5	PAYLOAD REQUESTS	5.1-5.11
6	PAYLOAD/ACRONYM LIST	6.1-6.45

SECTION 1

MIXED FLEET MANIFEST NOTES AND SUMMARY

MIXED FLEET MANIFEST NOTES

- THIS MANIFEST SERVES AS THE BASELINE FOR PLANNING PURPOSES. IT INCLUDES PAYLOAD FLIGHT ASSIGNMENTS FOR THE SPACE SHUTTLE THROUGH CALENDAR YEAR 1998 AND NASA EXPENDABLE LAUNCH VEHICLE (ELV) MISSIONS THROUGH CY 2002.

  NOTE: THE CY 99-02 SHUTTLE MANIFEST PLANNING IS OMITTED PENDING RESOLUTION OF THE REQUIRED SPACE STATION ASSEMBLY SEQUENCE LAUNCH DATES.

- SPACE SHUTTLE LAUNCH DATES ARE SHOWN BY MONTH AND REPRESENT REASONABLE EXPECTATION AS TO WHEN THE LAUNCH WILL OCCUR; HOWEVER IN MOST CASES, NASA'S INTERNAL PLANNING WILL BE AGAINST EARLIER LAUNCH DATE TARGETS.

- PRIMARY AND COMPLEX SECONDARY SPACE SHUTTLE PAYLOAD FLIGHT ASSIGNMENTS ARE BASELINED IN SPACE SHUTTLE PROGRAM CONTROL DOCUMENTATION APPROXIMATELY 17 MONTHS PRIOR TO LAUNCH. OTHER SECONDARY PAYLOAD ASSIGNMENTS ARE NORMALLY BASELINED 8 TO 12 MONTHS PRIOR TO LAUNCH. NOTE: ONCE BASELINED, THE FLIGHT NUMBERS ARE MAINTAINED WITH THE PRIMARY PAYLOAD; THESE BASELINED FLIGHTS MAY NOT REMAIN IN NUMERICAL ORDER WITH SUBSEQUENT MANIFEST CHANGES.

- FOR FURTHER SHUTTLE OR ELV INFORMATION PLEASE CONTACT:

SPACE OPERATIONS UTILIZATION DIVISION

*Retrieved by Space Shuttle Endeavour in May 1992 and successfully boosted into geosynchronous orbit.

SECTION 5

PAYLOAD REQUESTS

NOTES:

1. INCLUDES PRIMARY, COMPLEX SECONDARY, AND MANIFESTED NON-COMPLEX SECONDARY PAYLOADS.

2. REQUEST DATE: LAUNCH DATE REQUESTED BY THE PAYLOAD ORGANIZATION

3. FLIGHT DATE : LAUNCH DATE SHOWN IN THE MANIFEST.
   IF NOT MANIFESTED, NO DATE IS GIVEN.

4. SPACE STATION FLIGHTS ARE UNDER REVIEW PENDING RESOLUTION OF THE REQUIRED ASSEMBLY SEQUENCE LAUNCH DATES.

5. CARRIERS DESIGNATED AS SPACEHAB LOCKERS ARE FOR NON-SPACEHAB DEDICATED MIDDECK PAYLOADS MANIFESTED IN THE SPACEHAB MODULE.

SECTION 6

PAYLOAD/ACRONYM LIST

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
ACE	Advanced Composition Explorer	Charged particle detector for study of isotopic and elemental composition of energetic particles in interplanetary science.
ACES	Acoustic Containerless Experiment System	Technical demonstration to obtain early microgravity tests of gas transport phenomena in a 3-axis levitation furnace.
ACTS	Advanced Communications Technology Satellite	Flight verification of high risk communications technology to support future satellite communications systems.
ADSF	Automatic Directional Solidification Furnace	Technology demonstration of directional solidification of magnetic materials, immiscibles, and IR detection materials.
AFE	American Flight Echocardiograph	Collects quantitative in-flight data on cardiovascular changes in the crew.
AFITV	Air Force Instrumented Test Vehicle	Anti-satellite target vehicle.
AFP-675	Air Force Program-675	Collects infrared data to support Strategic Defense Initiative program. Formerly, Cryogenic Infrared Radiance Instrument for Shuttle (CIRRIS).
AIM	Astrometric Interferometry Mission	Mission to perform high resolution astrometric interferometry.
ALT	Altitude	Orbit altitude in nautical miles.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
AM	Auxiliary Module	Provides consumables resupply, payload changeout and additional on-orbit volume for the ISF Facility Module (FM).
AMOS	Air Force Maui Optical Station	Technology development/geophysical environment study. Calibrate AMOS ground-based electro-optical sensors and study on-orbit plume phenomenology using the Shuttle as a test object.
APCF	Advanced Protein Crystalization Facility	Facility used to gain scientific knowledge about dynamics of protein crystal growth in reduced gravity.
APCG	Advanced Protein Crystal Growth	Enhances scientific knowledge about dynamics of protein crystal growth in reduced gravity.
APE	Aurora Photography Experiment	Enhance understanding of the geographic extent and dynamics of the aurora.
APM	Ascent Particle Monitor	Collects particulate materials from the Orbiter during ascent, using an automated mechanical/electrical assembly.
ARABSAT	Arab Satellite	Communications satellite of the Arab Satellite Communications Organization.
ARC	Aggregation of Red Cells	Studies aggregation of red cells and blood viscosity under low-g conditions.
ASC	American Satellite Company	Satellite to provide commercial communication service to continental United States, Hawaii, Alaska, and Puerto Rico.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
ASEM	Assembly of Station by Extravehicular Activity Methods	Supports international space station development by demonstrating strut handling and EVA translation techniques.
ASP	Attitude Sensor Package	Foreign reimbursable Hitchhiker-G payload.
ASTRO	Astronomy	Program designed to obtain ultraviolet (UV) data on astronomical objects using a UV telescope flying on SPACELAB.
ASTRO-SPAS	Astronomy Platform-Shuttle Pallet Satellite	A shuttle deployable astronomy platform developed by the German Space Agency.
ATLAS	Atmospheric Laboratory for Applications and Science	Series of Spacelab flights that measure long term variability in the total energy radiated by the sun and determines the variability in the solar spectrum.
ATLAS I/II AS		Commercial and DOD intermediate class expendable launch vehicles.
AUSSAT	Australian Communication Satellite	Direct broadcast communication satellite which provides services to continental Australia and offshore territories.
AXAF-I	Advanced X-Ray Astrophysics Facility-Imager	Astrophysics mission to perform high-quality X-ray imaging over an extended lifetime.
B/U		Back-up

