RAE-A satellite design, simulation and flight performance, discussing gravity gradient stabilization
c31 A69-18328
Semiactive gravity gradient stabilization system design for low altitude earth oriented spacecraft attitude control, using active reaction wheel scanner
c31 A69-18334
System designs for manned spacecraft gravity gradient stabilization of Saturn S-4B stage at 400 km and lunar module at synchronous altitude
c31 A69-18338
Torqued two axis gimbaled boom actuator satellite attitude control
[AIAA PAPER 68-857] c21 A69-43245
Magnetically anchored eddy current and eddy current rod dampers for GEOS gravity gradient stabilized satellite
[NASA-CR-1282] c14 N69-18953
Influence of thermal distortion of booms on attitude of gravity stabilized satellites
[NASA-TN-D-5435] c31 N69-40781

GRAVITY WAVES
Atmospheric density variation measurements by density gages on Explorer 32 satellite confirm wave propagation in neutral thermosphere as free internal gravity waves
c13 A69-16261
Full wave calculation of gravity waves for thermospheric model, describing wave type reflection, transmission, conversion and coupling by scattering matrix elements
c13 A69-25150
Subsonic thermal convection or internal gravity waves from formal scale analysis of equations of motion in plane parallel atmosphere
c13 A69-33155

GREASES
Ball bearing test apparatus for evaluation of greases and solid lubricants at high temperatures
[ASLE PREPRINT 68AM 7C-2] c15 A69-10912

GREEN FUNCTION
Green function solution to Maxwell equations for interplanetary and coronal magnetic fields above photosphere, considering field at source surface
c30 A69-24429

GRIDS
Angular grid spacing resolution near poles effect tests in global prediction model for geophysical fluid dynamics, investigating forecast height and wind fields
c20 A69-43066

GRINDING (COMMINUTION)
Dispersion strengthened nickel produced from ultrafine comminuted powders
[NASA-TN-D-5421] c17 N69-38074

GRINDING MILLS
H release, pressure and oxide layer formed by reaction during ball milling Cr in water
c15 A69-38567

GROOVES
Elastohydrodynamic solution for ball torque spinning without rolling in nonconforming groove, showing increase in torque with stress and spinning and decreasing conformity
[ASME PAPER 69-LUBS-11] c15 A69-34381
Theory and clearance effects on stability of water lubricated herringbone-groove journal bearings
[NASA-TN-D-4883] c15 N69-10228
Power loss experiments on herringbone grooved, gas lubricated journal bearings
[NASA-TN-D-5224] c15 N69-24932
Stability of water lubricated herringbone groove journal bearings
[NASA-TN-D-5264] c15 N69-27955

GROOVING
Runway grooving to improve aircraft tire traction in adverse weather tested by F-4D and Convair 990A under wet conditions
[AIAA PAPER 69-773] c02 A69-35649
Runway and highway pavement grooving and traction studies
[NASA-SP-5073] c11 N69-20451
Steady-state characteristics of herringbone grooved air lubricated journal bearings
[NASA-TN-D-5386] c15 N69-33258

GROUND BASED CONTROL
Electron density profiles from topside ionograms compared to ground based sounding results, discussing error corrections
c07 A69-37865
Ground based guidance for land-landing manned spacecraft with low velocity descent systems, discussing high and low altitude glide path intercept and spiral
[AIAA PAPER 69-864] c21 A69-39390
Onboard processor servicing spacecraft sensors, programmable from ground, discussing functions and applications
c08 A69-39921

GROUND EFFECT
Predicting lift and drag for slender sharp-edge Delta wings in ground proximity
[NASA-TN-D-4891] c01 N69-16180

GROUND EFFECT MACHINES
Performance potential of high speed ocean-going air cushion vehicles with aircraft nuclear power plants
[AIAA PAPER 69-416] c02 A69-30480
Nuclear powered surface effects machine performance estimates, calculating reactor power and payload fraction for various clearance heights, gross weights and velocities
c22 A69-35180

Nuclear power plants based on nuclear aircraft technology to power ocean-going air cushion vehicles
[NASA-TM-X-1871] c22 N69-35723
Performance estimates of high speed peripheral jet nuclear powered ground effects machine
[NASA-TM-X-1888] c22 N69-36757
GROUND STATE
Nonequilibrium nitrogen plasma spectral line intensities calculated assuming optically thin plasma
c24 A69-10960
GROUND STATIONS
Magnetic field data from OGO-2 spacecraft and surface magnetic observatories, noting magnetic storm occurrence and magnetosphere inflation and detection of polar ionospheric currents
c13 A69-11125
Mutual RF interference between satellite and terrestrial telecommunications microwave relay system at shared frequencies
c07 A69-13242
Technological and cost factors of voice broadcasts from satellites to earth
[NASA-TM-X-1747] c07 N69-19025
Summary of operation, communications, and other experiments of Relay 2 satellite
[NASA-SP-151] c31 N69-21065
Solar flare and sunspot effects on VHF communications between synchronous satellite relay and ground stations
[NASA-TN-D-5100] c07 N69-23317
Procurement and construction of automatic picture transmission ground station equipment for ESSA and Nimbus transmission
[NASA-SP-5080] c07 N69-31985
GROUND SUPPORT EQUIPMENT
Short wave bands for earth-space communications, considering propagation anomalies compensated systems and frequency bands availability
c07 A69-13721
High pressure compressible flow systems in space vehicle ground support equipment
[NASA-SP-3045] c12 N69-26987
GROUND SUPPORT SYSTEMS
International 28-station global instrumentation ground support network for space tracking and data acquisition
[UN PAPER 68-95912] c34 A69-17059
Ground based guidance systems for supplementing onboard guidance of manned space vehicles
c21 A69-17580
Radio astronomy Explorer A attitude determination via disk-oriented programming ground support system for reducing and calibrating telemetry data, attitude prediction and command, etc
[AIAA PAPER 69-983] c08 A69-40363
GROUND TESTS
Lifting body stability augmentation systems design, development, ground tests and flight data including frequency response, limit cycle and structural resonance
[AIAA PAPER 69-887] c02 A69-39413
GROUP THEORY
FORTRAN program for computation of finite group tables
[NASA-TN-D-5402] c08 N69-35569
GROUP 6A COMPOUNDS
Ductilizing of Group 6A elements by rhenium and other solutes
[NASA-TN-D-4955] c17 N69-14403
GROWTH
Identity between growth hormone degrading activity of pituitary gland and plasmin
c04 A69-17105
Compensatory hypertrophy effects on adrenal phenylethanolamine n-methyl transferase /PNMT/ activity in rats
c04 A69-41404
GUIDANCE (MOTION)
Iterative guidance mode /IGM/ applied to effective gravity vector prediction, acceleration measurement of noise sensistivity and energy limitations
[AIAA PAPER 67-620] c21 A69-15501
GUIDE VANES
Jet engine inlet noise control by modification of inlet guide vanes
c28 A69-15622
GUNS (ORDNANCE)
Characterization of pressure perturbations induced in rocket combustor by machine gun
[NASA-TN-D-5214] c33 N69-24824
GYROFREQUENCY
Banded chorus, VLF discrete emissions in magnetosphere in single variable frequency band with frequency depending on equatorial electron gyrofrequency
c13 A69-31981
GYROSCOPES
Hydrodynamic conical and spherical spiral grooved grease bearings replacement of gyro ball bearings for extended space missions
[AIAA PAPER 69-836] c15 A69-39367
GYROSCOPIC PENDULUMS
Influence of thermal distortion of booms on attitude of gravity stabilized satellites
[NASA-TN-D-5435] c31 N69-40781

H

H ALPHA LINE
M-2 galaxy as Seyfert-like galaxy seem edge-on, using radio and optical data showing H alpha emission collisionally excited, discussing circular polarization
c30 A69-20051
HAFNIUM
Compatibility tests of molten uranium with tungsten and tungsten-1.5 percent hafnium
[NASA-TN-D-5076] c17 N69-19930
HAFNIUM ALLOYS
Mechanical properties of alloys molybdenum hafnium carbon compounds
[NASA-TN-D-5025] c17 N69-19200
Cyclic heating and thermal shock effects on hafnia stabilized with calcia, magnesia, and yttria
[NASA-TN-D-5279] c18 N69-34547
HAFNIUM CARBIDES
High temperature mechanical properties of polycrystalline hafnium carbide containing 13-volume-percent hafnium diboride
[NASA-TN-D-5008] c17 N69-16380
Effect of rhenium on mechanical properties of hafnium carbide strengthened tungsten alloys
[NASA-TN-D-5348] c17 N69-31977
HAIL
Elastic and plastic analyses of hail damage to aircraft surfaces
[NASA-TN-D-5363] c32 N69-33420
HALIDES
Thermionic converters with chloride and fluoride vapor deposited tungsten emitters, comparing performance characteristics and stability
c03 A69-21819
Feasibility of producing dispersion strengthened chromium by ball milling in hydrogen halides
[NASA-TN-D-4912] c17 N69-10827
Hot-salt stress-corrosion of titanium alloy under simulated turbine engine compressor environment
[NASA-TN-D-5510] c17 N69-40242
HALL EFFECT
Characteristic time on motion of magnetic lines of force in medium with Hall effect
c25 A69-12399
Near cathode magnetic field effect on instability in linear Hall current accelerators, using geometry of field extending from anode to cathode region
[AIAA PAPER 69-381] c28 A69-21731
Measurement and interpretation of Hall coefficient and resistivity of semiconductors
[NASA-TM-X-1711] c26 N69-14086
Nernst-Ettingshausen, thermoelectric power, thermal transverse-even, magnetoresistance, and Hall coefficients in white tin in 3.3 tesla field and cryogenic temperatures
[NASA-TN-D-5227] c26 N69-25412
HALOGENS
Halogen detector for leakage in hermetically sealed devices
[NASA-TN-D-5457] c09 N69-38597
HALOPHILES
Cation concentration requirement of halophilic NADH dehydrogenase for stability and maximum activity
c06 A69-23127

Salts and organic solvents effect on halophile Halobacterium cutirubrum catalase, noting enzyme activity inhibition by cation and anion c04 A69-35291
Flavoprotein/cytochrome b/559/ role as branch of Halobacterium electron transport in DPNH oxidase determined by salt dependence of reduced DPNH c06 A69-37101

HAMILTON-JACOBI EQUATION
Spacecraft optimum low thrust trajectory analyzed by Hamilton-Jacobi perturbation theory, obtaining canonic constants of motion c30 A69-17574

HANDBOOKS
Reliability handbook for silicon monolithic microcircuits - applications [NASA-CR-1346] c09 N69-23225
Reliability handbook for silicon monolithic microcircuits - failure mechanisms [NASA-CR-1347] c09 N69-23226
Soviet handbook of astronautics covering spacecraft and operating problems of near-earth spaceflight [NASA-TT-F-500] c31 N69-24760
Reliability handbook for failure analysis of silicon integrated microcircuits [NASA-CR-1348] c09 N69-25328

HANDWRITING
Recognition program for handwritten information in real time computer operation [NASA-CR-1284] c08 N69-21527

HANSEN LUNAR THEORY
Hansen planetary theory basic function, discussing perturbations expansion into trigonometric series c30 A69-13781
Application of Hansen lunar theory to 10th satellite of Jupiter [NASA-TN-D-4979] c30 N69-14479

HARDWARE
Low thrust mission simulation dependence on hardware definition, discussing power plant characteristics, jet velocity and thrustor efficiency c30 A69-21204
Computer memory reduction through FORTRAN higher level language, discussing tradeoff between costs saved and additional logic hardware [AIAA PAPER 69-963] c08 A69-40344
Hardware-software provisions for multiple precision floating point arithmetic [NASA-TM-X-1885] c08 N69-36918

HARMONIC ANALYSIS
Harmonic content of pressure wave shapes in strong traveling transverse acoustic modes [NASA-TM-X-1716] c12 N69-15371

HARMONIC EXCITATION
Ratio of equilibrium responses to transient responses both having equal excitation levels [NASA-TN-D-5070] c32 N69-17258

HARMONIC OSCILLATION
Inelastic scattering cross sections calculated, comparing results for various nuclear states expressed as Wood-Saxon radial and harmonic oscillator functions c26 A69-29006
Numerical calculation of viscous compressible flow around harmonic oscillating rigid cylinder [NASA-CR-1467] c12 N69-38782

HARMONIC OSCILLATORS
Quantum theory of particle-harmonic oscillator collision applied to gas-surface interactions at cryogenic temperatures [NASA-TN-D-4982] c24 N69-14288

HARNESSES
Design and dynamic characteristics of vertical lunar gravity simulator with six degrees of freedom torso harness [NASA-CR-1234] c05 N69-14979

HARTREE APPROXIMATION
Dipole shielding factor in coupled Hartree-Fock approximation for atomic S state c23 A69-12179
Upper bounds for electromagnetic transition rates for Ne 20 determined using Hartree-Fock wave functions c24 A69-35166
Hartree-Fock method used to study even-even nuclei in 2s-1d shell [NASA-TN-D-5066] c24 N69-17976

HATCHES
Preflight optical evaluation of right hand hatch windows in Gemini missions 7, 8, 9, and 12 [NASA-TN-D-5471] c31 N69-40813

HAZARDS
Explosive hazard evaluation of liquid oxygen liquid hydrogen propellants [NASA-TN-D-5382] c27 N69-35321

HAZE
Multiple light scattering solutions accuracy by diffraction peak omission from cloud and haze analytic phase functions compared for optically thick and thin planetary atmospheres c30 A69-33159

HEAD (FLUID MECHANICS)
Jet pump head rise deterioration parameter for prediction of cavitation c12 A69-15791

HEART
Analytic model resembling thick walled ellipsoid of revolution incorporating three dimensional shape of human left ventricle and ventricular wall thickness effects c05 A69-26235
Pneumatic driving system for heart assist or total replacement pumps, discussing design features and performance characteristics c05 A69-42983

HEART RATE
Real time metabolic rate analysis of suited astronaut using heart rate and O methods during thermal vacuum and extravehicular mobility tests [AIAA PAPER 69-993] c05 A69-40371
Circadian rhythm phase relationships between photoperiodism and heart rate, locomotor activity and deep body temperature /EBT/ in unrestrained monkeys c04 A69-42706

HEAT BALANCE
Nighttime protonosphere thermal balance from Alouette 2 electrostatic probe measurements of electron temperature and concentration in magnetosphere c13 A69-43181

HEAT EXCHANGERS
Design point performance of double containment tantalum and stainless steel mercury boiler for SNAP 8 [NASA-TN-D-4926] c33 N69-12739

HEAT FLUX
Downstream radiation flux distribution calculated for blunt entry bodies, considering self absorption effects c33 A69-12547
Rotating wickless hollow shaft heat pipe utilizing centrifugal acceleration for return pumping of condensate and transferring high heat fluxes [ASME PAPER 69-HT-19] c33 A69-43550
Heat finite propagation velocity effects on temperature distribution and heat flux for step temperature change at semiinfinite body surface [ASME PAPER 69-HT-1] c33 A69-43564
Computer program for computation of thermal radiation heat loads and temperatures of spacecraft orbiting planets or moon [NASA-TR-R-278] c30 N69-14428
Tungsten-184 used as thermal flux monitor at high temperatures in Plum Brook reactor [NASA-TN-D-5113] c22 N69-20795
Impulsive fluid motion on flat plates pulsed with uniform heat flux [NASA-TN-D-5249] c33 N69-26236
Aerodynamic heat flux determined within thermally thick walls for case of rapidly rising heat rates [NASA-TN-D-5309] c33 N69-30726
Infrared heating simulation of Mach 4.63 flight on X-15 horizontal stabilizer [NASA-TN-D-5403] c33 N69-35949

HEAT GENERATION
Heat generation calculations and heat transfer measurements in circulating currents of linear crossed field generators and accelerators [NASA-TN-D-5244] c25 N69-26313

HEAT MEASUREMENT
Heats of adsorption of carbon dioxide on silver /I/ oxide and copper /II/ oxide by gas chromatography

c06 A69-38277
Effect of shock precursor heating on radiative flux to blunt bodies
[NASA-CR-1265] c33 N69-17438
Calorimetric efficiency of cone and column solar energy concentrator
[NASA-TN-D-5109] c03 N69-21088
Calorimetric evaluation of three 1.5-meter diameter inflatable rigidized solar concentrators for solar dynamic cycle power systems
[NASA-TN-D-5234] c03 N69-28123

HEAT PIPES
High power TWT tube cooling in space vehicle, discussing thermal control system based on heat pipe radiator
c09 A69-24747
Vacuum tube with cathode heated directly by external radioisotope source, noting heat pipe providing isothermal heat transfer
c09 A69-24748
Rotating wickless hollow shaft heat pipe utilizing centrifugal acceleration for return pumping of condensate and transferring high heat fluxes
[ASME PAPER 69-HT-19] c33 A69-43550
Nuclear thermionic space power system using rod control and heat pipes
[NASA-TN-D-5250] c22 N69-26270
Heat pipe devices for space suit temperature control
[NASA-CR-1400] c05 N69-38491

HEAT RADIATORS
Radiator transfer functions for SNAP 8 ground test facilities
[NASA-TN-D-4946] c22 N69-14503
Aluminized plastic covers to reduce radiator sink temperatures on lunar surface
[NASA-TM-X-1729] c03 N69-17225
Calculation for study of vertical and horizontal positioned lunar radiators
[NASA-TM-X-1846] c33 N69-32683

HEAT RESISTANT ALLOYS
Columbium alloys properties, discussing creep strength, oxidation resistance, costs, production, etc
c17 A69-18791
Examination of thermal oxidation deposits on heat resistant alloys using X ray diffraction and X ray fluorescence analyses
[NASA-TN-D-5019] c17 N69-17277
Spectrochemical analysis of cobalt-base superalloys by liquid-layer solid-sample spark technique
[NASA-TM-X-1753] c06 N69-20853
Effect of ultrasonic vibration on precipitation hardening of steels and superalloys
[NASA-TN-D-5131] c32 N69-21814
Solubility of refractory metals and alloys in liquid potassium and lithium
[NASA-CR-1371] c17 N69-27059
Three oxidation-resistant alloy foil claddings for protecting typical gas turbine engine alloys of nickel and cobalt
[NASA-TN-D-5483] c17 N69-38794

HEAT SHIELDING
Blunt and conical body optimum heat shield shapes for Jupiter atmospheric entry, noting shallow flight path
[AIAA PAPER 68-1150] c31 A69-13565
Make wire, light pipe and spring wire ablation sensors development for measuring parameters of heat shield materials for reentry vehicles
c14 A69-15428
Charring phenolic nylon ablator material pyrolysis and surface recession for cyclic and constant combined convective and radiative heating
[AIAA PAPER 69-151] c33 A69-18055
Ablation characteristics of heat shield materials measured in arc heated wind tunnels, considering influence of model scale, heating rate and pressure level
c18 A69-26813
Heating facility for testing ablative heat shield material models in combined convective and radiative heating environment with constant or transient heating conditions
[AIAA PAPER 69-342] c11 A69-28278
Ablation heat shields, emphasizing dielectric low cost fabrication and application to entry vehicles
c15 A69-35538
Line source technique for ablative heat shield materials thermal conductivity measurements, comparing vacuum and atmospheric test results
[AIAA PAPER 69-1013] c11 A69-40386
Low density polybenzimidazole composites as ablative heat shields, discussing arc-heated wind tunnel tests of linear and crosslinked structures
c18 A69-41715
Effect of chemical properties of pyrolysis gases on heat shield mass required for lifting reentry vehicle in typical reentry trajectory
[NASA-TN-D-4975] c32 N69-14306
Ablation behavior of heat shield of Apollo command module over wide range of thermal environments
[NASA-TM-X-1778] c33 N69-22933
Wind tunnel study of open-face honeycomb to reduce temperature of hypersonic aircraft structure
[NASA-TN-D-5278] c33 N69-29599
Transient temperature fields in porous shell walls cooled by forced flow
[NASA-TT-F-552] c33 N69-30245
RAM-CA carbon-phenolic heat shield test in rocket engine exhaust
[NASA-TM-X-1841] c31 N69-32713

HEAT SINKS
Aluminized plastic covers to reduce radiator sink temperatures on lunar surface
[NASA-TM-X-1729] c03 N69-17225

HEAT SOURCES
Vacuum tube with cathode heated directly by external radioisotope source, noting heat pipe providing isothermal heat transfer
c09 A69-24748
Brayton-B generator for 2-10 kWe production, describing design, heat source/rejection, efficiencies and preliminary test data analysis
c03 A69-42278

HEAT TOLERANCE
Artificial heat acclimatization effect on orthostatic tolerance in man exposed to stresses of heat, exercise and dehydration
c05 A69-32810

HEAT TRANSFER
Transformation laws for thermodynamic quantities confirming conventional formulation by mechanical model of heat
c23 A69-11288
Venus microwave phase effect analyzed assuming dry massive Venus atmospheric model, discussing heat transfer processes
c30 A69-12108
Telemetry technique utilizing thermocouple sensors for base heating determinations on free flight blunt cone in shock tunnels, noting electrical noise reduction
[AIAA PAPER 68-407] c14 A69-15514
Advances in heat transfer, Volume 5, covering Monte Carlo method, film and transition boiling, convective heat transfer, etc
c33 A69-24456
Monte Carlo method application to heat transfer analysis including radiation, rarefied gas energy transfer and conduction
c33 A69-24457
Pressure and heating rate correlations for rocket exhausts impinging on flat plates and curved panels, generating axisymmetric real gas exhaust plumes
c33 A69-26781
X-15 research aircraft program piloting problems, ground facilities, heat transfer, space flight and steep reentry
c02 A69-26872
Inlet thermal boundary layer thickness effect on conical nozzle heat transfer and boundary layer determined by operating nozzle with cooled/uncooled inlet
[AIAA PAPER 69-474] c33 A69-32780
Optimal design for improving thermal performance of existing spacecraft thermally actuated louver system by increasing open-to-closed emittance ratio
[AIAA PAPER 69-627] c33 A69-33269
He and Ar arc-heated flows into reservoir and expansion in converging-diverging supersonic nozzles, considering flow equilibrium effect on

heat transfer and enthalpy
c33 A69-37198
Instantaneous frozen layer thickness and temperature profile in solidified layer obtained by iteration technique
c33 A69-39433
Hydrodynamic inlet conditions effect on film boiling and near critical hydrogen heat transfer, using data from electrically heated various geometry test sections
[ASME PAPER 69-HT-27] c33 A69-43541
Rotating wickless hollow shaft heat pipe utilizing centrifugal acceleration for return pumping of condensate and transferring high heat fluxes
[ASME PAPER 69-HT-19] c33 A69-43550
Heat finite propagation velocity effects on temperature distribution and heat flux for step temperature change at semiinfinite body surface
[ASME PAPER 69-HT-1] c33 A69-43564
Heat transfer and pressure distribution due to two-dimensional repetitive sine wave distortions on flat plate at Mach 20 in helium
[NASA-TN-D-4907] c12 N69-10804
Heat transfer and pressure distributions inside hinge line gap of wedge-flap combination at hypersonic speeds
[NASA-TN-D-4911] c01 N69-11009
Correlation equations for predicting gas-side heat transfer of axisymmetric rocket engine nozzles
[NASA-TM-X-1748] c33 N69-18898
Calculation of compressible turbulent boundary layers with pressure gradients and heat transfer
[NASA-CR-1303] c12 N69-21653
Stagnation pressure and heat transfer measurements of blunt axisymmetric bodies
[NASA-TN-D-5121] c01 N69-22554
Probability calculations for fuel clad surface temperatures of nuclear reactors
[NASA-TM-X-1802] c22 N69-26231
Heat generation calculations and heat transfer measurements in circulating currents of linear crossed field generators and accelerators
[NASA-TN-D-5244] c25 N69-26313
Tables and graphs of functions for solving nonlinear constant area fin one dimensional heat transfer problem
[NASA-TN-D-5173] c33 N69-26975
Heat transfer and neutronic calculations after fuel emitter separation in uranium oxide fueled thermionic diodes
[NASA-TM-X-1812] c22 N69-28212
Skin friction and heat transfer data for hypersonic turbulent layer on flat plates, wind tunnel wall, and cones
[NASA-TN-D-5089] c12 N69-29144
Bimetallic heat exchanger tube performance in sodium boiling facility
[NASA-TN-D-5323] c33 N69-30064
Properties and uses of liquid metal reactor fuels, including heat transfer processes in variously shaped channels, boiling and condensation of metals, and reactor control equipment
[NASA-TT-F-522] c33 N69-30507
Low order Runge-Kutta formulas with step control for heat transfer problems
[NASA-TR-R-315] c19 N69-30753
Energy thickness in prediction of throat heat transfer in rocket nozzles using nozzle geometries and temperature ratios
[NASA-TN-D-5356] c33 N69-31869
High temperature properties of gases - gas dynamics, thermodynamics, and combustion physics
[NASA-TT-F-558] c12 N69-35365
Pressure and heat transfer on swept Delta wing with trailing-edge flap
[NASA-TN-D-5418] c01 N69-35855
Comparison of predicted nozzle coolant side heat transfer and fluid flow with experimental values from Phoebus 2A nuclear tests
[NASA-TM-X-1881] c33 N69-36806

HEAT TRANSFER COEFFICIENTS
Combined conduction and radiation transfer equations solutions for absorbing-emitting gas, obtaining slip coefficient for diffusion solution correct boundary condition
c33 A69-27784
Heat transfer coefficients for film boiling from submerged spheres
[NASA-TN-D-5124] c33 N69-28318
Convective heat transfer rates on large angle conical bodies at hypersonic speeds
[NASA-TN-D-5526] c33 N69-40780
Temperature response of wall separating two fluids one with oscillating temperature
[NASA-TN-D-5520] c33 N69-40789

HEAT TRANSMISSION
Second breakdown and other thermal instabilities analyzed by heat flow equation, obtaining stability criteria predicting reduced power dissipation for transistor at low currents
c09 A69-31618

HEAT TREATMENT
Film processing effects on cryogenic mechanical properties of polyethylene terephthalate
c18 A69-16490
Surface fouling of ASTM jet A fuel heated to 700 deg F in simulated heat exchanger tube
[NASA-TN-D-4958] c28 N69-12831

HEAVING
Cushioncraft ground effect machine with heave response and control concepts
[NASA-TN-D-5202] c02 N69-23449

HEAVY IONS
Uranyl ions interaction with phospholipid and cholesterol monolayers, using surface pressure and potential measurements
c06 A69-25641

HEAVY WATER
Thermodynamic properties of liquid and gas phase equilibria of water plus heavy water
[NASA-TN-D-5223] c33 N69-26247

HEISENBERG THEORY
Anisotropic Heisenberg antiferromagnetism in spin wave approximation, calculating thermodynamic quantities in terms of elliptic integrals
c26 A69-26500
Anisotropic Heisenberg ferromagnets in random phase and spin wave approximation
[NASA-TN-D-5286] c26 N69-29588

HELICAL FLOW
FASTER computer program modified for tracking neutrons through reactor slabs penetrated by helical voided ducts
[NASA-TM-X-1838] c22 N69-31986

HELICAL INDUCERS
Net positive suction head requirements for helical inducer in liquid hydrogen under varied flow and temperature conditions
[NASA-TM-X-1808] c09 N69-27841

HELICAL WINDINGS
Structural stability of lattice column of longerons and helical braces
[NASA-CR-1301] c32 N69-26234

HELICOPTER CONTROL
Quadratic optimization applied to helicopter flight control design, assuming constant feedback gains and command step input with zero steady state error
c02 A69-43279

HELICOPTER DESIGN
NASA flight test of hingeless rotor compound helicopter to determine lift sharing characteristics, showing rotor lift dependence on airspeed
c02 A69-29702

HELICOPTER PERFORMANCE
NASA flight test of hingeless rotor compound helicopter to determine lift sharing characteristics, showing rotor lift dependence on airspeed
c02 A69-29702

HELICOPTERS
Flight tests with helicopters for studying manueverability
[NASA-TN-D-4931] c02 N69-14008
Theory for predicting rotational and vortex noise of lifting rotors in hovering and forward flight
[NASA-CR-1333] c23 N69-25344
Evaluation of contact analog display in landing approaches with helicopters
[NASA-TN-D-5241] c02 N69-27177
Flight investigation of lightweight helicopter to study feasibility of fixed collective pitch autorotations
[NASA-TN-D-5270] c02 N69-29232
Aerodynamic stability of helicopter rotor in forward flight
[NASA-CR-1332] c32 N69-34744

HELIO AIRCRAFT
Large solar sail vehicle to operate in manner of helicopter rotor
[NASA-CR-1329] c31 N69-28861
HELIUM
Magnetron ionization gauge in helium for low pressure measurement, discussing striking characteristics and time lags
c03 A69-10606
Variable He star HZ29, noting unusually wide and shallow He I lines and possible mass and composition
c30 A69-16931
First Born approximation cross sections for He excitation from ground state by proton impact calculated, using wave functions
c24 A69-17027
Primordial helium and horizontal branch star luminosity, obtaining luminosities in He burning phase for different He and metal abundances from models
c30 A69-22211
Pulsed glow discharges in He and He-H mixtures for high current density, noting electric field and wall potential distributions
c25 A69-23660
Gaseous He bubbles injection into liquid propellant launch vehicle fuel lines to reduce vehicle POGO oscillations by lowering feed system natural frequencies
c31 A69-25498
Leak rate measurement accuracy of rate-of-rise technique for nitrogen, methane and He between millionth and thousandth torr
c14 A69-32326
HD 30353 He binary star invisible component suggested as KO type supergiant from IR photometric data
c30 A69-35348
FORTRAN 4 subroutines for calculating critical flow factor to determine mass flow rate of gaseous helium and nitrogen through critical flow nozzles
[NASA-SP-3046] c12 N69-16098
Pumped helium tests of 51 centimeter bore niobium tin magnetic coils
[NASA-TN-D-5158] c26 N69-22965
Creep rupture data on welded tubes for helium to air heat exchanger design
[NASA-TN-D-5195] c17 N69-23731
Helium penetration and spreading in Mach 2 airstream using Delta wing injector
[NASA-TN-D-5322] c01 N69-30878
Shock shape and surface pressure measurements on hypersonic pointed cones in helium
[NASA-TN-D-5343] c01 N69-31228
Ramp pressurization tests with gaseous helium in thick walled liquid hydrogen tank
[NASA-TM-X-1870] c28 N69-35712
Spectroscopic study of helium arc
[NASA-TN-D-5396] c25 N69-36755
Helium pressurization systems for liquid methane fuel in supersonic transports
[NASA-TN-D-5519] c28 N69-40329
Biochemical and metabolic effects of exposure of mice to helium-oxygen atmosphere
[NASA-CR-1372] c04 N69-40955
HELIUM AFTERGLOW
Electron beam fluorescence probe and afterglow investigation for hypersonic He flow visualization, observing qualitative structure
c11 A69-35722
HELIUM IONS
Light ion abundance measurements of OGO satellites and field aligned diffusive equilibrium theory with temperature and concentration latitudinal variations
c13 A69-25157
Two photon decay of metastable levels of hydrogenic and He-like ions in solar corona, depopulating via proton collisional excitation to 2p level
c29 A69-36218
Explorer 34 observations of hydrogen and He ions in solar wind, noting number density variations and tentative association with geomagnetic storms
c29 A69-40305
Autoionized resonance transitions of He at 206.2-192.2 A using He continuum produced by capillary spark, also producing He II line spectra
c23 A69-42149
HELIUM ISOTOPES
Differential cross sections for elastic scattering of 600 Mev protons from He 3 between 19 and 45 degrees
c24 A69-13464
Cosmic ray deuteron and He 3 secondary origin and determination of cosmic ray path length and residual interplanetary field modulation
c29 A69-20066
He 2 excitation spectrum for interparticle potential using pair Hamiltonian with repulsive core and attractive well
c24 A69-33118
Dilute solution of He 3 in He 4 near absolute zero measured for viscosity, showing temperature effect
c23 A69-39582
Elastic and nonelastic scattering cross sections from 42 MeV alpha particles interacting with helium isctopes
[NASA-TN-D-5530] c24 N69-40979
HELMETS
EEG monitor helmet for aircraft or flight simulator programs, discussing sensing and transmitting system
c05 A69-26553
Relationship between binocular depth perception and optical distortion in Apollo pressure suit helmets and visors
[NASA-TN-D-5162] c05 N69-22990
HELMHOLTZ VORTICITY EQUATION
Helmholtz resonators with variable cavity depths tested with unstable rocket combustor
[NASA-TN-D-5171] c33 N69-23351
HEMATOCRIT RATIO
Repeated blcod sampling effect on plasma cholinesterase, acid phosphatase, alkaline phosphatase and hematocrit ratios in domestic chickens
c04 A69-23158
HEMATOLOGY
Repeated blcod sampling effect on plasma cholinesterase, acid phosphatase, alkaline phosphatase and hematocrit ratios in domestic chickens
c04 A69-23158
HERMETIC SEALS
Sealed and unsealed relay coils temperature rise at simulated outer space air pressure levels
c09 A69-28048
Pump and seal parameters for helical groove, hermetically sealed pump and bearing rotor
[NASA-TN-D-5225] c15 N69-24791
Halogen detector for leakage in hermetically sealed devices
[NASA-TN-D-5457] c09 N69-38597
HIGH ALTITUDE
Base flow field at high altitude for four-engine clustered nozzle configuration
[NASA-TN-D-5164] c12 N69-24936
HIGH ALTITUDE BALLOONS
Winds aloft and wind shear analysis from jimsphere wind sensor balloon-radar data
[NASA-CR-1204] c20 N69-13629
HIGH ALTITUDE TESTS
Structure and mean molecular weight measurement of unknown atmosphere assessed from high altitude tests in earth atmosphere
[AIAA PAPER 68-1054] c30 A69-13699
HIGH ENERGY ELECTRONS
Interplanetary relativistic electrons from solar flare events
c29 A69-15528
Hydrogenic atoms ionization by high energy electrons, discussing cross sections for ejected electrons and total energy
c24 A69-20738
Fast electron diffusion in stochastic magnetic field, obtaining diffusion coefficient as function of ratio of correlation time to Larmor period
c25 A69-20807
Relativistic solar electron detection in interplanetary space during July 7, 1966 proton flare event, noting energy spectrum and time

history
c29 A69-23766
High energy cosmic radiation problems
[NASA-SP-199] c29 N69-29652
HIGH ENERGY INTERACTIONS
High energy scattering approximation valid from small to large angles, discussing errors and proton scattering by He
c24 A69-29008
Photodisintegration of ultrahigh energy cosmic rays by universal radiation field, analyzing implications on origin and propagation time
c29 A69-35006
Proton-antiproton high energy elastic scattering by bosons exchange, introducing vertex functions for nonlocal Lagrangian
c24 A69-39467
HIGH FIELD MAGNETS
Cryogenic solenoids with pure Al conductor for production of strong magnetic fields, discussing softness and strain resistivity problems
c03 A69-26497
Design, construction, testing, and control devices for high-field electromagnets
[NASA-TN-D-4910] c23 N69-10889
HIGH FREQUENCIES
Synchroton radiation HF cut-off resulting from electrons with anisotropic pitch angle distribution for type 4 solar radio bursts
c29 A69-40577
HIGH POLYMERS
Skin friction drag reducing high polymer solution injected into turbulent boundary layer to test effectiveness on marine vehicles
c12 A69-33254
HIGH PRESSURE
Thomas-Fermi approximation applied to calculation of equations of state and thermodynamic functions at high pressure from differential equations of statistical atom model
c24 A69-40186
HIGH RESOLUTION
High resolution and image intensity of field ion microscope at low temperatures
[NASA-TN-D-5125] c14 N69-21408
HIGH STRENGTH ALLOYS
Columbium alloys properties, discussing creep strength, oxidation resistance, costs, production, etc
c17 A69-18791
Crack toughness characteristics of high strength alloys for use in heavy sections of supersonic aircraft
[NASA-TN-D-4998] c32 N69-17275
HIGH TEMPERATURE
Edge notch sensitivity in thin sheet nickel alloys under stress at high temperatures
[NASA-CR-1263] c32 N69-16156
High emittance coating materials for beryllium, niobium-zirconium compounds, and stainless steel used in spacecraft radiators
[NASA-CR-1278] c17 N69-18952
Tungsten-184 used as thermal flux monitor at high temperatures in Plum Brook reactor
[NASA-TN-D-5113] c22 N69-20795
Stress rupture and tensile properties of refractory metal wires at 2000 and 2200 deg F
[NASA-TN-D-5139] c32 N69-22823
Outdoor high temperature corrosion tests for aluminum alloys and titanium alloys, and stainless steels
[NASA-TN-D-5362] c17 N69-32558
Chromium base alloys for high temperature application in jet engines
[NASA-TM-X-1867] c17 N69-35764
Development and inverter circuit tests of high temperature cesium vapor thyratrons
[NASA-CR-1435] c03 N69-36843
Hot-salt stress-corrosion of titanium alloy under simulated turbine engine compressor environment
[NASA-TN-D-5510] c17 N69-40242
HIGH TEMPERATURE AIR
Oxidation behavior of coated molybdenum and niobium alloys in high temperature supersonic air streams
[NASA-TN-D-4877] c17 N69-10764
HIGH TEMPERATURE ENVIRONMENTS
Venus atmosphere origin, discussing high temperature effects and chemical composition via space probe and terrestrial observations
c30 A69-23183
Thermal electromotive force change for thermocouples in high temperature, low pressure environments for 3700 hours
[NASA-TN-D-5287] c14 N69-29196
HIGH TEMPERATURE FLUIDS
Chemical reactions activation energy at high temperature, noting cross section shape role for deducing activation energy from rate data
c06 A69-34443
HIGH TEMPERATURE GASES
Nongray equilibrium radiative heat transfer in viscous radiating shock layer around blunt body entering high temperature nonisothermal carbon dioxide-nitrogen atmosphere
[AIAA PAPER 69-636] c33 A69-33258
Modified model for vibration-dissociation relaxation coupling phenomena in nonequilibrium high temperature gas flow, discussing parameter U variation with kinetic temperature
c12 A69-37208
Quartz-insulated, single-wire thermocouples installed on thin-wall rocket cooling tubes to measure hot-gas-side wall temperatures
[NASA-TN-D-5291] c14 N69-29553
Measurement of thermal accommodation coefficients between liquids and high temperature gases in low pressure reentry communications blackout intervals
[NASA-CR-1330] c07 N69-32721
Empirically determined wind and scale effects on hot gas recirculation characteristics of jet V/STOL aircraft
[NASA-CR-1445] c28 N69-40776
HIGH TEMPERATURE LUBRICANTS
Steel ball bearing high temperature fatigue life tested with synthetic paraffinic oil, fluorocarbon and polyphenyl ether
[ASME PAPER 69-LUBS-18] c15 A69-34378
Oxygen concentration effects on ester lubricant degradation during high temperature bearing test
[NASA-TN-D-5262] c15 N69-26311
Oxygen concentration effects on synthetic paraffinic oil lubricant performance in high temperature bearing tests
[NASA-TN-D-5152] c15 N69-26314
Rare earth fluorides and oxides used as solid lubricants at high temperatures
[NASA-TN-D-5301] c15 N69-29568
Feasibility tests on liquid lubricants for inerted lubrication systems of advanced aircraft engines
[NASA-TN-D-5420] c15 N69-35788
HIGH TEMPERATURE RESEARCH
High temperature fatigue tests conducted to determine bearing life of angular contact ball bearing elements
[NASA-TN-D-5002] c15 N69-16367
Performance and cavitation damage to axial flow pump rotor blades in high temperature liquid sodium
[NASA-TN-D-5138] c15 N69-21773
Soviet research on high temperature strength of materials and machine parts
[NASA-TT-F-508] c17 N69-27300
Burst testing of tungsten tubing at high temperatures
[NASA-TM-X-1843] c17 N69-31889
Mechanical behavior of tantalum T-111 alloy at high temperatures and ultrahigh vacuum
[NASA-CR-1436] c17 N69-36831
HIGH TEMPERATURE TESTS
Superplasticity in W-Re alloys, noting tensile properties, grain size and strain rate sensitivity for various Re contents at high temperatures
c17 A69-22990
Boron nitride and boron nitride composite under high temperatures in air and vacuum for various time periods, discussing thermal shock and oxidation resistance
c18 A69-36208
High purity dielectric materials tested in capacitors at high temperatures
[NASA-CR-1213] c18 N69-14400
Strain-rate sensitivity of three titanium-alloy sheet materials after prolonged exposure to high temperature
[NASA-TN-D-4981] c17 N69-14873

High temperature mechanical properties of polycrystalline hafnium carbide containing 13-volume-percent hafnium diboride
[NASA-TN-D-5008] c17 N69-16380
Calorimetric analyses of metal corrosions in deionized heated water
[NASA-TM-X-1791] c17 N69-25243
Development and high temperature tests of high strength nickel alloy for stator vanes of gas turbine engines
[NASA-TN-D-5352] c17 N69-31873
Cavitation damage and effect of fluid temperature on performance of axial flow pumps in liquid sodium
[NASA-TN-D-5484] c15 N69-38641
Temperature effects on turbofan and turbojet noise radiation
[NASA-CR-1472] c02 N69-40439

HIGH VACUUM
Sliding friction and wear behavior of copper alloys in air and vacuum
[NASA-TN-D-4824] c15 N69-10757

HIGHWAYS
Runway and highway pavement grooving and traction studies
[NASA-SP-5073] c11 N69-20451

HILBERT SPACE
Existence, uniqueness, and stability criteria for linear and nonlinear operational differential equations in Banach and Hilbert spaces
[NASA-CR-1356] c19 N69-28256

HINGES
Heat transfer and pressure distributions inside hinge line gap of wedge-flap combination at hypersonic speeds
[NASA-TN-D-4911] c01 N69-11009
Performance tests on dynamic jettison hinge loads of Centaur nose fairing
[NASA-TM-X-1821] c32 N69-29734

HISTORIES
Historical developments in aviation and astronautics including liquid propellant rocket engine design, electric rocket engines, aircraft engines, and inertial guidance
[NASA-TT-F-540] c34 N69-31836

HODOGRAPHS
Normalized hodographic mapping for constrained trajectory families, discussing mapping concepts, information content and applications
[AIAA PAPER 69-924] c30 A69-39362

HOLES (ELECTRON DEFICIENCIES)
Periodicity of magnetothermal oscillations in pressure annealed pyrolytic graphite compared with hole carriers
c26 A69-29005

HOLOGRAPHY
Holographic displays using ultrasonic vibrations or laser outputs as optical sources, discussing recording materials, responses and computer applications
c14 A69-21394
Extended source Fourier transform holography for single image synthesis of multiple identical images produced by multiple pinhole camera in X ray astronomy
c14 A69-40019
Holographic microscopy for performance prediction and quality control of semiconductor devices and integrated circuits
[NASA-CR-1394] c14 N69-31958
Object motion effect in Fraunhofer holography with application to velocity measurements
[NASA-TN-D-5515] c14 N69-40812

HONEYCOMB STRUCTURES
Multiwall meteoroid protection design in Apollo program, discussing bumper, backup sheet and honeycomb cells insulation
[AIAA PAPER 69-372] c32 A69-28304
Forced convection heat-transfer data for hydrogen flow through heated parallel hexagonal passages
[NASA-TN-D-4959] c33 N69-14588
Wind tunnel study of open-face honeycomb to reduce temperature of hypersonic aircraft structure
[NASA-TN-D-5278] c33 N69-29599
Photographic study on bromine jet boundary shape in coaxial airstream with honeycombs at injection plane
[NASA-TM-X-1900] c12 N69-39303

HORIZON
Horizon radiance profile analysis for determining atmospheric temperature
[NASA-TN-D-5068] c13 N69-19024

HORIZON SCANNERS
Infrared horizon radiance profiles for winter conditions based on Scanner project flight test
[NASA-TN-D-4905] c21 N69-14346
Computer program used to infer atmospheric water-vapor mixing ratio from measured horizon radiance profiles
[NASA-TN-D-5252] c13 N69-27246
Stratospheric and mesospheric temperature and moisture profiles determined from infrared horizon observations
[NASA-CR-1419] c20 N69-35528

HORIZONTAL FLIGHT
Aerodynamic stability of helicopter rotor in forward flight
[NASA-CR-1332] c32 N69-34744

HORIZONTAL TAIL SURFACES
Factors affecting flat spin characteristics of fighter aircraft with horizontal tail surfaces
[NASA-TN-D-5409] c02 N69-36807

HORMONES
Identity between growth hormone degrading activity of pituitary gland and plasmin
c04 A69-17105
Blood sampling for parathyroid hormone and calcium metabolism during weightlessness of space flight
[NASA-CR-1395] c05 N69-38600

HOT CATHODES
Predicting relative sensitivities of hot cathode ionization vacuum gages
[NASA-TN-D-5285] c14 N69-29331

HOT STARS
Structure and pulsational properties of massive stars with helium cores and thin hydrogen poor envelopes
c30 A69-22421
Helium-carbon star BD plus 10 degrees 2179 reanalyzed by grid of constant flux models containing right amount of C
c30 A69-40652

HOT-WIRE FLOWMETERS
Turbulence measurement errors with inclined hot wires described by equations, assuming normal component cooling includes greater tangential cooling
c14 A69-34442

HOTSHOT WIND TUNNELS
Real helium hypersonic flow parameters for pressures to 3600 atmospheres and temperatures to 15,000 deg K applicable to hotshot type wind tunnels
[NASA-TN-D-4869] c12 N69-10443

HOVERING
Theory for predicting rotational and vortex noise of lifting rotors in hovering and forward flight
[NASA-CR-1333] c23 N69-25344
Evaluation of six degrees of freedom motion simulator for Bell X-14A aircraft hovering characteristics
[NASA-TN-D-5383] c11 N69-35359

HOVERING STABILITY
Lift loss and jet decay measurements on hovering vertical takeoff aircraft models
[NASA-CR-1297] c01 N69-21477

HUMAN BEINGS
Gravitational and acceleration effects on man and organisms, and biological effects of radiation
[NASA-TT-F-528] c05 N69-38701
Electro-optical instrument for measuring pointing direction of human eye
[NASA-CR-1422] c05 N69-39212

HUMAN BODY
Human body dynamic response to vibration combined with linear acceleration, noting changes in body mechanical impedance and resonance
c05 A69-11335
Human vestibular system and its connection with oculomotor system and their relation to motion perception, spatial disorientation, and illusions
[NASA-CR-1309] c04 N69-22637
Respiratory system and oxygen metabolism regulation in man and animals
[NASA-TT-F-501] c04 N69-31401

HUMAN CENTRIFUGES
Centrifugation for removal of bullet fragment floating freely in ventricular system of human brain to fixed safe position in left lateral ventricle wall
c04 A69-43372

HUMAN FACTORS ENGINEERING
Modular three dimensional mockup technique for economizing and facilitating design of control and display equipment
c05 A69-11953
Weightless simulators effectiveness for obtaining space systems maintainability criteria, using nonparametric experimental design for performance data
c05 A69-17648
Manned space stations for future space exploration, discussing earth-like environment, artificial gravity, human factors and time dependence
c30 A69-25644
Man-computer speech communication, discussing model and aspects of acoustics, phonetics, linguistics, language training, physiology, psychology, bionics, etc
c08 A69-35099
Human angular acceleration sensitivity using rotation and oculogyral illusion perception as indicators, relating to spatial orientation and flight control task precision
c05 A69-41674
Conference on NASA research in noise reduction of subsonic jet aircraft - nacelle acoustic linings, sound generation in jet engines, and operational noise effects on humans
[NASA-SP-189] c02 N69-11542
Visual sensing and spacecraft guidance for earth orbit rendezvous maneuvers
[NASA-CR-1214] c05 N69-13161
Practice and operator work load effects on acquisition and performance of code transformation /COTRAN/ task
[NASA-CR-1261] c05 N69-14345
Physiological and psychological responses of man to space flight problems
[NASA-TT-F-529] c05 N69-32044

HUMAN PERFORMANCE
Hypohydration effects on isometric muscular strength, noting decreasing trends in maximal strength
c04 A69-15983
Ideal safety system for accident prevention, considering foreseeable and unforeseeable aspects to eliminate individual or collective human error
c34 A69-16836
Human information processing rates during one and two axis compensatory tracking tasks with secondary auditory task
c05 A69-23880
Efficacy of sensory feedback information given during training period for improving human performance in producing memorized movement pattern
[NASA-CR-1251] c05 N69-13926
Small perturbation dynamics of neuromuscular system in tracking tasks
[NASA-CR-1212] c05 N69-14212
Proprioceptor influence on operator performance in manual control situations
[NASA-CR-1248] c05 N69-14768
Modified Fourier transform for calculating human operator describing functions
[NASA-TM-X-1762] c08 N69-21119

HUMAN REACTIONS
Rotational velocity estimates by observers during angular acceleration, noting vestibular function interpretation
c04 A69-15332
Psychophysical methods for determining perception threshold of angular acceleration in man during vertical rotation
c04 A69-15969
Space medicine to characterize nature and degree of changes in human functional capabilities due to space flight environment prolonged exposure
c34 A69-36460
Carbon dioxide levels monitoring in spacesuit research including limits of physiological acceptability
c05 A69-39170
Human physiological responses to angular acceleration during breath holding, Mi, Valsalva and Mueller respiratory maneuvers in hollow spherical simulator
c05 A69-41679
Conference on NASA research in noise reduction of subsonic jet aircraft - nacelle acoustic linings, sound generation in jet engines, and operational noise effects on humans
[NASA-SP-189] c02 N69-11542
Space flight effects on human time perception
[NASA-TT-F-545] c05 N69-26455
Predicting human performance in space environments
[NASA-CR-1370] c05 N69-30168
Coordination of voluntary movements of man in zero gravitational fields
[NASA-TT-F-578] c04 N69-31356

HUMAN TOLERANCES
Artificial heat acclimatization effect on orthostatic tolerance in man exposed to stresses of heat, exercise and dehydration
c05 A69-32810
Human responses to aerospace environment in relation to microwave, light, thermal, and ionizing radiation
[NASA-CR-1205-VOL-1] c04 N69-12434
Human responses to aerospace environment related to acceleration, vibration, sound, and noise
[NASA-CR-1205-VOL-2] c04 N69-12588
Conversion tables for studies of human responses to aerospace environment
[NASA-CR-1205-VOL-4] c04 N69-12600
Operational and structural design criteria for artificial gravity stabilization of rotating space station
[NASA-TN-D-5426] c05 N69-39210

HUMAN WASTES
Material recovery from metabolic and other wastes for long duration manned space missions, discussing carbon dioxide removal, bioregenerative food systems, etc
[AAS PAPER 69-143] c05 A69-42876
Manned spacecraft waste disposal systems
[NASA-TM-X-1851] c05 N69-33260

HYBRID PROPELLANT ROCKET ENGINES
Rocket-scramjet hybrid engines in lifting reusable second stage
[NASA-TN-D-5218] c28 N69-24922

HYDRATION
Hydration, oxidation, and origin of calc-alkali differentiation series of igneous rocks
[NASA-TN-D-5400] c13 N69-40893

HYDRAULIC EQUIPMENT
Transient performance of full flow hydraulic turbine driven two speed pump inducer system, formulating computer model
[AIAA PAPER 69-551] c15 A69-34415
Hydraulic-powered self propelled six degree of freedom loading vehicle moving tests assembly to test chamber with high accuracy positioning
c11 A69-38181
Lubrication performance and thermal shear degradation of polyphenyl ethers and refined mineral oils in high temperature vane pump loop
[NASA-TN-D-5096] c15 N69-20938

HYDRAULIC JETS
Mean drop size generated in vapor pressure regime of liquid water jet, noting effect of water temperature and orifice diameter
c12 A69-21995
Noncavitating and cavitating performance of low area ratio water jet pumps, analyzing efficiency, area ratio, throat length, nozzle spacing and diffuser geometry
c03 A69-35176

HYDRAZINES
Isothiocyanates and phenyl isocyanate reaction with hydrazinoethanol and hydrazinoethyl hydrogen sulfate
c06 A69-31808

HYDROCARBONS
Absorption coefficient measurement for hydrocarbon gases for He-Ne laser beam at 3.39 microns, tabulating coefficients, noting variations from spectroscopic data
c16 A69-42192

HYDRODYNAMIC EQUATIONS
Initial hydrodynamic phase of hypervelocity impact analyzed by computer program using eigenvector approach
[NASA-TR-R-298] c32 N69-24765
HYDRODYNAMICS
Nova outburst dynamics investigation by time dependent hydrodynamics computer program including energy transport by radiation and convection
c30 A69-30769
Momentum integral method treating magnetohydrodynamic and simple hydrodynamic entrance flows
[NASA-TN-D-5215] c25 N69-24920
Hydrodynamic stability of inviscid rotating coaxial jets
[NASA-CR-1363] c12 N69-24926
Survey of incompressible and compressible fluid film hydrostatic and hydrodynamic lubrication
[NASA-SP-5058] c15 N69-28592
HYDROGEN
Pressure and temperature dependence of slow crack growth in hardened steel in gaseous hydrogen environment
c17 A69-10612
Hydrogen absorption coefficients, giving number densities in hydrogen gas or plasma for wide range of temperature and pressure
c24 A69-19165
Cooling requirements for high speed polytetrafluorethylene lubricated ball bearings operating in cold hydrogen gas, developing minimum gas flow rate equation
[ASLE PAPER 68-LC-2] c15 A69-19310
High pressure storage vessels for gaseous hydrogen, discussing failure, manufacturing controls and access for internal nondestructive inspection
[ASM PAPER D8-14.1] c15 A69-19666
Segmented anode, carbon dioxide-hydrogen performance and hollow cathode erosion tests on low power MPD arc thrustor, noting current measurements
[AIAA PAPER 69-242] c28 A69-21236
Pulsed glow discharges in He and He-H mixtures for high current density, noting electric field and wall potential distributions
c25 A69-23660
Nuclear energized pulsational instability of stars based on linear quasi-adiabatic theory, including models with hydrogen burning shells
c30 A69-27576
Hot salt stress corrosion of Ti alloy, discussing hydrogen generation during elevated temperature exposure and embrittlement as manifestation of strain rate
c17 A69-39434
Order-disorder transitions in solid hydrogen, discussing model to explain molecular rotation angular momentum operator fluctuations
c23 A69-43119
Forced convection heat-transfer data for hydrogen flow through heated parallel hexagonal passages
[NASA-TN-D-4959] c33 N69-14588
Thermodynamic properties of erbium hydrogen binary system evaluated for use as low pressure standard
[NASA-CR-1271] c14 N69-16099
Hot salt stress corrosion of titanium alloys - generation of hydrogen and its embrittling effect
[NASA-TN-D-5000] c17 N69-16465
Measurement of liquid and two phase hydrogen densities with capacitance density meter
[NASA-TN-D-5015] c14 N69-23470
Ramp pressurization tests with gaseous helium in thick walled liquid hydrogen tank
[NASA-TM-X-1870] c28 N69-35712
Rapid computation of equilibrium, chemical composition, and thermodynamic properties of argon-oxygen-hydrogen gas system
[NASA-TN-D-5416] c33 N69-36299
Absorption of hydrogen by palladium and electrical resistivity of hydrogen-palladium system
[NASA-TN-D-5441] c26 N69-37272
Interaction energy and dipole moment in collisions of two hydrogen molecules
[NASA-TN-D-5486] c24 N69-39184
HYDROGEN ATOMS
Electron impact ionization cross sections for second quantum level of atomic H, using Born exchange approximation and Vainshtein approximation
c24 A69-17138
Hydrogenic atoms ionization by high energy electrons, discussing cross sections for ejected electrons and total energy
c24 A69-20738
Primary processes leading to atomic and molecular hydrogen formation in hydrogen peroxide photolysis at 1236 A, noting OH formation
c06 A69-23527
HYDROGEN CYANIDES
Simultaneous HCN and HOH laser emission in pulsed discharge through mixture containing H, C, N, and O
c16 A69-26330
HYDROGEN IONS
Elastic scattering of slow electrons by negative H and positive Li ions, calculating differential cross sections and phase shifts
c24 A69-12924
Light ion abundance measurements of OGO satellites and field aligned diffusive equilibrium theory with temperature and concentration latitudinal variations
c13 A69-25157
Dynamical effects in structure of H II equilibrium region left behind expanding ionization front, showing temperature as function of distance from star
c30 A69-35966
Two photon decay of metastable levels of hydrogenic and He-like ions in solar corona, depopulating via proton collisional excitation to 2p level
c29 A69-36218
Photospheric radiation field role in temperature inversion of stellar chromospheres with dominant H ion opacity, postulating mechanical energy dissipation
c30 A69-38173
Explorer 34 observations of hydrogen and He ions in solar wind, noting number density variations and tentative association with geomagnetic storms
c29 A69-40305
Positively charged diatomic hydrogen molecules interstellar extinction and photodissociation cross section in terms of formation mechanisms
c30 A69-42610
HYDROGEN OXYGEN ENGINES
Liquid rocket acoustic instability for hydrogen-oxygen and earth storable propellant combinations
[NASA-TN-D-4968] c28 N69-14384
Measured effects of gaseous flow system dynamics on acoustic mode combustion instability
[NASA-TN-D-5080] c33 N69-20882
Injector radial distribution and thrust chamber geometry effect on acoustic mode instability in hydrogen oxygen engines
[NASA-TN-D-5375] c33 N69-32340
HYDROGEN OXYGEN FUEL CELLS
Water electrolysis, discussing oxygen generators for spacecraft prototype cells and testing
c05 A69-12987
Oxygen supply inert diluent impurities effect on hydrogen-oxygen fuel cell performance
c03 A69-15310
High performance light weight electrodes for hydrogen oxygen fuel cells
[NASA-CR-1216] c03 N69-14397
Performance of prototype hydrogen oxygen electrolytic regenerative fuel cell stack with gas storage tank
[NASA-CR-1244] c03 N69-18885
HYDROGEN PEROXIDE
Primary processes leading to atomic and molecular hydrogen formation in hydrogen peroxide photolysis at 1236 A, noting OH formation
c06 A69-23527
HYDROGEN PLASMA
Hydrogen absorption coefficients, giving number densities in hydrogen gas or plasma for wide range of temperature and pressure
c24 A69-19165

Number densities of hydrogen species in hydrogen plasma - tables
[NASA-TN-D-4993] c25 N69-16466
Measurement of change in plasma potential and magnetic field of hydrogen plasma impinging on magnetic dipole - simulation of solar wind-earth interaction
[NASA-TM-X-1738] c25 N69-19131
Energy transfer and ion cost in hydrogen plasma
[NASA-TN-D-5319] c25 N69-29905
Interim absorption coefficients and opacities for hydrogen plasma at high pressure
[NASA-TM-X-1902] c24 N69-39187

HYDROGEN RECOMBINATIONS
Nonequilibrium gas dynamics of hydrogen dissociation and recombination
[NASA-CR-1411] c12 N69-34709

HYDROGENATION
Optimal growths of silicon carbide polytype crystals by methyltrichlorosilane reduction
[NASA-TN-D-5313] c26 N69-30072

HYDROGENOMONAS
NADH stimulation of ATP dependent carbon dioxide fixation in crude extracts of Hydrogenomonas facilis, considering allosteric regulation of phosphoribulokinase activity
c04 A69-30036
Hydrogenomonas cultures investigated for metabolic waste utilization in aerospace life support systems
[NASA-CR-1296] c05 N69-22766

HYDROSTATICS
Survey of incompressible and compressible fluid film hydrostatic and hydrodynamic lubrication
[NASA-SP-5058] c15 N69-28592

HYDROXYL COMPOUNDS
Primary processes leading to atomic and molecular hydrogen formation in hydrogen peroxide photolysis at 1236 A, noting OH formation
c06 A69-23527

HYPERBOLIC FUNCTIONS
Finite difference techniques used in numerical solutions for inviscid radiating shock layers around spheres at hyperbolic speed in air
[NASA-TR-R-311] c12 N69-26504

HYPERGEOMETRIC FUNCTIONS
Analytic continuation of Appell hypergeometric series into linear combination of four infinite series
c19 A69-26605

HYPERGOLIC ROCKET PROPELLANTS
Combustion response of hydrazine-nitrogen tetroxide hypergolic rocket propellants to transverse gas flows, noting coupled and uncoupled oscillations
c33 A69-10112

HYPEROXIA
High oxygen tension effect on transport and incorporation of exogenous leucine and protein synthesis in Pseudomonas saccharophila cells
c04 A69-13433
Hyperoxia and hypoxia effects on mitotic activity in regenerating and normal rat liver exposed to environmental conditions
c04 A69-43565

HYPERSONIC AIRCRAFT
Fluidic type temperature sensor for total temperature measurement for hypersonic aircraft in atmosphere
c14 A69-16755
Drag influence on mission performance of hypersonic aircraft during climb and cruise, noting payload capacity
c02 A69-37154
Transonic aerodynamic characteristics of two hypersonic cruise configurations
[NASA-TM-X-1816] c01 N69-29231
Experimental and theoretical study of symmetrical and cambered Delta wing configuration between Mach 2.0 and 10.7
[NASA-TN-D-5272] c01 N69-29269
Wind tunnel study of open-face honeycomb to reduce temperature of hypersonic aircraft structure
[NASA-TN-D-5278] c33 N69-29599
Wind tunnel stability tests to determine effect of hypersonic research engine on aerodynamic characteristics of research aircraft
[NASA-TM-X-1840] c01 N69-38612

HYPERSONIC BOUNDARY LAYER
Density and velocity fluctuations in hypersonic turbulent boundary layer based on Wallace data
c12 A69-31908
Free stream disturbances influence on hypersonic boundary layer transition Reynolds number in heated and unheated flows
[AIAA PAPER 69-704] c12 A69-33453
Compressible hypersonic turbulent boundary layers solution by finite difference method, relating mixing length to velocity profile shape factor
[AIAA PAPER 69-684] c12 A69-33474

HYPERSONIC FLOW
Hypersonic flow distribution and separation types over highly swept Delta wing with trailing edge flaps at Mach 6
[AIAA PAPER 68-97] c01 A69-12522
Hypersonic body shaping for minimum drag and improved performance from view of flight regimes, discussing implications of pressure laws
[AIAA PAPER 69-181] c01 A69-18052
Three dimensional hypersonic steady flow around blunt and pointed cones at nonzero angles of attack calculated by method of characteristics
[AIAA PAPER 69-187] c01 A69-18176
Drag coefficients for spheres and sharp cones in rarefied hypersonic air flow obtained in shock tunnel using free flight technique
[AIAA PAPER 69-140] c01 A69-18184
Supersonic Preston tube correlations for Mach number and Reynolds number effects on hypersonic turbulent skin friction on adiabatic surfaces, simplifying correlation
[AIAA PAPER 69-345] c12 A69-28280
Subliming ablation effects on boundary layer transition for cones in hypersonic flow, discussing Reynolds numbers measured in wind tunnel tests
[AIAA PAPER 68-40] c01 A69-31881
Boundary layer trip geometry, size and location effects on position of transition at hypersonic speeds
c12 A69-33249
Surface pressure and heat transfer over blunt conical body in hypersonic flow with uniform mass addition of various gases
[AIAA PAPER 69-716] c01 A69-33463
Electron beam fluorescence probe and afterglow investigation for hypersonic He flow visualization, observing qualitative structure
c11 A69-35722
Mach 42 test measuring surface pressures, surface heat transfer rates and shock wave shapes in strong interaction regime for sharp and blunt plates
[AIAA PAPER 68-720] c01 A69-41886
Radiation equilibrium temperature measured downstream of transpiration cooled gas flow near slender cone vertex in continuous flow hypersonic tunnel
c01 A69-43588
Real helium hypersonic flow parameters for pressures to 3600 atmospheres and temperatures to 15,000 deg K applicable to hotshot type wind tunnels
[NASA-TN-D-4869] c12 N69-10443
Effect of unit Reynolds number, nose bluntness, angle of attack, and roughness on transition on 5 degree half-angle cone at Mach 8
[NASA-TN-D-4961] c01 N69-14872
Series solution for hypersonic flow about blunt bodies
[NASA-CR-1266] c33 N69-18125
Flow field from forward facing nozzles exhausting near large cylindrical body at free-stream Mach numbers of 3.0 and 6.0
[NASA-TN-D-5030] c01 N69-21000
Leading edge effects on laminar flat plate boundary layer and aerodynamic heating at Mach 10.4
[NASA-TN-D-5160] c12 N69-23467
Real gas effects on hypersonic aerodynamics of blunt vehicles simulated with tetrafluoromethane
[NASA-TR-R-312] c01 N69-29270
Boundary layer and chemical reactions in hypersonic gas flow
[NASA-TT-F-549] c33 N69-31947

Aerodynamic drag effects of hypersonic magnetohydrodynamic plasma flow around blunt bodies
[NASA-CR-1393] c25 N69-34897
Minimum drag bodies in hypersonic flow using calculus of variations
[NASA-TN-D-5438] c01 N69-36699
Turbulent boundary layer measurements on axisymmetric hypersonic nozzle walls
[NASA-TN-D-5433] c12 N69-36805
Flow field and drag characteristics of several laminar boundary layer tripping element in hypersonic flow
[NASA-TN-D-5454] c12 N69-38156

HYPERSONIC HEAT TRANSFER
Flow characteristics and wall heat transfer in separated flow region of annular cavity at free stream hypersonic speed and high gas temperature
[AIAA PAPER 68-672] c01 A69-37185
Mach 42 test measuring surface pressures, surface heat transfer rates and shock wave shapes in strong interaction regime for sharp and blunt plates
[AIAA PAPER 68-720] c01 A69-41886

HYPERSONIC REENTRY
Hypervelocity reentry simulation problems for slender and blunt bodies, defining significant parameters
c30 A69-30376

HYPERSONIC SHOCK
Shock shape and surface pressure measurements on hypersonic pointed cones in helium
[NASA-TN-D-5343] c01 N69-31228

HYPERSONIC SPEED
Mach number, cone angle, bluntness and wall to recovery temperature ratio effects on slender cones boundary layer transition measurements at hypersonic speeds
c01 A69-33250
Calculated and experimental hinge moments on trailing-edge flaps of swept Delta wings at hypersonic speeds and positive deflection angles
[NASA-TN-D-4268] c01 N69-10054
Heat transfer and pressure distributions inside hinge line gap of wedge-flap combination at hypersonic speeds
[NASA-TN-D-4911] c01 N69-11009
Hypersonic aerodynamic characteristics of low fineness ratio variable geometry logistics spacecraft model
[NASA-TM-X-1701] c01 N69-13218
Laminar heat transfer distributions for blunted-cone, cone frustum reentry configuration at hypersonic speed using Reynolds number
[NASA-TN-D-5146] c33 N69-22997
Solution for shock layer energy equation with mass and convective heat transfer at hypersonic speed
[NASA-TN-D-5246] c12 N69-33421
Numerical calculation of inviscid adiabatic flow field around blunt bodies at hypersonic speeds
[NASA-TN-D-5434] c12 N69-36830
Upwash patterns on ablating and nonablating cones at hypersonic speeds
[NASA-TN-D-5346] c12 N69-37370
Convective heat transfer rates on large angle conical bodies at hypersonic speeds
[NASA-TN-D-5526] c33 N69-40780

HYPERSONIC TEST APPARATUS
Hypersonic surface measurements and flowfield properties about slender cones in hypersonic viscous interaction regime
[AIAA PAPER 68-2] c01 A69-12520

HYPERSONIC VEHICLES
Cone-conical-frustrum configurations meeting center of gravity requirements for higher hypersonic lift-drag ratios in axisymmetric manned spacecraft
c01 A69-39237

HYPERVELOCITY FLOW
Pressure and temperature surveys of Mach 27-47 nozzle boundary layer at Ames M-50 He tunnel, determining velocity profiles, wall friction coefficient, etc
[AIAA PAPER 69-686] c12 A69-33441
Solution to radiation-coupled stagnating flow with nongray emission over hypervelocity blunt body
[NASA-TR-R-299] c33 N69-16268

HYPERVELOCITY IMPACT
Numerical method for time dependent compressible Navier-Stokes equations applied to axisymmetric flow field produced by hypervelocity impact, examining viscous effects
[AIAA PAPER 69-354] c32 A69-28288
Impact crater cross section in fused silica, describing photomicrographic technique for distinguishing hypervelocity from low energy impacts
[AIAA PAPER 69-367] c32 A69-28299
Hypervelocity micrometeor impact sites identification on aluminized glass, using conchoidal pattern as criterion in analysis
c30 A69-34952
Theoretical prediction of crater size in Al alloy for hypervelocity impact by reduced density particles
[NASA-CR-1196] c32 N69-10225
Projectile shape effects on hypervelocity impact craters in aluminum
[NASA-TN-D-4953] c32 N69-14315
Response of infinite elastic plates to axisymmetric initial velocity distributions with application to hypervelocity impact
[NASA-TN-D-5118] c32 N69-23448
Initial hydrodynamic phase of hypervelocity impact analyzed by computer program using eigenvector approach
[NASA-TR-R-298] c32 N69-24765
Momentum transfer from impact into thin aluminum meteor bumper targets
[NASA-TN-D-5492] c32 N69-38809

HYPERVELOCITY PROJECTILES
Bremsstrahlung spectra from bombardment of typical spacecraft materials by monoenergetic electrons
[NASA-CR-1377] c24 N69-33416

HYPOXIA
Hyperoxia and hypoxia effects on mitotic activity in regenerating and normal rat liver exposed to environmental conditions
c04 A69-43565
Respiratory system and oxygen metabolism regulation in man and animals
[NASA-TT-F-501] c04 N69-31401
Adaptation to hypoxia, acclimatization, and conditioning in human and animal subjects from Space Biology collection
[NASA-TT-F-580] c04 N69-32131

HYSTERESIS
Hysteresis of strain gage absolute pressure transducer
[NASA-TN-D-5327] c14 N69-30506

I

IBM 360 COMPUTER
Minitrack data reduction procedures, with IBM 360 computer program description
[NASA-TN-D-5042] c08 N69-26193

IBM 7040 COMPUTER
Computer experiments on the microscopic behavior of one dimensional electrostatic plasma
[NASA-TN-D-4831] c25 N69-10471

ICE
Critique of paper on water crystal existence on Venus, presenting arguments against existence of clouds of micron sized ice crystals
c30 A69-11292
Absorption of black-body radiation by ice cryodeposits on metal substrates
[NASA-TN-D-5181] c23 N69-22769

IDENTIFYING
Applications of quasi-linearization theory to system identification
[NASA-TN-D-5300] c19 N69-29648

IGNEOUS ROCKS
Partition coefficients between natural melts and plagioclase phenocrysts determined for rare earth elements and barium by mass spectrometry
c13 A69-20944
Hydration, oxidation, and origin of calc-alkali differentiation series of igneous rocks
[NASA-TN-D-5400] c13 N69-40893

IGNITERS
Development and test firing of improved igniter for first stage retrorockets of Atlas Centaur launch vehicle
[NASA-TM-X-1676] c28 N69-13275

IGNITION
Ignition hazards in electrical circuits

contaminated by glycol fluids, describing hazard detection by RF methods, decontamination procedures, safety checks, etc
c18 A69-36028
ILLUMINATING
Illumination in cryogenic or noncryogenic fluids by standard light bulbs
[NASA-TM-X-1654] c14 N69-13176
ILMENITE
Chemical analysis and paragenesis of manganoan ilmenite from Sierran adamellite using electron microprobe
c13 A69-35977
Ilmenite composition in equilibrated ordinary chondrites, analyzing Fe, Mg, Ti and Cr content
c30 A69-42890
IMAGE CONTRAST
Optimizing spacecraft televisions for successive picture overlapping and maximum surface resolution during planetary descent
[NASA-TN-D-5061] c14 N69-17259
IMAGE CONVERTERS
Image converter camera and astronomical telescope arrangement for photographing metal diaphragm openings in shock tube
c14 A69-37227
IMAGE DISSECTOR TUBES
Image dissector meteorological cameras, discussing ATS-3 and Nimbus systems, high resolution camera and multispectral cameras
c14 A69-35101
Electronically scanned star sensor with digital output for orbiting astronomical telescope
[NASA-TN-D-5281] c14 N69-29153
IMAGE INTENSIFIERS
High resolution and image intensity of field ion microscope at low temperatures
[NASA-TN-D-5125] c14 N69-21408
IMAGE ORTHICONS
Rocket trajectory determination by tracking onboard light source against star background with image orthicon TV system
c07 A69-26965
IMAGERY
Conference on motion degraded images and correcting procedures - optical filters and digital methods for blurring removal from photographic imagery
[NASA-SP-193] c14 N69-33322
IMAGING TECHNIQUES
Aerospace sensor systems, discussing adaptive multimode sensors and multispectral sensing, electronic recognition of image components, laser radar and Raman scattering technique
c14 A69-13851
Single and double mirror systems geometrical optical image aberrations noting focal number, angle of field, secondary magnification and mutual position tolerances
c23 A69-24836
Image dissector meteorological cameras, discussing ATS-3 and Nimbus systems, high resolution camera and multispectral cameras
c14 A69-35101
Extended source Fourier transform holography for single image synthesis of multiple identical images produced by multiple pinhole camera in X ray astronomy
c14 A69-40019
Conference on motion degraded images and correcting procedures - optical filters and digital methods for blurring removal from photographic imagery
[NASA-SP-193] c14 N69-33322
IMP
Interplanetary magnetic field fluctuations obtained by IMP 2
c30 A69-16264
Cosmic ray detectors design for medium, low and very low energy events on IMP-1 spacecraft, noting PCM format
c07 A69-41738
IMPACT DAMAGE
Spacecraft sterilization requirements, evaluating viable organisms release probability from spacecraft as function of equipment fracturing
c04 A69-25460
Impact crater cross section in fused silica, describing photomicrographic technique for distinguishing hypervelocity from low energy impacts
[AIAA PAPER 69-367] c32 A69-28299
Experimental and analytical studies of multiple liquid impact erosion of aluminum and stainless steel
[NASA-CR-1288] c15 N69-19786
IMPACT LOADS
Inflatable landing system investigated for impact normal to smooth surface
[NASA-TN-D-5236] c32 N69-26223
Cosmic dust sensor experiment on Pioneer 8 space probe
[NASA-TN-D-5267] c30 N69-31058
IMPACT TESTS
FM/AM telemetry circuits with three axis piezoelectric accelerometer for measurements during impact tests of soft landing models
c07 A69-23279
Aluminum double sheet target penetration resistance determined by studying high velocity pyrex glass impact effects on front/rear sheets and spacing
[AIAA PAPER 69-375] c32 A69-28305
Full scale dynamic landing impact investigation of prototype lunar module landing gear
[NASA-TN-D-5029] c31 N69-20965
Crater characteristics of 11 metal alloys under hypervelocity impact including effects of projectile density and target temperature
[NASA-TN-D-5135] c32 N69-22994
Forces on flexible shells of Apollo command module during water impact
[NASA-TM-X-1781] c32 N69-23697
IMPEDANCE PROBES
High speed compression waves, rarefaction waves and gas interface regions position and velocity measurement in shock tube by sensing electrical impedance
c14 A69-13104
IMPELLERS
Impeller matching effects on flow range and stability operating in liquid hydrogen
[NASA-TM-X-1727] c28 N69-16213
IMPINGEMENT
Impingement forces, moments, and centers of pressure due to air jets in vacuum sphere
[NASA-TN-D-5147] c12 N69-23085
IMPURITIES
Impurity profiles and energy band diagram for cuprous sulfide-CdS heterojunction based on capacitance, Hall and electron microprobe measurements
c03 A69-13075
Impurity profile and energy band diagram for cuprous sulfide-cadmium sulfide heterojunction
[NASA-TN-D-5079] c26 N69-19781
Electrical conductivity of lanthanum fluoride single crystal with calcium impurities
[NASA-TN-D-5505] c26 N69-40056
IN-FLIGHT MONITORING
Radiation protection plan for Apollo lunar mission based on real time monitoring of solar activity and radiation in spacecraft
[AIAA PAPER 69-19] c29 A69-18113
Onboard checkout system concept, discussing philosophy, requirements, underlying considerations, system description, development and techniques of system selection
c11 A69-25081
Jet engine compressor stalls in-flight investigation up to Mach 2 on F-111A by pressure sensors, noting steady state distortion role
[AIAA PAPER 69-488] c28 A69-32706
INCIDENT RADIATION
Solar absorptance and hemispherical emmitance of metals at space conditions determined with cyclic incident radiation technique
[AIAA PAPER 69-60] c17 A69-18154
Lunar surface thermal radiation incident on unit area flat surface located at variable distance and orientation above moon, considering diffusion effects
c30 A69-38973
Photomultiplier tubes performance enhancement by light incidence on photocathode at oblique angles explained by reflection
c23 A69-42194

INCOMPRESSIBLE FLOW
Incompressible two dimensional turbulent boundary layer equations with arbitrary pressure distribution solved by weighted residual method
[AIAA PAPER 69-397] c12 A69-30478
Incompressible turbulent boundary layer analysis by two region characterization for eddy viscosity, using Spalding generalized function and Prandtl free shear flow model
c12 A69-33255
Conducting fluid incompressible flow in entrance of MHD channel by momentum integral method, permitting edge stress existence at boundary layer free stream interface
[AIAA PAPER 69-724] c12 A69-33436
Laminar incompressible viscous flow in short cylindrical vortex chamber with finite swirl ratio
[NASA-TN-D-5132] c12 N69-21400
INCOMPRESSIBLE FLUIDS
Survey of incompressible and compressible fluid film hydrostatic and hydrodynamic lubrication
[NASA-SP-5058] c15 N69-28592
INDEPENDENT VARIABLES
PCM bit synchronizer/signal conditioners performance characteristics and specification
c09 A69-19120
Survey of rocket soundings to 60 km, and 100 km
[NASA-CR-1293] c13 N69-18700
Integral transformations used in time variable parameter estimation
[NASA-TN-D-5194] c19 N69-23788
Hydrogen gas pressure requirements during pressurization and transfer of liquid hydrogen from spherical tanks
[NASA-TN-D-5387] c28 N69-33211
INDEXES (DOCUMENTATION)
NASA scientific and technical information program for building technical data and literature repository for scientists, engineers and technical managers, describing IAA and STAR
[UN PAPER 68-95317] c34 A69-17068
Combined selective listing of NASA scientific and technical reports announced during 1968
[NASA-SP-7033] c34 N69-29492
Indexed and abstracted references to reports and articles on management available in NASA information system
[NASA-SP-7500/03/] c34 N69-32430
Bibliography of systems approach to management
[NASA-SP-7501] c34 N69-34917
Annotated bibliography and indexes on aerospace medicine and biological effects - May 1969
[NASA-SP-7011/64/] c04 N69-38242
INDIAN OCEAN
Tiros 7 monthly maps of infrared radiation over Indian Ocean area
[NASA-TN-D-5101] c13 N69-23318
INDICATING INSTRUMENTS
Leak detection for aerospace hardware, discussing equipment, operations, checkout, etc
c15 A69-30315
INDIUM
Backward diodes in indium arsenide for microwave mixing
[NASA-TN-D-5401] c09 N69-36706
INDUCTANCE
Inductance behavior of coils filled with superconducting lead or niobium dusts
[NASA-TN-D-5137] c26 N69-21500
INDUCTION HEATING
Spectral emission characteristics of gaseous tungsten and uranium in induction heated argon plasmas
[NASA-CR-1314] c25 N69-22920
Technology utilization of induction heating systems up to 5800 deg F
[NASA-SP-5071] c03 N69-23643
INDUCTORS
Analysis and design of inductors for protecting power transistors against current surges in inverter bridge circuits
[NASA-TN-D-4995] c10 N69-16198
Digital computer program for homopolar inductor alternator electromagnetic design analysis
[NASA-TN-D-5072] c03 N69-19799
Motor starting characteristics of two inductor alternators
[NASA-TM-X-1912] c03 N69-40440
INDUSTRIAL SAFETY
Treatment procedure and preventive programs outlined for acute exposure to toxic rocket fuels or oxidizers
c05 A69-12498
INDUSTRIES
Application of NASA mathematical management models and systems analyses in private industry and economy
[NASA-SP-5048] c34 N69-10662
Technology utilization by industries of aerospace sciences and systems - conferences
[NASA-SP-5075] c34 N69-31946
INELASTIC SCATTERING
Angular correlation of inelastically scattered alpha particles and gamma rays emitted from 2-plus state of Sn 120
c24 A69-13098
Angular correlation between inelastically scattered 42 MeV alpha particles and emitted gammas from 2-plus Ni 58
c24 A69-13100
Inelastic scattering cross sections calculated, comparing results for various nuclear states expressed as Wood-Saxon radial and harmonic oscillator functions
c26 A69-29006
Core polarization effects in inelastic scattering cross sections for several nuclei in 2s-1d shell, using Hartree-Fock wave functions and Born approximation
c24 A69-29007
Inelastic proton scattering cross sections for target nuclei in 2s-1d shell calculated in distorted wave Born approximation with projected Hartree-Fock wave functions
c24 A69-41045
INERTIA
Transverse shear deformation and rotary inertia effects in vibrating beams
[NASA-CR-1317] c32 N69-24056
INERTIAL GUIDANCE
Historical developments in aviation and astronautics including liquid propellant rocket engine design, electric rocket engines, aircraft engines, and inertial guidance
[NASA-TT-F-540] c34 N69-31836
INERTIAL NAVIGATION
Guidance and navigation flight tests, demonstrating system performance improvements by onboard inertial system communicating with external navigation aid
[AIAA PAPER 69-842] c21 A69-39429
V/STOL aircraft radar inertial navigation system, describing approach and landing phase flight test results
[AAS PAPER 69-401] c02 A69-42831
Computer-generated computational errors in direction cosine matrix for strapdown inertial system
[NASA-TR-R-304] c21 N69-21402
Vibration induced attitude errors in strapdown inertial navigators
[NASA-CR-1396] c21 N69-34672
INERTIAL PLATFORMS
Fourth angle driving law for different four gimbal systems used for simulation display and inertial platform isolation
c11 A69-26265
INFLATABLE SPACECRAFT
Inflatable landing system investigated for impact normal to smooth surface
[NASA-TN-D-5236] c32 N69-26223
INFLATABLE STRUCTURES
Structural and aerodynamic developments in attached inflatable decelerators for deployment of payload at supersonic speeds
[AIAA PAPER 68-929] c02 A69-39015
Inflation, drag, and stability characteristics of towed inflatable ballute decelerator at free flight
[NASA-TN-D-4943] c01 N69-17398
Wind tunnel tests of inflatable disk-gap-band and modified ringsail parachutes at low dynamic pressure
[NASA-TM-X-1786] c01 N69-23538
Supersonic deployment and extraction of inflatable towed ballute decelerator
[NASA-TM-X-1773] c31 N69-26458

Calorimetric evaluation of three 1.5-meter diameter inflatable rigidized solar concentrators for solar dynamic cycle power systems
[NASA-TN-D-5234] c03 N69-28123
Evaluation of double wall balloon enclosure for thermal control of inertial satellites
[NASA-TN-D-5230] c33 N69-28209
Free flight performance characteristics of ram air inflated recovery balloons with peripheral airscoops
[NASA-TN-D-5186] c21 N69-29595
Large scale wind tunnel investigation of lifting body with inflatable and rigid afterbody
[NASA-TN-D-5468] c01 N69-38775

INFORMATION RETRIEVAL
NASA scientific and technical information program for building technical data and literature repository for scientists, engineers and technical managers, describing IAA and STAR
[UN PAPER 68-95317] c34 A69-17068
NASA current awareness service SCAN /selected current aerospace notices/, promoting selectivity in information transfer to abstract journals, accession lists and bibliographies c34 A69-39581
Remote information retrieval facility description
[NASA-CR-1318] c08 N69-23381

INFORMATION SYSTEMS
NASA current awareness service SCAN /selected current aerospace notices/, promoting selectivity in information transfer to abstract journals, accession lists and bibliographies c34 A69-39581

INFORMATION THEORY
Huffman minimum redundancy coding extension to run-length information based on Poisson distribution, including optimization and data compression applications c07 A69-36262
Communication and information theories for digital and analog systems design
[NASA-TN-D-5472] c07 N69-39176

INFRARED ASTRONOMY
Balloon-borne instrumentation for detection of far IR extended emission regions and bright point sources, describing results of initial flights c30 A69-27599
HgCdTe as IR satellite detector for terrestrial, atmospheric and ocean mapping, IR astronomy and optical communication c26 A69-43666

INFRARED DETECTORS
Earth resources remote sensing from spacecraft noting meteorology, oceanography, forestry, agriculture and IR detection of plant diseases and pollution c34 A69-26978
HgCdTe as IR satellite detector for terrestrial, atmospheric and ocean mapping, IR astronomy and optical communication c26 A69-43666
Mercury cadmium telluride as 1 to 20 micrometer wavelength infrared detector for space applications
[NASA-TN-D-4904] c26 N69-10125
Visible and infrared transmitting properties of epoxy resin suitable for infrared detectors
[NASA-TM-X-1776] c18 N69-23843

INFRARED INSTRUMENTS
Balloon-borne instrumentation for detection of far IR extended emission regions and bright point sources, describing results of initial flights c30 A69-27599

INFRARED LASERS
Frequency and stability measurements in far IR laser region c16 A69-18482
Iodine IR laser, discussing CW emission obtained at various wavelengths and attributed to electronic transitions in atom
[IEEE PAPER T-5] c16 A69-19082

INFRARED PHOTOGRAPHY
HD 30353 He binary star invisible component suggested as KO type supergiant from IR photometric data c30 A69-35348
Surface temperature mapping with infrared photographic pyrometry for turbine cooling investigations
[NASA-TN-D-5179] c14 N69-23895

INFRARED RADIATION
IR radiation of NML Cygnus with O/C ratio close to unity ascribed to circumstellar shell of graphite particles c30 A69-13775
Inverse problems in radiative transfer applied to remote measurements of IR radiation from planetary atmospheres, noting temperature and water vapor inversions c13 A69-17617
Thermal and free-free emission from planetary nebulae based on graphite grain model, discussing IR fluxes c30 A69-27158
Residual interstellar gas from protostar formation detected as high luminosity IR object c29 A69-27593
Water vapor profiles in stratosphere from IR radiometric observations under cloudless conditions, indicating relation to tropospheric meteorological features c13 A69-38261
Thermal calculations of objects near lunar surface, considering IR emission directivity effects c30 A69-43254
Detecting geomorphological features over northeast Africa by Nimbus 2 visible and infrared radiation measurements
[NASA-TN-D-4648] c13 N69-14290
Infrared horizon radiance profiles for winter conditions based on Scanner project flight test
[NASA-TN-D-4905] c21 N69-14346
Nimbus 2 high resolution infrared radiometer data on earth resources of arid and subarid lands
[NASA-TN-D-4647] c13 N69-14450
Thermal and dielectric properties of homogeneous moon based on microwave and infrared temperature observations
[NASA-TM-X-1734] c30 N69-17815
Tiros 7 monthly maps of infrared radiation over Indian Ocean area
[NASA-TN-D-5101] c13 N69-23318
Infrared radiation measurements in space environment simulator using integral equations
[NASA-TN-D-5166] c29 N69-28111
Infrared heating simulation of Mach 4.63 flight on X-15 horizontal stabilizer
[NASA-TN-D-5403] c33 N69-35949

INFRARED REFLECTION
Ice clouds near IR spectral reflectivity dependence on particle size, noting application to planetary atmospheres c13 A69-34283

INFRARED SPECTRA
Atmospheric ozone vertical distribution and total amount determined by radiative transfer and perturbation theory, presenting error analysis c13 A69-28493
Ice clouds near IR spectral reflectivity dependence on particle size, noting application to planetary atmospheres c13 A69-34283
Vertical tropospheric humidity distribution estimation from IR spectra obtained by TIROS satellites c13 A69-34284
IR directional and hemispherical emittance of spacecraft thermal control coatings, comparing values determined by various measurement techniques c14 A69-41633
IR excess of R CrB type variable star RY Sgr, noting visual brightness and radiation in 2.0-3.4 micron range c30 A69-42377

INGREDIENTS
Determination of micromorphic material constants from elastic properties of constituents
[NASA-CR-1320] c32 N69-21569

INHOUR EQUATION
Pulsed neutron source studies to determine shutdown reactivities of unreflected solution reactor
[NASA-TN-D-5487] c22 N69-39186

INITIATORS (EXPLOSIVES)
Pretesting techniques of suppliers and users and

effects on electroexplosive devices
[NASA-CR-1203] c15 N69-10298
INJECTION
Injection of attached inviscid jet at oblique angle to moving stream
[NASA-TN-D-5501] c12 N69-39916
INJECTORS
Double-dead-time model describing chugging to liquid propellant rocket engines having multielement injectors
[NASA-TN-D-5303] c28 N69-29405
Design of injectors and ablative thrust chambers for FLOX propane rocket engine with 1.2 inch throat diameter
[NASA-TN-D-5324] c28 N69-30560
Injector radial distribution and thrust chamber geometry effect on acoustic mode instability in hydrogen oxygen engines
[NASA-TN-D-5375] c33 N69-32340
Dynamic stability and performance of injectors, rocket liners, and supersonic combustors
[NASA-TM-X-1845] c33 N69-32468
INJURIES
Biomechanical factors determining lung damage following explosive decompression of space suits in vacuum test chambers
[NASA-CR-1223] c05 N69-13969
INLET FLOW
Exhaust gas reingestion and inlet flow distortion in V/STOL lift engines, discussing static and wind tunnel testing using fighter configuration models
[AIAA PAPER 68-78] c01 A69-26762
Inlet thermal boundary layer thickness effect on conical nozzle heat transfer and boundary layer determined by operating nozzle with cooled/uncooled inlet
[AIAA PAPER 69-474] c33 A69-32780
Conducting fluid incompressible flow in entrance of MHD channel by momentum integral method, permitting edge stress existence at boundary layer free stream interface
[AIAA PAPER 69-724] c12 A69-33436
Hydrodynamic inlet conditions effect on film boiling and near critical hydrogen heat transfer, using data from electrically heated various geometry test sections
[ASME PAPER 69-HT-27] c33 A69-43541
Performance tests of wind tunnel model inlet for bleed system back pressure and porous area effect of axisymmetric compression
[NASA-TM-X-1710] c01 N69-14075
Theoretical analysis of axisymmetric flow in VTOL lift fan inlets without crossflow
[NASA-TN-D-5065] c01 N69-17831
Performance and stall limits of YTF30-P-1 turbofan engine with uniform compressor inlet flow
[NASA-TM-X-1803] c28 N69-27019
INLET NOZZLES
Large scale axisymmetric inlet systems performance capabilities, reviewing theoretical and experimental programs
[AIAA PAPER 68-580] c28 A69-34018
INLET PRESSURE
Flow analysis to determine turbine efficiency as function of inlet temperature for two stage turbine
[NASA-TM-X-1728] c01 N69-17392
INNER RADIATION BELT
Inner radiation zone including data on electrons, protons and heavier particles and results from high altitude nuclear tests
c29 A69-27144
Model environment of inner belt proton fluxes
[NASA-SP-3024-VOL-5] c24 N69-28911
INPUT
Problem of identifying input-output of pilot by measuring data from flight tests with pilot providing feedback control
[NASA-TN-D-5127] c05 N69-23842
INPUT/OUTPUT ROUTINES
Concepts of theory of fuzzy systems
[NASA-CR-1432] c19 N69-37033
INSECTS
Viruslike particles in fat body cells and oenocytes of Drosophila melanogasters imagoes, in glial cells of cephalic ganglionic center of flies and in gamma radiated cells
c04 A69-42021
INSPECTION
High pressure storage vessels for gaseous hydrogen, discussing failure, manufacturing controls and access for internal nondestructive inspection
[ASM PAPER D8-14.1] c15 A69-19666
INSTRUMENT APPROACH
Influence of angle of glide slope on accuracy of performing instrument approaches in simulator tests
[NASA-TN-D-4835] c21 N69-10056
INSTRUMENT COMPENSATION
Radiation compensating thermocouple for gas temperature measurement, noting advantage over single thermocouples
c14 A69-14916
INSTRUMENT ERRORS
Radiation ccmpensating thermocouple for gas temperature measurement, noting advantage over single thermocouples
c14 A69-14916
Root mean square time delay error with respect to playback time and autocorrelation function of tape recorded sine wave for studying jitter spectra
c14 A69-18827
Error analysis of high resolution balloon-borne temperature sensor and comparison of temperature data with simultaneous rawinsonde measurements
c14 A69-21642
Turbulence measurement errors with inclined hot wires described by equations, assuming normal component cooling includes greater tangential cooling
c14 A69-34442
Precision autocollimating solar sensor design for attitude alignment changes, including detector calibration and sounding rocket flight test results
[AIAA PAPER 69-858] c21 A69-39386
INSTRUMENT FLIGHT RULES
IFR flight tests of Breguet 941 STOL transport
[NASA-TN-D-4939] c02 N69-13252
INSTRUMENT LANDING SYSTEMS
Influence of angle of glide slope on accuracy of performing instrument approaches in simulator tests
[NASA-TN-D-4835] c21 N69-10056
Advanced electronic applications to navigation, data transmission, and airborne collision avoidance in general aviation aircraft and to simulated displays for low visibility landing
[NASA-CR-1240] c02 N69-14729
INSTRUMENT PACKAGES
Magnetometer experiment for Apollo project to measure lunar surface magnetic field, describing mission requirements and instrumentation
[AAS PAPER 68-206] c30 A69-11481
Manned spacecraft systems design optimization for extended space missions replacement modules
c31 A69-16380
Small Scientific Satellite program, discussing payload for investigating magnetosphere and near interplanetary space
[IEEE PAPER 3C-1] c31 A69-19195
Pyrotechnic activated calorimeter for reentry package design of vehicles entering earth atmosphere at lunar return velocities
c11 A69-23026
Simulated manual package transfer in weightless environment of Saturn Orbital Space Station
[NASA-TN-D-5111] c05 N69-21501
INSTRUMENTS
Instrumentation in the aerospace industry - Conference, Boston, June 1968, Volume 14
c11 A69-23245
Instrumentation in aerospace simulation facilities - Conference, Farmingdale, New York, May 1969
c11 A69-35714
INSULATED STRUCTURES
Gas breakdown model for analyzing breakdown of Ce vapor filled crack in thermionic trilayer insulator
c03 A69-21840
Multiwall meteoroid protection design in Apollo program, discussing bumper, backup sheet and honeycomb cells insulation
[AIAA PAPER 69-372] c32 A69-28304

INTAKE SYSTEMS
M 3.5 two dimensional mixed compression inlet system with self restart using flexible variable ramp system
[AIAA PAPER 69-447] c28 A69-32732
Transient performance of full flow hydraulic turbine driven two speed pump inducer system, formulating computer model
[AIAA PAPER 69-551] c15 A69-34415
Effects of boundary layer bleed rate and location on performance of axisymmetric inlet designed for Mach 2.5
[NASA-TM-X-1692] c01 N69-10294
Electron temperature instabilities in entrance region of magnetohydrodynamic generator
[NASA-TM-X-1761] c25 N69-20875
Characteristics study of bicone mixed compression inlet for Mach 1.80 to 2.50
[NASA-TN-D-5084] c01 N69-20914
Steady-state interactions between turbojet engine and axisymmetric inlet with induced distortions
[NASA-TM-X-1780] c28 N69-23519
Tandem bladed inducer tested in water for cavitation corrosion
[NASA-TN-D-5134] c01 N69-23769
Prediction of cavitation performance of centrifugal pumps
[NASA-TN-D-5292] c15 N69-29165
Two phase hydrogen flow in pump inlet line
[NASA-TN-D-5258] c15 N69-29476
Noncavitating and cavitating performance of inducer in liquid hydrogen
[NASA-TM-X-1854] c12 N69-33261
INTEGRAL EQUATIONS
Integral equation method with continuous functions for calculating boundary stress components in plane elasticity
[NASA-CR-1273] c32 N69-19030
Sonic boom propagation in stratified atmosphere using FORTRAN computer program with integral and differential equations
[NASA-CR-1299] c02 N69-22546
Vinti dynamic problem relevance to prediction of satellite orbits using differential and integral equations
[NASA-TR-R-307] c30 N69-22948
Momentum integral method treating magnetohydrodynamic and simple hydrodynamic entrance flows
[NASA-TN-D-5215] c25 N69-24920
Infrared radiation measurements in space environment simulator using integral equations
[NASA-TN-D-5166] c29 N69-28111
Integral relations solution for radiating, nonadiabatic, inviscid flow over blunt body
[NASA-TN-D-5480] c33 N69-40356
INTEGRAL TRANSFORMATIONS
Integral transformations used in time variable parameter estimation
[NASA-TN-D-5194] c19 N69-23788
INTEGRATED CIRCUITS
Hybrid integrated parametric amplifier design considerations for fabrication in microstrip transmission line
c09 A69-10193
Metal oxide semiconductor integrated circuits, showing failure rates and degradation causes
c09 A69-31851
Scanning electron mirror microscope advantages over electron mirror and scanning electron microscopes for examining integrated circuits
c14 A69-32891
Al interconnections discontinuities at integrated circuit contact windows observed by scanning electron microscope, noting catastrophic failure and Si presence
c09 A69-32893
Fluidic integrated circuits for control of pneumatic stepping-motor actuator system
[NASA-TN-D-5155] c03 N69-22896
Reliability handbook for silicon monolithic microcircuits - applications
[NASA-CR-1346] c09 N69-23225
Reliability handbook for silicon monolithic microcircuits - failure mechanisms
[NASA-CR-1347] c09 N69-23226
Reliability handbook for failure analysis of silicon integrated microcircuits
[NASA-CR-1348] c09 N69-25328
Holographic microscopy for performance prediction and quality control of semiconductor devices and integrated circuits
[NASA-CR-1394] c14 N69-31958
INTELLECT
Evaluation of computer aids to augment human intellectual capability
[NASA-CR-1270] c08 N69-16140
INTERATOMIC FORCES
He 2 excitation spectrum for interparticle potential using pair Hamiltonian with repulsive core and attractive well
c24 A69-33118
INTERFACE STABILITY
Cylindrical bubbles stability in vertical pipes from photographs, describing wake, spacing, pressure pulsations and convection cells effects
[ASME PAPER 69-HT-28] c33 A69-43540
INTERFACES
Energetics in solid film lubricants vacuum deposition methods, showing dependence on interfacial and film characteristics
c15 A69-29001
INTERFACIAL TENSION
Influence of surface films on friction and deformation of single crystal and polycrystalline gold
[NASA-TN-D-4875] c15 N69-10249
Droplet wake minimization by surface tension changes
[NASA-CR-1368] c12 N69-24958
Surface tension, viscosity, and density of fluorocarbon solvents as function of temperature
[NASA-TM-X-1862] c18 N69-34134
INTERFERENCE
FORTRAN programs for calculating wind tunnel boundary interference factors
[NASA-TM-X-1740] c01 N69-17818
INTERFERENCE DRAG
Computer program for calculating wall interference factors of V/STOL aircraft and conventional airplanes
[NASA-TR-R-302] c01 N69-19028
Numerical method for evaluation and utilization of supersonic nacelle-wing interference
[NASA-TN-D-5057] c01 N69-19641
INTERFERENCE LIFT
Lift loss and jet decay measurements on hovering vertical takeoff aircraft models
[NASA-CR-1297] c01 N69-21477
INTERFEROMETERS
Navigation satellites system designed for ATC without requirement for onboard transmitter, discussing spectrum occupancy, satellite power, lane ambiguities and computational procedures
c21 A69-19212
INTERGRANULAR CORROSION
Dynamic creep model to determine oxidation effects on high temperature deformation of nickel
[NASA-TN-D-5266] c17 N69-27061
INTERMOLECULAR FORCES
Interaction energy and dipole moment in collisions of two hydrogen molecules
[NASA-TN-D-5486] c24 N69-39184
INTERNAL COMPRESSION INLETS
Numerical analysis of shock control by using perforated walls in internal compression supersonic inlets
[NASA-TR-R-317] c01 N69-32338
INTERNAL FRICTION
Internal friction measurement apparatus for nonmetallic solids, noting variations of Young modulus in extremely low loss materials
c14 A69-13108
INTERNATIONAL COOPERATION
International experimentation with U.S. communications satellites, noting design variations with participants and restraintless information exchange
[UN PAPER 68-95421] c20 A69-10474
NASA programs and opportunities for international cooperation in space
[UN PAPER 68-95367] c34 A69-10516
International liability for damage caused by launching of objects into outer space
[UN PAPER 68-95337] c34 A69-10525
International 28-station global instrumentation ground support network for space tracking and data acquisition

[UN PAPER 68-95912] c34 A69-17059
Summary of operation, communications, and other experiments of Relay 2 satellite
[NASA-SP-151] c31 N69-21065
INTERNATIONAL LAW
International legal liability for personal injury or property damage caused by space activities c34 A69-37127
INTERNATIONAL QUIET SUN YEAR
IQSY low energy galactic and solar cosmic ray observations made by various satellites and space probes, including hydrogen and helium energy spectra c29 A69-30014
INTERPLANETARY FLIGHT
Voyage to planets - Conference, Washington, D.C., March 1967 c30 A69-12301
Interplanetary low thrust mission analysis model, discussing major elements interactions c30 A69-21206
Evaluation method for strapdown spacecraft guidance systems on automated interplanetary missions, using cost and system performance efficiency probability model
[AIAA PAPER 68-828] c21 A69-35953
Direct flight and Jupiter swingby heliocentric trajectory modes of elliptic capture orbits compared for unmanned missions to outer planets
[AAS PAPER 68-105] c30 A69-39221
Interplanetary midcourse velocity correction schedules optimization, discussing timing equations modifications, mission simulation and role of earth based radar c21 A69-39646
Interplanetary space trajectories based on Jupiter swingby flights
[NASA-TN-D-5271] c30 N69-28441
Planetary flight handbook - direct trajectories to Jupiter, Saturn, Uranus, and Neptune
[NASA-SP-35-VOL-3-PT-7] c30 N69-33490
INTERPLANETARY MAGNETIC FIELDS
Interplanetary magnetic field measurements in lunar wake, noting magnetic perturbations pattern and absence of shocks c30 A69-11228
Charged particle dynamics in spiral interplanetary magnetic field model, discussing electric drift velocity, point of origin and distribution c29 A69-14015
Interplanetary magnetic field fluctuations obtained by IMP 2 c30 A69-16264
Cosmic ray deuteron and He 3 secondary origin and determination of cosmic ray path length and residual interplanetary field modulation c29 A69-20066
Sudden commencement associated discontinuities in interplanetary magnetic field observed by IMP 3 satellite, stressing shocks and tangential and rotational discontinuities c30 A69-22183
Simultaneous interplanetary magnetic field measurements by geocentric satellites Explorer 33 and IMP 3 of MHD shock wave associated with July 8, 1966 sudden storm commencement c30 A69-23773
Microscale fluctuations in interplanetary magnetic field, considering proton thermal energy and magnetic field energy densities c30 A69-24100
Green function solution to Maxwell equations for interplanetary and coronal magnetic fields above photosphere, considering field at source surface c30 A69-24429
Interplanetary sector structure during rising portion of 1966-1967 sunspot cycle, giving recurrence period of interplanetary field c30 A69-28957
Discontinuities in interplanetary magnetic field direction presented on mesoscale from Pioneer 6 observation, emphasizing distribution in time c30 A69-29970
Solar wind existence verified by direct measurements of interplanetary magnetic field and plasma, reviewing solar corona studies by satellites and space probes c30 A69-30010
Lunar dynamic response to discontinuities in interplanetary magnetic field to determine electrical conductivity and internal temperature c30 A69-31442
Interplanetary magnetic fields from Explorer 33 magnetometer relationship to surface geomagnetic variations emphasizing unified view c30 A69-32309
Earth bow shock waves in far upstream interplanetary medium observed from magnetic data of Explorer 34 satellite c30 A69-34941
Power spectra of interplanetary magnetic field fluctuations determined from Pioneer 6 satellite data, relating results to galactic cosmic rays modulation c30 A69-37554
Solar wind plasma effects on lunar wake umbral and penumbral interplanetary magnetic field anomalies, evaluating roles of electrons and ions c30 A69-38095
High energy cosmic radiation problems
[NASA-SP-199] c29 N69-29652
INTERPLANETARY MEDIUM
Interplanetary magnetic field measurements in lunar wake, noting magnetic perturbations pattern and absence of shocks c30 A69-11228
Discontinuities in interplanetary magnetic field direction presented on mesoscale from Pioneer 6 observation, emphasizing distribution in time c30 A69-29970
Solar wind existence verified by direct measurements of interplanetary magnetic field and plasma, reviewing solar corona studies by satellites and space probes c30 A69-30010
Interplanetary shock waves structure and evolution, discussing propagation in collision free media by wave-particle interactions c30 A69-42394
High energy cosmic radiation problems
[NASA-SP-199] c29 N69-29652
INTERPLANETARY SPACE
Optimum solar cell cover glass systems selected by studying interplanetary space environment effects of proton impact, temperature and concurrent illumination on radiation damage c03 A69-35702
IMP 4 satellite measurements of cosmic ray electrons in interplanetary space compared to predictions of electron intensity from interstellar proton-electron collisions c29 A69-42667
Translunar abort technique for nonfree-return missions
[NASA-TM-X-1806] c30 N69-29569
Meteoroid environment model for cometary origin near earth to lunar surface
[NASA-SP-8013] c30 N69-40326
INTERPLANETARY SPACECRAFT
Interplanetary Pioneer spacecraft development and systems engineering aspects c31 A69-17605
Advanced reconnaissance electric planetary spacecraft /AREPS/ concept for repeated coverage of Mars or Venus surface, using solar-photovoltaic system
[AIAA PAPER 69-253] c30 A69-21244
Spacecraft sterilization requirements, evaluating viable organisms release probability from spacecraft as function of equipment fracturing c04 A69-25460
Nuclear solid core rocket engine performance for interplanetary orbital launch of spacecraft by multiorbit injection
[AIAA PAPER 69-535] c22 A69-32660
Minimal electric propulsion systems for interplanetary spacecraft, discussing payload, reduced trip time and low thrust systems for Jupiter flyby
[AIAA PAPER 69-499] c28 A69-32714
Scientific findings from interplanetary spacecraft radio propagation experiments, particularly Mariner 5 data c07 A69-35940
Propulsion system performance relationship to manned planetary mission capability, discussing

anticipated performance of advanced propulsion concepts
c28 A69-38118
Optimum structural design for Martian entry capsule configurations
[NASA-CR-1414] c33 N69-35516

INTERPLANETARY TRAJECTORIES
Midcourse maneuvers in interplanetary guidance, considering spin stabilized spacecraft flyby for Jupiter mission
c30 A69-28504
Recurrent Lagrange multipliers for optimal low thrust earth-Jupiter transfers, using three dimensional solar system model
c30 A69-41896
Matched conic solutions to round trip interplanetary trajectory problems for use in guidance and navigation simulation
[NASA-TN-D-4942] c30 N69-14861
Interplanetary probe missions with solar electric propulsion systems
[NASA-TN-D-5293] c30 N69-29738

INTERPLANETARY TRANSFER ORBITS
Direct flight and Jupiter swingby heliocentric trajectory modes of elliptic capture orbits compared for unmanned missions to outer planets
[AAS PAPER 68-105] c30 A69-39221
Thrust requirements for correcting Keplerian orbits with interplanetary guidance application
[NASA-TN-D-4945] c21 N69-14399

INTERPOLATION
Graphical interpolation charts of local skin friction from compressible velocity profiles
[NASA-SP-3048] c01 N69-25391

INTERSTELLAR GAS
Steady axisymmetric gas flow from galactic center, determining supersonic to subsonic transition by equations of motion
c30 A69-22189
Residual interstellar gas from protostar formation detected as high luminosity IR object
c29 A69-27593
Origin of galactic gamma rays, discussing evidence in support of interstellar gas in galactic disk and production of neutral pions and bremsstrahlung
c29 A69-32806
Dynamical effects in structure of H II equilibrium region left behind expanding ionization front, showing temperature as function of distance from star
c30 A69-35966
Positively charged diatomic hydrogen molecules interstellar extinction and photodissociation cross section in terms of formation mechanisms
c30 A69-42610

INTERSTELLAR MATTER
Cosmic ray propagation, discussing interstellar matter effect on composition and diffusion effect necessary to study radiation models
c29 A69-16361
Far IR source in galactic center detected at 100 microns, noting thermal emission of interstellar dust grains as possible mechanism
c30 A69-22264
Interstellar extinction models of classical Mie particles and quantum mechanical polycyclic aromatic molecules
c30 A69-23679
Extinction efficiency of graphite core interstellar grains with solid hydrogen and ice mantles, using theoretical models
c23 A69-29587
Solid para hydrogen coated graphite particles expulsion into interstellar medium from star formation regions, considering mantles stability and particles extinction efficiency, albedo and phase function
c30 A69-37492

INTERSTELLAR RADIATION
Interstellar extinction in UV from zeta and epsilon Persei spectra obtained with scanner attached to telescope mounted in pointed Aerobee rocket
c30 A69-40772

INTERSTITIALS
Internal friction, Young modulus and resistivity measurements for stage I interstitials in electron irradiated tungsten
c17 A69-28682

INTRAMOLECULAR STRUCTURES
Rotational spectrum of ethylene episulfoxide to determine molecular structure, particularly orientation of C sub 2 S ring
c06 A69-20535

INVERTERS
Development and inverter circuit tests of high temperature cesium vapor thyratrons
[NASA-CR-1435] c03 N69-36843

INVISCID FLOW
One strip method of integral relations applied to inviscid supersonic blunt body problem
c01 A69-21972
Inviscid flow of two parallel slot jets impinging normally on surface
[NASA-TN-D-4957] c12 N69-14316
Hydrodynamic stability of inviscid rotating coaxial jets
[NASA-CR-1363] c12 N69-24926
Numerical calculation of inviscid adiabatic flow field around blunt bodies at hypersonic speeds
[NASA-TN-D-5434] c12 N69-36830
Analytical solution for inviscid separated jet injection at oblique angle into moving stream
[NASA-TN-D-5460] c12 N69-37965
Injection of attached inviscid jet at oblique angle to moving stream
[NASA-TN-D-5501] c12 N69-39916
Integral relations solution for radiating, nonadiabatic, inviscid flow over blunt body
[NASA-TN-D-5480] c33 N69-40356
Numerical analysis of laminar and turbulent mixing region for two dimensional jet injected at angle to moving stream
[NASA-TN-D-5531] c12 N69-41213

IODINE
Iodine IR laser, discussing CW emission obtained at various wavelengths and attributed to electronic transitions in atom
[IEEE PAPER T-5] c16 A69-19082
Three crystal sodium iodide pair spectrometers
[NASA-TM-X-1857] c14 N69-34628

IODINE ISOTOPES
Iodine 123 decay via gamma ray emission, noting energies of several transitions
c24 A69-13099
Excited states of xenon nuclei formed in beta decay of iodine and cesium isotopes
[NASA-TN-D-5329] c24 N69-30074

ION ATOM INTERACTIONS
Frictional forces and collision frequencies for ions moving in neutral gases
c13 A69-13328

ION BEAMS
Ion accelerators design for Kaufman thrustors in terms of beam optics and grid lifetime, using digital computer and electrolytic tank analog
[AIAA PAPER 69-261] c28 A69-21261

ION CURRENTS
Cesium contact ion microthrustor experiment onboard ATS 4, measuring emission currents and spacecraft potentials
[AIAA PAPER 69-297] c28 A69-21218

ION CYCLOTRON RADIATION
Ion cyclotron wave generation in RF self sustained mode improved by installing grid structures in plasma near magnetic mirrors
c25 A69-13113
Wave fields and coupling of RF power to ion cyclotron waves in finite length thermal collisional plasma column
c25 A69-13114

ION DENSITY (CONCENTRATION)
Mars lower ionosphere ionization from spectroscopic and Mariner 4 occultation data, discussing various ionization sources
c30 A69-18607
Light ion abundance measurements of OGO satellites and field aligned diffusive equilibrium theory with temperature and concentration latitudinal variations
c13 A69-25157

ION DISTRIBUTION
Earth thermal plasmasphere contraction subsequent to solar flare obtained from ion mass spectrometers on OGO satellites
c13 A69-23777

Ion, electron and neutral temperatures from ion composition distribution, assuming no change in vertical distribution within horizontal distance between upleg and downleg measurements
c29 A69-31990

ION EMISSION
Cesium contact ion microthrustor experiment onboard ATS 4, measuring emission currents and spacecraft potentials
[AIAA PAPER 69-297] c28 A69-21218

ION ENGINES
Mercury ion thrusters and facilities automatic controls durability testing, discussing vacuum chamber systems, unattended operation and control
[AIAA PAPER 68-576] c11 A69-12385
High voltage mercury electron bombardment ion thruster power efficiency
[ECS PAPER 170D] c28 A69-16233
Cesium contact ion microthrustor experiment onboard ATS 4, measuring emission currents and spacecraft potentials
[AIAA PAPER 69-297] c28 A69-21218
30 cm diameter mercury bombardment low impulse thrustor development for potential space applications, discussing performance and control
[AIAA PAPER 69-238] c28 A69-21256
Research and development program in annular slit colloid thrustor technology, proving thrustor feasibility by performance tests
[AIAA PAPER 69-287] c28 A69-21257
Ion accelerators design for Kaufman thrustors in terms of beam optics and grid lifetime, using digital computer and electrolytic tank analog
[AIAA PAPER 69-261] c28 A69-21261
Discharge chamber plasma processes in electron bombardment ion thrustors, considering factors affecting thrustor performance
[AIAA PAPER 69-494] c28 A69-32735
Electric propulsion systems for manned planetary exploration flights, discussing arc jet, ion and plasma engines
c28 A69-35108
Power conditioner for use with SERT 2 mercury ion thrustor, describing electrical and mechanical design and operation
c03 A69-42301
Uranium dioxide vent loss in externally fueled thermionic reactor concept
[NASA-TN-D-4922] c22 N69-10099
Performance of various oxide magazine cathodes in Kaufman thrusters
[NASA-TN-D-5074] c28 N69-19980
Production of glass coatings for molybdenum ion thruster accelerator grids
[NASA-TN-D-5320] c15 N69-30062
Performance of two electron bombardment thrusters with axial magnetic field and superimposed cusp magnetic field
[NASA-TN-D-5448] c28 N69-36844

ION EXCHANGE MEMBRANE ELECTROLYTES
Manned spacecraft fuel cell selection and design, discussing Gemini ion exchange membrane and Apollo Bacon cell systems
c03 A69-32406

ION EXCHANGING
Free lysine and dinitrophenyl /DNP/ derivatives determined quantitatively by ion exchange chromatography
c06 A69-33651

ION IRRADIATION
Plasma electron beam for welding, deriving beam current from secondary emission by ion bombardment, discussing gas pressure, equipment and applications
c15 A69-35555

ION MICROSCOPES
High resolution and image intensity of field ion microscope at low temperatures
[NASA-TN-D-5125] c14 N69-21408

ION MOTION
Electric field variations in vicinity of auroral forms from motions of Ba vapor clouds released from Nike-Tomahawk rockets
c13 A69-34935

ION PRODUCTION RATES
Experimental measurements of two electron capture for negative ion production in atmospheric gases
[NASA-CR-1406] c24 N69-38564

ION PUMPS
Tritium contamination reduction in small ion accelerators for neutron production, discussing pumping problems and vacuum systems
c11 A69-26499

ION RECOMBINATION
Lower auroral ionosphere rocket measurements of electrons, positive ions and energy particles, deriving height variation of ion pair production and ion-ion recombination
c13 A69-32187

ION SOURCES
Experimental measurements of two electron capture for negative ion production in atmospheric gases
[NASA-CR-1406] c24 N69-38564

ION TEMPERATURE
Electron, ion and neutral particle temperatures of upper atmosphere
c13 A69-14975
Ion temperature diurnal variations at 250-475 km obtained from Thomson scatter spectra
c13 A69-16407
Ion composition and charged particle temperatures at 300-600 km from sounding rocket and topside sounder Alouette 2 measurements
c13 A69-18839
Ion, electron and neutral temperatures from ion composition distribution, assuming no change in vertical distribution within horizontal distance between upleg and downleg measurements
c29 A69-31990
Ionospheric parameters of ion and electron density and temperature and ionic species compared by direct measurement probes on Explorer 31 satellite
c13 A69-37882

ION TRAPS (INSTRUMENTATION)
Planar thermal ion and electron trap experiments on Explorer 31 satellite, measuring ion and electron density and temperature and ionic composition
c14 A69-37878

IONIC COLLISIONS
Ion-molecule collisions of Ar-Co and N-No pairs, discussing charge exchange reaction rates and spiraling nature
c24 A69-16428
Computer made movies and time history plots for ion-dipole collisions involving polar molecules /CO, HCL and acetonitrile/
c24 A69-43124
Numerical analysis of spiraling in ion molecule collisions with polar targets using computer plotting techniques
[NASA-TN-D-5407] c24 N69-35508

IONIC DIFFUSION
Light ion abundance measurements of OGO satellites and field aligned diffusive equilibrium theory with temperature and concentration latitudinal variations
c13 A69-25157
Applicability and limitations of diffusive equilibrium in topside ionosphere, noting plasma density distribution along magnetic field line
c13 A69-37887

IONIZATION COEFFICIENTS
Rational approximation for coefficients used in calculating hydrogenic photoionization Gaunt factors
c24 A69-20153

IONIZATION CROSS SECTIONS
Atomic Li photoionization cross sections calculated with Brueckner-Goldstone many body perturbation theory
c24 A69-17134
Electron impact ionization cross sections for second quantum level of atomic H, using Born exchange approximation and Vainshtein approximation
c24 A69-17138
Cross sections computed for excitation and ionization of atoms and ions by electrons, using peaking approximation to evaluate Coulomb-Born matrix approximation
c24 A69-20206
Hydrogenic atoms ionization by high energy electrons, discussing cross sections for ejected electrons and total energy
c24 A69-20738

Electron impact cross sections for diatomic molecule ionization and excitation from modified Gryzinski theory, discussing results from molecular models
c24 A69-22249
Energy spectrum of secondary electrons and fluorescent efficiency in 3914 A band, obtaining ionization cross section
c29 A69-32315
Chemical reactions activation energy at high temperature, noting cross section shape role for deducing activation energy from rate data
c06 A69-34443

IONIZATION FREQUENCIES
High latitude ionization spikes observed by POGO spacecraft, noting frequency correlation with magnetic disturbances and development by high energy electron injections
c29 A69-28950

IONIZATION GAGES
Magnetron ionization gauge in helium for low pressure measurement, discussing striking characteristics and time lags
c03 A69-10606
Buried collector ionization gage for measurements in 100 billionth torr pressure range using shielded collector to lower X ray current
c14 A69-32324
Bent beam ionization gage linearity from calibrated nude Modulated Bayard-Alpert /MBA/ gage, discussing buried collector and tabulated magnetron gages
c14 A69-41216
Low pressure application of orbitron and ion gage designs
[NASA-CR-1300] c14 N69-28402
Predicting relative sensitivities of hot cathode ionization vacuum gages
[NASA-TN-D-5285] c14 N69-29331

IONIZATION POTENTIALS
Approximate ionization potentials for high ionization stages of elements with atomic numbers 31 to 92 obtained by binding energy calculations
c24 A69-29923
Ionization rate limiting processes behind strong shock waves in pure N, plotting electron density profile diagrams
c12 A69-43367

IONIZED GASES
Frictional forces and collision frequencies for ions moving in neutral gases
c13 A69-13328
Collisional theory of longitudinal wave propagation for two fluid viscous ionized plasmas formulated from coupled Maxwell and Boltzmann equations
c25 A69-20796
Electron number density LF oscillations for ionized gas identified with periodic solutions to neutral and charged particle plasma continuity equations
c25 A69-24315
Moving striations as plasma oscillations arising from transit time delays of neutral and charged particles moving through ionized gas, using continuity equation
c25 A69-43122
Electron density oscillations in ionized neon, helium, and deuterium gases
[NASA-TN-D-4950] c25 N69-14525

IONIZING RADIATION
Solar ionizing radiation increase during flares of 21 and 23 May 1967 determined from ionospheric electron density concentrations
c29 A69-37558

IONOGRAMS
Electron density profiles from topside ionograms compared to ground based sounding results, discussing error corrections
c07 A69-37865
Propagation characteristic model study of kinked Z trace observed on topside ionograms and explained by magnetoionic theory
c13 A69-37893
Computation of topside ionograms from electron concentration profiles
[NASA-TN-D-5052] c13 N69-23557

IONOSPHERE
Suprathermal electrons energy distributions as function of magnetic latitude in polar ionosphere obtained by Explorer 31 satellite observation
c29 A69-28963
Significant achievements in space sciences for 1967, including stellar astronomy, bioscience, ionospheres, planetology, particles and fields, solar physics, and planetary atmospheres
[NASA-SP-167] c30 N69-25460

IONOSPHERIC COMPOSITION
Plasmapause and relation to ion composition in topside ionosphere, using Bohm coefficient for turbulent diffusion
c13 A69-12741
Simultaneous solution of continuity and heat conduction equations for ionospheric plasma consisting of electrons, atomic O ions and neutral gas species, discussing varying solar flux effects
c29 A69-32082
Simultaneous solution of continuity and heat conduction equations for ionospheric electrons, ions and neutral species for studying F region magnetic storm behavior
c13 A69-32083
Ionospheric parameters of ion and electron density and temperature and ionic species compared by direct measurement probes on Explorer 31 satellite
c13 A69-37882
Rocket measurements of diurnal variations of F region concentrations and temperature of molecular N and O, showing disagreement with satellite drag data
c13 A69-40515

IONOSPHERIC CURRENTS
Magnetic field data from OGO-2 spacecraft and surface magnetic observatories, noting magnetic storm occurrence and magnetosphere inflation and detection of polar ionospheric currents
c13 A69-11125
Electric field variations in vicinity of auroral forms from motions of Ba vapor clouds released from Nike-Tomahawk rockets
c13 A69-34935
High latitude magnetospheric convection patterns determined from ionospheric current distribution using magnetic disturbance plots
c13 A69-38503
Ionospheric currents geophysical dc electric field measurement from sounding rockets, indicating anticorrelation with auroral luminosity
c13 A69-38508

IONOSPHERIC DISTURBANCES
Ionospheric irregularities effect on accurate satellite position determination in near real time
c07 A69-42549

IONOSPHERIC DRIFT
Causal and semiphenomenological theories concerning equatorial F 2 region, discussing electrodynamic drift theory and transequatorial winds
c13 A69-37888

IONOSPHERIC ELECTRON DENSITY
Nocturnal electron concentrations and temperature at Manitoba measured by rocket-borne Langmuir probe, compared with F 1 region
c29 A69-14008
Simultaneous rocket measurements of D region temperatures and electron densities on anomalous winter day
c13 A69-16411
Magnetic storm time variations of electron concentrations in upper ionosphere near north geomagnetic pole, discussing magnetic time, altitude and latitude dependence
c29 A69-28939
Rocket sounding measurements of ionospheric D region electron density profile during 20 May 1966 solar eclipse, discussing D region ionization source
c13 A69-29116
Rocket measurements of upper F region electron temperature and density profiles, for particle and energy balance of ionosphere topside, noting diffusive equilibrium

c29 A69-31975
Solar ionizing radiation increase during flares of 21 and 23 May 1967 determined from ionospheric electron density concentrations
c29 A69-37558
Topside ionogram reduction for ionospheric electron density determination, using geomagnetic strength at all heights, iteration and change of variables
c13 A69-37864
Electron density profiles from topside ionograms compared to ground based sounding results, discussing error corrections
c07 A69-37865
Global electron density distribution morphology in topside ionosphere during sunspot minimum from Alouette 1 and 2 ionograms
c13 A69-37867
Cylindrical electrostatic probes on Alouette 2 and Explorer 31 satellites used in intersatellite comparison of directly measured ionospheric electron temperature and density
c14 A69-37876
Ionospheric parameters of ion and electron density and temperature and ionic species compared by direct measurement probes on Explorer 31 satellite
c13 A69-37882
Topside ionosphere response to magnetic storms, using Explorer 22 satellite electron concentration and temperature measurements
c13 A69-42438

IONOSPHERIC ION DENSITY
Spectrometric rocket measurements of ion concentrations between 200 and 630 km
c13 A69-31974
Rocket measurements of upper F region electron temperature and density profiles, for particle and energy balance of ionosphere topside, noting diffusive equilibrium
c29 A69-31975
Ion depletion in high latitude exosphere, considering OGO 2 simultaneous observations of positive ion concentration, VLF signal propagation and whistlers
c29 A69-34939
Ionospheric parameters of ion and electron density and temperature and ionic species compared by direct measurement probes on Explorer 31 satellite
c13 A69-37882
Plasma temperature and ion concentration profiles determined from simultaneous measurements by Alouette 2 and Explorer 31 satellites of electron density, temperature and ion abundance
c13 A69-37896
Diurnal and seasonal variations of primary atmospheric ions in topside ionosphere correlated with solar zenith angle, using ion mass spectrometer on Explorer 32
c13 A69-38087
Distributions, seasonal variations and ionospheric implications of mesospheric nitric oxide concentration
c13 A69-38364

IONOSPHERIC PROPAGATION
Sudden magnetic field increase associated with July 8, 1966 sudden commencement observed by OGO 3 satellite in magnetotail
c13 A69-11226
Propagation characteristic model study of kinked Z trace observed on topside ionograms and explained by magnetoionic theory
c13 A69-37893
Polar cap ionospheric response to solar cosmic ray events observed by Mariners 2 and 4 solar proton measurements used to test magnetosphere models
c29 A69-43621

IONOSPHERIC SOUNDING
Nonvertical propagation effects on high altitude topside ionosphere sounder data reduction, using ray tracing
c13 A69-18838
Ion composition and charged particle temperatures at 300-600 km from sounding rocket and topside sounder Alouette 2 measurements
c13 A69-18839
Ionospheric satellites objectives and development resulting from topside sounder and ISIS programs
c13 A69-37855
Cylindrical electrostatic probes on Alouette 2 and Explorer 31 satellites used in intersatellite comparison of directly measured ionospheric electron temperature and density
c14 A69-37876
Plasma temperature and ion concentration profiles determined from simultaneous measurements by Alouette 2 and Explorer 31 satellites of electron density, temperature and ion abundance
c13 A69-37896
Antenna reactance from sounding rocket in ionosphere, showing variations relationship to rocket spin period
c13 A69-39964
Alouette 2 sounding data for magnetospheric field aligned propagation duct model
[NASA-TN-D-5332] c13 N69-34891

IONOSPHERIC TEMPERATURE
Ion temperature diurnal variations at 250-475 km obtained from Thomson scatter spectra
c13 A69-16407
Simultaneous rocket measurements of D region temperatures and electron densities on anomalous winter day
c13 A69-16411
Radar backscatter and rocket profiles of ionospheric electron temperature, noting agreement in daytime flight measurements
c29 A69-25162
Simultaneous solution of continuity and heat conduction equations for ionospheric plasma consisting of electrons, atomic O ions and neutral gas species, discussing varying solar flux effects
c29 A69-32082
Rocket measurements of diurnal variations of F region concentrations and temperature of molecular N and O, showing disagreement with satellite drag data
c13 A69-40515

IONS
Energy transfer and ion cost in hydrogen plasma
[NASA-TN-D-5319] c25 N69-29905
Technique for measuring ion energy loss in vapor deposited materials
[NASA-TN-D-5430] c24 N69-36929

IRISES (MECHANICAL APERTURES)
Thin film microwave irises with capacitive reactance
[NASA-CR-1364] c26 N69-28096

IRON
Iron line absence in emission spectrum of thermal X ray sources, constraining proposed thermal models
c29 A69-22231
Oscillator strengths and wavelengths of X ray and EUV transitions in highly ionized iron line spectra
c29 A69-27554
Intensity ratios effect of forbidden Fe and Ca transitions in solar corona on Fe/Ca ratio, noting cascading configurations
c30 A69-36219
Mass dependence of self diffusion in Fe by serial sectioning in alpha, gamma and delta phases, determining isotope effect with Fe radioactive isotopes
c17 A69-36440

IRON ISOTOPES
Mass dependence of self diffusion in Fe by serial sectioning in alpha, gamma and delta phases, determining isotope effect with Fe radioactive isotopes
c17 A69-36440

IRON METEORITES
Electron microprobe analysis of potassium feldspar in Weekerco Station meteorite
c30 A69-14979
Kodaikanal iron meteorite measurements for cosmogenic rare gases and K-Ar isotopes ages for glass inclusions
c30 A69-22047
Iron meteorites genetic classification based on parent body cooling rate and Ga-Ge trace element content
c30 A69-36129
Fe-Ni-P phase diagram studies applied to schreibersite and rhabdite formation in iron

meteorites
c30 A69-36132

IRRADIANCE
Solar spectral irradiance measured by airborne instruments, discussing construction, calibration, etc, of photoelectric filter radiometer and Leiss monochromator
c30 A69-32261

IRRADIATION
Luminescence effects on apparent size and shape of foveally fixated targets of various forms
c04 A69-36458
Prediction of thermal neutron flux perturbation effects in cylinders during irradiation tests
[NASA-TN-D-4949] c22 N69-14481
Uranium carbides irradiation tests for control of nuclear fuels fission gas swelling
[NAA-SR-12629] c22 N69-22946
Irradiation of encapsulated fuel and fast neutron fluxes that simulate thermionic reactor conditions
[NASA-TM-X-1858] c22 N69-33273
Properties of irradiated polyethylene memory materials
[NASA-CR-1384] c18 N69-36762
Quantitative method for determination of fission gases trapped in irradiated fuel forms
[NASA-TM-X-1893] c22 N69-37225
Effects of reactor irradiation at cryogenic temperatures on tensile properties of titanium and titanium-base alloys
[NASA-TN-D-5442] c17 N69-37436

ISIS SATELLITES
Ionospheric satellites objectives and development resulting from topside sounder and ISIS programs
c13 A69-37855

ISOCYANATES
Isothiocyanates and phenyl isocyanate reaction with hydrazinoethanol and hydrazinoethyl hydrogen sulfate
c06 A69-31808

ISOLATION
Optical carrier single channel telemetry system providing complete electrical isolation between shock tube data acquisition and data recording instrumentation
c14 A69-29561

ISOMERS
Temperature dependent isomer shift and anharmonic binding of Sn 119 in niobium stannide, measuring Mossbauer recoil free fraction
c26 A69-10009

ISOSTASY
Lunar gravitational anomalies from internal density variation viewpoint, discussing isostasy in maria
c30 A69-14631

ISOTHERMAL FLOW
Computer program for steady laminar, subsonic, and isothermal compressible flow across sealing dam
[NASA-TN-D-5373] c15 N69-33281

ISOTHERMAL PROCESSES
Isothermal diode as study basis for internal complex controlling thermionic energy conversion
c03 A69-21827
Transient condensing with freezing on nonisothermal inclined plate
[NASA-TN-D-5289] c33 N69-29598
Cyclic life calculations of materials subjected to isothermal stress considering fatigue and creep
[NASA-TN-D-5317] c32 N69-29672

ISOTOPE EFFECT
Mass dependence of self diffusion in Fe by serial sectioning in alpha, gamma and delta phases, determining isotope effect with Fe radioactive isotopes
c17 A69-36440

ISOTOPE SEPARATION
Thermal neutron capture cross section at high temperature irradiations determined for W 184, describing radiochemical separation and flux counting techniques
c14 A69-43192

ISOTOPIC LABELING
Z-micron sections removed from metal specimens by microtome for radiotracer study of mass dependence of self diffusion
c14 A69-36490

ITERATION
Iterative solution of boundary value problem for rapid optimization of multiple-burn rocket flights
[NASA-CR-1430] c30 N69-36439

ITERATIVE SOLUTION
Iterative guidance mode /IGM/ applied to effective gravity vector prediction, acceleration measurement of noise sensistivity and energy limitations
[AIAA PAPER 67-620] c21 A69-15501
Adaptive random search algorithm utilizing boundary cost-function hypersurfaces measurement to implement Pontryagin maximum principle, discussing hybrid computer use, iterative solution and convergence properties
c08 A69-33745
Instantaneous frozen layer thickness and temperature profile in solidified layer obtained by iteration technique
c33 A69-39433
Computational method for time optimal space rendezvous between rocket vehicle and circular orbit target
[NASA-TN-D-5017] c30 N69-16210
Second order errors in linearized velocity corrections and their effects on rate of convergence of iterative solutions
[NASA-TN-D-5037] c21 N69-17780
Applications of quasi-linearization theory to system identification
[NASA-TN-D-5300] c19 N69-29648

J

J-85 ENGINE
Inlet produced dynamic distortion and effects on stall margin of J-85 turbojet engine from supersonic wind tunnel tests
[AIAA PAPER 69-487] c28 A69-32676
Steady state airflow and afterburning performance characteristics of four J85-GE-13 turbojet engines
[NASA-TM-X-1742] c28 N69-17781

JAPAN
Comparisons of wind and temperature data obtained by Japanese MT-135 and American ARCAS meteorological rocket systems in closely spaced launchings
[NASA-TM-X-1726] c20 N69-17772

JET AIRCRAFT
Calculated and flight measured handling quality factors of three subsonic jet transports
[NASA-TN-D-4832] c02 N69-10495
Variation in engine noise for two landing approach configurations of jet transport aircraft
[NASA-TM-X-1896] c02 N69-38104
Aerodynamics and flight dynamics of turbojet aircraft
[NASA-TT-F-542] c01 N69-38670
Empirically determined wind and scale effects on hot gas recirculation characteristics of jet V/STOL aircraft
[NASA-CR-1445] c28 N69-40776

JET AIRCRAFT NOISE
Jet engine inlet noise control by modification of inlet guide vanes
c28 A69-15622
Technology trends in airbreathing propulsion, discussing noise control for subsonic jet transports, turbine blade cooling, etc
[AIAA PAPER 69-774] c02 A69-35648
Conference on NASA research in noise reduction of subsonic jet aircraft - nacelle acoustic linings, sound generation in jet engines, and operational noise effects on humans
[NASA-SP-189] c02 N69-11542
Optimum takeoff and climbout trajectory calculation technique for jet aircraft noise abatement
[NASA-TN-D-5182] c02 N69-26194
Effects of aerodynamic forces on jet engine noise from rigid flow spoilers
[NASA-CR-1340] c23 N69-26307
Operational limitations in flying noise abatement approaches
[NASA-TN-D-5497] c02 N69-39188
Temperature effects on turbofan and turbojet noise radiation

[NASA-CR-1472] c02 N69-40439
JET BOUNDARIES
FORTRAN programs for calculating wind tunnel boundary interference factors
[NASA-TM-X-1740] c01 N69-17818
Photographic study on bromine jet boundary shape in coaxial airstream with honeycombs at injection plane
[NASA-TM-X-1900] c12 N69-39303
JET ENGINE FUELS
Surface fouling of ASTM jet A fuel heated to 700 deg F in simulated heat exchanger tube
[NASA-TN-D-4958] c28 N69-12831
Thermodynamic and transport properties of air, and combustion products of natural gas and air, and jet engine fuel and air
[NASA-TN-D-5452] c33 N69-37936
JET ENGINES
Shorter combustors for high temperature jet engines of high speed aircraft, considering lifetime, shroud scoops, overheating, warpage, etc
c28 A69-29433
Jet engine compressor stalls in-flight investigation up to Mach 2 on F-111A by pressure sensors, noting steady state distortion role
[AIAA PAPER 69-488] c28 A69-32706
Wind tunnel tests for V/STOL aircraft having direct-lift and lift-cruise jet nozzles
[NASA-TM-X-1758] c01 N69-20016
Chromium base alloys for high temperature application in jet engines
[NASA-TM-X-1867] c17 N69-35764
Jet velocity and axial location of nozzle exit on performance of twin-jet afterbody model
[NASA-TN-D-5393] c28 N69-36932
JET EXHAUST
Path and shape of jet directed at large angles to subsonic free stream
[NASA-TN-D-4919] c01 N69-11634
Back flow density from jet plumes in vacuum
[NASA-TN-D-4978] c01 N69-14385
Scaled lunar landing module jet erosion of simulated moon surfaces
[NASA-TN-D-5051] c31 N69-22630
Jet exhaust location effects on longitudinal aerodynamic characteristics of jet V/STOL model
[NASA-TN-D-5333] c01 N69-33210
Exhaust recirculation effects produced by two heated jets impinging on ground plane
[NASA-CR-1307] c01 N69-34703
JET FLAPS
Trailing-edge flap system with boundary layer control and external jet augmentation for subsonic jet transport
[NASA-TN-D-5129] c01 N69-30722
Wind tunnel tests of static longitudinal and lateral characteristics of short takeoff aircraft with external flow jet flap
[NASA-TN-D-5364] c01 N69-33275
Static and dynamic stability derivatives of model jet transport equipped with external flow jet augmented flaps
[NASA-TN-D-5408] c02 N69-36258
Performance tests of jet flapped blade in six blade annular cascade
[NASA-CR-1423] c28 N69-36680
JET FLOW
Reduction of noise from underexpanded axisymmetric jet flows using radial jet flow impingement
[AIAA PAPER 68-81] c12 A69-28212
Path and shape of jet directed at large angles to subsonic free stream
[NASA-TN-D-4919] c01 N69-11634
Wind tunnel tests of large jet transport aircraft model with external flow jet flap
[NASA-TN-D-4928] c01 N69-14000
Conformal mapping of two dimensional jet flow from two nozzles striking plane surfaces
[NASA-TN-D-5064] c01 N69-17816
Impingement forces, moments, and centers of pressure due to air jets in vacuum sphere
[NASA-TN-D-5147] c12 N69-23085
Effects of free stream turbulence and boundary layer trip devices on mixing in jet stream
[NASA-CR-1336] c12 N69-24058
Photographic study of bromine jet flowing in coaxial airstream and impinging on stagnation surface
[NASA-TN-D-5209] c12 N69-24800
Jet effects on boattail pressure drag of isolated ejector nozzles at Mach 0.60 to 1.47
[NASA-TM-X-1785] c01 N69-26976
Turbulent mixing of compressible air in supersonic and subsonic coaxial jet flows
[NASA-TN-D-5315] c02 N69-30727
Helium penetration and spreading in Mach 2 airstream using Delta wing injector
[NASA-TN-D-5322] c01 N69-30878
Dynamic response of liquid jet atomization to acoustic oscillations
[NASA-TN-D-5339] c28 N69-30980
Exhaust recirculation effects produced by two heated jets impinging on ground plane
[NASA-CR-1307] c01 N69-34703
Injection of attached inviscid jet at oblique angle to moving stream
[NASA-TN-D-5501] c12 N69-39916
JET IMPINGEMENT
Pressure and heating rate correlations for rocket exhausts impinging on flat plates and curved panels, generating axisymmetric real gas exhaust plumes
c33 A69-26781
Reduction of noise from underexpanded axisymmetric jet flows using radial jet flow impingement
[AIAA PAPER 68-81] c12 A69-28212
Inviscid flow of two parallel slot jets impinging normally on surface
[NASA-TN-D-4957] c12 N69-14316
Conformal mapping of two dimensional jet flow from two nozzles striking plane surfaces
[NASA-TN-D-5064] c01 N69-17816
Analysis of two dimensional inviscid model jet impingement under verticle takeoff airplane
[NASA-TN-D-5288] c01 N69-29479
Exhaust recirculation effects produced by two heated jets impinging on ground plane
[NASA-CR-1307] c01 N69-34703
JET LIFT
Wind tunnel investigation of static stability characteristics of model jet-lift V/STOL research airplane
[NASA-TM-X-1835] c02 N69-30633
JET MIXING FLOW
Vortex motion enhancement of jet penetration and spreading in supersonic fuel injection into large diameter combustors
[AIAA PAPER 69-664] c12 A69-33437
Turbulence in mixing region of ducted coaxial flow of air-air and air-Freon 12 combination
[NASA-CR-1335] c12 N69-30728
Model analysis for viscosity in jet mixing flows
[NASA-CR-1382] c12 N69-31887
Analytical solution for inviscid separated jet injection at oblique angle into moving stream
[NASA-TN-D-5460] c12 N69-37965
Photographic study on bromine jet boundary shape in coaxial airstream with honeycombs at injection plane
[NASA-TM-X-1900] c12 N69-39303
JET NOZZLES
Flow field from forward facing nozzles exhausting near large cylindrical body at free-stream Mach numbers of 3.0 and 6.0
[NASA-TN-D-5030] c01 N69-21000
Base flow field at high altitude for four-engine clustered nozzle configuration
[NASA-TN-D-5164] c12 N69-24935
JET PROPULSION
Effect of angle of attack and injection pressure on jet penetration and spreading from Delta wing in supersonic flow
[NASA-TM-X-1889] c12 N69-37271
JET PUMPS
Jet pump head rise deterioration parameter for prediction of cavitation
c12 A69-15791
Noncavitating and cavitating performance of low area ratio water jet pumps, analyzing efficiency, area ratio, throat length, nozzle spacing and diffuser geometry
c03 A69-35176
Noncavitating and cavitating performance of low area ratio water jet pumps having throat lengths of 3.54 diameters
[NASA-TN-D-5095] c03 N69-20797

JETTISON SYSTEMS
Performance tests on dynamic jettison hinge loads of Centaur nose fairing
[NASA-TM-X-1821] c32 N69-29734
JOINTS (JUNCTIONS)
Joining ceramics and graphite to other materials
[NASA-SP-5052] c15 N69-14241
Space suit design with pressure stabilizer for force assisted elbow joint
[NASA-TN-D-5221] c05 N69-26259
JOURNAL BEARINGS
Herringbone grooved gas lubricated journal bearing stability, testing effects of geometries and clearances on onset speed for half frequency whirl
[ASME PAPER 68-LUBS-25] c15 A69-27271
Theory and clearance effects on stability of water lubricated herringbone-groove journal bearings
[NASA-TN-D-4883] c15 N69-10228
Theoretical analysis of pressure distribution, load capacity, attitude angle, and friction force for eccentric Rayleigh step journal bearing - infinite length solution
[NASA-TN-D-4873] c15 N69-10231
Small eccentricity stability analysis for externally pressurized gas lubricated bearings with journal rotation
[NASA-TN-D-4934] c15 N69-13256
Power loss experiments on herringbone grooved, gas lubricated journal bearings
[NASA-TN-D-5224] c15 N69-24932
Load and stiffness characteristics of rotating externally pressurized air journal bearings
[NASA-TN-D-5191] c15 N69-27078
Stability of water lubricated herringbone groove journal bearings
[NASA-TN-D-5264] c15 N69-27955
Air flow and attitude angle compared with theory for rotating externally pressurized air journal bearings
[NASA-TN-D-5192] c15 N69-27956
Steady-state characteristics of herringbone grooved air lubricated journal bearings
[NASA-TN-D-5386] c15 N69-33258
JUNCTION DIODES
Observation of photocurrents generated in Schottky barrier diodes on barium titanate, suggesting practical utility of photon-to-electron conversion efficiencies
c09 A69-18905
High performance silicon carbide backward diode, discussing device design and operational characteristics
c09 A69-22787
JUPITER (PLANET)
Photovoltaic properties of CdS thin film solar cells and silicon cells at Jupiter temperature and solar intensity
c03 A69-13076
Midcourse maneuvers in interplanetary guidance, considering spin stabilized spacecraft flyby for Jupiter mission
c30 A69-28504
Hansen method applied to Jupiter tenth satellite orbit correction and perturbations, describing computer program and formulas used
c30 A69-37529
Perturbative effects of Jupiter moons on spacecraft flyby and postencounter heliocentric trajectories, noting precision targeting
[AIAA PAPER 69-932] c30 A69-39361
Recurrent Lagrange multipliers for optimal low thrust earth-Jupiter transfers, using three dimensional solar system model
c30 A69-41896
Pioneer F/G mission to Jupiter by NASA for exploring interplanetary medium, asteroid belt, planet and environment
[AAS PAPER 69-290] c30 A69-42863
Application of Hansen lunar theory to 10th satellite of Jupiter
[NASA-TN-D-4979] c30 N69-14479
Analytical evaluation of space storable propellants for unmanned Jupiter and Saturn orbiter missions
[NASA-TM-X-1793] c31 N69-24942
Planetary flight handbook - direct trajectories to Jupiter, Saturn, Uranus, and Neptune
[NASA-SP-35-VOL-3-PT-7] c30 N69-33490
Jupiter swingby missions to Saturn, Uranus, Neptune, and Pluto
[NASA-SP-35-PT-8] c30 N69-34850
JUPITER ATMOSPHERE
Galactic Jupiter Probes investigating Jupiter atmosphere and emissions and deep space cosmic radiation
c30 A69-12303
Blunt and conical body optimum heat shield shapes for Jupiter atmospheric entry, noting shallow flight path
[AIAA PAPER 68-1150] c31 A69-13565

K

KALMAN-SCHMIDT FILTERING
Kalman filter simulation for estimating aircraft position and velocity from airborne digital computer data in zero-zero landing system
[AIAA PAPER 69-944] c21 A69-40327
Suboptimal estimator to Kalman filter containing scalar weighting factors
[NASA-TN-D-5082] c10 N69-21123
KEELS
Wind tunnel investigation of twin keel parawing aerodynamic characteristics
[NASA-TN-D-5199] c01 N69-23781
KEPLER LAWS
Comparison of class of orbits in Earth-Moon field and class of Kepler orbits in rotating coordinates by use of concurrent series of graphs
[NASA-TN-D-4903] c30 N69-10470
KINETIC ENERGY
Energetics in solid film lubricants vacuum deposition methods, showing dependence on interfacial and film characteristics
c15 A69-29001
KINETIC EQUATIONS
Coupled kinetic equations for inhomogeneous systems treated as simultaneous equations in time, obtaining solutions by successive approximation
c25 A69-30913
KINETIC THEORY
Kinetic theory model of plasma sheath transition, analyzing sheath structure in unignited mode of thermionic converter
c03 A69-13125
Kinetic theory model of plasma sheath transition applied to sheath structure in unignited mode of thermionic converter
c03 A69-21828
Coupled kinetic equations for inhomogeneous systems treated as simultaneous equations in time, obtaining solutions by successive approximation
c25 A69-30913
KINETICS
Uranium 233 critical mass requirements, neutron kinetic behavior, and neutron and gamma ray heating rates for nuclear light bulb rocket engine
[NASA-CR-1315] c25 N69-23451
KLYSTRONS
Beat frequency measurements in far IR due to harmonic mixing of klystrons, discussing noise role
c23 A69-33674

L

LABORATORIES
Design and operation of high temperature loads calibration laboratory
[NASA-TM-X-1868] c11 N69-36224
LABORATORY EQUIPMENT
Design and equipment requirements for manned earth orbiting biotechnology laboratory
[NASA-CR-1408] c05 N69-35541
LAGRANGE MULTIPLIERS
Recurrent Lagrange multipliers for optimal low thrust earth-Jupiter transfers, using three dimensional solar system model
c30 A69-41896
LAMINAR BOUNDARY LAYER
Nonsimilar laminar boundary layer solutions with negative pressure gradient compared to experimental boundary layer velocity profiles,

momentum and displacement thicknesses
[AIAA PAPER 69-35] c12 A69-18094
Amplified boundary layer oscillations and transition at swept flat nosed wing attachment line with/without boundary layer suction analyzed by wind tunnel tests
c01 A69-33251
Leading edge effects on laminar flat plate boundary layer and aerodynamic heating at Mach 10.4
[NASA-TN-D-5160] c12 N69-23467
Flow field and drag characteristics of several laminar boundary layer tripping element in hypersonic flow
[NASA-TN-D-5454] c12 N69-38156

LAMINAR FLOW
Flow characteristics and wall heat transfer in separated flow region of annular cavity at free stream hypersonic speed and high gas temperature
[AIAA PAPER 68-672] c01 A69-37185
Laminar incompressible viscous flow in short cylindrical vortex chamber with finite swirl ratio
[NASA-TN-D-5132] c12 N69-21400
Computer program for steady laminar, subsonic, and isothermal compressible flow across sealing dam
[NASA-TN-D-5373] c15 N69-33281
Laminar heating rate from wind tunnel tests using angle of attack and Reynolds number
[NASA-TN-D-5450] c12 N69-37604

LAMINAR HEAT TRANSFER
Laminar heat transfer distributions for blunted-cone, cone frustum reentry configuration at hypersonic speed using Reynolds number
[NASA-TN-D-5146] c33 N69-22997
Heat transfer to windward side of scale model for graphite lunar module fuel cylinder
[NASA-TN-D-5251] c12 N69-29608

LAMINAR MIXING
Numerical analysis of laminar and turbulent mixing region for two dimensional jet injected at angle to moving stream
[NASA-TN-D-5531] c12 N69-41213

LAMINATES
Cryogenic flexibility of thin polymeric film plies for use as spacecraft positive expulsion bladders
c15 A69-16486
Synthesis of Pyrrone laminates from sulfone dianhydride
[NASA-CR-1404] c30 N69-31960

LAND
Multispectral orbital photography used to obtain urban land-use data
[AAS PAPER 69-483] c13 A69-42837

LANDING
Evaluation of contact analog display in landing approaches with helicopters
[NASA-TN-D-5241] c02 N69-27177
Systems developed for reducing pilot workload and tracking accuracy improvements during noise abatement landing approaches
[NASA-CR-1427] c02 N69-38657

LANDING AIDS
Ground based guidance for land-landing manned spacecraft with low velocity descent systems, discussing high and low altitude glide path intercept and spiral
[AIAA PAPER 69-864] c21 A69-39390
Kalman filter simulation for estimating aircraft position and velocity from airborne digital computer data in zero-zero landing system
[AIAA PAPER 69-944] c21 A69-40327
Indirect optical viewing system in F-104B for simulated lifting-body approach and landing tasks
[NASA-TN-D-5299] c14 N69-29730

LANDING GEAR
Steerable landing gear system consisting of freely castoring corotating wheel nose gear, tiltable axle and main gear skids for lifting body spacecraft
[AIAA PAPER 69-790] c02 A69-35639
Full scale dynamic landing impact investigation of prototype lunar module landing gear
[NASA-TN-D-5029] c31 N69-20965

LANDING LOADS
Effect of heat shield flexibility on water landing loads of Apollo spacecraft models
[NASA-TN-D-5108] c32 N69-21042

LANDING MODULES
Inflatable landing system investigated for impact normal to smooth surface
[NASA-TN-D-5236] c32 N69-26223

LANDING SIMULATION
Optical simulation landing system for evaluating pilot controlled flexible parawing and Apollo capsule combination performance during landing
[NASA-TN-D-5049] c21 N69-20936

LANDING SITES
Longitudinal range dispersion of unmanned Mars landers using VM-8 and VM-9 atmospheric models, discussing Syrtis Major as possible landing site
c30 A69-12390

LANGUAGE PROGRAMMING
NASA computer language CLASP coordinated with evolution of SPL /Space Programming Language/ for aeronautics and space programming
[AIAA PAPER 69-957] c08 A69-40339
Computer memory reduction through FORTRAN higher level language, discussing tradeoff between costs saved and additional logic hardware
[AIAA PAPER 69-963] c08 A69-40344
Evaluation of computer aids to augment human intellectual capability
[NASA-CR-1270] c08 N69-16140

LANTHANUM FLUORIDES
Electrical conductivity of lanthanum fluoride single crystal with calcium impurities
[NASA-TN-D-5505] c26 N69-40056

