INTRODUCTION

This catalog contains proof prints of 70-mm and 5-in. photographs taken during the Apollo 14 mission; uncontrolled mosaics of surface panoramas and continuous orbital photography are included.

In this catalog, the photographs have been sorted by magazine and by frame number. For example, in AS14-64-9046, AS14 indicates that the photograph is part of the Apollo 14 mission, 64 is the magazine number, and 9046 is the frame number. This numbering scheme is being used for all Apollo missions. In addition, the photographs have been placed so that north is at the top of each page.

This catalog is designed to be used in conjunction with the sections on 70-mm and 5-in. photography in Part II, the Apollo 14 photography indexes, of this Apollo 14 data package. The information in Part II makes it possible to locate the area covered by each frame.

NSSDC will provide reproduction support to individuals and organizations only when the data requested are needed for specific scientific research projects or for use in college-level science courses, in that order. The current policy in satisfying such requests is to furnish limited quantities of lunar reproductions without charge. Nominal charges will be imposed for larger orders. Individuals or organizations that wish to obtain Apollo 14 photographic reproductions for purposes other than use in research projects or college-level science courses should address their requests to:

Public Information Division
Code FP
National Aeronautics and Space Administration
Washington, D.C. 20546

Printed materials to satisfy general information requests are also available from this division. The section on Ordering Procedures in the Data Users' Note for Apollo 14 (Part I) provides more specific instructions on ordering Apollo photography.

The Data Center wishes to thank Mr. Andrew Patteson, Chief, Mapping Sciences Branch, Manned Spacecraft Center, for providing the original layout pages from which this catalog has been prepared. The work in preparing these pages represents the combined efforts of Mr. Robert Musgrove, Mapping Sciences Branch, and the personnel of Lockheed Electronics Company/Mapping Sciences Department.

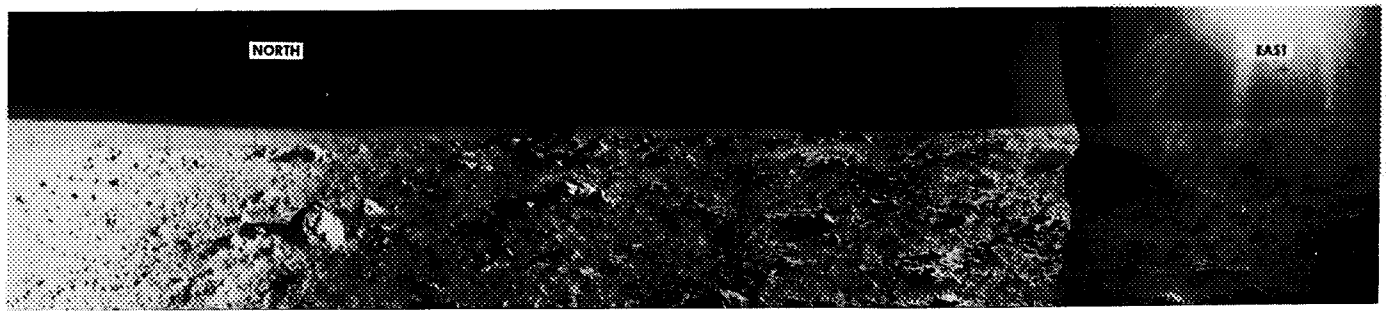
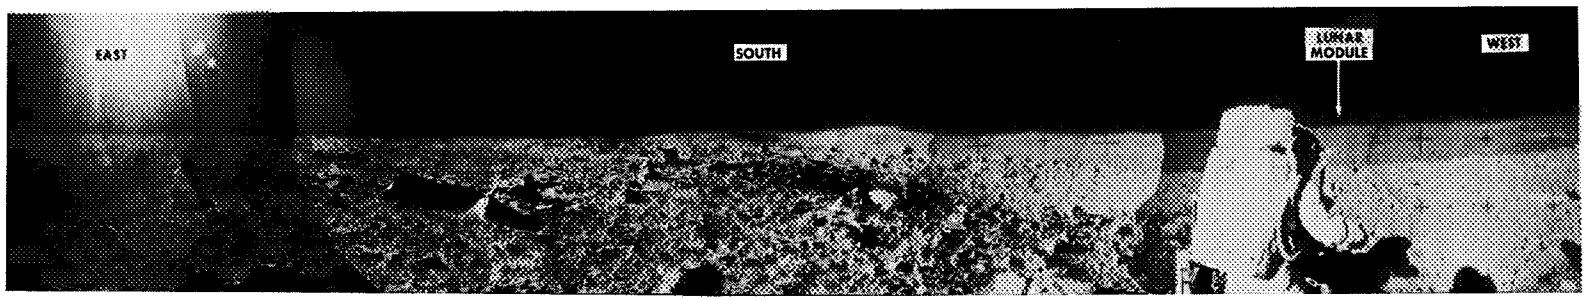
APOLLO 14
PANORAMAS