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
BBXRT	Broad Band X-Ray Telescope	Provides high resolution x-ray spectra for both point and extended sources, including stellar coronae, x-ray, binaries, active agalactic nuclei, and clusters of galaxies.
BDS	Bioreactor Demonstration System	Determines the threshold mass for the transfer/diffusion of glucose and oxygen into a static cell in the microgravity environment.
BIMDA	Bioprocessing With the Materials Dispersion Apparatus	A wide range of tests focused on the assembly of macromolecules. Uses a middeck thermal enclosure system (TES) unit.
BLAST	Battlefield Laser Acquisition Sensor Test	Evaluates the concept of utilization of a spaceborne laser receiver to detect laser energy from specific ground-based test locations.
BREMSAT	Bremen Satellite	University of Bremen's satellite ejected from a GAS canister.
BRIC	Biological Research In Canisters	Investigates the effects of microgravity on life science specimens utilizing the KSC Plant Canister and gaseous nitrogen freezer.
BS-3H	Broadcast Satellite	Japanese geosynchronous direct-broadcast satellite.
BSB	British Satellite Broadcasting	British commercial direct broadcast satellite.
C360	Cinema 360	35mm motion picture camera for the purpose of photographing crew and mission activities.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
CANEX	Canadian Experiments	Group of Canadian experiments conducted aboard STS-13 (41-G) by a Canadian Payload Specialist.
CANEX-2	Canadian Experiments-2	Tests the Canadian developed Space Vision System Experiment Development Tests (VISET) using an RMS deployed target (CTA), experiments in material exposure, spacecraft glow, phase partitioning, metal diffusion and space adaptation tests.
CAP	Complex Autonomous Payload	Program to allow use of GAS hardware for payloads requiring more costly Shuttle service.
CAPL	Capillary Pump Loop Experiment	Hitchhiker experiment to quantify behavior of a full-scale capillary pumped loop heat transfer system in microgravity.
CAPL/GBA	Capillary Pump Loop Experiment/GAS Bridge Assembly	Experiment to quantify behavior of a full-scale capillary pumped loop heat transfer system in microgravity flying on the Gas Bridge.
CASSINI		A spacecraft planned to conduct a four year detailed exploration of the Saturnian System and an ESA probe planned to penetrate and study the thick atmosphere of the moon Titan.
CBDE	Carbonated Beverage Dispenser Evaluation	Pepsico, Inc. experiment to evaluate packaging and dispensing techniques for space flight consumption of carbonated beverages.
CCAFS	Cape Canaveral Air Force Station	U.S. Air Force launch range on central Florida coast.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
CDR	Commander	Member of the Shuttle flight crew in command of the flight.
CENTAUR		Upper stage system for Atlas and Titan ELVs.
CETA	Crew and Equipment Translation Aid	Experiment that evaluates the design concept and operational procedures of 3 prototype cart designs that are part of an effort to develop a transportation device for use on the exterior of the international space station.
CFES	Continuous Flow Electrophoresis System	Demonstrates the technology of pharmaceutical processing in space.
CGBA	Commercial Generic Bioprocessing Apparatus	Develop advanced systems for, and investigations in, bioprocessing of materials.
CGP	Cryo Systems Experiment GLO-II Payload	Cryogenic system for cooling focal plane optics for space-based scientific instruments. GLO-II provides observations of earth's thermosphere, ionosphere, and mesosphere energetics and dynamics and shuttle surface glow.
CHAMP	Comet Halley Active Monitoring Program	Observation of Comet Halley on shuttle flights.
CHROMEX	Chromosomes and Plant Cell Division in Space Experiment	Investigation of the effects of space flight on plant tissue growth.
CLOUDS	Cloud Logic to Optimize Use of Defense Systems	Hand-held 35 mm photography for observations of cloud formation, dissipation, and opaqueness.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
CMIX	Commercial Middeck Instrumentation Technology Associates (ITA) Experiment	Private sector funded and developed payload consisting of multiple materials dispersion apparatus mini-lab devices, plus a self-contained power supply/controller. Uses a middeck thermal enclosure system (TES) unit.
CNCR	Characterization of Neurospora Circadian Rhythms in Space	Microgravity effects on circadian rhythms of neurospora.
CONCAP-II	Consortium for Materials Development in Space (Complex Autonomous Payload)-II	Investigation of materials surface reactions to exposure to atomic oxygen flow in earth orbit for high temperature super conducting films and for materials degradation/reaction samples.
CONCAP-III	Consortium for Materials Development in Space (Complex Autonomous Payload)-III	Determine the influence of change in acceleration environment while performing materials processing.
CONCAP-IV	Consortium for Materials Development in Space (Complex Autonomous Payload)-IV	Several non-linear organic optical materials (crystals & films) grown by the vapor transport growth method.
CPCG	Commercial Protein Crystal Growth	The production of large, high-quality protein crystals for analysis of molecular structures via x-ray diffraction and computer modeling.
CREAM	Cosmic Radiation Effects and Activation Monitor	Uses an active cosmic ray monitor and seven passive packages to record on-orbit cosmic ray environments.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
CRISTA-SPAS	Cryogenic Infrared Spectrometer Telescope for Atmosphere	A U.S./German joint aeronomy payload to explore the variability of the atmosphere and to provide measurements that will complement those provided by UARS.
CRRES	Combined Release & Radiation Effects Satellite	Joint NASA/USAF spacecraft to produce dynamic model of Van Allen radiation belts.
CRW	Crew	The Shuttle flight crew for a particular mission.
CVTE	Crystals By Vapor Transport Experiment	Investigate application of chemical vapor transport crystal growth process to materials of practical value in semiconductor and electro-optical device.
CVX	Critical Viscosity of Xenon	Measure the viscosity of xenon while approaching the liquid-vapor critical point. In order to approach the critical point, the sample density will be kept constant while the temperature is varied with a high degree of resolution.
DEE	Dexterous End Effector	DemonstratioN of a sensor for the Shuttle RMS which will allow for more precise control.
DELTA II		Medium class expendable launch vehicle.
DFI	Development Flight Instrument	Special instrumentation generally available on orbiter vehicle 102 (Columbia).
DFI PAL	Development Flight Instrumentation Pallet	A pallet used to accommodate the DFI used on the first four Shuttle flights.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
DISCOVERY		Series of inexpensive planetary flight opportunities, starting with a first flight in 1998.
DM	Docking Module	Hardware that will provide pressurized Shuttle access to the Russian MIR space station.
DMOS	Diffusive Mixing of Organic Solutions	Grow crystals of organic compounds for research programs for the 3M Corporation's Science Research Laboratory.
DOD	Department of Defense	
DSCS	Defense Satellite Communications System	Series of U.S. Air Force communications satellites.
DSP	Defense Support Program	Geosynchronous DOD satellite.
DUR	Duration	The number of days for a Shuttle flight.
DXS	Diffuse X-ray Spectrometer	Shuttle experiment to conduct spectral observations of the diffuse galactic soft x-ray background to determine the ionic, elemental abundances and the plasma temperature of the hot phase of the interstellar medium. Flown on a Hitchhiker.
EARTH PROBES		Series of missions to provide critical data for earth science investigations.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
EASE/ACCESS	Experimental Assembly of Structures in EVA/Assembly Concept for Construction of Erectable Space Structures	Investigation of human factors data during assembly of structures in space during Extra Vehicular Activity.
EDFT	EVA Demonstration Flight Test	Development of EVA technique for Space Station assembly.
EDO	Extended Duration Orbiter	Kit added to Orbiter to extend energy resources to support mission durations up to sixteen days.
EEVT	Electrophoresis Equipment Verification Test	Technology demonstration of apparatus to evaluate the effects of electrophoresis on biological cells in zero-g.
ELRAD	Earth-Limb Radiance Equipment	Obtain measurements of earth-limb radiance for various positions of the sun from near limb up to 9 degrees below earth horizon.
ELV	Expendable Launch Vehicle	Unmanned rocket used to deploy spacecraft into Earth's orbit and beyond.