LANTHANUM ISOTOPES
Lanthanum isotopes beta decay, analyzing excitation of near spherical daughter nuclei of barium isotopes
c24 A69-10100

LARGE SCALE INTEGRATION
Computer organization design employing distributed processor to provide general purpose computing while taking advantage of large scale integration
c34 A69-39133

LASER MODES
Carbon dioxide laser with two gas absorption cells in cavity for emission wavelength control and HF pulsed mode of operation
c16 A69-21088
Low energy ultrafast flashlamp systems as optical pumps for lasers using fast decaying fluorescent materials /organic dyes/
c16 A69-42187

LASER OUTPUTS
Emission and frequency shift angles of anti-Stokes radiation from trapped filaments of laser light in liquids
c23 A69-10012
Organic dye laser frequency variation with temperature, noting absorption and fluorescence spectra
c16 A69-12617
Sinusoidal phase modulation role in spectral broadening observed in trapped filaments of laser and Raman light
c16 A69-14189
Mie total and differential backscattering cross sections at laser wavelengths for Junge size distribution aerosol models
c16 A69-14290
Ammonium perchlorate high temperature decomposition by using carbon dioxide laser pyrolysis/mass spectrometry
[AIAA PAPER 69-143] c06 A69-18111
Iodine IR laser, discussing CW emission obtained at various wavelengths and attributed to electronic transitions in atom
[IEEE PAPER T-5] c16 A69-19082
Proportionality between log-amplitude variance and 7/6 power of wavenumber for horizontal propagation from spherical wave transmitter to point detector
c16 A69-19641
Picosecond light pulse measurement by two photon excitation of photographic film
c14 A69-20165
Holographic displays using ultrasonic vibrations or laser outputs as optical sources, discussing recording materials, responses and computer applications
c14 A69-21394

Three dimensional laser Doppler velocity instrument for mean velocity and turbulence measurements in subsonic jet shear layer
[SAE PAPER 690266] c14 A69-21555
Optical parametric noise in water by ruby laser beam for phase matched four photon process
c23 A69-21751
Sulfur dioxide-helium laser pulsed and CW submillimeter outputs
c16 A69-24005
Simultaneous HCN and HOH laser emission in pulsed discharge through mixture containing H, C, N, and O
c16 A69-26330
Laser Doppler flowmeter for heterodyne detection of laser light scattered from moving fluid applied to fluid velocity and velocity distribution measurements
c14 A69-26546
Absorption coefficient measurement for hydrocarbon gases for He-Ne laser beam at 3.39 microns, tabulating coefficients, noting variations from spectroscopic data
c16 A69-42192
Mie scattering calculations on laser wavelengths and atmospheric aerosols
[NASA-TN-D-5110] c23 N69-20905
Helium-neon laser discharge with striation oscillations in relation to pressure and current
[NASA-CR-1387] c08 N69-32350
Theoretical feasibility of detecting laser radiation scattered from plasma
[NASA-TN-D-5311] c25 N69-36939

LASERS
Microwave and optical generation and amplification - Conference, Hamburg, September 1968
c09 A69-18420
Intersatellite microwave laser communication system for ATS-F and ATS-G, discussing experiment, functional design and parameters
c07 A69-41758
Lunar laser beam retroreflection observations, showing agreement with predicted ephemeris and signal strength
c30 A69-43197
Design and performance of traveling wave phototube for coherent light demodulation
[NASA-TT-F-430] c09 N69-15441
Laser beam interactions with free electrons
[NASA-TN-D-5205] c16 N69-25357
Laser optical simulation of spaceborne radio astronomy interferometer experiment
[NASA-TN-D-5357] c30 N69-36892

LATERAL CONTROL
Pilot ratings of lateral directional handling for wide range of aircraft characteristics - graphs
[NASA-TN-D-5358] c02 N69-35762
Flight evaluation of tip turbine driven fans for lateral control in hovering VTOL aircraft
[NASA-TN-D-5491] c02 N69-38807

LATERAL OSCILLATION
Longitudinal structural vibration and lateral bending response mass and spring coupling in Saturn AS-502 during boost with longitudinal excitation by POGO effect
[AIAA PAPER 69-58] c31 A69-18204
Effects of lateral cable oscillations on dynamic response of cable-connected space station
[NASA-TN-D-5107] c31 N69-21111

LATERAL STABILITY
Instability of eccentrically stiffened cylindrical shells under axial compression and lateral pressure
[NASA-CR-1280] c32 N69-15378
Full scale wind tunnel investigation of lateral and longitudinal stability and control characteristics of light twin engine airplane
[NASA-TN-D-4983] c02 N69-17303
Lateral bending dynamic tests of Atlas Centaur Surveyor launch vehicle
[NASA-TM-X-1837] c31 N69-30631
Jet fighter aircraft lateral directional stability at high angles of attack
[NASA-TN-D-5361] c02 N69-32337
Wind tunnel tests of static longitudinal and lateral characteristics of short takeoff aircraft with external flow jet flap
[NASA-TN-D-5364] c01 N69-33275

LATTICE PARAMETERS
Effects of lithium and oxygen losses on magnetic and crystallographic properties of spinel lithium ferrite
[NASA-TR-R-305] c06 N69-20775

LAUNCH DATES
Launch opportunity and window constraints, considering injection energy and precision, reference body occultation, communications range, etc
c31 A69-37287

LAUNCH ESCAPE SYSTEMS
Aerodynamic loads on deployed canard surfaces and rocket nose section of Apollo launch escape vehicle
[NASA-TN-D-5260] c31 N69-28166
Aerodynamic characteristics determined during development of Apollo launch escape vehicle configuration in wind tunnel tests
[NASA-TN-D-5208] c01 N69-29027

LAUNCH VEHICLE CONFIGURATIONS
Cryogenic core concept for flexible and economical delivery system
[AIAA PAPER 68-812] c31 A69-39753

LAUNCH VEHICLES
Future space programs as governed by cost limitations, suggesting development of economical launch vehicle for shuttling between earth and orbital space stations
c30 A69-12680
Launch vehicle upper stage requirements in space missions, discussing space engine for lunar, planetary and interplanetary exploration
[AAS PAPER 69-359] c34 A69-42828
Cost analysis in low cost launch vehicle studies emphasizing sustaining engineering and plant economics
c31 A69-43120
Analysis of aeroelastic divergence phenomena in unguided launch vehicles
[NASA-TN-D-4846] c32 N69-10297
Wind tunnel test of aerodynamic characteristics of scale model of Tomahawk launch vehicle at Mach speeds
[NASA-TM-X-1684] c01 N69-10732
Prediction curves for launch vehicle vibration levels in region of spacecraft adaptor
[NASA-CR-1227] c31 N69-16155
Mathematical models for optimal three dimensional launch vehicle trajectories with attitude and attitude rate constraints
[NASA-TN-D-5117] c30 N69-20810
Longitudinal mass spring modeling of launch vehicles
[NASA-TN-D-5371] c32 N69-34970
Statistical effects of wind and atmospheric turbulence on launch vehicles
[NASA-CR-1410] c20 N69-35570

LAUNCH WINDOWS
Launch opportunity and window constraints, considering injection energy and precision, reference body occultation, communications range, etc
c31 A69-37287
Computer program for launch window determination from star illumination of night sky background
[NASA-TM-X-1772] c21 N69-22969
Performance of Atlas-Agena vehicle from lift off through Agena posigrade maneuver
[NASA-TM-X-1826] c31 N69-29594

LAUNCHING
International liability for damage caused by launching of objects into outer space
[UN PAPER 68-95337] c34 A69-10525

LAUNCHING SITES
Failure data role in management of launch operations reliability program
c11 A69-36022

LAW (JURISPRUDENCE)
Federal government contracting, discussing legality of NASA service contracts
c34 A69-15987

LC CIRCUITS
Delta functions spectrum in reciprocal time domain for LC and RC structures due to impulse response in distributed parameters
c10 A69-21327

LEADING EDGES
Leading edge effects on laminar flat plate

boundary layer and aerodynamic heating at Mach 10.4
[NASA-TN-D-5160] c12 N69-23467
LEAKAGE
Leak detection for aerospace hardware, discussing equipment, operations, checkout, etc
c15 A69-30315
Leak rate measurement accuracy of rate-of-rise technique for nitrogen, methane and He between millionth and thousandth torr
c14 A69-32326
Containment vessel leakage due to penetrations
[NASA-TM-X-1735] c22 N69-17701
Source and cause of fuel element fisson product leakage in reactor cooling water system at Plum Brook Reactor
[NASA-TN-D-5374] c22 N69-32317
Torque and leakage rates of various lubricated lip seal designs at peripheral velocity of 120 feet per second
[NASA-TN-D-5411] c15 N69-35769
Halogen detector for leakage in hermetically sealed devices
[NASA-TN-D-5457] c09 N69-38597
LEAST SQUARES METHOD
Damping factor automatic determination by use of second derivatives of residuals for damped least squares method of optical design
c23 A69-14295
Nonlinear least squares optimization program applied to atmospheric temperature sounding, solving for temperatures at various altitudes from simulated carbon dioxide intensity measurements
c13 A69-33156
Analytic approximations for application to spacecraft optical navigation system where position fixes are taken over short trajectory arcs
[NASA-TN-D-4863] c21 N69-10372
LEGAL LIABILITY
International liability for damage caused by launching of objects into outer space
[UN PAPER 68-95337] c34 A69-10525
International legal liability for personal injury or property damage caused by space activities
c34 A69-37127
LEGENDRE FUNCTIONS
Legendre polynomials for gravitational field and orbit perturbation
[NASA-TN-D-5163] c13 N69-26969
LEUCINE
High oxygen tension effect on transport and incorporation of exogenous leucine and protein synthesis in Pseudomonas saccharophila cells
c04 A69-13433
LEUKOCYTES
Preflight and postflight leukocyte chromosome aberration analyses of Gemini astronauts
c04 A69-33173
LEVITATION
Magnetic performance properties of air cooled solenoids applied to one component support and balance system
[NASA-CR-1352] c11 N69-24089
LIBRATIONAL MOTION
Libration point relay satellites for continuous communication link between earth and lunar far side, discussing trajectories and halo orbit stationkeeping
c30 A69-30188
LIFE (DURABILITY)
SERT 2 thrustor hollow cathode durability tested in bell jar
[AIAA PAPER 69-304] c28 A69-21224
Plasma electron beam for welding, deriving beam current from secondary emission by ion bombardment, discussing gas pressure, equipment and applications
c15 A69-35555
High temperature fatigue tests conducted to determine bearing life of angular contact ball bearing elements
[NASA-TN-D-5002] c15 N69-16367
LIFE DETECTORS
Mars biological exploration, discussing life detection, chemical and biological experimental strategy
[AIAA PAPER 68-1122] c04 A69-13700
Extraterrestrial life detection experiments integrated into single multipurpose space laboratory, including chemical analyses, metabolism identification, observation for molecular and/or cellular growth and replication
c05 A69-32970
Sequential analyses of planetary surface sample for extraterrestrial life detection, discussing chemistry, morphology, growth and metabolism for life attributes
c30 A69-41623
LIFE SCIENCES
Life sciences and space research - COSPAR Conference, London, July 1967
c04 A69-11073
Life sciences and space research on biological effects of radiation in space - COSPAR Conference, Tokyo, May 1968
c04 A69-37612
LIFE SPAN
Mortality kinetics of Drosophila melanogaster, comparing effects of gamma radiation-induced life shortening and natural aging
c04 A69-30444
LIFE SUPPORT SYSTEMS
Water electrolysis, discussing oxygen generators for spacecraft prototype cells and testing
c05 A69-12987
Lithium peroxide utilization feasibility for oxygen supply and carbon dioxide control in extravehicular portable life support systems
[AIAA PAPER 69-620] c05 A69-33303
Regenerative life support system development, considering synthesized organic compounds and microorganisms as foods for long duration space missions
c04 A69-37623
Unstabilized astronaut, hand-held and integrated life support EVA maneuvering units tested in gimbaled six degree of freedom servo driven moving base simulator
[AAS PAPER 69-516] c05 A69-42850
Material recovery from metabolic and other wastes for long duration manned space missions, discussing carbon dioxide removal, bioregenerative food systems, etc
[AAS PAPER 69-143] c05 A69-42876
Hydrogenomonas cultures investigated for metabolic waste utilization in aerospace life support systems
[NASA-CR-1296] c05 N69-22766
Astronaut capability to maintain life support systems and cabin habitability in weightlessness
[NASA-CR-1405] c05 N69-36709
LIFT
Flight tests of modified aileron direct lift control system during approach and landing of F8-C aircraft
[NASA-TN-D-4854] c02 N69-10371
Predicting lift and drag for slender sharp-edge Delta wings in ground proximity
[NASA-TN-D-4891] c01 N69-16180
Transonic wind tunnel tests of aerodynamic drag and lift forces on circular cylinder in two dimensional flow at high Reynolds number
[NASA-TR-R-300] c01 N69-17304
Rocket-scramjet hybrid engines in lifting reusable second stage
[NASA-TN-D-5218] c28 N69-24922
Free flight test model measurement of drag, lift, and trim in wind tunnel for Apollo command module
[NASA-TN-D-5276] c30 N69-29557
LIFT AUGMENTATION
Gas turbine engine shaft face seal with self acting lift augmentation preventing rubbing contact, noting disadvantages of labyrinth and conventional seals
[ASLE PICFS PREPRINT 27] c15 A69-30492
Shaft face seal with self acting lift augmentation for advanced gas turbine engines
[NASA-TN-D-5170] c15 N69-23232
LIFT DEVICES
Subsonic lifting surface theory including leading edge, discussing singularities in solution of integral equation for determination of aerodynamic properties
[AIAA PAPER 69-37] c01 A69-18167

Development of air bearing lift pads
[NASA-TM-X-1724] c01 N69-16467

LIFT DRAG RATIO
Cone-conical-frustrum configurations meeting center of gravity requirements for higher hypersonic lift-drag ratios in axisymmetric manned spacecraft
c01 A69-39237
Hypersonic aerodynamic characteristics of low fineness ratio variable geometry logistics spacecraft model
[NASA-TM-X-1701] c01 N69-13218
Newtonian aerodynamics for circular cones modified to produce lift at zero angle of attack
[NASA-TN-D-5193] c01 N69-23926

LIFT FANS
Theoretical analysis of axisymmetric flow in VTOL lift fan inlets without crossflow
[NASA-TN-D-5065] c01 N69-17831
Wind tunnel tests of subsonic aerodynamic characteristics of large scale tip turbine cruise fan with 1.075 pressure ratio at angle of attack
[NASA-TN-D-5316] c28 N69-34575

LIFTING BODIES
Subsonic lifting surface theory including leading edge, discussing singularities in solution of integral equation for determination of aerodynamic properties
[AIAA PAPER 69-37] c01 A69-18167
Lifting body stability augmentation systems design, development, ground tests and flight data including frequency response, limit cycle and structural resonance
[AIAA PAPER 69-887] c02 A69-39413
Transonic wind tunnel evaluation of variable stabilizer configuration effects on hypersonic elliptical lifting body dynamics
[NASA-TM-X-1789] c01 N69-25244
Indirect optical viewing system in F-104B for simulated lifting-body approach and landing tasks
[NASA-TN-D-5299] c14 N69-29730
Load distribution calculations for subsonic compressible flow of arbitrary wings and lifting surfaces
[NASA-TN-D-5335] c01 N69-31337
Three dimensional pressure distribution functions for lifting surfaces with trailing-edge controls based on integral equations for subsonic flow
[NASA-TN-D-5419] c01 N69-38768
Large scale wind tunnel investigation of lifting body with inflatable and rigid afterbody
[NASA-TN-D-5468] c01 N69-38775
Aerodynamic characteristics of large-angle cones in supersonic lifting capabilities
[NASA-TN-D-5499] c01 N69-40026
Longitudinal dynamics of lifting vehicle in orbital flight
[NASA-CR-1449] c30 N69-40062

LIFTING REENTRY VEHICLES
Lifting body type M2-F1 and M2-F2 aircraft enabling astronauts to make own landings at choice airport
c02 A69-13367
Lifting body entry vehicles in low speed flight test program for determining handling qualities, discussing M2-F2 glide flights
c02 A69-15571
Steerable landing gear system consisting of freely castoring corotating wheel nose gear, tiltable axle and main gear skids for lifting body spacecraft
[AIAA PAPER 69-790] c02 A69-35639
Aerodynamic performance tests of autorotative unpowered rotor entry vehicle model at various Mach numbers and angles of attack
[AIAA PAPER 68-950] c01 A69-37155

LIFTING ROTORS
Theory for predicting rotational and vortex noise of lifting rotors in hovering and forward flight
[NASA-CR-1333] c23 N69-25344
Wind tunnel investigation of steady state aerodynamics of composite lift VTOL aircraft model combining rotary and fixed wings
[NASA-TN-D-5232] c02 N69-28097

LIGHT (VISIBLE RADIATION)
Picosecond light pulse measurement by two photon excitation of photographic film
c14 A69-20165
Optical parametric noise in water by ruby laser beam for phase matched four photon process
c23 A69-21751
Light effects on circadian rhythms in monkeys, describing changes in deep body temperature and locomotor activity phase relationships
c04 A69-31336
Night sky Cerenkov light detectors observations of pulsars CP 1133, NP 0532 and NP 0527, noting instrumental limitation in detecting ultrashort light pulses
c30 A69-34994
Detecting geomorphological features over northeast Africa by Nimbus 2 visible and infrared radiation measurements
[NASA-TN-D-4648] c13 N69-14290
Visible and infrared transmitting properties of epoxy resin suitable for infrared detectors
[NASA-TM-X-1776] c18 N69-23843
Spectral emission of visible from Q switched dye lasers
[NASA-CR-1374] c16 N69-29934

LIGHT AIRCRAFT
Light aircraft hazards due to trailing vortex generated by heavy transport aircraft, suggesting specific procedures for takeoff, landing and flight phase
[SAE PAPER 680220] c02 A69-14930
Light rigid civil aircraft response to continuous atmospheric turbulence estimated using two rigid body degrees of freedom method for vertical and lateral gusts
[AIAA PAPER 69-766] c32 A69-35657
Full scale wind tunnel investigation of lateral and longitudinal stability and control characteristics of light twin engine airplane
[NASA-TN-D-4983] c02 N69-17303
Potential structural materials and design concepts for light aircraft
[NASA-CR-1285] c02 N69-20848

LIGHT BEAMS
Scanned laser beam display techniques based on cathode ray tube technology, noting flying spot scanner and beam deflection
c14 A69-15028
Self modulation, self steepening and spectral development of light in small scale trapped filaments, noting influence of relaxation time
c23 A69-20745
Laser beam interactions with free electrons
[NASA-TN-D-5205] c16 N69-25357

LIGHT ELEMENTS
Intermediate energy protons elastic and quasi-elastic scattering from light nuclei, correlating p-D, p-He-3, p-p and p-He-4 data with various scattering models
c24 A69-43123
Differential cross section and polarization measurements for elastic scattering of high energy protons from light nuclei
c24 A69-43125

LIGHT EMISSION
Ionospheric currents geophysical dc electric field measurement from sounding rockets, indicating anticorrelation with auroral luminosity
c13 A69-38508

LIGHT MODULATION
Automatic closed loop distortionless control of magnetic field modulation using light sensitive resistor as one leg of attenuator
c09 A69-17708
Self modulation, self steepening and spectral development of light in small scale trapped filaments, noting influence of relaxation time
c23 A69-20745

LIGHT SCATTERING
Multiple light scattering in planetary atmospheres, discussing diffuse reflection and transmission by atmosphere of particles with anisotropic scattering pattern
c30 A69-12105
Unicellular microorganisms size and concentration estimates based on light scattering measurements of suspensions in spectrophotometer cuvette compartment
c04 A69-25643
Multiple light scattering solutions accuracy by diffraction peak omission from cloud and haze

analytic phase functions compared for optically thick and thin planetary atmospheres
c30 A69-33159
Computer analysis of light scattering data from polymer solutions
[NASA-TN-D-5177] c06 N69-22991
LIGHT SOURCES
Detection time to light point source noting response to dark, star field and glare source backgrounds
c05 A69-17215
Rotating and oscillating magnetic neutron stars causing pulsars radio and optical signals, stressing UV line emissions theory
c30 A69-20624
Dual beam white or nearly monochromatic light source providing programmed repetitive sample illumination with variable intensity, pulse duration and sequence for photosynthesis research
c14 A69-36378
Optical system for recording Schlieren images with continuous writing, ultrahigh speed framing camera
[NASA-TN-D-4986] c14 N69-15381
LIGHT TRANSMISSION
Optical absorption coefficients for triphenylmethylarsonium tetracyanoquinodimethan complex single crystal, evaluating reflectance
c26 A69-10934
Multiple light scattering in planetary atmospheres, discussing diffuse reflection and transmission by atmosphere of particles with anisotropic scattering pattern
c30 A69-12105
Self modulation, self steepening and spectral development of light in small scale trapped filaments, noting influence of relaxation time
c23 A69-20745
Reflection and transmission measurements on as grown surfaces of tetracyanoquinodimethan, obtaining optical constants by Kramer-Kronig method
c26 A69-35477
LIMITER CIRCUITS
Filtering optimization prior to limiting digital signals in strong noise, detailing bandwidth choice of single pole low pass filter
c07 A69-39450
LIMITS (MATHEMATICS)
Relationship between complex covariance and covariances of envelopes of Rician fading communication channels
[NASA-TN-D-4825] c07 N69-11011
LINE SPECTRA
Red, blue and no bias light effects on spectral response of copper sulfide-cadmium sulfide cell, using model incorporating photoconductive layer
c26 A69-16358
Doppler shift measurements of axial and rotational velocities in MPD arc, using reference lines from iron arc
[AIAA PAPER 69-110] c25 A69-18171
Subdwarf HD 25329 studied with model atmosphere approach, using H alpha, Na I and Mg I profiles for effective temperature
c30 A69-22199
Cloud scattering corrections added to synthetic spectrum analysis of carbon dioxide bands and water vapor line in Venus spectrum
c30 A69-33161
Computer program to predict spectra from electronic transitions of diatomic molecules and atoms, noting line intensity distribution by Voigt profile
c24 A69-35239
Interferometrically measured wavelengths tabulated for Th lines in 2747-4572 A range, using liquid nitrogen cooled hollow cathode lamp and Fabry-Perot interferometer
c23 A69-42150
Carroll Fourier transform method applied to stellar spectra lines to determine small rotational velocities
c30 A69-42404
Theoretical molecular line absorption of carbon monoxide in late spectral type stellar atmospheres
[NASA-TN-D-4798] c24 N69-14448
Composition and line emission characteristics of ionized tungsten, uranium, and argon
[NASA-CR-1313] c25 N69-21124
Spectral analysis of solar activity, including solar electromagnetic phenomena, facula structure, and periodic variations in chromospheric flares and solar cycles
[NASA-TT-F-581] c29 N69-33401
LINEAR ACCELERATORS
Heat generation calculations and heat transfer measurements in circulating currents of linear crossed field generators and accelerators
[NASA-TN-D-5244] c25 N69-26313
LINEAR EQUATIONS
Finite difference method for symmetric positive linear differential equations, discussing methods to solve finite difference equations generated
c19 A69-13370
Buckling equations solved for equatorial segment of spherical shell loaded in axial direction by own weight
[NASA-TN-D-4921] c32 N69-13034
Generalized averaging method for linear differential equations with almost periodic coefficients
[NASA-TN-D-5167] c19 N69-22988
Nonlinear compressible flow problems - half-space of ideal compressible fluid motion due to arbitrary pressure front
[NASA-TT-F-560] c12 N69-27168
Existence, uniqueness, and stability criteria for linear and nonlinear operational differential equations in Banach and Hilbert spaces
[NASA-CR-1356] c19 N69-28256
LINEAR PREDICTION
Linear prediction of structural failure criteria for uniaxial fiber composites
[NASA-TN-D-5367] c18 N69-33321
LINEAR SYSTEMS
Linear state variable feedback to obtain asymptotic stabilization of linear dynamic systems
c10 A69-17947
Stochastic saturating systems optimal control computation, considering attitude control and tracking system design by elliptical differential equation of dynamic programming
c10 A69-30601
Model performance index /PI/ providing criterion for approximating one dynamic flight control system by another based on geometrical representation of linear autonomous systems
[AIAA PAPER 69-885] c21 A69-39410
Transient vibration analysis of liner systems using transition matrices
[NASA-CR-1237] c32 N69-11008
Determination of stability indicative function for linear systems with multiple time delays
[NASA-TR-R-301] c31 N69-17801
LINEARITY
Second order errors in linearized velocity corrections and their effects on rate of convergence of iterative solutions
[NASA-TN-D-5037] c21 N69-17780
LINEARIZATION
Applications of quasi-linearization theory to system identification
[NASA-TN-D-5300] c19 N69-29648
LINES OF FORCE
Characteristic time on motion of magnetic lines of force in medium with Hall effect
c25 A69-12399
LININGS
Conference on NASA research in noise reduction of subsonic jet aircraft - nacelle acoustic linings, sound generation in jet engines, and operational noise effects on humans
[NASA-SP-189] c02 N69-11542
Parameters of acoustic liner for maximum liner damping for rocket engines
[NASA-TM-X-1720] c28 N69-16152
LIPID METABOLISM
Acetate carbon 14 utilization in centrifuged rats, analyzing metabolism by measuring plasma glucose, FFA and lipids synthesis
c04 A69-19429
LIPIDS
Uranyl ions interaction with phospholipid and

cholesterol monolayers, using surface pressure and potential measurements
c06 A69-25641

LIQUID AMMONIA
Reaction rate and mechanism for low temperature reaction between lithium hydride and liquid ammonia, noting chemisorbed ammonia dissociation at interface
c06 A69-11285
ATS 3 spacecraft ammonia-fueled resistojet engine test performance
[AIAA PAPER 68-553] c28 A69-39754

LIQUID ATOMIZATION
Mean drop size generated in vapor pressure regime of liquid water jet, noting effect of water temperature and orifice diameter
c12 A69-21995

LIQUID COOLING
Instantaneous frozen layer thickness and temperature profile in solidified layer obtained by iteration technique
c33 A69-39433

LIQUID CRYSTALS
Skin friction measurement in aerodynamic tests using thin liquid crystal coatings with changes in maximum light scattering wavelength in response to shearing forces
c11 A69-29029

LIQUID HELIUM
Velocity of 1 MHz sound waves in He 4 along isotherms just above critical temperature, noting specific heat ratio for 4.5 and 5 K isotherms
c23 A69-17142

LIQUID HYDROGEN
Ball bearings lubrication and wear in cryogenic hydrogen turbopumps by transfer films provided from self lubricating cage
c15 A69-10109
Pressurant gas requirements for pressurized discharge of liquid hydrogen from propellant tanks for optimum pressurization system designs
[AIAA PAPER 69-526] c28 A69-32737
Hydrodynamic inlet conditions effect on film boiling and near critical hydrogen heat transfer, using data from electrically heated various geometry test sections
[ASME PAPER 69-HT-27] c33 A69-43541
Prediction of thermodynamic effects of developed cavitation based on liquid hydrogen and Freon-114 data in scaled venturis
[NASA-TN-D-4899] c12 N69-10070
Impeller matching effects on flow range and stability operating in liquid hydrogen
[NASA-TM-X-1727] c28 N69-16213
Friction and wear of polymers with various fillers in liquid hydrogen
[NASA-TN-D-5073] c15 N69-19800
Lightweight polyurethane insulation for liquid hydrogen tanks of space vehicles
[NASA-TN-D-5114] c18 N69-20790
Volume effects on normal gravity pressurization of spherical liquid hydrogen tanks
[NASA-TN-D-5196] c33 N69-24168
Venting of spherical liquid hydrogen tankage
[NASA-TN-D-5263] c33 N69-27620
Net positive suction head requirements for helical inducer in liquid hydrogen under varied flow and temperature conditions
[NASA-TM-X-1808] c09 N69-27841
Two phase hydrogen flow in pump inlet line
[NASA-TN-D-5258] c15 N69-29476
Computerized simulation of low frequency dynamics of liquid hydrogen flow in nuclear rocket engine
[NASA-TN-D-5312] c22 N69-30070
Physical parameter effect on pressurant gas requirements during expulsion of liquid hydrogen from spherical tanks
[NASA-TN-D-5336] c28 N69-32318
Hydrogen gas pressure requirements during pressurization and transfer of liquid hydrogen from spherical tanks
[NASA-TN-D-5387] c28 N69-33211
Noncavitating and cavitating performance of inducer in liquid hydrogen
[NASA-TM-X-1854] c12 N69-33261
Low speed characteristics of liquid hydrogen centrifugal turbopumps
[NASA-TM-X-1861] c28 N69-33806
Explosive hazard evaluation of liquid oxygen liquid hydrogen propellants
[NASA-TN-D-5382] c27 N69-35321
Heat transfer characteristics of water/cryogenic hydrogen heat exchanger for nuclear rocket reactor
[NASA-TN-D-5429] c33 N69-36701

LIQUID INJECTION
Wind profile developed for calculation of deflection impulse for rocket with liquid injection thrust vector control
[NASA-TM-X-1708] c31 N69-14033

LIQUID LASERS
Organic dye laser frequency variation with temperature, noting absorption and fluorescence spectra
c16 A69-12617

LIQUID METALS
Luminous spherical fog layer surrounding burning zirconium droplet during free fall through oxygen containing atmosphere, noting effect on mass and heat transfer processes
c33 A69-28462
Compatibility tests of molten uranium with tungsten and tungsten-1.5 percent hafnium
[NASA-TN-D-5076] c17 N69-19930
Performance tests on liquid metal pumps for sodium potassium loops
[NASA-TM-X-1765] c15 N69-22970
Liquid-metal centrifugal pump at mercury loop
[NASA-TM-X-1766] c15 N69-23768
Properties and uses of liquid metal reactor fuels, including heat transfer processes in variously shaped channels, boiling and condensation of metals, and reactor control equipment
[NASA-TT-F-522] c33 N69-30507

LIQUID NITROGEN
Spontaneous Raman band shapes and depolarization ratios in liquid nitrogen and oxygen measured and compared to gas, discussing time dependence of rotational motion
c24 A69-17817
Film-nucleate boiling transition for liquid nitrogen in vertical forced flow in electrically heated tube, discussing conduction model and agreement with visual experiment
[ASME PAPER 69-HT-26] c33 A69-43542
Pressurized liquid nitrogen inside parametric amplifier structures for input, noise, and temperature improvements
[NASA-TN-D-5509] c09 N69-40079

LIQUID OXYGEN
LOX prevalve accummulator system with He pressurant for prevention of POGO effect on Saturn 5
c31 A69-15298
Vulcanizable elastomers suitable for contact with liquid oxygen, discussing preparation, mechanical properties, transition temperature and structure
c06 A69-16497
Fluorinated polyurethanes synthesis for liquid oxygen environments and cryogenic structural utility, noting structural effects on LOX compatibility
c06 A69-16498
Spontaneous Raman band shapes and depolarization ratios in liquid nitrogen and oxygen measured and compared to gas, discussing time dependence of rotational motion
c24 A69-17817
Explosive hazard evaluation of liquid oxygen liquid hydrogen propellants
[NASA-TN-D-5382] c27 N69-35321

LIQUID PHASES
Thermodynamic properties of liquid and gas phase equilibria of water plus heavy water
[NASA-TN-D-5223] c33 N69-26247

LIQUID POTASSIUM
Solubility of vanadium in liquid potassium
[NASA-TN-D-5093] c17 N69-20789
Solubility of refractory metals and alloys in liquid potassium and lithium
[NASA-CR-1371] c17 N69-27059
Molybdenum and tungsten solubility in liquid potassium
[NASA-TN-D-5504] c17 N69-40053

LIQUID PROPELLANT ROCKET ENGINES
Gaseous He bubbles injection into liquid

propellant launch vehicle fuel lines to reduce vehicle POGO oscillations by lowering feed system natural frequencies
c31 A69-25498
Precision flow measurement techniques for low thrust auxiliary propulsion liquid rockets
[NASA-TN-D-4785] c28 N69-16122
Nozzle insert evaluation and gas cooling concept in storable liquid propellant rocket engine
[NASA-TM-X-1756] c28 N69-19782
Double-dead-time model describing chugging to liquid propellant rocket engines having multielement injectors
[NASA-TN-D-5303] c28 N69-29405
Dynamic response of liquid jet atomization to acoustic oscillations
[NASA-TN-D-5339] c28 N69-30980
Historical developments in aviation and astronautics including liquid propellant rocket engine design, electric rocket engines, aircraft engines, and inertial guidance
[NASA-TT-F-540] c34 N69-31836

LIQUID ROCKET PROPELLANTS
Characteristics of liquid propellant explosions, analyzing detonation, shock wave formation and deflagration
c27 A69-14474
Saturn fireball thermal environment associated with liquid propellant explosions, using analytical model
c27 A69-14475
Yield and combustion physics of liquid propellant explosions determined from analytic charts
c27 A69-14477
Performance of bipropellant fractional-pound rocket thrustor
[NASA-TM-X-1699] c28 N69-13237
Liquid rocket acoustic instability for hydrogen-oxygen and earth storable propellant combinations
[NASA-TN-D-4968] c28 N69-14384
Analytical model for use in design of pump inlet accumulators for prevention of liquid rocket longitudinal oscillation
[NASA-TN-D-5394] c28 N69-33319
Development of barium chemical release system
[NASA-CR-1415] c13 N69-35660
Historical development of liquid propellant rocket engines and aviation models
[NASA-TT-F-537] c34 N69-36314

LIQUID SLOSHING
Propellant slosh load criteria for design of space vehicles
[NASA-SP-8009] c32 N69-14553
Lateral sloshing in cylinders under low gravity conditions
[NASA-TN-D-5058] c12 N69-19112
Sound wave pressure for preventing cryogenic propellant sloshing during space flight
[NASA-TN-D-4024] c23 N69-38180

LIQUID SODIUM
Performance and cavitation damage to axial flow pump rotor blades in high temperature liquid sodium
[NASA-TN-D-5138] c15 N69-21773
Effect of temperature and pressure on cavitation damage to cobalt base alloy in sodium
[NASA-TN-D-5273] c17 N69-28863
Cavitation damage and effect of fluid temperature on performance of axial flow pumps in liquid sodium
[NASA-TN-D-5484] c15 N69-38641

LIQUID-SOLID INTERFACES
Microscopic time lapse movies in solid/liquid interface profile during melting and freezing of materials for spacecraft thermal control as reversible heat sink
[AIAA PAPER 69-95] c33 A69-18126

LIQUID-VAPOR INTERFACES
Cylindrical bubbles stability in vertical pipes from photographs, describing wake, spacing, pressure pulsations and convection cells effects
[ASME PAPER 69-HT-28] c33 A69-43540
Observations of interface behavior during inflow to elliptical ended cylinder in weightlessness
[NASA-TM-X-1719] c12 N69-15473
Flow rate effect on dynamic contact angle for wetting liquids in weightless environment
[NASA-TN-D-5115] c12 N69-20794
Vapor ingestion phenomenon during draining in weightlessness
[NASA-TN-D-5210] c12 N69-24917
Liquid-vapor interface during outflow in weightlessness
[NASA-TM-X-1811] c12 N69-27954

LIQUIDS
Analysis of flow stability of thin liquid film adjacent to high speed gas stream
[NASA-TN-D-4976] c12 N69-15630
Combustion stability of single swirl can combustor modules using ASTM-A1 liquid fuel
[NASA-TN-D-5436] c28 N69-40080

LITHIUM
Elastic scattering of slow electrons by negative H and positive Li ions, calculating differential cross sections and phase shifts
c24 A69-12924
Atomic Li photoionization cross sections calculated with Brueckner-Goldstone many body perturbation theory
c24 A69-17134
Vacuum distillation determination of O in Li, evaluating accuracy through O additions and recoveries, method blank and residue identification
c06 A69-40932
Electron irradiation effect on resolution of lithium-drifted silicon semiconductor detectors
[NASA-TN-D-4901] c14 N69-10933
Fabrication and testing of lithium-drifted detectors as low energy photon spectrometers
[NASA-TN-D-5056] c24 N69-19828
Vacuum distillation determination of oxygen in lithium
[NASA-TN-D-5197] c06 N69-23706
Solubility of refractory metals and alloys in liquid potassium and lithium
[NASA-CR-1371] c17 N69-27059

LITHIUM COMPOUNDS
Effects of lithium and oxygen losses on magnetic and crystallographic properties of spinel lithium ferrite
[NASA-TR-R-305] c06 N69-20775

LITHIUM COOLED REACTOR EXPERIMENT
Systems analysis of Rankine cycle nuclear-electric potassium space power system using Li cooled fast reactor and high temperature turbine inlet
c22 A69-42266

LITHIUM HYDRIDES
Reaction rate and mechanism for low temperature reaction between lithium hydride and liquid ammonia, noting chemisorbed ammonia dissociation at interface
c06 A69-11285
Compton profile from single crystal of LiH measured with X ray scattering, noting valence-electron momentum distribution role
c26 A69-40730
Transport study of neutron and photon attenuation through lithium hydride and tungsten spheres
[NASA-TN-D-4989] c24 N69-15375

LITHIUM OXIDES
Lithium peroxide utilization feasibility for oxygen supply and carbon dioxide control in extravehicular portable life support systems
[AIAA PAPER 69-620] c05 A69-33303

LIVER
Acetate-2-C 14 conversion to C 14 carbon dioxide and C 14 fatty acids in rats with 2/3 of liver removed
c04 A69-35976
Hyperoxia and hypoxia effects on mitotic activity in regenerating and normal rat liver exposed to environmental conditions
c04 A69-43565

LOAD DISTRIBUTION (FORCES)
Spherical caps axisymmetric static and dynamic buckling under load, using axisymmetric nonlinear elastic shell theory approximation and finite difference equations
[AIAA PAPER 69-89] c32 A69-18133
Flexible rotor blade dynamic response to radially moving force, emphasizing helicopter rotor vibration characteristics associated with tip-vortex impingement
[AIAA PAPER 69-203] c02 A69-19546

User manual for computer program 55VD for computation of minimum induced drag and load distribution of nonplanar wings
[NASA-CR-1218-SUPPL] c01 N69-12286
Propellant slosh load criteria for design of space vehicles
[NASA-SP-8009] c32 N69-14553
Load distribution calculations for subsonic compressible flow of arbitrary wings and lifting surfaces
[NASA-TN-D-5335] c01 N69-31337

LOADING OPERATIONS
Hydraulic-powered self propelled six degree of freedom loading vehicle moving tests assembly to test chamber with high accuracy positioning
c11 A69-38181

LOADS (FORCES)
Turbine blade loading in terms of surface diffusion and loading factors, discussing tandem and jet flap blades and vortex generators
[ASME PAPER 68-WA/GT-11] c28 A69-16136
Forces on flexible shells of Apollo command module during water impact
[NASA-TM-X-1781] c32 N69-23697
Design calculations for conical shells and elastic systems subject to antisymmetric loads
[NASA-TT-F-518] c32 N69-30754
Drag and stability characteristics of towed, conical decelerator
[NASA-TM-X-1833] c02 N69-38598

LOCOMOTION
Light effects on circadian rhythms in monkeys, describing changes in deep body temperature and locomotor activity phase relationships
c04 A69-31336

LOGIC CIRCUITS
Magnetic core logic circuit system for bidirectional stepping motor drive voltage power supply control in proper phase and time sequence
c09 A69-11000

LOGIC DESIGN
Computer organization design employing distributed processor to provide general purpose computing while taking advantage of large scale integration
c34 A69-39133
Computer memory reduction through FORTRAN higher level language, discussing tradeoff between costs saved and additional logic hardware
[AIAA PAPER 69-963] c08 A69-40344

LOGISTICS
Logistics management developed for Apollo Applications Program of NASA Manned Spacecraft Center
[AAS PAPER 69-204] c34 A69-42812

LONG TERM EFFECTS
Atmospheric model development relating temperature, density, moisture and energy measurements from satellite observations for long term weather forecasting
[UN PAPER 68-95397] c20 A69-10463
Secular change examination in cislunar geomagnetic tail field gradient during summers of 1966 and 1967, using Explorer 33 and 35 results
c13 A69-11237
Earth mantle and core friction interaction suggested as cause of secular change in orbital motion obliquity
c13 A69-27821

LONGERONS
Structural stability of lattice column of longerons and helical braces
[NASA-CR-1301] c32 N69-26234

LONGITUDE MEASUREMENT
Longitudinal mass spring modeling of launch vehicles
[NASA-TN-D-5371] c32 N69-34970

LONGITUDINAL CONTROL
Flight investigation of lightweight helicopter to study feasibility of fixed collective pitch autorotations
[NASA-TN-D-5270] c02 N69-29232

LONGITUDINAL STABILITY
Gaseous He bubbles injection into liquid propellant launch vehicle fuel lines to reduce vehicle POGO oscillations by lowering feed system natural frequencies
c31 A69-25498
Saturn 5 longitudinal instability /POGO/ precluded by lowering S-1C stage propulsion system resonance below structural frequency
[AIAA PAPER 69-548] c31 A69-32658
Large scale wind tunnel tests to improve longitudinal stability of supersonic transports with variable swept wings
[NASA-TN-D-5005] c02 N69-16384
Full scale wind tunnel investigation of lateral and longitudinal stability and control characteristics of light twin engine airplane
[NASA-TN-D-4983] c02 N69-17303
Jet exhaust location effects on longitudinal aerodynamic characteristics of jet V/STOL model
[NASA-TN-D-5333] c01 N69-33210
Wind tunnel tests of static longitudinal and lateral characteristics of short takeoff aircraft with external flow jet flap
[NASA-TN-D-5364] c01 N69-33275
Longitudinal dynamics of lifting vehicle in orbital flight
[NASA-CR-1449] c30 N69-40062

LONGITUDINAL WAVES
Collisional theory of longitudinal wave propagation for two fluid viscous ionized plasmas formulated from coupled Maxwell and Boltzmann equations
c25 A69-20796
Longitudinal plasma waves collision damping calculations using Rostoker test particle method
c25 A69-34439

LOOPS
Cb-1Zr pumped sodium loop tests to evaluate loop components, EM pump, pressure transducers, and instrumentation techniques
[NASA-CR-1135] c03 N69-11373

LOSSES
Flow angle and throat Reynolds number effects on loss characteristics of two dimensional supersonic nozzle
[NASA-TM-X-1823] c01 N69-31360

LOUVERS
Optimal design for improving thermal performance of existing spacecraft thermally actuated louver system by increasing open-to-closed emittance ratio
[AIAA PAPER 69-627] c33 A69-33269

LOW ALTITUDE
Parachute load distribution measurements with tensiometer during low altitude drop tests
[NASA-TM-X-1832] c14 N69-32682

LOW DENSITY FLOW
Flight test performance of supersonic parachutes in low density environment
[NASA-TN-D-5296] c01 N69-30063

LOW DENSITY MATERIALS
Low density polybenzimidazole composites as ablative heat shields, discussing arc-heated wind tunnel tests of linear and crosslinked structures
c18 A69-41715

LOW FREQUENCIES
Electron number density LF oscillations for ionized gas identified with periodic solutions to neutral and charged particle plasma continuity equations
c25 A69-24315

LOW NOISE
Error analysis of input noise temperature measurements of low noise amplifiers
[NASA-TN-D-4997] c07 N69-16162

LOW PASS FILTERS
Filtering optimization prior to limiting digital signals in strong noise, detailing bandwidth choice of single pole low pass filter
c07 A69-39450
Cataloged pulse response curves for different types of conventional low pass filters
[NASA-TN-D-5494] c07 N69-40099

LOW PRESSURE
Thermodynamic properties of erbium hydrogen binary system evaluated for use as low pressure standard
[NASA-CR-1271] c14 N69-16099
Low pressure application of orbitron and ion gage designs
[NASA-CR-1300] c14 N69-28402
Thermal electromotive force change for thermocouples in high temperature, low pressure

environments for 3700 hours
[NASA-TN-D-5287] c14 N69-29196
LOW SPEED
Low speed characteristics of liquid hydrogen centrifugal turbopumps
[NASA-TM-X-1861] c28 N69-33806
LOW SPEED STABILITY
Test facilities and techniques for low speed flight problems of aircraft handling qualities, stability, control and performance
c11 A69-15575
Low speed static and dynamic longitudinal, and lateral stability of scale model of supersonic transport in wind tunnel tests
[NASA-TN-D-4726] c02 N69-10733
LOW TEMPERATURE
Radius effect on bulging and fracture of through-cracked cylindrical pressure vessels at cryogenic temperatures
[NASA-TN-D-4951] c32 N69-14480
High resolution and image intensity of field ion microscope at low temperatures
[NASA-TN-D-5125] c14 N69-21408
Tensile and cyclic fatigue properties of graphite filament-wound pressure vessels at ambient and cryogenic temperatures
[NASA-TN-D-5354] c32 N69-31300
Emissivity coatings for low temperature space radiators
[NASA-CR-1420] c17 N69-36723
LOW TEMPERATURE ENVIRONMENTS
Solar absorptance, total hemispherical emittance and absorptance/emittance ratio for metals at cryogenic temperatures measured simultaneously with sinusoidally perturbed incident radiation
c33 A69-10847
Cryogenic behavior of adhesive materials used in fabrication of liquid hydrogen/liquid oxygen powered Saturn S-4B stage
c18 A69-16487
Film processing effects on cryogenic mechanical properties of polyethylene terephthalate
c18 A69-16490
Cryogenic mechanical properties of epoxy resins and glass/epoxy composites
c18 A69-16491
Mechanical behavior of polyethylene terephthalate at cryogenic temperatures
c18 A69-16494
Molecular motion in polytetrafluoroethylene crystals at cryogenic temperatures, noting crystal defect permitting angular displacements of chain segments
c24 A69-16495
Vulcanizable elastomers suitable for contact with liquid oxygen, discussing preparation, mechanical properties, transition temperature and structure
c06 A69-16497
Fluorinated polyurethanes synthesis for liquid oxygen environments and cryogenic structural utility, noting structural effects on LOX compatibility
c06 A69-16498
LOW TEMPERATURE PHYSICS
Fermi surface topology effects on Nernst-Ettingshausen coefficient from measurements in magnetic fields to 3.3 tesla and 1.2-4.2 K temperatures in metallic tin
c26 A69-16357
Cryogenic behavior of adhesive materials used in fabrication of liquid hydrogen/liquid oxygen powered Saturn S-4B stage
c18 A69-16487
Mechanical relaxation of poly 4 methyl pentene 1 at cryogenic temperatures, discussing temperature dispersion curve and secondary absorption associated with thermal motion of side chains
c18 A69-16492
Polymer glasses low temperature transitions, relating structure and transition temperature
c06 A69-16493
Molecular motion in polytetrafluoroethylene crystals at cryogenic temperatures, noting crystal defect permitting angular displacements of chain segments
c24 A69-16495
LOW TEMPERATURE TESTS
Cryogenic mechanical properties of epoxy resins and glass/epoxy composites
c18 A69-16491
Cooling requirements for high speed polytetrafluorethylene lubricated ball bearings operating in cold hydrogen gas, developing minimum gas flow rate equation
[ASLE PAPER 68-LC-2] c15 A69-19310
LOW THRUST PROPULSION
Spacecraft optimum low thrust trajectory analyzed by Hamiltcn-Jacobi perturbation theory, obtaining canonic constants of motion
c30 A69-17574
Low thrust mission simulation dependence on hardware definition, discussing power plant characteristics, jet velocity and thrustor efficiency
c30 A69-21204
Interplanetary low thrust mission analysis model, discussing major elements interactions
c30 A69-21206
30 cm diameter mercury bombardment low impulse thrustor development for potential space applications, discussing performance and control
[AIAA PAPER 69-238] c28 A69-21256
Low thrust trajectories for minimum time rendezvous between continuous thrust interceptor and passive target vehicle, comparing calculus of variations and steepest ascent analyses
c30 A69-32177
Minimal electric propulsion systems for interplanetary spacecraft, discussing payload, reduced trip time and low thrust systems for Jupiter flyby
[AIAA PAPER 69-499] c28 A69-32714
Precision flow measurement techniques for low thrust auxiliary propulsion liquid rockets
[NASA-TN-D-4785] c28 N69-16122
Current computer programs for low thrust trajectory analysis using flyby and rendezvous trajectories
[NASA-TM-X-1824] c08 N69-30014
Mechanics of low thrust space flight
[NASA-TT-F-507] c28 N69-33354
LOWER ATMOSPHERE
Mars lower atmospheric pressure, temperature and composition, noting consistency between photometric, spectroscopic and occultation techniques
c30 A69-12104
Optical radar studies of lower atmosphere, giving Mie theory calculations of clear atmosphere volume backscattering cross sections for four laser wavelengths
c07 A69-27001
LOWER IONOSPHERE
Mars lower ionosphere ionization from spectroscopic and Mariner 4 occultation data, discussing various ionization sources
c30 A69-18607
LUBRICANT TESTS
Steel ball bearing high temperature fatigue life tested with synthetic paraffinic oil, fluorocarbon and polyphenyl ether
[ASME PAPER 69-LUBS-18] c15 A69-34378
Oxygen concentration effects on oxidation of synthetic paraffinic and type II ester lubricants determined from ball bearing tests at 400 and 450 degrees F
c15 A69-35177
LUBRICANTS
Lubrication performance and thermal shear degradation of polyphenyl ethers and refined mineral oils in high temperature vane pump loop
[NASA-TN-D-5096] c15 N69-20938
Friction and contact resistance during sliding in vacuum of low resistivity metals lubricated with sputtered molybdenum disulfide
[NASA-TN-D-5349] c15 N69-31884
LUBRICATING OILS
Hydrodynamic conical and spherical spiral grooved grease bearings replacement of gyro ball bearings for extended space missions
[AIAA PAPER 69-836] c15 A69-39367
Performance evaluation of oil lubrication system for antifriction bearing rotor system of Brayton cycle turbomachinery
[NASA-CR-1229] c15 N69-16463

LUBRICATION
Ball bearings lubrication and wear in cryogenic hydrogen turbopumps by transfer films provided from self lubricating cage
c15 A69-10109
Elastohydrodynamic lubrication, discussing film thickness and dependence on fluid hydrodynamics and contact zone deformation
c15 A69-11324
Contact conformity effects on spinning torque and friction coefficient in angular contact ball bearings from lubricated and unlubricated tests
[ASME PAPER 68-LUB-10] c15 A69-30901
Elastohydrodynamic solution for ball torque spinning without rolling in nonconforming groove, showing increase in torque with stress and spinning and decreasing conformity
[ASME PAPER 69-LUBS-11] c15 A69-34381
Theory and clearance effects on stability of water lubricated herringbone-groove journal bearings
[NASA-TN-D-4883] c15 N69-10228
High speed foil bearing rotor support system
[NASA-CR-1157] c15 N69-14214
Survey of incompressible and compressible fluid film hydrostatic and hydrodynamic lubrication
[NASA-SP-5058] c15 N69-28592
LUBRICATION SYSTEMS
Performance and analysis of seals for nitrogen inerted lubrication systems of turbine engines
[NASA-TN-D-4761] c15 N69-10055
Performance tests of SNAP 8 lubrication and cooling subsystem
[NASA-TM-X-1731] c03 N69-20828
LUMINAIRES
Illumination in cryogenic or noncryogenic fluids by standard light bulbs
[NASA-TM-X-1654] c14 N69-13176
LUMINANCE
Foveal luminances for chromatic and absolute thresholds for hue identification in case of small targets
c23 A69-19649
LUMINESCENCE
Luminescence spectra of aromatic polymers, monomers and dimers under high energy electron excitation using molecular resonance model
c26 A69-32792
Luminescence effects on apparent size and shape of foveally fixated targets of various forms
c04 A69-36458
LUMINOUS INTENSITY
Minimal angle of resolution /MAR/ between point and extended circular source and between point source and simulated horizon, studying irradiation effects on manual navigation
c21 A69-19208
Star twinkling absence for lunar observation laboratory, noting star distance measurement and laser action in stellar atmospheres
c30 A69-27172
Intensity ratios effect of forbidden Fe and Ca transitions in solar corona on Fe/Ca ratio, noting cascading configurations
c30 A69-36219
IR excess of R CrB type variable star RY Sgr, noting visual brightness and radiation in 2.0-3.4 micron range
c30 A69-42377
LUNAR BASES
Lunar surface power plants, considering weight constraint for various systems using nuclear power, solar cell/fuel cells and H-O reactant regeneration
c03 A69-11396
Lunar colony development, detailing construction of permanent lunar bases taking into account oxygen, food, water, power and transportation
c11 A69-27906
Lunar soil as building material and extraction of water, oxygen and rocket propellants from lunar materials for lunar colony needs
c30 A69-27907
Apollo 11 mission and future space exploration prospects including moon base, manned space station, reusable shuttle vehicles, etc
c30 A69-41477
Lunar environment, bases, exploration, and extraterrestrial resources
[NASA-SP-177] c30 N69-22226
LUNAR COMMUNICATION
Lunar surface transmission loss for Apollo astronaut point-to-point communications
[NASA-TN-D-4915] c07 N69-13301
LUNAR COMPOSITION
Lunar composition analysis by measuring atomic and nuclear radiation emission from orbiter
[AAS PAPER 68-197] c30 A69-11475
Surveyor 5 Mare Tranquillitatis landing site similarity to Oceanus Procellarum sites, discussing surface material elemental composition and lunar structure
c30 A69-12224
Possible evolution of earth continents and ocean basin, considering ultrabasic, basic, and intermediate to acidic lunar highlands chemical composition
c30 A69-17006
LUNAR CRATERS
Collapse theory of dimple craters, analogies with terrestrial sink holes and dimple craters as channels for gas escape from interior
c30 A69-15589
Regolith thickness distribution at Lunar Orbiter sites, correlating thickness directly with cratering density
c30 A69-18604
Module landing effects on lunar surface, deriving erosion law from Surveyor 5 engine firing test and vacuum test data
c30 A69-41388
LUNAR CRUST
Lunar surface mechanical properties at Surveyor 5 site
c30 A69-12225
Regolith thickness distribution at Lunar Orbiter sites, correlating thickness directly with cratering density
c30 A69-18604
LUNAR ECHOES
Lunar laser beam retroreflection observations, showing agreement with predicted ephemeris and signal strength
c30 A69-43197
LUNAR EFFECTS
Interplanetary magnetic field measurements in lunar wake, noting magnetic perturbations pattern and absence of shocks
c30 A69-11228
LUNAR ENVIRONMENT
Manned testing of EVA equipment in thermal-vacuum environment for qualification of Apollo extravehicular mobility unit, using lunar surface thermal simulator
[AIAA PAPER 69-992] c05 A69-40370
Thermal and dielectric properties of homogeneous moon based on microwave and infrared temperature observations
[NASA-TM-X-1734] c30 N69-17815
LUNAR EVOLUTION
Chemical composition of Earth, Venus, Mars, Mercury and Moon calculated from mathematical models, constructing approximate equations of state at high pressure
c30 A69-29878
Lunar origin theories, considering moon/earth mass ratio, earth-moon system angular momentum deficiency and differential volatilization in earth
c30 A69-29882
LUNAR EXPLORATION
Lunar colony development, detailing construction of permanent lunar bases taking into account oxygen, food, water, power and transportation
c11 A69-27906
Lunar soil as building material and extraction of water, oxygen and rocket propellants from lunar materials for lunar colony needs
c30 A69-27907
Vehicles for lunar surface exploration and transportation including flying machines and wheeled vehicles
c30 A69-27908
Space travel and lunar exploration medical problems
c04 A69-27909
Lunar environment, bases, exploration, and extraterrestrial resources
[NASA-SP-177] c30 N69-22226

Manned space flight capabilities for lunar and planetary explorations and earth orbiting stations
[NASA-SP-196-VOL-1] c34 N69-22510
Proposed electromagnetic exploration of moon
[NASA-SP-174] c30 N69-33595
LUNAR FAR SIDE
Libration point relay satellites for continuous communication link between earth and lunar far side, discussing trajectories and halo orbit stationkeeping
c30 A69-30188
LUNAR FLIGHT
Navigation state vector update effect on lunar mission completion capability for Saturn 5, emphasizing hardware and scheme errors and accelerometer failure
[AIAA PAPER 69-883] c21 A69-39409
LUNAR GEOLOGY
NASA lunar receiving laboratory for lunar rock samples examination by gamma ray spectrometry for induced radioactive nuclides and naturally occurring isotopes
c11 A69-38271
Tektite origin theories, discussing Surveyor experiments effects on lunar geology and Tektite origin
c30 A69-40086
Apollo lunar sample collection and analysis, discussing astronauts activity and equipment, sample types, laboratories for radioactive counting and gas analysis, etc
c11 A69-40191
Summary of lunar data and scientific observations generated by Surveyor landings on Moon
[NASA-SP-184] c30 N69-36451
LUNAR GRAVITATION
Lunar gravitational anomalies from internal density variation viewpoint, discussing isostasy in maria
c30 A69-14631
Lunar mass and gravitational field determined from lunar satellite dynamics, using potential function in terms of spherical harmonics
c30 A69-31405
Lunar gravity effects on mans locomotion on moon
[NASA-CR-1403] c05 N69-36271
LUNAR GRAVITY SIMULATOR
Prototype lunar gravity simulator using magnetic air bearings and spring motors
[NASA-CR-1233-VOL-1] c05 N69-11675
Magnetic air bearings for use as low friction overhead support fixtures in vertical lunar gravity simulator
[NASA-CR-1235] c05 N69-14213
Design and dynamic characteristics of vertical lunar gravity simulator with six degrees of freedom torso harness
[NASA-CR-1234] c05 N69-14979
LUNAR LANDING
Module landing effects on lunar surface, deriving erosion law from Surveyor 5 engine firing test and vacuum test data
c30 A69-41388
LUNAR LANDING MODULES
Lunar colony development, detailing construction of permanent lunar bases taking into account oxygen, food, water, power and transportation
c11 A69-27906
Concepts of acceptance testing lunar and planetary vehicles
[NASA-TN-D-4924] c11 N69-14507
Scaled lunar landing module jet erosion of simulated moon surfaces
[NASA-TN-D-5051] c31 N69-22630
Translunar abort technique for nonfree-return missions
[NASA-TM-X-1806] c30 N69-29569
LUNAR LANDING SITES
Surveyor 5 Mare Tranquillitatis landing site similarity to Oceanus Procellarum sites, discussing surface material elemental composition and lunar structure
c30 A69-12224
Lunar surface mechanical properties at Surveyor 5 site
c30 A69-12225
Photographic results of Lunar Orbiter program noting possible Apollo sites
c30 A69-15858
Regolith thickness distribution at Lunar Orbiter sites, correlating thickness directly with cratering density
c30 A69-18604
NASA lunar survey and mapping for generating Apollo satellite landing navigation control, using analytic photogrammetry, camera position and altitude data of lunar topography
c14 A69-36931
Summary of lunar data and scientific observations generated by Surveyor landings on Moon
[NASA-SP-184] c30 N69-36451
LUNAR MAGNETIC FIELDS
Interplanetary magnetic field measurements in lunar wake, noting magnetic perturbations pattern and absence of shocks
c30 A69-11228
Secular change examination in cislunar geomagnetic tail field gradient during summers of 1966 and 1967, using Explorer 33 and 35 results
c13 A69-11237
Magnetometer experiment for Apollo project to measure lunar surface magnetic field, describing mission requirements and instrumentation
[AAS PAPER 68-206] c30 A69-11481
Lunar magnetic moment and surface field, discussing Explorer 35 field measurements
c30 A69-14005
Solar wind plasma effects on lunar wake umbral and penumbral interplanetary magnetic field anomalies, evaluating roles of electrons and ions
c30 A69-38095
Lunar Explorer 35 measurements of lunar surface electromagnetic properties, magnetic fields and solar wind-moon interactions
c30 A69-38379
LUNAR MARIA
Surveyor 5 Mare Tranquillitatis landing site similarity to Oceanus Procellarum sites, discussing surface material elemental composition and lunar structure
c30 A69-12224
Lunar gravitational anomalies from internal density variation viewpoint, discussing isostasy in maria
c30 A69-14631
Nondimensional Jeffreys number as ratio of Reynolds to Froude number for gravitational motion of viscous masses, with application to lunar maria and plastic ice
c30 A69-19262
LUNAR MODULE
System designs for manned spacecraft gravity gradient stabilization of Saturn S-4B stage at 400 km and lunar module at synchronous altitude
c31 A69-18338
Thermal Vacuum /TV/ manned test operations related to Apollo lunar module in simulated space environment
c05 A69-30394
Module landing effects on lunar surface, deriving erosion law from Surveyor 5 engine firing test and vacuum test data
c30 A69-41388
Full scale dynamic landing impact investigation of prototype lunar module landing gear
[NASA-TN-D-5029] c31 N69-20965
LUNAR ORBIT AND LANDING SIMULATORS
Full scale dynamic landing impact investigation of prototype lunar module landing gear
[NASA-TN-D-5029] c31 N69-20965
Human transfer functions applied in systems analysis of manually controlled lunar landing simulator
[NASA-TN-D-5478] c05 N69-39183
LUNAR ORBITER
Lunar composition analysis by measuring atomic and nuclear radiation emission from orbiter
[AAS PAPER 68-197] c30 A69-11475
Lunar Orbiter mission objectives and orbit design
[AIAA PAPER 68-47] c30 A69-15503
Photographic results of Lunar Orbiter program noting possible Apollo sites
c30 A69-15858
Telecommunications performance of two lunar relay satellite system /LRSS/, determining operation capabilities with Apollo communications system

c07 A69-42508
Telemetry data from image-motion compensation sensor on Lunar Orbiter 1 spacecraft for determining radius of moon
[NASA-TN-D-5231] c30 N69-29115
Flight performance of Atlas Agena launch vehicles in support of Lunar Orbiter missions 3, 4, and 5
[NASA-TM-X-1859] c31 N69-37281
Lunar Orbiter 1 terrain assessment photographs and preliminary selenodesy, micrometeoroid, and radiation data
[NASA-SP-197] c30 N69-39213
Penetration flux calculation for multiwall structure on Lunar Orbiter spacecraft missions
[NASA-TN-D-5455] c32 N69-41229

LUNAR ORBITS
Explorer 35 measurements of low energy plasma in lunar orbit made by planar multigrid sensor programmed as retarding potential analyzer
c30 A69-16278
Real time targeting for Apollo lunar orbit insertion maneuver burn, discussing impulsive maneuvers for flight control
[AIAA PAPER 68-848] c31 A69-39760
Effect of gravitational model variations on accuracy of lunar orbit determination from data arcs
[NASA-TN-D-5105] c30 N69-21018
Lunar and artificial satellite theories treated by generalization of Von Zeipel procedure
[NASA-TN-D-5459] c30 N69-38145
Entry aerodynamics at lunar return conditions from command module of Apollo 4 flight
[NASA-TN-D-5399] c31 N69-38820

LUNAR PHOTOGRAPHS
NASA photogrammetric lunar activities, discussing imagery and control data by Lunar Orbiter and photogrammetric data reduction for preparing manned lunar landing
c14 A69-34336

LUNAR PHOTOGRAPHY
Lunar Orbiter mission objectives and orbit design
[AIAA PAPER 68-47] c30 A69-15503
Photographic results of Lunar Orbiter program noting possible Apollo sites
c30 A69-15858
NASA lunar survey and mapping for generating Apollo satellite landing navigation control, using analytic photogrammetry, camera position and altitude data of lunar topography
c14 A69-36931
NASA Lunar Orbiter Program of lunar photography from orbiting spacecraft
c30 A69-38377
Photogrammetric camera system developed from NASA requirements to document lunar surface environment during manned space flight exploration
c14 A69-40989
Lunar Orbiter 1 terrain assessment photographs and preliminary selenodesy, micrometeoroid, and radiation data
[NASA-SP-197] c30 N69-39213

LUNAR PROBES
Lunar orbital mission plans intended to optimize spacecraft procurement, flight schedules, science objectives and available funds
c30 A69-34362

LUNAR RADIATION
Lunar surface thermal radiation incident on unit area flat surface located at variable distance and orientation above moon, considering diffusion effects
c30 A69-38973
Thermal calculations of objects near lunar surface, considering IR emission directivity effects
c30 A69-43254

LUNAR RECEIVING LABORATORY
NASA lunar receiving laboratory for lunar rock samples examination by gamma ray spectrometry for induced radioactive nuclides and naturally occurring isotopes
c11 A69-38271
NASA Lunar Receiving Laboratory functional areas and physical, chemical, biological and quarantine activities for crew and lunar samples
c11 A69-38896

LUNAR SATELLITES
Lunar mass and gravitational field determined from lunar satellite dynamics, using potential function in terms of spherical harmonics
c30 A69-31405
Short term motion of lunar satellite, discussing third body disturbing functions and perturbation solution of nonsingular orbit elements
c30 A69-35934
Semianalytic theory for lunar satellite motion including perturbative effects
[NASA-TN-D-5043] c30 N69-28050

LUNAR SHADOW
Moon effect on intensity and angular distribution of energetic electron and proton shadowing as observed by Explorer satellites
c30 A69-16252

LUNAR SOIL
Module landing effects on lunar surface, deriving erosion law from Surveyor 5 engine firing test and vacuum test data
c30 A69-41388

LUNAR SPACECRAFT
Chronology of Apollo spacecraft program to 7 Nov. 1962
[NASA-SP-4009] c31 N69-32021

LUNAR SURFACE VEHICLES
Flight test evaluation of small one man lunar flying device /POGO/, discussing vehicle control, pressure suit factors and piloting differences
[AIAA PAPER 68-240] c11 A69-12379
Vehicles for lunar surface exploration and transportation including flying machines and wheeled vehicles
c30 A69-27908

LUNAR TEMPERATURE
Lunar dynamic response to discontinuities in interplanetary magnetic field to determine electrical conductivity and internal temperature
c30 A69-31442
Lunar temperature prediction with emphasis on variable property models, noting assumptions about physical properties appearing in heat conduction equations
c30 A69-34374

LUNAR TIDES
Ocean circulation as climate regulator, discussing role in redistributing climate-changing energy input from solar radiation or lunar tidal friction into atmosphere
c13 A69-26333

LUNAR TOPOGRAPHY
Magnetometer experiment for Apollo project to measure lunar surface magnetic field, describing mission requirements and instrumentation
[AAS PAPER 68-206] c30 A69-11481
Electron beam meter application as lunar surface electric field detector, discussing breadboard model and performance characteristics
c14 A69-13221
Photographic results of Lunar Orbiter program noting possible Apollo sites
c30 A69-15858
Possible evolution of earth continents and ocean basin, considering ultrabasic, basic, and intermediate to acidic lunar highlands chemical composition
c30 A69-17006
Gaussian particle size distribution with porosity and surface irregularity corrections used to determine mean particle size of lunar surface material at Surveyor sites
c30 A69-26371
Vehicles for lunar surface exploration and transportation including flying machines and wheeled vehicles
c30 A69-27908
NASA lunar survey and mapping for generating Apollo satellite landing navigation control, using analytic photogrammetry, camera position and altitude data of lunar topography
c14 A69-36931
Aluminized plastic covers to reduce radiator sink temperatures on lunar surface
[NASA-TM-X-1729] c03 N69-17225
Lunar topography statistics determined by Zond 3 space probe
[NASA-TT-F-514] c30 N69-24206

Spectral reflectance of planetary atmospheres, lunar topography, and planetary surface analyses
[NASA-TT-F-502] c30 N69-31989
Calculation for study of vertical and horizontal positioned lunar radiators
[NASA-TM-X-1846] c33 N69-32683
Simulation of astronaut locomotion on lunar surface to determine metabolic costs
[NASA-CR-1402] c05 N69-37964

LUNGS
Ventilation-perfusion inequality increase effects on lung overall gas exchange, using digital model
c05 A69-38388
Biomechanical factors determining lung damage following explosive decompression of space suits in vacuum test chambers
[NASA-CR-1223] c05 N69-13969

LYMAN SPECTRA
Rocket spectrographic observations of Alpha Virginis noting hydrogen Lyman absorption lines
c30 A69-27555

LYRAE CONSTELLATION
Individual properties of RR Lyrae stars
[NASA-TT-F-562] c30 N69-27169

LYSINE
Time of heating effect on thermal polymerization of L-lysine free base
c06 A69-28439
Free lysine and dinitrophenyl /DNP/ derivatives determined quantitatively by ion exchange chromatography
c06 A69-33651

M

M-1 ENGINE
Scale models of M-1 rocket engine oxygen and hydrogen pump driven two stage turbines used to determine performance and compact inlet manifolds problems
[AIAA PAPER 69-553] c28 A69-32678
Structural failures of high pressure, gaseous hydrogen storage tanks for M-1 engines
[NASA-CR-1305] c17 N69-19831

M-2 LIFTING BODY
Lifting body type M2-F1 and M2-F2 aircraft enabling astronauts to make own landings at choice airport
c02 A69-13367

MACH NUMBER
Oblique shock wave properties with free stream Mach number and flow deflection angle as independent variables, noting explicit solution
c01 A69-25378
Mach number, cone angle, bluntness and wall to recovery temperature ratio effects on slender cones boundary layer transition measurements at hypersonic speeds
c01 A69-33250
Large scale axisymmetric inlet systems performance capabilities, reviewing theoretical and experimental programs
[AIAA PAPER 68-580] c28 A69-34018
Effect of unit Reynolds number, nose bluntness, angle of attack, and roughness on transition on 5 degree half-angle cone at Mach 8
[NASA-TN-D-4961] c01 N69-14872
Experimental surface pressure distributions on spherically blunted cone at Mach numbers from 1.50 to 4.63
[NASA-TM-X-1730] c01 N69-16209
Performance test from Mach 2.58 to 1.98 of axisymmetric mixed-compression inlet system with 60 percent internal contraction
[NASA-TM-X-1739] c01 N69-19130
Effects of cone angle, base flare angle, and corner radius on Mach 3 aerodynamic characteristics of large angle cones
[NASA-TN-D-5048] c01 N69-19926
Characteristics study of bicone mixed compression inlet for Mach 1.80 to 2.50
[NASA-TN-D-5084] c01 N69-20914
Antenna effects on aerodynamic characteristics of 0.410 scale model Cajun rocket at Mach numbers from 2.30 to 4.63
[NASA-TM-X-1771] c01 N69-21106
Aerodynamic characteristics of blunted cones, tension shell, and attached inflatable decelerator models
[NASA-TN-D-5219] c31 N69-26570
Aerodynamic investigation of sharp cone-cylinder spikes on 120 degree blunted cones at Mach numbers of 3, 4.5, and 6
[NASA-TN-D-5201] c01 N69-29154
Aerodynamic characteristics effected by parallel-staged simple aerodynamic configurations at Mach numbers of 3 and 6
[NASA-TN-D-5379] c01 N69-33302
Fluctuating properties of turbulent boundary layers for Mach numbers up to 9
[NASA-TN-D-5496] c12 N69-40137

MACHINE ORIENTED LANGUAGES
Interactive experimenter computer system software and hardware design considerations based on astronaut-machine/experimenter question-answer interactions
[AIAA PAPER 69-953] c08 A69-40335

MACHINE TOOLS
Soviet research on high temperature strength of materials and machine parts
[NASA-TT-F-508] c17 N69-27300

MACROSCOPIC EQUATIONS
Relation between ellipsoidal velocity distribution function and macroscopic flow equations
[NASA-TN-D-5026] c12 N69-17827

MAGNESIUM
Influence of number of slip systems operating in magnesium on friction and effect of orientation of crystals on friction behavior
[NASA-TN-D-4351] c15 N69-10370
Cyclic heating and thermal shock effects on hafnia stabilized with calcia, magnesia, and yttria
[NASA-TN-D-5279] c18 N69-34547

MAGNETIC ANOMALIES
Solar wind plasma effects on lunar wake umbral and penumbral interplanetary magnetic field anomalies, evaluating roles of electrons and ions
c30 A69-38095

MAGNETIC CIRCUITS
Magnetic core logic circuit system for bidirectional stepping motor drive voltage power supply control in proper phase and time sequence
c09 A69-11000

MAGNETIC COILS
Cryogenic solenoids with pure Al conductor for production of strong magnetic fields, discussing softness and strain resistivity problems
c03 A69-26497
Sealed and unsealed relay coils temperature rise at simulated outer space air pressure levels
c09 A69-28048
Pumped helium tests of 51 centimeter bore niobium tin magnetic coils
[NASA-TN-D-5158] c26 N69-22965
Wind tunnel magnetic support and balance system for measuring sphere drag
[NASA-CR-1353] c11 N69-25343
Thermal outgassing tests on epoxy impregnated magnet coil
[NASA-TM-X-1813] c18 N69-28203

MAGNETIC CONTROL
Automatic closed loop distortionless control of magnetic field modulation using light sensitive resistor as one leg of attenuator
c09 A69-17708

MAGNETIC CORES
Inductance behavior of coils filled with superconducting lead or niobium dusts
[NASA-TN-D-5137] c26 N69-21500

MAGNETIC DIPOLES
Outer magnetosphere average magnetic field configuration between 5 and 18 earth radii, noting various maps in equatorial plane
c13 A69-14012
Geomagnetic field model /POGO/ to confirm eccentric dipole westward velocity secular decrease predicted by day length changes
c13 A69-37490
Hydromagnetic radiation characteristics of electric and magnetic dipoles in homogeneous anisotropic cold plasma, obtaining field components and wave propagation modes
c13 A69-42905
Measurement of change in plasma potential and magnetic field of hydrogen plasma impinging on magnetic dipole - simulation of solar wind-earth

interaction
[NASA-TM-X-1738] c25 N69-19131
MAGNETIC DISPERSION
Physical properties of magnetic base ferrofluids
[NASA-CR-1407] c06 N69-33493
MAGNETIC DISTURBANCES
Sudden magnetic field increase associated with July 8, 1966 sudden commencement observed by OGO 3 satellite in magnetotail
c13 A69-11226
High latitude ionization spikes observed by POGO spacecraft, noting frequency correlation with magnetic disturbances and development by high energy electron injections
c29 A69-28950
High latitude magnetospheric convection patterns determined from ionospheric current distribution using magnetic disturbance plots
c13 A69-38503
MAGNETIC EFFECTS
Quiet solar wind model with magnetic field numerically calculated, obtaining coronal electron densities and angular momentum near earth
c29 A69-34301
Strength and direction data on earth and extraterrestrial magnetic fields for guidance in vehicle design
[NASA-SP-8017] c31 N69-40269
MAGNETIC EQUATOR
Magnetic dip equator position at E layer and gradient with time and altitude, using geomagnetic field models
c13 A69-42428
MAGNETIC FIELDS
Magnetic field data from OGO-2 spacecraft and surface magnetic observatories, noting magnetic storm occurrence and magnetosphere inflation and detection of polar ionospheric currents
c13 A69-11125
Ring current particle energy density distribution for symmetric portion of magnetic storm derived from current magnetic field profile measurements
c29 A69-11227
Characteristic time on motion of magnetic lines of force in medium with Hall effect
c25 A69-12399
Fermi surface topology effects on Nernst-Ettingshausen coefficient from measurements in magnetic fields to 3.3 tesla and 1.2-4.2 K temperatures in metallic tin
c26 A69-16357
Automatic closed loop distortionless control of magnetic field modulation using light sensitive resistor as one leg of attenuator
c09 A69-17708
Steady shock discontinuity in perfectly conducting gas flow in arbitrarily oriented magnetic field for various Mach numbers
c25 A69-19988
Plasma oscillation modes perpendicular to magnetic field used to study energy conversion by wave coupling across density discontinuity
c25 A69-20795
Fast electron diffusion in stochastic magnetic field, obtaining diffusion coefficient as function of ratio of correlation time to Larmor period
c25 A69-20807
Rotating plasma disturbances onset in MPD arc, determining magnetic field dependence on mass flow, background pressure and propellant
[AIAA PAPER 69-232] c28 A69-21225
Background pressure and magnetic field shape effect on MPD thrustor performance, testing radiation cooled thrustors
[AIAA PAPER 69-243] c28 A69-21239
Near cathode magnetic field effect on instability in linear Hall current accelerators, using geometry of field extending from anode to cathode region
[AIAA PAPER 69-381] c28 A69-21731
Electrothermal instabilities of ionization region of nonequilibrium MHD generator in presence of magnetic field
c25 A69-21919
Thermodynamic approach to equation of state of magnetized Fermi gas, deriving energy eigenvalues of free electron in magnetic field
c30 A69-25107
Electric relays requirements for spacecraft with magnetic field constraints
c09 A69-28046
Severe magnetosphere distortions in north-south direction with parallel/antiparallel magnetosheath to magnetospheric field ascribed to solar wind property changes from Explorer 12 observations
c13 A69-34947
Twenty year wave in diurnal anisotropy component of galactic cosmic rays arriving at earth from asymptotic direction east of sun interpreted as magnetic reconnection
c29 A69-38098
Ferromagnetism stable state in degenerate electron gas and magnetic fields in gravitationally collapsed bodies based on total microscopic magnetic moments associated with Landau level electrons
c30 A69-38600
Dirac equation in external electromagnetic fields, deriving solution for constant orthogonal electric and magnetic fields encountered in plasma transport
c23 A69-41357
Convected balanced electric arcs in transverse magnetic fields
[NASA-CR-1267] c25 N69-18041
Plasma accelerator with magnetic field producing divergent-nozzle effect
[NASA-TN-D-5122] c25 N69-22942
Physical model for plasma containment simulation in magnetic fields
[NASA-TN-D-5217] c25 N69-25394
Eddy current torques on bodies rotating relative to uniform magnetic field
[NASA-TN-D-5086] c23 N69-29477
Magnetic torque resulting from interaction between magnetic properties of spacecraft and ambient magnetic field
[NASA-SP-8018] c31 N69-30339
Parametric angles of trajectory-determined field line intersects predicting location of artificial auroras in magnetosphere
[NASA-TN-D-5189] c30 N69-32316
Hydrodynamic stability and vortex containment of two fluid wheel flow to helical disturbances contained by axial magnetic field
[NASA-TN-D-5372] c12 N69-32377
Performance tests of silicon and germanium transistors in intense magnetic fields
[NASA-TN-D-5428] c09 N69-36710
Performance of two electron bombardment thrusters with axial magnetic field and superimposed cusp magnetic field
[NASA-TN-D-5448] c28 N69-36844
Energy conversion and distribution of spiraling electron beam using retarding field analyzer
[NASA-TN-D-5490] c09 N69-41208
MAGNETIC FLUX
Interplanetary magnetic field fluctuations obtained by IMP 2
c30 A69-16264
MAGNETIC FORMING
Decoupling force exerted by magnetic forming Be coil assembly on metallic plate during forming
c14 A69-25310
MAGNETIC MATERIALS
Evaluation of magnetic materials for static inverters and converters, tested under square wave excitation and direct current excitation
[NASA-CR-1226] c03 N69-17765
MAGNETIC MEASUREMENT
Ac technique using lock-in power amplifier SNR for measuring galvanomagnetic and Shubnikov-de-Haas effects, noting error reduction
c14 A69-36375
Shock discontinuities in solar wind measured by magnetic field and plasma instruments on Explorer 34, applying Rankine-Hugoniot relations
c30 A69-40304
Spectral analysis of solar activity, including solar electromagnetic phenomena, facula structure, and periodic variations in chromospheric flares and solar cycles
[NASA-TT-F-581] c29 N69-33401
Physical properties of magnetic base ferrofluids
[NASA-CR-1407] c06 N69-33493

MAGNETIC MIRRORS
Ion cyclotron wave generation in RF self sustained mode improved by installing grid structures in plasma near magnetic mirrors
c25 A69-13113
MAGNETIC MOMENTS
Lunar magnetic moment and surface field, discussing Explorer 35 field measurements
c30 A69-14005
Quantum theory of electron gas with anomalous magnetic moments in intense magnetic fields, noting pair creation from thermodynamic energy in system
c24 A69-19782
Ferromagnetism stable state in degenerate electron gas and magnetic fields in gravitationally collapsed bodies based on total microscopic magnetic moments associated with Landau level electrons
c30 A69-38600
Effects of lithium and oxygen losses on magnetic and crystallographic properties of spinel lithium ferrite
[NASA-TR-R-305] c06 N69-20775
MAGNETIC PROPERTIES
Magnetically anchored eddy current and eddy current rod dampers for GEOS gravity gradient stabilized satellite
[NASA-CR-1282] c14 N69-18953
Magnetic performance properties of air cooled solenoids applied to one component support and balance system
[NASA-CR-1352] c11 N69-24089
MAGNETIC STORMS
Magnetic field data from OGO-2 spacecraft and surface magnetic observatories, noting magnetic storm occurrence and magnetosphere inflation and detection of polar ionospheric currents
c13 A69-11125
Ring current particle energy density distribution for symmetric portion of magnetic storm derived from current magnetic field profile measurements
c29 A69-11227
Solar plasma observations during magnetic storms, discussing shocks and tangential discontinuities, geomagnetic variations and He
c13 A69-11234
Sudden commencement associated discontinuities in interplanetary magnetic field observed by IMP 3 satellite, stressing shocks and tangential and rotational discontinuities
c30 A69-22183
Simultaneous interplanetary magnetic field measurements by geocentric satellites Explorer 33 and IMP 3 of MHD shock wave associated with July 8, 1966 sudden storm commencement
c30 A69-23773
Magnetic storm time variations of electron concentrations in upper ionosphere near north geomagnetic pole, discussing magnetic time, altitude and latitude dependence
c29 A69-28939
Worldwide changes in geomagnetic field, determining causes by examining magnetic field and plasma data for solar wind and classifying as SSC or SI
c29 A69-31963
Simultaneous solution of continuity and heat conduction equations for ionospheric electrons, ions and neutral species for studying F region magnetic storm behavior
c13 A69-32083
Interplanetary magnetic fields from Explorer 33 magnetometer relationship to surface geomagnetic variations emphasizing unified view
c30 A69-32309
Electron temperature, density and magnetic disturbances measurements at 1000 km compared with visual observations during 25-26 May 1967 magnetic storm and aurora
c13 A69-34954
Explorer 34 observations of hydrogen and He ions in solar wind, noting number density variations and tentative association with geomagnetic storms
c29 A69-40305
Topside ionosphere response to magnetic storms, using Explorer 22 satellite electron concentration and temperature measurements
c13 A69-42438
MAGNETIC SURVEYS
Structure, temporal behavior, shape and length of earth magnetic tail via satellite mapping
c29 A69-19363
Interplanetary magnetic fields from Explorer 33 magnetometer relationship to surface geomagnetic variations emphasizing unified view
c30 A69-32309
MAGNETIC TAPES
Root mean square time delay error with respect to playback time and autocorrelation function of tape recorded sine wave for studying jitter spectra
c14 A69-18827
MAGNETIC VARIATIONS
Solar plasma observations during magnetic storms, discussing shocks and tangential discontinuities, geomagnetic variations and He
c13 A69-11234
Secular change examination in cislunar geomagnetic tail field gradient during summers of 1966 and 1967, using Explorer 33 and 35 results
c13 A69-11237
Interplanetary magnetic field fluctuations obtained by IMP 2
c30 A69-16264
Microscale fluctuations in interplanetary magnetic field, considering proton thermal energy and magnetic field energy densities
c30 A69-24100
Electron concentration enhancement in upper atmosphere at polar latitudes, noting three independent zones and relation to magnetic local time
c29 A69-28938
Geomagnetic field model /POGO/ to confirm eccentric dipole westward velocity secular decrease predicted by day length changes
c13 A69-37490
MAGNETICALLY TRAPPED PARTICLES
Trapped particles drift velocity in time dependent meridional magnetic and perpendicular electric field
c25 A69-20809
Time dependent convection electric fields as agents for diffusing trapped magnetospheric radiation inward toward earth, discussing one dimensional diffusion equation
c29 A69-28936
MAGNETOACOUSTICS
Amplitude equations for magnetoacoustic and entropy waves diverging from normal MHD shock, obtaining energy flux ratios associated with incident and transmitted waves
c25 A69-38242
MAGNETOACTIVITY
Radiation fields from energetic electron moving in helical orbit in magnetoactive plasma, using Maxwell equations
c30 A69-39965
MAGNETOHYDRODYNAMIC FLOW
Steady shock discontinuity in perfectly conducting gas flow in arbitrarily oriented magnetic field for various Mach numbers
c25 A69-19988
Solar plasma flow around magnetosphere, discussing plasma velocity, density and temperature and magnetic field space and time variations
c29 A69-26736
Fluid dynamic simulation of gas core nuclear rocket chamber for separating light and heavy gas via centrifugal force produced by MHD-driven rotational flow
[AIAA PAPER 69-727] c22 A69-33483
Dirac equation in external electromagnetic fields, deriving solution for constant orthogonal electric and magnetic fields encountered in plasma transport
c23 A69-41357
Measurement of change in plasma potential and magnetic field of hydrogen plasma impinging on magnetic dipole - simulation of solar wind-earth interaction
[NASA-TM-X-1738] c25 N69-19131
Momentum integral method treating magnetohydrodynamic and simple hydrodynamic entrance flows
[NASA-TN-D-5215] c25 N69-24920

Aerodynamic drag effects of hypersonic magnetohydrodynamic plasma flow around blunt bodies
[NASA-CR-1393] c25 N69-34897
MAGNETOHYDRODYNAMIC GENERATORS
Doppler shift measurements of axial and rotational velocities in MPD arc, using reference lines from iron arc
[AIAA PAPER 69-110] c25 A69-18171
Electrothermal instabilities of ionization region of nonequilibrium MHD generator in presence of magnetic field
c25 A69-21919
Conducting fluid incompressible flow in entrance of MHD channel by momentum integral method, permitting edge stress existence at boundary layer free stream interface
[AIAA PAPER 69-724] c12 A69-33436
Comparison of Brayton and Rankine cycle magnetogasdynamic space power generation systems for use with nuclear heat source
[NASA-TN-D-5085] c03 N69-20852
Electron temperature instabilities in entrance region of magnetohydrodynamic generator
[NASA-TM-X-1761] c25 N69-20875
Physical model for behavior of thermionic arc spots on MHD generator cathode
[NASA-TN-D-5414] c25 N69-35732
MAGNETOHYDRODYNAMIC STABILITY
Relationship between instabilities and turbulence in plasma, using spectrum of plasma fluctuations
c25 A69-13115
Rotating plasma disturbances onset in MPD arc, determining magnetic field dependence on mass flow, background pressure and propellant
[AIAA PAPER 69-232] c28 A69-21225
Near cathode magnetic field effect on instability in linear Hall current accelerators, using geometry of field extending from anode to cathode region
[AIAA PAPER 69-381] c28 A69-21731
Electrothermal instabilities of ionization region of nonequilibrium MHD generator in presence of magnetic field
c25 A69-21919
Dynamics, stability and approach to equilibrium of bounded one dimensional collisionless plasma representing minimum energy states with nonlinear Vlasov equation solutions
c25 A69-24305
Alternating current plasma arc coaxial flow stabilization
[AIAA PAPER 68-706] c25 A69-28232
Plasma instabilities in astrophysics - Conference, Monterey, October 1968
c30 A69-42681
Electrothermal instabilities effects on Brayton and Rankine cycle magnetohydrodynamic space power generation systems
[NASA-TN-D-5461] c03 N69-37883
MAGNETOHYDRODYNAMIC WAVES
Collisionless plasma heating by hydromagnetic waves in solar wind
c29 A69-12714
Steady shock discontinuity in perfectly conducting gas flow in arbitrarily oriented magnetic field for various Mach numbers
c25 A69-19988
Quasi-linear theory of hydromagnetic waves in nonrelativistic collisionless plasma, noting resonant diffusion effect on plasma heating mode
c25 A69-20797
Switch-on ionizing shock waves structure, analyzing condition of downstream state and effect on hydromagnetic wave speed
c25 A69-22045
Collisionless plasma heating by damping hydromagnetic waves applied to solar wind qualitative model, discussing magnetoacoustic wave energy
c30 A69-22426
Simultaneous interplanetary magnetic field measurements by geocentric satellites Explorer 33 and IMP 3 of MHD shock wave associated with July 8, 1966 sudden storm commencement
c30 A69-23773
Transmission of Alfven waves through earth bow shock based on hydromagnetic shocks theory, discussing amplitude amplification
c13 A69-32099
Amplitude equations for magnetoacoustic and entropy waves diverging from normal MHD shock, obtaining energy flux ratios associated with incident and transmitted waves
c25 A69-38242
Hydromagnetic radiation characteristics of electric and magnetic dipoles in homogeneous anisotropic cold plasma, obtaining field components and wave propagation modes
c13 A69-42905
MAGNETOHYDRODYNAMICS
MHD Rankine-Hugoniot equations for ion density, thermal pressure and convective velocity magnitude and orientation during Pioneer 6 traversal of earth bow shock
c30 A69-42417
MAGNETOIONICS
Conjugate echoes in Alouette 2 topside sounder ionograms explained by multiple reflections between conjugate points of field line, noting magnetospheric waveguides role
c07 A69-20045
Propagation characteristic model study of kinked Z trace observed on topside ionograms and explained by magnetoionic theory
c13 A69-37893
MAGNETOMETERS
Magnetometer experiment for Apollo project to measure lunar surface magnetic field, describing mission requirements and instrumentation
[AAS PAPER 68-206] c30 A69-11481
MAGNETORESISTIVITY
Nernst-Ettingshausen, thermoelectric power, thermal transverse-even, magnetoresistance, and Hall coefficients in white tin in 3.3 tesla field and cryogenic temperatures
[NASA-TN-D-5227] c26 N69-25412
MAGNETOSPHERE
Outer magnetosphere average magnetic field configuration between 5 and 18 earth radii, noting various maps in equatorial plane
c13 A69-14012
Magnetosphere - Conference, Boston College, June 1967
c29 A69-19351
Solar wind flow past earth and magnetosphere correspondence to external aerodynamics of round nosed bodies in supersonic stream
c13 A69-19360
Structure, temporal behavior, shape and length of earth magnetic tail via satellite mapping
c29 A69-19363
Magnetospheric plasma probe results with Pioneer 6 and 7, discussing plasma fluctuations and solar wind interaction with geomagnetic field
c13 A69-19364
Geomagnetic tail topology, reconnection and interaction with moon from Explorer 33 satellite data
c13 A69-19365
Modified first order theory of magnetosphere boundary shape incorporating effects of neutral sheet currents of extended geomagnetic tail
c13 A69-21661
Solar protons in magnetospheric tail after flare of July 7, 1966 with isotropic pitch angle distribution, expressing energy spectrum as exponential in rigidity
c29 A69-21699
Earth thermal plasmasphere contraction subsequent to solar flare obtained from ion mass spectrometers on OGO satellites
c13 A69-23777
Plasma-pause position measurements by ion mass spectrometers and broadband VLF receivers on OGO 1 and OGO 3 and by broadband recordings at Antarctica
c13 A69-25153
Light ion abundance measurements of OGO satellites and field aligned diffusive equilibrium theory with temperature and concentration latitudinal variations
c13 A69-25157
Solar plasma flow around magnetosphere, discussing plasma velocity, density and temperature and magnetic field space and time variations
c29 A69-26736

Satellite observations of geomagnetic tail in magnetosphere near midnight meridian plane, discussing formation, shape, plasma sheet and models
c13 A69-26739
Solar wind plasma observations in geomagnetospheric wake compared at 1000 and 500 earth radii, considering ion energy spectra and geomagnetic tail
c29 A69-26943
Time dependent convection electric fields as agents for diffusing trapped magnetospheric radiation inward toward earth, discussing one dimensional diffusion equation
c29 A69-28936
Banded chorus, VLF discrete emissions in magnetosphere in single variable frequency band with frequency depending on equatorial electron gyrofrequency
c13 A69-31981
Low energy solar protons entry into magnetosphere on 26 May 1967 showing diffusion control
c29 A69-31984
High latitude magnetospheric convection patterns determined from ionospheric current distribution using magnetic disturbance plots
c13 A69-38503
Polar cap ionospheric response to solar cosmic ray events observed by Mariners 2 and 4 solar proton measurements used to test magnetosphere models
c29 A69-43621
Parametric angles of trajectory-determined field line intersects predicting location of artificial auroras in magnetosphere
[NASA-TN-D-5189] c30 N69-32316
Strength and direction data on earth and extraterrestrial magnetic fields for guidance in vehicle design
[NASA-SP-8017] c31 N69-40269

MAGNETOSPHERIC ELECTRON DENSITY
Nighttime protonosphere thermal balance from Alouette 2 electrostatic probe measurements of electron temperature and concentration in magnetosphere
c13 A69-43181

MAGNETOSPHERIC INSTABILITY
Severe magnetosphere distortions in north-south direction with parallel/antiparallel magnetosheath to magnetospheric field ascribed to solar wind property changes from Explorer 12 observations
c13 A69-34947

MAGNETOSPHERIC ION DENSITY
Alouette 2 sounding data for magnetospheric field aligned propagation duct model
[NASA-TN-D-5332] c13 N69-34891

MAGNETOSPHERIC PROTON DENSITY
Solar protons in magnetospheric tail after flare of July 7, 1966 with isotropic pitch angle distribution, expressing energy spectrum as exponential in rigidity
c29 A69-21699

MAGNETRONS
Magnetron ionization gauge in helium for low pressure measurement, discussing striking characteristics and time lags
c03 A69-10606
Bent beam ionization gage linearity from calibrated nude Modulated Bayard-Alpert /MBA/ gage, discussing buried collector and tabulated magnetron gages
c14 A69-41216

MAGNETS
Magnetic air bearings for use as low friction overhead support fixtures in vertical lunar gravity simulator
[NASA-CR-1235] c05 N69-14213

MAGNITUDE
Spectral classes and photographic magnitudes determined for region Lacerta OB1
[NASA-TN-D-5060] c30 N69-26235

MAGNONS
Anisotropic Heisenberg antiferromagnetism in spin wave approximation, calculating thermodynamic quantities in terms of elliptic integrals
c26 A69-26500
Anisotropic Heisenberg ferromagnets in random phase and spin wave approximation
[NASA-TN-D-5286] c26 N69-29588

MAIN SEQUENCE STARS
Atmospheric models for metal deficient stars of K and G spectral type, studying reduced metal abundance effect on atmospheric structure
c30 A69-22055
Optical depths of convection related to metal deficiency for main sequence and giant stars
c30 A69-29946

MAINTAINABILITY
Weightless simulators effectiveness for obtaining space systems maintainability criteria, using nonparametric experimental design for performance data
c05 A69-17648
Reliability and maintainability - Conference, Denver, July 1969
c15 A69-35999

MAMMALS
Micro lagoon technique for culture and observation of isolated mammalian cells
[NASA-TN-D-4906] c04 N69-11056

MAN MACHINE SYSTEMS
Roll-motion cues for man-vehicle control in compensatory tracking task with disturbance input
c05 A69-23879
Man-computer speech communication, discussing model and aspects of acoustics, phonetics, linguistics, language training, physiology, psychology, bionics, etc
c08 A69-35099
Synthesis methods for manual aerospace control systems using digital programming and man machine performance data with application to supersonic transport design
[NASA-CR-1208] c02 N69-13185
Measurement of pilot describing functions in single controller multiloop tasks
[NASA-CR-1238] c05 N69-15372
Predictive display systems using repetitive, fast time, on-line computation
[NASA-CR-1274] c05 N69-17738
Conversational approach to matrix calculations on computers
[NASA-TM-X-1749] c08 N69-18954
Engineering problems survey on teleoperator control systems
[NASA-SP-5070] c05 N69-21478
Physiological and psychological responses of man to space flight problems
[NASA-TT-F-529] c05 N69-32044

MANAGEMENT
Indexed and abstracted references to reports and articles on management available in NASA information system
[NASA-SP-7500/03/] c34 N69-32430

MANAGEMENT PLANNING
Electromagnetic interference /EMI/ created by noise coupling through conductive paths, discussing responsibility for control within systems management
c07 A69-18944
NASA long range planning of primary electric propulsion for automated space program
[AIAA PAPER 69-247] c28 A69-21251
In-house research on R and D management in government agencies, discussing manning, training, center programs, case studies, etc
c34 A69-38022
Logistics management developed for Apollo Applications Program of NASA Manned Spacecraft Center
[AAS PAPER 69-204] c34 A69-42812
Space program planning, noting market requirements, acceptability and future characteristics
[AAS PAPER 69-083] c34 A69-42820
Communication in large organizations, describing internal communication model
c34 A69-42930
Application of NASA mathematical management models and systems analyses in private industry and economy
[NASA-SP-5048] c34 N69-10662
Computer program for research and engineering management of spacecraft projects
[NASA-CR-1275] c34 N69-18057
Bibliography of systems approach to management
[NASA-SP-7501] c34 N69-34917

Chronological study of design and development of Gemini project
[NASA-SP-4002] c31 N69-36501
MANEUVERABILITY
Flight tests with helicopters for studying manueverability
[NASA-TN-D-4931] c02 N69-14008
MANEUVERS
Unstabilized astronaut, hand-held and integrated life support EVA maneuvering units tested in gimbaled six degree of freedom servo driven moving base simulator
[AAS PAPER 69-516] c05 A69-42850
MANGANESE COMPOUNDS
Chemical analysis and paragenesis of manganoan ilmenite from Sierran adamellite using electron microprobe
c13 A69-35977
MANIFOLDS
Scale models of M-1 rocket engine oxygen and hydrogen pump driven two stage turbines used to determine performance and compact inlet manifolds problems
[AIAA PAPER 69-553] c28 A69-32678
MANIPULATORS
Manipulation errors in finite element analysis of structures
[NASA-CR-1385] c19 N69-34360
MANNED ORBITAL LABORATORIES
Earth-orbiting manned space station as single facility base for power, volume, logistics, experimental equipment and data communications
c31 A69-36464
MANNED ORBITAL RESEARCH LABORATORIES
Experiment requirements for manned earth orbiting biotechnology laboratory
[NASA-CR-1409] c05 N69-35540
Design and equipment requirements for manned earth orbiting biotechnology laboratory
[NASA-CR-1408] c05 N69-35541
MANNED ORBITAL TELESCOPES
Equations of motion computerized simulation for attitude stabilization of orbiting telescope coupled to crew compartment
c14 A69-27952
Electronically scanned star sensor with digital output for orbiting astronomical telescope
[NASA-TN-D-5281] c14 N69-29153
MANNED SPACE FLIGHT
Manned Mars and Venus missions role in overall planetary exploration program
c30 A69-12304
Future space programs as governed by cost limitations, suggesting development of economical launch vehicle for shuttling between earth and orbital space stations
c30 A69-12680
Microbiology of water management subsystem for manned space flight, discussing sterilization by heat and tests inside Integrated Life Support System /ILSS/
[SAE PAPER 680718] c05 A69-13441
German analysis of preparatory technology of U.S. space programs, noting effects of hardware development for manned space travel on future planning
c34 A69-15576
Manned spacecraft systems design optimization for extended space missions replacement modules
c31 A69-16380
Manned space flight programs, discussing U.S. technological, scientific and practical contributions
c30 A69-17074
Ground based guidance systems for supplementing onboard guidance of manned space vehicles
c21 A69-17580
Systems engineering activities in manned space flight involving design, development, manufacture, test and operation of Mercury, Gemini and Apollo flight systems
c31 A69-17602
Space travel and lunar exploration medical problems
c04 A69-27909
Earth orbital manned space astronomy, discussing long range program, instruments, facilities and data processing
c11 A69-27947
Thermal Vacuum /TV/ manned test operations related to Apollo lunar module in simulated space environment
c05 A69-30394
Design philcsophy for cost reductions on future space transportation systems, exemplifying applicatcn to booster system for earth orbital lcgistics
[AIAA PAPER 69-439] c34 A69-32654
Navigation, guidance and control developments for manned space missions, discussing earth orbital exploratcn bases
c21 A69-35801
Propulsion system performance relationship to manned planetary mission capability, discussing anticipated performance of advanced propulsion concepts
c28 A69-38118
Reducing cost of space transportation - AAS Conference, Washington, D.C., March 1969
c34 A69-39686
Crew and passenger transportation to and from space station orbits, discussing cost reduction possibilities with current or future technology
c31 A69-39691
Real time digital computer hardware simulation of Apollo Telescope Mount /ATM/ mission
[AIAA PAPER 69-940] c11 A69-40323
Photogrammetric camera system developed from NASA requirements to document lunar surface environment during manned space flight exploratcn
c14 A69-40989
Space research in past and expected scientific knowledge from manned and automated earth orbital science missions
[AAS PAPER 69-036] c30 A69-42825
Management system for safety in NASA Manned Space Flight Prcgram, discussing hazard analyses and reduction precedence sequence
[AAS PAPER 69-522] c34 A69-42851
Manned space flight history and spacecraft development
[AAS PAPER 69-501] c30 A69-42852
Material recovery from metabolic and other wastes for long duration manned space missions, discussing carbon dioxide removal, bioregenerative food systems, etc
[AAS PAPER 69-143] c05 A69-42876
NASA contributions to bioinstrumentation system - survey
[NASA-SP-5054] c04 N69-14860
Research prcblems in atmospheric entry and landing of manned planetary space flights to Mars and Venus
[NASA-TN-D-4977] c31 N69-15634
Manned space flight capabilities for lunar and planetary explorations and earth orbiting stations
[NASA-SP-196-VOL-1] c34 N69-22510
Space flight effects on human time perception
[NASA-TT-F-545] c05 N69-26455
Manned spacecraft control system requirements for abort problems
[NASA-CR-835] c31 N69-27299
Solid electrolyte electrolysis of carbon dioxide and water as oxygen regeneration system for long manned space flights
[NASA-CR-1359] c05 N69-28099
Propulsion systems for manned exploration of solar system
[NASA-TM-X-1864] c28 N69-34674
MANNED SPACECRAFT
Meteorological satellite research program, including unmanned satellite observations and possibilities with meteorologist on board manned spacecraft
[UN PAPER 68-95350] c20 A69-10483
Lifting body type M2-F1 and M2-F2 aircraft enabling astronauts to make own landings at choice airport
c02 A69-13367
Photographic control system requirements for Project Apollo manned launches, considering extreme heat, vibration and sound pressure environment
[SMPTE PAPER 104-20] c14 A69-14360
Manned spacecraft systems design optimization for extended space missions replacement modules

c31 A69-16380
Life in spacecraft - Conference, Belgrade, September 1967
c05 A69-17642
System designs for manned spacecraft gravity gradient stabilization of Saturn S-4B stage at 400 km and lunar module at synchronous altitude
c31 A69-18338
Communications for Apollo Applications Program, considering extended duration manned missions in low earth orbit and Gemini, Saturn and Apollo hardware
c07 A69-19124
Displays and controls requirements in manned spacecraft to integrate man into vehicle system, noting man capability for task diversity
c14 A69-19968
Manned spacecraft electrical power systems requirements, noting Gemini and Apollo fuel cell system design and configuration
c03 A69-21035
Manned spacecraft developments, considering Apollo Applications Program, space station establishment, space shuttle operations and payload cost
c31 A69-22866
Weight estimation and forecast in manned spacecraft design, noting size and weight relationship
[SAWE PAPER 793] c31 A69-34864
Low cost rate transportation as mandatory goal for future space program, discussing recovery and reuse, launch system costs, hardware development, etc
c31 A69-38117
Cone-conical-frustrum configurations meeting center of gravity requirements for higher hypersonic lift-drag ratios in axisymmetric manned spacecraft
c01 A69-39237
Ground based guidance for land-landing manned spacecraft with low velocity descent systems, discussing high and low altitude glide path intercept and spiral
[AIAA PAPER 69-864] c21 A69-39390
Statistical error analysis of autonomous manned spacecraft navigation in long duration eccentric Mars orbits
[AIAA PAPER 69-880] c21 A69-39406
Flexible parawing lifting decelerator research data from wind tunnel and flight tests, noting manned space vehicle recovery and aircraft escape systems
[AIAA PAPER 68-967] c02 A69-43715
Visual sensing and spacecraft guidance for earth orbit rendezvous maneuvers
[NASA-CR-1214] c05 N69-13161
Effect of spacecraft onboard radar range and range rate data and accuracy on unmanned probe entry guidance corridor
[NASA-TN-D-4852] c21 N69-16503

MANUAL CONTROL

Flight test evaluation of small one man lunar flying device /POGO/, discussing vehicle control, pressure suit factors and piloting differences
[AIAA PAPER 68-240] c11 A69-12379
Minimal angle of resolution /MAR/ between point and extended circular source and between point source and simulated horizon, studying irradiation effects on manual navigation
c21 A69-19208
Roll-motion cues for man-vehicle control in compensatory tracking task with disturbance input
c05 A69-23879
Manual procedures for midcourse and terminal guidance, discussing onboard optical measurements and calculations
c21 A69-35792
Manual guidance and control of Saturn launch vehicles, considering feasibility, reliability and hardware implementation
[AIAA PAPER 69-876] c31 A69-39402
Synthesis methods for manual aerospace control systems using digital programming and man machine performance data with application to supersonic transport design
[NASA-CR-1208] c02 N69-13185
Proprioceptor influence on operator performance in manual control situations
[NASA-CR-1248] c05 N69-14768
Optical simulation landing system for evaluating pilot controlled flexible parawing and Apollo capsule combination performance during landing
[NASA-TN-D-5049] c21 N69-20936
Simulator program for defining in-flight experiment to evaluate manual control system for Saturn 1
[NASA-TN-D-5150] c21 N69-22936
Evaluation of pilot describing function method applied to manual control analysis of large flexible booster in Saturn 5 launch vehicle simulator
[NASA-TN-D-5149] c21 N69-22996
Reliability study of Saturn 5 launch vehicle manual backup control system
[NASA-TN-D-5261] c21 N69-28018
Multimodality pilot model for visual and motion feedbacks derived from simulator program
[NASA-CR-1325] c05 N69-28071

MANUALS

Users manual on FORTRAN 4 COMPUTE program for IBM 360/67 time sharing system
[NASA-TN-D-4917] c08 N69-10098
User manual for computer program 55VD for computation of minimum induced drag and load distribution of nonplanar wings
[NASA-CR-1218-SUPPL] c01 N69-12286

MANUFACTURING

Space manufacturing operations program, discussing zero gravity effect during earth orbit flight, Apollo Applications Program Orbital Workshop Flight 2, etc
c31 A69-35067
Space manufacturing processes for orbital low and zero gravity environment, discussing buoyancy and thermal convection sensitive and molecular forces controlled methods
[AAS PAPER 69-486] c30 A69-42844

MANY BODY PROBLEM

Computer study of collisionless self gravitating system using two dimensional model, obtaining gravitational field by solving Poisson equation
c30 A69-12272
Atomic Li photoionization cross sections calculated with Brueckner-Goldstone many body perturbation theory
c24 A69-17134
Trajectory error propagation upper bounds in many body field for impulsive initial error, relating error to mission tolerances
c30 A69-21937

MAPPING

Survey of six year period of satellite observed tropical Pacific cloud mapping
c20 A69-33001
Color coded area sensitivity maps of photomultiplier tubes by multicolor display technique, noting focus electrode voltage
c14 A69-35724
Normalized hodographic mapping for constrained trajectory families, discussing mapping concepts, information content and applications
[AIAA PAPER 69-924] c30 A69-39362
Orbit selection rules for planetary cartographic spacecraft derived from relations connecting camera angle, view field and imaging resolution
[AIAA PAPER 69-879] c21 A69-39405

MARAGING STEELS

Plain strain fracture toughness tests on two inch thick maraging steel plates of various strengths, using bend and compact tension tests
c32 A69-23057
Plane strain fracture toughness tests on maraging steel plates for various yield strengths and large dimensions
c17 A69-26496
Metallurgy, behavior, and application of 18 percent nickel maraging steels
[NASA-SP-5051] c17 N69-14193

MARINER SPACE PROBES

Orbital Experimental Capsule /OEC/ as subsatellite concept for Martian fields and particles measurements, noting Voyager exploring vehicle applications
c30 A69-39215

MARKETING
Space program planning, noting market requirements, acceptability and future characteristics
[AAS PAPER 69-083] c34 A69-42820

MARKING
Cross hatching on various body surfaces due to periodic surface pressure fluctuations, discussing origin from counter-rotating longitudinal vortices in boundary layer
[AIAA PAPER 69-11] c12 A69-18213

MARS (PLANET)
Extraterrestrial life possibility in solar system, noting Martian atmosphere and terrestrial life adaption to Mars simulations
c04 A69-11770
Manned Mars and Venus missions role in overall planetary exploration program
c30 A69-12304
Entry and terminal deceleration systems for unmanned Martian landers, discussing parachute landing and lifting entry vehicles
[AIAA PAPER 68-1147] c31 A69-13670
Mars biological exploration, discussing life detection, chemical and biological experimental strategy
[AIAA PAPER 68-1122] c04 A69-13700
Chemical composition of Earth, Venus, Mars, Mercury and Moon calculated from mathematical models, constructing approximate equations of state at high pressure
c30 A69-29878
Statistical error analysis of autonomous manned spacecraft navigation in long duration eccentric Mars orbits
[AIAA PAPER 69-880] c21 A69-39406
Mars exploration for life by Mariner flybys and orbiters and 1973 Viking landers
c30 A69-41611
Research problems in atmospheric entry and landing of manned planetary space flights to Mars and Venus
[NASA-TN-D-4977] c31 N69-15634
Observations and theoretical studies on Mars properties
[NASA-SP-179] c30 N69-16571
FORTRAN computer program for providing mission design data for elliptical orbits around Mars and Venus
[NASA-TN-D-5104] c30 N69-22571

MARS ATMOSPHERE
Extraterrestrial life possibility in solar system, noting Martian atmosphere and terrestrial life adaption to Mars simulations
c04 A69-11770
Mars lower atmospheric pressure, temperature and composition, noting consistency between photometric, spectroscopic and occultation techniques
c30 A69-12104
Deceleration control system for aerobraking and skipout to orbit at Mars
[AIAA PAPER 68-1146] c31 A69-13564
Dynamic stability derivatives of large angle blunted conical spacecraft near transonic speed in simulated Mars environment for various angles of attack
[AIAA PAPER 69-104] c31 A69-18210
Mars lower ionosphere ionization from spectroscopic and Mariner 4 occultation data, discussing various ionization sources
c30 A69-18607
Atmospheric models for exospheric temperatures of Mars and Venus based on photoionization heating efficiency
c30 A69-26020
UV solar radiation variation effects on Mars and Venus upper atmosphere temperatures
c30 A69-37136
Dynamic stability derivatives of large angle blunted conical spacecraft near transonic speed in simulated Mars environment for various angles of attack
c31 A69-40550
Mars atmospheric features from measurements during entry and after landing, discussing atmospheric state properties, diurnal variability, clouds and winds
c30 A69-41617
Requirement estimates and performance predictions for Martian television experiment onboard spacecraft in three point-mass descent trajectories
[NASA-TN-D-5062] c14 N69-17944
Optimum structural design for Martian entry capsule configurations
[NASA-CR-1414] c33 N69-35516
Gamma ray backscattering of radioisotope for measuring Martian atmospheric density
[NASA-TN-D-5431] c24 N69-36931
Physical properties of Martian atmosphere using solar occultation seen from artificial satellite
[NASA-TN-D-5443] c30 N69-38658

MARS PROBES
Longitudinal range dispersion of unmanned Mars landers using VM-8 and VM-9 atmospheric models, discussing Syrtis Major as possible landing site
c30 A69-12390
Mars exploration for life by Mariner flybys and orbiters and 1973 Viking landers
c30 A69-41611
Mars atmospheric features from measurements during entry and after landing, discussing atmospheric state properties, diurnal variability, clouds and winds
c30 A69-41617

MARS SURFACE
Mars surface photometric and spectrophotometric measurements, relating opposition effect details with corresponding laboratory sample measurements
c30 A69-18601
Adenosine triphosphate /ATP/ content of terrestrial soils, based on firefly bioluminescent reaction, for Mars soil problems
c04 A69-37567

MASKING
Auditory temporal masking of tonal signal by narrow band noise and perception of temporal order noting effects of intensity, frequency and time
c05 A69-24795

MASS
Nuclear level density and mass shell corrections relationship for deformed and undeformed nuclei
c24 A69-29337
Radio galaxy Messier 87 mass determined using virial theorem for nucleus velocity dispersion
c30 A69-30883
Effect of chemical properties of pyrolysis gases on heat shield mass required for lifting reentry vehicle in typical reentry trajectory
[NASA-TN-D-4975] c32 N69-14306

MASS DISTRIBUTION
Lunar mass and gravitational field determined from lunar satellite dynamics, using potential function in terms of spherical harmonics
c30 A69-31405
Einstein field equations solutions generated via static spherically symmetric mass and charge distributions
c23 A69-32053
Operational analysis of mass measuring system in orbiting spacecraft
[NASA-TN-D-5039] c04 N69-19115
FORTRAN program for computing principal mass moments of inertia of spacecraft treated as composite bodies
[NASA-TM-X-1754] c23 N69-20870
Weighting factor for correction of photographic bias caused by variation in mass and velocity of sporadic meteoroids
[NASA-TN-D-5245] c30 N69-26239

MASS FLOW RATE
FORTRAN 4 subroutines for calculating critical flow factor to determine mass flow rate of gaseous helium and nitrogen through critical flow nozzles
[NASA-SP-3046] c12 N69-16098

MASS RATIOS
Lunar origin theories, considering moon/earth mass ratio, earth-moon system angular momentum deficiency and differential volatilization in earth
c30 A69-29882

MASS SPECTROMETERS
Contaminant and atmospheric sensor for spacecraft cabin environments

[NASA-CR-1375] c14 N69-37876
MASS SPECTROSCOPY
Planetary atmosphere composition determination using mass spectrometry for neutral components, ion spectrometry for ionic components and data system optimization
[AAS PAPER 68-183] c14 A69-11468
Automatic equipment for sampling and preparing gases by dual column gas chromatography for subsequent mass spectral analysis of carbon isotopes during methane metabolism
c06 A69-12603
Ammonium perchlorate high temperature decomposition by using carbon dioxide laser pyrolysis/mass spectrometry
[AIAA PAPER 69-143] c06 A69-18111
Partition coefficients between natural melts and plagioclase phenocrysts determined for rare earth elements and barium by mass spectrometry
c13 A69-20944
MASS TRANSFER
Ablation product absorption and line transitions effects on shock layer radiative transport around blunt body
[NASA-CR-1264] c33 N69-19117
Solution for shock layer energy equation with mass and convective heat transfer at hypersonic speed
[NASA-TN-D-5246] c12 N69-33421
MATERIALS
Structures, structural dynamics, materials and aeroelasticity - ASME-AIAA Conference, New Orleans, April 1969
c32 A69-25492
MATERIALS RECOVERY
Material recovery from metabolic and other wastes for long duration manned space missions, discussing carbon dioxide removal, bioregenerative food systems, etc
[AAS PAPER 69-143] c05 A69-42876
MATERIALS SCIENCE
Cryogenic properties of polymers - NASA/Case Conference, Cleveland, April 1967
c18 A69-16485
Materials compatibility for space requirements, discussing shape retention, ductility, tensile strength, dissimilar materials stability, etc
c17 A69-17872
Aerospace material investigation and fabrication techniques - Conference, Cocoa Beach, November 1968
c15 A69-22301
Structures, structural dynamics and materials - AIAA-ASME Conference, New Orleans, April 1969
c32 A69-26807
Kim-Anderson flux flow theory for materials with kappa nearly equal to 1, discussing pinning forces and sites
c26 A69-33754
Materials and processes for aerospace applications in 1970s - Conference, Los Angeles, April- May 1969
c15 A69-35501
Materials research structural design cycle, discussing simultaneous optimization, constituent materials, fabrication process, load environment and mission constraints
c32 A69-42991
MATERIALS TESTS
Ablation characteristics of heat shield materials measured in arc heated wind tunnels, considering influence of model scale, heating rate and pressure level
c18 A69-26813
Unfilled Pyrrone prepared from powder into molded parts for flexural tests at elevated temperatures observed for stability to electron irradiation in air
c18 A69-35529
Design and performance prediction of calorimetric apparatus for measuring total hemispherical emittance of materials
[NASA-TN-D-5106] c14 N69-20941
MATHEMATICAL LOGIC
Mathematical model for measurement scale forms
[NASA-TN-D-5277] c19 N69-29141
MATHEMATICAL MODELS
Radiation models using discrete radiator ensembles having applications to analysis of forward and backscatter from rough surfaces, clutter and chaff models, etc
c07 A69-10556
Collisionless computer model performing gravitaticnal experiments with two dimensional galaxy
c30 A69-12271
Computer study of collisionless self gravitating system using two dimensional model, obtaining gravitaticnal field by solving Poisson equation
c30 A69-12272
Space-station-centrifuge configuration dynamic stability exhibiting instabilities at lower and higher centrifuge rotational speeds
[AIAA PAPER 68-142] c31 A69-12373
Explorer 40 satellite mathematical model and verification testing for close spacecraft flight temperature predictions
[SAE PAPER 690202] c33 A69-18305
Four terminal silicon planar p-n-p-n model operating as semiconductor small signal linear tetrode amplifier, discussing properties and mathematical models
c09 A69-35293
Model performance index /PI/ providing criterion for approximating one dynamic flight control system by another based on geometrical representation of linear autonomous systems
[AIAA PAPER 69-885] c21 A69-39410
Theoretical prediction of crater size in Al alloy for hypervelocity impact by reduced density particles
[NASA-CR-1196] c32 N69-10225
Effects of structural damping on flutter of stressed panels
[NASA-TN-D-4990] c32 N69-16091
Calculating equilibrium and kinetically limited performance using one dimensional model
[NASA-TN-D-4991] c27 N69-16153
Development of air bearing lift pads
[NASA-TM-X-1724] c01 N69-16467
Effect of shock precursor heating on radiative flux to blunt bodies
[NASA-CR-1265] c33 N69-17438
Photoviscoelastic method for stress analysis of two dimensional viscoelastic models
[NASA-CR-1289] c32 N69-17770
Thermal and dielectric properties of homogeneous moon based on microwave and infrared temperature observaticns
[NASA-TM-X-1734] c30 N69-17815
Mathematical model for determining total drag of pointed body of revolution in supersonic flow with turbulent boundary layer
[NASA-TN-D-5046] c01 N69-19925
Mathematical models for optimal three dimensional launch vehicle trajectories with attitude and attitude rate constraints
[NASA-TN-D-5117] c30 N69-20810
Effect of gravitational model variations on accuracy of lunar orbit determination from data arcs
[NASA-TN-D-5105] c30 N69-21018
Boundedness theorem, thresholds, and stationary values in modified Huxley-Hodgkin model for electric current flow through cell membrane
[NASA-CR-1272] c19 N69-21143
Estimating sound intensity from stationary and moving sources using mathematical models
[NASA-CR-1338] c23 N69-22545,
Development of lattice model for composite materials
[NASA-CR-1322] c32 N69-22982
Semiempirical collision model for plasmas
[NASA-TR-R-310] c25 N69-23787
Mitchell strain criterion for minimum weight structures using mathematical models
[NASA-TN-D-4345] c32 N69-25001
Systematic investigation of mathematical models by comparison of experimental and analytical regression coefficients
[NASA-TM-X-1797] c19 N69-25311
Gravity model comparison using geodetic satellite long arc orbital solutions
[NASA-TN-D-5035] c30 N69-27412
Mathematical model for measurement scale forms
[NASA-TN-D-5277] c19 N69-29141
Analytic time function models of stochastic processes of noise and modulation
[NASA-TR-R-314] c07 N69-29230

Model analysis for viscosity in jet mixing flows
[NASA-CR-1382] c12 N69-31887
Analytical model for use in design of pump inlet accumulators for prevention of liquid rocket longitudinal oscillation
[NASA-TN-D-5394] c28 N69-33319
Mathematical model for quantitative wind and turbulence effects on design and operation of launch vehicles
[NASA-CR-1418] c20 N69-36222
Comparison of fourth order Runge-Kutta numerical integration technique with two numerical integration formulas in mathematical models used for computing rigid body trajectories
[NASA-TN-D-5425] c30 N69-38769
Mathematical simulation model for rigid body rotational kinematics
[NASA-TN-D-5302] c23 N69-39178
Flow model for vortex shedding from slender body in coning motion
[NASA-CR-1448] c12 N69-40200

MATHEMATICAL TABLES
Tabulation of high accuracy gamma function values for some rational arguments, noting applications to Gaussian quadrature formulas, fractional Bessel functions and Airy functions
c19 A69-13375
Tabulated bending moment transfer coefficients for helicopter rotor blades
[NASA-CR-1441] c32 N69-40359

MATRICES (MATHEMATICS)
Coulomb approximation for dipole and quadrupole transitions, calculating tables for radial matrix elements
c24 A69-10901
Matrix Riccati and matrix quadratic equations in problems of stochastic control and filtering
c10 A69-16601
Transient vibration analysis of liner systems using transition matrices
[NASA-CR-1237] c32 N69-11008
Stiffness matrices analysis of thin flat plates
[NASA-TN-D-4927] c32 N69-14169
Conversational approach to matrix calculations on computers
[NASA-TM-X-1749] c08 N69-18954
Existence theorem using Pade approximation and matrices
[NASA-CR-1319] c19 N69-26248

MATRIX METHODS
Finite element method for computing natural frequencies and mode shapes of thin shells of revolution
[NASA-TN-D-4972] c32 N69-16469
Identification of structural systems using near resonance testing
[NASA-TN-D-5069] c32 N69-17737

MATRIX THEORY
Matrix theorem and application to establishing independent coordinates for complex dynamical systems with constraints
[NASA-TR-R-326] c19 N69-38655

MATTER (PHYSICS)
Extragalactic gamma ray fluxes predicted, discussing collisions, matter-antimatter annihilation and cosmological implications
c29 A69-24466
Structure of matter, physical fields, evolution of earth and universe, solar activity and earth, and interaction of earth biosphere with physical fields
[NASA-TT-F-345] c13 N69-12384

MAXWELL EQUATION
Radiation fields from energetic electron moving in helical orbit in magnetoactive plasma, using Maxwell equations
c30 A69-39965

MEASURING INSTRUMENTS
Make wire, light pipe and spring wire ablation sensors development for measuring parameters of heat shield materials for reentry vehicles
c14 A69-15428
Three dimensional laser Doppler velocity instrument for mean velocity and turbulence measurements in subsonic jet shear layer
[SAE PAPER 690266] c14 A69-21555
Radial inflow gas turbine engine performance testing, discussing instrumentation, recording systems and calibration techniques
[ASME PAPER 69-GT-104] c14 A69-22522
Earth orbital manned space astronomy, discussing long range program, instruments, facilities and data processing
c11 A69-27947
Multiple function combination probe design for compressor and turbine air flow research
c11 A69-31917
Self contained hand held battery operated aerosol particle analyzer, measuring aerosol concentration and size distribution for laboratory and space flight applications
c14 A69-34691
Design and performance of flueric shock position sensor for mixed compression supersonic inlets
[NASA-TM-X-1733] c14 N69-16382
Mathematical analysis of Fitzgerald apparatus measuring solids dynamic mechanical properties
[NASA-TN-D-5116] c18 N69-21384
Cosmic dust sensor experiment on Pioneer 8 space probe
[NASA-TN-D-5267] c30 N69-31058

MECHANICAL DRIVES
Mechanical characteristics of flexible drive shaft coupling
[NASA-CR-1241] c15 N69-16104

MECHANICAL IMPEDANCE
Human body dynamic response to vibration combined with linear acceleration, noting changes in body mechanical impedance and resonance
c05 A69-11335
Analysis of Fitzgerald apparatus for extraneous resonant modes, dynamic compliance, and mechanical impedance
[NASA-TN-D-5103] c26 N69-20798
Vibration test fixture design for mount impedance simulation of aerospace structures
[NASA-CR-1351] c32 N69-26315

MECHANICAL MEASUREMENT
Plain strain fracture toughness tests on two inch thick maraging steel plates of various strengths, using bend and compact tension tests
c32 A69-23057
Plane strain fracture toughness tests on maraging steel plates for various yield strengths and large dimensions
c17 A69-26496
Development of automatic quality control device for measuring welded joints
[NASA-TN-D-5304] c15 N69-33800

MECHANICAL PROPERTIES
Lunar surface mechanical properties at Surveyor 5 site
c30 A69-12225
Cryogenic behavior of adhesive materials used in fabrication of liquid hydrogen/liquid oxygen powered Saturn S-4B stage
c18 A69-16487
Film processing effects on cryogenic mechanical properties of polyethylene terephthalate
c18 A69-16490
Cryogenic mechanical properties of epoxy resins and glass/epoxy composites
c18 A69-16491
Mechanical behavior of polyethylene terephthalate at cryogenic temperatures
c18 A69-16494
Vulcanizable elastomers suitable for contact with liquid oxygen, discussing preparation, mechanical properties, transition temperature and structure
c06 A69-16497
Materials compatibility for space requirements, discussing shape retention, ductility, tensile strength, dissimilar materials stability, etc
c17 A69-17872
Powder metallurgy, fusion and chemical vapor deposition techniques in manufacturing tungsten base alloys
c17 A69-18792
In situ vacuum testing requirement for valid measurement of vacuum induced changes in mechanical and thermal properties of various filled elastomers
c11 A69-22008
Mechanical properties associated with 55-Nitinol memory effect, presenting stress-strain and electrical resistivity as function of temperature

c17 A69-35523
Mission sequential environment effects on Dacron parachute material mechanical properties
[AIAA PAPER 69-1018] c11 A69-40390
High temperature mechanical properties of polycrystalline hafnium carbide containing 13-volume-percent hafnium diboride
[NASA-TN-D-5008] c17 N69-16380
Mechanical properties of alloys molybdenum hafnium carbon compounds
[NASA-TN-D-5025] c17 N69-19200
Mechanical behavior of boron-epoxy and glass-epoxy filament-wound cylinders under various loads
[NASA-TN-D-5050] c18 N69-19825
Mechanical properties and column behavior of thin wall beryllium-aluminum alloy tubing
[NASA-TN-D-5145] c17 N69-23004
Soviet research on high temperature strength of materials and machine parts
[NASA-TT-F-508] c17 N69-27300
Effect of rhenium on mechanical properties of hafnium carbide strengthened tungsten alloys
[NASA-TN-D-5348] c17 N69-31977
Physical, mechanical, and electrical properties of 55-Nitinol - nickel-titanium alloy
[NASA-CR-1433] c17 N69-36367
Summary of lunar data and scientific observations generated by Surveyor landings on Moon
[NASA-SP-184] c30 N69-36451
Properties of irradiated polyethylene memory materials
[NASA-CR-1384] c18 N69-36762
Mechanical behavior of tantalum T-111 alloy at high temperatures and ultrahigh vacuum
[NASA-CR-1436] c17 N69-36831

MEDICAL EQUIPMENT
Soviet handbook on operation principles, use, and installation of electrocardiographs and electromedical apparatus for therapeutics
[NASA-TT-F-523] c05 N69-27577

MEDICAL SCIENCE
Aeromedical developments by NASA biomedical applications program applied to general medical equipment including cardiac sensors, surgical sterilization, ballistocardiograph, etc
c34 A69-32430
Centrifugation for removal of bullet fragment floating freely in ventricular system of human brain to fixed safe position in left lateral ventricle wall
c04 A69-43372

MEDIUM SCALE INTEGRATION
Spacecraft onboard data handling system with MSI complementary MOS arrays, describing various components
c08 A69-41739

MELTING
Microscopic time lapse movies in solid/liquid interface profile during melting and freezing of materials for spacecraft thermal control as reversible heat sink
[AIAA PAPER 69-95] c33 A69-18126

MEMORY
Efficacy of sensory feedback information given during training period for improving human performance in producing memorized movement pattern
[NASA-CR-1251] c05 N69-13926

MENTAL PERFORMANCE
Evaluation of computer aids to augment human intellectual capability
[NASA-CR-1270] c08 N69-16140

MERCURY (METAL)
Liquid mercury cathode thrustors characteristics satisfying constraints imposed by solar flux variations with distance from sun
[AIAA PAPER 69-237] c28 A69-21246
Design point performance of double containment tantalum and stainless steel mercury boiler for SNAP 8
[NASA-TN-D-4926] c33 N69-12739
Liquid-metal centrifugal pump at mercury loop
[NASA-TM-X-1766] c15 N69-23768
Corrosion in cobalt alloy two phase mercury loop
[NASA-TN-D-5326] c17 N69-31065

MERCURY (PLANET)
Mercury atmospheric models for preliminary environmental criteria to be used in spacecraft design and engineering trade-off studies
[AIAA PAPER 69-54] c30 A69-18042
Chemical composition of Earth, Venus, Mars, Mercury and Moon calculated from mathematical models, constructing approximate equations of state at high pressure
c30 A69-29878
Resonant spin and anomalous rotation of Mercury, analyzing influence of tidal degradation and permanent deformation of planet
c30 A69-39568
Venus swingby and direct Mercury trajectories analysis for optical imaging from flyby missions
[AAS PAPER 69-258] c30 A69-42860

MERCURY ARCS
Mercury ion thrusters and facilities automatic controls durability testing, discussing vacuum chamber systems, unattended operation and control
[AIAA PAPER 68-576] c11 A69-12385

MERCURY FLIGHTS
Manned spacecraft waste disposal systems
[NASA-TM-X-1851] c05 N69-33260

MERCURY PROJECT
Gemini and Mercury space flights medical results, summarizing physiological effects noted on body systems
c04 A69-11074
Systems engineering activities in manned space flight involving design, development, manufacture, test and operation of Mercury, Gemini and Apollo flight systems
c31 A69-17602

MERCURY SPACECRAFT
Guidance and control concepts and hardware for atmospheric entry of Mercury, Gemini and Apollo spacecraft
c21 A69-25724

MERCURY TELLURIDES
HgCdTe as IR satellite detector for terrestrial, atmospheric and ocean mapping, IR astronomy and optical communication
c26 A69-43666
Mercury cadmium telluride as 1 to 20 micrometer wavelength infrared detector for space applications
[NASA-TN-D-4904] c26 N69-10125

MERCURY VAPOR
Study of discharge from mercury vapor fed hollow cathode
[NASA-TN-D-4966] c28 N69-17847

MERIDIONAL FLOW
Model equatorial electrojet with meridional current system constructed by spherical harmonic expansion for geomagnetic field, noting current loops
c13 A69-38084

MESH
Variable mesh multistep methods for numerical solution of nonlinear differential equations
[NASA-CR-1247] c19 N69-11419

MESOPAUSE
Mesopause wind measurements at high latitude locations by sounding rockets noting relation to noctilucent clouds
c20 A69-28466

MESOSPHERE
Distributions, seasonal variations and ionospheric implications of mesospheric nitric oxide concentration
c13 A69-38364
Theoretical comparison of beads, wires, and films as rocketsonde temperature sensors in mesosphere
[NASA-CR-1286] c13 N69-18126
Stratospheric and mesospheric temperature and moisture profiles determined from infrared horizon observations
[NASA-CR-1419] c20 N69-35528

MESSAGES
Variable length codes for alphabets containing messages with assigned weighted information content
[NASA-TN-D-4962] c07 N69-15373

METABOLIC WASTES
Hydrogenomonas cultures investigated for metabolic waste utilization in aerospace life support systems
[NASA-CR-1296] c05 N69-22766

METABOLISM
Extraterrestrial life detection experiments

integrated into single multipurpose space laboratory, including chemical analyses, metabolism identification, observation for molecular and/or cellular growth and replication c05 A69-32970
Real time metabolic rate analysis of suited astronaut using heart rate and O methods during thermal vacuum and extravehicular mobility tests [AIAA PAPER 69-993] c05 A69-40371
Lunar gravity effects on mans locomotion on moon [NASA-CR-1403] c05 N69-36271
Simulation of astronaut locomotion on lunar surface to determine metabolic costs [NASA-CR-1402] c05 N69-37964
Biochemical and metabolic effects of exposure of mice to helium-oxygen atmosphere [NASA-CR-1372] c04 N69-40955

METAL BONDING
Quartz fiber adhesion to Re measured in LEED /low energy electron diffraction/ apparatus for clean and O layer surfaces, noting brittle fracture c17 A69-35182
Joining ceramics and graphite to other materials [NASA-SP-5052] c15 N69-14241

METAL COATINGS
High emittance coating materials for beryllium, niobium-zirconium compounds, and stainless steel used in spacecraft radiators [NASA-CR-1278] c17 N69-18952
Emittance properties of hafnium oxide, cerium oxide, and iron titanate coatings on platinum rhodium alloy substrates [NASA-CR-1413] c17 N69-35514
Corrosion and heat resistant coatings for oxidation protection of tungsten [NASA-TT-F-583] c17 N69-35836

METAL COMPOUNDS
Crater characteristics of 11 metal alloys under hypervelocity impact including effects of projectile density and target temperature [NASA-TN-D-5135] c32 N69-22994

METAL CRYSTALS
Fiber-metal matrix composites fabrication, applications, mechanical properties and powder metallurgy c17 A69-20204
Internal friction, Young modulus and resistivity measurements for stage I interstitials in electron irradiated tungsten c17 A69-28682

METAL FILMS
Gold-underlayer film combinations adhesion to oxide substrates, describing adhesion changes as function of Au and underlayer film thickness, time, environment, etc c26 A69-28007
Ge films formation by evaporation technique, discussing background O pressure effect c26 A69-43345

METAL FOILS
Resonance absorption integrals for rhenium 185, rhenium 187, and natural rhenium in foils and thin films [NASA-TN-D-4938] c24 N69-13152
Three oxidation-resistant alloy foil claddings for protecting typical gas turbine engine alloys of nickel and cobalt [NASA-TN-D-5483] c17 N69-38794

METAL IONS
Uranyl ions interaction with phospholipid and cholesterol monolayers, using surface pressure and potential measurements c06 A69-25641
Oscillator strengths and wavelengths of X ray and EUV transitions in highly ionized iron line spectra c29 A69-27554

METAL JOINTS
Dielectric overcoating effects on electromigration Al interconnections, showing dependence on thickness and surface passivation c09 A69-32889

METAL MATRIX COMPOSITES
Tensile data and photomicrographs of explosively bonded metal matrix composites interfaces c15 A69-43452

METAL OXIDE SEMICONDUCTORS
Electric field effects on thermal annealing of electron irradiation damage in p-channel MOSFET device c09 A69-16562
Electron radiation damage in MOSFET devices using bias temperature treatments c26 A69-16877
Metal oxide semiconductor integrated circuits, showing failure rates and degradation causes c09 A69-31851
Spacecraft onboard data handling system with MSI complementary MOS arrays, describing various components c08 A69-41739
Spacecraft analog to digital conversion system employing metal oxide semiconductor field effect transistors [NASA-TN-D-5228] c08 N69-29478

METAL OXIDES
H release, pressure and oxide layer formed by reaction during ball milling Cr in water c15 A69-38567

METAL PLATES
Plain strain fracture toughness tests on two inch thick maraging steel plates of various strengths, using bend and compact tension tests c32 A69-23057
Decoupling force exerted by magnetic forming Be coil assembly on metallic plate during forming c14 A69-25310
Plane strain fracture toughness tests on maraging steel plates for various yield strengths and large dimensions c17 A69-26496
Force penetration characteristics of sand horizontally penetrated by various geometrically shaped models [NASA-CR-1252] c18 N69-14764

METAL POWDER
Ductile metal powder chemical reactions during comminution in pure or oxygenated water c06 A69-27762
Inductance behavior of coils filled with superconducting lead or niobium dusts [NASA-TN-D-5137] c26 N69-21500

METAL SHEETS
Aluminum double sheet target penetration resistance determined by studying high velocity pyrex glass impact effects on front/rear sheets and spacing [AIAA PAPER 69-375] c32 A69-28305
Axial load fatigue crack propagation tests on Al alloy sheets for stress ratio effects c17 A69-36435
Stress ratio effects on fatigue crack growth in sheet aluminum alloys [NASA-TN-D-5390] c17 N69-34704

METAL SURFACES
Work function and desorption energy measurements of alkali metals from metallic substrates with modulated molecular beam, noting surface contamination c26 A69-21808
Free electron model for electron work functions and number density distributions and surface potentials in metals c26 A69-29009
Quartz fiber adhesion to Re measured in LEED /low energy electron diffraction/ apparatus for clean and O layer surfaces, noting brittle fracture c17 A69-35182
Electric fields and electron work functions, surface potentials and number density distributions in selected metals surfaces determined using free electron model c26 A69-36045
Solid film lubricants deposited by DC triode sputtering on Ni, Ni-Cr and Nb surfaces friction tested under ultrahigh vacuum conditions c15 A69-43126
Compressive properties and weight saving of metals reinforced on surface with resin bonded fibers [NASA-TN-D-4878] c17 N69-11012
Theory and method for characterizing surface cleanliness of nickel during adhesion testing [NASA-TN-D-5055] c17 N69-19827
Absorption of black-body radiation by ice cryodeposits on metal substrates [NASA-TN-D-5181] c23 N69-22769

METAL VAPORS
Electric field variations in vicinity of auroral

forms from motions of Ba vapor clouds released from Nike-Tomahawk rockets
c13 A69-34935

METALLURGY
Refractory metal alloys metallurgy and technology - Conference, Washington, D. C., April 1968
c17 A69-18790
Z-micron sections removed from metal specimens by microtome for radiotracer study of mass dependence of self diffusion
c14 A69-36490
Metallurgy, behavior, and application of 18 percent nickel maraging steels
[NASA-SP-5051] c17 N69-14193

METALS
Solar absorptance, total hemispherical emittance and absorptance/emittance ratio for metals at cryogenic temperatures measured simultaneously with sinusoidally perturbed incident radiation
c33 A69-10847
Solar absorptance and hemispherical emmitance of metals at space conditions determined with cyclic incident radiation technique
[AIAA PAPER 69-60] c17 A69-18154
Atmospheric models for metal deficient stars of K and G spectral type, studying reduced metal abundance effect on atmospheric structure
c30 A69-22055
Optical depths of convection related to metal deficiency for main sequence and giant stars
c30 A69-29946
Atmospheric models for specified effective temperatures, hydrogen-to-metal ratios and surface gravities in studying metal deficiency effect on stellar atmosphere
c30 A69-36338
Calorimetric analyses of metal corrosions in deionized heated water
[NASA-TM-X-1791] c17 N69-25243
Solar absorptances and spectral reflectances of metals
[NASA-TN-D-5353] c17 N69-31895

METASTABLE STATE
Two photon decay of metastable levels of hydrogenic and He-like ions in solar corona, depopulating via proton collisional excitation to 2p level
c29 A69-36218

METEOR TRAILS
Visual observation of meteor and train microstructure obtained by refractor
c30 A69-41058

METEORITE CRATERS
Moldavites and Ries crater material, studying Rb-Sr isochronal relationship
c13 A69-41341

METEORITES
Meteorite research - Conference, Vienna, August 1968
c30 A69-36072

METEORITIC COMPOSITION
Electron microprobe analysis of potassium feldspar in Weekeroo Station meteorite
c30 A69-14979
Electron microprobe analysis of vanadium in presence of titanium by compositional measurement of chromite in chondritic meteorites
c06 A69-18419
Chondrite meteorite fall /1969/ in Mexico, noting opaque and microcrystalline matrices and gamma rays from short lived isotopes
c30 A69-20686
Kodaikanal iron meteorite measurements for cosmogenic rare gases and K-Ar isotopes ages for glass inclusions
c30 A69-22047
Oxide composition of silicate spherules from forest area devastated by Tunguka meteorite explosion using electron microprobe analysis
c30 A69-28869
Bjurbole chrondrules composition and density, discussing formation of homogeneous olivines and pyroxenes
c30 A69-36090
Ca-rich achondrites genesis implied from rare earth and Ba absolute and relative concentrations
c30 A69-36091
Iron meteorites genetic classification based on parent body cooling rate and Ga-Ge trace element content
c30 A69-36129
Abundance compilations of elements due to nuclear processes, discussing carbonaceous chondrites character
c29 A69-38812
Tektite origin theories, discussing Surveyor experiments effects on lunar geology and Tektite origin
c30 A69-40086
Moldavites and Ries crater material, studying Rb-Sr isochronal relationship
c13 A69-41341
Rb-Sr isotope patterns in tekites from Southeast Australian strewn field, studying Rb volatilization role in Rb-Sr isochron production
c13 A69-41342
Ivory Coast microtektites chemical composition from electron microprobe analysis
c30 A69-41351
Ilmenite composition in equilibrated ordinary chondrites, analyzing Fe, Mg, Ti and Cr content
c30 A69-42890

METEORITIC DAMAGE
Hypervelocity micrometeor impact sites identification on aluminized glass, using conchoidal pattern as criterion in analysis
c30 A69-34952
Simulated micrometeoroid impact effect on silicon and cadmium sulfide solar cell performances
[NASA-TN-D-5133] c03 N69-21016
Penetration flux calculation for multiwall structure on Lunar Orbiter spacecraft missions
[NASA-TN-D-5455] c32 N69-41229

METEORITIC MICROSTRUCTURES
Chondrite meteorite fall /1969/ in Mexico, noting opaque and microcrystalline matrices and gamma rays from short lived isotopes
c30 A69-20686
Fe-Ni-P phase diagram studies applied to schreibersite and rhabdite formation in iron meteorites
c30 A69-36132

METEOROID CONCENTRATION
Determination of meteoroid environments from photographic meteor data
[NASA-TR-R-322] c30 N69-39336
Meteoroid environment model for cometary origin near earth to lunar surface
[NASA-SP-8013] c30 N69-40326

METEOROID HAZARDS
Meteoroid environment model for cometary origin near earth to lunar surface
[NASA-SP-8013] c30 N69-40326

METEOROID PROTECTION
Space suit meteoroid protection for extravehicular activity, discussing Gemini and lunar surface EVA suits and bumper concept
[AIAA-PAPER-69-366] c05 A69-28298
Multiwall meteoroid protection design in Apollo program, discussing bumper, backup sheet and honeycomb cells insulation
[AIAA PAPER 69-372] c32 A69-28304
Momentum transfer from impact into thin aluminum meteor bumper targets
[NASA-TN-D-5492] c32 N69-38809

METEOROIDS
Visual observation of meteor and train microstructure obtained by refractor
c30 A69-41058

METEOROLOGICAL BALLOONS
All weather wing profile monitoring system using FPS-16 radar/jimsphere system and flight simulation for protection of space vehicle and missile launches
c20 A69-13852
Error analysis of high resolution balloon-borne temperature sensor and comparison of temperature data with simultaneous rawinsonde measurements
c14 A69-21642

METEOROLOGICAL CHARTS
Tiros 7 monthly maps of infrared radiation over Indian Ocean area
[NASA-TN-D-5101] c13 N69-23318
Synoptic analysis of Southern Hemisphere stratosphere
[NASA-TM-X-1814] c13 N69-33555

METEOROLOGICAL PARAMETERS
Daily simultaneous solar measurements of microwave atmospheric absorption and emission to determine frequency correlation between meteorological phenomena and atmospheric parameters
c13 A69-39747
Mars atmospheric features from measurements during entry and after landing, discussing atmospheric state properties, diurnal variability, clouds and winds
c30 A69-41617
METEOROLOGICAL RADAR
All weather wing profile monitoring system using FPS-16 radar/jimsphere system and flight simulation for protection of space vehicle and missile launches
c20 A69-13852
METEOROLOGICAL SATELLITES
Atmospheric model development relating temperature, density, moisture and energy measurements from satellite observations for long term weather forecasting
[UN PAPER 68-95397] c20 A69-10463
Space applications program including communications and navigation meteorology, earth resources survey and geodesy
[UN PAPER 68-95437] c34 A69-10472
Meteorological satellite research program, including unmanned satellite observations and possibilities with meteorologist on board manned spacecraft
[UN PAPER 68-95350] c20 A69-10483
Atmospheric measurements from satellites, discussing ATS-1 cloud images for definition of wind and use of WEFAX through ATS 2 satellites for data transmission
[AIAA PAPER 69-158] c20 A69-18038
Image dissector meteorological cameras, discussing ATS-3 and Nimbus systems, high resolution camera and multispectral cameras
c14 A69-35101
Satellite-based meteorological observation system for global atmospheric research program, discussing wind measurement, IR and microwave sounding possibilities, etc
[AAS PAPER 69-120] c13 A69-42817
Exametnet meteorological rocket launchings and data dissemination, 1967 - tables
[NASA-SP-176] c20 N69-22570
METEOROLOGICAL SERVICES
WEFAX /Weather Facsimile/ experiment to explore operational feasibility of direct meteorological data transmission via satellite relay from central station to remote stations
c11 A69-13240
METEOROLOGY
Meteorological satellite research program, including unmanned satellite observations and possibilities with meteorologist on board manned spacecraft
[UN PAPER 68-95350] c20 A69-10483
METHANE
Leak rate measurement accuracy of rate-of-rise technique for nitrogen, methane and He between millionth and thousandth torr
c14 A69-32326
Real gas effects on hypersonic aerodynamics of blunt vehicles simulated with tetrafluoromethane
[NASA-TR-R-312] c01 N69-29270
Helium pressurization systems for liquid methane fuel in supersonic transports
[NASA-TN-D-5519] c28 N69-40329
METHOD OF CHARACTERISTICS
Three dimensional hypersonic steady flow around blunt and pointed cones at nonzero angles of attack calculated by method of characteristics
[AIAA PAPER 69-187] c01 A69-18176
FORTRAN computer program for designing supersonic inlets by characteristic theory
[NASA-TN-D-4960] c01 N69-14566
Characteristics method for determining three dimensional supersonic flow around inclined body of revolution
[NASA-TN-D-5341] c12 N69-39177
MICE
Centrifugation effects on body composition and growth of mice
c04 A69-33746
Biochemical and metabolic effects of exposure of mice to helium-oxygen atmosphere
[NASA-CR-1372] c04 N69-40955
MICHELL THEOREM
Mitchell strain criterion for minimum weight structures using mathematical models
[NASA-TN-D-4345] c32 N69-25001
MICROBIOLOGY
Microbiology of water management subsystem for manned space flight, discussing sterilization by heat and tests inside Integrated Life Support System /ILSS/
[SAE PAPER 680718] c05 A69-13441
MICROELECTRONICS
Hybrid integrated parametric amplifier design considerations for fabrication in microstrip transmission line
c09 A69-10193
Neutral buoyancy microelectrode for prolonged recording from single nerve units
c05 A69-11865
Microelectronic data and remote control function transmission system for wind tunnel testing of aircraft dynamic response to gusts and turbulence
c11 A69-23283
Reliability handbook for silicon monolithic microcircuits - applications
[NASA-CR-1346] c09 N69-23225
Reliability handbook for silicon monolithic microcircuits - failure mechanisms
[NASA-CR-1347] c09 N69-23226
Reliability handbook for failure analysis of silicon integrated microcircuits
[NASA-CR-1348] c09 N69-25328
MICROFILMS
Micromation and micrographics, discussing nonimpact printing in computer avoiding output imbalance by high speed microfilm recorder
c34 A69-35059
MICROMETEOROIDS
Stony meteoric particles size and velocity during passage through atmosphere
c30 A69-26341
Meteoritic dust particles collections prediction in atmosphere for low and high entry fluxes
c30 A69-26342
Hypervelocity micrometeor impact sites identification on aluminized glass, using conchoidal pattern as criterion in analysis
c30 A69-34952
Pegasus and Explorer 23 detector panels calibrated by determining particle perforation mass and velocity
[NASA-TR-R-321] c14 N69-36985
Lunar Orbiter 1 terrain assessment photographs and preliminary selenodesy, micrometeoroid, and radiation data
[NASA-SP-197] c30 N69-39213
MICROORGANISMS
Spacecraft sterilization techniques for space exploration, discussing mathematical models for planetary quarantine and contamination by nonlanding vehicles
c05 A69-15935
Spacecraft sterilization requirements, evaluating viable organisms release probability from spacecraft as function of equipment fracturing
c04 A69-25460
Unicellular microorganisms size and concentration estimates based on light scattering measurements of suspensions in spectrophotometer cuvette compartment
c04 A69-25643
Regenerative life support system development, considering synthesized organic compounds and microorganisms as foods for long duration space missions
c04 A69-37623
Gravitational and acceleration effects on man and organisms, and biological effects of radiation
[NASA-TT-F-528] c05 N69-38701
MICROROCKET ENGINES
Valving concepts and functional approaches for inert gas attitude control thrustor systems providing redundancy safeguards at minimum weight, volume and power costs
[AIAA PAPER 69-843] c28 A69-39373

MICROSCOPY
Holographic microscopy for performance prediction and quality control of semiconductor devices and integrated circuits
[NASA-CR-1394] c14 N69-31958
MICROSTRUCTURE
Visual observation of meteor and train microstructure obtained by refractor
c30 A69-41058
Sigma phase formation and its effect on stress rupture properties of nickel base alloy IN-100
[NASA-TN-D-5185] c17 N69-23465
MICROTHRUST
Cesium contact ion microthrustor experiment onboard ATS 4, measuring emission currents and spacecraft potentials
[AIAA PAPER 69-297] c28 A69-21218
MICROTOMY
Z-micron sections removed from metal specimens by microtome for radiotracer study of mass dependence of self diffusion
c14 A69-36490
MICROWAVE AMPLIFIERS
Microwave and optical generation and amplification - Conference, Hamburg, September 1968
c09 A69-18420
MICROWAVE ANTENNAS
Omnidirectional microwave parallel plate waveguide fed antenna design for flush mounted broadband spacecraft, noting equatorial and polar patterns
c09 A69-40697
MICROWAVE EQUIPMENT
Microwave power applications to propulsion, noting spacecraft launching, aircraft takeoff thrust assistance and power transmission in space
[IMPI PAPER D2] c28 A69-15000
Microwave and optical generation and amplification - Conference, Hamburg, September 1968
c09 A69-18420
Germanium microwave backward diodes optimum design and performance prediction through computer calculation for important parameters
c09 A69-41224
Thin film microwave irises with capacitive reactance
[NASA-CR-1364] c26 N69-28096
MICROWAVE FREQUENCIES
Daily simultaneous solar measurements of microwave atmospheric absorption and emission to determine frequency correlation between meteorological phenomena and atmospheric parameters
c13 A69-39747
MICROWAVE INTERFEROMETERS
Electron density measurement technique for dense thick steady state plasmas using swept microwave interferometer
c25 A69-12349
MICROWAVE RADIOMETERS
Microwave radiometric sensor operational principles and capabilities, discussing antennas and radiometric receivers
c07 A69-26976
Clear air turbulence detection in troposphere by multifrequency radiometric sensor, noting multibeam system for supersonic aircraft
c09 A69-42536
Microwave radiometric techniques for reentry plasma measurements
[NASA-TN-D-5274] c25 N69-29600
MICROWAVE SPECTRA
Microwave thermal emission by water measured from aircraft, studying radiation dependence on surface roughness
c13 A69-34421
MICROWAVE TRANSMISSION
Mutual RF interference between satellite and terrestrial telecommunications microwave relay system at shared frequencies
c07 A69-13242
Intersatellite microwave laser communication system for ATS-F and ATS-G, discussing experiment, functional design and parameters
c07 A69-41758
Parametric analysis of microwave and laser systems for communication and tracking - summary
[NASA-TR-R-309] c07 N69-23642
Statistical correlation between optical microwave propagation reliability, fade margin, path length, and geographic location
[NASA-CR-1442] c07 N69-39282
MICROWAVES
Venus microwave phase effect analyzed assuming dry massive Venus atmospheric model, discussing heat transfer processes
c30 A69-12108
Microwave power applications to propulsion, noting spacecraft launching, aircraft takeoff thrust assistance and power transmission in space
[IMPI PAPER D2] c28 A69-15000
Solar microwave radiation burst of 29 October 1968 from active region behind west limb
c30 A69-32811
Thermal and dielectric properties of homogeneous moon based on microwave and infrared temperature observations
[NASA-TM-X-1734] c30 N69-17815
Transfer of microwave radiation in atmosphere and underlying surfaces measured by aircraft instruments
[NASA-TT-F-590] c13 N69-31851
Backward diodes in indium arsenide for microwave mixing
[NASA-TN-D-5401] c09 N69-36706
MIDCOURSE GUIDANCE
Midcourse maneuvers in interplanetary guidance, considering spin stabilized spacecraft flyby for Jupiter mission
c30 A69-28504
Manual procedures for midcourse and terminal guidance, discussing onboard optical measurements and calculations
c21 A69-35792
Interplanetary midcourse velocity correction schedules optimization, discussing timing equations modifications, mission simulation and role of earth based radar
c21 A69-39646
MIDLATITUDE ATMOSPHERE
Electron cooling rates in midlatitude and auroral zone thermosphere measured by probe rockets
c13 A69-16267
Midlatitude neutral thermosphere density and temperature measurements, noting effect of atomic oxygen adsorption by instruments
c13 A69-16268
MIE SCATTERING
Mie total and differential backscattering cross sections at laser wavelengths for Junge size distribution aerosol models
c16 A69-14290
Interstellar extinction models of classical Mie particles and quantum mechanical polycyclic aromatic molecules
c30 A69-23679
Optical radar studies of lower atmosphere, giving Mie theory calculations of clear atmosphere volume backscattering cross sections for four laser wavelengths
c07 A69-27001
Particle albedos and extinction cross sections computed by Mie theory showing dependence on refractivity, considering thermal radiation from cloudy planetary atmospheres
c30 A69-38255
Mie scattering calculations on laser wavelengths and atmospheric aerosols
[NASA-TN-D-5110] c23 N69-20905
MILITARY AIRCRAFT
Spin-tunnel investigation of scale model of straight wing, twin boom counter insurgency airplane
[NASA-TM-X-1602] c02 N69-34988
MILITARY HELICOPTERS
NASA flight test of hingeless rotor compound helicopter to determine lift sharing characteristics, showing rotor lift dependence on airspeed
c02 A69-29702
MILKY WAY GALAXY
Far IR source in galactic center detected at 100 microns, noting thermal emission of interstellar dust grains as possible mechanism
c30 A69-22264
MILLIMETER WAVES
Short wave bands for earth-space communications, considering propagation anomalies compensated systems and frequency bands availability
c07 A69-13721