COMPILED FROM UNRECTIFIED PHOTOGRAPHS

Prepared by:
Mapping Sciences Branch EOD
NASA Manned Spacecraft Center
Houston, Texas



Panorama includes frames AS14-64-9100 through 9110

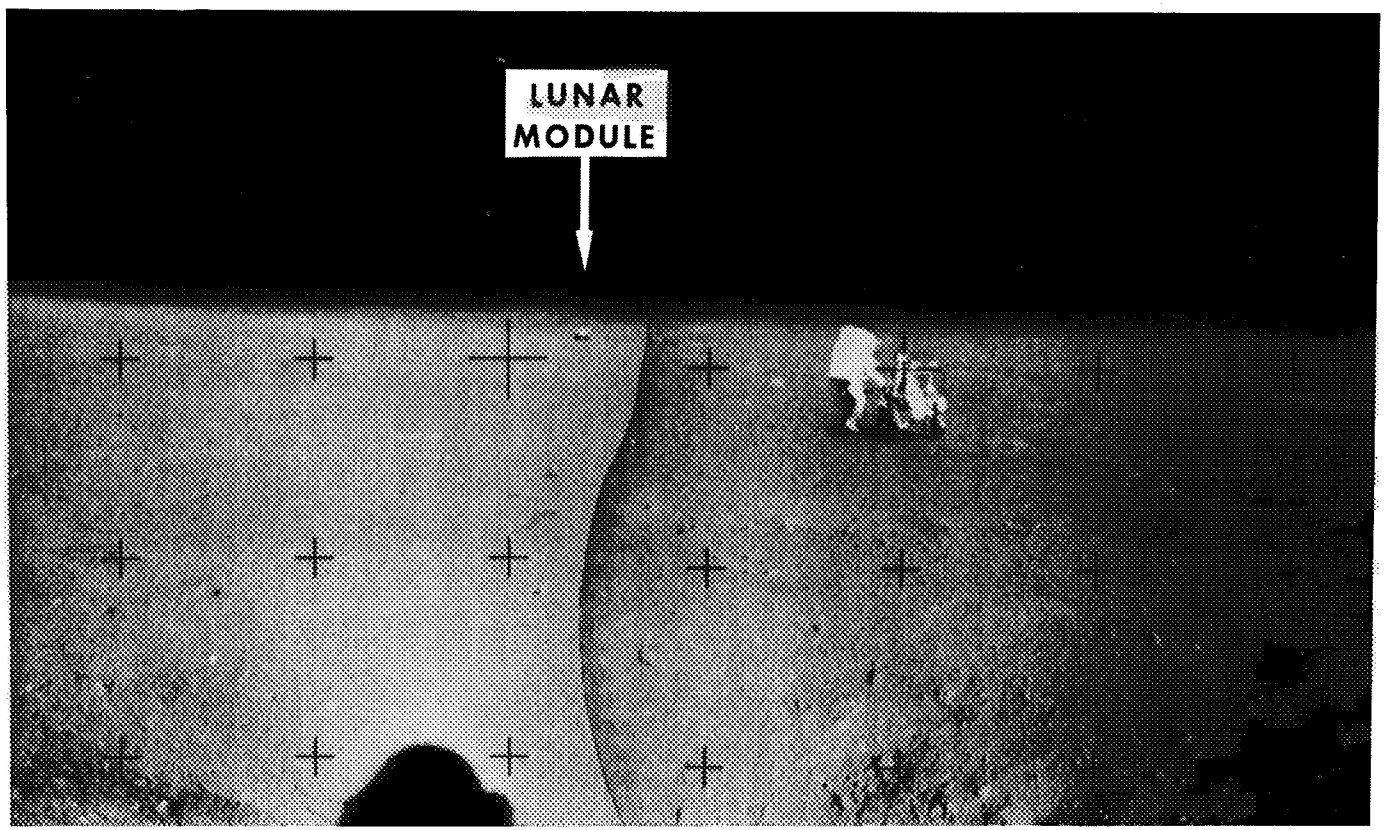


Panorama includes frames AS14-64-9111 through 9122

Panoramas 1 and 2 – Boulder field high on flank of Cone Crater at point of maximum distance from Lunar Module, EVA 2.