EOIM	Evaluation of Oxygen Interaction with Materials	Examines effects of atomic oxygen degradation on and determines reaction rates of varoius materials.
EOS	Earth Observing System	A complement of polar orbiting satellites conducting Earth science observations.
EOS-ALT	EOS Altimeter	Earth Observing System payload to observe ocean circulation and global ice sheet mass balance. Mission consists of laser spacecraft and radar spacecraft.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
EOS-AM	EOS A.M. (Morning)	Earth Observing System payload to observe clouds, aerosols, radiative balance, and characterization of terrestrial surface.
EOS-CHEM	EOS Chemistry	Earth Observing System payloads to observe atmospheric chemical species and their transformations, and ocean surface stress.
EOS-PM	EOS P.M. (Afternoon)	Earth Observing System payloads to observe clouds and precipitation, terrestrial snow and sea ice, and sea surface temperature and ocean productivity.
EPR	Explorer Platform Retrieval	Retrieve Explorer Platform spacecraft and return safely to earth
ERBS	Earth Radiation Budget Satellite	Collects global earth radiation budget data.
ESA	European Space Agency	Provide for and promote cooperation among European States in space research, technology and applications.
ESCAPE-II	Experiment of the Sun for Complementing the Atmospheric Laboratory for Applications and Science (ATLAS) Payload and for Education-II	To collect solar data with the solar imaging and UV solar irradiance experiments. The data will be correlative with the co-manifested ATLAS-3 solar experiments for the understanding of the upper atmosphere photochemistry.
EURECA	European Retrievable Carrier	Platform placed in orbit for six months offering conventional services to experimenters.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
EUTELSAT	European Telecommunications Satellite	European commercial communications satellite.
EUVE	Extreme Ultraviolet Explorer	Produces definitive sky map and catalog of extreme ultra violet portion of electomagnetic spectrum (100-1000 angstroms).
FARE	Fluid Acquisition and Resupply Experiment	Obtains data to evaluate fluid dynamics associated with capillary liquid acquisition devices.
FAST	Fast Auroral Snapshot Explorer	Spacecraft to investigate the processes operating within the auroral region.
FDE	Fluid Dynamics Experiment	A package of six experiments flown in the middeck that involve simulating the behavior of liquid propellants in low gravity.
FEA	Fluids Experiment Assembly	Investigate floating zone crystal growth processing investigations on selected semi-conductor materials.
FEE	French Echocardiograph Equipment	Obtains on-orbit cardiovascular system data.
FEL	First Element Launch	Initial launch of components for the international space station.
FLT	Flight	The flight sequence number for Shuttle missions.
FLTSATCOM	Fleet Communication Satellite	U.S. Navy communications satellite.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
FLUIDS-GBA	Fluids Generic Bioprocessing Apparatus	Automated fluid/gas mixing and dispensing device that will be used to monitor fluid intake in crew members and to pioneer needed controlled environmental life support system fluids management technologies.
FM	Facility Module	A man-tended module in support of ISF providing space for middeck locker inserts and common racks for payload accommodations.
FPE	French Postural Experiment	Studies sensory-motor adaptations in weightlessness.
FSS	Flight Support System	Support system of cradles and avionics used for satellite servicing.
FUSE	Far Ultraviolet Spectroscopy Explorer	Astronomy Ultraviolet Satellite
GALAXY		Hughes communications satellite.
GALILEO		Investigates the chemical composition and physical state of Jupiter's atmosphere and satellites.
GAS	Get Away Special	Alternate name for the Small Self-contained Payload (SSCP) program, providing standard canisters to accommodate low-cost space experimentation.
GAS BRIDGE	Get Away Special Bridge	Structure in the payload bay that can hold up to twelve GAS canisters.
GAS CAN	GAS Canister	Structure which can carry small payloads.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
GAS TEST		Test instrumentation to verify ability of the GAS hardware to function properly in flight.
GBA(xx)	GAS Bridge Assembly(xx)	(xx) denotes number of payloads on the GAS Bridge Assembly.
GCP	GLO/CRYOHP Payload	DOD Hitchhiker payload. The GLO portion of the Hitchhiker experiment is to measure optical emissions on the surface of the shuttle. The CRYOHP portion of the payload uses liquid oxygen as the heat pipe working fluid.
GEOTAIL		NASA-Japan cooperative mission to explore Geotail of the Earth Plasma Physics.
GHCD	Growth Hormone Concentration & Distribution in Plants	Microgravity effects on growth hormone distribution of various plant life.
GLOMR	Global Low Orbit Message Relay	Packet data relay satellite.
GOES	Geostationary Operational Environmental Satellite	NOAA weather satellites.
GOSAMR	Gelation of Sols: Applied Microgravity Research	Investigate gelation of multicomponent colloidal solutions and suspensions (SOL).
GP-B	Gravity Probe-B	Scientific probe to test Einstein's Theory of Relativity.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
GPP	GLOW/PASDE Payload	Glow experiment/photogrammetric appendage structural dynamics experiment payload.
GRO	Gamma Ray Observatory	Investigates extraterrestrial gamma-ray sources.
GSFC	Goddard Space Flight Center	NASA center in Greenbelt, Maryland.
GSO	Geosynchronous Orbit	Earth orbit that has a period equal to 24 hours.
GTO	Geosynchronous Transfer Orbit	
HCMM	Heat Capacity Mapping Mission	Produces thermal maps for discrimination of rock types, mineral resources, plant temperatures, soil moisture, snow fields, and water runoff.
HE	High Eccentricity Orbit	
HEEO	Highly Eliptical Earth Orbit	
HELIO	Heliocentric	
HERCULES	Hand-held, Earth-oriented, Real-time, Cooperative, User-friendly, Location, Targeting and Environmental System	This experiment upgrades/expands the Latitude/Longitude Locator (L3) experiment using a charge coupled device with inertial reference gyros. The objective is to locate earth surface sites within 1 nautical mile.
HESI	High Energy Solar Imager	Mission to study neutral radiation consisting of hard x-rays, gamma rays, and neutrons.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
HETE	High Energy Transient Experiment	Spacecraft to study gamma ray burst sources and source locations, and x-ray burst sources and source locations.
HH-G	Hitchhiker-G	Shuttle cargo bay sidewall mounted carrier for small experiments.
HH-G1	Hitchhiker-G1	Demonstration flight of Hitchhiker-G hardware.
HH-M	Hitchhiker-M	Shuttle cargo bay across-bay carrier for small experiments.
HILAT	High Latitude	Evaluate propagation effects of disturbed plasmas on radar and communications systems.
HME	Handheld Microgravity Experiment	Provides for middeck experiments of limited scope in order to allow for low-cost, timely testing of concepts or procedures, or the early acquisition of data.
HPCG	Handheld Protein Crystal Growth	Develops techniques to produce, in the microgravity environment, protein crystals of sufficient size and quality to permit molecular analysis by diffraction techniques.
HPP	Heat Pipe Performance & Working Fluid Behavior in Micro-gravity	Environment experiment to study the microgravity effects of working fluids used in heat pipes.
HPTE	High Precision Tracking Experiment	Demonstrates ability to propagate a low power laser beam through the atmosphere.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
HRSGS	High Resolution Shuttle Glow Spectroscopy	Obtains high resolution spectra, in the visible and near visible wavelength range, of the Shuttle surface glow as observed on the vertical tail of the Orbiter in LEO.
HS-376 RETV-P	HS-376 Retrieval-PALAPA	Salvage of HS-376 (PALAPA) communication satellite launched on the tenth Shuttle mission.
HS-376 RETV-W	HS-376 Retrieval-WESTAR	Salvage of HS-376 (WESTAR) communication satellite launched on the tenth Shuttle mission.
HST	Hubble Space Telescope	Observes the universe to gain information about its origin, evolution and disposition of stars, galaxies, etc.
HST SM	Hubble Space Telescope Servicing Mission	Servicing mission to the Hubble Space Telescope to replace science instruments or other orbital replacement units (ORU's).
IBSE	Initial Blood Storage Experiment	Evaluates changes in blood tissue during various storage conditions.
IBSS	Infrared Background Signature Survey	Obtains infrared measurements on rocket plumes, shortwave infrared Earth-limb, Shuttle environment, and chemical release from the payload bay while detached in proximity to the Orbiter.
ICBC	IMAX Cargo Bay Camera	

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
IECM	Induced Environment Contamination Monitor	A package of ten instruments designed to fly in the Orbiter payload bay on a special pallet to check for contamination in and around the Orbiter. It also has the capability to be operated on the end of the RMS outside of the payload bay.
IEF	Isoelectric Focussing Experiment	Gathers experimental data on the extent of electroosmosis in space.
IEH	International Extreme-UV Far-UV Hitchhiker	Hitchhiker experiment to study ultraviolet emissions of Jupiter system and stellar sources.
IG	Igloo	Structure which provides a pressurized and thermally controlled environment for Spacelab pallet subsystems.
IMAX	IMAX Systems Corp., Toronto, Ontario, Canada	A large screen motion picture format used by the NASA/Smithsonian project to document significant space activities.
IML	International Microgravity Laboratory	Series of microgravity missions devoted to material and life sciences studies using the Spacelab Long Module.
INCL	Inclination	Orbit inclination in degrees.
INMARSAT	International Maritime Satellite	Commercial satellite series providing global maritime and aviation communications.
INSAT	Indian Satellite	Communication and meteorological satellite for the government of India.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
INTELSAT-VI-R	INTELSAT-VI-Reboost	The retrieval, repair and deployment of a communications satellite for the International Telecommunication Satellite organization.
IOCM	Interim Operational Contamination Monitor	Measures molecular and particulate contamination in the cargo bay from prelaunch to post-landing.
IPMP	Investigation into Polymer Membranes Processing	Investigates low-g environment effects on industrial processing techniques for developing polymer membranes.
IR-IE	Infrared Imaging Equipment	Infrared video camera used to measure temperature gradients on the Orbiter surface.
IRAS	Infrared Astronomical Satellite	All sky survey for objects that emit infrared radiation.
IRCFE	Infrared Communications Flight Experiment	Demonstrates the feasibility of using diffuse infrared light as a carrier for Shuttle crew communications.
IRIS	Italian Research Interim Stage	Italian upper stage for use on the Shuttle.
IRT	Integrated Rendezvous Radar Target	A target for testing of Shuttle Orbiter rendezvous techniques and capabilities in orbit.
ISAC	INTELSAT Solar Array Coupons	Studies atomic oxygen effects on materials (silver and zinc sulphite).
ISAIAH	Israeli Space Agency Investigation About Hornets	Gravity perceptions by hornets and their reactions to changes in gravity.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
ISAL	Investigation of STS Atmospheric Luminosities	Determination of the spectral content of luminosity near Shuttle surfaces, to assess influence on optical experiments.
ISAS	Institute of Space and Astronautical Science	The Institute of Space and Astronautical Science, under the auspices of Japan's Ministry of Education, is responsible for promoting space science and technology, coordinating space-science research in Japan, and advancing education of space in Japan.
ISF	Industrial Space Facility	Commercially-owned, man-tended orbiting facility for research and manufacturing activities.
IUS	Inertial Upper Stage	Upper stage system for Shuttle and Titan.
JCSAT	Japan Communications Satellite	Japanese geosynchronous commercial communications satellite.
JEM	Japanese Experiment Module	The Japanese-provided laboratory module that is part of the international space station configuration.
JFD	JEM Flight Demonstration	Demonstrates on-orbit capability of JEM Manipulator system with its dextrous Small Fine Arm in replacing Orbital Replacement Units on JEM Exposed Facility.
JSC	Johnson Space Center	NASA center in Houston, Texas.
KSC	Kennedy Space Center	NASA center in Cape Canaveral, Florida.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
L1	First Earth-Sun Libration Point	Indication of a halo-type orbit around L1.
L3	Latitude/Longitude Locator	Tests the capability of a space sextant/camera system to locate earth surface targets within 10 nautical miles.
LACIE	Laser Altimeter Camera Irim Experiment	A grouping of the following instruments on a gas bridge. Shuttle Laser Altimeter(SLA), Camera Package Canister(CPC) and the Infra Red Imaging(IRIM) instrument. Additional GAS payloads are added as payloads of opportunity.
LANDSAT-07		Remote sensing satellite.
LDCE	Limited Duration Space Environment Candidate Materials Exposure	Evaluation of candidate space structure composite materials for degradation due to exposure in LEO (passive systems).
LDEF	Long Duration Exposure Facility	Free-flying satellite providing accommodations for experiments requiring long-term exposure to the space environment.
LEO	Low Earth Orbit	
LFC	Large Format Camera	Acquires synoptic, high-resolution images of the Earth's surface.
LITE	Lidar In-Space Technology Experiment systems	Project to measure the atmospheric parameters from a space platform utilizing laser sensors and to verify space-born Lidar systems.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
LM	Long Module	Spacelab habitable module that provides a safe shirt-sleeve environment in which science crew members can conduct their experiments.
LMS	Life and Microgravity Spacelab	Perform microgravity research through experiments in a stable low-gravity environment, emphasizing life sciences and microgravity sciences.
M88-1	Department of Defense M88-1	Evaluates the capability of man in space to enhance air, naval, and ground force operations and assesses the feasibility of observations of space debris while in orbit.
MACE	Middeck Active Control Experiment	Validation of controls/structures interaction technologies in zero gravity.
MACSAT	Multi-Access Communications Satellite	DOD battlefield tactical communications satellite.
MAGELLAN		Spacecraft designed to globally map the surface of Venus.
MAGSAT	Magnetic Field Satellite	Spacecraft to map the magnetic field of the Earth.
MAR	Middeck Accommodations Rack	An experiment integration facility installed in the middeck of the orbiter with stowage volume equivalent to five middeck lockers. Power distribution and active thermal control options are available.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
MARS (MSP)	Mars Surveyer Program	MSP program consists of a series of Orbiters and/or Landers to be launched at every mars opportunity roughly 25 months apart.
MARS PATHFINDER		Initial mission concept validation precursor for follow-on MARS Lander series.
MAST	Military Applications of Ship Tracks	Defines ship track characteristics with high resolution imagery to develop an understanding of the processes responsible for shiptrack formations, maintenance, and dissipation.
MBB	Messerschmitt-Boelkow-Blohm	A German industrial aerospace organization.
MD	Middeck	Lower deck of the orbiter crew compartment.
MGBX	Middeck Glovebox	Provides a general-purpose enclosed workspace to carry out small-scale microgravity science experiments in the Space Shuttle middeck.
MGS	Mars Global Surveyer	First Mars Orbiter in Mars Surveyer Program.
MI	Magnetosphere Imager	Mission to image the charged particle population of the Earth's magnetosphere.
MIDEX	Mid-Sized Explorer	Series of mid-sized explorer platforms.
MIR		Current Russian orbiting Space Station.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
MIS I	Drug Microencapsulation in Microgravity	Evaluates the effects of microgravity on methods used to encapsulate drugs within biodegradable polymers. Combines materials science with biomedical product development and results in the production of a pharmaceutical product in space.
MLE	Mesoscale Lightning Experiment	Records and observes the visual characteristics of large scale lightning as seen from space using on-board television cameras.
MLR	Monodisperse Latex Reactor	Produces monodisperse latex particles in the two to forty micron range.
MO	Mars Observer	Spacecraft to study the surface, climate, gravitational, and magnetic fields of the planet Mars.
MODE	Middeck O-Gravity Dynamics Experiment	Studies the dynamics of liquids and skewed space structures in the microgravity environment.
MODE-RFLT	Middeck O-Gravity Dynamics Experiment-Reflight	Reflight of the MODE payload
MORELOS		Mexican communication satellite system.
MPEC	Multi-Purpose Experiment Canister	An extended Hitchhiker-G. GAS canister capable of deploying an internally stowed payload.
MPESS	Mission Peculiar Equipment Support Structure	A cross-bay Shuttle payload carrier and support system for payloads weighing up to 3000 pounds.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
MPSE	Mexican Payload Specialist Experiment	Experiment performed by a Mexican payload specialist on the Shuttle flight which deployed the MORELOS satellite.
MS	Mission Specialist	A member of Shuttle flight crew primarily responsible for Orbiter subsystem and payload activities.
MSFC	Marshall Space Flight Center	NASA center in Huntsville, Alabama.
MSL	Microgravity Science Laboratory	A payload which remains attached to the Shuttle to perform materials processing experiments in low-g.
MSTI	Miniature Seeker Technology Integration	SDIO experimental payload -- part of program to develop advanced seeker/sensor technology.
MSX	Midcourse Space Experiments	Track and observe Space Shuttle vehicle and rocket motor plumes during RCS and OMS motor firings with MSX satellite sensors.
MTPE	Mission to Planet Earth NASA Office	Code Y
N/A	Not Applicable	
NASDA	National Space Development Agency of Japan	Advances space exploration and utilization and their practical applications on earth for the government of Japan.
NAVSTAR		USAF Global Positioning Satellite (GPS) system.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
NEAR	Near Earth Asteroid Rendezvous	Mission to rendezvous with an asteroid in near-Earth trajectory. First in planned MTPE "Discovery" series.
NEUROLAB	Space Life Sciences Laboratory	Investigates the effects of weightlessness exposure using both man and animal specimens.
NIH-C	National Institutes of Health-Cells	To understand the biological changes that occur in cultured cells when exposed to the reduced gravity environment of space flight.
NIH-R	National Institutes of Health-Rodents	To understand the physiological and anatomical changes that occur in mammals under weightless space flight conditions.
NM	New Millenium	Series of small, inexpensive spacecraft to test new technologies.
NOAA	National Oceanic and Atmospheric Administration	Conducts research and gathers data about the global oceans, atmosphere, space, and sun, and applies this knowledge to science and service that touch the lives of all Americans.
NOSL	Night/Day Optical Survey of Lightning	Optical survey of lightning.
NOVA		Advanced Navy Navigation Satellite.
NUSAT	Northern Utah Satellite	University developed packet communications satellite; first successful payload ejection from a GAS canister.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
OA	NASA Office of the Administrator	Code A
OARE	Orbital Acceleration Research Experiment	Keel-mounted accelerometer that characterizes the very low frequency acceleration environment of the orbiter payload bay during space flight.
OASIS	OEX Autonomous Supporting Instrumentation System	Collects environmental data in the Orbiter during dynamic shuttle flight phases.
OAST	Office of Aeronautics and Space Technology payload	Collection of experiments designed to enable or extend space flight technology.
OAST-FLYER	Office of Aeronautics and Space Technology-Flyer	Free flyer deployed from the Shuttle containing several space technology experiments.
OCTW	Optical Communication Thru the Shuttle Window Flight Demonstration	Demonstrates a system that allows the Shuttle crew to interface with payloads without depending on Orbiter communication systems.
ODERACS	Orbital Debris Radar Calibration Spheres Project	Releases radar dipoles into earth orbit for purposes of calibrating ground-based radar.
OEX	Orbiter Experiments	Series of engineering experiments on the Orbiter.
OIM	Oxygen Interaction with Materials	Tests which obtained quantitative rates of oxygen interaction with materials used on the Orbiter and advanced payloads.
OLMSA	NASA Office of Life and Microgravity Sciences and Applications	Code U

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
OMDP	Orbiter Maintenance Down Period	Program requirement to take an orbiter out of service for structural inspections and periodic maintenance based on number of flights and/or time elapsed. (approximately every 3 years)
ORFEUS-SPAS	Orbiting, Retrievable Far and Extreme Ultraviolet Spectrometer-Shuttle Pallet Satellite	A German developed payload to explore the distribution and character of radiation absorbing material in the solar system and to perform direct ultraviolet observations of the direct interstellar component.
ORS	Orbiter Refueling System	An experiment to demonstrate the ability of the shuttle to perform on-orbit satellite refueling.
ORSTED	ORSTED Scientific Microsatellite	Danish ELV secondary payload to conduct accurate global mapping of the Earth vector magnetic field.
OSAT	NASA Office of Space Access and Technology	Code X
OSC	NASA Office of Space Communications	Code O
OSF	NASA Office of Space Flight	Code M
OSL	Orbiting Solar Laboratory	Provides detailed data on the sun, to augment our studies of distant stars and cosmic processes.
OSS	NASA Office of Space Science	Code S

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
OSS-1	Office of Space Science-1	Single Pallet carrying eight experiments to demonstrate the use of the Shuttle for investigations in space plasma physics, solar physics, astronomy, etc. and to characterize the Orbiter and payload bay environment.
OSTA-1	Office of Space and Terrestial Applications-1	Shuttle attached payload using the Shuttle Imaging Radar (SIR-A) to obtain high resolution images of earth.
OSTA-2	Office of Space and Terrestial Applications-2	Microgravity experiments.
OSTA-3	Office of Space and Terrestial Applications -3	Acquire photographic and radar images of the Earth's surface.
PAL	Pallet	Spacelab Pallet structure.
PALAPA		Geosynchronous satellite communication system for the Republic of Indonesia.
PAM	Payload Assist Module	An upper stage system used on the Shuttle and the Delta ELV.
PARE	Physiological & Anatomical Rodent Experiment	Studies the physiological and anatomical changes that occur in mammals under weightless space flight conditions.
PCG	Protein Crystal Growth	Obtain high quality protein crystals to facilitate analysis of structures.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
PCG-STES	Protein Crystal Growth-Single Thermal Enclosure System	Investigate the mechanisms of protein crystal growth and retrieve high quality crystals grown during space flight using a single locker thermal enclosure system.
PCG-TES	Protein Crystal Growth-Thermal Enclosure System	Investigate the mechanisms of protein crystal growth and retrieve high quality crystals grown during space flight using a double locker thermal enclosure system.
PDRS/PFTA	Payload Deployment and Retrieval System/Payload Flight Test Article	Tests the performance of the RMS in handling a massive object by unberthing and reberthing a payload using the RMS.
PEGASUS		Small class air-launched expendable launch vehicle.
PFF	Pluto Fast Flyby	Small spacecraft to image and take environmental measurements of Pluto and its moon Charon in rapid fly-by.
PHCF	Pituitary Growth Hormone Cell Function	Microgravity induced effects on pituitary (active growth) hormones in various types of living cells.
PL OPPTY	Payload Opportunity	
PLAN	Planetary Trajectory	High Energy Trajectory to Outer Planets.
PLC	Payload Commander	A member of the Shuttle crew having overall crew responsibility for planning, integration, and on-orbit coordination of payload mission activities.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
PLT	Pilot	A member of the Shuttle crew whose primary responsibility is to pilot the Orbiter.
PM	Polymer Morphology	Determines effects of weightlessness on morphological formation of polymers as they undergo physical transition.
PMC	Permanently Manned Capability	Ability for a four person crew to occupy the international space station on a permanent basis with periodic crew rotation. Accomplished at the completion of SSA20-15A.
PMG	Plasma Motor Generator	ELV secondary payload experiment to verify ability of plasma sources to couple electric current along a wire.
POLAR		Polar auroral plasma physics spacecraft.
PPE	Phase Partitioning Experiment	Studies separation behavior of two phase system generated by the mixture in water of polyglucose and polyethylene glycol.
PS	Payload Specialist	A member of the Shuttle crew, who is not a NASA astronaut, but whose presence is required to perform specialized functions with respect to one or more payloads or other mission unique activities.
PSE	Physiological Systems Experiment	Examines effects of hormone therapy on changes in organic systems during spaceflight.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
PVTOS	Physical Vapor Transport of Organic Solids	Grows crystalline films on selected substrates of organic solids.
RADARSAT	Radar Satellite	Remote free flyer sensing satellite that will monitor land, sea and ice for five years over the poles (U.S./Canadian).
RADCAL	Radar Calibration Satellite	USAF STP satellite carring C-band transponders and precise position determination equipment for calibrating radars used for space and missile tracking.
REQ	Request	
RETV	Retrieval	
REX	Radiation Experiment	Researches effects of electron density irregularities on transionosphere radio signals.
RME	Radiation Monitoring Equipment	Measures gamma radiation levels in the Shuttle environment.
RMS	Remote Manipulator System	A Canadian developed, remotely controlled (from the Orbiter crew cabin) arm for deployment and/or retrieval of payloads from the Orbiter payload bay.
ROMPS	Robot Operated Materials Processing System	Investigates zero gravity anealing of semiconductor thin film and investigates robot handling of thin film samples.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
S/MM	Shuttle MIR Mission	Shuttle mission to the Russian Space Station MIR to support design and assembly of the international space station.
SAC-B/C	Satelite de Aplicaciones Cientificas-B/C	Argentine spacecraft carrying hard x-ray spectrometer to investigate solar flares and cosmic transient x-ray emissions.
SAGE	Strategic Aerosol and Gas Experiment	Map vertical profiles of the ozone, aerosol, and nitrogen Rayleigh molecular extinction around the globe.
SAM	Shuttle Activation Monitor	Collects gamma and x-ray data as a function of geomagnetic location from spacecraft materials.
SAMPEX	Solar, Anomalous, and Magnetospheric Particle Explorer	A spacecraft to study solar energetic particles, anomalous cosmic rays, galactic cosmic rays, and magnetospheric electrons.
SAMS	Space Acceleration Measurement System	Provides Orbiter acceleration measurements in support of microgravity experiments.
SAN MARCO		NASA-owned Scout launch platform in the Indian Ocean off the coast of Kenya.
SAREX	Shuttle Amateur Radio Experiment	Low cost space to ground voice and slow scan television experiment.
SAS	Space Adaptation Syndrome	Physiological changes which occur when adapting to microgravity.
SATCOM		RCA communications satellite.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
SBS	Satellite Business Systems	All digital domestic communication system servicing large industry, the government, etc.
SCISAT	Scientific Satellites	Small Canadian scientific satellites.
SCOUT		Small class expendable launch vehicle.
SDIO	Strategic Defense Initiative Organization	
SE	Student Experiment	Experiments sponsored by the Shuttle Student Involvement Program (SSIP).
SEDS	Small Expendable Deployer System	Experimental tether deployment device.
SEDSAT	Students for the Exploration and Development of Space Satellite	An amatuer radio receiver/transmitter communications satellite built by student engineers at the University of Alabama in Huntsville. Upward deployment using a 40km length tether called SEDS.
SFP	Space Flight Participant	A Shuttle crew member whose presence is not required for operation of payloads or mission unique activities, but is determined by the NASA Administrator to contribute to other approved NASA objectives or to be in the national interest.
SFU-RETR	Space Flyer Unit Retrieval	A reusable, retrievable unmanned free flyer to be launched on the Japanese H-II rocket and retrieved by Shuttle.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
SHARE	Space Station Heat Pipe Advanced Radiator Element	Demonstrates and quantifies the thermal performance of a high capacity, 50 foot, space constructible, heat pipe radiator element.
SHOOT	Super Fluid Helium On Orbit Transfer Demonstration	Demonstrates the feasibility of on-orbit transfer of superfluid helium using thermomechanical techniques.
SII	Space Industries, Inc.	U.S. company providing commercially-owned Industrial Space Facility (ISF).
SIRTF	Space Infrared Telescope Facility	Astrophysics mission to provide infrared imaging and spectroscopy.
SKYNET		United Kingdom military communication satellite.
SL-D1	Spacelab D1	First dedicated German Spacelab mission.
SL-D2	Spacelab D2	Second German Spacelab Mission. Objectives included microgravity research and technology preparation for space station use.
SL-E	European Spacelab	ESA sponsored science mission directed toward multidiscipline research in materials science, fluid science, life sciences, space science, observation and technology research.
SL-J	Spacelab J	Combined NASDA/NASA Spacelab mission. Objectives included life sciences, microgravity, and technology research.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
SL-M	Joint USA/Russian MIR Docking/Spacelab Life Science	Shuttle mission dedicated to rendezvous and docking with the Russian Space Station (MIR). Life Sciences experiments will be performed on the Spacelab.
SLA	Shuttle Laser Altimeter	Acquire space-based sample data sets of land topography and vegetation heights and provide testbed for future laser altimeter subsystem.
SLS	Space Life Sciences Laboratory	Investigates the effects of weightlessness exposure using both man and animal specimens.
SLSTP	Space Life Sciences Training Program	Series of payloads to support a broad range of life sciences studies.
SMEX	Small Explorer	Payloads being designed to fly on Small Class ELV's.
SMRM	Solar Maximum Repair Mission	A technology demonstration of the shuttle capability to rendezvous, service, checkout and deploy an on-orbit satellite.
SOHO	Solar Heliospheric Observatory	ESA spacecraft to provide optical measurements as well as plasma field and energetic particle observations of the sun system for studies of the solar interior, atmosphere and solar wind.
SOLAR PROBE		Studies unexplored region of the solar atmosphere, measures electromagnetic fields and studies the particle populations close to the sun.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
SOOS	Stacked OSCAR on Scout	Two OSCAR (Orbiting Satellite Carrying Amateur Radio) communication satellites.
SPACEHAB		U.S. company providing commercially-owned pressurized module for conducting experiments in a man-tended environment. Also a series of payloads to be flown on the Space Shuttle.
SPACEHAB-DM	SPACEHAB Double Module	
SPACEHAB-SM	SPACEHAB Single Module	
SPACELAB-01		Demonstrated Spacelab's capabilities for multidisciplinary research.
SPACELAB-02		Demonstrated Spacelab's capabilities for multidisciplinary research and verified system performance.
SPACELAB-03		Dedicated materials processing mission emphasizing research in microgravity conditions.
SPAS	Shuttle Pallet Satellite	Payload Carrier developed by MBB of Germany.
SPAS-01/01A	German Shuttle Pallet Satellite	Demonstrated the utilization of the MBB platform and systems as a carrier for science experiments.
SPAS-III	Shuttle Pallet Satellite III	A reflight of the Infrared Background Survey (IBSS) mission.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
SPIE	Shuttle Plume Impingement Experiment	Obtains quantitative measurements of the Primary Reaction Control System (PRCS) engine plume impingement effects on materials useful for space station design.
SPTN	Shuttle Pointed Autonomous Research Tool for Astronomy (SPARTAN)	X-ray astronomy, medium energy survey mission, using retrievable free flyer.
SPTN-HALLEY	SPARTAN-HALLEY	Search for molecules containing nitrogen, carbon or sulfur and observes the UV spectrum between 2100 and 3400A.
SPTN207/IAE	Inflatable Antenna Experiment	Validates erection of a packaged 28 meter paraboloid and determines the structural dynamics and surface accuracy.
SRL	Space Radar Laboratory	Series of flights to acquire radar images of the Earth's surface. The images will be used for making maps, interpreting geological features, and conducting resource studies.
SS	Sun Synchronous	Sun-synchronous polar orbit.
SSAF-XX-XE	Space Station Assembly Flight - European element	International space station assembly flight supporting the Attached Pressurized Module which will contain European and US payload racks and associated support equipment.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
SSAF-XX-XJ	Space Station Assembly Flight - Japanese element	International space station assembly flight supporting the Japanese Experiment Module which will contain Japanese and US payload racks and associated support equipment.
SSAF-XX-XJ/A	Space Station Assembly Flight - Japanese and American elements	Dedicated flights for the assembly of Japanese and American cargo elements for the international space station.
SSAF-XX-XXA	Space Station Assembly Flight - American element	International space station assembly flight supporting the US components of the international space station.
SSBUV	Shuttle Solar Backscatter Ultra-Violet Experiment	Series of flights to measure ozone characteristics of the atmosphere.
SSBUV/A	Shuttle Solar Backscatter Ultra-Violet Experiment/A	SSBUV/A differs from SSBUV in that it has avionics and a power connection with the orbiter.
SSCE	Solid Surface Combustion Experiment	Determines the gas-phase flame spread over solid fuel surfaces in microgravity.
SSIP	Shuttle Student Involvement Program	Competitions held between 1981-1985 in which the winning High School students proposed experiments which were accepted for Shuttle flights.
SSTI	Small Spacecraft Technology Initiative	Series of two missions to provide flight opportunities for testing advanced spacecraft technology.
SSUF	Space Station Utilization Flight	Mission supporting the scientific users of the international space station.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
STEX	Sensor Technology Experiment	Demonstrates radiation measurement technology.
STL	Space Tissue Loss	An experiment to validate or confirm model of skeletal and cardiac muscle atrophy, collect data on catabolic pathway and control mechanisms, and test candidate pharmaceuticals for efficacy.
STP-x	Space Test Program-x	A series of payloads which include DOD STP secondary experiments.
STS	Space Transportation System	The Space Shuttle; Manned launch vehicle dedicated to space exploration.
STTP	Life Sciences Space Technology Training Program	Activity to develop and encourage interest on the part of college students in space biology and medicine.
SUNSAT	Stellenbosch University Satellite	South Africa ELV secondary payload to provide remote sensing and mapping of the Earth's gravity field.
SURFSAT	Summer Undergraduate Research Fellowship Satellite	Secondary payload launched on a Delta to simulate a deep space vehicle by radiating in S,X,Ku and Ka Bands.
SUVE	Solar Ultra Violet Experiment	To collect solar data with the solar imaging and extreme ultraviolet solar irradiance experiments. The data will be correlative with the co-manifested ATLAS-2 solar experiments for understanding of the upper atmosphere photochemistry.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
SW	Sidewall	
SWAS	Submillimeter Wave Astronomy Satellite	Spacecraft to study how molecular clouds collapse to form stars and planetary systems.
SYNCOM	Hughes Geosynchronous Communication Satellite	Provides communication services from geosynchronous orbit principally to the U.S. government.
TBD	To Be Determined	
TDRS	Tracking and Data Relay Satellite	Series of NASA tracking, data and communications satellites to replace the NASA ground based network.
TEAMS	Technology Experiments Advancing Missions in Space	
TELESAT	Canadian Telecommunication Satellite	Communication satellite built for Telesat Canada to provide voice and TV coverage to trans-Canada network of Earth stations.
TELSTAR	AT&T Communications Satellite	AT&T COMSTAR replacement -- provides communication services to the continental U.S., Alaska, Hawaii, and Puerto Rico.
TEMP (TEMP 2A-3)	Thermal Energy Management Process	Demonstrates a mechanically pumped two phase heat acquisition, transport, and rejection thermal control system proposed for Space Station.
TERRA SCOUT		Evaluates the ability of an expert imagery analyst to conduct realtime analysis from low earth orbit.

C.2

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
TIMED	Thermosphere-Ionosphere-Mesosphere Energetics and Dynamics.	Single-spacecraft mission to investigate physical and chemical processes in the mesosphere and lower thermosphere/ionosphere.
TISP	Teacher in Space Program	Six experiments including hydrophonics, magnetism, Newton's laws, effervescence, chromatography, and simple machines.
TITAN II		DOD medium class expendable launch vehicle.
TITAN III		Commercial intermediate class expendable launch vehicle.
TITAN IV		DOD large class expendable launch vehicle.
TLD	Thermoluminescent Dosimeter	Obtains gamma ray measurements of the Shuttle environment.
TOMS	Total Ozone Mapping Spectrometer	Study of Stratospheric ozone.
TOS	Transfer Orbit Stage	Upper stage system for Shuttle and Titan.
TPCE	Tank Pressure Control Experiment	A study to determine the effects of microgravity on the thermal stratification of fluids and to validate the effects of jet induced mixing.
TPFE	Two Phase Flow Experiment	Demonstration of a High Efficiency Thermal Interface (HETI) in an integrated thermal control system.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
TRACE	Transition Region and Coronal Explorer	The 4th SMEX mission to study the Sun's corona and the region of transition from chromosphere to corona.
TSS	Tethered Satellite System	Cooperative system developed by the Italian Space Agency (ASI) and NASA which is capable of deploying and retrieving a satellite which is attached by a wire tether from distances up to 100 km from the Orbiter.
U.S.	United States	
UARS	Upper Atmosphere Research Satellite	Satellite to study chemical processes acting within and upon the stratosphere, mesosphere, and lower thermosphere.
UK-6	United Kingdom-6	British Scientific Satellite
ULYSSES	Formerly ISPM (International Solar Polar Mission)	Investigates the properties of the heliosphere (sun and its environment).
UNEX	University-class Explorers	Series of explorers small than SMEX (Small Explorer).
USAF	United States Air Force	
USML	United States Microgravity Laboratory	Series of flights of a microgravity materials processing laboratory attached to the Shuttle.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
USMP	United States Microgravity Payload	Series of flights that conduct materials processing and fundamental experiments in the microgravity environment available in the Orbiter cargo bay while in low earth orbit.
USRA	Universities Space Research Association	Small university class payloads. Precursor to UNEX program.
USS	Unique Support Structure	
UVPI	Ultraviolet Plume Imager	Free-flying satellite observation of Obiter Maneuvering System burns.
VAFB	Vandenberg Air Force Base	U.S. Air Force launch range on central California coast.
VCS	Voice Controlled System	Evaluates effectiveness of voice controlled system on the Shuttle cargo bay closed circuit television.
VFT	Visual Function Test in Space	A biomedical study to determine effects of microgravity on human visual performance.
VTRE	Vented Tank Resupply Experiment	Investigation of concepts to provide tank fill-while-venting to 90 percent full capacity.
WESTAR	Western Union Telegraph Communication Satellite	A C-band satellite to replenish and expand the Westar system (Western Union domestic communication system).
WFF	Wallops Flight Facility	NASA small class ELV and sounding rocket launch range on Virginia coast.

**** PAYLOAD/ACRONYM LIST ****

PAYLOAD/ACRONYM	NAME	DESCRIPTION
WIND		Satellite to measure solar wind input to magnetosphere. Part of ISTP program.
WINDEX	Window Experiment	To obtain calibrated measurements of environmentally induced optical emissions.
WIRE	Wide-Field Infrared Explorer	The 5th SMEX mission to make wide field infrared studies of galaxies.
WSF	Wake Shield Facility	Satellite for molecular and chemical beam epitaxy growth of compound semiconductors, high temperature superconductors, and other materials using techniques requiring ultra-high vacuum, high pumping speeds, and relatively large working volumes.
XTE	X-Ray Timing Explorer	A payload to be used in Earth orbit to investigate the physical nature of compact x-ray sources by studying fluctuations in x-ray brightness over time-scales ranging from microseconds to years.