Background radiation intensity upper limits for mm and submillimeter wavelengths in interstellar medium, noting intense flux in far IR
c30 A69-19404
Radiometric techniques applicable to measurement of solar activity and atmospheric attenuation at millimeter wavelengths
[NASA-TR-R-306] c07 N69-22951
Cyclotron resonance oscillators as sources of millimeter waves
[NASA-TN-D-5237] c10 N69-28121

MILLING (MACHINING)
Feasibility of producing dispersion strengthened chromium by ball milling in hydrogen halides
[NASA-TN-D-4912] c17 N69-10827

MINERAL OILS
Lubrication performance and thermal shear degradation of polyphenyl ethers and refined mineral oils in high temperature vane pump loop
[NASA-TN-D-5096] c15 N69-20938

MINITRACK SYSTEM
Minitrack data reduction procedures, with IBM 360 computer program description
[NASA-TN-D-5042] c08 N69-26193

MINORITY CARRIERS
Proton irradiation effects on minority carrier lifetime in silicon and gallium arsenide semiconductor materials
[NASA-TN-D-5028] c26 N69-18897

MIRRORS
Single and double mirror systems geometrical optical image aberrations noting focal number, angle of field, secondary magnification and mutual position tolerances
c23 A69-24836
Control system for thin diffraction limited orbiting astronomical telescope mirror based on structural analysis of static deflections
c14 A69-27951
Second surface mirror used as coating for spacecraft thermal control
c33 A69-37290
Thermal control coatings, windows and mirrors for 1973 Mars Viking Lander vehicles under simulated Martian surface conditions
[AIAA PAPER 69-1023] c11 A69-40393

MISSILE CONFIGURATIONS
Wind tunnel tests to determine static aerodynamic characteristics of cruciform wing-body missiles at transonic and supersonic speeds
[NASA-TM-X-1839] c01 N69-31875

MISSION PLANNING
Iterative guidance mode /IGM/ applied to effective gravity vector prediction, acceleration measurement of noise sensistivity and energy limitations
[AIAA PAPER 67-620] c21 A69-15501
German analysis of preparatory technology of U.S. space programs, noting effects of hardware development for manned space travel on future planning
c34 A69-15576
Astrodynamical data compilation for use by system engineer for mission planning
[AIAA PAPER 69-124] c30 A69-18090
Low thrust mission simulation dependence on hardware definition, discussing power plant characteristics, jet velocity and thrustor efficiency
c30 A69-21204
Interplanetary low thrust mission analysis model, discussing major elements interactions
c30 A69-21206
SERT 2 thrustor system performance over expected mission parameters, noting operational lifetime excess over mission requirements
[AIAA PAPER 69-235] c28 A69-21255
Space exploration plans adaptation, considering spacecraft design, programs, costs and schedules flexibility
c34 A69-22863
Lunar orbital mission plans intended to optimize spacecraft procurement, flight schedules, science objectives and available funds
c30 A69-34362
General aviation missions in national transportation system /1968, 1975, 1980/, considering fuel taxes, overall system economics, ground facilities, etc
[AIAA PAPER 69-818] c34 A69-35624
Worldwide cloud cover simulation procedure providing data for computer simulation of earth oriented space missions, describing computer program using Monte Carlo mission simulation
c20 A69-38120
Direct flight and Jupiter swingby heliocentric trajectory modes of elliptic capture orbits compared for unmanned missions to outer planets
[AAS PAPER 68-105] c30 A69-39221
Space power systems analysis, using computer program to correlate systems characteristics with mission parameters for automated satellite repair vehicle and space stations
c03 A69-42240
Space program planning, noting market requirements, acceptability and future characteristics
[AAS PAPER 69-083] c34 A69-42820
Objectives, current programs, and future mission options in space sciences and applications
[NASA-SP-162] c30 N69-13844
Engineering models of Venus atmosphere for design and mission planning for spacecrafts
[NASA-SP-8011] c30 N69-20916
Lunar environment, bases, exploration, and extraterrestrial resources
[NASA-SP-177] c30 N69-22226
Parametric analysis of microwave and laser systems for communication and tracking - summary
[NASA-TR-R-309] c07 N69-23642
Interplanetary probe missions with solar electric propulsion systems
[NASA-TN-D-5293] c30 N69-29738

MITOSIS
Hyperoxia and hypoxia effects on mitotic activity in regenerating and normal rat liver exposed to environmental conditions
c04 A69-43565
Mitotic synchronization of fibroblasts with metabolic retardants by chronophotography
[NASA-TN-D-5021] c04 N69-17248
Osmotically induced coalescence of sarcoma cells through intercellular bridges in vitro
[NASA-TN-D-5022] c04 N69-17782

MIXING LENGTH FLOW THEORY
Compressible hypersonic turbulent boundary layers solution by finite difference method, relating mixing length to velocity profile shape factor
[AIAA PAPER 69-684] c12 A69-33474

MODAL RESPONSE
Dynamic instability of solid bodies, using modal vibration method to establish criteria on basis of equivalent energy conditions
c32 A69-16742
Adaptive simulation using modal clustering and method of potential functions
[NASA-CR-1179] c08 N69-10316
Frequency and critical speed analysis of rigid rotors on flexible foundations
[NASA-TN-D-4858] c32 N69-29159

MODELS
GEOS 1 tracking station positions on SAO standard earth C-5 model
[NASA-TN-D-5034] c13 N69-28019
Double-dead-time model describing chugging to liquid propellant rocket engines having multielement injectors
[NASA-TN-D-5303] c28 N69-29405
Longitudinal mass spring modeling of launch vehicles
[NASA-TN-D-5371] c32 N69-34970

MODULUS OF ELASTICITY
Static pressure-diameter measurements on small pulmonary blood vessels of frogs, analyzing capillary septal area as function of intravascular pressures noting high compliance
c04 A69-40974
Analysis of Fitzgerald apparatus for extraneous resonant modes, dynamic compliance, and mechanical impedance
[NASA-TN-D-5103] c26 N69-20798

MOLDAVITE
Moldavites and Ries crater material, studying Rb-Sr isochronal relationship
c13 A69-41341

MOLDING MATERIALS
Compression molding of molecular salt-like intermediate Pyrrone powders by two pressure

method, noting volatiles elimination
c18 A69-29415
MOLECULAR ABSORPTION
Theoretical molecular line absorption of carbon monoxide in late spectral type stellar atmospheres
[NASA-TN-D-4798] c24 N69-14448
MOLECULAR BEAMS
High and medium energy molecular beams - Conference, Cannes, July 1969
c24 A69-36171
Satellite-borne experiments of neutral molecular beam-solid surface interactions, describing Molsink chamber, densitometer, sphere and paddlewheel satellites
c24 A69-36182
Cryogenic molecular beam system with pressure attenuation
[NASA-TN-D-5308] c24 N69-31338
MOLECULAR CHAINS
Molecular orientation and mechanical isotropy in polyethylene, polypropylene, and polyethylene terephthalate films
[NASA-TN-D-5380] c18 N69-34708
MOLECULAR COLLISIONS
Frictional forces and collision frequencies for ions moving in neutral gases
c13 A69-13328
Ion-molecule collisions of Ar-Co and N-No pairs, discussing charge exchange reaction rates and spiraling nature
c24 A69-16428
Computer made movies and time history plots for ion-dipole collisions involving polar molecules /CO, HCL and acetonitrile/
c24 A69-43124
Rotational relaxation times for calculating rotational collision numbers in polar gases
[NASA-TN-D-5321] c24 N69-30073
Numerical analysis of spiraling in ion molecule collisions with polar targets using computer plotting techniques
[NASA-TN-D-5407] c24 N69-35508
Interaction energy and dipole moment in collisions of two hydrogen molecules
[NASA-TN-D-5486] c24 N69-39184
MOLECULAR ENERGY LEVELS
Doublet electronic states of benzyl radical, discussing configuration-interaction calculations and transition predictions
c24 A69-13321
Rate coefficient for primary process in removing molecular nitrogen in high vibrational levels from active nitrogen by N atoms
c24 A69-36424
MOLECULAR GASES
Rocket measurements of diurnal variations of F region concentrations and temperature of molecular N and O, showing disagreement with satellite drag data
c13 A69-40515
MOLECULAR OSCILLATIONS
Molecular vibration absorption spectra from variation of field emitted electron energy distribution due to inelastic electron-molecule interaction at metal-vacuum interface
c24 A69-26097
MOLECULAR RELAXATION
Mechanical relaxation of poly 4 methyl pentene 1 at cryogenic temperatures, discussing temperature dispersion curve and secondary absorption associated with thermal motion of side chains
c18 A69-16492
MOLECULAR ROTATION
Molecular motion in polytetrafluoroethylene crystals at cryogenic temperatures, noting crystal defect permitting angular displacements of chain segments
c24 A69-16495
Spontaneous Raman band shapes and depolarization ratios in liquid nitrogen and oxygen measured and compared to gas, discussing time dependence of rotational motion
c24 A69-17817
Diatomic molecules rotational excitation calculated from electron molecule elastic scattering parameters in fixed nuclei approximation
c24 A69-39665
Order-disorder transitions in solid hydrogen, discussing model to explain molecular rotation angular momentum operator fluctuations
c23 A69-43119
Electron beam technique of measuring molecular rotational and vibrational temperatures of nitrogen in hypersonic tunnel using air as test gas
[NASA-TN-D-4892] c33 N69-10932
Rotational relaxation times for calculating rotational collision numbers in polar gases
[NASA-TN-D-5321] c24 N69-30073
MOLECULAR SPECTRA
Electronic transition moment for C /Swan/ bands measured in shock tube in carbon dioxide and argon mixtures
c24 A69-12833
Computer program to predict spectra from electronic transitions of diatomic molecules and atoms, noting line intensity distribution by Voigt profile
c24 A69-35239
Molecular vibration spectra from field emission energy distributions
[NASA-TN-D-5423] c24 N69-36924
MOLECULAR STRUCTURE
Europium complexes high resolution emission spectra in relation to molecular configuration
c06 A69-10893
Mechanical anisotropy of polyethylene terephthalate and relation to molecular structure and cold drawing
c18 A69-16489
Rotational spectrum of ethylene episulfoxide to determine molecular structure, particularly orientation of C sub 2 S ring
c06 A69-20535
Constitutive equation variation effect on near wall flow pattern of dilute polymer solutions
c12 A69-33257
MOLECULAR WEIGHT
Structure and mean molecular weight measurement of unknown atmosphere assessed from high altitude tests in earth atmosphere
[AIAA PAPER 68-1054] c30 A69-13699
Ultrahigh molecular weight polyethylene terephthalate synthesis from commercial solid state materials, noting effects of several parameters
c24 A69-16496
Fluidic oscillator use as molecular weight sensor for gas mixtures
[NASA-TM-X-1698] c03 N69-13246
MOLTEN SALT ELECTROLYTES
Electrochemical behavior of the aluminum electrode in molten salt electrolytes
[NASA-TN-D-5503] c06 N69-40240
MOLYBDENUM
Neutron interaction behavior of beryllium oxide and molybdenum reflectors for nuclear reactors
[NASA-TM-X-1822] c22 N69-29593
Production of glass coatings for molybdenum ion thruster accelerator grids
[NASA-TN-D-5320] c15 N69-30062
Molybdenum and tungsten solubility in liquid potassium
[NASA-TN-D-5504] c17 N69-40053
MOLYBDENUM ALLOYS
Oxidation behavior of coated molybdenum and niobium alloys in high temperature supersonic air streams
[NASA-TN-D-4877] c17 N69-10764
Ductilizing of Group 6A elements by rhenium and other solutes
[NASA-TN-D-4955] c17 N69-14403
Mechanical properties of alloys molybdenum hafnium carbon compounds
[NASA-TN-D-5025] c17 N69-19200
Stress rupture and tensile properties of refractory metal wires at 2000 and 2200 deg F
[NASA-TN-D-5139] c32 N69-22823
Dynamic strain aging during creep and tensile tests of molybdenum-titanium-carbon alloys
[NASA-TN-D-5169] c17 N69-22993
Dynamic strain aging in carbide strengthened molybdenum alloys
[NASA-TN-D-5355] c17 N69-31883

Creep rate equations for refractory metal alloys of tantalum molybdenum, and columbium
[NASA-TN-D-5424] c17 N69-36653
MOLYBDENUM COMPOUNDS
Impregnation of polytetrafluoroethylene with hexaflourides of rhenium, molybdenum, and tungsten
[NASA-TN-D-4886] c06 N69-10126
Thermal stability and friction of disulfides, diselenides, and ditellurides of molybdenum and tungsten in ultrahigh vacuum
[NASA-TN-D-5141] c15 N69-22992
MOLYBDENUM DISULFIDES
Physical sputtering deposition of molybdenum disulfide films as solid lubricant on rotating and sliding components, discussing lubrication properties in vacuum
[ASLE PAPER 68-LC-15] c15 A69-19308
Friction and contact resistance during sliding in vacuum of low resistivity metals lubricated with sputtered molybdenum disulfide
[NASA-TN-D-5349] c15 N69-31884
MOMENTS OF INERTIA
FORTRAN program for computing principal mass moments of inertia of spacecraft treated as composite bodies
[NASA-TM-X-1754] c23 N69-20870
MOMENTUM
Accelerated boundary layers classified in terms of integral balance of pressure, inertia, wall friction forces and entrainment momenta
[AIAA PAPER 69-666] c12 A69-33462
Momentum diffusion between two supersonic airstreams passing through oblique shock waves
[NASA-TN-D-4974] c12 N69-15631
Momentum integral method treating magnetohydrodynamic and simple hydrodynamic entrance flows
[NASA-TN-D-5215] c25 N69-24920
MOMENTUM TRANSFER
Interphase momentum transfer during propagation of infinitesimal pressure pulse through bubbly flow two phase mixture
c33 A69-43511
Impulsive fluid motion on flat plates pulsed with uniform heat flux
[NASA-TN-D-5249] c33 N69-26236
Electron-cesium atom collision probability for momentum transfer
[NASA-TM-X-1897] c24 N69-38773
Momentum transfer from impact into thin aluminum meteor bumper targets
[NASA-TN-D-5492] c32 N69-38809
MONATOMIC GASES
Radiation attenuation cross sections of monatomic and diatomic xenon gas from UV absorption measurements near resonance line
c24 A69-12551
Ionizing shock front structure in monatomic gas, considering atom-atom and electron-atom collisional ionization rates
c12 A69-13138
MONKEYS
Biological effects on rhesus monkeys of high energy protons compared to effects of cobalt 60 gamma radiation
c04 A69-13498
Light effects on circadian rhythms in monkeys, describing changes in deep body temperature and locomotor activity phase relationships
c04 A69-31336
Circadian rhythm phase relationships between photoperiodism and heart rate, locomotor activity and deep body temperature /DBT/ in unrestrained monkeys
c04 A69-42706
MONOCHROMATIC RADIATION
Dual beam white or nearly monochromatic light source providing programmed repetitive sample illumination with variable intensity, pulse duration and sequence for photosynthesis research
c14 A69-36378
MONOCHROMATORS
Solar spectral irradiance measured by airborne instruments, discussing construction, calibration, etc, of photoelectric filter radiometer and Leiss monochromator
c30 A69-32261
Minimization of optical resonance scattering by adjustment of monochromator slit geometry
[NASA-TM-X-1702] c24 N69-13210
MONOCULAR VISION
Landing performance in T-33A aircraft with loss of binocular vision compared to performance with both eyes
c05 A69-41675
MONOMERS
Luminescence spectra of aromatic polymers, monomers and dimers under high energy electron excitation using molecular resonance model
c26 A69-32792
MONOMOLECULAR FILMS
Uranyl ions interaction with phospholipid and cholesterol monolayers, using surface pressure and potential measurements
c06 A69-25641
MONOPOLE ANTENNAS
Apollo astronaut, backpack monopole antenna and its radiation patterns
[NASA-TN-D-5081] c07 N69-23882
MONOPULSE ANTENNAS
Multiplicative feed system for monopulse angle tracking antennas, discussing influence of sidelobe and backlobe responses on control function slope determining antenna bearing angle
c11 A69-37704
Parabolic antenna properties generated by dual band circularly polarized focused two channel monopulse feed system, discussing tracking data from helicopter, Apollo 8 and Cassiopeia A
c07 A69-41752
MONSOONS
Steady state solution of quasi-geostrophic perturbation equations for atmospheric forced response to parametized heating as global monsoon theory
c20 A69-36405
MONTE CARLO METHOD
Monte Carlo method application to heat transfer analysis including radiation, rarefied gas energy transfer and conduction
c33 A69-24457
COHORT-2 Monte Carlo computer program written in FORTRAN 4 to model radiation shielding problems
c08 A69-29004
Monte Carlo method application to neutron streaming in hemispherical air-filled ducts in water tank to determine leakage through nuclear reactor shields
c22 A69-35178
Monte Carlo relaxation method for physically self consistent model stellar atmospheres, discussing stability, accuracy and convergence of solution
c30 A69-36337
Comparison of ray trace methods for estimating sound intensity variations due to atmospheric variability as determined by Monte Carlo methods
[NASA-CR-1337] c23 N69-23199
Monte Carlo analysis of gold sphere transmission experiments at 24 keV neutron energy using S wave spin state data
[NASA-TN-D-5211] c24 N69-24826
Monte Carlo method for estimating costs and optimal testing of Explorer size spacecraft
[NASA-TN-D-5283] c34 N69-31333
Gamma ray transport portion of COHORT 2 Monte Carlo shielding code
[NASA-TM-X-1877] c22 N69-35848
MOON
Geomagnetic tail topology, reconnection and interaction with moon from Explorer 33 satellite data
c13 A69-19365
Lunar dynamic response to discontinuities in interplanetary magnetic field to determine electrical conductivity and internal temperature
c30 A69-31442
Computer program for computation of thermal radiation heat loads and temperatures of spacecraft orbiting planets or moon
[NASA-TR-R-278] c30 N69-14428
Space communications system for earth moon radio link
[NASA-TT-F-527] c07 N69-14973
Telemetry data from image-motion compensation sensor on Lunar Orbiter 1 spacecraft for determining radius of moon

[NASA-TN-D-5231] c30 N69-29115
MORPHOLOGY
Determination of micromorphic material constants from elastic properties of constituents
[NASA-CR-1320] c32 N69-21569
MOSSBAUER EFFECT
Temperature dependent isomer shift and anharmonic binding of Sn 119 in niobium stannide, measuring Mossbauer recoil free fraction
c26 A69-10009
MOTION
Differential thresholds for rotary and linear motion in the periphery
[NASA-CR-1439] c05 N69-36925
MOTION STABILITY
Boussinesq approximation for compressible fluids, discussing perturbation pressure and velocities and vertical scale motions
c12 A69-26013
Numerical solution of coupled, nonlinear, equation of motion for rigid blade to simulate response sensitivity and blade-motion stability of fully articulated rotor
[NASA-TN-D-5032] c01 N69-17289
Motion stabilization criteria for aircraft during spatial maneuvers
[NASA-TT-F-555] c02 N69-24761
MOTIVATION
Science education and training, discussing student motivation
[UN PAPER 68-95809] c34 A69-10515
MOTORS
Dynamic analysis and maximum stepping rate prediction for permanent magnet motor
[NASA-TN-D-5094] c03 N69-20780
Fluidic integrated circuits for control of pneumatic stepping-motor actuator system
[NASA-TN-D-5155] c03 N69-22896
MULTIPHASE FLOW
Wind tunnel tests of distortion dynamics in Mach three mixed compression inlet
[NASA-TM-X-1706] c01 N69-13154
Dynamic response of supersonic mixed compression inlet coupled to cold pipe or turbojet engine
[NASA-TN-D-5338] c28 N69-31336
MULTIPLIERS
Stability of time varying systems by construction of multipliers with prescribed phase characteristics
c10 A69-16598
Vector integral extension to optimal trajectory coordinate multiplier systems with constant of motion demonstrated for coast-arc problem
[AIAA PAPER 69-907] c30 A69-39339
MULTIPOLAR FIELDS
Coulomb approximation for dipole and quadrupole transitions, calculating tables for radial matrix elements
c24 A69-10901
MULTISTAGE ROCKET VEHICLES
Multistage rocket trajectories optimized by second order numerical technique and digital computer program, considering coasting, vacuum flight and transition times
c30 A69-32154
MUSCULAR FUNCTION
Exercise prescription for hypokinetic airline pilots to prevent physiological deterioration and maintain performance, discussing predictive tests, tolerance evaluation, training regimens, etc
c05 A69-41800
Small perturbation dynamics of neuromuscular system in tracking tasks
[NASA-CR-1212] c05 N69-14212
Coordination of voluntary movements of man in zero gravitational fields
[NASA-TT-F-578] c04 N69-31356
MUSCULAR STRENGTH
Hypohydration effects on isometric muscular strength, noting decreasing trends in maximal strength
c04 A69-15983
MYLAR (TRADEMARK)
Proton induced voltage breakdowns in polymeric materials
[NASA-TM-X-1688] c18 N69-10066

N

N-TYPE SEMICONDUCTORS
Negative differential resistance effect producing relaxation type oscillations in n-type gallium arsenide
c26 A69-10557
NACELLES
Conference on NASA research in noise reduction of subsonic jet aircraft - nacelle acoustic linings, sound generation in jet engines, and operational noise effects on humans
[NASA-SP-189] c02 N69-11542
Numerical method for evaluation and utilization of supersonic nacelle-wing interference
[NASA-TN-D-5057] c01 N69-19641
NASA PROGRAMS
Scientific advances from space research in communications astronomy, electronics, transportation, etc
c30 A69-10498
NASA university program, discussing participation in space and aeronautics developed based on project oriented research grants and sustaining university grants
[UN PAPER 68-95413] c34 A69-10506
NASA Technology Utilization Program, discussing information dissemination
[UN PAPER 68-95313] c34 A69-10512
NASA programs and opportunities for international cooperation in space
[UN PAPER 68-95367] c34 A69-10516
NASA programs impact on U.S. education
[UN PAPER 68-95291] c34 A69-10519
NASA Planetary Exploration Program to gather data on origin of solar system and life, discussing planetary evolution and extraterrestrial life
c04 A69-12804
NASA Plum Brook Reactor Facility /PBRF/ for determining radiation tolerance to support nuclear power application in space for propulsion and power
c22 A69-13128
NASA Space Application Program strategy, discussing research and development trend toward complexity, versatility and multidisciplinary use of larger spacecraft
c30 A69-13427
NASA research on flexible and stiffened flexible wings, discussing range of applicability, aerodynamic characteristics and wind tunnel results
c02 A69-15568
Federal government contracting, discussing legality of NASA service contracts
c34 A69-15987
Proton beams uniformity available at NASA synchrocyclotron designed for radiation biology research by simulating space radiation environment
c11 A69-15992
NASA civil aviation electronics research program, discussing feasibility of V/STOL aircraft all-weather operations
c34 A69-16718
NASA scientific and technical information program for building technical data and literature repository for scientists, engineers and technical managers, describing IAA and STAR
[UN PAPER 68-95317] c34 A69-17068
Manned space flight programs, discussing U.S. technological, scientific and practical contributions
c30 A69-17074
Multifunction Receiver System rationale, concepts, background requirements and technical justifications for tracking, telemetry and ranging data acquisition by Goddard Center
c07 A69-19101
Small Scientific Satellite program, discussing payload for investigating magnetosphere and near interplanetary space
[IEEE PAPER 3C-1] c31 A69-19195
NASA flight safety research, discussing size effects on aircraft handling and built-in response to failure modes
c02 A69-19764

NASA program in electric propulsion, noting applications for spacecraft position control and for small automated interplanetary spacecraft
[AIAA PAPER 69-248] c28 A69-21216
NASA long range planning of primary electric propulsion for automated space program
[AIAA PAPER 69-247] c28 A69-21251
Ablation characteristics of heat shield materials measured in arc heated wind tunnels, considering influence of model scale, heating rate and pressure level
c18 A69-26813
NASA manned aerospace simulation techniques and equipment as used at Ames Research Center, noting applications to various types of manned vehicles
[ASME PAPER 69-DE-56] c11 A69-28844
NASA flight test of hingeless rotor compound helicopter to determine lift sharing characteristics, showing rotor lift dependence on airspeed
c02 A69-29702
Aeromedical developments by NASA biomedical applications program applied to general medical equipment including cardiac sensors, surgical sterilization, ballistocardiograph, etc
c34 A69-32430
Commercial utilization of space technology, discussing cost reduction and role of NASA Apollo Program
c30 A69-34044
NASA photogrammetric lunar activities, discussing imagery and control data by Lunar Orbiter and photogrammetric data reduction for preparing manned lunar landing
c14 A69-34336
Professional programs for aeronautics, rocketry and astronautics development
c34 A69-34552
Space exploration influence on science education, showing NASA instructional materials for teachers in biology, chemistry, physics, mathematics, industrial arts, etc
c34 A69-35077
NASA technology utilization program for civilian economy benefit, discussing scientific and technical documentation and transfer across industrial, disciplinary and regional boundaries
c34 A69-35105
NASA planetary entry parachute program for rocket launched and balloon deployment tests
[AIAA PAPER 68-934] c02 A69-35952
NASA Earth Resources Survey Aircraft Program, describing aircraft and remote sensors characteristics
c14 A69-36259
NASA Lunar Orbiter Program of lunar photography from orbiting spacecraft
c30 A69-38377
NASA current awareness service SCAN /selected current aerospace notices/, promoting selectivity in information transfer to abstract journals, accession lists and bibliographies
c34 A69-39581
Telemetry data processing, describing designation, tasks and possibilities of data reduction laboratory attached to NASA Goddard Space Flight Center
c11 A69-40352
NASA program for radio spectrum utilization in aerospace communication systems
c07 A69-42502
Planetary exploration and NASA program objectives
[AAS PAPER 69-286] c30 A69-42810
Logistics management developed for Apollo Applications Program of NASA Manned Spacecraft Center
[AAS PAPER 69-204] c34 A69-42812
Launch vehicle upper stage requirements in space missions, discussing space engine for lunar, planetary and interplanetary exploration
[AAS PAPER 69-359] c34 A69-42828
Management system for safety in NASA Manned Space Flight Program, discussing hazard analyses and reduction precedence sequence
[AAS PAPER 69-522] c34 A69-42851
Pioneer F/G mission to Jupiter by NASA for exploring interplanetary medium, asteroid belt, planet and environment
[AAS PAPER 69-290] c30 A69-42863
NASA programs for development of high temperature alloys for advanced air breathing engines emphasizing cast Ni-base alloy
[ICAS PAPER 68-26] c17 A69-43718
Application of NASA mathematical management models and systems analyses in private industry and economy
[NASA-SP-5048] c34 N69-10662
Selected conference papers on NASA technology utilization for electric power industry
[NASA-SP-5057] c03 N69-12575
Objectives, current programs, and future mission options in space sciences and applications
[NASA-SP-162] c30 N69-13844
NASA contributions to bioinstrumentation system - survey
[NASA-SP-5054] c04 N69-14860
NASA Small Astronomy Satellite /SAS/ program for radiation source detection
[NASA-TN-D-5099] c31 N69-21017
Combined selective listing of NASA scientific and technical reports announced during 1968
[NASA-SP-7033] c34 N69-29492
Potential for advancement of astronomy by space programs
[NASA-SP-213] c30 N69-41150

NATURAL SATELLITES
Hansen method applied to Jupiter tenth satellite orbit correction and perturbations, describing computer program and formulas used
c30 A69-37529
Perturbative effects of Jupiter moons on spacecraft flyby and postencounter heliocentric trajectories, noting precision targeting
[AIAA PAPER 69-932] c30 A69-39361
Application of Hansen lunar theory to 10th satellite of Jupiter
[NASA-TN-D-4979] c30 N69-14479
Direct and indirect planetary perturbation effects on motion of natural satellites
[NASA-TN-D-5284] c30 N69-37893

NAVIER-STOKES EQUATION
Algorithm for Navier-Stokes and continuity equations used to derive curvilinear coordinate system
c08 A69-14858
Numerical method for time dependent compressible Navier-Stokes equations applied to axisymmetric flow field produced by hypervelocity impact, examining viscous effects
[AIAA PAPER 69-354] c32 A69-28288
Nonlinear disturbance decay in unbounded viscous fluid
[NASA-TN-D-4947] c12 N69-14483

NAVIGATION
Minimal angle of resolution /MAR/ between point and extended circular source and between point source and simulated horizon, studying irradiation effects on manual navigation
c21 A69-19208
Theory and practice of aircraft navigation - textbook
[NASA-TT-F-524] c21 N69-17788
Prediction methods for angular line-of-sight deviations induced by spacecraft window
[NASA-TN-D-5238] c21 N69-31227

NAVIGATION AIDS
Artificial satellites as navigation aids, describing angle, range and range-angle systems, discussing orbital mechanics and communications difficulties
c21 A69-34855
Guidance and navigation flight tests, demonstrating system performance improvements by onboard inertial system communicating with external navigation aid
[AIAA PAPER 69-842] c21 A69-39429
Advanced electronic applications to navigation, data transmission, and airborne collision avoidance in general aviation aircraft and to simulated displays for low visibility landing
[NASA-CR-1240] c02 N69-14729
Design and development of boresighted star tracker
[NASA-CR-976] c21 N69-21502

NAVIGATION INSTRUMENTS
Navigation-aids identification decoder and display device for general aviation aircraft
[NASA-TN-D-5445] c09 N69-38852

NAVIGATION SATELLITES
Space applications program including communications and navigation meteorology, earth resources survey and geodesy
[UN PAPER 68-95437] c34 A69-10472
Navigation services satellite systems including position determination, communication and telemetry for ships and aircraft
[UN PAPER 68-95363] c21 A69-10479
Navigation satellites system designed for ATC without requirement for onboard transmitter, discussing spectrum occupancy, satellite power, lane ambiguities and computational procedures
c21 A69-19212
Artificial satellites as navigation aids, describing angle, range and range-angle systems, discussing orbital mechanics and communications difficulties
c21 A69-34855
Optical measurements on secondary satellite for determining perturbation parameters of orbiting spacecraft
[NASA-CR-1412] c30 N69-35513

NEAR INFRARED RADIATION
Ice clouds near IR spectral reflectivity dependence on particle size, noting application to planetary atmospheres
c13 A69-34283
Two-micron sky survey catalog of celestial objects
[NASA-SP-3047-REV] c30 N69-37993

NEGATIVE CONDUCTANCE
Negative differential resistance effect producing relaxation type oscillations in n-type gallium arsenide
c26 A69-10557

NEON ISOTOPES
Upper bounds for electromagnetic transition rates for Ne 20 determined using Hartree-Fock wave functions
c24 A69-35166

NEPTUNE (PLANET)
Planetary flight handbook - direct trajectories to Jupiter, Saturn, Uranus, and Neptune
[NASA-SP-35-VOL-3-PT-7] c30 N69-33490

NERNST-ETTINGSHAUSEN EFFECT
Fermi surface topology effects on Nernst-Ettingshausen coefficient from measurements in magnetic fields to 3.3 tesla and 1.2-4.2 K temperatures in metallic tin
c26 A69-16357
Nernst-Ettingshausen, thermoelectric power, thermal transverse-even, magnetoresistance, and Hall coefficients in white tin in 3.3 tesla field and cryogenic temperatures
[NASA-TN-D-5227] c26 N69-25412

NERVES
Neutral buoyancy microelectrode for prolonged recording from single nerve units
c05 A69-11865

NETWORK ANALYSIS
Passive circuit to transform voltage of indefinitely repeated positive or negative pulses using transistors, diodes and magnetic cores
c09 A69-10564
Voltage divider network board composed of composite carbon resistors for measurement of terminal voltage of 3 MeV Dynamitron electron accelerator recalibration
c11 A69-17705
Feedback systems analysis, considering single phase and polyphase coupled and uncoupled commutation networks in forward loop and linear transfer function feedback loop
c10 A69-19853
Delta functions spectrum in reciprocal time domain for LC and RC structures due to impulse response in distributed parameters
c10 A69-21327
Scanning electron mirror microscope advantages over electron mirror and scanning electron microscopes for examining integrated circuits
c14 A69-32891
Circuits and systems - Conference, Pacific Grove, California, October-November 1968
c10 A69-34671
Multiloop feedback in active distributed RC networks for low parameter sensitivity with low amplifier gain compared to single loop circuits
c10 A69-34679
N-terminal parent networks with symmetry constraints derived for nonredundant one port configurations through combinatorial functions test patterns, using computer algorithm
c08 A69-42524

NETWORK SYNTHESIS
Circuits and systems - Conference, Pacific Grove, California, October-November 1968
c10 A69-34671
Multiplexer network synthesis based on arbitrary divisibility of frequency range and obtainability of input impedance at all frequencies
c09 A69-38530
Computer program for generation of test patterns for multiterminal devices and networks
c08 A69-39604
Time varying resistance wire to arrest oscillations in pulsed capacitor discharge circuit, deriving over, under and critical damping conditions
c09 A69-41228

NEUROMUSCULAR TRANSMISSION
Small perturbation dynamics of neuromuscular system in tracking tasks
[NASA-CR-1212] c05 N69-14212

NEURONS
Neutral buoyancy microelectrode for prolonged recording from single nerve units
c05 A69-11865

NEUTRAL PARTICLES
Radioactive decay of neutral pions generated in metagalactic cosmic ray interactions as source of high energy isotropic gamma rays observed by OSO-3
c29 A69-12092
Electron, ion and neutral particle temperatures of upper atmosphere
c13 A69-14975

NEUTRINOS
Red supergiants as old derivatives of main sequence O and B stars, discussing neutrino emissions and carbon core contraction
c30 A69-24125

NEUTRON ABSORBERS
Neutron interaction behavior of beryllium oxide and molybdenum reflectors for nuclear reactors
[NASA-TM-X-1822] c22 N69-29593
Multigroup calculations of resonance neutron capture in thick slab of depleted U-238
[NASA-TM-X-1878] c24 N69-36901

NEUTRON COUNTERS
Improved delayed neutron fission product monitor for operation in reactor coolant system
[NASA-TM-X-1886] c14 N69-38766

NEUTRON CROSS SECTIONS
Group cross section generating techniques to calculate neutron capture rates and spatial capture distribution in depleted thick U slab, using GARCL program
c24 A69-35179
Thermal neutron capture cross section at high temperature irradiations determined for W 184, describing radiochemical separation and flux counting techniques
c14 A69-43192

NEUTRON DISTRIBUTION
Group cross section generating techniques to calculate neutron capture rates and spatial capture distribution in depleted thick U slab, using GARCL program
c24 A69-35179

NEUTRON EMISSION
Monte Carlo method application to neutron streaming in hemispherical air-filled ducts in water tank to determine leakage through nuclear reactor shields
c22 A69-35178
Heat transfer and neutronic calculations after fuel emitter separation in uranium oxide fueled thermionic diodes
[NASA-TM-X-1812] c22 N69-28212

NEUTRON FLUX DENSITY
Boron 10 absorption cross sections from counting ratios measurements of boron trifluoride proportional counter used to monitor neutron fluxes
c24 A69-33753

Thermal neutron flux perturbations in cylinders in test reactors, using regression analysis to obtain polynomials for flux perturbation, depression, self shielding factors, etc
c22 A69-38274
Thermal neutron capture cross section at high temperature irradiations determined for W 184, describing radiochemical separation and flux counting techniques
c14 A69-43192

NEUTRON IRRADIATION
Effects of neutron irradiation on silicon voltage regulator Zener diodes
[NASA-TN-D-4923] c09 N69-10250

NEUTRON SOURCES
Pulsed neutron source studies to determine shutdown reactivities of unreflected solution reactor
[NASA-TN-D-5487] c22 N69-39186

NEUTRON SPECTRA
FASTER code for significantly reducing ducted reactor shield computation time for neutron number spectrum
[NASA-TM-X-1828] c22 N69-29671
FASTER computer program modified for tracking neutrons through reactor slabs penetrated by helical voided ducts
[NASA-TM-X-1838] c22 N69-31986

NEUTRON STARS
Rotating and oscillating magnetic neutron stars causing pulsars radio and optical signals, stressing UV line emissions theory
c30 A69-20624
Radio emission from magnetic neutron stars as possible model for pulsars, noting optical and IR emission bands
c30 A69-20729
Instability of stellar structures intermediate between white dwarfs and neutron stars shown by stellar models, discussing pulsar signals periodicities
c30 A69-20770
Rotational energy conversion of neutron star into relativistic electrons energy suggested by increasing period of pulsating radio source in Crab Nebula
c30 A69-21454
Spin down effects on neutron stars, discussing decrease of period of PSR 0833-45 as result of differential rotation instability
c30 A69-32803
Radial pulsations of neutron star losing mass, interpreting Crab Nebula pulsar observed period and secular increase of period
c30 A69-37573
Crab Nebula pulsars radio properties, possible neutron star origin, interstellar gas and magnetic fields, etc
c30 A69-42556

NEUTRONS
Tritium contamination reduction in small ion accelerators for neutron production, discussing pumping problems and vacuum systems
c11 A69-26499
Transport study of neutron and photon attenuation through lithium hydride and tungsten spheres
[NASA-TN-D-4989] c24 N69-15375
One megawatt reactor design for Brayton cycle space power application - neutronics design
[NASA-TN-D-5014] c22 N69-17314

NEWTON THEORY
Newtonian aerodynamics for circular cones modified to produce lift at zero angle of attack
[NASA-TN-D-5193] c01 N69-23926

NEWTON-RAPHSON METHOD
Newton-Raphson technique development for determining stability derivatives from flight data, noting use of a priori wind tunnel information
[AIAA PAPER 69-315] c02 A69-22379

NICKEL
Angular correlation between inelastically scattered 42 MeV alpha particles and emitted gammas from 2-plus Ni 58
c24 A69-13100
Size effect on tensile strength of polycrystalline nickel wires
[NASA-TN-D-4884] c17 N69-10226
Radiation induced reduction of ammoniacal nickel /2/ sulfate to metallic nickel
[NASA-TN-D-5213] c06 N69-24940
Low energy electron diffraction study of adhesion of various materials to nickel surface
[NASA-TN-D-5247] c17 N69-26258
Dynamic creep model to determine oxidation effects on high temperature deformation of nickel
[NASA-TN-D-5266] c17 N69-27061
Effects of nickel on performance of n on p silicon solar cells
[NASA-TN-D-5366] c03 N69-31844
Internal stress and deposit hardness of nickel electrodeposited containing controlled quantities of meta-benzenedisulfonic acid
[NASA-TN-D-5188] c17 N69-36697

NICKEL ALLOYS
Tungsten alloy fiber reinforced nickel base alloy composites stress-rupture strength, oxidation and impact resistance for high temperature turbojet engine buckets
c17 A69-29010
Mechanical properties associated with 55-Nitinol memory effect, presenting stress-strain and electrical resistivity as function of temperature
c17 A69-35523
NASA programs for development of high temperature alloys for advanced air breathing engines emphasizing cast Ni-base alloy
[ICAS PAPER 68-26] c17 A69-43718
Physical properties of near stoichiometric nickel-titanium alloy Nitinol and some structural-mechanical applications employing these properties
[NASA-CR-1232] c17 N69-11420
Edge notch sensitivity in thin sheet nickel alloys under stress at high temperatures
[NASA-CR-1263] c32 N69-16156
Sigma phase formation and its effect on stress rupture properties of nickel base alloy IN-100
[NASA-TN-D-5185] c17 N69-23465
Extruded prealloyed powder evaluation for two nickel-base alloys
[NASA-TN-D-5248] c17 N69-26192
Development and high temperature tests of high strength nickel alloy for stator vanes of gas turbine engines
[NASA-TN-D-5352] c17 N69-31873
Oxidation resistance and thermal fatigue cracking of nickel and cobalt base alloys in transonic gas streams
[NASA-TN-D-5376] c17 N69-33307
Physical, mechanical, and electrical properties of 55-Nitinol - nickel-titanium alloy
[NASA-CR-1433] c17 N69-36367
Dispersion strengthened nickel produced from ultrafine comminuted powders
[NASA-TN-D-5421] c17 N69-38074

NICKEL CADMIUM BATTERIES
Signal electrode charge control of sealed Ni-Cd batteries, discussing signal voltage for overcharge control
c03 A69-23993

NICKEL COMPOUNDS
Three oxidation-resistant alloy foil claddings for protecting typical gas turbine engine alloys of nickel and cobalt
[NASA-TN-D-5483] c17 N69-38794

NICKEL STEELS
Metallurgy, behavior, and application of 18 percent nickel maraging steels
[NASA-SP-5051] c17 N69-14193

NIGHT SKY
Day sky brightness at altitude above 100 km obtained during rocket flight compared to night sky viewed from ground
c30 A69-33664
Spectral and electrophotometric studies of upper atmosphere - airglows, atomic oxygen, hydroxyl emission, helium line spectra, auroras, and solar cycle effects on magnetosphere
[NASA-TT-F-530] c13 N69-16539
Computer program for launch window determination from star illumination of night sky background
[NASA-TM-X-1772] c21 N69-22969

NIMBUS PROJECT
NIMBUS program individual missions characteristics emphasizing NIMBUS 3 results and weather

forecasting improvements
[AAS PAPER 69-421] c31 A69-42835
NIMBUS SATELLITES
Regression generated radiometric and contour height fields of North American Continent using Nimbus 2 IR equivalent black body temperature and geopotential data
c20 A69-42896
Procurement and construction of automatic picture transmission ground station equipment for ESSA and Nimbus transmission
[NASA-SP-5080] c07 N69-31985
NIMBUS 2 SATELLITE
Detecting geomorphological features over northeast Africa by Nimbus 2 visible and infrared radiation measurements
[NASA-TN-D-4648] c13 N69-14290
Nimbus 2 high resolution infrared radiometer data on earth resources of arid and subarid lands
[NASA-TN-D-4647] c13 N69-14450
Nimbus 2 flight evaluation and engineering report covering launch through orbit 5275
[NASA-TN-D-4881] c31 N69-17851
NIMBUS 3 SATELLITE
NIMBUS program individual missions characteristics emphasizing NIMBUS 3 results and weather forecasting improvements
[AAS PAPER 69-421] c31 A69-42835
NIOBIUM
Rhenium-niobium cylindrical thermionic converters with mechanically polished or electroetched emitters, comparing performance
c03 A69-13126
Nonlinear flux flow in single crystal niobium
[NASA-TN-D-5198] c26 N69-24916
NIOBIUM ALLOYS
Columbium alloys properties, discussing creep strength, oxidation resistance, costs, production, etc
c17 A69-18791
Oxidation behavior of coated molybdenum and niobium alloys in high temperature supersonic air streams
[NASA-TN-D-4877] c17 N69-10764
Absorption rate sticking probabilities for oxygen on niobium and dilute niobium-zirconium alloys
[NASA-TN-D-4885] c17 N69-10931
Stress rupture and tensile properties of refractory metal wires at 2000 and 2200 deg F
[NASA-TN-D-5139] c32 N69-22823
Creep rate equations for refractory metal alloys of tantalum molybdenum, and columbium
[NASA-TN-D-5424] c17 N69-36653
NIOBIUM COMPOUNDS
Nuclear magnetic resonance of epsilon and delta phases in NbN system with nitrogen mole fractions
c26 A69-36445
Cb-1Zr pumped sodium loop tests to evaluate loop components, EM pump, pressure transducers, and instrumentation techniques
[NASA-CR-1135] c03 N69-11373
High emittance coating materials for beryllium, niobium-zirconium compounds, and stainless steel used in spacecraft radiators
[NASA-CR-1278] c17 N69-18952
NIOBIUM STANNIDES
Temperature dependent isomer shift and anharmonic binding of Sn 119 in niobium stannide, measuring Mossbauer recoil free fraction
c26 A69-10009
Superconductive 14-tesla magnet system with 15-cm bore and niobium stanide ribbon
[NASA-CR-1260] c03 N69-15382
Pumped helium tests of 51 centimeter bore niobium tin magnetic coils
[NASA-TN-D-5158] c26 N69-22965
NITRATION
Protective coatings for chromium alloys for use in advanced air breathing applications
[NASA-TN-D-5157] c17 N69-23084
NITRIC OXIDE
Distributions, seasonal variations and ionospheric implications of mesospheric nitric oxide concentration
c13 A69-38364
NITRIDES
Nuclear magnetic resonance of epsilon and delta phases in NbN system with nitrogen mole fractions
c26 A69-36445
NITROGEN
Leak rate measurement accuracy of rate-of-rise technique for nitrogen, methane and He between millionth and thousandth torr
c14 A69-32326
Rocket measurements of diurnal variations of F region concentrations and temperature of molecular N and O, showing disagreement with satellite drag data
c13 A69-40515
Ionization rate limiting processes behind strong shock waves in pure N, plotting electron density profile diagrams
c12 A69-43367
Performance and analysis of seals for nitrogen inerted lubrication systems of turbine engines
[NASA-TN-D-4761] c15 N69-10055
FORTRAN 4 subroutines for calculating critical flow factor to determine mass flow rate of gaseous helium and nitrogen through critical flow nozzles
[NASA-SP-3046] c12 N69-16098
NITROGEN ATOMS
Rate coefficient for primary process in removing molecular nitrogen in high vibrational levels from active nitrogen by N atoms
c24 A69-36424
Atomic nitrogen collisional ionization and recombination rates under assumed quasi-steady nonequilibrium distribution of electron state populations
c24 A69-43700
NITROGEN IONS
Energy spectrum of secondary electrons and fluorescent efficiency in 3914 A band, obtaining ionization cross section
c29 A69-32315
NITROGEN PLASMA
Nonequilibrium nitrogen plasma spectral line intensities calculated assuming optically thin plasma
c24 A69-10960
NITROGEN TETROXIDE
Liquid rocket acoustic instability for hydrogen-oxygen and earth storable propellant combinations
[NASA-TN-D-4968] c28 N69-14384
NOBLE METALS
Less common refractory metals /rhenium, technetium, hafnium, noble metals/ properties, phase equilibria, etc
c17 A69-18793
NOCTILUCENT CLOUDS
Mesopause wind measurements at high latitude locations by sounding rockets noting relation to noctilucent clouds
c20 A69-28466
Noctilucent clouds with wave movement, chemical composition, and water vapor
[NASA-TT-F-546] c13 N69-25013
NOISE (SOUND)
Auditory temporal masking of tonal signal by narrow band noise and perception of temporal order noting effects of intensity, frequency and time
c05 A69-24795
Systems developed for reducing pilot workload and tracking accuracy improvements during noise abatement landing approaches
[NASA-CR-1427] c02 N69-38657
NOISE INTENSITY
Cosmic radio noise intensity measurements by ATS 2 satellite-borne radiometer
c30 A69-19715
Conference on NASA research in noise reduction of subsonic jet aircraft - nacelle acoustic linings, sound generation in jet engines, and operational noise effects on humans
[NASA-SP-189] c02 N69-11542
Estimating sound intensity from stationary and moving sources using mathematical models
[NASA-CR-1338] c23 N69-22545
Temperature effects on turbofan and turbojet noise radiation
[NASA-CR-1472] c02 N69-40439
NOISE PROPAGATION
Estimating sound intensity from stationary and

moving sources using mathematical models
[NASA-CR-1338] c23 N69-22545
Noise in axisymmetric convergent electron beams
[NASA-TN-D-5212] c10 N69-24918
NOISE REDUCTION
Telemetry technique utilizing thermocouple sensors for base heating determinations on free flight blunt cone in shock tunnels, noting electrical noise reduction
[AIAA PAPER 68-407] c14 A69-15514
Jet engine inlet noise control by modification of inlet guide vanes
c28 A69-15622
Reduction of noise from underexpanded axisymmetric jet flows using radial jet flow impingement
[AIAA PAPER 68-81] c12 A69-28212
Technology trends in airbreathing propulsion, discussing noise control for subsonic jet transports, turbine blade cooling, etc
[AIAA PAPER 69-774] c02 A69-35648
Conference on NASA research in noise reduction of subsonic jet aircraft - nacelle acoustic linings, sound generation in jet engines, and operational noise effects on humans
[NASA-SP-189] c02 N69-11542
Optimum takeoff and climbout trajectory calculation technique for jet aircraft noise abatement
[NASA-TN-D-5182] c02 N69-26194
Analytical and experimental studies for predicting noise attenuation in acoustically treated ducts for turbofan engines
[NASA-CR-1373] c23 N69-36974
Operational limitations in flying noise abatement approaches
[NASA-TN-D-5497] c02 N69-39188
Pressurized liquid nitrogen inside parametric amplifier structures for input, noise, and temperature improvements
[NASA-TN-D-5509] c09 N69-40079
NOISE SPECTRA
Photon bunching effect in spatially coherent noise field enhanced by superposing monochromatic coherent signal and/or shaping incident noise spectra
c07 A69-31694
Beat frequency measurements in far IR due to harmonic mixing of klystrons, discussing noise role
c23 A69-33674
NOISE TOLERANCE
Conference on NASA research in noise reduction of subsonic jet aircraft - nacelle acoustic linings, sound generation in jet engines, and operational noise effects on humans
[NASA-SP-189] c02 N69-11542
Tone and duration effects on perceived noisiness
[NASA-CR-1283] c04 N69-18722
NONDESTRUCTIVE TESTS
Nondestructive testing methods for Saturn 5 space vehicle with emphasis on NDT equipment for Apollo program
c15 A69-23050
Cb-1Zr pumped sodium loop tests to evaluate loop components, EM pump, pressure transducers, and instrumentation techniques
[NASA-CR-1135] c03 N69-11373
Pumped helium tests of 51 centimeter bore niobium tin magnetic coils
[NASA-TN-D-5158] c26 N69-22965
NONEQUILIBRIUM CONDITIONS
Nonequilibrium performance of oxygen difluoride diborane rocket propellant
[NASA-TN-D-4992] c27 N69-16195
Gaseous reactant combustion simulation of dimethylhydrazine and hydrazine fuel system for nonequilibrium expansion studies
[NASA-TN-D-5404] c33 N69-35506
NONEQUILIBRIUM FLOW
Compressible hypersonic turbulent boundary layers solution by finite difference method, relating mixing length to velocity profile shape factor
[AIAA PAPER 69-684] c12 A69-33474
Modified model for vibration-dissociation relaxation coupling phenomena in nonequilibrium high temperature gas flow, discussing parameter U variation with kinetic temperature
c12 A69-37208
Aerodynamic and thermodynamic calibration of nonequilibrium air flow in Ames 1-foot shock tunnel
[NASA-TN-D-4985] c11 N69-15633
Numerical difficulties in integrating equations for one dimensional nonequilibrium nozzle flow of gas
[NASA-TN-D-5176] c19 N69-23355
Nonequilibrium gas dynamics of hydrogen dissociation and recombination
[NASA-CR-1411] c12 N69-34709
NONEQUILIBRIUM PLASMAS
Nonequilibrium nitrogen plasma spectral line intensities calculated assuming optically thin plasma
c24 A69-10960
Electrothermal instabilities of ionization region of nonequilibrium MHD generator in presence of magnetic field
c25 A69-21919
NONGRAY ATMOSPHERES
Correlations of stagnation point radiative heat transfer for earth reentry, noting use of nongray absorption coefficient models
c33 A69-14736
Nongray equilibrium radiative heat transfer in viscous radiating shock layer around blunt body entering high temperature nonisothermal carbon dioxide-nitrogen atmosphere
[AIAA PAPER 69-636] c33 A69-33258
Nongray absorption and radiation cooling on smooth symmetric blunt bodies included in modified Maslen flow field method for radiation and large blowing
[AIAA PAPER 69-637] c01 A69-33290
NONLINEAR EQUATIONS
Existence, uniqueness, and stability criteria for linear and nonlinear operational differential equations in Banach and Hilbert spaces
[NASA-CR-1356] c19 N69-28256
NONLINEAR FEEDBACK
Stochastic saturating systems optimal control computation, considering attitude control and tracking system design by elliptical differential equation of dynamic programming
c10 A69-30601
NONLINEAR FILTERS
Continuous time nonlinear dynamical system states variables estimated suboptimally from discrete noisy measurements with second order nonlinear filter, deriving dynamical equations
c10 A69-17939
NONLINEAR PROGRAMMING
Nonlinear least squares optimization program applied to atmospheric temperature sounding, solving for temperatures at various altitudes from simulated carbon dioxide intensity measurements
c13 A69-33156
NONLINEAR SYSTEMS
Continuous time nonlinear dynamical system states variables estimated suboptimally from discrete noisy measurements with second order nonlinear filter, deriving dynamical equations
c10 A69-17939
Stability of systems with sector nonlinearities determined by converting feedback equation into positive operators equation and by introducing appropriate multiplier
c10 A69-25450
Computer oriented error analysis of electrical circuits and nonlinear system performance
[NASA-TN-D-5112] c10 N69-22919
Computation of regions of constrained stability for nonlinear control systems
[NASA-CR-1328] c19 N69-28196
Chebyshev series solution of nonlinear ordinary differential equations - initial value problems
[NASA-TM-X-1882] c19 N69-36923
NONLINEARITY
Nonlinear disturbance decay in unbounded viscous fluid
[NASA-TN-D-4947] c12 N69-14483
Nonlinear flux flow in single crystal niobium
[NASA-TN-D-5198] c26 N69-24916
NONNEWTONIAN FLUIDS
Quasi-linear ordinary differential equations solutions for steady two dimensional stagnation point flows of nonNewtonian power law fluids

c12 A69-39674
NONPOLAR GASES
Viscosity, thermal conductivity and diffusion predicted for dilute nonpolar, polar and mixed gases, discussing methods for rotational relaxation collision numbers and resonant correction
c33 A69-38951
NONRELATIVISTIC MECHANICS
Scattering, reactions, and decay in nonrelativistic quantum mechanics
[NASA-TT-F-510] c24 N69-25848
NONUNIFORM MAGNETIC FIELDS
Magnetic field nonuniformity and its effect on stability of theta pinch plasma
[NASA-TR-R-303] c25 N69-20997
NORMAL DENSITY FUNCTIONS
Gaussian particle size distribution with porosity and surface irregularity corrections used to determine mean particle size of lunar surface material at Surveyor sites
c30 A69-26371
NORTH AMERICA
Regression generated radiometric and contour height fields of North American Continent using Nimbus 2 IR equivalent black body temperature and geopotential data
c20 A69-42896
NORTHERN HEMISPHERE
Low energy electron precipitation data at northern high latitudes obtained from satellite low altitude polar orbit
c29 A69-28964
Two-micron sky survey catalog of celestial objects
[NASA-SP-3047-REV] c30 N69-37993
NOSE CONES
Cone boundary layer transition location and Reynolds number as function of nose bluntness combined effect with Ar, air and He mass injection
[AIAA PAPER 67-706] c12 A69-33476
Surface pressure distribution on spherical blunted cones, and correlation of Mach numbers, cone angle, and angle of attack
[NASA-TN-D-5204] c01 N69-24764
Upwash patterns on ablating and nonablating cones at hypersonic speeds
[NASA-TN-D-5346] c12 N69-37370
NOSE WHEELS
Steerable landing gear system consisting of freely castoring corotating wheel nose gear, tiltable axle and main gear skids for lifting body spacecraft
[AIAA PAPER 69-790] c02 A69-35639
NOSES (FOREBODIES)
Performance tests on dynamic jettison hinge loads of Centaur nose fairing
[NASA-TM-X-1821] c32 N69-29734
NOTCH SENSITIVITY
Edge notch sensitivity in thin sheet nickel alloys under stress at high temperatures
[NASA-CR-1263] c32 N69-16156
NOTCH STRENGTH
Ultrasonic detection and measurement of fatigue cracks in notched cylinders subjected to reversed axial cyclic loading
c14 A69-10113
Load and temperature effects on fatigue strength of notched titanium alloy sheet for supersonic transport operation
[NASA-TN-D-5294] c32 N69-29607
NOTCH TESTS
Plane strain fracture toughness determined for crack notched bend specimens using standard test procedure for specific metallic material property
c17 A69-33566
NOTCHES
Elastoplastic stress-strain behavior at notch roots in sheet specimens under constant amplitude loading
[NASA-TN-D-5253] c32 N69-28038
NOVAE
Nova outburst dynamics investigation by time dependent hydrodynamics computer program including energy transport by radiation and convection
c30 A69-30769
NOZZLE DESIGN
Location effect of power plants on aft-mounted supersonic cruise exhaust nozzles at transonic speeds in flight and wind tunnel
[AIAA PAPER 69-427] c01 A69-32769
Jet velocity and axial location of nozzle exit on performance of twin-jet afterbody model
[NASA-TN-D-5393] c28 N69-36932
NOZZLE EFFICIENCY
Noncavitating and cavitating performance of low area ratio water jet pumps, analyzing efficiency, area ratio, throat length, nozzle spacing and diffuser geometry
c03 A69-35176
Static tests of nozzle efficiency and pumping characteristics of conical turbojet plug nozzle with translating primary and secondary shrouds at Mach 0 to 2.0
[NASA-TM-X-1777] c28 N69-21648
NOZZLE FLOW
Jet pump head rise deterioration parameter for prediction of cavitation
c12 A69-15791
Pressure and temperature surveys of Mach 27-47 nozzle boundary layer at Ames M-50 He tunnel, determining velocity profiles, wall friction coefficient, etc
[AIAA PAPER 69-686] c12 A69-33441
FORTRAN 4 subroutines for calculating critical flow factor to determine mass flow rate of gaseous helium and nitrogen through critical flow nozzles
[NASA-SP-3046] c12 N69-16098
Conformal mapping of two dimensional jet flow from two nozzles striking plane surfaces
[NASA-TN-D-5064] c01 N69-17816
Numerical difficulties in integrating equations for one dimensional nonequilibrium nozzle flow of gas
[NASA-TN-D-5176] c19 N69-23355
Jet effects on boattail pressure drag of isolated ejector nozzles at Mach 0.60 to 1.47
[NASA-TM-X-1785] c01 N69-26976
Flow angle and throat Reynolds number effects on loss characteristics of two dimensional supersonic nozzle
[NASA-TM-X-1823] c01 N69-31360
Comparison of predicted nozzle coolant side heat transfer and fluid flow with experimental values from Phoebus 2A nuclear tests
[NASA-TM-X-1881] c33 N69-36806
Discharge nozzle coefficients for thick plate orifices with approach flow perpendicular and inclined to orifice axis
[NASA-TN-D-5467] c12 N69-38012
NOZZLE GEOMETRY
Plug and shroud geometry variables on plug nozzle performance at transonic speeds
[NASA-TN-D-5098] c28 N69-21463
Performance characteristics of truncated, conical plug nozzle with cylindrical outer shroud
[NASA-TM-X-1807] c26 N69-27840
Energy thickness in prediction of throat heat transfer in rocket nozzles using nozzle geometries and temperature ratios
[NASA-TN-D-5356] c33 N69-31869
NOZZLE INSERTS
Nozzle insert evaluation and gas cooling concept in storable liquid propellant rocket engine
[NASA-TM-X-1756] c28 N69-19782
Throat and nozzle insert design for ablative rocket engine using storable propellants
[NASA-TN-D-4964] c32 N69-33481
NOZZLE WALLS
Turbulent boundary layer measurements on axisymmetric hypersonic nozzle walls
[NASA-TN-D-5433] c12 N69-36805
NOZZLES
Wind tunnel tests for V/STOL aircraft having direct-lift and lift-cruise jet nozzles
[NASA-TM-X-1758] c01 N69-20016
NUCLEAR BINDING ENERGY
Approximate ionization potentials for high ionization stages of elements with atomic numbers 31 to 92 obtained by binding energy calculations
c24 A69-29923
NUCLEAR ELECTRIC POWER GENERATION
Space nuclear electric power systems applications

and development, summarizing current status and near future programs
[AAS PAPER 69-305] c28 A69-42865
NUCLEAR ELECTRIC PROPULSION
Performance boundaries of space propulsion systems containing nuclear electric stages
[AIAA PAPER 69-249] c22 A69-21249
Space nuclear electric power systems applications and development, summarizing current status and near future programs
[AAS PAPER 69-305] c28 A69-42865
NUCLEAR EMULSIONS
Density measurements of particle tracks in nuclear emulsions utilizing digitized video scan, discussing operation and instrumentation
[IEEE PAPER 2A-7] c14 A69-19185
Primary cosmic ray nuclei studies during Gemini 2 flight by nuclear emulsion detector with time resolution capability, describing experiment design and equipment operation
c29 A69-38350
NUCLEAR ENGINE FOR ROCKET VEHICLES
Nuclear rocket program status and plans, presenting NERVA reactor and engine system tests
[AIAA PAPER 68-610] c22 A69-39219
NUCLEAR EXPLOSIONS
Inner radiation zone including data on electrons, protons and heavier particles and results from high altitude nuclear tests
c29 A69-27144
NUCLEAR FUEL ELEMENTS
Uranium dioxide vent loss in externally fueled thermionic reactor concept
[NASA-TN-D-4922] c22 N69-10099
Rate of loss of uranium dioxide or uranium mononitride from vented nuclear fuel element
[NASA-TN-D-4913] c22 N69-10734
Fabrication of cermets of uranium nitride and tungsten or molybdenum from mixed powders and from coated particles for nuclear fuel elements
[NASA-TN-D-5136] c17 N69-21404
Analysis of cylindrical reactor fuel pin for clad stress caused by fission gases
[NASA-TN-D-5178] c22 N69-24802
Source and cause of fuel element fisson product leakage in reactor cooling water system at Plum Brook Reactor
[NASA-TN-D-5374] c22 N69-32317
Irradiation of encapsulated fuel and fast neutron fluxes that simulate thermionic reactor conditions
[NASA-TM-X-1858] c22 N69-33273
Quantitative method for determination of fission gases trapped in irradiated fuel forms
[NASA-TM-X-1893] c22 N69-37225
NUCLEAR FUELS
Nuclear reactor space power system concept using thermionic diodes, heat pipes and rod control, emphasizing neutronic aspects and feasibility
c22 A69-14799
Nondestructive methods for fuel density determination in uranium dioxide
[NASA-TM-X-1779] c22 N69-22555
Uranium carbides irradiation tests for control of nuclear fuels fission gas swelling
[NAA-SR-12629] c22 N69-22946
NUCLEAR FUSION
Nucleosynthesis in dynamics of massive star cores, noting element synthesis by neutron capture in supernova explosions
c30 A69-20898
NUCLEAR MAGNETIC RESONANCE
Nuclear magnetic resonance of epsilon and delta phases in NbN system with nitrogen mole fractions
c26 A69-36445
Nuclear magnetic resonance and electron paramagnetic resonance techniques for aprotic electrolytes
[NASA-CR-1425] c06 N69-36413
NUCLEAR PARTICLES
High energy cosmic radiation problems
[NASA-SP-199] c29 N69-29652
NUCLEAR POWER PLANTS
Solar and nuclear electric power technology for electric propulsion
[AIAA PAPER 69-826] c03 A69-32709
Nuclear aircraft power plant, discussing safety, economy and obstacles
[AIAA PAPER 69-554] c22 A69-32761
Nuclear power plants based on nuclear aircraft technology to power ocean-going air cushion vehicles
[NASA-TM-X-1871] c22 N69-35723
NUCLEAR POWER REACTORS
Nuclear reactor space power system concept using thermionic diodes, heat pipes and rod control, emphasizing neutronic aspects and feasibility
c22 A69-14799
Systems analysis of Rankine cycle nuclear-electric potassium space power system using Li cooled fast reactor and high temperature turbine inlet
c22 A69-42266
NUCLEAR POWERED SHIPS
Performance potential of high speed ocean-going air cushion vehicles with aircraft nuclear power plants
[AIAA PAPER 69-416] c02 A69-30480
NUCLEAR PROPELLED AIRCRAFT
Performance potential of high speed ocean-going air cushion vehicles with aircraft nuclear power plants
[AIAA PAPER 69-416] c02 A69-30480
Nuclear aircraft power plant, discussing safety, economy and obstacles
[AIAA PAPER 69-554] c22 A69-32761
Nuclear power plants based on nuclear aircraft technology to power ocean-going air cushion vehicles
[NASA-TM-X-1871] c22 N69-35723
NUCLEAR PROPULSION
Solar and nuclear electric power technology for electric propulsion
[AIAA PAPER 69-826] c03 A69-32709
Nuclear powered surface effects machine performance estimates, calculating reactor power and payload fraction for various clearance heights, gross weights and velocities
c22 A69-35180
Performance estimates of high speed peripheral jet nuclear powered ground effects machine
[NASA-TM-X-1888] c22 N69-36757
Steam cycle analysis for nuclear powered turbofan engine
[NASA-TM-X-1907] c22 N69-40060
NUCLEAR RADIATION
NERVA control drum actuator tests in cryogenic temperature, nuclear radiation, and vacuum environments
[NASA-TN-D-5347] c22 N69-31870
NUCLEAR REACTIONS
Absolute cross sections for coincidence detection of deuteron breakup by 42 MeV alpha particles, showing He 5 and Li 5 final state interaction peaks
c24 A69-13469
Nuclear energized pulsational instability of stars based on linear quasi-adiabatic theory, including models with hydrogen burning shells
c30 A69-27576
Abundance compilations of elements due to nuclear processes, discussing carbonaceous chondrites character
c29 A69-38812
Angular distributions for Sc 45 Ti 46 nuclear reactions involving 41 MeV alpha particles bombardment described by Born approximation
c24 A69-41044
Alpha particle-triton reaction on scandium 45 at 41 MeV
[NASA-TN-D-5216] c24 N69-24919
NUCLEAR REACTOR CONTROL
Nuclear reactor space power system concept using thermionic diodes, heat pipes and rod control, emphasizing neutronic aspects and feasibility
c22 A69-14799
Linear multivariable control system design using modern control theory, and application to coupled core reactor control
[NASA-CR-1345] c19 N69-29268
Reflector based poison drum control on equal size reactor cores fueled with U-233 and U-235
[NASA-TM-X-1883] c22 N69-36756
NUCLEAR REACTORS
NASA Plum Brook Reactor Facility /PBRF/ for determining radiation tolerance to support nuclear power application in space for

propulsion and power
c22 A69-13128
Monte Carlo method application to neutron streaming in hemispherical air-filled ducts in water tank to determine leakage through nuclear reactor shields
c22 A69-35178
Initial radio frequency gas heating experiments to simulate thermal environment in nuclear light bulb reactor
[NASA-CR-1311] c22 N69-23450
Radial power tailoring for uranium dioxide-T-111 clad reactor with contained fission product gases
[NASA-TM-X-1795] c22 N69-25305
Probability calculations for fuel clad surface temperatures of nuclear reactors
[NASA-TM-X-1802] c22 N69-26231
Effects of reactor irradiation at cryogenic temperatures on tensile properties of titanium and titanium-base alloys
[NASA-TN-D-5442] c17 N69-37436

NUCLEAR RESEARCH AND TEST REACTORS
Cavity reactor consisting of dilute fuel core surrounded by moderating reflector to attain very high temperatures in gaseous cores
c22 A69-18954
Performance testing of SNAP 8 experimental power system
[NASA-TM-X-1732] c03 N69-20868

NUCLEAR ROCKET ENGINES
Nuclear rockets as Saturn 5 third stages, emphasizing increased payload or velocity utility and resulting engine and stage requirements
[AIAA PAPER 69-555] c31 A69-31849
Nuclear solid core rocket engine performance for interplanetary orbital launch of spacecraft by multiorbit injection
[AIAA PAPER 69-535] c22 A69-32660
Gaseous reactor fluid mechanics for nuclear rocket engines, discussing experiments on geometries used in open cycle engine for acceptable uranium loss rate
[AIAA PAPER 69-477] c22 A69-32728
Fluid dynamic simulation of gas core nuclear rocket chamber for separating light and heavy gas via centrifugal force produced by MHD-driven rotational flow
[AIAA PAPER 69-727] c22 A69-33483
Characteristics, performance potential, and problems of solid, liquid, and gas core nuclear rocket engines
[NASA-TM-X-1685] c22 N69-10067
Uranium dioxide vent loss in externally fueled thermionic reactor concept
[NASA-TN-D-4922] c22 N69-10099
Initial radio frequency gas heating experiments to simulate thermal environment in nuclear light bulb reactor
[NASA-CR-1311] c22 N69-23450
Uranium 233 critical mass requirements, neutron kinetic behavior, and neutron and gamma ray heating rates for nuclear light bulb rocket engine
[NASA-CR-1315] c25 N69-23451
Computerized simulation of low frequency dynamics of liquid hydrogen flow in nuclear rocket engine
[NASA-TN-D-5312] c22 N69-30070
Summaries of recent gaseous reactor fluid mechanics experiments
[NASA-TM-X-1847] c12 N69-31888

NUCLEAR SCATTERING
Asymmetry of polarized protons scattered from He 4 at 540 MeV for laboratory angles between 4 and 42 degrees
c24 A69-14966
Inelastic scattering cross sections calculated, comparing results for various nuclear states expressed as Wood-Saxon radial and harmonic oscillator functions
c26 A69-29006
Core polarization effects in inelastic scattering cross sections for several nuclei in 2s-1d shell, using Hartree-Fock wave functions and Born approximation
c24 A69-29007
High energy scattering approximation valid from small to large angles, discussing errors and proton scattering by He
c24 A69-29008
Intermediate energy protons elastic and quasi-elastic scattering from light nuclei, correlating p-D, p-He-3, p-p and p-He-4 data with varicus scattering models
c24 A69-43123

NUCLEAR STRUCTURE
Hartree-Fock method used to study even-even nuclei in 2s-1d shell
[NASA-TN-D-5066] c24 N69-17976

NUCLEATE BOILING
Film-nucleate boiling transition for liquid nitrogen in vertical forced flow in electrically heated tube, discussing conduction model and agreement with visual experiment
[ASME PAPER 69-HT-26] c33 A69-43542

NUCLEI
Inelastic proton scattering cross sections for target nuclei in 2s-1d shell calculated in distorted wave Born approximation with projected Hartree-Fock wave functions
c24 A69-41045

NUCLEI (NUCLEAR PHYSICS)
Iodine 123 decay via gamma ray emission, noting energies of several transitions
c24 A69-13099
Energy spectra of carbon and oxygen nuclei in primary cosmic radiation, comparing results to earlier measurements and satellite observation
c29 A69-20632
Core polarization effects in inelastic scattering cross sections for several nuclei in 2s-1d shell, using Hartree-Fock wave functions and Born approximation
c24 A69-29007
Nuclear level density and mass shell corrections relationship for deformed and undeformed nuclei
c24 A69-29337
Elastic scattering cross sections for 21-MeV incident protons measured for nuclei differing in mass, determining optical model potential
c24 A69-35489
Primary cosmic ray nuclei studies during Gemini 2 flight by nuclear emulsion detector with time resolution capability, describing experiment design and equipment operation
c29 A69-38350
Differential cross section and polarization measurements for elastic scattering of high energy protons from light nuclei
c24 A69-43125

NUCLEON POTENTIAL
He 2 excitation spectrum for interparticle potential using pair Hamiltonian with repulsive core and attractive well
c24 A69-33118

NUMERICAL ANALYSIS
Complex chemical equilibrium calculation, analyzing thermodynamic principles and solution to nonlinear equations
c06 A69-10588
Tabulation of high accuracy gamma function values for some rational arguments, noting applications to Gaussian quadrature formulas, fractional Bessel functions and Airy functions
c19 A69-13375
Aerodynamic coefficients from observed motion of body in flight, eliminating need for closed form solutions by employing numerical solutions to equations of motion
[AIAA PAPER 69-134] c01 A69-18161
Numerical analysis of periodic solutions of restricted three body problem in sun-Jupiter system, noting genealogy of periodic orbits
c30 A69-19874
Numerical method for time dependent compressible Navier-Stokes equations applied to axisymmetric flow field produced by hypervelocity impact, examining viscous effects
[AIAA PAPER 69-354] c32 A69-28288
Multistage rocket trajectories optimized by second order numerical technique and digital computer program, considering coasting, vacuum flight and transition times
c30 A69-32154
Variable mesh multistep methods for numerical solution of nonlinear differential equations
[NASA-CR-1247] c19 N69-11419

Analysis of flow stability of thin liquid film adjacent to high speed gas stream
[NASA-TN-D-4976] c12 N69-15630
Numerical solution of coupled, nonlinear, equation of motion for rigid blade to simulate response sensitivity and blade-motion stability of fully articulated rotor
[NASA-TN-D-5032] c01 N69-17289
Numerical method for evaluation and utilization of supersonic nacelle-wing interference
[NASA-TN-D-5057] c01 N69-19641
Wind tunnel and analytical study of conversion from wing lift to rotor lift on composite lift VTOL aircraft
[NASA-TN-D-5256] c02 N69-28044
Numerical method and computer program for computing deflection response of thin shells
[NASA-CR-1376] c32 N69-29558
Numerical analysis of shock control by using perforated walls in internal compression supersonic inlets
[NASA-TR-R-317] c01 N69-32338
Computer analysis of total pressure loss and air flow distribution in annular flow gas turbine combustion chambers
[NASA-TN-D-5385] c33 N69-33314
Numerical analysis of spiraling in ion molecule collisions with polar targets using computer plotting techniques
[NASA-TN-D-5407] c24 N69-35508
Evaluation of height and time based meteorological rocket wind reduction techniques
[NASA-TM-X-1850] c20 N69-35523
Numerical calculation of inviscid adiabatic flow field around blunt bodies at hypersonic speeds
[NASA-TN-D-5434] c12 N69-36830
Theoretical feasibility of detecting laser radiation scattered from plasma
[NASA-TN-D-5311] c25 N69-36939
Numerical calculation of viscous compressible flow around harmonic oscillating rigid cylinder
[NASA-CR-1467] c12 N69-38782
Numerical analysis of laminar and turbulent mixing region for two dimensional jet injected at angle to moving stream
[NASA-TN-D-5531] c12 N69-41213

NUMERICAL INTEGRATION
Recursive formulas for numerical evaluation of real convolution integral for simulation of control systems and electrical networks on digital computer
c19 A69-17250
Parasitic eigenvalue in integration of equations governing one dimensional flow of chemically reactive gas
c12 A69-18317
Encke type analytical-numerical integration for solving differential equations of modified set of Lagrange planetary equations, obtaining satellite ephemeris for orbit prediction
[AIAA PAPER 69-908] c30 A69-39340
Numerical integration techniques for real time digital flight simulation
[NASA-TN-D-4900] c11 N69-11371
Comparison of fourth order Runge-Kutta numerical integration technique with two numerical integration formulas in mathematical models used for computing rigid body trajectories
[NASA-TN-D-5425] c30 N69-38769

NUMERICAL WEATHER FORECASTING
Angular grid spacing resolution near poles effect tests in global prediction model for geophysical fluid dynamics, investigating forecast height and wind fields
c20 A69-43066

NUTRITIONAL REQUIREMENTS
Biological, psychological and technological requirements in astronaut nutrition programs, examining preservation and reconstitution techniques
c05 A69-15388
Human responses to spacecraft cabin atmosphere, pressure, and contamination, and water supply, diet, and anthropometry
[NASA-CR-1205-VOL-3] c04 N69-12592

NYQUIST DIAGRAM
Apollo-Saturn 5 propulsion and structure feedback loop, analyzing POGO components and Nyquist plot application
[AIAA PAPER 69-877] c31 A69-39403
Pilots and flight simulator used in study of human visual sampling study
[NASA-CR-1258] c05 N69-14145

O

O RING SEALS
Glass vacuum systems grease free assembly method using heat shrinkable polyolefin sleeve tubing connector for compression of O ring joints
c15 A69-20529

OAO
Orbiting Astronomical Observatory thermal test and evaluation program, discussing equipment and role in experimental design
[AIAA PAPER 69-995] c11 A69-40373
Spaceborne stored program computer design for OAO-C, noting auxiliary command storage, spacecraft monitoring and malfunction reporting, etc
c08 A69-41736

OBLIQUE SHOCK WAVES
Linear wave interaction with oblique shock waves, noting dependence of transmission, reflection and generation coefficients on Mach number
c12 A69-13137
Oblique shock wave properties with free stream Mach number and flow deflection angle as independent variables, noting explicit solution
c01 A69-25378

OBSERVATION AIRCRAFT
NASA Earth Resources Survey Aircraft Program, describing aircraft and remote sensors characteristics
c14 A69-36259

OCEANOGRAPHY
Orbiting satellite global all-weather oceanographic data acquisition to complement higher resolution data from ships, buoys and aircraft remote sensors
[UN PAPER 68-95878] c13 A69-10491
Ocean circulation as climate regulator, discussing role in redistributing climate-changing energy input from solar radiation or lunar tidal friction into atmosphere
c13 A69-26333

OCEANS
Origin and terrestrial relief of continents and oceans
[NASA-TT-F-533] c13 N69-29491
Nuclear power plants based on nuclear aircraft technology to power ocean-going air cushion vehicles
[NASA-TM-X-1871] c22 N69-35723

OCULOGRAVIC ILLUSIONS
Human angular acceleration sensitivity using rotation and oculogyral illusion perception as indicators, relating to spatial orientation and flight control task precision
c05 A69-41674

OGO
Magnetic field data from OGO-2 spacecraft and surface magnetic observatories, noting magnetic storm occurrence and magnetosphere inflation and detection of polar ionospheric currents
c13 A69-11125
Deployable appendages of OGO attitude controlled spacecraft design
c31 A69-17606
OGO program failure rate analysis with respect to cost, schedule and performance tradeoffs, considering component and systems design and reliability, prelaunch feedback, etc
c31 A69-34519
OGO for conducting diversified measurements to study earth atmosphere, earth-sun relationship, etc
c31 A69-36674

OGO-F
Solid state detector for electron spatial distribution measurements on OGO-F satellite, discussing design emphasizing reliability
c09 A69-36676

OILS
Diffusion pump oil reflectance and absorption coefficients measured in three thicknesses using light source, monochromator and detector
c23 A69-23647

OMEGA NAVIGATION SYSTEM
OMEGA position location equipment /OPLE/ test data to demonstrate feasibility of using OMEGA navigational system in conjunction with synchronous satellites
c21 A69-19135

OMNIDIRECTIONAL ANTENNAS
Omnidirectional microwave parallel plate waveguide fed antenna design for flush mounted broadband spacecraft, noting equatorial and polar patterns
c09 A69-40697
Simple antenna with good circular polarization over wide space sector, showing geometry, normalized orthogonal field distributions and beamwidth range, considering slot combinations
c09 A69-41590

OMNIDIRECTIONAL RADIO RANGES
Navigation-aids identification decoder and display device for general aviation aircraft
[NASA-TN-D-5445] c09 N69-38852

ON-LINE PROGRAMMING
On-line central data processing system connected to time shared computer for recording data from test facilities, discussing hardware configuration, software considerations and advantages
c08 A69-33106
Predictive display systems using repetitive, fast time, on-line computation
[NASA-CR-1274] c05 N69-17738

ONBOARD EQUIPMENT
Onboard checkout system concept, discussing philoscphy, requirements, underlying considerations, system description, development and techniques of system selection
c11 A69-25081
Manual procedures for midcourse and terminal guidance, discussing onboard optical measurements and calculations
c21 A69-35792
Operational analysis of mass measuring system in orbiting spacecraft
[NASA-TN-D-5039] c04 N69-19115

ONE DIMENSIONAL FLOW
Parasitic eigenvalue in integration of equations governing one dimensional flow of chemically reactive gas
c12 A69-18317
Normal stress effects in viscoelastic fluid theories applied to one dimensional Burgers model of weak turbulence predicting drag reduction
c12 A69-33256
Calculating equilibrium and kinetically limited performance using one dimensional model
[NASA-TN-D-4991] c27 N69-16153
Numerical difficulties in integrating equations for one dimensional nonequilibrium nozzle flow of gas
[NASA-TN-D-5176] c19 N69-23355

OPACITY
Interim absorption coefficients and opacities for hydrogen plasma at high pressure
[NASA-TM-X-1902] c24 N69-39187

OPERATIONS RESEARCH
Computer program for research and engineering management of spacecraft projects
[NASA-CR-1275] c34 N69-18057
Design and operation of high temperature loads calibration laboratory
[NASA-TM-X-1868] c11 N69-36224

OPERATOR PERFORMANCE
Weightless simulators effectiveness for obtaining space systems maintainability criteria, using nonparametric experimental design for performance data
c05 A69-17648
Small perturbation dynamics of neuromuscular system in tracking tasks
[NASA-CR-1212] c05 N69-14212
Practice and operator work load effects on acquisition and performance of code transformation /COTRAN/ task
[NASA-CR-1261] c05 N69-14345
Aspects of human operator performance in low order compensatory control tasks studied with regression analysis
[NASA-CR-1259] c05 N69-16212
Engineering problems survey on teleoperator control systems
[NASA-SP-5070] c05 N69-21478

OPERATORS (MATHEMATICS)
Stability of systems with sector nonlinearities determined by converting feedback equation into positive operators equation and by introducing appropriate multiplier
c10 A69-25450

OPTICAL COMMUNICATION
Intersatellite microwave laser communication system for ATS-F and ATS-G, discussing experiment, functional design and parameters
c07 A69-41758
HgCdTe as IR satellite detector for terrestrial, atmospheric and ocean mapping, IR astronomy and optical communication
c26 A69-43666
Parametric analysis of microwave and laser systems for communication and tracking - summary
[NASA-TR-R-309] c07 N69-23642
Quantum communication systems performance evaluated by communication efficiency parameter
[NASA-TR-R-320] c07 N69-39264

OPTICAL CORRECTION PROCEDURE
Remote sensing cross-beam cross correlation methods of determining spatially resolved average thermodynamic properties
[AIAA PAPER 67-149] c14 A69-31868
Conference on motion degraded images and correcting procedures - optical filters and digital methods for blurring removal from photographic imagery
[NASA-SP-193] c14 N69-33322

OPTICAL EQUIPMENT
Apollo optics system ground and flight performance tests results, suggesting possible design changes for sunlit space environments
c14 A69-35796
Analytic approximations for application to spacecraft optical navigation system where position fixes are taken over short trajectory arcs
[NASA-TN-D-4863] c21 N69-10372
Development of optical pilot warning indicator system for aircraft detection
[NASA-TN-D-5174] c14 N69-27267
Derivation of transfer function for optical system relating image intensity to spatial autocorrelation
[NASA-CR-1443] c21 N69-38041

OPTICAL FILTERS
Rocket-borne photoelectric photometers for UV observations of Saturn, using interference filters
c30 A69-22216
Laser optical simulation of spaceborne radio astronomy interferometer experiment
[NASA-TN-D-5357] c30 N69-36892

OPTICAL MEASUREMENT
Unicellular microorganisms size and concentration estimates based on light scattering measurements of suspensions in spectrophotometer cuvette compartment
c04 A69-25643
Manual procedures for midcourse and terminal guidance, discussing onboard optical measurements and calculations
c21 A69-35792
Optical measurements on secondary satellite for determining perturbation parameters of orbiting spacecraft
[NASA-CR-1412] c30 N69-35513

OPTICAL MEASURING INSTRUMENTS
Optical carrier single channel telemetry system providing complete electrical isolation between shock tube data acquisition and data recording instrumentation
c14 A69-29561
Indirect optical viewing system in F-104B for simulated lifting-body approach and landing tasks
[NASA-TN-D-5299] c14 N69-29730
Electro-optical instrument for measuring pointing direction of human eye
[NASA-CR-1422] c05 N69-39212

OPTICAL PATHS
Statistical correlation between optical microwave propagation reliability, fade margin, path

length, and geographic location
[NASA-CR-1442] c07 N69-39282
OPTICAL PROPERTIES
Diffusion pump oil reflectance and absorption coefficients measured in three thicknesses using light source, monochromator and detector
c23 A69-23647
Optical properties and chemical analysis of contaminants on Gemini spacecraft windows
[NASA-TN-D-4916] c31 N69-13232
Horizon radiance profile analysis for determining atmospheric temperature
[NASA-TN-D-5068] c13 N69-19024
Prediction methods for angular line-of-sight deviations induced by spacecraft window
[NASA-TN-D-5238] c21 N69-31227
Preflight optical evaluation of right hand hatch windows in Gemini missions 7, 8, 9, and 12
[NASA-TN-D-5471] c31 N69-40813
OPTICAL PUMPING
Time dependent emission spectra from flashlamp pumped organic dye lasers recorded with image converter, comparing dyes characteristics
c16 A69-17901
Microwave and optical generation and amplification - Conference, Hamburg, September 1968
c09 A69-18420
Low energy ultrafast flashlamp systems as optical pumps for lasers using fast decaying fluorescent materials /organic dyes/
c16 A69-42187
OPTICAL RADAR
Optical radar studies of lower atmosphere, giving Mie theory calculations of clear atmosphere volume backscattering cross sections for four laser wavelengths
c07 A69-27001
GaAs laser tracking system for space guidance, describing equipment and operations
[AIAA PAPER 69-870] c21 A69-39396
OPTICAL REFLECTION
Reflection and transmission measurements on as grown surfaces of tetracyanoquinodimethan, obtaining optical constants by Kramer-Kronig method
c26 A69-35477
Photomultiplier tubes performance enhancement by light incidence on photocathode at oblique angles explained by reflection
c23 A69-42194
OPTICAL RESONANCE
Minimization of optical resonance scattering by adjustment of monochromator slit geometry
[NASA-TM-X-1702] c24 N69-13210
OPTICAL SCANNERS
Scanned laser beam display techniques based on cathode ray tube technology, noting flying spot scanner and beam deflection
c14 A69-15028
Density measurements of particle tracks in nuclear emulsions utilizing digitized video scan, discussing operation and instrumentation
[IEEE PAPER 2A-7] c14 A69-19185
Visual simulation image generation using flying spot scanner
[NASA-TN-D-5151] c11 N69-23194
OPTICAL THICKNESS
Nonequilibrium nitrogen plasma spectral line intensities calculated assuming optically thin plasma
c24 A69-10960
Radiative transfer by doubling very thin layers in problem of diffuse reflection from plane-parallel atmosphere eliminates numerically solving transfer equation
c33 A69-20064
Optical depths of convection related to metal deficiency for main sequence and giant stars
c30 A69-29946
OPTICAL TRACKING
GaAs laser tracking system for space guidance, describing equipment and operations
[AIAA PAPER 69-870] c21 A69-39396
Optical simulation landing system for evaluating pilot controlled flexible parawing and Apollo capsule combination performance during landing
[NASA-TN-D-5049] c21 N69-20936
OPTICS
Damping factor automatic determination by use of second derivatives of residuals for damped least squares method of optical design
c23 A69-14295
Single and double mirror systems geometrical optical image aberrations noting focal number, angle of field, secondary magnification and mutual position tolerances
c23 A69-24836
OPTIMAL CONTROL
Optimal stochastic control of small dynamic systems described by random differential equations, noting selective bibliography on several subjects
c10 A69-14697
Optimal stochastic control, discussing dynamic mathematical models described by differential equations
c10 A69-22567
Adaptive random search algorithm utilizing boundary cost-function hypersurfaces measurement to implement Pontryagin maximum principle, discussing hybrid computer use, iterative solution and convergence properties
c08 A69-33745
Minimization of unconstrained function of several variables by gradient dependent techniques, discussing applications to boundary value problems in optimal control
[AIAA PAPER 69-951] c19 A69-40333
Quadratic optimization applied to helicopter flight control design, assuming constant feedback gains and command step input with zero steady state error
c02 A69-43279
Computation of optimal branched trajectories using classical variational problem of Bolza
[NASA-CR-1331] c30 N69-24950
Optimal control method based on linear programming for satellite fuel consumption
[NASA-CR-1450] c21 N69-41036
OPTIMIZATION
Digital computers in space flight simulation and vehicle performance optimization, examining mission analysis
c30 A69-14519
Hypersonic body shaping for minimum drag and improved performance from view of flight regimes, discussing implications of pressure laws
[AIAA PAPER 69-181] c01 A69-18052
Huffman minimum redundancy coding extension to run-length information based on Poisson distribution, including optimization and data compression applications
c07 A69-36262
Filtering optimization prior to limiting digital signals in strong noise, detailing bandwidth choice of single pole low pass filter
c07 A69-39450
Minimization of unconstrained function of several variables by gradient dependent techniques, discussing applications to boundary value problems in optimal control
[AIAA PAPER 69-951] c19 A69-40333
Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion
[AIAA PAPER 69-979] c33 A69-40359
Germanium microwave backward diodes optimum design and performance prediction through computer calculation for important parameters
c09 A69-41224
Spacecraft solar cell near-maximum power operation by tracking optimum value with array temperature sensor
c03 A69-42303
Materials research structural design cycle, discussing simultaneous optimization, constituent materials, fabrication process, load environment and mission constraints
c32 A69-42991
Optimum thickness of dynamically stable composite superconducting tapes determined for substrate thickness as function of current density
c26 A69-43121
Optimum design of binary phase shift keyed communication links with noisy phase reference
[NASA-TN-D-4895] c07 N69-13155

Variational methods for determining optimum design and flight of rockets
[NASA-TR-R-297] c31 N69-15374
FORTRAN program for radiation shield optimization using steepest descent method
[NASA-TM-X-1769] c22 N69-20854
Analytical solutions of optimum orbit modifications
[NASA-CR-1379] c30 N69-31362
Optimal structural design for sandwich-shaped and ring-stiffened loaded shells of revolution
[NASA-CR-1424] c32 N69-35515
Optimum structural design for Martian entry capsule configurations
[NASA-CR-1414] c33 N69-35516
Optimal rendezvous and transfers between close elliptical orbits
[NASA-TT-F-554] c30 N69-40592

ORBIT CALCULATION
Autonomous solution to orbital navigation problem yielding direct measure of orbital parameters
c21 A69-11005
Lunar Orbiter mission objectives and orbit design
[AIAA PAPER 68-47] c30 A69-15503
Impulsive orbit transfer optimization using accelerated gradient program based on Newtonian algorithm for digital computer method
c30 A69-35956
Hansen method applied to Jupiter tenth satellite orbit correction and perturbations, describing computer program and formulas used
c30 A69-37529
Encke type analytical-numerical integration for solving differential equations of modified set of Lagrange planetary equations, obtaining satellite ephemeris for orbit prediction
[AIAA PAPER 69-908] c30 A69-39340
Thrust requirements for correcting Keplerian orbits with interplanetary guidance application
[NASA-TN-D-4945] c21 N69-14399
Accuracy and speed comparison between drag-free and numerical satellite orbit prediction methods
[NASA-TN-D-5203] c30 N69-26252
Optical measurements on secondary satellite for determining perturbation parameters of orbiting spacecraft
[NASA-CR-1412] c30 N69-35513
Unified form of Lambert theorem valid for orbits
[NASA-TN-D-5368] c30 N69-36930

ORBIT PERTURBATION
Geopotential resonant orbital perturbations of existing satellites, noting high inclination role
c31 A69-13777
Perturbative effects of Jupiter moons on spacecraft flyby and postencounter heliocentric trajectories, noting precision targeting
[AIAA PAPER 69-932] c30 A69-39361
Thrust requirements for correcting Keplerian orbits with interplanetary guidance application
[NASA-TN-D-4945] c21 N69-14399
Vinti dynamic problem relevance to prediction of satellite orbits using differential and integral equations
[NASA-TR-R-307] c30 N69-22948
Legendre polynomials for gravitational field and orbit perturbation
[NASA-TN-D-5163] c13 N69-26969
Semianalytic theory for lunar satellite motion including perturbative effects
[NASA-TN-D-5043] c30 N69-28050
Optical measurements on secondary satellite for determining perturbation parameters of orbiting spacecraft
[NASA-CR-1412] c30 N69-35513
Direct and indirect planetary perturbation effects on motion of natural satellites
[NASA-TN-D-5284] c30 N69-37893

ORBITAL ASSEMBLY
Configurations for extravehicular activity work platforms for astronaut use in orbital assembly
[NASA-CR-1361] c31 N69-26993

ORBITAL ELEMENTS
Thrust requirements for correcting Keplerian orbits with interplanetary guidance application
[NASA-TN-D-4945] c21 N69-14399
Application of Hansen lunar theory to 10th satellite of Jupiter
[NASA-TN-D-4979] c30 N69-14479

ORBITAL LAUNCHING
Nuclear solid core rocket engine performance for interplanetary orbital launch of spacecraft by multiorbit injection
[AIAA PAPER 69-535] c22 A69-32660

ORBITAL MECHANICS
Hansen planetary theory basic function, discussing perturbations expansion into trigonometric series
c30 A69-13781
Numerical analysis of periodic solutions of restricted three body problem in sun-Jupiter system, noting genealogy of periodic orbits
c30 A69-19874
Gravitational and magnetic torque effect on rotational motion of triaxial rigid body in regressing orbit about oblate primary mass
c30 A69-32240
Short term motion of lunar satellite, discussing third body disturbing functions and perturbation solution of nonsingular orbit elements
c30 A69-35934
Encke type analytical-numerical integration for solving differential equations of modified set of Lagrange planetary equations, obtaining satellite ephemeris for orbit prediction
[AIAA PAPER 69-908] c30 A69-39340
Satellites resonant perturbations analysis, deriving mean mean motion formulas
c31 A69-39968
Effect of gravitational model variations on accuracy of lunar orbit determination from data arcs
[NASA-TN-D-5105] c30 N69-21018
Vinti dynamic problem relevance to prediction of satellite orbits using differential and integral equations
[NASA-TR-R-307] c30 N69-22948
Longitudinal dynamics of lifting vehicle in orbital flight
[NASA-CR-1449] c30 N69-40062

ORBITAL SPACE STATIONS
Future space programs as governed by cost limitations, suggesting development of economical launch vehicle for shuttling between earth and orbital space stations
c30 A69-12680
Manned space stations for future space exploration, discussing earth-like environment, artificial gravity, human factors and time dependence
c30 A69-25644
Space manufacturing operations program, discussing zero gravity effect during earth orbit flight, Apollo Applications Program Orbital Workshop Flight 2, etc
c31 A69-35067
Navigation, guidance and control developments for manned space missions, discussing earth orbital exploration bases
c21 A69-35801
Earth-orbiting manned space station as single facility base for power, volume, logistics, experimental equipment and data communications
c31 A69-36464
Mass expulsion and momentum systems for orbiting space station attitude control optimized, considering reaction jet and control moment gyro systems
[AIAA PAPER 69-846] c31 A69-39376
Apollo 11 mission and future space exploration prospects including moon base, manned space station, reusable shuttle vehicles, etc
c30 A69-41477
Apollo Applications Program /AAP/ spacecraft, describing contributions to space station engineering
[AAS PAPER 69-491] c31 A69-42838
Simulated manual package transfer in weightless environment of Saturn Orbital Space Station
[NASA-TN-D-5111] c05 N69-21501
Manned space flight capabilities for lunar and planetary explorations and earth orbiting stations
[NASA-SP-196-VOL-1] c34 N69-22510

ORBITER PROJECT
NASA Lunar Orbiter Program of lunar photography from orbiting spacecraft
c30 A69-38377

ORBITS
Comparison of class of orbits in Earth-Moon field and class of Kepler orbits in rotating coordinates by use of concurrent series of graphs
[NASA-TN-D-4903] c30 N69-10470
Analytical solutions of optimum orbit modifications
[NASA-CR-1379] c30 N69-31362
Unified form of Lambert theorem valid for orbits
[NASA-TN-D-5368] c30 N69-36930

ORDER-DISORDER TRANSFORMATIONS
Order-disorder transitions in solid hydrogen, discussing model to explain molecular rotation angular momentum operator fluctuations
c23 A69-43119

ORGANIC COMPOUNDS
Regenerative life support system development, considering synthesized organic compounds and microorganisms as foods for long duration space missions
c04 A69-37623
Electrochemical evaluation of electrode organic electrolyte combinations for rechargeable battery systems
[NASA-CR-1434] c03 N69-36829
Physical density and enzyme activity in coacervate biogenic molecular compounds
[NASA-TT-F-525] c04 N69-40324

ORGANIC LASERS
Organic dye laser frequency variation with temperature, noting absorption and fluorescence spectra
c16 A69-12617
Time dependent emission spectra from flashlamp pumped organic dye lasers recorded with image converter, comparing dyes characteristics
c16 A69-17901
Low energy ultrafast flashlamp systems as optical pumps for lasers using fast decaying fluorescent materials /organic dyes/
c16 A69-42187

ORGANIC LIQUIDS
Feasibility tests on liquid lubricants for inerted lubrication systems of advanced aircraft engines
[NASA-TN-D-5420] c15 N69-35788

ORGANIC MATERIALS
Gas chromatographic and mass spectrometric analyses of alicyclic hydrocarbons from Carboniferous organic materials, noting alkane distribution and evolutionary histories
c06 A69-34184

ORGANIZATIONS
Communication in large organizations, describing internal communication model
c34 A69-42930

ORGANOMETALLIC COMPOUNDS
Optical absorption coefficients for triphenylmethylarsonium tetracyanoquinodimethan complex single crystal, evaluating reflectance
c26 A69-10934

ORIENTATION
Feasibility of using roll and yaw compensation to reduce inclination error of Scout launch vehicle
[NASA-CR-1209] c31 N69-16221

ORIFICE FLOW
Discharge nozzle coefficients for thick plate orifices with approach flow perpendicular and inclined to orifice axis
[NASA-TN-D-5467] c12 N69-38012

ORTHOGONAL FUNCTIONS
First-order solutions for mutual coupling between waveguides which propagate two orthogonal modes
[NASA-TN-D-5180] c07 N69-24051

ORTHOSTATIC TOLERANCE
Artificial heat acclimatization effect on orthostatic tolerance in man exposed to stresses of heat, exercise and dehydration
c05 A69-32810

ORTHOTROPIC SHELLS
Finite element method for computing natural frequencies and mode shapes of thin shells of revolution
[NASA-TN-D-4972] c32 N69-16469

OSCILLATING FLOW
Amplified boundary layer oscillations and transition at swept flat nosed wing attachment line with/without boundary layer suction analyzed by wind tunnel tests
c01 A69-33251

OSCILLATION DAMPERS
Time varying resistance wire to arrest oscillations in pulsed capacitor discharge circuit, deriving over, under and critical damping conditions
c09 A69-41228

OSCILLATIONS
Individual properties of RR Lyrae stars
[NASA-TT-F-562] c30 N69-27169
Oscillations in pulse modulated satellite attitude control systems
[NASA-CR-1369] c21 N69-29967
Analytical model for use in design of pump inlet accumulators for prevention of liquid rocket longitudinal oscillation
[NASA-TN-D-5394] c28 N69-33319
Magnetothermal oscillations in pressure annealed pyrolytic graphite
[NASA-TN-D-5488] c26 N69-39239

OSCILLATORS
Small signal and saturation characteristics for X band cyclotron resonance oscillator, discussing device design and configuration
c09 A69-22786
Fluidic oscillator use as molecular weight sensor for gas mixtures
[NASA-TM-X-1698] c03 N69-13246
Cyclotron resonance oscillators as sources of millimeter waves
[NASA-TN-D-5237] c10 N69-28121

OSEEN APPROXIMATION
Nature of outside boundary layer on liquid sphere in steady, uniform stream
[NASA-CR-1362] c12 N69-24877

OSMOSIS
Transient electro-osmosis of water in capillary tubes for pumping and generation modes, analyzing response to step change in pressure or voltage change under external loading
c06 A69-14862
Osmotically induced coalescence of sarcoma cells through intercellular bridges in vitro
[NASA-TN-D-5022] c04 N69-17782

OSO-C
Solar extreme UV, soft and hard solar X rays, cosmic X rays and gamma rays, cosmic ray particles and near earth visible radiation observed by OSO-3
c29 A69-22167
Solar X ray and extreme UV spectra during flares, attributing intense emissions to optical transitions
c29 A69-22169

OUTGASSING
Leak rate measurement accuracy of rate-of-rise technique for nitrogen, methane and He between millionth and thousandth torr
c14 A69-32326
Rate of rise outgassing measurement technique in vacuums
[NASA-TN-D-4973] c14 N69-16097
Thermal outgassing tests on epoxy impregnated magnet coil
[NASA-TM-X-1813] c18 N69-28203

OUTPUT
Problem of identifying input-output of pilot by measuring data from flight tests with pilot providing feedback control
[NASA-TN-D-5127] c05 N69-23842

OVERPRESSURE
Design method for far field sonic boom shock strength and impulse independent of body length and volume
[NASA-TN-D-5148] c01 N69-23927

OXIDATION
Oxygen concentration effects on oxidation of synthetic paraffinic and type II ester lubricants determined from ball bearing tests at 400 and 450 degrees F
c15 A69-35177
Oxidation behavior of coated molybdenum and niobium alloys in high temperature supersonic air streams
[NASA-TN-D-4877] c17 N69-10764
Flow reduction due to oxidation of wire-form porous materials for transpiration cooled turbine blades
[NASA-TN-D-5001] c17 N69-16383

Protective coatings for chromium alloys for use in advanced air breathing applications
[NASA-TN-D-5157] c17 N69-23084
Dynamic creep model to determine oxidation effects on high temperature deformation of nickel
[NASA-TN-D-5266] c17 N69-27061
Hydration, oxidation, and origin of calc-alkali differentiation series of igneous rocks
[NASA-TN-D-5400] c13 N69-40893
OXIDATION RESISTANCE
Columbium alloys properties, discussing creep strength, oxidation resistance, costs, production, etc
c17 A69-18791
Ductile metal clads and coatings of silicides, aluminides and noble metals to protect Cr alloys against nitrogen embrittlement and air oxidation
c17 A69-26495
Boron nitride and boron nitride composite under high temperatures in air and vacuum for various time periods, discussing thermal shock and oxidation resistance
c18 A69-36208
Examination of thermal oxidation deposits on heat resistant alloys using X ray diffraction and X ray fluorescence analyses
[NASA-TN-D-5019] c17 N69-17277
Oxidation resistance and thermal fatigue cracking of nickel and cobalt base alloys in transonic gas streams
[NASA-TN-D-5376] c17 N69-33307
Corrosion and heat resistant coatings for oxidation protection of tungsten
[NASA-TT-F-583] c17 N69-35836
Three oxidation-resistant alloy foil claddings for protecting typical gas turbine engine alloys of nickel and cobalt
[NASA-TN-D-5483] c17 N69-38794
OXIDES
Oxide composition of silicate spherules from forest area devastated by Tunguka meteorite explosion using electron microprobe analysis
c30 A69-28869
Rare earth fluorides and oxides used as solid lubricants at high temperatures
[NASA-TN-D-5301] c15 N69-29568
OXYGEN
Oxygen concentration effects on oxidation of synthetic paraffinic and type II ester lubricants determined from ball bearing tests at 400 and 450 degrees F
c15 A69-35177
Ge films formation by evaporation technique, discussing background O pressure effect
c26 A69-43345
Absorption rate sticking probabilities for oxygen on niobium and dilute niobium-zirconium alloys
[NASA-TN-D-4885] c17 N69-10931
Evaluation of various laboratory determination of oxygen in potassium and sodium
[NASA-TN-D-4971] c06 N69-14180
Solubility of oxygen in tantalum determined by resistivity technique
[NASA-CR-1276] c17 N69-19886
Vacuum distillation determination of oxygen in lithium
[NASA-TN-D-5197] c06 N69-23706
Controlled oxygen additions to refractory metal alloys
[NASA-TM-X-1799] c17 N69-26952
Rapid computation of equilibrium, chemical composition, and thermodynamic properties of argon-oxygen-hydrogen gas system
[NASA-TN-D-5416] c33 N69-36299
OXYGEN ANALYZERS
Vacuum distillation determination of O in Li, evaluating accuracy through O additions and recoveries, method blank and residue identification
c06 A69-40932
OXYGEN ATOMS
Atomic oxygen density role in ionospheric E and F region magnetic stability, noting heat loss effect of atomic excitation
c13 A69-32314
OXYGEN CONSUMPTION
Oxygen depletion effect in chemical reactions between pyrolysis gases and air stream on surface recession of charring ablators
[AIAA PAPER 68-302] c33 A69-21982
Real time metabolic rate analysis of suited astronaut using heart rate and O methods during thermal vacuum and extravehicular mobility tests
[AIAA PAPER 69-993] c05 A69-40371
OXYGEN FLUORIDES
Specific impulse deliverable performance of space storable propellant combination fluorine-oxygen/methane and oxygen difluoride/diborane
[AIAA PAPER 69-505] c28 A69-32762
OXYGEN METABOLISM
Respiratory system and oxygen metabolism regulation in man and animals
[NASA-TT-F-501] c04 N69-31401
OXYGEN REGULATORS
Respiratory system and oxygen metabolism regulation in man and animals
[NASA-TT-F-501] c04 N69-31401
OXYGEN SUPPLY EQUIPMENT
Water electrolysis, discussing oxygen generators for spacecraft prototype cells and testing
c05 A69-12987
Oxygen supply inert diluent impurities effect on hydrogen-oxygen fuel cell performance
c03 A69-15310
Lithium peroxide utilization feasibility for oxygen supply and carbon dioxide control in extravehicular portable life support systems
[AIAA PAPER 69-620] c05 A69-33303
Solid electrolyte electrolysis of carbon dioxide and water as oxygen regeneration system for long manned space flights
[NASA-CR-1359] c05 N69-28099
OXYGEN TENSION
High oxygen concentration breathing effect on foveal thresholds, using sea level tests on trained observers
c05 A69-12216
High oxygen tension effect on transport and incorporation of exogenous leucine and protein synthesis in Pseudomonas saccharophila cells
c04 A69-13433
OXYGENATION
Oxygen concentration effects on synthetic paraffinic oil lubricant performance in high temperature bearing tests
[NASA-TN-D-5152] c15 N69-26314
OZONOMETRY
Atmospheric ozone vertical distribution and total amount determined by radiative transfer and perturbation theory, presenting error analysis
c13 A69-28493
OZONOSPHERE
Atmospheric ozone vertical distribution and total amount determined by radiative transfer and perturbation theory, presenting error analysis
c13 A69-28493

P

P-N JUNCTIONS
Radiation damage and recovery of lithium-diffused silicon p-n solar cells, measuring photovoltaic parameters as function of gamma radiation fluence
c03 A69-35694
Potential electrical response of p-n junction to mechanical strain
[NASA-CR-1366] c26 N69-29724
Effects of nickel on performance of n on p silicon solar cells
[NASA-TN-D-5366] c03 N69-31844
P-N-P-N JUNCTIONS
Four terminal silicon planar p-n-p-n model operating as semiconductor small signal linear tetrode amplifier, discussing properties and mathematical models
c09 A69-35293
P-TYPE SEMICONDUCTORS
Strong p-type conductivity of silicon doped with beryllium by thermal diffusion, giving electrical and optical measurements
c26 A69-21652
PACIFIC OCEAN
Survey of six year period of satellite observed tropical Pacific cloud mapping
c20 A69-33001
PACKAGING
Astronaut feeding in space and NASA criteria for

space foods, eliminating foods in metal tubes and directing development efforts to dehydrated foods
c05 A69-31459

PACKINGS (SEALS)
Torque and leakage rates of various lubricated lip seal designs at peripheral velocity of 120 feet per second
[NASA-TN-D-5411] c15 N69-35769

PADE APPROXIMATION
Existence theorem using Pade approximation and matrices
[NASA-CR-1319] c19 N69-26248

PAINTS
Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion
[AIAA PAPER 69-979] c33 A69-40359
Investigation of SA-501 S-4B auxiliary propulsion system anomalies
[NASA-TN-D-5207] c28 N69-26224

PAIR PRODUCTION
Quantum theory of electron gas with anomalous magnetic moments in intense magnetic fields, noting pair creation from thermodynamic energy in system
c24 A69-19782
Lower auroral ionosphere rocket measurements of electrons, positive ions and energy particles, deriving height variation of ion pair production and ion-ion recombination
c13 A69-32187

PALEONTOLOGY
Gas chromatographic and mass spectrometric analyses of alicyclic hydrocarbons from Carboniferous organic materials, noting alkane distribution and evolutionary histories
c06 A69-34184

PALLADIUM
Deuterium concentration effect on electrical resistivity of palladium-deuterium system
[NASA-TN-D-4970] c26 N69-14565
Comparison of extraction procedures using 1-nitroso 2-naphthol and dimethylglyoxime for spectrophotometric determination of palladium in titanium alloys
[NASA-TM-X-1767] c06 N69-20801
Absorption of hydrogen by palladium and electrical resistivity of hydrogen-palladium system
[NASA-TN-D-5441] c26 N69-37272

PANEL FLUTTER
Flutter design charts for isotropic panels stressed to verge of buckling for typical values of structural damping
c32 A69-25524
Effects of structural damping on flutter of stressed panels
[NASA-TN-D-4990] c32 N69-16091
Flutter investigation at Mach 3 of rotationally restrained panels and comparison with theory
[NASA-TN-D-5508] c32 N69-40087

PARA HYDROGEN
Solid para hydrogen coated graphite particles expulsion into interstellar medium from star formation regions, considering mantles stability and particles extinction efficiency, albedo and phase function
c30 A69-37492

PARABOLIC ANTENNAS
Parabolic antenna properties generated by dual band circularly polarized focused two channel monopulse feed system, discussing tracking data from helicopter, Apollo 8 and Cassiopeia A
c07 A69-41752

PARABOLIC REFLECTORS
Parametric analysis of surface temperatures and distortions of paraboloidal solar concentrators
[NASA-TN-D-5144] c03 N69-23356

PARACHUTE DESCENT
NASA planetary entry parachute program for rocket launched and balloon deployment tests
[AIAA PAPER 68-934] c02 A69-35952
Experimental verification of scale factors for parawing opening characteristics with dimensional ratios from 1/1.3 to 1/3
[NASA-TN-D-5071] c02 N69-19950
Parachute load distribution measurements with tensiometer during low altitude drop tests
[NASA-TM-X-1832] c14 N69-32682

PARACHUTE FABRICS
Mission sequential environment effects on Dacron parachute material mechanical properties
[AIAA PAPER 69-1018] c11 A69-40390

PARACHUTES
Equation of motion for predicting dynamic behavior of parachute payload system
[NASA-TN-D-4859] c02 N69-14504
Wind tunnel tests of inflatable disk-gap-band and modified ringsail parachutes at low dynamic pressure
[NASA-TM-X-1786] c01 N69-23538
Flight test performance of supersonic parachutes in low density environment
[NASA-TN-D-5296] c01 N69-30063

PARAFFINS
Steel ball bearing high temperature fatigue life tested with synthetic paraffinic oil, fluorocarbon and polyphenyl ether
[ASME PAPER 69-LUBS-18] c15 A69-34378
Oxygen concentration effects on oxidation of synthetic paraffinic and type II ester lubricants determined from ball bearing tests at 400 and 450 degrees F
c15 A69-35177
Oxygen concentration effects on synthetic paraffinic oil lubricant performance in high temperature bearing tests
[NASA-TN-D-5152] c15 N69-26314

PARALLEL PLATES
Admittance of parallel plate waveguide aperture with infinite flange illuminating metal sheet, using wedge diffraction theory and integral transform method
c09 A69-12328
Reflection coefficient of symmetric parallel plate waveguide operating in TEM mode illuminating lossless dielectric layer, using wedge diffraction and geometrical optics methods
c09 A69-34802
Omnidirectional microwave parallel plate waveguide fed antenna design for flush mounted broadband spacecraft, noting equatorial and polar patterns
c09 A69-40697
Admittance of parallel plate aperture illuminating displaced dielectric-dielectric boundary
[NASA-TN-D-5038] c07 N69-19114
Symmetric parallel plate waveguide reflection coefficient analyzed
[NASA-CR-1327] c07 N69-24059
Slope diffraction analysis of TEM parallel plate guide patterns
[NASA-CR-1326] c07 N69-26273

PARAMETERIZATION
Real helium hypersonic flow parameters for pressures to 3600 atmospheres and temperatures to 15,000 deg K applicable to hotshot type wind tunnels
[NASA-TN-D-4869] c12 N69-10443

PARAMETRIC AMPLIFIERS
Hybrid integrated parametric amplifier design considerations for fabrication in microstrip transmission line
c09 A69-10193
Error analysis of input noise temperature measurements of low noise amplifiers
[NASA-TN-D-4997] c07 N69-16162
Pressurized liquid nitrogen inside parametric amplifier structures for input, noise, and temperature improvements
[NASA-TN-D-5509] c09 N69-40079

PARAWINGS
Flexible parawing lifting decelerator research data from wind tunnel and flight tests, noting manned space vehicle recovery and aircraft escape systems
[AIAA PAPER 68-967] c02 A69-43715
Wind tunnel tests of opening characteristics of all flexible parawing
[NASA-TN-D-5031] c02 N69-17700
Experimental verification of scale factors for parawing opening characteristics with dimensional ratios from 1/1.3 to 1/3
[NASA-TN-D-5071] c02 N69-19950
Optical simulation landing system for evaluating pilot controlled flexible parawing and Apollo capsule combination performance during landing
[NASA-TN-D-5049] c21 N69-20936

Wind tunnel investigation of twin keel parawing aerodynamic characteristics
[NASA-TN-D-5199] c01 N69-23781
PARKING ORBITS
Two burn spacecraft trajectories for escaping earth parking orbit
[NASA-TN-D-5011] c30 N69-17305
PARTIAL DIFFERENTIAL EQUATIONS
Boundary conditions for Tricomi equation in symmetric positive form, showing analytical and finite difference solutions
c19 A69-42792
PARTICLE ACCELERATION
Solar cosmic radiation, particle acceleration, energetic particles as sample of sun and propagation of particles from sun tc earth
c29 A69-12934
Rocket measurements of primary auroral particles energy spectra indicating spectral structure acceleration peaks associated with electrostatic fields
c13 A69-38490
PARTICLE ACCELERATORS
Tritium contamination reduction in small ion accelerators for neutron production, discussing pumping problems and vacuum systems
c11 A69-26499
PARTICLE COLLISIONS
Collisional theory of longitudinal wave propagation for two fluid viscous ionized plasmas formulated from coupled Maxwell and Boltzmann equations
c25 A69-20796
Extragalactic gamma ray fluxes predicted, discussing collisions, matter-antimatter annihilation and cosmological implications
c29 A69-24466
Longitudinal plasma waves collision damping calculations using Rostoker test particle method
c25 A69-34439
Cosmic X ray bremsstrahlung due to collisions of suprathermal protons with ambient electron, giving clue about diffuse sky background of X rays
c29 A69-40643
Quantum theory of particle-harmonic oscillator collision applied to gas-surface interactions at cryogenic temperatures
[NASA-TN-D-4982] c24 N69-14288
Electron-cesium atom collision probability for momentum transfer
[NASA-TM-X-1897] c24 N69-38773
PARTICLE DENSITY (CONCENTRATION)
Transmittance and absorption cross sections of carbon particles suspended in flowing stream of nitrogen gas
c33 A69-17804
Unicellular microorganisms size and concentration estimates based on light scattering measurements of suspensions in spectrophotometer cuvette compartment
c04 A69-25643
Meteoritic dust particles collections prediction in atmosphere for low and high entry fluxes
c30 A69-26342
Self contained hand held battery operated aerosol particle analyzer, measuring aerosol concentration and size distribution for laboratory and space flight applications
c14 A69-34691
Back flow density from jet plumes in vacuum
[NASA-TN-D-4978] c01 N69-14385
PARTICLE DIFFUSION
Charged particle dynamics in spiral interplanetary magnetic field model, discussing electric drift velocity, point of origin and distribution
c29 A69-14015
Equation describing statistically trapped particle motion under influence of fields varying in time and space
c29 A69-19375
Low energy solar protons entry into magnetosphere on 26 May 1967 showing diffusion control
c29 A69-31984
PARTICLE EMISSION
Solid para hydrogen coated graphite particles expulsion into interstellar medium from star formation regions, considering mantles stability and particles extinction efficiency, albedo and phase function
c30 A69-37492
Atmospheric emissions - NATO Conference, Norway, July-August 1968
c13 A69-38482
PARTICLE ENERGY
Ring current particle energy density distribution for symmetric portion of magnetic storm derived from current magnetic field profile measurements
c29 A69-11227
Inner radiation zone including data on electrons, protons and heavier particles and results from high altitude nuclear tests
c29 A69-27144
High and medium energy molecular beams - Conference, Cannes, July 1969
c24 A69-36171
Cosmic ray detectors design for medium, low and very low energy events on IMP-1 spacecraft, noting PCM format
c07 A69-41738
PARTICLE INTERACTIONS
Ion-molecule collisions of Ar-Co and N-No pairs, discussing charge exchange reaction rates and spiraling nature
c24 A69-16428
Maximum number of binary collisions for three particles with zero range forces in relativistic rescattering singularities studies
c24 A69-19788
Computer experiments on the microscopic behavior of one dimensional electrostatic plasma
[NASA-TN-D-4831] c25 N69-10471
PARTICLE MOTION
Solar cosmic radiation, particle acceleration, energetic particles as sample of sun and propagation of particles from sun to earth
c29 A69-12934
Charged particle dynamics in spiral interplanetary magnetic field model, discussing electric drift velocity, point of origin and distribution
c29 A69-14015
PARTICLE PRODUCTION
Tritium contamination reduction in small ion accelerators for neutron production, discussing pumping problems and vacuum systems
c11 A69-26499
Cosmic gamma rays spectrum from neutral pions production and decay in metagalactic cosmic ray p-p collisions, deriving models based on Einstein general relativity theory
c29 A69-40641
PARTICLE SIZE DISTRIBUTION
Mie total and differential backscattering cross sections at laser wavelengths for Junge size distribution aerosol models
c16 A69-14290
Stony meteoric particles size and velocity during passage through atmosphere
c30 A69-26341
Gaussian particle size distribution with porosity and surface irregularity corrections used to determine mean particle size of lunar surface material at Surveyor sites
c30 A69-26371
Ice clouds near IR spectral reflectivity dependence on particle size, noting application to planetary atmospheres
c13 A69-34283
Self contained hand held battery operated aerosol particle analyzer, measuring aerosol concentration and size distribution for laboratory and space flight applications
c14 A69-34691
Particle albedos and extinction cross sections computed by Mie theory showing dependence on refractivity, considering thermal radiation from cloudy planetary atmospheres
c30 A69-38255
Sorting particles by shape using sieving equipment, noting results with crushed gravel
c15 A69-38950
PARTICLE TELESCOPES
Gamma ray telescope development for balloon-borne astronomy in search for discrete gamma sources and supernova explosions
[IEEE PAPER 3A-5] c14 A69-19192
PARTICLE THEORY
Computer experiment on 9000 particle plasma to

test temporal echo theoretical prediction
c25 A69-38713
PARTICLE TRAJECTORIES
Density measurements of particle tracks in nuclear emulsions utilizing digitized video scan, discussing operation and instrumentation
[IEEE PAPER 2A-7] c14 A69-19185
Trapped particles drift velocity in time dependent meridional magnetic and perpendicular electric field
c25 A69-20809
PARTITIONS (MATHEMATICS)
Partition coefficients between natural melts and plagioclase phenocrysts determined for rare earth elements and barium by mass spectrometry
c13 A69-20944
PATHOLOGICAL EFFECTS
Adaptation to hypoxia, acclimatization, and conditioning in human and animal subjects from Space Biology collection
[NASA-TT-F-580] c04 N69-32131
PAYLOAD MASS RATIO
Nuclear rockets as Saturn 5 third stages, emphasizing increased payload or velocity utility and resulting engine and stage requirements
[AIAA PAPER 69-555] c31 A69-31849
PAYLOADS
Onboard SDP-3 computer data system core for IMP spacecraft, considering payload
c08 A69-13243
Manned spacecraft developments, considering Apollo Applications Program, space station establishment, space shuttle operations and payload cost
c31 A69-22866
Balloon flights with space available for secondary experiments, discussing launching agencies and experiment design restrictions
c02 A69-40807
Equation of motion for predicting dynamic behavior of parachute payload system
[NASA-TN-D-4859] c02 N69-14504
PCM TELEMETRY
PCM bit synchronizer/signal conditioners performance characteristics and specification
c09 A69-19120
Spectral null from spectral characteristics and statistical properties of PCM signals used to estimate SNR
c07 A69-19122
Ground data handling equipment characteristics for PCM telemetry link utilizing convolutional coding
c07 A69-36267
Stored program data processor used as PCM telemetry data acquisition system for postApollo applications, considering format and bit rate changes
c07 A69-36280
PEGASUS SATELLITES
Pegasus and Explorer 23 detector panels calibrated by determining particle perforation mass and velocity
[NASA-TR-R-321] c14 N69-36985
PENETRATION
Force penetration characteristics of sand horizontally penetrated by various geometrically shaped models
[NASA-CR-1252] c18 N69-14764
Containment vessel leakage due to penetrations
[NASA-TM-X-1735] c22 N69-17701
Gaseous jet interaction and penetration in supersonic flow
[NASA-CR-1386] c12 N69-32480
Penetration flux calculation for multiwall structure on Lunar Orbiter spacecraft missions
[NASA-TN-D-5455] c32 N69-41229
PEPTIDES
Substrate specificity of cathepsin C derived from rat liver, describing polymeric structure and behavior as acidic protein
c04 A69-37577
PERFORATED PLATES
Numerical analysis of shock control by using perforated walls in internal compression supersonic inlets
[NASA-TR-R-317] c01 N69-32338
PERFORMANCE
Large scale axisymmetric inlet systems performance capabilities, reviewing theoretical and experimental programs
[AIAA PAPER 68-580] c28 A69-34018
Noncavitating and cavitating performance of low area ratio water jet pumps having throat lengths of 3.54 diameters
[NASA-TN-D-5095] c03 N69-20797
Performance characteristics of 14.3 kVA modified Lundell alternator for 1200 Hz Brayton cycle space power system
[NASA-TN-D-5405] c03 N69-35537
PERFORMANCE PREDICTION
Jet pump head rise deterioration parameter for prediction of cavitation
c12 A69-15791
Performance boundaries of space propulsion systems containing nuclear electric stages
[AIAA PAPER 69-249] c22 A69-21249
SERT 2 thrustor system performance over expected mission parameters, noting operational lifetime excess over mission requirements
[AIAA PAPER 69-235] c28 A69-21255
Supersonic compressor blade sections performance prediction near maximum pressure ratio and efficiency by analyzing flow processes
[AIAA PAPER 69-522] c28 A69-32711
Nuclear powered surface effects machine performance estimates, calculating reactor power and payload fraction for various clearance heights, gross weights and velocities
c22 A69-35180
Propulsion system performance relationship to manned planetary mission capability, discussing anticipated performance of advanced propulsion concepts
c28 A69-38118
Germanium microwave backward diodes optimum design and performance prediction through computer calculation for important parameters
c09 A69-41224
Analytical method for predicting performance of centrifugal pumps during pressurized startup
[NASA-TN-D-4967] c15 N69-14082
Equation of motion for predicting dynamic behavior of parachute payload system
[NASA-TN-D-4859] c02 N69-14504
Calculating equilibrium and kinetically limited performance using one dimensional model
[NASA-TN-D-4991] c27 N69-16153
Nonequilibrium performance of oxygen difluoride diborane rocket propellant
[NASA-TN-D-4992] c27 N69-16195
Steady state airflow and afterburning performance characteristics of four J85-GE-13 turbojet engines
[NASA-TM-X-1742] c28 N69-17781
Requirement estimates and performance predictions for Martian television experiment onboard spacecraft in three point-mass descent trajectories
[NASA-TN-D-5062] c14 N69-17944
Correlation equations for predicting gas-side heat transfer of axisymmetric rocket engine nozzles
[NASA-TM-X-1748] c33 N69-18898
Dynamic analysis and maximum stepping rate prediction for permanent magnet motor
[NASA-TN-D-5094] c03 N69-20780
Design and performance prediction of calorimetric apparatus for measuring total hemispherical emittance of materials
[NASA-TN-D-5106] c14 N69-20941
Accuracy and speed comparison between drag-free and numerical satellite orbit prediction methods
[NASA-TN-D-5203] c30 N69-26252
Design effects on performance of two dimensional mixed-compression supersonic inlets with low angle cowls
[NASA-TN-D-5330] c01 N69-30060
Predicting human performance in space environments
[NASA-CR-1370] c05 N69-30168
Performance estimates of high speed peripheral jet nuclear powered ground effects machine
[NASA-TM-X-1888] c22 N69-36757
Multistage turbocompressor simulation applied to performance prediction of axial flow instabilities
[NASA-TM-X-1880] c28 N69-36998

Creep rupture data for predicting thermal fatigue cracking of turbine blades or disks
[NASA-TN-D-5489] c32 N69-39393
Performance prediction for fast reactor with axially moving reflector control system
[NASA-TM-X-1911] c22 N69-40061
PERFORMANCE TESTS
Rhenium-niobium cylindrical thermionic converters with mechanically polished or electroetched emitters, comparing performance
c03 A69-13126
Optical design of Wolter type 1 glancing incidence X ray telescope for 6-100 A wavelength region, describing results of laboratory and rocket flight tests of prototype
c14 A69-21087
Segmented anode, carbon dioxide-hydrogen performance and hollow cathode erosion tests on low power MPD arc thrustor, noting current measurements
[AIAA PAPER 69-242] c28 A69-21236
Research and development program in annular slit colloid thrustor technology, proving thrustor feasibility by performance tests
[AIAA PAPER 69-287] c28 A69-21257
Thermionic converters with chloride and fluoride vapor deposited tungsten emitters, comparing performance characteristics and stability
c03 A69-21819
Turbine stator blade performance determination from total pressure surveys downstream of blade row, noting problems in pressure measurement
[ASME PAPER 69-GT-103] c01 A69-22521
Radial inflow gas turbine engine performance testing, discussing instrumentation, recording systems and calibration techniques
[ASME PAPER 69-GT-104] c14 A69-22522
Apollo optics system ground and flight performance tests results, suggesting possible design changes for sunlit space environments
c14 A69-35796
Aerodynamic performance tests of autorotative unpowered rotor entry vehicle model at various Mach numbers and angles of attack
[AIAA PAPER 68-950] c01 A69-37155
Guidance and navigation flight tests, demonstrating system performance improvements by onboard inertial system communicating with external navigation aid
[AIAA PAPER 69-842] c21 A69-39429
Photomultiplier tubes performance enhancement by light incidence on photocathode at oblique angles explained by reflection
c23 A69-42194
Variable stator area effect on performance of single stage turbine suitable for air cooling
[NASA-TM-X-1697] c01 N69-10558
Blast shields testing
[NASA-TN-D-4894] c11 N69-10888
Design point performance of double containment tantalum and stainless steel mercury boiler for SNAP 8
[NASA-TN-D-4926] c33 N69-12739
Performance of bipropellant fractional-pound rocket thrustor
[NASA-TM-X-1699] c28 N69-13237
Performance evaluation of tandem rotor blade of single stage turbine
[NASA-CR-1254] c01 N69-13621
Performance tests of wind tunnel model inlet for bleed system back pressure and porous area effect of axisymmetric compression
[NASA-TM-X-1710] c01 N69-14075
High performance light weight electrodes for hydrogen oxygen fuel cells
[NASA-CR-1216] c03 N69-14397
Design and performance of flueric shock position sensor for mixed compression supersonic inlets
[NASA-TM-X-1733] c14 N69-16382
Experimental and analytical study of dynamics of single tube counterflow boiler
[NASA-CR-1230] c12 N69-17751
Water electrolysis rocket engine performance tests
[NASA-TM-X-1737] c28 N69-19017
Performance test from Mach 2.58 to 1.98 of axisymmetric mixed-compression inlet system with 60 percent internal contraction
[NASA-TM-X-1739] c01 N69-19130
Performance tests of SNAP 8 lubrication and cooling subsystem
[NASA-TM-X-1731] c03 N69-20828
Performance testing of SNAP 8 experimental power system
[NASA-TM-X-1732] c03 N69-20868
Flight performance of PW-4D solid propellant rocket motor on third stage of Delta 50 launch vehicle
[NASA-TN-D-4987] c28 N69-20876
Results of endurance tests of SNAP 8 turbine alternator
[NASA-TM-X-1741] c03 N69-20913
Lubrication performance and thermal shear degradation of polyphenyl ethers and refined mineral oils in high temperature vane pump loop
[NASA-TN-D-5096] c15 N69-20938
Performance of two stage axial flow turbogenerator with gas bearing rotor support system
[NASA-CR-1290] c03 N69-21771
Design and performance of gas bearing system for turboalternators
[NASA-CR-1291] c15 N69-21772
Performance and cavitation damage to axial flow pump rotor blades in high temperature liquid sodium
[NASA-TN-D-5138] c15 N69-21773
Tests of bending strength on full scale model of Atlas LV-3C booster
[NASA-TN-D-5156] c31 N69-22937
Effects of temperature and electrolyte concentration on performance of fuel cell
[NASA-TN-D-5154] c03 N69-22940
Performance tests on liquid metal pumps for sodium potassium loops
[NASA-TM-X-1765] c15 N69-22970
Wind tunnel tests of inflatable disk-gap-band and modified ringsail parachutes at low dynamic pressure
[NASA-TM-X-1786] c01 N69-23538
Load and stiffness characteristics of rotating externally pressurized air journal bearings
[NASA-TN-D-5191] c15 N69-27078
Performance of Atlas-Agena vehicle from lift off through Agena posigrade maneuver
[NASA-TM-X-1826] c31 N69-29594
Free flight performance characteristics of ram air inflated recovery balloons with peripheral airscoops
[NASA-TN-D-5186] c21 N69-29595
Performance of gas bearing Brayton cycle turboalternator
[NASA-TM-X-1820] c03 N69-29707
Performance tests on dynamic jettison hinge loads of Centaur nose fairing
[NASA-TM-X-1821] c32 N69-29734
Outdoor high temperature corrosion tests for aluminum alloys and titanium alloys, and stainless steels
[NASA-TN-D-5362] c17 N69-32558
Performance of turbine driven V/STOL cruise fan propulsion system at subsonic Mach numbers
[NASA-TN-D-5314] c28 N69-35526
Design, development, and testing of 1000 pound thrust FLOX-propane ablative rocket engine
[NASA-TM-X-1873] c28 N69-35847
Performance tests of jet flapped blade in six blade annular cascade
[NASA-CR-1423] c28 N69-36680
Performance of two electron bombardment thrusters with axial magnetic field and superimposed cusp magnetic field
[NASA-TN-D-5448] c28 N69-36844
Jet velocity and axial location of nozzle exit on performance of twin-jet afterbody model
[NASA-TN-D-5393] c28 N69-36932
Thermal, acoustical, and acceleration environments of XB-70 airplane crew compartment in airworthiness tests
[NASA-TN-D-5449] c25 N69-38010
Derivation of transfer function for optical system relating image intensity to spatial autocorrelation
[NASA-CR-1443] c21 N69-38041
Stator performance with cooling by air ejection from trailing edges of blades
[NASA-TM-X-1901] c03 N69-39335
Performance of radiation cooled magnetoplasmadynamic arc thrustors

[NASA-TM-X-1908] c28 N69-40058
Outlet annulus area blockage configuration effects on performance of axial flow compressor rotor
[NASA-TN-D-5506] c28 N69-40078
PERIODIC FUNCTIONS
Numerical analysis of periodic solutions of restricted three body problem in sun-Jupiter system, noting genealogy of periodic orbits
c30 A69-19874
Generalized averaging method for linear differential equations with almost periodic coefficients
[NASA-TN-D-5167] c19 N69-22988
PERIODIC VARIATIONS
Interplanetary sector structure during rising portion of 1966-1967 sunspot cycle, giving recurrence period of interplanetary field
c30 A69-28957
Periodicity of magnetothermal oscillations in pressure annealed pyrolytic graphite compared with hole carriers
c26 A69-29005
Twenty year wave in diurnal anisotropy component of galactic cosmic rays arriving at earth from asymptotic direction east of sun interpreted as magnetic reconnection
c29 A69-38098
Individual properties of RR Lyrae stars
[NASA-TT-F-562] c30 N69-27169
Statistical analysis of satellite position with tracking error inclusion
[NASA-TN-D-5259] c30 N69-30611
PERIPHERAL JET FLOW
Nuclear powered surface effects machine performance estimates, calculating reactor power and payload fraction for various clearance heights, gross weights and velocities
c22 A69-35180
Performance estimates of high speed peripheral jet nuclear powered ground effects machine
[NASA-TM-X-1888] c22 N69-36757
PERISCOPES
Indirect optical viewing system in F-104B for simulated lifting-body approach and landing tasks
[NASA-TN-D-5299] c14 N69-29730
PERMALLOYS (TRADEMARK)
Transformer for unilateral energy transfer using single domain uniaxial Permalloy film
c09 A69-39454
PERTURBATION
Thermal neutron flux perturbations in cylinders in test reactors, using regression analysis to obtain polynomials for flux perturbation, depression, self shielding factors, etc
c22 A69-38274
Prediction of thermal neutron flux perturbation effects in cylinders during irradiation tests
[NASA-TN-D-4949] c22 N69-14481
Technique for dynamically calibrating turbine flowmeters for small perturbations by means of frequency response tests
[NASA-TM-X-1736] c14 N69-17702
Characterization of pressure perturbations induced in rocket combustor by machine gun
[NASA-TN-D-5214] c33 N69-24824
PERTURBATION THEORY
Hansen planetary theory basic function, discussing perturbations expansion into trigonometric series
c30 A69-13781
Atomic Li photoionization cross sections calculated with Brueckner-Goldstone many body perturbation theory
c24 A69-17134
Spacecraft optimum low thrust trajectory analyzed by Hamilton-Jacobi perturbation theory, obtaining canonic constants of motion
c30 A69-17574
Boussinesq approximation for compressible fluids, discussing perturbation pressure and velocities and vertical scale motions
c12 A69-26013
Atmospheric ozone vertical distribution and total amount determined by radiative transfer and perturbation theory, presenting error analysis
c13 A69-28493
Correction and calculation methods for second and first order Plutonian perturbations with respect to perturbing masses, and new Pluto elements
[NASA-TT-F-491] c30 N69-14943
Correction and calculation methods for first order Plutonian perturbations with respect to perturbing masses
[NASA-TT-F-490] c30 N69-14944
Semianalytic theory for lunar satellite motion including perturbative effects
[NASA-TN-D-5043] c30 N69-28050
PETROGRAPHY
Chemical analysis and paragenesis of manganoan ilmenite from Sierran adamellite using electron microprobe
c13 A69-35977
PETROLOGY
Hydration, oxidation, and origin of calc-alkali differentiation series of igneous rocks
[NASA-TN-D-5400] c13 N69-40893
PHASE COHERENCE
Split phase PCM code modulated carrier transmission characteristics determined for amplitude, phase and frequency shift keying, assuming random bit pattern and noncoherent modulation
c07 A69-39451
PHASE DIAGRAMS
Fe-Ni-P phase diagram studies applied to schreibersite and rhabdite formation in iron meteorites
c30 A69-36132
PHASE LOCK DEMODULATORS
Phase-lock loop demodulator ability to acquire and remain locked on signal under noise and pulse interference
c10 A69-42230
PHASE MODULATION
Sinusoidal phase modulation role in spectral broadening observed in trapped filaments of laser and Raman light
c16 A69-14189
Subcarrier phase modulated single sideband sinusoidal carrier synthesis, discussing signal power ratios, signal efficiency, design sensitivity, etc
c07 A69-29489
PHASE SHIFT KEYING
Split phase PCM code modulated carrier transmission characteristics determined for amplitude, phase and frequency shift keying, assuming random bit pattern and noncoherent modulation
c07 A69-39451
Optimum design of binary phase shift keyed communication links with noisy phase reference
[NASA-TN-D-4895] c07 N69-13155
PHASE TRANSFORMATIONS
Polymer glasses low temperature transitions, relating structure and transition temperature
c06 A69-16493
Sigma phase formation and its effect on stress rupture properties of nickel base alloy IN-100
[NASA-TN-D-5185] c17 N69-23465
PHASE VELOCITY
Axial waves in blood vessels, determining phase velocities and damping, noting anisotropic behavior of artery wall
[SESA PAPER 1350] c04 A69-19726
PHASED ARRAYS
Gain measurement of two element phased array aperture antenna during ATS-C tracking
c07 A69-36254
PHENOLIC RESINS
Ablative effectiveness of low density phenolic nylon materials
[NASA-TN-D-5257] c33 N69-28440
PHENOLS
RAM-CA carbon-phenolic heat shield test in rocket engine exhaust
[NASA-TM-X-1841] c31 N69-32713
PHENYLS
Free lysine and dinitrophenyl /DNP/ derivatives determined quantitatively by ion exchange chromatography
c06 A69-33651
Compensatory hypertrophy effects on adrenal phenylethanolamine n-methyl transferase /PNMT/ activity in rats
c04 A69-41404

PHOEBUS NUCLEAR REACTOR
Comparison of predicted nozzle coolant side heat transfer and fluid flow with experimental values from Phoebus 2A nuclear tests
[NASA-TM-X-1881] c33 N69-36806
PHONONS
Phonons, electrons and protons in ferro-paraelectrics and hydrogen bonded ferroelectrics, examining higher frequency optical and lower frequency dielectric properties
c26 A69-32262
PHOSPHATES
Uranyl ions interaction with phospholipid and cholesterol monolayers, using surface pressure and potential measurements
c06 A69-25641
PHOSPHORS
Superlinear and sublinear phosphors combined for producing single gun color cathode ray tubes
[NASA-CR-1228] c09 N69-14256
PHOTOCONDUCTIVITY
Current oscillations in semiinsulating O and Cr doped GaAs samples at room temperature, noting photoconductivity excitation spectra
c26 A69-21753
PHOTODECOMPOSITION
Photodegradation of organic polymers by UV radiation exposure, emphasizing polyvinyl chloride photochemistry and radiation stabilization
c18 A69-10861
PHOTODISSOCIATION
Primary processes leading to atomic and molecular hydrogen formation in hydrogen peroxide photolysis at 1236 A, noting OH formation
c06 A69-23527
Positively charged diatomic hydrogen molecules interstellar extinction and photodissociation cross section in terms of formation mechanisms
c30 A69-42610
PHOTOELECTRIC EFFECT
Alloying pairs of metal pellets to n and p type semiinsulating GaAs, discussing photo effects
c26 A69-32824
PHOTOELECTRIC EMISSION
Observation of photocurrents generated in Schottky barrier diodes on barium titanate, suggesting practical utility of photon-to-electron conversion efficiencies
c09 A69-18905
PHOTOELECTRICITY
Photoelectronic commutation by dc torquer-driven reaction wheel for spacecraft attitude control
[NASA-TN-D-5265] c03 N69-30945
PHOTOELECTRONS
Auger and photoelectron spectroscopy for chemical analysis, noting effects of sample thickness, sample potential, surface contamination and X ray incident angle
c06 A69-19775
Satellite measurements of suprathermal electrons at conjugate sunrise, indicating photoelectron escape from production level and movement along geomagnetic lines into conjugate ionosphere
c29 A69-25144
PHOTOGRAMMETRY
Photogrammetry - Conference, Washington, D.C., March 1969
c14 A69-34334
NASA photogrammetric lunar activities, discussing imagery and control data by Lunar Orbiter and photogrammetric data reduction for preparing manned lunar landing
c14 A69-34336
Heights of cloud bases and convective cloud tops determined by stereoscopic photogrammetry of Apollo 6 mission
c20 A69-36926
NASA lunar survey and mapping for generating Apollo satellite landing navigation control, using analytic photogrammetry, camera position and altitude data of lunar topography
c14 A69-36931
Photogrammetric camera system developed from NASA requirements to document lunar surface environment during manned space flight exploration
c14 A69-40989
PHOTOGRAPHIC EQUIPMENT
Photographic control system requirements for Project Apollo manned launches, considering extreme heat, vibration and sound pressure environment
[SMPTE PAPER 104-20] c14 A69-14360
PHOTOGRAPHIC FILM
Design, fabrication, assembly of planetary film reconnaissance system
[NASA-CR-1358] c14 N69-28023
PHOTOGRAPHIC MEASUREMENT
Photographic control system requirements for Project Apollo manned launches, considering extreme heat, vibration and sound pressure environment
[SMPTE PAPER 104-20] c14 A69-14360
Picosecond light pulse measurement by two photon excitation of photographic film
c14 A69-20165
Image converter camera and astronomical telescope arrangement for photographing metal diaphragm openings in shock tube
c14 A69-37227
Determination of meteoroid environments from photographic meteor data
[NASA-TR-R-322] c30 N69-39336
PHOTOGRAPHIC RECORDING
Holographic displays using ultrasonic vibrations or laser outputs as optical sources, discussing recording materials, responses and computer applications
c14 A69-21394
Optical system for recording Schlieren images with continuous writing, ultrahigh speed framing camera
[NASA-TN-D-4986] c14 N69-15381
Tuft-grid photographic survey of flow field about low speed Delta wings
[NASA-TN-D-5045] c01 N69-19027
Photographic study of bromine jet flowing in coaxial airstream and impinging on stagnation surface
[NASA-TN-D-5209] c12 N69-24800
Conference on motion degraded images and correcting procedures - optical filters and digital methods for blurring removal from photographic imagery
[NASA-SP-193] c14 N69-33322
PHOTOGRAPHS
Color photographs of earth surface taken during Gemini flights 6 through 12
[NASA-SP-171] c14 N69-28909
PHOTOGRAPHY
Flash X ray unit with special film transport devices to obtain sequenced dynamic radiographs of ablating models during reentry simulation tests
c11 A69-35720
Weighting factor for correction of photographic bias caused by variation in mass and velocity of sporadic meteoroids
[NASA-TN-D-5245] c30 N69-26239
PHOTOINTERPRETATION
Day sky brightness at altitude above 100 km obtained during rocket flight compared to night sky viewed from ground
c30 A69-33664
Multispectral orbital photography used to obtain urban land-use data
[AAS PAPER 69-483] c13 A69-42837
PHOTOIONIZATION
Atomic Li photoionization cross sections calculated with Brueckner-Goldstone many body perturbation theory
c24 A69-17134
Rational approximation for coefficients used in calculating hydrogenic photoionization Gaunt factors
c24 A69-20153
Use of photoionization in measuring velocity profile of free stream flow in expansion tube
[NASA-TN-D-4936] c12 N69-13945
PHOTOLYSIS
Primary processes leading to atomic and molecular hydrogen formation in hydrogen peroxide photolysis at 1236 A, noting OH formation
c06 A69-23527
PHOTOMICROGRAPHY
Impact crater cross section in fused silica,

describing photomicrographic technique for distinguishing hypervelocity from low energy impacts
[AIAA PAPER 69-367] c32 A69-28299
Micromation and micrographics, discussing nonimpact printing in computer avoiding output imbalance by high speed microfilm recorder c34 A69-35059

PHOTOMULTIPLIER TUBES
Photomultipliers response to energetic particles in terms of background current using data from OGO experiments c14 A69-16932
Color coded area sensitivity maps of photomultiplier tubes by multicolor display technique, noting focus electrode voltage c14 A69-35724
Photomultiplier tubes performance enhancement by light incidence on photocathode at oblique angles explained by reflection c23 A69-42194
Degradation of multiplier phototubes exposed to spatial radiations
[NASA-CR-1304] c14 N69-20777

PHOTON BEAMS
Theoretical feasibility of detecting laser radiation scattered from plasma
[NASA-TN-D-5311] c25 N69-36939

PHOTONS
Photon bunching effect in spatially coherent noise field enhanced by superposing monochromatic coherent signal and/or shaping incident noise spectra c07 A69-31694
Two photon decay of metastable levels of hydrogenic and He-like ions in solar corona, depopulating via proton collisional excitation to 2p level c29 A69-36218
Transport study of neutron and photon attenuation through lithium hydride and tungsten spheres
[NASA-TN-D-4989] c24 N69-15375
Fabrication and testing of lithium-drifted detectors as low energy photon spectrometers
[NASA-TN-D-5056] c24 N69-19828

PHOTORECONNAISSANCE
Design, fabrication, assembly of planetary film reconnaissance system
[NASA-CR-1358] c14 N69-28023

PHOTOSENSITIVITY
Color coded area sensitivity maps of photomultiplier tubes by multicolor display technique, noting focus electrode voltage c14 A69-35724

PHOTOSPHERE
Photospheric radiation field role in temperature inversion of stellar chromospheres with dominant H ion opacity, postulating mechanical energy dissipation c30 A69-38173

PHOTOSYNTHESIS
Dual beam white or nearly monochromatic light source providing programmed repetitive sample illumination with variable intensity, pulse duration and sequence for photosynthesis research c14 A69-36378

PHOTOVISCOELASTICITY
Photoviscoelastic method for stress analysis of two dimensional viscoelastic models
[NASA-CR-1289] c32 N69-17770

PHOTOVOLTAGES
Cadmium sulfide films with larger than bandgap photovoltages, analyzing photovoltage decay and temperature and light intensity effects c26 A69-17772

PHOTOVOLTAIC CELLS
Photovoltaic solar cell power technology application to space use and exploration
[ASME PAPER 68-WA/SOL-1] c03 A69-16158
Red, blue and no bias light effects on spectral response of copper sulfide-cadmium sulfide cell, using model incorporating photoconductive layer c26 A69-16358
Radiation damage and recovery of lithium-diffused silicon p-n solar cells, measuring photovoltaic parameters as function of gamma radiation fluence c03 A69-35694

PHOTOVOLTAIC CONVERSION
Photovoltaic properties of CdS thin film solar cells and silicon cells at Jupiter temperature and solar intensity c03 A69-13076
Advanced reconnaissance electric planetary spacecraft /AREPS/ concept for repeated coverage of Mars or Venus surface, using solar-photovoltaic system
[AIAA PAPER 69-253] c30 A69-21244
Liquid mercury cathode thrustors characteristics satisfying constraints imposed by solar flux variations with distance from sun
[AIAA PAPER 69-237] c28 A69-21246

PHOTOVOLTAIC EFFECT
Photovoltaics - IEEE Conference, Pasadena, November 1968 c03 A69-35678

PHYSICAL EXAMINATIONS
NASA Lunar Receiving Laboratory functional areas and physical, chemical, biological and quarantine activities for crew and lunar samples c11 A69-38896

PHYSICAL EXERCISE
Exercise prescription for hypokinetic airline pilots to prevent physiological deterioration and maintain performance, discussing predictive tests, tolerance evaluation, training regimens, etc c05 A69-41800

PHYSICAL PROPERTIES
Physical model for plasma containment simulation in magnetic fields
[NASA-TN-D-5217] c25 N69-25394
Physical, mechanical, and electrical properties of 55-Nitinol - nickel-titanium alloy
[NASA-CR-1433] c17 N69-36367
Physical properties of Martian atmosphere using solar occultation seen from artificial satellite
[NASA-TN-D-5443] c30 N69-38658
Physical density and enzyme activity in coacervate biogenic molecular compounds
[NASA-TT-F-525] c04 N69-40324

PHYSICS
Physics applications to earth and planetary interiors - NATO Conference, Newcastle-upon-Tyne, England, March-April 1967 c30 A69-40172

PHYSIOLOGICAL EFFECTS
Gemini and Mercury space flights medical results, summarizing physiological effects noted on body systems c04 A69-11074
Transensor implantation, sham implantation, no implantation and lighting effects on rat body composition, noting fat and water content c04 A69-26557
Light effects on circadian rhythms in monkeys, describing changes in deep body temperature and locomotor activity phase relationships c04 A69-31336
Carbon dioxide levels monitoring in spacesuit research including limits of physiological acceptability c05 A69-39170
Human responses to aerospace environment in relation to microwave, light, thermal, and ionizing radiation
[NASA-CR-1205-VOL-1] c04 N69-12434
Summary of potential adverse effects of artificial gravity and weightlessness on astronaut physiological processes and performance in aerospace environment
[NASA-TN-D-4980] c05 N69-15629
Aerospace Medicine and Biology bibliography on biological, physiological, psychological, and environmental effects on man during aerospace flight
[NASA-SP-7011/57/] c04 N69-16537

PHYSIOLOGICAL FACTORS
Space medicine to characterize nature and degree of changes in human functional capabilities due to space flight environment prolonged exposure c34 A69-36460

PHYSIOLOGICAL RESPONSES
Meaningful comparisons between single stimulus EEG records and average evoked potential c05 A69-40163

Human physiological responses to angular acceleration during breath holding, Mi, Valsalva and Meuller respiratory maneuvers in hollow spherical simulator
c05 A69-41679
Gravitational and acceleration effects on man and organisms, and biological effects of radiation
[NASA-TT-F-528] c05 N69-38701

PHYSIOLOGICAL TESTS
Exercise prescription for hypokinetic airline pilots to prevent physiological deterioration and maintain performance, discussing predictive tests, tolerance evaluation, training regimens, etc
c05 A69-41800
Suitability of white rats for suborbital studies of behavior in gravity fields
[NASA-CR-1255] c05 N69-14094

PIEZOELECTRIC GAGES
FM/AM telemetry circuits with three axis piezoelectric accelerometer for measurements during impact tests of soft landing models
c07 A69-23279