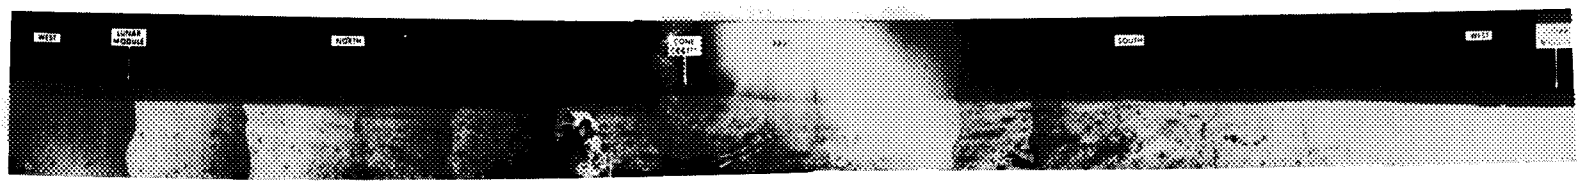
Panorama includes frames AS14-64-9132 through 9133

Panorama 3 – Cross-sun view of large fragment on flank of Cone Crater. Astronaut glove with sampling tongs and traverse map is visible in upper left corner.



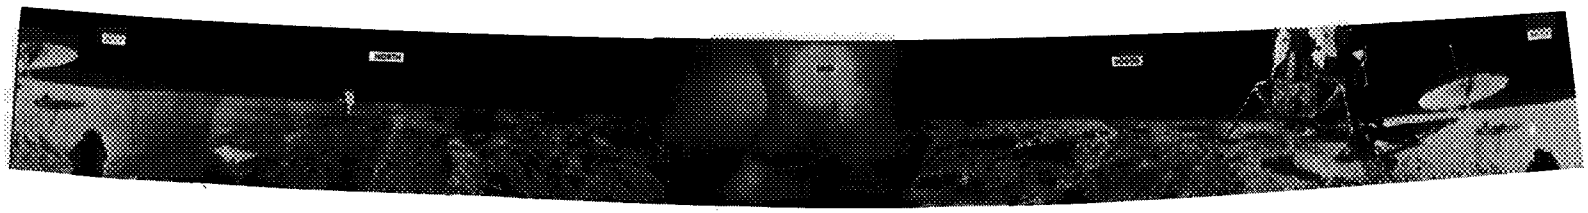
Panorama includes frames AS14-64-9139 through 9140

Panorama 4 – Astronaut Mitchell working at the M.E.T. on flat terrain near the Crater Weird, EVA 2.

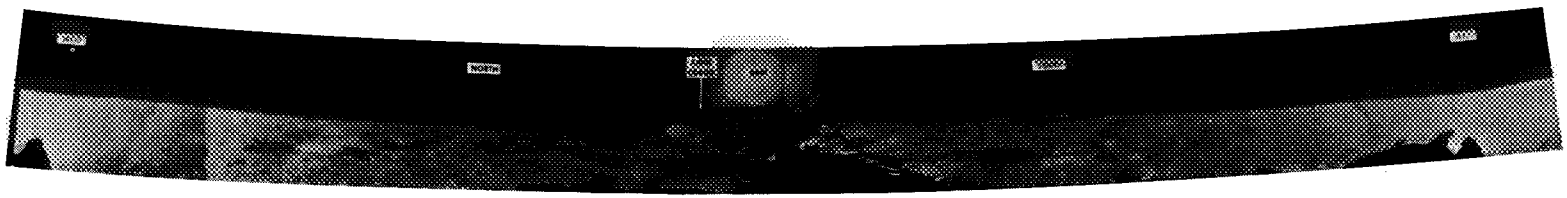


Panorama includes frames AS14-64-9167 through 9187

Panorama 5 – Photographed from a point northeast of the crater group called Triplet near the end of EVA 2.

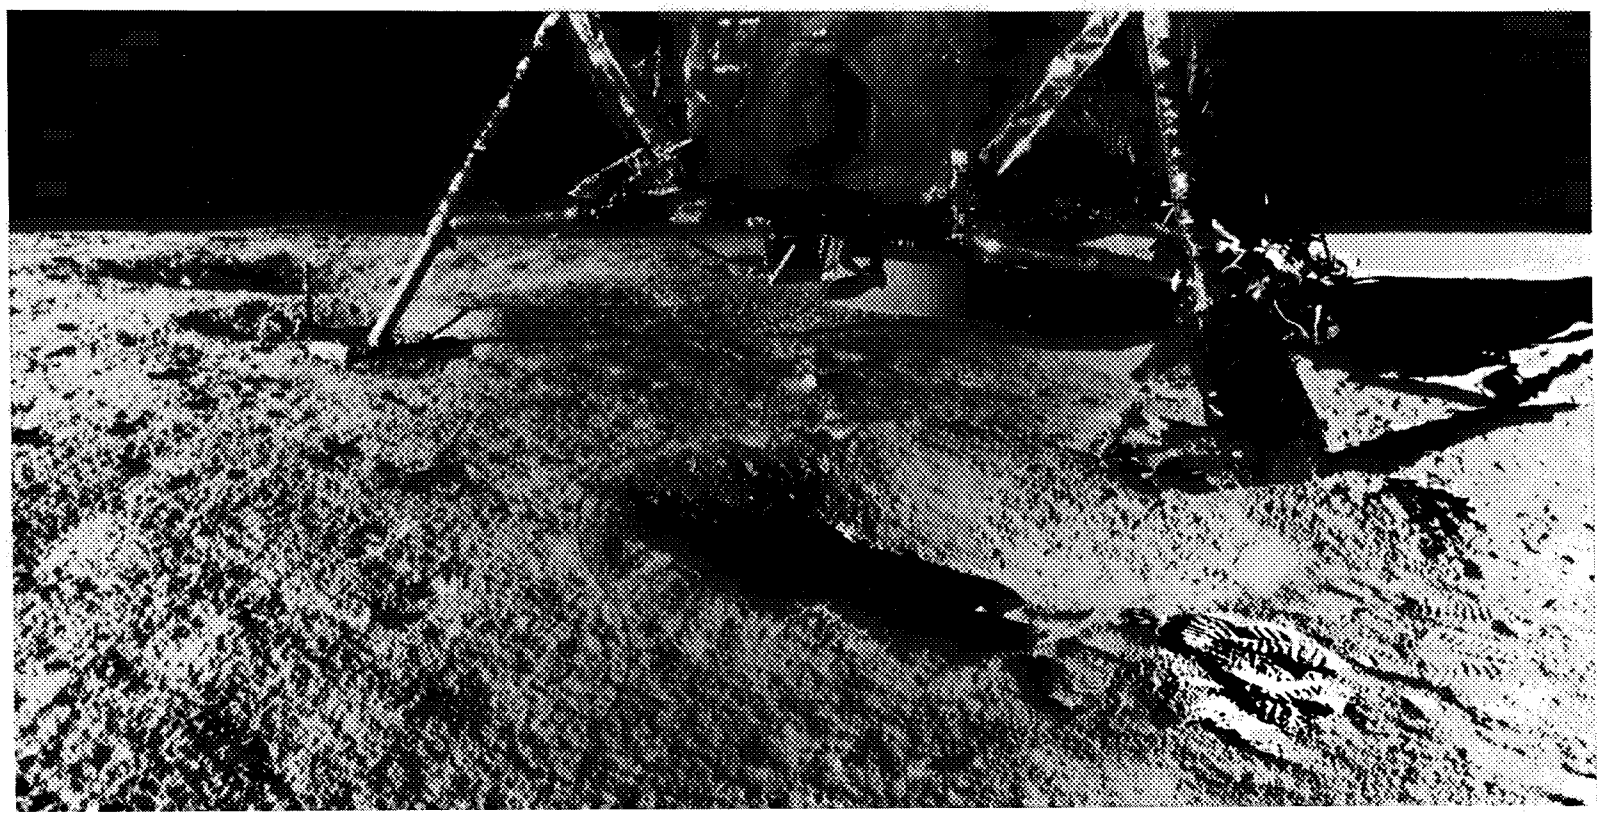


Panorama includes frames AS14-64-9236 through 9257



Panorama includes frames AS14-64-9294 through 9316

Panoramas 6 and 7 – Lunar Module and vicinity, EVA 1.
(Photographic prints of these panoramas are in color.)