PIEZORESISTIVE TRANSDUCERS
Simplified theory and transducer potentialities of pinch effect in semiconductors
[NASA-TN-D-5130] c26 N69-22573

PIGMENTS
Test program simulating solar wind outside magnetosphere to evaluate high melting point high density ceramic oxides as white thermal control coating pigments
[AIAA PAPER 69-641] c18 A69-33762
Meteorites pigments identification as porphyrins for extraterrestrial life evidence, noting sample analyses of Orgueil, Murray, Cold Bokkeveld and Mokoia carbonaceous chondrites
c30 A69-39889

PILOT PERFORMANCE
Error reduction in identifying pilot describing function from flight test data by shifting input signal by pilot delay time in simulated computer model
c05 A69-11950
Landing performance in T-33A aircraft with loss of binocular vision compared to performance with both eyes
c05 A69-41675
Exercise prescription for hypokinetic airline pilots to prevent physiological deterioration and maintain performance, discussing predictive tests, tolerance evaluation, training regimens, etc
c05 A69-41800
Pilots and flight simulator used in study of human visual sampling study
[NASA-CR-1258] c05 N69-14145
Peripheral vision displays for presenting dynamic control information
[NASA-CR-1239] c05 N69-14478
Measurement of pilot describing functions in single controller multiloop tasks
[NASA-CR-1238] c05 N69-15372
Human transfer characteristics in flight and ground simulation for roll tracking task
[NASA-TN-D-5007] c05 N69-17814
Pilot rating scales and their use in assessing aircraft handling qualities
[NASA-TN-D-5153] c02 N69-22539
Indirect optical viewing system in F-104B for simulated lifting-body approach and landing tasks
[NASA-TN-D-5299] c14 N69-29730
Human transfer functions applied in systems analysis of manually controlled lunar landing simulator
[NASA-TN-D-5478] c05 N69-39183

PILOTS (PERSONNEL)
Evaluation of pilot describing function method applied to manual control analysis of large flexible booster in Saturn 5 launch vehicle simulator
[NASA-TN-D-5149] c21 N69-22996
Problem of identifying input-output of pilot by measuring data from flight tests with pilot providing feedback control
[NASA-TN-D-5127] c05 N69-23842
Development of optical pilot warning indicator system for aircraft detection
[NASA-TN-D-5174] c14 N69-27267
Pilot ratings of lateral directional handling for wide range of aircraft characteristics - graphs
[NASA-TN-D-5358] c02 N69-35762
Aviation pilot reactions and opinions on grooved runways
[NASA-CR-1428] c02 N69-35861

PINCH EFFECT
Simplified theory and transducer potentialities of pinch effect in semiconductors
[NASA-TN-D-5130] c26 N69-22573

PION BEAMS
Origin of galactic gamma rays, discussing evidence in support of interstellar gas in galactic disk and production of neutral pions and bremsstrahlung
c29 A69-32806

PIONEER PROJECT
Interplanetary Pioneer spacecraft development and systems engineering aspects
c31 A69-17605
Pioneer F/G mission to Jupiter by NASA for exploring interplanetary medium, asteroid belt, planet and environment
[AAS PAPER 69-290] c30 A69-42863
Monograph on Pioneer spacecraft program, discussing mission objectives, spacecraft design, etc
[AAS PAPER 69-066] c30 A69-42883

PIONEER SPACE PROBES
Magnetospheric plasma probe results with Pioneer 6 and 7, discussing plasma fluctuations and solar wind interaction with geomagnetic field
c13 A69-19364
Monograph on Pioneer spacecraft program, discussing mission objectives, spacecraft design, etc
[AAS PAPER 69-066] c30 A69-42883

PIONEER 8 SPACE PROBE
Cosmic dust sensor experiment on Pioneer 8 space probe
[NASA-TN-D-5267] c30 N69-31058

PIONEER 9 SPACE PROBE
Pioneer 9 deep space probe with telemetry link operated in coded mode with sequential decoding, discussing ground and flight test data
c07 A69-42522

PIONS
Radioactive decay of neutral pions generated in metagalactic cosmic ray interactions as source of high energy isotropic gamma rays observed by OSO-3
c29 A69-12092
Cosmic gamma rays spectrum from neutral pions production and decay in metagalactic cosmic ray p-p collisions, deriving models based on Einstein general relativity theory
c29 A69-40641

PIPE FLOW
Turbulence measurements and roughness effects on viscous drag reduction with polymer solution in pipe flow, discussing friction factor, wall velocity profile, etc
c12 A69-33252
Concentration, flow rate and tube diameter effects on viscous drag reduction in nonpolar soap solutions, using pressure drop measurements to observe turbulent flow behavior
c12 A69-33253
Cylindrical bubbles stability in vertical pipes from photographs, describing wake, spacing, pressure pulsations and convection cells effects
[ASME PAPER 69-HT-28] c33 A69-43540
Film-nucleate boiling transition for liquid nitrogen in vertical forced flow in electrically heated tube, discussing conduction model and agreement with visual experiment
[ASME PAPER 69-HT-26] c33 A69-43542
Effects of aerodynamic forces on jet engine noise from rigid flow spoilers
[NASA-CR-1340] c23 N69-26307

PIPES (TUBES)
Use of photoionization in measuring velocity profile of free stream flow in expansion tube
[NASA-TN-D-4936] c12 N69-13945
Impact energy absorbing strut using tube cutting
[NASA-TN-D-4941] c32 N69-14506
Mechanical properties and column behavior of thin wall beryllium-aluminum alloy tubing

[NASA-TN-D-5145] c17 N69-23004
Subsonic expansion tube evaluation as device for studying particle drag in subsonic compressible slip flow
[NASA-CR-1354] c11 N69-28095
Structural response of tubular beryllium and beryllium aluminum alloy truss-type structures to dynamic and static loads
[NASA-TN-D-5254] c32 N69-28658
Burst testing of tungsten tubing at high temperatures
[NASA-TM-X-1843] c17 N69-31889

PISTONS
Fast response electrohydraulic valve-controlled piston servo systems
[NASA-TN-D-5388] c03 N69-34652

PITCHING MOMENTS
Aerodynamics of bodies of revolution in nonplanar motion using nonlinear functional analysis of moments for motion about center of gravity
[AIAA PAPER 68-20] c01 A69-14714

PITOT TUBES
Supersonic Preston tube correlations for Mach number and Reynolds number effects on hypersonic turbulent skin friction on adiabatic surfaces, simplifying correlation
[AIAA PAPER 69-345] c12 A69-28280
Baronti-Libby transformation and Preston tube calibrations used to determine skin friction from turbulent velocity profiles
[NASA-TN-D-4853] c12 N69-10472

PITUITARY GLAND
Identity between growth hormone degrading activity of pituitary gland and plasmin
c04 A69-17105
Adrenal epinephrine and phenylethanolamine n-methyl transferase /PNMT/ activity in rat bearing transplantable pituitary tumor
c04 A69-20374
Rats adrenal corticosterone concentrations changes in response to ACTH, determining response sensitivity dependence on time after hypophysectomy
c04 A69-39871

PLANETARY ATMOSPHERES
Planetary atmosphere composition determination using mass spectrometry for neutral components, ion spectrometry for ionic components and data system optimization
[AAS PAPER 68-183] c14 A69-11468
Multiple light scattering in planetary atmospheres, discussing diffuse reflection and transmission by atmosphere of particles with anisotropic scattering pattern
c30 A69-12105
Structure and mean molecular weight measurement of unknown atmosphere assessed from high altitude tests in earth atmosphere
[AIAA PAPER 68-1054] c30 A69-13699
Inverse problems in radiative transfer applied to remote measurements of IR radiation from planetary atmospheres, noting temperature and water vapor inversions
c13 A69-17617
Model ion-exosphere for nonrotating planet with static dipole magnetic field generalized by permitting density and temperature variations over baropause
c13 A69-25284
Multiple light scattering solutions accuracy by diffraction peak omission from cloud and haze analytic phase functions compared for optically thick and thin planetary atmospheres
c30 A69-33159
Ice clouds near IR spectral reflectivity dependence on particle size, noting application to planetary atmospheres
c13 A69-34283
Particle albedos and extinction cross sections computed by Mie theory showing dependence on refractivity, considering thermal radiation from cloudy planetary atmospheres
c30 A69-38255
Neutral exosphere model for nonrotating planet permitting barosphere uniform rotation at certain angular velocity, determining velocity distribution and density
c30 A69-40524
Significant achievements in space sciences for 1967, including stellar astronomy, bioscience, ionospheres, planetology, particles and fields, solar physics, and planetary atmospheres
[NASA-SP-167] c30 N69-25460
Spectral reflectance of planetary atmospheres, lunar topography, and planetary surface analyses
[NASA-TT-F-502] c30 N69-31989
Investigation of earth atmospheric composition, geomagnetism, extraterrestrial radiation, solar activity, and planetary atmospheres by satellite experiment and astronomical observations
[NASA-SP-195] c34 N69-38951

PLANETARY COMPOSITION
Mars surface photometric and spectrophotometric measurements, relating opposition effect details with corresponding laboratory sample measurements
c30 A69-18601
Chemical composition of Earth, Venus, Mars, Mercury and Moon calculated from mathematical models, constructing approximate equations of state at high pressure
c30 A69-29878
Observations and theoretical studies on Mars properties
[NASA-SP-179] c30 N69-16571

PLANETARY EVOLUTION
NASA Planetary Exploration Program to gather data on origin of solar system and life, discussing planetary evolution and extraterrestrial life
c04 A69-12804
Possible evolution of earth continents and ocean basin, considering ultrabasic, basic, and intermediate to acidic lunar highlands chemical composition
c30 A69-17006
Resonant spin and anomalous rotation of Mercury, analyzing influence of tidal degradation and permanent deformation of planet
c30 A69-39568
Cosmological forces in planetary evolution
[NASA-TT-F-532] c13 N69-28983

PLANETARY LANDING
Longitudinal range dispersion of unmanned Mars landers using VM-8 and VM-9 atmospheric models, discussing Syrtis Major as possible landing site
c30 A69-12390
Entry and terminal deceleration systems for unmanned Martian landers, discussing parachute landing and lifting entry vehicles
[AIAA PAPER 68-1147] c31 A69-13670
Research problems in atmospheric entry and landing of manned planetary space flights to Mars and Venus
[NASA-TN-D-4977] c31 N69-15634
Optimizing spacecraft televisions for successive picture overlapping and maximum surface resolution during planetary descent
[NASA-TN-D-5061] c14 N69-17259
Manned space flight capabilities for lunar and planetary explorations and earth orbiting stations
[NASA-SP-196-VOL-1] c34 N69-22510

PLANETARY MAGNETIC FIELDS
Model ion-exosphere for nonrotating planet with static dipole magnetic field generalized by permitting density and temperature variations over baropause
c13 A69-25284
Orbital Experimental Capsule /OEC/ as subsatellite concept for Martian fields and particles measurements, noting Voyager exploring vehicle applications
c30 A69-39215
Strength and direction data on earth and extraterrestrial magnetic fields for guidance in vehicle design
[NASA-SP-8017] c31 N69-40269

PLANETARY MASS
Correction and calculation methods for second and first order Plutonian perturbations with respect to perturbing masses, and new Pluto elements
[NASA-TT-F-491] c30 N69-14943
Correction and calculation methods for first order Plutonian perturbations with respect to perturbing masses
[NASA-TT-F-490] c30 N69-14944

PLANETARY NEBULAE
Thermal and free-free emission from planetary nebulae based on graphite grain model, discussing IR fluxes
c30 A69-27158
Nebulosity around FG Sagittae for origin and evolution of planetary nebulae, suggesting ejection of nebular shell
c30 A69-42887
PLANETARY ORBITS
Numerical analysis of periodic solutions of restricted three body problem in sun-Jupiter system, noting genealogy of periodic orbits
c30 A69-19874
Analytical evaluation of space storable propellants for unmanned Jupiter and Saturn orbiter missions
[NASA-TM-X-1793] c31 N69-24942
Direct and indirect planetary perturbation effects on motion of natural satellites
[NASA-TN-D-5284] c30 N69-37893
PLANETARY RADIATION
Working breadboard model of planet tracker under various illuminating conditions, discussing hardware and closed loop tracking error analysis accounting for signal to noise effects
c21 A69-13214
Visual ashen light observation on Venus possibly attributable to solar particle bombardment from dark side emission detection by spectroscopic and photometric studies
c30 A69-32300
Orbital Experimental Capsule /OEC/ as subsatellite concept for Martian fields and particles measurements, noting Voyager exploring vehicle applications
c30 A69-39215
PLANETARY ROTATION
Model ion-exosphere for nonrotating planet with static dipole magnetic field generalized by permitting density and temperature variations over baropause
c13 A69-25284
Resonant spin and anomalous rotation of Mercury, analyzing influence of tidal degradation and permanent deformation of planet
c30 A69-39568
PLANETARY SURFACES
Hard space suit for use on planetary surfaces and extravehicular activity, discussing design, fabrication and mobility
c05 A69-12993
Orbit selection rules for planetary cartographic spacecraft derived from relations connecting camera angle, view field and imaging resolution
[AIAA PAPER 69-879] c21 A69-39405
Sequential analyses of planetary surface sample for extraterrestrial life detection, discussing chemistry, morphology, growth and metabolism for life attributes
c30 A69-41623
Terrain bias error analysis in pulse modulated planetary radar altimeters
[NASA-TN-D-5220] c21 N69-26195
Spectral reflectance of planetary atmospheres, lunar topography, and planetary surface analyses
[NASA-TT-F-502] c30 N69-31989
PLANETARY TEMPERATURE
Photovoltaic properties of CdS thin film solar cells and silicon cells at Jupiter temperature and solar intensity
c03 A69-13076
Scaled solar and gray-body temperature distribution models compared to determine stellar atmosphere
c30 A69-14626
Atmospheric models for exospheric temperatures of Mars and Venus based on photoionization heating efficiency
c30 A69-26020
PLANETOLOGY
Boundary conditions for theory of solar system origin, discussing planetary atmospheres, surfaces, magnetic fields, composition and early solar wind
c30 A69-36209
Physics applications to earth and planetary interiors - NATO Conference, Newcastle-upon-Tyne, England, March-April 1967
c30 A69-40172
Planetary exploration and NASA program objectives
[AAS PAPER 69-286] c30 A69-42810
PLANETS
Computer program for computation of thermal radiation heat loads and temperatures of spacecraft orbiting planets or moon
[NASA-TR-R-278] c30 N69-14428
PLASMA ACCELERATORS
Particle free path estimates for axisymmetric high specific impulse plasma accelerators, discussing collisionless plasma simulated by computer
[AIAA PAPER 69-278] c28 A69-21233
Near cathode magnetic field effect on instability in linear Hall current accelerators, using geometry of field extending from anode to cathode region
[AIAA PAPER 69-381] c28 A69-21731
Plasma accelerator with magnetic field producing divergent-nozzle effect
[NASA-TN-D-5122] c25 N69-22942
PLASMA ARC WELDING
Plasma electron beam for welding, deriving beam current from secondary emission by ion bombardment, discussing gas pressure, equipment and applications
c15 A69-35555
PLASMA COMPOSITION
High temperature properties of gases - gas dynamics, thermodynamics, and combustion physics
[NASA-TT-F-558] c12 N69-35365
PLASMA CONDUCTIVITY
Coaxial three coil probe measuring local electrical conductivity and velocity in plasma streams, discussing operations in electrolytes and axisymmetric plasma stream
[AIAA PAPER 69-327] c25 A69-28264
PLASMA CONTROL
Theoretical population inversion in decaying nitrogen plasma column free from external fields and confined motionless in circular cylinder
[AIAA PAPER 69-48] c25 A69-18145
Physical model for plasma containment simulation in magnetic fields
[NASA-TN-D-5217] c25 N69-25394
PLASMA CYLINDERS
Theoretical population inversion in decaying nitrogen plasma column free from external fields and confined motionless in circular cylinder
[AIAA PAPER 69-48] c25 A69-18145
PLASMA DECAY
Theoretical population inversion in decaying nitrogen plasma column free from external fields and confined motionless in circular cylinder
[AIAA PAPER 69-48] c25 A69-18145
PLASMA DENSITY
Plasma oscillation modes perpendicular to magnetic field used to study energy conversion by wave coupling across density discontinuity
c25 A69-20795
Theoretical feasibility of detecting laser radiation scattered from plasma
[NASA-TN-D-5311] c25 N69-36939
PLASMA DIAGNOSTICS
Electron density measurement technique for dense thick steady state plasmas using swept microwave interferometer
c25 A69-12349
SERT 2 mercury vapor fed hollow cathode operated in bell jar, determining volt-ampere characteristics and flow rates for plasma diagnostics
[AIAA PAPER 69-258] c28 A69-21221
Solar wind plasma observations in geomagnetospheric wake compared at 1000 and 500 earth radii, considering ion energy spectra and geomagnetic tail
c29 A69-26943
Coupled set of differential equations describing generalized Volterra problem of conflicting populations and application to plasma oscillations
c19 A69-41260
Microwave radiometric techniques for reentry plasma measurements
[NASA-TN-D-5274] c25 N69-29600
PLASMA DIFFUSION
Quasi-linear theory of hydromagnetic waves in nonrelativistic collisionless plasma, noting

resonant diffusion effect on plasma heating mode
c25 A69-20797
Applicability and limitations of diffusive equilibrium in topside ionosphere, noting plasma density distribution along magnetic field line
c13 A69-37887

PLASMA DYNAMICS
Dynamics, stability and approach to equilibrium of bounded one dimensional collisionless plasma representing minimum energy states with nonlinear Vlasov equation solutions
c25 A69-24305
Coupled kinetic equations for inhomogeneous systems treated as simultaneous equations in time, obtaining solutions by successive approximation
c25 A69-30913
Helium-neon laser discharge with striation oscillations in relation to pressure and current
[NASA-CR-1387] c08 N69-32350
Performance of radiation cooled magnetoplasmadynamic arc thrustors
[NASA-TM-X-1908] c28 N69-40058

PLASMA ELECTRODES
Segmented anode, carbon dioxide-hydrogen performance and hollow cathode erosion tests on low power MPD arc thrustor, noting current measurements
[AIAA PAPER 69-242] c28 A69-21236

PLASMA ENGINES
Background pressure and magnetic field shape effect on MPD thrustor performance, testing radiation cooled thrustors
[AIAA PAPER 69-243] c28 A69-21239
Axial velocities in ammonia MPD thrustor exhaust by measuring Doppler shifts of spectral lines emitted by plasma constituents
c28 A69-31890
Electric propulsion systems for manned planetary exploration flights, discussing arc jet, ion and plasma engines
c28 A69-35108

PLASMA GENERATORS
Plasma generation using large V-groove cathode discharge
[NASA-TN-D-5269] c25 N69-29140

PLASMA HEATING
Collisionless plasma heating by hydromagnetic waves in solar wind
c29 A69-12714
Electron emitter cooling and plasma heating of thermionic converters noting effects of plasma density, diode spacing, etc
c03 A69-13127
Quasi-linear theory of hydromagnetic waves in nonrelativistic collisionless plasma, noting resonant diffusion effect on plasma heating mode
c25 A69-20797
Collisionless plasma heating by damping hydromagnetic waves applied to solar wind qualitative model, discussing magnetoacoustic wave energy
c30 A69-22426

PLASMA INTERACTIONS
Magnetospheric plasma probe results with Pioneer 6 and 7, discussing plasma fluctuations and solar wind interaction with geomagnetic field
c13 A69-19364
Solar plasma flow around magnetosphere, discussing plasma velocity, density and temperature and magnetic field space and time variations
c29 A69-26736
Comet interaction with solar wind, assuming field tail coupling of ionized comet material to solar wind ions
c30 A69-27817

PLASMA JETS
Frequency conversion in sheath capacitance of glow discharge plasma contained within metallic coaxial cylinders
c25 A69-14456
Doppler shift measurements of axial and rotational velocities in MPD arc, using reference lines from iron arc
[AIAA PAPER 69-110] c25 A69-18171
SERT 2 mercury vapor fed hollow cathode operated in bell jar, determining volt-ampere characteristics and flow rates for plasma diagnostics
[AIAA PAPER 69-258] c28 A69-21221
Alternating current plasma arc coaxial flow stabilization
[AIAA PAPER 68-706] c25 A69-28232
Discharge chamber plasma processes in electron bombardment ion thrustors, considering factors affecting thrustor performance
[AIAA PAPER 69-494] c28 A69-32735
Comparative evaluation of ablative materials in arc plasma jets
[NASA-CR-1207] c33 N69-14171

PLASMA LAYERS
Plasmapause and relation to ion composition in topside ionosphere, using Bohm coefficient for turbulent diffusion
c13 A69-12741

PLASMA OSCILLATIONS
Relationship between instabilities and turbulence in plasma, using spectrum of plasma fluctuations
c25 A69-13115
Plasma oscillation modes perpendicular to magnetic field used to study energy conversion by wave coupling across density discontinuity
c25 A69-20795
Rotating plasma disturbances onset in MPD arc, determining magnetic field dependence on mass flow, background pressure and propellant
[AIAA PAPER 69-232] c28 A69-21225
Electron number density LF oscillations for ionized gas identified with periodic solutions to neutral and charged particle plasma continuity equations
c25 A69-24315
LF oscillations in electron number density of ionized deuterium, Ne and He identified from particle continuity equation
c24 A69-40759
Moving striations as plasma oscillations arising from transit time delays of neutral and charged particles moving through ionized gas, using continuity equation
c25 A69-43122
Possible applications of continuity equation plasma oscillations to other periodic astrophysical phenomena
[NASA-TN-D-5078] c25 N69-19783

PLASMA PHYSICS
Characteristic time on motion of magnetic lines of force in medium with Hall effect
c25 A69-12399
Ion cyclotron wave generation in RF self sustained mode improved by installing grid structures in plasma near magnetic mirrors
c25 A69-13113
Computer experiment on 9000 particle plasma to test temporal echo theoretical prediction
c25 A69-38713
Nonthermal phenomena of astrophysics in relation to plasma physics, considering planetary and stellar regions, supernova envelopes, interstellar medium, cosmic rays, radio galaxies, etc
c30 A69-42682

PLASMA POTENTIALS
Integrated charged particle energy spectra from gridded electrostatic analyzers, relating retarding potential curve to particle floating potential, kinetic temperature, etc
c25 A69-20521
Measurement of change in plasma potential and magnetic field of hydrogen plasma impinging on magnetic dipole - simulation of solar wind-earth interaction
[NASA-TM-X-1738] c25 N69-19131

PLASMA PROBES
Explorer 35 measurements of low energy plasma in lunar orbit made by planar multigrid sensor programmed as retarding potential analyzer
c30 A69-16278
Magnetospheric plasma probe results with Pioneer 6 and 7, discussing plasma fluctuations and solar wind interaction with geomagnetic field
c13 A69-19364
Coaxial three coil probe measuring local electrical conductivity and velocity in plasma streams, discussing operations in electrolytes and axisymmetric plasma stream
[AIAA PAPER 69-327] c25 A69-28264

Refractive index computation for free electrons and neutral atoms in cesium plasma at helium neon laser wavelengths
[NASA-TN-D-5328] c25 N69-30622
PLASMA PROPULSION
Mercury ion thrusters and facilities automatic controls durability testing, discussing vacuum chamber systems, unattended operation and control
[AIAA PAPER 68-576] c11 A69-12385
Rotating plasma disturbances onset in MPD arc, determining magnetic field dependence on mass flow, background pressure and propellant
[AIAA PAPER 69-232] c28 A69-21225
Segmented anode, carbon dioxide-hydrogen performance and hollow cathode erosion tests on low power MPD arc thrustor, noting current measurements
[AIAA PAPER 69-242] c28 A69-21236
Electrothermal instabilities for explanation of MPD arc thrustor rotating spoke phenomenon, noting agreement with experimental results
[AIAA PAPER 69-231] c28 A69-21254
PLASMA RADIATION
Hydromagnetic radiation characteristics of electric and magnetic dipoles in homogeneous anisotropic cold plasma, obtaining field components and wave propagation modes
c13 A69-42905
Microwave radiometric techniques for reentry plasma measurements
[NASA-TN-D-5274] c25 N69-29600
PLASMA RESONANCE
Frequency shifts observed in Alouette 2 cyclotron harmonic plasma resonances, noting antenna length and direction
c07 A69-37892
PLASMA SHEATHS
Kinetic theory model of plasma sheath transition, analyzing sheath structure in unignited mode of thermionic converter
c03 A69-13125
Frequency conversion in sheath capacitance of glow discharge plasma contained within metallic coaxial cylinders
c25 A69-14456
Kinetic theory model of plasma sheath transition applied to sheath structure in unignited mode of thermionic converter
c03 A69-21828
Severe magnetosphere distortions in north-south direction with parallel/antiparallel magnetosheath to magnetospheric field ascribed to solar wind property changes from Explorer 12 observations
c13 A69-34947
PLASMA TEMPERATURE
Plasma temperature and ion concentration profiles determined from simultaneous measurements by Alouette 2 and Explorer 31 satellites of electron density, temperature and ion abundance
c13 A69-37896
PLASMA TURBULENCE
Relationship between instabilities and turbulence in plasma, using spectrum of plasma fluctuations
c25 A69-13115
PLASMA WAVES
Wave fields and coupling of RF power to ion cyclotron waves in finite length thermal collisional plasma column
c25 A69-13114
Collisional theory of longitudinal wave propagation for two fluid viscous ionized plasmas formulated from coupled Maxwell and Boltzmann equations
c25 A69-20796
Longitudinal plasma waves collision damping calculations using Rostoker test particle method
c25 A69-34439
PLASMA-PARTICLE INTERACTIONS
Backscattering due to collisions for electrons from emitter accelerated through positive ion sheath into plasma in thermionic diodes
c09 A69-17773
Radiation fields from energetic electron moving in helical orbit in magnetoactive plasma, using Maxwell equations
c30 A69-39965
Moving striations as plasma oscillations arising from transit time delays of neutral and charged particles moving through ionized gas, using continuity equation
c25 A69-43122
PLASMAS (PHYSICS)
Computer experiments on the microscopic behavior of one dimensional electrostatic plasma
[NASA-TN-D-4831] c25 N69-10471
Magnetic field nonuniformity and its effect on stability of theta pinch plasma
[NASA-TR-R-303] c25 N69-20997
Radio frequency induction heated plasmas with power deposition and energy removal
[NASA-CR-1312] c25 N69-22638
Semiempirical collision model for plasmas
[NASA-TR-R-310] c25 N69-23787
PLASTIC COATINGS
Plastic backing films removal from carbon electron microscope replicas by maintaining specimens in horizontal position
c14 A69-21651
PLASTIC DEFORMATION
Plastic deformation of corrosion resistant steel, CER-VIT 101, and fused silica as function of applied torsional stress
[NASA-CR-1257] c14 N69-16100
Digital computer program for analyzing elastic and plastic deformations and creep strains in solid and hollow cylindrical bodies
[NASA-TM-X-1723] c32 N69-16115
Elastic and plastic analyses of hail damage to aircraft surfaces
[NASA-TN-D-5363] c32 N69-33420
PLASTIC MEMORY
Mechanical properties associated with 55-Nitinol memory effect, presenting stress-strain and electrical resistivity as function of temperature
c17 A69-35523
Properties of irradiated polyethylene memory materials
[NASA-CR-1384] c18 N69-36762
PLASTIC PROPERTIES
Superplasticity in W-Re alloys, noting tensile properties, grain size and strain rate sensitivity for various Re contents at high temperatures
c17 A69-22990
PLASTICS
Plastics engineering - Conference, Chicago, May 1969
c18 A69-29411
Plastics applications in Apollo-Saturn 5 program, considering foam, honeycomb, conformal coatings, embedment compounds, dielectrics, damping compounds, adhesives, sealants and gaskets
c18 A69-38533
Design and construction of plastic model of prestressed segmented spherical shell
[NASA-CR-1231] c32 N69-11010
Dies for imprinting microscopic lagoon fields in plastic surfaces for use in cell and tissue culture
[NASA-TN-D-5255] c04 N69-29195
Toxicity of plastic hardware containing biological space flight experiment
[NASA-TM-X-1818] c04 N69-29723
PLATE THEORY
Statistical theories of turbulence applied to thermal convection between infinite slippery plates at large Prandtl number
c33 A69-24283
Mach 42 test measuring surface pressures, surface heat transfer rates and shock wave shapes in strong interaction regime for sharp and blunt plates
[AIAA PAPER 68-720] c01 A69-41886
PLATES (STRUCTURAL MEMBERS)
Dynamic response of uniform beams and plates exposed to sonic booms
[NASA-CR-1281] c32 N69-21403
PLATINUM ALLOYS
Emittance properties of hafnium oxide, cerium oxide, and iron titanate coatings on platinum rhodium alloy substrates
[NASA-CR-1413] c17 N69-35514
PLOTTERS
Data distortion elimination by improved

superimposing of sinusoidal audio frequency signal on dc voltage of automatic Langmuir probe second derivative plotters
c14 A69-32855
High speed printer for hard copy alphanumeric listings and digital data plots
[NASA-TN-D-5474] c08 N69-38654

PLOTTING
Numerical analysis of spiraling in ion molecule collisions with polar targets using computer plotting techniques
[NASA-TN-D-5407] c24 N69-35508

PLUG NOZZLES
Performance of 10 deg conical turbojet plug nozzle with iris primary and translating shroud for supersonic cruise applications
[NASA-TM-X-1709] c28 N69-14313
Plug and shroud geometry variables on plug nozzle performance at transonic speeds
[NASA-TN-D-5098] c28 N69-21463
Static tests of nozzle efficiency and pumping characteristics of conical turbojet plug nozzle with translating primary and secondary shrouds at Mach 0 to 2.0
[NASA-TM-X-1777] c28 N69-21648
Performance characteristics of truncated, conical plug nozzle with cylindrical outer shroud
[NASA-TM-X-1807] c26 N69-27840

PLUM BROOK REACTOR
Beryllium reflector distortion in Plum Brook Reactor due to neutron embrittlement and gas formation, noting material surveillance, replacement, etc
c22 A69-13131
Tungsten-184 used as thermal flux monitor at high temperatures in Plum Brook reactor
[NASA-TN-D-5113] c22 N69-20795
Beryllium swelling and replacement in Plum Brook reactor
[NASA-TM-X-1794] c22 N69-26233
Source and cause of fuel element fission product leakage in reactor cooling water system at Plum Brook Reactor
[NASA-TN-D-5374] c22 N69-32317
NASA Plum Brook Reactor Facility experimental program
[NASA-TM-X-1853] c22 N69-33132

PLUMES
Back flow density from jet plumes in vacuum
[NASA-TN-D-4978] c01 N69-14385

PLUTO (PLANET)
Correction and calculation methods for second and first order Plutonian perturbations with respect to perturbing masses, and new Pluto elements
[NASA-TT-F-491] c30 N69-14943
Correction and calculation methods for first order Plutonian perturbations with respect to perturbing masses
[NASA-TT-F-490] c30 N69-14944

PNEUMATIC CONTROL
Pneumatic driving system for heart assist or total replacement pumps, discussing design features and performance characteristics
c05 A69-42983

PNEUMATIC EQUIPMENT
Fluidic integrated circuits for control of pneumatic stepping-motor actuator system
[NASA-TN-D-5155] c03 N69-22896

POINT DEFECTS
Internal friction, Young modulus and resistivity measurements for stage I interstitials in electron irradiated tungsten
c17 A69-28682
Point defect calculations for tungsten
[NASA-TN-D-4918] c22 N69-13309

POINT SOURCES
Minimal angle of resolution /MAR/ between point and extended circular source and between point source and simulated horizon, studying irradiation effects on manual navigation
c21 A69-19208

POINT TO POINT COMMUNICATIONS
Lunar surface transmission loss for Apollo astronaut point-to-point communications
[NASA-TN-D-4915] c07 N69-13301

POISSON DENSITY FUNCTIONS
Huffman minimum redundancy coding extension to run-length information based on Poisson distribution, including optimization and data compression applications
c07 A69-36262

POLAR CAP ABSORPTION
Time history of July 7-10 1966 PCA event analyzed using 16 riometers and concurrent satellite observations of solar cosmic radiation
c13 A69-23770
Polar cap ionospheric response to solar cosmic ray events observed by Mariners 2 and 4 solar proton measurements used to test magnetosphere models
c29 A69-43621

POLAR COORDINATES
Numerical integration for continuously thrusting spacecraft optimal trajectory, considering rectangular Cartesian and polar cylindrical coordinates characteristics
[AIAA PAPER 69-903] c30 A69-38546
Graphic method determining sounding rocket vehicle attitude
[NASA-TN-D-5172] c30 N69-23782

POLAR GASES
Viscosity, thermal conductivity and diffusion predicted for dilute nonpolar, polar and mixed gases, discussing methods for rotational relaxation collision numbers and resonant correction
c33 A69-38951
Computer made movies and time history plots for ion-dipole collisions involving polar molecules /CO, HCL and acetonitrile/
c24 A69-43124
Rotational relaxation times for calculating rotational collision numbers in polar gases
[NASA-TN-D-5321] c24 N69-30073

POLAR REGIONS
Electron concentration enhancement in upper atmosphere at polar latitudes, noting three independent zones and relation to magnetic local time
c29 A69-28938
Magnetic storm time variations of electron concentrations in upper ionosphere near north geomagnetic pole, discussing magnetic time, altitude and latitude dependence
c29 A69-28939
Suprathermal electrons energy distributions as function of magnetic latitude in polar ionosphere obtained by Explorer 31 satellite observation
c29 A69-28963
Polar exosphere near solar maximum investigation by Explorer 19 and Explorer 24 drag satellites, considering density and atomic oxygen concentration measurements
c13 A69-31351
Ion depletion in high latitude exosphere, considering OGO 2 simultaneous observations of positive ion concentration, VLF signal propagation and whistlers
c29 A69-34939

POLARIZATION
Polarization, differential cross section, and total reaction cross section data for proton scattering
[NASA-TN-D-5067] c24 N69-22934

POLARIZATION (SPIN ALIGNMENT)
Asymmetry of polarized protons scattered from He 4 at 540 MeV for laboratory angles between 4 and 42 degrees
c24 A69-14966
Differential cross section and polarization measurements for elastic scattering of high energy protons from light nuclei
c24 A69-43125
Numerical analysis of spiraling in ion molecule collisions with polar targets using computer plotting techniques
[NASA-TN-D-5407] c24 N69-35508

POLARIZATION CHARACTERISTICS
Core polarization effects in inelastic scattering cross sections for several nuclei in 2s-1d shell, using Hartree-Fock wave functions and Born approximation
c24 A69-29007

POLARONS
Polarons large to nearly small transitions, studying ground state mass dependence on bare electron mass, electron-phonon interactions model, superconducting strontium titanate, etc

c26 A69-37280

POLYAMIDE RESINS
Ablative effectiveness of low density phenolic nylon materials
[NASA-TN-D-5257] c33 N69-28440

POLYBENZIMIDAZOLE
Low density polybenzimidazole composites as ablative heat shields, discussing arc-heated wind tunnel tests of linear and crosslinked structures
c18 A69-41715

POLYCRYSTALS
High temperature mechanical properties of polycrystalline hafnium carbide containing 13-volume-percent hafnium diboride
[NASA-TN-D-5008] c17 N69-16380
Optimal growths of silicon carbide polytype crystals by methyltrichlorosilane reduction
[NASA-TN-D-5313] c26 N69-30072

POLYETHYLENE TEREPHTHALATE
Mechanical anisotropy of polyethylene terephthalate and relation to molecular structure and cold drawing
c18 A69-16489
Film processing effects on cryogenic mechanical properties of polyethylene terephthalate
c18 A69-16490
Mechanical behavior of polyethylene terephthalate at cryogenic temperatures
c18 A69-16494
Ultrahigh molecular weight polyethylene terephthalate synthesis from commercial solid state materials, noting effects of several parameters
c24 A69-16496
Molecular orientation and mechanical isotropy in polyethylene, polypropylene, and polyethylene terephthalate films
[NASA-TN-D-5380] c18 N69-34708

POLYETHYLENES
Proton induced voltage breakdowns in polymeric materials
[NASA-TM-X-1688] c18 N69-10066
Molecular orientation and mechanical isotropy in polyethylene, polypropylene, and polyethylene terephthalate films
[NASA-TN-D-5380] c18 N69-34708
Properties of irradiated polyethylene memory materials
[NASA-CR-1384] c18 N69-36762

POLYIMIDES
Blocked polyimide precursor resistance to thermal imidization compared to polyamic acid
[NASA-TN-D-5184] c06 N69-23353

POLYISOPRENES
Geochemical synthesis of branched chain acyclic polymers from irradiated isoprene
c04 A69-43750

POLYMER CHEMISTRY
Photodegradation of organic polymers by UV radiation exposure, emphasizing polyvinyl chloride photochemistry and radiation stabilization
c18 A69-10861
Ultrahigh molecular weight polyethylene terephthalate synthesis from commercial solid state materials, noting effects of several parameters
c24 A69-16496
Geochemical synthesis of branched chain acyclic polymers from irradiated isoprene
c04 A69-43750
Syntheses and properties of pyrrone polymers
[NASA-CR-1310] c18 N69-26448

POLYMER PHYSICS
Mechanical anisotropy of polyethylene terephthalate and relation to molecular structure and cold drawing
c18 A69-16489
Polymer glasses low temperature transitions, relating structure and transition temperature
c06 A69-16493

POLYMERIC FILMS
Polymer films tensile properties after exposure to gamma radiation in vacuum, noting chain scission and cross linking
[ASME PAPER 68-WA/RP-6] c18 A69-16160
Cryogenic flexibility of thin polymeric film plies for use as spacecraft positive expulsion bladders
c15 A69-16486
Film processing effects on cryogenic mechanical properties of polyethylene terephthalate
c18 A69-16490
Plastic backing films removal from carbon electron microscope replicas by maintaining specimens in horizontal position
c14 A69-21651
Molecular orientation and mechanical isotropy in polyethylene, polypropylene, and polyethylene terephthalate films
[NASA-TN-D-5380] c18 N69-34708
Transmission effects on plastic films irradiated with ultraviolet light in vacuum
[NASA-TM-X-1905] c18 N69-40339

POLYMERIZATION
Time of heating effect on thermal polymerization of L-lysine free base
c06 A69-28439
Blocked polyimide precursor resistance to thermal imidizatiCn compared to polyamic acid
[NASA-TN-D-5184] c06 N69-23353

POLYMERS
Cryogenic properties of polymers - NASA/Case Conference, Cleveland, April 1967
c18 A69-16485
Luminescence spectra of aromatic polymers, monomers and dimers under high energy electron excitation using molecular resonance model
c26 A69-32792
Turbulence measurements and roughness effects on viscous drag reduction with polymer solution in pipe flow, discussing friction factor, wall velocity profile, etc
c12 A69-33252
Constitutive equation variation effect on near wall flow pattern of dilute polymer solutions
c12 A69-33257
Unfilled Pyrrone prepared from powder into molded parts for flexural tests at elevated temperatures observed for stability to electron irradiation in air
c18 A69-35529
Computer analysis of light scattering data from polymer sclutions
[NASA-TN-D-5177] c06 N69-22991

POLYPHENYL ETHER
Steel ball bearing high temperature fatigue life tested with synthetic paraffinic oil, fluorocarbon and polyphenyl ether
[ASME PAPER 69-LUBS-18] c15 A69-34378
Lubrication performance and thermal shear degradation of polyphenyl ethers and refined mineral oils in high temperature vane pump loop
[NASA-TN-D-5096] c15 N69-20938

POLYPROPYLENE
Molecular orientation and mechanical isotropy in polyethylene, polypropylene, and polyethylene terephthalate films
[NASA-TN-D-5380] c18 N69-34708

POLYTETRAFLUOROETHYLENE
Molecular motion in polytetrafluoroethylene crystals at cryogenic temperatures, noting crystal defect permitting angular displacements of chain segments
c24 A69-16495
Impregnation of polytetrafluoroethylene with hexaflourides of rhenium, molybdenum, and tungsten
[NASA-TN-D-4886] c06 N69-10126

POLYURETHANE FOAM
Ablative materials thermal protection characteristics at low heating rates evaluated by convective heating tests, stressing polyurethane foam composite
c18 A69-35536
Polyurethane foam composites for low heating rate thermal protection, noting astroquartz fiber additive effect on performance
c18 A69-39236
Lightweight polyurethane insulation for liquid hydrogen tanks of space vehicles
[NASA-TN-D-5114] c18 N69-20790

POLYURETHANE RESINS
Fluorinated polyurethanes synthesis for liquid oxygen environments and cryogenic structural utility, noting structural effects on LOX compatibility

c06 A69-16498
POLYVINYL CHLORIDE
Photodegradation of organic polymers by UV radiation exposure, emphasizing polyvinyl chloride photochemistry and radiation stabilization
c18 A69-10861
PONTRYAGIN PRINCIPLE
Adaptive random search algorithm utilizing boundary cost-function hypersurfaces measurement to implement Pontryagin maximum principle, discussing hybrid computer use, iterative solution and convergence properties
c08 A69-33745
POPULATION INVERSION
Theoretical population inversion in decaying nitrogen plasma column free from external fields and confined motionless in circular cylinder
[AIAA PAPER 69-48] c25 A69-18145
POROSITY
Performance tests of wind tunnel model inlet for bleed system back pressure and porous area effect of axisymmetric compression
[NASA-TM-X-1710] c01 N69-14075
POROUS MATERIALS
Flow reduction due to oxidation of wire-form porous materials for transpiration cooled turbine blades
[NASA-TN-D-5001] c17 N69-16383
POROUS WALLS
Gas core reactor curved porous walls geometry tested with clear and smoky air injection, noting mass flow ratio in reactor cavity
c22 A69-35181
Transient temperature fields in porous shell walls cooled by forced flow
[NASA-TT-F-552] c33 N69-30245
PORPHYRINS
Meteorites pigments identification as porphyrins for extraterrestrial life evidence, noting sample analyses of Orgueil, Murray, Cold Bokkeveld and Mokoia carbonaceous chondrites
c30 A69-39889
Detection and spectral examination of trace porphyrin complexes by demetallation with methanesulfonic acid and spectrofluorometry, compared to absorption spectrophotometry
c06 A69-42557
PORTABLE EQUIPMENT
Portable integrating sphere reflectometer, describing optical system, construction, etc
[AIAA PAPER 69-599] c14 A69-33264
Lithium peroxide utilization feasibility for oxygen supply and carbon dioxide control in extravehicular portable life support systems
[AIAA PAPER 69-620] c05 A69-33303
Self contained hand held battery operated aerosol particle analyzer, measuring aerosol concentration and size distribution for laboratory and space flight applications
c14 A69-34691
POSITION (LOCATION)
Plasma-pause position measurements by ion mass spectrometers and broadband VLF receivers on OGO 1 and OGO 3 and by broadband recordings at Antarctica
c13 A69-25153
Magnetic dip equator position at E layer and gradient with time and altitude, using geomagnetic field models
c13 A69-42428
GEOS 1 tracking station positions on SAO standard earth C-5 model
[NASA-TN-D-5034] c13 N69-28019
POSITION ERRORS
OMEGA position location equipment /OPLE/ test data to demonstrate feasibility of using OMEGA navigational system in conjunction with synchronous satellites
c21 A69-19135
Ionospheric irregularities effect on accurate satellite position determination in near real time
c07 A69-42549
POSITION INDICATORS
High speed compression waves, rarefaction waves and gas interface regions position and velocity measurement in shock tube by sensing electrical impedance
c14 A69-13104
OMEGA position location equipment /OPLE/ test data to demonstrate feasibility of using OMEGA navigational system in conjunction with synchronous satellites
c21 A69-19135
Electronic position indicator for latching solenoid valves in SNAP 8 ground test facility
[NASA-TM-X-1760] c14 N69-20874
POSITIONING
Potential use of satellites for enhancing positioning capabilities and for marine geodetic control
[NASA-CR-1253] c13 N69-16645
POSITIONING DEVICES (MACHINERY)
Hydraulic-powered self propelled six degree of freedom loading vehicle moving tests assembly to test chamber with high accuracy positioning
c11 A69-38181
POSITRONS
Annihilation gamma ray spectra from equilibrium spectra of secondary galactic positrons
c29 A69-29948
POSTFLIGHT ANALYSIS
Optical properties and chemical analysis of contaminants on Gemini spacecraft windows
[NASA-TN-D-4916] c31 N69-13232
Nimbus 2 flight evaluation and engineering report covering launch through orbit 5275
[NASA-TN-D-4881] c31 N69-17851
Correlation study of simulation of Gemini extravehicular activity with flight results
[NASA-CR-1146] c05 N69-19902
Systems analysis of Atlas-Centaur AC-11 flight performance for Surveyor 4
[NASA-TM-X-1768] c31 N69-21399
Postflight analysis of flight performance of Atlas Agena launch vehicle for Applications Technology Satellite ATS-2 mission
[NASA-TM-X-1800] c31 N69-27260
POTASSIUM
Work function and desorption energy measurements of alkali metals from metallic substrates with modulated molecular beam, noting surface contamination
c26 A69-21808
Evaluation of various laboratory determination of oxygen in potassium and sodium
[NASA-TN-D-4971] c06 N69-14180
POTENTIAL ENERGY
Vacancy relaxations in bcc crystals using energy dependence on radial displacements from defect of nearest neighbor sets, discussing crystal size and shape
c26 A69-16529
POTENTIAL GRADIENTS
Simplified theory and transducer potentialities of pinch effect in semiconductors
[NASA-TN-D-5130] c26 N69-22573
POTENTIAL THEORY
Adaptive simulation using modal clustering and method of potential functions
[NASA-CR-1179] c08 N69-10316
POWDER (PARTICLES)
Measurement of radiative thermal conduction of ideal powder as function of temperature
[NASA-TN-D-5063] c33 N69-20008
Extruded prealloyed powder evaluation for two nickel-base alloys
[NASA-TN-D-5248] c17 N69-26192
POWDER METALLURGY
Powder metallurgy, fusion and chemical vapor deposition techniques in manufacturing tungsten base alloys
c17 A69-18792
Yttrium effect on rate of thermal decomposition of silver carbonate powder and pressed pellets by isothermogravimetric analysis, examining water vapor, Co 60 gamma radiation and temperature effects
c06 A69-30442
Creep rate-stress-temperature relations for powder metallurgy rhenium, discussing activation energy
c17 A69-34186
H release, pressure and oxide layer formed by reaction during ball milling Cr in water
c15 A69-38567
Fabrication of cermets of uranium nitride and tungsten or molybdenum from mixed powders and

from coated particles for nuclear fuel elements
[NASA-TN-D-5136] c17 N69-21404
Dispersion strengthened nickel produced from ultrafine comminuted powders
[NASA-TN-D-5421] c17 N69-38074
POWER CONDITIONING
Modularized static ac and dc inverters and converters for aerospace electrical power conditioning systems, discussing circuit functions and performance tests
c03 A69-42292
Power conditioner for use with SERT 2 mercury ion thrustor, describing electrical and mechanical design and operation
c03 A69-42301
POWER EFFICIENCY
High voltage mercury electron bombardment ion thruster power efficiency
[ECS PAPER 170D] c28 A69-16233
Power loss experiments on herringbone grooved, gas lubricated journal bearings
[NASA-TN-D-5224] c15 N69-24932
POWER GAIN
Gain measurement of two element phased array aperture antenna during ATS-C tracking
c07 A69-36254
POWER LIMITED SPACECRAFT
Mechanics of low thrust space flight
[NASA-TT-F-507] c28 N69-33354
POWER SPECTRA
Power spectra of interplanetary magnetic field fluctuations determined from Pioneer 6 satellite data, relating results to galactic cosmic rays modulation
c30 A69-37554
POWER SUPPLIES
Magnetic core logic circuit system for bidirectional stepping motor drive voltage power supply control in proper phase and time sequence
c09 A69-11000
PRANDTL NUMBER
Statistical theories of turbulence applied to thermal convection between infinite slippery plates at large Prandtl number
c33 A69-24283
PRECIPITATION (METEOROLOGY)
Transfer of microwave radiation in atmosphere and underlying surfaces measured by aircraft instruments
[NASA-TT-F-590] c13 N69-31851
PRECIPITATION HARDENING
Effect of ultrasonic vibration on precipitation hardening of steels and superalloys
[NASA-TN-D-5131] c32 N69-21814
Dynamic strain aging during creep and tensile tests of molybdenum-titanium-carbon alloys
[NASA-TN-D-5169] c17 N69-22993
Dispersion strengthened nickel produced from ultrafine comminuted powders
[NASA-TN-D-5421] c17 N69-38074
PRECISION
Hardware-software provisions for multiple precision floating point arithmetic
[NASA-TM-X-1885] c08 N69-36918
PREDICTION RECORDING
Predictive display systems using repetitive, fast time, on-line computation
[NASA-CR-1274] c05 N69-17738
PREDICTIONS
Adaptive compression system for predicting and encoding video data for transmission in noiseless channel
c14 A69-12869
Prediction curves for launch vehicle vibration levels in region of spacecraft adaptor
[NASA-CR-1227] c31 N69-16155
Summary of random vibration prediction procedures for aerospace vehicles, with bibliography
[NASA-CR-1302] c32 N69-23096
Theory for predicting rotational and vortex noise of lifting rotors in hovering and forward flight
[NASA-CR-1333] c23 N69-25344
Prediction methods for angular line-of-sight deviations induced by spacecraft window
[NASA-TN-D-5238] c21 N69-31227
PREFLIGHT ANALYSIS
Preflight optical evaluation of right hand hatch windows in Gemini missions 7, 8, 9, and 12
[NASA-TN-D-5471] c31 N69-40813
PRELAUNCH TESTS
OGO program failure rate analysis with respect to cost, schedule and performance tradeoffs, considering component and systems design and reliability, prelaunch feedback, etc
c31 A69-34519
PRESSURE
Magnetothermal oscillations in pressure annealed pyrolytic graphite
[NASA-TN-D-5488] c26 N69-39239
PRESSURE DISTRIBUTION
Aircraft created pressure patterns responsible for sonic boom, discussing design techniques for noise reduction
c02 A69-30369
Incompressible two dimensional turbulent boundary layer equations with arbitrary pressure distribution solved by weighted residual method
[AIAA PAPER 69-397] c12 A69-30478
Flow and pressure fields for spiral grooved pumping seal with specified groove dimensions and Reynolds number
[ASLE PICFS PREPRINT 30] c15 A69-30481
Surface pressure and heat transfer over blunt conical body in hypersonic flow with uniform mass addition of various gases
[AIAA PAPER 69-716] c01 A69-33463
Equations for pressure signature of supersonic projectile in stratified atmosphere
[NASA-TN-D-4890] c02 N69-10087
Computational method for surface pressures on blunt bodies of revolution at small angles of attack in supersonic flow
[NASA-TN-D-4865] c01 N69-10215
Heat transfer and pressure distribution due to two-dimensional repetitive sine wave distortions on flat plate at Mach 20 in helium
[NASA-TN-D-4907] c12 N69-10804
Heat transfer and pressure distributions inside hinge line gap of wedge-flap combination at hypersonic speeds
[NASA-TN-D-4911] c01 N69-11009
Pressure fields and multidimensional gas flow in permeable char layers and effects on ablation
[NASA-TR-R-296] c33 N69-16181
Experimental surface pressure distributions on spherically blunted cone at Mach numbers from 1.50 to 4.63
[NASA-TM-X-1730] c01 N69-16209
Experimental pressure distributions on 120 deg cone at Mach 2.96 to 4.63 and angles of attack from 0 deg to 20 deg
[NASA-TN-D-5054] c01 N69-19826
Surface pressure distribution on spherical blunted cones, and correlation of Mach numbers, cone angle, and angle of attack
[NASA-TN-D-5204] c01 N69-24764
Initial hydrodynamic phase of hypervelocity impact analyzed by computer program using eigenvector approach
[NASA-TR-R-298] c32 N69-24765
Space suit design with pressure stabilizer for force assisted elbow joint
[NASA-TN-D-5221] c05 N69-26259
Wind tunnel tests of subsonic aerodynamic characteristics of large scale tip turbine cruise fan with 1.075 pressure ratio at angle of attack
[NASA-TN-D-5316] c28 N69-34575
Pressure distributions for blunt body wind tunnel models at supersonic speeds and angles of attack from 0 to 15 degrees
[NASA-TN-D-5392] c01 N69-35300
Pressure and heat transfer on swept Delta wing with trailing-edge flap
[NASA-TN-D-5418] c01 N69-35855
Three dimensional pressure distribution functions for lifting surfaces with trailing-edge controls based on integral equations for subsonic flow
[NASA-TN-D-5419] c01 N69-38768
Aerodynamic pressure distribution on semispan tilting wing-propeller combination of V/STOL aircraft
[NASA-TN-D-5481] c01 N69-40876
PRESSURE DRAG
Determination of drag of fabrication-type surface roughness in turbulent boundary layer at transonic speeds
[NASA-TN-D-5004] c01 N69-16460

Jet effects on boattail pressure drag of isolated ejector nozzles at Mach 0.60 to 1.47
[NASA-TM-X-1785] c01 N69-26976

PRESSURE EFFECTS
Pressure and temperature dependence of slow crack growth in hardened steel in gaseous hydrogen environment
c17 A69-10612
Cross hatching on various body surfaces due to periodic surface pressure fluctuations, discussing origin from counter-rotating longitudinal vortices in boundary layer
[AIAA PAPER 69-11] c12 A69-18213
Background pressure and magnetic field shape effect on MPD thrustor performance, testing radiation cooled thrustors
[AIAA PAPER 69-243] c28 A69-21239
Pressure and heating rate correlations for rocket exhausts impinging on flat plates and curved panels, generating axisymmetric real gas exhaust plumes
c33 A69-26781
Compression molding of molecular salt-like intermediate Pyrrone powders by two pressure method, noting volatiles elimination
c18 A69-29415
Jet engine compressor stalls in-flight investigation up to Mach 2 on F-111A by pressure sensors, noting steady state distortion role
[AIAA PAPER 69-488] c28 A69-32706
Supersonic compressor blade sections performance prediction near maximum pressure ratio and efficiency by analyzing flow processes
[AIAA PAPER 69-522] c28 A69-32711
Thermal contact resistance measurement at various ambient pressures compared with theoretical predictions with each parameter analyzed over interface by computer program
[AIAA PAPER 69-629] c33 A69-33299
Temperature and pressure effect on cobalt base alloy cavitation in liquid sodium, using vibratory apparatus and loss rate contour diagram
c17 A69-35184
Ge films formation by evaporation technique, discussing background O pressure effect
c26 A69-43345
Force penetration characteristics of sand horizontally penetrated by various geometrically shaped models
[NASA-CR-1252] c18 N69-14764
Instability of eccentrically stiffened cylindrical shells under axial compression and lateral pressure
[NASA-CR-1280] c32 N69-15378
Load and stiffness characteristics of rotating externally pressurized air journal bearings
[NASA-TN-D-5191] c15 N69-27078
Effect of temperature and pressure on cavitation damage to cobalt base alloy in sodium
[NASA-TN-D-5273] c17 N69-28863
Pressure and velocity coupling effects on combustion stability in solid propellant burning
[NASA-TN-D-5395] c33 N69-34892
Sound wave pressure for preventing cryogenic propellant sloshing during space flight
[NASA-TN-D-4024] c23 N69-38180

PRESSURE GRADIENTS
Nonsimilar laminar boundary layer solutions with negative pressure gradient compared to experimental boundary layer velocity profiles, momentum and displacement thicknesses
[AIAA PAPER 69-35] c12 A69-18094
Lower solar corona composition changes due to pressure and thermal gradients calculated with multicomponent diffusion equations
c30 A69-33059
Calculation of compressible turbulent boundary layers with pressure gradients and heat transfer
[NASA-CR-1303] c12 N69-21653
Turbulent boundary layer of subsonic transport fuselage with pressure gradient, Reynolds number, and angle of attack
[NASA-TN-D-5242] c01 N69-28112
Thermal outgassing tests on epoxy impregnated magnet coil
[NASA-TM-X-1813] c18 N69-28203
Respiratory system and oxygen metabolism regulation in man and animals
[NASA-TT-F-501] c04 N69-31401

PRESSURE HEADS
Net positive suction head requirements for helical inducer in liquid hydrogen under varied flow and temperature conditions
[NASA-TM-X-1808] c09 N69-27841

PRESSURE MEASUREMENTS
Turbine stator blade performance determination from total pressure surveys downstream of blade row, noting problems in pressure measurement
[ASME PAPER 69-GT-103] c01 A69-22521
Buried collector ionization gage for measurements in 100 billionth torr pressure range using shielded collector to lower X ray current
c14 A69-32324
Pressure and temperature surveys of Mach 27-47 nozzle boundary layer at Ames M-50 He tunnel, determining velocity profiles, wall friction coefficient, etc
[AIAA PAPER 69-686] c12 A69-33441
Pressure measurements and gas flow analysis during thermal vacuum tests of manned spacecraft indicating adequate space vacuum simulation
[AIAA PAPER 69-1033] c11 A69-40401
Variability in sonic boom signatures measured along 8000 foot linear microphone array
[NASA-TN-D-5040] c02 N69-17279
Wind tunnel force and pressure tests of rocket engine nozzle extensions on X-15-2 model at supersonic and hypersonic speeds
[NASA-TM-X-1759] c01 N69-20873
Low pressure application of orbitron and ion gage designs
[NASA-CR-1300] c14 N69-28402
Shock shape and surface pressure measurements on hypersonic pointed cones in helium
[NASA-TN-D-5343] c01 N69-31228

PRESSURE PULSES
Elastic behavior of large blood vessels in canine aorta by measuring dispersion and attenuation of artificially induced pressure waves
c04 A69-14692
Interphase momentum transfer during propagation of infinitesimal pressure pulse through bubbly flow two phase mixture
c33 A69-43511

PRESSURE REDUCTION
Concentration, flow rate and tube diameter effects on viscous drag reduction in nonpolar soap solutions, using pressure drop measurements to observe turbulent flow behavior
c12 A69-33253
Performance tests of wind tunnel model inlet for bleed system back pressure and porous area effect of axisymmetric compression
[NASA-TM-X-1710] c01 N69-14075
Computer analysis of total pressure loss and air flow distribution in annular flow gas turbine combustion chambers
[NASA-TN-D-5385] c33 N69-33314

PRESSURE SENSORS
Single channel pressure telemetry unit for chronic implantation into cardiac chambers or major blood vessels in unrestrained animals for measuring ventricular pressure
c05 A69-25642
Fixed position pressure probe for measuring subsonic flow direction over range of Reynolds number, Mach number and flow angle
c14 A69-33107
Potential electrical response of p-n junction to mechanical strain
[NASA-CR-1366] c26 N69-29724

PRESSURE SUITS
Flight test evaluation of small one man lunar flying device /POGO/, discussing vehicle control, pressure suit factors and piloting differences
[AIAA PAPER 68-240] c11 A69-12379
Relationship between binocular depth perception and optical distortion in Apollo pressure suit helmets and visors
[NASA-TN-D-5162] c05 N69-22990

PRESSURE VESSELS
Glass, boron and graphite filament wound resin composites and liners for cryogenic pressure vessels
c18 A69-16488

High pressure storage vessels for gaseous hydrogen, discussing failure, manufacturing controls and access for internal nondestructive inspection
[ASM PAPER D8-14.1] c15 A69-19666
Graphite fiber NOL rings and biaxial wound pressurized cylinders tested at ambient and cryogenic temperatures for tensile and cyclic fatigue properties
c18 A69-35521
Radius effect on bulging and fracture of through-cracked cylindrical pressure vessels at cryogenic temperatures
[NASA-TN-D-4951] c32 N69-14480
Containment vessel leakage due to penetrations
[NASA-TM-X-1735] c22 N69-17701

PRESSURIZING
Ramp pressurization tests with gaseous helium in thick walled liquid hydrogen tank
[NASA-TM-X-1870] c28 N69-35712
Helium pressurization systems for liquid methane fuel in supersonic transports
[NASA-TN-D-5519] c28 N69-40329

PRESTRESSING
Design and construction of plastic model of prestressed segmented spherical shell
[NASA-CR-1231] c32 N69-11010

PRIMARY COSMIC RAYS
Energy spectra of carbon and oxygen nuclei in primary cosmic radiation, comparing results to earlier measurements and satellite observation
c29 A69-20632
Primary cosmic ray nuclei studies during Gemini 2 flight by nuclear emulsion detector with time resolution capability, describing experiment design and equipment operation
c29 A69-38350

PRIMATES
Circadian rhythms in nonhuman primates - Conference, Atlanta, July 1968
c04 A69-42701

PRINTERS (DATA PROCESSING)
Alphanumeric listing and digital data x-y plotting by high speed printer, describing equipment modifications and control software
c08 A69-33108
Micromation and micrographics, discussing nonimpact printing in computer avoiding output imbalance by high speed microfilm recorder
c34 A69-35059
High speed printer for hard copy alphanumeric listings and digital data plots
[NASA-TN-D-5474] c08 N69-38654

PRINTOUTS
FORTRAN 4 subroutines to generate printed plots as normal output
[NASA-TM-X-1700] c08 N69-13566

PROBABILITY DENSITY FUNCTIONS
Statistical method for evaluating goodness of fit between data set and theoretical distribution of random variables
[NASA-TR-R-313] c19 N69-30610

PROBABILITY DISTRIBUTION FUNCTIONS
Recursive equation for estimating variance of sequential random numbers
[NASA-TN-D-5465] c19 N69-38178

PROBABILITY THEORY
Evaluation method for strapdown spacecraft guidance systems on automated interplanetary missions, using cost and system performance efficiency probability model
[AIAA PAPER 68-828] c21 A69-35953
Log-a-posteriori probability metric for use in sequential decoding
[NASA-TN-D-4930] c07 N69-23163
Probability calculations for fuel clad surface temperatures of nuclear reactors
[NASA-TM-X-1802] c22 N69-26231
Statistical effects of wind and atmospheric turbulence on launch vehicles
[NASA-CR-1410] c20 N69-35570

PROBLEM SOLVING
Practice and operator work load effects on acquisition and performance of code transformation /COTRAN/ task
[NASA-CR-1261] c05 N69-14345
Nonlinear compressible flow problems - half-space of ideal compressible fluid motion due to arbitrary pressure front
[NASA-TT-F-560] c12 N69-27168
Analytical solutions of optimum orbit modifications
[NASA-CR-1379] c30 N69-31362
Chebyshev series solution of nonlinear ordinary differential equations - initial value problems
[NASA-TM-X-1882] c19 N69-36923

PRODUCT DEVELOPMENT
Development and test firing of improved igniter for first stage retrorockets of Atlas Centaur launch vehicle
[NASA-TM-X-1676] c28 N69-13275
Disk radiometer for use in space vacuum-thermal environmental studies
[NASA-TN-D-4925] c14 N69-13311
Performance evaluation of tandem rotor blade of single stage turbine
[NASA-CR-1254] c01 N69-13621
Mechanical characteristics of flexible drive shaft coupling
[NASA-CR-1241] c15 N69-16104
Development of static inverters or converters operating electrically in parallel for space vehicle applications
[NASA-CR-1224] c03 N69-16379
Development of optical pilot warning indicator system for aircraft detection
[NASA-TN-D-5174] c14 N69-27267
Design, development, integration, and testing of Small Scientific Satellites
[NASA-TN-D-4988] c32 N69-33232
Development of automatic quality control device for measuring welded joints
[NASA-TN-D-5304] c15 N69-33800
Development and inverter circuit tests of high temperature cesium vapor thyratrons
[NASA-CR-1435] c03 N69-36843
Computer program for designing compressor blades
[NASA-TN-D-5437] c28 N69-36882

PRODUCTION ENGINEERING
Flat conductor cable technology, discussing design, manufacture, specifications, etc
[ASME PAPER 69-DE-8] c03 A69-28855
Production of glass coatings for molybdenum ion thruster accelerator grids
[NASA-TN-D-5320] c15 N69-30062

PROGRAMS
German analysis of preparatory technology of U.S. space programs, noting effects of hardware development for manned space travel on future planning
c34 A69-15576

PROJECT MANAGEMENT
Interplanetary Pioneer spacecraft development and systems engineering aspects
c31 A69-17605
Failure data role in management of launch operations reliability program
c11 A69-36022
Management system for safety in NASA Manned Space Flight Program, discussing hazard analyses and reduction precedence sequence
[AAS PAPER 69-522] c34 A69-42851
Objectives, current programs, and future mission options in space sciences and applications
[NASA-SP-162] c30 N69-13844

PROJECTILE CRATERING
Numerical method for time dependent compressible Navier-Stokes equations applied to axisymmetric flow field produced by hypervelocity impact, examining viscous effects
[AIAA PAPER 69-354] c32 A69-28288
Hypervelocity micrometeor impact sites identification on aluminized glass, using conchoidal pattern as criterion in analysis
c30 A69-34952
Theoretical prediction of crater size in Al alloy for hypervelocity impact by reduced density particles
[NASA-CR-1196] c32 N69-10225
Projectile shape effects on hypervelocity impact craters in aluminum
[NASA-TN-D-4953] c32 N69-14315
Crater characteristics of 11 metal alloys under hypervelocity impact including effects of projectile density and target temperature
[NASA-TN-D-5135] c32 N69-22994
Momentum transfer from impact into thin aluminum meteor bumper targets

[NASA-TN-D-5492] c32 N69-38809
PROPAGATION MODES
Air gap tolerances effect on admittance of TEM mode dielectric and plasma coated slot antennas determined by variational method
c09 A69-24986
Propagation characteristic model study of kinked Z trace observed on topside ionograms and explained by magnetoionic theory
c13 A69-37893
Equatorial radiation pattern of parallel plate TEM mode axial slot on elliptical conducting cylinders, using wedge diffraction and creeping wave theory
c09 A69-40703
PROPAGATION VELOCITY
Heat finite propagation velocity effects on temperature distribution and heat flux for step temperature change at semiinfinite body surface
[ASME PAPER 69-HT-1] c33 A69-43564
PROPANE
Design, development, and testing of 1000 pound thrust FLOX-propane ablative rocket engine
[NASA-TM-X-1873] c28 N69-35847
PROPELLANT CHEMISTRY
Propellant condensation on surfaces near electric rocket exhaust, calculating particle arrival rates, backflow and desorption energies
[AIAA PAPER 69-270] c28 A69-21252
PROPELLANT COMBUSTION
Characteristics of liquid propellant explosions, analyzing detonation, shock wave formation and deflagration
c27 A69-14474
Saturn fireball thermal environment associated with liquid propellant explosions, using analytical model
c27 A69-14475
Yield and combustion physics of liquid propellant explosions determined from analytic charts
c27 A69-14477
Ammonium perchlorate high temperature decomposition by using carbon dioxide laser pyrolysis/mass spectrometry
[AIAA PAPER 69-143] c06 A69-18111
Shorter combustors for high temperature jet engines of high speed aircraft, considering lifetime, shroud scoops, overheating, warpage, etc
c28 A69-29433
Hydrogen and methane combustion to simulate expansion of storable propellants
[AIAA PAPER 68-635] c33 A69-37188
Acceleration effects on solid propellant rocket motors combustion characteristics
[AIAA PAPER 68-530] c28 A69-39217
Steady state acceleration effects on combustion characteristics of aluminized composite solid propellant
[NASA-TN-D-4914] c33 N69-13231
PROPELLANT PROPERTIES
Characteristics of liquid propellant explosions, analyzing detonation, shock wave formation and deflagration
c27 A69-14474
PROPELLANT STORABILITY
Analytical evaluation of space storable propellants for unmanned Jupiter and Saturn orbiter missions
[NASA-TM-X-1793] c31 N69-24942
PROPELLANT STORAGE
Liquid rocket acoustic instability for hydrogen-oxygen and earth storable propellant combinations
[NASA-TN-D-4968] c28 N69-14384
PROPELLANT TESTS
Short duration tube wind tunnel supersonic testing, noting Saturn S-1C base heating and solid propellant rocket base burning tests
[AIAA PAPER 69-335] c11 A69-28271
Acceleration effects on solid propellant rocket motors combustion characteristics
[AIAA PAPER 68-530] c28 A69-39217
Explosive hazard evaluation of liquid oxygen liquid hydrogen propellants
[NASA-TN-D-5382] c27 N69-35321
PROPELLANT TRANSFER
Cryogenic flexibility of thin polymeric film plies for use as spacecraft positive expulsion bladders
c15 A69-16486
Pressurant gas requirements for pressurized discharge of liquid hydrogen from propellant tanks for optimum pressurization system designs
[AIAA PAPER 69-526] c28 A69-32737
Excessive extrapolation limitations in applying transient data to low gravity fluid behavior for orbital refueling systems, presenting orbital fluid transfer experiment
[AIAA PAPER 69-566] c31 A69-32755
Hydrogen gas pressure requirements during pressurization and transfer of liquid hydrogen from spherical tanks
[NASA-TN-D-5387] c28 N69-33211
PROPELLER BLADES
Numerical sclution of coupled, nonlinear, equation of motion for rigid blade to simulate response sensitivity and blade-motion stability of fully articulated rotor
[NASA-TN-D-5032] c01 N69-17289
PROPELLER DRIVE
Aerodynamic characteristics of large semi-span V/STOL tilt-wing with single propeller tested for modes of propeller rotation
[NASA-TN-D-5016] c01 N69-17312
PROPORTIONAL CONTROL
Fluidic proportional thruster system for sounding rocket control
[ASME PAPER 68-WA/FE-32] c14 A69-16105
PROPORTIONAL COUNTERS
Boron 10 absorption cross sections from counting ratios measurements of boron trifluoride proportional counter used to monitor neutron fluxes
c24 A69-33753
PROPRIOCEPTORS
Proprioceptor influence on operator performance in manual control situations
[NASA-CR-1248] c05 N69-14768
PROPULSION SYSTEM CONFIGURATIONS
Interplanetary probe missions with solar electric propulsion systems
[NASA-TN-D-5293] c30 N69-29738
PROPULSION SYSTEM PERFORMANCE
High voltage mercury electron bombardment ion thruster power efficiency
[ECS PAPER 170D] c28 A69-16233
Particle free path estimates for axisymmetric high specific impulse plasma accelerators, discussing collisionless plasma simulated by computer
[AIAA PAPER 69-278] c28 A69-21233
Background pressure and magnetic field shape effect on MPD thrustor performance, testing radiation cooled thrustors
[AIAA PAPER 69-243] c28 A69-21239
Performance boundaries of space propulsion systems containing nuclear electric stages
[AIAA PAPER 69-249] c22 A69-21249
30 cm diameter mercury bombardment low impulse thrustor development for potential space applications, discussing performance and control
[AIAA PAPER 69-238] c28 A69-21256
Performance potential of high speed ocean-going air cushion vehicles with aircraft nuclear power plants
[AIAA PAPER 69-416] c02 A69-30480
Nuclear rockets as Saturn 5 third stages, emphasizing increased payload or velocity utility and resulting engine and stage requirements
[AIAA PAPER 69-555] c31 A69-31849
Nuclear solid core rocket engine performance for interplanetary orbital launch of spacecraft by multiorbit injection
[AIAA PAPER 69-535] c22 A69-32660
Stator setting effect on single stage turbine performance, considering blade loss and surface velocity distribution
[AIAA PAPER 69-525] c28 A69-32686
Discharge chamber plasma processes in electron bombardment ion thrustors, considering factors affecting thrustor performance
[AIAA PAPER 69-494] c28 A69-32735
Steady state and dynamic distortion influence on performance and stall of turbofan engine, discussing compressor instrumentation, tests and simulation data
c28 A69-35175

Propulsion system performance relationship to manned planetary mission capability, discussing anticipated performance of advanced propulsion concepts
c28 A69-38118
ATS 3 spacecraft ammonia-fueled resistojet engine test performance
[AIAA PAPER 68-553] c28 A69-39754
Characteristics, performance potential, and problems of solid, liquid, and gas core nuclear rocket engines
[NASA-TM-X-1685] c22 N69-10067
Investigation of SA-501 S-4B auxiliary propulsion system anomalies
[NASA-TN-D-5207] c28 N69-26224
Propulsion systems for manned exploration of solar system
[NASA-TM-X-1864] c28 N69-34674

PROPULSIVE EFFICIENCY
Performance evaluation of plain rotor blade with plow type vortex generators
[NASA-CR-1342] c28 N69-24223
Performance characteristics of truncated, conical plug nozzle with cylindrical outer shroud
[NASA-TM-X-1807] c26 N69-27840

PROTECTIVE COATINGS
Plastic backing films removal from carbon electron microscope replicas by maintaining specimens in horizontal position
c14 A69-21651
Ductile metal clads and coatings of silicides, aluminides and noble metals to protect Cr alloys against nitrogen embrittlement and air oxidation
c17 A69-26495
UV irradiation effects on ZnO spacecraft thermal control coating pigments, discussing photo-Hall, luminescence and electron paramagnetic resonance measurements
[AIAA PAPER 69-639] c18 A69-33288
Second surface mirror used as coating for spacecraft thermal control
c33 A69-37290
Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion
[AIAA PAPER 69-979] c33 A69-40359
Vacuum integrating sphere for measuring solar absorptance in space environment to determine thermal control coatings qualifications
[AIAA PAPER 69-1021] c11 A69-40392
IR directional and hemispherical emittance of spacecraft thermal control coatings, comparing values determined by various measurement techniques
c14 A69-41633
Integral coverslip development for Si solar cells, considering borosilicate glass fusing on cell surface and RF and high vacuum ion beam sputtering
c03 A69-42272
Protective coatings for chromium alloys for use in advanced air breathing applications
[NASA-TN-D-5157] c17 N69-23084

PROTEINS
High oxygen tension effect on transport and incorporation of exogenous leucine and protein synthesis in Pseudomonas saccharophila cells
c04 A69-13433
Dynamic differential thermal analysis with He flow performed on biological specimens, proteins and starches, showing discrete decomposition peaks monitoring pyrolysis process
c06 A69-31807

PROTON BEAMS
Proton beams uniformity available at NASA synchrocyclotron designed for radiation biology research by simulating space radiation environment
c11 A69-15992
Elastic scattering cross sections for 21-MeV incident protons measured for nuclei differing in mass, determining optical model potential
c24 A69-35489

PROTON BELTS
Inner radiation zone including data on electrons, protons and heavier particles and results from high altitude nuclear tests
c29 A69-27144
Proton dose in receiver behind combination electromagnetic and material shield, calculating dose for Van Allen and solar proton event spectra
c22 A69-31522
Nighttime protonosphere thermal balance from Alouette 2 electrostatic probe measurements of electron temperature and concentration in magnetosphere
c13 A69-43181
Model environment of inner belt proton fluxes
[NASA-SP-3024-VOL-5] c24 N69-28911

PROTON ENERGY
Microscale fluctuations in interplanetary magnetic field, considering proton thermal energy and magnetic field energy densities
c30 A69-24100
Low energy solar protons entry into magnetosphere on 26 May 1967 showing diffusion control
c29 A69-31984
Cosmic X ray bremsstrahlung due to collisions of suprathermal protons with ambient electron, giving clue about diffuse sky background of X rays
c29 A69-40643
Intermediate energy protons elastic and quasi-elastic scattering from light nuclei, correlating p-D, p-He-3, p-p and p-He-4 data with various scattering models
c24 A69-43123

PROTON FLUX DENSITY
Ground based solar proton monitoring, considering particle intensities and radiation dose rates from riometer absorption as function of time
c29 A69-32321

PROTON IMPACT
First Born approximation cross sections for He excitation from ground state by proton impact calculated, using wave functions
c24 A69-17027

PROTON IRRADIATION
Biological effects on rhesus monkeys of high energy protons compared to effects of cobalt 60 gamma radiation
c04 A69-13498
Proton induced voltage breakdowns in polymeric materials
[NASA-TM-X-1688] c18 N69-10066
Analysis of annealed and proton irradiated silicon
[NASA-TN-D-5119] c26 N69-22552

PROTON SCATTERING
Differential cross sections for elastic scattering of 600 Mev protons from He 3 between 19 and 45 degrees
c24 A69-13464
Asymmetry of polarized protons scattered from He 4 at 540 MeV for laboratory angles between 4 and 42 degrees
c24 A69-14966
High energy scattering approximation valid from small to large angles, discussing errors and proton scattering by He
c24 A69-29008
Inelastic proton scattering cross sections for target nuclei in 2s-1d shell calculated in distorted wave Born approximation with projected Hartree-Fock wave functions
c24 A69-41045
Intermediate energy protons elastic and quasi-elastic scattering from light nuclei, correlating p-D, p-He-3, p-p and p-He-4 data with various scattering models
c24 A69-43123
Differential cross section and polarization measurements for elastic scattering of high energy protons from light nuclei
c24 A69-43125
Polarization, differential cross section, and total reaction cross section data for proton scattering
[NASA-TN-D-5067] c24 N69-22934

PROTONS
Cosmic gamma ray spectra from metagalactic proton-antiproton annihilation
c29 A69-21459
Phonons, electrons and protons in ferroelectrics and hydrogen bonded ferroelectrics, examining higher frequency optical and lower frequency dielectric

properties
c26 A69-32262
Proton-antiproton high energy elastic scattering by bosons exchange, introducing vertex functions for nonlocal Lagrangian
c24 A69-39467
Elastic scattering of 21 MeV protons from nitrogen 14, oxygen 16, argon 40, nickel 58, and tin 116
[NASA-TN-D-4932] c24 N69-12840
Diffraction dissociation of protons on complex nuclei of photoemulsion
[NASA-TT-F-535] c29 N69-24924

PROTOSTARS
Residual interstellar gas from protostar formation detected as high luminosity IR object
c29 A69-27593
Primitive solar nebula physical model considered under angular momentum conservation in collapsing fragment
c30 A69-36074

PROTOTYPES
Optical design of Wolter type 1 glancing incidence X ray telescope for 6-100 A wavelength region, describing results of laboratory and rocket flight tests of prototype
c14 A69-21087
Prototype lunar gravity simulator using magnetic air bearings and spring motors
[NASA-CR-1233-VOL-1] c05 N69-11675
Performance of prototype hydrogen oxygen electrolytic regenerative fuel cell stack with gas storage tank
[NASA-CR-1244] c03 N69-18885
Full scale dynamic landing impact investigation of prototype lunar module landing gear
[NASA-TN-D-5029] c31 N69-20965
Monte Carlo method for estimating costs and optimal testing of Explorer size spacecraft
[NASA-TN-D-5283] c34 N69-31333

PSEUDOMONAS
High oxygen tension effect on transport and incorporation of exogenous leucine and protein synthesis in Pseudomonas saccharophila cells
c04 A69-13433

PSYCHOLOGICAL EFFECTS
Aerospace Medicine and Biology bibliography on biological, physiological, psychological, and environmental effects on man during aerospace flight
[NASA-SP-7011/57/] c04 N69-16537

PSYCHOLOGICAL FACTORS
Biological, psychological and technological requirements in astronaut nutrition programs, examining preservation and reconstitution techniques
c05 A69-15388

PSYCHOMOTOR PERFORMANCE
Circadian rhythm phase relationships between photoperiodism and heart rate, locomotor activity and deep body temperature /DBT/ in unrestrained monkeys
c04 A69-42706
Efficacy of sensory feedback information given during training period for improving human performance in producing memorized movement pattern
[NASA-CR-1251] c05 N69-13926

PSYCHOPHYSICS
Psychophysical methods for determining perception threshold of angular acceleration in man during vertical rotation
c04 A69-15969

PULMONARY CIRCULATION
Static pressure-diameter measurements on small pulmonary blood vessels of frogs, analyzing capillary septal area as function of intravascular pressures noting high compliance
c04 A69-40974

PULSARS
Rotating and oscillating magnetic neutron stars causing pulsars radio and optical signals, stressing UV line emissions theory
c30 A69-20624
Radio emission from magnetic neutron stars as possible model for pulsars, noting optical and IR emission bands
c30 A69-20729
Instability of stellar structures intermediate between white dwarfs and neutron stars shown by stellar models, discussing pulsar signals periodicities
c30 A69-20770
Spin down effects on neutron stars, discussing decrease of period of PSR 0833-45 as result of differential rotation instability
c30 A69-32803
Night sky Cerenkov light detectors observations of pulsars CP 1133, NP 0532 and NP 0527, noting instrumental limitation in detecting ultrashort light pulses
c30 A69-34994
Radial pulsations of neutron star losing mass, interpreting Crab Nebula pulsar observed period and secular increase of period
c30 A69-37573
Pulsed X ray emission associated with pulsar NP 0532 in Crab Nebula measured by six element detector on Aerobee 150 rocket
c29 A69-37574
Crab Nebula pulsars radio properties, possible neutron star origin, interstellar gas and magnetic fields, etc
c30 A69-42556

PULSE AMPLITUDE
High latitude ionization spikes observed by POGO spacecraft, noting frequency correlation with magnetic disturbances and development by high energy electron injections
c29 A69-28950
Cataloged pulse response curves for different types of conventional low pass filters
[NASA-TN-D-5494] c07 N69-40099

PULSE CODE MODULATION
PCM data handling system for NASA Space Tracking and Data Acquisition Network with explanation for output capabilities, noting BIOSAT project
c07 A69-36242
Split phase PCM code modulated carrier transmission characteristics determined for amplitude, phase and frequency shift keying, assuming random bit pattern and noncoherent modulation
c07 A69-39451
Log-a-posteriori probability metric for use in sequential decoding
[NASA-TN-D-4930] c07 N69-23163

PULSE DURATION
Radial pulsation mode of convective envelopes in adiabatic equilibrium for variable M red supergiant stars
c30 A69-30766
Night sky Cerenkov light detectors observations of pulsars CP 1133, NP 0532 and NP 0527, noting instrumental limitation in detecting ultrashort light pulses
c30 A69-34994
Cataloged pulse response curves for different types of conventional low pass filters
[NASA-TN-D-5494] c07 N69-40099

PULSE FREQUENCY MODULATION
Oscillations in pulse modulated satellite attitude control systems
[NASA-CR-1369] c21 N69-29967

PULSE MODULATION
Terrain bias error analysis in pulse modulated planetary radar altimeters
[NASA-TN-D-5220] c21 N69-26195

PULSE RATE
Ultrasonic pulse velocity and attenuation measurement in presence of noise, using coherent detection and signal averaging
c14 A69-29564

PULSED JET ENGINES
Multipulse thruster module design and development tests for spacecraft attitude control, noting micropulse solid propellant rocket motor
c03 A69-11762

PULSED LASERS
Carbon dioxide laser with two gas absorption cells in cavity for emission wavelength control and HF pulsed mode of operation
c16 A69-21088
Sulfur dioxide-helium laser pulsed and CW submillimeter outputs
c16 A69-24005
Simultaneous HCN and HOH laser emission in pulsed discharge through mixture containing H, C, N, and O

c16 A69-26330
PULSED RADIATION
Thermodielectric radiometer for transient radiant flux short duration pulse measurement, using thermally induced depolarization of polymer film dielectric
[AIAA PAPER 68-403] c14 A69-12392
Picosecond light pulse measurement by two photon excitation of photographic film
c14 A69-20165
Nuclear energized pulsational instability of stars based on linear quasi-adiabatic theory, including models with hydrogen burning shells
c30 A69-27576
PUMP SEALS
Flow and pressure fields for spiral grooved pumping seal with specified groove dimensions and Reynolds number
[ASLE PICFS PREPRINT 30] c15 A69-30481
PUMPS
Pneumatic driving system for heart assist or total replacement pumps, discussing design features and performance characteristics
c05 A69-42983
Two phase hydrogen flow in pump inlet line
[NASA-TN-D-5258] c15 N69-29476
Analytical model for use in design of pump inlet accumulators for prevention of liquid rocket longitudinal oscillation
[NASA-TN-D-5394] c28 N69-33319
PURIFICATION
Organic geochemical laboratories solvent purification procedures
[NASA-TM-X-1746] c06 N69-18962
PYRIDINE NUCLEOTIDES
Flavoprotein/cytochrome b/559/ role as branch of Halobacterium electron transport in DPNH oxidase determined by salt dependence of reduced DPNH
c06 A69-37101
PYROLYSIS
Charring phenolic nylon ablator material pyrolysis and surface recession for cyclic and constant combined convective and radiative heating
[AIAA PAPER 69-151] c33 A69-18055
Yttrium effect on rate of thermal decomposition of silver carbonate powder and pressed pellets by isothermogravimetric analysis, examining water vapor, Co 60 gamma radiation and temperature effects
c06 A69-30442
Dynamic differential thermal analysis with He flow performed on biological specimens, proteins and starches, showing discrete decomposition peaks monitoring pyrolysis process
c06 A69-31807
Effect of chemical properties of pyrolysis gases on heat shield mass required for lifting reentry vehicle in typical reentry trajectory
[NASA-TN-D-4975] c32 N69-14306
Chemical equilibrium of ablation materials including condensed species
[NASA-TN-D-5391] c33 N69-34966
PYROLYTIC GRAPHITE
Periodicity of magnetothermal oscillations in pressure annealed pyrolytic graphite compared with hole carriers
c26 A69-29005
Magnetcthermal oscillations in pressure annealed pyrolytic graphite
[NASA-TN-D-5488] c26 N69-39239
PYROLYTIC MATERIALS
High temperature capacitor consisting of thin wafers of pyrolytic boron nitride noting fabrication, dissipation factor and capacitance
c03 A69-15299
Thermochemical data from simulated pyrolysis gas flow through ablating char layer
[NASA-TN-D-5464] c33 N69-38271
PYROTECHNICS
Pyrotechnic and explosive elements in space systems - Conference, Tarbes, France, July 1968
c27 A69-23003
Pyrotechnic activated calorimeter for reentry package design of vehicles entering earth atmosphere at lunar return velocities
c11 A69-23026
PYRROLES
Syntheses and properties of pyrrone polymers
[NASA-CR-1310] c18 N69-26448
Electrical properties and high energy radiation effect on Pyrrone polymers
[NASA-CR-1367] c18 N69-29559
Synthesis of Pyrrone laminates from sulfone dianhydride
[NASA-CR-1404] c30 N69-31960

Q

Q SWITCHED LASERS
Spectral emission of visible from Q switched dye lasers
[NASA-CR-1374] c16 N69-29934
QUALITY CONTROL
Electromagnetic interference /EMI/ created by noise coupling through conductive paths, discussing responsibility for control within systems management
c07 A69-18944
High pressure storage vessels for gaseous hydrogen, discussing failure, manufacturing controls and access for internal nondestructive inspection
[ASM PAPER D8-14.1] c15 A69-19666
Computer program for component quality control and reliability data analysis
[NASA-TN-D-5009] c15 N69-17988
Development of automatic quality control device for measuring welded joints
[NASA-TN-D-5304] c15 N69-33800
QUANTITATIVE ANALYSIS
X Ray fluorescence of rock samples as applied to geological problems, noting standard deviations for element distribution
c14 A69-10890
Quantitative method for determination of fission gases trapped in irradiated fuel forms
[NASA-TM-X-1893] c22 N69-37225
QUANTUM ELECTRODYNAMICS
Interstellar extinction models of classical Mie particles and quantum mechanical polycyclic aromatic molecules
c30 A69-23679
QUANTUM MECHANICS
Scattering, reactions, and decay in nonrelativistic quantum mechanics
[NASA-TT-F-510] c24 N69-25848
QUANTUM THEORY
Quantum theory of electron gas with anomalous magnetic moments in intense magnetic fields, noting pair creation from thermodynamic energy in system
c24 A69-19782
Quantum theory of particle-harmonic oscillator collision applied to gas-surface interactions at cryogenic temperatures
[NASA-TN-D-4982] c24 N69-14288
Quantum communication systems performance evaluated by communication efficiency parameter
[NASA-TR-R-320] c07 N69-39264
QUARTZ
Quartz fiber adhesion to Re measured in LEED /low energy electron diffraction/ apparatus for clean and O layer surfaces, noting brittle fracture
c17 A69-35182
Low energy electron diffraction analysis of quartz fiber adhesion to rhenium crystal surface
[NASA-TN-D-5229] c17 N69-25363
Quartz-insulated, single-wire thermocouples installed on thin-wall rocket cooling tubes to measure hot-gas-side wall temperatures
[NASA-TN-D-5291] c14 N69-29553

R

RADAR DATA
Effect of spacecraft onboard radar range and range rate data and accuracy on unmanned probe entry guidance corridor
[NASA-TN-D-4852] c21 N69-16503
Exametnet meteorological rocket launchings and data dissemination, 1967 - tables
[NASA-SP-176] c20 N69-22570
RADAR DETECTION
Radar attitude sensing system for determining vehicle roll, pitch, yaw, altitude and velocity of earth and lunar orbital vehicles
c07 A69-13183

RADAR MEASUREMENT
Temperature profiles and associated wind profiles obtained with Jimsphere/FPS-16 radar system at Cape Kennedy, discussing remote CAT detector assessment
c20 A69-33739
Tradeoff analysis on radar and laser space altimeter systems for sea surface geodesy
[NASA-CR-1298] c14 N69-21117
RADAR NAVIGATION
V/STOL aircraft radar inertial navigation system, describing approach and landing phase flight test results
[AAS PAPER 69-401] c02 A69-42831
RADAR SCATTERING
Radar backscatter and rocket profiles of ionospheric electron temperature, noting agreement in daytime flight measurements
c29 A69-25162
RADAR TRACKING
Regression analysis procedures for evaluating tracking system measurement errors
[NASA-TN-D-4826] c19 N69-14476
Radar observations and radiophysical investigations of Venus
[NASA-TT-F-536] c30 N69-38643
RADIAL FLOW
FORTRAN 4 program for estimating off-design performance of radial inflow turbines
[NASA-TN-D-5059] c03 N69-19829
Test performance of radial inflow turbine for Brayton cycle space power system
[NASA-TN-D-5090] c03 N69-20937
Approximative solution for dynamic response of flexible rotor blade to radially moving force
[NASA-TN-D-5410] c32 N69-36220
RADIANCE
Infrared horizon radiance profiles for winter conditions based on Scanner project flight test
[NASA-TN-D-4905] c21 N69-14346
Horizon radiance profile analysis for determining atmospheric temperature
[NASA-TN-D-5068] c13 N69-19024
RADIANT COOLING
Nongray absorption and radiation cooling on smooth symmetric blunt bodies included in modified Maslen flow field method for radiation and large blowing
[AIAA PAPER 69-637] c01 A69-33290
RADIANT FLUX DENSITY
Thermodielectric radiometer for transient radiant flux short duration pulse measurement, using thermally induced depolarization of polymer film dielectric
[AIAA PAPER 68-403] c14 A69-12392
Radiation measurements inside Apollo 4 and 6 command modules during passage through trapped radiation belts
[AIAA PAPER 69-17] c05 A69-18202
Background radiation intensity upper limits for mm and submillimeter wavelengths in interstellar medium, noting intense flux in far IR
c30 A69-19404
Cosmic ray intensity during solar cycles, considering minima relationship to Bartel index maxima and solar wind modulation theory
c29 A69-29967
Radiant energy transfer measurements in air plasma in reflected region of arc-driven shock tube
[NASA-CR-1390] c25 N69-38227
Large thin film cadmium sulfide solar cell electrical characteristics over ranging temperatures and radiant intensities
[NASA-TM-X-1899] c03 N69-38767
RADIANT HEATING
Initial radio frequency gas heating experiments to simulate thermal environment in nuclear light bulb reactor
[NASA-CR-1311] c22 N69-23450
RADIATION ABSORPTION
Radiation attenuation cross sections of monatomic and diatomic xenon gas from UV absorption measurements near resonance line
c24 A69-12551
Nongray absorption and radiation cooling on smooth symmetric blunt bodies included in modified Maslen flow field method for radiation and large blowing
[AIAA PAPER 69-637] c01 A69-33290
Vacuum integrating sphere for measuring solar absorptance in space environment to determine thermal control coatings qualifications
[AIAA PAPER 69-1021] c11 A69-40392
Interstellar extinction in UV from zeta and epsilon Persei spectra obtained with scanner attached to telescope mounted in pointed Aerobee rocket
c30 A69-40772
Absorption of black-body radiation by ice cryodeposits on metal substrates
[NASA-TN-D-5181] c23 N69-22769
Simple equations for temperature distributions in radiating gray gases
[NASA-TN-D-5226] c33 N69-25312
RADIATION BELTS
Radiation measurements inside Apollo 4 and 6 command modules during passage through trapped radiation belts
[AIAA PAPER 69-17] c05 A69-18202
RADIATION COUNTERS
NASA lunar receiving laboratory for lunar rock samples examination by gamma ray spectrometry for induced radioactive nuclides and naturally occurring isotopes
c11 A69-38271
RADIATION DAMAGE
Radiation damage and recovery of lithium-diffused silicon p-n solar cells, measuring photovoltaic parameters as function of gamma radiation fluence
c03 A69-35694
Solar cell radiation damage during 416.8 days in synchronous orbit on satellite ATS 1, discussing radiation shields
c03 A69-35704
Diffusion lengths of silicon solar cells after radiation damage and annealing by X ray method
[NASA-TM-X-1894] c03 N69-37827
RADIATION DETECTORS
Cosmic ray detectors design for medium, low and very low energy events on IMP-1 spacecraft, noting PCM format
c07 A69-41738
Theoretical feasibility of detecting laser radiation scattered from plasma
[NASA-TN-D-5311] c25 N69-36939
RADIATION DISTRIBUTION
Emission and frequency shift angles of anti-Stokes radiation from trapped filaments of laser light in liquids
c23 A69-10012
Radiating collinear open ended waveguides and near field coupling analyzed using simultaneous integral equations and Fourier series expansion of aperture field
c09 A69-24984
Radiation fields from energetic electron moving in helical orbit in magnetoactive plasma, using Maxwell equations
c30 A69-39965
Computer program for line-by-line calculation of spectra from diatomic molecules and atoms assuming Voigt line profile
[NASA-TN-D-5088] c24 N69-21462
Tabulated values of configuration factors between two spheres and parts of two spheres
[NASA-SP-3050] c30 N69-37777
RADIATION DOSAGE
Radiation measurements inside Apollo 4 and 6 command modules during passage through trapped radiation belts
[AIAA PAPER 69-17] c05 A69-18202
Proton dose in receiver behind combination electromagnetic and material shield, calculating dose for Van Allen and solar proton event spectra
c22 A69-31522
Ground based solar proton monitoring, considering particle intensities and radiation dose rates from riometer absorption as function of time
c29 A69-32321
RADIATION EFFECTS
Photodegradation of organic polymers by UV radiation exposure, emphasizing polyvinyl chloride photochemistry and radiation stabilization
c18 A69-10861

Biological effects on rhesus monkeys of high energy protons compared to effects of cobalt 60 gamma radiation
c04 A69-13498
Polymer films tensile properties after exposure to gamma radiation in vacuum, noting chain scission and cross linking
[ASME PAPER 68-WA/RP-6] c18 A69-16160
Electric field effects on thermal annealing of electron irradiation damage in p-channel MOSFET device
c09 A69-16562
Electron radiation damage in MOSFET devices using bias temperature treatments
c26 A69-16877
Annealing temperature of radiation defects in phosphorus doped silicon, discussing isochronal recovery characteristics of solar cells with different donor and oxygen concentrations
c26 A69-24006
Mortality kinetics of Drosophila melanogaster, comparing effects of gamma radiation-induced life shortening and natural aging
c04 A69-30444
UV irradiation effects on ZnO spacecraft thermal control coating pigments, discussing photo-Hall, luminescence and electron paramagnetic resonance measurements
[AIAA PAPER 69-639] c18 A69-33288
Photodisintegration of ultrahigh energy cosmic rays by universal radiation field, analyzing implications on origin and propagation time
c29 A69-35006
Optimum solar cell cover glass systems selected by studying interplanetary space environment effects of proton impact, temperature and concurrent illumination on radiation damage
c03 A69-35702
UV solar radiation variation effects on Mars and Venus upper atmosphere temperatures
c30 A69-37136
Life sciences and space research on biological effects of radiation in space - COSPAR Conference, Tokyo, May 1968
c04 A69-37612
Photospheric radiation field role in temperature inversion of stellar chromospheres with dominant H ion opacity, postulating mechanical energy dissipation
c30 A69-38173
Thermal calculations of objects near lunar surface, considering IR emission directivity effects
c30 A69-43254
Effects of neutron irradiation on silicon voltage regulator Zener diodes
[NASA-TN-D-4923] c09 N69-10250
Human responses to aerospace environment in relation to microwave, light, thermal, and ionizing radiation
[NASA-CR-1205-VOL-1] c04 N69-12434
Proton irradiation effects on minority carrier lifetime in silicon and gallium arsenide semiconductor materials
[NASA-TN-D-5028] c26 N69-18897
Degradation of multiplier phototubes exposed to spatial radiations
[NASA-CR-1304] c14 N69-20777
Radiation induced reduction of ammoniacal nickel /2/ sulfate to metallic nickel
[NASA-TN-D-5213] c06 N69-24940
Electrical properties and high energy radiation effect on Pyrrone polymers
[NASA-CR-1367] c18 N69-29559

RADIATION LAWS

Radiation models using discrete radiator ensembles having applications to analysis of forward and backscatter from rough surfaces, clutter and chaff models, etc
c07 A69-10556

RADIATION MEASUREMENT

Energy spectra of carbon and oxygen nuclei in primary cosmic radiation, comparing results to earlier measurements and satellite observation
c29 A69-20632
Pulsed X ray emission associated with pulsar NP 0532 in Crab Nebula measured by six element detector on Aerobee 150 rocket
c29 A69-37574
Infrared radiation measurements in space environment simulator using integral equations
[NASA-TN-D-5166] c29 N69-28111
Lunar Orbiter 1 terrain assessment photographs and preliminary selenodesy, micrometeoroid, and radiation data
[NASA-SP-197] c30 N69-39213

RADIATION MEASURING INSTRUMENTS

Lunar composition analysis by measuring atomic and nuclear radiation emission from orbiter
[AAS PAPER 68-197] c30 A69-11475
Vacuum ultraviolet detector-spectroscopy systems for capsule reentry measurements
[NASA-CR-1268] c09 N69-18761

RADIATION MEDICINE

Gravitational and acceleration effects on man and organisms, and biological effects of radiation
[NASA-TT-F-528] c05 N69-38701

RADIATION PRESSURE

Solar radiation pressure windmill effect in rotational bursting and elimination from solar system of small magnetic celestial bodies
c30 A69-39584

RADIATION PROTECTION

Radiation protection plan for Apollo lunar mission based on real time monitoring of solar activity and radiation in spacecraft
[AIAA PAPER 69-19] c29 A69-18113
Integral coverslip development for Si solar cells, considering borosilicate glass fusing on cell surface and RF and high vacuum ion beam sputtering
c03 A69-42272

RADIATION SHIELDING

Radiation compensating thermocouple for gas temperature measurement, noting advantage over single thermocouples
c14 A69-14916
COHORT-2 Monte Carlo computer program written in FORTRAN 4 to model radiation shielding problems
c08 A69-29004
Proton dose in receiver behind combination electromagnetic and material shield, calculating dose for Van Allen and solar proton event spectra
c22 A69-31522
Monte Carlo method application to neutron streaming in hemispherical air-filled ducts in water tank to determine leakage through nuclear reactor shields
c22 A69-35178
Solar cell radiation damage during 416.8 days in synchronous orbit on satellite ATS 1, discussing radiation shields
c03 A69-35704
FORTRAN program for radiation shield optimization using steepest descent method
[NASA-TM-X-1769] c22 N69-20854
Neutron interaction behavior of beryllium oxide and molybdenum reflectors for nuclear reactors
[NASA-TM-X-1822] c22 N69-29593
Tungsten and depleted uranium in mimimum weight, layered shield comparisons for space power reactor
[NASA-TM-X-1874] c22 N69-35817
Gamma ray transport portion of COHORT 2 Monte Carlo shielding code
[NASA-TM-X-1877] c22 N69-35848

RADIATION SOURCES

Discrete source hypothesis for interpreting high energy cosmic gamma ray measurements obtained by OSO-3 spacecraft
c29 A69-20699
Iron line absence in emission spectrum of thermal X ray sources, constraining proposed thermal models
c29 A69-22231
Far IR source in galactic center detected at 100 microns, noting thermal emission of interstellar dust grains as possible mechanism
c30 A69-22264
X ray sources model, describing possible ring of matter around white dwarf near end of active evolution
c29 A69-35204
NASA Small Astronomy Satellite /SAS/ program for radiation source detection
[NASA-TN-D-5099] c31 N69-21017

RADIATION SPECTRA
Annihilation gamma ray spectra from equilibrium spectra of secondary galactic positrons
c29 A69-29948
Cosmic gamma rays spectrum from neutral pions production and decay in metagalactic cosmic ray p-p collisions, deriving models based on Einstein general relativity theory
c29 A69-40641
RADIATION THERAPY
Soviet handbook on operation principles, use, and installation of electrocardiographs and electromedical apparatus for therapeutics
[NASA-TT-F-523] c05 N69-27577
RADIATION TOLERANCE
NASA Plum Brook Reactor Facility /PBRF/ for determining radiation tolerance to support nuclear power application in space for propulsion and power
c22 A69-13128
Unfilled Pyrrone prepared from powder into molded parts for flexural tests at elevated temperatures observed for stability to electron irradiation in air
c18 A69-35529
Radiation resistance of cylindrical shells in ideal compressible acoustic medium
[NASA-CR-1437] c32 N69-40935
RADIATIVE HEAT TRANSFER
Downstream radiation flux distribution calculated for blunt entry bodies, considering self absorption effects
c33 A69-12547
Correlations of stagnation point radiative heat transfer for earth reentry, noting use of nongray absorption coefficient models
c33 A69-14736
Inverse problems in radiative transfer applied to remote measurements of IR radiation from planetary atmospheres, noting temperature and water vapor inversions
c13 A69-17617
Combined radiation and conduction heat transfer equation applied to temperature profile around opaque hollow sphere and in solid condensed gas layer
[SAE PAPER 690197] c33 A69-18303
Combined conduction and radiation transfer equations solutions for absorbing-emitting gas, obtaining slip coefficient for diffusion solution correct boundary condition
c33 A69-27784
Atmospheric ozone vertical distribution and total amount determined by radiative transfer and perturbation theory, presenting error analysis
c13 A69-28493
Nongray equilibrium radiative heat transfer in viscous radiating shock layer around blunt body entering high temperature nonisothermal carbon dioxide-nitrogen atmosphere
[AIAA PAPER 69-636] c33 A69-33258
Perturbation solution to blunt body stagnation region flow of radiating gas with radiation heat transfer
[NASA-TR-R-295] c12 N69-10788
Solution to radiation-coupled stagnating flow with nongray emission over hypervelocity blunt body
[NASA-TR-R-299] c33 N69-16268
Effect of shock precursor heating on radiative flux to blunt bodies
[NASA-CR-1265] c33 N69-17438
Ablation product absorption and line transitions effects on shock layer radiative transport around blunt body
[NASA-CR-1264] c33 N69-19117
Measurement of radiative thermal conduction of ideal powder as function of temperature
[NASA-TN-D-5063] c33 N69-20008
Thermal radiation exchange between surfaces and enclosures
[NASA-SP-164-VOL-2] c33 N69-30317
Calculation for study of vertical and horizontal positioned lunar radiators
[NASA-TM-X-1846] c33 N69-32683
Tabulated values of configuration factors between two spheres and parts of two spheres
[NASA-SP-3050] c30 N69-37777
Integral relations solution for radiating, nonadiabatic, inviscid flow over blunt body
[NASA-TN-D-5480] c33 N69-40356
RADIATORS
Radiation models using discrete radiator ensembles having applications to analysis of forward and backscatter from rough surfaces, clutter and chaff models, etc
c07 A69-10556
RADII
Radius effect on bulging and fracture of through-cracked cylindrical pressure vessels at cryogenic temperatures
[NASA-TN-D-4951] c32 N69-14480
Telemetry data from image-motion compensation sensor on Lunar Orbiter 1 spacecraft for determining radius of moon
[NASA-TN-D-5231] c30 N69-29115
RADIO ALTIMETERS
Terrain bias error analysis in pulse modulated planetary radar altimeters
[NASA-TN-D-5220] c21 N69-26195
RADIO ANTENNAS
Microwave radiometric sensor operational principles and capabilities, discussing antennas and radiometric receivers
c07 A69-26976
Transmission loss and effects on antenna radiation patterns and impedance produced by thermally degraded ablation materials
[NASA-TN-D-4879] c07 N69-10885
RADIO ASTRONOMY
Laser optical simulation of spaceborne radio astronomy interferometer experiment
[NASA-TN-D-5357] c30 N69-36892
RADIO ASTRONOMY EXPLORER SATELLITE
RAE-A satellite design, simulation and flight performance, discussing gravity gradient stabilization
c31 A69-18328
Radio astronomy Explorer A attitude determination via disk-oriented programming ground support system for reducing and calibrating telemetry data, attitude prediction and command, etc
[AIAA PAPER 69-983] c08 A69-40363
Cosmic radio background noise spectrum near north galactic pole based on Radio Astronomy Explorer satellite experiments
c30 A69-42375
RADIO ATTENUATION
Flow field predictions for radio attenuation measurements on blunt reentry cone
[NASA-CR-1308] c07 N69-28223
RADIO ECHOES
Conjugate echoes in Alouette 2 topside sounder ionograms explained by multiple reflections between conjugate points of field line, noting magnetospheric waveguides role
c07 A69-20045
RADIO EMISSION
Venus microwave phase effect analyzed assuming dry massive Venus atmospheric model, discussing heat transfer processes
c30 A69-12108
Galactic Jupiter Probes investigating Jupiter atmosphere and emissions and deep space cosmic radiation
c30 A69-12303
Diurnal variations of low latitude VLF emissions observed at Hiraiso, Japan
c07 A69-13900
Radio emission from magnetic neutron stars as possible model for pulsars, noting optical and IR emission bands
c30 A69-20729
Radio emission from Sco XR-1 shown as synchroton radiation of relativistic electrons in low density region surrounding denser core producing X ray
c30 A69-37334
Crab Nebula pulsars radio properties, possible neutron star origin, interstellar gas and magnetic fields, etc
c30 A69-42556
RADIO FREQUENCIES
Extragalactic gamma ray fluxes predicted, discussing collisions, matter-antimatter annihilation and cosmological implications
c29 A69-24466
Radio frequency transmission characteristics of ablation materials for planetary entry vehicle

heat shields
[NASA-TN-D-4920] c07 N69-13158
Radio frequency induction heated plasmas with power deposition and energy removal
[NASA-CR-1312] c25 N69-22638
RADIO FREQUENCY INTERFERENCE
Mutual RF interference between satellite and terrestrial telecommunications microwave relay system at shared frequencies
c07 A69-13242
RFI effects of earth based emitters on operation of geosynchronous satellites for data relay from near earth orbiting satellites, noting frequency assignments
c07 A69-41757
Experiment design for measuring radio frequency interference between communication satellite and terrestrial microwave relay system
[NASA-TN-D-5041] c07 N69-26272
RADIO GALAXIES
M-2 galaxy as Seyfert-like galaxy seem edge-on, using radio and optical data showing H alpha emission collisionally excited, discussing circular polarization
c30 A69-20051
Radio galaxy Messier 87 mass determined using virial theorem for nucleus velocity dispersion
c30 A69-30883
RADIO INTERFEROMETERS
Laser optical simulation of spaceborne radio astronomy interferometer experiment
[NASA-TN-D-5357] c30 N69-36892
RADIO PHYSICS
Radar observations and radiophysical investigations of Venus
[NASA-TT-F-536] c30 N69-38643
RADIO RECEIVERS
Microwave radiometric sensor operational principles and capabilities, discussing antennas and radiometric receivers
c07 A69-26976
RADIO RELAY SYSTEMS
Mutual RF interference between satellite and terrestrial telecommunications microwave relay system at shared frequencies
c07 A69-13242
RADIO SOURCES (ASTRONOMY)
Balloon-borne instrumentation for detection of far IR extended emission regions and bright point sources, describing results of initial flights
c30 A69-27599
RADIO SPECTRA
Cosmic radio background noise spectrum near north galactic pole based on Radio Astronomy Explorer satellite experiments
c30 A69-42375
NASA program for radio spectrum utilization in aerospace communication systems
c07 A69-42502
RADIO TELEMETRY
Laboratory and flight tests of airborne solid state UHF telemetry transmitter, discussing miniaturized coaxial hardware from RF power conservation viewpoint
c07 A69-35996
Pioneer 9 deep space probe with telemetry link operated in coded mode with sequential decoding, discussing ground and flight test data
c07 A69-42522
Computerized telemetry filter design
[NASA-SP-3049] c08 N69-35816
RADIO TELESCOPES
Structural technology for large radio and radar telescope systems - Conference, Cambridge, Mass., October 1967
c11 A69-42120
RADIO TRANSMISSION
Scientific findings from interplanetary spacecraft radio propagation experiments, particularly Mariner 5 data
c07 A69-35940
Split phase PCM code modulated carrier transmission characteristics determined for amplitude, phase and frequency shift keying, assuming random bit pattern and noncoherent modulation
c07 A69-39451
Lunar surface transmission loss for Apollo astronaut point-to-point communications
[NASA-TN-D-4915] c07 N69-13301
RADIO TRANSMITTERS
Laboratory and flight tests of airborne solid state UHF telemetry transmitter, discussing miniaturized coaxial hardware from RF power conservation viewpoint
c07 A69-35996
RADIOACTIVE AGE DETERMINATION
Kodaikanal iron meteorite measurements for cosmogenic rare gases and K-Ar isotopes ages for glass inclusions
c30 A69-22047
RADIOACTIVE DECAY
Lanthanum isotopes beta decay, analyzing excitation of near spherical daughter nuclei of barium isotopes
c24 A69-10100
Radioactive decay of neutral pions generated in metagalactic cosmic ray interactions as source of high energy isotropic gamma rays observed by OSO-3
c29 A69-12092
Iodine 123 decay via gamma ray emission, noting energies of several transitions
c24 A69-13099
RADIOACTIVE ISOTOPES
Chondrite meteorite fall /1969/ in Mexico, noting opaque and microcrystalline matrices and gamma rays from short lived isotopes
c30 A69-20686
Vacuum tube with cathode heated directly by external radioisotope source, noting heat pipe providing isothermal heat transfer
c09 A69-24748
NASA lunar receiving laboratory for lunar rock samples examination by gamma ray spectrometry for induced radioactive nuclides and naturally occurring isotopes
c11 A69-38271
Gamma ray backscattering of radioisotope for measuring Martian atmospheric density
[NASA-TN-D-5431] c24 N69-36931
RADIOBIOLOGY
Proton beams uniformity available at NASA synchrocyclotron designed for radiation biology research by simulating space radiation environment
c11 A69-15992
Gravitational and acceleration effects on man and organisms, and biological effects of radiation
[NASA-TT-F-528] c05 N69-38701
RADIOGRAPHY
Flash X ray unit with special film transport devices to obtain sequenced dynamic radiographs of ablating models during reentry simulation tests
c11 A69-35720
RADIOISOTOPE BATTERIES
Planar radioisotope thermoelectric generator system for NASA deep space missions and integrated spacecraft power supply
c03 A69-42254
RADIOLYSIS
Blocked two level factorial experiment to measure radiolysis of water in water cooled reactors
[NASA-TN-D-5369] c19 N69-32319
RADIOMETEOROGRAPHS
Radiometric measurements of atmospheric attenuation in electromagnetic spectrum
[NASA-TN-D-5087] c07 N69-22949
RADIOMETERS
Thermodielectric radiometer for transient radiant flux short duration pulse measurement, using thermally induced depolarization of polymer film dielectric
[AIAA PAPER 68-403] c14 A69-12392
Cosmic radio noise intensity measurements by ATS 2 satellite-borne radiometer
c30 A69-19715
Solar spectral irradiance measured by airborne instruments, discussing construction, calibration, etc, of photoelectric filter radiometer and Leiss monochromator
c30 A69-32261
Radiometer for measuring solar flux variations, discussing design, performance tests and use for spacecraft measurements
[AAS PAPER 69-254] c14 A69-42858

Regression generated radiometric and contour height fields of North American Continent using Nimbus 2 IR equivalent black body temperature and geopotential data
c20 A69-42896
Disk radiometer for use in space vacuum-thermal environmental studies
[NASA-TN-D-4925] c14 N69-13311
Nimbus 2 high resolution infrared radiometer data on earth resources of arid and subarid lands
[NASA-TN-D-4647] c13 N69-14450
Radiometric techniques applicable to measurement of solar activity and atmospheric attenuation at millimeter wavelengths
[NASA-TR-R-306] c07 N69-22951
Design, calibration, and use of radiometers to measure spectral emission in ballistic range and shock tube experiments
[NASA-TN-D-5360] c14 N69-38144

RAMAN SPECTRA
Emission and frequency shift angles of anti-Stokes radiation from trapped filaments of laser light in liquids
c23 A69-10012
Sinusoidal phase modulation role in spectral broadening observed in trapped filaments of laser and Raman light
c16 A69-14189
Spontaneous Raman band shapes and depolarization ratios in liquid nitrogen and oxygen measured and compared to gas, discussing time dependence of rotational motion
c24 A69-17817

RAMPS (STRUCTURES)
M 3.5 two dimensional mixed compression inlet system with self restart using flexible variable ramp system
[AIAA PAPER 69-447] c28 A69-32732

RANDOM NOISE
Analytic time function models of stochastic processes of noise and modulation
[NASA-TR-R-314] c07 N69-29230
Quantum communication systems performance evaluated by communication efficiency parameter
[NASA-TR-R-320] c07 N69-39264

RANDOM PROCESSES
Fast electron diffusion in stochastic magnetic field, obtaining diffusion coefficient as function of ratio of correlation time to Larmor period
c25 A69-20807
Anisotropic Heisenberg ferromagnets in random phase and spin wave approximation
[NASA-TN-D-5286] c26 N69-29588

RANDOM VARIABLES
Statistical method for evaluating goodness of fit between data set and theoretical distribution of random variables
[NASA-TR-R-313] c19 N69-30610

RANDOM VIBRATION
Summary of random vibration prediction procedures for aerospace vehicles, with bibliography
[NASA-CR-1302] c32 N69-23096

RANGE AND RANGE RATE TRACKING
Effect of spacecraft onboard radar range and range rate data and accuracy on unmanned probe entry guidance corridor
[NASA-TN-D-4852] c21 N69-16503
Evaluation of Goddard range and range rate system at Rosman by intercomparison with GEOS 1 long-arc orbital solutions
[NASA-TN-D-5036] c13 N69-28442

RANGE ERRORS
Longitudinal range dispersion of unmanned Mars landers using VM-8 and VM-9 atmospheric models, discussing Syrtis Major as possible landing site
c30 A69-12390
Prediction methods for angular line-of-sight deviations induced by spacecraft window
[NASA-TN-D-5238] c21 N69-31227

RANGEFINDING
Navigation satellites system designed for ATC without requirement for onboard transmitter, discussing spectrum occupancy, satellite power, lane ambiguities and computational procedures
c21 A69-19212

RANGES (FACILITIES)
Wind velocity profiles by smoke trail method for eastern test range
[NASA-TN-D-4880] c20 N69-14505

RANKINE CYCLE
Systems analysis of Rankine cycle nuclear-electric potassium space power system using Li cooled fast reactor and high temperature turbine inlet
c22 A69-42266
Comparison of Brayton and Rankine cycle magnetogasdynamic space power generation systems for use with nuclear heat source
[NASA-TN-D-5085] c03 N69-20852
Electrothermal instabilities effects on Brayton and Rankine cycle magnetohydrodynamic space power generation systems
[NASA-TN-D-5461] c03 N69-37883

RANKINE-HUGONIOT RELATION
MHD Rankine-Hugoniot equations for ion density, thermal pressure and convective velocity magnitude and orientation during Pioneer 6 traversal of earth bow shock
c30 A69-42417

RARE EARTH COMPOUNDS
Rare earth fluorides and oxides used as solid lubricants at high temperatures
[NASA-TN-D-5301] c15 N69-29568

RARE EARTH ELEMENTS
Partition coefficients between natural melts and plagioclase phenocrysts determined for rare earth elements and barium by mass spectrometry
c13 A69-20944
Continental diabases and oceanic tholeiites in light of rare earth and barium abundances and partition coefficients indicating fusion process
c13 A69-20945
Ca-rich achondrites genesis implied from rare earth and Ba absolute and relative concentrations
c30 A69-36091

RARE GASES
Kodaikanal iron meteorite measurements for cosmogenic rare gases and K-Ar isotopes ages for glass inclusions
c30 A69-22047
Valving concepts and functional approaches for inert gas attitude control thrustor systems providing redundancy safeguards at minimum weight, volume and power costs
[AIAA PAPER 69-843] c28 A69-39373

RAREFIED GAS DYNAMICS
Monte Carlo method application to heat transfer analysis including radiation, rarefied gas energy transfer and conduction
c33 A69-24457

RAREFIED GASES
Viscosity, thermal conductivity and diffusion predicted for dilute nonpolar, polar and mixed gases, discussing methods for rotational relaxation collision numbers and resonant correction
c33 A69-38951
Quantum theory of particle-harmonic oscillator collision applied to gas-surface interactions at cryogenic temperatures
[NASA-TN-D-4982] c24 N69-14288

RATES (PER TIME)
Rate of rise outgassing measurement technique in vacuums
[NASA-TN-D-4973] c14 N69-16097

RATINGS
Pilot rating scales and their use in assessing aircraft handling qualities
[NASA-TN-D-5153] c02 N69-22539

RATIOS
Gamma heating rate measured by aqueous dosimeter converted to rate in thin tungsten detector in water shield through transport theory calculations, obtaining correction factors
c22 A69-18825
Volume-ratio system for vacuum gage calibration from 10 to minus 8 to 10 torr
[NASA-TN-D-5406] c14 N69-35265

RATS
Critical body temperature for intracranial self stimulation in white rats
c04 A69-13897
Acetate carbon 14 utilization in centrifuged rats, analyzing metabolism by measuring plasma glucose, FFA and lipids synthesis
c04 A69-19429

Adrenal epinephrine and phenylethanolamine n-methyl transferase /PNMT/ activity in rat bearing transplantable pituitary tumor
c04 A69-20374

Transensor implantation, sham implantation, no implantation and lighting effects on rat body composition, noting fat and water content
c04 A69-26557

Acetate-2-C 14 conversion to C 14 carbon dioxide and C 14 fatty acids in rats with 2/3 of liver removed
c04 A69-35976

Rats adrenal corticosterone concentrations changes in response to ACTH, determining response sensitivity dependence on time after hypophysectomy
c04 A69-39871

Compensatory hypertrophy effects on adrenal phenylethanolamine n-methyl transferase /PNMT/ activity in rats
c04 A69-41404

Hyperoxia and hypoxia effects on mitotic activity in regenerating and normal rat liver exposed to environmental conditions
c04 A69-43565

Suitability of white rats for suborbital studies of behavior in gravity fields
[NASA-CR-1255] c05 N69-14094

RAY TRACING

Nonvertical propagation effects on high altitude topside ionosphere sounder data reduction, using ray tracing
c13 A69-18838

Propagation characteristic model study of kinked Z trace observed on topside ionograms and explained by magnetoionic theory
c13 A69-37893

Comparison of ray trace methods for estimating sound intensity variations due to atmospheric variability as determined by Monte Carlo methods
[NASA-CR-1337] c23 N69-23199

RAYLEIGH-RITZ METHOD

Theoretical analysis of free vibration of discretely stiffened cylindrical shells with arbitrary end conditions
[NASA-CR-1316] c32 N69-28164

RC CIRCUITS

Delta functions spectrum in reciprocal time domain for LC and RC structures due to impulse response in distributed parameters
c10 A69-21327

Multiloop feedback in active distributed RC networks for low parameter sensitivity with low amplifier gain compared to single loop circuits
c10 A69-34679

REACTANCE

Antenna reactance from sounding rocket in ionosphere, showing variations relationship to rocket spin period
c13 A69-39964

Thin film microwave irises with capacitive reactance
[NASA-CR-1364] c26 N69-28096

REACTION KINETICS

Reaction rate and mechanism for low temperature reaction between lithium hydride and liquid ammonia, noting chemisorbed ammonia dissociation at interface
c06 A69-11285

Reaction rate constants of ion-molecule interchange reaction as function of temperature, flow velocity, activation energy and constant part of steric factor P
c06 A69-32312

Chemical reactions activation energy at high temperature, noting cross section shape role for deducing activation energy from rate data
c06 A69-34443

Rate coefficient for primary process in removing molecular nitrogen in high vibrational levels from active nitrogen by N atoms
c24 A69-36424

Elemental fluorine reactions with Ni, Cu, Fe, Ti, Be-Al, Zr and Ag, giving reaction rate constants, activation energies, etc
c06 A69-39706

Computerized Arrhenius equation component reliability extrapolation techniques
[NASA-TN-D-4902] c19 N69-13368

Boundary layer and chemical reactions in hypersonic gas flow
[NASA-TT-F-549] c33 N69-31947

REACTION TIME

Yttrium effect on rate of thermal decomposition of silver carbonate powder and pressed pellets by isothermogravimetric analysis, examining water vapor, Co 60 gamma radiation and temperature effects
c06 A69-30442

REACTION WHEELS

Semiactive gravity gradient stabilization system design for low altitude earth oriented spacecraft attitude control, using active reaction wheel scanner
c31 A69-18334

Photoelectronic commutation by dc torquer-driven reaction wheel for spacecraft attitude control
[NASA-TN-D-5265] c03 N69-30945

REACTIVITY

Pulsed neutron source studies to determine shutdown reactivities of unreflected solution reactor
[NASA-TN-D-5487] c22 N69-39186

REACTOR CORES

Beryllium reflector distortion in Plum Brook Reactor due to neutron embrittlement and gas formation, noting material surveillance, replacement, etc
c22 A69-13131

Cavity reactor consisting of dilute fuel core surrounded by moderating reflector to attain very high temperatures in gaseous cores
c22 A69-18954

Thermal neutron flux perturbations in cylinders in test reactors, using regression analysis to obtain polynomials for flux perturbation, depression, self shielding factors, etc
c22 A69-38274

Characteristics, performance potential, and problems of solid, liquid, and gas core nuclear rocket engines
[NASA-TM-X-1685] c22 N69-10067

Elastic-plastic and creep analysis predictions of core movement during operation of fast nuclear reactor
[NASA-TN-D-5012] c22 N69-16381

One megawatt reactor design for Brayton cycle space power application - thermal analysis and core design
[NASA-TN-D-5013] c22 N69-17313

Beryllium swelling and replacement in Plum Brook reactor
[NASA-TM-X-1794] c22 N69-26233

Curved porous wall gas core reactor flow distribution experiment
[NASA-TM-X-1852] c12 N69-32217

Reflector based poison drum control on equal size reactor cores fueled with U-233 and U-235
[NASA-TM-X-1883] c22 N69-36756

REACTOR DESIGN

Cavity reactor consisting of dilute fuel core surrounded by moderating reflector to attain very high temperatures in gaseous cores
c22 A69-18954

Gas core reactor curved porous walls geometry tested with clear and smoky air injection, noting mass flow ratio in reactor cavity
c22 A69-35181

Brayton-B generator for 2-10 kWe production, describing design, heat source/rejection, efficiencies and preliminary test data analysis
c03 A69-42278

One megawatt reactor design for Brayton cycle space power application - thermal analysis and core design
[NASA-TN-D-5013] c22 N69-17313

One megawatt reactor design for Brayton cycle space power application - neutronics design
[NASA-TN-D-5014] c22 N69-17314

REACTOR MATERIALS

Properties and uses of liquid metal reactor fuels, including heat transfer processes in variously shaped channels, boiling and condensation of metals, and reactor control equipment
[NASA-TT-F-522] c33 N69-30507

REACTOR SAFETY

Improved delayed neutron fission product monitor for operation in reactor coolant system

[NASA-TM-X-1886] c14 N69-38766

REACTOR TECHNOLOGY
Pulsed neutron source studies to determine shutdown reactivities of unreflected solution reactor
[NASA-TN-D-5487] c22 N69-39186

REAL GASES
Shock wave propagation in real gases
[NASA-TT-F-585] c12 N69-40824

REAL TIME OPERATION
Radiation protection plan for Apollo lunar mission based on real time monitoring of solar activity and radiation in spacecraft
[AIAA PAPER 69-19] c29 A69-18113
Real time targeting for Apollo lunar orbit insertion maneuver burn, discussing impulsive maneuvers for flight control
[AIAA PAPER 68-848] c31 A69-39760
Real time digital computer hardware simulation of Apollo Telescope Mount /ATM/ mission
[AIAA PAPER 69-940] c11 A69-40323
Real time telemetry, tracking and command links by synchronous satellite relay, describing ATS-Nimbus E S band experiment
c07 A69-41759
Ionospheric irregularities effect on accurate satellite position determination in near real time
c07 A69-42549
Numerical integration techniques for real time digital flight simulation
[NASA-TN-D-4900] c11 N69-11371
Predictive display systems using repetitive, fast time, on-line computation
[NASA-CR-1274] c05 N69-17738
Iterative solution of boundary value problem for rapid optimization of multiple-burn rocket flights
[NASA-CR-1430] c30 N69-36439

RECOMBINATION COEFFICIENT
Atomic nitrogen collisional ionization and recombination rates under assumed quasi-steady nonequilibrium distribution of electron state populations
c24 A69-43700

RECOVERABLE SPACECRAFT
Flexible parawing lifting decelerator research data from wind tunnel and flight tests, noting manned space vehicle recovery and aircraft escape systems
[AIAA PAPER 68-967] c02 A69-43715

RECTANGLES
Flow characteristics in two dimensional channel with rectangular cavity
[NASA-CR-1245] c12 N69-14095

RECTANGULAR GUIDES
Waveguide fed rectangular aperture antenna with dielectric plug load, describing admittance resonant perturbation due to excited TE mode
c09 A69-41589

RECTANGULAR PANELS
Influence of fabrication methods on compressive strength of titanium alloy skin stringer panels
[NASA-TN-D-5389] c15 N69-34707
Flutter investigation at Mach 3 of rotationally restrained panels and comparison with theory
[NASA-TN-D-5508] c32 N69-40087

RECTANGULAR WINGS
Spin-tunnel investigation of scale model of straight wing, twin boom counter insurgency airplane
[NASA-TM-X-1602] c02 N69-34988

RECURSIVE FUNCTIONS
Recursive formulas for numerical evaluation of real convolution integral for simulation of control systems and electrical networks on digital computer
c19 A69-17250
Recursive equation for estimating variance of sequential random numbers
[NASA-TN-D-5465] c19 N69-38178

RED SHIFT
Red shift-magnitude relation for universe model and observational data
[NASA-TN-D-5398] c30 N69-34884

REDUCED GRAVITY
Excessive extrapolation limitations in applying transient data to low gravity fluid behavior for orbital refueling systems, presenting orbital fluid transfer experiment
[AIAA PAPER 69-566] c31 A69-32755
Space manufacturing processes for orbital low and zero gravity environment, discussing buoyancy and thermal convection sensitive and molecular forces controlled methods
[AAS PAPER 69-486] c30 A69-42844
Natural frequency of liquids in annular cylinders under low gravity conditions
[NASA-TN-D-5412] c12 N69-35842
Reynolds number relation to single noncondensable bubble motion under low gravity conditions
[NASA-TN-D-5462] c12 N69-38032

REDUCTION (CHEMISTRY)
Radiation induced reduction of ammoniacal nickel /2/ sulfate to metallic nickel
[NASA-TN-D-5213] c06 N69-24940

REDUNDANCY ENCODING
Huffman minimum redundancy coding extension to run-length information based on Poisson distribution, including optimization and data compression applications
c07 A69-36262

REDUNDANT COMPONENTS
Valving concepts and functional approaches for inert gas attitude control thrustor systems providing redundancy safeguards at minimum weight, volume and power costs
[AIAA PAPER 69-843] c28 A69-39373

REENTRY COMMUNICATION
Measurements of mutual interference heating for probe antenna mounted on Apollo reentry configuration
[NASA-TM-X-1787] c01 N69-29318
Measurement of thermal accommodation coefficients between liquids and high temperature gases in low pressure reentry communications blackout intervals
[NASA-CR-1330] c07 N69-32721

REENTRY EFFECTS
Flash X ray unit with special film transport devices to obtain sequenced dynamic radiographs of ablating models during reentry simulation tests
c11 A69-35720
Flow field predictions for radio attenuation measurements on blunt reentry cone
[NASA-CR-1308] c07 N69-28223
Microwave radiometric techniques for reentry plasma measurements
[NASA-TN-D-5274] c25 N69-29600

REENTRY GUIDANCE
Reentry and planetary entry physics and technology 2, advanced concepts, experiments, guidance-control and technology
c31 A69-25718
Guidance and navigation for atmospheric entry phase of vehicles
[NASA-SP-8015] c21 N69-19518

REENTRY PHYSICS
Correlations of stagnation point radiative heat transfer for earth reentry, noting use of nongray absorption coefficient models
c33 A69-14736
Reentry and planetary entry physics and technology 2, advanced concepts, experiments, guidance-control and technology
c31 A69-25718
Apollo afterbody heat transfer, studying ablation effects for various reentry angles of attack
c33 A69-43680
Vacuum ultraviolet detector-spectroscopy systems for capsule reentry measurements
[NASA-CR-1268] c09 N69-18761

REENTRY SHIELDING
Apollo thermal protection system, noting low density ablation, flight and ground tests
[AIAA PAPER 68-1142] c31 A69-13558

REENTRY TRAJECTORIES
Computer mechanization of reentry equations with four degrees of freedom
[NASA-CR-1249] c30 N69-13300

REENTRY VEHICLES
Make wire, light pipe and spring wire ablation sensors development for measuring parameters of heat shield materials for reentry vehicles
c14 A69-15428
Pyrotechnic activated calorimeter for reentry package design of vehicles entering earth

atmosphere at lunar return velocities
c11 A69-23026
Hypervelocity reentry simulation problems for slender and blunt bodies, defining significant parameters
c30 A69-30376
Collection of papers on thermal design principles of spacecraft and entry bodies
c33 A69-34372
Aerodynamic and flight characteristics of variable geometry entry spacecraft during subsonic wing deployment and landing
[AIAA PAPER 69-742] c01 A69-34407
Ablation heat shields, emphasizing dielectric low cost fabrication and application to entry vehicles
c15 A69-35538
Guidance and navigation for atmospheric entry phase of vehicles
[NASA-SP-8015] c21 N69-19518

REFLECTANCE
Diffusion pump oil reflectance and absorption coefficients measured in three thicknesses using light source, monochromator and detector
c23 A69-23647
Reflection coefficient of symmetric parallel plate waveguide operating in TEM mode illuminating lossless dielectric layer, using wedge diffraction and geometrical optics methods
c09 A69-34802
Bidirectional reflectance of earth atmosphere and cloud formation above equatorial Pacific observed by synchronous satellite as function of angular dependence
c20 A69-43154
Symmetric parallel plate waveguide reflection coefficient analyzed
[NASA-CR-1327] c07 N69-24059
Solar absorptances and spectral reflectances of metals
[NASA-TN-D-5353] c17 N69-31895

REFLECTING TELESCOPES
Single and double mirror systems geometrical optical image aberrations noting focal number, angle of field, secondary magnification and mutual position tolerances
c23 A69-24836

REFLECTOMETERS
Portable integrating sphere reflectometer, describing optical system, construction, etc
[AIAA PAPER 69-599] c14 A69-33264
ATS 3 satellite reflectometer experiment carrying test samples to measure specular reflectance, noting silica shield effects
[AIAA PAPER 69-644] c33 A69-33270

REFLECTORS
Beryllium reflector distortion in Plum Brook Reactor due to neutron embrittlement and gas formation, noting material surveillance, replacement, etc
c22 A69-13131
Reflector based poison drum control on equal size reactor cores fueled with U-233 and U-235
[NASA-TM-X-1883] c22 N69-36756
Performance prediction for fast reactor with axially moving reflector control system
[NASA-TM-X-1911] c22 N69-40061

REFRACTIVITY
Refractive index computation for free electrons and neutral atoms in cesium plasma at helium neon laser wavelengths
[NASA-TN-D-5328] c25 N69-30622

REFRACTORY MATERIALS
High temperature capacitor consisting of thin wafers of pyrolytic boron nitride noting fabrication, dissipation factor and capacitance
c03 A69-15299
Refractory cone models made of copper and Co coated Be for force tests in high enthalpy hypersonic arc tunnels at high simulated attitudes
c11 A69-26796

REFRACTORY METAL ALLOYS
Refractory metal alloys metallurgy and technology - Conference, Washington, D. C., April 1968
c17 A69-18790
NASA programs for development of high temperature alloys for advanced air breathing engines emphasizing cast Ni-base alloy
[ICAS PAPER 68-26] c17 A69-43718
Controlled oxygen additions to refractory metal alloys
[NASA-TM-X-1799] c17 N69-26952

REFRACTORY METALS
Less common refractory metals /rhenium, technetium, hafnium, noble metals/ properties, phase equilibria, etc
c17 A69-18793
Crack initiation prediction in high temperature components subjected to arbitrary thermal-mechanical cycling
c32 A69-28252
Solubility of refractory metals and alloys in liquid potassium and lithium
[NASA-CR-1371] c17 N69-27059
Performance prediction for fast reactor with axially moving reflector control system
[NASA-TM-X-1911] c22 N69-40061

REFUELING
Excessive extrapolation limitations in applying transient data to low gravity fluid behavior for orbital refueling systems, presenting orbital fluid transfer experiment
[AIAA PAPER 69-566] c31 A69-32755

REGENERATION (PHYSIOLOGY)
Regenerative life support system development, considering synthesized organic compounds and microorganisms as foods for long duration space missions
c04 A69-37623
Conference on bone diseases and regeneration, cellular differentiation, and homeostasis of calcium
[NASA-SP-161] c04 N69-10444

REGENERATIVE COOLING
Heat transfer characteristics of water/cryogenic hydrogen heat exchanger for nuclear rocket reactor
[NASA-TN-D-5429] c33 N69-36701

REGENERATIVE FUEL CELLS
Performance of prototype hydrogen oxygen electrolytic regenerative fuel cell stack with gas storage tank
[NASA-CR-1244] c03 N69-18885
Electrochemical evaluation of electrode organic electrolyte combinations for rechargeable battery systems
[NASA-CR-1434] c03 N69-36829

REGRESSION ANALYSIS
Regression generated radiometric and contour height fields of North American Continent using Nimbus 2 IR equivalent black body temperature and geopotential data
c20 A69-42896
Regression analysis procedures for evaluating tracking system measurement errors
[NASA-TN-D-4826] c19 N69-14476
Aspects of human operator performance in low order compensatory control tasks studied with regression analysis
[NASA-CR-1259] c05 N69-16212

REGRESSION COEFFICIENTS
Systematic investigation of mathematical models by comparison of experimental and analytical regression coefficients
[NASA-TM-X-1797] c19 N69-25311

REINFORCED PLASTICS
Compressive behavior of uniaxial filament reinforced epoxy tubes for aerospace structures, using hand layup method with Teflon mandrel and sleeve
c15 A69-22339
Lightly loaded truss structures fabricated from Be, Be-Al alloy and uniaxial B filament reinforced epoxy tubing for unmanned spacecraft applications
c17 A69-35504

REINFORCED SHELLS
Dynamic analysis of axisymmetric ring stiffened shells with attached asymmetric elastic structures, noting vibration modes
c32 A69-25525
Computer program determination of barreling effect on strength of ring and stringer stiffened shells designed to support axial compression loads
c32 A69-43671

Structural synthesis of cylindrical shell reinforced with rectangular cross section stiffeners
[NASA-CR-1217] c32 N69-14254
Predicting buckling of thin walled, uniform stiffened and unstiffened circular cylindrical shells under static loading
[NASA-SP-8007] c32 N69-23320

REINFORCEMENT (STRUCTURES)
Optimal structural design for sandwich-shaped and ring-stiffened loaded shells of revolution
[NASA-CR-1424] c32 N69-35515

REINFORCING FIBERS
Glass, boron and graphite filament wound resin composites and liners for cryogenic pressure vessels
c18 A69-16488
Fiber-metal matrix composites fabrication, applications, mechanical properties and powder metallurgy
c17 A69-20204
Failure criteria for predicting filamentary composite strength under uniaxial and combined stresses from properties and fabrication process considerations
c32 A69-21479
Tungsten alloy fiber reinforced nickel base alloy composites stress-rupture strength, oxidation and impact resistance for high temperature turbojet engine buckets
c17 A69-29010
Tensile data and photomicrographs of explosively bonded metal matrix composites interfaces
c15 A69-43452
Compressive properties and weight saving of metals reinforced on surface with resin bonded fibers
[NASA-TN-D-4878] c17 N69-11012
Mechanical behavior of boron-epoxy and glass-epoxy filament-wound cylinders under various loads
[NASA-TN-D-5050] c18 N69-19825
Theory and test results of tensile strength of epoxy rings and belts reinforced by boron filaments
[NASA-TN-D-5053] c18 N69-19918
Zero thermal expansion composites of high strength and stiffness
[NASA-CR-1324] c32 N69-24876

REJECTION
Water rejection dynamics in hydrogen oxygen fuel cells
[NASA-TN-D-4956] c03 N69-14518

RELATIVISTIC PARTICLES
Interplanetary relativistic electrons from solar flare events
c29 A69-15528
Maximum number of binary collisions for three particles with zero range forces in relativistic rescattering singularities studies
c24 A69-19788
Rotational energy conversion of neutron star into relativistic electrons energy suggested by increasing period of pulsating radio source in Crab Nebula
c30 A69-21454
Relativistic solar electron detection in interplanetary space during July 7, 1966 proton flare event, noting energy spectrum and time history
c29 A69-23766

RELATIVITY
Einstein field equations solutions generated via static spherically symmetric mass and charge distributions
c23 A69-32053

RELAXATION (MECHANICS)
Mechanical relaxation of poly 4 methyl pentene 1 at cryogenic temperatures, discussing temperature dispersion curve and secondary absorption associated with thermal motion of side chains
c18 A69-16492
Vacancy relaxations in bcc crystals using energy dependence on radial displacements from defect of nearest neighbor sets, discussing crystal size and shape
c26 A69-16529
Modified model for vibration-dissociation relaxation coupling phenomena in nonequilibrium high temperature gas flow, discussing parameter U variation with kinetic temperature
c12 A69-37208
Steady state stress relaxation analysis of turbine blade cooling designs
[NASA-TN-D-5282] c28 N69-29321
Turbulent boundary layer measurements on axisymmetric hypersonic nozzle walls
[NASA-TN-D-5433] c12 N69-36805

RELAXATION METHOD (MATHEMATICS)
Monte Carlo relaxation method for physically self consistent model stellar atmospheres, discussing stability, accuracy and convergence of solution
c30 A69-36337

RELAXATION OSCILLATORS
Negative differential resistance effect producing relaxation type oscillations in n-type gallium arsenide
c26 A69-10557

RELAY SATELLITES
Data relay satellite systems for support of NASA R and D missions, discussing communications between satellites and to mission control
c07 A69-25296
Libration point relay satellites for continuous communication link between earth and lunar far side, discussing trajectories and halo orbit stationkeeping
c30 A69-30188
Tracking and Data Relay Satellite System with synchronous orbit satellites to relay data between low altitude earth orbital spacecraft and mission control centers
c07 A69-41755
RFI effects of earth based emitters on operation of geosynchronous satellites for data relay from near earth orbiting satellites, noting frequency assignments
c07 A69-41757
Real time telemetry, tracking and command links by synchronous satellite relay, describing ATS-Nimbus E S band experiment
c07 A69-41759
Telecommunications performance of two lunar relay satellite system /LRSS/, determining operation capabilities with Apollo communications system
c07 A69-42508

RELAY 2 SATELLITE
Summary of operation, communications, and other experiments of Relay 2 satellite
[NASA-SP-151] c31 N69-21065

RELIABILITY
Reliability handbook for failure analysis of silicon integrated microcircuits
[NASA-CR-1348] c09 N69-25328
Upgrading of electronic power supply for greater reliability in aerospace use
[NASA-TM-X-1875] c03 N69-35763

RELIABILITY ENGINEERING
Reliability - Conference, Chicago, January 1969
c15 A69-34476
Scanning electron microscopy for reliability studies in semiconductor devices
c26 A69-35788
Reliability and maintainability - Conference, Denver, July 1969
c15 A69-35999
Failure data role in management of launch operations reliability program
c11 A69-36022
Pretesting techniques of suppliers and users and effects on electroexplosive devices
[NASA-CR-1203] c15 N69-10298
Reliability handbook for silicon monolithic microcircuits - applications
[NASA-CR-1346] c09 N69-23225
Reliability handbook for silicon monolithic microcircuits - failure mechanisms
[NASA-CR-1347] c09 N69-23226
Reliability study of Saturn 5 launch vehicle manual backup control system
[NASA-TN-D-5261] c21 N69-28018
Clean room technologies for control of contaminants for component reliability
[NASA-SP-5074] c05 N69-33775

REMOTE HANDLING
Engineering problems survey on teleoperator control systems
[NASA-SP-5070] c05 N69-21478

Remote information retrieval facility description
[NASA-CR-1318] c08 N69-23381
REMOTE SENSORS
Remote sensing of environment - Conference, University of Michigan, Ann Arbor, April 1968
c14 A69-26974
Microwave radiometric sensor operational principles and capabilities, discussing antennas and radiometric receivers
c07 A69-26976
Earth resources remote sensing from spacecraft noting meteorology, oceanography, forestry, agriculture and IR detection of plant diseases and pollution
c34 A69-26978
Optical radar studies of lower atmosphere, giving Mie theory calculations of clear atmosphere volume backscattering cross sections for four laser wavelengths
c07 A69-27001
Temperature profiles and associated wind profiles obtained with Jimsphere/FPS-16 radar system at Cape Kennedy, discussing remote CAT detector assessment
c20 A69-33739
NASA Earth Resources Survey Aircraft Program, describing aircraft and remote sensors characteristics
c14 A69-36259
RENDEZVOUS GUIDANCE
Visual sensing and spacecraft guidance for earth orbit rendezvous maneuvers
[NASA-CR-1214] c05 N69-13161
RENDEZVOUS TRAJECTORIES
Low thrust trajectories for minimum time rendezvous between continuous thrust interceptor and passive target vehicle, comparing calculus of variations and steepest ascent analyses
c30 A69-32177
Computational method for time optimal space rendezvous between rocket vehicle and circular orbit target
[NASA-TN-D-5017] c30 N69-16210
Current computer programs for low thrust trajectory analysis using flyby and rendezvous trajectories
[NASA-TM-X-1824] c08 N69-30014
REPLICAS
Plastic backing films removal from carbon electron microscope replicas by maintaining specimens in horizontal position
c14 A69-21651
RESEARCH AIRCRAFT
Wind tunnel stability tests to determine effect of hypersonic research engine on aerodynamic characteristics of research aircraft
[NASA-TM-X-1840] c01 N69-38612
RESEARCH AND DEVELOPMENT
30 cm diameter mercury bombardment low impulse thrustor development for potential space applications, discussing performance and control
[AIAA PAPER 69-238] c28 A69-21256
Research and development program in annular slit colloid thrustor technology, proving thrustor feasibility by performance tests
[AIAA PAPER 69-287] c28 A69-21257
In-house research on R and D management in government agencies, discussing manning, training, center programs, case studies, etc
c34 A69-38022
Materials research structural design cycle, discussing simultaneous optimization, constituent materials, fabrication process, load environment and mission constraints
c32 A69-42991
RESEARCH FACILITIES
Scientific advances from space research in communications astronomy, electronics, transportation, etc
c30 A69-10498
Flight simulator with large lateral motion for large and supersonic transport aircraft, emphasizing reproduction of cockpit accelerations due to supersonic engine thrust loss
c11 A69-43044
NASA Plum Brook Reactor Facility experimental program
[NASA-TM-X-1853] c22 N69-33132
RESEARCH PROJECTS
NASA Space Application Program strategy, discussing research and development trend toward complexity, versatility and multidisciplinary use of larger spacecraft
c30 A69-13427
NASA civil aviation electronics research program, discussing feasibility of V/STOL aircraft all-weather operations
c34 A69-16718
Experiment requirements for manned earth orbiting biotechnology laboratory
[NASA-CR-1409] c05 N69-35540
RESIDUAL GAS
Residual interstellar gas from protostar formation detected as high luminosity IR object
c29 A69-27593
RESIDUAL STRESS
Internal stress and deposit hardness of nickel electrodeposited containing controlled quantities of meta-benzenedisulfonic acid
[NASA-TN-D-5188] c17 N69-36697
RESISTOJET ENGINES
Ammonia resistojet stationkeeping subsystem onboard ATS 4 satellite, noting flight test data agreement with ground tests
[AIAA PAPER 69-296] c28 A69-21212
ATS 3 spacecraft ammonia-fueled resistojet engine test performance
[AIAA PAPER 68-553] c28 A69-39754
RESISTORS
Voltage divider network board composed of composite carbon resistors for measurement of terminal voltage of 3 MeV Dynamitron electron accelerator recalibration
c11 A69-17705
Composite carbon resistor characteristics used for accelerator terminal voltage measurement
[NASA-TM-X-1718] c24 N69-14398
RESOLUTION
Electron irradiation effect on resolution of lithium-drifted silicon semiconductor detectors
[NASA-TN-D-4901] c14 N69-10933
Atmospheric turbulence limits on resolution of manned aerospace observations of ground
[NASA-TN-D-4940] c20 N69-12934
RESONANCE
Resonance absorption integrals for rhenium 185, rhenium 187, and natural rhenium in foils and thin films
[NASA-TN-D-4938] c24 N69-13152
Analysis of Fitzgerald apparatus for extraneous resonant modes, dynamic compliance, and mechanical impedance
[NASA-TN-D-5103] c26 N69-20798
Multigroup calculations of resonance neutron capture in thick slab of depleted U-238
[NASA-TM-X-1878] c24 N69-36901
RESONANCE SCATTERING
Minimization of optical resonance scattering by adjustment of monochromator slit geometry
[NASA-TM-X-1702] c24 N69-13210
RESONANCE TESTING
Identification of structural systems using near resonance testing
[NASA-TN-D-5069] c32 N69-17737
RESONANT FREQUENCIES
Gaseous He bubbles injection into liquid propellant launch vehicle fuel lines to reduce vehicle POGO oscillations by lowering feed system natural frequencies
c31 A69-25498
Saturn 5 longitudinal instability /POGO/ precluded by lowering S-1C stage propulsion system resonance below structural frequency
[AIAA PAPER 69-548] c31 A69-32658
Rosman I reflector antenna for collecting data from earth orbiting satellites, discussing dynamic analysis of structural response to natural frequencies
c32 A69-42133
Loss factor and resonant frequency of viscoelastic shear damped structural composites
[NASA-CR-1269] c32 N69-17766
Natural vibration modal analysis as related to space vehicle design criteria
[NASA-SP-8012] c32 N69-22773
Effect of shallow meridional curvature on vibration of nearly cylindrical shells

[NASA-TN-D-5143] c32 N69-22821
Transient response of coupled acoustic cavity resonators
[NASA-CR-1421] c23 N69-35286
Natural frequency of liquids in annular cylinders under low gravity conditions
[NASA-TN-D-5412] c12 N69-35842

RESPIRATORY PHYSIOLOGY
Human physiological responses to angular acceleration during breath holding, Mi, Valsalva and Mueller respiratory maneuvers in hollow spherical simulator
c05 A69-41679
Respiratory system and oxygen metabolism regulation in man and animals
[NASA-TT-F-501] c04 N69-31401

RESPIRATORY SYSTEM
Respiratory system and oxygen metabolism regulation in man and animals
[NASA-TT-F-501] c04 N69-31401

RETROREFLECTION
Lunar laser beam retroreflection observations, showing agreement with predicted ephemeris and signal strength
c30 A69-43197

RETROROCKET ENGINES
Development and test firing of improved igniter for first stage retrorockets of Atlas Centaur launch vehicle
[NASA-TM-X-1676] c28 N69-13275

RETURN TO EARTH SPACE FLIGHT
Pyrotechnic activated calorimeter for reentry package design of vehicles entering earth atmosphere at lunar return velocities
c11 A69-23026
Entry aerodynamics at lunar return conditions from command module of Apollo 4 flight
[NASA-TN-D-5399] c31 N69-38820

REUSABLE SPACECRAFT
Low cost rate transportation as mandatory goal for future space program, discussing recovery and reuse, launch system costs, hardware development, etc
c31 A69-38117
Apollo 11 mission and future space exploration prospects including moon base, manned space station, reusable shuttle vehicles, etc
c30 A69-41477

REVERSED FLOW
Flow field throughout wind tunnel containing rotor with sharply defected blades, noting reversed flow effect in front of wake
c11 A69-35228

REYNOLDS NUMBER
Subliming ablation effects on boundary layer transition for cones in hypersonic flow, discussing Reynolds numbers measured in wind tunnel tests
[AIAA PAPER 68-40] c01 A69-31881
Free stream disturbances influence on hypersonic boundary layer transition Reynolds number in heated and unheated flows
[AIAA PAPER 69-704] c12 A69-33453
Cone boundary layer transition location and Reynolds number as function of nose bluntness combined effect with Ar, air and He mass injection
[AIAA PAPER 67-706] c12 A69-33476
Effect of unit Reynolds number, nose bluntness, angle of attack, and roughness on transition on 5 degree half-angle cone at Mach 8
[NASA-TN-D-4961] c01 N69-14872
Transonic wind tunnel studies on airfoil to determine effects of Reynolds number and boundary layer transition location on shock induced separated flow
[NASA-TN-D-5003] c01 N69-16121
Laminar heat transfer distributions for blunted-cone, cone frustum reentry configuration at hypersonic speed using Reynolds number
[NASA-TN-D-5146] c33 N69-22997
Turbulent boundary layer of subsonic transport fuselage with pressure gradient, Reynolds number, and angle of attack
[NASA-TN-D-5242] c01 N69-28112
Laminar heating rate from wind tunnel tests using angle of attack and Reynolds number
[NASA-TN-D-5450] c12 N69-37604
Reynolds number relation to single noncondensable bubble motion under low gravity conditions
[NASA-TN-D-5462] c12 N69-38032

RHENIUM
Rhenium-niobium cylindrical thermionic converters with mechanically polished or electroetched emitters, comparing performance
c03 A69-13126
Vacuum arc melted W and W-Re alloys mechanical properties, noting Re additions effects
c17 A69-20190
Creep rate-stress-temperature relations for powder metallurgy rhenium, discussing activation energy
c17 A69-34186
Quartz fiber adhesion to Re measured in LEED /low energy electron diffraction/ apparatus for clean and O layer surfaces, noting brittle fracture
c17 A69-35182
Resonance absorption integrals for rhenium 185, rhenium 187, and natural rhenium in foils and thin films
[NASA-TN-D-4938] c24 N69-13152
Ductilizing of Group 6A elements by rhenium and other solutes
[NASA-TN-D-4955] c17 N69-14403
Low energy electron diffraction analysis of quartz fiber adhesion to rhenium crystal surface
[NASA-TN-D-5229] c17 N69-25363

RHENIUM ALLOYS
Superplasticity in W-Re alloys, noting tensile properties, grain size and strain rate sensitivity for various Re contents at high temperatures
c17 A69-22990
Stress rupture and tensile properties of refractory metal wires at 2000 and 2200 deg F
[NASA-TN-D-5139] c32 N69-22823
Effect of rhenium on mechanical properties of hafnium carbide strengthened tungsten alloys
[NASA-TN-D-5348] c17 N69-31977

RHENIUM COMPOUNDS
Impregnation of polytetrafluoroethylene with hexaflourides of rhenium, molybdenum, and tungsten
[NASA-TN-D-4886] c06 N69-10126

RHODIUM ALLOYS
Emittance properties of hafnium oxide, cerium oxide, and iron titanate coatings on platinum rhodium alloy substrates
[NASA-CR-1413] c17 N69-35514

RICCATI EQUATION
Matrix Riccati and matrix quadratic equations in problems of stochastic control and filtering
c10 A69-16601

RIGID ROTORS
Undamped rigid rotor critical speed analysis for firm and flexible foundations, discussing effect of center of gravity and rotor shapes
[ASME PAPER 69-VIBR-49] c32 A69-24184
NASA flight test of hingeless rotor compound helicopter to determine lift sharing characteristics, showing rotor lift dependence on airspeed
c02 A69-29702
Frequency and critical speed analysis of rigid rotors on flexible foundations
[NASA-TN-D-4858] c32 N69-29159

RIGID STRUCTURES
Light rigid civil aircraft response to continuous atmospheric turbulence estimated using two rigid body degrees of freedom method for vertical and lateral gusts
[AIAA PAPER 69-766] c32 A69-35657
Calorimetric evaluation of three 1.5-meter diameter inflatable rigidized solar concentrators for solar dynamic cycle power systems
[NASA-TN-D-5234] c03 N69-28123
Equations of motion for rigid body rotor in linearized bearings
[NASA-CR-1391] c15 N69-36349
Comparison of fourth order Runge-Kutta numerical integration technique with two numerical integration formulas in mathematical models used for computing rigid body trajectories
[NASA-TN-D-5425] c30 N69-38769

RING CURRENTS
Ring current particle energy density distribution for symmetric portion of magnetic storm derived

from current magnetic field profile measurements
c29 A69-11227

RING STRUCTURES
Rotational spectrum of ethylene episulfoxide to determine molecular structure, particularly orientation of C sub 2 S ring
c06 A69-20535
Graphite fiber NOL rings and biaxial wound pressurized cylinders tested at ambient and cryogenic temperatures for tensile and cyclic fatigue properties
c18 A69-35521
Computer program determination of barreling effect on strength of ring and stringer stiffened shells designed to support axial compression loads
c32 A69-43671

RIOMETERS
Ground based solar proton monitoring, considering particle intensities and radiation dose rates from riometer absorption as function of time
c29 A69-32321

RLC CIRCUITS
Time varying resistance wire to arrest oscillations in pulsed capacitor discharge circuit, deriving over, under and critical damping conditions
c09 A69-41228

ROCKET ENGINE CASES
Rocket motor integration into Scout vehicle to improve performance
c31 A69-12384

ROCKET ENGINE CONTROL
Fluidic proportional thruster system for sounding rocket control
[ASME PAPER 68-WA/FE-32] c14 A69-16105

ROCKET ENGINE DESIGN
Ion accelerators design for Kaufman thrustors in terms of beam optics and grid lifetime, using digital computer and electrolytic tank analog
[AIAA PAPER 69-261] c28 A69-21261
Cryogenic core concept for flexible and economical delivery system
[AIAA PAPER 68-812] c31 A69-39753
Parameters of acoustic liner for maximum liner damping for rocket engines
[NASA-TM-X-1720] c28 N69-16152

ROCKET ENGINES
Fluidic proportional thruster system for sounding rocket control
[ASME PAPER 68-WA/FE-32] c14 A69-16105
Research and development program in annular slit colloid thrustor technology, proving thrustor feasibility by performance tests
[AIAA PAPER 69-287] c28 A69-21257
Performance of bipropellant fractional-pound rocket thrustor
[NASA-TM-X-1699] c28 N69-13237
Water electrolysis rocket engine performance tests
[NASA-TM-X-1737] c28 N69-19017
Wind tunnel force and pressure tests of rocket engine nozzle extensions on X-15-2 model at supersonic and hypersonic speeds
[NASA-TM-X-1759] c01 N69-20873
Boundary layer interaction in cooling tubes of rocket engines tends to lower convective heat transfer
[NASA-TN-D-5168] c33 N69-22931
Design of injectors and ablative thrust chambers for FLOX propane rocket engine with 1.2 inch throat diameter
[NASA-TN-D-5324] c28 N69-30560
Throat and nozzle insert design for ablative rocket engine using storable propellants
[NASA-TN-D-4964] c32 N69-33481
Design, development, and testing of 1000 pound thrust FLOX-propane ablative rocket engine
[NASA-TM-X-1873] c28 N69-35847
Historical development of liquid propellant rocket engines and aviation models
[NASA-TT-F-537] c34 N69-36314
Performance of radiation cooled magnetoplasmadynamic arc thrustors
[NASA-TM-X-1908] c28 N69-40058

ROCKET EXHAUST
Propellant condensation on surfaces near electric rocket exhaust, calculating particle arrival rates, backflow and desorption energies
[AIAA PAPER 69-270] c28 A69-21252
Pressure and heating rate correlations for rocket exhausts impinging on flat plates and curved panels, generating axisymmetric real gas exhaust plumes
c33 A69-26781
RAM-CA carbon-phenolic heat shield test in rocket engine exhaust
[NASA-TM-X-1841] c31 N69-32713

ROCKET FLIGHT
Rocket trajectory determination by tracking onboard light source against star background with image orthicon TV system
c07 A69-26965

ROCKET LAUNCHING
Exametnet meteorological rocket launchings and data dissemination, 1967 - tables
[NASA-SP-176] c20 N69-22570

ROCKET LININGS
Helmholtz resonators with variable cavity depths tested with unstable rocket combustor
[NASA-TN-D-5171] c33 N69-23351
Dynamic stability and performance of injectors, rocket liners, and supersonic combustors
[NASA-TM-X-1845] c33 N69-32468

ROCKET NOSE CONES
Aerodynamic loads on deployed canard surfaces and rocket nose section of Apollo launch escape vehicle
[NASA-TN-D-5260] c31 N69-28166

ROCKET NOZZLES
Hydrogen and methane combustion to simulate expansion of storable propellants
[AIAA PAPER 68-635] c33 A69-37188
Rocket engine evaluation of erosion and char as functions of fabric orientation for silica reinforced nozzle materials
[NASA-TM-X-1721] c28 N69-15475
Correlation equations for predicting gas-side heat transfer of axisymmetric rocket engine nozzles
[NASA-TM-X-1748] c33 N69-18898
Energy thickness in prediction of throat heat transfer in rocket nozzles using nozzle geometries and temperature ratios
[NASA-TN-D-5356] c33 N69-31869

ROCKET OXIDIZERS
Treatment procedure and preventive programs outlined for acute exposure to toxic rocket fuels or oxidizers
c05 A69-12498

ROCKET PROPELLANTS
Treatment procedure and preventive programs outlined for acute exposure to toxic rocket fuels or oxidizers
c05 A69-12498
Mercury electron bombardment thrusters, discussing mission, design, ground tests, components and thrust vectoring
c28 A69-26787
Lunar soil as building material and extraction of water, oxygen and rocket propellants from lunar materials for lunar colony needs
c30 A69-27907
Nonequilibrium performance of oxygen difluoride diborane rocket propellant
[NASA-TN-D-4992] c27 N69-16195

ROCKET SOUNDING
Simultaneous rocket measurements of D region temperatures and electron densities on anomalous winter day
c13 A69-16411
Radar backscatter and rocket profiles of ionospheric electron temperature, noting agreement in daytime flight measurements
c29 A69-25162
Rocket spectrographic observations of Alpha Virginis noting hydrogen Lyman absorption lines
c30 A69-27555
Spectrometric rocket measurements of ion concentrations between 200 and 630 km
c13 A69-31974
Ionospheric currents geophysical dc electric field measurement from sounding rockets, indicating anticorrelation with auroral luminosity
c13 A69-38508
Survey of rocket soundings to 60 km, and 100 km
[NASA-CR-1293] c13 N69-18700

ROCKET TEST FACILITIES
Short duration tube wind tunnel supersonic testing, noting Saturn S-1C base heating and

solid propellant rocket base burning tests
[AIAA PAPER 69-335] c11 A69-28271
ROCKET VEHICLES
Ballistically effective atmospheric parameters for rocket vehicle design manuals involving application of climatological concepts of meteorology
c31 A69-26874
Wind profile developed for calculation of deflection impulse for rocket with liquid injection thrust vector control
[NASA-TM-X-1708] c31 N69-14033
Aerodynamic characteristics in pitch of scale model of two and three stage rocket configuration at Mach numbers of 0.4 to 4.63
[NASA-TN-D-5378] c01 N69-34986
ROCKET-BORNE INSTRUMENTS
Nocturnal electron concentrations and temperature at Manitoba measured by rocket-borne Langmuir probe, compared with F 1 region
c29 A69-14008
Rocket-borne spectroheliograph for monochromatic solar photography in Mg II 2802.7 A line noting filter bandwidth, film polarizers and temperature control
c14 A69-24838
Spinning rockets UV spectrophotometry of early type stars, discussing instrumentation, calibration, data recording and stellar spectra
c30 A69-25812
ROCKET-BORNE PHOTOGRAPHY
Rocket-borne spectroheliograph for monochromatic solar photography in Mg II 2802.7 A line noting filter bandwidth, film polarizers and temperature control
c14 A69-24838
ROCKETS
Professional programs for aeronautics, rocketry and astronautics development
c34 A69-34552
Variational methods for determining optimum design and flight of rockets
[NASA-TR-R-297] c31 N69-15374
ROCKS
X Ray fluorescence of rock samples as applied to geological problems, noting standard deviations for element distribution
c14 A69-10890
RODS
Magnetically anchored eddy current and eddy current rod dampers for GEOS gravity gradient stabilized satellite
[NASA-CR-1282] c14 N69-18953
ROLL
Feasibility of using roll and yaw compensation to reduce inclination error of Scout launch vehicle
[NASA-CR-1209] c31 N69-16221
Human transfer characteristics in flight and ground simulation for roll tracking task
[NASA-TN-D-5007] c05 N69-17814
ROLLER BEARINGS
Design of Brayton rotating unit with roller bearings for space power system
[NASA-CR-1401] c15 N69-33450
ROLLING MOMENTS
Aerodynamics of bodies of revolution in nonplanar motion using nonlinear functional analysis of moments for motion about center of gravity
[AIAA PAPER 68-20] c01 A69-14714
Motion stabilization criteria for aircraft during spatial maneuvers
[NASA-TT-F-555] c02 N69-24761
ROOT-MEAN-SQUARE ERRORS
Root mean square time delay error with respect to playback time and autocorrelation function of tape recorded sine wave for studying jitter spectra
c14 A69-18827
ROTARY STABILITY
Herringbone grooved gas lubricated journal bearing stability, testing effects of geometries and clearances on onset speed for half frequency whirl
[ASME PAPER 68-LUBS-25] c15 A69-27271
Theory and clearance effects on stability of water lubricated herringbone-groove journal bearings
[NASA-TN-D-4883] c15 N69-10228
Operational and structural design criteria for artificial gravity stabilization of rotating space station
[NASA-TN-D-5426] c05 N69-39210
ROTARY WING AIRCRAFT
Aerodynamics of rotary wing and V/STOL aircraft - Conference, Buffalo, June 1969, Volume 3
c01 A69-41369
Wind tunnel investigation of steady state aerodynamics of composite lift VTOL aircraft model combining rotary and fixed wings
[NASA-TN-D-5232] c02 N69-28097
ROTARY WINGS
Flexible rotor blade dynamic response to radially moving force, emphasizing helicopter rotor vibration characteristics associated with tip-vortex impingement
[AIAA PAPER 69-203] c02 A69-19546
Aerodynamics of rotary wing and V/STOL aircraft-Conference, Buffalo, June 1969, Volume 2, Wind tunnel testing, new concepts in rotor control
c01 A69-35226
Flow field throughout wind tunnel containing rotor with sharply defected blades, noting reversed flow effect in front of wake
c11 A69-35228
Aerodynamic performance tests of autorotative unpowered rotor entry vehicle model at various Mach numbers and angles of attack
[AIAA PAPER 68-950] c01 A69-37155
Rotor aerodynamics research in terms of theoretical and experimental data comparison, rotor blade flow visualization and blade section camber
c01 A69-41372
Aerodynamic stability of helicopter rotor in forward flight
[NASA-CR-1332] c32 N69-34744
Approximative solution for dynamic response of flexible rotor blade to radially moving force
[NASA-TN-D-5410] c32 N69-36220
Tabulated bending moment transfer coefficients for helicopter rotor blades
[NASA-CR-1441] c32 N69-40359
ROTATING BODIES
Gravitational and magnetic torque effect on rotational motion of triaxial rigid body in regressing orbit about oblate primary mass
c30 A69-32240
Antenna reactance from sounding rocket in ionosphere, showing variations relationship to rocket spin period
c13 A69-39964
Air flow and attitude angle compared with theory for rotating externally pressurized air journal bearings
[NASA-TN-D-5192] c15 N69-27956
Eddy current torques on bodies rotating relative to uniform magnetic field
[NASA-TN-D-5086] c23 N69-29477
Mathematical simulation model for rigid body rotational kinematics
[NASA-TN-D-5302] c23 N69-39178
ROTATING CYLINDERS
Equations formulated for space vehicle reaction to rotating machinery and internal mass motion, evaluating dynamics of cylindrical space station rotating about major axis
c30 A69-16476
ROTATING ENVIRONMENTS
Rotational velocity estimates by observers during angular acceleration, noting vestibular function interpretation
c04 A69-15332
ROTATING FLUIDS
Fluid dynamic simulation of gas core nuclear rocket chamber for separating light and heavy gas via centrifugal force produced by MHD-driven rotational flow
[AIAA PAPER 69-727] c22 A69-33483
Hydrodynamic stability and vortex containment of two fluid wheel flow to helical disturbances contained by axial magnetic field
[NASA-TN-D-5372] c12 N69-32377
ROTATING PLASMAS
Rotating plasma disturbances onset in MPD arc, determining magnetic field dependence on mass flow, background pressure and propellant
[AIAA PAPER 69-232] c28 A69-21225
ROTATING SHAFTS
Rotating wickless hollow shaft heat pipe utilizing

centrifugal acceleration for return pumping of condensate and transferring high heat fluxes
[ASME PAPER 69-HT-19] c33 A69-43550
Single shaft Brayton rotating unit for 2 to 10 kilowatt space power generation system
[NASA-TM-X-1869] c03 N69-39238
ROTATION
Rotational effects on isothermal compressible flow across gas turbine sealing dam
[NASA-TN-D-5344] c15 N69-35799
ROTOR AERODYNAMICS
Flow field throughout wind tunnel containing rotor with sharply defected blades, noting reversed flow effect in front of wake
c11 A69-35228
Rotor aerodynamics research in terms of theoretical and experimental data comparison, rotor blade flow visualization and blade section camber
c01 A69-41372
ROTOR BLADES
Theoretical study of discrete frequency noise generated by turbocompressors and blades
[NASA-CR-1287] c28 N69-21476
Tabulated bending moment transfer coefficients for helicopter rotor blades
[NASA-CR-1441] c32 N69-40359
ROTOR BLADES (TURBOMACHINERY)
Performance evaluation of tandem rotor blade of single stage turbine
[NASA-CR-1254] c01 N69-13621
Performance comparisons of supersonic compressor rotor blades
[NASA-CR-1256] c28 N69-14210
Performance evaluation of oil lubrication system for antifriction bearing rotor system of Brayton cycle turbomachinery
[NASA-CR-1229] c15 N69-16463
Effect of rotor tip clearance on performance of 5-inch single-stage axial flow turbine
[NASA-TM-X-1757] c03 N69-20883
Performance and cavitation damage to axial flow pump rotor blades in high temperature liquid sodium
[NASA-TN-D-5138] c15 N69-21773
FORTRAN computer program for detailed solution of compressible, subsonic, nonviscous flow at leading or trailing edges of blade surface
[NASA-TN-D-5091] c01 N69-22938
Performance evaluation of plain rotor blade with plow type vortex generators
[NASA-CR-1342] c28 N69-24223
Prediction of cavitation performance of centrifugal pumps
[NASA-TN-D-5292] c15 N69-29165
Noncavitating and cavitating performance of inducer in liquid hydrogen
[NASA-TM-X-1854] c12 N69-33261
ROTOR LIFT
NASA flight test of hingeless rotor compound helicopter to determine lift sharing characteristics, showing rotor lift dependence on airspeed
c02 A69-29702
Wind tunnel and analytical study of conversion from wing lift to rotor lift on composite lift VTOL aircraft
[NASA-TN-D-5256] c02 N69-28044
ROTOR SPEED
Frequency and critical speed analysis of rigid rotors on flexible foundations
[NASA-TN-D-4858] c32 N69-29159
ROTORS
High speed foil bearing rotor support system
[NASA-CR-1157] c15 N69-14214
Large solar sail vehicle to operate in manner of helicopter rotor
[NASA-CR-1329] c31 N69-28861
ROUND TRIP TRAJECTORIES
Matched conic solutions to round trip interplanetary trajectory problems for use in guidance and navigation simulation
[NASA-TN-D-4942] c30 N69-14861
RUBBER
Reverted rubber during skidding of aircraft tires
[NASA-CR-1398] c02 N69-34915
RUBIDIUM
Moldavites and Ries crater material, studying Rb-Sr isochronal relationship
c13 A69-41341
RUBIDIUM ISOTOPES
Rb-Sr isotope patterns in tekites from Southeast Australian strewn field, studying Rb volatilization role in Rb-Sr isochron production
c13 A69-41342
RUBY LASERS
Optical parametric noise in water by ruby laser beam for phase matched four photon process
c23 A69-21751
RUNGE-KUTTA METHOD
Low order Runge-Kutta formulas with step control for heat transfer problems
[NASA-TR-R-315] c19 N69-30753
Comparison of fourth order Runge-Kutta numerical integration technique with two numerical integration formulas in mathematical models used for computing rigid body trajectories
[NASA-TN-D-5425] c30 N69-38769
RUNWAY CONDITIONS
Runway grooving to improve aircraft tire traction in adverse weather tested by F-4D and Convair 990A under wet conditions
[AIAA PAPER 69-773] c02 A69-35649
Aviation pilot reactions and opinions on grooved runways
[NASA-CR-1428] c02 N69-35861
Airplane response to ground roughness from three-track runway and taxiway profiles by elevation angle measurements
[NASA-TN-D-5444] c02 N69-38770
RUNWAYS
Runway and highway pavement grooving and traction studies
[NASA-SP-5073] c11 N69-20451

S

S MATRIX THEORY
Full wave calculation of gravity waves for thermospheric model, describing wave type reflection, transmission, conversion and coupling by scattering matrix elements
c13 A69-25150
S WAVES
Monte Carlo analysis of gold sphere transmission experiments at 24 keV neutron energy using S wave spin state data
[NASA-TN-D-5211] c24 N69-24826
SAFETY DEVICES
Pilot warning indicators to equip all aircraft at low cost, discussing Doppler system
c21 A69-16726
SAFETY FACTORS
Safety planning for use of reactive cryogens in large volume, noting FLOX and liquid fluorine
c27 A69-14468
Management system for safety in NASA Manned Space Flight Program, discussing hazard analyses and reduction precedence sequence
[AAS PAPER 69-522] c34 A69-42851
SAGITTARIUS CONSTELLATION
Nebulosity around FG Sagittae for origin and evolution of planetary nebulae, suggesting ejection of nebular shell
c30 A69-42887
SALT BATHS
Hot salt stress corrosion of Ti alloy, discussing hydrogen generation during elevated temperature exposure and embrittlement as manifestation of strain rate
c17 A69-39434
SALT SPRAY TESTS
Salt stress corrosion cracking effects on tensile and stress rupture properties of titanium alloy sheet
[NASA-TN-D-5417] c17 N69-36221
SALTS
Salts and organic solvents effect on halophile Halobacterium cutirubrum catalase, noting enzyme activity inhibition by cation and anion
c04 A69-35291
Electron transport chain of monovalent and divalent cations and of polyamines, studying effects on menadione reductase activity to determine salt dependence
c04 A69-41077
SAMPLES
Apollo lunar sample collection and analysis,

discussing astronauts activity and equipment, sample types, laboratories for radioactive counting and gas analysis, etc
c11 A69-40191

SAMPLING
Statistical method for evaluating goodness of fit between data set and theoretical distribution of random variables
[NASA-TR-R-313] c19 N69-30610
Recursive equation for estimating variance of sequential random numbers
[NASA-TN-D-5465] c19 N69-38178

SANDS
Force penetration characteristics of sand horizontally penetrated by various geometrically shaped models
[NASA-CR-1252] c18 N69-14764

SANDWICH STRUCTURES
Structural design of conical and tension shells using sandwich structures
[NASA-CR-1365] c32 N69-36357

SATELLITE ANTENNAS
Directional solar thermal field /sunlight/ effect on coupled nonplanar transverse and torsional vibrations of satellite cylindrical antennas in orbit
c32 A69-25534

SATELLITE ATTITUDE CONTROL
Multipulse thruster module design and development tests for spacecraft attitude control, noting micropulse solid propellant rocket motor
c03 A69-11762
Multijet electrothermal systems for attitude control and stationkeeping of synchronous communications satellite
[AIAA PAPER 67-723] c28 A69-12375
Semiactive gravity gradient stabilization system design for low altitude earth oriented spacecraft attitude control, using active reaction wheel scanner
c31 A69-18334
Biosatellite attitude control systems design development and flight test results for payload perturbing effects, discussing simulation activity
c31 A69-35094
Valving concepts and functional approaches for inert gas attitude control thrustor systems providing redundancy safeguards at minimum weight, volume and power costs
[AIAA PAPER 69-843] c28 A69-39373
Mass expulsion and momentum systems for orbiting space station attitude control optimized, considering reaction jet and control moment gyro systems
[AIAA PAPER 69-846] c31 A69-39376
Spacecraft wide angle attitude control system stability analysis, using air bearing table simulation
[AIAA PAPER 69-856] c31 A69-39384
Radio astronomy Explorer A attitude determination via disk-oriented programming ground support system for reducing and calibrating telemetry data, attitude prediction and command, etc
[AIAA PAPER 69-983] c08 A69-40363
Torqued two axis gimbaled boom actuator satellite attitude control
[AIAA PAPER 68-857] c21 A69-43245
Oscillations in pulse modulated satellite attitude control systems
[NASA-CR-1369] c21 N69-29967
Spinning satellite attitude stability
[NASA-TN-D-5268] c31 N69-32298
Optimal control method based on linear programming for satellite fuel consumption
[NASA-CR-1450] c21 N69-41036

SATELLITE CONFIGURATIONS
Small astronomy satellite /SAS/ design, power, command, telemetry and control systems
c31 A69-19126

SATELLITE CONTROL
Radar attitude sensing system for determining vehicle roll, pitch, yaw, altitude and velocity of earth and lunar orbital vehicles
c07 A69-13183
Small astronomy satellite /SAS/ design, power, command, telemetry and control systems
c31 A69-19126
NASA lunar survey and mapping for generating Apollo satellite landing navigation control, using analytic photogrammetry, camera position and altitude data of lunar topography
c14 A69-36931

SATELLITE DESIGN
RAE-A satellite design, simulation and flight performance, discussing gravity gradient stabilization
c31 A69-18328
Small astronomy satellite /SAS/ design, power, command, telemetry and control systems
c31 A69-19126
Small Scientific Satellite program, discussing payload for investigating magnetosphere and near interplanetary space
[IEEE PAPER 3C-1] c31 A69-19195
OGO for conducting diversified measurements to study earth atmosphere, earth-sun relationship, etc
c31 A69-36674
Orbital Experimental Capsule /OEC/ as subsatellite concept for Martian fields and particles measurements, noting Voyager exploring vehicle applications
c30 A69-39215

SATELLITE DRAG
Polar exosphere near solar maximum investigation by Explorer 19 and Explorer 24 drag satellites, considering density and atomic oxygen concentration measurements
c13 A69-31351

SATELLITE INSTRUMENTS
Small Scientific Satellite program, discussing payload for investigating magnetosphere and near interplanetary space
[IEEE PAPER 3C-1] c31 A69-19195
Satellite-borne experiments of neutral molecular beam-solid surface interactions, describing Molsink chamber, densitometer, sphere and paddlewheel satellites
c24 A69-36182
HgCdTe as IR satellite detector for terrestrial, atmospheric and ocean mapping, IR astronomy and optical communication
c26 A69-43666

SATELLITE NAVIGATION SYSTEMS
Artificial satellites as navigation aids, describing angle, range and range-angle systems, discussing orbital mechanics and communications difficulties
c21 A69-34855

SATELLITE NETWORKS
Navigation services satellite systems including position determination, communication and telemetry for ships and aircraft
[UN PAPER 68-95363] c21 A69-10479
Data relay satellite systems for support of NASA R and D missions, discussing communications between satellites and to mission control
c07 A69-25296
Tracking and data acquisition networks and communications systems for support of space missions, studying data processing, unified S Band System and Data Relay Satellite System
c07 A69-25933
Real time telemetry, tracking and command links by synchronous satellite relay, describing ATS-Nimbus E S band experiment
c07 A69-41759

SATELLITE OBSERVATION
Atmospheric model development relating temperature, density, moisture and energy measurements from satellite observations for long term weather forecasting
[UN PAPER 68-95397] c20 A69-10463
Orbiting satellite global all-weather oceanographic data acquisition to complement higher resolution data from ships, buoys and aircraft remote sensors
[UN PAPER 68-95878] c13 A69-10491
Magnetic field data from OGO-2 spacecraft and surface magnetic observatories, noting magnetic storm occurrence and magnetosphere inflation and detection of polar ionospheric currents
c13 A69-11125
Sudden magnetic field increase associated with July 8, 1966 sudden commencement observed by OGO 3 satellite in magnetotail

c13 A69-11226
Solar plasma observations during magnetic storms, discussing shocks and tangential discontinuities, geomagnetic variations and He
c13 A69-11234
Vela 3A and Explorer 33 elapsed time observations of earth bow shock
c13 A69-12299
Moon effect on intensity and angular distribution of energetic electron and proton shadowing as observed by Explorer satellites
c30 A69-16252
Explorer 35 measurements of low energy plasma in lunar orbit made by planar multigrid sensor programmed as retarding potential analyzer
c30 A69-16278
Photomultipliers response to energetic particles in terms of background current using data from OGO experiments
c14 A69-16932
Atmospheric measurements from satellites, discussing ATS-1 cloud images for definition of wind and use of WEFAX through ATS 2 satellites for data transmission
[AIAA PAPER 69-158] c20 A69-18038
Structure, temporal behavior, shape and length of earth magnetic tail via satellite mapping
c29 A69-19363
Geomagnetic tail topology, reconnection and interaction with moon from Explorer 33 satellite data
c13 A69-19365
Cosmic radio noise intensity measurements by ATS 2 satellite-borne radiometer
c30 A69-19715
Solar extreme UV, soft and hard solar X rays, cosmic X rays and gamma rays, cosmic ray particles and near earth visible radiation observed by OSO-3
c29 A69-22167
Sudden commencement associated discontinuities in interplanetary magnetic field observed by IMP 3 satellite, stressing shocks and tangential and rotational discontinuities
c30 A69-22183
Spectral intensity of high energy solar X rays observed during July 7, 1966 polar event with satellite OGO 3, suggesting nonthermal bremsstrahlung origin
c29 A69-23753
Simultaneous interplanetary magnetic field measurements by geocentric satellites Explorer 33 and IMP 3 of MHD shock wave associated with July 8, 1966 sudden storm commencement
c30 A69-23773
Satellite measurements of suprathermal electrons at conjugate sunrise, indicating photoelectron escape from production level and movement along geomagnetic lines into conjugate ionosphere
c29 A69-25144
Satellite observations of geomagnetic tail in magnetosphere near midnight meridian plane, discussing formation, shape, plasma sheet and models
c13 A69-26739
Earth resources remote sensing from spacecraft noting meteorology, oceanography, forestry, agriculture and IR detection of plant diseases and pollution
c34 A69-26978
Star twinkling absence for lunar observation laboratory, noting star distance measurement and laser action in stellar atmospheres
c30 A69-27172
High latitude ionization spikes observed by POGO spacecraft, noting frequency correlation with magnetic disturbances and development by high energy electron injections
c29 A69-28950
Suprathermal electrons energy distributions as function of magnetic latitude in polar ionosphere obtained by Explorer 31 satellite observation
c29 A69-28963
Discontinuities in interplanetary magnetic field direction presented on mesoscale from Pioneer 6 observation, emphasizing distribution in time
c30 A69-29970
Solar wind Helmholtz-type velocity discontinuities, noting plasma density and temperature stabilities from Explorer 34 observations
c29 A69-29971
Solar wind existence verified by direct measurements of interplanetary magnetic field and plasma, reviewing solar corona studies by satellites and space probes
c30 A69-30010
IQSY low energy galactic and solar cosmic ray observations made by various satellites and space probes, including hydrogen and helium energy spectra
c29 A69-30014
Banded chorus, VLF discrete emissions in magnetosphere in single variable frequency band with frequency depending on equatorial electron gyrofrequency
c13 A69-31981
Interplanetary magnetic fields from Explorer 33 magnetometer relationship to surface geomagnetic variations emphasizing unified view
c30 A69-32309
Survey of six year period of satellite observed tropical Pacific cloud mapping
c20 A69-33001
Vertical tropospheric humidity distribution estimation from IR spectra obtained by TIROS satellites
c13 A69-34284
Ion depletion in high latitude exosphere, considering OGO 2 simultaneous observations of positive ion concentration, VLF signal propagation and whistlers
c29 A69-34939
Earth bow shock waves in far upstream interplanetary medium observed from magnetic data of Explorer 34 satellite
c30 A69-34941
OGO for conducting diversified measurements to study earth atmosphere, earth-sun relationship, etc
c31 A69-36674
Solid state detector for electron spatial distribution measurements on OGO-F satellite, discussing design emphasizing reliability
c09 A69-36676
Power spectra of interplanetary magnetic field fluctuations determined from Pioneer 6 satellite data, relating results to galactic cosmic rays modulation
c30 A69-37554
Electron density profiles from topside ionograms compared to ground based sounding results, discussing error corrections
c07 A69-37865
Global electron density distribution morphology in topside ionosphere during sunspot minimum from Alouette 1 and 2 ionograms
c13 A69-37867
Cylindrical electrostatic probe measurements on Alouette 2 and Explorer 31, considering implications for future missions
c14 A69-37877
Planar thermal ion and electron trap experiments on Explorer 31 satellite, measuring ion and electron density and temperature and ionic composition
c14 A69-37878
Suprathermal electron flux in lower latitudes and polar region analyzed from measurements by retarding potential analyzers on Explorer 31 satellite
c29 A69-37880
Frequency shifts observed in Alouette 2 cyclotron harmonic plasma resonances, noting antenna length and direction
c07 A69-37892
Explorer 32 atmospheric density measurements revealing neutral thermosphere latitudinal variations during geomagnetically undisturbed times
c13 A69-38100
Lunar Explorer 35 measurements of lunar surface electromagnetic properties, magnetic fields and solar wind-moon interactions
c30 A69-38379

Shock discontinuities in solar wind measured by magnetic field and plasma instruments on Explorer 34, applying Rankine-Hugoniot relations c30 A69-40304
Explorer 34 observations of hydrogen and He ions in solar wind, noting number density variations and tentative association with geomagnetic storms c29 A69-40305
Topside ionosphere response to magnetic storms, using Explorer 22 satellite electron concentration and temperature measurements c13 A69-42438
IMP 4 satellite measurements of cosmic ray electrons in interplanetary space compared to predictions of electron intensity from interstellar proton-electron collisions c29 A69-42667
Satellite-based meteorological observation system for global atmospheric research program, discussing wind measurement, IR and microwave sounding possibilities, etc
[AAS PAPER 69-120] c13 A69-42817
Venus swingby and direct Mercury trajectories analysis for optical imaging from flyby missions
[AAS PAPER 69-258] c30 A69-42860
Bidirectional reflectance of earth atmosphere and cloud formation above equatorial Pacific observed by synchronous satellite as function of angular dependence c20 A69-43154
Nighttime protonosphere thermal balance from Alouette 2 electrostatic probe measurements of electron temperature and concentration in magnetosphere c13 A69-43181
Solar flare soft X ray and EUV emission spectra data obtained on OSO-3 satellite compared with centimetric radio bursts c29 A69-43609
Preprocessing procedures for reduction of electronic data from geodetic satellites
[NASA-CR-1183] c08 N69-11470
Air pollution detection using satellite observation
[GDC-DBE-68-011] c13 N69-31961

SATELLITE ORBITS
Geopotential resonant orbital perturbations of existing satellites, noting high inclination role c31 A69-13777
Artificial satellites as navigation aids, describing angle, range and range-angle systems, discussing orbital mechanics and communications difficulties c21 A69-34855
Satellites resonant perturbations analysis, deriving mean mean motion formulas c31 A69-39968
Ionospheric irregularities effect on accurate satellite position determination in near real time c07 A69-42549
Accuracy and speed comparison between drag-free and numerical satellite orbit prediction methods
[NASA-TN-D-5203] c30 N69-26252
Semianalytic theory for lunar satellite motion including perturbative effects
[NASA-TN-D-5043] c30 N69-28050

SATELLITE PERTURBATION
Anomalous spacecraft OGO-D motion explained by open section boom thermally induced oscillations, discussing corrective measures c32 A69-18331
Lunar mass and gravitational field determined from lunar satellite dynamics, using potential function in terms of spherical harmonics c30 A69-31405
Short term motion of lunar satellite, discussing third body disturbing functions and perturbation solution of nonsingular orbit elements c30 A69-35934
Hansen method applied to Jupiter tenth satellite orbit correction and perturbations, describing computer program and formulas used c30 A69-37529
Satellites resonant perturbations analysis, deriving mean mean motion formulas c31 A69-39968
Application of Hansen lunar theory to 10th satellite of Jupiter
[NASA-TN-D-4979] c30 N69-14479

SATELLITE ROTATION
Spinning satellite attitude stability
[NASA-TN-D-5268] c31 N69-32298

SATELLITE TRACKING
Computer programming of satellite orbit tracking angles for automatic picture transmission receiving stations c07 A69-14917
Gain measurement of two element phased array aperture antenna during ATS-C tracking c07 A69-36254
Tracking and Data Relay Satellite System with synchronous orbit satellites to relay data between low altitude earth orbital spacecraft and mission control centers c07 A69-41755
Real time telemetry, tracking and command links by synchronous satellite relay, describing ATS-Nimbus E S band experiment c07 A69-41759
Rosman I reflector antenna for collecting data from earth orbiting satellites, discussing dynamic analysis of structural response to natural frequencies c32 A69-42133
Preprocessing procedures for reduction of electronic data from geodetic satellites
[NASA-CR-1183] c08 N69-11470
Minitrack data reduction procedures, with IBM 360 computer program description
[NASA-TN-D-5042] c08 N69-26193
Statistical analysis of satellite position with tracking error inclusion
[NASA-TN-D-5259] c30 N69-30611

SATELLITE TRANSMISSION
International experimentation with U.S. communications satellites, noting design variations with participants and restraintless information exchange
[UN PAPER 68-95421] c20 A69-10474
WEFAX /Weather Facsimile/ experiment to explore operational feasibility of direct meteorological data transmission via satellite relay from central station to remote stations c11 A69-13240
Conjugate echoes in Alouette 2 topside sounder ionograms explained by multiple reflections between conjugate points of field line, noting magnetospheric waveguides role c07 A69-20045
Image dissector meteorological cameras, discussing ATS-3 and Nimbus systems, high resolution camera and multispectral cameras c14 A69-35101
Procurement and construction of automatic picture transmission ground station equipment for ESSA and Nimbus transmission
[NASA-SP-5080] c07 N69-31985

SATELLITE-BORNE PHOTOGRAPHY
Gemini program for geologic orbital photography, discussing equipment used c13 A69-35274
Multispectral orbital photography used to obtain urban land-use data
[AAS PAPER 69-483] c13 A69-42837

SATELLITE-BORNE RADAR
Radar attitude sensing system for determining vehicle roll, pitch, yaw, altitude and velocity of earth and lunar orbital vehicles c07 A69-13183

SATURN (PLANET)
Rocket-borne photoelectric photometers for UV observations of Saturn, using interference filters c30 A69-22216
Analytical evaluation of space storable propellants for unmanned Jupiter and Saturn orbiter missions
[NASA-TM-X-1793] c31 N69-24942
Planetary flight handbook - direct trajectories to Jupiter, Saturn, Uranus, and Neptune
[NASA-SP-35-VOL-3-PT-7] c30 N69-33490

SATURN LAUNCH VEHICLES
Saturn fireball thermal environment associated with liquid propellant explosions, using analytical model

c27 A69-14475
Manual guidance and control of Saturn launch vehicles, considering feasibility, reliability and hardware implementation
[AIAA PAPER 69-876] c31 A69-39402
SATURN S-1C STAGE
Short duration tube wind tunnel supersonic testing, noting Saturn S-1C base heating and solid propellant rocket base burning tests
[AIAA PAPER 69-335] c11 A69-28271
Saturn 5 longitudinal instability /POGO/ precluded by lowering S-1C stage propulsion system resonance below structural frequency
[AIAA PAPER 69-548] c31 A69-32658
SATURN S-4B STAGE
Cryogenic behavior of adhesive materials used in fabrication of liquid hydrogen/liquid oxygen powered Saturn S-4B stage
c18 A69-16487
System designs for manned spacecraft gravity gradient stabilization of Saturn S-4B stage at 400 km and lunar module at synchronous altitude
c31 A69-18338
Investigation of SA-501 S-4B auxiliary propulsion system anomalies
[NASA-TN-D-5207] c28 N69-26224
Wind tunnel stability tests to determine flutter characteristics of Saturn S-4B stage panel
[NASA-TN-D-5439] c32 N69-38808
SATURN STAGES
Nuclear rockets as Saturn 5 third stages, emphasizing increased payload or velocity utility and resulting engine and stage requirements
[AIAA PAPER 69-555] c31 A69-31849
SATURN 1 LAUNCH VEHICLES
Simulator program for defining in-flight experiment to evaluate manual control system for Saturn 1
[NASA-TN-D-5150] c21 N69-22936
SATURN 1B LAUNCH VEHICLES
Wind tunnel investigation for determination of subsonic and transonic aerodynamic characteristics of Saturn 1B launch vehicle
[NASA-TM-X-1848] c31 N69-33380
SATURN 5 LAUNCH VEHICLES
LOX prevalve accummulator system with He pressurant for prevention of POGO effect on Saturn 5
c31 A69-15298
Nondestructive testing methods for Saturn 5 space vehicle with emphasis on NDT equipment for Apollo program
c15 A69-23050
Saturn 5 longitudinal instability /POGO/ precluded by lowering S-1C stage propulsion system resonance below structural frequency
[AIAA PAPER 69-548] c31 A69-32658
Plastics applications in Apollo-Saturn 5 program, considering foam, honeycomb, conformal coatings, embedment compounds, dielectrics, damping compounds, adhesives, sealants and gaskets
c18 A69-38533
Apollo-Saturn 5 propulsion and structure feedback loop, analyzing POGO components and Nyquist plot application
[AIAA PAPER 69-877] c31 A69-39403
Navigation state vector update effect on lunar mission completion capability for Saturn 5, emphasizing hardware and scheme errors and accelerometer failure
[AIAA PAPER 69-883] c21 A69-39409
Vibration characteristics of 1/40 scale model of Saturn 5 launch vehicle and umbilical tower configuration
[NASA-TN-D-4870] c31 N69-10775
Direct stiffness method of computing vibrational characteristics of dynamic model of Apollo-Saturn 5 vehicle - umbilical tower configuration
[NASA-TN-D-4871] c31 N69-10934
Lateral vibration characteristics of dynamic model of Apollo-Saturn 5 launch vehicle
[NASA-TN-D-4872] c31 N69-11007
Identification of structural systems using near resonance testing
[NASA-TN-D-5069] c32 N69-17737
Saturn 5 launch vehicle scale model tests for free vibration during first stage burn
[NASA-TN-D-5159] c32 N69-22932
Evaluation of pilot describing function method applied to manual control analysis of large flexible booster in Saturn 5 launch vehicle simulator
[NASA-TN-D-5149] c21 N69-22996
Investigation of SA-501 S-4B auxiliary propulsion system anomalies
[NASA-TN-D-5207] c28 N69-26224
Reliability study of Saturn 5 launch vehicle manual backup control system
[NASA-TN-D-5261] c21 N69-28018
SCALE (CORROSION)
Examination of thermal oxidation deposits on heat resistant alloys using X ray diffraction and X ray fluorescence analyses
[NASA-TN-D-5019] c17 N69-17277
SCALE (RATIO)
Mathematical model for measurement scale forms
[NASA-TN-D-5277] c19 N69-29141
SCALE EFFECT
Experimental verification of scale factors for parawing opening characteristics with dimensional ratios from 1/1.3 to 1/3
[NASA-TN-D-5071] c02 N69-19950
SCALE MODELS
Scaled solar and gray-body temperature distribution models compared to determine stellar atmosphere
c30 A69-14626
Scale models of M-1 rocket engine oxygen and hydrogen pump driven two stage turbines used to determine performance and compact inlet manifolds problems
[AIAA PAPER 69-553] c28 A69-32678
Wind tunnel test of aerodynamic characteristics of scale model of Tomahawk launch vehicle at Mach speeds
[NASA-TM-X-1684] c01 N69-10732
Low speed static and dynamic longitudinal, and lateral stability of scale model of supersonic transport in wind tunnel tests
[NASA-TN-D-4726] c02 N69-10733
Identification of structural systems using near resonance testing
[NASA-TN-D-5069] c32 N69-17737
Effect of heat shield flexibility on water landing loads of Apollo spacecraft models
[NASA-TN-D-5108] c32 N69-21042
Antenna effects on aerodynamic characteristics of 0.410 scale model Cajun rocket at Mach numbers from 2.30 to 4.63
[NASA-TM-X-1771] c01 N69-21106
Lift loss and jet decay measurements on hovering vertical takeoff aircraft models
[NASA-CR-1297] c01 N69-21477
Scaled lunar landing module jet erosion of simulated moon surfaces
[NASA-TN-D-5051] c31 N69-22630
Tests of bending strength on full scale model of Atlas LV-3C booster
[NASA-TN-D-5156] c31 N69-22937
Physical model for plasma containment simulation in magnetic fields
[NASA-TN-D-5217] c25 N69-25394
Heat transfer to windward side of scale model for graphite lunar module fuel cylinder
[NASA-TN-D-5251] c12 N69-29608
Aerodynamic characteristics in pitch of scale model of two and three stage rocket configuration at Mach numbers of 0.4 to 4.63
[NASA-TN-D-5378] c01 N69-34986
Spin-tunnel investigation of scale model of straight wing, twin boom counter insurgency airplane
[NASA-TM-X-1602] c02 N69-34988
Performance of turbine driven V/STOL cruise fan propulsion system at subsonic Mach numbers
[NASA-TN-D-5314] c28 N69-35526
Spin and recovery characteristics of 1/30 scale subsonic attack aircraft model determined in wind tunnel tests
[NASA-TM-X-1788] c02 N69-37976
Empirically determined wind and scale effects on hot gas recirculation characteristics of jet V/STOL aircraft
[NASA-CR-1445] c28 N69-40776
Design and structural model of thin film solar cell array
[NASA-TM-X-1913] c03 N69-40787

Wind tunnel studies of scaled model of multijet cargo airplane
[NASA-TN-D-5538] c02 N69-40937
SCANDIUM ISOTOPES
Angular distributions for Sc 45 Ti 46 nuclear reactions involving 41 MeV alpha particles bombardment described by Born approximation
c24 A69-41044
Alpha particle-triton reaction on scandium 45 at 41 MeV
[NASA-TN-D-5216] c24 N69-24919
SCANNER PROJECT
Infrared horizon radiance profiles for winter conditions based on Scanner project flight test
[NASA-TN-D-4905] c21 N69-14346
SCANNERS
Scanning electron mirror microscope advantages over electron mirror and scanning electron microscopes for examining integrated circuits
c14 A69-32891
Scanning electron microscopy for reliability studies in semiconductor devices
c26 A69-35788
SCANNING
Celestial sphere scanning by passive method applicable to space missions requiring long lifetime and moderate pointing accuracies
[AIAA PAPER 68-854] c21 A69-39764
SCATTER PROPAGATION
Mie scattering calculations on laser wavelengths and atmospheric aerosols
[NASA-TN-D-5110] c23 N69-20905
SCATTERING
Scattering, reactions, and decay in nonrelativistic quantum mechanics
[NASA-TT-F-510] c24 N69-25848
Gamma ray transport portion of COHORT 2 Monte Carlo shielding code
[NASA-TM-X-1877] c22 N69-35848
SCATTERING CROSS SECTIONS
Differential cross sections for elastic scattering of 600 MeV protons from He 3 between 19 and 45 degrees
c24 A69-13464
Mie total and differential backscattering cross sections at laser wavelengths for Junge size distribution aerosol models
c16 A69-14290
First Born approximation cross sections for He excitation from ground state by proton impact calculated, using wave functions
c24 A69-17027
Inelastic scattering cross sections calculated, comparing results for various nuclear states expressed as Wood-Saxon radial and harmonic oscillator functions
c26 A69-29006
Core polarization effects in inelastic scattering cross sections for several nuclei in 2s-1d shell, using Hartree-Fock wave functions and Born approximation
c24 A69-29007
Elastic scattering cross sections for 21-MeV incident protons measured for nuclei differing in mass, determining optical model potential
c24 A69-35489
Inelastic proton scattering cross sections for target nuclei in 2s-1d shell calculated in distorted wave Born approximation with projected Hartree-Fock wave functions
c24 A69-41045
Differential cross section and polarization measurements for elastic scattering of high energy protons from light nuclei
c24 A69-43125
Absolute cross sections for scattering of 42 MeV alpha particles from even isotopes of cadmium
[NASA-TN-D-4948] c24 N69-14482
Polarization, differential cross section, and total reaction cross section data for proton scattering
[NASA-TN-D-5067] c24 N69-22934
Theoretical feasibility of detecting laser radiation scattered from plasma
[NASA-TN-D-5311] c25 N69-36939
Elastic and nonelastic scattering cross sections from 42 MeV alpha particles interacting with helium isotopes
[NASA-TN-D-5530] c24 N69-40979
SCATTERING FUNCTIONS
Maximum number of binary collisions for three particles with zero range forces in relativistic rescattering singularities studies
c24 A69-19788
SCHLIEREN PHOTOGRAPHY
Optical system for recording Schlieren images with continuous writing, ultrahigh speed framing camera
[NASA-TN-D-4986] c14 N69-15381
SCHREIBERSITE
Fe-Ni-P phase diagram studies applied to schreibersite and rhabdite formation in iron meteorites
c30 A69-36132
SCIENTIFIC SATELLITES
Stored program computer for small scientific spacecraft, noting program and data memory capacities
c08 A69-15472
Small Scientific Satellite program, discussing payload for investigating magnetosphere and near interplanetary space
[IEEE PAPER 3C-1] c31 A69-19195
OGO for conducting diversified measurements to study earth atmosphere, earth-sun relationship, etc
c31 A69-36674
Programmable data handling and telemetry systems for scientific satellites, noting system checkout, spacecraft integration, software and ground data processing
c08 A69-41735
Space research in past and expected scientific knowledge from manned and automated earth orbital science missions
[AAS PAPER 69-036] c30 A69-42825
Design, development, integration, and testing of Small Scientific Satellites
[NASA-TN-D-4988] c32 N69-33232
SCIENTISTS
Bibliography of works of Soviet engineer F. A. Tsander
[NASA-TT-F-541] c34 N69-26112
SCINTILLATION
Proportionality between log-amplitude variance and 7/6 power of wavenumber for horizontal propagation from spherical wave transmitter to point detector
c16 A69-19641
SCORPIUS CONSTELLATION
Radio emission from Sco XR-1 shown as synchroton radiation of relativistic electrons in low density region surrounding denser core producing X ray
c30 A69-37334
SCOUT LAUNCH VEHICLE
Rocket motor integration into Scout vehicle to improve performance
c31 A69-12384
Feasibility of using roll and yaw compensation to reduce inclination error of Scout launch vehicle
[NASA-CR-1209] c31 N69-16221
SEA URCHINS
Toxicity of plastic hardware containing biological space flight experiment
[NASA-TM-X-1818] c04 N69-29723
SEA WATER
Tradeoff analysis on radar and laser space altimeter systems for sea surface geodesy
[NASA-CR-1298] c14 N69-21117
SEALERS
Computer program for steady laminar, subsonic, and isothermal compressible flow across sealing dam
[NASA-TN-D-5373] c15 N69-33281
SEALING
Gas turbine compressor end seals, discussing air leakage paths, primary and secondary seals, design and efficiency
[ASLE PREPRINT 68AM 4B-4] c15 A69-27366
SEALS (STOPPERS)
Gas turbine engine shaft face seal with self acting lift augmentation preventing rubbing contact, noting disadvantages of labyrinth and conventional seals
[ASLE PICFS PREPRINT 27] c15 A69-30492
Performance and analysis of seals for nitrogen inerted lubrication systems of turbine engines
[NASA-TN-D-4761] c15 N69-10055

Shaft face seal with self acting lift augmentation for advanced gas turbine engines
[NASA-TN-D-5170] c15 N69-23232
Vibration of shaft face seals and stabilizing effect of viscous and friction damping
[NASA-TN-D-5161] c15 N69-23466
Rotational effects on isothermal compressible flow across gas turbine sealing dam
[NASA-TN-D-5344] c15 N69-35799

SEARCHING
Adaptive random search algorithm utilizing boundary cost-function hypersurfaces measurement to implement Pontryagin maximum principle, discussing hybrid computer use, iterative solution and convergence properties
c08 A69-33745

SEAS
Microwave thermal emission by water measured from aircraft, studying radiation dependence on surface roughness
c13 A69-34421

SECONDARY EMISSION
Plasma electron beam for welding, deriving beam current from secondary emission by ion bombardment, discussing gas pressure, equipment and applications
c15 A69-35555

SEGMENTS
Design and construction of plastic model of prestressed segmented spherical shell
[NASA-CR-1231] c32 N69-11010

SELENIDES
Thermal stability and friction of disulfides, diselenides, and ditellurides of molybdenum and tungsten in ultrahigh vacuum
[NASA-TN-D-5141] c15 N69-22992

SELENOGRAPHY
Gaussian particle size distribution with porosity and surface irregularity corrections used to determine mean particle size of lunar surface material at Surveyor sites
c30 A69-26371
Lunar Orbiter 1 terrain assessment photographs and preliminary selenodesy, micrometeoroid, and radiation data
[NASA-SP-197] c30 N69-39213

SELENOLOGY
Regolith thickness distribution at Lunar Orbiter sites, correlating thickness directly with cratering density
c30 A69-18604

SELF ABSORPTION
Downstream radiation flux distribution calculated for blunt entry bodies, considering self absorption effects
c33 A69-12547

SELF LUBRICATING MATERIALS
Cooling requirements for high speed polytetrafluorethylene lubricated ball bearings operating in cold hydrogen gas, developing minimum gas flow rate equation
[ASLE PAPER 68-LC-2] c15 A69-19310

SELF STIMULATION
Critical body temperature for intracranial self stimulation in white rats
c04 A69-13897

SEMICONDUCTING FILMS
Cadmium sulfide films with larger than bandgap photovoltages, analyzing photovoltage decay and temperature and light intensity effects
c26 A69-17772

SEMICONDUCTOR DEVICES
Delta functions spectrum in reciprocal time domain for LC and RC structures due to impulse response in distributed parameters
c10 A69-21327
Four terminal silicon planar p-n-p-n model operating as semiconductor small signal linear tetrode amplifier, discussing properties and mathematical models
c09 A69-35293
Scanning electron microscopy for reliability studies in semiconductor devices
c26 A69-35788
Electron irradiation effect on resolution of lithium-drifted silicon semiconductor detectors
[NASA-TN-D-4901] c14 N69-10933
Simplified theory and transducer potentialities of pinch effect in semiconductors
[NASA-TN-D-5130] c26 N69-22573

SEMICONDUCTOR JUNCTIONS
GaSb-ZnTe heterojunction fabrication method, noting photoresponse, fluorescence and light transmission
c26 A69-12408
Impurity profiles and energy band diagram for cuprous sulfide-CdS heterojunction based on capacitance, Hall and electron microprobe measurements
c03 A69-13075

SEMICONDUCTORS (MATERIALS)
Current oscillations in semiinsulating O and Cr doped GaAs samples at room temperature, noting photoconductivity excitation spectra
c26 A69-21753
Computerized Arrhenius equation component reliability extrapolation techniques
[NASA-TN-D-4902] c19 N69-13368
Measurement and interpretation of Hall coefficient and resistivity of semiconductors
[NASA-TM-X-1711] c26 N69-14086
Breaking of semiconductor single crystal wafer into chips
[NASA-TM-X-1892] c09 N69-38774

SEMIEMPIRICAL EQUATIONS
Semiempirical fracture analysis for semielliptical surface crack in plate
[NASA-TN-D-5340] c32 N69-31056

SEMISPAN MODELS
Aerodynamic characteristics of large semi-span V/STOL tilt-wing with single propeller tested for modes of propeller rotation
[NASA-TN-D-5016] c01 N69-17312

SENSITIVITY
Predicting relative sensitivities of hot cathode ionization vacuum gages
[NASA-TN-D-5285] c14 N69-29331

SENSORS
Make wire, light pipe and spring wire ablation sensors development for measuring parameters of heat shield materials for reentry vehicles
c14 A69-15428
Transensor implantation, sham implantation, no implantation and lighting effects on rat body composition, noting fat and water content
c04 A69-26557

SENSORY FEEDBACK
Efficacy of sensory feedback information given during training period for improving human performance in producing memorized movement pattern
[NASA-CR-1251] c05 N69-13926
Multimodality pilot model for visual and motion feedbacks derived from simulator program
[NASA-CR-1325] c05 N69-28071

SENSORY PERCEPTION
Human vestibular system and its connection with oculomotor system and their relation to motion perception, spatial disorientation, and illusions
[NASA-CR-1309] c04 N69-22637
Human perception of multiple-point tactile and visual stimuli
[NASA-CR-1389] c05 N69-39211

SENSORY STIMULATION
Critical body temperature for intracranial self stimulation in white rats
c04 A69-13897

SEPARATED FLOW
Flow characteristics and wall heat transfer in separated flow region of annular cavity at free stream hypersonic speed and high gas temperature
[AIAA PAPER 68-672] c01 A69-37185
Transonic wind tunnel studies on airfoil to determine effects of Reynolds number and boundary layer transition location on shock induced separated flow
[NASA-TN-D-5003] c01 N69-16121
Statistical analysis of pressure fluctuations in separated turbulent boundary layer
[NASA-TN-D-5440] c12 N69-36940

SEQUENCING
Determining sequential decoding performance and metric sensitivity by computer simulation
[NASA-TR-R-294] c07 N69-16196

SEQUENTIAL ANALYSIS
Auditory temporal masking of tonal signal by narrow band noise and perception of temporal

order noting effects of intensity, frequency and time
c05 A69-24795
Sequential analyses of planetary surface sample for extraterrestrial life detection, discussing chemistry, morphology, growth and metabolism for life attributes
c30 A69-41623
Log-a-posteriori probability metric for use in sequential decoding
[NASA-TN-D-4930] c07 N69-23163
Sequential stochastic techniques for trajectory estimation
[NASA-CR-1360] c30 N69-40325
SEQUENTIAL COMPUTERS
SDP-3 small serial computer for engineering experiment on IMP spacecraft, discussing design modifications to improve performance
c08 A69-41737
SERIES (MATHEMATICS)
Analytic continuation of Appell hypergeometric series into linear combination of four infinite series
c19 A69-26605
Series solution for hypersonic flow about blunt bodies
[NASA-CR-1266] c33 N69-18125
Chebyshev series solution of nonlinear ordinary differential equations - initial value problems
[NASA-TM-X-1882] c19 N69-36923
SERVICE LIFE
SERT 2 thrustor system performance over expected mission parameters, noting operational lifetime excess over mission requirements
[AIAA PAPER 69-235] c28 A69-21255
High performance light weight electrodes for hydrogen oxygen fuel cells
[NASA-CR-1216] c03 N69-14397
SERVOAMPLIFIERS
Design and analysis of modular servoamplifier for fast response electrohydraulic control systems
[NASA-TN-D-4898] c03 N69-10068
SERVOCONTROL
Three axis attitude servomechanism design to adjust attitude and angular velocity of spacecraft
c21 A69-17589
Fast response electrohydraulic valve-controlled piston servo systems
[NASA-TN-D-5388] c03 N69-34652
SET THEORY
Shape preserving expansion and contraction of objects in E 3
[NASA-TN-D-5240] c19 N69-31303
Concepts of theory of fuzzy systems
[NASA-CR-1432] c19 N69-37033
SEXTANTS
Sextant sighting measurements from on board Gemini 12 spacecraft
[NASA-TN-D-4952] c21 N69-14332
Sextant sighting performance concerned with training and monochromatic stars
[NASA-TN-D-5190] c05 N69-35024
SHADOWS
Thermal analysis of shadow shields and structural members in space environment
[NASA-TN-D-4876] c33 N69-10473
SHAFTS (MACHINE ELEMENTS)
Shaft face seal with self acting lift augmentation for advanced gas turbine engines
[NASA-TN-D-5170] c15 N69-23232
Torque and leakage rates of various lubricated lip seal designs at peripheral velocity of 120 feet per second
[NASA-TN-D-5411] c15 N69-35769
Vibrations of turbomachine rotors and methods for determining optimal hydraulic damping mounts, vibrations of systems with friction, and self induced vibrations of compressor blades
[NASA-TT-F-547] c02 N69-36326
SHAPES
Hypersonic body shaping for minimum drag and improved performance from view of flight regimes, discussing implications of pressure laws
[AIAA PAPER 69-181] c01 A69-18052
Sorting particles by shape using sieving equipment, noting results with crushed gravel
c15 A69-38950
Harmonic content of pressure wave shapes in strong traveling transverse acoustic modes
[NASA-TM-X-1716] c12 N69-15371
Theoretical comparison of beads, wires, and films as rocketsonde temperature sensors in mesosphere
[NASA-CR-1286] c13 N69-18126
SHEAR FLOW
Direction of maximum turbulent vorticity in turbulent shear flow, determining alignment
c12 A69-25282
Incompressible turbulent boundary layer analysis by two region characterization for eddy viscosity, using Spalding generalized function and Prandtl free shear flow model
c12 A69-33255
SHEAR LAYERS
Three dimensional laser Doppler velocity instrument for mean velocity and turbulence measurements in subsonic jet shear layer
[SAE PAPER 690266] c14 A69-21555
SHEAR PROPERTIES
Transverse shear deformation and rotary inertia effects in vibrating beams
[NASA-CR-1317] c32 N69-24056
SHEAR STRENGTH
Dislocation model of strength of elastically inhomogeneous crystalline materials based on elastic interactions between dislocations and periodic fluctuations of shear modulus
c17 A69-20557
SHEAR STRESS
Normal stress effects in viscoelastic fluid theories applied to one dimensional Burgers model of weak turbulence predicting drag reduction
c12 A69-33256
SHEARING
Skin friction measurement in aerodynamic tests using thin liquid crystal coatings with changes in maximum light scattering wavelength in response to shearing forces
c11 A69-29029
SHEETS
Elastoplastic stress-strain behavior at notch roots in sheet specimens under constant amplitude loading
[NASA-TN-D-5253] c32 N69-28038
SHELL STABILITY
Recent advances in shell buckling, discussing imperfection sensitivity, boundary conditions and wall configuration
[AIAA PAPER 68-103] c32 A69-12516
Computer program determination of barreling effect on strength of ring and stringer stiffened shells designed to support axial compression loads
c32 A69-43671
Structural synthesis of cylindrical shell reinforced with rectangular cross section stiffeners
[NASA-CR-1217] c32 N69-14254
SHELL THEORY
Spherical caps axisymmetric static and dynamic buckling under load, using axisymmetric nonlinear elastic shell theory approximation and finite difference equations
[AIAA PAPER 69-89] c32 A69-18133
SHELLS (STRUCTURAL FORMS)
Equilibrium and free vibration problems of centrifugally stabilized disk and shell structures
[NASA-CR-1178] c32 N69-14477
Forces on flexible shells of Apollo command module during water impact
[NASA-TM-X-1781] c32 N69-23697
Transient temperature fields in porous shell walls cooled by forced flow
[NASA-TT-F-552] c33 N69-30245
Design calculations for conical shells and elastic systems subject to antisymmetric loads
[NASA-TT-F-518] c32 N69-30754
Optimal structural design for sandwich-shaped and ring-stiffened loaded shells of revolution
[NASA-CR-1424] c32 N69-35515
SHIELDING
Thermal analysis of shadow shields and structural members in space environment
[NASA-TN-D-4876] c33 N69-10473

SHIPS
Skin friction drag reducing high polymer solution injected into turbulent boundary layer to test effectiveness on marine vehicles
c12 A69-33254
SHOCK ABSORBERS
Impact energy absorbing strut using tube cutting
[NASA-TN-D-4941] c32 N69-14506
SHOCK DISCONTINUITY
Steady shock discontinuity in perfectly conducting gas flow in arbitrarily oriented magnetic field for various Mach numbers
c25 A69-19988
Shock discontinuities in solar wind measured by magnetic field and plasma instruments on Explorer 34, applying Rankine-Hugoniot relations
c30 A69-40304
SHOCK FRONTS
Ionizing shock front structure in monatomic gas, considering atom-atom and electron-atom collisional ionization rates
c12 A69-13138
SHOCK HEATING
Flight measurement of optical radiation from shock heated air with Trailblazer 2 reentry vehicle
[NASA-TN-D-4937] c33 N69-14501
Effect of shock precursor heating on radiative flux to blunt bodies
[NASA-CR-1265] c33 N69-17438
SHOCK LAYERS
Nongray equilibrium radiative heat transfer in viscous radiating shock layer around blunt body entering high temperature nonisothermal carbon dioxide-nitrogen atmosphere
[AIAA PAPER 69-636] c33 A69-33258
Effects of angle of attack and bluntness on shock layer properties of cones at supersonic speeds
[NASA-TN-D-4909] c01 N69-10789
Ablation product absorption and line transitions effects on shock layer radiative transport around blunt body
[NASA-CR-1264] c33 N69-19117
Finite difference techniques used in numerical solutions for inviscid radiating shock layers around spheres at hyperbolic speed in air
[NASA-TR-R-311] c12 N69-26504
Solution for shock layer energy equation with mass and convective heat transfer at hypersonic speed
[NASA-TN-D-5246] c12 N69-33421
SHOCK LOADS
Numerical analysis of shock control by using perforated walls in internal compression supersonic inlets
[NASA-TR-R-317] c01 N69-32338
SHOCK SIMULATORS
Design and performance of sonic boom simulator
[NASA-CR-1378] c02 N69-31959
SHOCK SPECTRA
Radiant energy transfer measurements in air plasma in reflected region of arc-driven shock tube
[NASA-CR-1390] c25 N69-38227
SHOCK TUBES
Electronic transition moment for C /Swan/ bands measured in shock tube in carbon dioxide and argon mixtures
c24 A69-12833
High speed compression waves, rarefaction waves and gas interface regions position and velocity measurement in shock tube by sensing electrical impedance
c14 A69-13104
Optical carrier single channel telemetry system providing complete electrical isolation between shock tube data acquisition and data recording instrumentation
c14 A69-29561
Image converter camera and astronomical telescope arrangement for photographing metal diaphragm openings in shock tube
c14 A69-37227
High temperature properties of gases - gas dynamics, thermodynamics, and combustion physics
[NASA-TT-F-558] c12 N69-35365
Design, calibration, and use of radiometers to measure spectral emission in ballistic range and shock tube experiments
[NASA-TN-D-5360] c14 N69-38144
SHOCK TUNNELS
Digital data acquisition system with ultrahigh sampling rate for Ames electric arc shock tunnel, describing analog to digital conversion, data storage, system performance, etc
c11 A69-35744
Aerodynamic and thermodynamic calibration of nonequilibrium air flow in Ames 1-foot shock tunnel
[NASA-TN-D-4985] c11 N69-15633
Exploding wire initiation and electrical operation of 40 kV system for arc heated drivers up to 10 feet long
[NASA-TN-D-5126] c11 N69-22989
SHOCK WAVE INTERACTION
Hypersonic surface measurements and flowfield properties about slender cones in hypersonic viscous interaction regime
[AIAA PAPER 68-2] c01 A69-12520
Linear wave interaction with oblique shock waves, noting dependence of transmission, reflection and generation coefficients on Mach number
c12 A69-13137
Amplitude equations for magnetoacoustic and entropy waves diverging from normal MHD shock, obtaining energy flux ratios associated with incident and transmitted waves
c25 A69-38242
Mach 42 test measuring surface pressures, surface heat transfer rates and shock wave shapes in strong interaction regime for sharp and blunt plates
[AIAA PAPER 68-720] c01 A69-41886
SHOCK WAVE PROFILES
Switch-on ionizing shock waves structure, analyzing condition of downstream state and effect on hydromagnetic wave speed
c25 A69-22045
Interplanetary shock waves structure and evolution, discussing propagation in collision free media by wave-particle interactions
c30 A69-42394
SHOCK WAVE PROPAGATION
Transmission of Alfven waves through earth bow shock based on hydromagnetic shocks theory, discussing amplitude amplification
c13 A69-32099
Interplanetary shock waves structure and evolution, discussing propagation in collision free media by wave-particle interactions
c30 A69-42394
Ionization rate limiting processes behind strong shock waves in pure N, plotting electron density profile diagrams
c12 A69-43367
High temperature properties of gases - gas dynamics, thermodynamics, and combustion physics
[NASA-TT-F-558] c12 N69-35365
SHOCK WAVES
Vela 3A and Explorer 33 elapsed time observations of earth bow shock
c13 A69-12299
Steady shock discontinuity in perfectly conducting gas flow in arbitrarily oriented magnetic field for various Mach numbers
c25 A69-19988
Simultaneous interplanetary magnetic field measurements by geocentric satellites Explorer 33 and IME 3 of MHD shock wave associated with July 8, 1966 sudden storm commencement
c30 A69-23773
Earth bow shock waves in far upstream interplanetary medium observed from magnetic data of Explorer 34 satellite
c30 A69-34941
MHD Rankine-Hugoniot equations for ion density, thermal pressure and convective velocity magnitude and orientation during Pioneer 6 traversal of earth bow shock
c30 A69-42417
Estimated supersonic flow field shock waves and sonic boom effects for cones and axisymmetric bodies
[NASA-TN-D-4935] c01 N69-13238
Momentum diffusion between two supersonic airstreams passing through oblique shock waves
[NASA-TN-D-4974] c12 N69-15631
Transonic wind tunnel studies on airfoil to determine effects of Reynolds number and boundary layer transition location on shock induced separated flow

[NASA-TN-D-5003] c01 N69-16121
Design and performance of flueric shock position sensor for mixed compression supersonic inlets
[NASA-TM-X-1733] c14 N69-16382
Vacuum ultraviolet detector-spectroscopy systems for capsule reentry measurements
[NASA-CR-1268] c09 N69-18761
N shaped shock wave line focusing simulating sonic superbooms
[NASA-TN-D-5306] c02 N69-31874
Supersonic aerodynamic characteristics and shock standoff distances for large angle cones with and without cylindrical afterbodies
[NASA-TN-D-5334] c01 N69-33237
Shock wave propagation in real gases
[NASA-TT-F-585] c12 N69-40824

SHORT TAKEOFF AIRCRAFT
IFR flight tests of Breguet 941 STOL transport
[NASA-TN-D-4939] c02 N69-13252
Wind tunnel tests of static longitudinal and lateral characteristics of short takeoff aircraft with external flow jet flap
[NASA-TN-D-5364] c01 N69-33275

SHORT WAVE RADIO TRANSMISSION
Short wave bands for earth-space communications, considering propagation anomalies compensated systems and frequency bands availability
c07 A69-13721

SHROUDED NOZZLES
Plug and shroud geometry variables on plug nozzle performance at transonic speeds
[NASA-TN-D-5098] c28 N69-21463
Static tests of nozzle efficiency and pumping characteristics of conical turbojet plug nozzle with translating primary and secondary shrouds at Mach 0 to 2.0
[NASA-TM-X-1777] c28 N69-21648

SIDELOBES
Multiplicative feed system for monopulse angle tracking antennas, discussing influence of sidelobe and backlobe responses on control function slope determining antenna bearing angle
c11 A69-37704

SIEVES
Sorting particles by shape using sieving equipment, noting results with crushed gravel
c15 A69-38950

SIGNAL ANALYSIS
Spectral null from spectral characteristics and statistical properties of PCM signals used to estimate SNR
c07 A69-19122
Subcarrier phase modulated single sideband sinusoidal carrier synthesis, discussing signal power ratios, signal efficiency, design sensitivity, etc
c07 A69-29489

SIGNAL DETECTION
Proportionality between log-amplitude variance and 7/6 power of wavenumber for horizontal propagation from spherical wave transmitter to point detector
c16 A69-19641
Phase-lock loop demodulator ability to acquire and remain locked on signal under noise and pulse interference
c10 A69-42230
Lunar laser beam retroreflection observations, showing agreement with predicted ephemeris and signal strength
c30 A69-43197

SIGNAL ENCODING
Ground data handling equipment characteristics for PCM telemetry link utilizing convolutional coding
c07 A69-36267

SIGNAL FADING
Relationship between complex covariance and covariances of envelopes of Rician fading communication channels
[NASA-TN-D-4825] c07 N69-11011

SIGNAL MEASUREMENT
Experiment design for measuring radio frequency interference between communication satellite and terrestrial microwave relay system
[NASA-TN-D-5041] c07 N69-26272

SIGNAL PROCESSING
Photon bunching effect in spatially coherent noise field enhanced by superposing monochromatic coherent signal and/or shaping incident noise spectra
c07 A69-31694

SIGNAL RECEPTION
Multifunction Receiver System rationale, concepts, background requirements and technical justifications for tracking, telemetry and ranging data acquisition by Goddard Center
c07 A69-19101

SIGNAL TO NOISE RATIOS
Working breadboard model of planet tracker under various illuminating conditions, discussing hardware and closed loop tracking error analysis accounting for signal to noise effects
c21 A69-13214
Spectral null from spectral characteristics and statistical properties of PCM signals used to estimate SNR
c07 A69-19122
Double sideband suppressed carrier FM telemetry system as airborne data recorder, discussing noise, environmental conditions, laboratory and flight tests
c07 A69-19132
Ultrasonic pulse velocity and attenuation measurement in presence of noise, using coherent detection and signal averaging
c14 A69-29564
Beat frequency measurements in far IR due to harmonic mixing of klystrons, discussing noise role
c23 A69-33674
Ac technique using lock-in power amplifier SNR for measuring galvanomagnetic and Shubnikov-de-Haas effects, noting error reduction
c14 A69-36375
Filtering optimization prior to limiting digital signals in strong noise, detailing bandwidth choice of single pole low pass filter
c07 A69-39450
Phase-lock loop demodulator ability to acquire and remain locked on signal under noise and pulse interference
c10 A69-42230

SIGNAL TRANSMISSION
Adaptive compression system for predicting and encoding video data for transmission in noiseless channel
c14 A69-12869

SIGNATURES
Equations for pressure signature of supersonic projectile in stratified atmosphere
[NASA-TN-D-4890] c02 N69-10087

SILICA GLASS
Impact crater cross section in fused silica, describing photomicrographic technique for distinguishing hypervelocity from low energy impacts
[AIAA PAPER 69-367] c32 A69-28299

SILICON
Strong p-type conductivity of silicon doped with beryllium by thermal diffusion, giving electrical and optical measurements
c26 A69-21652
Annealing temperature of radiation defects in phosphorus doped silicon, discussing isochronal recovery characteristics of solar cells with different donor and oxygen concentrations
c26 A69-24006
Electron irradiation effect on resolution of lithium-drifted silicon semiconductor detectors
[NASA-TN-D-4901] c14 N69-10933
Proton irradiation effects on minority carrier lifetime in silicon and gallium arsenide semiconductor materials
[NASA-TN-D-5028] c26 N69-18897
Energy and angular distribution of electrons transmitted through silicon targets
[NASA-TN-D-5075] c24 N69-19113
Analysis of annealed and proton irradiated silicon
[NASA-TN-D-5119] c26 N69-22552
Effects of nickel on performance of n on p silicon solar cells
[NASA-TN-D-5366] c03 N69-31844

SILICON CARBIDES
Cubic /beta/ silicon carbide films deposition by volatilization in presence of acetylene
c26 A69-21350

Chemical processes in silicon carbide due to reactive deposition and chemical conversion, noting silicon growth mechanism involving outward diffusion
c26 A69-21351
High performance silicon carbide backward diode, discussing device design and operational characteristics
c09 A69-22787
Figures of merit for experimental silicon carbide backward diode operable to 1000 degrees K
[NASA-TN-D-5183] c09 N69-23556
Optimal growths of silicon carbide polytype crystals by methyltrichlorosilane reduction
[NASA-TN-D-5313] c26 N69-30072

SILICON DIOXIDE
Single crystal growth by controlled diffusion in silica gel using metathetical and decomplexation reactions
c06 A69-23371
Rocket engine evaluation of erosion and char as functions of fabric orientation for silica reinforced nozzle materials
[NASA-TM-X-1721] c28 N69-15475
Plastic deformation of corrosion resistant steel, CER-VIT 101, and fused silica as function of applied torsional stress
[NASA-CR-1257] c14 N69-16100

SILICON JUNCTIONS
Al interconnections discontinuities at integrated circuit contact windows observed by scanning electron microscope, noting catastrophic failure and Si presence
c09 A69-32893
Radiation damage and recovery of lithium-diffused silicon p-n solar cells, measuring photovoltaic parameters as function of gamma radiation fluence
c03 A69-35694
Simulated micrometeoroid impact effect on silicon and cadmium sulfide solar cell performances
[NASA-TN-D-5133] c03 N69-21016
Potential electrical response of p-n junction to mechanical strain
[NASA-CR-1366] c26 N69-29724

SILICON RADIATION DETECTORS
Fabrication and testing of lithium-drifted detectors as low energy photon spectrometers
[NASA-TN-D-5056] c24 N69-19828

SILVER COMPOUNDS
Yttrium effect on rate of thermal decomposition of silver carbonate powder and pressed pellets by isothermogravimetric analysis, examining water vapor, Co 60 gamma radiation and temperature effects
c06 A69-30442

SIMILITUDE LAW
Model design for simulation of space capsule landing on soils using similitude law
[NASA-CR-1210] c34 N69-13159

SIMULATION
Fourth angle driving law for different four gimbal systems used for simulation display and inertial platform isolation
c11 A69-26265
Flow simulation on wind tunnel test models for aerodynamic characteristics of aircraft design, discussing boundary layer and external flow coupling
[AIAA PAPER 69-660] c11 A69-33471
Evaluating performance of swirl can turbojet combustor at simulated supersonic inlet conditions
[NASA-TN-D-4996] c28 N69-16154
Gaseous reactant combustion simulation of dimethylhydrazine and hydrazine fuel system for nonequilibrium expansion studies
[NASA-TN-D-5404] c33 N69-35506
Multistage turbocompressor simulation applied to performance prediction of axial flow instabilities
[NASA-TM-X-1880] c28 N69-36998
Simulation of astronaut locomotion on lunar surface to determine metabolic costs
[NASA-CR-1402] c05 N69-37964

SIMULATORS
Rendezvous and station keeping simulator with fly around capability and virtual image viewing
[NASA-TN-D-5123] c11 N69-22629

SIMULTANEOUS EQUATIONS
Coupled kinetic equations for inhomogeneous systems treated as simultaneous equations in time, obtaining solutions by successive approximation
c25 A69-30913

SINE WAVES
Sinusoidal phase modulation role in spectral broadening observed in trapped filaments of laser and Raman light
c16 A69-14189
Heat transfer and pressure distribution due to two-dimensional repetitive sine wave distortions on flat plate at Mach 20 in helium
[NASA-TN-D-4907] c12 N69-10804

SINGLE CRYSTALS
Single crystal growth by controlled diffusion in silica gel using metathetical and decomplexation reactions
c06 A69-23371
Compton profile from single crystal of LiH measured with X ray scattering, noting valence-electron momentum distribution role
c26 A69-40730
Nonlinear flux flow in single crystal niobium
[NASA-TN-D-5198] c26 N69-24916
Breaking of semiconductor single crystal wafer into chips
[NASA-TM-X-1892] c09 N69-38774
Tungsten and tungsten alloy single crystal deformations determined as function of alloying, strain, and temperature
[NASA-TN-D-5493] c17 N69-39182
Electrical conductivity of lanthanum fluoride single crystal with calcium impurities
[NASA-TN-D-5505] c26 N69-40056

SINGLE SIDEBAND TRANSMISSION
Subcarrier phase modulated single sideband sinusoidal carrier synthesis, discussing signal power ratios, signal efficiency, design sensitivity, etc
c07 A69-29489
Analytic function theory applications to analysis of single-sideband angle modulated systems
[NASA-TN-D-5446] c07 N69-37602

SINTERING
Effects of lithium and oxygen losses on magnetic and crystallographic properties of spinel lithium ferrite
[NASA-TR-R-305] c06 N69-20775

SITE DATA PROCESSORS
IMP-1 experiment, describing design and applications of SDP-3 computer
c08 A69-36265
SDP-3-A general purpose stored program computer designed for small scientific spacecraft onboard data system, noting computerized simulation
c08 A69-37385

SIZE (DIMENSIONS)
Plane strain fracture toughness tests on maraging steel plates for various yield strengths and large dimensions
c17 A69-26496
Weight estimation and forecast in manned spacecraft design, noting size and weight relationship
[SAWE PAPER 793] c31 A69-34864
Size effect on tensile strength of polycrystalline nickel wires
[NASA-TN-D-4884] c17 N69-10226

SIZE DETERMINATION
Unicellular microorganisms size and concentration estimates based on light scattering measurements of suspensions in spectrophotometer cuvette compartment
c04 A69-25643

SIZE SEPARATION
Sorting particles by shape using sieving equipment, noting results with crushed gravel
c15 A69-38950

SKID LANDINGS
Steerable landing gear system consisting of freely castoring corotating wheel nose gear, tiltable axle and main gear skids for lifting body spacecraft
[AIAA PAPER 69-790] c02 A69-35639

SKIDDING
Reverted rubber during skidding of aircraft tires
[NASA-CR-1398] c02 N69-34915

SKIN FRICTION
Supersonic Preston tube correlations for Mach number and Reynolds number effects on hypersonic turbulent skin friction on adiabatic surfaces, simplifying correlation
[AIAA PAPER 69-345] c12 A69-28280
Skin friction measurement in aerodynamic tests using thin liquid crystal coatings with changes in maximum light scattering wavelength in response to shearing forces
c11 A69-29029
Baronti-Libby transformation and Preston tube calibrations used to determine skin friction from turbulent velocity profiles
[NASA-TN-D-4853] c12 N69-10472
Graphical interpolation charts of local skin friction from compressible velocity profiles
[NASA-SP-3048] c01 N69-25391
Direct measurement of skin friction in wind tunnel testing by using cholesteric liquid crystals
[NASA-TM-X-1774] c12 N69-26956
Skin friction and heat transfer data for hypersonic turbulent layer on flat plates, wind tunnel wall, and cones
[NASA-TN-D-5089] c12 N69-29144
SKIN TEMPERATURE (NON-BIOLOGICAL)
Computer program for computation of thermal radiation heat loads and temperatures of spacecraft orbiting planets or moon
[NASA-TR-R-278] c30 N69-14428
Parametric analysis of surface temperatures and distortions of paraboloidal solar concentrators
[NASA-TN-D-5144] c03 N69-23356
SKY BRIGHTNESS
Day sky brightness at altitude above 100 km obtained during rocket flight compared to night sky viewed from ground
c30 A69-33664
SKY RADIATION
Cosmic X ray bremsstrahlung due to collisions of suprathermal protons with ambient electron, giving clue about diffuse sky background of X rays
c29 A69-40643
SLABS
Group cross section generating techniques to calculate neutron capture rates and spatial capture distribution in depleted thick U slab, using GAROL program
c24 A69-35179
Multigroup calculations of resonance neutron capture in thick slab of depleted U-238
[NASA-TM-X-1878] c24 N69-36901
SLEEVES
Glass vacuum systems grease free assembly method using heat shrinkable polyolefin sleeve tubing connector for compression of O ring joints
c15 A69-20529
SLENDER BODIES
Hypervelocity reentry simulation problems for slender and blunt bodies, defining significant parameters
c30 A69-30376
Aerodynamic characteristics of blunt space capsules and slender reentry bodies with bulbous bases
[NASA-CR-1339] c01 N69-35521
Flow model for vortex shedding from slender body in coning motion
[NASA-CR-1448] c12 N69-40200
SLENDER CONES
Hypersonic surface measurements and flowfield properties about slender cones in hypersonic viscous interaction regime
[AIAA PAPER 68-2] c01 A69-12520
Ballistic range tests to study ablation effects on aerodynamic characteristics of ablating and nonablating slender cones
[AIAA PAPER 69-179] c33 A69-18083
Drag coefficients for spheres and sharp cones in rarefied hypersonic air flow obtained in shock tunnel using free flight technique
[AIAA PAPER 69-140] c01 A69-18184
Mach number, cone angle, bluntness and wall to recovery temperature ratio effects on slender cones boundary layer transition measurements at hypersonic speeds
c01 A69-33250
Radiation equilibrium temperature measured downstream of transpiration cooled gas flow near slender cone vertex in continuous flow hypersonic tunnel
c01 A69-43588
Experimental pressure distributions on 120 deg cone at Mach 2.96 to 4.63 and angles of attack from 0 deg to 20 deg
[NASA-TN-D-5054] c01 N69-19826
SLIDING FRICTION
Gas turbine engine shaft face seal with self acting lift augmentation preventing rubbing contact, noting disadvantages of labyrinth and conventional seals
[ASLE PICFS PREPRINT 27] c15 A69-30492
Sliding friction tests of Cu and Cu-Be alloy plates in contact with various alloy sliders in air and vacuum
[ASLE PAPER 68-LC-5] c15 A69-30610
Solid solutions atomic ordering effect on friction and wear in vacuum, using CuAu and FeCo systems
c15 A69-35183
Influence of surface films on friction and deformation of single crystal and polycrystalline gold
[NASA-TN-D-4875] c15 N69-10249
Sliding friction and wear behavior of copper alloys in air and vacuum
[NASA-TN-D-4824] c15 N69-10757
Effect of orientation and presence of surface active materials on friction and wear of aluminum
[NASA-TN-D-4994] c15 N69-16197
Friction and wear of polymers with various fillers in liquid hydrogen
[NASA-TN-D-5073] c15 N69-19800
Vibration of shaft face seals and stabilizing effect of viscous and friction damping
[NASA-TN-D-5161] c15 N69-23466
Structure, interactions, and topography of solid surfaces, sliding friction, adhesion, wear, and boundary lubrication conference topics
[NASA-SP-181] c15 N69-30401
Friction and contact resistance during sliding in vacuum of low resistivity metals lubricated with sputtered molybdenum disulfide
[NASA-TN-D-5349] c15 N69-31884
SLIP FLOW
Subsonic expansion tube evaluation as device for studying particle drag in subsonic compressible slip flow
[NASA-CR-1354] c11 N69-28095
SLITS
Minimization of optical resonance scattering by adjustment of monochromator slit geometry
[NASA-TM-X-1702] c24 N69-13210
SLOPES
Transient condensing with freezing on nonisothermal inclined plate
[NASA-TN-D-5289] c33 N69-29598
SLOT ANTENNAS
Air gap tolerances effect on admittance of TEM mode dielectric and plasma coated slot antennas determined by variational method
c09 A69-24986
Radiation pattern of axial slot on circular conducting cylinder based on wedge diffraction and creeping wave theory
c07 A69-24993
Equatorial radiation pattern of parallel plate TEM mode axial slot on elliptical conducting cylinders, using wedge diffraction and creeping wave theory
c09 A69-40703
Edge diffraction effects in TEM axially slotted finite ground plane on radiation pattern in waveguides of different geometries
c07 A69-41588
Simple antenna with good circular polarization over wide space sector, showing geometry, normalized orthogonal field distributions and beamwidth range, considering slot combinations
c09 A69-41590
SLOTS
Inviscid flow of two parallel slot jets impinging normally on surface
[NASA-TN-D-4957] c12 N69-14316
SMOKE TRAILS
Wind velocity profiles by smoke trail method for

eastern test range
[NASA-TN-D-4880] c20 N69-14505
SNAP 8
Design point performance of double containment tantalum and stainless steel mercury boiler for SNAP 8
[NASA-TN-D-4926] c33 N69-12739
Radiator transfer functions for SNAP 8 ground test facilities
[NASA-TN-D-4946] c22 N69-14503
Performance tests of SNAP 8 lubrication and cooling subsystem
[NASA-TM-X-1731] c03 N69-20828
Performance testing of SNAP 8 experimental power system
[NASA-TM-X-1732] c03 N69-20868
Electronic position indicator for latching solenoid valves in SNAP 8 ground test facility
[NASA-TM-X-1760] c14 N69-20874
Results of endurance tests of SNAP 8 turbine alternator
[NASA-TM-X-1741] c03 N69-20913
SOAPS
Concentration, flow rate and tube diameter effects on viscous drag reduction in nonpolar soap solutions, using pressure drop measurements to observe turbulent flow behavior
c12 A69-33253
SOCIAL FACTORS
Aerospace technology role in economic and social benefits
[UN PAPER 68-95321] c34 A69-10467
Space, technology and society - Conference, Cocoa Beach, Florida, March 1969, Volume 2
c34 A69-35055
Space, technology and society - Conference, Cocoa Beach, Florida, March 1969, Volume 1
c34 A69-35070
SODIUM
Cb-1Zr pumped sodium loop tests to evaluate loop components, EM pump, pressure transducers, and instrumentation techniques
[NASA-CR-1135] c03 N69-11373
Evaluation of various laboratory determination of oxygen in potassium and sodium
[NASA-TN-D-4971] c06 N69-14180
SODIUM CHLORIDES
Hot salt stress corrosion of titanium alloys - generation of hydrogen and its embrittling effect
[NASA-TN-D-5000] c17 N69-16465
Analysis of sodium chloride deposits on compressor blades of flight gas turbine engines
[NASA-TN-D-4999] c28 N69-17276
Research on warm fog properties, and dispersal concepts
[NASA-SP-212] c20 N69-39526
SODIUM COMPOUNDS
Three crystal sodium iodide pair spectrometers
[NASA-TM-X-1857] c14 N69-34628
SODIUM COOLING
Properties and uses of liquid metal reactor fuels, including heat transfer processes in variously shaped channels, boiling and condensation of metals, and reactor control equipment
[NASA-TT-F-522] c33 N69-30507
SODIUM VAPOR
Bimetallic heat exchanger tube performance in sodium boiling facility
[NASA-TN-D-5323] c33 N69-30064
SOFT LANDING
FM/AM telemetry circuits with three axis piezoelectric accelerometer for measurements during impact tests of soft landing models
c07 A69-23279
Model design for simulation of space capsule landing on soils using similitude law
[NASA-CR-1210] c34 N69-13159
SOFT LANDING SPACECRAFT
Vehicles for lunar surface exploration and transportation including flying machines and wheeled vehicles
c30 A69-27908
SOIL SCIENCE
Adenosine triphosphate /ATP/ content of terrestrial soils, based on firefly bioluminescent reaction, for Mars soil problems
c04 A69-37567
SOLAR ACTIVITY
Polar exosphere near solar maximum investigation by Explorer 19 and Explorer 24 drag satellites, considering density and atomic oxygen concentration measurements
c13 A69-31351
Structure of matter, physical fields, evolution of earth and universe, solar activity and earth, and interaction of earth biosphere with physical fields
[NASA-TT-F-345] c13 N69-12384
Radiometric techniques applicable to measurement of solar activity and atmospheric attenuation at millimeter wavelengths
[NASA-TR-R-306] c07 N69-22951
Investigation of earth atmospheric composition, geomagnetism, extraterrestrial radiation, solar activity, and planetary atmospheres by satellite experiment and astronomical observations
[NASA-SP-195] c34 N69-38951
SOLAR ACTIVITY EFFECTS
Radiation protection plan for Apollo lunar mission based on real time monitoring of solar activity and radiation in spacecraft
[AIAA PAPER 69-19] c29 A69-18113
Time history of July 7-10 1966 PCA event analyzed using 16 riometers and concurrent satellite observations of solar cosmic radiation
c13 A69-23770
Cosmic ray intensity during solar cycles, considering minima relationship to Bartel index maxima and solar wind modulation theory
c29 A69-29967
Simultaneous solution of continuity and heat conduction equations for ionospheric plasma consisting of electrons, atomic O ions and neutral gas species, discussing varying solar flux effects
c29 A69-32082
Solar radiation pressure windmill effect in rotational bursting and elimination from solar system of small magnetic celestial bodies
c30 A69-39584
Spectral and electrophotometric studies of upper atmosphere - airglows, atomic oxygen, hydroxyl emission, helium line spectra, auroras, and solar cycle effects on magnetosphere
[NASA-TT-F-530] c13 N69-16539
SOLAR ATMOSPHERE
Type 3 solar radio bursts observed during April - October 1967 for two alternative models of active region streamers in outer corona
c29 A69-40300
SOLAR CELLS
Thermal cycling tests showing improvement in cadmium sulfide solar cell stability, noting effect of thermal cycling stresses
c03 A69-13074
Photovoltaic properties of CdS thin film solar cells and silicon cells at Jupiter temperature and solar intensity
c03 A69-13076
Photovoltaic solar cell power technology application to space use and exploration
[ASME PAPER 68-WA/SOL-1] c03 A69-16158
Annealing temperature of radiation defects in phosphorus doped silicon, discussing isochronal recovery characteristics of solar cells with different donor and oxygen concentrations
c26 A69-24006
Photovoltaics - IEEE Conference, Pasadena, November 1968
c03 A69-35678
Radiation damage and recovery of lithium-diffused silicon p-n solar cells, measuring photovoltaic parameters as function of gamma radiation fluence
c03 A69-35694
Optimum solar cell cover glass systems selected by studying interplanetary space environment effects of proton impact, temperature and concurrent illumination on radiation damage
c03 A69-35702
Solar cell radiation damage during 416.8 days in synchronous orbit on satellite ATS 1, discussing radiation shields
c03 A69-35704
Fuel cell /battery and solar array/ battery systems for manned Apollo Applications Program

/AAP/ space vehicles, considering mission and power requirements
c03 A69-42244
Integral coverslip development for Si solar cells, considering borosilicate glass fusing on cell surface and RF and high vacuum ion beam sputtering
c03 A69-42272
Spacecraft solar cell near-maximum power operation by tracking optimum value with array temperature sensor
c03 A69-42303
Effects of preparation techniques on thin film CdS solar cells
[NASA-TM-X-1722] c03 N69-15397
Simulated micrometeoroid impact effect on silicon and cadmium sulfide solar cell performances
[NASA-TN-D-5133] c03 N69-21016
Thermal shock cycling of Kapton, copper, and molybdenum thin film cadmium sulfide solar cell
[NASA-TM-X-1819] c03 N69-29555
Effects of nickel on performance of n on p silicon solar cells
[NASA-TN-D-5366] c03 N69-31844
Simulated space environmental effects on full and fractional size cadmium sulfide thin film solar cells
[NASA-TM-X-1884] c03 N69-36758
Diffusion lengths of silicon solar cells after radiation damage and annealing by X ray method
[NASA-TM-X-1894] c03 N69-37827
Large thin film cadmium sulfide solar cell electrical characteristics over ranging temperatures and radiant intensities
[NASA-TM-X-1899] c03 N69-38767
Design and structural model of thin film solar cell array
[NASA-TM-X-1913] c03 N69-40787

SOLAR COLLECTORS
Calorimetric, optical, and vibration investigation of stretch-formed aluminum solar concentrators for thermionic converters
[NASA-TN-D-4889] c03 N69-10708
Calorimetric efficiency of cone and column solar energy concentrator
[NASA-TN-D-5109] c03 N69-21088
Calorimetric evaluation of three 1.5-meter diameter inflatable rigidized solar concentrators for solar dynamic cycle power systems
[NASA-TN-D-5234] c03 N69-28123

SOLAR CONSTANT
Solar electromagnetic radiation spectral distribution from ground level, rocket and satellite observations to obtain value of energy received at top of atmosphere
c29 A69-21645
Solar irradiance spectral distribution data normalized and combined with spectral absorptance of satellite surface coatings, obtaining absorbed energy for spectral range
c29 A69-21646
Solar constant and spectral irradiance curve for zero air mass obtained from aircraft measurements
c30 A69-42191

SOLAR CORONA
Green function solution to Maxwell equations for interplanetary and coronal magnetic fields above photosphere, considering field at source surface
c30 A69-24429
Solar wind existence verified by direct measurements of interplanetary magnetic field and plasma, reviewing solar corona studies by satellites and space probes
c30 A69-30010
Lower solar corona composition changes due to pressure and thermal gradients calculated with multicomponent diffusion equations
c30 A69-33059
Quiet solar wind model with magnetic field numerically calculated, obtaining coronal electron densities and angular momentum near earth
c29 A69-34301
Primitive solar nebula physical model considered under angular momentum conservation in collapsing fragment
c30 A69-36074
Two photon decay of metastable levels of hydrogenic and He-like ions in solar corona, depopulating via proton collisional excitation to 2p level
c29 A69-36218
Intensity ratios effect of forbidden Fe and Ca transitions in solar corona on Fe/Ca ratio, noting cascading configurations
c30 A69-36219
Type 3 solar radio bursts observed during April - October 1967 for two alternative models of active region streamers in outer corona
c29 A69-40300

SOLAR COSMIC RAYS
Solar cosmic radiation, particle acceleration, energetic particles as sample of sun and propagation of particles from sun to earth
c29 A69-12934
Time history of July 7-10 1966 PCA event analyzed using 16 riometers and concurrent satellite observations of solar cosmic radiation
c13 A69-23770
Chemical composition of galactic and solar cosmic rays, discussing differences from universal cosmic abundances, using Cerenkov counters, emulsions, etc
c29 A69-40090
Polar cap ionospheric response to solar cosmic ray events observed by Mariners 2 and 4 solar proton measurements used to test magnetosphere models
c29 A69-43621
High energy cosmic radiation problems
[NASA-SP-199] c29 N69-29652

SOLAR CYCLES
Cosmic ray intensity during solar cycles, considering minima relationship to Bartel index maxima and solar wind modulation theory
c29 A69-29967
Solar cycle and slowly varying components correlation with soft X ray radiation based on spacecraft measurements
c29 A69-40504
Diurnal and solar cycle variations of thermosphere density and temperature generated by solar EUV input and tidal wave, using two dimensional model
c29 A69-43003

SOLAR ECLIPSES
Rocket sounding measurements of ionospheric D region electron density profile during 20 May 1966 solar eclipse, discussing D region ionization source
c13 A69-29116
Physical properties of Martian atmosphere using solar occultation seen from artificial satellite
[NASA-TN-D-5443] c30 N69-38658

SOLAR ENERGY
Liquid mercury cathode thrustors characteristics satisfying constraints imposed by solar flux variations with distance from sun
[AIAA PAPER 69-237] c28 A69-21246

SOLAR ENERGY ABSORBERS
Solar irradiance spectral distribution data normalized and combined with spectral absorptance of satellite surface coatings, obtaining absorbed energy for spectral range
c29 A69-21646
Solar absorptances and spectral reflectances of metals
[NASA-TN-D-5353] c17 N69-31895

SOLAR FLARES
Interplanetary relativistic electrons from solar flare events
c29 A69-15528
Charge and energy composition of particles in solar flare, discussing rigidity spectra of singly and multiply charged nuclei
c29 A69-17280
Solar protons in magnetospheric tail after flare of July 7, 1966 with isotropic pitch angle distribution, expressing energy spectrum as exponential in rigidity
c29 A69-21699
Solar X ray and extreme UV spectra during flares, attributing intense emissions to optical transitions
c29 A69-22169
Synchrotron and X ray emission generation from upper chromosphere electrons during solar flares

c29 A69-22203
Spectral intensity of high energy solar X rays observed during July 7, 1966 polar event with satellite OGO 3, suggesting nonthermal bremsstrahlung origin
c29 A69-23753
Relativistic solar electron detection in interplanetary space during July 7, 1966 proton flare event, noting energy spectrum and time history
c29 A69-23766
Earth thermal plasmasphere contraction subsequent to solar flare obtained from ion mass spectrometers on OGO satellites
c13 A69-23777
Sunspots magnetic structure producing solar proton flares, considering role of sunspots rotational motion on photospheric surface
c29 A69-35415
Solar flares microwave and hard X ray bursts, discussing gyrosynchroton plasma, nonthermal electron bremsstrahlung and electron relaxation
c29 A69-37551
Solar ionizing radiation increase during flares of 21 and 23 May 1967 determined from ionospheric electron density concentrations
c29 A69-37558
Solar flare and space research - COSPAR Conference, Tokyo, May 1968
c29 A69-43603
Solar flare soft X ray and EUV emission spectra data obtained on OSO-3 satellite compared with centimetric radio bursts
c29 A69-43609
Solar flare and sunspot effects on VHF communications between synchronous satellite relay and ground stations
[NASA-TN-D-5100] c07 N69-23317
Spectral analysis of solar activity, including solar electromagnetic phenomena, facula structure, and periodic variations in chromospheric flares and solar cycles
[NASA-TT-F-581] c29 N69-33401

SOLAR FLUX
Photovoltaic properties of CdS thin film solar cells and silicon cells at Jupiter temperature and solar intensity
c03 A69-13076

SOLAR FLUX DENSITY
Liquid mercury cathode thrustors characteristics satisfying constraints imposed by solar flux variations with distance from sun
[AIAA PAPER 69-237] c28 A69-21246
Radiometer for measuring solar flux variations, discussing design, performance tests and use for spacecraft measurements
[AAS PAPER 69-254] c14 A69-42858

SOLAR GENERATORS
Solar and nuclear electric power technology for electric propulsion
[AIAA PAPER 69-826] c03 A69-32709
Transient solidification outside cocled pipe with application to solar Brayton heat receiver
[NASA-TN-D-4897] c33 N69-10227

SOLAR HEATING
Empirical determination of heating efficiency of extreme solar UV radiation interacting with carbon dioxide atmosphere of Mars and Venus
c30 A69-26019

SOLAR MAGNETIC FIELD
Green function solution to Maxwell equations for interplanetary and coronal magnetic fields above photosphere, considering field at source surface
c30 A69-24429
Sunspots magnetic structure producing solar proton flares, considering role of sunspots rotational motion on photospheric surface
c29 A69-35415
Spectral analysis of solar activity, including solar electromagnetic phenomena, facula structure, and periodic variations in chromospheric flares and solar cycles
[NASA-TT-F-581] c29 N69-33401

SOLAR ORBITS
Perturbative effects of Jupiter moons on spacecraft flyby and postencounter heliocentric trajectories, noting precision targeting
[AIAA PAPER 69-932] c30 A69-39361
Correction and calculation methods for second and first order Plutonian perturbations with respect to perturbing masses, and new Pluto elements
[NASA-TT-F-491] c30 N69-14943
Correction and calculation methods for first order Plutonian perturbations with respect to perturbing masses
[NASA-TT-F-490] c30 N69-14944
Direct and indirect planetary perturbation effects on motion of natural satellites
[NASA-TN-D-5284] c30 N69-37893

SOLAR PHYSICS
Solar-terrestrial physics, Solar aspects - IQSY/COSPAR Conference, London, July 1967, Part 1
c29 A69-30005
Significant achievements in space sciences for 1967, including stellar astronomy, bioscience, ionospheres, planetology, particles and fields, solar physics, and planetary atmospheres
[NASA-SP-167] c30 N69-25460

SOLAR POSITION
Diurnal and seasonal variations of primary atmospheric ions in topside ionosphere correlated with solar zenith angle, using ion mass spectrometer on Explorer 32
c13 A69-38087

SOLAR PROBES
Spacecraft central data system for deep space solar probe data management
c08 A69-42621

SOLAR PROPULSION
Advanced reconnaissance electric planetary spacecraft /AREPS/ concept for repeated coverage of Mars or Venus surface, using solar-photovoltaic system
[AIAA PAPER 69-253] c30 A69-21244
Solar and nuclear electric power technology for electric propulsion
[AIAA PAPER 69-826] c03 A69-32709
Interplanetary probe missions with solar electric propulsion systems
[NASA-TN-D-5293] c30 N69-29738

SOLAR PROTONS
Solar protons in magnetospheric tail after flare of July 7, 1966 with isotropic pitch angle distribution, expressing energy spectrum as exponential in rigidity
c29 A69-21699
Spectral intensity of high energy solar X rays observed during July 7, 1966 polar event with satellite OGO 3, suggesting nonthermal bremsstrahlung origin
c29 A69-23753
Relativistic solar electron detection in interplanetary space during July 7, 1966 proton flare event, noting energy spectrum and time history
c29 A69-23766
Proton dose in receiver behind combination electromagnetic and material shield, calculating dose for Van Allen and solar proton event spectra
c22 A69-31522
Low energy solar protons entry into magnetosphere on 26 May 1967 showing diffusion control
c29 A69-31984
Ground based solar proton monitoring, considering particle intensities and radiation dose rates from riometer absorption as function of time
c29 A69-32321
Sunspots magnetic structure producing solar proton flares, considering role of sunspots rotational motion on photospheric surface
c29 A69-35415

SOLAR RADIATION
Solar absorptance, total hemispherical emittance and absorptance/emittance ratio for metals at cryogenic temperatures measured simultaneously with sinusoidally perturbed incident radiation
c33 A69-10847
Moon effect on intensity and angular distribution of energetic electron and proton shadowing as observed by Explorer satellites
c30 A69-16252
Charge and energy composition of particles in solar flare, discussing rigidity spectra of singly and multiply charged nuclei
c29 A69-17280

Solar absorptance and hemispherical emmitance of metals at space conditions determined with cyclic incident radiation technique
[AIAA PAPER 69-60] c17 A69-18154
Albedo over Antarctic, measuring solar radiation reflected by surface and atmosphere by Eppley radiometer
c13 A69-21404
Solar electromagnetic radiation spectral distribution from ground level, rocket and satellite observations to obtain value of energy received at top of atmosphere
c29 A69-21645
Solar extreme UV, soft and hard solar X rays, cosmic X rays and gamma rays, cosmic ray particles and near earth visible radiation observed by OSO-3
c29 A69-22167
Empirical determination of heating efficiency of extreme solar UV radiation interacting with carbon dioxide atmosphere of Mars and Venus
c30 A69-26019
Ocean circulation as climate regulator, discussing role in redistributing climate-changing energy input from solar radiation or lunar tidal friction into atmosphere
c13 A69-26333
Visual ashen light observation on Venus possibly attributable to solar particle bombardment from dark side emission detection by spectroscopic and photometric studies
c30 A69-32300
UV solar radiation variation effects on Mars and Venus upper atmosphere temperatures
c30 A69-37136
Solar ionizing radiation increase during flares of 21 and 23 May 1967 determined from ionospheric electron density concentrations
c29 A69-37558
Solar radiation pressure windmill effect in rotational bursting and elimination from solar system of small magnetic celestial bodies
c30 A69-39584
Vacuum integrating sphere for measuring solar absorptance in space environment to determine thermal control coatings qualifications
[AIAA PAPER 69-1021] c11 A69-40392

SOLAR RADIO BURSTS
Solar microwave radiation burst of 29 October 1968 from active region behind west limb
c30 A69-32811
Solar flares microwave and hard X ray bursts, discussing gyrosynchroton plasma, nonthermal electron bremsstrahlung and electron relaxation
c29 A69-37551
Synchroton radiation HF cut-off resulting from electrons with anisotropic pitch angle distribution for type 4 solar radio bursts
c29 A69-40577
Solar flare soft X ray and EUV emission spectra data obtained on OSO-3 satellite compared with centimetric radio bursts
c29 A69-43609

SOLAR RADIO EMISSION
Synchrotron and X ray emission generation from upper chromosphere electrons during solar flares
c29 A69-22203
Solar cycle and slowly varying components correlation with soft X ray radiation based on spacecraft measurements
c29 A69-40504

SOLAR SAILS
Large solar sail vehicle to operate in manner of helicopter rotor
[NASA-CR-1329] c31 N69-28861

SOLAR SENSORS
Precision autocollimating solar sensor design for attitude alignment changes, including detector calibration and sounding rocket flight test results
[AIAA PAPER 69-858] c21 A69-39386

SOLAR SIMULATION
Handbook of solar simulation for thermal vacuum testing, discussing space environment, thermal control coatings, radiation sources, optical components, etc
c11 A69-38894

SOLAR SIMULATORS
Solar simulator with xenon and krypton lamps designed for thermal balance tests, power conversion and material degradation experiments
c11 A69-30383
Spectral and operational characteristics of high intensity carbon arc solar simulator
[NASA-TM-X-1825] c11 N69-29737

SOLAR SPECTRA
Solar electromagnetic radiation spectral distribution from ground level, rocket and satellite observations to obtain value of energy received at top of atmosphere
c29 A69-21645
Solar irradiance spectral distribution data normalized and combined with spectral absorptance of satellite surface coatings, obtaining absorbed energy for spectral range
c29 A69-21646
Solar X ray and extreme UV spectra during flares, attributing intense emissions to optical transitions
c29 A69-22169
Rocket-borne spectroheliograph for monochromatic solar photography in Mg II 2802.7 A line noting filter bandwidth, film polarizers and temperature control
c14 A69-24838
Solar spectral irradiance measured by airborne instruments, discussing construction, calibration, etc, of photoelectric filter radiometer and Leiss monochromator
c30 A69-32261
Solar Na D lines analysis by direct inversion of line source function, finding Doppler core dependence on frequency
c30 A69-38479
Solar X rays observations, describing instrumentation, radiation characteristics, association with flares, spectrum analysis, etc
c29 A69-39506
Solar constant and spectral irradiance curve for zero air mass obtained from aircraft measurements
c30 A69-42191

SOLAR SYSTEM
NASA Planetary Exploration Program to gather data on origin of solar system and life, discussing planetary evolution and extraterrestrial life
c04 A69-12804
Solar system elements abundance compilation based on carbonaceous chondrites and nucleosynthesis in stars
c30 A69-20903
Boundary conditions for theory of solar system origin, discussing planetary atmospheres, surfaces, magnetic fields, composition and early solar wind
c30 A69-36209
Propulsion systems for manned exploration of solar system
[NASA-TM-X-1864] c28 N69-34674

SOLAR WIND
Solar plasma observations during magnetic storms, discussing shocks and tangential discontinuities, geomagnetic variations and He
c13 A69-11234
Collisionless plasma heating by hydromagnetic waves in solar wind
c29 A69-12714
Solar wind flow past earth and magnetosphere correspondence to external aerodynamics of round nosed bodies in supersonic stream
c13 A69-19360
Magnetospheric plasma probe results with Pioneer 6 and 7, discussing plasma fluctuations and solar wind interaction with geomagnetic field
c13 A69-19364
Collisionless plasma heating by damping hydromagnetic waves applied to solar wind qualitative model, discussing magnetoacoustic wave energy
c30 A69-22426
Solar plasma flow around magnetosphere, discussing plasma velocity, density and temperature and magnetic field space and time variations
c29 A69-26736
Solar wind plasma observations in geomagnetospheric wake compared at 1000 and 500 earth radii, considering ion energy spectra and geomagnetic tail

c29 A69-26943
Comet interaction with solar wind, assuming field tail coupling of ionized comet material to solar wind ions
c30 A69-27817
Cosmic ray intensity during solar cycles, considering minima relationship tc Bartel index maxima and solar wind modulation theory
c29 A69-29967
Solar wind Helmholtz-type velocity discontinuities, noting plasma density and temperature stabilities from Explorer 34 observations
c29 A69-29971
Solar wind existence verified by direct measurements of interplanetary magnetic field and plasma, reviewing solar corona studies by satellites and space probes
c30 A69-30010
Worldwide changes in geomagnetic field, determining causes by examining magnetic field and plasma data for solar wind and classifying as SSC or SI
c29 A69-31963
Test program simulating solar wind outside magnetosphere to evaluate high melting point high density ceramic oxides as white thermal ccntrol coating pigments
[AIAA PAPER 69-641] c18 A69-33762
Quiet solar wind model with magnetic field numerically calculated, obtaining coronal electron densities and angular momentum near earth
c29 A69-34301
Severe magnetosphere distortions in north-south direction with parallel/antiparallel magnetosheath to magnetospheric field ascribed to solar wind property changes from Explorer 12 observations
c13 A69-34947
Boundary conditions for theory of solar system origin, discussing planetary atmospheres, surfaces, magnetic fields, composition and early solar wind
c30 A69-36209
Solar wind plasma effects on lunar wake umbral and penumbral interplanetary magnetic field anomalies, evaluating roles of electrons and ions
c30 A69-38095
Lunar Explorer 35 measurements of lunar surface electromagnetic properties, magnetic fields and solar wind-moon interactions
c30 A69-38379
Shock discontinuities in solar wind measured by magnetic field and plasma instruments on Explorer 34, applying Rankine-Hugoniot relations
c30 A69-40304
Explorer 34 observations of hydrogen and He ions in solar wind, noting number density variations and tentative association with geomagnetic storms
c29 A69-40305
Measurement of change in plasma potential and magnetic field of hydrogen plasma impinging on magnetic dipole - simulation of solar wind-earth interaction
[NASA-TM-X-1738] c25 N69-19131
Significant achievements in space sciences for 1967, including stellar astronomy, bioscience, ionospheres, planetology, particles and fields, solar physics, and planetary atmospheres
[NASA-SP-167] c30 N69-25460

SOLAR X-RAYS
Solar X ray and extreme UV spectra during flares, attributing intense emissions to optical transitions
c29 A69-22169
Synchrotron and X ray emission generation from upper chromosphere electrons during sclar flares
c29 A69-22203
Spectral intensity of high energy solar X rays observed during July 7, 1966 polar event with satellite OGO 3, suggesting nonthermal bremsstrahlung origin
c29 A69-23753
Solar flares microwave and hard X ray bursts, discussing gyrosynchroton plasma, nonthermal electron bremsstrahlung and electron relaxation
c29 A69-37551
Solar X rays observations, describing instrumentation, radiation characteristics, association with flares, spectrum analysis, etc
c29 A69-39506
Solar cycle and slowly varying components correlation with soft X ray radiation based on spacecraft measurements
c29 A69-40504
Solar flare soft X ray and EUV emission spectra data obtained on OSO-3 satellite compared with centimetric radio bursts
c29 A69-43609

SOLENOIDS
Cryogenic sclenoids with pure Al conductor for production of strong magnetic fields, discussing softness and strain resistivity problems
c03 A69-26497
Electronic position indicator for latching sclenoid valves in SNAP 8 ground test facility
[NASA-TM-X-1760] c14 N69-20874
Magnetic performance properties of air cooled solenoids applied to one component support and balance system
[NASA-CR-1352] c11 N69-24089

SOLID LUBRICANTS
Ball bearing test apparatus for evaluation of greases and solid lubricants at high temperatures
[ASLE PREPRINT 68AM 7C-2] c15 A69-10912
Physical sputtering deposition of molybdenum disulfide films as solid lubricant on rotating and sliding components, discussing lubrication properties in vacuum
[ASLE PAPER 68-LC-15] c15 A69-19308
Energetics in solid film lubricants vacuum deposition methods, showing dependence on interfacial and film characteristics
c15 A69-29001
Solid film lubricants deposited by DC triode sputtering on Ni, Ni-Cr and Nb surfaces friction tested under ultrahigh vacuum conditions
c15 A69-43126
Friction and wear tests with graphite flucride lubricant
[NASA-TN-D-5097] c15 N69-20939

SOLID PHASES
Mass dependence of self diffusion in Fe by serial sectioning in alpha, gamma and delta phases, determining isotope effect with Fe radioactive isotopes
c17 A69-36440
Nuclear magnetic resonance of epsilon and delta phases in NbN system with nitrogen mcle fractions
c26 A69-36445

SOLID PROPELLANT ROCKET ENGINES
Multipulse thruster module design and development tests for spacecraft attitude ccntrol, noting micropulse solid propellant rocket motor
c03 A69-11762
Acceleration effects on solid propellant rocket motors combustion characteristics
[AIAA PAPER 68-530] c28 A69-39217
Flight perfcrmance of FW-4D solid propellant rocket motor on third stage of Delta 50 launch vehicle
[NASA-TN-D-4987] c28 N69-20876

SOLID PROPELLANTS
Pressure and velocity coupling effects on combustion stability in solid propellant burning
[NASA-TN-D-5395] c33 N69-34892
Aluminum size and loading effects on burning rate of centrifugal accelerated solid propellants
[NASA-TN-D-5397] c27 N69-36225

SOLID ROCKET PROPELLANTS
Steady state acceleration effects on combustion characteristics of aluminized composite solid propellant
[NASA-TN-D-4914] c33 N69-13231

SOLID SOLUTIONS
Solid solutions atomic ordering effect on friction and wear in vacuum, using CuAu and FeCo systems
c15 A69-35183

SOLID STATE DEVICES
Laboratory and flight tests of airborne solid state UHF telemetry transmitter, discussing miniaturized coaxial hardware from RF power conservation viewpoint

c07 A69-35996
Solid state detector for electron spatial distribution measurements on OGO-F satellite, discussing design emphasizing reliability
c09 A69-36676

SOLID SURFACES
Structure, interactions, and topography of solid surfaces, sliding friction, adhesion, wear, and boundary lubrication conference topics
[NASA-SP-181] c15 N69-30401

SOLIDIFICATION
Transient solidification outside cooled pipe with application to solar Brayton heat receiver
[NASA-TN-D-4897] c33 N69-10227

SOLIDIFIED GASES
Solid para hydrogen coated graphite particles expulsion into interstellar medium from star formation regions, considering mantles stability and particles extinction efficiency, albedo and phase function
c30 A69-37492
Order-disorder transitions in solid hydrogen, discussing model to explain molecular rotation angular momentum operator fluctuations
c23 A69-43119

SOLIDS
Compatibility conditions for strain measures of theory of micromorphic elastic solids
[NASA-CR-1236] c26 N69-10817
Mathematical analysis of Fitzgerald apparatus measuring solids dynamic mechanical properties
[NASA-TN-D-5116] c18 N69-21384

SOLUBILITY
Solubility of oxygen in tantalum determined by resistivity technique
[NASA-CR-1276] c17 N69-19886
Solubility of vanadium in liquid potassium
[NASA-TN-D-5093] c17 N69-20789
Solubility of refractory metals and alloys in liquid potassium and lithium
[NASA-CR-1371] c17 N69-27059
Molybdenum and tungsten solubility in liquid potassium
[NASA-TN-D-5504] c17 N69-40053

SOLUTIONS
Computer analysis of light scattering data from polymer solutions
[NASA-TN-D-5177] c06 N69-22991

SOLVENTS
Organic geochemical laboratories solvent purification procedures
[NASA-TM-X-1746] c06 N69-18962

SONIC BOOMS
Aircraft created pressure patterns responsible for sonic boom, discussing design techniques for noise reduction
c02 A69-30369
Equations for pressure signature of supersonic projectile in stratified atmosphere
[NASA-TN-D-4890] c02 N69-10087
Estimated supersonic flow field shock waves and sonic boom effects for cones and axisymmetric bodies
[NASA-TN-D-4935] c01 N69-13238
Variability in sonic boom signatures measured along 8000 foot linear microphone array
[NASA-TN-D-5040] c02 N69-17279
Dynamic response of uniform beams and plates exposed to sonic booms
[NASA-CR-1281] c32 N69-21403
Sonic boom propagation in stratified atmosphere using FORTRAN computer program with integral and differential equations
[NASA-CR-1299] c02 N69-22546
Design method for far field sonic boom shock strength and impulse independent of body length and volume
[NASA-TN-D-5148] c01 N69-23927
N shaped shock wave line focusing simulating sonic superbooms
[NASA-TN-D-5306] c02 N69-31874
Design and performance of sonic boom simulator
[NASA-CR-1378] c02 N69-31959

SOUND GENERATORS
Acoustic energy generation for helium rich stars, discussing X ray radiation from helium star corona
c29 A69-20645

SOUND INTENSITY
Comparison of ray trace methods for estimating sound intensity variations due to atmospheric variability as determined by Monte Carlo methods
[NASA-CR-1337] c23 N69-23199
Prediction of loudness from frequency characteristics of sound
[NASA-TN-D-5422] c23 N69-37028

SOUND PRESSURE
Prediction of loudness from frequency characteristics of sound
[NASA-TN-D-5422] c23 N69-37028
Thermal, acoustical, and acceleration environments of XB-70 airplane crew compartment in airworthiness tests
[NASA-TN-D-5449] c25 N69-38010
Sound wave pressure for preventing cryogenic propellant sloshing during space flight
[NASA-TN-D-4024] c23 N69-38180

SOUND WAVES
Linear wave interaction with oblique shock waves, noting dependence of transmission, reflection and generation coefficients on Mach number
c12 A69-13137
Stellar atmospheres acoustic energy generation rate calculations, studying corona mass ejection effects on stellar rotation
c30 A69-39521
Dynamic response of liquid jet atomization to acoustic oscillations
[NASA-TN-D-5339] c28 N69-30980
Temperature effects on turbofan and turbojet noise radiation
[NASA-CR-1472] c02 N69-40439
Radiation resistance of cylindrical shells in ideal compressible acoustic medium
[NASA-CR-1437] c32 N69-40935

SOUNDING ROCKETS
Fluidic proportional thruster system for sounding rocket control
[ASME PAPER 68-WA/FE-32] c14 A69-16105
Antenna reactance from sounding rocket in ionosphere, showing variations relationship to rocket spin period
c13 A69-39964
Theoretical comparison of beads, wires, and films as rocketsonde temperature sensors in mesosphere
[NASA-CR-1286] c13 N69-18126
Graphic method determining sounding rocket vehicle attitude
[NASA-TN-D-5172] c30 N69-23782
Evaluation of height and time based meteorological rocket wind reduction techniques
[NASA-TM-X-1850] c20 N69-35523

SOUTHERN HEMISPHERE
Synoptic analysis of Southern Hemisphere stratosphere
[NASA-TM-X-1814] c13 N69-33555

SPACE CAPSULES
Model design for simulation of space capsule landing on soils using similitude law
[NASA-CR-1210] c34 N69-13159
Astronaut capability to maintain life support systems and cabin habitability in weightlessness
[NASA-CR-1405] c05 N69-36709

SPACE COMMUNICATION
Short wave bands for earth-space communications, considering propagation anomalies compensated systems and frequency bands availability
c07 A69-13721
NASA program for radio spectrum utilization in aerospace communication systems
c07 A69-42502
Space communications system for earth moon radio link
[NASA-TT-F-527] c07 N69-14973
Analytic function theory applications to analysis of single-sideband angle modulated systems
[NASA-TN-D-5446] c07 N69-37602

SPACE DEBRIS
Gegenschein measurements for determining upper limit on asteroidal debris spatial density
c30 A69-12545

SPACE ELECTRIC ROCKET TESTS
SERT 2 mercury vapor fed hollow cathode operated in bell jar, determining volt-ampere characteristics and flow rates for plasma diagnostics
[AIAA PAPER 69-258] c28 A69-21221

SERT 2 thrustor system performance over expected mission parameters, noting operational lifetime excess over mission requirements
[AIAA PAPER 69-235] c28 A69-21255
Mercury electron bombardment thrusters, discussing mission, design, ground tests, components and thrust vectoring
c28 A69-26787
Power conditioner for use with SERT 2 mercury ion thrustor, describing electrical and mechanical design and operation
c03 A69-42301
Performance of various oxide magazine cathodes in Kaufman thrusters
[NASA-TN-D-5074] c28 N69-19980

SPACE ENVIRONMENT SIMULATION
Sealed and unsealed relay coils temperature rise at simulated outer space air pressure levels
c09 A69-28048
Space suit meteoroid protection for extravehicular activity, discussing Gemini and lunar surface EVA suits and bumper concept
[AIAA-PAPER-69-366] c05 A69-28298
Thermal Vacuum /TV/ manned test operations related to Apollo lunar module in simulated space environment
c05 A69-30394
Test program simulating solar wind outside magnetosphere to evaluate high melting point high density ceramic oxides as white thermal control coating pigments
[AIAA PAPER 69-641] c18 A69-33762
Instrumentation in aerospace simulation facilities - Conference, Farmingdale, New York, May 1969
c11 A69-35714
Flash X ray unit with special film transport devices to obtain sequenced dynamic radiographs of ablating models during reentry simulation tests
c11 A69-35720
Handbook of solar simulation for thermal vacuum testing, discussing space environment, thermal control coatings, radiation sources, optical components, etc
c11 A69-38894
Pressure measurements and gas flow analysis during thermal vacuum tests of manned spacecraft indicating adequate space vacuum simulation
[AIAA PAPER 69-1033] c11 A69-40401
Degradation of multiplier phototubes exposed to spatial radiations
[NASA-CR-1304] c14 N69-20777
Predicting human performance in space environments
[NASA-CR-1370] c05 N69-30168
Lunar gravity effects on mans locomotion on moon
[NASA-CR-1403] c05 N69-36271
Simulated space environmental effects on full and fractional size cadmium sulfide thin film solar cells
[NASA-TM-X-1884] c03 N69-36758
Laser optical simulation of spaceborne radio astronomy interferometer experiment
[NASA-TN-D-5357] c30 N69-36892

SPACE EXPLORATION
Life sciences and space research - COSPAR Conference, London, July 1967
c04 A69-11073
Manned Mars and Venus missions role in overall planetary exploration program
c30 A69-12304
Structural design options for decelerative aeroshell configurations for atmospheric entry on unmanned planetary explorations
[AIAA PAPER 68-344] c32 A69-15507
Spacecraft sterilization techniques for space exploration, discussing mathematical models for planetary quarantine and contamination by nonlanding vehicles
c05 A69-15935
Manned space flight programs, discussing U.S. technological, scientific and practical contributions
c30 A69-17074
Interplanetary Pioneer spacecraft development and systems engineering aspects
c31 A69-17605
Space exploration plans adaptation, considering spacecraft design, programs, costs and schedules flexibility
c34 A69-22863
Manned space stations for future space exploration, discussing earth-like environment, artificial gravity, human factors and time dependence
c30 A69-25644
Commercial utilization of space technology, discussing cost reduction and role of NASA Apollo Program
c30 A69-34044
Advanced space experiments - AAS Conference, Ann Arbor, September 1968
c30 A69-34359
Space, technology and society - Conference, Cocoa Beach, Florida, March 1969, Volume 2
c34 A69-35055
Space exploration influence on science education, showing NASA instructional materials for teachers in biology, chemistry, physics, mathematics, industrial arts, etc
c34 A69-35077
Scientific findings from interplanetary spacecraft radio propagation experiments, particularly Mariner 5 data
c07 A69-35940
Propulsion system performance relationship to manned planetary mission capability, discussing anticipated performance of advanced propulsion concepts
c28 A69-38118
Apollo 11 mission and future space exploration prospects including moon base, manned space station, reusable shuttle vehicles, etc
c30 A69-41477
Mars exploration for life by Mariner flybys and orbiters and 1973 Viking landers
c30 A69-41611
Planetary exploration and NASA program objectives
[AAS PAPER 69-286] c30 A69-42810
Space research in past and expected scientific knowledge from manned and automated earth orbital science missions
[AAS PAPER 69-036] c30 A69-42825
Launch vehicle upper stage requirements in space missions, discussing space engine for lunar, planetary and interplanetary exploration
[AAS PAPER 69-359] c34 A69-42828
Manned space flight history and spacecraft development
[AAS PAPER 69-501] c30 A69-42852
Pioneer F/G mission to Jupiter by NASA for exploring interplanetary medium, asteroid belt, planet and environment
[AAS PAPER 69-290] c30 A69-42863
Monograph on Pioneer spacecraft program, discussing mission objectives, spacecraft design, etc
[AAS PAPER 69-066] c30 A69-42883
Interplanetary space trajectories based on Jupiter swingby flights
[NASA-TN-D-5271] c30 N69-28441
Propulsion systems for manned exploration of solar system
[NASA-TM-X-1864] c28 N69-34674

SPACE FLIGHT
Digital computers in space flight simulation and vehicle performance optimization, examining mission analysis
c30 A69-14519
X-15 research aircraft program piloting problems, ground facilities, heat transfer, space flight and steep reentry
c02 A69-26872
Soviet handbook of astronautics covering spacecraft and operating problems of near-earth spaceflight
[NASA-TT-F-500] c31 N69-24760
Bibliography of works of Soviet engineer F. A. Tsander
[NASA-TT-F-541] c34 N69-26112
Physiological and psychological responses of man to space flight problems
[NASA-TT-F-529] c05 N69-32044
Mechanics of low thrust space flight
[NASA-TT-F-507] c28 N69-33354
Bibliography on aerospace medicine and related biological research
[NASA-SP-7011/66/] c04 N69-37909

Blood sampling for parathyroid hormone and calcium metabolism during weightlessness of space flight
[NASA-CR-1395] c05 N69-38600
SPACE FLIGHT FEEDING
Biological, psychological and technological requirements in astronaut nutrition programs, examining preservation and reconstitution techniques
c05 A69-15388
Astronaut feeding in space and NASA criteria for space foods, eliminating foods in metal tubes and directing development efforts to dehydrated foods
c05 A69-31459
Regenerative life support system development, considering synthesized organic compounds and microorganisms as foods for long duration space missions
c04 A69-37623
SPACE FLIGHT STRESS
Gemini and Mercury space flights medical results, summarizing physiological effects noted on body systems
c04 A69-11074
Gravitational and acceleration effects on man and organisms, and biological effects of radiation
[NASA-TT-F-528] c05 N69-38701
SPACE LABORATORIES
Space station design requirements, Apollo applications program and various experimental programs
c31 A69-11395
Extraterrestrial life detection experiments integrated into single multipurpose space laboratory, including chemical analyses, metabolism identification, observation for molecular and/or cellular growth and replication
c05 A69-32970
Space manufacturing processes for orbital low and zero gravity environment, discussing buoyancy and thermal convection sensitive and molecular forces controlled methods
[AAS PAPER 69-486] c30 A69-42844
SPACE LAW
International liability for damage caused by launching of objects into outer space
[UN PAPER 68-95337] c34 A69-10525
Space law - Conference, New York, October 1968
c34 A69-37102
International legal liability for personal injury or property damage caused by space activities
c34 A69-37127
SPACE MAINTENANCE
Space manufacturing operations program, discussing zero gravity effect during earth orbit flight, Apollo Applications Program Orbital Workshop Flight 2, etc
c31 A69-35067
Tools and equipment for extravehicular and intravehicular activities in space and on lunar surface
[AAS PAPER 69-438] c15 A69-42802
Space manufacturing processes for orbital low and zero gravity environment, discussing buoyancy and thermal convection sensitive and molecular forces controlled methods
[AAS PAPER 69-486] c30 A69-42844
SPACE MISSIONS
Lunar Orbiter mission objectives and orbit design
[AIAA PAPER 68-47] c30 A69-15503
Apollo 4, 5 and 6 space missions, with preview of Apollo 7, 8 and 9 missions
c31 A69-17672
Worldwide cloud cover simulation procedure providing data for computer simulation of earth oriented space missions, describing computer program using Monte Carlo mission simulation
c20 A69-38120
Celestial sphere scanning by passive method applicable to space missions requiring long lifetime and moderate pointing accuracies
[AIAA PAPER 68-854] c21 A69-39764
Aerodynamic deceleration systems for space missions, considering deployment of subsonic parachute and inflatable configuration following atmospheric entry
[AIAA PAPER 68-1081] c31 A69-40542
Parametric analysis of microwave and laser systems for communication and tracking - summary
[NASA-TR-R-309] c07 N69-23642
SPACE NAVIGATION
Autonomous solution to orbital navigation problem yielding direct measure of orbital parameters
c21 A69-11005
Ground based guidance systems for supplementing onboard guidance of manned space vehicles
c21 A69-17580
Space navigation - Conference, Houston, April 1969
c21 A69-35789
Navigation, guidance and control developments for manned space missions, discussing earth orbital exploration bases
c21 A69-35801
Statistical error analysis of autonomous manned spacecraft navigation in long duration eccentric Mars orbits
[AIAA PAPER 69-880] c21 A69-39406
Navigation state vector update effect on lunar mission completion capability for Saturn 5, emphasizing hardware and scheme errors and accelerometer failure
[AIAA PAPER 69-883] c21 A69-39409
Analytic approximations for application to spacecraft optical navigation system where position fixes are taken over short trajectory arcs
[NASA-TN-D-4863] c21 N69-10372
Sextant sighting measurements from on board Gemini 12 spacecraft
[NASA-TN-D-4952] c21 N69-14332
Matched conic solutions to round trip interplanetary trajectory problems for use in guidance and navigation simulation
[NASA-TN-D-4942] c30 N69-14861
Soviet handbook of astronautics covering spacecraft and operating problems of near-earth spaceflight
[NASA-TT-F-500] c31 N69-24760
SPACE PERCEPTION
Luminescence effects on apparent size and shape of foveally fixated targets of various forms
c04 A69-36458
Relationship between binocular depth perception and optical distortion in Apollo pressure suit helmets and visors
[NASA-TN-D-5162] c05 N69-22990
Space flight effects on human time perception
[NASA-TT-F-545] c05 N69-26455
SPACE POWER UNIT REACTORS
Lunar surface power plants, considering weight constraint for various systems using nuclear power, solar cell/fuel cells and H-O reactant regeneration
c03 A69-11396
Comparison of Brayton and Rankine cycle magnetogasdynamic space power generation systems for use with nuclear heat source
[NASA-TN-D-5085] c03 N69-20852
Nuclear thermionic space power system using rod control and heat pipes
[NASA-TN-D-5250] c22 N69-26270
Design of Brayton rotating unit with roller bearings for space power system
[NASA-CR-1401] c15 N69-33450
Tungsten and depleted uranium in minimum weight, layered shield comparisons for space power reactor
[NASA-TM-X-1874] c22 N69-35817
SPACE PROBES
IQSY low energy galactic and solar cosmic ray observations made by various satellites and space probes, including hydrogen and helium energy spectra
c29 A69-30014
SPACE PROGRAMS
Space applications program including communications and navigation meteorology, earth resources survey and geodesy
[UN PAPER 68-95437] c34 A69-10472
Meteorological satellite research program, including unmanned satellite observations and possibilities with meteorologist on board manned spacecraft
[UN PAPER 68-95350] c20 A69-10483
NASA university program, discussing participation in space and aeronautics developed based on project oriented research grants and sustaining university grants

[UN PAPER 68-95413] c34 A69-10506
NASA programs and opportunities for international cooperation in space
[UN PAPER 68-95367] c34 A69-10516
Galactic Jupiter Probes investigating Jupiter atmosphere and emissions and deep space cosmic radiation
c30 A69-12303
Future space programs as governed by cost limitations, suggesting development of economical launch vehicle for shuttling between earth and orbital space stations
c30 A69-12680
NASA Space Application Program strategy, discussing research and development trend toward complexity, versatility and multidisciplinary use of larger spacecraft
c30 A69-13427
Space exploration plans adaptation, considering spacecraft design, programs, costs and schedules flexibility
c34 A69-22863
Earth orbital manned space astronomy, discussing long range program, instruments, facilities and data processing
c11 A69-27947
Commercial utilization of space - Conference, Dallas, May 1967
c30 A69-34043
Space manufacturing operations program, discussing zero gravity effect during earth orbit flight, Apollo Applications Program Orbital Workshop Flight 2, etc
c31 A69-35067
Low cost rate transportation as mandatory goal for future space program, discussing recovery and reuse, launch system costs, hardware development, etc
c31 A69-38117
Nuclear rocket program status and plans, presenting NERVA reactor and engine system tests
[AIAA PAPER 68-610] c22 A69-39219
Space program planning, noting market requirements, acceptability and future characteristics
[AAS PAPER 69-083] c34 A69-42820
Space research in past and expected scientific knowledge from manned and automated earth orbital science missions
[AAS PAPER 69-036] c30 A69-42825
Potential for advancement of astronomy by space programs
[NASA-SP-213] c30 N69-41150

SPACE RENDEZVOUS
Low thrust trajectories for minimum time rendezvous between continuous thrust interceptor and passive target vehicle, comparing calculus of variations and steepest ascent analyses
c30 A69-32177

SPACE SIMULATORS
Unstabilized astronaut, hand-held and integrated life support EVA maneuvering units tested in gimbaled six degree of freedom servo driven moving base simulator
[AAS PAPER 69-516] c05 A69-42850

SPACE STATIONS
Space station design requirements, Apollo applications program and various experimental programs
c31 A69-11395
Space-station-centrifuge configuration dynamic stability exhibiting instabilities at lower and higher centrifuge rotational speeds
[AIAA PAPER 68-142] c31 A69-12373
Equations formulated for space vehicle reaction to rotating machinery and internal mass motion, evaluating dynamics of cylindrical space station rotating about major axis
c30 A69-16476
Crew and passenger transportation to and from space station orbits, discussing cost reduction possibilities with current or future technology
c31 A69-39691
Space station safety, discussing damage containment and control, escape and rescue, etc
[AAS PAPER 69-518] c31 A69-42842
Effects of lateral cable oscillations on dynamic response of cable-connected space station
[NASA-TN-D-5107] c31 N69-21111
Rendezvous and station keeping simulator with fly around capability and virtual image viewing
[NASA-TN-D-5123] c11 N69-22629
Operational and structural design criteria for artificial gravity stabilization of rotating space station
[NASA-TN-D-5426] c05 N69-39210

SPACE STORAGE
Specific impulse deliverable performance of space storable propellant combination fluorine-oxygen/methane and oxygen difluoride/diborane
[AIAA PAPER 69-505] c28 A69-32762
Shadow shields for thermal protection of cryogenic tanks in space
[NASA-TN-D-4887] c33 N69-10420
Analytical evaluation of space storable propellants for unmanned Jupiter and Saturn orbiter missions
[NASA-TM-X-1793] c31 N69-24942

SPACE SUITS
Hard space suit for use on planetary surfaces and extravehicular activity, discussing design, fabrication and mobility
c05 A69-12993
Space suit meteoroid protection for extravehicular activity, discussing Gemini and lunar surface EVA suits and bumper concept
[AIAA-PAPER-69-366] c05 A69-28298
Carbon dioxide levels monitoring in spacesuit research including limits of physiological acceptability
c05 A69-39170
Manned testing of EVA equipment in thermal-vacuum environment for qualification of Apollo extravehicular mobility unit, using lunar surface thermal simulator
[AIAA PAPER 69-992] c05 A69-40370
Real time metabolic rate analysis of suited astronaut using heart rate and O methods during thermal vacuum and extravehicular mobility tests
[AIAA PAPER 69-993] c05 A69-40371
Cardiovascular conditioning suit to provide transmural pressure gradient in circulatory system during weightlessness
[NASA-CR-1206] c05 N69-13202
Biomechanical factors determining lung damage following explosive decompression of space suits in vacuum test chambers
[NASA-CR-1223] c05 N69-13969
Space suit design with pressure stabilizer for force assisted elbow joint
[NASA-TN-D-5221] c05 N69-26259
Heat pipe devices for space suit temperature control
[NASA-CR-1400] c05 N69-38491

SPACE SURVEILLANCE (SPACEBORNE)
Earth resources remote sensing from spacecraft noting meteorology, oceanography, forestry, agriculture and IR detection of plant diseases and pollution
c34 A69-26978

SPACE TOOLS
Tools and equipment for extravehicular and intravehicular activities in space and on lunar surface
[AAS PAPER 69-438] c15 A69-42802

SPACE VEHICLE CHECKOUT PROGRAM
Onboard checkout system concept, discussing philosophy, requirements, underlying considerations, system description, development and techniques of system selection
c11 A69-25081

SPACE-TIME FUNCTIONS
Equation describing statistically trapped particle motion under influence of fields varying in time and space
c29 A69-19375
Metric state-time dynamical polysystem with sequentially compact topological space, noting sliding state trajectories
c19 A69-40573

SPACEBORNE PHOTOGRAPHY
Photographic results of Lunar Orbiter program noting possible Apollo sites
c30 A69-15858
NASA photogrammetric lunar activities, discussing imagery and control data by Lunar Orbiter and photogrammetric data reduction for preparing manned lunar landing

c14 A69-34336
Design, fabrication, assembly of planetary film reconnaissance system
[NASA-CR-1358] c14 N69-28023
SPACECRAFT
Propellant slosh load criteria for design of space vehicles
[NASA-SP-8009] c32 N69-14553
Development of static inverters or converters operating electrically in parallel for space vehicle applications
[NASA-CR-1224] c03 N69-16379
Spacecraft analog to digital conversion system employing metal oxide semiconductor field effect transistors
[NASA-TN-D-5228] c08 N69-29478
SPACECRAFT ANTENNAS
Antenna reactance from sounding rocket in ionosphere, showing variations relationship to rocket spin period
c13 A69-39964
Omnidirectional microwave parallel plate waveguide fed antenna design for flush mounted broadband spacecraft, noting equatorial and polar patterns
c09 A69-40697
Measurements of mutual interference heating for probe antenna mounted on Apollo reentry configuration
[NASA-TM-X-1787] c01 N69-29318
SPACECRAFT CABIN ATMOSPHERES
Human responses to spacecraft cabin atmosphere, pressure, and contamination, and water supply, diet, and anthropometry
[NASA-CR-1205-VOL-3] c04 N69-12592
Removal of acid gases and oxides of nitrogen from spacecraft cabin atmospheres at ambient temperatures
[NASA-CR-1388] c05 N69-37517
Contaminant and atmospheric sensor for spacecraft cabin environments
[NASA-CR-1375] c14 N69-37876
SPACECRAFT CABIN SIMULATORS
Apollo mission simulation, discussing Command Module Simulator /CMS/, onboard computer system and dynamic visual presentation via infinity-optics display
[SMPTE PAPER 105-74] c11 A69-25768
Evaluation of pilot describing function method applied to manual control analysis of large flexible booster in Saturn 5 launch vehicle simulator
[NASA-TN-D-5149] c21 N69-22996
SPACECRAFT COMMUNICATION
Communications for Apollo Applications Program, considering extended duration manned missions in low earth orbit and Gemini, Saturn and Apollo hardware
c07 A69-19124
Data relay satellite systems for support of NASA R and D missions, discussing communications between satellites and to mission control
c07 A69-25296
Tracking and data acquisition networks and communications systems for support of space missions, studying data processing, unified S Band System and Data Relay Satellite System
c07 A69-25933
Artificial satellites as navigation aids, describing angle, range and range-angle systems, discussing orbital mechanics and communications difficulties
c21 A69-34855
Ground data handling equipment characteristics for PCM telemetry link utilizing convolutional coding
c07 A69-36267
Intersatellite microwave laser communication system for ATS-F and ATS-G, discussing experiment, functional design and parameters
c07 A69-41758
Telecommunications performance of two lunar relay satellite system /LRSS/, determining operation capabilities with Apollo communications system
c07 A69-42508
Solar flare and sunspot effects on VHF communications between synchronous satellite relay and ground stations
[NASA-TN-D-5100] c07 N69-23317
Parametric analysis of microwave and laser systems for communication and tracking - summary
[NASA-TR-R-309] c07 N69-23642
SPACECRAFT CONFIGURATIONS
Entry phase flight data of Missions AS-202, Apollo 4 and 6 compared with wind tunnel aerodynamics data
[AIAA PAPER 68-1143] c31 A69-13556
Structural design options for decelerative aeroshell configurations for atmospheric entry on unmanned planetary explorations
[AIAA PAPER 68-344] c32 A69-15507
Configuration, trajectory planning, instrumentation, calorimetry and aerodynamic heating for planetary atmosphere entry
c31 A69-25719
Cone-conical-frustrum configurations meeting center of gravity requirements for higher hypersonic lift-drag ratios in axisymmetric manned spacecraft
c01 A69-39237
FORTRAN program for computing principal mass moments of inertia of spacecraft treated as composite bodies
[NASA-TM-X-1754] c23 N69-20870
Engineering models of Venus atmosphere for design and mission planning for spacecrafts
[NASA-SP-8011] c30 N69-20916
SPACECRAFT CONSTRUCTION MATERIALS
Cryogenic behavior of adhesive materials used in fabrication of liquid hydrogen/liquid oxygen powered Saturn S-4B stage
c18 A69-16487
Materials compatibility for space requirements, discussing shape retention, ductility, tensile strength, dissimilar materials stability, etc
c17 A69-17872
High emittance coating materials for beryllium, niobium-zirconium compounds, and stainless steel used in spacecraft radiators
[NASA-CR-1278] c17 N69-18952
Bremsstrahlung spectra from bombardment of typical spacecraft materials by monoenergetic electrons
[NASA-CR-1377] c24 N69-33416
SPACECRAFT CONTAMINATION
Spacecraft sterilization requirements, evaluating viable organisms release probability from spacecraft as function of equipment fracturing
c04 A69-25460
Human responses to spacecraft cabin atmosphere, pressure, and contamination, and water supply, diet, and anthropometry
[NASA-CR-1205-VOL-3] c04 N69-12592
SPACECRAFT CONTROL
Deceleration control system for aerobraking and skipout to orbit at Mars
[AIAA PAPER 68-1146] c31 A69-13564
Astrodynamics, guidance and control - Conference, Belgrade, September 1967, Volume 1
c30 A69-17560
Three axis attitude servomechanism design to adjust attitude and angular velocity of spacecraft
c21 A69-17589
Microscopic time lapse movies in solid/liquid interface profile during melting and freezing of materials for spacecraft thermal control as reversible heat sink
[AIAA PAPER 69-95] c33 A69-18126
Space guidance and control system components, noting control moment gyro, actuator, brushless dc motor, electrically supported gyro and laser gyro
c14 A69-22434
Spacecraft design for minimization of structure interaction with control system, noting susceptibility of extendible booms to solar environment
c31 A69-25500
Reentry and planetary entry physics and technology 2, advanced concepts, experiments, guidance-control and technology
c31 A69-25718
Guidance and control concepts and hardware for atmospheric entry of Mercury, Gemini and Apollo spacecraft
c21 A69-25724
Navigation, guidance and control developments for manned space missions, discussing earth orbital

exploration bases
c21 A69-35801
Manual guidance and control of Saturn launch vehicles, considering feasibility, reliability and hardware implementation
[AIAA PAPER 69-876] c31 A69-39402
Orbit selection rules for planetary cartographic spacecraft derived from relations connecting camera angle, view field and imaging resolution
[AIAA PAPER 69-879] c21 A69-39405
Guidance and control in space - Conference, Warsaw, June 1969
c21 A69-39644
Real time targeting for Apollo lunar orbit insertion maneuver burn, discussing impulsive maneuvers for flight control
[AIAA PAPER 68-848] c31 A69-39760
Responsiveness of three axis, large angle attitude control systems of highly maneuverable spacecraft capable of tracking time-varying target attitudes
[NASA-TN-D-4896] c30 N69-10756
Manned spacecraft control system requirements for abort problems
[NASA-CR-835] c31 N69-27299
Reliability study of Saturn 5 launch vehicle manual backup control system
[NASA-TN-D-5261] c21 N69-28018
Magnetic torque resulting from interaction between magnetic properties of spacecraft and ambient magnetic field
[NASA-SP-8018] c31 N69-30339

SPACECRAFT DESIGN
Space station design requirements, Apollo applications program and various experimental programs
c31 A69-11395
Entry corridor thermal entry limits for Apollo spacecraft defined for design of thermal protection system
[AIAA PAPER 68-1144] c31 A69-13673
Structural design options for decelerative aeroshell configurations for atmospheric entry on unmanned planetary explorations
[AIAA PAPER 68-344] c32 A69-15507
Manned spacecraft systems design optimization for extended space missions replacement modules
c31 A69-16380
Equations formulated for space vehicle reaction to rotating machinery and internal mass motion, evaluating dynamics of cylindrical space station rotating about major axis
c30 A69-16476
Spacecraft systems, education - Conference, Belgrade, September 1967
c31 A69-17596
Interplanetary Pioneer spacecraft development and systems engineering aspects
c31 A69-17605
Deployable appendages of OGO attitude controlled spacecraft design
c31 A69-17606
Mercury atmospheric models for preliminary environmental criteria to be used in spacecraft design and engineering trade-off studies
[AIAA PAPER 69-54] c30 A69-18042
Explorer 40 satellite mathematical model and verification testing for close spacecraft flight temperature predictions
[SAE PAPER 690202] c33 A69-18305
Semiactive gravity gradient stabilization system design for low altitude earth oriented spacecraft attitude control, using active reaction wheel scanner
c31 A69-18334
Propellant condensation on surfaces near electric rocket exhaust, calculating particle arrival rates, backflow and desorption energies
[AIAA PAPER 69-270] c28 A69-21252
Space exploration plans adaptation, considering spacecraft design, programs, costs and schedules flexibility
c34 A69-22863
Spacecraft design for minimization of structure interaction with control system, noting susceptibility of extendible booms to solar environment
c31 A69-25500
Electric relays requirements for spacecraft with magnetic field constraints
c09 A69-28046
Lunar orbital mission plans intended to optimize spacecraft procurement, flight schedules, science objectives and available funds
c30 A69-34362
Collection of papers on thermal design principles of spacecraft and entry bodies
c33 A69-34372
Weight estimation and forecast in manned spacecraft design, noting size and weight relationship
[SAWE PAPER 793] c31 A69-34864
Low cost efficient shuttle system for personnel and cargo transport to earth orbit for NASA and DOD needs
c31 A69-39695
Manned space flight history and spacecraft development
[AAS PAPER 69-501] c30 A69-42852
Statistical analysis on influential aspects of wind profile disturbance design and dynamic response of space vehicles
[NASA-TN-D-4963] c32 N69-15632
Prediction curves for launch vehicle vibration levels in region of spacecraft adaptor
[NASA-CR-1227] c31 N69-16155
Natural vibration modal analysis as related to space vehicle design criteria
[NASA-SP-8012] c32 N69-22773
Design, development, integration, and testing of Small Scientific Satellites
[NASA-TN-D-4988] c32 N69-33232
Design and test criteria regarding structural flexibility effects on spacecraft stability and control systems
[NASA-SP-8016] c31 N69-37030

SPACECRAFT DOCKING
Space vehicle docking dynamics and matrix equations of motion amenable to numerical solution on digital computer, using Hamilton principle and Lagrange multipliers
c31 A69-25501

SPACECRAFT ELECTRONIC EQUIPMENT
High temperature capacitor consisting of thin wafers of pyrolytic boron nitride noting fabrication, dissipation factor and capacitance
c03 A69-15299
Spacecraft electronics - Conference, Chicago, December 1968
c09 A69-22433
High power TWT tube cooling in space vehicle, discussing thermal control system based on heat pipe radiator
c09 A69-24747
Electric relays requirements for spacecraft with magnetic field constraints
c09 A69-28046
Onboard spacecraft computer design, programming and operation based on dual bussing system
c08 A69-37384
SDP-3-A general purpose stored program computer designed for small scientific spacecraft onboard data system, noting computerized simulation
c08 A69-37385
Spacecraft onboard data handling system with MSI complementary MOS arrays, describing various components
c08 A69-41739

SPACECRAFT ENVIRONMENTS
UV irradiation effects on ZnO spacecraft thermal control coating pigments, discussing photo-Hall, luminescence and electron paramagnetic resonance measurements
[AIAA PAPER 69-639] c18 A69-33288
Optimum solar cell cover glass systems selected by studying interplanetary space environment effects of proton impact, temperature and concurrent illumination on radiation damage
c03 A69-35702
Space medicine to characterize nature and degree of changes in human functional capabilities due to space flight environment prolonged exposure
c34 A69-36460
Back flow density from jet plumes in vacuum
[NASA-TN-D-4978] c01 N69-14385

SPACECRAFT GUIDANCE
Astrodynamics, guidance and control - Conference,

Belgrade, September 1967, Volume 1
c30 A69-17560
Ground based guidance systems for supplementing onboard guidance of manned space vehicles
c21 A69-17580
Trajectory error propagation upper bounds in many body field for impulsive initial error, relating error to mission tolerances
c30 A69-21937
Space guidance and control system components, noting control moment gyro, actuator, brushless dc motor, electrically supported gyro and laser gyro
c14 A69-22434
Guidance and control concepts and hardware for atmospheric entry of Mercury, Gemini and Apollo spacecraft
c21 A69-25724
Tracking and data acquisition systems for spacecraft and ground link through command, telemetry and tracking, noting data relay satellites, etc
c07 A69-33371
Manual procedures for midcourse and terminal guidance, discussing onboard optical measurements and calculations
c21 A69-35792
Navigation, guidance and control developments for manned space missions, discussing earth orbital exploration bases
c21 A69-35801
Evaluation method for strapdown spacecraft guidance systems on automated interplanetary missions, using cost and system performance efficiency probability model
[AIAA PAPER 68-828] c21 A69-35953
GaAs laser tracking system for space guidance, describing equipment and operations
[AIAA PAPER 69-870] c21 A69-39396
Manual guidance and control of Saturn launch vehicles, considering feasibility, reliability and hardware implementation
[AIAA PAPER 69-876] c31 A69-39402
Guidance and control in space - Conference, Warsaw, June 1969
c21 A69-39644
Visual sensing and spacecraft guidance for earth orbit rendezvous maneuvers
[NASA-CR-1214] c05 N69-13161
Matched conic solutions to round trip interplanetary trajectory problems for use in guidance and navigation simulation
[NASA-TN-D-4942] c30 N69-14861
Effect of spacecraft onboard radar range and range rate data and accuracy on unmanned probe entry guidance corridor
[NASA-TN-D-4852] c21 N69-16503

SPACECRAFT INSTRUMENTS
Aerospace sensor systems, discussing adaptive multimode sensors and multispectral sensing, electronic recognition of image components, laser radar and Raman scattering technique
c14 A69-13851
Sterilization techniques for instruments and materials as applied to space research - COSPAR Conference, London, July 1967
c05 A69-15934
Spaceborne optical telescopes requirements and development including mirror material and construction, optical design, servocontrol, etc
c14 A69-27946
Apollo optics system ground and flight performance tests results, suggesting possible design changes for sunlit space environments
c14 A69-35796
Onboard processor servicing spacecraft sensors, programmable from ground, discussing functions and applications
c08 A69-39921
Operational analysis of mass measuring system in orbiting spacecraft
[NASA-TN-D-5039] c04 N69-19115

SPACECRAFT LANDING
Aerodynamic and flight characteristics of variable geometry entry spacecraft during subsonic wing deployment and landing
[AIAA PAPER 69-742] c01 A69-34407
Ground based guidance for land-landing manned spacecraft with low velocity descent systems, discussing high and low altitude glide path intercept and spiral
[AIAA PAPER 69-864] c21 A69-39390