Panorama includes frames AS14-64-9260 through 9262

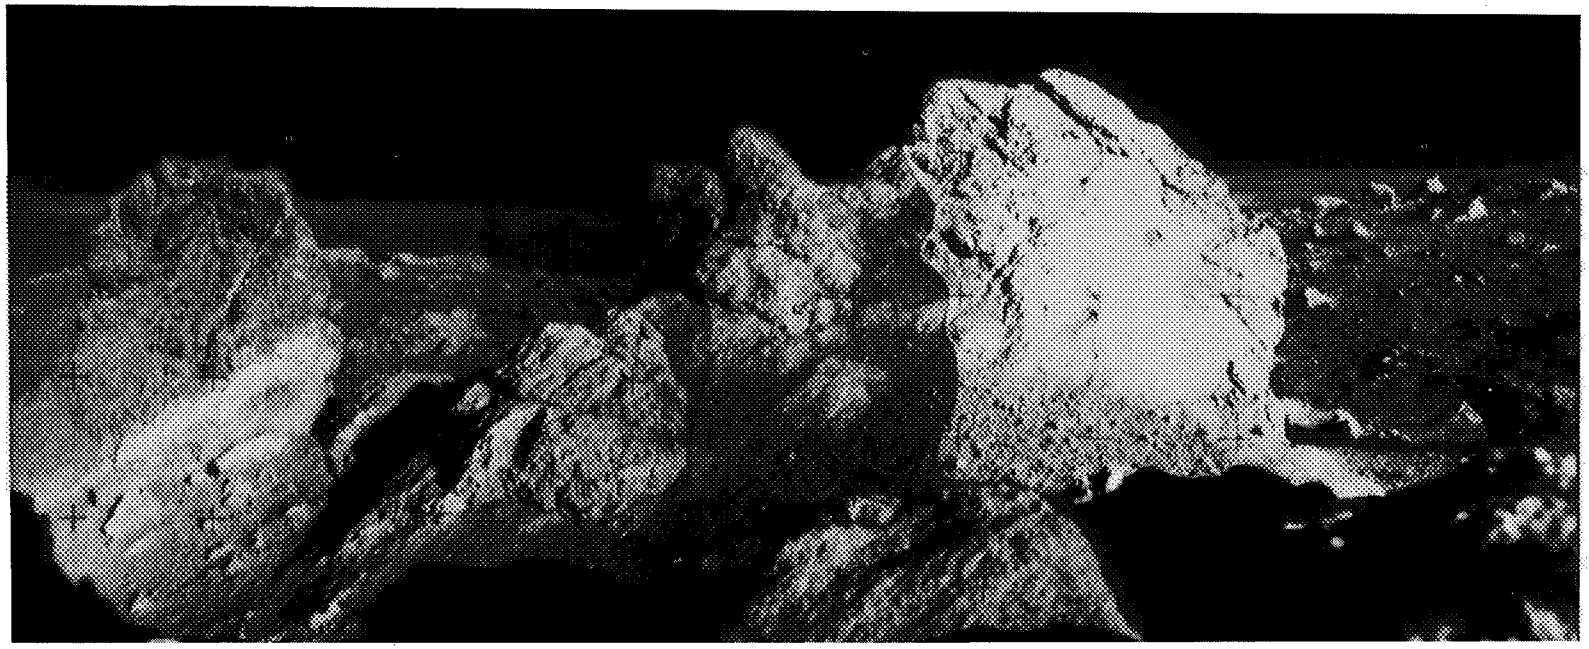
Panorama 8 – Lunar surface at the Fra Mauro site showing deformation of crater wall produced by the footpad.
(Photographic print of this panorama is in color.)

Panorama includes frames AS14-64-9421 through 9429

Panorama 9 – Flank of Cone Crater.

Panorama includes frames AS14-64-9430 through 9442

Panorama 10 – Flank of Cone Crater, EVA 2.



Panorama includes frames AS14-64-9449 through 9451

Panorama 11 – Large blocks in boulder field high on the flank of Cone Crater.