SPACECRAFT LAUNCHING
All weather wing profile monitoring system using FPS-16 radar/jimsphere system and flight simulation for protection of space vehicle and missile launches
c20 A69-13852
Photographic control system requirements for Project Apollo manned launches, considering extreme heat, vibration and sound pressure environment
[SMPTE PAPER 104-20] c14 A69-14360
Microwave power applications to propulsion, noting spacecraft launching, aircraft takeoff thrust assistance and power transmission in space
[IMPI PAPER D2] c28 A69-15000
Longitudinal structural vibration and lateral bending response mass and spring coupling in Saturn AS-502 during boost with longitudinal excitation by POGO effect
[AIAA PAPER 69-58] c31 A69-18204
Launch opportunity and window constraints, considering injection energy and precision, reference body occultation, communications range, etc
c31 A69-37287
Low cost rate transportation as mandatory goal for future space program, discussing recovery and reuse, launch system costs, hardware development, etc
c31 A69-38117
Nimbus 2 flight evaluation and engineering report covering launch through orbit 5275
[NASA-TN-D-4881] c31 N69-17851

SPACECRAFT MANEUVERS
Ground based guidance systems for supplementing onboard guidance of manned space vehicles
c21 A69-17580
Midcourse maneuvers in interplanetary guidance, considering spin stabilized spacecraft flyby for Jupiter mission
c30 A69-28504
Real time targeting for Apollo lunar orbit insertion maneuver burn, discussing impulsive maneuvers for flight control
[AIAA PAPER 68-848] c31 A69-39760

SPACECRAFT MODELS
Model design for simulation of space capsule landing on soils using similitude law
[NASA-CR-1210] c34 N69-13159
Data from thermal vacuum tests of flight model spacecraft
[NASA-TN-D-4908] c31 N69-14010
Engineering models of Venus atmosphere for design and mission planning for spacecrafts
[NASA-SP-8011] c30 N69-20916

SPACECRAFT ORBITS
Orbit selection rules for planetary cartographic spacecraft derived from relations connecting camera angle, view field and imaging resolution
[AIAA PAPER 69-879] c21 A69-39405
Statistical error analysis of autonomous manned spacecraft navigation in long duration eccentric Mars orbits
[AIAA PAPER 69-880] c21 A69-39406
Celestial sphere scanning by passive method applicable to space missions requiring long lifetime and moderate pointing accuracies
[AIAA PAPER 68-854] c21 A69-39764
Computer program for computation of thermal radiation heat loads and temperatures of spacecraft orbiting planets or moon
[NASA-TR-R-278] c30 N69-14428

SPACECRAFT PERFORMANCE
Digital computers in space flight simulation and vehicle performance optimization, examining mission analysis
c30 A69-14519
RAE-A satellite design, simulation and flight performance, discussing gravity gradient stabilization
c31 A69-18328
Navigation state vector update effect on lunar mission completion capability for Saturn 5, emphasizing hardware and scheme errors and accelerometer failure
[AIAA PAPER 69-883] c21 A69-39409

Summary of operation, communications, and other experiments of Relay 2 satellite
[NASA-SP-151] c31 N69-21065
SPACECRAFT POSITION INDICATORS
Navigation satellites system designed for ATC without requirement for onboard transmitter, discussing spectrum occupancy, satellite power, lane ambiguities and computational procedures c21 A69-19212
SPACECRAFT POWER SUPPLIES
Photovoltaic solar cell power technology application to space use and exploration
[ASME PAPER 68-WA/SOL-1] c03 A69-16158
Manned spacecraft electrical power systems requirements, noting Gemini and Apollo fuel cell system design and configuration c03 A69-21035
Electrochemical generators for space applications - Conference, Paris, December 1967 c03 A69-32405
Manned spacecraft fuel cell selection and design, discussing Gemini ion exchange membrane and Apollo Bacon cell systems c03 A69-32406
Space power systems analysis, using computer program to correlate systems characteristics with mission parameters for automated satellite repair vehicle and space stations c03 A69-42240
Fuel cell /battery and solar array/ battery systems for manned Apollo Applications Program /AAP/ space vehicles, considering mission and power requirements c03 A69-42244
Planar radioisotope thermoelectric generator system for NASA deep space missions and integrated spacecraft power supply c03 A69-42254
Systems analysis of Rankine cycle nuclear-electric potassium space power system using Li cooled fast reactor and high temperature turbine inlet c22 A69-42266
Argon turboalternator design and testing for Brayton cycle space power system, discussing inlet operating temperature and shaft bearings and rotation c03 A69-42279
Modularized static ac and dc inverters and converters for aerospace electrical power conditioning systems, discussing circuit functions and performance tests c03 A69-42292
Power conditioner for use with SERT 2 mercury ion thruster, describing electrical and mechanical design and operation c03 A69-42301
Spacecraft solar cell near-maximum power operation by tracking optimum value with array temperature sensor c03 A69-42303
Space nuclear electric power systems applications and development, summarizing current status and near future programs
[AAS PAPER 69-305] c28 A69-42865
Design, fabrication, and testing of 12-kilowatt inductor alternator, voltage regulator-exciter, and parasitic loading speed controller - summary
[NASA-TN-D-4874] c03 N69-10088
One megawatt reactor design for Brayton cycle space power application - thermal analysis and core design
[NASA-TN-D-5013] c22 N69-17313
One megawatt reactor design for Brayton cycle space power application - neutronics design
[NASA-TN-D-5014] c22 N69-17314
Calorimetric evaluation of three 1.5-meter diameter inflatable rigidized solar concentrators for solar dynamic cycle power systems
[NASA-TN-D-5234] c03 N69-28123
Performance characteristics of 14.3 kVA modified Lundell alternator for 1200 Hz Brayton cycle space power system
[NASA-TN-D-5405] c03 N69-35537
Electrothermal instabilities effects on Brayton and Rankine cycle magnetohydrodynamic space power generation systems
[NASA-TN-D-5461] c03 N69-37883
SPACECRAFT PROPULSION
Rocket motor integration into Scout vehicle to improve performance c31 A69-12384
Microwave power applications to propulsion, noting spacecraft launching, aircraft takeoff thrust assistance and power transmission in space
[IMPI PAPER D2] c28 A69-15000
Spacecraft optimum low thrust trajectory analyzed by Hamiltcn-Jacobi perturbation theory, obtaining canonic constants of motion c30 A69-17574
SERT 2 thrustor hollow cathode durability tested in bell jar
[AIAA PAPER 69-304] c28 A69-21224
Background pressure and magnetic field shape effect on MPD thrustor performance, testing radiation cooled thrustors
[AIAA PAPER 69-243] c28 A69-21239
Performance boundaries of space propulsion systems containing nuclear electric stages
[AIAA PAPER 69-249] c22 A69-21249
NASA long range planning of primary electric propulsion for automated space program
[AIAA PAPER 69-247] c28 A69-21251
Minimal electric propulsion systems for interplanetary spacecraft, discussing payload, reduced trip time and low thrust systems for Jupiter flyby
[AIAA PAPER 69-499] c28 A69-32714
Electric propulsion systems for manned planetary exploration flights, discussing arc jet, ion and plasma engines c28 A69-35108
Launch vehicle upper stage requirements in space missions, discussing space engine for lunar, planetary and interplanetary exploration
[AAS PAPER 69-359] c34 A69-42828
Mechanics of low thrust space flight
[NASA-TT-F-507] c28 N69-33354
SPACECRAFT RADIATORS
Emissivity coatings for low temperature space radiators
[NASA-CR-1420] c17 N69-36723
SPACECRAFT RECOVERY
Cloud cover effects on selection of recovery sites for future earth orbital missions
[NASA-TN-D-5120] c30 N69-22939
Free flight performance characteristics of ram air inflated recovery balloons with peripheral airscoops
[NASA-TN-D-5186] c21 N69-29595
SPACECRAFT REENTRY
Apollo thermal protection system, noting low density ablation, flight and ground tests
[AIAA PAPER 68-1142] c31 A69-13558
NASA planetary entry parachute program for rocket launched and balloon deployment tests
[AIAA PAPER 68-934] c02 A69-35952
SPACECRAFT RELIABILITY
Electric relays requirements for spacecraft with magnetic field constraints c09 A69-28046
Orbiting Astronomical Observatory thermal test and evaluation program, discussing equipment and role in experimental design
[AIAA PAPER 69-995] c11 A69-40373
Space station safety, discussing damage containment and control, escape and rescue, etc
[AAS PAPER 69-518] c31 A69-42842
Design, development, integration, and testing of Small Scientific Satellites
[NASA-TN-D-4988] c32 N69-33232
SPACECRAFT SHIELDING
Multiwall meteoroid protection design in Apollo program, discussing bumper, backup sheet and honeycomb cells insulation
[AIAA PAPER 69-372] c32 A69-28304
Second surface mirror used as coating for spacecraft thermal control c33 A69-37290
Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion
[AIAA PAPER 69-979] c33 A69-40359
IR directional and hemispherical emittance of spacecraft thermal control coatings, comparing values determined by various measurement techniques

c14 A69-41633
SPACECRAFT STABILITY
Dynamic stability derivatives of large angle blunted conical spacecraft near transonic speed in simulated Mars environment for various angles of attack
[AIAA PAPER 69-104] c31 A69-18210
RAE-A satellite design, simulation and flight performance, discussing gravity gradient stabilization
c31 A69-18328
System designs for manned spacecraft gravity gradient stabilization of Saturn S-4B stage at 400 km and lunar module at synchronous altitude
c31 A69-18338
Differential synthesis technique application to design of multiaxis stability augmentation systems for aerospace vehicles
[AIAA PAPER 68-834] c31 A69-37156
Apollo-Saturn 5 propulsion and structure feedback loop, analyzing POGO components and Nyquist plot application
[AIAA PAPER 69-877] c31 A69-39403
Dynamic stability derivatives of large angle blunted conical spacecraft near transonic speed in simulated Mars environment for various angles of attack
c31 A69-40550
Design and test criteria regarding structural flexibility effects on spacecraft stability and control systems
[NASA-SP-8016] c31 N69-37030
SPACECRAFT STERILIZATION
Sterilization techniques for instruments and materials as applied to space research - COSPAR Conference, London, July 1967
c05 A69-15934
Spacecraft sterilization techniques for space exploration, discussing mathematical models for planetary quarantine and contamination by nonlanding vehicles
c05 A69-15935
Spacecraft sterilization requirements, evaluating viable organisms release probability from spacecraft as function of equipment fracturing
c04 A69-25460
Spacecraft sterilization by destructive heating with thermite or high velocity entry friction before entering planet atmosphere
c05 A69-31472
SPACECRAFT STRUCTURES
Spacecraft design for minimization of structure interaction with control system, noting susceptibility of extendible booms to solar environment
c31 A69-25500
Lightly loaded truss structures fabricated from Be, Be-Al alloy and uniaxial B filament reinforced epoxy tubing for unmanned spacecraft applications
c17 A69-35504
Penetration flux calculation for multiwall structure on Lunar Orbiter spacecraft missions
[NASA-TN-D-5455] c32 N69-41229
SPACECRAFT TELEVISION
Optimizing spacecraft televisions for successive picture overlapping and maximum surface resolution during planetary descent
[NASA-TN-D-5061] c14 N69-17259
SPACECRAFT TRACKING
Multifunction Receiver System rationale, concepts, background requirements and technical justifications for tracking, telemetry and ranging data acquisition by Goddard Center
c07 A69-19101
Tracking and data acquisition systems for spacecraft and ground link through command, telemetry and tracking, noting data relay satellites, etc
c07 A69-33371
Regression analysis procedures for evaluating tracking system measurement errors
[NASA-TN-D-4826] c19 N69-14476
Parametric analysis of microwave and laser systems for communication and tracking - summary
[NASA-TR-R-309] c07 N69-23642
SPACECRAFT TRAJECTORIES
Multistage rocket trajectories optimized by second order numerical technique and digital computer program, considering coasting, vacuum flight and transition times
c30 A69-32154
Numerical integration for continuously thrusting spacecraft optimal trajectory, considering rectangular Cartesian and polar cylindrical coordinates characteristics
[AIAA PAPER 69-903] c30 A69-38546
Closed form solution for minimum fuel constant thrust trajectories for vehicle transfer in vacuum between arbitrary boundary conditions
[AIAA PAPER 69-905] c30 A69-39337
Branched trajectory optimization for split rocket vehicles using projected gradient or steepest descent method
[AIAA PAPER 69-917] c30 A69-39346
Perturbative effects of Jupiter moons on spacecraft flyby and postencounter heliocentric trajectories, noting precision targeting
[AIAA PAPER 69-932] c30 A69-39361
Venus swingby and direct Mercury trajectories analysis for optical imaging from flyby missions
[AAS PAPER 69-258] c30 A69-42860
Two burn spacecraft trajectories for escaping earth parking orbit
[NASA-TN-D-5011] c30 N69-17305
Requirement estimates and performance predictions for Martian television experiment onboard spacecraft in three point-mass descent trajectories
[NASA-TN-D-5062] c14 N69-17944
Semianalytic theory for lunar satellite motion including perturbative effects
[NASA-TN-D-5043] c30 N69-28050
Planetary flight handbook - direct trajectories to Jupiter, Saturn, Uranus, and Neptune
[NASA-SP-35-VOL-3-PT-7] c30 N69-33490
SPARE PARTS
Manned spacecraft systems design optimization for extended space missions replacement modules
c31 A69-16380
SPARK CHAMBERS
Gamma ray detection from Crab Nebula using digitized spark chamber
[NASA-TR-R-308] c30 N69-24170
SPARK GAPS
Parameters affecting firing time of simultaneously triggered trigatron spark gap switches
[NASA-TN-D-5077] c09 N69-20888
SPATIAL DISTRIBUTION
Gegenschein measurements for determining upper limit on asteroidal debris spatial density
c30 A69-12545
SPATIAL FILTERING
Mechanical collimator using random aperture arrays for celestial observation at extreme UV and X rays
c14 A69-36489
SPECIES DIFFUSION
Z-micron sections removed from metal specimens by microtome for radiotracer study of mass dependence of self diffusion
c14 A69-36490
SPECIFIC IMPULSE
Specific impulse deliverable performance of space storable propellant combination fluorine-oxygen/methane and oxygen difluoride/diborane
[AIAA PAPER 69-505] c28 A69-32762
SPECTRA
Flight measurement of optical radiation from shock heated air with Trailblazer 2 reentry vehicle
[NASA-TN-D-4937] c33 N69-14501
Bremsstrahlung spectra from bombardment of typical spacecraft materials by monoenergetic electrons
[NASA-CR-1377] c24 N69-33416
SPECTRAL BANDS
Banded chorus, VLF discrete emissions in magnetosphere in single variable frequency band with frequency depending on equatorial electron gyrofrequency
c13 A69-31981
Energy spectrum of secondary electrons and fluorescent efficiency in 3914 A band, obtaining ionization cross section
c29 A69-32315
Limb radiance calculation model for atmospheric carbon dioxide bands with pressure and temperature gradients
[NASA-TN-D-5495] c21 N69-40055

SPECTRAL EMISSION
Autoionized resonance transitions of He at 206.2-192.2 A using He continuum produced by capillary spark, also producing He 2 line spectra
c23 A69-42149
Spectral emission characteristics of gaseous tungsten and uranium in induction heated argon plasmas
[NASA-CR-1314] c25 N69-22920
Spectral emission of visible from Q switched dye lasers
[NASA-CR-1374] c16 N69-29934
Design, calibration, and use of radiometers to measure spectral emission in ballistic range and shock tube experiments
[NASA-TN-D-5360] c14 N69-38144

SPECTRAL ENERGY DISTRIBUTION
Solar irradiance spectral distribution data normalized and combined with spectral absorptance of satellite surface coatings, obtaining absorbed energy for spectral range
c29 A69-21646
Rocket measurements of primary auroral particles energy spectra indicating spectral structure acceleration peaks associated with electrostatic fields
c13 A69-38490
Spectral and operational characteristics of high intensity carbon arc solar simulator
[NASA-TM-X-1825] c11 N69-29737
Radiant energy transfer measurements in air plasma in reflected region of arc-driven shock tube
[NASA-CR-1390] c25 N69-38227

SPECTRAL LINE WIDTH
Nonequilibrium nitrogen plasma spectral line intensities calculated assuming optically thin plasma
c24 A69-10960
Sinusoidal phase modulation role in spectral broadening observed in trapped filaments of laser and Raman light
c16 A69-14189
Self modulation, self steepening and spectral development of light in small scale trapped filaments, noting influence of relaxation time
c23 A69-20745

SPECTRAL REFLECTANCE
Spectral reflectance of planetary atmospheres, lunar topography, and planetary surface analyses
[NASA-TT-F-502] c30 N69-31989

SPECTRAL RESOLUTION
Europium complexes high resolution emission spectra in relation to molecular configuration
c06 A69-10893

SPECTROHELIOGRAPHS
Rocket-borne spectroheliograph for monochromatic solar photography in Mg II 2802.7 A line noting filter bandwidth, film polarizers and temperature control
c14 A69-24838

SPECTROMETERS
Fabrication and testing of lithium-drifted detectors as low energy photon spectrometers
[NASA-TN-D-5056] c24 N69-19828
Computer program for line-by-line calculation of spectra from diatomic molecules and atoms assuming Voigt line profile
[NASA-TN-D-5088] c24 N69-21462
Three crystal sodium iodide pair spectrometers
[NASA-TM-X-1857] c14 N69-34628

SPECTROPHOTOMETRY
Mars surface photometric and spectrophotometric measurements, relating opposition effect details with corresponding laboratory sample measurements
c30 A69-18601
Electron transport of Halobacterium cutirubrum, discussing spectrophotometric identification of cytochromes
c04 A69-19481
Detection and spectral examination of trace porphyrin complexes by demetallation with methanesulfonic acid and spectrofluorometry, compared to absorption spectrophotometry
c06 A69-42557
Comparison of extraction procedures using 1-nitroso 2-naphthol and dimethylglyoxime for spectrophotometric determination of palladium in titanium alloys
[NASA-TM-X-1767] c06 N69-20801

SPECTROSCOPIC ANALYSIS
Spectrochemical analysis of cobalt-base superalloys by liquid-layer solid-sample spark technique
[NASA-TM-X-1753] c06 N69-20853

SPECTROSCOPY
Auger and photoelectron spectroscopy for chemical analysis, noting effects of sample thickness, sample potential, surface contamination and X ray incident angle
c06 A69-19775
Remote sensing cross-beam cross correlation methods of determining spatially resolved average thermodynamic properties
[AIAA PAPER 67-149] c14 A69-31868
Spectroscopic study of helium arc
[NASA-TN-D-5396] c25 N69-36755

SPECTRUM ANALYSIS
Spectra of close binary systems, analyzing abundance anomalies, noting metallicity results
c30 A69-15854
Ion temperature diurnal variations at 250-475 km obtained from Thomson scatter spectra
c13 A69-16407
Rotating and oscillating magnetic neutron stars causing pulsars radio and optical signals, stressing UV line emissions theory
c30 A69-20624
Doublet structure suppression in mixtures of cesium and foreign gases, discussing absorption observations
c24 A69-20736
Oscillator strengths and wavelengths of X ray and EUV transitions in highly ionized iron line spectra
c29 A69-27554
Luminescence spectra of aromatic polymers, monomers and dimers under high energy electron excitation using molecular resonance model
c26 A69-32792
Cloud scattering corrections added to synthetic spectrum analysis of carbon dioxide bands and water vapor line in Venus spectrum
c30 A69-33161
Solar Na D lines analysis by direct inversion of line source function, finding Doppler core dependence on frequency
c30 A69-38479
Autoionized resonance transitions of He at 206.2-192.2 A using He continuum produced by capillary spark, also producing He II line spectra
c23 A69-42149
Spectral and electrophotometric studies of upper atmosphere - airglows, atomic oxygen, hydroxyl emission, helium line spectra, auroras, and solar cycle effects on magnetosphere
[NASA-TT-F-530] c13 N69-16539
Spectral classes and photographic magnitudes determined for region Lacerta OB1
[NASA-TN-D-5060] c30 N69-26235

SPECULAR REFLECTION
ATS 3 satellite reflectometer experiment carrying test samples to measure specular reflectance, noting silica shield effects
[AIAA PAPER 69-644] c33 A69-33270

SPEED INDICATORS
Supersonic Preston tube correlations for Mach number and Reynolds number effects on hypersonic turbulent skin friction on adiabatic surfaces, simplifying correlation
[AIAA PAPER 69-345] c12 A69-28280
Baronti-Libby transformation and Preston tube calibrations used to determine skin friction from turbulent velocity profiles
[NASA-TN-D-4853] c12 N69-10472

SPHERES
Drag coefficients for spheres and sharp cones in rarefied hypersonic air flow obtained in shock tunnel using free flight technique
[AIAA PAPER 69-140] c01 A69-18184
Force penetration characteristics of sand horizontally penetrated by various geometrically shaped models
[NASA-CR-1252] c18 N69-14764
Wind tunnel magnetic support and balance system for measuring sphere drag
[NASA-CR-1353] c11 N69-25343

Heat transfer coefficients for film boiling from submerged spheres
[NASA-TN-D-5124] c33 N69-28318
Wind tunnel drag measurements on subsonic sphere
[NASA-CR-1392] c01 N69-30609
Tabulated values of configuration factors between two spheres and parts of two spheres
[NASA-SP-3050] c30 N69-37777

SPHERICAL CAPS
Spherical caps axisymmetric static and dynamic buckling under load, using axisymmetric nonlinear elastic shell theory approximation and finite difference equations
[AIAA PAPER 69-89] c32 A69-18133
Surface pressure distribution on spherical blunted cones, and correlation of Mach numbers, cone angle, and angle of attack
[NASA-TN-D-5204] c01 N69-24764

SPHERICAL SHELLS
Design and construction of plastic model of prestressed segmented spherical shell
[NASA-CR-1231] c32 N69-11010
Buckling equations solved for equatorial segment of spherical shell loaded in axial direction by own weight
[NASA-TN-D-4921] c32 N69-13034
Monte Carlo analysis of gold sphere transmission experiments at 24 keV neutron energy using S wave spin state data
[NASA-TN-D-5211] c24 N69-24826

SPHERICAL TANKS
Volume effects on normal gravity pressurization of spherical liquid hydrogen tanks
[NASA-TN-D-5196] c33 N69-24168
Venting of spherical liquid hydrogen tankage
[NASA-TN-D-5263] c33 N69-27620
Physical parameter effect on pressurant gas requirements during expulsion of liquid hydrogen from spherical tanks
[NASA-TN-D-5336] c28 N69-32318
Hydrogen gas pressure requirements during pressurization and transfer of liquid hydrogen from spherical tanks
[NASA-TN-D-5387] c28 N69-33211

SPHERICAL WAVES
Proportionality between log-amplitude variance and 7/6 power of wavenumber for horizontal propagation from spherical wave transmitter to point detector
c16 A69-19641

SPHERULES
Oxide composition of silicate spherules from forest area devastated by Tunguska meteorite explosion using electron microprobe analysis
c30 A69-28869

SPIKES
High latitude ionization spikes observed by POGO spacecraft, noting frequency correlation with magnetic disturbances and development by high energy electron injections
c29 A69-28950

SPIN DYNAMICS
Celestial sphere scanning by passive method applicable to space missions requiring long lifetime and moderate pointing accuracies
[AIAA PAPER 68-854] c21 A69-39764
Elastohydrodynamic analysis and experimental speed effects on ball spinning friction coefficients and torque
[NASA-TN-D-5527] c15 N69-41210

SPIN REDUCTION
Resonant spin and anomalous rotation of Mercury, analyzing influence of tidal degradation and permanent deformation of planet
c30 A69-39568

SPIN STABILIZATION
Spin-tunnel investigation of scale model of straight wing, twin boom counter insurgency airplane
[NASA-TM-X-1602] c02 N69-34988
Spin and recovery characteristics of 1/30 scale subsonic attack aircraft model determined in wind tunnel tests
[NASA-TM-X-1788] c02 N69-37976

SPIRALS
Energy conversion and distribution of spiraling electron beam using retarding field analyzer
[NASA-TN-D-5490] c09 N69-41208

SPLINE FUNCTIONS
FORTRAN computer program for spline fit curve with function valves
[NASA-TM-X-1707] c19 N69-14002

SPOILERS
Effects of aerodynamic forces on jet engine noise from rigid flow spoilers
[NASA-CR-1340] c23 N69-26307

SPORADIC METEOROIDS
Weighting factor for correction of photographic bias caused by variation in mass and velocity of sporadic meteoroids
[NASA-TN-D-5245] c30 N69-26239

SPRINGS (ELASTIC)
Longitudinal mass spring modeling of launch vehicles
[NASA-TN-D-5371] c32 N69-34970

SPUTTERING
Physical sputtering deposition of molybdenum disulfide films as solid lubricant on rotating and sliding components, discussing lubrication properties in vacuum
[ASLE PAPER 68-LC-15] c15 A69-19308
Friction and contact resistance during sliding in vacuum of low resistivity metals lubricated with sputtered molybdenum disulfide
[NASA-TN-D-5349] c15 N69-31884

STABILITY
Stability of time varying systems by construction of multipliers with prescribed phase characteristics
c10 A69-16598
Digital simulation computer stability analysis scheme premised on use of perturbed transient responses
c10 A69-32899
Determination of stability indicative function for linear systems with multiple time delays
[NASA-TR-R-301] c31 N69-17801
Computation of regions of constrained stability for nonlinear control systems
[NASA-CR-1328] c19 N69-28196
Combustion stability of single swirl can combustor modules using ASTM-A1 liquid fuel
[NASA-TN-D-5436] c28 N69-40080

STABILITY DERIVATIVES
Newton-Raphson technique development for determining stability derivatives from flight data, noting use of a priori wind tunnel information
[AIAA PAPER 69-315] c02 A69-22379

STABILITY TESTS
Thermal cycling tests showing improvement in cadmium sulfide solar cell stability, noting effect of thermal cycling stresses
c03 A69-13074
Design and test criteria regarding structural flexibility effects on spacecraft stability and control systems
[NASA-SP-8016] c31 N69-37030

STABILIZATION
Lifting body stability augmentation systems design, development, ground tests and flight data including frequency response, limit cycle and structural resonance
[AIAA PAPER 69-887] c02 A69-39413

STABILIZERS (FLUID DYNAMICS)
Infrared heating simulation of Mach 4.63 flight on X-15 horizontal stabilizer
[NASA-TN-D-5403] c33 N69-35949

STACKS
Performance of prototype hydrogen oxygen electrolytic regenerative fuel cell stack with gas storage tank
[NASA-CR-1244] c03 N69-18885

STADAN (SATELLITE TRACKING NETWORK)
International 28-station global instrumentation ground support network for space tracking and data acquisition
[UN PAPER 68-95912] c34 A69-17059
Tracking and data acquisition networks and communications systems for support of space missions, studying data processing, unified S Band System and Data Relay Satellite System
c07 A69-25933
PCM data handling system for NASA Space Tracking and Data Acquisition Network with explanation for output capabilities, noting BIOSAT project
c07 A69-36242

Data systems coordinating standards developed from experience with STADAN, discussing operating environment and administrative decisions influence on implementation
c08 A69-41769

STAGE SEPARATION
Launch vehicle upper stage requirements in space missions, discussing space engine for lunar, planetary and interplanetary exploration
[AAS PAPER 69-359] c34 A69-42828
Rocket-scramjet hybrid engines in lifting reusable second stage
[NASA-TN-D-5218] c28 N69-24922
Aerodynamic characteristics in pitch of scale model of two and three stage rocket configuration at Mach numbers of 0.4 to 4.63
[NASA-TN-D-5378] c01 N69-34986

STAGNATION FLOW
Quasi-linear ordinary differential equations solutions for steady two dimensional stagnation point flows of nonNewtonian power law fluids
c12 A69-39674
Solution to radiation-coupled stagnating flow with nongray emission over hypervelocity blunt body
[NASA-TR-R-299] c33 N69-16268

STAGNATION POINT
Correlations of stagnation point radiative heat transfer for earth reentry, noting use of nongray absorption coefficient models
c33 A69-14736
Perturbation solution to blunt body stagnation region flow of radiating gas with radiation heat transfer
[NASA-TR-R-295] c12 N69-10788
Stagnation point boundary layer with suction and injection in equilibrium dissociating air
[NASA-TN-D-3889] c12 N69-14314
Stagnation pressure and heat transfer measurements of blunt axisymmetric bodies
[NASA-TN-D-5121] c01 N69-22554
Photographic study of bromine jet flowing in coaxial airstream and impinging on stagnation surface
[NASA-TN-D-5209] c12 N69-24800

STAINLESS STEELS
High emittance coating materials for beryllium, niobium-zirconium compounds, and stainless steel used in spacecraft radiators
[NASA-CR-1278] c17 N69-18952
Experimental and analytical studies of multiple liquid impact erosion of aluminum and stainless steel
[NASA-CR-1288] c15 N69-19786
Fabrication of counterflow double wall tantalum-stainless steel mercury boiler
[NASA-TN-D-5092] c33 N69-23707
Outdoor high temperature corrosion tests for aluminum alloys and titanium alloys, and stainless steels
[NASA-TN-D-5362] c17 N69-32558

STANDARD DEVIATION
X Ray fluorescence of rock samples as applied to geological problems, noting standard deviations for element distribution
c14 A69-10890
Approximation for mean and standard deviation of magnitude of statistical velocity correction vector
[NASA-TN-D-5381] c30 N69-36143

STANDARDS
Data systems coordinating standards developed from experience with STADAN, discussing operating environment and administrative decisions influence on implementation
c08 A69-41769
Thermodynamic properties of erbium hydrogen binary system evaluated for use as low pressure standard
[NASA-CR-1271] c14 N69-16099

STANDING WAVES
Multiple scattering in Kapitza-Dirac effect describing electron scattering by standing electromagnetic wave, noting transition probability less than unity
c23 A69-25323

STAR CLUSTERS
Computer study of collisionless self gravitating system using two dimensional model, obtaining gravitational field by solving Poisson equation
c30 A69-12272
Lacerta OB1 stellar spectral classes and photographic magnitudes, analyzing clusters and distributions in concentrated and dispersed areas
c30 A69-25813
Residual interstellar gas from protostar formation detected as high luminosity IR object
c29 A69-27593

STAR DISTRIBUTION
Lacerta OB1 stellar spectral classes and photographic magnitudes, analyzing clusters and distributions in concentrated and dispersed areas
c30 A69-25813

STAR TRACKERS
Working breadboard model of planet tracker under various illuminating conditions, discussing hardware and closed loop tracking error analysis accounting for signal to noise effects
c21 A69-13214
Design and development of boresighted star tracker
[NASA-CR-976] c21 N69-21502
Electronically scanned star sensor with digital output for orbiting astronomical telescope
[NASA-TN-D-5281] c14 N69-29153
Derivation of transfer function for optical system relating image intensity to spatial autocorrelation
[NASA-CR-1443] c21 N69-38041

STARCHES
Dynamic differential thermal analysis with He flow performed on biological specimens, proteins and starches, showing discrete decomposition peaks monitoring pyrolysis process
c06 A69-31807

STARK EFFECT
Europium complexes high resolution emission spectra in relation to molecular configuration
c06 A69-10893

STARS
Individual properties of RR Lyrae stars
[NASA-TT-F-562] c30 N69-27169
Sextant sighting performance concerned with training and monochromatic stars
[NASA-TN-D-5190] c05 N69-35024

STARTING
Analytical method for predicting performance of centrifugal pumps during pressurized startup
[NASA-TN-D-4967] c15 N69-14082

STATIC AERODYNAMIC CHARACTERISTICS
Wind tunnel tests to determine static aerodynamic characteristics of cruciform wing-body missiles at transonic and supersonic speeds
[NASA-TM-X-1839] c01 N69-31875
Wind tunnel stability tests to determine effect of hypersonic research engine on aerodynamic characteristics of research aircraft
[NASA-TM-X-1840] c01 N69-38612

STATIC INVERTERS
Modularized static ac and dc inverters and converters for aerospace electrical power conditioning systems, discussing circuit functions and performance tests
c03 A69-42292
Development of static inverters or converters operating electrically in parallel for space vehicle applications
[NASA-CR-1224] c03 N69-16379
Evaluation of magnetic materials for static inverters and converters, tested under square wave excitation and direct current excitation
[NASA-CR-1226] c03 N69-17765
Electric control and protection circuits for parallel operation of inverter-converter
[NASA-CR-1225] c10 N69-19003

STATIC LOADS
Predicting buckling of thin walled, uniform stiffened and unstiffened circular cylindrical shells under static loading
[NASA-SP-8007] c32 N69-23320
Buckling of thin walled truncated conical shells under static loads
[NASA-SP-8019] c32 N69-24131

STATIC PRESSURE
Flow direction measurement with fixed-position probes
[NASA-TM-X-1904] c14 N69-40059

STATIC STABILITY
Spherical caps axisymmetric static and dynamic buckling under load, using axisymmetric nonlinear elastic shell theory approximation and finite difference equations
[AIAA PAPER 69-89] c32 A69-18133
Small eccentricity stability analysis for externally pressurized gas lubricated bearings with journal rotation
[NASA-TN-D-4934] c15 N69-13256
Wind tunnel investigation of static stability characteristics of model jet-lift V/STOL research airplane
[NASA-TM-X-1835] c02 N69-30633
STATIONKEEPING
Multijet electrothermal systems for attitude control and stationkeeping of synchronous communications satellite
[AIAA PAPER 67-723] c28 A69-12375
Ammonia resistojet stationkeeping subsystem onboard ATS 4 satellite, noting flight test data agreement with ground tests
[AIAA PAPER 69-296] c28 A69-21212
STATISTICAL ANALYSIS
Spectral null from spectral characteristics and statistical properties of PCM signals used to estimate SNR
c07 A69-19122
Statistical theories of turbulence applied to thermal convection between infinite slippery plates at large Prandtl number
c33 A69-24283
Statistical error analysis of autonomous manned spacecraft navigation in long duration eccentric Mars orbits
[AIAA PAPER 69-880] c21 A69-39406
Statistical analysis on influential aspects of wind profile disturbance design and dynamic response of space vehicles
[NASA-TN-D-4963] c32 N69-15632
Statistical analysis of satellite position with tracking error inclusion
[NASA-TN-D-5259] c30 N69-30611
Approximation for mean and standard deviation of magnitude of statistical velocity correction vector
[NASA-TN-D-5381] c30 N69-36143
Creep rate equations for refractory metal alloys of tantalum molybdenum, and columbium
[NASA-TN-D-5424] c17 N69-36653
Statistical analysis of pressure fluctuations in separated turbulent boundary layer
[NASA-TN-D-5440] c12 N69-36940
Determination of meteoroid environments from photographic meteor data
[NASA-TR-R-322] c30 N69-39336
STATISTICAL CORRELATION
Lunar topography statistics determined by Zond 3 space probe
[NASA-TT-F-514] c30 N69-24206
Statistical method for evaluating goodness of fit between data set and theoretical distribution of random variables
[NASA-TR-R-313] c19 N69-30610
Statistical correlation between optical microwave propagation reliability, fade margin, path length, and geographic location
[NASA-CR-1442] c07 N69-39282
STATISTICAL MECHANICS
Transport properties of steam, analyzing selection, correlation and prediction using statistical mechanical theories
c33 A69-10110
STATOR BLADES
Turbine stator blade performance determination from total pressure surveys downstream of blade row, noting problems in pressure measurement
[ASME PAPER 69-GT-103] c01 A69-22521
Variable stator area effect on performance of single stage turbine suitable for air cooling
[NASA-TM-X-1697] c01 N69-10558
Application of boundary layer control concepts to highly loaded turbine stator blades in annular cascades
[NASA-CR-1219] c01 N69-14211
Theoretical study of discrete frequency noise generated by turbocompressors and blades
[NASA-CR-1287] c28 N69-21476
Aerodynamic characteristics of annular cascade of blades
[NASA-CR-1323] c01 N69-25327
Stator performance with cooling by air ejection from trailing edges of blades
[NASA-TM-X-1901] c03 N69-39335
STATORS
Stator setting effect on single stage turbine performance, considering blade loss and surface velocity distribution
[AIAA PAPER 69-525] c28 A69-32686
Effect of variable stator with area design of 70 percent on performance of single stage turbine suitable for air cooling
[NASA-TM-X-1696] c28 N69-10296
Development and high temperature tests of high strength nickel alloy for stator vanes of gas turbine engines
[NASA-TN-D-5352] c17 N69-31873
STEADY FLOW
Three dimensional hypersonic steady flow around blunt and pointed cones at nonzero angles of attack calculated by method of characteristics
[AIAA PAPER 69-187] c01 A69-18176
STEAM FLOW
Transport properties of steam, analyzing selection, correlation and prediction using statistical mechanical theories
c33 A69-10110
Steam cycle analysis for nuclear powered turbofan engine
[NASA-TM-X-1907] c22 N69-40060
STEELS
Pressure and temperature dependence of slow crack growth in hardened steel in gaseous hydrogen environment
c17 A69-10612
Plastic deformation of corrosion resistant steel, CER-VIT 101, and fused silica as function of applied torsional stress
[NASA-CR-1257] c14 N69-16100
Effect of ultrasonic vibration on precipitation hardening of steels and superalloys
[NASA-TN-D-5131] c32 N69-21814
STEEPEST DESCENT METHOD
Branched trajectory optimization for split rocket vehicles using projected gradient or steepest descent method
[AIAA PAPER 69-917] c30 A69-39346
FORTRAN program for radiation shield optimization using steepest descent method
[NASA-TM-X-1769] c22 N69-20854
STEERING
Steerable landing gear system consisting of freely castoring corotating wheel nose gear, tiltable axle and main gear skids for lifting body spacecraft
[AIAA PAPER 69-790] c02 A69-35639
STELLAR ATMOSPHERES
Scaled solar and gray-body temperature distribution models compared to determine stellar atmosphere
c30 A69-14626
Acoustic energy generation for helium rich stars, discussing X ray radiation from helium star corona
c29 A69-20645
Aurigae star HD 35620 with respect to epsilon Virginis using model atmosphere and high dispersion spectra
c30 A69-20913
Density inversion in convective zone of stellar photospheres occurring in Eridani atmospheric model under certain conditions
c30 A69-21843
Atmospheric models for metal deficient stars of K and G spectral type, studying reduced metal abundance effect on atmospheric structure
c30 A69-22055
Subdwarf HD 25329 studied with model atmosphere approach, using H alpha, Na I and Mg I profiles for effective temperature
c30 A69-22199
Circumstellar grain compositions of stars with various O to C abundance ratios, calculating molecular equilibrium of condensates and gaseous compounds in stellar atmospheres
c30 A69-24103

Star twinkling absence for lunar observation laboratory, noting star distance measurement and laser action in stellar atmospheres
c30 A69-27172
Radial pulsation mode of convective envelopes in adiabatic equilibrium for variable M red supergiant stars
c30 A69-30766
Monte Carlo relaxation method for physically self consistent model stellar atmospheres, discussing stability, accuracy and convergence of solution
c30 A69-36337
Atmospheric models for specified effective temperatures, hydrogen-to-metal ratios and surface gravities in studying metal deficiency effect on stellar atmosphere
c30 A69-36338
Stellar atmospheres acoustic energy generation rate calculations, studying corona mass ejection effects on stellar rotation
c30 A69-39521
Helium-carbon star BD plus 10 degrees 2179 reanalyzed by grid of constant flux models containing right amount of C
c30 A69-40652
Theoretical molecular line absorption of carbon monoxide in late spectral type stellar atmospheres
[NASA-TN-D-4798] c24 N69-14448

STELLAR EVOLUTION
Computer study of collisionless self gravitating system using two dimensional model, obtaining gravitational field by solving Poisson equation
c30 A69-12272
Primordial helium and horizontal branch star luminosity, obtaining luminosities in He burning phase for different He and metal abundances from models
c30 A69-22211
Red supergiants as old derivatives of main sequence O and B stars, discussing neutrino emissions and carbon core contraction
c30 A69-24125
Residual interstellar gas from protostar formation detected as high luminosity IR object
c29 A69-27593
X ray sources model, describing possible ring of matter around white dwarf near end of active evolution
c29 A69-35204
Primitive solar nebula physical model considered under angular momentum conservation in collapsing fragment
c30 A69-36074
Nebulosity around FG Sagittae for origin and evolution of planetary nebulae, suggesting ejection of nebular shell
c30 A69-42887

STELLAR LUMINOSITY
Relation between amplitude of light and radial velocity variations of beta Canis Majoris stars
c30 A69-14126
Primordial helium and horizontal branch star luminosity, obtaining luminosities in He burning phase for different He and metal abundances from models
c30 A69-22211
Red supergiants as old derivatives of main sequence O and B stars, discussing neutrino emissions and carbon core contraction
c30 A69-24125
Lacerta OB1 stellar spectral classes and photographic magnitudes, analyzing clusters and distributions in concentrated and dispersed areas
c30 A69-25813
Computer program for launch window determination from star illumination of night sky background
[NASA-TM-X-1772] c21 N69-22969
Two-micron sky survey catalog of celestial objects
[NASA-SP-3047-REV] c30 N69-37993

STELLAR MASS
Structure and pulsational properties of massive stars with helium cores and thin hydrogen poor envelopes
c30 A69-22421
Radial pulsation mode of convective envelopes in adiabatic equilibrium for variable M red supergiant stars
c30 A69-30766

STELLAR MASS EJECTION
Stellar rotation braking due to mass loss from coronae through stellar wind based on calculation of acoustic energy generation from convective zone
c30 A69-20644
Radial pulsations of neutron star losing mass, interpreting Crab Nebula pulsar observed period and secular increase of period
c30 A69-37573
Stellar atmospheres acoustic energy generation rate calculations, studying corona mass ejection effects on stellar rotation
c30 A69-39521

STELLAR MOTIONS
Relation between amplitude of light and radial velocity variations of beta Canis Majoris stars
c30 A69-14126

STELLAR RADIATION
Radio emission from magnetic neutron stars as possible model for pulsars, noting optical and IR emission bands
c30 A69-20729
Nuclear energized pulsational instability of stars based on linear quasi-adiabatic theory, including models with hydrogen burning shells
c30 A69-27576
Interstellar extinction in UV from zeta and epsilon Persei spectra obtained with scanner attached to telescope mounted in pointed Aerobee rocket
c30 A69-40772
IR excess of R CrB type variable star RY Sgr, noting visual brightness and radiation in 2.0-3.4 micron range
c30 A69-42377

STELLAR ROTATION
Stellar rotation braking due to mass loss from coronae through stellar wind based on calculation of acoustic energy generation from convective zone
c30 A69-20644
Rotational energy conversion of neutron star into relativistic electrons energy suggested by increasing period of pulsating radio source in Crab Nebula
c30 A69-21454
Spin down effects on neutron stars, discussing decrease of period of PSR 0833-45 as result of differential rotation instability
c30 A69-32803
Stellar atmospheres acoustic energy generation rate calculations, studying corona mass ejection effects on stellar rotation
c30 A69-39521
Carroll Fourier transform method applied to stellar spectra lines to determine small rotational velocities
c30 A69-42404

STELLAR SPECTRA
Spectra of close binary systems, analyzing abundance anomalies, noting metallicity results
c30 A69-15854
Aurigae star HD 35620 with respect to epsilon Virginis using model atmosphere and high dispersion spectra
c30 A69-20913
Atmospheric models for metal deficient stars of K and G spectral type, studying reduced metal abundance effect on atmospheric structure
c30 A69-22055
Subdwarf HD 25329 studied with model atmosphere approach, using H alpha, Na I and Mg I profiles for effective temperature
c30 A69-22199
Spinning rockets UV spectrophotometry of early type stars, discussing instrumentation, calibration, data recording and stellar spectra
c30 A69-25812
Lacerta OB1 stellar spectral classes and photographic magnitudes, analyzing clusters and distributions in concentrated and dispersed areas
c30 A69-25813
Rocket spectrographic observations of Alpha Virginis noting hydrogen Lyman absorption lines
c30 A69-27555

Curve of growth analysis for close binary HR 5317 indicating Mg, Mn, Ca and Sr overabundance respecting standard star 110 Her
c30 A69-34297
Variable stars blue sequence, proposing mu mechanism and beta mechanism as explanation for radial pulsations
c30 A69-40650
Helium-carbon star BD plus 10 degrees 2179 reanalyzed by grid of constant flux models containing right amount of C
c30 A69-40652
Carroll Fourier transform method applied to stellar spectra lines to determine small rotational velocities
c30 A69-42404

STELLAR SPECTROPHOTOMETRY
Spinning rockets UV spectrophotometry of early type stars, discussing instrumentation, calibration, data recording and stellar spectra
c30 A69-25812
Lacerta OB1 stellar spectral classes and photographic magnitudes, analyzing clusters and distributions in concentrated and dispersed areas
c30 A69-25813
HD 30353 He binary star invisible component suggested as KO type supergiant from IR photometric data
c30 A69-35348
Spectral classes and photographic magnitudes determined for region Lacerta OB1
[NASA-TN-D-5060] c30 N69-26235

STELLAR STRUCTURE
Instability of stellar structures intermediate between white dwarfs and neutron stars shown by stellar models, discussing pulsar signals periodicities
c30 A69-20770
Structure and pulsational properties of massive stars with helium cores and thin hydrogen poor envelopes
c30 A69-22421

STELLAR WINDS
Stellar rotation braking due to mass loss from coronae through stellar wind based on calculation of acoustic energy generation from convective zone
c30 A69-20644

STEP FUNCTIONS
Dynamic analysis and maximum stepping rate prediction for permanent magnet motor
[NASA-TN-D-5094] c03 N69-20780
Low order Runge-Kutta formulas with step control for heat transfer problems
[NASA-TR-R-315] c19 N69-30753

STEREOPHOTOGRAPHY
Heights of cloud bases and convective cloud tops determined by stereoscopic photogrammetry of Apollo 6 mission
c20 A69-36926

STIFFNESS
Direct stiffness method of computing vibrational characteristics of dynamic model of Apollo-Saturn 5 vehicle - umbilical tower configuration
[NASA-TN-D-4871] c31 N69-10934
Stiffness matrices analysis of thin flat plates
[NASA-TN-D-4927] c32 N69-14169
Instability of eccentrically stiffened cylindrical shells under axial compression and lateral pressure
[NASA-CR-1280] c32 N69-15378
Theoretical analysis of free vibration of discretely stiffened cylindrical shells with arbitrary end conditions
[NASA-CR-1316] c32 N69-28164
Beam stiffness determined for thin walled truncated cones under bending loads
[NASA-TN-D-5536] c32 N69-41141

STOCHASTIC PROCESSES
Stochastic problems in control - Conference, Ann Arbor, June 1968
c10 A69-14693
Optimal stochastic control of small dynamic systems described by random differential equations, noting selective bibliography on several subjects
c10 A69-14697
Matrix Riccati and matrix quadratic equations in problems of stochastic control and filtering
c10 A69-16601
Optimal stochastic control, discussing dynamic mathematical models described by differential equations
c10 A69-22567
Stochastic saturating systems optimal control computation, considering attitude control and tracking system design by elliptical differential equation of dynamic programming
c10 A69-30601
Analytic time function models of stochastic processes of noise and modulation
[NASA-TR-R-314] c07 N69-29230
Sequential stochastic techniques for trajectory estimation
[NASA-CR-1360] c30 N69-40325

STOICHIOMETRY
Physical properties of near stoichiometric nickel-titanium alloy Nitinol and some structural-mechanical applications employing these properties
[NASA-CR-1232] c17 N69-11420

STOKES LAW (FLUID MECHANICS)
Nature of outside boundary layer on liquid sphere in steady, uniform stream
[NASA-CR-1362] c12 N69-24877

STONY METEORITES
Stony meteoric particles size and velocity during passage through atmosphere
c30 A69-26341

STORABLE PROPELLANTS
Specific impulse deliverable performance of space storable propellant combination fluorine-oxygen/methane and oxygen difluoride/diborane
[AIAA PAPER 69-505] c28 A69-32762
Hydrogen and methane combustion to simulate expansion of storable propellants
[AIAA PAPER 68-635] c33 A69-37188
Nozzle insert evaluation and gas cooling concept in storable liquid propellant rocket engine
[NASA-TM-X-1756] c28 N69-19782
Throat and nozzle insert design for ablative rocket engine using storable propellants
[NASA-TN-D-4964] c32 N69-33481
Gaseous reactant combustion simulation of dimethylhydrazine and hydrazine fuel system for nonequilibrium expansion studies
[NASA-TN-D-5404] c33 N69-35506

STORAGE TANKS
High pressure storage vessels for gaseous hydrogen, discussing failure, manufacturing controls and access for internal nondestructive inspection
[ASM PAPER D8-14.1] c15 A69-19666
Structural failures of high pressure, gaseous hydrogen storage tanks for M-1 engines
[NASA-CR-1305] c17 N69-19831
Lightweight polyurethane insulation for liquid hydrogen tanks of space vehicles
[NASA-TN-D-5114] c18 N69-20790

STRAIN GAGES
Hysteresis of strain gage absolute pressure transducer
[NASA-TN-D-5327] c14 N69-30506
Design and operation of high temperature loads calibration laboratory
[NASA-TM-X-1868] c11 N69-36224

STRAIN HARDENING
Dynamic strain aging in carbide strengthened molybdenum alloys
[NASA-TN-D-5355] c17 N69-31883
Internal stress and deposit hardness of nickel electrodeposited containing controlled quantities of meta-benzenedisulfonic acid
[NASA-TN-D-5188] c17 N69-36697

STRAIN RATE
Strain-rate sensitivity of three titanium-alloy sheet materials after prolonged exposure to high temperature
[NASA-TN-D-4981] c17 N69-14873

STRAPDOWN INERTIAL GUIDANCE
Computer-generated computational errors in direction cosine matrix for strapdown inertial system
[NASA-TR-R-304] c21 N69-21402
Vibration induced attitude errors in strapdown inertial navigators

[NASA-CR-1396] c21 N69-34672
Algorithm for computing direction cosine matrix of strapdown inertial system
[NASA-TN-D-5384] c21 N69-36997
STRATOSPHERE
Water vapor profiles in stratosphere from IR radiometric observations under cloudless conditions, indicating relation to tropospheric meteorological features
c13 A69-38261
Synoptic analysis of Southern Hemisphere stratosphere
[NASA-TM-X-1814] c13 N69-33555
Stratospheric and mesospheric temperature and moisture profiles determined from infrared horizon observations
[NASA-CR-1419] c20 N69-35528
STREAMLINING
FORTRAN program for calculating velocities and streamlines on blade to blade stream surfaces of turbomachinery
[NASA-TN-D-5044] c01 N69-21811
STREAMS
Injection of attached inviscid jet at oblique angle to moving stream
[NASA-TN-D-5501] c12 N69-39916
STRESS (PHYSIOLOGY)
Artificial heat acclimatization effect on orthostatic tolerance in man exposed to stresses of heat, exercise and dehydration
c05 A69-32810
STRESS ANALYSIS
Creep rate-stress-temperature relations for powder metallurgy rhenium, discussing activation energy
c17 A69-34186
Photoviscoelastic method for stress analysis of two dimensional viscoelastic models
[NASA-CR-1289] c32 N69-17770
Integral equation method with continuous functions for calculating boundary stress components in plane elasticity
[NASA-CR-1273] c32 N69-19030
Structural response of tubular beryllium and beryllium aluminum alloy truss-type structures to dynamic and static loads
[NASA-TN-D-5254] c32 N69-28658
STRESS CONCENTRATION
Geometrically exact finite element for thin shells of revolution, using approximation to predict boundary layer stress distribution during vibration
[AIAA PAPER 69-56] c32 A69-18193
Displacements and stress intensity as function of crack length for compact tension specimen, considering load line and crack edge
c15 A69-21392
Inclination effect of fatigue cracks on plane strain fracture toughness of 7075-T651 Al alloy, discussing cantilever bending
c32 A69-25958
Analysis of cylindrical reactor fuel pin for clad stress caused by fission gases
[NASA-TN-D-5178] c22 N69-24802
Stress concentration around broken filaments in filament stiffened sheet
[NASA-TN-D-5453] c32 N69-38642
STRESS CORROSION
Hot salt stress corrosion of Ti alloy, discussing hydrogen generation during elevated temperature exposure and embrittlement as manifestation of strain rate
c17 A69-39434
Hot salt stress corrosion of titanium alloys - generation of hydrogen and its embrittling effect
[NASA-TN-D-5000] c17 N69-16465
Analysis of sodium chloride deposits on compressor blades of flight gas turbine engines
[NASA-TN-D-4999] c28 N69-17276
Salt stress corrosion cracking effects on tensile and stress rupture properties of titanium alloy sheet
[NASA-TN-D-5417] c17 N69-36221
Hot-salt stress-corrosion of titanium alloy under simulated turbine engine compressor environment
[NASA-TN-D-5510] c17 N69-40242
STRESS CYCLES
Factors influencing low cycle crack growth of aluminum sheet specimens
[NASA-TN-D-5140] c32 N69-21392
Cyclic life calculations of materials subjected to isothermal stress considering fatigue and creep
[NASA-TN-D-5317] c32 N69-29672
STRESS RATIO
Axial load fatigue crack propagation tests on Al alloy sheets for stress ratio effects
c17 A69-36435
Stress ratio effects on fatigue crack growth in sheet aluminum alloys
[NASA-TN-D-5390] c17 N69-34704
STRESS-STRAIN DIAGRAMS
Elastoplastic stress-strain behavior at notch roots in sheet specimens under constant amplitude loading
[NASA-TN-D-5253] c32 N69-28038
STRESSED-SKIN STRUCTURES
Influence of fabrication methods on compressive strength of titanium alloy skin stringer panels
[NASA-TN-D-5389] c15 N69-34707
STRESSES
Edge notch sensitivity in thin sheet nickel alloys under stress at high temperatures
[NASA-CR-1263] c32 N69-16156
STRETCH FORMING
Calorimetric, optical, and vibration investigation of stretch-formed aluminum solar concentrators for thermionic converters
[NASA-TN-D-4889] c03 N69-10708
STRIATION
Moving striations as plasma oscillations arising from transit time delays of neutral and charged particles moving through ionized gas, using continuity equation
c25 A69-43122
Helium-neon laser discharge with striation oscillations in relation to pressure and current
[NASA-CR-1387] c08 N69-32350
STRINGERS
Influence of fabrication methods on compressive strength of titanium alloy skin stringer panels
[NASA-TN-D-5389] c15 N69-34707
STRONTIUM
Moldavites and Ries crater material, studying Rb-Sr isochronal relationship
c13 A69-41341
STRONTIUM ISOTOPES
Rb-Sr isotope patterns in tekites from Southeast Australian strewn field, studying Rb volatilization role in Rb-Sr isochron production
c13 A69-41342
STRONTIUM TITANATES
Zr doped superconducting ceramic strontium titanate, noting effective electron mass variations and transition temperature
c26 A69-27400
Polarons large to nearly small transitions, studying ground state mass dependence on bare electron mass, electron-phonon interactions model, superconducting strontium titanate, etc
c26 A69-37280
STRUCTURAL ANALYSIS
Control system for thin diffraction limited orbiting astronomical telescope mirror based on structural analysis of static deflections
c14 A69-27951
Rosman I reflector antenna for collecting data from earth orbiting satellites, discussing dynamic analysis of structural response to natural frequencies
c32 A69-42133
Structural synthesis of cylindrical shell reinforced with rectangular cross section stiffeners
[NASA-CR-1217] c32 N69-14254
Transient thermal analysis and structural analysis for synthesis of ablating thermostructural panels in planetary entry environment
[NASA-CR-1215] c32 N69-16114
Outer and inner curved plates and shell shapes optimized by conformal mapping
[NASA-CR-1357] c32 N69-26559
Manipulation errors in finite element analysis of structures
[NASA-CR-1385] c19 N69-34360
Differential equations for compression loaded axisymmetric cylindrical structures
[NASA-CR-1444] c32 N69-38781

STRUCTURAL DESIGN
Structural design options for decelerative aeroshell configurations for atmospheric entry on unmanned planetary explorations
[AIAA PAPER 68-344] c32 A69-15507
Flutter design charts for isotropic panels stressed to verge of buckling for typical values of structural damping
c32 A69-25524
Papers on fracture, Volume 5, Fracture design of structures
c32 A69-33559
Fracture design for airflight vehicles, discussing crack strength requirements and method for serviceability prediction
c32 A69-33563
Structural and aerodynamic developments in attached inflatable decelerators for deplcyment of payload at supersonic speeds
[AIAA PAPER 68-929] c02 A69-39015
Structural technology for large radio and radar telescope systems - Conference, Cambridge, Mass., October 1967
c11 A69-42120
Materials research structural design cycle, discussing simultaneous optimization, constituent materials, fabrication process, load environment and mission constraints
c32 A69-42991
Design and construction of plastic model of prestressed segmented spherical shell
[NASA-CR-1231] c32 N69-11010
Conference on NASA research in noise reduction of subsonic jet aircraft - nacelle acoustic linings, sound generation in jet engines, and operational noise effects on humans
[NASA-SP-189] c02 N69-11542
Propellant slosh load criteria for design of space vehicles
[NASA-SP-8009] c32 N69-14553
Variational methods for determining optimum design and flight of rockets
[NASA-TR-R-297] c31 N69-15374
Design and performance prediction of calorimetric apparatus for measuring total hemispherical emittance of materials
[NASA-TN-D-5106] c14 N69-20941
Design and development of boresighted star tracker
[NASA-CR-976] c21 N69-21502
Vibration test fixture design for mount impedance simulation of aerospace structures
[NASA-CR-1351] c32 N69-26315
Wind tunnel study of open-face honeycomb to reduce temperature of hypersonic aircraft structure
[NASA-TN-D-5278] c33 N69-29599
Design effects on performance of two dimensional mixed-compression supersonic inlets with low angle cowls
[NASA-TN-D-5330] c01 N69-30060
Design calculations for conical shells and elastic systems subject to antisymmetric loads
[NASA-TT-F-518] c32 N69-30754
Design and performance of sonic boom simulator
[NASA-CR-1378] c02 N69-31959
Design of Brayton rotating unit with roller bearings for space power system
[NASA-CR-1401] c15 N69-33450
Optimal structural design for sandwich-shaped and ring-stiffened loaded shells of revclution
[NASA-CR-1424] c32 N69-35515
Optimum structural design for Martian entry capsule configurations
[NASA-CR-1414] c33 N69-35516
Design and equipment requirements for manned earth orbiting biotechnology laboratory
[NASA-CR-1408] c05 N69-35541
Structural design of conical and tension shells using sandwich structures
[NASA-CR-1365] c32 N69-36357
Modified structural design of high temperature cesium vapor thyratrons
[NASA-CR-1417] c03 N69-36411
Drag and stability characteristics of towed, conical decelerator
[NASA-TM-X-1833] c02 N69-38598
STRUCTURAL FAILURE
High pressure storage vessels for gaseous hydrogen, discussing failure, manufacturing controls and access for internal nondestructive inspection
[ASM PAPER D8-14.1] c15 A69-19666
Failure criteria for predicting filamentary composite strength under uniaxial and combined stresses from properties and fabrication process considerations
c32 A69-21479
Structural failures of high pressure, gaseous hydrogen storage tanks for M-1 engines
[NASA-CR-1305] c17 N69-19831
STRUCTURAL MEMBERS
Computer program for one dimensional elastic wave problems connected with structural members
[NASA-CR-1306] c32 N69-22983
STRUCTURAL STABILITY
Instability of eccentrically stiffened cylindrical shells under axial compression and lateral pressure
[NASA-CR-1280] c32 N69-15378
Structural stability of lattice column of longerons and helical braces
[NASA-CR-1301] c32 N69-26234
STRUCTURAL STRAIN
Plane strain fracture toughness determined for crack notched bend specimens using standard test procedure for specific metallic material property
c17 A69-33566
STRUCTURAL VIBRATION
LOX prevalve accummulator system with He pressurant for prevention of POGO effect on Saturn 5
c31 A69-15298
Longitudinal structural vibration and lateral bending response mass and spring coupling in Saturn AS-502 during boost with longitudinal excitation by POGO effect
[AIAA PAPER 69-58] c31 A69-18204
Flexible rotor blade dynamic response to radially moving force, emphasizing helicopter rotor vibration characteristics associated with tip-vortex impingement
[AIAA PAPER 69-203] c02 A69-19546
Dynamic analysis of axisymmetric ring stiffened shells with attached asymmetric elastic structures, noting vibration modes
c32 A69-25525
Saturn 5 longitudinal instability /POGO/ precluded by lowering S-1C stage propulsion system resonance below structural frequency
[AIAA PAPER 69-548] c31 A69-32658
Natural vibration modal analysis as related to space vehicle design criteria
[NASA-SP-8012] c32 N69-22773
Effect of shallow meridional curvature on vibration of nearly cylindrical shells
[NASA-TN-D-5143] c32 N69-22821
STRUCTURAL WEIGHT
Weight estimation and forecast in manned spacecraft design, noting size and weight relationship
[SAWE PAPER 793] c31 A69-34864
Compressive properties and weight saving of metals reinforced on surface with resin bonded fibers
[NASA-TN-D-4878] c17 N69-11012
STRUTS
Thermal analysis of shadow shields and structural members in space environment
[NASA-TN-D-4876] c33 N69-10473
Impact energy absorbing strut using tube cutting
[NASA-TN-D-4941] c32 N69-14506
SUBMERGED BODIES
Heat transfer coefficients for film boiling from submerged spheres
[NASA-TN-D-5124] c33 N69-28318
SUBMILLIMETER WAVES
Background radiation intensity upper limits for mm and submillimeter wavelengths in interstellar medium, ncting intense flux in far IR
c30 A69-19404
Sulfur dioxide-helium laser pulsed and CW submillimeter outputs
c16 A69-24005
SUBORBITAL FLIGHT
Suitability of white rats for suborbital studies of behavior in gravity fields
[NASA-CR-1255] c05 N69-14094
SUBROUTINES
FORTRAN 4 subroutines to generate printed plots as

normal output
[NASA-TM-X-1700] c08 N69-13566
FASTER computer program modified for tracking neutrons through reactor slabs penetrated by helical voided ducts
[NASA-TM-X-1838] c22 N69-31986
SUBSONIC AIRCRAFT
Calculated and flight measured handling quality factors of three subsonic jet transports
[NASA-TN-D-4832] c02 N69-10495
Fluid mechanical problems related with subsonic and supersonic aircraft
[NASA-SP-183] c12 N69-10693
Conference on NASA research in noise reduction of subsonic jet aircraft - nacelle acoustic linings, sound generation in jet engines, and operational noise effects on humans
[NASA-SP-189] c02 N69-11542
SUBSONIC FLOW
Subsonic lifting surface theory including leading edge, discussing singularities in solution of integral equation for determination of aerodynamic properties
[AIAA PAPER 69-37] c01 A69-18167
Fixed position pressure probe for measuring subsonic flow direction over range of Reynolds number, Mach number and flow angle
c14 A69-33107
FORTRAN computer program for detailed solution of compressible, subsonic, nonviscous flow at leading or trailing edges of blade surface
[NASA-TN-D-5091] c01 N69-22938
Subsonic expansion tube evaluation as device for studying particle drag in subsonic compressible slip flow
[NASA-CR-1354] c11 N69-28095
Load distribution calculations for subsonic compressible flow of arbitrary wings and lifting surfaces
[NASA-TN-D-5335] c01 N69-31337
Computer program for steady laminar, subsonic, and isothermal compressible flow across sealing dam
[NASA-TN-D-5373] c15 N69-33281
Wind tunnel investigation for determination of subsonic and transonic aerodynamic characteristics of Saturn 1B launch vehicle
[NASA-TM-X-1848] c31 N69-33380
Wind tunnel tests of subsonic aerodynamic characteristics of large scale tip turbine cruise fan with 1.075 pressure ratio at angle of attack
[NASA-TN-D-5316] c28 N69-34575
Three dimensional pressure distribution functions for lifting surfaces with trailing-edge controls based on integral equations for subsonic flow
[NASA-TN-D-5419] c01 N69-38768
SUBSONIC SPEED
Aerodynamic and flight characteristics of variable geometry entry spacecraft during subsonic wing deployment and landing
[AIAA PAPER 69-742] c01 A69-34407
C-5A aircraft model high subsonic speed tests, correlating data from three transonic wind tunnels
[AIAA PAPER 69-794] c01 A69-35636
SUBSONIC WIND TUNNELS
Wind tunnel wall constraints effects at extreme force coefficients during V/STOL testing shown different from effects in conventional aircraft testing
c11 A69-15574
Test facilities and techniques for low speed flight problems of aircraft handling qualities, stability, control and performance
c11 A69-15575
Wind tunnel drag measurements on subsonic sphere
[NASA-CR-1392] c01 N69-30609
SUBSTRATES
Gold-underlayer film combinations adhesion to oxide substrates, describing adhesion changes as function of Au and underlayer film thickness, time, environment, etc
c26 A69-28007
Substrate specificity of cathepsin C derived from rat liver, describing polymeric structure and behavior as acidic protein
c04 A69-37577
SUBZERO TEMPERATURE
Cryogenic fracture properties of thin AISI 301 cold reduced sheet at different angles to rolling direction
[NASA-TN-D-5413] c17 N69-35688
SUCTION
Amplified boundary layer oscillations and transition at swept flat nosed wing attachment line with/without boundary layer suction analyzed by wind tunnel tests
c01 A69-33251
Stagnation point boundary layer with suction and injection in equilibrium dissociating air
[NASA-TN-D-3889] c12 N69-14314
SUDDEN IONOSPHERIC DISTURBANCES
Sudden magnetic field increase associated with July 8, 1966 sudden commencement observed by OGO 3 satellite in magnetotail
c13 A69-11226
Sudden commencement associated discontinuities in interplanetary magnetic field observed by IMP 3 satellite, stressing shocks and tangential and rotational discontinuities
c30 A69-22183
Worldwide changes in geomagnetic field, determining causes by examining magnetic field and plasma data for solar wind and classifying as SSC or SI
c29 A69-31963
SUGARS
Sugars identification as trifluoethylacetyl polyol derivatives by gas-liquid chromatography
c04 A69-31539
SULFONES
Synthesis of Pyrrone laminates from sulfone dianhydride
[NASA-CR-1404] c30 N69-31960
SUNLIGHT
Directional solar thermal field /sunlight/ effect on coupled nonplanar transverse and torsional vibrations of satellite cylindrical antennas in orbit
c32 A69-25534
SUNSPOT CYCLE
Interplanetary sector structure during rising portion of 1966-1967 sunspot cycle, giving recurrence period of interplanetary field
c30 A69-28957
Global electron density distribution morphology in topside ionosphere during sunspot minimum from Alouette 1 and 2 ionograms
c13 A69-37867
SUNSPOTS
Sunspots magnetic structure producing solar proton flares, considering role of sunspots rotational motion on photospheric surface
c29 A69-35415
Solar flare and sunspot effects on VHF communications between synchronous satellite relay and ground stations
[NASA-TN-D-5100] c07 N69-23317
SUPERCONDUCTING MAGNETS
Variable voltage dc power supplies for energizing cryogenically cooled and superconductive electromagnets
c03 A69-26498
Design, construction, testing, and control devices for high-field electromagnets
[NASA-TN-D-4910] c23 N69-10889
Superconductive 14-tesla magnet system with 15-cm bore and niobium stanide ribbon
[NASA-CR-1260] c03 N69-15382
SUPERCONDUCTIVITY
Polarons large to nearly small transitions, studying ground state mass dependence on bare electron mass, electron-phonon interactions model, superconducting strontium titanate, etc
c26 A69-37280
SUPERCONDUCTORS
Zr doped superconducting ceramic strontium titanate, noting effective electron mass variations and transition temperature
c26 A69-27400
Optimum thickness of dynamically stable composite superconducting tapes determined for substrate thickness as function of current density
c26 A69-43121
Inductance behavior of coils filled with superconducting lead or niobium dusts
[NASA-TN-D-5137] c26 N69-21500

SUPERGIANT STARS
Red supergiants as old derivatives of main sequence O and B stars, discussing neutrino emissions and carbon core contraction
c30 A69-24125
Radial pulsation mode of convective envelopes in adiabatic equilibrium for variable M red supergiant stars
c30 A69-30766
HD 30353 He binary star invisible component suggested as KO type supergiant from IR photometric data
c30 A69-35348
SUPERNOVAE
Gamma ray telescope development for balloon-borne astronomy in search for discrete gamma sources and supernova explosions
[IEEE PAPER 3A-5] c14 A69-19192
Nucleosynthesis in dynamics of massive star cores, noting element synthesis by neutron capture in supernova explosions
c30 A69-20898
SUPERSONIC AIRCRAFT
Fluid mechanical problems related with subsonic and supersonic aircraft
[NASA-SP-183] c12 N69-10693
Crack toughness characteristics of high strength alloys for use in heavy sections of supersonic aircraft
[NASA-TN-D-4998] c32 N69-17275
Conditions for supersonic aircraft entering critical stall and spin regimes
[NASA-TT-F-526] c02 N69-31917
Helium pressurization systems for liquid methane fuel in supersonic transports
[NASA-TN-D-5519] c28 N69-40329
SUPERSONIC AIRFOILS
Performance comparisons of supersonic compressor rotor blades
[NASA-CR-1256] c28 N69-14210
SUPERSONIC COMBUSTION
Dynamic stability and performance of injectors, rocket liners, and supersonic combustors
[NASA-TM-X-1845] c33 N69-32468
SUPERSONIC COMBUSTION RAMJET ENGINES
Rocket-scramjet hybrid engines in lifting reusable second stage
[NASA-TN-D-5218] c28 N69-24922
SUPERSONIC COMPRESSORS
Supersonic compressor blade sections performance prediction near maximum pressure ratio and efficiency by analyzing flow processes
[AIAA PAPER 69-522] c28 A69-32711
Steady state and dynamic distortion influence on performance and stall of turbofan engine, discussing compressor instrumentation, tests and simulation data
c28 A69-35175
SUPERSONIC DRAG
Drag coefficients for spheres and sharp cones in rarefied hypersonic air flow obtained in shock tunnel using free flight technique
[AIAA PAPER 69-140] c01 A69-18184
Numerical method for evaluation and utilization of supersonic nacelle-wing interference
[NASA-TN-D-5057] c01 N69-19641
Force measurements in drag reduction by gas injection into turbulent boundary layer through supersonic wing slots
[NASA-TN-D-5307] c12 N69-31359
SUPERSONIC FLIGHT
Evaluating performance of swirl can turbojet combustor at simulated supersonic inlet conditions
[NASA-TN-D-4996] c28 N69-16154
Aerodynamic characteristics of large-angle cones in supersonic lifting capabilities
[NASA-TN-D-5499] c01 N69-40026
SUPERSONIC FLOW
Solar wind flow past earth and magnetosphere correspondence to external aerodynamics of round nosed bodies in supersonic stream
c13 A69-19360
One strip method of integral relations applied to inviscid supersonic blunt body problem
c01 A69-21972
Vortex motion enhancement of jet penetration and spreading in supersonic fuel injection into large diameter combustors
[AIAA PAPER 69-664] c12 A69-33437
Computational method for surface pressures on blunt bodies of revolution at small angles of attack in supersonic flow
[NASA-TN-D-4865] c01 N69-10215
Oxidation behavior of coated molybdenum and niobium alloys in high temperature supersonic air streams
[NASA-TN-D-4877] c17 N69-10764
Estimated supersonic flow field shock waves and sonic boom effects for cones and axisymmetric bodies
[NASA-TN-D-4935] c01 N69-13238
Momentum diffusion between two supersonic airstreams passing through oblique shock waves
[NASA-TN-D-4974] c12 N69-15631
Experimental pressure distributions on 120 deg cone at Mach 2.96 to 4.63 and angles of attack from 0 deg to 20 deg
[NASA-TN-D-5054] c01 N69-19826
Mathematical model for determining total drag of pointed body of revolution in supersonic flow with turbulent boundary layer
[NASA-TN-D-5046] c01 N69-19925
Flow field from forward facing nozzles exhausting near large cylindrical body at free-stream Mach numbers of 3.0 and 6.0
[NASA-TN-D-5030] c01 N69-21000
Finite difference techniques used in numerical solutions for inviscid radiating shock layers around spheres at hyperbolic speed in air
[NASA-TR-R-311] c12 N69-26504
Flow field measurements on flat plate with attached protuberances in supersonic turbulent boundary layer
[NASA-TN-D-5297] c12 N69-30071
Supersonic flow characteristics in wake of blunt cones
[NASA-TN-D-5365] c01 N69-32299
Gaseous jet interaction and penetration in supersonic flow
[NASA-CR-1386] c12 N69-32480
Turbulent boundary layer temperature and velocity measurements in supersonic water-cooled conical nozzle
[NASA-TN-D-5377] c12 N69-33353
Mathematical analysis of wave structure in supersonic flow
[NASA-CR-1438] c04 N69-37062
Effect of angle of attack and injection pressure on jet penetration and spreading from Delta wing in supersonic flow
[NASA-TM-X-1889] c12 N69-37271
Characteristics method for determining three dimensional supersonic flow around inclined body of revolution
[NASA-TN-D-5341] c12 N69-39177
SUPERSONIC INLETS
M 3.5 two dimensional mixed compression inlet system with self restart using flexible variable ramp system
[AIAA PAPER 69-447] c28 A69-32732
Large scale axisymmetric inlet systems performance capabilities, reviewing theoretical and experimental programs
[AIAA PAPER 68-580] c28 A69-34018
Wind tunnel tests of distortion dynamics in Mach three mixed compression inlet
[NASA-TM-X-1706] c01 N69-13154
Approximate mathematical analysis of supersonic inlet dynamics
[NASA-TN-D-4969] c01 N69-14289
FORTRAN computer program for designing supersonic inlets by characteristic theory
[NASA-TN-D-4960] c01 N69-14566
Design and performance of flueric shock position sensor for mixed compression supersonic inlets
[NASA-TM-X-1733] c14 N69-16382
Performance test from Mach 2.58 to 1.98 of axisymmetric mixed-compression inlet system with 60 percent internal contraction
[NASA-TM-X-1739] c01 N69-19130
Restart and high response terminal shock control for axisymmetric mixed-compression inlet with internal contraction
[NASA-TM-X-1792] c28 N69-24938
Design effects on performance of two dimensional mixed-compression supersonic inlets with low angle cowls

[NASA-TN-D-5330] c01 N69-30060
Dynamic response of supersonic mixed compression inlet coupled to cold pipe or turbojet engine
[NASA-TN-D-5338] c28 N69-31336
Numerical analysis of shock control by using perforated walls in internal compression supersonic inlets
[NASA-TR-R-317] c01 N69-32338

SUPERSONIC NOZZLES
Flow angle and throat Reynolds number effects on loss characteristics of two dimensional supersonic nozzle
[NASA-TM-X-1823] c01 N69-31360

SUPERSONIC SPEEDS
Structural and aerodynamic developments in attached inflatable decelerators for deployment of payload at supersonic speeds
[AIAA PAPER 68-929] c02 A69-39015
Effects of boundary layer bleed rate and location on performance of axisymmetric inlet designed for Mach 2.5
[NASA-TM-X-1692] c01 N69-10294
Effects of angle of attack and bluntness on shock layer properties of cones at supersonic speeds
[NASA-TN-D-4909] c01 N69-10789
Performance of 10 deg conical turbojet plug nozzle with iris primary and translating shroud for supersonic cruise applications
[NASA-TM-X-1709] c28 N69-14313
Aerodynamic characteristics of blunted cones, tension shell, and attached inflatable decelerator models
[NASA-TN-D-5219] c31 N69-26570
Flight test performance of supersonic parachutes in low density environment
[NASA-TN-D-5296] c01 N69-30063
Pressure distributions for blunt body wind tunnel models at supersonic speeds and angles of attack from 0 to 15 degrees
[NASA-TN-D-5392] c01 N69-35300
Feasibility tests on liquid lubricants for inerted lubrication systems of advanced aircraft engines
[NASA-TN-D-5420] c15 N69-35788

SUPERSONIC TRANSPORTS
Location effect of power plants on aft-mounted supersonic cruise exhaust nozzles at transonic speeds in flight and wind tunnel
[AIAA PAPER 69-427] c01 A69-32769
XB-70 aircraft test data as applied to SST safety, describing aircraft design, flight characteristics, instrumentation, takeoff and landing, etc
c02 A69-41143
Flight simulator with large lateral motion for large and supersonic transport aircraft, emphasizing reproduction of cockpit accelerations due to supersonic engine thrust loss
c11 A69-43044
Low speed static and dynamic longitudinal, and lateral stability of scale model of supersonic transport in wind tunnel tests
[NASA-TN-D-4726] c02 N69-10733
Simulation studies of supersonic transports in future air traffic control systems
[NASA-TN-D-4944] c21 N69-14382
Large scale wind tunnel tests to improve longitudinal stability of supersonic transports with variable swept wings
[NASA-TN-D-5005] c02 N69-16384
Supersonic transport performance during real time simulated operations in future air traffic control system environments
[NASA-TN-D-5018] c02 N69-17257
Aerodynamic characteristics and ground effects of supersonic transport with double Delta wing
[NASA-TN-D-5102] c02 N69-21020
Supersonic transport instrumentation and flight simulation
[NASA-TN-D-5280] c14 N69-32286

SUPERSONIC WAKES
Supersonic flow characteristics in wake of blunt cones
[NASA-TN-D-5365] c01 N69-32299

SUPERSONIC WIND TUNNELS
Short duration tube wind tunnel supersonic testing, noting Saturn S-1C base heating and solid propellant rocket base burning tests
[AIAA PAPER 69-335] c11 A69-28271
Inlet produced dynamic distortion and effects on stall margin of J-85 turbojet engine from supersonic wind tunnel tests
[AIAA PAPER 69-487] c28 A69-32676

SUPERSONICS
Supersonic aerodynamic characteristics and shock standoff distances for large angle cones with and without cylindrical afterbodies
[NASA-TN-D-5334] c01 N69-33237

SUPPORT SYSTEMS
Data relay satellite systems for support of NASA R and D missions, discussing communications between satellites and to mission control
c07 A69-25296
Tracking and data acquisition networks and communications systems for support of space missions, studying data processing, unified S Band System and Data Relay Satellite System
c07 A69-25933
High speed foil bearing rotor support system
[NASA-CR-1157] c15 N69-14214

SUPPORTS
Vibration test fixture design for mount impedance simulation of aerospace structures
[NASA-CR-1351] c32 N69-26315

SURFACE CRACKS
Gas breakdown model for analyzing breakdown of Ce vapor filled crack in thermionic trilayer insulator
c03 A69-21840
Semiempirical fracture analysis for semielliptical surface crack in plate
[NASA-TN-D-5340] c32 N69-31056

SURFACE DIFFUSION
Turbine blade loading in terms of surface diffusion and loading factors, discussing tandem and jet flap blades and vortex generators
[ASME PAPER 68-WA/GT-11] c28 A69-16136
Lunar surface thermal radiation incident on unit area flat surface located at variable distance and orientation above moon, considering diffusion effects
c30 A69-38973

SURFACE DISTORTION
Heat transfer and pressure distribution due to two-dimensional repetitive sine wave distortions on flat plate at Mach 20 in helium
[NASA-TN-D-4907] c12 N69-10804
Parametric analysis of surface temperatures and distortions of paraboloidal solar concentrators
[NASA-TN-D-5144] c03 N69-23356

SURFACE ENERGY
Free electron model for electron work functions and number density distributions and surface potentials in metals
c26 A69-29009

SURFACE NAVIGATION
Potential use of satellites for enhancing positioning capabilities and for marine geodetic control
[NASA-CR-1253] c13 N69-16645

SURFACE PROPERTIES
Rhenium-niobium cylindrical thermionic converters with mechanically polished or electroetched emitters, comparing performance
c03 A69-13126
Lunar magnetic moment and surface field, discussing Explorer 35 field measurements
c30 A69-14005
Cross hatching on various body surfaces due to periodic surface pressure fluctuations, discussing origin from counter-rotating longitudinal vortices in boundary layer
[AIAA PAPER 69-11] c12 A69-18213
Albedo over Antarctic, measuring solar radiation reflected by surface and atmosphere by Eppley radiometer
c13 A69-21404
Nonlinear compressible flow problems - half-space of ideal compressible fluid motion due to arbitrary pressure front
[NASA-TT-F-560] c12 N69-27168
Summary of lunar data and scientific observations generated by Surveyor landings on Moon
[NASA-SP-184] c30 N69-36451

SURFACE REACTIONS
Propellant condensation on surfaces near electric rocket exhaust, calculating particle arrival rates, backflow and desorption energies

[AIAA PAPER 69-270] c26 A69-21252
Oxygen depletion effect in chemical reactions between pyrolysis gases and air stream on surface recession of charring ablators
[AIAA PAPER 68-302] c33 A69-21982
Uranyl ions interaction with phospholipid and cholesterol monolayers, using surface pressure and potential measurements
c06 A69-25641
Modes and mechanisms of wear covering adhesive, abrasive and corrosive wear, surface fatigue and fretting corrosion
c15 A69-27231
Dielectric overcoating effects on electromigration Al interconnections, showing dependence on thickness and surface passivation
c09 A69-32889
Quartz fiber adhesion to Re measured in LEED /low energy electron diffraction/ apparatus for clean and O layer surfaces, noting brittle fracture
c17 A69-35182
Satellite-borne experiments of neutral molecular beam-solid surface interactions, describing Molsink chamber, densitometer, sphere and paddlewheel satellites
c24 A69-36182
Quantum theory of particle-harmonic oscillator collision applied to gas-surface interactions at cryogenic temperatures
[NASA-TN-D-4982] c24 N69-14288
Thermal radiation exchange between surfaces and enclosures
[NASA-SP-164-VOL-2] c33 N69-30317

SURFACE ROUGHNESS
Radiation models using discrete radiator ensembles having applications to analysis of forward and backscatter from rough surfaces, clutter and chaff models, etc
c07 A69-10556
Turbulence characteristics up to 150 m above ground, noting surface roughness length directional dependence, longitudinal turbulence spectra and turbulent energy budget
c20 A69-10695
Experimental verification of surface vehicle dynamics
[NASA-CR-1399] c11 N69-37022
Airplane response to ground roughness from three-track runway and taxiway profiles by elevation angle measurements
[NASA-TN-D-5444] c02 N69-38770

SURFACE ROUGHNESS EFFECTS
Turbulence measurements and roughness effects on viscous drag reduction with polymer solution in pipe flow, discussing friction factor, wall velocity profile, etc
c12 A69-33252
Microwave thermal emission by water measured from aircraft, studying radiation dependence on surface roughness
c13 A69-34421
Effect of unit Reynolds number, nose bluntness, angle of attack, and roughness on transition on 5 degree half-angle cone at Mach 8
[NASA-TN-D-4961] c01 N69-14872
Determination of drag of fabrication-type surface roughness in turbulent boundary layer at transonic speeds
[NASA-TN-D-5004] c01 N69-16460

SURFACE TEMPERATURE
Venus atmosphere chemical composition, surface temperature and pressure obtained by Venera 4 and Mariner 5
c30 A69-26129
Heat finite propagation velocity effects on temperature distribution and heat flux for step temperature change at semiinfinite body surface
[ASME PAPER 69-HT-1] c33 A69-43564
Surface temperature mapping with infrared photographic pyrometry for turbine cooling investigations
[NASA-TN-D-5179] c14 N69-23895
Probability calculations for fuel clad surface temperatures of nuclear reactors
[NASA-TM-X-1802] c22 N69-26231

SURFACE VEHICLES
Experimental verification of surface vehicle dynamics
[NASA-CR-1399] c11 N69-37022

SURFACES
Subsonic lifting surface theory including leading edge, discussing singularities in solution of integral equation for determination of aerodynamic properties
[AIAA PAPER 69-37] c01 A69-18167
Three dimensional pressure distribution functions for lifting surfaces with trailing-edge controls based on integral equations for subsonic flow
[NASA-TN-D-5419] c01 N69-38768

SURGES
Analysis and design of inductors for protecting power transistors against current surges in inverter bridge circuits
[NASA-TN-D-4995] c10 N69-16198

SURVEYOR LUNAR PROBES
Summary of lunar data and scientific observations generated by Surveyor landings on Moon
[NASA-SP-184] c30 N69-36451

SURVEYOR 3 LUNAR PROBE
Flight performance evaluation of Atlas Centaur launch vehicle AC-12 carrying Surveyor 3 lunar probe
[NASA-TM-X-1678] c31 N69-10295

SURVEYOR 4 LUNAR PROBE
Systems analysis of Atlas-Centaur AC-11 flight performance for Surveyor 4
[NASA-TM-X-1768] c31 N69-21399

SURVIVAL
Human survival in flight emergencies involving commercial and general aviation aircraft
[NASA-CR-1262] c02 N69-14763

SWAN BANDS
Electronic transition moment for C /Swan/ bands measured in shock tube in carbon dioxide and argon mixtures
c24 A69-12833

SWEAT COOLING
Radiation equilibrium temperature measured downstream of transpiration cooled gas flow near slender cone vertex in continuous flow hypersonic tunnel
c01 A69-43588
Flow reduction due to oxidation of wire-form porous materials for transpiration cooled turbine blades
[NASA-TN-D-5001] c17 N69-16383

SWEEP FREQUENCY
Dynamic tests for air breathing engines using sweep frequency techniques
[NASA-TN-D-5485] c28 N69-39185

SWELLING
Uranium carbides irradiation tests for control of nuclear fuels fission gas swelling
[NAA-SR-12629] c22 N69-22946
Beryllium swelling and replacement in Plum Brook reactor
[NASA-TM-X-1794] c22 N69-26233

SWEPT WINGS
Amplified boundary layer oscillations and transition at swept flat nosed wing attachment line with/without boundary layer suction analyzed by wind tunnel tests
c01 A69-33251

SWINGBY TECHNIQUE
Venus swingby and direct Mercury trajectories analysis for optical imaging from flyby missions
[AAS PAPER 69-258] c30 A69-42860
Interplanetary space trajectories based on Jupiter swingby flights
[NASA-TN-D-5271] c30 N69-28441
Jupiter swingby missions to Saturn, Uranus, Neptune, and Pluto
[NASA-SP-35-PT-8] c30 N69-34850

SYMMETRY
Response of infinite elastic plates to axisymmetric initial velocity distributions with application to hypervelocity impact
[NASA-TN-D-5118] c32 N69-23448
Noise in axisymmetric convergent electron beams
[NASA-TN-D-5212] c10 N69-24918
Restart and high response terminal shock control for axisymmetric mixed-compression inlet with internal contraction
[NASA-TM-X-1792] c28 N69-24938

SYNCHROCYCLOTRONS
Proton beams uniformity available at NASA synchrocyclotron designed for radiation biology research by simulating space radiation

environment
c11 A69-15992
SYNCHRONISM
Mitotic synchronization of fibroblasts with metabolic retardants by chronophotography
[NASA-TN-D-5021] c04 N69-17248
SYNCHRONOUS MOTORS
Motor starting characteristics of two inductor alternators
[NASA-TM-X-1912] c03 N69-40440
SYNCHRONOUS SATELLITES
Multijet electrothermal systems for attitude control and stationkeeping of synchronous communications satellite
[AIAA PAPER 67-723] c28 A69-12375
OMEGA position location equipment /OPLE/ test data to demonstrate feasibility of using OMEGA navigational system in conjunction with synchronous satellites
c21 A69-19135
Solar cell radiation damage during 416.8 days in synchronous orbit on satellite ATS 1, discussing radiation shields
c03 A69-35704
Tracking and Data Relay Satellite System with synchronous orbit satellites to relay data between low altitude earth orbital spacecraft and mission control centers
c07 A69-41755
RFI effects of earth based emitters on operation of geosynchronous satellites for data relay from near earth orbiting satellites, noting frequency assignments
c07 A69-41757
Solar flare and sunspot effects on VHF communications between synchronous satellite relay and ground stations
[NASA-TN-D-5100] c07 N69-23317
SYNCHROTRON RADIATION
Synchrotron and X ray emission generation from upper chromosphere electrons during solar flares
c29 A69-22203
Radio emission from Sco XR-1 shown as synchroton radiation of relativistic electrons in low density region surrounding denser core producing X ray
c30 A69-37334
Synchroton radiation HF cut-off resulting from electrons with anisotropic pitch angle distribution for type 4 solar radio bursts
c29 A69-40577
SYNOPTIC METEOROLOGY
Synoptic analysis of Southern Hemisphere stratosphere
[NASA-TM-X-1814] c13 N69-33555
SYNTHETIC ARRAYS
Mechanical collimator using random aperture arrays for celestial observation at extreme UV and X rays
c14 A69-36489
SYNTHETIC RUBBERS
Stable crack propagation in viscoelastic strip of polyurethane rubber
[NASA-CR-1279] c30 N69-21506
SYSTEM FAILURES
Metal oxide semiconductor integrated circuits, showing failure rates and degradation causes
c09 A69-31851
Failure data role in management of launch operations reliability program
c11 A69-36022
Computer oriented error analysis of electrical circuits and nonlinear system performance
[NASA-TN-D-5112] c10 N69-22919
SYSTEMS ANALYSIS
Stability of time varying systems by construction of multipliers with prescribed phase characteristics
c10 A69-16598
Digital simulation computer stability analysis scheme premised on use of perturbed transient responses
c10 A69-32899
Evaluation method for strapdown spacecraft guidance systems on automated interplanetary missions, using cost and system performance efficiency probability model
[AIAA PAPER 68-828] c21 A69-35953
Space power systems analysis, using computer program to correlate systems characteristics with mission parameters for automated satellite repair vehicle and space stations
c03 A69-42240
Systems analysis of Rankine cycle nuclear-electric potassium space power system using Li cooled fast reactor and high temperature turbine inlet
c22 A69-42266
Systems analysis of Atlas-Centaur AC-11 flight performance for Surveyor 4
[NASA-TM-X-1768] c31 N69-21399
Human transfer functions applied in systems analysis of manually controlled lunar landing simulator
[NASA-TN-D-5478] c05 N69-39183
Quantum communication systems performance evaluated by communication efficiency parameter
[NASA-TR-R-320] c07 N69-39264
Application of control theory to production engineering, transportation systems, urban development, biological oceanography, mass communications, and socio-economic problems
[NASA-SP-211] c34 N69-39957
Modern network theory applications to analysis of complex systems
[NASA-TN-D-5511] c19 N69-40088
SYSTEMS ENGINEERING
Navigation services satellite systems including position determination, communication and telemetry for ships and aircraft
[UN PAPER 68-95363] c21 A69-10479
Nuclear reactor space power system concept using thermionic diodes, heat pipes and rod control, emphasizing neutronic aspects and feasibility
c22 A69-14799
Systems engineering activities in manned space flight involving design, development, manufacture, test and operation of Mercury, Gemini and Apollo flight systems
c31 A69-17602
Interplanetary Pioneer spacecraft development and systems engineering aspects
c31 A69-17605
Astrodynamical data compilation for use by system engineer for mission planning
[AIAA PAPER 69-124] c30 A69-18090
High performance silicon carbide backward diode, discussing device design and operational characteristics
c09 A69-22787
Onboard checkout system concept, discussing philosophy, requirements, underlying considerations, system description, development and techniques of system selection
c11 A69-25081
Spacecraft design for minimization of structure interaction with control system, noting susceptibility of extendible booms to solar environment
c31 A69-25500
Fourth angle driving law for different four gimbal systems used for simulation display and inertial platform isolation
c11 A69-26265
Spaceborne optical telescopes requirements and development including mirror material and construction, optical design, servocontrol, etc
c14 A69-27946
Solar simulator with xenon and krypton lamps designed for thermal balance tests, power conversion and material degradation experiments
c11 A69-30383
Design philosophy for cost reductions on future space transportation systems, exemplifying application to booster system for earth orbital logistics
[AIAA PAPER 69-439] c34 A69-32654
Optimal design for improving thermal performance of existing spacecraft thermally actuated louver system by increasing open-to-closed emittance ratio
[AIAA PAPER 69-627] c33 A69-33269
OGO program failure rate analysis with respect to cost, schedule and performance tradeoffs, considering component and systems design and reliability, prelaunch feedback, etc
c31 A69-34519

Biosatellite attitude control systems design development and flight test results for paylcad perturbing effects, discussing simulation activity c31 A69-35094
Nuclear rocket program status and plans, presenting NERVA reactor and engine system tests [AIAA PAPER 68-610] c22 A69-39219
Model performance index /PI/ providing criterion for approximating one dynamic flight control system by another based on geometrical representation of linear autonomous systems [AIAA PAPER 69-885] c21 A69-39410
Lifting body stability augmentation systems design, development, ground tests and flight data including frequency response, limit cycle and structural resonance [AIAA PAPER 69-887] c02 A69-39413
SDP-3 small serial computer for engineering experiment on IMP spacecraft, discussing design modifications to improve performance c08 A69-41737
Pneumatic driving system for heart assist or total replacement pumps, discussing design features and performance characteristics c05 A69-42983
Design and analysis of modular servoamplifier for fast response electrohydraulic control systems [NASA-TN-D-4898] c03 N69-10068
Effect of variable stator with area design of 70 percent on performance of single stage turbine suitable for air cooling [NASA-TM-X-1696] c28 N69-10296
Synthesis methods for manual aerospace control systems using digital programming and man machine performance data with application to supersonic transport design [NASA-CR-1208] c02 N69-13185
Concepts of acceptance testing lunar and planetary vehicles [NASA-TN-D-4924] c11 N69-14507
Evaluation of computer aids to augment human intellectual capability [NASA-CR-1270] c08 N69-16140
Design and performance of flueric shock position sensor for mixed compression supersonic inlets [NASA-TM-X-1733] c14 N69-16382
Nimbus 2 flight evaluation and engineering report covering launch through orbit 5275 [NASA-TN-D-4881] c31 N69-17851
Design and performance of gas bearing system for turboalternators [NASA-CR-1291] c15 N69-21772
Low pressure application of orbitron and ion gage designs [NASA-CR-1300] c14 N69-28402
Communication and information theories for digital and analog systems design [NASA-TN-D-5472] c07 N69-39176

SYSTEMS STABILITY
Spacecraft wide angle attitude control system stability analysis, using air bearing table simulation [AIAA PAPER 69-856] c31 A69-39384

T

T TAIL SURFACES
Wind tunnel study of deflected elevator flutter encountered on T-tail airplane [NASA-TN-D-5024] c32 N69-16211

TABLES (DATA)
Solar system elements abundance compilation based on carbonaceous chondrites and nucleosynthesis in stars c30 A69-20903
Approximate ionization potentials for high ionization stages of elements with atomic numbers 31 to 92 obtained by binding energy calculations c24 A69-29923
Interferometrically measured wavelengths tabulated for Th lines in 2747-4572 A range, using liquid nitrogen cooled hollow cathode lamp and Fabry-Perot interferometer c23 A69-42150
Data from thermal vacuum tests of flight model spacecraft [NASA-TN-D-4908] c31 N69-14010
Rocket sounding meteorological data of Exametnet for 1966 [NASA-SP-175] c20 N69-16214
Exametnet meteorological rocket launchings and data dissemination, 1967 - tables [NASA-SP-176] c20 N69-22570
Performance data for high tip speed compressor rotor operated with radial and inlet airflow distortions [NASA-TM-X-1798] c01 N69-26312
Tables and graphs of functions for solving nonlinear constant area fin one dimensional heat transfer problem [NASA-TN-D-5173] c33 N69-26975
Model environment of inner belt proton fluxes [NASA-SP-3024-VOL-5] c24 N69-28911
Pressure distributions for blunt body wind tunnel models at supersonic speeds and angles of attack from 0 to 15 degrees [NASA-TN-D-5392] c01 N69-35300
FORTRAN program for computation of finite group tables [NASA-TN-D-5402] c08 N69-35569
Thermochemical data from simulated pyrolysis gas flow through ablating char layer [NASA-TN-D-5464] c33 N69-38271
Tabular and graphical data on thermal radiative properties for dissemination [NASA-CR-1431] c33 N69-40455
Aerodynamic pressure distribution on semispan tilting wing-propeller combination of V/STOL aircraft [NASA-TN-D-5481] c01 N69-40876

TACTILE DISCRIMINATION
Human perception of multiple-point tactile and visual stimuli [NASA-CR-1389] c05 N69-39211

TAIL ASSEMBLIES
Aerodynamic characteristics of COIN aircraft model with boundary layer control on inverted V-tail [NASA-TN-D-4856] c02 N69-10935
Factors affecting flat spin characteristics of fighter aircraft with horizontal tail surfaces [NASA-TN-D-5409] c02 N69-36807

TAKEOFF
Optimum takeoff and climbout trajectory calculation technique for jet aircraft noise abatement [NASA-TN-D-5182] c02 N69-26194

TANTALUM
Fabrication of counterflow double wall tantalum-stainless steel mercury boiler [NASA-TN-D-5092] c33 N69-23707

TANTALUM ALLOYS
Solubility of oxygen in tantalum determined by resistivity technique [NASA-CR-1276] c17 N69-19886
Creep rate equations for refractory metal alloys of tantalum molybdenum, and columbium [NASA-TN-D-5424] c17 N69-36653
Mechanical behavior of tantalum T-111 alloy at high temperatures and ultrahigh vacuum [NASA-CR-1436] c17 N69-36831

TARGET RECOGNITION
Luminescence effects on apparent size and shape of foveally fixated targets of various forms c04 A69-36458

TARGET THICKNESS
Aluminum double sheet target penetration resistance determined by studying high velocity pyrex glass impact effects on front/rear sheets and spacing [AIAA PAPER 69-375] c32 A69-28305

TARGETS
Responsiveness of three axis, large angle attitude control systems of highly maneuverable spacecraft capable of tracking time-varying target attitudes [NASA-TN-D-4896] c30 N69-10756
Crater characteristics of 11 metal alloys under hypervelocity impact including effects of projectile density and target temperature [NASA-TN-D-5135] c32 N69-22994

TASK COMPLEXITY
Displays and controls requirements in manned spacecraft to integrate man into vehicle system, noting man capability for task diversity c14 A69-19968

Human information processing rates during one and two axis compensatory tracking tasks with secondary auditory task
c05 A69-23880
TASKS
Practice and operator work load effects on acquisition and performance of code transformation /COTRAN/ task
[NASA-CR-1261] c05 N69-14345
TAYLOR INSTABILITY
Cylindrical bubbles stability in vertical pipes from photographs, describing wake, spacing, pressure pulsations and convection cells effects
[ASME PAPER 69-HT-28] c33 A69-43540
TECHNOLOGY UTILIZATION
Aerospace technology role in economic and social benefits
[UN PAPER 68-95321] c34 A69-10467
Space applications program including communications and navigation meteorology, earth resources survey and geodesy
[UN PAPER 68-95437] c34 A69-10472
NASA Technology Utilization Program, discussing information dissemination
[UN PAPER 68-95313] c34 A69-10512
NASA Space Application Program strategy, discussing research and development trend toward complexity, versatility and multidisciplinary use of larger spacecraft
c30 A69-13427
Photovoltaic solar cell power technology application to space use and exploration
[ASME PAPER 68-WA/SOL-1] c03 A69-16158
Manned space flight programs, discussing U.S. technological, scientific and practical contributions
c30 A69-17074
Refractory metal alloys metallurgy and technology - Conference, Washington, D. C., April 1968
c17 A69-18790
Spaceborne optical telescopes requirements and development including mirror material and construction, optical design, servocontrol, etc
c14 A69-27946
Aeromedical developments by NASA biomedical applications program applied to general medical equipment including cardiac sensors, surgical sterilization, ballistocardiograph, etc
c34 A69-32430
Commercial utilization of space - Conference, Dallas, May 1967
c30 A69-34043
Commercial utilization of space technology, discussing cost reduction and role of NASA Apollo Program
c30 A69-34044
Space, technology and society - Conference, Cocoa Beach, Florida, March 1969, Volume 2
c34 A69-35055
Space, technology and society - Conference, Cocoa Beach, Florida, March 1969, Volume 1
c34 A69-35070
Space exploration influence on science education, showing NASA instructional materials for teachers in biology, chemistry, physics, mathematics, industrial arts, etc
c34 A69-35077
NASA technology utilization program for civilian economy benefit, discussing scientific and technical documentation and transfer across industrial, disciplinary and regional boundaries
c34 A69-35105
Nuclear rocket program status and plans, presenting NERVA reactor and engine system tests
[AIAA PAPER 68-610] c22 A69-39219
Application of NASA mathematical management models and systems analyses in private industry and economy
[NASA-SP-5048] c34 N69-10662
Selected conference papers on NASA technology utilization for electric power industry
[NASA-SP-5057] c03 N69-12575
Metallurgy, behavior, and application of 18 percent nickel maraging steels
[NASA-SP-5051] c17 N69-14193
Technology utilization of induction heating systems up to 5800 deg F
[NASA-SP-5071] c03 N69-23643
Air pollution monitoring instrumentation developed for aerospace uses surveyed for industrial applications
[NASA-SP-5072] c14 N69-24751
Survey of incompressible and compressible fluid film hydrostatic and hydrodynamic lubrication
[NASA-SP-5058] c15 N69-28592
Technology transfer and utilization - bibliography
[NASA-CR-1355] c34 N69-28868
Technology utilization by industries of aerospace sciences and systems - conferences
[NASA-SP-5075] c34 N69-31946
Indexed and abstracted references to reports and articles on management available in NASA information system
[NASA-SP-7500/03/] c34 N69-32430
TECTONICS
Origin and terrestrial relief of continents and oceans
[NASA-TT-F-533] c13 N69-29491
TEFLON (TRADEMARK)
Proton induced voltage breakdowns in polymeric materials
[NASA-TM-X-1688] c18 N69-10066
TEKTITES
Tektite origin theories, discussing Surveyor experiments effects on lunar geology and Tektite origin
c30 A69-40086
Rb-Sr isotope patterns in tekites from Southeast Australian strewn field, studying Rb volatilization role in Rb-Sr isochron production
c13 A69-41342
Ivory Coast microtektites chemical composition from electron microprobe analysis
c30 A69-41351
TELECOMMUNICATION
Communications - IEEE Conference, Boulder, June 1969
c07 A69-42500
Relationship between complex covariance and covariances of envelopes of Rician fading communication channels
[NASA-TN-D-4825] c07 N69-11011
Requirement estimates and performance predictions for Martian television experiment onboard spacecraft in three point-mass descent trajectories
[NASA-TN-D-5062] c14 N69-17944
Summary of operation, communications, and other experiments of Relay 2 satellite
[NASA-SP-151] c31 N69-21065
Communication and information theories for digital and analog systems design
[NASA-TN-D-5472] c07 N69-39176
TELEMETRY
Telemetering - Conference, Los Angeles, October 1968
c07 A69-19092
Multifunction Receiver System rationale, concepts, background requirements and technical justifications for tracking, telemetry and ranging data acquisition by Goddard Center
c07 A69-19101
Double sideband suppressed carrier FM telemetry system as airborne data recorder, discussing noise, environmental conditions, laboratory and flight tests
c07 A69-19132
FM/AM telemetry circuits with three axis piezoelectric accelerometer for measurements during impact tests of soft landing models
c07 A69-23279
Space electronics, telemetry, antennas, computers - IEEE Conference, Cocoa Beach, Florida, November 1968
c07 A69-25288
Single channel pressure telemetry unit for chronic implantation into cardiac chambers or major blood vessels in unrestrained animals for measuring ventricular pressure
c05 A69-25642
Optical carrier single channel telemetry system providing complete electrical isolation between shock tube data acquisition and data recording instrumentation
c14 A69-29561
Tracking and data acquisition systems for spacecraft and ground link through command,

telemetry and tracking, noting data relay satellites, etc
c07 A69-33371
Telemetering - IEEE Conference, Washington, D.C., April 1969
c07 A69-36237
Backfire antenna radiation characteristics and physical dimensions for tracking and telemetry applications, including five element array model
c07 A69-36251
Telemetry data processing, describing designation, tasks and possibilities of data reduction laboratory attached to NASA Goddard Space Flight Center
c11 A69-40352
Telemetering - Conference, Washington, D.C., September 1969
c07 A69-41734
Programmable data handling and telemetry systems for scientific satellites, noting system checkout, spacecraft integration, software and ground data processing
c08 A69-41735
Digital telemetry link coding as English language analogy, developing block code scheme combining bit, word and block error detection and correction methods
c07 A69-41745
Telemetry data from image-motion compensation sensor on Lunar Orbiter 1 spacecraft for determining radius of moon
[NASA-TN-D-5231] c30 N69-29115

TELEVISION CAMERAS
Rocket trajectory determination by tracking onboard light source against star background with image orthicon TV system
c07 A69-26965
Image dissector meteorological cameras, discussing ATS-3 and Nimbus systems, high resolution camera and multispectral cameras
c14 A69-35101
Visual simulation image generation using flying spot scanner
[NASA-TN-D-5151] c11 N69-23194

TELEVISION TRANSMISSION
Optimizing spacecraft televisions for successive picture overlapping and maximum surface resolution during planetary descent
[NASA-TN-D-5061] c14 N69-17259
Requirement estimates and performance predictions for Martian television experiment onboard spacecraft in three point-mass descent trajectories
[NASA-TN-D-5062] c14 N69-17944

TELLURIDES
Thermal stability and friction of disulfides, diselenides, and ditellurides of molybdenum and tungsten in ultrahigh vacuum
[NASA-TN-D-5141] c15 N69-22992

TEMPERATURE CONTROL
Electron emitter cooling and plasma heating of thermionic converters noting effects of plasma density, diode spacing, etc
c03 A69-13127
Explorer 40 satellite mathematical model and verification testing for close spacecraft flight temperature predictions
[SAE PAPER 690202] c33 A69-18305
High power TWT tube cooling in space vehicle, discussing thermal control system based on heat pipe radiator
c09 A69-24747
UV irradiation effects on ZnO spacecraft thermal control coating pigments, discussing photo-Hall, luminescence and electron paramagnetic resonance measurements
[AIAA PAPER 69-639] c18 A69-33288
Second surface mirror used as coating for spacecraft thermal control
c33 A69-37290
Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion
[AIAA PAPER 69-979] c33 A69-40359
Thermal control coatings, windows and mirrors for 1973 Mars Viking Lander vehicles under simulated Martian surface conditions
[AIAA PAPER 69-1023] c11 A69-40393
Aluminized plastic covers to reduce radiator sink temperatures on lunar surface
[NASA-TM-X-1729] c03 N69-17225
Evaluation of double wall balloon enclosure for thermal control of inertial satellites
[NASA-TN-D-5230] c33 N69-28209
Heat pipe devices for space suit temperature control
[NASA-CR-1400] c05 N69-38491

TEMPERATURE DISTRIBUTION
Scaled solar and gray-body temperature distribution models compared to determine stellar atmosphere
c30 A69-14626
Electron, ion and neutral particle temperatures of upper atmosphere
c13 A69-14975
Atmospheric models for exospheric temperatures of Mars and Venus based on photoionization heating efficiency
c30 A69-26020
Periodicity of magnetothermal oscillations in pressure annealed pyrolytic graphite compared with hole carriers
c26 A69-29005
Dynamical effects in structure of H II equilibrium region left behind expanding ionization front, showing temperature as function of distance from star
c30 A69-35966
Instantaneous frozen layer thickness and temperature profile in solidified layer obtained by iteration technique
c33 A69-39433
Heat finite propagation velocity effects on temperature distribution and heat flux for step temperature change at semiinfinite body surface
[ASME PAPER 69-HT-1] c33 A69-43564
Simple equations for temperature distributions in radiating gray gases
[NASA-TN-D-5226] c33 N69-25312
Transient temperature fields in porous shell walls cooled by forced flow
[NASA-TT-F-552] c33 N69-30245

TEMPERATURE EFFECTS
Temperature dependent isomer shift and anharmonic binding of Sn 119 in niobium stannide, measuring Mossbauer recoil free fraction
c26 A69-10009
Pressure and temperature dependence of slow crack growth in hardened steel in gaseous hydrogen environment
c17 A69-10612
Ball bearing test apparatus for evaluation of greases and solid lubricants at high temperatures
[ASLE PREPRINT 68AM 7C-2] c15 A69-10912
Organic dye laser frequency variation with temperature, noting absorption and fluorescence spectra
c16 A69-12617
Rhenium Nb cylindrical thermionic converter, measuring efficiency and power density in emitter temperature range 1600-2050 K and collector temperature range 873-1173 K
c03 A69-16359
Electron radiation damage in MOSFET devices using bias temperature treatments
c26 A69-16877
Venus atmosphere origin, discussing high temperature effects and chemical composition via space probe and terrestrial observations
c30 A69-23183
Reaction rate constants of ion-molecule interchange reaction as function of temperature, flow velocity, activation energy and constant part of steric factor P
c06 A69-32312
Al interconnections discontinuities at integrated circuit contact windows observed by scanning electron microscope, noting catastrophic failure and Si presence
c09 A69-32893
Creep rate-stress-temperature relations for powder metallurgy rhenium, discussing activation energy
c17 A69-34186
Temperature and pressure effect on cobalt base alloy cavitation in liquid sodium, using vibratory apparatus and loss rate contour

diagram
c17 A69-35184
Mechanical properties associated with 55-Nitinol memory effect, presenting stress-strain and electrical resistivity as function of temperature
c17 A69-35523
Unfilled Pyrrone prepared from powder into molded parts for flexural tests at elevated temperatures observed for stability to electron irradiation in air
c18 A69-35529
Ablative materials thermal protection characteristics at low heating rates evaluated by convective heating tests, stressing polyurethane foam composite
c18 A69-35536
Dilute solution of He 3 in He 4 near absolute zero measured for viscosity, showing temperature effect
c23 A69-39582
Pressure measurements and gas flow analysis during thermal vacuum tests of manned spacecraft indicating adequate space vacuum simulation
[AIAA PAPER 69-1033] c11 A69-40401
Flow analysis to determine turbine efficiency as function of inlet temperature for two stage turbine
[NASA-TM-X-1728] c01 N69-17392
Compatibility tests of molten uranium with tungsten and tungsten-1.5 percent hafnium
[NASA-TN-D-5076] c17 N69-19930
Measurement of radiative thermal conduction of ideal powder as function of temperature
[NASA-TN-D-5063] c33 N69-20008
Effects of temperature and electrolyte concentration on performance of fuel cell
[NASA-TN-D-5154] c03 N69-22940
Effect of temperature and pressure on cavitation damage to cobalt base alloy in sodium
[NASA-TN-D-5273] c17 N69-28863
Load and temperature effects on fatigue strength of notched titanium alloy sheet for supersonic transport operation
[NASA-TN-D-5294] c32 N69-29607
Fluid temperature effect on cavitation performance of axial flow pump
[NASA-TN-D-5318] c15 N69-30069
Hydrogen gas pressure requirements during pressurization and transfer of liquid hydrogen from spherical tanks
[NASA-TN-D-5387] c28 N69-33211
Large thin film cadmium sulfide solar cell electrical characteristics over ranging temperatures and radiant intensities
[NASA-TM-X-1899] c03 N69-38767
Influence of thermal distortion of booms on attitude of gravity stabilized satellites
[NASA-TN-D-5435] c31 N69-40781

TEMPERATURE GRADIENTS
Lower solar corona composition changes due to pressure and thermal gradients calculated with multicomponent diffusion equations
c30 A69-33059
Thermal outgassing tests on epoxy impregnated magnet coil
[NASA-TM-X-1813] c18 N69-28203
Surface tension, viscosity, and density of fluorocarbon solvents as function of temperature
[NASA-TM-X-1862] c18 N69-34134

TEMPERATURE INVERSIONS
Photospheric radiation field role in temperature inversion of stellar chromospheres with dominant H ion opacity, postulating mechanical energy dissipation
c30 A69-38173

TEMPERATURE MEASUREMENT
Radiation compensating thermocouple for gas temperature measurement, noting advantage over single thermocouples
c14 A69-14916
Midlatitude neutral thermosphere density and temperature measurements, noting effect of atomic oxygen adsorption by instruments
c13 A69-16268
Ion temperature diurnal variations at 250-475 km obtained from Thomson scatter spectra
c13 A69-16407
Pressure and temperature surveys of Mach 27-47 nozzle boundary layer at Ames M-50 He tunnel, determining velocity profiles, wall friction coefficient, etc
[AIAA PAPER 69-686] c12 A69-33441
Thermal calculations of objects near lunar surface, considering IR emission directivity effects
c30 A69-43254
Radiation equilibrium temperature measured downstream of transpiration cooled gas flow near slender cone vertex in continuous flow hypersonic tunnel
c01 A69-43588
Electron beam technique of measuring molecular rotational and vibrational temperatures of nitrogen in hypersonic tunnel using air as test gas
[NASA-TN-D-4892] c33 N69-10932
Error analysis of input noise temperature measurements of low noise amplifiers
[NASA-TN-D-4997] c07 N69-16162
Surface temperature mapping with infrared photographic pyrometry for turbine cooling investigations
[NASA-TN-D-5179] c14 N69-23895
Turbulent boundary layer temperature and velocity measurements in supersonic water-cooled conical nozzle
[NASA-TN-D-5377] c12 N69-33353

TEMPERATURE MEASURING INSTRUMENTS
Telemetry technique utilizing thermocouple sensors for base heating determinations on free flight blunt cone in shock tunnels, noting electrical noise reduction
[AIAA PAPER 68-407] c14 A69-15514
Fluidic type temperature sensor for total temperature measurement for hypersonic aircraft in atmosphere
c14 A69-16755

TEMPERATURE PROBES
Thermodielectric radiometer for transient radiant flux short duration pulse measurement, using thermally induced depolarization of polymer film dielectric
[AIAA PAPER 68-403] c14 A69-12392

TEMPERATURE PROFILES
Combined radiation and conduction heat transfer equation applied to temperature profile around opaque hollow sphere and in solid condensed gas layer
[SAE PAPER 690197] c33 A69-18303
Sealed and unsealed relay coils temperature rise at simulated outer space air pressure levels
c09 A69-28048
Nonlinear least squares optimization program applied to atmospheric temperature sounding, solving for temperatures at various altitudes from simulated carbon dioxide intensity measurements
c13 A69-33156
Temperature profiles and associated wind profiles obtained with Jimsphere/FPS-16 radar system at Cape Kennedy, discussing remote CAT detector assessment
c20 A69-33739
Thermosphere temperature shape parameters from probe flights, showing dependence on hour angle
c13 A69-38088
Comparisons of wind and temperature data obtained by Japanese MT-135 and American ARCAS meteorological rocket systems in closely spaced launchings
[NASA-TM-X-1726] c20 N69-17772

TEMPERATURE SENSORS
Fluidic type temperature sensor for total temperature measurement for hypersonic aircraft in atmosphere
c14 A69-16755
Error analysis of high resolution balloon-borne temperature sensor and comparison of temperature data with simultaneous rawinsonde measurements
c14 A69-21642
Spacecraft solar cell near-maximum power operation by tracking optimum value with array temperature sensor
c03 A69-42303

TENSILE PROPERTIES
Polymer films tensile properties after exposure to

gamma radiation in vacuum, noting chain scission and cross linking
[ASME PAPER 68-WA/RP-6] c18 A69-16160
Strain-rate sensitivity of three titanium-alloy sheet materials after prolonged exposure to high temperature
[NASA-TN-D-4981] c17 N69-14873
Tensile properties and creep strength of aluminum alloys
[NASA-TN-D-5010] c17 N69-19203
Tensile and cyclic fatigue properties of graphite filament-wound pressure vessels at ambient and cryogenic temperatures
[NASA-TN-D-5354] c32 N69-31300
Salt stress corrosion cracking effects on tensile and stress rupture properties of titanium alloy sheet
[NASA-TN-D-5417] c17 N69-36221
Effects of reactor irradiation at cryogenic temperatures on tensile properties of titanium and titanium-base alloys
[NASA-TN-D-5442] c17 N69-37436

TENSILE STRENGTH
Failure criteria for predicting filamentary composite strength under uniaxial and combined stresses from properties and fabrication process considerations
c32 A69-21479
Graphite fiber NOL rings and biaxial wound pressurized cylinders tested at ambient and cryogenic temperatures for tensile and cyclic fatigue properties
c18 A69-35521
Size effect on tensile strength of polycrystalline nickel wires
[NASA-TN-D-4884] c17 N69-10226
Physical properties of near stoichiometric nickel-titanium alloy Nitinol and some structural-mechanical applications employing these properties
[NASA-CR-1232] c17 N69-11420
Theory and test results of tensile strength of epoxy rings and belts reinforced by boron filaments
[NASA-TN-D-5053] c18 N69-19918
Stress rupture and tensile properties of refractory metal wires at 2000 and 2200 deg F
[NASA-TN-D-5139] c32 N69-22823

TENSILE STRESS
Displacements and stress intensity as function of crack length for compact tension specimen, considering load line and crack edge
c15 A69-21392
Tensile properties and creep strength of aluminum alloys
[NASA-TN-D-5010] c17 N69-19203

TENSILE TESTS
Dynamic strain aging during creep and tensile tests of molybdenum-titanium-carbon alloys
[NASA-TN-D-5169] c17 N69-22993

TENSOR ANALYSIS
Suboptimal estimator to Kalman filter containing scalar weighting factors
[NASA-TN-D-5082] c10 N69-21123

TERMINAL BALLISTICS
Aluminum double sheet target penetration resistance determined by studying high velocity pyrex glass impact effects on front/rear sheets and spacing
[AIAA PAPER 69-375] c32 A69-28305
Pegasus and Explorer 23 detector panels calibrated by determining particle perforation mass and velocity
[NASA-TR-R-321] c14 N69-36985

TERMINAL FACILITIES
Remote information retrieval facility description
[NASA-CR-1318] c08 N69-23381

TERMINAL GUIDANCE
Manual procedures for midcourse and terminal guidance, discussing onboard optical measurements and calculations
c21 A69-35792

TERMINAL VELOCITY
Entry and terminal deceleration systems for unmanned Martian landers, discussing parachute landing and lifting entry vehicles
[AIAA PAPER 68-1147] c31 A69-13670

TERRAIN ANALYSIS
Gemini program for geologic orbital photography, discussing equipment used
c13 A69-35274

TEST CHAMBERS
Hydraulic-powered self propelled six degree of freedom loading vehicle moving tests assembly to test chamber with high accuracy positioning
c11 A69-38181

TEST EQUIPMENT
Ball bearing test apparatus for evaluation of greases and solid lubricants at high temperatures
[ASLE PREPRINT 68AM 7C-2] c15 A69-10912
EEG monitor helmet for aircraft or flight simulator programs, discussing sensing and transmitting system
c05 A69-26553
Hydraulic-powered self propelled six degree of freedom loading vehicle moving tests assembly to test chamber with high accuracy positioning
c11 A69-38181

TEST FACILITIES
NASA Plum Brook Reactor Facility /PBRF/ for determining radiation tolerance to support nuclear power application in space for propulsion and power
c22 A69-13128
Heating facility for testing ablative heat shield material models in combined convective and radiative heating environment with constant or transient heating conditions
[AIAA PAPER 69-342] c11 A69-28278
On-line central data processing system connected to time shared computer for recording data from test facilities, discussing hardware configuration, software considerations and advantages
c08 A69-33106
Telemetry data processing, describing designation, tasks and possibilities of data reduction laboratory attached to NASA Goddard Space Flight Center
c11 A69-40352
Vacuum integrating sphere for measuring solar absorptance in space environment to determine thermal control coatings qualifications
[AIAA PAPER 69-1021] c11 A69-40392
Concepts of acceptance testing lunar and planetary vehicles
[NASA-TN-D-4924] c11 N69-14507
High enthalpy arc tunnel at Langley Research Center for simulating aerodynamic heating and forces during spacecraft reentry
[NASA-TN-D-5295] c11 N69-29981

TEST FIRING
Development and test firing of improved igniter for first stage retrorockets of Atlas Centaur launch vehicle
[NASA-TM-X-1676] c28 N69-13275
Rocket engine evaluation of erosion and char as functions of fabric orientation for silica reinforced nozzle materials
[NASA-TM-X-1721] c28 N69-15475

TEST STANDS
Test facilities and techniques for low speed flight problems of aircraft handling qualities, stability, control and performance
c11 A69-15575

TEST VEHICLES
Monte Carlo method for estimating costs and optimal testing of Explorer size spacecraft
[NASA-TN-D-5283] c34 N69-31333

TETHERED BALLOONS
Aerostatic and aerodynamic characteristics of Dart Vee tethered balloon system
c02 A69-40813

TETRODES
Four terminal silicon planar p-n-p-n model operating as semiconductor small signal linear tetrode amplifier, discussing properties and mathematical models
c09 A69-35293

TEXTBOOKS
Theory and practice of aircraft navigation - textbook
[NASA-TT-F-524] c21 N69-17788

THEOREM PROVING
Shape preserving expansion and contraction of objects in E 3
[NASA-TN-D-5240] c19 N69-31303

THEORIES
Flutter investigation at Mach 3 of rotationally restrained panels and comparison with theory
[NASA-TN-D-5508] c32 N69-40087
Modern network theory applications to analysis of complex systems
[NASA-TN-D-5511] c19 N69-40088

THERMAL ABSORPTION
Solar absorptances and spectral reflectances of metals
[NASA-TN-D-5353] c17 N69-31895

THERMAL BOUNDARY LAYER
Inlet thermal boundary layer thickness effect on conical nozzle heat transfer and boundary layer determined by operating nozzle with cooled/uncooled inlet
[AIAA PAPER 69-474] c33 A69-32780

THERMAL CONDUCTIVITY
Subject classification bibliography for thermal contact resistance
[ASME PAPER 68-WA/HT-18] c33 A69-16122
Thermal contact resistance measurement at various ambient pressures compared with theoretical predictions with each parameter analyzed over interface by computer program
[AIAA PAPER 69-629] c33 A69-33299
Viscosity, thermal conductivity and diffusion predicted for dilute nonpolar, polar and mixed gases, discussing methods for rotational relaxation collision numbers and resonant correction
c33 A69-38951
Line source technique for ablative heat shield materials thermal conductivity measurements, comparing vacuum and atmospheric test results
[AIAA PAPER 69-1013] c11 A69-40386
Transient thermal analysis and structural analysis for synthesis of ablating thermostructural panels in planetary entry environment
[NASA-CR-1215] c32 N69-16114
Thermodynamic and transport properties of air, and combustion products of natural gas and air, and jet engine fuel and air
[NASA-TN-D-5452] c33 N69-37936

THERMAL CYCLING TESTS
Thermal cycling tests showing improvement in cadmium sulfide solar cell stability, noting effect of thermal cycling stresses
c03 A69-13074
Crack initiation prediction in high temperature components subjected to arbitrary thermal-mechanical cycling
c32 A69-28252

THERMAL DEGRADATION
Oxygen concentration effects on ester lubricant degradation during high temperature bearing test
[NASA-TN-D-5262] c15 N69-26311

THERMAL DIFFUSIVITY
Thermal and dielectric properties of homogeneous moon based on microwave and infrared temperature observations
[NASA-TM-X-1734] c30 N69-17815

THERMAL EMISSION
Far IR source in galactic center detected at 100 microns, noting thermal emission of interstellar dust grains as possible mechanism
c30 A69-22264
Thermal and free-free emission from planetary nebulae based on graphite grain model, discussing IR fluxes
c30 A69-27158
Microwave thermal emission by water measured from aircraft, studying radiation dependence on surface roughness
c13 A69-34421

THERMAL ENERGY
Microscale fluctuations in interplanetary magnetic field, considering proton thermal energy and magnetic field energy densities
c30 A69-24100

THERMAL ENVIRONMENTS
Saturn fireball thermal environment associated with liquid propellant explosions, using analytical model
c27 A69-14475
Optimal design for improving thermal performance of existing spacecraft thermally actuated louver system by increasing open-to-closed emittance ratio
[AIAA PAPER 69-627] c33 A69-33269
Orbiting Astronomical Observatory thermal test and evaluation program, discussing equipment and role in experimental design
[AIAA PAPER 69-995] c11 A69-40373
Disk radiometer for use in space vacuum-thermal environmental studies
[NASA-TN-D-4925] c14 N69-13311
Ablation behavior of heat shield of Apollo command module over wide range of thermal environments
[NASA-TM-X-1778] c33 N69-22933
Initial radio frequency gas heating experiments to simulate thermal environment in nuclear light bulb reactor
[NASA-CR-1311] c22 N69-23450
Thermal, acoustical, and acceleration environments of XB-70 airplane crew compartment in airworthiness tests
[NASA-TN-D-5449] c25 N69-38010

THERMAL EXPANSION
Zero thermal expansion composites of high strength and stiffness
[NASA-CR-1324] c32 N69-24876

THERMAL FATIGUE
Crack initiation prediction in high temperature components subjected to arbitrary thermal-mechanical cycling
c32 A69-28252
Oxidation resistance and thermal fatigue cracking of nickel and cobalt base alloys in transonic gas streams
[NASA-TN-D-5376] c17 N69-33307

THERMAL INSTABILITY
Electrothermal instabilities for explanation of MPD arc thrustor rotating spoke phenomenon, noting agreement with experimental results
[AIAA PAPER 69-231] c28 A69-21254
Pressure and velocity coupling effects on combustion stability in solid propellant burning
[NASA-TN-D-5395] c33 N69-34892

THERMAL INSULATION
Lightweight polyurethane insulation for liquid hydrogen tanks of space vehicles
[NASA-TN-D-5114] c18 N69-20790

THERMAL NEUTRONS
Thermal neutron flux perturbations in cylinders in test reactors, using regression analysis to obtain polynomials for flux perturbation, depression, self shielding factors, etc
c22 A69-38274
Thermal neutron capture cross section at high temperature irradiations determined for W 184, describing radiochemical separation and flux counting techniques
c14 A69-43192
Prediction of thermal neutron flux perturbation effects in cylinders during irradiation tests
[NASA-TN-D-4949] c22 N69-14481

THERMAL NOISE
Error analysis of input noise temperature measurements of low noise amplifiers
[NASA-TN-D-4997] c07 N69-16162

THERMAL PLASMAS
Wave fields and coupling of RF power to ion cyclotron waves in finite length thermal collisional plasma column
c25 A69-13114
Earth thermal plasmasphere contraction subsequent to solar flare obtained from ion mass spectrometers on OGO satellites
c13 A69-23777
Suprathermal electron flux in lower latitudes and polar region analyzed from measurements by retarding potential analyzers on Explorer 31 satellite
c29 A69-37880

THERMAL PROTECTION
Apollo thermal protection system, noting low density ablation, flight and ground tests
[AIAA PAPER 68-1142] c31 A69-13558
Entry corridor thermal entry limits for Apollo spacecraft defined for design of thermal protection system
[AIAA PAPER 68-1144] c31 A69-13673
Collection of papers on thermal design principles of spacecraft and entry bodies
c33 A69-34372
Ablative materials thermal protection characteristics at low heating rates evaluated

by convective heating tests, stressing polyurethane foam composite
c18 A69-35536
Polyurethane foam composites for low heating rate thermal protection, noting astroquartz fiber additive effect on performance
c18 A69-39236
IR directional and hemispherical emittance of spacecraft thermal control coatings, comparing values determined by various measurement techniques
c14 A69-41633
Shadow shields for thermal protection of cryogenic tanks in space
[NASA-TN-D-4887] c33 N69-10420
Thermal analysis of shadow shields and structural members in space environment
[NASA-TN-D-4876] c33 N69-10473

THERMAL RADIATION
Solar absorptance, total hemispherical emittance and absorptance/emittance ratio for metals at cryogenic temperatures measured simultaneously with sinusoidally perturbed incident radiation
c33 A69-10847
Solar absorptance and hemispherical emmitance of metals at space conditions determined with cyclic incident radiation technique
[AIAA PAPER 69-60] c17 A69-18154
Gamma heating rate measured by aqueous dosimeter converted to rate in thin tungsten detector in water shield through transport theory calculations, obtaining correction factors
c22 A69-18825
Iron line absence in emission spectrum of thermal X ray sources, constraining proposed thermal models
c29 A69-22231
Microwave thermal emission by water measured from aircraft, studying radiation dependence on surface roughness
c13 A69-34421
Lunar surface thermal radiation incident on unit area flat surface located at variable distance and orientation above moon, considering diffusion effects
c30 A69-38973
Computer program for computation of thermal radiation heat loads and temperatures of spacecraft orbiting planets or moon
[NASA-TR-R-278] c30 N69-14428
Thermal radiation exchange between surfaces and enclosures
[NASA-SP-164-VOL-2] c33 N69-30317
Tabular and graphical data on thermal radiative properties for dissemination
[NASA-CR-1431] c33 N69-40455

THERMAL RESISTANCE
Subject classification bibliography for thermal contact resistance
[ASME PAPER 68-WA/HT-18] c33 A69-16122

THERMAL SHOCK
Boron nitride and boron nitride composite under high temperatures in air and vacuum for various time periods, discussing thermal shock and oxidation resistance
c18 A69-36208
Restart and high response terminal shock control for axisymmetric mixed-compression inlet with internal contraction
[NASA-TM-X-1792] c28 N69-24938
Thermal shock cycling of Kapton, copper, and molybdenum thin film cadmium sulfide solar cell
[NASA-TM-X-1819] c03 N69-29555

THERMAL SIMULATION
Handbook of solar simulation for thermal vacuum testing, discussing space environment, thermal control coatings, radiation sources, optical components, etc
c11 A69-38894

THERMAL STABILITY
Second breakdown and other thermal instabilities analyzed by heat flow equation, obtaining stability criteria predicting reduced power dissipation for transistor at low currents
c09 A69-31618
Electron temperature instabilities in entrance region of magnetohydrodynamic generator
[NASA-TM-X-1761] c25 N69-20875
Thermal stability and friction of disulfides, diselenides, and ditellurides of molybdenum and tungsten in ultrahigh vacuum
[NASA-TN-D-5141] c15 N69-22992
Cyclic heating and thermal shock effects on hafnia stabilized with calcia, magnesia, and yttria
[NASA-TN-D-5279] c18 N69-34547

THERMAL STRESSES
Directional solar thermal field /sunlight/ effect on coupled nonplanar transverse and torsional vibrations of satellite cylindrical antennas in orbit
c32 A69-25534
Creep rupture data for predicting thermal fatigue cracking of turbine blades or disks
[NASA-TN-D-5489] c32 N69-39393
Influence of thermal distortion of booms on attitude of gravity stabilized satellites
[NASA-TN-D-5435] c31 N69-40781

THERMAL VACUUM TESTS
Thermal Vacuum /TV/ manned test operations related to Apollo lunar module in simulated space environment
c05 A69-30394
Manned testing of EVA equipment in thermal-vacuum environment for qualification of Apollo extravehicular mobility unit, using lunar surface thermal simulator
[AIAA PAPER 69-992] c05 A69-40370
Line source technique for ablative heat shield materials thermal conductivity measurements, comparing vacuum and atmospheric test results
[AIAA PAPER 69-1013] c11 A69-40386
Pressure measurements and gas flow analysis during thermal vacuum tests of manned spacecraft indicating adequate space vacuum simulation
[AIAA PAPER 69-1033] c11 A69-40401

THERMIONIC CATHODES
Physical model for behavior of thermionic arc spots on MHD generator cathode
[NASA-TN-D-5414] c25 N69-35732

THERMIONIC CONVERTERS
Kinetic theory model of plasma sheath transition, analyzing sheath structure in unignited mode of thermionic converter
c03 A69-13125
Rhenium-niobium cylindrical thermionic converters with mechanically polished or electroetched emitters, comparing performance
c03 A69-13126
Electron emitter cooling and plasma heating of thermionic converters noting effects of plasma density, diode spacing, etc
c03 A69-13127
Rhenium Nb cylindrical thermionic converter, measuring efficiency and power density in emitter temperature range 1600-2050 K and collector temperature range 873-1173 K
c03 A69-16359
Thermionic conversion - Conference, Framingham, Mass., October 1968
c03 A69-21806
Thermionic converters with chloride and fluoride vapor deposited tungsten emitters, comparing performance characteristics and stability
c03 A69-21819
Isothermal diode as study basis for internal complex controlling thermionic energy conversion
c03 A69-21827
Kinetic theory model of plasma sheath transition applied to sheath structure in unignited mode of thermionic converter
c03 A69-21828
Gas breakdown model for analyzing breakdown of Ce vapor filled crack in thermionic trilayer insulator
c03 A69-21840
Calorimetric, optical, and vibration investigation of stretch-formed aluminum solar concentrators for thermionic converters
[NASA-TN-D-4889] c03 N69-10708
Nuclear thermionic space power system using rod control and heat pipes
[NASA-TN-D-5250] c22 N69-26270

THERMIONIC DIODES
Nuclear reactor space power system concept using thermionic diodes, heat pipes and rod control, emphasizing neutronic aspects and feasibility
c22 A69-14799

Heat transfer and neutronic calculations after fuel emitter separation in uranium oxide fueled thermionic diodes
[NASA-TM-X-1812] c22 N69-28212

THERMIONIC EMITTERS
Thermionic converters with chloride and fluoride vapor deposited tungsten emitters, comparing performance characteristics and stability
c03 A69-21819

THERMIONIC POWER GENERATION
Rhenium Nb cylindrical thermionic converter, measuring efficiency and power density in emitter temperature range 1600-2050 K and collector temperature range 873-1173 K
c03 A69-16359
Thermionic converter with chloride vapor deposited tungsten emitter and nickel collector
[NASA-CR-1416] c03 N69-32553

THERMISTORS
Theoretical comparison of beads, wires, and films as rocketsonde temperature sensors in mesosphere
[NASA-CR-1286] c13 N69-18126

THERMOCHEMICAL PROPERTIES
Time of heating effect on thermal polymerization of L-lysine free base
c06 A69-28439

THERMOCOUPLE PYROMETERS
Radiation compensating thermocouple for gas temperature measurement, noting advantage over single thermocouples
c14 A69-14916

THERMOCOUPLES
Thermal electromotive force change for thermocouples in high temperature, low pressure environments for 3700 hours
[NASA-TN-D-5287] c14 N69-29196
Quartz-insulated, single-wire thermocouples installed on thin-wall rocket cooling tubes to measure hot-gas-side wall temperatures
[NASA-TN-D-5291] c14 N69-29553

THERMODYNAMIC CYCLES
Steam cycle analysis for nuclear powered turbofan engine
[NASA-TM-X-1907] c22 N69-40060

THERMODYNAMIC EFFICIENCY
Rhenium Nb cylindrical thermionic converter, measuring efficiency and power density in emitter temperature range 1600-2050 K and collector temperature range 873-1173 K
c03 A69-16359

THERMODYNAMIC EQUILIBRIUM
Light ion abundance measurements of OGO satellites and field aligned diffusive equilibrium theory with temperature and concentration latitudinal variations
c13 A69-25157
Dynamical effects in structure of H II equilibrium region left behind expanding ionization front, showing temperature as function of distance from star
c30 A69-35966

THERMODYNAMIC PROPERTIES
Complex chemical equilibrium calculation, analyzing thermodynamic principles and solution to nonlinear equations
c06 A69-10588
In situ vacuum testing requirement for valid measurement of vacuum induced changes in mechanical and thermal properties of various filled elastomers
c11 A69-22008
Anisotropic Heisenberg antiferromagnetism in spin wave approximation, calculating thermodynamic quantities in terms of elliptic integrals
c26 A69-26500
Remote sensing cross-beam cross correlation methods of determining spatially resolved average thermodynamic properties
[AIAA PAPER 67-149] c14 A69-31868
Thomas-Fermi approximation applied to calculation of equations of state and thermodynamic functions at high pressure from differential equations of statistical atom model
c24 A69-40186
Prediction of thermodynamic effects of developed cavitation based on liquid hydrogen and Freon-114 data in scaled venturis
[NASA-TN-D-4899] c12 N69-10070
NASA development work on high efficiency batteries for space electric power systems
[NASA-SP-172] c03 N69-18042
Test performance of radial inflow turbine for Brayton cycle space power system
[NASA-TN-D-5090] c03 N69-20937
Investigation of SA-501 S-4B auxiliary propulsion system anomalies
[NASA-TN-D-5207] c28 N69-26224
Thermodynamic properties of liquid and gas phase equilibria of water plus heavy water
[NASA-TN-D-5223] c33 N69-26247
Computerized simulation of low frequency dynamics of liquid hydrogen flow in nuclear rocket engine
[NASA-TN-D-5312] c22 N69-30070
Rapid computation of equilibrium, chemical composition, and thermodynamic properties of argon-oxygen-hydrogen gas system
[NASA-TN-D-5416] c33 N69-36299
Magnetothermal oscillations in pressure annealed pyrolytic graphite
[NASA-TN-D-5488] c26 N69-39239

THERMODYNAMICS
Transformation laws for thermodynamic quantities confirming conventional formulation by mechanical model of heat
c23 A69-11288
Thermodynamic approach to equation of state of magnetized Fermi gas, deriving energy eigenvalues of free electron in magnetic field
c30 A69-25107
Aerodynamic and thermodynamic calibration of nonequilibrium air flow in Ames 1-foot shock tunnel
[NASA-TN-D-4985] c11 N69-15633
High pressure compressible flow systems in space vehicle ground support equipment
[NASA-SP-3045] c12 N69-26987
High temperature properties of gases - gas dynamics, thermodynamics, and combustion physics
[NASA-TT-F-558] c12 N69-35365

THERMOELASTICITY
Anomalous spacecraft OGO-D motion explained by open section boom thermally induced oscillations, discussing corrective measures
c32 A69-18331
Thermal flutter analysis of booms with open cross section
[NASA-TN-D-5222] c32 N69-29589

THERMOELECTRIC GENERATORS
Planar radioisotope thermoelectric generator system for NASA deep space missions and integrated spacecraft power supply
c03 A69-42254

THERMOELECTRIC POWER GENERATION
Nernst-Ettingshausen, thermoelectric power, thermal transverse-even, magnetoresistance, and Hall coefficients in white tin in 3.3 tesla field and cryogenic temperatures
[NASA-TN-D-5227] c26 N69-25412

THERMONUCLEAR POWER GENERATION
Comparison of Brayton and Rankine cycle magnetogasdynamic space power generation systems for use with nuclear heat source
[NASA-TN-D-5085] c03 N69-20852

THERMONUCLEAR REACTIONS
Primordial helium and horizontal branch star luminosity, obtaining luminosities in He burning phase for different He and metal abundances from models
c30 A69-22211

THERMOPHYSICAL PROPERTIES
Mars atmospheric features from measurements during entry and after landing, discussing atmospheric state properties, diurnal variability, clouds and winds
c30 A69-41617

THERMOSETTING RESINS
Synthesis of Pyrrone laminates from sulfone dianhydride
[NASA-CR-1404] c30 N69-31960

THERMOSPHERE
Atmospheric density variation measurements by density gages on Explorer 32 satellite confirm wave propagation in neutral thermosphere as free internal gravity waves
c13 A69-16261
Electron cooling rates in midlatitude and auroral zone thermosphere measured by probe rockets

c13 A69-16267
Midlatitude neutral thermosphere density and temperature measurements, noting effect of atomic oxygen adsorption by instruments
c13 A69-16268
Full wave calculation of gravity waves for thermospheric model, describing wave type reflection, transmission, conversion and coupling by scattering matrix elements
c13 A69-25150
Characteristic plane harmonic free internal neutral atmospheric wave oblique propagation through horizontally stratified quiet atmosphere for various thermospheric parameters
c13 A69-26101
Thermosphere temperature shape parameters from probe flights, showing dependence on hour angle
c13 A69-38088
Explorer 32 atmospheric density measurements revealing neutral thermosphere latitudinal variations during geomagnetically undisturbed times
c13 A69-38100
Diurnal and solar cycle variations of thermosphere density and temperature generated by solar EUV input and tidal wave, using two dimensional model
c29 A69-43003

THETA PINCH
Magnetic field nonuniformity and its effect on stability of theta pinch plasma
[NASA-TR-R-303] c25 N69-20997

THICK WALLS
Analytic model resembling thick walled ellipsoid of revolution incorporating three dimensional shape of human left ventricle and ventricular wall thickness effects
c05 A69-26235
Aerodynamic heat flux determined within thermally thick walls for case of rapidly rising heat rates
[NASA-TN-D-5309] c33 N69-30726
Ramp pressurization tests with gaseous helium in thick walled liquid hydrogen tank
[NASA-TM-X-1870] c28 N69-35712
Discharge nozzle coefficients for thick plate orifices with approach flow perpendicular and inclined to orifice axis
[NASA-TN-D-5467] c12 N69-38012

THICKNESS
Optimum thickness of dynamically stable composite superconducting tapes determined for substrate thickness as function of current density
c26 A69-43121

THIN FILMS
Cryogenic flexibility of thin polymeric film plies for use as spacecraft positive expulsion bladders
c15 A69-16486
Film processing effects on cryogenic mechanical properties of polyethylene terephthalate
c18 A69-16490
X ray fluorescence and electron microprobe for determining thin film thickness
c09 A69-19582
Cubic /beta/ silicon carbide films deposition by volatilization in presence of acetylene
c26 A69-21350
Energetics in solid film lubricants vacuum deposition methods, showing dependence on interfacial and film characteristics
c15 A69-29001
Transformer for unilateral energy transfer using single domain uniaxial Permalloy film
c09 A69-39454
Solid film lubricants deposited by DC triode sputtering on Ni, Ni-Cr and Nb surfaces friction tested under ultrahigh vacuum conditions
c15 A69-43126
Thin film formation, deposition methods and relation to film structure and properties
c26 A69-43344
Resonance absorption integrals for rhenium 185, rhenium 187, and natural rhenium in foils and thin films
[NASA-TN-D-4938] c24 N69-13152
Effects of preparation techniques on thin film CdS solar cells
[NASA-TM-X-1722] c03 N69-15397
Thin film microwave irises with capacitive reactance
[NASA-CR-1364] c26 N69-28096
Thermal shock cycling of Kapton, copper, and molybdenum thin film cadmium sulfide solar cell
[NASA-TM-X-1819] c03 N69-29555
Friction and contact resistance during sliding in vacuum of low resistivity metals lubricated with sputtered molybdenum disulfide
[NASA-TN-D-5349] c15 N69-31884
Simulated space environmental effects on full and fractional size cadmium sulfide thin film solar cells
[NASA-TM-X-1884] c03 N69-36758
Large thin film cadmium sulfide solar cell electrical characteristics over ranging temperatures and radiant intensities
[NASA-TM-X-1899] c03 N69-38767
Design and structural model of thin film solar cell array
[NASA-TM-X-1913] c03 N69-40787

THIN PLATES
Stiffness matrices analysis of thin flat plates
[NASA-TN-D-4927] c32 N69-14169
Cryogenic fracture properties of thin AISI 301 cold reduced sheet at different angles to rolling direction
[NASA-TN-D-5413] c17 N69-35688

THIN WALLED SHELLS
Recent advances in shell buckling, discussing imperfection sensitivity, boundary conditions and wall configuration
[AIAA PAPER 68-103] c32 A69-12516
Geometrically exact finite element for thin shells of revolution, using approximation to predict boundary layer stress distribution during vibration
[AIAA PAPER 69-56] c32 A69-18193
Finite element method for computing natural frequencies and mode shapes of thin shells of revolution
[NASA-TN-D-4972] c32 N69-16469
Predicting buckling of thin walled, uniform stiffened and unstiffened circular cylindrical shells under static loading
[NASA-SP-8007] c32 N69-23320
Numerical method and computer program for computing deflection response of thin shells
[NASA-CR-1376] c32 N69-29558

THIN WALLS
Buckling of thin walled truncated conical shells under static loads
[NASA-SP-8019] c32 N69-24131
Quartz-insulated, single-wire thermocouples installed on thin-wall rocket cooling tubes to measure hot-gas-side wall temperatures
[NASA-TN-D-5291] c14 N69-29553

THOMAS-FERMI MODEL
Thomas-Fermi approximation applied to calculation of equations of state and thermodynamic functions at high pressure from differential equations of statistical atom model
c24 A69-40186

THORIUM
Interferometrically measured wavelengths tabulated for Th lines in 2747-4572 A range, using liquid nitrogen cooled hollow cathode lamp and Fabry-Perot interferometer
c23 A69-42150

THREE BODY PROBLEM
Numerical analysis of periodic solutions of restricted three body problem in sun-Jupiter system, noting genealogy of periodic orbits
c30 A69-19874
Short term motion of lunar satellite, discussing third body disturbing functions and perturbation solution of nonsingular orbit elements
c30 A69-35934

THREE DIMENSIONAL FLOW
Three dimensional hypersonic steady flow around blunt and pointed cones at nonzero angles of attack calculated by method of characteristics
[AIAA PAPER 69-187] c01 A69-18176
Characteristics method for determining three dimensional supersonic flow around inclined body of revolution
[NASA-TN-D-5341] c12 N69-39177

THREE DIMENSIONAL MOTION
Mathematical models for optimal three dimensional

launch vehicle trajectories with attitude and attitude rate constraints
[NASA-TN-D-5117] c30 N69-20810
Evaluation of six degrees of freedom motion simulator for Bell X-14A aircraft hovering characteristics
[NASA-TN-D-5383] c11 N69-35359
THRESHOLDS (PERCEPTION)
Psychophysical methods for determining perception threshold of angular acceleration in man during vertical rotation
c04 A69-15969
Foveal luminances for chromatic and absolute thresholds for hue identification in case of small targets
c23 A69-19649
Differential thresholds for rotary and linear motion in the periphery
[NASA-CR-1439] c05 N69-36925
THROATS
Throat and nozzle insert design for ablative rocket engine using storable propellants
[NASA-TN-D-4964] c32 N69-33481
THRUST CHAMBERS
Mercury ion thrusters and facilities automatic controls durability testing, discussing vacuum chamber systems, unattended operation and control
[AIAA PAPER 68-576] c11 A69-12385
Discharge chamber plasma processes in electron bombardment ion thrustors, considering factors affecting thrustor performance
[AIAA PAPER 69-494] c28 A69-32735
Characterization of pressure perturbations induced in rocket combustor by machine gun
[NASA-TN-D-5214] c33 N69-24824
Design of injectors and ablative thrust chambers for FLOX propane rocket engine with 1.2 inch throat diameter
[NASA-TN-D-5324] c28 N69-30560
Injector radial distribution and thrust chamber geometry effect on acoustic mode instability in hydrogen oxygen engines
[NASA-TN-D-5375] c33 N69-32340
THRUST CONTROL
Mercury ion thrusters and facilities automatic controls durability testing, discussing vacuum chamber systems, unattended operation and control
[AIAA PAPER 68-576] c11 A69-12385
Wind profile developed for calculation of deflection impulse for rocket with liquid injection thrust vector control
[NASA-TM-X-1708] c31 N69-14033
THRUST PROGRAMMING
Optimal rendezvous and transfers between close elliptical orbits
[NASA-TT-F-554] c30 N69-40592
THRUST VECTOR CONTROL
Flight test evaluation of small one man lunar flying device /POGO/, discussing vehicle control, pressure suit factors and piloting differences
[AIAA PAPER 68-240] c11 A69-12379
Thrust requirements for correcting Keplerian orbits with interplanetary guidance application
[NASA-TN-D-4945] c21 N69-14399
THYRATRONS
Modified structural design of high temperature cesium vapor thyratrons
[NASA-CR-1417] c03 N69-36411
Development and inverter circuit tests of high temperature cesium vapor thyratrons
[NASA-CR-1435] c03 N69-36843
TIDES
Resonant spin and anomalous rotation of Mercury, analyzing influence of tidal degradation and permanent deformation of planet
c30 A69-39568
TILT WING AIRCRAFT
Aerodynamic pressure distribution on semispan tilting wing-propeller combination of V/STOL aircraft
[NASA-TN-D-5481] c01 N69-40876
TIME CONSTANT
Characteristic time on motion of magnetic lines of force in medium with Hall effect
c25 A69-12399
TIME DEPENDENCE
Time dependent emission spectra from flashlamp pumped organic dye lasers recorded with image converter, comparing dyes characteristics
c16 A69-17901
Trapped particles drift velocity in time dependent meridional magnetic and perpendicular electric field
c25 A69-20809
Delta functions spectrum in reciprocal time domain for LC and RC structures due to impulse response in distributed parameters
c10 A69-21327
Time of heating effect on thermal polymerization of L-lysine free base
c06 A69-28439
Time dependent convection electric fields as agents for diffusing trapped magnetospheric radiation inward toward earth, discussing one dimensional diffusion equation
c29 A69-28936
Electron concentration enhancement in upper atmosphere at polar latitudes, noting three independent zones and relation to magnetic local time
c29 A69-28938
Discontinuities in interplanetary magnetic field direction presented on mesoscale from Pioneer 6 observation, emphasizing distribution in time
c30 A69-29970
Coupled kinetic equations for inhomogeneous systems treated as simultaneous equations in time, obtaining solutions by successive approximation
c25 A69-30913
Ground based solar proton monitoring, considering particle intensities and radiation dose rates from riometer absorption as function of time
c29 A69-32321
Computer experiment on 9000 particle plasma to test temporal echo theoretical prediction
c25 A69-38713
TIME DISCRIMINATION
Auditory temporal masking of tonal signal by narrow band noise and perception of temporal order noting effects of intensity, frequency and time
c05 A69-24795
Space flight effects on human time perception
[NASA-TT-F-545] c05 N69-26455
TIME FUNCTIONS
Stability of time varying systems by construction of multipliers with prescribed phase characteristics
c10 A69-16598
Integral transformations used in time variable parameter estimation
[NASA-TN-D-5194] c19 N69-23788
Analytic time function models of stochastic processes of noise and modulation
[NASA-TR-R-314] c07 N69-29230
TIME LAG
Magnetron ionization gauge in helium for low pressure measurement, discussing striking characteristics and time lags
c03 A69-10606
Root mean square time delay error with respect to playback time and autocorrelation function of tape recorded sine wave for studying jitter spectra
c14 A69-18827
Moving striations as plasma oscillations arising from transit time delays of neutral and charged particles moving through ionized gas, using continuity equation
c25 A69-43122
Determination of stability indicative function for linear systems with multiple time delays
[NASA-TR-R-301] c31 N69-17801
TIME MEASUREMENT
Picosecond light pulse measurement by two photon excitation of photographic film
c14 A69-20165
TIME OPTIMAL CONTROL
Stochastic saturating systems optimal control computation, considering attitude control and tracking system design by elliptical differential equation of dynamic programming
c10 A69-30601

Interplanetary midcourse velocity correction schedules optimization, discussing timing equations modifications, mission simulation and role of earth based radar
c21 A69-39646
Computational method for time optimal space rendezvous between rocket vehicle and circular orbit target
[NASA-TN-D-5017] c30 N69-16210

TIME RESPONSE
Detection time to light point source noting response to dark, star field and glare source backgrounds
c05 A69-17215

TIME SHARING
On-line central data processing system connected to time shared computer for recording data from test facilities, discussing hardware configuration, software considerations and advantages
c08 A69-33106
Users manual on FORTRAN 4 COMPUTE program for IBM 360/67 time sharing system
[NASA-TN-D-4917] c08 N69-10098
COMPUTE time sharing calculator program for numerical calculations
[NASA-TN-D-5350] c08 N69-32685

TIN
Temperature dependent isomer shift and anharmonic binding of Sn 119 in niobium stannide, measuring Mossbauer recoil free fraction
c26 A69-10009
Angular correlation of inelastically scattered alpha particles and gamma rays emitted from 2-plus state of Sn 120
c24 A69-13098
Fermi surface topology effects on Nernst-Ettingshausen coefficient from measurements in magnetic fields to 3.3 tesla and 1.2-4.2 K temperatures in metallic tin
c26 A69-16357
Nernst-Ettingshausen, thermoelectric power, thermal transverse-even, magnetoresistance, and Hall coefficients in white tin in 3.3 tesla field and cryogenic temperatures
[NASA-TN-D-5227] c26 N69-25412

TIP DRIVEN ROTORS
Wind tunnel tests of subsonic aerodynamic characteristics of large scale tip turbine cruise fan with 1.075 pressure ratio at angle of attack
[NASA-TN-D-5316] c28 N69-34575

TIP SPEED
Performance data for high tip speed compressor rotor operated with radial and inlet airflow distortions
[NASA-TM-X-1798] c01 N69-26312

TIROS 7 SATELLITE
Tiros 7 monthly maps of infrared radiation over Indian Ocean area
[NASA-TN-D-5101] c13 N69-23318

TITANIUM
Electron microprobe analysis of vanadium in presence of titanium by compositional measurement of chromite in chondritic meteorites
c06 A69-18419
Angular distributions for Sc 45 Ti 46 nuclear reactions involving 41 MeV alpha particles bombardment described by Born approximation
c24 A69-41044

TITANIUM ALLOYS
Mechanical properties associated with 55-Nitinol memory effect, presenting stress-strain and electrical resistivity as function of temperature
c17 A69-35523
Hot salt stress corrosion of Ti alloy, discussing hydrogen generation during elevated temperature exposure and embrittlement as manifestation of strain rate
c17 A69-39434
Physical properties of near stoichiometric nickel-titanium alloy Nitinol and some structural-mechanical applications employing these properties
[NASA-CR-1232] c17 N69-11420
Strain-rate sensitivity of three titanium-alloy sheet materials after prolonged exposure to high temperature
[NASA-TN-D-4981] c17 N69-14873
Hot salt stress corrosion of titanium alloys - generation of hydrogen and its embrittling effect
[NASA-TN-D-5000] c17 N69-16465
Comparison of extraction procedures using 1-nitroso 2-naphthol and dimethylglyoxime for spectrophotometric determination of palladium in titanium alloys
[NASA-TM-X-1767] c06 N69-20801
Dynamic strain aging during creep and tensile tests of molybdenum-titanium-carbon alloys
[NASA-TN-D-5169] c17 N69-22993
Load and temperature effects on fatigue strength of notched titanium alloy sheet for supersonic transport operation
[NASA-TN-D-5294] c32 N69-29607
Outdoor high temperature corrosion tests for aluminum alloys and titanium alloys, and stainless steels
[NASA-TN-D-5362] c17 N69-32558
Influence of fabrication methods on compressive strength of titanium alloy skin stringer panels
[NASA-TN-D-5389] c15 N69-34707
Salt stress corrosion cracking effects on tensile and stress rupture properties of titanium alloy sheet
[NASA-TN-D-5417] c17 N69-36221
Physical, mechanical, and electrical properties of 55-Nitinol - nickel-titanium alloy
[NASA-CR-1433] c17 N69-36367
Effects of reactor irradiation at cryogenic temperatures on tensile properties of titanium and titanium-base alloys
[NASA-TN-D-5442] c17 N69-37436
Hot-salt stress-corrosion of titanium alloy under simulated turbine engine compressor environment
[NASA-TN-D-5510] c17 N69-40242

TITANIUM NITRIDES
Dissociation energy of gaseous titanium nitride
[NASA-TN-D-5027] c06 N69-19129

TOPOLOGY
Fermi surface topology effects on Nernst-Ettingshausen coefficient from measurements in magnetic fields to 3.3 tesla and 1.2-4.2 K temperatures in metallic tin
c26 A69-16357

TOROIDS
Radiation view factors for toroid calculated by digital computer
[NASA-TN-D-5006] c33 N69-23471

TORQUE
Contact conformity effects on spinning torque and friction coefficient in angular contact ball bearings from lubricated and unlubricated tests
[ASME PAPER 68-LUB-10] c15 A69-30901
Gravitational and magnetic torque effect on rotational motion of triaxial rigid body in regressing orbit about oblate primary mass
c30 A69-32240
Elastohydrodynamic solution for ball torque spinning without rolling in nonconforming groove, showing increase in torque with stress and spinning and decreasing conformity
[ASME PAPER 69-LUBS-11] c15 A69-34381
Calculated and experimental hinge moments on trailing-edge flaps of swept Delta wings at hypersonic speeds and positive deflection angles
[NASA-TN-D-4268] c01 N69-10054
Eddy current torques on bodies rotating relative to uniform magnetic field
[NASA-TN-D-5086] c23 N69-29477
Magnetic torque resulting from interaction between magnetic properties of spacecraft and ambient magnetic field
[NASA-SP-8018] c31 N69-30339
Torque and leakage rates of various lubricated lip seal designs at peripheral velocity of 120 feet per second
[NASA-TN-D-5411] c15 N69-35769
Elastohydrodynamic analysis and experimental speed effects on ball spinning friction coefficients and torque
[NASA-TN-D-5527] c15 N69-41210

TORQUE MOTORS
Design and analysis of modular servoamplifier for fast response electrohydraulic control systems
[NASA-TN-D-4898] c03 N69-10068

TORQUERS
Photoelectronic commutation by dc torquer-driven reaction wheel for spacecraft attitude control
[NASA-TN-D-5265] c03 N69-30945
TORSIONAL STRESS
Plastic deformation of corrosion resistant steel, CER-VIT 101, and fused silica as function of applied torsional stress
[NASA-CR-1257] c14 N69-16100
Mechanical characteristics of flexible drive shaft coupling
[NASA-CR-1241] c15 N69-16104
TORSIONAL VIBRATION
Anomalous spacecraft OGO-D motion explained by open section boom thermally induced oscillations, discussing corrective measures
c32 A69-18331
Directional solar thermal field /sunlight/ effect on coupled nonplanar transverse and torsional vibrations of satellite cylindrical antennas in orbit
c32 A69-25534
TOUGHNESS
Crack length and thickness influence in plane strain fracture toughness tests
[NASA-TM-X-1860] c17 N69-34916
TOXIC HAZARDS
Treatment procedure and preventive programs outlined for acute exposure to toxic rocket fuels or oxidizers
c05 A69-12498
TOXICITY
Toxicity of plastic hardware containing biological space flight experiment
[NASA-TM-X-1818] c04 N69-29723
TRACE ELEMENTS
Detection and spectral examination of trace porphyrin complexes by demetallation with methanesulfonic acid and spectrofluorometry, compared to absorption spectrophotometry
c06 A69-42557
TRACKING (POSITION)
Working breadboard model of planet tracker under various illuminating conditions, discussing hardware and closed loop tracking error analysis accounting for signal to noise effects
c21 A69-13214
Small perturbation dynamics of neuromuscular system in tracking tasks
[NASA-CR-1212] c05 N69-14212
Modified Fourier transform for calculating human operator describing functions
[NASA-TM-X-1762] c08 N69-21119
Systems developed for reducing pilot workload and tracking accuracy improvements during noise abatement landing approaches
[NASA-CR-1427] c02 N69-38657
TRACKING NETWORKS
Tracking and Data Relay Satellite System with synchronous orbit satellites to relay data between low altitude earth orbital spacecraft and mission control centers
c07 A69-41755
TRACKING STATIONS
GEOS 1 tracking station positions on SAC standard earth C-5 model
[NASA-TN-D-5034] c13 N69-28019
TRACTION
Runway grooving to improve aircraft tire traction in adverse weather tested by F-4D and Convair 990A under wet conditions
[AIAA PAPER 69-773] c02 A69-35649
Runway and highway pavement grooving and traction studies
[NASA-SP-5073] c11 N69-20451
TRAILBLAZER 2 REENTRY VEHICLE
Flight measurement of optical radiation from shock heated air with Trailblazer 2 reentry vehicle
[NASA-TN-D-4937] c33 N69-14501
TRAILING EDGES
Stator performance with cooling by air ejection from trailing edges of blades
[NASA-TM-X-1901] c03 N69-39335
TRAILING-EDGE FLAPS
Hypersonic flow distribution and separation types over highly swept Delta wing with trailing edge flaps at Mach 6
[AIAA PAPER 68-97] c01 A69-12522
Calculated and experimental hinge moments on trailing-edge flaps of swept Delta wings at hypersonic speeds and positive deflection angles
[NASA-TN-D-4268] c01 N69-10054
Trailing-edge flap system with boundary layer control and external jet augmentation for subsonic jet transport
[NASA-TN-D-5129] c01 N69-30722
Pressure and heat transfer on swept Delta wing with trailing-edge flap
[NASA-TN-D-5418] c01 N69-35855
Three dimensional pressure distribution functions for lifting surfaces with trailing-edge controls based on integral equations for subsonic flow
[NASA-TN-D-5419] c01 N69-38768
Boundary layer control and trailing edge flaps for direct-lift control
[NASA-CR-1426] c02 N69-38819
TRAINING SIMULATORS
Flight simulation requirements for reducing aircraft training flight time, discussing control system and instrument motion characteristics, visual simulation and critical maneuvers motion
c11 A69-41139
TRAJECTORY ANALYSIS
Autonomous solution to orbital navigation problem yielding direct measure of orbital parameters
c21 A69-11005
Longitudinal range dispersion of unmanned Mars landers using VM-8 and VM-9 atmospheric models, discussing Syrtis Major as possible landing site
c30 A69-12390
Trajectory error propagation upper bounds in many body field for impulsive initial error, relating error to mission tolerances
c30 A69-21937
Configuration, trajectory planning, instrumentation, calorimetry and aerodynamic heating for planetary atmosphere entry
c31 A69-25719
Normalized hodographic mapping for constrained trajectory families, discussing mapping concepts, information content and applications
[AIAA PAPER 69-924] c30 A69-39362
Metric state-time dynamical polysystem with sequentially compact topological space, noting sliding state trajectories
c19 A69-40573
Computation of optimal branched trajectories using classical variational problem of Bolza
[NASA-CR-1331] c30 N69-24950
Gravity model comparison using geodetic satellite long arc orbital solutions
[NASA-TN-D-5035] c30 N69-27412
Interplanetary space trajectories based on Jupiter swingby flights
[NASA-TN-D-5271] c30 N69-28441
Current computer programs for low thrust trajectory analysis using flyby and rendezvous trajectories
[NASA-TM-X-1824] c08 N69-30014
Comparison of fourth order Runge-Kutta numerical integration technique with two numerical integration formulas in mathematical models used for computing rigid body trajectories
[NASA-TN-D-5425] c30 N69-38769
Sequential stochastic techniques for trajectory estimation
[NASA-CR-1360] c30 N69-40325
TRAJECTORY CONTROL
Numerical integration for continuously thrusting spacecraft optimal trajectory, considering rectangular Cartesian and polar cylindrical coordinates characteristics
[AIAA PAPER 69-903] c30 A69-38546
Performance of Atlas-Agena vehicle from lift off through Agena posigrade maneuver
[NASA-TM-X-1826] c31 N69-29594
TRAJECTORY MEASUREMENT
Rocket trajectory determination by tracking onboard light source against star background with image orthicon TV system
c07 A69-26965
TRAJECTORY OPTIMIZATION
Iterative guidance mode /IGM/ applied to effective gravity vector prediction, acceleration measurement of noise sensistivity and energy limitations

[AIAA PAPER 67-620] c21 A69-15501
Spacecraft optimum low thrust trajectory analyzed by Hamilton-Jacobi perturbation theory, obtaining canonic constants of motion c30 A69-17574
Multistage rocket trajectories optimized by second order numerical technique and digital computer program, considering coasting, vacuum flight and transition times c30 A69-32154
Low thrust trajectories for minimum time rendezvous between continuous thrust interceptor and passive target vehicle, comparing calculus of variations and steepest ascent analyses c30 A69-32177
Impulsive orbit transfer optimization using accelerated gradient program based on Newtonian algorithm for digital computer method c30 A69-35956
Numerical integration for continuously thrusting spacecraft optimal trajectory, considering rectangular Cartesian and polar cylindrical coordinates characteristics
[AIAA PAPER 69-903] c30 A69-38546
Closed form solution for minimum fuel constant thrust trajectories for vehicle transfer in vacuum between arbitrary boundary conditions
[AIAA PAPER 69-905] c30 A69-39337
Vector integral extension to optimal trajectory coordinate multiplier systems with constant of motion demonstrated for coast-arc problem
[AIAA PAPER 69-907] c30 A69-39339
Branched trajectory optimization for split rocket vehicles using projected gradient or steepest descent method
[AIAA PAPER 69-917] c30 A69-39346
Recurrent Lagrange multipliers for optimal low thrust earth-Jupiter transfers, using three dimensional solar system model c30 A69-41896
Generation of ideal coordinate systems for analysis of optimal trajectories
[NASA-CR-1250] c30 N69-13274
Computational method for time optimal space rendezvous between rocket vehicle and circular orbit target
[NASA-TN-D-5017] c30 N69-16210
Optimum takeoff and climbout trajectory calculation technique for jet aircraft noise abatement
[NASA-TN-D-5182] c02 N69-26194

TRANSDUCERS
Cb-1Zr pumped sodium loop tests to evaluate loop components, EM pump, pressure transducers, and instrumentation techniques
[NASA-CR-1135] c03 N69-11373
Hysteresis of strain gage absolute pressure transducer
[NASA-TN-D-5327] c14 N69-30506

TRANSFER FUNCTIONS
Radiator transfer functions for SNAP 8 ground test facilities
[NASA-TN-D-4946] c22 N69-14503
Measurement of pilot describing functions in single controller multiloop tasks
[NASA-CR-1238] c05 N69-15372
Experimental and analytical study of dynamics of single tube counterflow boiler
[NASA-CR-1230] c12 N69-17751
Derivation of transfer function for optical system relating image intensity to spatial autocorrelation
[NASA-CR-1443] c21 N69-38041
Human transfer functions applied in systems analysis of manually controlled lunar landing simulator
[NASA-TN-D-5478] c05 N69-39183

TRANSFER ORBITS
Impulsive orbit transfer optimization using accelerated gradient program based on Newtonian algorithm for digital computer method c30 A69-35956
Recurrent Lagrange multipliers for optimal low thrust earth-Jupiter transfers, using three dimensional solar system model c30 A69-41896
Optimal rendezvous and transfers between close elliptical orbits
[NASA-TT-F-554] c30 N69-40592

TRANSFERRING
Simulated manual package transfer in weightless environment of Saturn Orbital Space Station
[NASA-TN-D-5111] c05 N69-21501

TRANSFORMATIONS (MATHEMATICS)
Transformation laws for thermodynamic quantities confirming conventional formulation by mechanical model of heat c23 A69-11288
Computation of topside ionograms from electron concentration profiles
[NASA-TN-D-5052] c13 N69-23557

TRANSFORMERS
Passive circuit to transform voltage of indefinitely repeated positive or negative pulses using transistors, diodes and magnetic cores c09 A69-10564
Transformer for unilateral energy transfer using single domain uniaxial Permalloy film c09 A69-39454
Transformer of closely spaced pulsed waveforms having nonzero average value
[NASA-TN-D-5473] c09 N69-38776

TRANSIENT HEATING
Charring phenolic nylon ablator material pyrolysis and surface recession for cyclic and constant combined convective and radiative heating
[AIAA PAPER 69-151] c33 A69-18055
Heating facility for testing ablative heat shield material models in combined convective and radiative heating environment with constant or transient heating conditions
[AIAA PAPER 69-342] c11 A69-28278
Transient solidification outside cooled pipe with application to solar Brayton heat receiver
[NASA-TN-D-4897] c33 N69-10227

TRANSIENT RESPONSE
Transient electro-osmosis of water in capillary tubes for pumping and generation modes, analyzing response to step change in pressure or voltage change under external loading c06 A69-14862
Digital simulation computer stability analysis scheme premised on use of perturbed transient responses c10 A69-32899
Transient performance of full flow hydraulic turbine driven two speed pump inducer system, formulating computer model
[AIAA PAPER 69-551] c15 A69-34415
Ratio of equilibrium responses to transient responses both having equal excitation levels
[NASA-TN-D-5070] c32 N69-17258
Identification of structural systems using near resonance testing
[NASA-TN-D-5069] c32 N69-17737
Transient response of coupled acoustic cavity resonators
[NASA-CR-1421] c23 N69-35286
Cataloged pulse response curves for different types of conventional low pass filters
[NASA-TN-D-5494] c07 N69-40099

TRANSISTORS
Second breakdown and other thermal instabilities analyzed by heat flow equation, obtaining stability criteria predicting reduced power dissipation for transistor at low currents c09 A69-31618
Analysis and design of inductors for protecting power transistors against current surges in inverter bridge circuits
[NASA-TN-D-4995] c10 N69-16198
Performance tests of silicon and germanium transistors in intense magnetic fields
[NASA-TN-D-5428] c09 N69-36710
Transformer of closely spaced pulsed waveforms having nonzero average value
[NASA-TN-D-5473] c09 N69-38776

TRANSITION FLOW
Linear amplification, nonlinear limiting and secondary instability induced by unsteady effects illustrated for various transitional flows, including roughness and streamwise vorticity c12 A69-33248

TRANSITION LAYERS
Plasmapause and relation to ion composition in topside ionosphere, using Bohm coefficient for

turbulent diffusion
c13 A69-12741
TRANSITION METALS
Vacuum distillation technique for isolation and recovery of alkali metal reaction products with Ta, Ni, V and oxygen
c14 A69-10927
TRANSMISSION CIRCUITS
Microelectronic data and remote control function transmission system for wind tunnel testing of aircraft dynamic response to gusts and turbulence
c11 A69-23283
TRANSMISSION LOSS
Transmission loss and effects on antenna radiation patterns and impedance produced by thermally degraded ablation materials
[NASA-TN-D-4879] c07 N69-10885
Lunar surface transmission loss for Apollo astronaut point-to-point communications
[NASA-TN-D-4915] c07 N69-13301
TRANSMISSIVITY
Radio frequency transmission characteristics of ablation materials for planetary entry vehicle heat shields
[NASA-TN-D-4920] c07 N69-13158
Transmission effects on plastic films irradiated with ultraviolet light in vacuum
[NASA-TM-X-1905] c18 N69-40339
TRANSMITTANCE
Transmittance and absorption cross sections of carbon particles suspended in flowing stream of nitrogen gas
c33 A69-17804
Visible and infrared transmitting properties of epoxy resin suitable for infrared detectors
[NASA-TM-X-1776] c18 N69-23843
TRANSONIC FLOW
Oxidation resistance and thermal fatigue cracking of nickel and cobalt base alloys in transonic gas streams
[NASA-TN-D-5376] c17 N69-33307
Wind tunnel investigation for determination of subsonic and transonic aerodynamic characteristics of Saturn 1B launch vehicle
[NASA-TM-X-1848] c31 N69-33380
Finite difference theory for transonic velocity calculations on blade-to-blade stream surface of turbomachine
[NASA-TN-D-5427] c01 N69-37521
TRANSONIC FLUTTER
Wind tunnel study of deflected elevator flutter encountered on T-tail airplane
[NASA-TN-D-5024] c32 N69-16211
TRANSONIC SPEED
Location effect of power plants on aft-mounted supersonic cruise exhaust nozzles at transonic speeds in flight and wind tunnel
[AIAA PAPER 69-427] c01 A69-32769
Determination of drag of fabrication-type surface roughness in turbulent boundary layer at transonic speeds
[NASA-TN-D-5004] c01 N69-16460
Plug and shroud geometry variables on plug nozzle performance at transonic speeds
[NASA-TN-D-5098] c28 N69-21463
Transonic aerodynamic characteristics of two hypersonic cruise configurations
[NASA-TM-X-1816] c01 N69-29231
TRANSONIC WIND TUNNELS
Microelectronic data and remote control function transmission system for wind tunnel testing of aircraft dynamic response to gusts and turbulence
c11 A69-23283
Transonic wind tunnel tests of aerodynamic drag and lift forces on circular cylinder in two dimensional flow at high Reynolds number
[NASA-TR-R-300] c01 N69-17304
Transonic wind tunnel evaluation of variable stabilizer configuration effects on hypersonic elliptical lifting body dynamics
[NASA-TM-X-1789] c01 N69-25244
TRANSPORT AIRCRAFT
Light aircraft hazards due to trailing vortex generated by heavy transport aircraft, suggesting specific procedures for takeoff, landing and flight phase
[SAE PAPER 680220] c02 A69-14930
Drag influence on mission performance of hypersonic aircraft during climb and cruise, noting payload capacity
c02 A69-37154
Flight simulator with large lateral motion for large and supersonic transport aircraft, emphasizing reproduction of cockpit accelerations due to supersonic engine thrust loss
c11 A69-43044
Calculated and flight measured handling quality factors of three subsonic jet transports
[NASA-TN-D-4832] c02 N69-10495
Wind tunnel tests of large jet transport aircraft model with external flow jet flap
[NASA-TN-D-4928] c01 N69-14000
Trailing-edge flap system with boundary layer control and external jet augmentation for subsonic jet transport
[NASA-TN-D-5129] c01 N69-30722
Auxiliary flap system tests using Boeing 367-80 transport aircraft and wind tunnels
[NASA-TN-D-5128-REV] c02 N69-31962
Static and dynamic stability derivatives of model jet transport equipped with external flow jet augmented flaps
[NASA-TN-D-5408] c02 N69-36258
Variation in engine noise for two landing approach configurations of jet transport aircraft
[NASA-TM-X-1896] c02 N69-38104
TRANSPORT PROPERTIES
Transport properties of steam, analyzing selection, correlation and prediction using statistical mechanical theories
c33 A69-10110
Laser ignited combustion of 365 micron Zr droplets falling in ultrapure oxygen using spectroscopic and photographic techniques, discussing vapor phase transport phenomena
[WSCI PAPER 69-4] c27 A69-32345
Thermodynamic and transport properties of air, and combustion products of natural gas and air, and jet engine fuel and air
[NASA-TN-D-5452] c33 N69-37936
TRANSPORT THEORY
Gamma heating rate measured by aqueous dosimeter converted to rate in thin tungsten detector in water shield through transport theory calculations, obtaining correction factors
c22 A69-18825
Transport study of neutron and photon attenuation through lithium hydride and tungsten spheres
[NASA-TN-D-4989] c24 N69-15375
Quadrature variations in discrete-ordinates calculation
[NASA-TM-X-1887] c20 N69-36976
TRANSPORT VEHICLES
Concepts of acceptance testing lunar and planetary vehicles
[NASA-TN-D-4924] c11 N69-14507
TRANSPORTATION
Design philosophy for cost reductions on future space transportation systems, exemplifying application to booster system for earth orbital logistics
[AIAA PAPER 69-439] c34 A69-32654
Reducing cost of space transportation - AAS Conference, Washington, D.C., March 1969
c34 A69-39686
TRANSVERSE WAVES
Air gap tolerances effect on admittance of TEM mode dielectric and plasma coated slot antennas determined by variational method
c09 A69-24986
Reflection coefficient of symmetric parallel plate waveguide operating in TEM mode illuminating lossless dielectric layer, using wedge diffraction and geometrical optics methods
c09 A69-34802
Edge diffraction effects in TEM axially slotted finite ground plane on radiation pattern in waveguides of different geometries
c07 A69-41588
Harmonic content of pressure wave shapes in strong traveling transverse acoustic modes
[NASA-TM-X-1716] c12 N69-15371
TRAPPED PARTICLES
Equation describing statistically trapped particle motion under influence of fields varying in time

and space
c29 A69-19375
TRAVELING WAVE MODULATION
Design and performance of traveling wave phototube for coherent light demodulation
[NASA-TT-F-430] c09 N69-15441
TRAVELING WAVE TUBES
High power TWT tube cooling in space vehicle, discussing thermal control system based on heat pipe radiator
c09 A69-24747
Design and performance of traveling wave phototube for coherent light demodulation
[NASA-TT-F-430] c09 N69-15441
TRAVELING WAVES
Harmonic content of pressure wave shapes in strong traveling transverse acoustic modes
[NASA-TM-X-1716] c12 N69-15371
TRIGATRONS
Parameters affecting firing time of simultaneously triggered trigatron spark gap switches
[NASA-TN-D-5077] c09 N69-20888
TRIGONOMETRIC FUNCTIONS
Algorithm for computing direction cosine matrix of strapdown inertial system
[NASA-TN-D-5384] c21 N69-36997
TRITIUM
Tritium contamination reduction in small ion accelerators for neutron production, discussing pumping problems and vacuum systems
c11 A69-26499
TRITONS
Alpha particle-triton reaction on scandium 45 at 41 MeV
[NASA-TN-D-5216] c24 N69-24919
TROPICAL METEOROLOGY
Survey of six year period of satellite observed tropical Pacific cloud mapping
c20 A69-33001
Causal and semiphenomenological theories concerning equatorial F 2 region, discussing electrodynamic drift theory and transequatorial winds
c13 A69-37888
TROPICAL REGIONS
Bidirectional reflectance of earth atmosphere and cloud formation above equatorial Pacific observed by synchronous satellite as function of angular dependence
c20 A69-43154
TROPOSPHERE
Vertical tropospheric humidity distribution estimation from IR spectra obtained by TIROS satellites
c13 A69-34284
Water vapor profiles in stratosphere from IR radiometric observations under cloudless conditions, indicating relation to tropospheric meteorological features
c13 A69-38261
Clear air turbulence detection in troposphere by multifrequency radiometric sensor, noting multibeam system for supersonic aircraft
c09 A69-42536
TRUSSES
Lightly loaded truss structures fabricated from Be, Be-Al alloy and uniaxial B filament reinforced epoxy tubing for unmanned spacecraft applications
c17 A69-35504
Structural response of tubular beryllium and beryllium aluminum alloy truss-type structures to dynamic and static loads
[NASA-TN-D-5254] c32 N69-28658
TUBE CATHODES
SERT 2 mercury vapor fed hollow cathode operated in bell jar, determining volt-ampere characteristics and flow rates for plasma diagnostics
[AIAA PAPER 69-258] c28 A69-21221
Vacuum tube with cathode heated directly by external radioisotope source, noting heat pipe providing isothermal heat transfer
c09 A69-24748
TUBE HEAT EXCHANGERS
Creep rupture data on welded tubes for helium to air heat exchanger design
[NASA-TN-D-5195] c17 N69-23731
Bimetallic heat exchanger tube performance in sodium boiling facility
[NASA-TN-D-5323] c33 N69-30064
Heat transfer characteristics of water/cryogenic hydrogen heat exchanger for nuclear rocket reactor
[NASA-TN-D-5429] c33 N69-36701
TUBES
Tube techniques - IEEE Conference, New York, September 1968
c09 A69-24740
TUMBLING MOTION
Multimodality pilot model for visual and motion feedbacks derived from simulator program
[NASA-CR-1325] c05 N69-28071
TUMORS
Adrenal epinephrine and phenylethanolamine n-methyl transferase /PNMT/ activity in rat bearing transplantable pituitary tumor
c04 A69-20374
TUNGSTEN
Work function and desorption energy measurements of alkali metals from metallic substrates with modulated molecular beam, noting surface contamination
c26 A69-21808
Thermionic converters with chloride and fluoride vapor deposited tungsten emitters, comparing performance characteristics and stability
c03 A69-21819
Internal friction, Young modulus and resistivity measurements for stage I interstitials in electron irradiated tungsten
c17 A69-28682
Thermal neutron capture cross section at high temperature irradiations determined for W 184, describing radiochemical separation and flux counting techniques
c14 A69-43192
Point defect calculations for tungsten
[NASA-TN-D-4918] c22 N69-13309
Transport study of neutron and photon attenuation through lithium hydride and tungsten spheres
[NASA-TN-D-4989] c24 N69-15375
Compatibility tests of molten uranium with tungsten and tungsten-1.5 percent hafnium
[NASA-TN-D-5076] c17 N69-19930
Tungsten-184 used as thermal flux monitor at high temperatures in Plum Brook reactor
[NASA-TN-D-5113] c22 N69-20795
Composition and line emission characteristics of ionized tungsten, uranium, and argon
[NASA-CR-1313] c25 N69-21124
Spectral emission characteristics of gaseous tungsten and uranium in induction heated argon plasmas
[NASA-CR-1314] c25 N69-22920
Furnace brazing butt joints in tungsten-uranium dioxide cermet cylinders at 3000 deg C
[NASA-TM-X-1815] c15 N69-28862
Burst testing of tungsten tubing at high temperatures
[NASA-TM-X-1843] c17 N69-31889
Thermionic converter with fluorine vapor deposited tungsten emitter etched to expose crystal planes
[NASA-CR-1381] c03 N69-35689
Tungsten and depleted uranium in mimimum weight, layered shield comparisons for space power reactor
[NASA-TM-X-1874] c22 N69-35817
Corrosion and heat resistant coatings for oxidation protection of tungsten
[NASA-TT-F-583] c17 N69-35836
Tungsten and tungsten alloy single crystal deformations determined as function of alloying, strain, and temperature
[NASA-TN-D-5493] c17 N69-39182
Molybdenum and tungsten solubility in liquid potassium
[NASA-TN-D-5504] c17 N69-40053
TUNGSTEN ALLOYS
Powder metallurgy, fusion and chemical vapor deposition techniques in manufacturing tungsten base alloys
c17 A69-18792
Vacuum arc melted W and W-Re alloys mechanical properties, noting Re additions effects
c17 A69-20190

Superplasticity in W-Re alloys, noting tensile properties, grain size and strain rate sensitivity for various Re contents at high temperatures
c17 A69-22990
Tungsten alloy fiber reinforced nickel base alloy composites stress-rupture strength, oxidation and impact resistance for high temperature turbojet engine buckets
c17 A69-29010
Ductilizing of Group 6A elements by rhenium and other solutes
[NASA-TN-D-4955] c17 N69-14403
Effect of rhenium on mechanical properties of hafnium carbide strengthened tungsten alloys
[NASA-TN-D-5348] c17 N69-31977
Tungsten and tungsten alloy single crystal deformations determined as function of alloying, strain, and temperature
[NASA-TN-D-5493] c17 N69-39182

TUNGSTEN CHLORIDES
Thermionic converter with chloride vapor deposited tungsten emitter and nickel collector
[NASA-CR-1416] c03 N69-32553

TUNGSTEN COMPOUNDS
Impregnation of polytetrafluoroethylene with hexaflourides of rhenium, molybdenum, and tungsten
[NASA-TN-D-4886] c06 N69-10126
Thermal stability and friction of disulfides, diselenides, and ditellurides of molybdenum and tungsten in ultrahigh vacuum
[NASA-TN-D-5141] c15 N69-22992

TUNGUSK METEORITE
Oxide composition of silicate spherules from forest area devastated by Tunguka meteorite explosion using electron microprobe analysis
c30 A69-28869

TUNING
VHF cavity backed cylindrical gap antenna input tuning impedance and equatorial radiation patterns controlled by cavity adjustments
c09 A69-40698

TUNNEL DIODES
Germanium microwave backward diodes optimum design and performance prediction through computer calculation for important parameters
c09 A69-41224
Backward diodes in indium arsenide for microwave mixing
[NASA-TN-D-5401] c09 N69-36706

TURBINE BLADES
Turbine blade loading in terms of surface diffusion and loading factors, discussing tandem and jet flap blades and vortex generators
[ASME PAPER 68-WA/GT-11] c28 A69-16136
Turbine stator blade performance determination from total pressure surveys downstream of blade row, noting problems in pressure measurement
[ASME PAPER 69-GT-103] c01 A69-22521
Technology trends in airbreathing propulsion, discussing noise control for subsonic jet transports, turbine blade cooling, etc
[AIAA PAPER 69-774] c02 A69-35648
Performance evaluation of tandem rotor blade of single stage turbine
[NASA-CR-1254] c01 N69-13621
Flow reduction due to oxidation of wire-form porous materials for transpiration cooled turbine blades
[NASA-TN-D-5001] c17 N69-16383
Performance of tandem turbine blade and its influence on flow separation and visualization
[NASA-CR-1341] c01 N69-23892
Steady state stress relaxation analysis of turbine blade cooling designs
[NASA-TN-D-5282] c28 N69-29321
Flow and wake characteristics on turbine tandem blades in two dimensional cascade tunnel
[NASA-TM-X-1836] c01 N69-30632

TURBINE ENGINES
Performance and analysis of seals for nitrogen inerted lubrication systems of turbine engines
[NASA-TN-D-4761] c15 N69-10055

TURBINE INSTRUMENTS
Technique for dynamically calibrating turbine flowmeters for small perturbations by means of frequency response tests
[NASA-TM-X-1736] c14 N69-17702

TURBINE PUMPS
Ball bearings lubrication and wear in cryogenic hydrogen turbopumps by transfer films provided from self lubricating cage
c15 A69-10109
Transient performance of full flow hydraulic turbine driven two speed pump inducer system, formulating computer model
[AIAA PAPER 69-551] c15 A69-34415
Low speed characteristics of liquid hydrogen centrifugal turbopumps
[NASA-TM-X-1861] c28 N69-33806

TURBINE WHEELS
Vibrations of turbomachine rotors and methods for determining optimal hydraulic damping mounts, vibrations of systems with friction, and self induced vibrations of compressor blades
[NASA-TT-F-547] c02 N69-36326

TURBINES
Multiple function combination probe design for compressor and turbine air flow research
c11 A69-31917
Stator setting effect on single stage turbine performance, considering blade loss and surface velocity distribution
[AIAA PAPER 69-525] c28 A69-32686
Effect of variable stator with area design of 70 percent on performance of single stage turbine suitable for air cooling
[NASA-TM-X-1696] c28 N69-10296
FORTRAN 4 program for estimating off-design performance of radial inflow turbines
[NASA-TN-D-5059] c03 N69-19829
Surface temperature mapping with infrared photographic pyrometry for turbine cooling investigations
[NASA-TN-D-5179] c14 N69-23895

TURBOCOMPRESSORS
Gas turbine compressor end seals, discussing air leakage paths, primary and secondary seals, design and efficiency
[ASLE PREPRINT 68AM 4B-4] c15 A69-27366
Analog simulation of closed loop Braytcn cycle test facility
[NASA-TM-X-1715] c03 N69-14312
Theoretical study of discrete frequency noise generated by turbocompressors and blades
[NASA-CR-1287] c28 N69-21476
Multistage turbocompressor simulation applied to performance prediction of axial flow instabilities
[NASA-TM-X-1880] c28 N69-36998
Hot-salt stress-corrosion of titanium alloy under simulated turbine engine compressor environment
[NASA-TN-D-5510] c17 N69-40242

TURBOFAN ENGINES
Steady state and dynamic distortion influence on performance and stall of turbofan engine, discussing compressor instrumentation, tests and simulation data
c28 A69-35175
Conference cn NASA research in noise reduction of subsonic jet aircraft - nacelle acoustic linings, sound generation in jet engines, and operational noise effects on humans
[NASA-SP-189] c02 N69-11542
Performance and stall limits of YTF30-P-1 turbofan engine with uniform compressor inlet flow
[NASA-TM-X-1803] c28 N69-27019
Analytical and experimental studies for predicting noise attenuation in acoustically treated ducts for turbofan engines
[NASA-CR-1373] c23 N69-36974
Steam cycle analysis for nuclear powered turbofan engine
[NASA-TM-X-1907] c22 N69-40060

TURBOFANS
Flight evaluation of tip turbine driven fans for lateral control in hovering VTOL aircraft
[NASA-TN-D-5491] c02 N69-38807

TURBOGENERATORS
Argon turboalternator design and testing for Brayton cycle space power system, discussing inlet operating temperature and shaft bearings and rotation
c03 A69-42279
Turboalternator gas bearing system for spacecraft electric power production
[NASA-CR-1292] c15 N69-19775

Results of endurance tests of SNAP 8 turbine alternator
[NASA-TM-X-1741] c03 N69-20913
Performance of two stage axial flow turbogenerator with gas bearing rotor support system
[NASA-CR-1290] c03 N69-21771
Design and performance of gas bearing system for turboalternators
[NASA-CR-1291] c15 N69-21772
Performance of gas bearing Brayton cycle turbcalternator
[NASA-TM-X-1820] c03 N69-29707

TURBOJET ENGINES
Tungsten alloy fiber reinforced nickel base alloy composites stress-rupture strength, oxidation and impact resistance for high temperature turbojet engine buckets
c17 A69-29010
Performance of 10 deg conical turbojet plug nozzle with iris primary and translating shroud for supersonic cruise applications
[NASA-TM-X-1709] c28 N69-14313
Evaluating performance of swirl can turbojet combustor at simulated supersonic inlet conditions
[NASA-TN-D-4996] c28 N69-16154
Static tests of nozzle efficiency and pumping characteristics of conical turbojet plug nozzle with translating primary and secondary shrouds at Mach 0 to 2.0
[NASA-TM-X-1777] c28 N69-21648
Steady-state interactions between turbcjet engine and axisymmetric inlet with induced distortions
[NASA-TM-X-1780] c28 N69-23519
Dynamic distortion of supersonic wind tunnel for turbojet engines
[NASA-TM-X-1842] c28 N69-38599
Aerodynamics and flight dynamics of turbojet aircraft
[NASA-TT-F-542] c01 N69-38670

TURBOMACHINE BLADES
Tungsten alloy fiber reinforced nickel base alloy composites stress-rupture strength, oxidation and impact resistance for high temperature turbojet engine buckets
c17 A69-29010
FORTRAN program for calculating velocities and streamlines on blade to blade stream surfaces of turbomachinery
[NASA-TN-D-5044] c01 N69-21811
Computer program for aerodynamic analysis of turbomachine blades
[NASA-TM-X-1764] c01 N69-22553
Tandem bladed inducer tested in water for cavitation corrosion
[NASA-TN-D-5134] c01 N69-23769
Performance tests of jet flapped blade in six blade annular cascade
[NASA-CR-1423] c28 N69-36680

TURBOMACHINERY
Finite difference theory for transonic velocity calculations on blade-to-blade stream surface of turbomachine
[NASA-TN-D-5427] c01 N69-37521

TURBOSHAFTS
Gas turbine engine shaft face seal with self acting lift augmentation preventing rubbing contact, noting disadvantages of labyrinth and conventional seals
[ASLE PICFS PREPRINT 27] c15 A69-30492

TURBULENCE
Statistical theories of turbulence applied to thermal convection between infinite slippery plates at large Prandtl number
c33 A69-24283

TURBULENCE EFFECTS
Statistical effects of wind and atmospheric turbulence on launch vehicles
[NASA-CR-1410] c20 N69-35570

TURBULENCE METERS
Turbulence measurement errors with inclined hot wires described by equations, assuming normal component cooling includes greater tangential cooling
c14 A69-34442

TURBULENT BOUNDARY LAYER
Acceleration effects on forced convection in turbulent boundary layer, noting heat transfer history and rates prediction
c12 A69-21480
Incompressible two dimensional turbulent boundary layer equations with arbitrary pressure distribution solved by weighted residual method
[AIAA PAPER 69-397] c12 A69-30478
Density and velocity fluctuations in hypersonic turbulent boundary layer based on Wallace data
c12 A69-31908
Boundary layer trip geometry, size and location effects on position of transition at hypersonic speeds
c12 A69-33249
Skin friction drag reducing high polymer solution injected into turbulent boundary layer to test effectiveness on marine vehicles
c12 A69-33254
Incompressible turbulent boundary layer analysis by two region characterization for eddy viscosity, using Spalding generalized function and Prandtl free shear flow model
c12 A69-33255
Compressible hypersonic turbulent boundary layers solution by finite difference method, relating mixing length to velocity profile shape factor
[AIAA PAPER 69-684] c12 A69-33474
Determination of drag of fabrication-type surface roughness in turbulent boundary layer at transonic speeds
[NASA-TN-D-5004] c01 N69-16460
Mathematical model for determining total drag of pointed body of revolution in supersonic flow with turbulent boundary layer
[NASA-TN-D-5046] c01 N69-19925
Calculation of compressible turbulent boundary layers with pressure gradients and heat transfer
[NASA-CR-1303] c12 N69-21653
Turbulent boundary layer of subsonic transport fuselage with pressure gradient, Reynolds number, and angle of attack
[NASA-TN-D-5242] c01 N69-28112
Skin friction and heat transfer data for hypersonic turbulent layer on flat plates, wind tunnel wall, and cones
[NASA-TN-D-5089] c12 N69-29144
Flow field measurements on flat plate with attached protuberances in supersonic turbulent boundary layer
[NASA-TN-D-5297] c12 N69-30071
Turbulent boundary layer temperature and velocity measurements in supersonic water-cooled conical nozzle
[NASA-TN-D-5377] c12 N69-33353
Statistical analysis of pressure fluctuations in separated turbulent boundary layer
[NASA-TN-D-5440] c12 N69-36940
Fluctuating properties of turbulent boundary layers for Mach numbers up to 9
[NASA-TN-D-5496] c12 N69-40137

TURBULENT DIFFUSION
Plasmapause and relation to ion composition in topside ionosphere, using Bohm coefficient for turbulent diffusion
c13 A69-12741

TURBULENT FLOW
Direction of maximum turbulent vorticity in turbulent shear flow, determining alignment
c12 A69-25282
Supersonic Preston tube correlations for Mach number and Reynolds number effects on hypersonic turbulent skin friction on adiabatic surfaces, simplifying correlation
[AIAA PAPER 69-345] c12 A69-28280
Linear amplification, nonlinear limiting and secondary instability induced by unsteady effects illustrated for various transitional flows, including roughness and streamwise vorticity
c12 A69-33248
Turbulence measurements and roughness effects on viscous drag reduction with polymer solution in pipe flow, discussing friction factor, wall velocity profile, etc
c12 A69-33252
Concentration, flow rate and tube diameter effects on viscous drag reduction in nonpolar soap solutions, using pressure drop measurements to observe turbulent flow behavior
c12 A69-33253

Baronti-Libby transformation and Preston tube calibrations used to determine skin friction from turbulent velocity profiles
[NASA-TN-D-4853] c12 N69-10472
Nonlinear disturbance decay in unbounded viscous fluid
[NASA-TN-D-4947] c12 N69-14483
Turbulent boundary layer measurements on axisymmetric hypersonic nozzle walls
[NASA-TN-D-5433] c12 N69-36805
Flow model for vortex shedding from slender body in coning motion
[NASA-CR-1448] c12 N69-40200

TURBULENT HEAT TRANSFER
Acceleration effects on forced convection in turbulent boundary layer, noting heat transfer history and rates prediction
c12 A69-21480
Penetration model explanation for turbulent forced convection heat transfer in near-critical fluids
[NASA-TN-D-5522] c33 N69-40437

TURBULENT JETS
Three dimensional laser Doppler velocity instrument for mean velocity and turbulence measurements in subsonic jet shear layer
[SAE PAPER 690266] c14 A69-21555

TURBULENT MIXING
Effects of free stream turbulence and boundary layer trip devices on mixing in jet stream
[NASA-CR-1336] c12 N69-24058
Turbulent mixing of compressible air in supersonic and subsonic coaxial jet flows
[NASA-TN-D-5315] c02 N69-30727
Turbulence in mixing region of ducted coaxial flow of air-air and air-Freon 12 combination
[NASA-CR-1335] c12 N69-30728
Numerical analysis of laminar and turbulent mixing region for two dimensional jet injected at angle to moving stream
[NASA-TN-D-5531] c12 N69-41213

TURBULENT WAKES
Light aircraft hazards due to trailing vortex generated by heavy transport aircraft, suggesting specific procedures for takeoff, landing and flight phase
[SAE PAPER 680220] c02 A69-14930
Flow field throughout wind tunnel containing rotor with sharply defected blades, noting reversed flow effect in front of wake
c11 A69-35228

TURNING FLIGHT
Direct side-force maneuvering system on deflected X-14A jet VTOL aircraft without changing bank angle
[NASA-TN-D-5175] c02 N69-22572

TWENTY-FOUR HOUR ORBITS
Low degree earth gravity harmonics effect on 12 and 24 hour orbits of high altitude communications satellites
c13 A69-14661

TWENTY-SEVEN DAY VARIATION
Solar cycle and slowly varying components correlation with soft X ray radiation based on spacecraft measurements
c29 A69-40504

TWILIGHT GLOW
Spectral and electrophotometric studies of upper atmosphere - airglows, atomic oxygen, hydroxyl emission, helium line spectra, auroras, and solar cycle effects on magnetosphere
[NASA-TT-F-530] c13 N69-16539

TWO BODY PROBLEM
Second order errors in linearized velocity corrections and their effects on rate of convergence of iterative solutions
[NASA-TN-D-5037] c21 N69-17780

TWO DIMENSIONAL BODIES
Flow characteristics in two dimensional channel with rectangular cavity
[NASA-CR-1245] c12 N69-14095
Photoviscoelastic method for stress analysis of two dimensional viscoelastic models
[NASA-CR-1289] c32 N69-17770

TWO DIMENSIONAL FLOW
Unsteady two dimensional flow in square cavity with fluid initially at rest and constant velocity upper surface of cavity, noting vortex center
[AICHE PAPER 25C] c12 A69-14510
Finite difference method computer programs for calculation of velocities and streamlines on blade to blade surface of revolution of turbomachine
[ASME PAPER 69-GT-48] c01 A69-22495
Incompressible two dimensional turbulent boundary layer equations with arbitrary pressure distribution solved by weighted residual method
[AIAA PAPER 69-397] c12 A69-30478
Quasi-linear ordinary differential equations solutions for steady two dimensional stagnation point flows of nonNewtonian power law fluids
c12 A69-39674
Transonic wind tunnel tests of aerodynamic drag and lift forces on circular cylinder in two dimensional flow at high Reynolds number
[NASA-TR-R-300] c01 N69-17304
Conformal mapping of two dimensional jet flow from two nozzles striking plane surfaces
[NASA-TN-D-5064] c01 N69-17816

TWO DIMENSIONAL JETS
Analytical solution for inviscid separated jet injection at oblique angle into moving stream
[NASA-TN-D-5460] c12 N69-37965

TWO FLUID MODELS
Hydrodynamic stability and vortex containment of two fluid wheel flow to helical disturbances contained by axial magnetic field
[NASA-TN-D-5372] c12 N69-32377

TWO PHASE FLOW
Interphase momentum transfer during propagation of infinitesimal pressure pulse through bubbly flow two phase mixture
c33 A69-43511
Measurement of liquid and two phase hydrogen densities with capacitance density meter
[NASA-TN-D-5015] c14 N69-23470
Two phase hydrogen flow in pump inlet line
[NASA-TN-D-5258] c15 N69-29476
Corrosion in cobalt alloy two phase mercury loop
[NASA-TN-D-5326] c17 N69-31065

TWO REFLECTOR ANTENNAS
Rosman I reflector antenna for collecting data from earth orbiting satellites, discussing dynamic analysis of structural response to natural frequencies
c32 A69-42133

TWO STAGE TURBINES
Scale models of M-1 rocket engine oxygen and hydrogen pump driven two stage turbines used to determine performance and compact inlet manifolds problems
[AIAA PAPER 69-553] c28 A69-32678
Flow analysis to determine turbine efficiency as function of inlet temperature for two stage turbine
[NASA-TM-X-1728] c01 N69-17392
Performance of two stage axial flow turbogenerator with gas bearing rotor support system
[NASA-CR-1290] c03 N69-21771

TYPE 3 BURSTS
Type 3 solar radio bursts observed during April - October 1967 for two alternative models of active region streamers in outer corona
c29 A69-40300

TYPE 4 BURSTS
Synchroton radiation HF cut-off resulting from electrons with anisotropic pitch angle distribution for type 4 solar radio bursts
c29 A69-40577

U

U.S.S.R.
Bibliography of works of Soviet engineer F. A. Tsander
[NASA-TT-F-541] c34 N69-26112
Soviet research on high temperature strength of materials and machine parts
[NASA-TT-F-508] c17 N69-27300
Adaptation to hypoxia, acclimatization, and conditioning in human and animal subjects from Space Biology collection
[NASA-TT-F-580] c04 N69-32131

ULTRAHIGH FREQUENCIES
Transfer of microwave radiation in atmosphere and underlying surfaces measured by aircraft instruments
[NASA-TT-F-590] c13 N69-31851

ULTRAHIGH VACUUM
Thermal stability and friction of disulfides, diselenides, and ditellurides of molybdenum and tungsten in ultrahigh vacuum
[NASA-TN-D-5141] c15 N69-22992
Mechanical behavior of tantalum T-111 alloy at high temperatures and ultrahigh vacuum
[NASA-CR-1436] c17 N69-36831
ULTRASONIC RADIATION
Velocity of 1 MHz sound waves in He 4 along isotherms just above critical temperature, noting specific heat ratio for 4.5 and 5 K isotherms
c23 A69-17142
Holographic displays using ultrasonic vibrations or laser outputs as optical sources, discussing recording materials, responses and computer applications
c14 A69-21394
ULTRASONIC TESTS
Ultrasonic detection and measurement of fatigue cracks in notched cylinders subjected to reversed axial cyclic loading
c14 A69-10113
Effect of ultrasonic vibration on precipitation hardening of steels and superalloys
[NASA-TN-D-5131] c32 N69-21814
ULTRASONICS
Ultrasonic pulse velocity and attenuation measurement in presence of noise, using coherent detection and signal averaging
c14 A69-29564
ULTRAVIOLET PHOTOMETRY
Rocket-borne photoelectric photometers for UV observations of Saturn, using interference filters
c30 A69-22216
ULTRAVIOLET RADIATION
Photodegradation of organic polymers by UV radiation exposure, emphasizing polyvinyl chloride photochemistry and radiation stabilization
c18 A69-10861
Rocket-borne spectroheliograph for monochromatic solar photography in Mg II 2802.7 A line noting filter bandwidth, film polarizers and temperature control
c14 A69-24838
Empirical determination of heating efficiency of extreme solar UV radiation interacting with carbon dioxide atmosphere of Mars and Venus
c30 A69-26019
UV irradiation effects on ZnO spacecraft thermal control coating pigments, discussing photo-Hall, luminescence and electron paramagnetic resonance measurements
[AIAA PAPER 69-639] c18 A69-33288
Transmission effects on plastic films irradiated with ultraviolet light in vacuum
[NASA-TM-X-1905] c18 N69-40339
ULTRAVIOLET SPECTROPHOTOMETERS
Spinning rockets UV spectrophotometry of early type stars, discussing instrumentation, calibration, data recording and stellar spectra
c30 A69-25812
Interstellar extinction in UV from zeta and epsilon Persei spectra obtained with scanner attached to telescope mounted in pointed Aerobee rocket
c30 A69-40772
ULTRAVIOLET SPECTROSCOPY
Vacuum ultraviolet detector-spectroscopy systems for capsule reentry measurements
[NASA-CR-1268] c09 N69-18761
UMBILICAL TOWERS
Vibration characteristics of 1/40 scale model of Saturn 5 launch vehicle and umbilical tower configuration
[NASA-TN-D-4870] c31 N69-10775
Direct stiffness method of computing vibrational characteristics of dynamic model of Apollo-Saturn 5 vehicle - umbilical tower configuration
[NASA-TN-D-4871] c31 N69-10934
UNDERWATER TESTS
Correlation study of simulation of Gemini extravehicular activity with flight results
[NASA-CR-1146] c05 N69-19902
Weightlessness simulation of Gemini extravehicular tasks using neutral-buoyancy underwater techniques
[NASA-TN-D-5235] c05 N69-28024
UNIFORM FLOW
Performance and stall limits of YTF30-P-1 turbofan engine with uniform compressor inlet flow
[NASA-TM-X-1803] c28 N69-27019
UNITED STATES OF AMERICA
Federal government contracting, discussing legality of NASA service contracts
c34 A69-15987
UNITS OF MEASUREMENT
Mathematical model for measurement scale forms
[NASA-TN-D-5277] c19 N69-29141
UNIVERSE
Radioactive decay of neutral pions generated in metagalactic cosmic ray interactions as source of high energy isotropic gamma rays observed by OSO-3
c29 A69-12092
Cosmic gamma rays spectrum from neutral pions production and decay in metagalactic cosmic ray p-p collisions, deriving models based on Einstein general relativity theory
c29 A69-40641
Red shift-magnitude relation for universe model and observational data
[NASA-TN-D-5398] c30 N69-34884
UNIVERSITY PROGRAM
NASA university program, discussing participation in space and aeronautics developed based on project oriented research grants and sustaining university grants
[UN PAPER 68-95413] c34 A69-10506
UNMANNED SPACECRAFT
Meteorological satellite research program, including unmanned satellite observations and possibilities with meteorologist on board manned spacecraft
[UN PAPER 68-95350] c20 A69-10483
Longitudinal range dispersion of unmanned Mars landers using VM-8 and VM-9 atmospheric models, discussing Syrtis Major as possible landing site
c30 A69-12390
Effect of spacecraft onboard radar range and range rate data and accuracy on unmanned probe entry guidance corridor
[NASA-TN-D-4852] c21 N69-16503
UNSTEADY FLOW
Unsteady two dimensional flow in square cavity with fluid initially at rest and constant velocity upper surface of cavity, noting vortex center
[AICHE PAPER 25C] c12 A69-14510
Linear amplification, nonlinear limiting and secondary instability induced by unsteady effects illustrated for various transitional flows, including roughness and streamwise vorticity
c12 A69-33248
Unstable combustion of hydrazine-nitrogen tetroxide caused by transverse gas flow
[NASA-TN-D-4984] c27 N69-19026
UPGRADING
Upgrading of electronic power supply for greater reliability in aerospace use
[NASA-TM-X-1875] c03 N69-35763
UPPER ATMOSPHERE
Electron, ion and neutral particle temperatures of upper atmosphere
c13 A69-14975
Semiannual density variations in thermosphere and exosphere as function of mixtopause height variations
c13 A69-26012
Electron concentration enhancement in upper atmosphere at polar latitudes, noting three independent zones and relation to magnetic local time
c29 A69-28938
UV solar radiation variation effects on Mars and Venus upper atmosphere temperatures
c30 A69-37136
Spectral and electrophotometric studies of upper atmosphere - airglows, atomic oxygen, hydroxyl emission, helium line spectra, auroras, and solar cycle effects on magnetosphere
[NASA-TT-F-530] c13 N69-16539
Survey of rocket soundings to 60 km, and 100 km
[NASA-CR-1293] c13 N69-18700

UPPER IONOSPHERE
Nonvertical propagation effects on high altitude topside ionosphere sounder data reduction, using ray tracing
c13 A69-18838
Ion composition and charged particle temperatures at 300-600 km from sounding rocket and topside sounder Alouette 2 measurements
c13 A69-18839
Satellite measurements of suprathermal electrons at conjugate sunrise, indicating photoelectron escape from production level and movement along geomagnetic lines into conjugate ionosphere
c29 A69-25144
Ionospheric satellites objectives and development resulting from topside sounder and ISIS programs
c13 A69-37855
Topside ionogram reduction for ionospheric electron density determination, using geomagnetic strength at all heights, iteration and change of variables
c13 A69-37864
Global electron density distribution morphology in topside ionosphere during sunspot minimum from Alouette 1 and 2 ionograms
c13 A69-37867
Applicability and limitations of diffusive equilibrium in topside ionosphere, noting plasma density distribution along magnetic field line
c13 A69-37887
Diurnal and seasonal variations of primary atmospheric ions in topside ionosphere correlated with solar zenith angle, using ion mass spectrometer on Explorer 32
c13 A69-38087
Topside ionosphere response to magnetic storms, using Explorer 22 satellite electron concentration and temperature measurements
c13 A69-42438
Computation of topside ionograms from electron concentration profiles
[NASA-TN-D-5052] c13 N69-23557
UPWASH
Upwash patterns on ablating and nonablating cones at hypersonic speeds
[NASA-TN-D-5346] c12 N69-37370
URANIUM
Gaseous reactor fluid mechanics for nuclear rocket engines, discussing experiments on geometries used in open cycle engine for acceptable uranium loss rate
[AIAA PAPER 69-477] c22 A69-32728
Group cross section generating techniques to calculate neutron capture rates and spatial capture distribution in depleted thick U slab, using GAROL program
c24 A69-35179
Compatibility tests of molten uranium with tungsten and tungsten-1.5 percent hafnium
[NASA-TN-D-5076] c17 N69-19930
Composition and line emission characteristics of ionized tungsten, uranium, and argon
[NASA-CR-1313] c25 N69-21124
Spectral emission characteristics of gaseous tungsten and uranium in induction heated argon plasmas
[NASA-CR-1314] c25 N69-22920
Tungsten and depleted uranium in minimum weight, layered shield comparisons for space power reactor
[NASA-TM-X-1874] c22 N69-35817
URANIUM CARBIDES
Uranium carbides irradiation tests for control of nuclear fuels fission gas swelling
[NAA-SR-12629] c22 N69-22946
URANIUM COMPOUNDS
Uranyl ions interaction with phospholipid and cholesterol monolayers, using surface pressure and potential measurements
c06 A69-25641
Fabrication of cermets of uranium nitride and tungsten or molybdenum from mixed powders and from coated particles for nuclear fuel elements
[NASA-TN-D-5136] c17 N69-21404
URANIUM OXIDES
Uranium dioxide vent loss in externally fueled thermionic reactor concept
[NASA-TN-D-4922] c22 N69-10099
Fission product gas pressure calculated for uranium dioxide ceramic fuel elements
[NASA-TN-D-4823] c22 N69-10216
Rate of loss of uranium dioxide or uranium mononitride from vented nuclear fuel element
[NASA-TN-D-4913] c22 N69-10734
Nondestructive methods for fuel density determination in uranium dioxide
[NASA-TM-X-1779] c22 N69-22555
Radial power tailoring for uranium dioxide-T-111 clad reactor with contained fission product gases
[NASA-TM-X-1795] c22 N69-25305
Heat transfer and neutronic calculations after fuel emitter separation in uranium oxide fueled thermionic diodes
[NASA-TM-X-1812] c22 N69-28212
Furnace brazing butt joints in tungsten-uranium dioxide cermet cylinders at 3000 deg C
[NASA-TM-X-1815] c15 N69-28862
URANIUM 233
Uranium 233 critical mass requirements, neutron kinetic behavior, and neutron and gamma ray heating rates for nuclear light bulb rocket engine
[NASA-CR-1315] c25 N69-23451
Reflector based poison drum control on equal size reactor cores fueled with U-233 and U-235
[NASA-TM-X-1883] c22 N69-36756
URANIUM 235
Reflector based poison drum control on equal size reactor cores fueled with U-233 and U-235
[NASA-TM-X-1883] c22 N69-36756
URANIUM 238
Multigroup calculations of resonance neutron capture in thick slab of depleted U-238
[NASA-TM-X-1878] c24 N69-36901
URANUS (PLANET)
Planetary flight handbook - direct trajectories to Jupiter, Saturn, Uranus, and Neptune
[NASA-SP-35-VOL-3-PT-7] c30 N69-33490
URBAN DEVELOPMENT
Multispectral orbital photography used to obtain urban land-use data
[AAS PAPER 69-483] c13 A69-42837

V

V GROOVES
Herringbone grooved gas lubricated journal bearing stability, testing effects of geometries and clearances on onset speed for half frequency whirl
[ASME PAPER 68-LUBS-25] c15 A69-27271
Plasma generation using large V-groove cathode discharge
[NASA-TN-D-5269] c25 N69-29140
V/STOL AIRCRAFT
V/STOL aircraft characteristics, emphasizing propeller, ducted fan and turbojet types
c02 A69-15563
Wind tunnel wall constraints effects at extreme force coefficients during V/STOL testing shown different from effects in conventional aircraft testing
c11 A69-15574
Exhaust gas reingestion and inlet flow distortion in V/STOL lift engines, discussing static and wind tunnel testing using fighter configuration models
[AIAA PAPER 68-78] c01 A69-26762
Aerodynamics of rotary wing and V/STOL aircraft-Conference, Buffalo, June 1969, Volume 2, Wind tunnel testing, new concepts in rotor control
c01 A69-35226
V/STOL aircraft radar inertial navigation system, describing approach and landing phase flight test results
[AAS PAPER 69-401] c02 A69-42831
Instrument display devices for landing VTOL aircraft
[NASA-TN-D-4861] c21 N69-10069
Aerodynamic characteristics of large semi-span V/STOL tilt-wing with single propeller tested for modes of propeller rotation
[NASA-TN-D-5016] c01 N69-17312
Computer program for calculating wall interference factors of V/STOL aircraft and conventicnal airplanes

[NASA-TR-R-302] c01 N69-19028
Wind tunnel tests for V/STOL aircraft having direct-lift and lift-cruise jet nozzles
[NASA-TM-X-1758] c01 N69-20016
Wind tunnel investigation of static stability characteristics of model jet-lift V/STOL research airplane
[NASA-TM-X-1835] c02 N69-30633
Jet exhaust location effects on longitudinal aerodynamic characteristics of jet V/STOL model
[NASA-TN-D-5333] c01 N69-33210
Performance of turbine driven V/STOL cruise fan propulsion system at subsonic Mach numbers
[NASA-TN-D-5314] c28 N69-35526
Empirically determined wind and scale effects on hot gas recirculation characteristics of jet V/STOL aircraft
[NASA-CR-1445] c28 N69-40776

VACUUM
Disk radiometer for use in space vacuum-thermal environmental studies
[NASA-TN-D-4925] c14 N69-13311
Rate of rise outgassing measurement technique in vacuums
[NASA-TN-D-4973] c14 N69-16097
Impingement forces, moments, and centers of pressure due to air jets in vacuum sphere
[NASA-TN-D-5147] c12 N69-23085
NERVA control drum actuator tests in cryogenic temperature, nuclear radiation, and vacuum environments
[NASA-TN-D-5347] c22 N69-31870

VACUUM APPARATUS
Vacuum distillation technique for isolation and recovery of alkali metal reaction products with Ta, Ni, V and oxygen
c14 A69-10927
Vacuum distillation determination of O in Li, evaluating accuracy through O additions and recoveries, method blank and residue identification
c06 A69-40932

VACUUM CHAMBERS
In situ vacuum testing requirement for valid measurement of vacuum induced changes in mechanical and thermal properties of various filled elastomers
c11 A69-22008
Solid solutions atomic ordering effect on friction and wear in vacuum, using CuAu and FeCo systems
c15 A69-35183
Pressure measurements and gas flow analysis during thermal vacuum tests of manned spacecraft indicating adequate space vacuum simulation
[AIAA PAPER 69-1033] c11 A69-40401
Biomechanical factors determining lung damage following explosive decompression of space suits in vacuum test chambers
[NASA-CR-1223] c05 N69-13969

VACUUM DEPOSITION
Physical sputtering deposition of molybdenum disulfide films as solid lubricant on rotating and sliding components, discussing lubrication properties in vacuum
[ASLE PAPER 68-LC-15] c15 A69-19308
Energetics in solid film lubricants vacuum deposition methods, showing dependence on interfacial and film characteristics
c15 A69-29001
Thin film formation, deposition methods and relation to film structure and properties
c26 A69-43344

VACUUM EFFECTS
Polymer films tensile properties after exposure to gamma radiation in vacuum, noting chain scission and cross linking
[ASME PAPER 68-WA/RP-6] c18 A69-16160
In situ vacuum testing requirement for valid measurement of vacuum induced changes in mechanical and thermal properties of various filled elastomers
c11 A69-22008
Sliding friction tests of Cu and Cu-Be alloy plates in contact with various alloy sliders in air and vacuum
[ASLE PAPER 68-LC-5] c15 A69-30610
Solid film lubricants deposited by DC triode sputtering on Ni, Ni-Cr and Nb surfaces friction tested under ultrahigh vacuum conditions
c15 A69-43126
Transmission effects on plastic films irradiated with ultraviolet light in vacuum
[NASA-TM-X-1905] c18 N69-40339

VACUUM GAGES
Volume-ratio system for vacuum gage calibration from 10 to minus 8 to 10 torr
[NASA-TN-D-5406] c14 N69-35265

VACUUM MELTING
Vacuum arc melted W and W-Re alloys mechanical properties, noting Re additions effects
c17 A69-20190

VACUUM SPECTROSCOPY
Vacuum ultraviolet detector-spectroscopy systems for capsule reentry measurements
[NASA-CR-1268] c09 N69-18761

VACUUM SYSTEMS
Magnetron ionization gauge in helium for low pressure measurement, discussing striking characteristics and time lags
c03 A69-10606
Glass vacuum systems grease free assembly method using heat shrinkable polyolefin sleeve tubing connector for compression of O ring joints
c15 A69-20529
Vacuum distillation determination of oxygen in lithium
[NASA-TN-D-5197] c06 N69-23706
Cryogenic molecular beam system with pressure attenuation
[NASA-TN-D-5308] c24 N69-31338
Quantitative method for determination of fission gases trapped in irradiated fuel forms
[NASA-TM-X-1893] c22 N69-37225

VACUUM TUBES
Vacuum tube with cathode heated directly by external radioisotope source, noting heat pipe providing isothermal heat transfer
c09 A69-24748

VALVES
Fast response electrohydraulic valve-controlled piston servo systems
[NASA-TN-D-5388] c03 N69-34652

VANADIUM
Electron microprobe analysis of vanadium in presence of titanium by compositional measurement of chromite in chondritic meteorites
c06 A69-18419
Solubility of vanadium in liquid potassium
[NASA-TN-D-5093] c17 N69-20789

VAPOR DEPOSITION
Powder metallurgy, fusion and chemical vapor deposition techniques in manufacturing tungsten base alloys
c17 A69-18792
Cubic /beta/ silicon carbide films deposition by volatilization in presence of acetylene
c26 A69-21350
Chemical processes in silicon carbide due to reactive deposition and chemical conversion, noting silicon growth mechanism involving outward diffusion
c26 A69-21351
Ge films formation by evaporation technique, discussing background O pressure effect
c26 A69-43345
Thermionic converter with chloride vapor deposited tungsten emitter and nickel collector
[NASA-CR-1416] c03 N69-32553
Technique for measuring ion energy loss in vapor deposited materials
[NASA-TN-D-5430] c24 N69-36929

VAPOR PHASES
Oxygen depletion effect in chemical reactions between pyrolysis gases and air stream on surface recession of charring ablators
[AIAA PAPER 68-302] c33 A69-21982
Laser ignited combustion of 365 micron Zr droplets falling in ultrapure oxygen using spectroscopic and photographic techniques, discussing vapor phase transport phenomena
[WSCI PAPER 69-4] c27 A69-32345
Dissociation energy of gaseous titanium nitride
[NASA-TN-D-5027] c06 N69-19129
Thermodynamic properties of liquid and gas phase equilibria of water plus heavy water
[NASA-TN-D-5223] c33 N69-26247
Computer program used to infer atmospheric water-vapor mixing ratio from measured horizon

radiance profiles
[NASA-TN-D-5252] c13 N69-27246
Net positive suction head requirements for helical inducer in liquid hydrogen under varied flow and temperature conditions
[NASA-TM-X-1808] c09 N69-27841
Transient condensing with freezing on nonisothermal inclined plate
[NASA-TN-D-5289] c33 N69-29598

VAPOR PRESSURE
Mean drop size generated in vapor pressure regime of liquid water jet, noting effect of water temperature and orifice diameter
c12 A69-21995

VAPORS
Vapor ingestion phenomenon during draining in weightlessness
[NASA-TN-D-5210] c12 N69-24917

VARACTOR DIODES
Computerized design parameters for realizable overdriven bimode varactor frequency doubler based on charge-voltage relationship at break point
c09 A69-37299

VARIABLE GEOMETRY STRUCTURES
Aerodynamic and flight characteristics of variable geometry entry spacecraft during subsonic wing deployment and landing
[AIAA PAPER 69-742] c01 A69-34407
Hypersonic aerodynamic characteristics of low fineness ratio variable geometry logistics spacecraft model
[NASA-TM-X-1701] c01 N69-13218
Transonic wind tunnel evaluation of variable stabilizer configuration effects on hypersonic elliptical lifting body dynamics
[NASA-TM-X-1789] c01 N69-25244

VARIABLE STARS
Variable He star HZ29, noting unusually wide and shallow He I lines and possible mass and composition
c30 A69-16931
Star twinkling absence for lunar observation laboratory, noting star distance measurement and laser action in stellar atmospheres
c30 A69-27172
Radial pulsation mode of convective envelopes in adiabatic equilibrium for variable M red supergiant stars
c30 A69-30766
Variable stars blue sequence, proposing mu mechanism and beta mechanism as explanation for radial pulsations
c30 A69-40650
IR excess of R CrB type variable star RY Sgr, noting visual brightness and radiation in 2.0-3.4 micron range
c30 A69-42377

VARIABLE SWEEP WINGS
Large scale wind tunnel tests to improve longitudinal stability of supersonic transports with variable swept wings
[NASA-TN-D-5005] c02 N69-16384

VARIANCE (STATISTICS)
Recursive equation for estimating variance of sequential random numbers
[NASA-TN-D-5465] c19 N69-38178

VARIATIONS
Comparison of ray trace methods for estimating sound intensity variations due to atmospheric variability as determined by Monte Carlo methods
[NASA-CR-1337] c23 N69-23199
Fluctuating properties of turbulent boundary layers for Mach numbers up to 9
[NASA-TN-D-5496] c12 N69-40137

VECTOR ANALYSIS
Vector integral extension to optimal trajectory coordinate multiplier systems with constant of motion demonstrated for coast-arc problem
[AIAA PAPER 69-907] c30 A69-39339
Computer mechanization of reentry equations with four degrees of freedom
[NASA-CR-1249] c30 N69-13300

VECTORS (MATHEMATICS)
Approximation for mean and standard deviation of magnitude of statistical velocity correction vector
[NASA-TN-D-5381] c30 N69-36143

VELOCITY
Fluctuating properties of turbulent boundary layers for Mach numbers up to 9
[NASA-TN-D-5496] c12 N69-40137

VELOCITY DISTRIBUTION
Unsteady two dimensional flow in square cavity with fluid initially at rest and constant velocity upper surface of cavity, noting vortex center
[AICHE PAPER 25C] c12 A69-14510
Stony meteoric particles size and velocity during passage through atmosphere
c30 A69-26341
Solar wind Helmholtz-type velocity discontinuities, noting plasma density and temperature stabilities from Explorer 34 observations
c29 A69-29971
Radio galaxy Messier 87 mass determined using virial theorem for nucleus velocity dispersion
c30 A69-30883
Density and velocity fluctuations in hypersonic turbulent boundary layer based on Wallace data
c12 A69-31908
Baronti-Libby transformation and Preston tube calibrations used to determine skin friction from turbulent velocity profiles
[NASA-TN-D-4853] c12 N69-10472
Use of photoionization in measuring velocity profile of free stream flow in expansion tube
[NASA-TN-D-4936] c12 N69-13945
Response of infinite elastic plates to axisymmetric initial velocity distributions with application to hypervelocity impact
[NASA-TN-D-5118] c32 N69-23448
Graphical interpolation charts of local skin friction from compressible velocity profiles
[NASA-SP-3048] c01 N69-25391
Weighting factor for correction of photographic bias caused by variation in mass and velocity of sporadic meteoroids
[NASA-TN-D-5245] c30 N69-26239
Torque and leakage rates of various lubricated lip seal designs at peripheral velocity of 120 feet per second
[NASA-TN-D-5411] c15 N69-35769
Elastohydrodynamic analysis and experimental speed effects on ball spinning friction coefficients and torque
[NASA-TN-D-5527] c15 N69-41210

VELOCITY ERRORS
Interplanetary midcourse velocity correction schedules optimization, discussing timing equations modifications, mission simulation and role of earth based radar
c21 A69-39646
Second order errors in linearized velocity corrections and their effects on rate of convergence of iterative solutions
[NASA-TN-D-5037] c21 N69-17780
Approximation for mean and standard deviation of magnitude of statistical velocity correction vector
[NASA-TN-D-5381] c30 N69-36143

VELOCITY MEASUREMENT
High speed compression waves, rarefaction waves and gas interface regions position and velocity measurement in shock tube by sensing electrical impedance
c14 A69-13104
Doppler shift measurements of axial and rotational velocities in MPD arc, using reference lines from iron arc
[AIAA PAPER 69-110] c25 A69-18171
Three dimensional laser Doppler velocity instrument for mean velocity and turbulence measurements in subsonic jet shear layer
[SAE PAPER 690266] c14 A69-21555
Coaxial three coil probe measuring local electrical conductivity and velocity in plasma streams, discussing operations in electrolytes and axisymmetric plasma stream
[AIAA PAPER 69-327] c25 A69-28264
Ultrasonic pulse velocity and attenuation measurement in presence of noise, using coherent detection and signal averaging
c14 A69-29564
Axial velocities in ammonia MPD thrustor exhaust by measuring Doppler shifts of spectral lines

emitted by plasma constituents
c28 A69-31890
Laser Doppler velocity instrument for measuring turbulence and mean velocity in subsonic and supersonic gas flows
[R-67-4450] c14 N69-14351
FORTRAN program for calculating velocities and streamlines on blade to blade stream surfaces of turbomachinery
[NASA-TN-D-5044] c01 N69-21811
Turbulent boundary layer temperature and velocity measurements in supersonic water-cooled conical nozzle
[NASA-TN-D-5377] c12 N69-33353
Object motion effect in Fraunhofer holography with application to velocity measurements
[NASA-TN-D-5515] c14 N69-40812

VENTILATION
Ventilation-perfusion inequality increase effects on lung overall gas exchange, using digital model
c05 A69-38388

VENTING
Rate of loss of uranium dioxide or uranium mononitride from vented nuclear fuel element
[NASA-TN-D-4913] c22 N69-10734
Venting of spherical liquid hydrogen tankage
[NASA-TN-D-5263] c33 N69-27620

VENTURI TUBES
Venturi meter with separable diffuser and radial outward step at transition from throat to diffuser, noting effect of step on efficiency
[ASME PAPER 68-WA/FM-2] c14 A69-16135
Prediction of thermodynamic effects of developed cavitation based on liquid hydrogen and Freon-114 data in scaled venturis
[NASA-TN-D-4899] c12 N69-10070

VENUS (PLANET)
Critique of paper on water crystal existence on Venus, presenting arguments against existence of clouds of micron sized ice crystals
c30 A69-11292
Manned Mars and Venus missions role in overall planetary exploration program
c30 A69-12304
Chemical composition of Earth, Venus, Mars, Mercury and Moon calculated from mathematical models, constructing approximate equations of state at high pressure
c30 A69-29878
Research problems in atmospheric entry and landing of manned planetary space flights to Mars and Venus
[NASA-TN-D-4977] c31 N69-15634
FORTRAN computer program for providing mission design data for elliptical orbits around Mars and Venus
[NASA-TN-D-5104] c30 N69-22571
Radar observations and radiophysical investigations of Venus
[NASA-TT-F-536] c30 N69-38643

VENUS ATMOSPHERE
Venus microwave phase effect analyzed assuming dry massive Venus atmospheric model, discussing heat transfer processes
c30 A69-12108
Venus exospheric temperature for various composition models, discussing carbon dioxide concentration effects
c30 A69-12109
Venus atmosphere origin, discussing high temperature effects and chemical composition via space probe and terrestrial observations
c30 A69-23183
Atmospheric models for exospheric temperatures of Mars and Venus based on photoionization heating efficiency
c30 A69-26020
Venus atmosphere chemical composition, surface temperature and pressure obtained by Venera 4 and Mariner 5
c30 A69-26129
Visual ashen light observation on Venus possibly attributable to solar particle bombardment from dark side emission detection by spectroscopic and photometric studies
c30 A69-32300
Cloud scattering corrections added to synthetic spectrum analysis of carbon dioxide bands and water vapor line in Venus spectrum
c30 A69-33161
UV solar radiation variation effects on Mars and Venus upper atmosphere temperatures
c30 A69-37136
Engineering models of Venus atmosphere for design and mission planning for spacecrafts
[NASA-SP-8011] c30 N69-20916

VENUS PROBES
Venus atmosphere origin, discussing high temperature effects and chemical composition via space probe and terrestrial observations
c30 A69-23183

VERTICAL DISTRIBUTION
Radar backscatter and rocket profiles of ionospheric electron temperature, noting agreement in daytime flight measurements
c29 A69-25162
Semiannual density variations in thermosphere and exosphere as function of mixtopause height variations
c13 A69-26012
Spectrometric rocket measurements of ion concentrations between 200 and 630 km
c13 A69-31974
Ion, electron and neutral temperatures from ion composition distribution, assuming no change in vertical distribution within horizontal distance between upleg and downleg measurements
c29 A69-31990
Nonlinear least squares optimization program applied to atmospheric temperature sounding, solving for temperatures at various altitudes from simulated carbon dioxide intensity measurements
c13 A69-33156
Vertical tropospheric humidity distribution estimation from IR spectra obtained by TIROS satellites
c13 A69-34284

VERTICAL TAKEOFF AIRCRAFT
Aerodynamics of rotary wing and V/STOL aircraft - Conference, Buffalo, June 1969, Volume 3
c01 A69-41369
Theoretical analysis of axisymmetric flow in VTOL lift fan inlets without crossflow
[NASA-TN-D-5065] c01 N69-17831
Lift loss and jet decay measurements on hovering vertical takeoff aircraft models
[NASA-CR-1297] c01 N69-21477
Direct side-force maneuvering system on deflected X-14A jet VTOL aircraft without changing bank angle
[NASA-TN-D-5175] c02 N69-22572
Wind tunnel and analytical study of conversion from wing lift to rotor lift on composite lift VTOL aircraft
[NASA-TN-D-5256] c02 N69-28044
Wind tunnel investigation of steady state aerodynamics of composite lift VTOL aircraft model combining rotary and fixed wings
[NASA-TN-D-5232] c02 N69-28097
Analysis of two dimensional inviscid model jet impingement under verticle takeoff airplane
[NASA-TN-D-5288] c01 N69-29479
In-flight simulation to evaluate simultaneous use of attitude control for jet VTOL maneuvering
[NASA-TN-D-5342] c02 N69-32110
Flight evaluation of tip turbine driven fans for lateral control in hovering VTOL aircraft
[NASA-TN-D-5491] c02 N69-38807

VERY HIGH FREQUENCIES
Solar flare and sunspot effects on VHF communications between synchronous satellite relay and ground stations
[NASA-TN-D-5100] c07 N69-23317

VESTIBULAR TESTS
Human vestibular system and its connection with oculomotor system and their relation to motion perception, spatial disorientation, and illusions
[NASA-CR-1309] c04 N69-22637

VESTIBULES
Rotational velocity estimates by observers during angular acceleration, noting vestibular function interpretation
c04 A69-15332

VHF OMNIRANGE NAVIGATION
Navigation-aids identification decoder and display

device for general aviation aircraft
[NASA-TN-D-5445] c09 N69-38852
VIBRATION
Electron beam technique of measuring molecular rotational and vibrational temperatures of nitrogen in hypersonic tunnel using air as test gas
[NASA-TN-D-4892] c33 N69-10932
Direct stiffness method of computing vibrational characteristics of dynamic model of Apollo-Saturn 5 vehicle - umbilical tower configuration
[NASA-TN-D-4871] c31 N69-10934
Human responses to aerospace environment related to acceleration, vibration, sound, and noise
[NASA-CR-1205-VOL-2] c04 N69-12588
Prediction curves for launch vehicle vibration levels in region of spacecraft adaptor
[NASA-CR-1227] c31 N69-16155
VIBRATION DAMPING
Axial waves in blood vessels, determining phase velocities and damping, noting anisotropic behavior of artery wall
[SESA PAPER 1350] c04 A69-19726
Flutter design charts for isotropic panels stressed to verge of buckling for typical values of structural damping
c32 A69-25524
Effects of structural damping on flutter of stressed panels
[NASA-TN-D-4990] c32 N69-16091
Vibrations of turbomachine rotors and methods for determining optimal hydraulic damping mounts, vibrations of systems with friction, and self induced vibrations of compressor blades
[NASA-TT-F-547] c02 N69-36326
VIBRATION EFFECTS
Human body dynamic response to vibration combined with linear acceleration, noting changes in body mechanical impedance and resonance
c05 A69-11335
Effect of ultrasonic vibration on precipitation hardening of steels and superalloys
[NASA-TN-D-5131] c32 N69-21814
Vibration of shaft face seals and stabilizing effect of viscous and friction damping
[NASA-TN-D-5161] c15 N69-23466
Dynamic stability of mechanisms with elastic couplings under vibratory impact
[NASA-TT-F-534] c15 N69-35859
Vibrations of turbomachine rotors and methods for determining optimal hydraulic damping mounts, vibrations of systems with friction, and self induced vibrations of compressor blades
[NASA-TT-F-547] c02 N69-36326
VIBRATION MODE
Dynamic instability of solid bodies, using modal vibration method to establish criteria on basis of equivalent energy conditions
c32 A69-16742
Geometrically exact finite element for thin shells of revolution, using approximation to predict boundary layer stress distribution during vibration
[AIAA PAPER 69-56] c32 A69-18193
Plasma oscillation modes perpendicular to magnetic field used to study energy conversion by wave coupling across density discontinuity
c25 A69-20795
Dynamic analysis of axisymmetric ring stiffened shells with attached asymmetric elastic structures, noting vibration modes
c32 A69-25525
Finite element method for computing natural frequencies and mode shapes of thin shells of revolution
[NASA-TN-D-4972] c32 N69-16469
Natural vibration modal analysis as related to space vehicle design criteria
[NASA-SP-8012] c32 N69-22773
Effect of shallow meridional curvature on vibration of nearly cylindrical shells
[NASA-TN-D-5143] c32 N69-22821
Longitudinal mass spring modeling of launch vehicles
[NASA-TN-D-5371] c32 N69-34970
VIBRATION SIMULATORS
Temperature and pressure effect on cobalt base alloy cavitation in liquid sodium, using vibratory apparatus and loss rate contour diagram
c17 A69-35184
Vibration test fixture design for mount impedance simulation of aerospace structures
[NASA-CR-1351] c32 N69-26315
VIBRATION TESTS
Vibration characteristics of 1/40 scale model of Saturn 5 launch vehicle and umbilical tower configuration
[NASA-TN-D-4870] c31 N69-10775
Lateral vibration characteristics of dynamic model of Apollo-Saturn 5 launch vehicle
[NASA-TN-D-4872] c31 N69-11007
Saturn 5 launch vehicle scale model tests for free vibration during first stage burn
[NASA-TN-D-5159] c32 N69-22932
VIBRATIONAL SPECTRA
Molecular vibration absorption spectra from variation of field emitted electron energy distribution due to inelastic electron-molecule interaction at metal-vacuum interface
c24 A69-26097
Rate coefficient for primary process in removing molecular nitrogen in high vibrational levels from active nitrogen by N atoms
c24 A69-36424
Molecular vibration spectra from field emission energy distributions
[NASA-TN-D-5423] c24 N69-36924
VIDEO DATA
Adaptive compression system for predicting and encoding video data for transmission in noiseless channel
c14 A69-12869
VIDEO EQUIPMENT
Density measurements of particle tracks in nuclear emulsions utilizing digitized video scan, discussing operation and instrumentation
[IEEE PAPER 2A-7] c14 A69-19185
VIEW EFFECTS
Evaluation of contact analog display in landing approaches with helicopters
[NASA-TN-D-5241] c02 N69-27177
VIKING LANDER SPACECRAFT
Thermal control coatings, windows and mirrors for 1973 Mars Viking Lander vehicles under simulated Martian surface conditions
[AIAA PAPER 69-1023] c11 A69-40393
VINTI THEORY
Vinti dynamic problem relevance to prediction of satellite orbits using differential and integral equations
[NASA-TR-R-307] c30 N69-22948
VIRIAL THEOREM
Radio galaxy Messier 87 mass determined using virial theorem for nucleus velocity dispersion
c30 A69-30883
VIRUSES
Viruslike particles in fat body cells and oenocytes of Drosophila melanogasters imagoes, in glial cells of cephalic ganglionic center of flies and in gamma radiated cells
c04 A69-42021
VISCOELASTICITY
Normal stress effects in viscoelastic fluid theories applied to one dimensional Burgers model of weak turbulence predicting drag reduction
c12 A69-33256
Stable crack propagation in viscoelastic strip of polyurethane rubber
[NASA-CR-1279] c30 N69-21506
VISCOPUMPS
Pump and seal parameters for helical groove, hermetically sealed pump and bearing rotor
[NASA-TN-D-5225] c15 N69-24791
VISCOSITY
Dilute solution of He 3 in He 4 near absolute zero measured for viscosity, showing temperature effect
c23 A69-39582
Model analysis for viscosity in jet mixing flows
[NASA-CR-1382] c12 N69-31887
Surface tension, viscosity, and density of fluorocarbon solvents as function of temperature
[NASA-TM-X-1862] c18 N69-34134
VISCOUS DAMPING
Loss factor and resonant frequency of viscoelastic shear damped structural composites

[NASA-CR-1269] c32 N69-17766
Vibration of shaft face seals and stabilizing effect of viscous and friction damping
[NASA-TN-D-5161] c15 N69-23466
VISCOUS DRAG
Viscous drag reduction - Conference, Dallas, September 1968
c12 A69-33247
Turbulence measurements and roughness effects on viscous drag reduction with polymer solution in pipe flow, discussing friction factor, wall velocity profile, etc
c12 A69-33252
Concentration, flow rate and tube diameter effects on viscous drag reduction in nonpolar soap solutions, using pressure drop measurements to observe turbulent flow behavior
c12 A69-33253
VISCOUS FLOW
Numerical method for time dependent compressible Navier-Stokes equations applied to axisymmetric flow field produced by hypervelocity impact, examining viscous effects
[AIAA PAPER 69-354] c32 A69-28288
Relation between ellipsoidal velocity distribution function and macroscopic flow equations
[NASA-TN-D-5026] c12 N69-17827
Laminar incompressible viscous flow in short cylindrical vortex chamber with finite swirl ratio
[NASA-TN-D-5132] c12 N69-21400
Numerical calculation of viscous compressible flow around harmonic oscillating rigid cylinder
[NASA-CR-1467] c12 N69-38782
VISCOUS FLUIDS
Nondimensional Jeffreys number as ratio of Reynolds to Froude number for gravitational motion of viscous masses, with application to lunar maria and plastic ice
c30 A69-19262
Nonlinear disturbance decay in unbounded viscous fluid
[NASA-TN-D-4947] c12 N69-14483
Physical properties of magnetic base ferrofluids
[NASA-CR-1407] c06 N69-33493
VISIBILITY
Visual acuity and visibility of markings on ground in long duration earth orbital space flight
[NASA-CR-1134] c05 N69-10813
VISUAL ACUITY
Minimal angle of resolution /MAR/ between point and extended circular source and between point source and simulated horizon, studying irradiation effects on manual navigation
c21 A69-19208
Visual acuity and visibility of markings on ground in long duration earth orbital space flight
[NASA-CR-1134] c05 N69-10813
VISUAL DISCRIMINATION
Human perception of multiple-point tactile and visual stimuli
[NASA-CR-1389] c05 N69-39211
VISUAL OBSERVATION
Visual ashen light observation on Venus possibly attributable to solar particle bombardment from dark side emission detection by spectroscopic and photometric studies
c30 A69-32300
Visual observation of meteor and train microstructure obtained by refractor
c30 A69-41058
Atmospheric turbulence limits on resolution of manned aerospace observations of ground
[NASA-TN-D-4940] c20 N69-12934
Pilots and flight simulator used in study of human visual sampling study
[NASA-CR-1258] c05 N69-14145
VISUAL PERCEPTION
High oxygen concentration breathing effect on foveal thresholds, using sea level tests on trained observers
c05 A69-12216
Detection time to light point source noting response to dark, star field and glare source backgrounds
c05 A69-17215
Luminescence effects on apparent size and shape of foveally fixated targets of various forms
c04 A69-36458
Visual sensing and spacecraft guidance for earth orbit rendezvous maneuvers
[NASA-CR-1214] c05 N69-13161
Peripheral vision displays for presenting dynamic control information
[NASA-CR-1239] c05 N69-14478
Differential thresholds for rotary and linear motion in the periphery
[NASA-CR-1439] c05 N69-36925
VISUAL SIGNALS
Visual simulation image generation using flying spot scanner
[NASA-TN-D-5151] c11 N69-23194
VISUAL STIMULI
Human perception of multiple-point tactile and visual stimuli
[NASA-CR-1389] c05 N69-39211
VISUAL TASKS
Minimal angle of resolution /MAR/ between point and extended circular source and between point source and simulated horizon, studying irradiation effects on manual navigation
c21 A69-19208
Human information processing rates during one and two axis compensatory tracking tasks with secondary auditory task
c05 A69-23880
Indirect optical viewing system in F-104B for simulated lifting-body approach and landing tasks
[NASA-TN-D-5299] c14 N69-29730
VOICE COMMUNICATION
Technological and cost factors of voice broadcasts from satellites to earth
[NASA-TM-X-1747] c07 N69-19025
VOICE DATA PROCESSING
Man-computer speech communication, discussing model and aspects of acoustics, phonetics, linguistics, language training, physiology, psychology, bionics, etc
c08 A69-35099
VOIGT EFFECT
Computer program to predict spectra from electronic transitions of diatomic molecules and atoms, noting line intensity distribution by Voigt profile
c24 A69-35239
Computer program for line-by-line calculation of spectra from diatomic molecules and atoms assuming Voigt line profile
[NASA-TN-D-5088] c24 N69-21462
VOLT-AMPERE CHARACTERISTICS
SERT 2 mercury vapor fed hollow cathode operated in bell jar, determining volt-ampere characteristics and flow rates for plasma diagnostics
[AIAA PAPER 69-258] c28 A69-21221
Current oscillations in semiinsulating O and Cr doped GaAs samples at room temperature, noting photoconductivity excitation spectra
c26 A69-21753
Composite carbon resistor characteristics used for accelerator terminal voltage measurement
[NASA-TM-X-1718] c24 N69-14398
VOLTAGE REGULATORS
Passive circuit to transform voltage of indefinitely repeated positive or negative pulses using transistors, diodes and magnetic cores
c09 A69-10564
Magnetic core logic circuit system for bidirectional stepping motor drive voltage power supply control in proper phase and time sequence
c09 A69-11000
Variable voltage dc power supplies for energizing cryogenically cooled and superconductive electromagnets
c03 A69-26498
VOLTERRA EQUATIONS
Coupled set of differential equations describing generalized Volterra problem of conflicting populations and application to plasma oscillations
c19 A69-41260
VOLUME
Volume effects on normal gravity pressurization of spherical liquid hydrogen tanks
[NASA-TN-D-5196] c33 N69-24168

Volume-ratio system for vacuum gage calibration from 10 to minus 8 to 10 torr
[NASA-TN-D-5406] c14 N69-35265
VON ZEIPEL METHOD
Lunar and artificial satellite theories treated by generalization of Von Zeipel procedure
[NASA-TN-D-5459] c30 N69-38145
VORTEX GENERATORS
Performance evaluation of plain rotor blade with plow type vortex generators
[NASA-CR-1342] c28 N69-24223
Flow model for vortex shedding from slender body in coning motion
[NASA-CR-1448] c12 N69-40200
VORTEX INJECTORS
Vortex motion enhancement of jet penetration and spreading in supersonic fuel injection into large diameter combustors
[AIAA PAPER 69-664] c12 A69-33437
Helium penetration and spreading in Mach 2 airstream using Delta wing injector
[NASA-TN-D-5322] c01 N69-30878
VORTICES
Unsteady two dimensional flow in square cavity with fluid initially at rest and constant velocity upper surface of cavity, acting vortex center
[AICHE PAPER 25C] c12 A69-14510
Light aircraft hazards due to trailing vortex generated by heavy transport aircraft, suggesting specific procedures for takeoff, landing and flight phase
[SAE PAPER 680220] c02 A69-14930
Cross hatching on various body surfaces due to periodic surface pressure fluctuations, discussing origin from counter-rotating longitudinal vortices in boundary layer
[AIAA PAPER 69-11] c12 A69-18213
Flexible rotor blade dynamic response to radially moving force, emphasizing helicopter rotor vibration characteristics associated with tip-vortex impingement
[AIAA PAPER 69-203] c02 A69-19546
Laminar incompressible viscous flow in short cylindrical vortex chamber with finite swirl ratio
[NASA-TN-D-5132] c12 N69-21400
Hydrodynamic stability and vortex containment of two fluid wheel flow to helical disturbances contained by axial magnetic field
[NASA-TN-D-5372] c12 N69-32377
VORTICITY
Direction of maximum turbulent vorticity in turbulent shear flow, determining alignment
c12 A69-25282
Linear amplification, nonlinear limiting and secondary instability induced by unsteady effects illustrated for various transitional flows, including roughness and streamwise vorticity
c12 A69-33248
VULCANIZED ELASTOMERS
Vulcanizable elastomers suitable for contact with liquid oxygen, discussing preparation, mechanical properties, transition temperature and structure
c06 A69-16497

W

WAFERS
Breaking of semiconductor single crystal wafer into chips
[NASA-TM-X-1892] c09 N69-38774
WAKES
Droplet wake minimization by surface tension changes
[NASA-CR-1368] c12 N69-24958
Flow and wake characteristics on turbine tandem blades in two dimensional cascade tunnel
[NASA-TM-X-1836] c01 N69-30632
WALL FLOW
Computer program for calculating wall interference factors of V/STOL aircraft and conventional airplanes
[NASA-TR-R-302] c01 N69-19028
WALL TEMPERATURE
Mach number, cone angle, bluntness and wall to recovery temperature ratio effects on slender cones boundary layer transition measurements at hypersonic speeds
c01 A69-33250
Correlation equations for predicting gas-side heat transfer of axisymmetric rocket engine nozzles
[NASA-TM-X-1748] c33 N69-18898
Quartz-insulated, single-wire thermocouples installed on thin-wall rocket cooling tubes to measure hot-gas-side wall temperatures
[NASA-TN-D-5291] c14 N69-29553
Transient temperature fields in porous shell walls cooled by forced flow
[NASA-TT-F-552] c33 N69-30245
Aerodynamic heat flux determined within thermally thick walls for case of rapidly rising heat rates
[NASA-TN-D-5309] c33 N69-30726
Temperature response of wall separating two fluids one with oscillating temperature
[NASA-TN-D-5520] c33 N69-40789
WARNING SYSTEMS
Pilot warning indicators to equip all aircraft at low cost, discussing Doppler system
c21 A69-16726
Development of optical pilot warning indicator system for aircraft detection
[NASA-TN-D-5174] c14 N69-27267
WASTE DISPOSAL
Manned spacecraft waste disposal systems
[NASA-TM-X-1851] c05 N69-33260
WASTE UTILIZATION
Material recovery from metabolic and other wastes for long duration manned space missions, discussing carbon dioxide removal, bioregenerative food systems, etc
[AAS PAPER 69-143] c05 A69-42876
Hydrogenomonas cultures investigated for metabolic waste utilization in aerospace life support systems
[NASA-CR-1296] c05 N69-22766
WATER
Optical parametric noise in water by ruby laser beam for phase matched four photon process
c23 A69-21751
Simultaneous HCN and HOH laser emission in pulsed discharge through mixture containing H, C, N, and O
c16 A69-26330
Water rejection dynamics in hydrogen oxygen fuel cells
[NASA-TN-D-4956] c03 N69-14518
Tandem bladed inducer tested in water for cavitation corrosion
[NASA-TN-D-5134] c01 N69-23769
Calorimetric analyses of metal corrosions in deionized heated water
[NASA-TM-X-1791] c17 N69-25243
Stability of water lubricated herringbone groove journal bearings
[NASA-TN-D-5264] c15 N69-27955
Solid electrolyte electrolysis of carbon dioxide and water as oxygen regeneration system for long manned space flights
[NASA-CR-1359] c05 N69-28099
WATER BALANCE
Transient electro-osmosis of water in capillary tubes for pumping and generation modes, analyzing response to step change in pressure or voltage change under external loading
c06 A69-14862
WATER COOLED REACTORS
FASTER computer program modified for tracking neutrons through reactor slabs penetrated by helical voided ducts
[NASA-TM-X-1838] c22 N69-31986
Blocked two level factorial experiment to measure radiolysis of water in water cooled reactors
[NASA-TN-D-5369] c19 N69-32319
WATER FLOW
Water flow and cavitation in convergent-divergent boiler inlet nozzles
[NASA-TM-X-1689] c12 N69-10293
WATER INJECTION
Mean drop size generated in vapor pressure regime of liquid water jet, noting effect of water temperature and orifice diameter
c12 A69-21995
WATER LANDING
Effect of heat shield flexibility on water landing

loads of Apollo spacecraft models
[NASA-TN-D-5108] c32 N69-21042
Forces on flexible shells of Apollo command module during water impact
[NASA-TM-X-1781] c32 N69-23697

WATER RECLAMATION
Microbiology of water management subsystem for manned space flight, discussing sterilization by heat and tests inside Integrated Life Support System /ILSS/
[SAE PAPER 680718] c05 A69-13441

WATER VAPOR
Water vapor profiles in stratosphere from IR radiometric observations under cloudless conditions, indicating relation to tropospheric meteorological features
c13 A69-38261
Noctilucent clouds with wave movement, chemical composition, and water vapor
[NASA-TT-F-546] c13 N69-25013

WAVE ATTENUATION
Elastic behavior of large blood vessels in canine aorta by measuring dispersion and attenuation of artificially induced pressure waves
c04 A69-14692
Longitudinal plasma waves collision damping calculations using Rostoker test particle method
c25 A69-34439

WAVE DIFFRACTION
Radiation pattern of axial slot on circular conducting cylinder based on wedge diffraction and creeping wave theory
c07 A69-24993

WAVE DISPERSION
Elastic behavior of large blood vessels in canine aorta by measuring dispersion and attenuation of artificially induced pressure waves
c04 A69-14692

WAVE EXCITATION
Evaluation of magnetic materials for static inverters and converters, tested under square wave excitation and direct current excitation
[NASA-CR-1226] c03 N69-17765

WAVE FUNCTIONS
Inelastic scattering cross sections calculated, comparing results for various nuclear states expressed as Wood-Saxon radial and harmonic oscillator functions
c26 A69-29006
Upper bounds for electromagnetic transition rates for Ne 20 determined using Hartree-Fock wave functions
c24 A69-35166
Equatorial radiation pattern of parallel plate TEM mode axial slot on elliptical conducting cylinders, using wedge diffraction and creeping wave theory
c09 A69-40703

WAVE GENERATION
Ion cyclotron wave generation in RF self sustained mode improved by installing grid structures in plasma near magnetic mirrors
c25 A69-13113
Stellar atmospheres acoustic energy generation rate calculations, studying corona mass ejection effects on stellar rotation
c30 A69-39521

WAVE INTERACTION
Plasma oscillation modes perpendicular to magnetic field used to study energy conversion by wave coupling across density discontinuity
c25 A69-20795

WAVE PROPAGATION
High speed compression waves, rarefaction waves and gas interface regions position and velocity measurement in shock tube by sensing electrical impedance
c14 A69-13104
Atmospheric density variation measurements by density gages on Explorer 32 satellite confirm wave propagation in neutral thermosphere as free internal gravity waves
c13 A69-16261
Axial waves in blood vessels, determining phase velocities and damping, noting anisotropic behavior of artery wall
[SESA PAPER 1350] c04 A69-19726
Self modulation, self steepening and spectral development of light in small scale trapped filaments, noting influence of relaxation time
c23 A69-20745
Collisional theory of longitudinal wave propagation for two fluid viscous ionized plasmas formulated from coupled Maxwell and Boltzmann equations
c25 A69-20796
Full wave calculation of gravity waves for thermospheric model, describing wave type reflection, transmission, conversion and coupling by scattering matrix elements
c13 A69-25150
Characteristic plane harmonic free internal neutral atmospheric wave oblique propagation through horizontally stratified quiet atmosphere for various thermospheric parameters
c13 A69-26101
Interphase momentum transfer during propagation of infinitesimal pressure pulse through bubbly flow two phase mixture
c33 A69-43511
Continuum theory for wave propagation in elastic composite solid with elastic microinclusions
[NASA-CR-1321] c32 N69-21401
First-order solutions for mutual coupling between waveguides which propagate two orthogonal modes
[NASA-TN-D-5180] c07 N69-24051
Analytical and experimental studies for predicting noise attenuation in acoustically treated ducts for turbofan engines
[NASA-CR-1373] c23 N69-36974
Shock wave propagation in real gases
[NASA-TT-F-585] c12 N69-40824

WAVE REFLECTION
Radiative transfer by doubling very thin layers in problem of diffuse reflection from plane-parallel atmosphere eliminates numerically solving transfer equation
c33 A69-20064

WAVEFORMS
N shaped shock wave line focusing simulating sonic superbooms
[NASA-TN-D-5306] c02 N69-31874
Mathematical analysis of wave structure in supersonic flow
[NASA-CR-1438] c04 N69-37062
Transformer of closely spaced pulsed waveforms having nonzero average value
[NASA-TN-D-5473] c09 N69-38776

WAVEGUIDE ANTENNAS
Omnidirectional microwave parallel plate waveguide fed antenna design for flush mounted broadband spacecraft, noting equatorial and polar patterns
c09 A69-40697
Slope diffraction analysis of TEM parallel plate guide patterns
[NASA-CR-1326] c07 N69-26273

WAVEGUIDES
Admittance of parallel plate waveguide aperture with infinite flange illuminating metal sheet, using wedge diffraction theory and integral transform method
c09 A69-12328
Conjugate echoes in Alouette 2 topside sounder ionograms explained by multiple reflections between conjugate points of field line, noting magnetospheric waveguides role
c07 A69-20045
Radiating collinear open ended waveguides and near field coupling analyzed using simultaneous integral equations and Fourier series expansion of aperture field
c09 A69-24984
Reflection coefficient of symmetric parallel plate waveguide operating in TEM mode illuminating lossless dielectric layer, using wedge diffraction and geometrical optics methods
c09 A69-34802
Edge diffraction effects in TEM axially slotted finite ground plane on radiation pattern in waveguides of different geometries
c07 A69-41588
Symmetric parallel plate waveguide reflection coefficient analyzed
[NASA-CR-1327] c07 N69-24059

WEAR
Ball bearings lubrication and wear in cryogenic hydrogen turbopumps by transfer films provided from self lubricating cage

c15 A69-10109
Modes and mechanisms of wear covering adhesive, abrasive and corrosive wear, surface fatigue and fretting corrosion
c15 A69-27231
Effect of orientation and presence of surface active materials on friction and wear of aluminum
[NASA-TN-D-4994] c15 N69-16197
Friction and wear of polymers with various fillers in liquid hydrogen
[NASA-TN-D-5073] c15 N69-19800
Structure, interactions, and topography of solid surfaces, sliding friction, adhesion, wear, and boundary lubrication conference topics
[NASA-SP-181] c15 N69-30401

WEAR TESTS
Modes and mechanisms of wear covering adhesive, abrasive and corrosive wear, surface fatigue and fretting corrosion
c15 A69-27231
Solid solutions atomic ordering effect on friction and wear in vacuum, using CuAu and FeCo systems
c15 A69-35183
Friction and wear tests with graphite fluoride lubricant
[NASA-TN-D-5097] c15 N69-20939

WEATHER FORECASTING
Atmospheric model development relating temperature, density, moisture and energy measurements from satellite observations for long term weather forecasting
[UN PAPER 68-95397] c20 A69-10463
Satellite-based meteorological observation system for global atmospheric research program, discussing wind measurement, IR and microwave sounding possibilities, etc
[AAS PAPER 69-120] c13 A69-42817
NIMBUS program individual missions characteristics emphasizing NIMBUS 3 results and weather forecasting improvements
[AAS PAPER 69-421] c31 A69-42835

WEDGES
Heat transfer and pressure distributions inside hinge line gap of wedge-flap combination at hypersonic speeds
[NASA-TN-D-4911] c01 N69-11009

WEIGHT (MASS)
Mitchell strain criterion for minimum weight structures using mathematical models
[NASA-TN-D-4345] c32 N69-25001

WEIGHT ANALYSIS
Lunar surface power plants, considering weight constraint for various systems using nuclear power, solar cell/fuel cells and H-C reactant regeneration
c03 A69-11396
Weight estimation and forecast in manned spacecraft design, noting size and weight relationship
[SAWE PAPER 793] c31 A69-34864

WEIGHT MEASUREMENT
Operational analysis of mass measuring system in orbiting spacecraft
[NASA-TN-D-5039] c04 N69-19115

WEIGHTING FUNCTIONS
Variable length codes for alphabets containing messages with assigned weighted information content
[NASA-TN-D-4962] c07 N69-15373
Suboptimal estimator to Kalman filter containing scalar weighting factors
[NASA-TN-D-5082] c10 N69-21123
Weighting factor for correction of photographic bias caused by variation in mass and velocity of sporadic meteoroids
[NASA-TN-D-5245] c30 N69-26239

WEIGHTLESS FLUIDS
Excessive extrapolation limitations in applying transient data to low gravity fluid behavior for orbital refueling systems, presenting orbital fluid transfer experiment
[AIAA PAPER 69-566] c31 A69-32755

WEIGHTLESSNESS
Weightlessness effects on fertilized frog egg development onboard Gemini 8 and 12 manned orbital flights, discussing cell division, differentiation and embryogeneis
c04 A69-11084
Space manufacturing operations program, discussing zero gravity effect during earth orbit flight, Apollo Applications Program Orbital Workshop Flight 2, etc
c31 A69-35067
Space manufacturing processes for orbital low and zero gravity environment, discussing buoyancy and thermal convection sensitive and molecular forces controlled methods
[AAS PAPER 69-486] c30 A69-42844
Cardiovascular conditioning suit to provide transmural pressure gradient in circulatory system during weightlessness
[NASA-CR-1206] c05 N69-13202
Observations of interface behavior during inflow to elliptical ended cylinder in weightlessness
[NASA-TM-X-1719] c12 N69-15473
Summary of potential adverse effects of artificial gravity and weightlessness on astronaut physiological processes and performance in aerospace environment
[NASA-TN-D-4980] c05 N69-15629
Vapor ingestion phenomenon during draining in weightlessness
[NASA-TN-D-5210] c12 N69-24917
Liquid-vapor interface during outflow in weightlessness
[NASA-TM-X-1811] c12 N69-27954
Coordination of voluntary movements of man in zero gravitational fields
[NASA-TT-F-578] c04 N69-31356
Astronaut capability to maintain life support systems and cabin habitability in weightlessness
[NASA-CR-1405] c05 N69-36709
Blood sampling for parathyroid hormone and calcium metabolism during weightlessness of space flight
[NASA-CR-1395] c05 N69-38600

WEIGHTLESSNESS SIMULATION
Weightless simulators effectiveness for obtaining space systems maintainability criteria, using nonparametric experimental design for performance data
c05 A69-17648
Correlation study of simulation of Gemini extravehicular activity with flight results
[NASA-CR-1146] c05 N69-19902
Simulated manual package transfer in weightless environment of Saturn Orbital Space Station
[NASA-TN-D-5111] c05 N69-21501
Astronaut extravehicular work performance under simulated weightlessness conditions
[NASA-CR-1334] c05 N69-27266
Weightlessness simulation of Gemini extravehicular tasks using neutral-buoyancy underwater techniques
[NASA-TN-D-5235] c05 N69-28024

WELDED JOINTS
Development of automatic quality control device for measuring welded joints
[NASA-TN-D-5304] c15 N69-33800

WETTING
Flow rate effect on dynamic contact angle for wetting liquids in weightless environment
[NASA-TN-D-5115] c12 N69-20794

WHISKERS (SINGLE CRYSTALS)
Fiber-metal matrix composites fabrication, applications, mechanical properties and powder metallurgy
c17 A69-20204

WHITE DWARF STARS
Instability of stellar structures intermediate between white dwarfs and neutron stars shown by stellar models, discussing pulsar signals periodicities
c30 A69-20770
X ray sources model, describing possible ring of matter around white dwarf near end of active evolution
c29 A69-35204

WIND (METEOROLOGY)
Rocket sounding meteorological data of Exametnet for 1966
[NASA-SP-175] c20 N69-16214

WIND EFFECTS
Statistical effects of wind and atmospheric turbulence on launch vehicles
[NASA-CR-1410] c20 N69-35570
Mathematical model for quantitative wind and turbulence effects on design and operation of

launch vehicles
[NASA-CR-1418] c20 N69-36222
Empirically determined wind and scale effects on hot gas recirculation characteristics of jet V/STOL aircraft
[NASA-CR-1445] c28 N69-40776

WIND MEASUREMENT
Atmospheric measurements from satellites, discussing ATS-1 cloud images for definition of wind and use of WEFAX through ATS 2 satellites for data transmission
[AIAA PAPER 69-158] c20 A69-18038
Mesopause wind measurements at high latitude locations by sounding rockets noting relation to noctilucent clouds
c20 A69-28466
Angular grid spacing resolution near poles effect tests in global prediction model for geophysical fluid dynamics, investigating forecast height and wind fields
c20 A69-43066
Evaluation of height and time based meteorological rocket wind reduction techniques
[NASA-TM-X-1850] c20 N69-35523

WIND PROFILES
All weather wing profile monitoring system using FPS-16 radar/jimsphere system and flight simulation for protection of space vehicle and missile launches
c20 A69-13852
Temperature profiles and associated wind profiles obtained with Jimsphere/FPS-16 radar system at Cape Kennedy, discussing remote CAT detector assessment
c20 A69-33739
Winds aloft and wind shear analysis from jimsphere wind sensor balloon-radar data
[NASA-CR-1204] c20 N69-13629
Wind profile developed for calculation of deflection impulse for rocket with liquid injection thrust vector control
[NASA-TM-X-1708] c31 N69-14033
Wind velocity profiles by smoke trail method for eastern test range
[NASA-TN-D-4880] c20 N69-14505
Statistical analysis on influential aspects of wind profile disturbance design and dynamic response of space vehicles
[NASA-TN-D-4963] c32 N69-15632
Comparisons of wind and temperature data obtained by Japanese MT-135 and American ARCAS meteorological rocket systems in closely spaced launchings
[NASA-TM-X-1726] c20 N69-17772

WIND TUNNEL APPARATUS
Factors influencing development of both wind tunnel and flight test technology for determining aerodynamic derivatives of aircraft motions
c11 A69-15572
Wind tunnel magnetic support and balance system for measuring sphere drag
[NASA-CR-1353] c11 N69-25343

WIND TUNNEL DRIVES
Exploding wire initiation and electrical operation of 40 kV system for arc heated drivers up to 10 feet long
[NASA-TN-D-5126] c11 N69-22989

WIND TUNNEL MODELS
Factors influencing development of both wind tunnel and flight test technology for determining aerodynamic derivatives of aircraft motions
c11 A69-15572
Refractory cone models made of copper and Co coated Be for force tests in high enthalpy hypersonic arc tunnels at high simulated attitudes
c11 A69-26796
Flow simulation on wind tunnel test models for aerodynamic characteristics of aircraft design, discussing boundary layer and external flow coupling
[AIAA PAPER 69-660] c11 A69-33471
C-5A aircraft model high subsonic speed tests, correlating data from three transonic wind tunnels
[AIAA PAPER 69-794] c01 A69-35636
Aerodynamic performance tests of autorotative unpowered rotor entry vehicle model at various Mach numbers and angles of attack
[AIAA PAPER 68-950] c01 A69-37155
Experimental surface pressure distributions on spherically blunted cone at Mach numbers from 1.50 to 4.63
[NASA-TM-X-1730] c01 N69-16209
Wind tunnel study of deflected elevator flutter encountered on T-tail airplane
[NASA-TN-D-5024] c32 N69-16211
Wind tunnel tests of opening characteristics of all flexible parawing
[NASA-TN-D-5031] c02 N69-17700
Effects of cone angle, base flare angle, and corner radius on Mach 3 aerodynamic characteristics of large angle cones
[NASA-TN-D-5048] c01 N69-19926
Wind tunnel force and pressure tests of rocket engine nozzle extensions on X-15-2 model at supersonic and hypersonic speeds
[NASA-TM-X-1759] c01 N69-20873
Aerodynamic characteristics and ground effects of supersonic transport with double Delta wing
[NASA-TN-D-5102] c02 N69-21020
Measured static aerodynamic forces for hypersonic flutter analysis on airfoil models in helium flow
[NASA-TN-D-5233] c01 N69-26271
Measurements of mutual interference heating for probe antenna mounted on Apollo reentry configuration
[NASA-TM-X-1787] c01 N69-29318
Free flight test model measurement of drag, lift, and trim in wind tunnel for Apollo command module
[NASA-TN-D-5276] c30 N69-29557
Jet exhaust location effects on longitudinal aerodynamic characteristics of jet V/STOL model
[NASA-TN-D-5333] c01 N69-33210
Wind tunnel investigation for determination of subsonic and transonic aerodynamic characteristics of Saturn 1B launch vehicle
[NASA-TM-X-1848] c31 N69-33380
Spin-tunnel investigation of scale model of straight wing, twin boom counter insurgency airplane
[NASA-TM-X-1602] c02 N69-34988
Pressure distributions for blunt body wind tunnel models at supersonic speeds and angles of attack from 0 to 15 degrees
[NASA-TN-D-5392] c01 N69-35300
Jet velocity and axial location of nozzle exit on performance of twin-jet afterbody model
[NASA-TN-D-5393] c28 N69-36932
Upwash patterns on ablating and nonablating cones at hypersonic speeds
[NASA-TN-D-5346] c12 N69-37370
Wind tunnel study of aerodynamic pressures on Apollo command module configuration
[NASA-TN-D-5514] c01 N69-40345
Wind tunnel studies of scaled model of multijet cargo airplane
[NASA-TN-D-5538] c02 N69-40937

WIND TUNNEL NOZZLES
Pressure and temperature surveys of Mach 27-47 nozzle boundary layer at Ames M-50 He tunnel, determining velocity profiles, wall friction coefficient, etc
[AIAA PAPER 69-686] c12 A69-33441

WIND TUNNEL STABILITY TESTS
Entry phase flight data of Missions AS-202, Apollo 4 and 6 compared with wind tunnel aerodynamics data
[AIAA PAPER 68-1143] c31 A69-13556
Amplified boundary layer oscillations and transition at swept flat nosed wing attachment line with/without boundary layer suction analyzed by wind tunnel tests
c01 A69-33251
Flow field throughout wind tunnel containing rotor with sharply defected blades, noting reversed flow effect in front of wake
c11 A69-35228
Low speed static and dynamic longitudinal, and lateral stability of scale model of supersonic transport in wind tunnel tests
[NASA-TN-D-4726] c02 N69-10733

Large scale wind tunnel tests to improve longitudinal stability of supersonic transports with variable swept wings
[NASA-TN-D-5005] c02 N69-16384
Full scale wind tunnel investigation of lateral and longitudinal stability and control characteristics of light twin engine airplane
[NASA-TN-D-4983] c02 N69-17303
Aerodynamic characteristics of full scale model sailwing with aspect ratio 5.9
[NASA-TN-D-5047] c01 N69-19243
Wind tunnel tests for V/STOL aircraft having direct-lift and lift-cruise jet nozzles
[NASA-TM-X-1758] c01 N69-20016
Wind tunnel investigation of twin keel parawing aerodynamic characteristics
[NASA-TN-D-5199] c01 N69-23781
Wind tunnel and analytical study of conversion from wing lift to rotor lift on composite lift VTOL aircraft
[NASA-TN-D-5256] c02 N69-28044
Wind tunnel investigation of steady state aerodynamics of composite lift VTOL aircraft model combining rotary and fixed wings
[NASA-TN-D-5232] c02 N69-28097
Wind tunnel investigation of static stability characteristics of model jet-lift V/STOL research airplane
[NASA-TM-X-1835] c02 N69-30633
Wind tunnel tests to determine static aerodynamic characteristics of cruciform wing-body missiles at transonic and supersonic speeds
[NASA-TM-X-1839] c01 N69-31875
Wind tunnel tests of static longitudinal and lateral characteristics of short takeoff aircraft with external flow jet flap
[NASA-TN-D-5364] c01 N69-33275
Wind tunnel investigation for determination of subsonic and transonic aerodynamic characteristics of Saturn 1B launch vehicle
[NASA-TM-X-1848] c31 N69-33380
Spin and recovery characteristics of 1/30 scale subsonic attack aircraft model determined in wind tunnel tests
[NASA-TM-X-1788] c02 N69-37976
Wind tunnel stability tests to determine effect of hypersonic research engine on aerodynamic characteristics of research aircraft
[NASA-TM-X-1840] c01 N69-38612
Large scale wind tunnel investigation of lifting body with inflatable and rigid afterbody
[NASA-TN-D-5468] c01 N69-38775
Wind tunnel stability tests to determine flutter characteristics of Saturn S-4B stage panel
[NASA-TN-D-5439] c32 N69-38808

WIND TUNNEL WALLS
Wind tunnel wall constraints effects at extreme force coefficients during V/STOL testing shown different from effects in conventional aircraft testing
c11 A69-15574
Skin friction and heat transfer data for hypersonic turbulent layer on flat plates, wind tunnel wall, and cones
[NASA-TN-D-5089] c12 N69-29144

WIND TUNNELS
FORTRAN programs for calculating wind tunnel boundary interference factors
[NASA-TM-X-1740] c01 N69-17818
Direct measurement of skin friction in wind tunnel testing by using cholesteric liquid crystals
[NASA-TM-X-1774] c12 N69-26956
Aerodynamic characteristics determined during development of Apollo launch escape vehicle configuration in wind tunnel tests
[NASA-TN-D-5208] c01 N69-29027
Auxiliary flap system tests using Boeing 367-80 transport aircraft and wind tunnels
[NASA-TN-D-5128-REV] c02 N69-31962
Aerodynamic characteristics effected by parallel-staged simple aerodynamic configurations at Mach numbers of 3 and 6
[NASA-TN-D-5379] c01 N69-33302
Laminar heating rate from wind tunnel tests using angle of attack and Reynolds number
[NASA-TN-D-5450] c12 N69-37604
Dynamic distortion of supersonic wind tunnel for turbojet engines
[NASA-TM-X-1842] c28 N69-38599
Langmuir and interferometric measurements on electron concentration in arc heated wind tunnel using air and nitrogen
[NASA-TN-D-5500] c25 N69-39302

WIND VARIATIONS
Turbulence characteristics up to 150 m above ground, noting surface roughness length directional dependence, longitudinal turbulence spectra and turbulent energy budget
c20 A69-10695

WINDOWS (APERTURES)
Thermal control coatings, windows and mirrors for 1973 Mars Viking Lander vehicles under simulated Martian surface conditions
[AIAA PAPER 69-1023] c11 A69-40393
Optical properties and chemical analysis of contaminants on Gemini spacecraft windows
[NASA-TN-D-4916] c31 N69-13232
Preflight optical evaluation of right hand hatch windows in Gemini missions 7, 8, 9, and 12
[NASA-TN-D-5471] c31 N69-40813

WING CAMBER
Rotor aerodynamics research in terms of theoretical and experimental data comparison, rotor blade flow visualization and blade section camber
c01 A69-41372

WING LOADING
Computing span loads and stability derivatives due to sideslip, yawing, and rolling for wings in compressible flow
[NASA-TN-D-4929] c01 N69-14001

WING PROFILES
Experimental and theoretical study of symmetrical and cambered Delta wing configuration between Mach 2.0 and 10.7
[NASA-TN-D-5272] c01 N69-29269

WING SLOTS
Force measurements in drag reduction by gas injection into turbulent boundary layer through supersonic wing slots
[NASA-TN-D-5307] c12 N69-31359

WINGS
Numerical solution for minimum induced drag, and associated loading, of nonplanar wings
[NASA-CR-1218] c01 N69-10343
User manual for computer program 55VD for computation of minimum induced drag and load distribution of nonplanar wings
[NASA-CR-1218-SUPPL] c01 N69-12286
Wind tunnel and analytical study of conversion from wing lift to rotor lift on composite lift VTOL aircraft
[NASA-TN-D-5256] c02 N69-28044
Load distribution calculations for subsonic compressible flow of arbitrary wings and lifting surfaces
[NASA-TN-D-5335] c01 N69-31337

WINTER
Infrared horizon radiance profiles for winter conditions based on Scanner project flight test
[NASA-TN-D-4905] c21 N69-14346

WIRE
Size effect on tensile strength of polycrystalline nickel wires
[NASA-TN-D-4884] c17 N69-10226
Stress rupture and tensile properties of refractory metal wires at 2000 and 2200 deg F
[NASA-TN-D-5139] c32 N69-22823

WIRE CLOTH
Flow reduction due to oxidation of wire-form porous materials for transpiration cooled turbine blades
[NASA-TN-D-5001] c17 N69-16383

WORK FUNCTIONS
Observation of photocurrents generated in Schottky barrier diodes on barium titanate, suggesting practical utility of photon-to-electron conversion efficiencies
c09 A69-18905
Work function and desorption energy measurements of alkali metals from metallic substrates with modulated molecular beam, noting surface contamination
c26 A69-21808
Free electron model for electron work functions and number density distributions and surface potentials in metals
c26 A69-29009

Electric fields and electron work functions, surface potentials and number density distributions in selected metals surfaces determined using free electron model
c26 A69-36045

X

X RAY ANALYSIS
Diffusion lengths of silicon solar cells after radiation damage and annealing by X ray method
[NASA-TM-X-1894] c03 N69-37827
X RAY ASTRONOMY
Acoustic energy generation for helium rich stars, discussing X ray radiation from helium star corona
c29 A69-20645
Discrete source hypothesis for interpreting high energy cosmic gamma ray measurements obtained by OSO-3 spacecraft
c29 A69-20699
Iron line absence in emission spectrum of thermal X ray sources, constraining proposed thermal models
c29 A69-22231
X ray energy spectrum from Crab Nebula and diffuse background on celestial sphere near galactic anticenter, noting spectral index
c29 A69-30759
X ray sources model, describing possible ring of matter around white dwarf near end of active evolution
c29 A69-35204
Pulsed X ray emission associated with pulsar NP 0532 in Crab Nebula measured by six element detector on Aerobee 150 rocket
c29 A69-37574
Solar X rays observations, describing instrumentation, radiation characteristics, association with flares, spectrum analysis, etc
c29 A69-39506
Extended source Fourier transform holography for single image synthesis of multiple identical images produced by multiple pinhole camera in X ray astronomy
c14 A69-40019
X RAY DIFFRACTION
X ray crystallographic measurements of selected grades of commercial nonpyrolitic artificial graphite
[NASA-TN-D-4888] c18 N69-10754
Examination of thermal oxidation deposits on heat resistant alloys using X ray diffraction and X ray fluorescence analyses
[NASA-TN-D-5019] c17 N69-17277
X RAY FLUORESCENCE
X Ray fluorescence of rock samples as applied to geological problems, noting standard deviations for element distribution
c14 A69-10890
X ray fluorescence and electron microprobe for determining thin film thickness
c09 A69-19582
Examination of thermal oxidation deposits on heat resistant alloys using X ray diffraction and X ray fluorescence analyses
[NASA-TN-D-5019] c17 N69-17277
X RAY SCATTERING
Compton profile from single crystal of LiH measured with X ray scattering, noting valence-electron momentum distribution role
c26 A69-40730
X RAY SPECTROSCOPY
Spectral intensity of high energy solar X rays observed during July 7, 1966 polar event with satellite OGO 3, suggesting nonthermal bremsstrahlung origin
c29 A69-23753
X RAY TELESCOPES
Optical design of Wolter type 1 glancing incidence X ray telescope for 6-100 A wavelength region, describing results of laboratory and rocket flight tests of prototype
c14 A69-21087
X RAYS
Solar extreme UV, soft and hard solar X rays, cosmic X rays and gamma rays, cosmic ray particles and near earth visible radiation observed by OSO-3
c29 A69-22167
Oscillator strengths and wavelengths of X ray and EUV transitions in highly ionized iron line spectra
c29 A69-27554
Radio emission from Sco XR-1 shown as synchroton radiation of relativistic electrons in low density region surrounding denser core producing X ray
c30 A69-37334
Cosmic X ray bremsstrahlung due to collisions of suprathermal protons with ambient electron, giving clue about diffuse sky background of X rays
c29 A69-40643
X-Y PLOTTERS
Alphanumeric listing and digital data x-y plotting by high speed printer, describing equipment modifications and control software
c08 A69-33108
X-14 AIRCRAFT
Direct side-force maneuvering system on deflected X-14A jet VTOL aircraft without changing bank angle
[NASA-TN-D-5175] c02 N69-22572
Evaluation of six degrees of freedom motion simulator for Bell X-14A aircraft hovering characteristics
[NASA-TN-D-5383] c11 N69-35359
X-15 AIRCRAFT
X-15 research aircraft program piloting problems, ground facilities, heat transfer, space flight and steep reentry
c02 A69-26872
Wind tunnel force and pressure tests of rocket engine nozzle extensions on X-15-2 model at supersonic and hypersonic speeds
[NASA-TM-X-1759] c01 N69-20873
Infrared heating simulation of Mach 4.63 flight on X-15 horizontal stabilizer
[NASA-TN-D-5403] c33 N69-35949
Aerodynamic drag of external fuel tanks attached to X-15-2 airplane at Mach numbers of 1.6 to 2.3
[NASA-TM-X-1895] c01 N69-38065
XENON
Radiation attenuation cross sections of monatomic and diatomic xenon gas from UV absorption measurements near resonance line
c24 A69-12551
Excited states of xenon nuclei formed in beta decay of iodine and cesium isotopes
[NASA-TN-D-5329] c24 N69-30074

Y

YAW
Feasibility of using roll and yaw compensation to reduce inclination error of Scout launch vehicle
[NASA-CR-1209] c31 N69-16221
YIELD STRENGTH
Vacuum arc melted W and W-Re alloys mechanical properties, noting Re additions effects
c17 A69-20190
Plain strain fracture toughness tests on two inch thick maraging steel plates of various strengths, using bend and compact tension tests
c32 A69-23057
Plane strain fracture toughness tests on maraging steel plates for various yield strengths and large dimensions
c17 A69-26496
YTTRIUM
Yttrium effect on rate of thermal decomposition of silver carbonate powder and pressed pellets by isothermogravimetric analysis, examining water vapor, Co 60 gamma radiation and temperature effects
c06 A69-30442
Cyclic heating and thermal shock effects on hafnia stabilized with calcia, magnesia, and yttria
[NASA-TN-D-5279] c18 N69-34547

Z

ZERO ANGLE OF ATTACK
Newtonian aerodynamics for circular cones modified to produce lift at zero angle of attack
[NASA-TN-D-5193] c01 N69-23926

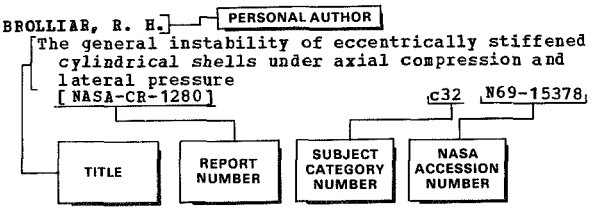
ZINC OXIDES
UV irradiation effects on ZnO spacecraft thermal control coating pigments, discussing photo-Hall, luminescence and electron paramagnetic resonance measurements
[AIAA PAPER 69-639] c18 A69-33288
ZINC TELLURIDES
GaSb-ZnTe heterojunction fabrication method, noting photoresponse, fluorescence and light transmission
c26 A69-12408
ZIRCONIUM
Zr doped superconducting ceramic strontium titanate, noting effective electron mass variations and transition temperature
c26 A69-27400
Luminous spherical fog layer surrounding burning zirconium droplet during free fall through oxygen containing atmosphere, noting effect on mass and heat transfer processes
c33 A69-28462
Laser ignited combustion of 365 micron Zr droplets falling in ultrapure oxygen using spectroscopic and photographic techniques, discussing vapor phase transport phenomena
[WSCI PAPER 69-4] c27 A69-32345
ZIRCONIUM ALLOYS
Absorption rate sticking probabilities for oxygen on niobium and dilute niobium-zirconium alloys
[NASA-TN-D-4885] c17 N69-10931
ZIRCONIUM COMPOUNDS
Cb-1Zr pumped sodium loop tests to evaluate loop components, EM pump, pressure transducers, and instrumentation techniques
[NASA-CR-1135] c03 N69-11373
ZOND 3 SPACE PROBE
Lunar topography statistics determined by Zond 3 space probe
[NASA-TT-F-514] c30 N69-24206

PERSONAL AUTHOR INDEX

NASA SCIENTIFIC AND TECHNICAL REPORTS AND PUBLICATIONS FOR 1969

A Selected Listing

Typical Personal Author Index Listing



Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, NASA contractor report). The subject category number indicates the subject category in the abstract section in which the citation is located. The accession number denotes the number by which the citation is identified within the subject category. The titles are arranged under each personal author in ascending accession number order. "A" items precede "N" items in this index.

A

ABBOTT, D. E.
Analytical prediction of the incompressible turbulent boundary layer with arbitrary pressure distribution.
[AIAA PAPER 69-397] c12 A69-30478

ABBOTT, W. H.
Research on metallurgical characteristics and performance of materials used for sliding electrical contacts Summary report, 1 May 1968 - 30 Apr. 1969
[NASA-CR-1447] c17 N69-40057

ABDALLA, K. L.
Vapor ingestion phenomenon in weightlessness
[NASA-TN-D-5210] c12 N69-24917
The liquid-vapor interface during outflow in weightlessness
[NASA-TM-X-1811] c12 N69-27954

ABEL, I.
Evaluation of a technique for determining airplane aileron effectiveness and roll rate by using an aeroelastically scaled model
[NASA-TN-D-5538] c02 N69-40937

ACAMPORA, F. L.
High photovoltages in cadmium sulfide films.
c26 A69-17772

ADAMS, B. H.
Computer experiments on the microscopic behavior of one-dimensional plasmas
[NASA-TN-D-4831] c25 N69-10471

ADAMS, D. W.
A procedure for furnace brazing butt joints in tungsten-uranium dioxide cermet cylinders at 3000 deg C
[NASA-TM-X-1815] c15 N69-28862
Heat-transfer characteristics of a water-to-cryogenic-hydrogen heat exchanger
[NASA-TN-D-5429] c33 N69-36701

ADAMS, G. W.
Riometer measurements, solar proton intensities and radiation dose rates.
c29 A69-32321

ADAMS, J. J.
Application of human transfer functions to system analysis
[NASA-TN-D-5478] c05 N69-39183

ADAMS, M. C.
The aerospace stimulus to technological advance.
[ON PAPER 68-95321] c34 A69-10467

ADAMS, W. M., JR.
Analytic approximations for application to spacecraft optical navigation on short data arcs
[NASA-TN-D-4863] c21 N69-10372

ADAMSKY, R. F.
Effect of oxygen on the formation of germanium films.
c26 A69-43345

ADELFANG, S. I.
A study of jimsphere wind profiles as related to space vehicle design and operations
[NASA-CR-1204] c20 N69-13629

ADELMAN, H. M.
A geometrically exact finite element for thin shells of revolution.
[AIAA PAPER 69-56] c32 A69-18193
Vibration analysis of a 1/40-scale dynamic model of Saturn 5 launch platform-umbilical tower configuration
[NASA-TN-D-4871] c31 N69-10934
A method for computation of vibration modes and frequencies of orthotropic thin shells of revolution having general meridional curvature
[NASA-TN-D-4972] c32 N69-16469

ADKINS, E. J.
Variation in engine noise for two landing-approach configurations of a jet transport aircraft
[NASA-TM-X-1896] c02 N69-38104

ADLER, I.
An integrated experiment for compositional analysis from an orbiter.
[AAS PAPER 68-197] c30 A69-11475
Some parameters affecting Auger and photoelectron spectroscopy as an analytical technique.
c06 A69-19775

ADLON, G. L.
Effects of simulated Mars dust erosion environment on thermal control coatings.
[AIAA PAPER 69-1023] c11 A69-40393

AGGSON, T. L.
Probe measurements of electric fields in space.
c13 A69-38508

AHRENS, L. H.
Origin and Distribution of the Elements, Proceedings of the International Symposium, Paris, France, May 8-11, 1967.
c30 A69-20892

AIKIN, A. C.
The lower ionosphere of Mars.
c30 A69-18607

AKIN, C. M.
Combined effects of mass addition and nose bluntness on boundary-layer transition.
[AIAA PAPER 67-706] c12 A69-33476

ALBERS, J. A.
Design-point performance of a double containment tantalum and stainless steel mercury boiler for SNAP-8
[NASA-TN-D-4926] c33 N69-12739

ALBERS, L. U.
Noise in axisymmetric convergent electron beams
[NASA-TN-D-5212] c10 N69-24918

ALDRIDGE, M. D.
Enhancement of photon-bunching effects.
c07 A69-31694

ALEKSEYEV, B. V.
Boundary layer and chemical reactions
[NASA-TT-F-549] c33 N69-31947

ALEX, F. R.
Experiments and a model for pilot dynamics with visual and motion inputs
[NASA-CR-1325] c05 N69-28071

ALEXANDER, J. K.
Measurements in the ionosphere of the aspect dependence of antenna reactance. I - Variations arising from the inhomogeneous plasma distribution about the vehicle.

c13 A69-39964
Type III radio bursts in the outer corona.
c29 A69-40300
The spectrum of the cosmic radio background between 0.4 and 6.5 MHz.
c30 A69-42375
ALGER, D. L.
A solution to tritium pump contamination for small accelerators.
c11 A69-26499
ALI, D. E.
Measurements of negative ion production in atmospheric gases
[NASA-CR-1406] c24 N69-38564
ALKSNE, A. Y.
External aerodynamics of the magnetosphere.
c13 A69-19360
Effect of neutral sheet currents on the shape and magnetic field of the magnetosphere tail.
c13 A69-21661
Plasma flow around the magnetosphere.
c29 A69-26736
ALLARIO, F.
Onset of rotating disturbance in the interelectrode region and exhaust jet of an MPD arc.
[AIAA PAPER 69-232] c28 A69-21225
Onset of rotating disturbance in linear Hall current accelerator.
[AIAA PAPER 69-381] c28 A69-21731
Electric-field distribution in pulsed high-current-density discharges in helium and helium-hydrogen mixtures.
c25 A69-23660
ALLEN, C. W.
Elastohydrodynamic lubrication of a spinning ball in a nonconforming groove.
[ASME PAPER 69-LUBS-11] c15 A69-34381
ALLEN, G.
Viscosity measurements of dilute solutions of helium-3 in superfluid helium-4 between 0.1 and 1.2 deg K.
c23 A69-39582
FORTRAN program for machine computation of group tables of finite groups
[NASA-TN-D-5402] c08 N69-35569
ALLEN, H. W.
Characteristics of a 2.17-megawatt fast- spectrum reactor concept using an axially moving reflector control system
[NASA-TM-X-1911] c22 N69-40061
ALLEN, J. L.
Conceptual study of rocket-scramjet hybrid engines in a lifting reusable second stage
[NASA-TN-D-5218] c28 N69-24922
ALLEN, J. M.
Use of Baronti-Libby transformation and Preston tube calibrations to determine skin friction from turbulent velocity profiles
[NASA-TN-D-4853] c12 N69-10472
Charts for interpolation of local skin friction from experimental turbulent velocity profiles
[NASA-SP-3048] c01 N69-25391
ALLEN, W. H.
Irradiation and manual navigation.
c21 A69-19208
ALLENBY, R. J.
Lunar orbital mission plans.
c30 A69-34362
ALLISON, L. J.
Satellite mapping of the Pacific tropical cloudiness.
c20 A69-33001
An atlas of Tiros 7 monthly maps of emitted radiation in the 8-12 micron atmospheric window over the Indian Ocean area
[NASA-TN-D-5101] c13 N69-23318
ALLUISI, E. A.
Effects of practice and work load on the performance of a code transformation task /COTRAN/
[NASA-CR-1261] c05 N69-14345
AMICONE, R. G.
Study of pretesting effects on electroexplosive devices
[NASA-CR-1203] c15 N69-10298
AMMANN, C.
Properties of high emittance materials
[NASA-CR-1278] c17 N69-18952
Testing of high-emittance coatings
[NASA-CR-1413] c17 N69-35514
ANAGNOSTOU, E.
Transmission effects on plastic films irradiated with ultraviolet light, electrons, and protons
[NASA-TM-X-1905] c18 N69-40339
ANDERSON, B. H.
Design of supersonic inlets by a computer program incorporating the method of characteristics
[NASA-TN-D-4960] c01 N69-14566
Characteristics study of a bicone mixed-compression inlet for Mach 1.80 to 2.50
[NASA-TN-D-5084] c01 N69-20914
Characteristic design study of mixed- compression two-dimensional inlets with low-angle cowls for the Mach number range 2.70 to 1.80
[NASA-TN-D-5330] c01 N69-30060
ANDERSON, D. L.
An exploratory study of the interplanetary environmental effects on solar-cell cover glasses.
c03 A69-35702
ANDERSON, H. R.
A lunar-surface electric-field detector.
c14 A69-13221
ANDERSON, J. L.
A nuclear thermionic space power concept using rod control and heat pipes.
c22 A69-14799
A nuclear thermionic space power concept using rod control and heat pipes
[NASA-TN-D-5250] c22 N69-26270
ANDERSON, K. F.
NASA high temperature loads calibration laboratory
[NASA-TM-X-1868] c11 N69-36224
ANDERSON, S. B.
A review of facilities and test techniques used in low-speed flight.
c11 A69-15575
ANDERSON, W. C.
Environmental control for radiation testing of lunar rock samples.
c11 A69-38271
ANDERSON, W. E.
A two-dimensional, mixed-compression inlet system designed to self-restart at a Mach number of 3.5.
[AIAA PAPER 69-447] c28 A69-32732
ANDERSON, W. J.
EHD lubrication.
c15 A69-11324
Experimental stability studies of the herringbone-grooved gas-lubricated journal bearing.
[ASME PAPER 68-LUBS-25] c15 A69-27271
Contact conformity effects on spinning torque and friction.
[ASME PAPER 68-LUB-10] c15 A69-30901
Effect of three advanced lubricants on high-temperature bearing life.
[ASME PAPER 69-LUBS-18] c15 A69-34378
Experiments on the stability of water lubricated herringbone-groove journal bearings. 1 - Theoretical considerations and clearance effects
[NASA-TN-D-4883] c15 N69-10228
Incompressibly lubricated Rayleigh step journal bearing. 2 - Infinite-length solution
[NASA-TN-D-4873] c15 N69-10231
Stability analysis for unloaded externally pressurized gas-lubricated bearings with journal rotation
[NASA-TN-D-4934] c15 N69-13256
Rolling-element bearing life from 400 deg to 600 F
[NASA-TN-D-5002] c15 N69-16367
Experiments on power loss in herringbone grooved, gas-lubricated journal bearings
[NASA-TN-D-5224] c15 N69-24932
Experiments on rotating externally pressurized air journal bearings. Part 1 - Load capacity and stiffness
[NASA-TN-D-5191] c15 N69-27078
Experiments on the stability of water lubricated herringbone-groove journal bearings. 2 - Effects of configuration and groove to ridge clearance ratio
[NASA-TN-D-5264] c15 N69-27955
Experiments on rotating externally pressurized air journal bearings. Part 2 - Attitude angle and air flow

[NASA-TN-D-5192] c15 N69-27956
Experiments on the steady state characteristics of herringbone-grooved air-lubricated journal bearings
[NASA-TN-D-5386] c15 N69-33258
ANDERSON, W. W.
On lateral cable oscillations of cable- connected space stations
[NASA-TN-D-5107] c31 N69-21111
ANDERTON, H. L.
Progress in pilot warning indicators.
c21 A69-16726
ANDREWS, W. H.
Summary of XB-70 airplane cockpit environmental data
[NASA-TN-D-5449] c25 N69-38010
ANDRUS, A. M. G.
Tracking and data relay satellite system.
c07 A69-41755
ANGELE, W.
Flat conductor cable technology.
[ASME PAPER 69-DE-8] c03 A69-28855
ANGLIN, E. L.
Analysis of lateral directional stability characteristics of a twin jet fighter airplane at high angles of attack
[NASA-TN-D-5361] c02 N69-32337
Analysis of the flat-spin characteristics of a twin-jet swept-wing fighter airplane
[NASA-TN-D-5409] c02 N69-36807
ANGUS, J. C.
Application of the laser Doppler flowmeter to fluid flow measurements.
c14 A69-26546
ANLIKER, M.
Dispersion and attenuation of small artificial pressure waves in the canine aorta.
c04 A69-14692
Transmission characteristics of axial waves in blood vessels.
[SESA PAPER 1350] c04 A69-19726
ANSTEAD, R. J.
Thermal effects on the integrity of aluminum to silicon contacts in silicon integrated circuits.
c09 A69-32893
Current status of scanning electron microscopy in semiconductor device reliability physics.
c26 A69-35788
ANTL, R. J.
Steady-state airflow and afterburning performance characteristics of four J85-GE-13 turbojet engines
[NASA-TM-X-1742] c28 N69-17781
AOKI, S.
Friction between mantle and core of the earth as a cause of the secular change in obliquity.
c13 A69-27821
AOYAGI, K.
Investigation of a 0.3-scale jet-transport model having a jet-augmented boundary-layer- control flap with direct-lift control capability
[NASA-TN-D-5129] c01 N69-30722
ARCHER, J. S.
Natural vibration modal analysis
[NASA-SP-8012] c32 N69-22773
ARGENTIERO, P. D.
The X sup 2 statistic and the goodness of fit test
[NASA-TR-R-313] c19 N69-30610
On the shape preserving expansion and contraction of objects in E sup 3
[NASA-TN-D-5240] c19 N69-31303
ARIAS, A.
Chemical reactions of ductile metals during comminution.
c06 A69-27762
The release of hydrogen on ball milling chromium in water.
c15 A69-38567
Feasibility of producing dispersion strengthened chromium by ball-milling in hydrogen halides
[NASA-TN-D-4912] c17 N69-10827
ARMENIADES, C. D.
Mechanical behavior of poly/ethylene terephthalate/ at cryogenic temperatures.
c18 A69-16494
ARMSTEAD, B. J.
Tagged arithmetic
[NASA-TN-D-5370] c08 N69-32556
ARMSTRONG, E. S.
A computational method for time-optimal space rendezvous
[NASA-TN-D-5017] c30 N69-16210
ARNDT, G. D.
An analysis of the telecommunications performance of a lunar relay satellite system.
c07 A69-42508
ARNETT, G. M.
Optical absorption in tetracyanoquinodimethan.
c26 A69-35477
ARNETT, W. D.
Nucleosynthesis in supernova explosions.
c30 A69-20898
ARNO, R. D.
Computer analysis of space power systems for mission analysis.
c03 A69-42240
ARNOLD, J. O.
A shock tube determination of the electronic transition moment of the C sub 2.
c24 A69-12833
Line by line calculation of spectra from diatomic molecules and atoms assuming a Voigt line profile.
c24 A69-35239
A computer program for a line by line calculation of spectra from diatomic molecules and atoms assuming a Voigt line profile
[NASA-TN-D-5088] c24 N69-21462
ARRINGTON, J. P.
Heat transfer and pressure distributions due to sinusoidal distortions on a flat plate at Mach 20 in helium
[NASA-TN-D-4907] c12 N69-10804
ARVESEN, J.
Handbook of Solar Simulation for Thermal Vacuum Testing.
c11 A69-38894
ASADOURIAN, A. S.
Results of endurance tests of a SNAP 8 turbine-alternator
[NASA-TM-X-1741] c03 N69-20913
ASANO, N.
Primordial helium and the luminosity of horizontal-branch stars.
c30 A69-22211
ASHBROOK, R. L.
A survey of salt deposits in compressors of flight gas turbine engines
[NASA-TN-D-4999] c28 N69-17276
Sigma phase formation and its effect on stress-rupture properties of IN-100
[NASA-TN-D-5185] c17 N69-23465
Evaluation of two nickel-base alloys, alloy 713C and NASA TAZ-8A, produced by extrusion of prealloyed powders
[NASA-TN-D-5248] c17 N69-26192
Oxidation and thermal fatigue cracking of nickel- and cobalt-base alloys in a high velocity gas stream
[NASA-TN-D-5376] c17 N69-33307
ASHBURN, E. V.
A study of jimsphere wind profiles as related to space vehicle design and operations
[NASA-CR-1204] c20 N69-13629
ASHBY, G. C., JR.
Some topics in hypersonic body shaping.
[AIAA PAPER 69-181] c01 A69-18052
Calculated and experimental hinge moments on a trailing-edge flap of a 75 deg swept delta wing at Mach 6
[NASA-TN-D-4268] c01 N69-10054
ASTRIN, R.
Hydrogen-oxygen electrolytic regenerative fuel cells
[NASA-CR-1244] c03 N69-18885
ATHANS, M.
Suboptimal state estimation for continuous-time nonlinear systems from discrete noisy measurements.
c10 A69-17939
ATKINS, H.
Subject classification bibliography for thermal contact resistance studies.
[ASME PAPER 68-WA/HT-18] c33 A69-16122
ATLAN, H.
Differences between radiation-induced life shortening and natural aging in Drosophila

melanogaster.
c04 A69-30444

Boundary-layer tripping with emphasis on hypersonic flows.
c12 A69-33249
Flow-field and drag characteristics of several boundary-layer tripping elements in hypersonic flow
[NASA-TN-D-5454] c12 N69-38156
WHITEHEAD, V. S.
Cloud height contouring from Apollo 6 photography.
c20 A69-36926
WHITFIELD, C. E.
Evaluation of meta-benzenedisulfonic acid as a stress-reducing additive in a Watts nickel electroplating bath
[NASA-TN-D-5188] c17 N69-36697
WHITING, E. E.
Line by line calculation of spectra from diatomic molecules and atoms assuming a Voigt line profile.
c24 A69-35239
A computer program for a line by line calculation of spectra from diatomic molecules and atoms assuming a Voigt line profile
[NASA-TN-D-5088] c24 N69-21462
WHITLOCK, C. H.
Dynamic stability characteristics of large-size 120 deg blunted conical spacecraft in a simulated Martian environment.
[AIAA PAPER 69-104] c31 A69-18210
Damping derivatives of 120 deg conical spacecraft from flights in a low-density environment.
c31 A69-40550
Wind tunnel investigation of inflation of disk-gap-band and modified ringsail parachutes at dynamic pressures between 0.24 and 7.07 pounds per square foot
[NASA-TM-X-1786] c01 N69-23538
Inflation and performance of three parachute configurations from supersonic flight tests in a low-density environment
[NASA-TN-D-5296] c01 N69-30063
WHITMAN, R. I.
Infrared horizon profiles for winter conditions from Project Scanner
[NASA-TN-D-4905] c21 N69-14346
A technique to infer atmospheric temperature from horizon radiance profiles

[NASA-TN-D-5068] c13 N69-19024
A technique to infer atmospheric water-vapor mixing ratio from measured horizon radiance profiles
[NASA-TN-D-5252] c13 N69-27246
WHITMARSH, C. L., JR.
A 1-megawatt reactor design for Brayton-cycle space power application. Part 1 - Thermal analysis and core design
[NASA-TN-D-5013] c22 N69-17313
A 1-megawatt reactor design for Brayton-cycle space power application Part 2 - Neutronics design
[NASA-TN-D-5014] c22 N69-17314
Neutronic comparison of beryllium oxide and molybdenum for movable reflector control of a fast-spectrum reactor
[NASA-TM-X-1822] c22 N69-29593
Characteristics of a 2.17-megawatt fast- spectrum reactor concept using an axially moving reflector control system
[NASA-TM-X-1911] c22 N69-40061
WHITNEY, W. J.
Performance of a single-stage turbine as affected by variable stator area.
[AIAA PAPER 69-525] c28 A69-32686
Analytical investigation of the effect of cooling air on two-stage turbine performance
[NASA-TM-X-1728] c01 N69-17392
Cold air investigation of a turbine with stator-blade trailing-edge coolant ejection. Part 1 - Overall stator performance
[NASA-TM-X-1901] c03 N69-39335
WHITSETT, C. E., JR.
EVA maneuvering unit comparison.
[AAS PAPER 69-516] c05 A69-42850
WICHOREK, G. R.
Design, fabrication, and tests of tubular beryllium and Be-38Al alloy truss-type structures
[NASA-TN-D-5254] c32 N69-28658
WICKRAMASINGHE, N. C.
Graphite particle model for NML Cygnus.
c30 A69-13775
Strengths of the fundamental bands of ice and solid hydrogen in composite grains.
c23 A69-29587
Solid hydrogen coated graphite particles in the interstellar medium. I.

Real-time targeting for the Apollo lunar orbit insertion maneuver.
[AIAA PAPER 68-848] c31 A69-39760
WILKERSON, T. D.
Plasma observations on Explorer 34.
c13 A69-11234
Helium abundance in the solar wind.
c29 A69-40305
WILKINS, J. R.
Microbiological studies on a water management subsystem for manned space flight.
[SAE PAPER 680718] c05 A69-13441
WILLIAMS, B. L.
Improved method of removing plastic backing films from carbon electron microscope replicas.
c14 A69-21651
WILLIAMS, D. A.
The interstellar H super plus sub 2 molecule.
c30 A69-42610
WILLIAMS, D. J.
The Small Scientific Satellite
[IEEE PAPER 3C-1] c31 A69-19195
Proton entry into the magnetosphere on May 26, 1967.
c29 A69-31984
Design of a long-life reliable nuclear experiment for space flight.
c09 A69-36676
WILLIAMS, D. P.
Comments on slow crack growth of steels in hydrogen and water environments.
c17 A69-10612
WILLIAMS, J. R.
Space manufacturing modules.
c31 A69-35067
A feasibility study of determining physical properties of the Martian atmosphere by use of solar occultation as seen from an artificial satellite
[NASA-TN-D-5443] c30 N69-38658
WILLIAMS, M. D.
Parameters affecting firing time of simultaneously triggered trigatron spark gap switches
[NASA-TN-D-5077] c09 N69-20888
WILLIAMS, R. M.
A comparison of the performance of two rhenium, niobium cylindrical thermionic converters.
c03 A69-13126
The performance of a rhenium, niobium cylindrical thermionic converter.
c03 A69-16359
WILLIAMS, W. L.
In-house research on the management of R and D in government agencies.
c34 A69-38022
WILLIAMSON, R. C.
Velocity of sound at 1 MHz near the He super 4 critical point.
c23 A69-17142
Measurement of the velocity and attenuation of ultrasonic pulses in the presence of noise.
c14 A69-29564
WILLICH, W.
A flight investigation of systems developed for reducing pilot workload and improving tracking accuracy during noise-abatement landing approaches
[NASA-CR-1427] c02 N69-38657

WILLIS, C. M.
Calorimetric, optical, and vibration investigations of stretch-formed aluminum solar concentrators
[NASA-TN-D-4889] c03 N69-10708
Calorimetric evaluation of two cone-column solar-energy concentrations
[NASA-TN-D-5109] c03 N69-21088
WILLIS, E. A., JR.
Two-burn escape maneuvers with an intermediate coasting ellipse
[NASA-TN-D-5011] c30 N69-17305
WILLOH, R. G.
A mathematical analysis of supersonic inlet dynamics
[NASA-TN-D-4969] c01 N69-14289
Multistage compressor simulation applied to the prediction of axial flow instabilities
[NASA-TM-X-1880] c28 N69-36998
WILLOUGHBY, D. S.
An interpretation of OGO light ion abundance measurements.
c13 A69-25157
Temperature and ion abundance profiles deduced from simultaneous Explorer XXXI and Alouette II data.
c13 A69-37896
WILLOUGHBY, R.
Toxicity problems in plastic hardware designed for biological space-flight experiments
[NASA-TM-X-1818] c04 N69-29723
WILMARTH, R. W.
Small-signal and saturation characteristics of an X-band cyclotron-resonance oscillator.
c09 A69-22786
Cooling of a high-power electron tube in a space vehicle.
c09 A69-24747
Nonelectric cathode heating.
c09 A69-24748
WILMARTH, V. R.
Apollo lunar sample analysis program - A progress report.
c11 A69-40191
WILSON, A.
Carroll's method applied to small stellar rotations.

Laser Doppler velocity instrument
[R-67-4450] c14 N69-14351
YOUNG, R. S.
Weightlessness and the developing frog egg.
c04 A69-11084
The search for life - Planetary evolution.
c04 A69-12804
Life detection techniques.
c05 A69-32970
Extraterrestrial life detection.
c30 A69-41623
YOUNG, S. G.
Effect of temperature and pressure on cavitation damage to a cobalt base alloy in sodium.
c17 A69-35184
Effect of ultrasonic vibration on precipitation hardening of steels and superalloys
[NASA-TN-D-5131] c32 N69-21814
Effect of temperature and pressure on cavitation damage to a cobalt base alloy in sodium
[NASA-TN-D-5273] c17 N69-28863
YOUNGBLUTH, O., JR.
Photomultiplier area sensitivity measurements using a multicolor display technique.
c14 A69-35724
YOUNGER, C. L.
Effect of nuclear radiation at cryogenic temperatures on the tensile properties of titanium and titanium-base alloys
[NASA-TN-D-5442] c17 N69-37436
YUAN, S.
Design considerations for an integrated 1.8- GHz parametric amplifier.
c09 A69-10193
YUEN, M. C.
Experimental investigation of magnetoaerodynamic flow around blunt bodies
[NASA-CR-1393] c25 N69-34897

Z

ZADEH, L. A.
Toward a theory of fuzzy systems
[NASA-CR-1432] c19 N69-37033

ZAITZEFF, E. M.
Advanced Space Experiments, American Astronautical Society, Conference, Ann Arbor, Mich., September 16-18, 1968, Proceedings.
c30 A69-34359

ZAKIN, J. L.
Exploratory drag reduction studies in non-polar soap systems.
c12 A69-33253

ZAMES, G.
Logarithmic variation criteria for the stability of systems with time-varying gains.
c10 A69-13073
Stability of systems with sector nonlinearities - a comparison of various inequalities.
c10 A69-25450

ZAREMBA, J. G.
Implementation of a semi-active gravity gradient controller.
c31 A69-18334

ZARETSKY, E. V.
EHD lubrication.
c15 A69-11324
Contact conformity effects on spinning torque and friction.
[ASME PAPER 68-LUB-10] c15 A69-30901
Elastohydrodynamic lubrication of a spinning ball in a nonconforming groove.
[ASME PAPER 69-LUBS-11] c15 A69-34381
Effect of oxygen concentration on synthetic paraffinic and advanced ester base lubricants in bearing tests at 400 deg and 450 deg F.
c15 A69-35177
Rolling-element fatigue life of ausformed M-50 steel balls
[NASA-TN-D-4954] c15 N69-14383
Rolling-element bearing life from 400 deg to 600 F
[NASA-TN-D-5002] c15 N69-16367
Effect of oxygen concentration on an advanced ester lubricant in bearing tests at 400 deg and 450 deg F
[NASA-TN-D-5262] c15 N69-26311
Effect of oxygen concentration on the performance of synthetic paraffinic oils in short term bearing tests from 400 deg to 500 deg F
[NASA-TN-D-5152] c15 N69-26314
Speed effects on ball spinning torque
[NASA-TN-D-5527] c15 N69-41210

ZEITMAN, B. B.
New observations on the substrate specificity of cathepsin C /dipeptidyl aminopeptidase I/ including the degradation of beta-corticotropin and other peptide hormones.
c04 A69-37577

ZELEZNIK, F. J.
Calculation of complex chemical equilibria.
c06 A69-10588
A comparison of rotational collision numbers obtained from different definitions
[NASA-TN-D-5321] c24 N69-30073

ZELLARS, G. R.
Evaluation of the results of a round robin analysis for oxygen in potassium and sodium
[NASA-TN-D-4971] c06 N69-14180

ZELLER, J. R.
Design and analysis of a modular servoamplifier for fast-response electrohydraulic control systems
[NASA-TN-D-4898] c03 N69-10068
Dynamic performance analysis of a fuel-control valve for use in airbreathing engine research
[NASA-TN-D-5331] c03 N69-29977
Analysis of dynamic performance limitations of fast response /150 to 200 Hz/ electrohydraulic servos
[NASA-TN-D-5388] c03 N69-34652

ZENDER, G. W.
Compressive properties and column efficiency of metals reinforced on the surface with bonded filaments
[NASA-TN-D-4878] c17 N69-11012

ZIMMERMAN, B. G.
Digital simulation of rotational kinematics
[NASA-TN-D-5302] c23 N69-39178

ZINN, B. T.
Effect of jet temperature on jet and pure tone noise radiation
[NASA-CR-1472] c02 N69-40439

ZITO, G. V.
Design and development of a multipurpose, boresighted star tracker
[NASA-CR-976] c21 N69-21502

ZMUDA, A. J.
Ionospheric and magnetic observations at 1000 kilometers during the geomagnetic storm and aurora of May 25-26, 1967.
c13 A69-34954

ZOBY, E. V.
An evaluation test of a full scale replica of the RAM-CA flight heat shield in a rocket engine exhaust
[NASA-TM-X-1841] c31 N69-32713

ZOLA, C. L.
Interplanetary probe missions with solar- electric propulsion systems
[NASA-TN-D-5293] c30 N69-29738

ZRUBEK, W. E.
Optimum design of communication links with noisy phase reference
[NASA-TN-D-4895] c07 N69-13155

ZUCCARO, J. J.
EEG sensing and transmitting system contained in a flight helmet.
c05 A69-26553

ZUK, J.
Numerical solutions for the flow and pressure fields in an idealized spiral grooved pumping seal.
[ASLE PREPRINT 30] c15 A69-30481
Computer program for viscous, isothermal compressible flow across a sealing dam with small tilt angle
[NASA-TN-D-5373] c15 N69-33281
Investigation of isothermal, compressible flow across a rotating sealing dam. 1 - Analysis
[NASA-TN-D-5344] c15 N69-35799

ZUMOFF, J.
Fluorescence spectra of homogeneous and mixed europium complexes.
c06 A69-10893

ZUPP, G. A., JR.
Applications of quasi-linearization theory to system identification
[NASA-TN-D-5300] c19 N69-29648

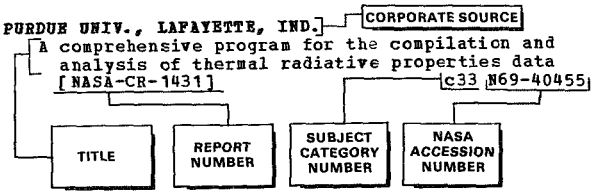
ZWEIGBAUM, H.
Launch constraints.
c31 A69-37287

CORPORATE SOURCE INDEX

NASA SCIENTIFIC AND TECHNICAL REPORTS AND PUBLICATIONS FOR 1969

A Selected Listing

Typical Corporate Source Index Listing



Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The subject category number indicates the subject category in the abstract section in which the citation is located. The accession number denotes the number by which the citation is identified within the subject category. The titles are arranged under each personal author in ascending accession number order. There are no "A" items in this index because AIAA does not use the Corporate Source entry.

A

AEROCHEM RESEARCH LABS., INC., PRINCETON, N. J.
Vaporization and decomposition kinetics of candidate re-entry blackout suppressants in low-pressure flames
[NASA-CR-1330] c07 N69-32721

AEROJET-GENERAL CORP., SACRAMENTO, CALIF.
Hydrogen gas pressure vessel problems in the M-1 facilities
[NASA-CR-1305] c17 N69-19831

AERONAUTICAL RESEARCH ASSOCIATES OF PRINCETON, INC., N. J.
Sonic boom propagation in a stratified atmosphere, with computer program
[NASA-CR-1299] c02 N69-22546

AIRESEARCH MFG. CO., LOS ANGELES, CALIF.
Man's capability for self-locomotion on the moon. Volume 2 - Summary report
[NASA-CR-1403] c05 N69-36271
Man's capability for self-locomotion on the moon. Volume 1 - Detailed report
[NASA-CR-1402] c05 N69-37964

ALI /DELORES E./, BERKELEY, CALIF.
Measurements of negative ion production in atmospheric gases
[NASA-CR-1406] c24 N69-38564

AMERICAN CYANAMID CO., STAMFORD, CONN.
High-performance light-weight electrodes for hydrogen-oxygen fuel cells
[NASA-CR-1216] c03 N69-14397

AMERICAN OPTICAL CO., FRAMINGHAM, MASS.
Holographic microscopy for the determination of failure mechanisms in monolithic circuits
[NASA-CR-1394] c14 N69-31958

ANPEX CORP., REDWOOD CITY, CALIF.
Study, fabrication and testing of a foil-bearing rotor support system
[NASA-CR-1157] c15 N69-14214

ANALYTIC SCIENCES CORP., READING, MASS.
Design of strapdown gyroscopes for a dynamic environment Interim scientific report
[NASA-CR-1396] c21 N69-34672

APPLIED PHYSICS LAB., JOHNS HOPKINS UNIV., SILVER SPRING, MD.
Unified analysis of turbulent jet mixing
[NASA-CR-1382] c12 N69-31887
The interaction and penetration of gaseous jets in supersonic flow
[NASA-CR-1386] c12 N69-32480

APPLIED THEORY, SANTA MONICA, CALIF.
Numerical calculation of viscous compressible fluid flow around an oscillating rigid cylinder
[NASA-CR-1467] c12 N69-38782

ARIZONA UNIV., TUCSON.
Computation of regions of constrained stability for nonlinear control systems
[NASA-CR-1328] c19 N69-28196
The design of linear multivariable control systems using modern control theory /with applications to coupled core reactor control/
[NASA-CR-1345] c19 N69-29268

ASTRO RESEARCH CORP., SANTA BARBARA, CALIF.
Certain physical properties and applications of Nitinol
[NASA-CR-1232] c17 N69-11420
Investigation of a coilable lattice column
[NASA-CR-1301] c32 N69-26234
Heliogyro solar sailer Summary report
[NASA-CR-1329] c31 N69-28861
Axisymmetric and cylindrical isostabiloids
[NASA-CR-1444] c32 N69-38781

ATOMICS INTERNATIONAL, CANOGA PARK, CALIF.
Preparation of UC and UC-W specimens for an irradiation test of the value of a fine-particle dispersion in the control of fission gas swelling /EXP-NRX-9-101 experiment/
[NAA-SR-12629] c22 N69-22946
Solubility of refractory metals and alloys in potassium and in lithium
[NASA-CR-1371] c17 N69-27059

AVCO CORP., LOWELL, MASS.
Study of ferromagnetic liquid
[NASA-CR-1407] c06 N69-33493

AZTEC SCHOOL OF LANGUAGES, INC., ACTON, MASS.
Radio bridge - ''Earth-moon-earth''
[NASA-TT-F-527] c07 N69-14973
Aurorae and airglow. Results of the research on the international geophysical projects. Collection of articles, no. 13
[NASA-TT-F-530] c13 N69-16539
Observations of noctilucent clouds
[NASA-TT-F-546] c13 N69-25013
Perception of space and time in outer space
[NASA-TT-F-545] c05 N69-26455
Electromedical apparatus - Principles of operation, installation, and use
[NASA-TT-F-523] c05 N69-27577
Motive forces in the development of the earth and planets
[NASA-TT-F-532] c13 N69-28983
Critical regimes of supersonic jet aircraft-stall and spin
[NASA-TT-F-526] c02 N69-31917
Boundary layer and chemical reactions
[NASA-TT-F-549] c33 N69-31947
Transactions of the Tenth Scientific Conference of the Institute of History of Natural Science and Technology
[NASA-TT-F-537] c34 N69-36314
Problems of Space Biology, volume 6
[NASA-TT-F-528] c05 N69-38701

AZTEC SCHOOL OF LANGUAGES, INC., MAYNARD, MASS.
Coordination of the voluntary movements of man in a zero gravitational field /under weightlessness/
[NASA-TT-F-578] c04 N69-31356
Transactions of the Ninth Scientific Conference of Graduate Students and Junior Scientific Associates of the Institute for the History of Natural Science and Technology, Section on the History of Aviation and Cosmonautics
[NASA-TT-F-540] c34 N69-31836
Transfer of microwave radiation in the atmosphere
[NASA-TT-F-590] c13 N69-31851
Problems of space biology. Volume 8 - Adaptation to hypoxia and resistance of an organism
[NASA-TT-F-580] c04 N69-32131

Solar activity, no. 3 Collection of articles
[NASA-TT-F-581] c29 N69-33401
High temperature oxidation protection of tungsten
[NASA-TT-F-583] c17 N69-35836

B

BARRY WRIGHT CORP., WATERTOWN, MASS.
Loss factor and resonant frequency of viscoelastic shear-damped structural composites
[NASA-CR-1269] c32 N69-17766
BATTELLE MEMORIAL INST., COLUMBUS, OHIO.
Satellite applications to marine geodesy
[NASA-CR-1253] c13 N69-16645
Systems approach to evaluating Hydrogenomonas cultures
[NASA-CR-1296] c05 N69-22766
Research on metallurgical characteristics and performance of materials used for sliding electrical contacts Summary report, 1 May 1968 - 30 Apr. 1969
[NASA-CR-1447] c17 N69-40057
BELL AEROSYSTEMS CO., BUFFALO, N. Y.
Empirically determined wind and scale effects on hot gas recirculation characteristics of jet V/STOL aircraft
[NASA-CR-1445] c28 N69-40776
BENDIX CORP., MISHAWAKA, IND.
Study of a modular extravehicular activity work platform
[NASA-CR-1361] c31 N69-26993
BENDIX CORP., TETERBORO, N. J.
Design and development of a multipurpose, boresighted star tracker
[NASA-CR-976] c21 N69-21502
BOEING CO., SEATTLE, WASH.
Shear strain properties to 10 sup -10 of selected optical materials
[NASA-CR-1257] c14 N69-16100
A flight investigation of systems developed for reducing pilot workload and improving tracking accuracy during noise-abatement landing approaches
[NASA-CR-1427] c02 N69-38657
Flight test results of a trailing edge flap designed for direct-lift control
[NASA-CR-1426] c02 N69-38819
BOLT, BERANEK, AND NEWMAN, INC., CAMBRIDGE, MASS.
Human visual sampling processes - A simulation validation study
[NASA-CR-1258] c05 N69-14145
Correlation of fluctuating forces with the sound radiation from rigid flow spoilers
[NASA-CR-1340] c23 N69-26307
BOLT, BERANEK, AND NEWMAN, INC., VAN NUYS, CALIF.
Combination effects of tone and duration parameters on perceived noisiness
[NASA-CR-1283] c04 N69-18722
Development of impedance simulation fixtures for spacecraft vibration tests
[NASA-CR-1351] c32 N69-26315
BROWN ENGINEERING CO., INC., HUNTSVILLE, ALA.
The general instability of eccentrically stiffened cylindrical shells under axial compression and lateral pressure
[NASA-CR-1280] c32 N69-15378

C

CALIFORNIA INST. OF TECH., PASADENA.
Stable crack propagation in a viscoelastic strip
[NASA-CR-1279] c30 N69-21506
Two-micron sky survey - A preliminary catalog
[NASA-SP-3047-REV] c30 N69-37993
CALIFORNIA UNIV., BERKELEY.
Incremental analysis of large deformations in mechanics of solids with applications to axisymmetric shells of revolution
[NASA-CR-1350] c32 N69-28624
Toward a theory of fuzzy systems
[NASA-CR-1432] c19 N69-37033
CALIFORNIA UNIV., LOS ANGELES.
Geometric properties of a prestressed segmented spherical shell
[NASA-CR-1231] c32 N69-11010
CALIFORNIA UNIV., SAN DIEGO.
Experiments on visual acuity and the visibility of markings on the ground in long-duration earth-orbital space flight
[NASA-CR-1134] c05 N69-10813
CASE WESTERN RESERVE UNIV., CLEVELAND, OHIO.
A lunar gravity simulator, volume 1
[NASA-CR-1233-VOL-1] c05 N69-11675
A lunar gravity simulator, volume 3
[NASA-CR-1235] c05 N69-14213
Structural synthesis of a stiffened cylinder
[NASA-CR-1217] c32 N69-14254
A lunar gravity simulator, volume 2
[NASA-CR-1234] c05 N69-14979
The structural synthesis of an ablating thermostructural panel
[NASA-CR-1215] c32 N69-16114
CHRYSLER CORP., DETROIT, MICH.
Experimental verification of surface vehicle dynamics
[NASA-CR-1399] c11 N69-37022
CITY COLL. OF THE CITY OF NEW YORK.
Dynamic response of structural elements exposed to sonic booms
[NASA-CR-1281] c32 N69-21403
CLEMSON COLL., S. C.
A family of solutions of certain nonautonomous differential equations by series of exponential functions
[NASA-CR-1294] c19 N69-17249
COMMUNICATIONS AND SYSTEMS, INC., FALLS CHURCH, VA.
Analysis of two alternate damping systems for GEOS gravity gradient stabilized satellite
[NASA-CR-1282] c14 N69-18953
CONTROL DATA CORP., MINNEAPOLIS, MINN.
Method of deriving orbital perturbing parameters from onboard optical measurements of an ejected probe or a natural satellite
[NASA-CR-1412] c30 N69-35513
CORNELL AERONAUTICAL LAB., INC., BUFFALO, N. Y.
Synthesis methods for manual aerospace control systems with applications to SST design
[NASA-CR-1208] c02 N69-13185
Nonequilibrium gasdynamics
[NASA-CR-1411] c12 N69-34709
Ground wind characteristics at Kennedy Space Center Final report
[NASA-CR-1418] c20 N69-36222
CORNELL UNIV., ITHACA, N. Y.
Comments on the nature of the outside boundary layer on a liquid sphere in a steady, uniform stream
[NASA-CR-1362] c12 N69-24877
Hydrodynamic stability of inviscid rotating coaxial jets
[NASA-CR-1363] c12 N69-24926
On minimizing the wake of droplets
[NASA-CR-1368] c12 N69-24958

D

DENVER UNIV., COLO.
The use of thermodynamic properties of metal-gas systems as reduced-pressure standards
[NASA-CR-1271] c14 N69-16099
Technology transfer - A selected bibliography
[NASA-CR-1355] c34 N69-28868
DREXEL INST. OF TECH., PHILADELPHIA, PA.
MCDIT 21 - A computer code for one-dimensional elastic wave problems
[NASA-CR-1306] c32 N69-22983
DUNLAP AND ASSOCIATES, INC., DARIEN, CONN.
Peripheral vision displays, phase 2 report
[NASA-CR-1239] c05 N69-14478
Differential thresholds for motions in the periphery
[NASA-CR-1439] c05 N69-36925
DYNATECH CORP., CAMBRIDGE, MASS.
Asymmetric nonlinear dynamic response and buckling of shallow spherical shells
[NASA-CR-1376] c32 N69-29558

E

ELECTRO-OPTICAL SYSTEMS, INC., PASADENA, CALIF.
Hydrogen-oxygen electrolytic regenerative fuel cells
[NASA-CR-1244] c03 N69-18885
ENVIRONMENTAL RESEARCH ASSOCIATES, RANDALLSTOWN, MD.
Correlation study of the simulation of Gemini extravehicular activity with flight results
[NASA-CR-1146] c05 N69-19902

Study of the astronaut's capabilities to maintain life support systems and cabin habitability in weightless conditions
[NASA-CR-1405] c05 N69-36709

F

FAIRCHILD CAMERA AND INSTRUMENT CORP., SYOSSET, N. Y.
Planetary film reconnaissance system
[NASA-CR-1358] c14 N69-28023
FLIGHT SAFETY FOUNDATION, INC., ARLINGTON, VA.
General-aviation pilot reactions to and opinions on grooved runways
[NASA-CR-1428] c02 N69-35861
FRANKLIN INST., PHILADELPHIA, PA.
Study of pretesting effects on electroexplosive devices
[NASA-CR-1203] c15 N69-10298
High performance turboalternator and associated hardware. 3. Design of backup gas bearings
[NASA-CR-1292] c15 N69-19775
NASA contributions to fluid-film lubrication - A survey
[NASA-SP-5058] c15 N69-28592
Electrical characteristics of Pyrrole polymers
[NASA-CR-1367] c18 N69-29559

G

GARRETT CORP., LOS ANGELES, CALIF.
A study of astronauts' extravehicular work capabilities in weightless conditions
[NASA-CR-1334] c05 N69-27266
GCA CORP., BEDFORD, MASS.
Inference of stratospheric temperature and moisture profiles from observations of the infrared horizon Final report
[NASA-CR-1419] c20 N69-35528
GENERAL APPLIED SCIENCE LABS., INC., WESTBURY, N. Y.
Research and development of a sonic boom simulation device
[NASA-CR-1378] c02 N69-31959
GENERAL DYNAMICS CORP., SAN DIEGO, CALIF.
Experiments on a high power, pulsed, constricted arc heater
[GDC-DBE-68-008] c25 N69-17212
Study of air pollutant detection by remote sensors
[GDC-DBE-68-011] c13 N69-31961
GENERAL DYNAMICS/CONVAIR, SAN DIEGO, CALIF.
Analysis and design of space vehicle flight control systems. Volume 16 - Abort
[NASA-CR-835] c31 N69-27299
GENERAL DYNAMICS/FORT WORTH, TEX.
Space flight handbooks, volume 3. Planetary flight handbook, part 7 - Direct trajectories to Jupiter, Saturn, Uranus, and Neptune. General discussion, contour charts and related graphical information
[NASA-SP-35-VOL-3-PT-7] c30 N69-33490
Planetary Flight Handbook. Part 8 - Jupiter swingby missions to Saturn, Uranus, Neptune, and Pluto
[NASA-SP-35-PT-8] c30 N69-34850
GENERAL ELECTRIC CO., CINCINNATI, OHIO.
Cb-1Zr pumped sodium loop
[NASA-CR-1135] c03 N69-11373
GENERAL ELECTRIC CO., LYNN, MASS.
Performance comparisons of high Mach number compressor rotor blading
[NASA-CR-1256] c28 N69-14210
GENERAL ELECTRIC CO., PHILADELPHIA, PA.
Theoretical prediction of crater size for hypervelocity impact by reduced-density particles, 18 May 1966 - 17 August 1967
[NASA-CR-1196] c32 N69-10225
Zero thermal expansion composites of high strength and stiffness
[NASA-CR-1324] c32 N69-24876
GENERAL ELECTRIC CO., SCHENECTADY, N. Y.
Characteristics of a thermionic converter with a chloride vapor deposited tungsten emitter /110/ and a nickel collector
[NASA-CR-1416] c03 N69-32553
Characteristics of a thermionic converter with a fluoride vapor deposited tungsten emitter etched to preferentially expose the 110 crystal planes
[NASA-CR-1381] c03 N69-35689
Reduction of recovery time in high-temperature cesium vapor thyratrons
[NASA-CR-1417] c03 N69-36411
Development and inverter testing of high temperature cesium-vapor thyratrons
[NASA-CR-1435] c03 N69-36843
GENERAL MOTORS CORP., INDIANAPOLIS, IND.
Experimental investigation of advanced concepts to increase turbine blade loading. 3 - Performance evaluation of tandem rotor blade
[NASA-CR-1254] c01 N69-13621
Experimental investigation in an annular cascade sector of highly loaded turbine stator blading. Volume 1 - Analysis and design
[NASA-CR-1219] c01 N69-14211
Experimental investigation in an annular cascade sector of highly loaded turbine stator blading. Volume 3 - Performance of tandem blade
[NASA-CR-1341] c01 N69-23892
Experimental investigation of advanced concepts to increase turbine blade loading. 4 - Performance evaluation of plain rotor blade with plow type vortex generators
[NASA-CR-1342] c28 N69-24223
Experimental investigation in an annular cascade sector of highly loaded turbine stator blading. Volume 2 - Performance of plain blade and effect of vortex generators
[NASA-CR-1323] c01 N69-25327
Experimental investigation in an angular cascade sector of highly loaded turbine stator blading. Volume 4 - Performance of a jet- flapped blade
[NASA-CR-1423] c28 N69-36680
GENERAL TECHNOLOGY CORP., LAWRENCEVILLE, N. J.
Compatibility conditions of the theory of micromorphic elastic solids
[NASA-CR-1236] c26 N69-10817
A continuum theory for an elastic solid with elastic micro-inclusions
[NASA-CR-1321] c32 N69-21401
On the determination of micromorphic material constants from properties of the constituents
[NASA-CR-1320] c32 N69-21569
A lattice model for composite materials
[NASA-CR-1322] c32 N69-22982
GOODYEAR AEROSPACE CORP., AKRON, OHIO.
Nitinol characterization study
[NASA-CR-1433] c17 N69-36367

H

HARVARD UNIV., BOSTON, MASS.
Predicting human performance in space environments
[NASA-CR-1370] c05 N69-30168
HONEYWELL, INC., LEXINGTON, MASS.
Laboratory cculometer
[NASA-CR-1422] c05 N69-39212
HUGHES AIRCRAFT CO., CULVER CITY, CALIF.
Development and processing of pyrcnne polymers
[NASA-CR-1310] c18 N69-26448
HUMPHREYS CORP., CONCORD, N. H.
Induction plasma heating - High power, low frequency operation and pure hydrogen heating
[NASA-CR-1343] c22 N69-24055
HYDRONAUTICS, INC., LAUREL, MD.
Experimental and analytical investigations on multiple liquid impact erosion
[NASA-CR-1288] c15 N69-19786

I

IIT RESEARCH INST., CHICAGO, ILL.
Flow in a two-dimensional channel with a rectangular cavity
[NASA-CR-1245] c12 N69-14095
Evaluation of vacuum UV detector-spectroscopy systems fcr capsule reentry measurements
[NASA-CR-1268] c09 N69-18761
Effect of free stream turbulence on coaxial mixing
[NASA-CR-1336] c12 N69-24058
Air pollution monitoring instrumentation A survey
[NASA-SP-5072] c14 N69-24751
Turbulence in the mixing region between ducted coaxial streams
[NASA-CR-1335] c12 N69-30728
ILLINOIS UNIV., URBANA.
The conformal mapping of the interior of the unit circle onto the interior of a class of smooth curves
[NASA-CR-1357] c32 N69-26559

INTERNATIONAL BUSINESS MACHINES CORP., CAMBRIDGE, MASS.
Rapid optimization of multiple-burn rocket flights, 8 March 1968 - 8 March 1969
[NASA-CR-1430] c30 N69-36439
INTERNATIONAL INFORMATION, INC., PHILADELPHIA, PA.
Theory of motion of the planet Pluto. Part 2 - Plutonian perturbation of the second order with respect to perturbing masses. Part 3 - Recalculation of first- order Plutonian perturbations with respect to perturbing masses. Part 4 - New elements of Pluto
[NASA-TT-F-491] c30 N69-14943
Theory of motion of the planet Pluto. Part 1 - Plutonian perturbations of the first order with respect to perturbing masses
[NASA-TT-F-490] c30 N69-14944
IOWA UNIV., IOWA CITY.
Improvement of an integral equation method in plane elasticity through modification of source density representation
[NASA-CR-1273] c32 N69-19030
ISRAEL PROGRAM FOR SCIENTIFIC TRANSLATIONS, LTD., JERUSALEM.
The earth in the universe
[NASA-TT-F-345] c13 N69-12384
Handbook of astronautics
[NASA-TT-F-500] c31 N69-24760
Scattering, reactions and decay in nonrelativistic quantum mechanics
[NASA-TT-F-510] c24 N69-25848
Nonlinear problems of compressible flow
[NASA-TT-F-560] c12 N69-27168
RR Lyrae stars
[NASA-TT-F-562] c30 N69-27169
High temperature strength of materials
[NASA-TT-F-508] c17 N69-27300
The Oxygen Regime of the Organism and Its Regulation /Symposium/
[NASA-TT-F-501] c04 N69-31401
Mechanics of spaceflight low-thrust
[NASA-TT-F-507] c28 N69-33354
High-temperature properties of gases. Physical gas dynamics, thermodynamics, and physics of combustion
[NASA-TT-F-558] c12 N69-35365
ITT INDUSTRIAL LABS., FORT WAYNE, IND.
Research and development of a single gun color CRT, phase 1 Final report
[NASA-CR-1228] c09 N69-14256

K

KAMAN AIRCRAFT CORP., BLOOMFIELD, CONN.
The Bossler coupling
[NASA-CR-1241] c15 N69-16104
KAMAN NUCLEAR, COLORADO SPRINGS, COLO.
Variability of sound propagation prediction due to atmospheric variability
[NASA-CR-1338] c23 N69-22545
KAMAN SCIENCES CORP., COLORADO SPRINGS, COLO.
The effects of atmospheric fluctuations and representation upon propagated sound
[NASA-CR-1337] c23 N69-23199
KENTUCKY UNIV., LEXINGTON.
An investigation of the suitability of white rats for sub-orbital studies of behavior in a gravity field
[NASA-CR-1255] c05 N69-14094

L

LING-TEMCO-VOUGHT, INC., DALLAS, TEX.
Roll and yaw compensation feasibility study
[NASA-CR-1209] c31 N69-16221
Investigation of bremsstrahlung production in spacecraft materials
[NASA-CR-1377] c24 N69-33416
An experimental study of electron transmission and bremsstrahlung production
[NASA-CR-1383] c24 N69-34541
LITCHFORD SYSTEMS, NORTHPORT, N. Y.
Study of advanced electronic applications to aeronautical display and control problems
[NASA-CR-1240] c02 N69-14729
LOCKHEED AIRCRAFT CORP., SUNNYVALE, CALIF.
Emissivity coatings for low-temperature space radiators

Requirements study for a biotechnology laboratory for manned earth orbiting missions Volume 1 - Results, recommendations and requirements
[NASA-CR-1408] c05 N69-35541
MCDONNELL-DOUGLAS CO., LONG BEACH, CALIF.
A numerical solution for the minimum induced drag, and the corresponding loading, of nonplanar wings Final report
[NASA-CR-1218] c01 N69-10343
A numerical solution for the minimum induced drag, and the corresponding loading, of nonplanar wings. 1 - User's manual for computer program 55VD. 2 - Descriptive manual for computer program 55VD
[NASA-CR-1218-SUPPL] c01 N69-12286
MEASUREMENT ANALYSIS CORP., LOS ANGELES, CALIF.
A method for predicting launch vehicle vibration levels in the region of the spacecraft adaptor

[NASA-CR-1227] c31 N69-16155
Summary of random vibration prediction procedures
[NASA-CR-1302] c32 N69-23096
MECHANICAL TECHNOLOGY, INC., LATHAM, N. Y.
High-performance turboalternator and associated hardware. 2 - Design of gas bearings
[NASA-CR-1291] c15 N69-21772
MICHAEL REESE HOSPITAL AND MEDICAL CENTER, CHICAGO, ILL.
Analyses and measurements of blood samples
[NASA-CR-1395] c05 N69-38600
MICHIGAN UNIV., ANN ARBOR.
On the generation of ideal coordinate systems for the analysis of optimal trajectories
[NASA-CR-1250] c30 N69-13274
Computer mechanization of reentry equations with four degrees of freedom
[NASA-CR-1249] c30 N69-13300
Skill training for the production of a memorized movement pattern
[NASA-CR-1251] c05 N69-13926
Proprioceptive cues and their influence on operator performance in manual control
[NASA-CR-1248] c05 N69-14768
E-type photodemodulators for coherent light signals Final technical report
[NASA-TT-F-430] c09 N69-15441
Sensitivity of the creep-rupture properties of nickel-base superalloy sheet to sharp edge-notches in the temperature range of 1000 deg F - 1400 deg F
[NASA-CR-1263] c32 N69-16156
A study of human operator performance using regression analysis
[NASA-CR-1259] c05 N69-16212
A fundamental study of predictive display systems
[NASA-CR-1274] c05 N69-17738
An experimental and theoretical analysis of the convected balanced arc
[NASA-CR-1267] c25 N69-18041
Magnetic field properties related to the design of a one-component magnetic support-and-balance system
[NASA-CR-1352] c11 N69-24089
One component, magnetic, support and balance system for wind tunnel models
[NASA-CR-1353] c11 N69-25343
Computer mechanization of six-degree of freedom flight equations
[NASA-CR-1344] c21 N69-26232
Experimental evaluation of a subsonic expansion tube
[NASA-CR-1354] c11 N69-28095
Subsonic sphere drag measurements at intermediate Reynolds numbers
[NASA-CR-1392] c01 N69-30609
Analytical solutions of a class of optimum orbit modifications
[NASA-CR-1379] c30 N69-31362
Laboratory experiments on reverted rubber friction
[NASA-CR-1398] c02 N69-34915
Non-linear longitudinal dynamics of an orbital lifting vehicle
[NASA-CR-1449] c30 N69-40062
MIDWEST RESEARCH INST., KANSAS CITY, MO.
Study of low pressure application of new orbitron and iron gauge designs
[NASA-CR-1300] c14 N69-28402
MISSISSIPPI STATE UNIV., STATE COLLEGE.
A study of 2 GHz electromagnetic wave propagation over optical paths in three geographical regions of the United States
[NASA-CR-1442] c07 N69-39282

N

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. AMES RESEARCH CENTER, MOFFETT FIELD, CALIF.
Calculated and flight measured handling- qualities factors of three subsonic jet transports
[NASA-TN-D-4832] c02 N69-10495
Response envelope - A global description of three-axis large angle spacecraft attitude control systems
[NASA-TN-D-4896] c30 N69-10756
Effects of angle of attack and bluntness on the shock-layer properties of a 15 deg cone at a Mach number of 10.6
[NASA-TN-D-4909] c01 N69-10789

Flight tests under IFR with an STOL transport aircraft
[NASA-TN-D-4939] c02 N69-13252
Projectile shape effects on hypervelocity impact craters in aluminum
[NASA-TN-D-4953] c32 N69-14315
Sextant sighting measurements from on board the Gemini 12 spacecraft
[NASA-TN-D-4952] c21 N69-14332
Minimum thrust for correcting Keplerian orbits with application to interplanetary guidance
[NASA-TN-D-4945] c21 N69-14399
An impact energy-absorbing strut employing tube cutting
[NASA-TN-D-4941] c32 N69-14506
Analysis of the stability of a thin liquid film adjacent to a high-speed gas stream
[NASA-TN-D-4976] c12 N69-15630
Analysis of nonequilibrium air streams in the Ames 1-foot shock tunnel
[NASA-TN-D-4985] c11 N69-15633
Research problems in atmosphere entry and landing for manned planetary missions
[NASA-TN-D-4977] c31 N69-15634
Large scale wind tunnel investigation to improve the low speed longitudinal stability at high lift of a supersonic transport with variable-sweep wings
[NASA-TN-D-5005] c02 N69-16384
Second order errors in linearized velocity corrections and their effects on the rate of convergence of iterative solutions
[NASA-TN-D-5037] c21 N69-17780
Solvent purification procedures used in organic geochemistry laboratories
[NASA-TM-X-1746] c06 N69-18962
Large-scale tests of an airplane model with a double-delta wing, including longitudinal and lateral characteristics and ground effects
[NASA-TN-D-5102] c02 N69-21020
A computer program for a line by line calculation of spectra from diatomic molecules and atoms assuming a Voigt line profile
[NASA-TN-D-5088] c24 N69-21462
The use of pilot rating in the evaluation of aircraft handling qualities
[NASA-TN-D-5153] c02 N69-22539
An investigation of a direct side-force maneuvering system on a deflected jet VTOL aircraft
[NASA-TN-D-5175] c02 N69-22572
Simulation studies for planning an in-flight experiment to define manual guidance and control techniques for large launch vehicles
[NASA-TN-D-5150] c21 N69-22936
A generalized averaging method for linear differential equations with almost periodic coefficients
[NASA-TN-D-5167] c19 N69-22988
Exploding wire initiation and electrical operation of a 40-kV system for arc-heated drivers up to 10 feet long
[NASA-TN-D-5126] c11 N69-22989
Evaluation of a pilot describing function method applied to the manual control analysis of a large flexible booster
[NASA-TN-D-5149] c21 N69-22996
On some numerical difficulties in integrating the equations for one-dimensional nonequilibrium nozzle flow
[NASA-TN-D-5176] c19 N69-23355
Computation of topside ionograms from N/h/ profiles
[NASA-TN-D-5052] c13 N69-23557
The use of integral transforms in the estimation of time variable parameters
[NASA-TN-D-5194] c19 N69-23788
A technique for identifying pilot describing functions from routine flight-test records
[NASA-TN-D-5127] c05 N69-23842
Newtonian aerodynamics for circular cones modified to produce lift at zero angle of attack
[NASA-TN-D-5193] c01 N69-23926
Development of Michell minimum weight structures
[NASA-TN-D-4345] c32 N69-25001
Technique for calculating optimum takeoff and climb out trajectories for noise abatement
[NASA-TN-D-5182] c02 N69-26194

Circulating currents in linear crossed-field generators and accelerators
[NASA-TN-D-5244] c25 N69-26313
Exploratory investigation on the measurement of skin friction by means of liquid crystals
[NASA-TM-X-1774] c12 N69-26956
A detailed study of manual backup control systems for the Saturn 5 launch vehicle
[NASA-TN-D-5261] c21 N69-28018
Jupiter swingby missions to nonspecific locaticns in interplanetary space
[NASA-TN-D-5271] c30 N69-28441
Summary and correlation of skin-friction and heat-transfer data for a hyperscnic turbulent boundary layer on simple shapes
[NASA-TN-D-5089] c12 N69-29144
An experimental and theoretical investigation of a symmetrical and a cambered delta wing configuration at Mach numbers from 2.0 to 10.7
[NASA-TN-D-5272] c01 N69-29269
Trim attitude, lift and drag of the Apollc command module with offset center-of-gravity positions at Mach numbers to 29
[NASA-TN-D-5276] c30 N69-29557
On the phenomenon of thermoelastic instability /thermal flutter/ of booms with open cross section
[NASA-TN-D-5222] c32 N69-29589
Toxicity problems in plastic hardware designed for biological space-flight experiments
[NASA-TM-X-1818] c04 N69-29723
A compilation of current computer programs for low-thrust trajectory analysis
[NASA-TM-X-1824] c08 N69-30014
Investigation of a 0.3-scale jet-transport model having a jet-augmented boundary-layer- control flap with direct-lift control capability
[NASA-TN-D-5129] c01 N69-30722
Methods for predicting spacecraft-window- induced line-of-sight deviations
[NASA-TN-D-5238] c21 N69-31227
Shock shapes and pressure distributicns for large angle pointed cones in helium at Mach numbers of 8 and 20
[NASA-TN-D-5343] c01 N69-31228
Flight-determined aerodynamic properties of a jet-augmented, auxiliary-flap, direct-lift-control system including correlation with wind-tunnel results
[NASA-TN-D-5128-REV] c02 N69-31962
Linearized theory of stagnation point heat and mass transfer at hypersonic speeds
[NASA-TN-D-5246] c12 N69-33421
Conference on Electromagnetic Exploration of the Moon, 11-13 June 1968. Report of the Program Evaluation Committee
[NASA-SP-174] c30 N69-33595
Effects of differing amounts of training and of monochromatic targets on sextant sighting performance
[NASA-TN-D-5190] c05 N69-35024
Use of a six-degrees-of-freedom motion simulator for VTOL hovering tasks
[NASA-TN-D-5383] c11 N69-35359
Chebyshev series solution of nonlinear ordinary differential equations - Initial-value problems
[NASA-TM-X-1882] c19 N69-36923
Power- and cross-spectra and space-time correlations of surface fluctuating pressures at Mach numbers between 1.6 and 2.5
[NASA-TN-D-5440] c12 N69-36940
Upwash patterns on ablating and nonablating cones at hypersonic speeds
[NASA-TN-D-5346] c12 N69-37370
Effects of angle of attack and bluntness on laminar heating-rate distributions cf a 15 deg cone at a Mach number of 10.6
[NASA-TN-D-5450] c12 N69-37604
Absolute radiometers for use in ballistic- range and shock-tube experiments
[NASA-TN-D-5360] c14 N69-38144
A unified treatment of lunar theory and artificial satellite theory
[NASA-TN-D-5459] c30 N69-38145
Large-scale wind-tunnel investigation of an M1-L lifting body with an inflatable and a rigid afterbody
[NASA-TN-D-5468] c01 N69-38775
Flight evaluation of tip-turbine-driven fans for lateral control in a hovering VTOL aircraft
[NASA-TN-D-5491] c02 N69-38807
Experimental investigation of the momentum transfer associated with impact into thin aluminum targets
[NASA-TN-D-5492] c32 N69-38809
A method of characteristics for steady three-dimensional supersonic flow with application to inclined bodies of revolution
[NASA-TN-D-5341] c12 N69-39177
Convective heat-transfer rates on large-angle conical bcdies at hypersonic speeds
[NASA-TN-D-5526] c33 N69-40780
The influence of thermal distortion on the performance of gravity-stabilized satellites
[NASA-TN-D-5435] c31 N69-40781

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. ELECTRONICS RESEARCH CENTER, CAMBRIDGE, MASS.

Mercury cadmium telluride as a 1- to 20-micro-meter wavelength infrared detector for space applications
[NASA-TN-D-4904] c26 N69-10125
A comparison of a class of earth-moon orbits with a class of rotating Kepler orbits
[NASA-TN-D-4903] c30 N69-10470
Examples of coding schemes based on strategic value
[NASA-TN-D-4962] c07 N69-15373
Introduction to computer aided reliability data analysis
[NASA-TN-D-5009] c15 N69-17988
Effects of lithium and oxygen losses on the magnetic and crystallographic properties of spinel lithium ferrite
[NASA-TR-R-305] c06 N69-20775
Fourier analysis by the method of selected ordinates
[NASA-TN-D-5083] c19 N69-20940
Application of a modified fast Fourier transform to calculate human operator describing functions
[NASA-TM-X-1762] c08 N69-21119
A suboptimal approximation to the Kalman filter
[NASA-TN-D-5082] c10 N69-21123
Direction ccsine computational error
[NASA-TR-R-304] c21 N69-21402
Simplified theory and transducer potentialities of the ''pinch effect'' in semiconductors
[NASA-TN-D-5130] c26 N69-22573
Symbol-oriented failure analysis in multicomponent systems
[NASA-TN-D-5112] c10 N69-22919
Computer program for dimensional analysis
[NASA-TN-D-5165] c08 N69-22935
The Vinti dynamical problem and the geopotential
[NASA-TR-R-307] c30 N69-22948
A review of radiometric measurements of atmospheric attenuation at wavelengths from 75 centimeters to 2 millimeters
[NASA-TN-D-5087] c07 N69-22949
Radiometric techniques applicable to the measurement of solar activity and atmospheric attenuation at millimeter wavelengths
[NASA-TR-R-306] c07 N69-22951
Development of an experimental silicon carbide backward diode operable to 1000 deg K
[NASA-TN-D-5183] c09 N69-23556
A bonding material for optically immersing infrared detectors from 2 to 14 micro-meters
[NASA-TM-X-1776] c18 N69-23843
First-order solutions for mutual coupling between waveguides which propagate two orthogonal modes
[NASA-TN-D-5180] c07 N69-24051
The interaction of intense laser beams with free electrons
[NASA-TN-D-5205] c16 N69-25357
Thermodynamic properties of liquid H sub 2 O and D sub 2 O and their mixtures
[NASA-TN-D-5223] c33 N69-26247
Compilation of data from related technologies in the develcpment of an optical pilot warning indicator system
[NASA-TN-D-5174] c14 N69-27267
Design considerations for cyclotron resonance oscillators
[NASA-TN-D-5237] c10 N69-28121
Plasma generation using a large V-groove cathode discharge
[NASA-TN-D-5269] c25 N69-29140

A formalization of measurement scale forms
[NASA-TN-D-5277] c19 N69-29141
A laboratory study of microwave radiometric techniques for re-entry plasma measurements
[NASA-TN-D-5274] c25 N69-29600
Spacecraft magnetic torques
[NASA-SP-8018] c31 N69-30339
Magnetospheric duct propagation research using Alouette-2 topside-sounder observations
[NASA-TN-D-5332] c13 N69-34891
Fabrication and characteristics of microwave backward diodes in indium arsenide
[NASA-TN-D-5401] c09 N69-36706
Spectroscopic study of a helium arc
[NASA-TN-D-5396] c25 N69-36755
Feasibility of detecting radiation scattered from a plasma
[NASA-TN-D-5311] c25 N69-36939
An accurate strapdown direction cosine algorithm
[NASA-TN-D-5384] c21 N69-36997
Leak detection in hermetically sealed devices
[NASA-TN-D-5457] c09 N69-38597
A method for separating a semiconductor wafer into individual chips
[NASA-TM-X-1892] c09 N69-38774
Communication system design
[NASA-TN-D-5472] c07 N69-39176
Communication efficiencey of quantum systems
[NASA-TR-R-320] c07 N69-39264
Future fields of control application
[NASA-SP-211] c34 N69-39957
Energy distribution of a spiraling electron beam
[NASA-TN-D-5490] c09 N69-41208

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. FLIGHT RESEARCH CENTER, EDWARDS, CALIF.

Human transfer characteristics in flight and ground simulation for a roll tracking task
[NASA-TN-D-5007] c05 N69-17814
Wind-tunnel force and pressure tests of rocket-engine nozzle extensions on the 0.0667-scale X-15-2 model at supersonic and hypersonic speeds
[NASA-TM-X-1759] c01 N69-20873
Visual simulation image generation using a flying-spot scanner
[NASA-TN-D-5151] c11 N69-23194
A simple technique for automatic computer editing of biodata
[NASA-TN-D-5275] c08 N69-29592
Evaluation of an indirect viewing system for lifting-body terminal-area navigation and landing tasks
[NASA-TN-D-5299] c14 N69-29730
Flight investigation of a fluidic autopilot system
[NASA-TN-D-5298] c21 N69-30946
Flight measurements of canard loads, canard buffeting, and elevon and wing tip hinge moments on the XB-70 aircraft including comparisons with predictions
[NASA-TN-D-5359] c02 N69-32284
Fixed-base simulator pilot rating surveys for predicting lateral-directional handling qualities and pilot rating variability
[NASA-TN-D-5358] c02 N69-35762
Evaluation of an infrared heating simulation of a Mach 4.63 flight on an X 15 horizontal stabilizer
[NASA-TN-D-5403] c33 N69-35949
NASA high temperature loads calibration laboratory
[NASA-TM-X-1868] c11 N69-36224
Summary of XB-70 airplane cockpit environmental data
[NASA-TN-D-5449] c25 N69-38010
Flight-measured aerodynamic drag of two large external tanks attached to the X-15-2 airplane at Mach numbers of 1.6 to 2.3
[NASA-TM-X-1895] c01 N69-38065
Variation in engine noise for two landing-approach configurations of a jet transport aircraft
[NASA-TM-X-1896] c02 N69-38104

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. GODDARD SPACE FLIGHT CENTER, GREENBELT, MD.

Sliding friction of copper alloys in vacuum
[NASA-TN-D-4824] c15 N69-10757
Relationship between complex- and envelope-covariance for Rician fading communication channels
[NASA-TN-D-4825] c07 N69-11011

Time required for an adequate thermal-vacuum test of flight model spacecraft
[NASA-TN-D-4908] c31 N69-14010
A preliminary study of the detection of geomorphological features over northeast Africa by satellite radiation measurements in the visible and infrared
[NASA-TN-D-4648] c13 N69-14290
Theoretical molecular line absorption of CO in late spectral type atmospheres
[NASA-TN-D-4798] c24 N69-14448
An approach to the remote detection of earth resources in sub-arid lands
[NASA-TN-D-4647] c13 N69-14450
Application of Hansen's method to the 10th satellite of Jupiter
[NASA-TN-D-4979] c30 N69-14479
Precision flow measurement techniques for low-thrust auxiliary-propulsion liquid rockets
[NASA-TN-D-4785] c28 N69-16122
A comparsion of sequential decoding metrics by computer simulation
[NASA-TR-R-294] c07 N69-16196
Nimbus 2 flight evaluation and engineering report, launch through orbit 5275
[NASA-TN-D-4881] c31 N69-17851
Flight performance of FW-4D solid-propellant rocket motor on Delta 50 /AIMP-E/
[NASA-TN-D-4987] c28 N69-20876
The Small Astronomy Satellite /SAS/ program
[NASA-TN-D-5099] c31 N69-21017
Relay program Final report
[NASA-SP-151] c31 N69-21065
The log-a-posteriori probability metric for use in sequential decoding
[NASA-TN-D-4930] c07 N69-23163
Solar effects on VHF communications between a synchronous satellite relay and earth ground stations
[NASA-TN-D-5100] c07 N69-23317
An atlas of Tiros 7 monthly maps of emitted radiation in the 8-12 micron atmospheric window over the Indian Ocean area
[NASA-TN-D-5101] c13 N69-23318
Parametric analysis of microwave and laser systems for communication and tracking - A summary
[NASA-TR-R-309] c07 N69-23642
A graphic method for determining the absolute attitude of sounding rocket vehicles
[NASA-TN-D-5172] c30 N69-23782
A search for gamma-rays from the Crab nebula using a digitized spark chamber
[NASA-TR-R-308] c30 N69-24170
Preprocessing of Minitrack data
[NASA-TN-D-5042] c08 N69-26193
Statistics of the region of Lacerta OB1
[NASA-TN-D-5060] c30 N69-26235
An accuracy and speed comparison of the Vinti and Brouwer orbit prediction methods
[NASA-TN-D-5203] c30 N69-26252
Radio frequency interference experiment design for the applications technology satellite
[NASA-TN-D-5041] c07 N69-26272
Explorer 35 attitude control system
[NASA-TN-D-5187] c21 N69-27268
Gravity model comparison using GEOS 1 long- arc orbital solutions
[NASA-TN-D-5035] c30 N69-27412
GEOS I tracking station positions on the SAO standard earth /C-5/
[NASA-TN-D-5034] c13 N69-28019
A semi-analytic theory for the motion of a lunar satellite
[NASA-TN-D-5043] c30 N69-28050
Infrared spectral irradiance measurements in a space environment simulator
[NASA-TN-D-5166] c29 N69-28111
Evaluation of the Goddard range and range rate system at Rosman by intercomparison with GEOS 1 long-arc orbital solutions
[NASA-TN-D-5036] c13 N69-28442
Models of the trapped radiation environment. Volume 5 - Inner belt protons
[NASA-SP-3024-VOL-5] c24 N69-28911
Experimental determination of eddy-current torques on bodies rotating relative to a uniform magnetic field
[NASA-TN-D-5086] c23 N69-29477

A spacecraft analog-to-digital conversion system employing MOSFETS
[NASA-TN-D-5228] c08 N69-29478
Lectures in high energy astrophysics
[NASA-SP-199] c29 N69-29652
The X sup 2 statistic and the goodness of fit test
[NASA-TR-R-313] c19 N69-30610
An analysis of satellite positional uncertainty by statistical mechanics
[NASA-TN-D-5259] c30 N69-30611
A brushless dc torquer-driven reaction wheel for spacecraft attitude control
[NASA-TN-D-5265] c03 N69-30945
The Picneer 8 cosmic dust experiment
[NASA-TN-D-5267] c30 N69-31058
On the shape preserving expansion and contraction of objects in E sup 3
[NASA-TN-D-5240] c19 N69-31303
Test plan optimization for an Explorer-size spacecraft
[NASA-TN-D-5283] c34 N69-31333
Attitude stability of a class of partially flexible spinning satellites
[NASA-TN-D-5268] c31 N69-32298
Parametric angles of trajectory determined field line intersects predicting the location of artificial auroras
[NASA-TN-D-5189] c30 N69-32316
Design techniques for small scientific satellite structures
[NASA-TN-D-4988] c32 N69-33232
Development of a weld quality monitor
[NASA-TN-D-5304] c15 N69-33800
Evaluation of meta-benzenedisulfonic acid as a stress-reducing additive in a Watts nickel electroplating bath
[NASA-TN-D-5188] c17 N69-36697
Optical simulation of a radio-astronomy interferometer experiment
[NASA-TN-D-5357] c30 N69-36892
A unified form of Lambert's theorem
[NASA-TN-D-5368] c30 N69-36930
Planetary effects in the motion of natural satellites
[NASA-TN-D-5284] c30 N69-37893
Significant accomplishments in science, 1968
[NASA-SP-195] c34 N69-38951
Digital simulation of rotational kinematics
[NASA-TN-D-5302] c23 N69-39178
NASA space vehicle design criteria- environment. Magnetic fields - Earth and terrestrial
[NASA-SP-8017] c31 N69-40269
Hydration, oxidation, and the origin of the calc-alkali series
[NASA-TN-D-5400] c13 N69-40893
Atmospheric densities measured by the Explorer 17 density gauges - Analysis of errors and their effects upon the measurements
[NASA-TN-D-5447] c13 N69-40924

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. LANGLEY RESEARCH CENTER, LANGLEY STATION, VA.

Calculated and experimental hinge moments on a trailing-edge flap of a 75 deg swept delta wing at Mach 6
[NASA-TN-D-4268] c01 N69-10054
Influence of angle of glide slope on the accuracy of performing instrument approaches in a simulator
[NASA-TN-D-4835] c21 N69-10056
Shock-wave pressure decay in polycarbonate targets impacted by cylindrical polycarbonate projectiles
[NASA-TN-D-4864] c32 N69-10057
A study to determine the presence of voltage breakdown due to proton irradiation in polymeric materials
[NASA-TM-X-1688] c18 N69-10066
Comparison of information display concepts for landing of VTOL aircraft
[NASA-TN-D-4861] c21 N69-10069
Development of sonic-boom signatures in a stratified atmosphere
[NASA-TN-D-4890] c02 N69-10087
A method for determining surface pressures on blunt bodies of revolution at small angles of attack in supersonic flow
[NASA-TN-D-4865] c01 N69-10215
Analysis of the aeroelastic divergence of two experimental unguided launch vehicles
[NASA-TN-D-4846] c32 N69-10297
Flight tests of a direct lift control system during approach and landing
[NASA-TN-D-4854] c02 N69-10371
Analytic approximations for application to spacecraft optical navigation on short data arcs
[NASA-TN-D-4863] c21 N69-10372
Real-helium hypersonic flow parameters for pressures to 3600 atmospheres and temperatures to 15,000 deg K
[NASA-TN-D-4869] c12 N69-10443
Computer experiments on the microscopic behavior of one-dimensional plasmas
[NASA-TN-D-4831] c25 N69-10471
Use of Baronti-Libby transformation and Preston tube calibrations to determine skin friction from turbulent velocity profiles
[NASA-TN-D-4853] c12 N69-10472
Calorimetric, optical, and vibration investigations of stretch-formed aluminum solar concentrators
[NASA-TN-D-4889] c03 N69-10708
Aerodynamic characteristics of 0.25-scale model of Tomahawk launch vehicle at Mach numbers from 2.30 to 4.63
[NASA-TM-X-1684] c01 N69-10732
Crystallographic data on selected artificial graphites with comments on the role of the degree of crystal development in oxidation
[NASA-TN-D-4888] c18 N69-10754
An evaluation of coated molybdenum and columbium alloys in high-temperature supersonic airstreams
[NASA-TN-D-4877] c17 N69-10764
Experimental vibration characteristics of a 1/40-scale dynamic model of the Saturn 5 launch umbilical tower configuration
[NASA-TN-D-4870] c31 N69-10775
Blunt body stagnation region flow with nongray radiation heat transfer - A singular perturbation solution
[NASA-TR-R-295] c12 N69-10788
Heat transfer and pressure distributions due to sinusoidal distortions on a flat plate at Mach 20 in helium
[NASA-TN-D-4907] c12 N69-10804
Radiofrequency transmission characteristics of several ablation materials
[NASA-TN-D-4879] c07 N69-10885
Rotational and vibrational temperature measurements in the 12-inch hypersonic ceramic-heated tunnel
[NASA-TN-D-4892] c33 N69-10932
Resolution changes in lithium-drifted silicon semiconductor detectors irradiated with 0.5, 1.0, 2.0, and 3.0 MeV electrons
[NASA-TN-D-4901] c14 N69-10933
Vibration analysis of a 1/40-scale dynamic model of Saturn 5 launch platform-umbilical tower configuration
[NASA-TN-D-4871] c31 N69-10934
Aerodynamic characteristics of twin propeller deflected slipstream STOL airplane model with boundary layer control on inverted V-tail
[NASA-TN-D-4856] c02 N69-10935
Lateral vibration characteristics of a 1/40-scale dynamic model of Apollo-Saturn 5 launch vehicle
[NASA-TN-D-4872] c31 N69-11007
Heat-transfer and pressure distributions inside the hinge-line gap of a wedge-flap combination at Mach number 10.4
[NASA-TN-D-4911] c01 N69-11009
Compressive properties and column efficiency of metals reinforced on the surface with bonded filaments
[NASA-TN-D-4878] c17 N69-11012
A micro lagoon technique for the culture and observation of isolated mammalian cells
[NASA-TN-D-4906] c04 N69-11056
Analysis of numerical integration techniques for real-time digital flight simulation
[NASA-TN-D-4900] c11 N69-11371
The path of a jet directed at large angles to a subsonic free stream
[NASA-TN-D-4919] c01 N69-11634
Buckling of an equatorial segment of a spherical shell loaded by its own weight
[NASA-TN-D-4921] c32 N69-13034
Radiofrequency transmission characteristics of candidate ablation materials for

planetary-entry-vehicle heat shields
[NASA-TN-D-4920] c07 N69-13158
Hypersonic aerodynamic characteristics of a model of a low-fineness-ratio variable geometry logistics spacecraft concept
[NASA-TM-X-1701] c01 N69-13218
Effects of steady-state acceleration on combustion characteristics of an aluminized composite solid propellant
[NASA-TN-D-4914] c33 N69-13231
A radiometer for use in thermal studies of spacecraft
[NASA-TN-D-4925] c14 N69-13311
Use of photoionization in measuring velocity profile of free-stream flow in Langley pilot model expansion tube
[NASA-TN-D-4936] c12 N69-13945
Wind-tunnel investigation of a large jet transport model equipped with an external-flow jet flap
[NASA-TN-D-4928] c01 N69-14000
Theory for computing span loads and stability derivatives due to sideslip, yawing, and rolling for wings in subsonic compressible flow
[NASA-TN-D-4929] c01 N69-14001
Flying quality factors currently limiting helicopter nap of the earth maneuverability as identified by flight investigation
[NASA-TN-D-4931] c02 N69-14008
Effect of the chemical state of pyrolysis gases on heat-shield mass
[NASA-TN-D-4975] c32 N69-14306
Infrared horizon profiles for winter conditions from Project Scanner
[NASA-TN-D-4905] c21 N69-14346
A flight measurement of optical radiation from shock-heated air by using a Trailblazer 2 vehicle
[NASA-TN-D-4937] c33 N69-14501
Wind velocity profiles measured by the smoke-trail method at the eastern test range, 1963
[NASA-TN-D-4880] c20 N69-14505
Effect of unit Reynolds number, nose bluntness, angle of attack, and roughness on transition on a 5 deg half-angle cone at Mach 8
[NASA-TN-D-4961] c01 N69-14872
Strain rate sensitivity of three titanium alloy sheet materials after prolonged exposure at 550 deg F /561 deg K/
[NASA-TN-D-4981] c17 N69-14873
An investigation of the optimum design and flight of rockets
[NASA-TR-R-297] c31 N69-15374
An optical system for recording schlieren images with continuous writing ultra high speed framing camera
[NASA-TN-D-4986] c14 N69-15381
Potential problems related to weightlessness and artificial gravity
[NASA-TN-D-4980] c05 N69-15629
Preliminary investigation of momentum diffusion between two supersonic airstreams in the presence of shock waves
[NASA-TN-D-4974] c12 N69-15631
Effects of structural damping on flutter of stressed panels
[NASA-TN-D-4990] c32 N69-16091
Experimental study in vacuum of the rate-of-rise outgassing-measurement technique
[NASA-TN-D-4973] c14 N69-16097
Preliminary study of effects of Reynolds number and boundary-layer transition location on shock-induced separation
[NASA-TN-D-5003] c01 N69-16121
Error analysis of input-noise-temperature measurements of low-noise amplifiers
[NASA-TN-D-4997] c07 N69-16162
Prediction of lift and drag for slender sharp-edge delta wings in ground proximity
[NASA-TN-D-4891] c01 N69-16180
Multidimensional gas flow through permeable char layers and its effects on ablation
[NASA-TR-R-296] c33 N69-16181
Experimental surface-pressure distributions on a 9 deg spherically blunted cone at Mach numbers from 1.50 to 4.63
[NASA-TM-X-1730] c01 N69-16209
A computational method for time-optimal space rendezvous
[NASA-TN-D-5017] c30 N69-16210
Wind-tunnel study of deflected-elevator flutter encountered on a T-tail airplane
[NASA-TN-D-5024] c32 N69-16211
Solutions of blunt-body stagnation-region flows with nongray emission and absorption of radiation by a time-asymptotic technique
[NASA-TR-R-299] c33 N69-16268
Roughness drag due to two-dimensional fabrication-type surface roughness on an ogive cylinder from force tests at transonic speeds
[NASA-TN-D-5004] c01 N69-16460
A method for computation of vibration modes and frequencies of orthotropic thin shells of revolution having general meridional curvature
[NASA-TN-D-4972] c32 N69-16469
Mitotic synchronization of L-strain fibroblasts with 5-aminouracil as determined by time-lapse cinephotography
[NASA-TN-D-5021] c04 N69-17248
Supersonic transport operating practices during simulated operations in future air traffic control system environments
[NASA-TN-D-5018] c02 N69-17257
Ratios of steady-state responses to various transient responses, both having equal maximum excitation levels
[NASA-TN-D-5070] c32 N69-17258
An analytical procedure for optimizing television systems for planetary descent missions
[NASA-TN-D-5061] c14 N69-17259
Variability in sonic-boom signatures measured along an 8000-foot linear array
[NASA-TN-D-5040] c02 N69-17279
A parametric study of blade-motion stability boundaries for an articulated rotor
[NASA-TN-D-5032] c01 N69-17289
Full-scale wind-tunnel investigation of static longtudinal and lateral characteristics of a light twin-engine airplane
[NASA-TN-D-4983] c02 N69-17303
Aerodynamic forces on a stationary and oscillating circular cylinder at high Reynolds numbers
[NASA-TR-R-300] c01 N69-17304
Aerodynamic data on large semispan tilting wing with 0.4-diameter chord, single-slotted flap, and single propeller 0.22 chord below wing
[NASA-TN-D-5016] c01 N69-17312
Performance of a towed, 48-inch-diameter /121.92-cm/ ballute decelerator tested in free flight at Mach numbers from 4.2 to 0.4
[NASA-TN-D-4943] c01 N69-17398
Investigation of opening characteristics of an all-flexible parawing
[NASA-TN-D-5031] c02 N69-17700
Identification of structural systems by use of near-resonance testing
[NASA-TN-D-5069] c32 N69-17737
Osmotically induced coalescence of sarcoma cells through intercellular bridges in vitro
[NASA-TN-D-5022] c04 N69-17782
The determination of a stability indicative function for linear systems with multiple delays
[NASA-TR-R-301] c31 N69-17801
FORTRAN programs for calculating wind-tunnel boundary interference
[NASA-TM-X-1740] c01 N69-17818
Requirements of a Martian television experiment for three point-mass descent trajectories
[NASA-TN-D-5062] c14 N69-17944
Changes in minority-carrier lifetime in silicon and gallium arsenide resulting from irradiation with 22 and 40 MeV protons
[NASA-TN-D-5028] c26 N69-18897
A technique to infer atmospheric temperature from horizon radiance profiles
[NASA-TN-D-5068] c13 N69-19024
Tuft-grid surveys at low speeds for delta wings
[NASA-TN-D-5045] c01 N69-19027
Use of superposition in digital computers to obtain wind tunnel interference factors for arbitrary configurations, with particular reference to V/STOL models
[NASA-TR-R-302] c01 N69-19028
Transmission of 2.43 MeV electrons through thick silicon targets
[NASA-TN-D-5075] c24 N69-19113
The admittance of a parallel-plate aperture illuminating a displaced dielectric-dielectric boundary

[NASA-TN-D-5038] c07 N69-19114
An analysis of the operation of a mass measuring system in an orbiting spacecraft
[NASA-TN-D-5039] c04 N69-19115
Tensile properties and creep strength of three aluminum alloys exposed up to 25000 hours at 200 deg to 400 deg F /370 deg to 480 deg K/
[NASA-TN-D-5010] c17 N69-19203
Full-scale investigation of the aerodynamic characteristics of a sailwing of aspect ratio 5.9
[NASA-TN-D-5047] c01 N69-19243
A numerical method for evaluation and utilization of supersonic nacelle-wing interference
[NASA-TN-D-5057] c01 N69-19641
Mechanical behavior of boron-epoxy and glass-epoxy filament-wound cylinders under various loads
[NASA-TN-D-5050] c18 N69-19825
Experimental pressure distributions on a 120 deg cone at Mach numbers from 2.96 tc 4.63 and angles of attack from 0 deg to 20 deg
[NASA-TN-D-5054] c01 N69-19826
A method for characterizing the surface cleanliness during adhesion testing
[NASA-TN-D-5055] c17 N69-19827
Lithium-drifted silicon detectors as low-energy photcn spectrometers
[NASA-TN-D-5056] c24 N69-19828
Tensile behavicr of boron filament reinforced epoxy rings and belts
[NASA-TN-D-5053] c18 N69-19918
A method for determining the total drag of a pointed body of revolution in supersonic flow with turbulent boundary layer
[NASA-TN-D-5046] c01 N69-19925
Effects of cone angle, base flare angle, and corner radius on Mach 3.0 aerodynamic characteristics of large-angle cones
[NASA-TN-D-5048] c01 N69-19926
Wind-tunnel data from a 0.16-scale V/STOL model with direct-lift and lift-cruise jets
[NASA-TM-X-1758] c01 N69-20016
Parameters affecting firing time of simultaneously triggered trigatron spark gap switches
[NASA-TN-D-5077] c09 N69-20888
Tables of Mie scattering functions for particles with refractive index 1.5
[NASA-TN-D-5110] c23 N69-20905
Fixed-base visual simulation of pilot ccntrolled descents of an advanced Apollo spacecraft with an all-flexible parawing
[NASA-TN-D-5049] c21 N69-20936
The design and uncertainty analysis of an improved total hemispherical emittance transient calorimeter
[NASA-TN-D-5106] c14 N69-20941
Full-scale dynamic landing-impact investigation of a prototype lunar module landing gear
[NASA-TN-D-5029] c31 N69-20965
Causes of magnetic-field nonuniformity and its effect on stability of theta-pinch plasma
[NASA-TR-R-303] c25 N69-20997
Exploratory investigation of flow field resulting from forward-facing nozzles exhausting near a large cylindrical body at free-stream Mach numbers of 3.0 and 6.0
[NASA-TN-D-5030] c01 N69-21000
Effect of gravitational-model selection on accuracy of lunar orbit determinatien from short data arcs
[NASA-TN-D-5105] c30 N69-21018
Effects of bottom-structure flexibility on water landing loads of Apollo spacecraft models
[NASA-TN-D-5108] c32 N69-21042
Calorimetric evaluation of two cone-column solar-energy concentrations
[NASA-TN-D-5109] c03 N69-21088
Antenna effects on the aerodynamic characteristics of a 0.410-scale model of the Cajun rocket at Mach numbers from 2.30 to 4.63
[NASA-TM-X-1771] c01 N69-21106
On lateral cable oscillations of cable- connected space stations
[NASA-TN-D-5107] c31 N69-21111
Effect of plug and shroud geometry variables on plug-nozzle performance at transonic speeds
[NASA-TN-D-5098] c28 N69-21463
Annealing of 22, 40, and 158 MeV prcton damage in n-type and p-type silicon
[NASA-TN-D-5119] c26 N69-22552
Experimental stagnation point velocity gradients and heat transfer coefficients for a family of blunt bodies at Mach 8 and angles of attack
[NASA-TN-D-5121] c01 N69-22554
Investigation of occultation and imagery problems for orbital missions to Venus and Mars
[NASA-TN-D-5100] c30 N69-22571
A rendezvous and station-keeping simulator with fly around capability and virtual image viewing
[NASA-TN-D-5123] c11 N69-22629
Scaled lunar module jet erosion experiments
[NASA-TN-D-5051] c31 N69-22630
Natural vibration modal analysis
[NASA-SP-8012] c32 N69-22773
Effect of shallow meridional curvature on the vibration of nearly cylindrical shells
[NASA-TN-D-5143] c32 N69-22821
Longitudinal vibration characteristics of 1/10-scale Apollo/Saturn 5 replica model
[NASA-TN-D-5159] c32 N69-22932
An investigation of ablation behavior of Avcoat 5026/39M cver a wide range of thermal environments
[NASA-TM-X-1778] c33 N69-22933
Effects of cloud cover on selection of recovery sites for future earth orbital missions
[NASA-TN-D-5120] c30 N69-22939
Investigatien of a plasma accelerator with magnetic field arranged to produce a divergent-nozzle effect
[NASA-TN-D-5122] c25 N69-22942
Night sky background conditions and launch windows for research experiments
[NASA-TM-X-1772] c21 N69-22969
Laminar heat-transfer distributions for a blunted-cone, cone-frustum reentry configuration at Mach 10
[NASA-TN-D-5146] c33 N69-22997
Mechanical properties and column behavior of thin wall Be-38Al alloy tubing
[NASA-TN-D-5145] c17 N69-23004
Forces and moments due to air jets exhausting parallel to large flat plates in a near vacuum
[NASA-TN-D-5147] c12 N69-23085
Buckling of thin-walled circular cylinders
[NASA-SP-8007] c32 N69-23320
A parametric analysis of surface temperatures of paraboloidal solar concentrators in space
[NASA-TN-D-5144] c03 N69-23356
Response of an infinite elastic plate to axisymmetric initial velocity distributions with applicatien to hypervelocity impact
[NASA-TN-D-5118] c32 N69-23448
Heave response of a plenum air cushion including passive and active control concepts
[NASA-TN-D-5202] c02 N69-23449
The leading-edge effects on the laminar flat-plate boundary layer and the aerodynamic heating at Mach 10.4
[NASA-TN-D-5160] c12 N69-23467
Wind tunnel investigation of inflation of disk-gap-band and modified ringsail parachutes at dynamic pressures between 0.24 and 7.07 pounds per square foot
[NASA-TM-X-1786] c01 N69-23538
Computer simulation of a cylindrical galaxy
[NASA-TN-D-5200] c30 N69-23708
Wind-tunnel investigation of the aerodynamic characteristics of a twin-keel parawing
[NASA-TN-D-5199] c01 N69-23781
A semiempirical collision model for plasmas
[NASA-TR-R-310] c25 N69-23787
Investigation of a class of bodies that generate far-field sonic boom shock strength and impulse independent of body length and volume
[NASA-TN-D-5148] c01 N69-23927
Buckling of thin-walled truncated cones
[NASA-SP-8019] c32 N69-24131
Pressure distributions on 140 deg, 160 deg, and 180 deg cones at Mach numbers from 2.30 to 4.63 and angles of attack from 0 deg to 20 deg
[NASA-TN-D-5204] c01 N69-24764
Hypervelocity impact analysis by the methcd of characteristics
[NASA-TR-R-298] c32 N69-24765
Transonic aerodynamic characteristics of hypersonic low-wave-drag elliptical body-tail combinations as affected by changes in

stabilizer configuration
[NASA-TM-X-1789] c01 N69-25244
Charts for interpolation of local skin friction from experimental turbulent velocity profiles
[NASA-SP-3048] c01 N69-25391
An analysis of terrain bias error in planetary radar altimeters
[NASA-TN-D-5220] c21 N69-26195
Analytical investigation of an inflatable landing system having omnidirectional and multiple impact capabilities
[NASA-TN-D-5236] c32 N69-26223
The equipotential space suit design concept and its application to a space suit elbow joint
[NASA-TN-D-5221] c05 N69-26259
Hypersonic flutter analysis using measured static aerodynamic derivatives, and comparison with experiment
[NASA-TN-D-5233] c01 N69-26271
Flight-test results from supersonic deployment of an 18-foot-diameter /5.49 meter/ towed ballute decelerator
[NASA-TM-X-1773] c31 N69-26458
Inviscid radiating shock layers about spheres traveling at hyperbolic speeds in air
[NASA-TR-R-311] c12 N69-26504
Static longitudinal aerodynamic characteristics of some supersonic decelerator models at Mach numbers of 2.30 and 4.63
[NASA-TN-D-5219] c31 N69-26570
Evaluation of a contact-analog display in landing approaches with a helicopter
[NASA-TN-D-5241] c02 N69-27177
A technique to infer atmospheric water-vapor mixing ratio from measured horizon radiance profiles
[NASA-TN-D-5252] c13 N69-27246
Simulation of Gemini extravehicular tasks by neutral-buoyancy techniques
[NASA-TN-D-5235] c05 N69-28024
Elastoplastic stress-strain behavior at notch roots in sheet specimens under constant-amplitude loading
[NASA-TN-D-5253] c32 N69-28038
A wind-tunnel and analytical study of the conversion from wing lift to rotor lift on a composite-lift V/TOL aircraft
[NASA-TN-D-5256] c02 N69-28044
Wind-tunnel investigation of steady-state aerodynamics of a composite-lift VTOL aircraft model
[NASA-TN-D-5232] c02 N69-28097
Experimental investigation of the turbulent boundary layer on a typical subsonic transport fuselage
[NASA-TN-D-5242] c01 N69-28112
Calorimetric evaluation of three 1.5-meter-diameter inflatable rigidized solar concentrators
[NASA-TN-D-5234] c03 N69-28123
An experimental and analytical investigation of balloon-type enclosures for thermal control of satellites
[NASA-TN-D-5230] c33 N69-28209
A study of the performance of low-density phenolic-nylon ablators
[NASA-TN-D-5257] c33 N69-28440
Design, fabrication, and tests of tubular beryllium and Be-38Al alloy truss-type structures
[NASA-TN-D-5254] c32 N69-28658
Determination of lunar equatorial radius using image-motion compensation sensor data from Lunar Orbiter I
[NASA-TN-D-5231] c30 N69-29115
Design of an electronically scanned star sensor with digital output
[NASA-TN-D-5281] c14 N69-29153
Aerodynamic investigation of sharp cone- cylinder spikes on 120 degree blunted cones at Mach numbers of 3.00, 4.50, and 6.00
[NASA-TN-D-5201] c01 N69-29154
A process for imprinting micro lagoon fields in plastic surfaces for use in cell and tissue culture
[NASA-TN-D-5255] c04 N69-29195
Analytic function models of noise and modulation
[NASA-TR-R-314] c07 N69-29230
Transonic aerodynamic characteristics of two hypersonic cruise configurations
[NASA-TM-X-1816] c01 N69-29231
A flight investigation of a lightweight helicopter to study the feasibility of fixed-collective-pitch autorotations
[NASA-TN-D-5270] c02 N69-29232
Use of tetrafluoromethane to simulate real-gas effects on the hypersonic aerodynamics of blunt vehicles
[NASA-TR-R-312] c01 N69-29270
Measurements of mutual interference heating for a probe antenna mounted on an Apollo reentry configuration
[NASA-TM-X-1787] c01 N69-29318
Low-speed deployment, inflation, and steady-descent characteristics of ram-air-inflated balloon recovery systems with peripheral airscoop
[NASA-TN-D-5186] c21 N69-29595
Exploratory study of open-face honeycomb to reduce temperature of hypersonic aircraft structure
[NASA-TN-D-5278] c33 N69-29599
Fatigue of notched Ti-8Al-1Mo-1V titanium alloy at room temperature and 550 deg F /560 deg K/ with flight-by-flight loading representative of a supersonic transport
[NASA-TN-D-5294] c32 N69-29607
Heat transfer to the windward side of a fineness-ratio-2.9 cylinder with nearly spherical ends at a Mach number of 6 and angles of attack of 50 deg, 70 deg, and 90 deg
[NASA-TN-D-5251] c12 N69-29608
Description of the high-enthalpy arc tunnel at the Langley Research Center including test- stream conditions at selected operating points
[NASA-TN-D-5295] c11 N69-29981
Inflation and performance of three parachute configurations from supersonic flight tests in a low-density environment
[NASA-TN-D-5296] c01 N69-30063
Flow-field measurements downstream of two protuberances on a flat plate submerged in a turbulent boundary layer at Mach 2.49 and 4.44
[NASA-TN-D-5297] c12 N69-30071
Static stability characteristics of a 0.16- scale model of a jet-lift V/STOL research airplane in cruise
[NASA-TM-X-1835] c02 N69-30633
Data-reduction technique for determining rapidly rising heating rates to thermally thick walls
[NASA-TN-D-5309] c33 N69-30726
An experimental investigation of the mixing of compressible-air jets in a coaxial configuration
[NASA-TN-D-5315] c02 N69-30727
A finite-step method for calculation of theoretical load distributions for arbitrary lifting surface arrangements at subsonic speeds
[NASA-TN-D-5335] c01 N69-31337
Analysis of a molecular beam system utilizing a known pressure source
[NASA-TN-D-5308] c24 N69-31338
Drag reduction due to gas injection through various discrete slots on a three-dimensional wing at Mach 2.01
[NASA-TN-D-5307] c12 N69-31359
A laboratory investigation of N-wave focusing
[NASA-TN-D-5306] c02 N69-31874
Effects of wing planform on the static aerodynamics of a cruciform wing-body missile for Mach numbers up to 4.63
[NASA-TM-X-1839] c01 N69-31875
Simultaneous usage of attitude control for VTOL maneuvering determined by in-flight simulation
[NASA-TN-D-5342] c02 N69-32110
Simulation studies of some supersonic transport instrumentation requirements and operating problems
[NASA-TN-D-5280] c14 N69-32286
Experimental flow properties in the wake of a 120 deg cone at Mach number 2.20
[NASA-TN-D-5365] c01 N69-32299
Analysis of lateral directional stability characteristics of a twin jet fighter airplane at high angles of attack
[NASA-TN-D-5361] c02 N69-32337
A numerical analysis of the use of perforated walls to control shock location and movement in an internal compression supersonic inlet

[NASA-TR-R-317] c01 N69-32338
Effect of outdoor exposure at elevated temperature on the fatigue life of Ti-8Al-1Mo-1V titanium alloy and AM 350 stainless steel sheet
[NASA-TN-D-5362] c17 N69-32558
Evaluation of a parachute load distribution measuring system during low altitude drop tests
[NASA-TM-X-1832] c14 N69-32682
An evaluation test of a full scale replica of the RAM-CA flight heat shield in a rocket engine exhaust
[NASA-TM-X-1841] c31 N69-32713
Effects of jet exhaust longitudinal aerodynamic characteristics of a jet V/STOL model
[NASA-TN-D-5333] c01 N69-33210
Supersonic aerodynamic characteristics and shock standoff distances for large-angle cones with and without cylindrical afterbodies
[NASA-TN-D-5334] c01 N69-33237
Wind-tunnel investigation of a STOL aircraft configuration equipped with an external-flow jet flap
[NASA-TN-D-5364] c01 N69-33275
Aerodynamic interference effects caused by parallel-staged simple aerodynamic configurations at Mach numbers of 3 and 6
[NASA-TN-D-5379] c01 N69-3330
Transonic aerodynamic characteristics of a Saturn 1B Manned Orbiting Research Laboratory launch vehicle
[NASA-TM-X-1848] c31 N69-33380
An analytical evaluation of the denting of airplane surfaces by hail
[NASA-TN-D-5363] c32 N69-33420
Effects of cyclic heating and thermal shock on hafnia stabilized with calcia, magnesia, and yttria
[NASA-TN-D-5279] c18 N69-34547
Subsonic aerodynamic characteristics of a large-scale 1.075-pressure-ratio tip-turbine cruise-fan propulsion system at angle of attack
[NASA-TN-D-5316] c28 N69-34575
The calculated response of a three-crystal pair spectrometer
[NASA-TM-X-1857] c14 N69-34628
Effect of stress ratio on fatigue-crack growth in 7075-T6 and 2024-T3 aluminum-alloy specimens
[NASA-TN-D-5390] c17 N69-34704
Influence of various fabrication methods on the compressive strength of titanium skin- stringer panels
[NASA-TN-D-5389] c15 N69-34707
Molecular orientation and mechanical anisotropy in polyethylene, polypropylene, and poly/ethylene terephthalate/ films
[NASA-TN-D-5380] c18 N69-34708
The red-shift magnitude relation and observational data
[NASA-TN-D-5398] c30 N69-34884
Chemical equilibrium of ablation materials including condensed species
[NASA-TN-D-5391] c33 N69-34966
Aerodynamic characteristics in pitch of a 1/7-scale model of a two- and three-stage rocket configuration at Mach numbers of 0.4 to 4.63
[NASA-TN-D-5378] c01 N69-34986
Spin-tunnel investigation of a 1/20-scale model of a straight-wing, twin-boom, counter-insurgency airplane
[NASA-TM-X-1602] c02 N69-34988
Experimental pressure distributions for a family of blunt bodies at Mach numbers from 2.49 to 4.63 and angles of attack from 0 deg to 15 deg
[NASA-TN-D-5392] c01 N69-35300
Subsonic performance characteristics of a large-scale 1.075-pressure-ratio tip-turbine cruise-fan propulsion system
[NASA-TN-D-5314] c28 N69-35526
Pressures and heat transfer on a 75 degree swept delta wing with trailing-edge flap at Mach 6 and angles of attack to 90 degrees
[NASA-TN-D-5418] c01 N69-35855
The dynamic response of a flexible rotor blade to a concentrated force moving from tip to root
[NASA-TN-D-5410] c32 N69-36220
Hot-salt-stress-corrosion cracking and its effect on tensile and stress-rupture properties of Ti-6Al-4V titanium-alloy sheet
[NASA-TN-D-5417] c17 N69-36221
Experimental investigation of the effect of aluminum size and loading on the burning rate of solid propellants under acceleration
[NASA-TN-D-5397] c27 N69-36225
Static and dynamic stability derivatives of a model of a jet transport equipped with external-flow jet-augmented flaps
[NASA-TN-D-5408] c02 N69-36258
A procedure for rapid computation of equilibrium chemical composition and thermodynamic properties of the generalized argon-nitrogen-oxygen-hydrogen gas system
[NASA-TN-D-5416] c33 N69-36299
Bodies of revolution having minimum total drag in hypersonic flow
[NASA-TN-D-5438] c01 N69-36699
Comparison of prediction methods and studies of relaxation in hypersonic turbulent nozzle-wall boundary layers
[NASA-TN-D-5433] c12 N69-36805
Analysis of the flat-spin characteristics of a twin-jet swept-wing fighter airplane
[NASA-TN-D-5409] c02 N69-36807
A modified method of integral relations approach to the blunt-body equilibrium air flow field, including comparisons with inverse solutions
[NASA-TN-D-5434] c12 N69-36830
Evaluation of a technique for measuring ion energy loss in vapor-deposited materials
[NASA-TN-D-5430] c24 N69-36929
Analysis of the gamma-ray-backscatter technique for direct measurement of the density of the Martian atmosphere
[NASA-TN-D-5431] c24 N69-36931
Effect of jet velocity and axial location of nozzle exit on the performance of a twin-jet afterbody model at Mach numbers up tc 2.2
[NASA-TN-D-5393] c28 N69-36932
Applications of analytic function theory to analysis of single-sideband angle-modulated systems
[NASA-TN-D-5446] c07 N69-37602
Spin-tunnel investigation of a 1/30-scale model of a subsonic attack airplane
[NASA-TM-X-1788] c02 N69-37976
Flow-field and drag characteristics of several boundary-layer tripping elements in hypersonic flow
[NASA-TN-D-5454] c12 N69-38156
Estimation of variance by a recursive equation
[NASA-TN-D-5465] c19 N69-38178
Simulation of pyrolysis-gas flow through a char layer during ablation
[NASA-TN-D-5464] c33 N69-38271
Results of a free-flight test to determine the performance characteristics of a towed, conical decelerator
[NASA-TM-X-1833] c02 N69-38598
Effect of hypersonic research engine installation on aerodynamic characteristics of 0.0667-scale model of X-15A-2 airplane at Mach numbers from 1.75 to 4.63
[NASA-TM-X-1840] c01 N69-38612
Stress concentration around broken filaments in a filament-stiffened sheet
[NASA-TN-D-5453] c32 N69-38642
A new matrix theorem and its application for establishing independent coordinates for complex dynamical systems with constraints
[NASA-TR-R-326] c19 N69-38655
A feasibility study of determining physical properties of the Martian atmosphere by use of solar occultation as seen from an artificial satellite
[NASA-TN-D-5443] c30 N69-38658
Development of three-dimensional pressure-distribution functions for lifting surfaces with trailing-edge controls based on the integral equation for subsonic flow
[NASA-TN-D-5419] c01 N69-38768
Three-track runway and taxiway profiles measured at international airports A and B
[NASA-TN-D-5444] c02 N69-38770
A navigation-aids identification decoder and display for general-aviation aircraft
[NASA-TN-D-5445] c09 N69-38852
Application of human transfer functions to system analysis
[NASA-TN-D-5478] c05 N69-39183

Operational limitations in flying noise- abatement approaches
[NASA-TN-D-5497] c02 N69-39188
Lunar Orbiter 1, preliminary results - Lunar terrain assessment and selenodesy, micrometeoroid, and radiation measurements
[NASA-SP-197] c30 N69-39213
Free-stream electron concentration in an arc-heated wind tunnel and correlation of Langmuir probe and microwave interferometer measurements
[NASA-TN-D-5500] c25 N69-39302
Supersonic lifting capabilities of large-angle cones
[NASA-TN-D-5499] c01 N69-40026
A limb radiance calculation approach for model atmospheres containing horizontal gradients of temperature and pressure
[NASA-TN-D-5495] c21 N69-40055
Application of pressurized liquid nitrogen inside parametric-amplifier structures for input-noise-temperature improvement
[NASA-TN-D-5509] c09 N69-40079
Experimental investigation of flutter at Mach 3 of rotationally restrained panels and comparison with theory
[NASA-TN-D-5508] c32 N69-40087
Pulse-response curves of conventional low-pass filters
[NASA-TN-D-5494] c07 N69-40099
Fluctuating properties of turbulent boundary layers for Mach numbers up to 9
[NASA-TN-D-5496] c12 N69-40137
A method of integral relations solution for radiating, nonadiabatic, inviscid flow over a blunt body
[NASA-TN-D-5480] c33 N69-40356
Pressure distribution of a large semispan tilting wing with 0.4-diameter-chord, single- slotted flap, and a single propeller 0.22 chord below wing
[NASA-TN-D-5481] c01 N69-40876
Evaluation of a technique for determining airplane aileron effectiveness and roll rate by using an aeroelastically scaled model
[NASA-TN-D-5538] c02 N69-40937
Analytical and experimental investigation of end-plane rotations of truncated cones under bending loads
[NASA-TN-D-5536] c32 N69-41141
Calculation of the penetration flux for a multiwall structure on the Lunar Orbiter spacecraft
[NASA-TN-D-5455] c32 N69-41229

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. LEWIS RESEARCH CENTER, CLEVELAND, OHIO.

Performance and analysis of seals for inerted lubrication systems of turbine engines
[NASA-TN-D-4761] c15 N69-10055
Nuclear-rocket propulsion
[NASA-TM-X-1685] c22 N69-10067
Design and analysis of a modular servoamplifier for fast-response electrohydraulic control systems
[NASA-TN-D-4898] c03 N69-10068
Prediction of thermodynamic effects of developed cavitation based on liquid-hydrogen and Freon-114 data on scaled venturis
[NASA-TN-D-4899] c12 N69-10070
Summary of electrical component development for a 400-hertz Brayton energy conversion system
[NASA-TN-D-4874] c03 N69-10088
COMPUTE - A time-sharing desk calculator program
[NASA-TN-D-4917] c08 N69-10098
Uranium dioxide vent loss in an externally fueled thermionic reactor concept
[NASA-TN-D-4922] c22 N69-10099
Observations on permeation of polytetrafluoroethylene by compounds of rhenium, molybdenum, and tungsten
[NASA-TN-D-4886] c06 N69-10126
Estimation of fission-product gas pressure in uranium dioxide ceramic fuel elements
[NASA-TN-D-4823] c22 N69-10216
Effect of size on tensile strength of fine polycrystalline nickel wires
[NASA-TN-D-4884] c17 N69-10226
Transient solidification outside a cooled pipe with application to a solar Brayton heat receiver
[NASA-TN-D-4897] c33 N69-10227
Experiments on the stability of water lubricated herringbone-groove journal bearings. 1 - Theoretical considerations and clearance effects
[NASA-TN-D-4883] c15 N69-10228
Incompressibly lubricated Rayleigh step journal bearing. 2 - Infinite-length solution
[NASA-TN-D-4873] c15 N69-10231
Influence of surface films on friction and deformation of single-crystal and polycrystalline gold
[NASA-TN-D-4875] c15 N69-10249
The effects of reactor radiation on 22-volt silicon voltage-regulator diodes
[NASA-TN-D-4923] c09 N69-10250
Water flow and cavitation in converging- diverging boiler-inlet nozzle
[NASA-TM-X-1689] c12 N69-10293
Effect of porous bleed in a high performance axisymmetric, mixed compression inlet at Mach 2.50
[NASA-TM-X-1692] c01 N69-10294
Atlas-Centaur AC-12 flight performance for Surveyor 3
[NASA-TM-X-1678] c31 N69-10295
Effect of variable stator area on performance of a single-stage turbine suitable for air cooling. 5 - Stator detailed losses with 70 percent design area
[NASA-TM-X-1696] c28 N69-10296
Influence of number of operable slip systems on friction characteristics of single-crystal and polycrystalline magnesium
[NASA-TN-D-4351] c15 N69-10370
Experimental studies on shadow shields for thermal protection of cryogenic tanks in space
[NASA-TN-D-4887] c33 N69-10420
Thermal analysis of shadow shields and structural members in a vacuum
[NASA-TN-D-4876] c33 N69-10473
Effect of variable stator area on performance of a single-stage turbine suitable for air cooling. 6 - Turbine performance with 70-percent design stator area
[NASA-TM-X-1697] c01 N69-10558
Calculation of fuel loss from vented nuclear fuel elements for space power reactors
[NASA-TN-D-4913] c22 N69-10734
Feasibility of producing dispersion strengthened chromium by ball-milling in hydrogen halides
[NASA-TN-D-4912] c17 N69-10827
High-field electromagnets at NASA Lewis Research Center
[NASA-TN-D-4910] c23 N69-10889
Absorption rate sticking probabilities for oxygen on columbium and dilute columbium- zirconium alloys
[NASA-TN-D-4885] c17 N69-10931
Selected technology for the electric power industry
[NASA-SP-5057] c03 N69-12575
Design-point performance of a double containment tantalum and stainless steel mercury boiler for SNAP-8
[NASA-TN-D-4926] c33 N69-12739
Excited states of barium 136 and barium 134
[NASA-TN-D-4933] c24 N69-12778
Fouling characteristics of ASTM jet A fuel when heated to 700 deg F in a simulated heat exchanger tube
[NASA-TN-D-4958] c28 N69-12831
Elastic scattering of 21-MeV protons from nitrogen 14, oxygen 16, argon 40, nickel 58, and tin 116
[NASA-TN-D-4932] c24 N69-12840
Atmospheric limits on the observational capabilities of aerospacecraft
[NASA-TN-D-4940] c20 N69-12934
Resonance integrals of rhenium for a wide range of sample sizes
[NASA-TN-D-4938] c24 N69-13152
Preliminary investigation of distortion dynamics in a Mach 3 mixed compression inlet
[NASA-TM-X-1706] c01 N69-13154
Lighting in cryogenic and noncryogenic fluids
[NASA-TM-X-1654] c14 N69-13176
Minimization of optical scattering effects through use of optimal monochromator slit geometry
[NASA-TM-X-1702] c24 N69-13210

Performance investigation of bipropellant fractional-pound thrusters
[NASA-TM-X-1699] c28 N69-13237
An estimate of the supersonic flow field about an axisymmetric body with an N wave pressure trace
[NASA-TN-D-4935] c01 N69-13238
Evaluation of a fluidic oscillator as a molecular weight sensor for gas mixtures
[NASA-TM-X-1698] c03 N69-13246
Stability analysis for unloaded externally pressurized gas-lubricated bearings with journal rotation
[NASA-TN-D-4934] c15 N69-13256
Test of improved ignitor for first stage separation rockets for the Atlas-Centaur launch vehicle
[NASA-TM-X-1676] c28 N69-13275
Point defect calculations in tungsten
[NASA-TN-D-4918] c22 N69-13309
A set of 360 FORTRAN /level G or H/ subroutines for generating printed plots
[NASA-TM-X-1700] c08 N69-13566
FORTRAN program for spline fit curve
[NASA-TM-X-1707] c19 N69-14002
A wind profile for generating control requirements for rocket vehicles using liquid-injection control systems
[NASA-TM-X-1708] c31 N69-14033
Effect of bleed-system back pressure and porous area on the performance of an axisymmetric mixed-compression inlet at Mach 2.50
[NASA-TM-X-1710] c01 N69-14075
An analytical method for predicting the performance of centrifugal pumps during pressurized startup
[NASA-TN-D-4967] c15 N69-14082
A summary of the measurement and interpretation of the Hall coefficient and resistivity of semiconductors
[NASA-TM-X-1711] c26 N69-14086
Evaluation of the results of a round robin analysis for oxygen in potassium and sodium
[NASA-TN-D-4971] c06 N69-14180
Quantum theory of a particle oscillator collision applied to gas-surface interactions at cryogenic temperatures
[NASA-TN-D-4982] c24 N69-14288
A mathematical analysis of supersonic inlet dynamics
[NASA-TN-D-4969] c01 N69-14289
Analog simulation of a closed loop Brayton cycle test facility
[NASA-TM-X-1715] c03 N69-14312
Experimental investigation of a 10 deg conical turbojet plug nozzle with iris primary and translating shroud at Mach numbers from 0 to 2.0
[NASA-TM-X-1709] c28 N69-14313
Inviscid flow analysis of two parallel slot jets impinging normally on a surface
[NASA-TN-D-4957] c12 N69-14316
Simulation studies of the supersonic transport in future air traffic control systems
[NASA-TN-D-4944] c21 N69-14382
Rolling-element fatigue life of ausformed M-50 steel balls
[NASA-TN-D-4954] c15 N69-14383
Liquid rocket acoustic-mode-instability studies at a nominal thrust of 20000 pounds
[NASA-TN-D-4968] c28 N69-14384
Back flow from jet plumes in vacuum
[NASA-TN-D-4978] c01 N69-14385
Influence of high-turbine inlet temperature engines in a methane-fueled SST when takeoff jet noise limits are considered
[NASA-TN-D-4965] c28 N69-14386
Characteristics of composite carbon resistors used for measuring accelerator terminal voltages
[NASA-TM-X-1718] c24 N69-14398
Review of ductilizing of group 6A elements by rhenium and other solutes
[NASA-TN-D-4955] c17 N69-14403
Effect of radius on bulging and fracture of through-cracked cylindrical pressure vessels at cryogenic temperatures
[NASA-TN-D-4951] c32 N69-14480
Predictive equations for thermal neutron flux perturbation effects in cylinders
[NASA-TN-D-4949] c22 N69-14481
Scattering of 42 MeV /6.7-pJ/ alpha particles from even isotopes of cadmium. Supplement 1 - Absolute cross sections
[NASA-TN-D-4948] c24 N69-14482
Nonlinear decay of a disturbance in an unbounded viscous fluid
[NASA-TN-D-4947] c12 N69-14483
Transfer functions for radiator dynamics in the SNAP-8 system
[NASA-TN-D-4946] c22 N69-14503
Experimental investigation of the dynamics of water rejection from a matrix type of hydrogen-oxygen fuel cell
[NASA-TN-D-4956] c03 N69-14518
Experimental observation of oscillations described by the continuity equations of slightly ionized deuterium, neon, and helium gas
[NASA-TN-D-4950] c25 N69-14525
Electrical resistivity as a function of deuterium concentration in palladium
[NASA-TN-D-4970] c26 N69-14565
Design of supersonic inlets by a computer program incorporating the method of characteristics
[NASA-TN-D-4960] c01 N69-14566
Heat-transfer coefficients for hydrogen flowing through parallel hexagonal passages at surface temperatures to 2275 K
[NASA-TN-D-4959] c33 N69-14588
Empirical characterization of some pressure wave shapes in strong traveling transverse acoustic modes
[NASA-TM-X-1716] c12 N69-15371
Transport study of neutron and photon attenuation through lithium hydride and tungsten spherical media
[NASA-TN-D-4989] c24 N69-15375
Effects of sample preparation on photomicrographs of cadmium sulfide thin-film solar cells
[NASA-TM-X-1722] c03 N69-15397
Observations of interface behavior during inflow to an elliptical ended cylinder in weightlessness
[NASA-TM-X-1719] c12 N69-15473
Rocket engine evaluation of erosion and char as functions of fabric orientation for silica-reinforced nozzle materials
[NASA-TM-X-1721] c28 N69-15475
Real-gas effects in critical flow through nozzles and thermodynamic properties of nitrogen and helium at pressures to 300 times 10 sup 5. Newtons per square meter /approx. 300 ATM/
[NASA-SP-3046] c12 N69-16098
A digital computer program for determining the elastic-plastic deformation and creep strains in cylindrical rods, tubes and vessels
[NASA-TM-X-1723] c32 N69-16115
On the design of acoustic liners for rocket engines - Maximum damping as a design objective
[NASA-TM-X-1720] c28 N69-16152
Nonequilibrium calculations of methane fluorine oxygen and butene-1-fluorine oxygen rocket performance
[NASA-TN-D-4991] c27 N69-16153
Performance of swirl-can turbojet combustors at simulated supersonic combustor-inlet conditions
[NASA-TN-D-4996] c28 N69-16154
Theoretical nonequilibrium performance of oxygen difluoride-diborane rocket propellant
[NASA-TN-D-4992] c27 N69-16195
The effect of orientation and the presence of surface active materials on the friction, deformation and wear of aluminum
[NASA-TN-D-4994] c15 N69-16197
Analysis and design of inductors for protecting power transistors against current surges in inverter bridge circuits
[NASA-TN-D-4995] c10 N69-16198
Investigation of flow range and stability of three inducer-impeller pump combinations operating in liquid hydrogen
[NASA-TM-X-1727] c28 N69-16213
Rolling-element bearing life from 400 deg to 600 F
[NASA-TN-D-5002] c15 N69-16367
High temperature mechanical properties of polycrystalline hafnium carbide and hafnium carbide containing 13-volume-percent hafnium diboride
[NASA-TN-D-5008] c17 N69-16380

Reactivity changes of a fast reactor core due to elastic-plastic strain and creep
[NASA-TN-D-5012] c22 N69-16381
Design and performance of flueric shock position sensor for a mixed-compression supersonic inlet
[NASA-TM-X-1733] c14 N69-16382
Analytical study of flow reduction due to oxidation of wire-form porous sheet for transpiration cooled turbine blades
[NASA-TN-D-5001] c17 N69-16383
Hot-salt stress-corrosion of titanium alloys - Generation of hydrogen and its embrittling effect
[NASA-TN-D-5000] c17 N69-16465
Components of a hydrogen plasma including minor species
[NASA-TN-D-4993] c25 N69-16466
A method for reducing the equivalent sink temperature of a vertically oriented radiator on the lunar surface
[NASA-TM-X-1729] c03 N69-17225
Crack toughness characteristics of several alloys for use in heavy sections of high speed aircraft
[NASA-TN-D-4998] c32 N69-17275
A survey of salt deposits in compressors of flight gas turbine engines
[NASA-TN-D-4999] c28 N69-17276
Examination of oxide scales on heat resisting alloys
[NASA-TN-D-5019] c17 N69-17277
Two-burn escape maneuvers with an intermediate coasting ellipse
[NASA-TN-D-5011] c30 N69-17305
A 1-megawatt reactor design for Brayton-cycle space power application. Part 1 - Thermal analysis and core design
[NASA-TN-D-5013] c22 N69-17313
A 1-megawatt reactor design for Brayton-cycle space power application Part 2 - Neutronics design
[NASA-TN-D-5014] c22 N69-17314
Analytical investigation of the effect of cooling air on two-stage turbine performance
[NASA-TM-X-1728] c01 N69-17392
Experience with and improvements in containment vessel penetrations
[NASA-TM-X-1735] c22 N69-17701
Dynamic calibration of turbine flowmeters by means of frequency response tests
[NASA-TM-X-1736] c14 N69-17702
Frequency response of a forced flow single tube boiler with inserts and exit restriction
[NASA-TN-D-5023] c12 N69-17779
Steady-state airflow and afterburning performance characteristics of four J85-GE-13 turbojet engines
[NASA-TM-X-1742] c28 N69-17781
Two dimensional inviscid jet flow from two nozzles at an angle to a plane surface
[NASA-TN-D-5064] c01 N69-17816
The ellipsoidal velocity distribution function
[NASA-TN-D-5026] c12 N69-17827
Theoretical analysis of flow in VTOL lift fan inlets without crossflow
[NASA-TN-D-5065] c01 N69-17831
Measurements of some properties of a discharge from a hollow cathode
[NASA-TN-D-4966] c28 N69-17847
Hartree-Fock calculations with Wood-Saxon basis functions
[NASA-TN-D-5066] c24 N69-17976
Correlation of gas-side heat transfer for axisymmetric rocket engine nozzles
[NASA-TM-X-1748] c33 N69-18898
A conversational approach to matrix calculations, concepts and implementation
[NASA-TM-X-1749] c08 N69-18954
Experimental performance of a water- electrolysis rocket
[NASA-TM-X-1737] c28 N69-19017
Feasibility studies of direct voice broadcast satellites
[NASA-TM-X-1747] c07 N69-19025
Dynamic response of hydrazine-nitrogen tetroxide combustion to transverse gas flow
[NASA-TN-D-4984] c27 N69-19026
Lateral sloshing in cylinders under low-gravity conditions
[NASA-TN-D-5058] c12 N69-19112
The dissociation energy of gaseous titanium mononitride
[NASA-TN-D-5027] c06 N69-19129
Performance characteristics from Mach 2.58 to 1.98 of an axisymmetric mixed-compression inlet system with 60-percent internal contraction
[NASA-TM-X-1739] c01 N69-19130
Laboratory simulation of solar wind - earth interaction
[NASA-TM-X-1738] c25 N69-19131
Exploratory study of mechanical properties and heat treatment of molybdenum-hafnium-carbon alloys
[NASA-TN-D-5025] c17 N69-19200
Impurity profile and energy band diagram for the cuprous sulfide-cadmium sulfide heterojunction
[NASA-TN-D-5079] c26 N69-19781
Evaluation of 7.8-inch-throat-diameter inserts and a unique cooling concept in a storable-propellant rocket engine
[NASA-TM-X-1756] c28 N69-19782
Possible applications of the continuity- equation plasma oscillation to pulsars and other periodic astrophysical phenomena
[NASA-TN-D-5078] c25 N69-19783
Description and evaluation of digital-computer design-analysis program for homopolar inductor alternators
[NASA-TN-D-5072] c03 N69-19799
Friction and wear of nine selected polymers with various fillers in liquid hydrogen
[NASA-TN-D-5073] c15 N69-19800
A FORTRAN 4 program to estimate the off-design performance of radial-inflow turbines
[NASA-TN-D-5059] c03 N69-19829
Compatibility tests of molten uranium with tungsten and tungsten - 1.5 percent hafnium
[NASA-TN-D-5076] c17 N69-19930
Performance of various oxide-magazine cathodes in Kaufman thrusters
[NASA-TN-D-5074] c28 N69-19980
Dynamic analysis of permanent magnet stepping motors
[NASA-TN-D-5094] c03 N69-20780
Solubilities of vanadium, titanium, and zirconium in liquid potassium
[NASA-TN-D-5093] c17 N69-20789
Low-density foam for insulating liquid- hydrogen tanks
[NASA-TN-D-5114] c18 N69-20790
Effect of flow rate on the dynamic contact angle for wetting liquids
[NASA-TN-D-5115] c12 N69-20794
Use of tungsten-184 as a thermal flux monitor at high temperatures
[NASA-TN-D-5113] c22 N69-20795
Noncavitating and cavitating performance of several low area ratio water jet pumps having throat lengths of 3.54 diameters
[NASA-TN-D-5095] c03 N69-20797
Resonant mode analysis of the Fitzgerald apparatus
[NASA-TN-D-5103] c26 N69-20798
A comparison of two spectrophotometric methods for the determination of palladium in titanium-base alloys
[NASA-TM-X-1767] c06 N69-20801
Optimal three dimensional launch vehicle trajectories with attitude and attitude rate constraints
[NASA-TN-D-5117] c30 N69-20810
Performance of the SNAP-8 lubrication and coolant subsystem
[NASA-TM-X-1731] c03 N69-20828
Comparison of Brayton and Rankine cycle magnetogasdynamic space-power generation systems
[NASA-TN-D-5085] c03 N69-20852
Preliminary development of spectrochemical analysis of superalloys with the liquid-layer solid-sample spark technique
[NASA-TM-X-1753] c06 N69-20853
OPEX 2 - A radiation shield optimization code
[NASA-TM-X-1769] c22 N69-20854
Performance of an experimental SNAP 8 power conversion system
[NASA-TM-X-1732] c03 N69-20868
A FORTRAN code for computing the principle mass movements of inertia of composite bodies
[NASA-TM-X-1754] c23 N69-20870

Electronic position indicator for latching solenoid valves
[NASA-TM-X-1760] c14 N69-20874
Electrothermal instabilities in the entrance region of an MHD generator
[NASA-TM-X-1761] c25 N69-20875
Measured effects of gaseous flow system dynamics on acoustic-mode combustion instability
[NASA-TN-D-5080] c33 N69-20882
Effect of rotor tip clearance on the performance of a 5-inch single stage axial flow turbine
[NASA-TM-X-1757] c03 N69-20883
Results of endurance tests of a SNAP 8 turbine-alternator
[NASA-TM-X-1741] c03 N69-20913
Characteristics study of a bicone mixed-compression inlet for Mach 1.80 to 2.50
[NASA-TN-D-5084] c01 N69-20914
Cold performance evaluation of 4.97-inch radial-inflow turbine design for single-shaft Brayton cycle space-power system
[NASA-TN-D-5090] c03 N69-20937
Lubrication with some polyphenyl ethers and superrefined mineral oils in a 600 deg F /316 deg C/ inerted vane pump loop
[NASA-TN-D-5096] c15 N69-20938
Preliminary investigation of graphite fluoride /CF sub x/ sub n as a solid lubricant
[NASA-TN-D-5097] c15 N69-20939
Performance of N/p silicon and cadmium sulfide solar cells as affected by hypervelocity particle impact
[NASA-TN-D-5133] c03 N69-21016
Mathematical analysis of the Fitzgerald apparatus
[NASA-TN-D-5116] c18 N69-21384
Factors influencing low cycle crack growth in 2014-T6 aluminum sheet at minus 320 deg F /77 K/
[NASA-TN-D-5140] c32 N69-21392
Atlas-Centaur AC-11 flight performance for Surveyor 4
[NASA-TM-X-1768] c31 N69-21399
Viscous flow in a short cylindrical vortex chamber with a finite swirl ratio
[NASA-TN-D-5132] c12 N69-21400
Fabrication of cermets of uranium nitride and tungsten or molybdenum from mixed powders and from coated particles
[NASA-TN-D-5136] c17 N69-21404
On the resolution and image intensity of the field-ion microscope
[NASA-TN-D-5125] c14 N69-21408
Superconductive dust cores for inductive elements
[NASA-TN-D-5137] c26 N69-21500
Experimental investigation of a 10 deg conical turbojet plug nozzle with translating primary and secondary shrouds at Mach numbers from 0 to 2.0
[NASA-TM-X-1777] c28 N69-21648
Performance and cavitation damage of an axial-flow pump in 1500 deg F /1089 K/ liquid sodium
[NASA-TN-D-5138] c15 N69-21773
FORTRAN program for calculating velocities and streamlines on a blade-to-blade stream surface of a tandem blade turbomachine
[NASA-TN-D-5044] c01 N69-21811
Effect of ultrasonic vibration on precipitation hardening of steels and superalloys
[NASA-TN-D-5131] c32 N69-21814
Revised FORTRAN program for calculating velocities and streamlines on a blade to blade stream surface of a turbomachine
[NASA-TM-X-1764] c01 N69-22553
Nondestructive determination of uranium 235 distribution by fixed position gamma scanning
[NASA-TM-X-1779] c22 N69-22555
Absorption of infrared radiation by ice cryodeposits
[NASA-TN-D-5181] c23 N69-22769
Stress-rupture and tensile properties of refractory-metal wires at 2000 deg and 2200 deg F /1093 deg and 1204 deg C/
[NASA-TN-D-5139] c32 N69-22823
Design and performance of two integrated circuits for fluidic-controlled pneumatic stepping motor system
[NASA-TN-D-5155] c03 N69-22896
Variation of convective heat-transfer coefficient around a simulated rocket cooling tube section
[NASA-TN-D-5168] c33 N69-22931
Optical model analysis of proton scattering in the range 16 to 22 MeV
[NASA-TN-D-5067] c24 N69-22934
Experimental bending strength of an Atlas LV-3C booster beyond compressive skin wrinkling
[NASA-TN-D-5156] c31 N69-22937
FORTRAN program for calculating velocities in a magnified region on a blade to blade stream surface of a turbomachine
[NASA-TN-D-5091] c01 N69-22938
Effects of temperature and electrolyte concentration on performance of a fuel cell of the Bacon type
[NASA-TN-D-5154] c03 N69-22940
Pumped helium tests of a 51-centimeter bore niobium-tin magnet
[NASA-TN-D-5158] c26 N69-22965
Performance and evaluation of two liquid-metal pumps for sodium-potassium service
[NASA-TM-X-1765] c15 N69-22970
Analysis of light-scattering data from polymer solutions
[NASA-TN-D-5177] c06 N69-22991
The thermal stability and friction of the disulfides, diselenides, and ditellurides of molybdenum and tungsten in vacuum
[NASA-TN-D-5141] c15 N69-22992
Dynamic strain aging during the creep and tensile testing of a molybdenum-titanium- carbon alloy
[NASA-TN-D-5169] c17 N69-22993
Crater characteristics of 11 metal alloys under hyper-velocity impact including effects of projectile density and target temperature
[NASA-TN-D-5135] c32 N69-22994
Exploratory study of silicide, aluminide, and boride coatings for nitridation-oxidation protection of chromium alloys
[NASA-TN-D-5157] c17 N69-23084
Shaft face seal with self-acting lift augmentation for advanced gas turbine engines
[NASA-TN-D-5170] c15 N69-23232
On the design of acoustic liners for rocket engines - Helmholtz resonators evaluated with a rocket combustor
[NASA-TN-D-5171] c33 N69-23351
The synthesis of a novel polymide precursor
[NASA-TN-D-5184] c06 N69-23353
Sigma phase formation and its effect on stress-rupture properties of IN-100
[NASA-TN-D-5185] c17 N69-23465
Vibration of shaft face seals and stabilizing effect of viscous and friction damping
[NASA-TN-D-5161] c15 N69-23466
Measurement of liquid and two-phase hydrogen densities with a capacitance density meter
[NASA-TN-D-5015] c14 N69-23470
View factors for toroids and their parts
[NASA-TN-D-5006] c33 N69-23471
Steady-state interactions from Mach 1.98 to 2.58 between a turbojet engine and an axisymmetric inlet with 60-percent internal area contraction
[NASA-TM-X-1780] c28 N69-23519
Determination of oxygen in lithium by the vacuum distillation method
[NASA-TN-D-5197] c06 N69-23706
Design and fabrication of a counterflow double-containment tantalum-stainless steel mercury boiler
[NASA-TN-D-5092] c33 N69-23707
Creep-rupture data for welded N-155 tubes
[NASA-TN-D-5195] c17 N69-23731
Performance and evaluation of a liquid-metal pump for mercury service
[NASA-TM-X-1766] c15 N69-23768
Overall performance of a tandem-bladed inducer tested in water
[NASA-TN-D-5134] c01 N69-23769
Surface temperature mapping with infrared photographic pyrometry for turbine cooling investigations
[NASA-TN-D-5179] c14 N69-23895
Atlas-Agena flight performance for the Applications Technology Satellite ATS-1 mission
[NASA-TM-X-1784] c31 N69-24038
Effect of size on normal-gravity self-pressurization of spherical liquid hydrogen tankage
[NASA-TN-D-5196] c33 N69-24168

Experimental study of pump and seal characteristics of helical groove geometry incorporated in a combined bearing and pump
[NASA-TN-D-5225] c15 N69-24791
Photographic study of a bromine jet flowing in a coaxial airstream and impinging on a stagnation surface
[NASA-TN-D-5209] c12 N69-24800
Analysis of cylindrical reactor fuel pin for clad stress caused by fission gases
[NASA-TN-D-5178] c22 N69-24802
Characterization of pressure perturbations induced in a rocket combustor by a machine gun
[NASA-TN-D-5214] c33 N69-24824
Analysis of gold sphere transmission experiments at 24-keV neutron energy using spin-dependent S-wave statistics
[NASA-TN-D-5211] c24 N69-24826
Nonlinear flux flow in single crystal niobium
[NASA-TN-D-5198] c26 N69-24916
Vapor ingestion phenomenon in weightlessness
[NASA-TN-D-5210] c12 N69-24917
Noise in axisymmetric convergent electron beams
[NASA-TN-D-5212] c10 N69-24918
Study of the /alpha, t/ reaction on scandium-45 at 41 MeV
[NASA-TN-D-5216] c24 N69-24919
A new momentum integral method for treating magnetohydrodynamic and simple hydrodynamic entrance flows
[NASA-TN-D-5215] c25 N69-24920
Conceptual study of rocket-scramjet hybrid engines in a lifting reusable second stage
[NASA-TN-D-5218] c28 N69-24922
Experiments on power loss in herringbone grooved, gas-lubricated journal bearings
[NASA-TN-D-5224] c15 N69-24932
Restart and high response terminal shock control for an axisymmetric mixed-compression inlet with 60-percent internal contraction
[NASA-TM-X-1792] c28 N69-24938
Radiation induced reduction of ammoniacal nickel /2/ sulfate to metallic nickel
[NASA-TN-D-5213] c06 N69-24940
Analytical evaluation of space storable propellants for unmanned Jupiter and Saturn orbiter missions
[NASA-TM-X-1793] c31 N69-24942
Corrosion of metals in deionized water at 30 deg C /100 deg F/
[NASA-TM-X-1791] c17 N69-25243
Clevis design for compact tension specimens used in plane-strain fracture toughness testing
[NASA-TM-X-1796] c32 N69-25301
Radial power tailoring for a uranium dioxide T-111 clad reactor with contained fission product gases
[NASA-TM-X-1795] c22 N69-25305
A systematic approach to model development by comparison of experimental and analytical regression coefficients
[NASA-TM-X-1797] c19 N69-25311
Simple equations for calculating temperature distributions in radiating gray gases
[NASA-TN-D-5226] c33 N69-25312
LEED studies of adhesion to a rhenium surface
[NASA-TN-D-5229] c17 N69-25363
Analysis of electron analog simulation of ion containment in magnetic fields
[NASA-TN-D-5217] c25 N69-25394
Galvanomagnetic and thermomagnetic effects in white tin in fields to 3.3 tesla and at temperatures between 1.2 and 4.2 K
[NASA-TN-D-5227] c26 N69-25412
Evaluation of two nickel-base alloys, alloy 713C and NASA TAZ-8A, produced by extrusion of prealloyed powders
[NASA-TN-D-5248] c17 N69-26192
A new method for treatment of uncertainties in nuclear reactor heat transfer calculations
[NASA-TM-X-1802] c22 N69-26231
Experiences with beryllium swelling and replacement in the Plum Brook reactor
[NASA-TM-X-1794] c22 N69-26233
Impulsive motion on a flat plate pulsed with uniform heat flux
[NASA-TN-D-5249] c33 N69-26236
Unaccelerated geocentric velocities and influx rates of sporadic photographic meteors
[NASA-TN-D-5245] c30 N69-26239
LEED study of the adhesion of various materials to the /iii/ surface of nickel
[NASA-TN-D-5247] c17 N69-26258
A nuclear thermionic space power concept using rod control and heat pipes
[NASA-TN-D-5250] c22 N69-26270
Effect of oxygen concentration on an advanced ester lubricant in bearing tests at 400 deg and 450 deg F
[NASA-TN-D-5262] c15 N69-26311
Experimental data for two 1400-feet per second tip speed compressor rotors operated with inlet flow distortions
[NASA-TM-X-1798] c01 N69-26312
Effect of oxygen concentration on the performance of synthetic paraffinic oils in short term bearing tests from 400 deg to 500 deg F
[NASA-TN-D-5152] c15 N69-26314
Controlled oxygen additions to refractory metals
[NASA-TM-X-1799] c17 N69-26952
Jet effects on boattail pressure drag of isolated ejector nozzles at Mach numbers from 0.60 to 1.47
[NASA-TM-X-1785] c01 N69-26976
Performance and stall limits of a YTF30-P-1 turbofan engine with uniform inlet flow
[NASA-TM-X-1803] c28 N69-27019
A proposed model for the effect of oxidation on the high-temperature deformation of nickel
[NASA-TN-D-5266] c17 N69-27061
Experiments on rotating externally pressurized air journal bearings. Part 1 - Load capacity and stiffness
[NASA-TN-D-5191] c15 N69-27078
Atlas-Agena flight performance for the Applications Technology Satellite ATS-2 mission
[NASA-TM-X-1800] c31 N69-27260
Venting of liquid hydrogen tankage
[NASA-TN-D-5263] c33 N69-27620
Quiescent-air performance of a truncated turbojet plug nozzle with shroud and plug base flows from a common source
[NASA-TM-X-1807] c26 N69-27840
Cavitation performance of 80.6 deg helical inducer in liquid hydrogen
[NASA-TM-X-1808] c09 N69-27841
The liquid-vapor interface during outflow in weightlessness
[NASA-TM-X-1811] c12 N69-27954
Experiments on the stability of water lubricated herringbone-groove journal bearings. 2 - Effects of configuration and groove to ridge clearance ratio
[NASA-TN-D-5264] c15 N69-27955
Experiments on rotating externally pressurized air journal bearings. Part 2 - Attitude angle and air flow
[NASA-TN-D-5192] c15 N69-27956
Outgassing characteristics of an expoxy-impregnated magnet coil
[NASA-TM-X-1813] c18 N69-28203
The fuel-emitter separation problem in externally fueled thermionic diodes
[NASA-TM-X-1812] c22 N69-28212
Film boiling from submerged spheres
[NASA-TN-D-5124] c33 N69-28318
A procedure for furnace brazing butt joints in tungsten-uranium dioxide cermet cylinders at 3000 deg C
[NASA-TM-X-1815] c15 N69-28862
Effect of temperature and pressure on cavitation damage to a cobalt base alloy in sodium
[NASA-TN-D-5273] c17 N69-28863
Critical-speed analysis of rigid rotors on flexible foundations
[NASA-TN-D-4858] c32 N69-29159
Method for prediction of pump cavitation performance for various liquids, liquid temperatures, and rotative speeds
[NASA-TN-D-5292] c15 N69-29165
Thermal electromotive force change for 87Pt13Rh/Pt thermocouples in 1530 K, 10 to the minus 8 torr environment for 3700 hours
[NASA-TN-D-5287] c14 N69-29196
Steady-state stress relaxation analysis of turbine blade cooling designs
[NASA-TN-D-5282] c28 N69-29321

Empirical observations on the sensitivity of hot cathode ionization type vacuum gages
[NASA-TN-D-5285] c14 N69-29331
Application of a double-dead-time model describing chugging to liquid propellant rocket engines having multielement injectors
[NASA-TN-D-5303] c28 N69-29405
Adhesion of gold to various planes of copper studied with LEED
[NASA-TN-D-5290] c26 N69-29407
Investigation of two-phase hydrogen flow in pump inlet line
[NASA-TN-D-5258] c15 N69-29476
Analysis of two dimensional inviscid model of jet impingement under vertical-takeoff airplane
[NASA-TN-D-5288] c01 N69-29479
A thermocouple technique for measuring hot-gas-side wall temperatures in rocket engines
[NASA-TN-D-5291] c14 N69-29553
Effects of thermal-shock cycling on thin-film cadmium sulfide solar cells
[NASA-TM-X-1819] c03 N69-29555
Rare earth fluorides and oxides - An exploratory study of their use as solid lubricants at temperatures to 1800 deg F /1000 deg C/
[NASA-TN-D-5301] c15 N69-29568
Random phase approximation for the anisotropic Heisenberg ferromagnet
[NASA-TN-D-5286] c26 N69-29588
Neutronic comparison of beryllium oxide and molybdenum for movable reflector control of a fast-spectrum reactor
[NASA-TM-X-1822] c22 N69-29593
Atlas-Agena performance for the 1967 Mariner Venus mission
[NASA-TM-X-1826] c31 N69-29594
Three-phase heat transfer - Transient condensing with freezing on a nonisothermal inclined plane
[NASA-TN-D-5289] c33 N69-29598
Use of ''FASTER'' code for significantly reducing ducted reactor shield computation time
[NASA-TM-X-1828] c22 N69-29671
The calculation of elevated temperature cyclic life considering low cycle fatigue and creep
[NASA-TN-D-5317] c32 N69-29672
Preliminary performance characteristics of a gas-bearing turboalternator
[NASA-TM-X-1820] c03 N69-29707
Analysis of dynamic jettison hinge forces for Centaur nose fairing
[NASA-TM-X-1821] c32 N69-29734
Spectral and operational characteristics of a high-intensity carbon arc solar simulator
[NASA-TM-X-1825] c11 N69-29737
Interplanetary probe missions with solar- electric propulsion systems
[NASA-TN-D-5293] c30 N69-29738
Energy transfer and ion cost in a hydrogen plasma
[NASA-TN-D-5319] c25 N69-29905
Dynamic performance analysis of a fuel-control valve for use in airbreathing engine research
[NASA-TN-D-5331] c03 N69-29977
Characteristic design study of mixed- compression two-dimensional inlets with low-angle cowls for the Mach number range 2.70 to 1.80
[NASA-TN-D-5330] c01 N69-30060
A fabrication process for glass coated electron-bombardment ion thruster grids
[NASA-TN-D-5320] c15 N69-30062
Test of sodium boiling in a single tube-in- shell heat exchanger over the range 1720 deg to 1980 deg F /1211 to 1355 K/
[NASA-TN-D-5323] c33 N69-30064
Effect of fluid temperature on the cavitation performance of a high hub-tip ratio axial flow pump in water to 250 degrees F /394 K/
[NASA-TN-D-5318] c15 N69-30069
An analog computer study of the low-frequency flow dynamics of two nuclear rocket cold-flow engine systems
[NASA-TN-D-5312] c22 N69-30070
Growth of 2H silicon carbide crystals
[NASA-TN-D-5313] c26 N69-30072
A comparison of rotational collision numbers obtained from different definitions
[NASA-TN-D-5321] c24 N69-30073
Excited states of xenon-130 populated by beta decay
[NASA-TN-D-5329] c24 N69-30074
Thermal radiation heat transfer. Volume 2 - Radiation exchange between surfaces and in exclosures
[NASA-SP-164-VOL-2] c33 N69-30317
Performance of two models of commercial unbonded strain-gage-type absolute pressure transducer at 260 deg C
[NASA-TN-D-5327] c14 N69-30506
Design of injectors and ablative thrust chambers for a flox-propane rocket engine with a 1.2-inch throat diameter
[NASA-TN-D-5324] c28 N69-30560
Refractive index - Particle density nonequilibrium cesium plasmas probed by a multifrequency helium-neon laser
[NASA-TN-D-5328] c25 N69-30622
Experimental lateral bending dynamics of the Atlas-Centaur-Surveyor launch vehicle
[NASA-TM-X-1837] c31 N69-30631
Two-dimensional cascade investigation of a turbine tandem blade design
[NASA-TM-X-1836] c01 N69-30632
A study of helium penetration and spreading in a Mach 2 airstream using a delta wing injector
[NASA-TN-D-5322] c01 N69-30878
Analysis of the dynamic response of liquid jet atomization to acoustic oscillations
[NASA-TN-D-5339] c28 N69-30980
A semiempirical fracture analysis for small surface cracks
[NASA-TN-D-5340] c32 N69-31056
Corrosion in a cobalt alloy, two-phase mercury loop
[NASA-TN-D-5326] c17 N69-31065
Tensile and cyclic fatigue properties of graphite filament-wound pressure vessels at ambient and cryogenic temperatures
[NASA-TN-D-5354] c32 N69-31300
Dynamic response of a Mach 2.5 axisymmetric inlet with engine or cold pipe and utilizing 60 percent supersonic internal area contraction
[NASA-TN-D-5338] c28 N69-31336
Analytical investigation of two-dimensional loss characteristics of supersonic turbine stator blades
[NASA-TM-X-1823] c01 N69-31360
Effects of nickel on the performance of N on P silicon soar cells
[NASA-TN-D-5366] c03 N69-31844
The use of energy thickness in prediction of throat heat transfer in rocket nozzle
[NASA-TN-D-5356] c33 N69-31869
NERVA control drum actuator irradiation test program
[NASA-TN-D-5347] c22 N69-31870
A nickel base alloy, WAZ-20, with improved strength in the 2000 deg to 2200 deg F range
[NASA-TN-D-5352] c17 N69-31873
Dynamic strain aging in carbide strengthened molybdenum alloys
[NASA-TN-D-5355] c17 N69-31883
Friction and contact resistance during sliding in vacuum of some-low-resistivity metals lubricated with sputtered molybdenum disulfide films
[NASA-TN-D-5349] c15 N69-31884
Summary of recent gaseous reactor fluid mechanics experiments
[NASA-TM-X-1847] c12 N69-31888
Burst testing of tungsten tubing at temperatures from 3000 deg to 4500 deg F /1650 deg to 2480 deg C/
[NASA-TM-X-1843] c17 N69-31889
Solar absorptances and spectral reflectances of 12 metals for temperatures ranging from 300 to 500 K
[NASA-TN-D-5353] c17 N69-31895
Mechanical properties of arc-melted tungsten-rhenium-hafnium-carbon alloys
[NASA-TN-D-5348] c17 N69-31977
A LEED study of the adhesion of gold to copper and copper-aluminum alloys
[NASA-TN-D-5351] c23 N69-31984
Helical duct geometry routine for the shielding computer program ''FASTER''
[NASA-TM-X-1838] c22 N69-31986
A flow experiment on a curved-porous-wall gas-core reactor geometry
[NASA-TM-X-1852] c12 N69-32217

Causes, measurement, and elimination of fuel element fission product leakage at the NASA Plum Brook reactor
[NASA-TN-D-5374] c22 N69-32317
Gaseous hydrogen requirements for the discharge of liquid hydrogen from a 1.52 meter /5 ft/ diameter spherical tank
[NASA-TN-D-5336] c28 N69-32318
Design of experiments as doubly telescoping sequences of blocks with application to a nuclear reactor experiment
[NASA-TN-D-5369] c19 N69-32319
Effect of injection element radial distribution and chamber geometry on acoustic mode instability in a hydrogen oxygen rocket
[NASA-TN-D-5375] c33 N69-32340
Stability of two-fluid wheel flows with an imposed uniform axial magnetic field
[NASA-TN-D-5372] c12 N69-32377
Stability and performance characteristics of several hydrazine and nitrogen tetroxide hot gas generators for large scale supersonic combustor testing
[NASA-TM-X-1845] c33 N69-32468
Tagged arithmetic
[NASA-TN-D-5370] c08 N69-32556
Design studies on the effect of orientation, lunation, and location of the performance of lunar radiators
[NASA-TM-X-1846] c33 N69-32683
Implementation and structure of COMPUTE, a time-sharing calculator program
[NASA-TN-D-5350] c08 N69-32685
Significant experiences of the NASA Plum Brook reactor facility
[NASA-TM-X-1853] c22 N69-33132
Gaseous-hydrogen pressurant requirements for the discharge of liquid hydrogen from a 3.96 meter /13 ft/ diameter spherical tank
[NASA-TN-D-5387] c28 N69-33211
Experiments on the steady state characteristics of herringbone-grooved air-lubricated journal bearings
[NASA-TN-D-5386] c15 N69-33258
Cavitation performance of line-mounted 80.6 deg helical inducer in hydrogen
[NASA-TM-X-1854] c12 N69-33261
Thermionic fuel irradiation experiment description
[NASA-TM-X-1858] c22 N69-33273
Computer program for viscous, isothermal compressible flow across a sealing dam with small tilt angle
[NASA-TN-D-5373] c15 N69-33281
Oxidation and thermal fatigue cracking of nickel- and cobalt-base alloys in a high velocity gas stream
[NASA-TN-D-5376] c17 N69-33307
Analysis of total-pressure loss and airflow distribution for annular gas turbine combustors
[NASA-TN-D-5385] c33 N69-33314
Simplified analytical model for use in design of pump-inlet accumulators for the prevention of liquid-rocket longitudinal oscillation /POGO/
[NASA-TN-D-5394] c28 N69-33319
Failure criteria for filamentary composites
[NASA-TN-D-5367] c18 N69-33321
Experimental and theoretical turbulent boundary layer development in a Mach 4.4 water-cooled conical nozzle
[NASA-TN-D-5377] c12 N69-33353
Development of improved throat inserts for ablative rocket engines
[NASA-TN-D-4964] c32 N69-33481
Clean room technology
[NASA-SP-5074] c05 N69-33775
Experimental study of low-speed operating characteristics of a liquid hydrogen centrifugal turbopump
[NASA-TM-X-1861] c28 N69-33806
Surface tension, viscosity, and density measurements of two fluorocarbon solvents, FC-43 and FC-78
[NASA-TM-X-1862] c18 N69-34134
Analysis of dynamic performance limitations of fast response /150 to 200 Hz/ electrohydraulic servos
[NASA-TN-D-5388] c03 N69-34652
Propulsion systems for manned exploration of the solar system
[NASA-TM-X-1864] c28 N69-34674
Solid-propellant combustion instability and the role of velocity coupling
[NASA-TN-D-5395] c33 N69-34892
The influence of crack length and thickness in plane strain fracture toughness tests
[NASA-TM-X-1860] c17 N69-34916
Evaluation of a volume-ratio system for vacuum gage calibration from 10 to the minus 8 power to 10 torr
[NASA-TN-D-5406] c14 N69-35265
Experimental measurements of expanding storable-propellant products simulated by combustion of gaseous reactants
[NASA-TN-D-5404] c33 N69-35506
A computer plotting description of ion-molecule collisions with long-lived capture complexes
[NASA-TN-D-5407] c24 N69-35508
Performance characteristics of a 14.3-kilovolt-ampere modified Lundell alternator for 1200 hertz Brayton-cycle space-power system
[NASA-TN-D-5405] c03 N69-35537
FORTRAN program for machine computation of group tables of finite groups
[NASA-TN-D-5402] c08 N69-35569
Cryogenic fracture properties of thin AISI 301 60-percent cold-reduced sheet at various angles to the rolling direction
[NASA-TN-D-5413] c17 N69-35688
A comparison of experimental and calculated helium requirements for the pressurization of a Centaur liquid hydrogen tank
[NASA-TM-X-1870] c28 N69-35712
The potential of nuclear power for high-speed ocean-going air-cushion vehicles
[NASA-TM-X-1871] c22 N69-35723
Analytical and experimental studies of MHD generator cathodes emitting in a ''spot'' mode
[NASA-TN-D-5414] c25 N69-35732
The improvement of an electronic power supply for greater reliability in aerospace use
[NASA-TM-X-1875] c03 N69-35763
Recent developments in chromium and chromium alloys
[NASA-TM-X-1867] c17 N69-35764
Torque and leakage rates of various lubricated lip seal designs at a peripheral velocity of 120 feet per second
[NASA-TN-D-5411] c15 N69-35769
Lubricants for inerted lubrication systems in engines for advanced aircraft
[NASA-TN-D-5420] c15 N69-35788
Investigation of isothermal, compressible flow across a rotating sealing dam. 1 - Analysis
[NASA-TN-D-5344] c15 N69-35799
Comparison of tungsten and depleted uranium in minimum-weight, layered shields for a space power reactor
[NASA-TM-X-1874] c22 N69-35817
Natural frequency of liquids in annular cylinders under low gravitational conditions
[NASA-TN-D-5412] c12 N69-35842
Design, development, and testing of a 1000 pound /4450 N/ thrust FLOX-propane ablative rocket engine
[NASA-TM-X-1873] c28 N69-35847
Evaluation of the COHORT 2 Monte Carlo shielding code - Gamma ray transport using source direction biasing
[NASA-TM-X-1877] c22 N69-35848
Statistical analysis of high-temperature creep-rate data for alloys of tantalum, molybdenum, and columbium
[NASA-TN-D-5424] c17 N69-36653
Heat-transfer characteristics of a water-to-cryogenic-hydrogen heat exchanger
[NASA-TN-D-5429] c33 N69-36701
Transistor performance in intense magnetic fields
[NASA-TN-D-5428] c09 N69-36710
Reflector-based poison-drum control on equal-size reactor cores fueled with uranium-233 and with uranium-235
[NASA-TM-X-1883] c22 N69-36756
Parametric study of large nuclear surface effects machines
[NASA-TM-X-1888] c22 N69-36757
Effects of simulated space environment on full, half, and quarter-size cadmium sulfide thin-film solar cells

[NASA-TM-X-1884] c03 N69-36758
Comparison of predicted nozzle coolant side heat transfer and fluid flow with experimental values from Phoebus-2A nuclear tests
[NASA-TM-X-1881] c33 N69-36806
An electron bombardment thruster operated with a cusped magnetic field
[NASA-TN-D-5448] c28 N69-36844
A computer program for composing compressor blading from simulated circular-arc elements on conical surfaces
[NASA-TN-D-5437] c28 N69-36882
Multigroup calculations of resonance neutron capture in a thick slab of depleted uranium
[NASA-TM-X-1878] c24 N69-36901
Hardware /or software/ provisions for multiple precision floating-point arithmetic
[NASA-TM-X-1885] c08 N69-36918
Molecular vibration spectra from field emission energy distributions
[NASA-TN-D-5423] c24 N69-36924
Quadrature variations in discrete-ordinates calculations
[NASA-TM-X-1887] c20 N69-36976
Multistage compressor simulation applied to the prediction of axial flow instabilities
[NASA-TM-X-1880] c28 N69-36998
Phenomenological theory of loudness
[NASA-TN-D-5422] c23 N69-37028
A simple method for determination of fission gases trapped in irradiated fuel forms
[NASA-TM-X-1893] c22 N69-37225
Effect of angle of attack and injection pressure on jet penetration and spreading from a delta wing in supersonic flow
[NASA-TM-X-1889] c12 N69-37271
Absorption of hydrogen by palladium and electrical resistivity up to hydrogen- palladium atom ratios of 0.97
[NASA-TN-D-5441] c26 N69-37272
Flight performance of Atlas-Agena launch vehicles in support of the Lunar Orbiter missions 3, 4, and 5
[NASA-TM-X-1859] c31 N69-37281
Effect of nuclear radiation at cryogenic temperatures on the tensile properties of titanium and titanium-base alloys
[NASA-TN-D-5442] c17 N69-37436
FORTRAN program for calculating transonic velocities on a blade-to-blade stream surface of a turbomachine
[NASA-TN-D-5427] c01 N69-37521
Tabulations of configuration factors between any two spheres and their parts
[NASA-SP-3050] c30 N69-37777
Diffusion lengths in silicon obtained by an X-ray method
[NASA-TM-X-1894] c03 N69-37827
Flight performance of the Atlas-Agena launch vehicle in support of the Applications Technology Satellite ATS-3
[NASA-TM-X-1879] c31 N69-37840
Effect of electrothermal instabilities on Brayton- and Rankine-cycle magnetohydrodynamic space-power generation systems
[NASA-TN-D-5461] c03 N69-37883
Thermodynamic and transport properties of air and the combustion products of natural gas and of ASTM-A-1 fuel with air
[NASA-TN-D-5452] c33 N69-37936
Injection of an inviscid separated jet at an oblique angle to a moving stream
[NASA-TN-D-5460] c12 N69-37965
Discharge coefficients for thick plate orifices with approach flow perpendicular and inclined to the orifice axis
[NASA-TN-D-5467] c12 N69-38012
Motion of single bubbles under low gravitational conditions
[NASA-TN-D-5462] c12 N69-38032
Dispersion-strengthened nickel produced from ultrafine comminuted powders
[NASA-TN-D-5421] c17 N69-38074
Experimental investigation of dynamic distortion in a Mach 2.50 inlet with 60 percent internal contraction and its effect on turbojet stall margin
[NASA-TM-X-1842] c28 N69-38599
Cavitation damage and the effect of fluid temperature on the performance of an axial- flow pump in liquid sodium
[NASA-TN-D-5484] c15 N69-38641
A device for producing both hard copy alphanumeric listings and digital data plots
[NASA-TN-D-5474] c08 N69-38654
An improved delayed neutron fission product monitor
[NASA-TM-X-1886] c14 N69-38766
Electrical characteristics of a large area thin film CdS solar cell
[NASA-TM-X-1899] c03 N69-38767
Survey of electron-cesium collision probabilities - Momentum transfer collisions
[NASA-TM-X-1897] c24 N69-38773
A transformer of closely spaced pulsed wave forms having a nonzero average value
[NASA-TN-D-5473] c09 N69-38776
An evaluation of three oxidation-resistant alloy claddings for IN 100 and WI 52 superalloys
[NASA-TN-D-5483] c17 N69-38794
Dislocation structures in single crystal tungsten and tungsten alloys
[NASA-TN-D-5493] c17 N69-39182
Calculated interaction energy and dipole moment in collisions of two hydrogen molecules
[NASA-TN-D-5486] c24 N69-39184
Airbreathing propulsion system testing using sweep frequency techniques
[NASA-TN-D-5485] c28 N69-39185
Analysis and experiments with a pulsed neutron source for an unreflected solution reactor up to 50 dollars shutdown
[NASA-TN-D-5487] c22 N69-39186
Interim absorption coefficients and opacities for hydrogen plasma at high pressure
[NASA-TM-X-1902] c24 N69-39187
Preliminary investigation of a single-shaft Brayton rotating unit designed for a 2 to 10-kilowatt space power generation system
[NASA-TM-X-1869] c03 N69-39238
Magnetothermal oscillations in pressure- annealed, pyrolytic graphite
[NASA-TN-D-5488] c26 N69-39239
A photographic study of a bromine jet in a coaxial airstream with honeycombs at the injection plane
[NASA-TM-X-1900] c12 N69-39303
Cold air investigation of a turbine with stator-blade trailing-edge coolant ejection. Part 1 - Overall stator performance
[NASA-TM-X-1901] c03 N69-39335
Calculation of thermal-fatigue life based on accumulated creep damage
[NASA-TN-D-5489] c32 N69-39393
Injection of an attached inviscid jet at an oblique angle to a moving stream
[NASA-TN-D-5501] c12 N69-39916
Solubilities of molybdenum and tungsten in liquid potassium
[NASA-TN-D-5504] c17 N69-40053
Ionic conductivity of lanthanum fluoride
[NASA-TN-D-5505] c26 N69-40056
Performance of radiation-cooled magnetoplasmadynamic arc thrusters
[NASA-TM-X-1908] c28 N69-40058
Flow-direction measurement with fixed-position probes
[NASA-TM-X-1904] c14 N69-40059
A steam cycle for aircraft nuclear propulsion
[NASA-TM-X-1907] c22 N69-40060
Characteristics of a 2.17-megawatt fast- spectrum reactor concept using an axially moving reflector control system
[NASA-TM-X-1911] c22 N69-40061
Effects of three outlet-annulus area blockage configurations on the performance of a 20-inch /50.8-CM/ axial-flow compressor rotor
[NASA-TN-D-5506] c28 N69-40078
Combustion stability of single swirl-can combustor modules using ASTM-A1 liquid fuel
[NASA-TN-D-5436] c28 N69-40080
Application of modern network theory to analysis of complex systems
[NASA-TN-D-5511] c19 N69-40088
Electrochemical behavior of the aluminum electrode in molten salt electrolytes
[NASA-TN-D-5503] c06 N69-40240

Hot-salt stress-corrosion of a titanium alloy under a simulated turbine-engine compressor environment
[NASA-TN-D-5510] c17 N69-40242
Helium pressurization systems for liquid- methane fuel in supersonic transports
[NASA-TN-D-5519] c28 N69-40329
Transmission effects on plastic films irradiated with ultraviolet light, electrons, and protons
[NASA-TM-X-1905] c18 N69-40339
Penetration model explanation for turbulent forced-convection heat transfer observed in near-critical fluids
[NASA-TN-D-5522] c33 N69-40437
Motor-starting characteristics of two inductor alternators
[NASA-TM-X-1912] c03 N69-40440
Conceptual design and structural model of a 560-watt thin-film solar-cell array
[NASA-TM-X-1913] c03 N69-40787
Convective heat-transfer coefficients from a solution of the conduction equation for a wall separating two fluids, one having an oscillating temperature
[NASA-TN-D-5520] c33 N69-40789
Interaction of 42-MeV alpha particles with helium-3
[NASA-TN-D-5530] c24 N69-40979
Speed effects on ball spinning torque
[NASA-TN-D-5527] c15 N69-41210
Analysis of the mixing region for a two-dimensional jet injected at an angle to a moving stream
[NASA-TN-D-5531] c12 N69-41213

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION. MANNED SPACECRAFT CENTER, HOUSTON, TEX.

Optimum design of communication links with noisy phase reference
[NASA-TN-D-4895] c07 N69-13155
Postflight optical evaluation of the right- hand and left-hand windows of Gemini missions 4, 5, 6, and 7
[NASA-TN-D-4916] c31 N69-13232
Lunar surface transmission loss for the Apollo astronaut
[NASA-TN-D-4915] c07 N69-13301
The stagnation-point boundary layer with suction and injection in equilibrium dissociating air
[NASA-TN-D-3889] c12 N69-14314
A computer program for calculating external thermal-radiation heat loads and temperatures of spacecraft orbiting the planets or the moon
[NASA-TR-R-278] c30 N69-14428
A mathematical model for calculating the flight dynamics of a general parachute-payload system
[NASA-TN-D-4859] c02 N69-14504
Matched conic solutions to round trip interplanetary trajectory problems that insure state-vector continuity at all boundaries
[NASA-TN-D-4942] c30 N69-14861
Planetary probe guidance accuracy influence factors for conjunction-class missions
[NASA-TN-D-4852] c21 N69-16503
Experimental verification of scale factors for parawing opening characteristics with dimensional ratios from 1/1.3 to 1/3
[NASA-TN-D-5071] c02 N69-19950
The relationship between optical distortion and binocular depth perception

Evaluation of the Goddard research and engineering management exercise simulation
[NASA-CR-1275] c34 N69-18057
UTAH UNIV., SALT LAKE CITY.
Theoretical comparison of beads, wires, and films as rocketsonde temperature sensors in the mesosphere
[NASA-CR-1286] c13 N69-18126

V

VARIAN ASSOCIATES, SAN CARLOS, CALIF.
Solubility and diffusion of oxygen in tantalum
[NASA-CR-1276] c17 N69-19886
VIRGINIA UNIV., CHARLOTTESVILLE.
The thin film iris
[NASA-CR-1364] c26 N69-28096
Rigid rotor dynamics
[NASA-CR-1391] c15 N69-36349

W

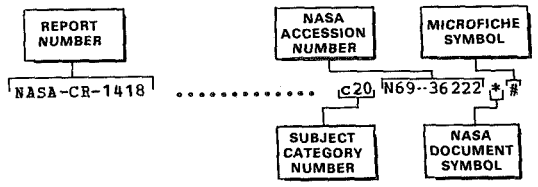
WASHINGTON UNIV., SEATTLE.
Photoviscoelastic model testing
[NASA-CR-1289] c32 N69-17770
WEBB ASSOCIATES, MALIBU, CALIF.
Preliminary evaluation test of the Langley cardiovascular conditioning suit concept
[NASA-CR-1206] c05 N69-13202
WESTINGHOUSE ELECTRIC CORP., LIMA, OHIO.
High-temperature capacitor feasibility
[NASA-CR-1213] c18 N69-14400
Inverter-converter parallel operation
[NASA-CR-1224] c03 N69-16379
Evaluation of magnetic materials for static inverters and converters
[NASA-CR-1226] c03 N69-17765
Inverter-converter automatic paralleling and protection
[NASA-CR-1225] c10 N69-19003
WESTINGHOUSE ELECTRIC CORP., PITTSBURGH, PA.
Solid electrolyte system for oxygen regeneration
[NASA-CR-1359] c05 N69-28099
WESTON INSTRUMENTS, INC., COLLEGE PARK, MD.
Degradation of multiplier phototubes exposed to spatial radiations
[NASA-CR-1304] c14 N69-20777
WHITTAKER CORP., SAN DIEGO, CALIF.
Electrochemical characterization of nonaqueous systems for secondary battery application
[NASA-CR-1434] c03 N69-36829
WICHITA STATE UNIV., KANS.
Some equilibrium and free vibration problems associated with centrifugally stabilized disk and shell structures
[NASA-CR-1178] c32 N69-14477
WOLF RESEARCH AND DEVELOPMENT CORP., BLADENSBURG, MD.
A survey of current debugging concepts
[NASA-CR-1397] c08 N69-35613
WYLE LABS., INC., HUNTSVILLE, ALA.
Theoretical studies of compressor noise
[NASA-CR-1287] c28 N69-21476

REPORT/ACCESSION NUMBER INDEX

NASA SCIENTIFIC AND TECHNICAL REPORTS AND PUBLICATIONS FOR 1969

A Selected Listing

Typical Report/Accession Number Index Listing



Listings in this index are arranged alphanumerically by report number. The subject category number indicates the subject category in the abstract section in which the citation is located. The accession number denotes the number by which the citation is identified within the subject category. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

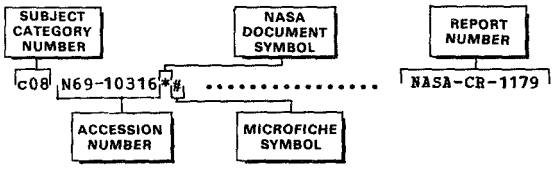
ACCESSION/REPORT NUMBER INDEX

NASA SCIENTIFIC AND TECHNICAL REPORTS AND PUBLICATIONS FOR 1969

A Selected Listing

Typical Accession/Report Number Index Listing



Listings in this index are arranged numerically by IAA and NASA accession numbers. The subject category number indicates the subject category in the abstract section in which the citation is located. The accession number denotes the number by which the citation is identified within the subject category. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche. The report numbers are the identification numbers that have been assigned to the item by the issuing body or other agency.

PUBLIC COLLECTIONS OF NASA DOCUMENTS

DOMESTIC

NASA deposits its technical documents and bibliographic tools in eleven Federal Regional Technical Report Centers located in the organizations listed below. Each center is prepared to furnish the public such services as reference assistance, interlibrary loans, photocopy service, and assistance in obtaining copies of NASA documents for retention.

CALIFORNIA
University of California, Berkeley

COLORADO
University of Colorado, Boulder

DISTRICT OF COLUMBIA
Library of Congress

GEORGIA
Georgia Institute of Technology, Atlanta

ILLINOIS
The John Crerar Library, Chicago

MASSACHUSETTS
Massachusetts Institute of Technology, Cambridge

MISSOURI
Linda Hall Library, Kansas City

NEW YORK
Columbia University, New York

PENNSYLVANIA
Carnegie Library of Pittsburgh

TEXAS
Southern Methodist University, Dallas

WASHINGTON
University of Washington, Seattle

NASA publications (those indicated by an "*" following the accession number) are also received by the following public and free libraries:

CALIFORNIA
Los Angeles Public Library
San Diego Public Library

COLORADO
Denver Public Library

CONNECTICUT
Hartford Public Library

DELAWARE
Wilmington Institute Free Library, Wilmington

MARYLAND
Enoch Pratt Free Library, Baltimore

MASSACHUSETTS
Boston Public Library

MICHIGAN
Detroit Public Library

MINNESOTA
Minneapolis Public Library
James Jerome Hill Reference Library, St. Paul

MISSOURI
Kansas City Public Library
St. Louis Public Library

NEW JERSEY
Trenton Public Library

NEW YORK
Brooklyn Public Library
Buffalo and Erie County Public Library
Rochester Public Library
New York Public Library

OHIO
Akron Public Library
Cincinnati Public Library
Cleveland Public Library
Dayton Public Library
Toledo Public Library

OKLAHOMA
Oklahoma County Libraries, Oklahoma City

TENNESSEE
Cossitt-Goodwin Libraries, Memphis

TEXAS
Dallas Public Library
Fort Worth Public Library

WASHINGTON
Seattle Public Library

WISCONSIN
Milwaukee Public Library

An extensive collection of NASA and NASA-sponsored documents and aerospace publications available to the public for reference purposes is maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 750 Third Avenue, New York, New York, 10017.

EUROPEAN

An extensive collection of NASA and NASA-sponsored publications is maintained by the National Lending Library for Science and Technology, Boston Spa, Yorkshire, England. By virtue of arrangements other than with NASA, the National Lending Library also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols "#" and "*", from: ESRO/ELDO Space Documentation Service, European Space Research Organization, 114, av de Neuilly, 92-Neuilly-sur-Seine, France.

SPACE ADMINISTRATION

POSTMASTER: If Undeliverable (Section 158 Postal Manual) Do Not Return

"The aeronautical and space activities of the United States shall be conducted so as to contribute . . . to the expansion of human knowledge of phenomena in the atmosphere and space. The Administration shall provide for the widest practicable and appropriate dissemination of information concerning its activities and the results thereof."

—NATIONAL AERONAUTICS AND SPACE ACT OF 1958

NASA SCIENTIFIC AND TECHNICAL PUBLICATIONS

TECHNICAL REPORTS: Scientific and technical information considered important, complete, and a lasting contribution to existing knowledge.

TECHNICAL NOTES: Information less broad in scope but nevertheless of importance as a contribution to existing knowledge.

TECHNICAL MEMORANDUMS: Information receiving limited distribution because of preliminary data, security classification, or other reasons.

CONTRACTOR REPORTS: Scientific and technical information generated under a NASA contract or grant and considered an important contribution to existing knowledge.

TECHNICAL TRANSLATIONS: Information published in a foreign language considered to merit NASA distribution in English.

SPECIAL PUBLICATIONS: Information derived from or of value to NASA activities. Publications include conference proceedings, monographs, data compilations, handbooks, sourcebooks, and special bibliographies.

TECHNOLOGY UTILIZATION PUBLICATIONS: Information on technology used by NASA that may be of particular interest in commercial and other non-aerospace applications. Publications include Tech Briefs, Technology Utilization Reports, and Technology Surveys.

Details on the availability of these publications may be obtained from:
