Standard Form 85P December 1990 U.S.Office of Personnel Management FPM Chapter 731 Form approved: O.M.B. No. 3206-0191 NSN 7540-01-317-7372 85-1601

# UNITED STATES OF AMERICA

## **AUTHORIZATION FOR RELEASE OF INFORMATION**

Carefully read this authorization to release information about you, then sign and date it in ink.

I Authorize any investigator, special agent, or other duly accredited representative of the U.S. Office of Personnel Management, the Federal Bureau of Investigation, the Department of Defense, and any authorized Federal agency, to obtain any information relating to my activities from schools, residential management agents, employers, criminal justice agencies, retail business establishments, or other sources of information. This information may include, but is not limited to, my academic, residential, achievement, performance, attendance, disciplinary, employment history, and criminal history record information.

I Understand that, for financial or lending institutions, medical institutions, hospitals, health care professionals, and other sources of information, a separate specific release will or may be needed, and I may be contacted for such a release at a later date.

I Authorize custodians of records and sources of information pertaining to me to release such information upon request of the investigator, special agent, or other duly accredited representative of any Federal agency authorized above regardless of any previous agreement to the contrary.

I Understand that the information released by records custodians and sources of information is for official use by the Federal Government only for the purposes provided in this Standard Form 85P, and may be redisclosed by the Government only as authorized by law.

Copies of this authorization that show my signature are as valid as the original release signed by me. This authorization is valid for two (2) years from the date signed.

NASA FORM 523 JAN 91 PREVIOUS EDITIONS ARE OBSOLETE.

### INS'TRUCTIONS

The NASA Defense Purchase Request is to be used by NASA to request the procurement of supplies or services from the Department of Defense. These instructions pertain to preparation and use of the form by NASA activities. Attachments should be prepared in sufficient quantity so that each copy of a request is complete with a copy of every attachment listed therein.

**Block 4:** The original and 5 copies of the purchase request, each complete with all attachments, will be forwarded to the DOD activity shown in this block.

**Block 6b:** Describe the required services or supplies accurately and in sufficient detail to enable the purchasing activity to understand the requirement. When applicable, the particular NASA program and/ or project to which the request or amendment pertains will be indicated. Attachments may be used as required. For items of hardware stocked by DOD, the item identification of the Army, Navy or Air Force and the National Stock Number will be entered if known. When applicable, the specification number, manufacturer's part number and other descriptive data, such as the desired grade, style, type, color, size, rating, etc.

- SHIPPING INSTRUCTIONS: When names and addresses of consignees of all supplies to be delivered are not contained herein, or otherwise furnished, request for the issuance of shipping instructions shall be made to the appropriate NASA originating office not less than 30 days prior to date on which any of the articles is to be ready for shipment. Three copies of shipping documents shall be forwarded to the NASA originating office and each consignee.
- DISPOSITION OF PROPERTY: Include instructions for the disposition of any nonexpendable or other residual property purchased with NASA funds.
- **PRIORITY RATING:** Include applicable priority rating and claimant program identification (Example: Priority Rating DO-A2). In procurement for DX programs, identification will also include the unclassified program name.

**Block 8:** If this request or any part of the supplies or services covered by this request is subject to Section 305 of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2457), NASA FAR Supplement 18-27.373 applies in the same manner as if the procurement was actually conducted by NASA. Therefore, a copy of the appropriate clauses, prescribed by NFS 18-27.373 shall be furnished to the purchasing activity in accordance with FAR 27.304.2.

<u>Block 10:</u> Cite appropriation symbol, cost coding, or any other accounting data to be included in the ensuing documentation.

Security Classification: If the purchase request or any part thereof is classified, DD Form 254, "Contract Security Classification Specification" (FAR 4.403 (c) (1)), or other written notice of security requirements will be prepared.

Changes: All changes that affect the contents of the purchase request must be processed as a purchase request amendment. This includes such changes as a decrease in quantity, increase or decrease in funds, change in the specifications or in the part, stock or drawing numbers, etc. Such changes may be made initially be expeditions means such as telegraph or telephone communication, but each change will be confirmed by a purchase request amendment. The original and 5 copies of purchase request amendments will be forwarded to the DOD recipient of the original purchase request. In preparing an amendment, Blocks 1 through 5 must always be completed. Only those remaining blocks of the form that are applicable to the change or revision of the data in the purchase request or prior amendments thereto need to be filled in. The unused blocks, however, should have "N/C" inserted to reflect no change.

FORMS

53-17

#### INSTRUCTIONS

General - All paragraph references below refer to the current edition of NHB 9501.2, which includes additional instructions for completing NASA Form 533 reports, Copies of the Handbook are available through the NASA Contracting Officer or from the Superintendent of Documents, Government Printing Office, Washington, DC 20401.

Forms - Forms will be obtained by the contractor through the contracting officer. When directed or approved by the contracting officer, other means than the NASA 533 format may be used for transmitting the data required by these instructions; e.g., punched cards, tapes or electronic transmissions.

Security Classification - If the information in the report is classified, appropriate security classification shall be given the report (see par. 107).

Submission - The NASA Form 533M report is due in the office of the addressee not later than 10 operating days following the close of the contractor's monthly accounting period, unless otherwise specified in the contract. For initial reports and other related items of significance, see par. 300, 301 and the contract. The addresses and number of copies to be submitted will be as specified by the contract or an administrative instruction.

Amounts - Report dollar amounts in even thousands and hours in tenths of thousands (e.g., \$32,600 as \$33 or 462 hours as .5).

Form Headings - The form headings shall be completed as follows:

1. To - Enter the full name and address of the NASA field installation and contracting officer or other designated recipient.

2. From - Enter the full name and address of the contractor and, if applicable, the contractor's division performing the contract,

#### Preparation:

1. Description of Contract:

a. Type - Cost-Plus-Fixed-Fee, Cost-Plus-Incentive-Fee, etc.

b. Contract No. and Latest Definitized Amendment No. - Enter complete letter or contract symbol, number, and number of latest definitized amendment.

c. Scope of Work - Enter a brief description of the contract effort, identify the service, project, system or subsystem and, where hardware is concerned, the quantity being procured or proposed for the contract.

d. Authorized Contractor Representative (Signature) and Date - The authorized contractor representative shall sign and date to reflect approval. When such representative is other than the project manager, the project manager shall also sign to signify review of the content. Date shall signify date of approval and signature of report

2. Report for Month Ending and Number of Operating Days - Enter the ending date of the contractor's accounting month and the number of operating days for that accounting month.

3. Contract Value - Enter the total definitized cost (a) and fee (b) of all work to be performed under the contract as of the report date. Include dollar amounts through the latest definitized amendment as noted in 1b above. For all incentive contracts, enter the neootiated target cost and target fee.

4. Fund Limitation - Enter the total funding obligated and the latest corresponding contract amendment number as of the report date.

5. Billing

a. Invoice Amounts Billed - Enter the total amount of invoices billed by the contractor against the contract and the latest invoice number as of the report date.

b. Total Payments Received - Enter the total amount of payments received by the contractor for the contract as of the report date.

6. Reporting Category - Enter the captions of the reporting categories specified in the contract (see par. 301-3).

7. Cost Incurred/Hours Worked - All cost and hour data will be reported by the categories negotiated in the contract (see par, 301-4).

a, Actual During Month - Enter the total actual cost incurred/hours worked for the accounting month being reported.

b. & d. Planned Cost (optional) - Enter the planned (budgeted) cost for the month being reported in column 7b and cumulative to date in column 7d. The planned cost is obtained from the time phased baseline plan which includes the original contract value plus authorized changes. The baseline plan to date consists of the sum of the budgets for all work authorized that is scheduled for completion through the report date. The plan shall include a pro rata share of the budgets for work in process. Identify the baseline plan used by date and revision number at the bottom of the report.

c. Cumulative Actual Cost/Hours to Date - Enter the cumulative actual cost incurred/hours worked as of the report date. Where the cumulative data reported in this column is only for the current "schedule," the report should be annotated to show the total cumulative cost for all previous "schedules."

8. Estimated Cost/Hours to Complete - Enter the current estimates for performing currently authorized work which is included in the most recently executed contract amendment, plus additional authorized work (directions to proceed) for which execution of amendments is pending. The estimates will be used for planning purposes only and will not be binding on either the contractor or NASA,

a, & b. These columns may be used at the option of project management to obtain any desired combination of subsequent month(s), fiscal year(s) and/or balance of fiscal year data. The required data element(s) shall be specified in the contract (see par, 301-5).

c. Enter the cost/hour data for the balance of the contract not including columns 8a and 8b. Where amounts reported in this column exceed one fiscal year, a breakdown by fiscal year may be required.

9. Estimated Final Cost/Hours.

a. Contractor Estimate - Enter the total estimated cost/hours for completion of the contracted effort (this should equal the sum of columns 7c, 8a, 8b and 8c).

b. Contract Value - Enter the distribution of the Contract Value to the reporting categories. The total of this column shall agree with item 3, above. Significant differences between columns 9a and 9b shall be explained in the "Contractor's Remarks." When there are no changes from the prior reports submitted, the data may be omitted if the contractor and the NASA contracting officer jointly agree.

10. Unfilled Orders Outstanding - Enter the total of unfilled orders outstanding as of the report date (see par. 301-6).

11. Contractor's Remarks:

a. Analytical remarks on significant items materially affecting historical or projected cost or performance shall accompany each monthly report (e.g., see item 9b above and par, 304),

b, Include a reconciliation from the original contract value (Original Negotiated Baseline) to the present contract value as reported in item 3. A sample format is set forth in the instructions on the back of NASA Form 533Q and par, 304.

c. The NASA field installation may require changes authorized but not finalized to be further subdivided as follows

- (1) Changes negotiated but not definitized
- (2) Changes pending negotiation
- (3) Changes pending quotation

d. Report new change orders per sample format set forth in the figure below

| Change Order No,    |        |

NASA FAR SUPPLEMENT

#### INSTRUCTIONS

General — All paragraph references below refer to the current edition of NHB 9501.2, which includes additional instructions for completing NASA Form 533 reports. Copies of the Handbook are available through the NASA Contracting Offlice or from the Superintendent of Documents, Government Printing Offlice, Washington, DC 20401.

Forms — Forms will be obtained by the contractor through the contracting officer. When directed or approved by the contracting officer, other means than the NASA 533 format may be used for transmitting the data required by these instructions; e.g., punched cards, topes or electronic transmissions.

Security Classification — If the information in the report is classified, appro-security classification shall be given the report (see par, 107).

Submission — The NASA Form 533P report is due in the office of the addresse on a negotiated date specified in the contract. The addresses and number of copies to be submitted will be as specified by the contract or an administrative instruction.

Amounts - Report dollar amounts in even thousands and hours in tenths of thousands (e.g., \$32,600 as \$33 or 462 hours as .5),

Form Headings - The form headings shall be completed as follows:

1. To - Enter the full name and address of the NASA field installation and contracting officer or other designated recipient.

2. From - Enter the full name and address of the contractor and, if applicable, the contractor's division performing the contract,

Preparation:

1. Description of Contract:

s. Type - Cost-Plus-Fixed-Fee, Cost-Plus-Incentive-Fee, etc.

b. Contract No. and Latest Definitized Amendment No. - Enter complete letter or contract symbol, number, and number of latest definitized any

c. Scope of Work — Enter a brief description of the contract effort, identify the service, project, system or subsystem and, where hardware is concerned, the quantity being procured or proposed for the contract.

d. Authorized Contractor Representative (Signature) and Date — The authorized contractor representative shall sign and date to reflect approval, When such representative is other than the project manager, the project manager shall also sign to signify review of the content. Date shall signify date of approval and signature of report.

Report for Month Ending and Number of Operating Days - Enter the ending date of the contractor's accounting month and the number of operating days for that accounting month.

3. Contract Value – Enter the total definitized cost (a) and fee (b) of all work to be performed under the contract as of the report date. Include dollar amounts through the latest definitized amendment as noted in 1b above. For all incentive contracts, enter the negotiated target cost and target fee.

4. Fund Limitation — Enter the total funding obligated and the latest corresponding contract amendment number as of the report date.

5, Billing:

a. Invoice Amounts Billed — Enter the total amount of invoices billed by the con-tractor against the contract and the latest invoice number as of the report date.

b. Total Payments Received — Enter the total amount of payments received by contractor for the contract as of the report date. the m

6. Reporting Category  $\sim$  Enter the captions of the reporting categories specified in the contract (see par, 303-3),

7. Budgeted Cost for Work - The contractor shall establish a time phased baseline

cost plan for each reporting category by assigning budgets at the lower levels of the WBS.

a. Budgeted Cost for Work Scheduled (BCWS) shall be the sum of the cumulative budgets assigned for all effort scheduled to be completed through the period being reported, include a pro rata share of the budgets for scheduled work in process, iden-tify the baseline plan used by date and revision number at bottom of form.

idgeted Cost for Work Performed (BCWP) shall be the sum of the cumulative budgets assigned for all effort actually completed through the period being reported plus a pro rate share of the budgets assigned to completed portions of work in process.

8. Actual Cost of Work Performed (ACWP) - Report cumulative actual cost for each reporting category as of the report data. The actual cost reported on this report shall agree with the actual cost reported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$33M when both reports are supported on the NASA Form \$34M when \$ required.

Variance — Variances exceeding the criteria (dollar/hour or percentage limits) set forth in the contract shall be explained in the narrative report.

a. Schedule Variance — Enter for each reporting category the differe minus BCWS. A positive variance indicates a favorable position — ahead a negative variance indicates an unfavorable position — bahind schedule. ead of schedule;

b. Cost. Variance — Enter for each reporting category the difference of BCWP minus ACWP. A positive variance indicates a favorable position — an underrun of cost; a negative variance indicates an unfavorable position - an overrun of cost.

10. Contractor's Estimated Final Cost – Enter the current estimates for performing currently authorized work which is included in the most recently executed contract amendment, plus additional authorized work (directions to proceed) for which execu-tion of the security of the secur tion of amendments is pending.

Technical Assessment of Progress — This portion of the report shall reflect the contractor's (technical manager's) evaluation of the schedule and technical status for each reporting category as of the report date.

Schedule and Status 

— The Symbology Table displayed below illustrates the method to be used to reflect schedules and status,

Top Line — Enter the appropriate calendar year.
 Second Line — Enter the first letter of each month.
 Shaded Blocks — Enter the current NASA approved schedule for each reporting category and enter the data approved by the NASA Project Manager at the bottom of the form. Use inverted open triangles to represent beginning and ending

(4) Unshaded Blocks — Enter the contractor's current working schedule, (i) Use an open schedule bar to indicate time span for which effort is planned. Use an open inverted triangle to represent beginning and ending differences.

(ii) The contractor's current working schedule may be the same as or dif-ferent from the NASA approved syldedule, if the work status as of the report date indicates a necressity to revise the current working schedule, show such revision in the next monthly report. (iii) Black in transfer when each milestone is reached. (iv) To report schedulars status, desarrine the length of time planned for the technical achievement to date, Black in the schedule be to that point in time. For our part of the schedule ber to that point.

for the schnical achievement to date. Black in the schedule ber to that point in time. Consider any modifications made in the current working schedule. Note: The percent ratio of the blacked in portion of the schedule ber to its total schedule is not necessarily the same as (1) the schnical setsement-percent complete, or (2) the percent man hours or dollare used to date (e.g., as distimined by the ratio of actuals to the total estimate), (a) the schows to indicate a break in schedule span. (w) Place is number (1, 2, 3, 4, etc.) next to the triangle to indicate number of time scheduled. (wi) Time Now Indicator -- Use a broken vertical line to indicate report date.

440

b. Technical Assessment (% Complete) — Evaluate the progress toward meeting the technical requirement of each reporting category. The contractor's project man-eger or system regineer makes this assument, considering all aspects of progress technical specification, quality, production of hardware, software achievement, etc., and hubjective Bettors, such as complexity of takis, state of the art and level of confi-dence that the objective can be achieved.

12. Contractor's Remarks - Analytical ramarks on significant items materially affect-ing cost or performance are required. See paragraph 304 for more detailed instruc-tions.

#### INSTRUCTIONS

General – All paragraph references below refer to the current adition of NH895012, which includes additional instructions for completing NASA Form 533 reports. Copies of the Handbook are available through the NASA Contracting Offician or from the Superintendent of Documents, Government Printing Office, Washington, DC 20401.

Forms - Forms will be obtained by the contractor through the contracting officer. When directed or approved by the contracting officer, other means than the NASA 533 format may be used for transmitting the data required by these instructions; e.g., punched cards, tapes or electronic transmissions.

Security Classification - H the information in the report is classified, appropriate security classification shall be given the report (see per, 107).

Submission -- The NASA Form 533Q report is due in the office of the addresses on a quarterly frequency (La., calendar quarter or other designated 3-month interval) not later then the 15th day of the month perceding the quarter being projected in columns 8a, b and c. For initial reports and other related items of significance, see per, 300-5, 302 and the contract. The addresses and number of copies to be submitted will be as specified by the contract or an administrative instruction.

Amounts – Report dollar amounts in even thousands and hours in tenths of thousands ie.g., 532,600 as 533 or 462 hours as .5).

Form Headings - The form headings shall be completed as follows:

1. To - Enter the full name and address of the NASA field installation and contracting officer or other designated recipient.

2. From - Enter the full name and address of the contractor and, if applicable, the contractor's division performing the contract.

Preparation:

1. Description of Contract:

a. Type - Cost-Plus-Fixed-Fee, Cost-Plus-Incentive-Fee, etc.

b. Contract No, and Latest Definitized Amendment No. — Enter complete letter or contract symbol, number, and number of latest definitized amendment.

c. Scope of Work — Enter a brief description of the contract effort. Identify the service, project, system or subsystem and, where hardware is concerned, the quantity being procured or proposed for the contract.

d. Authorized Contractor Representative (Superver) and Date — The authorized contractor representative shall sign and date to reflect approval. When such representative in other than the project manager, the project manager shall also sign to signify review of the content. Date shall signify date of approval and signature of report.

 Report for Ouarter Beginning — Enter the beginning data of the quarter being projected in columns Ba, b and c and the number of operating days in the quarter.

3. Contract Value — Enter the total definitized cost (a) and fee (b) of all work to be performed under the contract as of the report date. Include dollar amounts through the latest definitized amendment as noted in 1b above. For all incentive contracts, enter the negotiated target cost and target fee.

 Fund Limitation — Entar the total funding obligated and the latest corresponding contract amendment number as of the report date;

5. Billing:

a. Invoice Amounts Billed — Enter the total amount of invoices billed by the contractor against the contract and the latest invoice number as of the report data.

b. Total Payments Received — Enter the total amount of payments received by the contractor for the contract as of the report date.

8. Reporting Category - Enter the captions of the reporting categories specified in the contract (see par. 302-3).

7. Cost Incurred/Hours Worked:

a. Enter the cumulative actual cost incurred/hours worked through the first two months of the quarter preceding the quarter projected in columns 8a, b and c. Where the cumulative data reported in this column is only for the current "schedule," the report should be annotated to show the total cumulative cost for all previous "schedule,"

b. Enter an estimate for the month in which the report lodue (see "Submission" above).

#### c. Enter the sum of columns 7a and b.

8. Estimated Cost/Hours to Complete (columns 8a through i) - Enter the appropriate month, quarter and fiscal year designations in the column headings. Enter the current estimates for performing currently excharge down's which is included in the most recently executed contract amendments is panding. These estimates will be used for planning purposes only and will not be binding on either the contractor or NASA. The sum of columns 8a through 1 will be entered in column 8i. If the totals reported in column 8i, "Balance of Contract," exceed const the ones than one fiscal year, each fiscal year shall be identified and reported separately.

#### 9. Estimated Final Cost/Hours:

 Contractor Estimate — Enter the total estimated cost/hours for completion of the contracted effort for each reporting category. This should equal the sum of columns 7c and 8j.

b. Contract Value — Enter the distribution of the Contract Value to the reporting categories. The total of this column shall agree with item 3, above. Significant differences between columns 9e and 9b shall be explained in the "Contractor's Remarks." When there are no changes from the prior reports submitted, the data may be omitted if the contractor and the NASA contracting officer jointly agree.

10. Estimated Completion Date — Enter the estimated completion date for each studdivision of work if a correlated costschedula activity report is not required. The entry shall not serve as a notice to NASA of late delivery or as acquiescence in such late delivery by NASA.

 Unfilled Orders Outstanding – Enter the total of unfilled orders outstanding at of the report data (see par, 302-6).

12. Contractor's Remarks — The harrative report submitted with the quarterly cost projection report shall normally be limited to those items materially affecting projected cost or performance which have not been addressed in the preceding monthly narrative reports (see per, 304).

 Explain any significant items affecting cost, e.g., technical and schedule problems, changes in plans, incurred overAunder runs, etc.

b. Include a reconciliation from the original contract value (Original Negotiated Baseline) to the present contract value as reported in Item 3. A sample format is set forth in Figure A below.

c. The NASA field installation may require changes authorized but not finalized to be further subdivided as follows:

- (1) Changes negotiated but not definitized
- (2) Changes pending negotiation
- (3) Changes pending quotation

d. Report new change orders per sample format set forth in Figure B below.

| Original Contract Value                 | \$ | New Change Orders I | dentified to Subdivi | ision of Work |              |
|-----------------------------------------|----|---------------------|----------------------|---------------|--------------|

NASA FORM 667 AUG 92 PREVIOUS EDITIONS ARE OBSOLETE.

Public reporting burden for this co mation is estimated to average 0.25 hours per response. Send comments regarding this burden estimate or any other aspect of this collection of inf ection of inf reducing this burden, to NASA Headquarters, Procurement Systems Division (Code HM), Washington, DC 20546; and to the Office of Management and Budget, Paperwork, Reduction Project (2700-0004), Washington, DC 20503

#### INSTRUCTIONS-GENERAL AND SPECIFIC

A. This report form is for use by NASA prime contractors and first-tier subcontractors participating in the NASA subcontracting reporting program. (See Section 18-4.672 of the NASA FAR Supplement.) Parts 1 and II of the form are for use by the prime contractors. Parts I, II, and III are for use by the first-tier subcontractors.

NASA prime contractors will complete and submit Parts I and II of B. the form for each subcontract (as defined in Paragraph E, below), placed by them which exceeds \$25,000 and for each action (modification) in excess of \$25,000 on such subcontract. Modifications to be reported include actions which result in the decommitment of funds as well as commitments.

C. First-tier subcontractors having subcontracts which exceed \$100,000 are required to complete and submit the form in its entirety (Parts I, II, and III) for each subcontract (as defined in Paragraph E, below) placed by them which exceeds \$25,000 and for each action (modification) in excess of \$25,000 on such subcontract. Modifications to be reported include actions which result in the decommitment of funds as well as commitments.

D. For use in reporting on NASA subcontracts, "research and development" means basic and applied research, and design and development of prototypes and processes to (1) pursue a planned search for new knowledge, with or without reference to a specific application, (2) apply existing knowledge in the creation of new products or processes, and (3) apply existing knowledge in the improvement or modification of present products or processes. It excludes subcontracts for the purchase of standard commercial items and services.

The term "subcontract" as used herein means procurement in excess E. The term "subcontract" as used herein means procurement in excess of \$25,000 by the prime contractor or first-tier subcontractor of articles, materials, or services entering into the performance of a specific NASA prime contract. It does not include purchases, regardless of amount, of stock items, materials, or services which cannot be identified with a specific NASA prime contract.

F. NASA prime contractors will provide the number of the NASA prime contract to their first-tier subcontractors for entry on the reports.

6. The report is to be submitted within 10 working days after placement of the subcontract to the National Aeronautics and Space Administration, Office of Procurement, Code HM, Washington, DC 20546.

H. Prime contractors will obtain a supply of the forms from their NASA Contracting Officer. Subcontractors will obtain the forms from the prime contractor.

- Item 1. Enter the NASA prime contract number.
- item 2. Enter name of the prime contractor.
- Hem 3. Enter address (City and State only) of the prime contractor.
- item 4. Enter name of the subcontractor
- ttem 5. Enter address (City and State only) of the subcontractor.
- **Hern 6.** Check applicable box. (For definition of a small business concern, see Section 19.001 of the Federal Acquisition Regulation.)
- Nom 7. Check applicable box. (For definition of a disadvantaged business concern, see Sect. 19.001 of the Federal Acquisition Regulation.)

Nom 8. Enter subcontract or purchase order number specified by the contractor initiating the action.

tem 9. Enter in terms of commitments, to the nearest dollar, the amount of the subcontract, or amount of modification of the subcontract. For modifications resulting in decommitments, the dollar amount should be enclosed in parentheses.

Item 10. Enter the location (City and State only) of the principal plant or place of business where the items will be produced or supplied from stock or where the work will be performed. For construction subcontracts, enter the site of construction.

ttem 11. Enter a brief description of the item to be furnished or the work to be performed under the subcontract. (For example: ADP Equipment.)

item 12. Check applicable box to indicate whether effort involves research and development. (See Instruction D.)

Item 13 through 21. See items 4 through 12.

**Item 22.** Enter the name of the company submitting the report. This should be the name of the prime contractor for reports on first-tier subcontracts; it should be the name of the first-tier subcontractor for reports on second-tier subcontracts.

Item 23. Typed name and signature of company individual submitting the report

Item 24. Enter the phone number of the individual submitting the report.

Item 25. Enter the date of signature.

## FORMS

53-33

#### **REPORTING INSTRUCTIONS**

7. The contracting officer, or his designce, shall forward one copy of this form to the cognizant Financial Management Office, and one copy to the Supply and Equipment Management Office.

8. Additional blank forms may be obtained from the cognizant property administrator.

Item 1, Date Submitted. - Enter date submitted to the property administrator.

Item 2, Reporting Period. - Enter the period being reported (e.g., 7/1/85-6/30/86).

Item 3, Contract No.-Enter the complete contract symbol and number under which the Government property and/or space hard-ware is accountable.

Item 4, Contract Value.-Enter the total estimated cost and fee (or target fee where appropriate) of all work to be performed under the contract as formally amended to the date of the report.

Item 5, Report Status.-Place an "x" in the appropriate box to indicate the status of this report.

Property (Type/Account).-Enter in the appropriate columns (a through f) amounts for each type of property (items 6 through 12, and 14) as defined in the Federal Acquisition Regulation (FAR), Subpart 45.5 and Subpart 18-45.5 of the NFS. Item 15, Space Hardware, shall not be reported unless specifically directed by the cognizant contracting officer (Subsection 18-45.505-14 of the NFS).

Column a, Balance Beginning of Period. – The amounts reported will agree with the amounts reported in column f, Balance End of Period, of the preceding report, except if this is an initial report.

Column b, Additions, Government - Furnished. – Amounts reported shall be the values designated by the Government for Government – Furnished Property (GFP) received during the reporting period. Receipts for GFP shall be detailed in Schedule 1 for each type/ account except Materials and Space Hardware. For incomplete data on transfer documents, refer to Subpart 18-45.71 of the NFS.

Government property administrators should be contacted for assistance in obtaining prices for those items on the list. If unable to obtain prices, the contracting officer should be immediately notified.

Columns c and d. Additions, Contractor - Acquired. - Amounts shall be reported by the appropriate funding classification (Research and Development - R&D, Construction of Facilities - C of F, Space Flight Control and Data Communications - SFCDC or Research and Program Management - R&PM). If additional columns are needed, attach back-up sheet. On multi-funded contracts, the NASA installation shall identify the appropriate funding classification for the contractor. Include all Government-owned property acquired during the reporting period.

Column e, Disposals. - Report book costs of all disposals, including net adjustments for inventory differences, write-offs, sales, donations, and abandonments. Transfers of GFP shall be detailed in Schedule I, Analysis of Government-Furnished Additions and Contractor Disposals, for each type/account *(except Materials and Space Hardware)* showing the total amount transferred to each NASA installation and the total to other Federal agencies. Detailed lists, including shipping document references, shall be provided as required by NASA field installations.

Column f, Balance End of Period. – Report the total of columns a, b, c and d, minus e. These balances shall be maintained pursuant to FAR Subpart 45.5 and Subpart 18-45.5 of the NFS.

Schedule I, Analysis of Government - Furnished Additions and Contractor Disposals. - A detailed analysis of the amounts reported as Government-Furnished Additions (column b) and Contractor Disposals (column e) is required for each property classification (items 6 through 12) by NASA installations and in total for all other Federal agencies. The total amounts reported in item 13 for columns b and e should equal the amounts reported in Government-Furnished Additions and Contractor Disposals, respectively.

Schedule II. Space Hardware Reportable Items. - This schedule shall be submitted only upon the direction of the contracting officer. Once so directed, the contractor shall continue to submit this schedule until termination of the contract or notification from the contracting officer that the reportable item(s) has been deleted from the Annual List of Selected Items of Space Hardware.

Description.-Space Hardware shall be itemized in three categories as follows (see NFS Subpart 18-45.71):

 Completed Space Hardware Systems and Subsystems.— Includes the cost *[actual or estimated]* of such items as aircraft, engines, space vehicles, satellites, spacecraft, and rockets including components provided for prototypes, mock-ups, fit checks, or for such other reasons as may be specified in the contract.

• <u>Completed Components and Spare Parts</u>—Includes the cost (actual or estimated) of deliverable spare parts and components employed as spare parts to be used for the purposes of emergency, replacement, repair, or modification subsequent to the fabrication of Space Hardware. Do not include components utilized by the contractor which are not deliverable as spares and which are included as work in process.

 Work in Process. - Includes the actual or estimated fabrication costs as of the date of the report of undelivered Space Hardware and such associated systems, subsystems, spare parts, and components which are provided or acquired and charged to work in process pending incorporation into an end item. Also include progress payments to firm fixed-price subcontractors for undelivered items.

Quantity.-Enter the total units on hand as of the end of the reporting period, including both Government-furnished and contractoracquired, for each line item listed under completed Space Hardware only (excluding systems and subsystems).

Cost (Net).-Enter the cost of each classification of Governmentfurnished or contractor-acquired Space Hardware (whether fabricated or purchased) applicable to each category of Space Hardware. Unpriced transfer documents received for GFP are to be handled in accordance with instructions above relating to Additions, Government-furnished.

#### INSTRUCTIONS FOR COMPLETION OF PART I BY PROCUREMENT REQUEST INITIATORS

This form must accompany all PR's for obligations to domestic or foreign colleges and universities, including their operationally affiliated nonprofit organizations or foundations (*NFS 18-4.676*). The form is not required with procurements for training of NASA employees; for non-research procurements under \$5,000 made by Purchase Order; or for obligations made during close-out well after the effort is completed.

The initiator completes blocks 1-14 for new awards, and blocks 1-11 for continuations (and blocks 13-14 if there is a change). Part II is completed by the procurement office.

- Block 1 Use complete college or university name to avoid confusion among institutions with similar names.
- Block 2 Ad Hoc Data. Reserved for future use.
- Block 3 The principal investigator is a person proposed by the university who bears the prime responsibility for the overall technical direction of the work.
- Block 12 University named in block 1 must have a medical school if "Yes" is checked. For investigators with multiple departmental appointments, check "Yes" if primary affiliation is with a medical school component.
- Block 13 Almost all of NASA's work in educational institutions is "R" or "D." Only a few types of projects, primarily information dissemination and conferences, fall into "Other Activities Related to Science and Engineering "R&D definitions":

Research is systematic intensive study directed toward the fuller scientific knowledge or understanding of the subject studied, information on the distinction between basic and applied research, including examples, appears in the NASA section of the National Science Board's 10th Annual Report. (An excerpt is available from the Headquarters Procurement Management Division.) To summarize the definitions in the NASA context:

Basic Research is work directed toward an increase in fundamental knowledge, both general and specific, of properties and processes in fields relevant to aeronautical and space activities.

Applied Research is the application of the knowledge gained through basic research to specific problems associated with the conduct of aeronautical and space activities.

Development is systematic use of the knowledge and understanding gained from research, directed toward the production of useful materials, devices, systems, or methods, including design and development of prototypes and processes. It excludes quality control, routine product testing and production.

Block 14 - Location of selected disciplines in fields of science and engineering:

- 11 ASTRONOMY Astrophysics.
- 13 PHYSICS Acoustics; atomic and molecular; condensed matter; elementary particles; optics; plasma.
- 31 ATMOSPHERIC SCIENCES Solar; weather modification; extraterrestrial atmospheres.
- 32 GEOLOGICAL SCIENCES Geophysics; geodesy and gravity; geomagnetism; hydrology; geochemistry; paleomagetism; physical geography and cartography; seismology; soil sciences.
- 33 OCEANOGRAPHY Chemical; geological; physical; marine geophysics.
- 44 CIVIL ENGINEERING Environmental; hydrologic; sanitary; structural; transportation.
- 47 METALLURGY/MATERIALS ENGINEERING Ceramic; mining; textile; welding.
- 49 OTHER ENGINEERING -- Agricultural; Industrial; management; nuclear; ocean; systems.
- 51 BIOLOGICAL SCIENCES (Excludes environmental biology) --Anatomy; biochemistry; biology; biometry and biostatistics; biophysics; botany; cell biology; entomology and parasitology; genetics; microbiology; neuroscience (biological); nutrition; physiology; zoology.

- 54 ENVIRONMENTAL BIOLOGY Ecosystem sciences; evolutionary biology; limnology; physiological ecology; population biology; population and biotic community ecology; systematics.
- 55 AGRICULTURAL SCIENCES Agronomy; animal sciences; food science and technology; fish and wildlife; forestry; horticulture; plant sciences; soils and soil sciences; other agriculture.
- 56 MEDICAL SCIENCES Internal medicine; neurology; opthalmology; otolaryngology; preventative medicine; pharmacology; psychiatry; radiology; surgery; dentistry; pharmacy; veterinary medicine, and other medical not otherwise classified.
- 61 PSYCHOLOGY-BIOLOGICAL --- Animal behavior.
- 74 LINGUISTICS Computational.
- 75 POLITICAL SCIENCE -- Regional studies; international relations; public administration; management.
- 76 SOCIOLOGY -- Complex organizations.

DETAILED INSTRUCTIONS FOR PROCUREMENT OFFICES\* (Initiating Office Instructions Are on Back of First Page)

CONTENTS

- 1.00 Need for NASA Form 1356.
- 2.00 Organizations for which the Form is Required
- 3.00 Types of Actions Requiring Form Preparation
- 4.00 Procurement Office Actions on Forms Provided by Procurement Request Initiators
- 5.00 Procurement Office Actions on Part II
- 6.00 Contents of Forms Initiated by Procurement Offices
- 7.00 How Individual Blocks on Form are Completed
- 8.00 Corrections to Submitted Forms
- 9.00 What to Do with the Form

1.00 NEED FOR NASA FORM 1356. NASA Form 1356 is the primary source of information for use in a Government-wide reporting system. It is also the basis for numerous internal NASA reports, for example, NASA's University Program, a published listing of active grants, cooperative agreements and contracts. Submission is prescribed by NFS 18-4.676 and NHB 5800.1.

2.00 ORGANIZATIONS FOR WHICH THE FORM IS REQUIRED. The NASA Form 1356 requirement applies to all procurements from domestic and foreign institutions of higher education (colleges and universities), including their operationally affiliated non-profit organizations or foundations.

3.00 TYPES OF ACTIONS REQUIRING FORM PRERARTION. A NASA Form 1356 is required for each individual obligation to an educational institution, with the exception of procurements for the training of NASA employees; for non-research procurements under \$5,000 made by Purchase Order; for adjustments in the estimated cost of a contract; or for negative obligations (*de-obligations*). Reports are not necessary for obligations made during closeout for overruns, overhead changes and similar minor adjustments, unless the ending date is changed (*See 6.11*). The requirement applies regardless of the funding instrument used (grant, contract, cooperative agreement, purchase order, or award made under the authority of Sec. 203(c)(5) of the Space Act), the solicited or unsolicited nature of the proposal, the nature of supported work, the fund source within NASA, the procuring Installation, or whether the funding is full, step or incremental. Forms are prepared at the basic contract or modification level; there will be only one form per modification. For each case involving a funding action, a NASA Form 1356 must be included in the procurement package by the initiator. If the NASA Form 1356 is missing or incomplete, the procurement office must rectify matters prior to execution of the final procurement documents. In addition the procurement office must initiate a NASA Form 1356 in several situations not involving obligation of funds (See 6.00).

4.00 PROCUREMENT OFFICE ACTIONS ON FORMS PROVIDED BY PROCUREMENT REQUEST INITIATORS.

4.10 Ensure blocks 1-3, 6-8, 12-14 have been completed for new awards; 1-3, 6-8 and 12 are required for other actions. Blocks 4, 5, and 9-11 must be completed whenever there are multiple investigators or technical officers.

4.20 Only one NASA Form 1356 is to be completed for each action; i.e., basic award or modification. Consolidate the data if multiple procurement requests covering a single procurement result in receipt of more than one NASA Form 1356; consult the procurement request inltators, if necessary, to obtain agreement on incompatible Part I entries. 4.30 Verify the information in blocks 1-11, paying particular attention to the following blocks:

4.31 Block 1 - University Name. Make sure the name is valid and uniquely identifies the proper institution. This is particularly important for new awards. The name of the parent university is listed rather than research foundation, institute or laboratory names. System names as "State University of New York (SUNY)," "University of Alabama," "University of Missouri." "University of California," are meaningless. The specific campus performing the work must be readily identifiable. For example, the SUNY Research Foundation in Albany negotiates awards on behalf of over 70 campuses in the state; awards made through the Foundation must be attributed to the performing campus.

4.32 Block 2 - Ad Hoc Data. Reserved for future use.

4.33 Block 3 - Principal investigator. Make sure principal investigators are as designated on the face of the award instrument. For agreements which do not specify a principal investigator, per se, university person bearing primary responsibility for overall technical direction of the project should be named. Provide a brief explanation in blocks 3-5 if there is no principal investigator for the project.

5.00 PROCUREMENT OFFICE ACTIONS ON PART II.

5.10 For NEW AWARDS (Type of Action 1).

5.11 Take actions described in 4.00.

5.12 Complete blocks 15, 17-24 and 26.

5.20 For ADDITIONAL FUNDS, SAME DURATION (Type of Action 2).

5.21 Take actions described in 4.00.

5.22 Complete blocks 15-19, 23, 24 and 26.

5.30 For ADDITIONAL FUNDS AND TIME (Type of Action 3).

- 5.31 Take actions described in 4.00.
- 5.32 Complete blocks 15-19, 21-24 and 26.

5.40 For INCREMENTAL FUNDING (Type of Action 6). (Follow this instruction if procurement request for augmenting an incrementally funded contract is received from a source external to the procurement office. If internally generated, see 6.30.)

5.41 Take actions described in 4.00.

5.42 Complete blocks 15-19, 23, 24 and 26.

 $\pmb{6.00}$  CONTENTS OF FORMS INITIATED BY PROCUREMENT OFFICES.

6.10 For NO-COST TIME EXTENSIONS (Type of Action 4).

6.11 Complete blocks 1, 6-8, 15, 16 *(If applicable)*, 19, 22, 23 and 26. Treat an ending date change during close-out as a no-cost time extension *(See 3.00)*.

6.20 For CHANGE IN PRINCIPAL INVESTIGATOR OR TECHNICAL OFFICER (Type of Action 5).

6.21 Complete blocks 1, 15 and 26.

6.22 Complete at least one of the following sets of blocks: 3-5; 6-8; 9-11.

6.23 ALTERNATIVE PROCEDURE. A copy of the letter of notification

\*These instructions also apply to offices making awards under Space Act Section 203(c)(5) or (6) authority.

(December 1988)

(Continued on other side)

Procurement Office Actions on Part II, continued)

to the institution regarding a change in principal investigator or technical officer may be submitted in lieu of a NASA Form 1356.

**8.30** For INCREMENTAL FUNDING OF CONTRACTS (Type of Action 6).

8.31 Where an individual procurement request from an external source is not required (*PR initiated by procurement office, funds obligated against existing PR or "master" commiting document, etc.*), procurement office must initiate NASA Form 1356 (See also 5.40).

6.32 Complete blocks 1, 15-19, 23, 24 and 26.

6.33 Complete blocks 3 and 6-8 only if there has been a change since the last incremental action.

7.00 HOW INDIVIDUAL BLOCKS ON FORM ARE COMPLETED. Provide for each block only information specified on the form and in these instructions. Do not modify printed material or add explanatory notes. In the event of situations not covered by the instructions, consult the Headquarters Procurement Management Division.

7.10 Block 15 - Agreement No. Identification number must include complete prefix and suffix. Do not include modification or task order numbers, if any.

7.11 Block 18 - Modification No. Leave blank for new awards and for changes to which a modification number is not assigned.

7.12 Block 17 - Amount obligated. Report to nearest dollar only amount actually obligated by the action at hand. Do not show estimated total cost of incrementally funded contracts.

7.13 Block 18 - Cost Sharing Percentage. Use percentage figure appearing in the agreement cost sharing clause. Insert 0 if there is no cost sharing.

7.14 Block 19 - Type of Action Being Reported. In addition to the instructions in block 19, itself, note that assignment of a new modification number does not constitute a new award and that grants or cooperative agreements are, by definition, never incrementally funded.

7.15 Block 20 - Title or Brief Description of Technical Purpose of Agreement. This should be a brief, yet clear statement, suitable for public release. Avoid use of non-technical procurement-type terms or obscure abbreviations. Use of grant/cooperative agreement title or other wording on the award instrument is preferred.

7.16 Block 21 - Proposal Type. Special Announcements are Dear Colleague Letters, Space Science Notices, Applications Notices and similar widely distributed announcements of NASA's interest in receiving unsolicited proposals in certain areas. Proposals resulting from general brochures or discussion with NASA individuals would fall into the "No Announcement" category. Proposals that do not fit into the above categories would be classified as "Other."

7.17 Block 22 - Slart Date This Action. For new awards, use date for which agreement authorizes initiation of effort. Where both additional funds and time (*Type of Action 3*) or no-cost extensions (*Type of Action 4*) are involved, use day next following agreement ending date as it existed before the award was made. Note that for step-funded awards (with or without the NGL prefix) the start date can be two to

three years in the future. Leave the start date blank for Type of Action 2 (Additional Funds, Same Duration) and incremental funding (Type 6).

7.18 Block 23 - End (Completion) Date. Use ending date as shown on agreement. Include this date even if it hasnot changed since last action. For periods of performance based on variables such as successful flight experiments, give best current estimate of ending date.

7.19 Block 24 - "Gov't Signature." Use date signed by Grants or Contracting Officer.

7.20 Block 25 - Special Data, Reserved for future use.

7.21 Block 26 - Validation by Responsible Individual. Forms must be reviewed for compliance with instructions. Reviewing individual certifies that both parts I and II have been properly prepared.

7.22 Block 27 - Ad Hoc Data. Reserved for future use.

8.00 CORRECTIONS TO SUBMITTED FORMS.

8.10 Inadequately prepared forms may be returned by Headquarters to the sender's organization for correction. A covering memo will provide handling instructions.

8.20 The initiating organization may correct a previously submitted form. Such corrections must be made on a corbon or facsimile copy of the erroneous form. Insert the correct information in red so as not to obscure the original error and forward to the Headquarters University Programs Branch, Code XEU.

8.21 Correction should always be made for wrong agreement number (*Block 22*) for a new award. These and other corrections should be made no later than two months after the close of the Fiscal Year in which the error was made.

#### 9.00 WHAT TO DO WITH FORM.

9.10 NASA Form 1356 should be completed as soon as practicable after the obligation or other action giving rise to the form is accomplished. Send it directly to Headquarters University Programs Branch, Code XEU.

9.20 Forms should be sent as soon as possible after completion. Preparation of special cover memos should be avoided to conserve resources.

9.30 Headquarters can accept only the original blue form as a final submission. Machine copies are not acceptable (Except for corrections. See 8.20).

9.40 Carbons should be detached before transmitting form to Headquarters. Distribution of carbons is governed by Individual installation guidelines; however, a copy should be retained in the officia: award file for future reference.

9.50 Forms submitted more than two months after the close of the Fiscal Year in which the action occurred may not be useable. Consult Headquarters prior to submitting any such "misplaced" forms.

|                                                                                         | nd                                                                                |                                                               | <u></u>                                                                                                        | Terminatio                                                                                  | on Authority                                                                                                                  | <u> </u>                                                                                       |                                                                                                                                |                                                                                                                                        |

NASA FORM 1434 OCT 83 PREVIOUS EDITIONS ARE OBSOLETE.

\_\_\_\_

#### INSTRUCTIONS

- The purpose of this form is to standardize requests for specific one-time services or information from contract
  administration and audit offices. It should be used in conjunction with any contract whether or not the contract
  has been delegated for contract administration or audit, and for services required on procurements that are in
  the pre-award phase. This form shall not be used to request pre-award surveys in lieu of Standard Forms 1403
  through 1408, nor to delegate contract administration or audit functions covered by NASA Forms 1430, 1430A,
  1432 and 1433.
- 2. When completing item 11, the services desired should be clearly marked and/or described in continuation sheets to preclude servicing organizations from furnishing expensive services over and above those actually needed. Continuation sheets should also be used in conjunction with item 11 to provide sufficient background information to assist the servicing organization in furnishing the quality of service desired, such as the criticality of the work to be performed, importance of the delivery schedule, the caliber of the contractor personnel desired, etc.
- 3. Distribution of the form should include at least the following but may be adjusted to satisfy NASA contracting officers or servicing organizations:
  - a. Original and I copy to the servicing organization.
  - b. Information copy to the cognizant auditor if service is requested of a contract administration officer, or an information copy to the contract administration office concerned if service is requested of the cognizant auditor.
  - c. Information copies to cognizant DCAA on-site Procurement Liaison Auditors, if applicable.
- 4. The requirement for use of this form does not preclude the use of oral and TWX requests when there is need for expedited service; however, such requests should furnish most of the information contained on the form and should request written acknowledgement to include the data shown in items 18 through 23. Care should be taken when using TWX requests to assure that appropriate distribution is made. Oral requests should be confirmed by use of this form.

| 1. Pursuant to the Federal Acquisition Regulation (FAR) and NASA FAR Supplement, you are hereby appointed<br>the Contracting Officer Technical Representative (COTR) for the contract identified above. The COTR's function<br>is to serve as technical liaison between the Contractor and the Contracting Officer. The COTR is responsible for<br>monitoring the Contractor's performance and delivery of the final product and/or services under the contract.<br>Specific duties and responsibilities are listed in paragraph 3 below.                                                                                                            |
| 2. The duties delegated in this letter are not redelegable. The COTR is cautioned that he or she may be personally liable for actions taken or direction given beyond the authorities delegated in this letter.                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 3. The following authority and responsibilities, when checked below, are hereby delegated to the individual appointed by paragraph 1 above:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| a. Monitor contract performance and immediately report all problems related to it to the Contracting Officer. Keep the Contracting Officer informed, both orally and in writing, of the status of the contract and performance of its requirements. No periodic reports, as such, are required, but care should be taken to promptly report any potential disagreement or controversy that may arise.                                                                                                                                                                                                                                                |
| b. Establish, and provide to the Contracting Officer, a surveillance plan that will ensure receipt of the quantity and kinds of supplies or services required by the contract.                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| □ c. Perform on-site surveillance in accordance with the surveillance plan (see paragraph 3b above). Docu-<br>ment surveillance activities and provide a copy of documentation to the Contracting Officer (see paragraph 3a<br>above). Assure technical proficiency and compliance with the technical provisions of the contract by review and<br>verification of the performance of the work accomplished by the Contractor. Coordinate with Defense Contract<br>Administration Services (DCAS) when a partial contract administration delegation has been made to that agency<br>to ensure that there is no duplication of administrative efforts. |
| ☐ d. Ensure that the Contractor complies with the defined Statement of Work or specifications included<br>in the contract. Assist the Contractor and the Contracting Officer in interpreting technical requirements of the<br>contract scope of work or specifications. Differences of opinion shall be referred to the Contracting Officer for<br>resolution.                                                                                                                                                                                                                                                                                       |
| e. Assure that the Contractor uses the levels of personnel contracted for and necessary for performance of contractual requirements and that the level of personnel contracted for is not diluted by the excessive use of lower caliber personnel.                                                                                                                                                                                                                                                                                                                                                                                                   |
| f. Review and evaluate the Contractor's progress in relation to expenditures and advise the Contracting Officer of any disparity indicating excessive or deficient funding.                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>g</b> . Review Contractor invoices and recommend approval/disapproval for payment is appropriate. Such review shall be completed in a manner so as to allow timely payment under the Prompt Payment Act and avoid-ance of payment of interest penalties.                                                                                                                                                                                                                                                                                                                                                                                          |
| ☐ h. Recommend in writing to the Contracting Officer any changes desired in scope and/or technical provisions of the contract with justification for the proposed action. If the Contractor proposes a change, obtain the Contractor's written statement to that effect and forward it to the Contracting Officer together with your analysis and recommendation. YOU ARE NOT DELEGATED TO AUTHORIZE ANY CHANGES IN THE STATE-MENT OF WORK OR SPECIFICATIONS OR DUTIES OF THE PARTIES AS STATED IN THE CONTRACT.                                                                                                                                     |
| NASA FORM 1634 FEB 88                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

i. Ensure that proper action has been taken to formally modify the contract before the Contractor proceeds with any changes in the work or services to be performed.

 $\Box$  j. As requested, prepare and forward to the Contracting Officer cost estimates for any proposed increase or decrease in the work and/or services to be performed. Obtain certified funds when necessary for proposed increases.

 $\Box$  k. Perform inspections of completed work and/or services and certify or have certified (By authorized Government officials) acceptance or nonacceptance of work.

□ I. After completion of work, notify the Contracting Officer when the Contractor has met all terms of the contract and make any appropriate recommendations.

m. Other duties as follows:

4. In order to record your actions as COTR, you should set up and maintain a file of letters you may send to and receive from the Contractor and Contracting Officer and memoranda for record of any such nonwritten actions and/or decisions. This file is considered a segment of the official contract file and should be forwarded to the Contracting Officer at the conclusion of this contract.

5. This delegation as COTR does not in any way alter or supersede your existing relationship with your supervisor.

6. This appointment is effective upon its receipt by you and shall remain in effect until closeout and final payment of the assigned contract or until terminated in writing by me or other appropriate Contracting Officer.

#### **TERMS AND CONDITIONS**

- 1. Byproduct, source, and special nuclear materials, technical services or other isotopic materials are furnished at prices and services. Fees as fixed by the U.S. Department of Energy and in effect on the date of shipment of material or performance of the services. Prices in catalogs issued by the Department or the operator of any DOE facility are subject to change without notice. All transportation costs will be paid by the requisitioning agency, and materials will be shipped F.O.B. the DOE facility handling the transaction. When shipment of material pursuant to this order requires the use of returnable Government-owned containers, title to such containers shall remain in the Government. The buyer will keep the containers in good condition, will not use them for any materials other than the materials shipped therein, and will deliver them to a carrier for return to the point of shipment, transportation prepaid, within thirty days from the date of receipt by the buyer of the shipment. The buyer agrees to pay to the Department a demurage charge on each returnable Government-owned container for that period of retention which is in excess of the said 30-day period.
- 2. The right to revoke or cancel this order is reserved to DOE.
- 3. Material ordered from a DOE facility will be shipped as nearly approximating the condition specified in the order as is possible, but no representation is made that materials will be of a particular quality, quantity, or activity, or will be delivered at specified times. The requisitioning agency agrees to report promptly any discrepancies between the material supplied and that ordered so that replacement or other appropriate adjustment may be made.
- 4. Payment will be made direct to the operator of the DOE facility from which the materials or services are ordered.
- 5. Title to any material procured on a loan or rental basis under this order shall remain in the DOE. A completed Loan Agreement form, which will be provided by the DOE, must accompany this order if material is being procured on a loan or rental basis.

#### INSTRUCTIONS

- 1. This isotope order blank has been prepared for use by all Federal agencies ordering byproduct, source, and special nuclear materials, technical services, or other isotopic materials from DOE or DOE facilities owned by the U.S. Department of Energy and operated for DOE by contractors. No other type of order blank, purchase order, or contract will be accepted by DOE or DOE facilities.
- 2. When submitting this order form the requisitioning agency should furnish a prepared bill of lading on which shipment will be made. If such bill of lading is not furnished, shipment will be made collect on a commercial bill of lading to be converted at destination.
- 3. The DOE utilizes the services of contractors operating its facilities to perform distribution functions for DOE under cost-type contractual arrangements whereby expenses of the facilities are borne by DOE and revenue from distribution of byproduct, source, and special nuclear materials, special technical services, and other isotopic materials is deposited for the account of the Government, used to reduce costs of operation, or paid over as directed by DOE in accordance with applicable contract provisions.

**--**...

18-70.000 Scope of part.

This part contains NASA-unique regulations which --

(a) Constitute a system of regulations such that presentation in a unified format is essential;

(b) Relate to numerous FAR subparts;

(c) Have, as a whole, no clearly identifiable FAR counterpart; and

(d) May include non-regulatory material necessary to complete coverage of the instant subject.

#### SUBPART 18-70.1 NASA ACQUISITION OF INVESTIGATIONS SYSTEM

#### 18-70.101 Purpose.

Experience has shown that the best space research results when active space personally research investigators parthe selection of investiticipate in acquisition gations. The investigation provides the mechanism for system encouraging the participation of investigators and selecting the investigations which contribute most effectively to the advancement of NASA's scientific and technological objectives. It is a system separate and distinct from the ordinary acquisition process, but requiring the same vigorous management and discipline to assure compliance with statutory requirements and elementary considerations of equitable treatment. "NASA Acquisition of Investigations" is the formal name under which this system is incorporated into the NASA FAR Supplement.

#### 18-70.102 System content.

The regulations governing the NASA (a) Acquisition of Investigations system system shall set forth the entire system in a single document, covering the individuals with interrelated roles procurement and programmatic responsibilities both within NASA and the private sector. Therefore, the regulation will provide general and specific guidance to all NASA personnel engaged in the solicitation, evaluation and selection of investigations. It will emphasize the responsibilities of line management and, as appropriate, the selected investigators in the acquisition of equipment necessary for the investigation. It will procedures for uniform and provide equitable treatment in the evaluation and selection of investigators and acquisiinvestigative equipment contion of sistent with the FAR and NFS.

(b) The system regulation shall contain policy and procedures applicable to the solicitation of investigations with "Announcements of Opportunity," a form of broad agency announcement authorized at FAR 6.102(d)(2)(i).

# 18-70.103 NASA acquisition of investigations.

(a) The NASA Acquisition of Investigations System is prescribed by Appendix I to this section 18-70.103.

(b) NASA may reprint this Appendix I as a separate Handbook for sale and/or distribution provided the following two conditions are met:

(1) With the exception of availability and distribution information, any subsequent modification in the text shall be preceded by a change to the NASA FAR Supplement 18-70.103.

(2) The following information shall be included as a part of the prefatory material in the NASA Handbook:

#### IMPORTANT NOTICE

This Handbook is a separately bound, verbatim version of NASA FAR Supplement (NFS) (48 CFR 18-70.103) Section 18-70.103, Appendix I. Reference to other parts of the Federal Acquisition Regulation (FAR) and the NFS will be required for complete coverage of all procurement aspects. NASA reserves the right to make changes to NFS 18-70.103. Appendix Ι without issuing a new edition of this Handbook. Any such changes will be published in the Federal Register; however, it is anticipated that such changes will be rare, unless mandated by statute or unusual circumstances. In the event of apparent conflict between this Handbook and the NFS, the NFS shall govern.

.

#### PART 18-70 NASA SUPPLEMENTARY REGULATIONS

#### APPENDIX I TO 18-70.103: Guidelines for Acquisition of Investigations.

#### PREFACE

From its beginning, NASA has provided opportunities for qualified people in NASA, other Government agencies, colleges and universities, private industry, and foreign countries to participate in developing and carrying out its responsibilities in aeronautical and space activities. NASA has treated itself as a part of the scientific and technical community and has encouraged this community to bring to bear its expertise in developing investigatory objectives, selecting the investigations to carry out, participating in the resulting missions, analyzing the data obtained, and publishing the results.

Success of our program in aeronautics and space, in a large measure, can be attributed to the ability of NASA to harness the ideas, knowledge, and technical abilities of the investigators within and outside of NASA. Success has also been dependent on the effective development of equipment required for investigations. In the area of space applications, program success also depends upon the support of actual and potential users of space related systems, and upon how well NASA understands their operations and programmatic requirements.

The acquisition of investigations process covered by this Handbook allows the cooperative endeavors successful with the scientific. continuation our of technological, and applications user communities in the Space Transportation System, Spacelab, and Space Station era, and, at the same time, provides standards requiring greater attention to the planning and management of investigations. Also, this Handbook emphasizes the responsibilities of line management and, as appropriate, the selected investigators in the acquisition of equipment necessary for the investigation. This Handbook should assure uniform procedures and equitable treatment in the evaluation and selection of investigators and the acquisition of investigative equipment.

This Handbook provides general and specific guidance to all NASA personnel engaged in the solicitation, evaluation, and selection of investigations.

# CHAPTER 1--THE INVESTIGATION ACQUISITION SYSTEM

## **100 GENERAL**

Experience has shown that the best space research results when active space personally research investigators in the selection of participate investigation The investigations. acquisition system provides the mechanism for encouraging the participation of and selecting the investigators contribute most investigations which effectively to the advancement of NASA's scientific and technological objectives. It is a system separate and distinct from ordinary acquisition process but the requiring the same vigorous management and discipline to assure compliance with statutory requirements and elementary considerations of equitable treatment.

# **101 KEY FEATURES OF THE SYSTEM**

1. Utilization of the system commences with a Program Associate Administrator's determination that the acquisition process is investigation appropriate and applicable for a program under consideration. There follows a broadly disseminated Announcement of Opportunity (AO) to the interested community. This solicitation does not generally specify the investigations to rather solicits proposed but be investigative ideas which contribute to broad objectives. The proposals received are distinctive and innovative. In order to determine which of the dissimilar proposals should be selected, a formal evaluation process is competitive utilized. The evaluation for merit is normally made by experts in the specific fields represented by the proposals and care taken to avoid conflicts of interest. These peer evaluators may be from NASA, other Government agencies, universities, or the commercial sector. with or subsequent to the Along evaluation for merit, the other factors of the proposals, such as engineering, and integration aspects, are cost. reviewed by specialists in those areas. The evaluation conclusions as well as considerations of budget and other formulate а used to factors are complement of recommended investigations. A steering committee serving as staff to the Program Associate Administrator reviews the proposed payload or program of investigation, the iterative process, and the selection recommendations. The steering committee serves as a forum where different interests, such as flight management, and program, discipline and be weighed administration, can reconciled.

The Program Associate Administrator selects the investigations and the investigators who shall participate program. Once selected, an in the investigator is assigned appropriate key responsibilities relating to the investigation through a contract with the institution. In the case of foreign responsibilities these investigators, will usually be outlined in an agreement between NASA and the sponsoring governmental agency in the investigator's country.

The Announcement of Opportu-2. disciplined nity process provides a approach to investigation acquisition. major steps must be The following cach case where the followed in determination is made to utilize the investigation acquisition system:

a. Announcement of Opportunity shall be signed by the appropriate Program Associate Administrator and shall be widely distributed to the scientific, technological, and applications user communities, as appropriate.

b. An evaluation team shall be formed including recognized peers of 18-70.103, App. I

the investigators to review the proposals.

c. A project office will be assigned to assess the engineering, cost, integration, and management aspects of the proposals.

d. A program office will be responsible to formulate a complement of investigations consistent with the objectives stated in the Announcement of Opportunity, cost, and schedule constraints.

e. A steering committee appointed by the appropriate Program Associate Administrat or shall review the proposed investigations for relevance and merit, will assure compliance with the system as described in this Handbook, and make selection recommendations.

f. Selections shall be made by the appropriate Program Associate Administrator.

3. Payloads will be formulated consisting of investigations selected through the Announcement of Opportunity process and/or other authorized methods.

4. When the need is determined by the Program Associate Administrator, payload specialists will be selected in accordance with NMI 7100.16, Payload Specialists for Space Transportation Systems (STS) Missions.

# **102 MANAGEMENT RESPONSIBILITIES**

1. Program Associate Administrators are responsible for overseeing the process and for making key decisions essential to the process including:

a. Determination to use the investigation acquisition system.

b. Appointment of the steering committee members.

c. Designation of a centralized staff to assure uniformity in the issuance of the Announcement of Opportunity and conformity with the required procedures in the evaluation and selection.

d. Reuse, to the maximum extent practicable, of space hardware and support equipment.

e. Determination to use advisory subcommittees, contractor, or fulltime Government employees only in the evaluation process.

f. Issuance of the Announcement of Opportunity.

g. Selection of investigations and investigators, determination of need of a definition phase, determination of the role of the investigator with regard to providing essential investigation hardware and services, and determination of the need for payload specialists.

h. A s s u r e d u e consideration is given to minorities in the establishment of peer groups, distribution of the Announcement of Opportunity, and in the selection of investigations.

i. Provide a timely, flexible framework for cooperative foreign participation in Space Shuttle, Spacelab, and Space Station missions.

2. Exercise of these responsibilities will require the professional assistance of experts in several functional, programmatic, and technical disciplines. The Program Associate Administrator should call upon such experts at appropriate times throughout the process. The remaining chapters of this Handbook will discuss the exercise of the foregoing responsibilities in greater detail.

# CHAPTER 2--APPLICABILITY OF THE PROCESS

#### 200 GENERAL

The system used for acquisition of investigations is separate and distinct procedures for agency from the procurement of known requirements of hardware and services. A decision to use this special acquisition process will be based on a considered determination, in accordance with the general guidance in this chapter, that it is the most suitable to meet program needs. The decision-making official will consider the criteria for use of the system. The project plan or other program or project documentation should discuss the proposed mode of investigations selection.

# 201 CRITERIA FOR DETERMINING APPLICABILITY

1. The decision to utilize the investigations acquisition process as an alternative to the normal planning and acquisition process of the agency can only be made after consideration of the special conditions which are requisite to its use. All of the following conditions should exist before deciding that the system is appropriate and applicable:

a. NASA has a general objective which can be furthered through unique, novel, experimental approaches. To develop such novel approaches, NASA wishes to draw upon the broadest reservoir of ideas that can be made available.

b. Choices must be made among competing dissimilar ideas in expanding knowledge of phenomena in the atmosphere and space.

c. Individual participation of an investigator is essential to exploitation of the opportunity. 2. The investigations acquisition process shall not be used when any of the following characteristics are present:

a. The requiring office can define a requirement sufficiently to allow for normal procurement. This includes requirements that can be stated as design or performance specifications, including requirements for the use of known technology and hardware, and requirements for continuation of existing tasks.

b. The program is extremely complex, requiring specialized integration, coordination, or other special handling, or extending over a lengthy period wherein individual participation is not essential.

c. It is not possible or considered essential to the program to follow the critical steps of the special investigations acquisition process.

# 202 PROGRAMS AND ACTIVITIES WHERE USE MAY BE CONSIDERED

General--The investigation ac-1. quisition process is most suitable for investigations aimed at exploration unique requiring several sensors or instruments, but it has been used advantageously successfully and in of opportunity. Each several types program is unique and the opportunities for participation in investigative effort will necessarily vary from program to program. Similarly, program implementation plans may provide opportunities for participation but may not meet the conditions necessary for use of the acquisition investigations special process. In those latter cases. the normal procurement procedures will be followed to meet the program needs. Because of the differences in programs, only general standards can be given to guide the decision of whether or not to use the alternate acquisition process.

7

There follows a discussion of several types of programs, the opportunities they offer, and comment on the suitability of the special process.

# 2. Exploration and Space Research Flights

Examples--Space Transpora. tation System (STS) flights with attached payloads. generally Spacelab payloads; and free-flying spacecraft. such as Explorers, Pioneers, Space Telescope, Landsats, and Long Duration **Exposure** Facilities.

b. Types of Opportunity

(1) A common and sought after opportunity is to participate as a Principal Investigator responsible for conceiving and conducting a space investigation. This may involve a major piece of instrumentation. In the case of a "facility" or "multiuser" payload, each Principal Investigator's responsibilities would ordinarily involve a relatively minor portion of the total instrument.

(2) There may also be an opportunity to serve on a Principal Investigator's team as a team member or as a Co-Investigator.

(3) A type of opportunity that generally involves the use of data from another investigator's instrument is that of guest investigator or guest observer. Guest investigators usually participate after the primary objectives have been satisfied for the investigations involved.

(4) A team may be formed from selected investigators to assist in defining planned mission objectives and/or to determine, in a general manner, the most meaningful instruments to accomplish the mission objectives.

c. Selection and Acquisition Procedures--The investigation acquisition process may be applicable to all of these types of opportunities. The supposition common in these opportunities is that the best ideas and approaches are likely to result from the broadest possible involvement of the scientific, technological or applications user communities. Most free-flying spacecraft represent single flight opportunities in contrast to Spacelab payload acquisition which may have a number of discipline objectives since the flight opportunities are frequent and recurring.

# 3. Minor Missions

b.

a. **Examples--Research** aircraft, sounding rockets, balloons, and minor missions are generally of short duration, small in size, often single purpose, and subject to repetition. Many investigations are follow-on to pastflight investigations.

Types of Opportunity

(1) Principal Investigators responsible for investigation.

(2) Data use or analy-

Selection and Acquisition c. **Process**--Opportunities for participation on minor missions are generally suitable for normal procurement procedures. The use of a general announcement announcing the general nature and schedule of flights may be appropriate when considered necessary to broaden participation by requesting investigatorinitiated research proposals. Procurement procedures as contained in NASA FAR Supplement shall be used for follow-on repeat flights. Although NASA seeks unique, innovative ideas for these missions, the prospect of reflight and the latitude in determining number and schedule of flights argue against the need for the use of the investigations acquisition process to force dissimilar proposals into an annual or periodic competitive structure. On the other hand, there are some minor missions addressed to specific limited opportunities: for example. a solar eclipse. When such limitations indicate

#### NFSD 89-0 (June 30, 1989)

# PART 18-70 NASA SUPPLEMENTARY REGULATIONS

that the special competitive structure is needed, it should be authorized.

4. Operational and Operational Prototype Spacecraft

a. **Examples--**GOES, TIROS.

b. Selection and Acquisition Process--The user agency can be expected performance parameters. specify to definition will be the Payload responsibility of the user agency and NASA. Specifications sufficient for normal procedures can be produced. Use data from the mission is the of responsibility of the user agency. Thus, the special process is not required.

#### 5. Reimbursable Missions

a. Examples -- INTELSAT, SATCOM, WESTAR, MARISAT.

b. Selection and Acquisition Process--Payload determination and delivery are the responsibility of the user organization. NASA's role is essentially to provide launch services. No special process is required.

6. Supporting Research and Technology (SR&T)

a. **Examples**--Studies, minor developments, instrument conceptualization, ground-based observations, laboratory and theoretical supporting research, and data reduction and analysis which is unconstrained by a specific opportunity.

Selection and Acquisition b. Process--Programs in these areas tend to go forward on a continuing basis, rather exploiting unique opportunities. than Normal procurement procedures should be utilized to satisfy these requirements. A general announcement of area of interest could be made when greater deemed advisable. participation is Proposals can be solicited or unsolicited and can be entertained within the context of the normal procurement procedure.

## 203 SPECIFIC APPROVAL REQUIRED

Associate Administrator Program The responsible for the program is also responsible for determining whether or not to use the special investigations acquisition process. Normally on major projects, or when a project plan is use of the investigation required. acquisition system will be justified and recommended in the project planning documentation and will be coordinated with staff offices and discussed in the planning presentation to the Deputy Administrator or designee.

# CHAPTER 3--THE ANNOUNCEMENT OF OPPORTUNITY

## 300 GENERAL

of the competitive The essence through of an usc solicitation is The Announcement of Opportunity. Announcement is characterized by its generality since NASA has not prespecific and finite determined a objective but only the general objective of the investigations. Notwithstanding its general nature, it is essential that the Announcement of Opportunity contains sufficient data in order to obtain meaningful proposals. To a considerable extent, the detail and depth of the Announcement will depend on the investigative objective. In all cases, judgment is of paramount importance, since the purpose is to get adequate information to assess the relevance. merit, cost, and management without overburdening the proposer.

# 301 NEED FOR PREPARATORY EFFORT

1. When the use of the Announcement process is contemplated, there is need to consult with appropriate Headquarters offices and the Project Installation responsible for the project prior to release of the Announcement. These consultations will require early involvement of the Project Installation and appropriate Headquarters offices in the investigation acquisition process.

2. In addition, the need to meet legal requirements in the acquisition processes will require early external Program Office involvement to:

a. Synopsize the Announcement in the Commerce Business Daily prior to the time of release. b. Determine if there is instrumentation or support equipment available which may be appropriate to the Announcement with all necessary background data considered essential for use by a proposer.

c. Determine mailing lists, including the mailing list maintained by the International Affairs Division, Office of External Relations, for broad dissemination of the Announcement to the appropriate recipients.

d. Assure mandatory provisions are contained in the Announcement.

Other methods of dissemination 3. of the Announcement may also be used, such as the use of press releases, etc. When possible, the Announcement should be widely publicized through publications of societies: professional appropriate however, NASA policy does not allow payment for the placement of advertisements.

#### **302 RESPONSIBILITIES**

The Program Office originator 1. is responsible for the content of the Announcement and that coordination with concerned Headquarters offices and field installations has been accomplished. All personnel involved in the evaluation of investigative proposals are responsible familiarizing themselves and for complying with this Handbook and other applicable regulations. To this end, they are expected to seek the advice and guidance of appropriate Headquarters program and staff offices, and Project Installation management.

2. The Program Office is also responsible for coordinating the Announcement of Opportunity with the International Affairs, Educational Affairs, Management Support Divisions, Office of External Relations, Office of General Counsel, and Office of

11

Procurement prior to issuance. Attention is directed to NMI 1362.1, Initiation and Development of International Cooperation in Space and Aeronautical Programs.

3. Concurrence of the Office of Procurement is required before issuance of an Announcement of Opportunity.

## 303 PROPOSAL OPPORTUNITY PERIOD

1. The Announcement of Opportunity is considered the primary method of soliciting investigations. As such, it is necessary that the process accommodate the continuous opportunities afforded by the Shuttle/Spacelab flights. Thus, the following methods may be utilized, individually or in combination, to enable an Announcement and resultant proposals to be open for an extended period of time and/or to cover a series or range of flight possibilities or disciplines:

a. The Announcement may be issued establishing a number of proposal submission dates. Normally, no more than three proposal submission dates should be established. The submittal dates may be spread over the number of months most compatible with the possible flight opportunities and the availability of resources necessary to evaluate and fund the proposals.

The Announcement may be b. issued establishing a single proposal submission date. However, the Announcement could provide that NASA may amend the Announcement to provide for subsequent dates for submission of proposals, if additional investigations are desired within the Announcement objectives. In this case, the initiative to reopen is a management determination. If sufficient investigations are selected to satisfy the Announcement objectives or the flight possibilities as a result of the first submission, subsequent opportunities for proposal submission by potential investigators would not be available.

c. The Announcement may be issued to provide for an initial submission date with the Announcement to remain open for submission of additional proposals up to a final cutoff date. This final date should be related to the availability of resources necessary to evaluate the continuous flow of proposals, the time remaining prior to the flight opportunity(s) contemplated by the Announcement, and payload funding and availability.

2. Generally, a core or primary payload of investigations would be selected from the initial submission of proposals under the above methods of open-ended Announcements. These selections could be final or tentative recognizing the need for further definition. Proposals received by subsequent submission dates would be considered in the scope of the original Announcement but would be subject to the opportunities and resources remaining available or the progress being made by prior selected investigations.

3. Any investigation proposal. whether received on the initial submission subsequent submission, requires or notification to the investigator and the investigator's institution of the proposal disposition. Some of the proposals will be rejected completely and the investigators immediately notified. The remaining unselected proposals may, if agreeable with the proposers, be held for later consideration and funding and the investigator so notified. However, if an investigator's proposal is considered at a later date by NASA, the investigator must be given an opportunity to validate the proposal with the investigator's institution and for updating the cost and other data contained in the original submission prior to a final selection. In summary, NASA may retain proposals, receiving

Category I, II, or III classifications (see paragraph 403), for possible later sponsorship until no longer feasible to consider the proposal. When this final stage is reached, the investigator must be promptly notified.

4. If the intent is to hold proposals for possible later consideration, as discussed in subparagraph 3, the Announcement should specifically indicate this intent and the procedure to be used. Proposing investigators not desiring their proposals be held for later consideration should be given the opportunity to so indicate in their original submissions.

# 304 GUIDELINES FOR ANNOUNCEMENT OF OPPORTUNITY

1. The preparation of the Announcement of Opportunity should be a multi-functional effort. It involves program and project management and usually involves other offices of NASA.

2. The Announcement should be tailored to the particular needs of the contemplated investigations and be complete in itself. Each Announcement will be identified as (Program Office) originated and numbered consecutively calendar OSSA-1-86, each year, e.g., OSSA-2-86; OAST-1-86; OSTDS-1-86; etc. required format and detailed The instructions regarding the contents of the Announcement are contained in Appendix A. They are summarized as follows:

a. Description of the Opportunity--The basic purpose or aims of the opportunity.

b. Announcement Objectives--A succinct statement of the specific scientific, applications, and/or technological objectives. c. **Background**—An explanation of the context of the opportunity in relation to broader objectives, other disciplines, and prior studies and investigations.

d. **Proposal Opportunity Period**—The period in which the Announcement opportunity will remain open for receipt of proposals.

e. Requirements and Constraints--Technical, programmatic, cost, and schedule requirements or limitations.

f. **Proposal Submission Information**--Information relating to the proposal submission procedure.

g. Proposal Evaluation, Selection, and Implementation--The notification to the proposers of the evaluation criteria and the manner of proposal evaluation.

h. Schedule--Scheduled dates for activities related in the Announcement.

i. **Appendices--**The General Instructions and Provisions and any other appendices that are pertinent to the Announcement.

The General Instructions and 3. Provisions (Appendix B) are necessary to accommodate the unique aspects of the Announcement of Opportunity process. The provisions instructions and inform investigators potential and their institutions of certain prerogatives of the selection official and of procedural law requirements dictated by and regulation. Therefore, they must be appended to each Announcement of Opportunity.

4. At the time of issuance, copies of the Announcement must be furnished to the Office of Procurement and to the Office of General Counsel.

5. Proposers should be informed of significant departures from scheduled

dates for activities related in the Announcement.

# 305 ANNOUNCEMENT OF OPPORTUNITY SOLICITING FOREIGN PARTICIPATION

Proposals for participation bv individuals outside the U.S. should be submitted in the same format (excluding plans) as U.S. proposals; cost they should be typewritten and be in English; the proposals should be reviewed and appropriate foreign endorsed by the governmental agency. If letters of "Notice of Intent" are required, the Announcement should indicate that they be sent to NASA's International Affairs Division, Office of External Relations. Should a foreign proposal be selected, NASA will arrange with the sponsoring agency for the proposed foreign participation on a no-exchange-of-funds basis, in which NASA and the sponsoring agency will each bear the cost of

respective discharging its responsibilities. Note that additional guidelines applicable to foreign proposers are contained in the Management Plan Section of Appendix C (see Section II) and must Guidelines be included in any for Proposal Preparation or otherwise furnished to foreign proposers.

# 306 GUIDELINES FOR PROPOSAL PREPARATION

While not all of the guidelines outlined in Appendix C will be applicable in response to every Announcement, the investigator should be informed of the relevant information required to allow for an evaluation of the investigator's proposal. The proposal may be submitted on a form to be supplied by the Program Office. However, the proposal should be submitted in at least two sections: (1) Investigation and Technical Section; and (2) Management and Cost Section as described in Appendix C.

# CHAPTER 4--EVALUATION OF PROPOSALS

## 400 GENERAL

process The evaluation assures consideration of the several aspects of each proposal and constitutes a series of progressive sorting of the proposals. A review resulting in a categorization is performed by using one of the methods or combination of the methods outlined in paragraph 402. The purpose of this determine the is initial review to scientific and/or technological merit of the proposals in the context of the Announcement objectives. Those proposals which are considered to have the greatest scientific or technological merit are the reviewed detail for in then and cost management, engineering. aspects, usually by the Project Office at installation responsible for the the project. Final reviews are performed by the Program Office and the Steering Committee and are aimed at developing a group of investigations which represent an integrated payload or a well-balanced program of investigation which has the possibility for meeting the best applications. scientific. announced and technological objectives, and/or The programmatic constraints. within of considering the importance interrelationship of the several aspects of the proposals to be reviewed in the process and the need for carefully planning their treatment should not be overlooked. An evaluation plan has been found helpful to the evaluators, program management officials, and the selection official. The evaluation plan should be before issuance of the developed Announcement of Opportunity. It should cover the recommended staffing for any contractor support, subcommittee or as well as the review guidelines procedural flow and schedule of the evaluation. While not mandatory, such a plan should be considered for each Announcement. A fuller discussion of the evaluation and selection process is included in the following paragraphs.

# 401 CRITERIA FOR EVALUATION

The fundamental aim of the 1. investigations acquisition process is the acquisition of those unique ideas and best fulfill capabilities which an stated scientific. Announcement's applications, and/or technological objectives. In furtherance of this goal, each Announcement must indicate those criteria which the evaluators will apply when assessing the merit of a proposal. The relative importance of each criterion must also be stated in the Announcement. The provision of this information will allow prospective investigators to make informed judgments in their attempt to formulate proposals that best meet the stated objectives.

2. Following is a list of general evaluation criteria which would be appropriate for inclusion in most Announcements:

a. The scientific, applications, and/or technological merit of the investigation.

b. The relevance of the proposed investigation to the Announcement's stated scientific, applications, and/or technological objectives.

c. The competence and experience of the investigator and any investigative team, as an indication of the investigator's ability to carry the investigation to a successful conclusion.

d. Adequacy of whatever apparatus may be proposed with particular regard to its ability to supply the data needed for the investigation.

e. The reputation and interest of the investigator's

NASA FAR SUPPLEMENT (NFS)

institution, as measured by the willingness of the institution to provide the support necessary to ensure that the investigation can be completed satisfactorily.

In addition to or in lieu of the criteria listed herein, additional criteria may be utilized. In all cases, the evaluation criteria must be germane to the accomplishment of the stated objectives.

3. Cost and management aspects will be considered in all selections.

4. Once the evaluation criteria and their relative importance are disseminated through issuance of the Announcement, it is essential that they be applied in a uniform manner. If it becomes apparent, before the date set for receipt of proposals, that the criteria or their relative importance should be changed, the Announcement will he amended, and all known recipients will be informed of the change and given an adequate opportunity to consider it in submission of their proposals. Evaluation criteria and/or their relative importance will not be changed after the date set for receipt of proposals.

# 402 METHODS OF EVALUATION

1. Alternative methods are available to initiate the evaluation of proposals received in response to an Announcement of Opportunity. These are referred to hereinafter as the Advisory Subcommittee Evaluation Process. the Contractor Evaluation Process, and the Government Evaluation Process. In all processes, subcommittee а of the appropriate Program Office Steering Committee will be formed for the purpose of categorizing the proposals. The various approaches, described in detail in paragraph 403, are summarized as follows:

Advisory a. **Subcommittee** Evaluation Process--An advisory subcommittee of the appropriate Program Office Steering Committee may be established to evaluate the scientific, applications, or technological merit of the proposals and categorize to them. This method envisions the use of non-Government peers or a combination of non-Government and Government peers. The impact of using one of the open-ended Announcement methods should be considered in establishing the subcommittee.

b. Contractor **Evaluation** Process-In some instances, it may be necessarv for NASA to utilize а contractor to assist in evaluation of The contractor proposals. would not provide advice or recommendations to the agency nor categorize the proposals but would assist by submitting a summary of each proposal along with a listing of its major strengths and weaknesses to the Program Office. The Program Office, using full-time Government employees appointed as a subcommittee of the Program Office Steering Committee, will, upon consideration of the contractor's report. categorize the proposals. This method may also be used to aid an advisorv subcommittee established 25 indicated in subparagraph a. in which event the categorization function will be performed by the advisory subcommittee.

C. Government **Evaluation** Process--In certain circumstances. such as those situations where the establishment of an advisory subcommittee is not feasible, it may be appropriate to appoint or assign full-time Government employee(s) as a subcommittee of the Program Office Steering Committee to perform the evaluation and categorization of proposals.

Following categorization under 2. one of the methods outlined in subparagraphs through a. c., those proposals still in consideration will be processed to the selection official as prescribed hereafter.

# 403 ADVISORY SUBCOMMITTEE EVALUATION PROCESS

Evaluation of scientific and/or 1. technological merit of proposed investigations is the responsibility of an advisory subcommittee of the Steering Committee. It is of prime importance that the appointment of members to the subcommittee be weighed carefully as individuals may exercise these significant influence on the selection of investigations and hence achievement of program goals and objectives.

The subcommittee constitutes a 2. qualified to judge the peer group scientific and technological aspects of all investigation proposals submitted in a specific program. For a given application of the process, one or more subcommittees established may be depending on the breadth of the technical or scientific disciplines inherent in the Announcement's objectives. Each subcommittee represents a discipline or grouping of closely related disciplines. the quality of То maximize the subcommittee evaluation and categorization. the following conditions of selection and appointment should be considered.

a. The subcommittee normally should be established on an ad hoc basis for the particular objectives referenced in the Announcement.

b. Qualifications and broad acknowledgment of the professional abilities of the subcommittee members are of primary importance. Institutional affiliations, per se, are not sufficient qualifications.

c. The executive secretary of the subcommittee must be a full-time NASA employee.

d. Subcommittee members should normally be appointed as early as possible and prior to receipt of proposals.

In selecting members, care c. must be taken to avoid conflicts of financial These include interest. affiliations. interests. institutional professional biases and associations, as well familiar relationships. as Conflicts could further occur as a result of imbalance between Government and nonmember Government appointees, а evaluating a proposal from the person's parent organization, or membership from institutions representing a singular school of thought in discipline areas competitive theories involving in approach to an investigation.

The subcommittee should f. convene as a group in closed sessions for evaluation proposal to protect the proposer's proprietary ideas and to allow frank discussion of the proposer's of the qualifications and the merit proposer's ideas. Lead review responsibility for each proposal may be assigned to members most qualified in the involved discipline. It is important that each proposal be considered by the entire subcommittee. It is only through this action that dissimilar ideas are forced into open competition.

It may not be possible to 3. select a subcommittee fully satisfying all of the conditions described in subparagraph 2. For example, the most qualified specialists in a particularly narrow discipline may themselves, or some other part of their parent organization, be submitting proposals. It is not the purpose of these guidelines to establish provisions for making trade-offs, where necessary, among the above criteria (see subparagraph 2). This is properly the responsibility of the nominating and appointing officials. This latitude permits flexibility in making decisions in accord with circumstances of each application. In so doing, however, it is emphasized that recognized expertise in evaluating dissimilar proposals is essential to the continued workability of the investigation acquisition process.

## NASA FAR SUPPLEMENT (NFS)

4. Candidate subcommittee members should be nominated by the office having responsibility for evaluation. the Nominations should be approved in NMI accordance with 1150.2. "Establishment, Operation, and Duration NASA Advisory Committees." The of notification appointment of should specify the duration of assignment on the subcommittee. provisions concerning conflicts of interest, and arrangements regarding honoraria, per diem, and travel when actually employed.

5. It is important that members of the subcommittee be formally instructed as to their responsibilities with respect to the investigation acquisition process, even where several or all of the members have served previously. This briefing of subcommittee members should include:

a. Instruction of subcommittee members on agency policies and procedures pertinent to acquisition of investigations.

b. Review of the program goals, announcement objectives, and evaluation criteria, including relative importance, which provide the basis for evaluation.

Instruction on the use of C preliminary proposal evaluation data furnished by the Installation Project Office. The subcommittee should examine these data to gain a better understanding of the proposed investigations, any associated problems, and to consider cost in relation the value of the to investigations' objectives.

d. Definition of responsibility of the subcommittee for evaluation and categorization with respect to scientific and/or technical merit in accordance with the evaluation criteria.

e. Instruction for documentation of deliberations and categorizations of the subcommittee.

f. Inform the chairperson of the subcommittee and all members that

they should familiarize themselves with the provisions of the current "Standards of Conduct for NASA Employees", NHB 1900.1, or "Standards of Conduct for NASA Special Government Employees", NHB 1900.2. as appropriate. regarding conflicts of interest. Members should inform the appointing authority if their participation presents a real or apparent conflict of interest situation. In addition, all participants should inform the selection official in the event they are subjected to pressure or improper contacts.

Inform members that prior g. to the selection and announcement of the successful investigators and investigations, subcommittee members and NASA personnel shall not reveal any information concerning the evaluation to anyone who is not also participating in the same evaluation proceedings, and then only to the extent that such information is required in connection with such proceedings. Also, inform members that selection subsequent to of an investigation and announcement of negotiations with the investigator's institution, information concerning the proceedings of the subcommittee and data developed by the subcommittee will be made available to others within NASA only when the requestor demonstrates a need to NASA know for а purpose. Such information will be made available to persons outside NASA including other Government agencies, only when such disclosure is concurred in by the Office of General Counsel. In this connection, reference is made to 18 U.S.C. 1905 which provides criminal sanctions if anv officer or employee (including special employees) of the United States discloses or divulges certain kinds of business confidential and trade secret information unless authorized by law.

6. The product of an advisory subcommittee is the classification of proposals into four categories. The categories are:

## NFSD 89-0 (June 30, 1989)

# PART 18-70 NASA SUPPLEMENTARY REGULATIONS

Category I--Well conceived a. and scientifically and technically sound investigations pertinent to the goals of the program and the Announcement's objectives and offered by a competent investigator from an institution capable of supplying the necessary support to ensure that any essential flight hardware or other support can be delivered on time and that data can be properly reduced, analyzed, interpreted, and published in a Investigations in time. reasonable Category I are recommended for acceptance and normally will be displaced only by other Category I investigations.

b. Category II--Well conceived and scientifically or technically sound investigations which are recommended for acceptance, but at a lower priority than Category I.

c. Category III -- Scientifically or technically sound investigations which require further development. Category III investigations may be funded for development and may be reconsidered at a later time for the same or other opportunities.

d. **Category IV**--Proposed investigations which are recommended for rejection for the particular opportunity under consideration, whatever the reason.

7. A record of the deliberations of the subcommittee should be prepared by the assigned executive secretary and should be signed by the Chairperson. The minutes should contain the categorizations with basic rationale for such ratings and the significant strengths and weaknesses of the proposals evaluated.

# 404 CONTRACTOR EVALUATION PROCESS

use of the contractor 1 The support for obtaining method for evaluation purposes of proposals received in response to an Announcement of requires the specific Opportunity Associate the Program approval of

Administrator. Prior to the use of this method, discussion should be held with the Office of Procurement.

2. It is NASA policy to avoid situations in the procurement process where, by virtue of the work or services performed for NASA, or as a result of data acquired from NASA or from other entities, a particular company:

a. Is given an unfair competitive advantage over other companies with respect to future NASA business:

b. Is placed in a position to affect Government actions under circumstances in which there is potential that the company's judgment may be biased; or

c. Otherwise finds that a conflict exists between the performance of work or services for the Government in an impartial manner and the company's own self-interest.

3. To reduce the possibility of an organizational conflict of interest problem arising, the following minimum restrictions will apply and be incorporated into the contract:

a. No employee of the contractor will be permitted to propose in response to the Announcement of Opportunity;

b. The "Limitation on Future Contracting" clause contained in NASA FAR Supplement 18-52.209-71 and the conditions set forth in NASA FAR Supplement 18-15.413-2 Alternate II (c) and (d) will be included in all such contracts; and

c. Unless authorized by the NASA contracting officer, the contractor shall not contact the originator of any proposal concerning its contents.

4. The scope of work for the selected contractor will provide for an identification of strengths and

weaknesses and a summary of the proposals. The contractor will not make selections nor recommend investigations.

5. The steps to be taken in establishing evaluation panels and the responsibilities of NASA and the contractor in relation to the panels will be as follows:

a. The contractor will be required to establish and provide support to panels of experts for review of proposals to evaluate their scientific and technical merit;

b. These panels will be composed of scientists and specialists qualified to evaluate the proposals;

c. The agency may provide to the contractor lists of scientist(s) and specialist(s) in the various disciplines it believes are qualified to serve on the panels;

d. The contractor will report each panel's membership to NASA for approval; and

e. The contractor must make all the necessary arrangements with the panel members.

6. The evaluation support by the contractor's panels of experts will be accomplished as follows:

a. The panels will review the scientific and technical merit of the proposals in accordance with the evaluation criteria contained in the Announcement and will record their strengths and weaknesses.

b. The contractor will make records of each panel's deliberations which will form the basis for a report summarizing the results of the evaluations. Upon request, the contractor shall provide all such records to NASA;

c. The chairperson of each panel should certify that the evaluation report correctly represents the findings of the review panel; and d. A final report will be submitted as provided in the contract.

7. A subcommittee of the Program Office Steering Committee will be established оп an ad hoc basis. Utilizing furnished data. the subcommittee will classify the proposals into the four categories enumerated in paragraph 403, "Advisory Subcommittee Evaluation Process." A record of the deliberations of the subcommittee should be prepared by an assigned executive secretary and signed by the chairperson. The minutes should contain the categorizations with the basic rationale for such ratings and the significant strengths and weaknesses of the proposals evaluated.

# 405 GOVERNMENT EVALUATION PROCESS

1. The Program Associate Administrator may, in accordance with NMI 1150.2, appoint one or more full-time Government employees as subcommittee members of the Program Office Steering Committee to evaluate and categorize the proposals.

2. Each subcommittee member should be qualified and competent to evaluate the proposals in accordance with the Announcement evaluation criteria. It is important that a subcommittee's evaluation be uninfluenced by others either within or outside of NASA.

3. The subcommittee members will not contact the proposers for additional information.

4. The subcommittee members will classify the proposals in accordance with the four categories indicated in paragraph 403. Each categorization will be supported by an appropriate rationale including a narrative of each proposal's strengths and weaknesses.

# 406 ENGINEERING, INTEGRATION, AND MANAGEMENT EVALUATION

1 The subcommittee responsible for categorization of each proposal in terms of its scientific, applications, or merit should receive technical information on probable cost, technical status, developmental risk, integration and safety problems, and management arrangements in time for their deliberations.

2. This information should be provided, where appropriate, at the discretion of the Headquarters Program Office by the Project Office at the cognizant installation. This information can be in fairly gross, general terms and should reflect what insights the Project Office can provide without requesting additional details from the proposers. This limited Project Office review will not normally give the subcommittees information of significant precision. The purpose is to give the subcommittee sufficient information so it can review conjunction with the proposals in available cost, integration, and management considerations to gain an impression of each investigator's understanding of the problems of the experiment and to permit gross trade-offs of cost versus value of the investigation objective.

3. Following categorization, the Project Office shall evaluate proposals still in contention, in depth, including a thorough review of each proposal's engineering, integration, management, and cost aspects. This review should be accomplished by qualified engineering, cost, and business analysts at the project center. The review must be a regular part of the evaluation and selection process. 4. In assessing proposed costs, the evaluation must consider:

a. The investigation objective.

b. Comparable, similar or related investigations.

c. Whether NASA or the investigator should procure the necessary supporting instrumentation or services and the relative cost of each mode.

Total overall or probable **d**. to the Government including costs integration and data reduction and analysis. In the case of investigations proposed by Government investigators, this includes all associated direct and With indirect cost. respect to cooperative investigations. integration, and other applicable costs should be considered.

The Project Office, as part of 5. the in-depth evaluation of proposals that require instrumentation or support equipment, will survey all potential sources for Government-owned instrumentation or support equipment that may be available, with or without made the potential modifications. to investigator. Such items contributed by foreign cooperating groups which are still available under cooperative project agreements will also be considered for use under the terms and conditions specified in the agreements. As part of the evaluation report to the Program the availability Office. or nonavailability of instrumentation or support equipment will be indicated.

which 6. Proposals require instrumentation should be evaluated by project personnel. This evaluation should cover the interfaces and the assessment of development risks. This evaluation should furnish the selection official with sufficient data to contribute the instrument to determinations. Important among these are:

a. Whether the instrument requires further definition;

b. Whether studies and designs are necessary to provide a reasonably accurate appreciation of the cost;

c. Whether the investigation can be carried out without incurring undue cost, schedule, or risk of failure penalties; and

d. Whether integration of the instrument is feasible.

In reviewing an investigator's 7 management plan, the Project Office should evaluate the investigator's approach for efficiently managing the work, the recognition of essential management functions, and the effective overall integration of these functions. Evaluation of the proposals under final consideration should include, but not be limited to: workload--present and future related to capacity and capability; past experience; management approach and organization; e.g.;

a. With respect to workload and its relationship to capacity and capability, it is important to ascertain the extent to which the investigator is providing facilities of capable and personnel skills necessary to perform the required effort on a timely basis. This review should reveal the need for additional facilities people. and or provide some indication of the Government support the investigator will require.

h A review should be made of the investigator. the investigator's institution. and supporting any contractor's performance on prior investigations. This should assist in arriving at an assessment of the investigator and the institution's ability to perform the effort within the proposed cost and time constraints.

c. The proposed investigator's management arrangements should be reviewed, including make or buy choices, support of any co-investigator, and preselected subcontractors or other instrument fabricators to determine whether such arrangements are justified. The review should determine if the proposed management arrangements enhance the investigator's ability to devote more time to the proposed experiment objectives and still effectively employ the technical and administrative support required for a successful investigation. In making these evaluations, the Project Office should draw on the installation's engineering, business, legal, and other staff resources, as necessary, as well as scientific its resources. If further information is needed from the proposers. it should be obtained through the proper contacts.

# 407 PROGRAM OFFICE EVALUATION

A Program Office responsible 1. the project for or program at Headquarters will receive the evaluation of the several aspects of the proposals. and weigh the evaluative data to determine an optimum payload or program investigation. This of determination will involve recommendations concerning individual investigations; but. more importantly, should result in a payload or program which is judged to optimize total mission return within schedule. engineering, and budgetary constraints. The recommendations so made should facilitate sound selection decisions by the Program Associate Administrator. Three sets of recommendations result from the Program Office evaluation:

a. Optimum payload or program of investigations, or options for alternative payloads or programs.

Recommendation for final b. tentative selection based or on а determination of the degree of uncertainty associated with individual investigations. Α tentative selection may be considered step one of a two-step selection technique.

c. Upon consideration of the guidelines contained in paragraph 501lc, recommending responsibility for instrument development.

2. The cognizant Installation Project Office evaluation is principally concerned with ensuring that the proposed investigation can be managed, developed, executed with an integrated. and technical probability of appropriate success within the estimated probable cost. The Headquarters program Director, drawing upon these inputs, should be mainly concerned with determining a payload or program from the point of view of programmatic goals and budgetary constraints. Discipline and cost tradeoffs are considered at this level. The Headquarters Program Office should focus on the potential contribution to program objectives that can be achieved under alternative feasible payload integration options.

It may be to NASA's advantage 3. to consider certain investigations for tentative selection pending resolution of uncertainties in their development. Such selections should be tentative reconsidered after a period of time for final selection in a payload or program This two-step investigations. of selection process should be considered when:

a. The potential return from the investigation is sufficient, relative to that of the other investigations under consideration, and that its further development appears to be warranted before final selection.

b. The investigation potential is of such high priority to the program that the investigation should be developed for flight if at all possible.

c. The investigative area is critical to the program and competitive approaches need to be developed further to allow selection of the optimum course.

4. Based on evaluation of the above considerations associated with the investigations requiring further development of hardware, the following information should be provided to the Steering Committee and the Program Associate Administrator responsible for selection:

gain The expected in a. with potential return associated the incorporation of tentatively eventual investigations in the recommended payload(s) or program.

b. The expected costs required to develop instrumentation to the point of "demonstrated capability."

c. The risk involved in terms of added cost, probability of successfully developing the required instrument capability, and the possibility of schedule impact.

d. Identification of opportunities, if any, for inclusion of such investigations in later missions.

In those cases where investi-5. are tentatively selected, gations an explicit statement should be made of the process to be followed in determining the of program final payload or investigations and the proposers so two-phase selection informed. The approach provides the opportunity for development additional assurance of potential and probable cost prior to a full and final commitment to the investigation.

used in instruments 6. As investigations become increasingly complex and costly, the need for greater control of their development by the responsible Headquarters Program Office also grows. Accordingly, as an integral evaluation process, a part of the decision should be made deliberate regarding the role of the Principal to the with respect Investigator

18-70.103, App. I

provision of the major hardware associated with that person's investigation. The guidelines for the hardware acquisition determination are discussed in paragraph 501-1c.

7. The range of options for responsibility for the instrumentation consists of:

a. Assignment of full responsibility to the Principal Investigator. The responsibility includes all in-house or contracted activity to fabricate, test, calibrate and provide the instrumentation for integration.

b. Retention of developmental responsibility by the Government with participation by the Principal Investigator in key events defined for the program. In all cases the right of the Principal Investigator to counsel and recommend is paramount. Such involvement of the Principal Investigator may include:

(1) Provision of instrument specifications.

(2) Approval of instrument specifications.

(3) Independent monitorship of the development and advice to the Government on optimization of the instrumentation for conduct of the investigation.

(4) Participation in design reviews and all other appropriate reviews.

(5) Review and concurrence in changes resulting from design reviews.

(6) Participation in configuration control board actions.

(7) Advice in definition of test program.

(8) Review and approval of test program and changes thereto.

(9) Participation in conduct of the test program.

(10) Participation in calibration of instrument. (11) Participation in final inspection and acceptance of the instrument.

(12) Participation in subsequent test and evaluation processes incident to integration and flight preparation.

(13) Participation in the development and support of the operations plan.

(14) Analysis and interpretation of data.

8. Normally, the Principal Investigator should as a minimum:

a. Approve the instrument specification.

b. Consult and advise the project manager in development and fabrication.

c. Participate in final calibration of the instrument.

d. Develop and support the operations plan.

e. Analyze and interpret the data.

9. The cognizant Project Installation is responsible for implementing the program or project and should make recommendations concerning the appropriate role for the Principal Investigators. The responsible Program Associate Administrator will determine the role, acting upon the advice of the responsible Headquarters Program Office and the Steering Committee. The Principal Investigator's desires will be respected in the negotiation of the person's role allowing an avenue of appeal to the Program Associate Administrator and, of course, the right to withdraw from participation.

10. The Program Office responsible for the program should make a presentation to the Steering Committee with supporting documentation on the several decisions to be made by the

responsible Program Associate Administrator.

#### 408 STEERING COMMITTEE REVIEW

1. The most important role of the Steering Committee is to provide a substantive review of a potential payload or program of investigations and to recommend a selection to the Program Associate Administrator. The Steering Committee applies the collective experience and insight of representatives and discipline program from the communities and offers a forum for discussing the logic of the selection from those points of view. In addition mission-specific evaluation this to function, the Steering Committee provides subcommittee central guidance to chairpersons and serves 28 а clearinghouse for problems and complaints regarding the evaluation and selection process. The Steering Committee is responsible for assuring adherence to required procedures. Lastly, it is the forum where discipline objectives are weighed against program objectives and constraints.

2. The Steering Committee represents the means for exercising three responsibilities in the process of selecting investigations to:

a. Review compliance with procedures governing application of the investigation acquisition process.

b. Ensure that adequate and appropriate documentation has been made of the several steps in the evaluation process.

c. Review the results of the evaluation by the subcommittee, Project, and Program Offices and prepare an assessment or endorsement of a recommended payload or program of investigations to the Program Associate Administrator.

The purpose in exercising the 3. these responsibilities is to first of ensure equity and consistency in the application of the process. In this sense, the Steering Committee is intended the checks. provide necessary to coordination balances, reviews. and established through procedures and inherent in conventional controls acquisition practices.

third 4. The second and responsibilities of the Steering Committee are technical in nature. They require that the Steering Committee review the evaluations by subcommittee, the Project Office, and the Program Office in terms of their completeness and appropriateness for forwarding to the Program Associate Administrator. Most important in this review are:

a. Degree to which results of evaluations and recommendations follow logically from the criteria contained in the Announcement.

b. Consistency with objectives and policies generally beyond the scope of affected Project/Program Offices.

c. Sufficiency of reasons stated for tentative recommendations of those investigations requiring further instrument research and development.

d. Sufficiency of reasons stated for determining responsibilities for instrument development.

e. Sufficiency of consideration of reusable space flight hardware and support equipment for the recommended investigations.

f. Sufficiency of reasons given for classifying proposed investigations in their respective categories.

g. Fair treatment of all proposals.

5. The Steering Committee makes recommendations to the selection official

18-70.103, App. I

#### NASA FAR SUPPLEMENT (NFS)

on the payload or program of investigations and notes caveats or provisions important for consideration of the selection official.

## **409 PRINCIPLES TO APPLY**

1. Paragraph 408 contains a description of the evaluation function appropriate for a major payload or very significant program of investigation. The levels of review, evaluation, and refinement described should be applied in those selections where warranted but could be varied for less significant selection situations. It is essential to consider the principles of the several evaluative steps, but it may not be essential to maintain strict adherence to the sequence and structure of the evaluation system described. The selection official is responsible for determining the evaluation process most appropriate for the selection situation using this Chapter as a guide.

2. Significant deviations from the provisions of this Handbook must be fully documented and be approved by the Program Associate Administrator after concurrence by the Office of General Counsel and Office of Procurement.

18-70.103, App. I

# CHAPTER 5--THE SELECTION PROCESS

#### 500 GENERAL

The Program Associate Administrator is responsible for the final decision on those investigations to be selected for contract negotiation. This decision culminates the several types of evaluations and processes that can be summarized as follows:

| Evaluation<br><u>Stage</u>         | Principal<br><u>Emphasis</u>   | <u>Results</u>   |
|------------------------------------|--|--|
| Contractor<br>(when<br>authorized) | Summary<br>evaluation<br>(strengths<br>and weak-<br>nesses.  | Report to<br>Subcommittee.   |
| Subcommit-<br>tee                  | Science and<br>technologi-<br>cal rele-<br>vance,<br>value, and<br>feasibility.                                    | Categoriza-<br>tion of indi-<br>vidual pro-<br>posals.   |
| Project<br>Office                  | Engincering/<br>cost/inte-<br>gration/<br>management<br>assessment.  | Reports to<br>Subcommittee<br>and Program<br>Office.   |
| Program<br>Office                  | Consistency<br>with<br>Announce-<br>ment and<br>program<br>Objectives,<br>and cost<br>and schedule<br>constraints. | Recommenda-<br>tions to<br>Steering Com-<br>mittee of pay-<br>load or pro-<br>gram of inves-<br>tigations. |

| Steering  | Logic of    | Re  |

| Committee | proposed    | tio |
|           | selections  | gra |
|           | and compli- | Ad  |
|           | ance with   | tor |
|           | proper      |     |
|           | procedures. |     |

Recommendaions to Program Associate Administraor.

#### 501 DECISIONS TO BE MADE

1. The selection decisions by the Program Associate Administrator constitute management judgments balancing individual and aggregate scientific or technological merit, the contribution of the recommended investigations to the Announcement's objectives, and their consonance with budget constraints. In so doing, the selection official may develop such additional data to make the following decisions:

a. Determination of the adequacy of scientific/technical analysis supporting the recommended selections. This supporting rationale should involve considerations including:

(1) Assurance that the expected return contributes substantially to program objectives and is likely to be realized.

Assurance that the (2) evaluation criteria were applied proposed all consistently to investigations, thus ensuring that selection and rejection decisions are proper and fair.

(3) Assurance that the set of recommended investigations constitutes the optimum program or payload considering potential value and constraints.

(4) Assurance that only one investigator is assigned as the Principal Investigator to each investigation and that the Principal Investigator will assume the associated responsibilities and be the single point of contact and leader of any other investigators selected for the same investigation.

b. Determination as to whether available returned space hardware or support equipment, with or without modification, would be adequate to meet or support investigation objectives.

Determination c. as to whether the proposed instrument fabricator qualifies and should he accepted as a sole source or whether the requirement should be subjected to competitive solicitation. The following guidelines apply:

(1) The hardware requirement should be subjected to competitive solicitation in those instances where it is clear that the capability is not sufficiently unique to justify sole source procurement.

(2) The hardware requirement should be purchased from the fabricator proposed by the investigator, which may be the investigator's own institution, (a) when the fabricator's proposal contains technical data that are not available from another source, and it is not feasible or practicable to define the fabrication requirement in such a way as to avoid the necessity of using the technical data contained in the proposal: (b) when the fabricator offers unique capabilities that are not available from another source: (c) when the selection official determines as part of the selection that the hardware of the fabricator particular contributes 50 significantly the value of to the investigator's proposal as to be an integral part of it.

(3) If a producer other than the one proposed by the investigator offers unique capabilities to produce the hardware requirement, NASA may buy the hardware from the qualified fabricator.

(4) If a NASA employee submits a proposal as a principal investigator, any concomitant requirement

for hardware necessary to perform the investigation must, in accordance with CICA. either be competed bv the installation procurement office or, should it be determined that the hardware is so unique as to constitute a sole source, a justification must be written. synopsized, and approved in accordance with the requirements of FAR and the NFS.

d. Determination of the desirability for tentative selection of investigations. This determination involves considerations including:

(1) Assessment of the state of development of the investigative hardware, the cost and schedule for development in relation to the gain in potential benefits at the time of final selection.

(2) Assurance that there is adequate definition of investigation hardware to allow parallel design of other project hardware.

(3) Assurance that approprocedures priate management are contained in the project plan for reevaluation and final selection (or rejection) on an appropriate time scale.

of e. Determination the acceptability of the proposer's management plan, including the proposed hardware development plan, and the necessity, if any, of negotiating modifications to that plan.

2. In the process of making the above determinations described in subparagraph 1, the Program Associate Administrator may request additional evaluations. information or In most instances, this information can be provided bγ the Program Office responsible for the mission, project, or program. However, where it is determined appropriate. the Program Associate Administrator may reconvene the subcommittee or poll the members individually or provide for additional analysis or require additional data from evaluators or proposers as considered

necessary to facilitate the Program Associate Administrator's decision.

#### **502 THE SELECTION STATEMENT**

Upon completion of deliberations, the responsible Program Associate Administrator shall issue a selection statement. Ordinarily this statement will, upon request, be releasable to the public. As a minimum, the selection statement should include:

1. The general and specific evaluation criteria and relative importance used for the selection.

2. The categorizations provided by the subcommittee and the basic rationale for accepting or not accepting each Category I proposal and a succinct statement concerning the nonacceptance of all other proposals.

3. A concise description of each investigation accepted including an indication as to whether the selection is a partial acceptance of a proposal and/or a joinder with other investigators.

4. The role of the Principal Investigator with regard to hardware essential to the investigation and whether the Principal Investigator will be responsible for hardware acquisition and the basis therefor.

5. An indication of the plan and acquisition using the regular procurement processes, if the Principal Investigator is not to acquire the hardware.

6. A statement indicating whether the selection is final or tentative, recognizing the need for better definition of the investigation and its cost. 7. A statement indicating any use of Government-owned available space flight hardware and/or support equipment.

#### **503 NOTIFICATION OF PROPOSERS**

1. It is essential that investigators whose proposals are determined to have no reasonable chance for selection be apprised of that fact as soon as practicable. To this end, the responsible Program Office will, upon determination, promptly notify such investigators of that fact together with an exposition of the major reason(s) why the proposals were so considered. The notification letter should also inform such investigators that they may obtain a detailed oral debriefing provided they request it in writing. The letter should point out that such a debriefing would be available only after completion of the selection process and would otherwise be conducted in accordance with NASA regulations (NASA FAR Supplement). (See paragraph 504.)

2. As a result of the selection decisions made by the Program Associate Administrator, letters of notification will be sent to those Principal participate. selected to Investigators This notification letter should not commit the agency to more than for the selected negotiations investigation leading to a contract, but it should clearly indicate the decision made and contain:

a. A concise description of the Principal Investigator's investigation as selected, specifically noting substantive changes, if any, from the investigation originally proposed by the Principal Investigator.

b. The nature of the selection, i.e., whether it should be considered final or tentative requiring additional hardware or cost definition.

c. A description of the anticipated role of the Principal

Investigator including the responsibility for the provision of instruments for flight experiments.

d. Identification of the principal technical and management points to be treated in subsequent negotiations.

e. Any rights to be granted on use of data, publishing of data, and duration of use of the data.

f. Where applicable, indication that a foreign selectee's participation in the program will be arranged between the International Affairs Division, Office of External Relations, and the foreign government agency which endorsed the proposal.

3. In conjunction with the notification successful of foreign proposers, the Program Office shall forward a letter to the responsible International Affairs Division, Office of Relations, External addressing the following:

a. The overall scientific technological objective of the planned effort.

b. The period of time during which the effort is planned.

c. The respective responsibilities of NASA and of the sponsoring (endorsing) governmental agency; these may include:

(1) Provision and subsequent disposition of hardware and software.

(2) Responsibilities for reporting, reduction and dissemination of data.

(3) Responsibilities for transportation of hardware.

d. Any additional information pertinent to the successful conduct of the experiment.

4. Using the information provided in subparagraph 3, the International Affairs Division, Office of External Relations will prepare and negotiate an agreement with the sponsoring foreign agency.

Notices shall also be sent to 5. those proposers not previously notified pursuant to the preceding paragraphs. and, as applicable, a copy to the sponsoring foreign government agency. It is important that these remaining proposers be informed at the same time as selected. those Other agency notifications and press release procedures will apply, as appropriate.

# 504 DEBRIEFING

It is the policy of the National Aeronautics and Space Administration to debrief, if requested, unsuccessful proposers of investigations in accordance with NFS 18-15.1003. The following considerations are offered in arranging and conducting debriefings:

1. Debriefing should be carried out by an official designated by the responsible Program Associate Administrator. Any other personnel receiving requests for information concerning the rejection of a proposal should refer to the designated official.

2. Debriefing of unsuccessful offerors should be made at the earliest possible time; debriefing will generally be scheduled subsequent to selection but prior to award of contracts to the successful proposers.

3. Material discussed in debriefing should be factual and wholly consonant with the documented findings of several stages of the evaluation process and the selection statement.

4. The debriefing official should advise of weak or deficient areas in the proposal, indicate whether those weaknesses were factors in the selection, and advise of the major considerations in

selecting the competing successful proposer where appropriate.

5. The debriefing official should not discuss other unsuccessful proposals, ranking, votes of members, or attempt to make a point-by-point comparison with successful proposals.

6. A memorandum of record of the debriefing should be provided the Chairperson of the Steering Committee.

# CHAPTER 6--PAYLOAD FORMULATION

## 600 PAYLOAD FORMULATION

Payload elements for Space 1. Transportation System (STS) missions can come from many sources. These include those selected through Announcements of Opportunity, those generated by in-house research and funded through the Research and Technology Operations and Plans (RTOP) procedures, unsolicited (domestic and foreign) proposals and those derived from agreements between NASA and Missions may have external entities. payload elements originating from any or all of these sources. However, it is anticipated that the primary source of NASA pavload elements will be the Announcement Generally, process. proposals for payload elements submitted outside the Announcement process will not be selected if they would have been responsive to a stated Announcement objective.

2. Payload elements for STS flights fall into two major categories. "NASA or NASA-related" payload elements are those which are developed by a NASA Program Office or by another party with which NASA has a shared interest. "Non-NASA" payload elements are those which require only STS operation services from NASA and hence interface with NASA through the Office of Space Flight.

3. In general, a Program Office will be designated to be responsible for formulating the "NASA or NASA-related" portion of an STS payload. The Office of Space Flight will be responsible for formulating the "non-NASA" portion of an STS payload. Flights may, of course, consist wholly of payload elements of either type defined in subparagraphs 1 and 2. Resource allocation for mixed missions will be determined jointly by the designated Program Office and the Office of Space Flight.

## CHAPTER 7--PROCUREMENT AND OTHER CONSIDERATIONS

## 700 EARLY INVOLVEMENT ESSENTIAL

1. The distinctive feature of the Announcement of Opportunity process is that it is both a program planning system and a procurement system in one single of what procedure. The choice aeronautical and space phenomena to planning. investigate is program Procurement is involved with the purchase of property and services to carry out the selected investigations.

Because of both the program-2. matic and multi-functional aspects of the Announcement of Opportunity process, early involvement of external program office elements is essential. Success of the process requires that it proceed in a manner that meets program goals and is with in line statutory clearly and sound procurement requirements policy.

The planning preparation and 3. selection schedule for the investigation should commence early enough to meet the and regulatory present statutory requirements. Chief of these are the requirements for soliciting maximum feasible competition and for conducting discussions with offerors within the competitive range by the Project Office and/or any other evaluation group or office authorized by the selection official.

# 701 NEGOTIATION, DISCUSSIONS, AND CONTRACT AWARD

Indicated below are some of the major procurement procedures that need to be accomplished or performed to assure uniformity and sufficiency in the acquisition of investigations. These areas are not exclusive and not intended to substitute for adequate coordination and good judgment before issuance of the Announcement, during evaluation of proposals, and prior to contract award.

As negotiated procurements must 1. be made by soliciting proposals from the maximum number of qualified sources the requirement, the consistent with Announcement of Opportunity must also be synopsized in the Commerce Business Daily. Responses to the synopsis must be added to the Announcement mailing list. Every effort should be made to publish opportunities far enough in advance to encourage a broad response. (In no case less than 45 days before the date set for receipt of proposals).

2. Significant items for consideration after receipt of proposals:

a. Late Proposals--The NASA policy on late proposals contained in the NASA FAR Supplement (NFS 18-15.412) is proposals received in to applicable Announcement of response to an Opportunity. Potential investigators should be informed of this policy. In the Announcement of Opportunity context, the selection official or designee will determine whether a late proposal will be considered.

# b. Competitive Considerations

(1) The acquisition of investigations involves the solicitation of unique, novel, and unspecified ideas to meet NASA's aeronautical and space responsibilities. The proposals submitted in response to these solicitations are not necessarily fully comparable. novel discrete. Rather these are scientific and technical investigative associated with limited ideas а Although not necessarily opportunity. fully comparable, all proposals within the scope of a specified opportunity must nevertheless be evaluated in accordance

with the criteria stated in the Announcement.

(2) Cost must be considered in the evaluation if costs are involved in the investigation. Accordingly, general cost information should be given to the subcommittee by the Installation Project Office for use in determining the categories into which the subcommittee places proposals.

(3) Further information should be obtained, as necessary, by the Installation Project Office and/or any other evaluation group or office authorized by the selection official and from the investigators whose proposals are still being considered. This would be similar to the regular procurement procedure for conducting written and oral discussions. Α major consideration during discussions is to avoid unfairness and unequal treatment. Obviously, good judgment is required by all concerned in the extent and content of the discussions. There should he no reluctance in obtaining the advice and guidance of management and staff offices during the discussion phase. A summary should be prepared of the primary points covered in the written and oral discussions and show the effect of the discussions on the evaluation of This proposals. summary should also contain general information about the questions submitted to the investigators, the amount of time spent in oral discussion, and revisions in proposals, if any, resulting from the discussions.

(4) During the conduct of all proposers still being discussions, considered shall be offered an equitable submit such opportunity to cost. technical, or other revisions in their proposals as may result from the proposers discussions. All shall he informed that any revisions to their proposals must be submitted by a common cut-off date in order to be considered. The record should take note of compliance of the investigators with that cut-off date.

3. Significant items for consideration before award:

a. Issuance of a Request for Proposal (RFP)--A formal RFP should not be issued to obtain additional information on proposals accepted under the Announcement of Opportunity process. Additional technical, cost, or other data received should be considered as a supplement to the original proposal.

Selection of Investigator/ Ъ. Contractor-The selection decision of the **Program Associate Administrator approves** selected investigators the and their institutions as the only satisfactory for the investigations. sources The selection of the investigator does not constitute the selection of that person's proposed supporting hardware fabricator selection official unless the specifically incorporates the fabricator in the selection decision.

# 702 APPLICATION OF THE FEDERAL ACQUISITION REGULATION (FAR) AND THE NASA FAR SUPPLEMENT (NFS)

The Announcement of Opportunity process supplants normal procurement procedures only to the extent necessary to meet the distinctive features of the process that it is both a program planning system and a procurement system in a procedure. This process single is intended conflict not to with any established statutory requirements. The FAR, the NFS, and related procurement directives should be referred to for guidance and clarification in those instances where specific instructions are not contained in this Handbook.

# 703 OTHER ADMINISTRATIVE AND FUNCTIONAL REQUIREMENTS

After selection, all other applicable administrative and functional

requirements will be complied with or incorporated in any resultant contract. These may include requirements contained in such publications as NHB 5300.4(1B), "Quality Program Provisions for Aeronautical and Space System Contractors," and NHB 9501.2, "Procedures for Contractor Reporting of Correlated Cost and Performance Data."

~\_...

## APPENDIX A: FORMAT OF ANNOUNCEMENT OF OPPORTUNITY (AO)

\* \* \*

OMB Approval Number 2700-0042

# NATIONAL AERONAUTICS AND SPACE ADMINISTRATION Washington, DC 20546

# ANNOUNCEMENT OF OPPORTUNITY

A0 No. \_\_\_\_\_ (Issuance Date)

#### (DESCRIPTIVE HEADING)

#### I. Description of the Opportunity

This section should set forth the basic purpose of the Announcement and describe the opportunity in terms of NASA's desire to obtain proposals which will meet the applications stated scientific, and/or objectives. These objectechnological tives may be directed to the generation of proposals for investigations and/or they may pertain to the acquisition of dissimilar ideas leading to selection of guest observers, investigators, guest investigators, or theorists; and/or any other approved area as identified in NHB 8030.6. In those instances wherein proposals for investigations are sought, should describe the this section for selected requirement, if any, investigators to serve on advisory or working groups. In those instances where the project or program has not yet been appropriate qualifying approved, an statement should be included to clearly indicate that this Announcement of does not constitute an **Opportunity** obligation on the part of the Government proposed effort carry the to to completion.

#### II. Announcement Objectives

This section will give a succinct statement of the specific scientific, applications, and/or technological objective(s) for the opportunity(s) for which proposals are sought.

#### III. Background

This section should provide an explanation of the context of the opportunity, i.e., information which will the reader to understand the help relevance of the opportunity in relation to broader objectives. For example, if the opportunity is related to a specific mission, this section should so indicate and provide information regarding the mission objectives. If, on the other hand, the opportunity is not related to a specific mission (for example, where the opportunity is discipline-oriented), this section should reflect that fact and provide information which will give the reader insight into the circumstances which have given rise to the opportunity and its relevance to the general scheme of things. Information on prior studies their availability should. if and relevant to an understanding of the opportunity, be disclosed here.

#### IV. Proposal Opportunity Period

This section should inform the reader of the proposal opportunity period(s). The following methods may be utilized individually or in conjunction for establishing the proposal opportunity period(s):

1. The Announcement may be issued establishing a single date by which proposals may be received. However, the Announcement could provide that the agency may amend the AO to provide for subsequent dates for submission of proposals, if additional investigations

#### NASA FAR SUPPLEMENT (NFS)

are desired. In this case, the initiative reopen is to an agency management determination and if sufficient investigations were selected for the Announcement objectives or flight possibilities. subsequent opportunities for proposal submission by potential investigators would not be available.

2. The Announcement may be issued to provide for an initial submission date with the AO to remain open for submission of additional proposals up to a final cutoff date. This final date should be related to the availability of resources necessary to evaluate the continuous flow of proposals and the time remaining prior to the flight opportunities contemplated by the Announcement.

The Announcement may be issued 3. establishing a number of dates by which proposals may be received. Normally no more than three proposal submission dates should be established. The submittal dates may be spread over the number of months most compatible with the possible flight opportunities and the availability of resources necessary to evaluate and fund the proposal. If desired, this section should further inform the reader that if a proposal receives a Category I, II, or III rating but is not selected for immediate support, the proposal may, if desired by the proposer, be held by NASA for later consideration within the ground rules set forth in paragraphs 1 and 2. The section should inform the reader that if the person wishes the proposal to be so treated, it should be indicated in the proposal. This section should further indicate that offerors whose proposals are to be considered at a later time will be given the opportunity to revalidate their proposals with their institution and update cost data.

#### V. Requirements and Constraints.

1. This section will include technical, programmatic, cost, and

schedule requirements or constraints, as applicable, and will specify performance limits such lifetime. as flight reliability, environment. safety, and quality assurance provisions for flightworthiness. It will specify the requirements and constraints related to the flight crew and the ground support. It will also include requirements for data analysis, estimated schedule of data shipment to user or observer, need for preliminary or raw data analysis and interim reports. It will specify planned period (time) for data analysis to be used for budgeting. It will provide any additional information necessary for a meaningful proposal.

2. When NASA determines that ground instrumentation. support equipment, or NASA supporting effort will be required or may be expected to be required by the contemplated investigations, the Announcement should indicate to the potential investigators that thev must submit specific information regarding this requirement to allow an in-depth evaluation of the technical aspects, cost, management, and other factors by the Installation Project Office.

#### VI. Proposal Submission Information.

1. **Preproposal Activities--**In this section, the Announcement will indicate requirements and activities such as the following:

a. Submittal of "Notice of Intent" to propose (if desired), date for submission, and any additional required data to be submitted. Indicate whether there are information packages which will only be sent to those who submit "Notice of Intent."

b. Attendance at the preproposal conference (if held). Information should be provided as to time, place, whether attendance will be

restricted in number from each institution, and whether prior notice of intention to attend is required. If desired, a request may be included that questions be submitted in writing several days before the conference in order to prepare replies.

c. The name and address of the scientific or technical contact for questions or inquiries.

d. Any other preproposal data considered necessary.

2. Format of Proposals--This section should provide the investigator with the information necessary to enable an effective evaluation of the proposal. The information is as follows:

Proposal-The Announceа. ment should indicate how the proposal facilitate should be submitted to The proposal should be evaluation. submitted in at least two sections; (1) Investigation and Technical Section; and (2) Management and Cost Section.

b. Certification--The proposal must be signed by an institutional official authorized to certify institutional support, sponsorship of the investigation, management, and financial aspects of the proposal.

c. Quantity--The number of copies of the proposal should be specified. One copy should be clear black and white, and on white paper of quality suitable for reproduction.

d. Submittal Address--Proposals from domestic sources should be mailed to arrive not later than the time indicated for receipt of proposals to:

National Aeronautics and Space Administration Office of (Program) Code \_\_\_\_\_ AO No. \_\_\_\_\_ Washington, DC 20546

e. Format--To aid in proposal evaluation, and to facilitate comparative analysis, a uniform proposal format will be required for each Announcement. The number of pages, page size, and restriction on photo reduction, etc., may The format he included therein. contained in Appendix C can be used as a guide. Proposers may be requested to respond to all of the items contained therein or the Announcement may indicate selected items need that only be addressed. Using the Appendix format as guide, specific guidelines may be a prepared for the Announcement or an appropriate form developed. The major consideration is that all proposals be received in a similar format.

3. Additional Information--This section may be used to request or furnish data considered necessary to obtain clear and concise proposals that should not require further discussions with the proposer by the evaluators. Any other pertinent data could also be included in this section, such as significant milestones.

4. Foreign Proposals--The detailed procedures for submission of proposals from outside the U.S. are contained in Appendix B, "General Instructions and Provisions." This section will describe any additional requirements, for example, if information copies of proposals are required to be furnished by the proposer to other organizations, such as European Space Agency (ESA), at the same time the proposal is sent to NASA, this should be indicated here.

5. Cost Proposals (U.S. Investigators Only)--This section defines any special requirements regarding cost proposals of domestic investigators. Reference then should be made to the cost proposal certifications indicated in Appendix B, "General Instructions and Provisions."

VII. Proposal Evaluation, Selection, and Implementation.

## 1. Evaluation and Selection Procedure.

a. This section should notify the proposers of the evaluation process, i.e., advisory subcommittee, government evaluation and/or contractor assistance.

b. For example, a statement similar to the following should be included:

"Proposals received in response to this Announcement of Opportunity will be reviewed by a subcommittee appointed by the (appropriate Program Associate Administrator). The purpose of the review is to determine the scientific/technical merit of the proposals in the context of this Announcement of Opportunity and so categorize the proposals. Those proposals which are considered to have the greatest scientific/technical merit are further reviewed for engineering, integration, management, and cost aspects by the Project Office at responsible the installation for the project. On the basis of these reviews, and the reviews of the responsible Program Office and the Committee. Steering the Program Associate (appropriate Administrator) will appoint/select the investigators/investigations."

## 2. Evaluation Criteria.

a. This section should indicate that the selection of proposals which best meet the specific scientific, applications, and/or technological objectives, as stated in the Announcement, is the fundamental aim of the solicitation. This section should then list the criteria to be used in the evaluation of proposals and indicate their relative importance. See paragraph 401, NHB listing 8030.6, for a of criteria generally appropriate.

Following a listing of the b. indication of their criteria and an importance, this section will relative also inform the proposers that cost and management factors, e.g., proposed small business participation in instrumentation or investigation fabrication support. will be separately considered.

## VIII. Schedule.

This section should include the following, as applicable:

1. Preproposal conference date.

2. Notice of Intent submittal date.

3. Proposal submittal date(s).

4. Target date for announcement of selections.

IX. Appendices.

1. General Instructions and Provisions (must be attached to each Announcement).

2. Other Pertinent Data, e.g., Spacelab Accommodations Data.

/s/ Associate Administrator for (Program)

## APPENDIX B: GENERAL INSTRUCTIONS AND PROVISIONS

## I. Instrumentation and/or Ground Equipment

the submitting proposal, By а investigator and institution agree that NASA has the option to accept all or part of the offeror's plan to provide the ground support instrumentation ог equipment required for the investigation or NASA may furnish or obtain such instrumentation or equipment from any other source as determined by the selecting official. In addition, NASA reserves the right to require use, by the of Government selected investigator, instrumentation or property that subsequently becomes available, with or without modification, that will meet the investigative objectives.

## II. Tentative Selections, Phased Development, Partial Selections, and Participation with Others

Bv submitting а proposal, the investigator and the organization agree that NASA has the option to make a tentative selection pending a successful feasibility or definition effort. NASA has the option to contract in phases for a proposed experiment, and to discontinue effort the the investigative at phase. any The completion of investigator should also understand that NASA may desire to select only a portion of the proposed investigation and/or that NASA may desire the individual's participation with other investigators in a joint investigation, in which case the will given the investigator be opportunity to accept or decline such partial acceptance or participation with other investigators prior to a NASA participation Where with selection. other investigators as a team is agreed to, one of the team members will normally be designated as its team leader or contact point.

#### III. Selection Without Discussion

The Government reserves the right to reject any or all proposals received in response to this Announcement when such action shall be considered in the best interest of the Government. Notice is also given of the possibility that any selection may be made without discussion (other than discussions conducted for the purpose of minor clarification). It is therefore emphasized that all proposals should be submitted initially on the most favorable terms that the offeror can submit.

#### IV. Foreign Proposals

See Appendix C, Section II, paragraph 3.

#### V. Treatment of Proposal Data

It is NASA policy to use information contained in proposals and quotations for evaluation purposes only. While this policy does not require that the proposal or quotation bear a restrictive notice, offerors or quoters should, in order to maximize protection of trade secrets or other information that is commercial or financial and confidential or privileged, place the following notice on the title page of the proposal or quotation and specify the information, subject to the appropriate inserting notice by identification, such as page numbers, in the notice. In any event, information contained in proposals and (data) will be protected to the auotations extent permitted by law, but NASA assumes no liability for use and disclosure of information not made subject to the notice.

## RESTRICTION ON USE AND DISCLOSURE OF PROPOSAL AND QUOTATION INFORMATION (DATA)

The information (data) contained in finsert page numbers or other identification] of this proposal or quotation constitutes a trade secret and/or information that is commercial or financial and confidential or privileged. It is furnished to the Government in confidence with the understanding that it will not. without permission of the offeror, be used or disclosed for other than evaluation purposes: provided. however, that in the event a contract is awarded on the basis of this proposal or quotation the Government shall have the right to use and disclose this information (data) to the extent provided in the contract. This restriction does not limit the Government's disclose right to use ٥r this information (data) if obtained from another source without restriction.

# VI. Status of Cost Proposals (U.S. Proposals Only)

The investigator's institution agrees that the cost proposal submitted in response to the Announcement is for evaluation proposal and selection purposes, and that following selection and during negotiations leading to a definitive contract, the institution will be required to resubmit or execute a Standard Form (SF) Form 1411 "Contract Pricing Proposal Cover Sheet" and all certifications and representations required by law and regulation.

## VII. Late Proposals

The Government reserves the right to consider proposals or modifications thereof received after the date indicated for such purpose, should such action be in the interest of the Government.

## VIII. Source of Space Transportation System Investigations

Investigators are advised that candidate investigations for Space Transportation System (STS) missions can come from many sources. These sources include those selected through the Announcement of Opportunity, those generated by NASA inhouse research and development, and those and derived from contracts other agreements between NASA and external entities.

## IX. Disclosure of Proposals Outside Government

NASA may find it necessary to obtain proposal evaluation assistance outside the Government. Where NASA determines it is necessary to disclose a proposal outside the Government for evaluation purposes, arrangements will be made with the evaluator for appropriate handling of the proposal information. Therefore, by submitting a proposal the investigator and institution agree that NASA may have the proposal evaluated outside the Government. If the investigator or institution desire to preclude NASA from using ап outside evaluation. the investigator institution or should SO indicate on the cover. However, notice is given that if NASA is precluded from using outside evaluation, it may be unable to consider the proposal.

## X. Equal Opportunity (U.S. Proposals Only)

By submitting a proposal, the investigator and institution agree to

accept the the following clause in any resulting contract:

#### EQUAL OPPORTUNITY

During the performance of this contract, the Contractor agrees as follows:

1. The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin.

2. The Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their color, religion, sex, or race. national origin. This shall include, but not be limited to, (a) employment, (b) upgrading, (c) demotion, (d) transfer, (e) recruitment or recruitment advertising, (f) layoff or termination, (g) rates of pay or other forms of compensation, and (h) selection for training, including apprenticeship.

3. The Contractor shall post in conspicuous places available to employees and applicants for employment the notices to be provided by the Contracting Officer that explain this clause.

4. The Contractor shall, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

5. The Contractor shall send each labor union to or of representative workers with which has collective it a agreement or other bargaining contract or understanding the notice to be provided by the Contracting Officer, advising the union or workers' labor representative of the Contractor's commitments under this clause, and post copies of the notice in conspicuous places available to employees and applicants for employment.

6. The Contractor shall comply with Executive Order 11246, as amended, and the rules, regulations, and orders of the Secretary of Labor.

The 7. Contractor shall furnish to the contracting agency information required all bv Executive Order 11246, as amended, and by the rules, regulations, and orders of the Secretary of Labor. Standard Form 100 (EEO-1), or any successor form, is the prescribed form to be filed within 30 days following the award, unless filed within 12 months preceding the date of award.

8. The Contractor shall permit access to its books, records, and accounts by the contracting agency or the Office of Federal Compliance Contract Programs (OFCCP) for the purposes of investigation to ascertain the Contractor's compliance with the applicable rules, regulations, and orders.

9. If the OFCCP determines that the Contractor is not in compliance with this clause or any rule, regulation, or order of the Secretary of Labor, the contract

45

may be cancelled, terminated, or suspended in whole or in part, and the Contractor may be declared ineligible for further Government contracts, under the procedures authorized in Executive Order 11246, as amended. In addition, sanctions may be imposed and invoked remedies against the Contractor as provided in Executive Order 11246, as amended, the rules, regulations, and orders of the Secretary of Labor, or as otherwise provided by law.

Contractor 10. The shall include the terms and conditions of subparagraph 1 through 9 of this clause in every subcontract or purchase order that is not exempted by the rules, regulations, οr orders of the Secretary of Labor issued under Executive Order 11246, as amended, so that these terms and conditions will be binding upon each subcontractor or vendor.

11. The Contractor shall take such action with respect to any subcontract or purchase order as the contracting agency may direct as means of enforcing these terms and conditions, including sanctions for non-compliance; provided, that if the Contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of direction, the Contractor may request the United States to enter into the litigation to protect the interests of the United States.

## XI. Patent Rights

1. For any contract resulting from this solicitation awarded to other than a small business firm or nonprofit organization, the clause at NFS 18-52.227-70, "New Technology," shall apply. Such contractors may, in advance of contract, request waiver of rights as set forth in the provision at NFS 18-52.227-71, "Requests for Waiver of Rights to Inventions."

2. For any contract resulting from this solicitation awarded to a small business firm or nonprofit organization, the clause at FAR 52.227-11, "Patent Rights--Retention by the Contractor (Short Form)" (as modified by NFS 18-52.227-11), and the clause at NFS 18-52.227-73, "Patent Rights Clause for Subcontracts," shall apply.

## APPENDIX C: GUIDELINES FOR PROPOSAL PREPARATION

The following guidelines apply to the preparation of proposals by potential investigators in response to an Announcement of Opportunity. The material presented is merely a guide for the prospective proposer and not intended to encompassing be all or directly applicable to the various types of proposals which can be submitted. The proposer should. however. provide information relative those to items applicable or as otherwise required by the Announcement of Opportunity.

#### I. Cover Letter

A letter or cover page should be forwarded with the proposal. It should be signed by the investigator and an official by title of the investigator's organization who is authorized to commit the organization that is responsible for the proposal and its contents.

## II. Table of Contents

The proposal should contain a table of contents.

# III. Identifying Information

The proposal should contain a short descriptive title for the investigation, the names of all investigators, the name of the organization or institution and the full name, address, and telephone number of the Principal Investigator.

#### **SECTION I**

## INVESTIGATION AND TECHNICAL PLAN

### 1. INVESTIGATION AND TECHNICAL PLAN

The investigation and technical plan generally will contain the following:

a. Summary. A simple, concise statement about the investigation, its conduct, and the anticipated results.

b. Objective and Significant Aspects. A brief definition of the objectives, their value, and their relationships to past, current, and future effort. The history and basis for the proposal and a demonstration of the need for such an investigation. A statement of present development in the discipline field.

c. Investigation Approach

(1) Fully describe the concept of the investigation.

(2) Detail the method and procedures for carrying out the investigation.

#### 2. INSTRUMENTATION

This section should describe all information necessary to plan for experiment development, integration, ground operations, and flight operations. This section must be complete in itself without need to request additional data. Failure to furnish complete data may preclude evaluation of the proposal.

a. Instrument Description--This section should fully describe the instrumentation and indicate items which are proposed to be developed as well as any existing instrumentation. Performance characteristics should be related to the experiment objectives as stated in the proposal.

Instrument h Integration--This section should describe all parameters of the instrument pertinent to the accommodation of the instrument in the spacecraft. Spacelab. Shuttle Orbiter, Space Station, etc. These include, but are not limited to volumetric envelope; weight; power requirements; thermal requirements; telemetry requirement; sensitivity to or generation of contamination (e.g., EMI gaseous effluents); data processing requirements.

c. Ground Operations--This section should identify requirements for pre-launch or post-launch ground operations support.

d. Flight **Operations**--This section should identify any requirements for flight operations support including mission planning. Operational constraints. viewing requirements, and pointing requirements should also be identified. Details of communications needs, tracking needs, and special techniques. such **a** s extravehicular activity or restrictions in the use of control thrusters at stated times should be delineated. Special communications facilities that are needed must be described. Anv special orbital requirements, such as time of month, of day, phase of moon, and lighting conditions are to be given in detail. Describe real-time ground support requirements and

indicate any special equipment or skills required of ground personnel.

# 3. DATA REDUCTION AND ANALYSIS

A discussion of the data reduction and analysis plan including the method and format. A section of the plan should include a schedule for the submission of reduced data to the receiving point. In the case of Space Science programs, the National Space Science Data Center, Greenbelt. MD. will be the repository for such data and the Department of Interior. Sioux Falls, SD, for earth observations data.

## 4. ORBITER CREW AND/ OR PAYLOAD SPECIALIST TRAINING REQUIREMENT

A description of the tasks required of each crew member (Commander, Pilot. Mission Specialist) or pavload specialist should he provided, including the task duration and equipment involved. Indicate special training necessary to provide the crew members or pavload specialist(s) with the capability for performing the aforementioned tasks.

## SECTION II

## MANAGEMENT PLAN AND COST PLAN

## A. MANAGEMENT PLAN

The management plan should summarize the management approach and the facilities and equipment required. Additional guidelines applicable to non-U.S. proposers are contained herein:

## I. MANAGEMENT

a. The management plan sets forth the investigator's approach for managing the work, the recognition of essential management functions, and the overall integration of these functions.

The management plan gives b. insight into the organization proposed for the work, including the internal operations and lines of authority with delegations. together with internal interfaces and relationships with the NASA major subcontractors and associated investigators. Likewise. the management plan usually reflects various schedules necessary for the logical and timely pursuit of the work accompanied by a description of the investigator's work plan and the responsibilities of the coinvestigators.

c. The plan should describe the proposed method of instrument acquisition. Specifically, it should include the following, as applicable.

(1) Rationale for the investigator to obtain the instrument through or by the investigator's institution.

(2) Method and basis for the selection of the proposed instrument fabricator.

(3) Unique or proprietary capabilities of the instrument fabricator that are not available from any other source.

(4) Contributions or characteristics of the proposed fabricator's instrument that make it an inseparable part of the investigation.

of (5) Availability personnel in the supporting institution to successfully administer the instrument contract and technically monitor the fabrication.

(6) Status of development of the instrument. What additional development is needed. Areas that need further design or in which unknowns are present.

(7) Method by which the investigator proposes to:

(a) Prepare instrument specifications.

(b) Review development progress.

(c) Review design and fabrication changes.

(d) Participate in testing program.

(e) Participate in final checkout and calibration.

(f) Provide for integration of instrument.

(g) Support the flight operations.

(h) Coordinate with co-investigators, other related investigations, and the payload integrator.

(i) Assure safety, reliability, and quality.

(j) Provide required support for Payload Specialist(s), if applicable.

(8) Planned participation by small and/or minority business in any subcontracting for instrument fabrication or investigative support functions.

## 2. FACILITIES AND EQUIPMENT

All major facilities, laboratory equipment. and ground-support equipment (GSE) (including those investigator's the proposed of contractors and those of NASA and other U.S. Government agencies) essential to the experiment in terms of its system and subsystems are to be indicated, distinguishing insofar as possible between those already in existence and those that

will be developed in order to investigation. execute the The outline of new facilities and equipment should also indicate the lead time involved and the planned construction. schedule for modification, and/or acquisition of the facilities.

## 3. ADDITIONAL GUIDELINES APPLICABLE TO NON-U.S PROPOSERS ONLY

The following guidelines are established for foreign responses to NASA's Announcement of Opportunity. Unless otherwise indicated in a specific announcement, these guidelines indicate the appropriate measures to be taken by foreign proposers, prospective foreign sponsoring agencies, and NASA leading to the selection of a proposal and execution of appropriate arrangements. They include the following:

Where a "Notice of Inа. tent" to propose is requested, prospective foreign proposers should write directly to the NASA official designated in the Announcement of Opportunity and send a copy of this International to the letter Division. Office Relations of Policy Coordination and International Relations, Code IRD, NASA, Washington, DC 20546, U.S.A.

b. Unless otherwise indicated in the Announcement of Opportunity, proposals will be submitted in accordance with this Appendix excluding cost plans. Proposals should be typewritten and written in English.

c. Persons planning to submit a proposal should arrange with an appropriate foreign governmental agency for a review and endorsement of the proposed activity. Such endorsement by a foreign organization indicates:

(1) The proposal merits careful consideration by NASA.

(2) If the proposal is selected, sufficient funds will be available to undertake the activity envisioned.

d. Proposals along with the requested number of copies and letters of endorsement from the foreign governmental agency must be forwarded to NASA in time to arrive before the deadline established for each Announcement of Opportunity. These documents should be sent to:

National Aeronautics and Space Administration International Relations Division Code IRD Office of Policy Coordination and International Relations Washington, DC 20546 U.S.A.

All proposals must be e. received before the established closing date; those received after the closing date will be treated in accordance with NASA's provisions for late proposals. Sponsoring foreign government agencies may, in exceptional situations, forward a proposal directly to the above address if review and endorsement is possible before not the announced closing date. In such cases, NASA should be advised when a decision on endorsement can be expected.

f. Shortly after the deadline for each Announcement of Opportunity, NASA's International Relations Division will advise the appropriate sponsoring agency which proposals have been received and when the selection process should be completed. A copy of this acknowledgement will be provided to each proposer.

g. Successful and unsuccessful proposers will be contacted directly by the NASA Program Office coordinating the Announcement of Opportunity. Copies of these letters will be sent to the sponsoring Government agency.

h. NASA's International Relations Division will then begin making the necessary arrangements to provide for the selectee's participation in the appropriate NASA program. Depending on the nature and extent of the proposed cooperation, these arrangements may entail:

(1) A letter of notification by NASA.

(2) An exchange of letters between NASA and the sponsoring foreign governmental agency.

(3) An agreement or Memorandum of Understanding between NASA and the sponsoring foreign governmental agency.

## B. COST PLAN (U.S. Investigations Only)

The cost plan should summarize the total investigation cost by major categories of cost as well as by function.

1. The categories of cost should include the following:

a. Direct Labor--List by labor category, with labor hours and rates for each. Provide actual salaries of all personnel and the percentage of time each individual will devote to the effort.

b. Overhead--Include indirect costs, which because of its incurrence for common or joint objectives, is not readily subject to treatment as a direct cost. Usually this is in the form of a percentage of the direct labor costs.

c. Materials--This should give the total cost of the bill of materials including estimated cost of each major item. Include lead time of critical items.

d. Subcontracts--List those over \$25,000, specify the vendor and the basis for estimated costs. Include any baseline or supporting studies.

e. Special Equipment--Include a list of special equipment with lead and/or development time.

f. **Travel--**List estimated number of trips, destinations, duration, purpose, number of travelers, and anticipated dates.

g. Other Costs--Costs not covered elsewhere.

h. General and Administrative Expense--This includes the expenses of the institution's general and executive offices and other miscellaneous expenses related to the overall business.

i. Fcc (if applicable).

2. Separate schedules, in the above format, should be attached to show total cost allocable to the following:

a. Principal Investigator and other Investigators' costs.

b. Instrument costs.

c. Integration costs.

d. Data reduction and analysis including the amount and cost of computer time.

3. If the effort is sufficiently known and defined, a funding obligation plan should provide the proposed funding requirements of the investigations by quarter and/or annum keyed to the work schedule. ,

## APPENDIX D: GLOSSARY OF TERMS AND ABBREVIATIONS ASSOCIATED WITH INVESTIGATIONS

Advisory Committee Subcommittee--Any committee, board, commission, council, conference, panel, task force; or other similar group, or any subcommittee or other subgroup thereof, that is not wholly composed of full-time Federal Government employees, and that is established or utilized by NASA in the interest of obtaining advice or recommendations.

Announcement of Opportunity (AO)--A document used to announce opportunities to participate in NASA programs. Announcements are published in accordance with this Handbook.

AO Process--A term used to describe the program planning and procurement procedure used to acquire investigative effort, initiated by an AO.

**Categorization--**The process whereby proposed investigations are classified into four categories: synopsized here as Category I--recommended for immediate acceptance; Category II--recommended for acceptance but at a lower priority than Category I proposals; Category III--sound investigations requiring further development; Category IV--rejected.

**Co-Investigator** (Co-I)--Associate of a Principal Investigator, responsible to the Principal Investigator for discrete portions or tasks of the investigation. A NASA employee can participate as a Co-I on an investigation proposed by a private organization.

**Data Users-**-Participants in NASA programs, selected to perform investigations utilizing data from NASA payloads or facilities.

**Experiments**--Activities or effort aimed at the generation of data. NASAsponsored experiments generally concern generation of data obtained through measurement of aeronautical and space phenomena or use of space to observe earth phenomena.

Federal Acquisition Regulation (FAR)--The regulations governing the conduct of procurement.

Flight--That portion of the mission encompassing the period from launch to landing or launch to termination of the active life of spacecraft. The term shuttle "flight" means a single shuttle round trip--its launch, orbital activity, and return; one flight might deliver more than one payload. More than one flight might be required to accomplish one mission.

Flight Investigation--Investigation conducted utilizing aeronautical or space instrumentation.

Flight Opportunity--A flight mission designed to accommodate one or more experiments or investigations.

**Guest** Investigators-Investigators selected to conduct observations and obtain data within the capability of a NASA mission, which are additional to the mission's primary objectives. Sometimes referred to as Guest Observers.

**Investigation**--Used interchangeably with "Experiments."

**Investigation Team--A** group of investigators collaborating on a single investigation.

**Investigator--**A participant in an investigation. May refer to the Principal Investigator, Co-Investigator, or member of an investigation team. 18-70.103, App. I

Mission--The performance of a coherent set of investigations or operations in space to achieve program goals. (Example: Measure detailed structure of Sun's chromosphere; survey mineral resources of North America.)

NASA FAR Supplement (NFS)--Procurement regulations promulgated by NASA in addition to the FAR.

NHB--NASA Handbook.

NMI--NASA Management Instruction.

Notice of Intent--A notice or letter submitted by a potential investigator indicating the intent to submit a proposal in response to an AO.

**Payload**--A specific complement of instruments, space equipment, and support hardware carried to space to accomplish a mission or discrete activity in space.

**Peer Group--**A gathering of experts in related disciplinary areas convened as a subcommittee of the Program Office Steering Committee to review proposals for flight investigations.

**Peer Review**—The process of proposal review utilizing a group of peers in accordance with the categorization criteria as outlined in this Handbook.

**Principal Investigator (PI)**--A person who conceives an investigation and is responsible for carrying it out and reporting its results. A NASA employee can participate as a PI only on a government-proposed investigation.

**Program--**An activity involving human resources, materials, funding, and scheduling necessary to achieve desired goals.

**Project--**Within a program, an undertaking with a scheduled beginning and ending, which normally involves the design,

construction, and operation of one or more aeronautical or space vehicles and necessary ground support in order to accomplish a scientific or technical objective.

**Project Office--**An office generally established at a NASA field installation to manage a project.

Selection Official--The NASA official designated to determine the source for award of a contract or grant.

**Space Facility--**An instrument or series of instruments in space provided by NASA to satisfy a general objective or need.

Steering Committee--A standing NASA sponsored committee providing advice to the Program Associate Administrators and providing procedural review over the investigation selection process. Composed wholly of full-time Federal Government employees.

**Study Office-**-An office established at a NASA field installation to manage a potential undertaking which has not yet developed into project status.

Subcommittee--An arm of the Program Office Steering Committee consisting of experts in relevant disciplines to review and categorize proposals for investigations submitted in response to an AO.

Supporting Research and Technology (SR&T)--The programs devoted to the conduct of research and development necessary to support and sustain NASA programs.

**Team--A** group of investigators responsible for carrying out and reporting the results of an investigation or group of investigations.

Team Leader--The person appointed to manage and be the point of contact for

18-70.103, App. I

the team and who is responsible for assigning respective roles and privileges to the team members and reporting the results of the investigation.

**Team Member**—A person appointed to a team who is an associate of the other members of the team and is responsible to the team leader for assigned tasks or portions of the investigation.

55

70-2:1

### SUBPART 18-70.2 NASA RESEARCH ANNOUNCEMENT SYSTEM

18-70.201 Purpose.

It is NASA policy to encourage submission of research proposals relevant to agency The NASA Research requirements. Announcement (NRA) System is one means of implementing the policy by permitting the solicitation and competitive selection of research projects in accordance with statute while at the same time preserving the traditional concepts and understandings associated with NASA sponsorship of research.

18-70.202 System Content.

(a) The regulations governing the NRA System (see 18-35.016-70) set forth the requirements for preparing, issuing, and processing NRAs.

(b) The system contains specific instructions for proposers. These instructions shall be included in the NRA, a form of broad agency announcement authorized at 18-35.016. 18-70.203 Instructions for Responding to NRAs.

(a) The "Instructions for Responding to NASA Research Announcements for Solicited Research Proposals" document (prescribed in 18-35.016-70(c)(4)) is set forth as Appendix I to this section 18-70.203.

(b) This Appendix may be reproduced locally as part of the NRA provided the following conditions are met:

(1) For each NRA the issuing office shall verify that the most recent version of Appendix I, as contained in the NFS, is used.

(2) The current text shall be reproduced verbatim; however, the issuing office may remove the NFS page headers and add the NRA number in order to identify the NRA to which the Appendix is attached. Any other change shall be treated as a deviation in accordance with 18-1.400.

APPENDIX I TO 18-70.203: INSTRUCTIONS FOR RESPONDING TO NASA RESEARCH ANNOUNCEMENTS FOR SOLICITED RESEARCH PROPOSALS

---.

18-70.203, App. I

#### INSTRUCTIONS FOR RESPONDING TO NASA RESEARCH ANNOUNCEMENTS FOR SOLICITED RESEARCH PROPOSALS

#### (AUGUST 1988)

## 1. FOREWORD

industry, NASA depends upon 8 educational institutions and other nonprofit organizations for most of its research efforts. While a number of mechanisms have been developed over the years to inform the research community of those areas in which NASA has special research interests. these instructions "NASA Research apply only to Announcements," a form of "broad agency announcement" described in 6.102(d)(2) and 35.016 of the Federal Acquisition Regulation (FAR). The "NASA Research Announcement (NRA)" permits competitive selection of research projects in accordance with statute while at the same time preserving the traditional concepts and understandings associated with NASA sponsorship of research.

b. These instructions are Appendix I to 18-70.203 of the NASA Federal Acquisition Regulation Supplement.

#### 2. POLICY

a. NASA fosters and encourages the submission of research proposals relevant to agency mission requirements by solicitations, "NASA Research Announcements," which describe research areas of interest to NASA. Proposals received in response to an NRA will be used only for evaluation purposes.

b. NASA does not allow a proposal, the contents of which are not available without restriction from another source, or any unique ideas submitted in response to an NRA to be used as the basis of a solicitation or in negotiation with other organizations, nor is a pre-award synopsis published for individual proposals. c. A solicited proposal that results in a NASA award becomes part of the record of that transaction and may be available to the public on specific request; however, information or material that NASA and the awardee mutually agree to be of a privileged nature will be held in confidence to the extent permitted by law, including the Freedom of Information Act.

#### 3. PURPOSE

These instructions are intended to supplement documents identified as "NASA Research Announcements." The NRAs contain programmatic information and certain "NRA-specific" requirements which apply only to proposals prepared in response to that particular announcement. These instructions contain the general proposal preparation information which applies to responses to all NRAs.

#### 4. RELATIONSHIP TO AWARD

a. A contract, grant, cooperative agreement, or other agreement may be used to accomplish an effort funded on the basis of a proposal submitted in response to an NRA. NASA does not have separate "grant proposal" and "contract proposal" categories, so all proposals may be prepared in a similar fashion. NASA will determine the appropriate instrument.

Grants are generally used to fund b. basic research in educational and nonprofit institutions, while research in other private sector organizations is accomplished under contract. Additional information peculiar to the contractual process (certifications, cost and pricing data, facilities information, etc.) will be requested, necessary, as the as

18-70.203, App. I

#### NASA FAR SUPPLEMENT (NFS)

procurement progresses. Contracts resulting from NRAs are subject to the Federal Acquisition Regulation and the NASA FAR Supplement (NHB 5100.4). Any resultant grants or cooperative will awarded agreements be and administered in accordance with the NASA Grant and Cooperative Agreement Handbook (NHB 5800.1).

## 5. CONFORMANCE TO GUIDANCE

NASA does not have any mandatory а forms or formats for preparation of responses to NRAs; however, it is requested that proposals conform to the guidelines procedural and submission covered in these instructions. In particular, NASA may accept proposals discussion: without hence. proposals initially be should as complete as possible and be submitted on the proposers' most favorable terms.

In order to be considered responsive b. to the solicitation, a submission must. at a minimum, present a specific project within the areas delineated by the NRA; contain sufficient technical and cost information to permit a meaningful evaluation; be signed by an official authorized to legally bind the submitting organization; not merely offer to perform standard services or to just provide computer facilities or services; and not significantly duplicate a more specific current or pending NASA solicitation. NASA reserves the right to reject any or all proposals received in response to an NRA when such action is considered in the best interest of the Government.

#### 6. NRA-SPECIFIC ITEMS

a. Several proposal submission items will appear in the NRA itself. These include: the unique NRA identifier; when to submit proposals; where to send proposals; number of copies required; and sources for more information. b. Items included in these instructions may be supplemented by the NRA, as circumstances warrant. Examples are: technical points for special emphasis; additional evaluation factors; and proposal length.

#### 7. PROPOSAL CONTENTS

The following general information is a. needed in all proposals in order to permit consideration in an objective manner. NRAs will generally specify topics for which additional information or greater detail is desirable. Each proposal copy shall contain all submitted including material, CODV of a the transmittal letter if it contains substantive information.

## b. Transmittal Letter or Prefatory Material

(1) The legal name and address of the organization and specific division or campus identification if part of a larger organization;

(2) A brief, scientifically valid project title intelligible to a scientifically literate reader and suitable for use in the public press;

(3) Type of organization: e.g., profit, nonprofit, educational, small business, minority, women-owned, etc.;

(4) Name and telephone number of the principal investigator and business personnel who may be contacted during evaluation or negotiation;

(5) Identification of any other organizations that are currently evaluating a proposal for the same efforts;

## NFSD 89-0 (June 30, 1989)

# PART 18-70 NASA SUPPLEMENTARY REGULATIONS

(6) Identification of the specific NRA, by number and title, to which the proposal is responding;

(7) Dollar amount requested of NASA, desired starting date, and duration of project;

(8) Date of submission; and

(9) Signature of a responsible official or authorized representative of the organization, or any other person authorized to legally bind the organization (unless the signature appears on the proposal itself).

# c. Restriction on Use and Disclosure of Proposal Information

It is NASA policy to use information contained in proposals for evaluation purposes only. While this policy does not require that the proposal bear a restrictive notice, offerors or quoters should, in order to maximize protection of trade secrets or other information that is commercial or financial and confidential or privileged, place the following notice on the title page of the proposal and specify the information subject to the notice by inserting appropriate identification, such as page numbers, in the notice. In any event, contained (data) in information proposals will be protected to the extent permitted by law, but NASA assumes no liability for use and disclosure of information not made subject to the notice.

#### NOTICE

#### Restriction on Use and Disclosure of Proposal Information

The information (data) contained in [insert page numbers or other identification] of this proposal

and/or trade secret constitutes a that information is commercial or financial and confidential or privileged. It is furnished to the Government in confidence with the understanding that it will not, without permission of the offeror, be used or disclosed other than purposes; provided, for evaluation however, that in the event a contract (or other agreement) is awarded on the basis of this proposal the Government shall have the right to use and disclose this information (data) to the extent provided in the contract (or other agreement). restriction does not limit the This Government's right to use or disclose this information (data) if obtained from another source without restriction.

#### d. Abstract

Include a concise (200-300 word if not otherwise specified in the NRA) abstract describing the objective of the proposed effort and the method of approach.

#### e. Project Description

(1) The main body of the proposal shall be a detailed statement of the work to be undertaken and should include significance: objectives and expected state of relation to the present knowledge in the field; and relation to previous work done on the project and to related work in progress elsewhere. The statement should outline the general plan of work, including the broad design of experiments to be undertaken and an adequate description of experimental methods and procedures. The project description should be prepared in a manner that addresses the evaluation factors in these instructions and any additional specific factors in the NRA. substantial collaboration with Anv individuals not referred to in the budget use of consultants should be or however. that Note. described.

subcontracting significant portions of a research project is discouraged.

When it is expected that the (2) effort will require more than one year for completion, the proposal should cover the complete project to the extent that it can be reasonably anticipated. Principal emphasis should, of course, be on the first year of work, and the distinguish clearly description should between the first year's work and work planned for subsequent years.

## f. Management Approxith

For large or complex efforts involving interactions among numerous individuals or other organizations, plans for distribution of responsibilities and any necessary arrangements for ensuring a coordinated effort should be described. Aspects of any required intensive working relations with NASA field centers that are not logical inclusions elsewhere in the proposal should be described in this section.

#### g. Personnel

The principal investigator is responsible for direct supervision of the work and participates in the conduct of the research regardless of whether or not compensation is received under the award. A short biographical sketch of the principal investigator, a list of principal publications and any exceptional qualifications should be included. Omit social security number and other personal items which do not merit consideration in evaluation of the proposal. Give similar biographical information on other senior professional personnel who will be directly associated with the project. Give the names and titles of any other scientists and technical personnel associated substantially with the project in an

advisory capacity. Universities should list the approximate number of students or other assistants, together with information as to their level of academic attainment. Any special industryuniversity cooperative arrangements should be described.

## h. Facilities and Equipment

(1) Describe available facilities and major items of equipment especially adapted or suited to the proposed project. and any additional major equipment that will be required. Identify any Government-owned facilities. industrial plant equipment, or special tooling that are proposed for use on the project.

(2) Before requesting a major item of capital equipment, the proposer should determine if sharing or loan of equipment already within the organization is a feasible alternative to purchase. Where such arrangements cannot be made, the proposal should so state. The need for items that typically can be used for both research and non-research purposes should be explained.

## i. **Proposed Costs**

Proposals should contain cost (1)and technical parts in one volume; do not use separate "confidential" salary pages. As applicable, include separate cost estimates for salaries and wages: fringe benefits; equipment; expendable materials and supplies; services: domestic and foreign travel; ADP expenses; publication or page charges; subcontracts; consultants; other miscellaneous identifiable direct costs: and indirect costs. List salaries and wages in appropriate organizational categories (e.g., principal investigator, other scientific and engineering professionals. graduate students. research assistants, and technicians and other non-professional personnel).

Estimate all manpower data in terms of man-months or fractions of full-time.

(2) Explanatory notes should accompany the cost proposal to provide identification and estimated cost of major capital equipment items to be acquired; purpose and estimated number and lengths of trips planned; basis for indirect cost computation (including date of most recent negotiation and cognizant agency); and clarification of other items in the cost proposal that are not selfevident. List estimated expenses as yearly requirements by major work phases. (Standard Form 1411 may be used).

(3) Allowable costs are governed by FAR Part 31 and the NASA FAR Supplement Part 18-31 (and OMB Circulars A-21 for educational institutions and A-122 for nonprofit organizations).

#### j. Security

Proposals should not contain security classified material. However, if the proposed research requires access to or may generate security classified information, the submitter will be required to comply with applicable Government security regulations.

#### k. Current Support

For other current projects being conducted by the principal investigator, provide title of project, sponsoring agency, and ending date.

#### 1. Special Matters

(1) Include any required statements of environmental impact of the research, human subject or animal care provisions, conflict of interest, or on such other topics as may be required by the nature of the effort and current statutes, executive orders, or other current Government-wide guidelines.

should include (2) Proposers а brief description of the organization, previous work its facilities. and experience in the field of the proposal. Identify the cognizant Government audit inspection and agency, agency, administrative contracting officer, when applicable.

#### 8. RENEWAL PROPOSALS

proposals for existing Renewal a. awards will be considered in the same manner as proposals for new endeavors. It is not necessary that a renewal proposal repeat all of the information that was in the original proposal upon which the current support was based. The renewal proposal should refer to its predecessor, update the parts that are no longer current, and indicate what elements of the research are expected to be covered during the period for which support desired. Α extended is description of any significant findings since the most recent progress report should be included. The renewal proposal should treat, in reasonable detail, the plans for the next period, contain a cost estimate, and otherwise adhere to these instructions.

b. NASA reserves the right to renew an effort either through amendment of an existing contract or by a new award.

## 9. LENGTH

Unless otherwise specified in the NRA, every effort should be made to keep brief possible. proposals as 28 on substantive concentrating material essential for a complete understanding of the project. Experience shows that few proposals need exceed 15-20 pages. Any necessary detailed information, such as included reprints. should be as attachments rather than in the main body of the proposal. A complete set of attachments is necessary for each copy of the proposal. As proposals are not 18-70.203, App. I

returned, avoid use of "one-of-a-kind" attachments: their availability may be mentioned in the proposal.

### **10. JOINT PROPOSALS**

Some projects involve joint efforts a. individuals in among different organizations or mutual efforts of more than one organization. Where multiple organizations are involved, the proposal may be submitted by only one of them. In this event, it should clearly describe the role to be played by the other organizations and indicate the legal and managerial arrangements contemplated. In other instances, simultaneous submission of related proposals from each organization might be appropriate, in which case parallel awards would be made.

Where a project of a cooperative b. nature with NASA is contemplated, the proposal should describe the contributions expected from any participating NASA investigator and agency facilities or equipment which may be required. However, the proposal must be confined only to that which the proposing organization can commit itself. "Joint" proposals which purport to specify the internal arrangements NASA will actually make are not acceptable as a means of establishing an agency commitment.

# **11. LATE PROPOSALS**

proposal modification A οr thereto received after the date or dates specified in an NRA may still be considered the if selecting official deems it to offer NASA a significant technical advantage or cost reduction.

## 12. WITHDRAWAL

Proposals may be withdrawn by the proposer at any time. Offerors are requested to notify NASA if the proposal is funded by another organization or of other changed circumstances which dictate termination of evaluation.

## **13. EVALUATION FACTORS**

a. Unless otherwise specified in the NRA, the principal elements (of approximately equal weight) considered in evaluating a proposal are its relevance to NASA's objectives, intrinsic merit, and cost.

b. Evaluation of a proposal's relevance to NASA's objectives includes the consideration of the potential contribution of the effort to NASA's mission.

c. Evaluation of its intrinsic merit includes the consideration of the following factors, none of which is more important than any other:

(1) Overall scientific or technical merit of the proposal or unique and innovative methods, approaches, or concepts demonstrated by the proposal.

(2) The offeror's capabilities, related experience, facilities, techniques, or unique combinations of these which are integral factors for achieving the proposal objectives.

(3) The qualifications, capabilities, and experience of the proposed principal investigator, team leader, or key personnel who are critical in achieving the proposal objectives.

(4) Overall standing among similar proposals available for evaluation and/or evaluation against the known state-of-the-art.

d. Evaluation of the cost of a proposed effort includes the consideration of the realism and reasonableness of the proposed cost and the relationship of the proposed cost to available funds.

## 14. EVALUATION TECHNIQUES

Selection decisions will be made following peer and/or scientific review of the proposals. Several evaluation techniques are regularly used within NASA. In all cases, however, proposals are subject to scientific review by discipline specialists in the area of the proposal. Some proposals are reviewed entirely in-house where NASA has particular competence; others are evaluated by a combination of in-house people and selected external reviewers, while yet others are subject to the full external peer review technique (with due regard for conflict-ofinterest and protection of proposal information), such as by mail or through assembled panels. Regardless of the technique, the final decisions are always made by a designated NASA selecting official. A proposal which is scientifically and programmatically meritorious, but which is not selected for award during its initial review under the NRA may be included in subsequent reviews unless the proposer requests otherwise.

#### 15. SELECTION FOR AWARD

a. When a proposal is not selected for award, and the proposer has indicated that the proposal is not to be held over for subsequent reviews, the proposer will be notified that the proposal was not selected for award. NASA will notify the proposer and explain generally why the proposal was not selected. Proposers desiring additional information may contact the selecting official who will arrange a debriefing.

b. When a proposal is selected for award, negotiation and award will be handled by the procurement office in the funding installation. The proposal is used as the basis for negotiation with the submitter. Formal RFPs are not used to obtain additional information on a proposal selected under the NRA process. However, the contracting officer may request certain business data and may forward a model contract and other information which will be of use during the contract negotiation.

## 16. CANCELLATION OF NRA

NASA reserves the right to make no awards under this NRA and, in the absence of program funding or for any other reason, to cancel this NRA by having a notice published in the <u>Commerce Business Daily</u>. NASA assumes no liability for cancelling the NRA or for anyone's failure to receive actual notice of cancellation. Cancellation may be followed by issuance and synopsis of a revised NRA, since amendment of an NRA is normally not permitted.

#### SUBPART 18-70.3

#### NASA SOURCE EVALUATION

## 18-70.301 Purpose.

The acquisition of goods and services is among the most important activities that NASA performs and demands the agency's best management efforts. Therefore, the source evaluation and selection procedures must emphasize the application of sound judgment to the problems of source evaluation and assure that Source Evaluation Boards (SEB) conduct their activities impartially and efficiently in ways which will effectively accomplish the source evaluation task.

#### 18-70.302 Regulations.

The basic regulations governing source selection using the SEB process appear at 18-15.613-71. Detailed operating instructions and procedures for the evaluation and negotiation of procurements by Source Evaluation Boards appear at 18-70.303. These instructions provide general and for specific policies and procedures SEB's evaluating offerors' proposals and related capabilities. They are designed for use by procurement personnel and by the wide range of individuals who participate in the SEB process. The instructions will also be of help to the public in understanding NASA's source selection policies and procedures.

18-70.303 Source Evaluation Board Procedures.

(a) SEB procedures are prescribed by Appendix I to this section 18-70.303.

(b) NASA may reprint Appendix I as a separate document, which may be referred to as the NASA Source Evaluation Board Handbook, for sale and/or distribution provided the following conditions are met:

(1) The issuance date ("cover date") of the Handbook shall be the date of the NASA FAR Supplement version from which the text is extracted.

(2) With the exception of availability, distribution and other special prefatory notices, any subsequent modification in the text shall be preceded by a change to the NASA FAR Supplement 18-70.303, Appendix I.

(3) The following notice shall be included in the prefatory material of the Handbook:

## IMPORTANT NOTICE

This Handbook is a separately bound, verbatim version of NASA FAR Supplement (NFS) (48 CFR 1870.303) Section 18-70.303, Appendix I. Reference to other Acquisition Federal parts of the Regulation (FAR) and the NFS will be required for complete coverage of all procurement aspects. NASA reserves the right to make changes to NFS 18-70.303, Appendix I, without issuing a new edition of this Handbook. Any such changes will be published in the Federal Register; however, it is anticipated that such changes will be rare, unless mandated by statute or unusual circumstances. In the event of apparent conflict between this Handbook and the NFS, the NFS shall govern.

## APPENDIX I TO 18-70.303 NASA SOURCE EVALUATION BOARD PROCEDURES (HANDBOOK)

#### NASA SOURCE EVALUATION BOARD HANDBOOK

#### PREFACE

The acquisition of goods and services is among the most important activities that NASA performs and demands our best management efforts. The acquisition system we use must be such that individuals performing within it are challenged to high standards of performance because they know that their efforts contribute to and form part of the Government's decision-making process.

The source evaluation and selection process covered by this handbook exemplifies our efforts to emphasize the application of sound judgment to the problems of source evaluation. In addition, the handbook emphasizes the responsibility which line and staff management retains to assure that Source Evaluation Boards (SEB's) conduct their activities impartially and efficiently in ways which will effectively accomplish the source evaluation task.

The process provides for an equitable and comprehensive evaluation of offerors' proposals to assist the Source Selection Official (SSO) in selecting the source(s) whose proposal(s) presents the highest probability of quality performance to best meet NASA's requirements at a realistic cost/price. This handbook provides guidance and general and specific policies and procedures for SEB's evaluating offerors' proposals and related capabilities in negotiated procurements. Its intention is to encourage the exercise of sound judgment in the many important aspects of the process. SEB's are expected to apply common sense in determining appropriate variations and adaptations necessary in individual situations, provided that these do not constitute a departure from basic concepts and intent. Substantive deviations may be authorized only by the Associate Administrator for Procurement.

While this handbook is intended primarily for NASA use, it is also available to the public so that NASA's source selection policies and procedures can be understood by all participants in the process.

The provisions of this handbook are applicable to all elements of NASA and are to be implemented on any Request for Proposal (RFP) subject to evaluation by an SEB and issued on or after October 1, 1988. The source selection policies and procedures set forth in this handbook are to be implemented in accordance with the Federal Acquisition Regulation (FAR) 15.6 and NASA/FAR Supplement (NFS) 18-15.613. However, the procedures in this handbook may be used in any other competitively negotiated procurement where the SSO determines it desirable to do so.

- APPENDIX C GUIDELINES FOR THE SEB REPORT AND PRESENTATION TO THE SOURCE SELECTION OFFICIAL

18-70.303, App. I

# CHAPTER 1: KEY PARTICIPANTS IN THE SOURCE EVALUATION BOARD PROCESS

#### **100 INTRODUCTION**

This Chapter describes the role of key participants in the Source Evaluation Board, (SEB) process, including cognizant line and staff management, the Source Evaluation Board and the Source Selection Official.

#### 101 <u>COGNIZANT MANAGEMENT</u> <u>RESPONSIBILITIES</u>

1. The SEB process described in this handbook shall be used for major procurements as defined by NFS 18-15.613-71(a). The process is used to accomplish and document the source evaluation and selection function.

2. Upon request of the cognizant Installation Procurement Officer, as a part of the Master Buy Plan procedure, the Associate Administrator for Procurement or an appropriate designee may consider streamlining these source selection procedures for a particular procurement. This decision, granting a deviation to the formal SEB process, will be communicated to the cognizant Procurement Officer as a part of the written response to the installation regarding the Master Buy Plan submission. Requests for use of streamlined procedures may also be submitted independent of the Master Buy Plan procedure.

3. When the SEB process is determined to be applicable in accordance with the NFS, the specific SEB procedures detailed in this handbook are employed to--

a. Prepare a solicitation that accurately conveys to offerors the technical, schedule, cost, and other contractual requirements of the procurement;

b. Ensure equitable and comprehensive evaluation of the competitors' proposals;

c. Ensure fairness and freedom from outside influence throughout the process;

d. Ensure selection of the source(s) whose performance can be expected to be most advantageous to the Government with respect to the Mission Suitability, Cost, Relevant Experience and Past Performance, and Other Considerations factors considered; and

e. Protect the business confidential and proprietary information contained in proposals submitted to the Government for evaluation.

4. Appropriate cognizant line and staff management shall--

a. Establish each SEB with fully qualified Government personnel possessing broad experience and the professional skills and knowledge required for proper evaluation and assessment of offerors' proposals;

b. Ensure all personnel assigned to the SEB are unencumbered by other assignments which compete with SEB activities and, further, ensure that personnel assigned to the SEB are officially appointed to the activity for the duration of the SEB;

c. Ensure the SEB is provided all current NASA policies and procedures relevant to SEB operation; 18-70.303, App. I

d. Ensure acquisition strate; y and planning objectives are achieved as reflected in the acquisition's requirements;

e. Ensure the SEB works in harmony with the needs and objectives of the requiring activity;

f. Concur in the substance and weight of evaluation factors, subfactors, and elements;

g. Ensure the RFP is complete, clear, and consistent with agency objectives and with the needs of the activity requiring the procurement, that the procedures for evaluation and selection are clearly set forth, and that the offeror is not burdened with unnecessary requests for data not pertinent to source selection;

h. Ensure appropriate actions are taken, consistent with the FAR and NFS, to obtain full and open competition in the selection process, or to obtain appropriate approvals for exceptions;

i. Establish an SEB advisory group or individual at the field installation to ensure proper source selection procedures are employed; and

j. Ensure an environment exists in which evaluation and selection activities can be effectively conducted.

5. For purposes of this handbook, in cases where the SSO is at the Headquarters level, "cognizant line and staff management, "as addressed in subparagraph 4, includes--

a. The NASA Acquisition Executive for systems designated as major acquisitions under NMI 7100.14, "Major System Acquisitions";

b. Officials-in-Charge of the cognizant Headquarters Program and Headquarters Offices or their Deputies. (See NMI 1101.2, "NASA Organization and Definition of Terms.");

c. The cognizant Field Installation Director and Deputy/Associate Director;

d. The Field Installation Project Manager;

e. The Associate Administrator for Procurement;

f. The General Counsel and/or Associate General Counsel (Contracts);

g. The Associate Administrator for Safety, Reliability, Maintainability, and Quality Assurance (SRM&QA);

h. The Field Installation Principal Official-in-Chargeof Administration, when such a position exists;

i. The Field Installation Chief Counsel;

j. The Field Installation Procurement Officer; and

k. Ensure that the activities of the SEB are carefully planned, all key events identified and scheduled, and progress monitored. Normally, the goal of all SEBs should be to complete activities from receipt of proposal to contract award in not more than 120 calendar days. Realization of this goal can be furthered through the synergism of acquisition streamlining techniques such as RFP and proposal page limitations, reduced SEB memberships, and limitation of evaluation sub-factors and elements to key discriminators. However, there may be instances when this goal cannot be attained even when these streamlining techniques are used, for example, in procurements of unusual complexity or when a large number of proposals is anticipated. In these cases, a schedule longer than the 120-day goal should be planned, consistent with the exercise of good judgment.

When the Administrator or an 6. Official-in-Charge of a Headquarters Office is the SSO, selected cognizant line and staff management, including the General Counsel or designee and the Associate Administrator for Procurement, will advise the SSO in executive session. at the conclusion of the presentation of the report, regarding their views SEB concerning the SEB's findings. Management personnel are encouraged to seek the advice of the General Counsel, the Associate Administrator for Procurement, and any other responsible Headquarters official regarding any SEB-level procurement problem where their participation would be helpful in the conduct of the SEB process.

#### 102 SOURCE SELECTION OFFICIAL

The SSO is the senior agency 1. official responsible on a particular procurement for proper and efficient conduct of the source selection process and for making the final source selection decision. It is the SSO's responsibility to decide which of the proposals submitted in response to the solicitation would prove most advantageous to the Government, all RFP evaluation factors considered. The decision must reflect the SSO's determination of relative quality and suitability of what is proposed by each offeror in light of the Government's stated requirements and the confidence level associated with the offeror's ability to accomplish what is proposed. This includes an assessment of the probable cost of each proposal in the competitive range. Tradeoff judgments may be required among the evaluation factors (Mission Suitability, Cost. Relevant Experience and Past Performance, and Other Considerations). For procurements designated as Headquarters selections, the SSO will be identified as a part of the Master Buy Plan process. For field installation selections, the Field Installation Director will serve as the SSO. When source selection official authority is at the installation level, either by delegation from Headquarters or by virtue of a procurement value under the installation Master Buy Plan limitation, the head of the installation may further delegate this authority to the lowest reasonable level.

#### 2. The SSO will--

a. Approve the substance and weight of evaluation factors, subfactors, and elements prior to release of the RFP, or delegate this responsibility to appropriate management personnel;

b. Appoint the SEB Chairperson and members, both voting and nonvoting, except when the Administrator will serve as the SSO, in which case the Official-in-Charge of the cognizant Headquarters Program Office will appoint the SEB Chairperson and members;

c. Provide the SEB with appropriate guidance and special instructions to conduct the evaluation and selection procedures; and

d. Make the final selection decision. Selection for final negotiations will be based on an integrated assessment of each offeror's proposal, taking into consideration the SEB's report and advice from senior officials.

## **103 SOURCE EVALUATION BOARD**

1. The solicitation, receipt, and evaluation of proposals will be implemented by the SEB in accordance with the procedures outlined in this handbook. It is paramount that the SEB's evaluation not be influenced by persons outside the SEB process, whether or not such persons are NASA employees. The SEB is established with special status and shall be staffed with competent people fully qualified to identify 18-70.303, App. I

the strengths, weaknesses, and risks associated with proposals submitted in response to the Government solicitation. The SEB assists the SSO in decision making by providing expert analyses of the offerors' proposals in relation to the evaluation factors, subfactors, and elements contained in the solicitation.

2. In particular, the SEB shall--

a. Conduct an in-depth review and evaluation of each proposal against the solicitation requirements and the approved evaluation factors, subfactors, and elements;

b. Provide an integrated assessment of each offeror's probable performance relative to the evaluation factors, subfactors, and elements contained in the solicitation related to Mission Suitability;

c. Perform cost analysis by reviewing and analyzing each offeror's proposed costs by individual cost element to determine the validity and reasonableness of the proposed costs. Perform price analysis by comparing each offeror's proposed price (when it is feasible to do so) against the independent Government cost estimate and/or prior experience and knowledge regarding similar efforts to assist in determination of a fair and reasonable price. Develop a probable cost for each proposal within the competitive range;

d. Evaluate the relevant experience and past performance of each offeror, including the relevant experience and past performance of proposed subcontractors intended to perform a major role in accomplishment of procurement objectives or to participate in a substantive manner;

e. Evaluate proposals under the Other Considerations factor included in the RFP and present the analysis of that factor as reflected in each offeror's proposal;

f. Ensure proper SEB procedures are implemented, including those necessary to prevent disclosure of source selection data;

g. Prepare and present the SEB report which accurately and clearly reflects the findings of the SEB.

<u>NOTE</u>: The SEB is not to make recommendations for selection to the SSO. The SEB reports its findings, avoiding trade-off judgments among either the individual offerors or among the Mission Suitability, Cost, Relevant Experience and Past Performance, and Other Considerations evaluation factors.

# CHAPTER 2: MEMBERSHIP, ORGANIZATION, AND RESPONSIBILITIES

#### 200 GENERAL

This Chapter sets forth NASA policy on membership, organization, and responsibilities of SEB's.

#### 201 MEMBERSHIP

## 1. Composition

a. SEB's shall be comprised of qualified management, technical, scientific, contracting, and business experts including, where appropriate, SRM&QA representatives. Each SEB shall have a legal advisor.

b. While in general the SEB Chairperson, SEB members, and committee members are drawn from the cognizant installation, personnel from other NASA installations or other Government agencies may be used when their services are required in a particular area of expertise and would significantly contribute to the evaluation of proposals.

c. It is NASA policy to have proposals evaluated by the most competent technical and management sources available in NASA and the Jet Propulsion Laboratory (JPL). All personnel participating in evaluation proceedings shall be instructed to observe the restrictions in the FAR and NFS regarding personal conflicts of interest and the disclosure of information concerning the evaluation. Non-NASA personnel shall not serve as voting members of a NASA SEB.

d. In evaluating a proposal, the SEB may find that it is necessary to disclose the proposal (in whole or in part) outside the Government to meet its evaluation needs. When it is clearly necessary to disclose the proposal (in whole or in part) outside the Government, arrangements shall be made in accordance with NFS 18-15.413-2. e. It is desirable that voting members of the SEB include people who will have key assignments on the project to which the procurement is directed. However, it is important that this should be tempered to ensure objectivity and to avoid an improper balance. It may even be appropriate to designate a management official from outside the project as SEB Chairperson.

f. SEB membership shall be limited to a maximum of 7 voting individuals. Wherever feasible, an assignment to SEB membership as a voting member shall be on a full-time basis. Where this is not feasible, SEB membership shall take precedence over other duties.

g. If additional support is needed, committees and panels may be used to assist in the evaluation. The total of all such evaluators (committees, panels, etc., excluding SEB voting members and ex officio members) shall be limited to a maximum of 20 individuals, unless approved in writing by the Procurement Officer.

h. The number of nonvoting ex officio (advisory) members shall be kept as small as the nature of the procurement allows. Ex officio members should be selected for the experience and expertise they can provide to the SEB. Since their advisory role may require access to highly sensitive SEB material and findings, ex officio membership for persons other than those identified in paragraph 3.b. should be carefully considered.

#### 2. Designation

a. Designation of the SEB Chairperson and members, both voting and nonvoting, shall be by the SSO except

when the Administrator will serve as the SSO, in which case the designation shall be by the Official-in-Charge of the cognizant Headquarters Program Office. The designation letter will be addressed to the cognizant Field Installation Director when the SSO is at the Headquarters level or to the SEB Chairperson when the SSO is the Field Installation Director. The letter shall be prepared in accordance with the sample letter in Appendix A and forwarded for signature to the SSO or the cognizant Official-in-Charge of the Headquarters Program Office early in the procurement cycle, but not later than coordination and approval of the procurement plan. Prior to signature, concurrence by the Headquarters Office of Procurement (Code HS) is required when the SSO is at the Headquarters level or by the cognizant Field Installation Procurement Officer when the SSO is the Field Installation Director.

b. When the Administrator or the Official-in-Charge of the cognizant Headquarters Program Office is the SSO, resumes of voting members shall be provided along with the proposed designation letter. These resumes shall include functional title, grade level and related SEB experience.

# 3. Voting and nonvoting Members

a. The following people shall be on all SEB's and designated as voting members:

(1) Chairperson.

(2) A senior, key technical representative for the project.

(3) An experienced procurement representative.

(4) A senior SRM&QA representative, as appropriate.

(5) Committee chairpersons (except where this imposes an undue workload). All voting members of the SEB shall have equal status as rating officials.

b. The following people shall be on all SEB's as nonvoting ex officio members:

(1) Associate Administrator for Procurement and designee from the Program Operations Division (Code HS) when either an Official-in-Charge of a Headquarters Program Office or the Administrator is the SSO.

(2) General Counsel and/or the Associate General Counsel (Contracts) when either an Official-in-Charge of a Headquarters Program Office or the Administrator is the SSO.

(3) Associate Administrator for Safety, Reliability, Maintainability, and Quality Assurance or designee when either an Official-in-Charge of a Headquarters Program Office or the Administrator is the SSO.

(4) Director of the cognizant Field Installation or designee when either an Official-in-Charge of a Headquarters Program Office or the Administrator is the SSO.

(5) Cognizant Program Director or designee when an Official-in-Charge of a Headquarters Program Office is the SSO.

(6) Official-in-Charge of the cognizant Headquarters Program Office or a designee when the Administrator is the SSO.

(7) Chairpersons of SEB committees when they are non-voting members.

(8) The Procurement Officer of the installation, unless designated a voting member.

(9) The contracting officer responsible for the procurement, unless designated a voting member.

(10) The Chief Counsel and/or designee of the installation.

(11) The SEB recorder.

c. The Associate Administrator for Procurement, the Code HS Director and

cognizant procurement analyst, and the Associate General Counsel (Contracts) have access to all SEB activity by virtue of their positions in the agency.

d. The Associate General Counsel (Contracts) will assign legal advisors to Headquarters SEB's. The installation Chief Counsels will assign legal advisors to SEB's at their installations. The assigned advisor will provide legal advice and counsel on all matters pertaining to the procurement. Upon appointment of the SEB, the Associate General Counsel (Contracts) or designee, or Chief Counsel or designee, as appropriate, will brief SEB personnel on required standards of conduct.

e. Nonvoting ex officio members may state their views and contribute to the discussions in SEB deliberations, but they may not participate in the actual rating process. However, the SEB recorder should be present during rating sessions. The Chairperson is responsible for determining appropriate attendance at SEB meetings and is encouraged to seek the advice and counsel of nonvoting ex officio members whenever necessary without convening a special meeting.

# 202 ORGANIZATION

The organization of an SEB is tailored to the requirements of the particular procurement. This can range from the simplest situation, where the SEB conducts the evaluation and fact-finding without the use of committees or panels, to a highly complex situation involving a major acquisition where two or more committees are formed and these, in turn, are assisted by special panels in particular areas. Appropriate organization somewhere between these two extremes is generally expected but in all cases the number of committees or panels should be kept to a minimum consistent with the requirements of the procurement.

## 203 <u>RESPONSIBILITIES</u>

1. The SEB is the central group in the source evaluation process. Its function is to carry out the activities set forth in this handbook, culminating in final evaluation of all proposals and its report to the SSO. The SEB's evaluation is based on all available information, including proposals, committee and panel reports, written and/or oral discussions, personal knowledge of the members in the area of experience performance, and other and past appropriate reference checks. Subject to reviews by the SSO and cognizant management personnel as may be required, the SEB establishes evaluation factors, subfactors, elements and their relative importance; generates qualification standards (where applicable); and reviews and approves the RFP prior to issuance. The SEB reviews offeror satisfaction of applicable qualification standards, if any, makes an identification of and It provides an unacceptable proposals. initial evaluation of acceptable proposals sufficient for determination of the competitive range and participates in written and/or oral discussions held with all offerors in the competitive range. The SEB shall not delegate its evaluation responsibility in whole or in part. Findings of committees or panels must be reviewed by the SEB, with its own collective judgment being applied in arriving at the SEB evaluation findings reported to the SSO.

2. The SEB Chairperson is the principal operating executive of the SEB. This carries with it a responsibility broader in scope and including more requirements for coordination across more different specialized disciplines and through more diverse management channels than is expected in most management situations. The Chairperson is expected to manage the team efficiently without compromising the validity of the findings provided to the SSO as the basis for a sound selection decision.

## NASA FAR SUPPLEMENT (NFS)

3. The SEB Recorder functions as the principal administrative assistant to the SEB Chairperson. The duties and responsibilities of the position are as follows:

a. Attends all SEB meetings and serves as principal assistant to the SEB Chairperson.

b. Obtains secure work areas for conduct of SEB activity and develops and implements procedures for controlling access and safeguarding SEB proceedings and documentation.

c. Obtains materials, supplies, and equipment needed by the SEB.

d. Arranges for preparation, reproduction, control, and distribution of material relating to the activity of the SEB and its committees.

e. Prepares and distributes the agenda for SEB meetings.

f. Obtains and distributes current applicable procedures, policies, and instructions to the SEB and committee members and others involved.

g. Records the substantive issues discussed.

h. Follows up on action items assigned to SEB members to ensure no delays in the SEB schedule will occur.

i. Obtains the SEB Chairperson's approval of SEB minutes. Provides copies to all voting SEB members and/or nonvoting members, as directed by the SEB Chairperson. Retains the original copy of the minutes and incorporates them into an official record book.

j. Assists in preparation and assembly of the SEB's report of findings and presentation charts and arranges for reproduction and distribution.

k. Destroys all duplicate material in excess of the SEB's need or retains material, as defined by the contracting officer, the SEB, and/or the SSO.

l. After formal selection announcement, accumulates, packages, and forwards documentation pertinent to the SEB's work to the cognizant contracting officer for retention throughout the life of the contract.

m. At the conclusion of all SEB activity, surveys the area where SEB activity occurred and arranges for the return of equipment and materials, as appropriate.

4. An SEB Committee functions as a fact-finding arm of the SEB, usually in a broad grouping of related disciplines (e.g., technical or management). It is comprised of people well-versed and experienced in each of the major disciplines under its aegis. For example, a "Management Committee" could include experts in such areas as organization, pricing, personnel, labor, contracting, and facilities operation. The committee examines in detail each proposal, or portion thereof, assigned by the SEB. It evaluates such proposals or excerpts in accordance with the approved evaluation factors, subfactors, and elements and submits a written report to the SEB summarizing its evaluation. The committee will also respond to requirements assigned by the SEB, including further justification or reconsideration of its findings.

5. Committee chairpersons shall, with respect to their committees, exercise the same responsibility for administrative and procedural matters as does the SEB Chairperson for the SEB.

6. An SEB panel functions as a factfinding arm of the committee in a specialized area of the committee's

## NFSD 89-0 (NFSD 89-13)

## PART 18-70 NASA SUPPLEMENTARY REGULATIONS

responsibilities. Panels are established when a particular area requires deeper analysis than can be provided by individual members of the committee.

7. a. All personnel involved in SEB activities are responsible for complying with the requirements of this handbook and other applicable regulations. Accordingly, they are advised to seek counsel and guidance from appropriate personnel, such as; the SEB Chairperson, the SEB procurement voting member, the contracting officer and/or the SEB legal advisor as well as any cognizant installation SEB advisory group with respect to any questions concerning compliance with these requirements. The Chairperson shall require each SEB, committee, and panel member to be familiar with the provisions of NHB 1900.1, "Standards of Conduct for NASA Employees," regarding conflict of interest and to inform the Chairperson in writing if, in the opinion of the member. their participation presents a real or apparent conflict of interest. In addition, the SEB Chairperson shall ensure that each SEB, committee, and panel member has filed a completed NASA Form 1270, "Confidential Statement of Employment and Financial Interests." Code HS procurement analysts will comply with the necessary disclosure requirements and will sign the necessary certificates on an annual basis to cover all SEB activities that the analyst may participate in throughout the

year. Completed NASA Form 1270's from Code HS personnel will be generated and reviewed at the Headquarters level and will remain on file in the Office of General Counsel.

b. Prior to selection and announcement of an offeror for final negotiations, NASA personnel shall not reveal any information concerning the evaluation to anyone not participating in the same evaluation proceedings and then only to the extent such information is required by such proceedings and approved by the SSO or designee.

c. Subsequent to selection and announcement of an offeror for final negotiations, information concerning SEB proceedings and data will be made available to others within NASA only when the requester demonstrates a need to know for a NASA purpose. Information will be made available to persons outside NASA, including other Government agencies, only when such disclosure is concurred in by the Office of General Counsel. Title 18, U.S. Code, Section 1905, prohibits any officer or employee of the United States from disclosing or divulging certain kinds of business confidential and trade secret information unless authorized by law. Possible penalties upon conviction include imprisonment of up to 1 year, a fine of not more than \$1,000, and removal from the Federal Service.

# CHAPTER 3: EVALUATION FACTORS, SUBFACTORS AND ELEMENTS

# 300 GENERAL

1. This Chapter describes the factors, subfactors, and elements used in evaluation of proposals and discusses the manner in which the SEB will develop, describe, and structure such factors, subfactors, and elements.

2. The SEB's responsibility is to provide analysis of proposals to aid the SSO in selecting the offeror(s) who best meets the Government's requirements at a reasonable cost.

In making a selection, the SSO 3. considers four evaluation normally factors: a. Mission Suitability (which reflects how well the offerors can be expected to perform the work from a technical and management perspective); b. Cost (which reflects what it will probably cost the Government to do business with the offerors); c. Relevant Experience and Past Performance (which reflects the amount and quality of work accomplished by the previous offerors comparable to the work to be performed under the procurement being evaluated); and d. Other Considerations (which are those considerations, stated the RFP, other than Mission in Relevant Suitability. and Cost. Experience and Past Performance that can affect contract performance).

4. Performing the proposed work properly (Mission Suitability) is always important, and so is the probable cost of performing that work. Probable cost is not necessarily the offeror's estimate of costs; rather, it is the SEB's assessment of what the proposed work is likely to cost. Depending on circumstances, relevant experience and past performance or other considerations may or may not be of prime importance. 5. The SEB evaluates proposals with respect to the four evaluation factors, as follows:

a. <u>Mission Suitability</u>. This factor indicates, for each offeror, the merit or excellence of the work to be performed or product to be delivered. It includes, as appropriate, both technical and management subfactors. Because this factor can be highly technical and must be integrated in order to convey an overall evaluation of relative merit, Mission Suitability and its supporting subfactors shall be numerically weighted and scored. Elements may or may not be numerically weighted and scored.

This factor Cost. b. evaluates what each offeror's proposal will probably cost the Government should it be selected for negotiations leading to award. Proposed costs are analyzed to determine the probable "cost of doing based upon the offeror's business" this proposed approach. Further, identifies assesses the and analysis impact of features that cause a proposal more or less than other cost to 302 for (See paragraph proposals. Cost is not coverage.) detailed numerically weighted or scored.

Relevant Experience and c. Past Performance. This factor indicates the relevant quantitative and qualitative aspects of each offeror's record of services or delivering performing products similar in size, content, and complexity to the requirements of the procurement. The Relevant instant Experience and Past Performance factor provides an opportunity to evaluate the quality of goods and services provided by the offeror(s) to the agency and other Government organizations. The agency has acquired a substantial amount of firsthand experience and past performance data over a variety of program and

contract efforts. Evaluation of this factor also utilizes relevant experience and past performance data from programs acquired by other Governmental organizations, covering both prime and subcontractor performance. The Relevant Experience and Past Performance factor is not numerically weighted or scored.

d. Other Considerations. This factor includes those considerations other than Mission Suitability, Cost, and Relevant Experience and Past Performance. They include, but are not limited to, such items as: financial condition. labor relations considerations, small and disadvantaged small business considerations, and geographic distribution of subcontracts. Other Considerations not numerically is weighted or scored.

Mission Suitability is the only 6. factor which is numerically weighted (normally 1000 points) and scored. Further. each Mission Suitability subfactor is numerically weighted and scored. The sum of the subfactor weights will total the weight of the Mission Suitability factor. A subfactor may, at the discretion of the SEB, be divided into discrete elements which, in total, comprise the subfactor evaluation area. If deemed conducive to the evaluation process, the SEB may weigh and score individual elements of a subfactor. The sum of the weights of the individual elements will equal the weight of the subfactor.

7. The general format for inclusion of the factors, subfactors, and elements in the RFP are:

a. Factor (numerically scored)--Mission Suitability Grouping/Category (not numerically scored)--i.e., Technical or Management (optional)

- (1) Subfactor (numerically scored)
- (2) Subfactor (numerically scored)
- (3) Subfactor (numerically scored)

Element (optional). May or may not be numerically scored.

b. Factor (not numerically scored)--Cost

c. Factor (not numerically scored)--Relevant Experience and Past Performance

d. Factor (not numerically scored)--Other Considerations

# 301 MISSION SUITABILITY

## 1. Evaluation subfactors

Evaluation subfactors are a the weighted areas within the Mission Suitability factor that further identify, for proposal preparation and evaluation purposes, the content of the factor. Mission Examples of Suitability subfactors found by experience to be relevant to many procurements are: Understanding of the Requirement; Management Plan; Key Personnel; Corporate or Company Resources; and Excellence of Proposed Design for hardware procurements. However, citation of these specific subfactors is not intended to be restrictive or all inclusive. The nature and thrust of the requirements and objectives of the procurement mav logically call for the use of some subfactors titled and described in a somewhat different manner than those described below:

(1) <u>Understanding of the</u> <u>Requirement</u>. An offeror's proposal

reflects how well the offeror comprehends the work and the data requirements. The offeror's proposal should be examined and to evaluate the offeror's analyzed understanding of the requirements set forth in the RFP. Understanding of the requirement can be evaluated as a separate subfactor or can be evaluated as an element to be considered as a part of the evaluation of each subfactor. Although costs are analyzed separately from Mission Suitability, they may be significant in indicating an offeror's understanding of the resources, human and material, required for performance of the Accordingly, technical contract. assigned to committees or personnel panels, in evaluation of the Mission Suitability factor pursuant to the weighted subfactors and elements, may be given access to the cost proposals or portions of the cost proposals to help determine the offeror's understanding of the requirements of the RFP. Such cost information may also help them to assess the validity of the offeror's approach to performing the work in accordance with the requirements. Cost realism, or the lack thereof, should enter into the SEB's of measure of the assessment understanding possessed by each offeror. entail Normally this would а consideration of cost realism in the evaluation of all subfactors and elements wherein understanding is an essential Similarly, an offeror's concept. justification or rationale for proposed costs can give insight into how well the work to be performed is understood.

# (2) Management Plan

(a) The offeror's management plan sets forth the offeror's approach for efficiently managing the work as demonstrated by the proposed organization, the recognition of essential management functions, and the effective overall integration of these functions.

(b) The management plan describes the project organization proposed for the work, including internal operations and lines of authority, together with external interfaces and relationships with the Government, major subcontractors, and associate contracproperly prepared, tors. When the authority of the project manager, the project manager's relationship to the next echelon of management, and the project manager's command of company resources can be ascertained from the management plan. Likewise, the management plan provides schedules necessary for the logical and timely pursuit of the work, accompanied by a description of the offeror's work plan.

(3) Excellence of Proposed Design. In hardware acquisition, design of the product is generally a major aspect of competition. In order to arrive at an informed judgment, the SSO may require the SEB's evaluation of the merits of competing designs in relationship to the stated requirement. In evaluating the proposed designs, the consider SEB should the resources required to perform the work inherent in the differing designs. Evaluation of design may extend to whatever subsystem level is deemed appropriate by the SEB include producibility, and may and. reliability, maintainability, as applicable, warranties.

## (4) Key Personnel

(a) Thorough evaluation of proposed key personnel is usually one of the most vital aspects of SEB activity.

(b) Experience demonstrates that the qualifications and

## NASA FAR SUPPLEMENT (NFS)

performance of a few people--the too halfdozen or so directly involved manage:s--are extremely important to successful accomplishment of a contract. For evaluation purposes, the SEB may designate separate subfactor entitled "Kev a Personnel." The SEB may define the number and identity of the key personnel for each offeror in the solicitation or may, subject to such limitations as the SEB deems appropriate to assure a reasonable basis for comparison, permit each offeror to define its own key personnel consistent with its proposed organization.

(c) Written resumes should be the baseline from which the evaluation of key personnel begins. Personal reference checks with people knowledgeable of an individual's training, experience, and performance constitute part of this baseline; these should be made at levels commensurate with the role of the individual in the program or project involved. However, the written and/or oral discussions, if conducted, will include all offerors in the competitive range and may be used to establish the relative merits of personnel proposed by each competing firm.

(d) The presentation to the SSO must clearly and concisely set forth the results of the evaluation and discussion, including the strengths and weaknesses of each offeror's key personnel.

(5) Corporate or Company Resources. The SEB should assess the resources proposed by each offeror in the general areas of human resources and facilities. For example, are the proper skill mixes and numbers of people to do the work being offered? Does the offeror propose facilities and, where required, special test equipment suitable and adequate to assure timely performance of the work? If the offeror does not possess adequate resources internally, is there a demonstration of the ability to acquire them through subcontracts or otherwise?

b. Elements that further define the content of each subfactor may be used. If individually numerically scored, these elements must be revealed in the RFP and must be assigned a specific weighting in the SEB's evaluation plan as a portion of the total points allotted. If they are not numerically scored, identification in the RFP is not required.

c. Establishment of evaluation subfactors, elements, and their weights requires judgment on a case-by-case basis. The subfactors and elements established and included in the RFP will then be utilized to determine each offeror's rating in Mission Suitability, including its understanding of the requirements, approach to the work, and the competence of personnel to be directly involved.

d. By carefully considering the requirement(s) to be satisfied through the products or services being procured, the SEB should be able to identify, analyze, and score discrete subfactors and, where appropriate, elements that determine how well the proposed product or service can be expected to meet the demands of the specific requirement(s). If individual subfactors, elements, and their weights are prudently established, the integrated scores of the subfactors and elements will give a representative picture of the merit of each offeror's Mission Suitability.

e. (1) In structuring evaluation subfactors and elements, emphasis should be placed on identification of significant discriminators, or "key swingers" - the essential information required to support a source selection decision. Too many subfactors and elements are detrimental to effective evaluation of proposals and may result in a leveling or averaging out of scores over all proposals. To avoid this negative effect, the number of subfactors under Mission Suitability shall be no more than 4 and the number of elements no more than 8. Other evaluation factors shall also be limited to only essential subfactors and elements. Further, care should be taken to avoid overlap and redundancy by clearly defining each evaluation subfactor and element. Avoiding such overlap assures an offeror is not scored in two or more areas for the same work.

(2) The following example conveys one approach to describing a subfactor, utilizing elements, in an RFP. Within the "management plan" subfactor the following elements may be determined by the SEB as most suitable to assess how well each offeror's overall management proposal would contribute to the probability of performing the contract in an excellent manner: (a) management approach and organization; (b) staffing plan; and (c) management systems.

f. (1) Proposal risk will be carefully considered in evaluating proposals. The proposal risks to be assessed are those associated with cost, schedule, and performance or technical aspects of the program. These risks will be considered in the Mission Suitability subfactors and the Cost factor evaluation. Risks may be inherent in a program by virtue of the program objectives relative to the state of the art. Risks may occur as a result of a particular technical approach, manufacturing plan, the selection of certain materials, processes, equipment, etc., or as a result of the cost, schedule and economic impacts associated with these approaches. Risk may also occur from the impact that these will have on the offeror's ability to perform.

(2) As part of their proposal, offerors should be required to submit a risk analysis which identifies risk areas and the recommended approaches to minimize the impact of those risks on the overall success of the program. (3) In evaluating risks, the evaluators must consider the offeror's assessment and make an independent judgment of the probability of success, the impact of failure, and the alternatives available to meet the requirements.

(4) Risk assessments shall be discussed in the SEB Report and be considered in determining the overall numerical and adjectival ratings and the strengths and weaknesses.

(5) It is the responsibility of the evaluation teams to inform the cost team of identified risk areas and the potential for cost impact.

g. For each subfactor and element, there should be detailed instructions provided in the RFP's Section L. "Instructions, Conditions, and Notices to Offerors or Quoters," specifying what supporting information should be included in the proposals and the specific format to be used. This increases the probability that SEB evaluators will be provided necessary data in the format easiest to understand and evaluate relative to the subfactors and elements assigned for evaluation and assessment. Thought given to carefully structuring these instructions will generally result in proposals that address what the Government is most interested in relative to the work to be performed. For example, if the evaluation will utilize SEB committees or SEB panels, instructions for proposal preparation in the RFP's Section L that direct offerors to group together information required by such committees or panels will facilitate and accelerate the evaluation process.

h. Where the procurement involves acquisition of a major system

# NASA FAR SUPPLEMENT (NFS)

under NMI 7100.14, "Major System Acquisitions," and the evaluation is to identify the most promising system design concept(s) to be selected for further exploration, the evaluation should also address the benefits to be derived by where tradeoffs. feasible, among technical performance, acquisition cost, ownership cost, and time to develop and procure.

# 2. <u>Weighting of factors</u>, subfactors, and elements

a. Numerical weights shall be used for evaluating the Mission Suitability factor for competing offerors.

(1) Once the b. Mission Suitability subfactors are established. the SEB will determine the weight assigned to each. Likewise, if elements are established, the SEB will determine the weight, if any, assigned to each. The proposed subfactors, elements, and weights will be presented to the SSO or designee for approval. The weight assigned to each subfactor and, if numerically scored, each element must reflect its relative importance within the overall Mission Suitability factor. conjunction, an In evaluation plan covering not only Mission Suitability evaluation, but all evaluation factors (Mission Suitability, Cost, Relevant Experience and Past Performance, and Other Considerations). will he established by the SEB (see Chapter 4). Suitability evaluation Mission subfactors, elements, and their weights shall be established and approved in advance of RFP issuance. The four factors and their supporting subfactors and, if numerically scored, elements shall be described in the RFP's Section M, "Evaluation Factors for Award," and weights associated the with the

individual Mission Suitability subfactors and elements shall be revealed in Section M as well. However, care should be taken to avoid the impression of a mathematical evaluation devoid of judgment. The weights are intended to be used by the SSO as a guideline.

(2) If all evaluation factors are considered by the SEB to be of approximately equal importance, a statement to that effect shall be included in the RFP. However, if there is а difference in the level of importance among the factors, then a statement shall be included in the RFP to advise the offerors of the relative of the factors. importance In this regard, one example of a statement that might be appropriate, depending on the nature of the requirements, type of and contract. objectives of the acquisition, is as follows:

"Of the four evaluation factors identified above. Mission Suitability and Cost are most important, and, as related to each other, are approximately equal in importance. The Relevant Experience and Past Performance factor is of somewhat less importance than either Mission Suitability or Cost, and the Other Considerations factor is of considerably less importance than Relevant Experience and Past Performance.

The subfactors to be used in evaluating Mission Suitability and their corresponding weights are listed below in descending order of importance:

Understanding of the Requirement (40 percent)

#### NFSD 89-14 (March 31, 1994)

# PART 18-70 NASA SUPPLEMENTARY REGULATIONS

Excellence of Proposed Design (30 percent) Management Plan (15 percent) Key Personnel (10 percent) Corporate or Company Resources (5 percent)

The numerical weights assigned to the five subfactors identified above are indicative of the relative importance of those evaluation areas. The weights will be utilized only as a guide."

## 302 <u>COST</u>

1. Before issuing a solicitation, the contracting officer and technical personnel shall (when it is feasible to do so) develop a Government cost estimate for the planned acquisition. Estimates can range from simple budgetary estimates to complex estimates based on inspection of the product itself and review of such items as drawings, specifications, and prior data. The SEB is tasked with the responsibility to ensure that the Government cost estimate properly reflects the effort to which the RFP applies.

2. In the Cost factor evaluation, the SEB shall analyze the proposed costs or prices of all offerors in accordance with the criteria in FAR 15.805. The SEB may use any or all tools available in performing these analyses, including information in the Armed Services Pricing Manual (ASPM). If field pricing/audit support is requested, the request should be tailored to reduce the time required for the support and still enable the SEB to properly review Whenever possible and proposals. appropriate, pricing/audit support should be limited to rates and factors checks, or otherwise limited to that information specifically required for the SEB All pricing/audit deliberation process. support requests should specifically identify the limited areas for which pricing assistance is required and should also specify the response date required for timely accomplishment of SEB proceedings. At the conclusion of its analyses, the SEB shall advise the SSO concerning--

a. The costs or prices as proposed by all offerors, including those not within the competitive range;

b. The comparison of costs proposed by all offerors, with the independent Government cost estimate, when feasible;

c. The realism of costs proposed by all offerors determined to be within the competitive range. Cost realism is a review of the proposal to determine if the overall costs proposed are realistic for the work to be performed, if the costs reflect an offeror's understanding of the requirements, and if the costs are consistent with the various elements of the technical proposal. This type of analysis will be used in the Cost area and Mission Suitability or other technical areas;

d. The probable cost to the Government of, at a minimum, each proposal within the competitive range. If it appears to the SEB that any offeror's approach(es) or plan(s) for accomplishing the proposed work will require modification in order to be acceptable to the Government, the SEB shall identify and assess the modification required, determine the probable cost of such modification, and include that probable cost assessment in its report to the SSO;

e. The differences in business methods, operating procedures, and practices as they impact cost; and

f. Its level of confidence in the probable cost assessments as they pertain to each fully evaluated proposal.

3. The probable cost should reflect the SEB's best estimate of the cost of any contract which might result from that offeror's proposal, including any recommended additions or reductions in personnel, equipment, or materials. To the extent that the recommended additions or reductions reflect a lack of understanding of the requirements of the RFP, that lack of understanding should be reflected in the scoring of the Mission Suitability factor, subfactors, and elements.

4. A well-defined statement of work reflecting clear, concise work breakdown structures is of great value in obtaining well-structured proposals and in allowing the SEB to understand and assess proposed costs.

5. All cost categories and amounts present in an offeror's cost proposal (including options) are to be analyzed by the SEB and reported to the SSO. In the event SEB members have different opinions as to the cost analyses and assessments of probable costs, these differing opinions should be reported to the SSO to aid in forming an opinion regarding the confidence to be attributed to the analyses and assessments.

# 303 <u>RELEVANT EXPERIENCE AND</u> <u>PAST PERFORMANCE</u>

ł

ł

1. This factor addresses evaluation of overall relevant experience and past performance for the company, not the experience and past performance of individuals involved with contract performance; the latter are to be evaluated under key personnel within the Mission Suitability factor.

2. Relevant experience reflects the accomplishment of work by an offeror that is comparable to or related to the work or effort required under the instant procurement. Programs or projects of comparable magnitude that include technical, cost, schedule, and management constraints similar to those expected to be encountered in the instant procurement are clearly relevant.

3. Past performance is especially | important; how well the offeror performed on similar work may be a significant indicator of performance on the job at hand. Manv organizations exhibit characteristics that persist over time--for example, the ability to move projects out of the research environment and to translate research findings into practical, resultsoriented hardware; difficulty in transitioning conceptual efforts into soundly engineered "hardcopy" plans which can be produced economically; resiliency in the face of trouble; resourcefulness; management determination that the organization live up to its commitments; and skill in development of key people. It is essential to develop such an indicator independent of the offeror's proposal. It is the responsibility of the SEB to collect and document information on the past performance of, at a minimum, all offerors within the competitive range. The SEB should personally contact program or project managers within NASA or other Government agencies in a position to have responsibly observed performance of the offerors as either a prime or major subcontractor and obtain their views concerning the quality of the work the offeror did (or is doing) on comparable jobs. In the event a substantially unfavorable response is received which, in the opinion of the SEB will be of special significance to the SSO, the offeror in question will be provided an opportunity during written and/or oral discussions (see Chapter 4) to clarify that response.

4. The SEB is responsible for **1** collecting and developing relevant experience and past performance information, identifying the source, and

#### NFSD 89-14 (March 31, 1994)

# PART 18-70 NASA SUPPLEMENTARY REGULATIONS

presenting it to the SSO. While the clearly relevant experience or past performance is of prime importance, other experience or past performance determined by the SEB to be significant or to be indicative of company experience or past performance should be noted and brought to the attention of the SSO. All pertinent information, including project manager assessments and offeror responses, will be:

a. Made part of the SEB's records,

b. Contained in the SEB report, and

c. Presented to the SSO.

I

I

5. The Relevant Experience and Past Performance factor is not numerically scored but is assigned an adjectival rating by the SEB.

6. This factor may be a significant consideration in the selection process. Therefore, the basis of the evaluation must be thoroughly identified and well documented. While objectivity is desirable, reasonable judgments of ten have to be made in the evaluation process. Subjectivity is not improper; an SEB should not hesitate to make reasonable subjective evaluations of relevant experience and past performance based upon as much factual data and experiential information as can be reasonably accumulated.

#### **304 OTHER CONSIDERATIONS**

1. This factor includes all considerations other than Mission Suitability, Cost, and Relevant Experience and Past Performance that the SSO will consider in making a final selection. Only Other Considerationsspecifically identified in the RFP shall be considered by the SSO in making a decision.

2. Following is a listing of Other Considerations that may be appropriate to include in an RFP. Not all of the subfactors listed are necessarily applicable to all procurements; nor is the listing intended to be all inclusive or restrictive:

a. Financial condition and capability.

b. Corporate priority on the work being proposed, or importance of the business to corporate management.

c. Labor-management relations.

d. Extent of proposed small and small disadvantaged business, and womenowned small business enterprise participation in subcontracting arrangements.

e. Geographic distribution of the work to be performed.

f. Acceptance of contract terms and conditions set forth in the RFP.

g. Quality and productivity improvement plan.

h. Any other subfactors pertinent to the particular procurement and identified under the Other Considerations factor within the RFP.

3. Other Considerations shall be defined specifically in the RFP, evaluated by the SEB, and reported to the SSO. Certain subfactors under the Other Considerations factor, such as financial condition and capability, may undergo change up to the moment of source selection.

4. Information regarding some of the Other Considerations is generally available to an SEB in the form of preaward surveys, NASA inspection reports, facility capability reports, purchasing system surveys, audit reports, and equal employment opportunity

# NASA FAR SUPPLEMENT (NFS)

surveys. The SEB should make every reasonable effort to identify and use timely existing reports before initiating original inquiries. While written reports such as those mentioned in this paragraph may be significant, they should not be exclusively relied upon by the SEB. In addition, personal inquiries should be directed to Government managers likely to be knowledgeable about the offeror's record in these areas.

# 305 <u>CONTINUING EVALUATIVE</u> <u>RESPONSIBILITY OF SEB</u>

Even after the SEB has made its formal

report to the SSO, the SEB shall have continuing responsibility to report to the SSO, until its discharge, any circumstances that would change the SEB's evaluation findings relative to any evaluation factor (Mission Suitability, Cost, Relevant Experience and Past Performance, and Other Considerations) for any offeror. It is not intended that, after its report, the SEB actively pursue continuing evaluation. What is expected is that matters related to any of the evaluation factors which come to the attention of the SEB, and which might be expected to be pertinent to the selection decision, will be communicated to the SSO.

# CHAPTER 4: SEB OPERATING PROCEDURES FOR SOLICITATION AND EVALUATION

## 400 GENERAL

This Chapter describes procedural steps in preparing the SEB for its work and outlines SEB activities for solicitation and evaluation of proposals.

## 401 INITIAL SEB ACTIVITIES

Official 1. SEB activities commence upon receipt by the Chairperson of the letter establishing the SEB and designating its members which should be no later than approval of the procurement plan. However, prior to official establishment of the SEB, the proposed SEB Chairperson and members may hold meetings to accomplish such tasks as SEB member orientation to proposed operational procedures, security measures that will be utilized, and preliminary review of the proposed RFP.

2. Once the SEB is established, the SEB Chairperson shall ensure that--

a. A management and staffing plan is prepared, indicating necessary personnel and other resource requirements, including a time schedule for SEB actions and events leading to presentation of findings to the SSO;

b. Each SEB voting member is furnished appropriate information regarding the nature of the procurement in addition to a copy of their designation letter, approved procurement plan, and the projected time schedule;

c. Each SEB participant, voting and nonvoting, is cautioned concerning restrictions on disclosure of information during the SEB process, avoidance of conflicts of interest, and conformity with the NASA Standards of Conduct. Each SEB participant, voting and nonvoting, shall file a NASA Form

"Confidential 1270. Statement of Employment and Financial Interests," in accordance with NHB 1900.1, "Standards of Conduct for NASA Employees." In addition, each SEB participant shall sign an appropriate nondisclosure statement (a nondisclosure statement sample is included in Appendix B). These documents shall be reviewed by the Associate General Counsel for General Law or designee for Headquarters employees or by the cognizant Field Installation Chief Counsel or designee for field installation employees.

Letters are issued to all d. personnel involved in the SEB's activities advising them of pertinent restrictions and prohibitions, including a caution not to discuss any aspect of the procurement with anyone not having a need-to-know. The right to information on a need-to-know basis does not extend to the normal chain of supervision of any member of the SEB or to any individual having technical responsibility for the evaluated effort being except as specifically approved the SEB by Chairperson on a case-by-case basis. Those individuals will also be notified by the SEB Chairperson, in writing, of the privileged character of proposal information:

e. The list of sources to be solicited is developed and approved by the SEB with the assistance of the cognizant procurement and program or project offices;

f. A draft RFP is an effective method of obtaining industry comment on our requirements and engendering industry goodwill. A draft RFP should be used whenever it is expected to be beneficial. The draft RFP should be complete and include all applicable sections, including Sections L and M. Where appropriate, the Statement of Work

or specifications may be released in advance of the draft RFP;

g. Prior to RFP issuance, the substance and the weight of evaluation factors, subfactors, and elements, as well as the substance of any applicable qualification standards, are presented to the SSO or designee for approval;

h. The RFP is reviewed and approved by the SEB prior to issuance;

During the competitive i. phase of the procurement, every effort must be made to assure fair and equitable treatment of all offerors (both prospective and actual). Upon release of the formal RFP, the Chairperson shall impose a communication blackout, in writing, directing by all personnel associated with the procurement to refrain from communicating with prospective offerors, formally or informally, regarding any aspects of the procurement. All inquiries regarding the procurement shall be referred to the contracting officer; and

Prior j. to receipt of proposals, the evaluation plan is reviewed and approved by the SEB and cognizant management personnel. The evaluation plan, once approved, must be impartially applied by the SEB to each proposal.

# 402 EVALUATION PLAN

1. The SEB evaluation plan of general consists and specific evaluation guidelines (and qualification standards, where applicable) established to assess each offeror's proposal relative the to evaluation factors. subfactors, and elements set forth in the RFP. The evaluation guidelines are

designed to focus the evaluators' assessment. They are not weighted and are not listed in the RFP. However, the substance of the guidelines may be included in a narrative description of subfactors the and elements. In addition, the plan includes the system used in conducting the evaluation and scoring each offeror's proposal.

2. The SEB determines what evaluation factors. subfactors. and elements to assign to the various committees and panels. While it is necessary to give committees and panels all information required to conduct an evaluation of their assigned area, it is not appropriate to disclose to them the specific scoring system used by the SEB in scoring proposals.

3. The detailed SEB evaluation plan to be used by the SEB, committees, and panels should be approved before the RFP is issued but, in any case, shall be approved before proposals are evaluated.

# 403 QUALIFICATION STANDARDS

1. It is NASA policy to offer the opportunity to compete for its procurements as broadly as is consistent with the nature of each particular procurement. However, in view of the distinctive characteristics of NASA programs, those potential offerors that do not possess the minimum qualifications and resources necessary to perform the proposed work of a given procurement should not be encouraged to incur proposal and other expenses involved in competitive submissions.

2. To accomplish this objective without limiting meaningful competition requires early and intense effort on the part of the SEB, working in conjunction with the program and procurement staff

# NFSD 89-12 (November 30, 1992)

most familiar with the procurement requirements.

3. When the nature of the procurement requires, qualification standards may be established in accordance with FAR 9.104-2. These will

(The next page is 27.)

.

consist of special experience, capability, or specialized facilities critical to program performance aspects of the procurement.

4. In establishing qualification standards, care must be exercised to restrict them to those essential to the successful completion of the contract work. Qualification standards may be employed only where it is possible for the SEB to establish standards which are justified by the nature of the particular procurement. These standards must be applied equally to all potential sources.

5. When developed by the SEB and approved by the SSO or designee, qualification standards shall be clearly set forth in the RFP and included in the Commerce Business Daily synopsis.

6. Approved qualification standards will be used by the SEB to screen proposed source list(s) so that only firms possessing unique specialized facilities, those capability, or experience deemed critical to program performance aspects of the procurement will be solicited. Notwithstanding the considerations that lead to the elimination of sources from solicitation, any firm may submit a These same qualification proposal. standards will be used to consider all sources who may submit a proposal. This assures that the presolicitation consideration of prospective contractor qualification standards does not act to restrict competition, but only to discourage costly proposal submissions from potential offerors to whom award would not appear likely and that all offerors shall have an equal opportunity to compete. If an offeror fails to meet the stated qualification standards, the proposal shall be rejected, not considered further in the evaluation, and the offeror informed of the basis of rejection.

# 404 <u>REQUEST FOR PROPOSALS</u> (<u>RFP's</u>)--<u>REVIEW AND</u> <u>APPROVAL</u>

1. Effectiveness of the evaluation is dependent, in large measure, on how well the work to be performed and the basic ground rules under which the competition will be conducted are described in the RFP. Accordingly, the RFP shall be reviewed by the SEB and approved by appropriate levels of management prior to issuance to ensure To streamline the its acceptability. solicitation review cycle, use of the Solicitation Review Board (SRB) technique, or its functional equivalent, is encouraged as an alternative to the traditional procedure of serial or sequential coordination of the solicitation with reviewing offices. The SRB is a meeting in which all offices having review and approval responsibilities meet to discuss the solicitation and their concerns. Individual reviewers should be given a reasonable amount of time to review the document prior to the meeting. At the conclusion of the meeting, recommendations for changes are made and the solicitation is formally approved or disapproved. Afterwards, formal written minutes reflecting the agreement of the SRB members shall be prepared and included in the contract file. Use of this technique not only expedites the review and approval process, but it also encourages the synergism of a number of acquisition professionals discussing their concerns in one forum.

2. In reviewing the RFP, the SEB and appropriate management shall ensure that the following matters pertinent to source evaluation and selection are fully covered in the solicitation:

a. Any qualification standards shall be identified and described.

b. Evaluation factors shall be described, including a general narrative explanation of their relative importance.

c. The Mission Suitability factor shall be described. Evaluation subfactors shall be identified and described, including their numerical weights. If deemed conducive to the evaluation process, elements of a subfactor shall be identified and described, including their numerical weights.

d. The Cost factor shall be described.

(1) When uncertainties involved in contract requirements necessitate the use of a cost-type contract, offerors may be motivated to perform within the proposed cost estimate through the inclusion of appropriate cost incentive arrangements.

(2) Negotiated indirect cost rate ceilings shall be used only in accordance with FAR 42.707.

e. The Relevant Experience and Past Performance factor shall be described. The identification data and contact or customer references required by NFS 18-15.406-70(b)(6) for the conduct of this evaluation shall be stated. Offerors should be cautioned that omissions or an inaccurate or inadequate response to this evaluation category could have a negative effect on overall evaluation. Offerors should also be advised that, in addition to information they provide, the SEB will consider all information available to NASA regarding the offeror's relevant experience and past performance.

f. The Other Considerations factor shall be described.

g. The method of evaluation shall be explained clearly, but concisely, so that prospective offerors understand the SEB's use and treatment of the factors, subfactors, and elements. h. When cost proposals are permitted to be submitted after technical proposals, a notice shall be included in the RFP stating the required date for each submission.

i. When applicable, a notice that a preproposal conference is to be held shall be included, stating its purpose, time, place, and scope.

j. The Statement of Work shall describe as clearly and concisely as possible the product or service to be procured. It shall be structured to identify the important areas of emphasis. There must be no inconsistencies between it and the evaluation factors, subfactors, and elements to be used by the SEB and the SSO. Nonessential or unduly restrictive requirements shall be eliminated.

k. Requirements for reports and data essential to contract evaluation and performance shall be clearly described, including a cross reference to the Statement of Work and a schedule for submission.

1. When the procurement involves a major system under NMI 7120.4. Management of Major System Programs and Projects, and NHB 7120.5 Management of Major System Programs and Projects Handbook, the SEB will ensure that the RFP is prepared in terms of mission need so each offeror can respond with an alternative system design concept proposal to satisfy the mission need and can propose a technical approach, design features, and alternatives to schedule, cost, and capability goals consistent with that concept. In order to remove inhibitions to innovative solutions and to improve the approach to achieving program objectives, consideration should be given to conducting orientation briefings for prospective offerors and, where appropriate, solicit comments on a draft of the solicitation.

m. Limitations on pages and the

number of copies of offerors' initial proposals shall be included in accordance with NFS 18-15.406(d). In no case shall the total proposal, excluding cost/price information, exceed 500 pages using the page definition of 18-15.406(c), unless a different limitation is approved in writing by the Procurement Officer. Firm page limitations shall also be established for BAFOs, if requested. The appropriate BAFO page limitations should be determined by considering the complexity of the procurement and the extent of any written or oral discussions. The same BAFO page limitations shall apply to all offerors. Proposal pages exceeding the specified maximums shall be removed from the proposal or BAFO and not evaluated. One copy of these pages shall be retained for the official contract file and the remaining copies returned to the offeror. When excess pages are returned to the offeror, cite the Proposal Page Limitations provision of the solicitation.

n. When applicable, a notice is included that offerors are invited to give oral presentations after receipt of proposals but before initial evaluation.

3. The SSO may request a detailed review of the RFP beyond that of the SEB and cognizant management personnel or may, more specifically, request a detailed review of the Statement of Work, qualification standards, evaluation factors, subfactors, elements, or other areas pertinent to proposal preparation, evaluation, and source selection. Specific reviewing officials or offices may be designated for this purpose.

4. The RFP shall comply with all current regulations and directives applicable to NASA solicitations; particular emphasis is placed on the requirements of FAR 15.406 and NFS 18-15.406. 5. When detailed program or project support plans will be required as part of the offeror's proposal but are not considered important discriminators in the evaluation process, the requirements for these plans shall be described in separate appendices to the Statement of Work in accordance with NFS 18-15.406-70(a)(7).

6. When, either before or after receipt of proposals, the Government modifies its requirements, the contracting officer is required to issue a written amendment to the RFP in accordance with FAR 15.606.

# 405 PREPROPOSAL CONFERENCE

1. A preproposal conference to brief prospective offerors may be conducted after a solicitation has been issued but before proposals are received, in accordance with FAR 15.409. The contracting officer, in conjunction with the SEB, shall make a determination prior to issuance of the solicitation whether a preproposal conference will be held. Conferences should be held only when their value to the Government and prospective offerors is apparent, and the specifics of any given procurement should be carefully considered in assessing this value. Generally, these conferences are of most value in complex acquisitions where it is necessary to ensure that complicated specifications or requirements are fully and clearly understood. These conferences can also be of value in major on-site service contracts to familiarize offerors with the center organization and its physical layout. as well as the specific contract tasks. (In these latter cases, site visits and observation of on-going operations should also be considered). In more routine, less complex procurements, however, the preproposal conference offers far less value and should normally not be used.

#### NASA FAR SUPPLEMENT (NFS)

2. When a preproposal conference is held, the solicitation shall include the Preproposal/Pre-Bid Conference provision at 1852.215-77, indicating the time and place of the conference. The conference shall be scheduled to permit prospective offerors sufficient time after the issuance of the solicitation to become familiar with its requirements but not too late to allow meaningful use of the information obtained at the conference.

3. The conference should include a presentation of the significant aspects of the procurement followed by a question and answer session. A record of all information provided at the conference, together with a copy of all questions and answers, shall be provided to all prospective offerors by formal written amendment to the solicitation. If it becomes apparent at the conference that the RFP needs revision, the revised requirements must be included in a written amendment.

## 406 OFFEROR ORAL PRESENTATIONS

1. In some cases, offeror oral presentations may expedite the evaluation and provide insight into the proposals. These presentations are of particular value in procurements when the proposal content is expected to be complex or when the proposal will include an unusually large number of volumes. The SEB should consider the specifics of a given procurement in assessing the value of offeror oral presentations, and should utilize them only when their value is apparent.

2. If offeror oral presentations are held, they should be conducted before commencement of initial evaluation of proposals, normally not more than three days after receipt. The offerors should be instructed that the presentations are to be a "roadmap" to understanding their proposals, i.e., a discussion of the proposal organization and layout, and where required information and elements are located. Although the offeror's basic approach to satisfying solicitation requirements may be explained, it is to be done so only in general terms and only to expedite the Government's formal evaluation. The presentation is not intended for the offerors to provide additional information or supporting rationale that was not included in the proposal, nor is it to be a forum to "market" the proposal. Government attendees shall not engage in any discussions during the oral presentation, and no proposal revisions may be accepted as part of the presentation. The Government's evaluation of offeror proposals is be based on the contents of the initial proposal, and any information not included in the initial proposal that is provided at the oral presentation shall not be evaluated.

3. A typical presentation consists of a strictly enforced one to two hour briefing period followed by a question and answer period. Government evaluators may ask questions about the proposal "roadmap" only and should not engage in detailed discussions over the value or validity of the offeror's proposed approach to satisfying solicitation requirements. All offerors must be afforded the same opportunity to brief and the same briefing groundrules. If considered appropriate, limitations may be placed on the number of offeror and Government attendees to ensure the presentation meets its intended purpose. The order of presentation should be determined at random.

4. The SEB may determine which of the Government participants in the evaluation may attend the offeror oral presentations. However, to eliminate bias and to ensure the objectivity during the evaluation process, any individual who attends one presentation must attend all presentations, unless prevented from doing so by emergency or other unforeseen event. The SEB shall retain one copy of all

briefing materials (if any) used in the presentation, as well as SEB-prepared minutes of the meeting, as historical records for the official contract file. However, the briefing materials and minutes shall not be used in the formal evaluation process.

## **407 INITIAL EVALUATION**

1. Upon receipt of proposals, the contracting officer shall mark each proposal with the date and time of receipt and forward all proposals to the SEB Chairperson or the SEB Recorder for control and safeguarding throughout the evaluation process.

2. Late proposals or modifications shall be handled in accordance with FAR 15.412.

## 3. Procedure for Evaluation of a Single Proposal

a. If only one proposal is received in response to the solicitation, the contracting officer shall examine the situation to ascertain the reasons for the single response. The contracting officer shall include a written notation in the contract file describing the circumstances surrounding the receipt of a single proposal as well as a determination whether or not the solicitation was or was not flawed or unduly restrictive, prior to releasing the proposal to the SEB for evaluation.

b. The SEB shall complete a limited preliminary evaluation to determine that the single proposal submitted satisfies stated qualification standards, if any, and is otherwise an acceptable proposal (see subparagraph 406.5). Upon completion of this limited preliminary evaluation, a letter shall be forwarded to the SSO presenting a summary of the evaluation results. c. The SSO shall as a result of reviewing the SEB summary, and the contracting officer's examination of the facts and determination, notify the SEB Chairperson that either--

(1) The SEB is instructed to proceed with pre-established SEB procedures, including complete initial evaluation, oral and written discussions, request and receipt of a Best and Final Offer (BAFO), and final evaluation, culminating in a formal presentation to the SSO for approval to enter into negotiations;

(2) The contracting officer is instructed to immediately enter into negotiations resulting in a complete contract document, signed by the offeror, to be signed by the contracting officer upon approval by the SSO. Upon completion of the negotiations, the SEB shall present the results to the SSO for approval; or

(3) The SEB Chairperson is granted full delegation of authority to disband the SEB and to instruct the contracting officer to conduct negotiations for contract award without further SSO involvement.

(4) The contracting officer is instructed to reject the single proposal received and to cancel the solicitation.

d. These procedures are likewise applicable when the number of proposals equals the number of awards contemplated or when only one acceptable proposal is received as defined by subparagraph 406.5 of this handbook.

# 4. Committee Evaluations

a. The initial phase of evaluation

## NASA FAR SUPPLEMENT (NFS)

generally will involve established committees. As promptly as possible, committees are to be convened. The SEB Chairperson shall transmit to the committees proposals or portions of proposals to be evaluated, instructions regarding the expected function of each committee, and all data considered necessary or helpful. The committee chairperson is responsible for instructing the members as to committee functions, responsibilities, and procedures.

b. While oral reports may be given to the SEB, the committee function requires the submission of a written report which should include--

(1) Copies of individual worksheets and supporting comments to the lowest level evaluated;

(2) An evaluation sheet summarized for the committee as a whole; and

(3) A statement for each proposal describing any strengths or weaknesses which significantly affected the evaluation and stating any reservations or concerns, together with supporting rationale, which the committee or any of its members want to bring to the attention of the SEB.

c. It is imperative that the SEB provide clear traceability throughout the evaluation process. This traceability must exist at all levels of the SEB process. All reports submitted by committees or panels will be retained as part of the SEB records but need not necessarily be included as part of the SEB report to the SSO. A committee report should be included with the SEB report if it is so significant that its inclusion is necessary to the SSO's understanding of the SEB's action.

d. Each voting SEB member shall

thoroughly review each proposal. Committee reports and findings shall be reviewed by the SEB. The SEB is to consider the committee evaluation, take into account any reservations or concerns stated by the SEB members and the committee, and rate or score the proposals for each evaluation factor, subfactor, and element according to its own collective judgment. SEB minutes shall reflect this evaluation process which shall be consistent with the approved evaluation plan.

# 5. Identification of Unacceptable Proposals

a. The SEB may discontinue the evaluation of any proposal which is unacceptable because--

(1) It does not represent a reasonable initial effort to address itself to the essential requirements of the RFP or clearly demonstrates that the offeror does not understand the requirements of the RFP;

(2) In research and development procurement, a substantial design drawback is evident in the proposal, and sufficient correction or improvement to consider the proposal acceptable would require virtually an entirely new technical proposal; or

(3) It contains major technical or business deficiencies or omissions or outof-line costs which discussions with the offeror could not reasonably be expected to cure.

b. Simple technical nonresponsiveness in the sense in which the term is used in sealed bidding is not alone sufficient to constitute unacceptability if the proposal is otherwise competitive and written and/or oral discussions, or negotiations after selection, reasonably offer the likelihood of resolution. When there is doubt as to whether a proposal should be rejected initially as unacceptable, that doubt shall be resolved by including it for further consideration.

c. The SEB must document its judgment that the deficiencies of any proposal are sufficiently significant to warrant discontinuing evaluation of the proposal at this point in the process.

## 6. SEB Findings

a. Preparing the results of the initial evaluation in a narrative SEB report is an important aspect of the evaluation process. The SEB should be aware that the SEB report and presentation provide the principal tools available to the SSO to perform a comparative analysis in making a source selection decision. Guidelines for the report and presentation are set forth in Chapter 5 and Appendix C. For each proposal, the SEB should indicate in the narrative whether the proposal meets or fails to meet any of the requirements of the RFP; all strengths and weaknesses of the proposal and whether they are correctable; the proposed and probable cost (normally required only for those offeror(s) in the competitive range or those offeror(s) eliminated from competitive range on the basis of cost); the technical, schedule, and cost risk associated with the proposal; and the adjectival rating of the Relevant Experience and Past Performance and Other Considerations evaluation factors. Strengths and weaknesses must be further defined in the SEB report as major or minor to provide a valuable summary of discriminators among proposals in addition to supporting the adjectival ratings assigned to each Mission Suitability subfactor and element by the SEB, and for the Mission Suitability factor as a whole. In addition to the narrative report of evaluation findings, the SEB will apply the Mission Suitability

scoring system detailed in the evaluation plan to rate each proposal in relation to the Mission Suitability evaluation subfactors and elements.

b. In structuring an appli- cable rating system, the following adjective ratings, definitions, and percentile ranges shall be used for the evaluation of Mission Suitability subfactors, and, if individually weighted and scored, elements. (The total proposal should also be classified with an appropriate adjectival rating for Mission Suitability.)

# PERCENTILE RANGE

- Excellent A comprehensive 91-100 and thorough proposal of exceptional merit with one or more major strengths. No weaknesses or only minor correctable weaknesses exist.
- Very Good A proposal which 71-90 demonstrates overall competence. One or more major strengths have been found, and strengths outbalance any weaknesses that exist. Any major weaknesses are correctable.
- Good A proposal which 51-70 shows a reasonably sound response. There may be strengths or weaknesses, or both. As a whole, weaknesses, not off-set by strengths, do not significantly detract from the offeror's

## NASA FAR SUPPLEMENT (NFS)

response. Major weaknesses are probably correctable.

- Fair A proposal that has 31-50 one or more weaknesses. Weaknesses have been found that outbalance any strengths that exist. Major weaknesses can probably be improved, minimized, or corrected.
- Poor A proposal that has 0-30 or more major weaknesses which are expected to be difficult to correct, or are not correctable.

c. Normally, proposals are to be rated using adjectival ratings on two occasions as follows:

(1) Upon completion of the initial evaluation of proposals, and

(2) Upon completion of the final evaluation of the BAFO's.

Both ratings will be maintained by the SEB, included in the SEB report, and presented to the SSO. There shall be clear traceability of any scoring changes between initial and best and final proposals.

d. Proposals may also be evaluated and scored under an alternate method that does not require scoring after initial evaluation of proposals. It normally may only be used when two conditions exist: (1) relatively few (e.g., five or fewer) proposals are received; and (2) a full scoring or ranking of proposals is not required to make the determination that all offerors are in the competitive range. If during the initial evaluation of proposals, it becomes apparent that all offerors will be in the competitive range, the SEB may then elect to use the alternate method of initial evaluation by making this competitive range determination without formally scoring or ranking the proposals or generating the extensive documentation required to support this scoring or ranking. Once the alternate method is chosen, the initial evaluation is completed when the SEB determines strong and weak points for all proposals and develops questions for written and oral discussions. The SEB will then proceed directly to the discussion phase of the evaluation process. Only the BAFO is fully scored and ranked, and the results of this scoring or ranking are presented to the SSO to assist the selection decision. The principal benefit in using the alternate scoring method is the reduced time and resources associated with not performing two separate proposal scorings along with the attendant documentation.

#### 7. Determination of Competitive Range

Subsequent to the initial а. identification of proposals considered unacceptable, the SEB will compile initial evaluation findings, of all remaining acceptable proposals, sufficient for determination of the competitive range in accordance with FAR 15.609 and NFS 18-15.613-71(b)(4). The competitive range shall be determined by the SEB together with the contracting officer on the basis of Mission Suitability, Cost, Relevant Experience and Past Performance, and Other Considerations stated in the solicitation and shall include all proposals that have a reasonable chance of being selected for award. Competitive range determinations are final unless the SSO determines otherwise.

b. The objective of a competitive range determination is not to eliminate proposals but to facilitate competition by conducting written and/or oral discussions with only those offerors who have a reasonable chance of being selected for award. Where there is doubt as to whether a proposal is or is not within the

## NFSD 89-0 (NFSD 89-13)

# PART 18-70 NASA SUPPLEMENTARY REGULATIONS

competitive range, the proposal should be included within the competitive range. The determination of competitive range is a complex determination based on informed judgment. All competitive range decisions shall be completely and adequately documented in the contract file in accordance with NFS 18-15.613-71(b)(4).

8. Notification of Unsuccessful Offerors. The contracting officer shall notify each unsuccessful offeror in accordance with FAR 15.1001(b) at the earliest practicable time, in writing, that its proposal is no longer to be considered for contract award.

## 408 FINAL EVALUATION

1. Evaluation of Plant and Facilities

a. Inspections at the plants of competing offerors could provide valuable insight into the SEB's evaluation of proposals. For instance, in procurements where significant experimental, research, developmental, testing, fabrication, or other work is to be performed (the quality of which may be affected by a contractor's plant or facilities), a complete evaluation may require an on-site visit by the SEB. For other procurements, e.g., support services contracts, plant inspections may serve no useful purpose.

b. When plant inspections are conducted, the visiting team shall include SEB members and any qualified experts required by the SEB. At least one SEB member shall be the same on all team visits to provide continuity and a basis for comparison. Visits are to be conducted, generally, after the SEB's initial evaluation has been completed and for a specific, clearly understood purpose. Visits shall be conducted only with the approval of the SEB Chairperson, who will ensure that all visits are made on an impartial basis. All personnel must remember that only the contracting officer can commit NASA and that they must avoid any contact with an offeror that is not essential or which could raise questions of impropriety. A visit to all offerors within the competitive range is advisable if plant inspections are being conducted.

c. Some potential benefits of plant visits are--

(1) Reviewing with resident Government personnel relevant experience and past performance;

(2) Reviewing the degree of capability and interest of the offeror to undertake the project in light of other work planned or in process; and

(3) Examining such matters as--

(a) Plant capacities;

(b) Management and technical capability of personnel;

(c) Availability of existing facilities, both Government-owned and contractor-owned;

(d) Adequacy of accounting practices and cost controls;

(e) Adequacy of estimating systems; and

(f) Ability to forecast and meet program schedules.

2. Written and/or Oral Discussions

a. Except as provided in FAR 15.610(a), the contracting officer shall conduct written and/or oral discussions with all responsible offerors in the competitive range. If, however, a decision made in accordance with FAR is 15.610(a)(3) to award without conducting written and/or oral discussions upon the completion of the initial evaluation, the SEB Chairperson shall forward a letter to the SSO for approval presenting a summary of the evaluation results. Upon SSO approval, the contracting officer shall undertake to complete all actions necessary to award the contract, without discussions or negotiations, to the offeror submitting the lowest overall cost proposal.

b. Written and/or oral discussions shall be conducted in accordance with FAR 15.610 (with the exception of FAR 15.610(c)(2)) and NFS 18-15.613-71(b)(5). Preparation for written and/or oral discussions should include, but not be limited to, the establishment of the following:

(1) The time(s) and place(s) for conducting discussions. This requires establishment of the order of discussions with offerors. When feasible, the order should be established alphabetically or by lot. When discussions are to be at offeror's plants or offices it may be that geographic dispersion will be the deciding factor. The objective is impartiality.

(2) Topics for discussion. This will include preparation and issuance of written questions common to all offerors, as well as those that are peculiar to individual offerors, allowing adequate time for development of responses by offerors.

(3) The Government team that will conduct the discussions. The contracting officer, together with the SEB Chairperson, will designate appropriate procurement, pricing, and technical personnel for the Government team in addition to identifying the individuals specified in the offeror's proposal requested to be present for the discussions.

c. The contracting officer, together with or on behalf of the SEB, will conduct written and/or oral discussions of the effort to be accomplished and the cost or price of the effort with all offerors determined to be within the competitive range. The discussions are intended to assist the SEB--

(1) In understanding fully each offeror's proposal and its strengths and weaknesses based upon the individual efforts of each offeror;

(2) In assuring that the intent and the points of emphasis of RFP provisions have been adequately conveyed to the offerors so that all offerors are competing equally on the basis intended by the Government;

(3) In evaluating the personnel proposed by each offeror; and

(4) In presenting a report to the SSO that makes the discriminators identified among proposals clear and visible.

d. In cost-reimbursement type contracts and all research and development contracts, the contracting officer shall point out instances where the meaning of some aspect of a proposal is not clear and instances in which some aspects of the proposal failed to include substantiation for a proposed approach, solution, or cost estimate. However, where the meaning of a proposal is clear and the SEB has sufficient information to assess its validity and the proposal contains a weakness that is inherent in an offeror's management, engineering, or scientific judgment or which is the result of its own lack of competence or inventiveness in preparing

its proposal, the contracting office- shall not point out the weaknesses. The possibility that such discussions may lead an offeror to discover that it has a weakness is not a reason for failing to inquire into a matter where the meaning is not clear or where insufficient information is available, since understanding of the meaning and validity of the proposed approaches, solutions, and cost estimates is essential to a sound selection. Offerors should not be informed of the relative strengths or weaknesses of their proposals in relation to those of other offerors. To do so would be contrary to regulations which prohibit the use of auction techniques (see FAR 15.610(d)(3)). In the course of discussions, Government participants should be careful not to transmit information which could give leads to one offeror as to how its proposal may be improved or which could reveal a competitor's ideas.

e. In fixed-price type contracts other than for research and development, the specifications ordinarily describe the Government's requirements with more particularity than is possible in cost reimbursement or research and development contracting, so that less emphasis is placed on an offeror's introduction of scientific, engineering, and management innovations. The contracting officer, in written and/or oral discussions, shall point out instances in which some aspect of a proposal contains a weakness in relation to the Government's requirements. However, the contracting officer shall neither point out the relative strengths or weaknesses of a proposal in relation to those of other offerors nor transmit information which could give leads to one offeror as to how its proposal may be improved or which could reveal a competitor's ideas. The contracting officer shall point out price elements that do not appear to be justified and shall encourage offerors to put forward their most favorable price proposals, but shall not

discuss, disclose, or compare price elements of any other offeror.

f. Although unusual, if the SEB and the contracting officer, after conducting written and/or oral discussions, determine that a proposal no longer has a reasonable chance of being selected for contract award, the proposal can be eliminated from the competitive range in accordance with FAR 15.609(b). The contracting officer shall notify the unsuccessful offeror in writing that its proposal is no longer eligible for award.

g. Normally, written or oral discussions are completed with each offeror in the competitive range in one round. In some cases, however, a single round of discussions prior to requesting BAFOs may insufficient for a comprehensive be evaluation, and multiple rounds may be required. In these cases, when discussions have been declared closed and BAFOs requested, the approval of the Associate Administrator for Procurement (or the Procurement Officer when the value of the procurement is less than \$25 million) is required to reopen discussions (see 18-Each subsequent round of 15.611). discussions is subject to the same groundrules as the initial round (e.g., no discussion of weaknesses where such discussion is otherwise prohibited).

## 3. Best and Final Offers (BAFO's)

a. The contracting officer will issue to all offerors still within the competitive range a request for Best and Final Offers (BAFO's) in accordance with FAR 15.611. Oral requests for BAFO's shall be confirmed in writing.

b. A common cutoff date and time that allows each offeror a reasonable opportunity to support and clarify its proposal through submission of a written BAFO shall be established. An offeror may,

# NASA FAR SUPPLEMENT (NFS)

on its own initiative, revise its proposal and make corrections or improvements until the established cutoff date.

c. Offerors should be cautioned to provide supporting documentation for any changes to their prior offers. Any revision received after the established common cutoff date must be considered late in accordance with FAR 15.412.

d. The cutoff date must be such as to permit adequate time for all offerors to submit revised proposals; particular care must be taken to ensure that there is no compression of time for the offeror with whom discussions were last held, i.e., if 2 weeks is adequate time for submission, then the time allowed should be 2 weeks from the date of last discussions.

# 4. Evaluation Findings

a. After consideration of all committee reports, information received from offerors through plant visits, written and/or oral discussions, and BAFO's, the SEB shall conduct a final evaluation of proposals.

b. The final evaluation must build on the SEB's earlier recorded findings. The purpose of the final evaluation is to determine the effects, if any, of discussions and BAFO's on the SEB's earlier Mission Suitability scores and adjectival ratings as well as on the initial evaluation of Cost, Relevant Experience and Past Performance, and Other Considerations. Therefore, a clear and logical audit trail shall be maintained for the rationale for changes in ratings and scores, including a detailed account of the SEB decisions leading to the final ratings and scores.

c. The final evaluation must represent the collective judgment of the SEB regarding its assessment of the offerors for each factor evaluated including its assessment of the Mission Suitability subfactors, elements, if any, and its associated ratings, scores, and findings. The adjectival ratings and numerical scores shall reflect the strengths, weaknesses, and discriminators the SEB finds in the proposals. In this way, the reasons for differences in adjectival ratings, numerical scores, and findings can readily be explained to and understood by the SSO.

d. All significant SEB evaluation findings shall be fully documented and incorporated into a written report which will serve as the basis for the selection decision by the SSO.

18-70.303, App. I

# CHAPTER 5: SOURCE EVALUATION BOARD REPORT AND PRESENTATION

# 500 GENERAL

This Chapter describes the requirements for the written report and oral presentation to the SSO.

# 501 <u>RESPONSIBILITIES AND</u> <u>PROCEDURES</u>

1. The SEB shall prepare a written report of its findings, signed by the Chairperson and all voting members of the SEB. It shall present its written report and make an accompanying oral presentation to the SSO. Guidelines for the written report and the oral presentation are set forth in Appendix C.

# 2. SEB Preliminary Presentation (Dry Run)

a. When the Administrator is the SSO, a preliminary presentation should be made to the Field Installation Director and to the Official-in-Charge of the cognizant Headquarters Program Office. When the Official-in-Charge of the cognizant Headquarters Program Office is the SSO, a preliminary presentation should be made to the Field Installation Director and the cognizant Headquarters Deputy Program/Staff Associate Administrator or the official responsible for the specific project. The dry run presentation is the same presentation prepared for the SSO. Attendance at the dry run shall be restricted to those personnel who are involved in the selection process or who have a valid need-to-know. For Headquarters dry runs, an attendance list will be issued by the SEB coordinator in the Office of Procurement (Code HS). Admittance to the dry run will be restricted to those individuals whose names appear on the attendance list. However, changes proposed 24 hours before the presentation will be considered. Persons not on the list will not be admitted without the prior authorization of the SEB coordinator. For field installation dry runs, the attendance list will be prepared by a designee of the Procurement Officer.

b. The following personnel or designees should attend the Headquarters dry run presentation:

(1) Cognizant program/ staff officials.

(2) Official-in-Charge of the cognizant Headquarters Program Office in those cases when the Administrator serves as the SSO.

(3) NASA Comptroller.

(4) Associate Administrator for Procurement and/or Deputy Associate Administrator for Procurement.

(5) General Counsel and/or Associate General Counsel (Contracts).

(6) Associate Administrator for | Safety, Reliability, Maintainability, and Quality Assurance, when SRM&QA matters are involved.

(7) Field Installation Director.

(8) Field Installation Chief Counsel.

(9) Selected voting and nonvoting ex officio SEB members (no designees).

(10) Field Installation Procurement Officer.

(11) Headquarters procurement personnel responsible for support to the Headquarters cognizant Program/Staff Office.

(12) Other personnel as approved by the Official-in-Charge of the cognizant Headquarters Program Office and the Office of Procurement (Code HS).

c. The SEB Chairperson or designee is responsible for arranging and coordinating the SEB dry run with the SEB coordinator. The SEB dry run should take place far enough in advance of the presentation to the SSO to allow for changes or revisions to the presentation material, if necessary. The material used during the dry run presentation is considered to be "SEB Sensitive" and should be treated accordingly. Consequently, the SEB Chairperson is responsible for providing a projectionist, who has been SEB cleared, to present the material for both presentations.

d. The dry run presentation, as well as the presentation to the SSO, will ordinarily be made by the SEB Chairperson; however, if another official has been designated to make the final presentation to the SSO, that person shall also make the dry run presentation. The SEB presentation material shall be delivered to the SEB coordinator for control and distribution no later than 7 working days before the scheduled dry run presentation date. The SEB presentation material includes 10 copies of the SEB report and charts.

## 3. SEB Formal Presentation

a. The SEB shall present its evaluation findings to the SSO as the basis for a sound selection decision. This formal presentation should be attended by the same personnel or designees in attendance at the dry run, with the exception of the inclusion of the SSO at the formal presentation. Continuity of attendees assures a more efficient formal presentation in addition to limiting access to SEB sensitive data.

b. The cognizant procurement analyst in the Procurement Operations Division (Code HS) will function as the SEB coordinator and will perform coordination functions for the formal presentation when the Administrator or the Official-in-Charge of the cognizant Headquarters Program Office serves as the SSO. These functions include arranging the time and place of the presentation; assuring, with the concurrence of the appropriate personnel in the Office of the Administrator, proper attendance; and distributing SEB reports and graphic material.

4. The designated individuals to whom the SEB presentation(s) (dry run and final) are made will be responsible for ensuring that--

a. The requirements of this handbook and all applicable agency policies have been complied with in the solicitation and evaluation processes;

b. The written report and presentation accurately convey SEB activities and findings;

c. The oral presentation is arranged and conducted in a professional manner; it is complete and informative; and it can be concisely presented within the time allocated by the SSO; and

d. No changes (1) to established evaluation factors, subfactors, elements, weights, or scoring systems or (2) in the substance of the SEB's findings shall be made. They may, however, direct the SEB to reconvene to rectify procedural omissions, irregularities or inconsistencies, substantiate its findings, or revise the organization of the written report and/or the method of presentation.

# NFSD 89-0 (NFSD 89-13)

# PART 18-70 NASA SUPPLEMENTARY REGULATIONS

18-70.303, App. I

5. All copies of the SEB reports and presentation material contain sensitive business information in addition to "SEB Sensitive" data and shall be adequately safeguarded throughout the source selection process. Physical safeguarding of sensitive data includes, but is not limited to--

a. Controlling the number of copies of proposals and SEB reports;

b. Restricting access to SEB work areas;

c. Securing SEB material under locked conditions or in vaults;

d. Minimizing SEB presentations other than the dry run and formal presentations; and

e. Limiting attendees at SEB presentations.

41

### PART 18-70 NASA SUPPLEMENTARY REGULATIONS

# **CHAPTER 6: SOURCE SELECTION**

#### 600 GENERAL

This Chapter provides guidelines relating to the source selection decision, notice and debriefing for unsuccessful offerors, source selection statement, and multiple selection decisions.

#### 601 SOURCE SELECTION DECISION

1. The SSO shall use the evaluation factors, subfactors, and elements set forth in the solicitation to make the source selection decision. The SSO shall consider the SEB findings and the advice provided by cognizant line and staff management at the conclusion of the SEB presentation in determining which of the proposals submitted in response to the solicitation would prove most advantageous to the Government, all factors considered.

2. In accordance with NASA policy and FAR 15.613, upon source selection by the SSO, the contracting officer will proceed with negotiations leading to award of contract(s).

## 602 NOTICE AND DEBRIEFING FOR UNSUCCESSFUL OFFERORS

1. a. When a proposal is no longer to be considered for contract award, the offeror will be promptly notified by the contracting officer, in writing, together, with a general, brief explanation of the major reasons in accordance with FAR 15.1001 and NFS 18-15.613-71(b)(7). There are, generally, five points in the SEB process when it may be determined that a proposal is no longer to be considered for contract award:

(1) After determination that stated qualification standards, if any, have not been satisfactorily met. (2) After identification of an unacceptable proposal in accordance with subparagraph 406.5 of this handbook.

(3) After determination of the competitive range resulting from the initial evaluation of proposals.

(4) After written and/or oral discussions resulting in a determination that a proposal does not stand a reasonable chance of being selected for award.

(5) After the selection decision by the Source Selection Official.

b. In the first four instances, the notice shall state that a revision of the proposal will not be considered. Postselection notices shall be issued in accordance with FAR 15.1001(c) and 15.1002.

2. If any offeror requests a debriefing in writing, the offeror shall be formally debriefed and furnished the basis for the selection decision after the final source selection decision by the SSO. This debriefing should normally take place prior to contract award and be conducted in accordance with 15.1003. If the situation will not permit delaying the award in order to debrief unsuccessful offerors, the debriefing may be conducted after award.

#### 603 SOURCE SELECTION STATEMENT

1. When the final source selection decision has been made by the SSO, a Source Selection Statement shall be prepared for the SSO's signature in a manner releasable to the competing offerors and the general public, if requested. When the Administrator or an Official-in-Charge of a Headquarters Program Office is the SSO, the Statement will be prepared

# NASA FAR SUPPLEMENT (NFS)

by the Office of General Counsel. Source Selection Statements prepared at the field installation should be drafted by the Field Installation Chief Counsel or designee.

2. Source Selection Statements must describe the procurement; the SEB evaluation procedures; the substance of the Mission Suitability evaluation; evaluation of the Cost factor, Relevant Experience and Past Performance factor, and Other Considerations factor involved in reaching the selection decision. There should be coverage of unacceptable proposals, the competitive range determination, late proposals, or any other pertinent considerations applicable to the specific decision. It must be stressed that nothing can substitute for the use of good judgment. The Source Selection Statement must be self-sufficient and must reveal sound rationale for the selection clearly and succinctly, without revealing the scores involved, the proposed prices, or any other confidential business information.

3. Source Selection Statements shall be signed as soon as practicable after the final selection is made. The SSO may desire to have one or more key officials who participated in the selection decision concur on the Source Selection Statement prior to final signature.

4. As indicated in subparagraph 1, Source Selection Statements generally may be released to competing offerors and the general public; however, it is anticipated that the Statement will not always be available in final form or signed by the Source Selection Official at the time of debriefing of unsuccessful offerors. Α draft of the decision portion of the Statement that has been reviewed by the SSO or a concurring official should be available to the designated Debriefing Official for guidance at the debriefing. In order to avoid any misunderstanding, the Source Selection Statement rationale contained in the draft Statement should have the approval of the SSO or a concurring official prior to any debriefing(s). This will enable NASA to demonstrate, for the record, that the SSO's selection rationale was not modified substantially (editorial changes can be made) as a result of the debriefings. If requested by an offeror a copy of the final Source Selection Statement will be furnished to the offeror when it is signed by the SSO, subject to the provisions of subparagraph 5.

5. a. Under some situations, multiple selections are made for the purpose of permitting a design or other competition to continue until a final selection is made for a single contractor to undertake full-scale development. Stating the strengths and weaknesses in the Source Selection Statement in these cases may result in the premature disclosure of innovative concepts, designs, and approaches. Release of these Selection Statements to competing offerors or the general public prior to final selection of concept(s) or contractor(s) for full-scale development could compromise the integrity of the competition by making possible a transfusion of ideas which could also inhibit offerors during the early phase from offering their best and most promising ideas for meeting the mission need.

b. Accordingly, unless prior approval is obtained through the Headquarters Procurement Operations Division (Code HS) with the concurrence of the Office of General Counsel, Source Selection Statements for the selection of alternative system design concepts subject to NMI 7120.4, Management of Major System Programs or Projects and NHB 7120.5, Management of Major System Programs or Projects Handbook, are not to be released to competing offerors or the general public, if requested, prior to the release of the Source Selection Statement for full-scale development.

c. A similar problem may occur in other procurements where competition

# **CHAPTER 6: SOURCE SELECTION**

continues but is not covered under NMI 7120.4 or NHB 7120.5. When possible, care should be taken to set forth the strengths and weaknesses and other information in a manner that will avoid this problem. However, if this is not feasible, the Statement should not be released except in accordance with the procedures of the Freedom of Information Act, 5 U.S.C. 552.

#### 604 MULTIPLE SELECTION DECISIONS

1. While SEB procedures contemplate that the SSO will be in a position to select a single source for final contract negotiations subsequent to the SEB presentation, a variety of considerations may lead the SSO to direct that contract negotiations be conducted with two or more offerors. Such negotiations are to result in complete contract documents signed by the offerors which may be accepted by the agency upon final selection of the successful offeror by the SSO.

2. The SEB shall consult with the SSO, the contracting officer, and the negotiating team regarding negotiation positions, objectives, and information to be obtained during negotiations to assist the SEB in making its final evaluation and report after the negotiations. The objectives of negotiations are essentially the same as those where a single offeror has been selected for final contract negotiation and award: each offeror's correctable weaknesses should be pointed out and corrected during negotiations, using whatever technical and other information is known and which the Government has the right to use. Similarly, negotiations should be conducted to result in a fair and reasonable cost or price. Particular attention shall be given to any instructions which the SSO may have given when he/she directed the multiple contract negotiations.

3. The final contract negotiation process differs from the written and oral discussions previously held with offerors in the competitive range. Discussions have the specific function of obtaining information for evaluation and selection purposes, while the final contract negotiations have the additional function of presenting that information in contractually binding form. For this reason, it is essential that each offeror be brought to the most favorable terms that the negotiation process can produce, including technical and scientific approaches, management arrangements, and estimated costs (or fixed prices where The prohibition against applicable). auction techniques in FAR 15.610(d)(3) is equally applicable to these negotiations.

4. Upon completion of the negotiations and agreement on contract terms, the SEB shall conduct a final evaluation, focusing on a comparative analysis of the contracts negotiated, their relative strengths and remaining weaknesses, their estimated costs and fee(s)/prices and probable costs, and any other factors that might influence the selection. The evaluation must build on the SEB's earlier report and presentation to the SSO which resulted in the decision to have multiple contract negotiations conducted. The evaluation is to determine the effects, if any, of the contract negotiations on the SEB's earlier final Mission Suitability scores as well as on evaluation of Cost, Relevant Experience and Past Performance, and Other Considerations; however, an arithmetic rescoring is not to be accomplished. A summary of the results of the evaluation shall be prepared for presentation to the SSO including any changes in the SEB's assessment of each proposal. The revisions may be expressed in a narrative analysis including an appropriate adjectival rating.

5. a. Upon completing its evaluation

18-70.303, App. I

# NASA FAR SUPPLEMENT (NFS)

of the results of contract negotiaticns, the SEB shall report its findings to the SSO. This is to be accomplished by oral presentation and supplemental written report. When the Administrator is serving as the SSO, this should be preceded by preliminary presentations to the Field Installation Director and to the Official-in-Charge of the cognizant Headquarters Program Office.

b. The report and presentation shall include the following:

(1) A summary review of the previous report and presentation.

(2) A brief discussion of significant weaknesses and strengths of the companies involved, as reported and presented in the previous report and presentation, with emphasis on key discriminators, if any. (3) A discussion of how any instructions given by the Source Selection Official were carried out.

(4) The results of the negotiation, and the impact, if any, on the SEB's findings and conclusions in the previous report, including Mission Suitability, Cost, Relevant Experience and Past Performance, and Other Considerations, as appropriate.

(5) Discussions of any matters or areas of substance that arose during the negotiations and that were not present in the proposals or the earlier oral and/or written discussions or BAFO's.

6. The contracting officer should be present and should participate, as appropriate, in the presentation to the SSO. The contracting officer or designee will bring to the presentation copies of the contracts signed by the offerors.

### NFSD 89-0 (June 30, 1989)

# APPENDIX A: SAMPLE LETTER OF DESIGNATION

## TO:

### FROM:

SUBJECT: Source Evaluation Board (SEB) for \_\_\_\_\_\_

Pursuant to Chapter 2 of the NASA Source Evaluation Board Handbook (NHB 5103.6), I hereby designate the following individuals to serve as members of the SEB for the purpose of evaluating proposals received in response to the solicitation for

Chairperson:

Name of individual, functional title, and organizational assignment.

#### Other Voting Members:

Names of individuals, functional titles, and organizational assignments.

#### SEB Recorder:

Name, functional title, and organizational assignment.

## Nonvoting Ex Officio Members:

Name, functional title, and organizational assignment.

The SEB will conduct its business in strict accordance with the provisions of the SEB handbook. The SEB Chairperson is responsible for determining that each SEB member (both voting and nonvoting) is fully conversant with the instructions contained in the handbook. SEB duties will take precedence over other regular duties of the SEB members. Attention of the SEB Chairperson and each SEB member is particularly directed to Chapter 2 of the SEB handbook which describes the roles of key participants in the SEB process, including cognizant line and staff management, the SEB, and the Source Selection Official (SSO). The importance of the SEB function to agency programs necessitates continual management involvement throughout the evaluation and selection process.

It is emphasized that the SEB report and presentation are the principal tools available to the SSO to perform a comparative analysis for making the final source selection decision and must be presented in sufficient depth to permit the intelligent weighing of alternatives. All proposals will be evaluated and reported in accordance with the SEB handbook. The SEB's written findings will give no consideration to elements which are extraneous to the objectives of this procurement.

Attention of the SEB Chairperson and the SEB is further directed to FAR 15.612(e) and Chapter 2 of the SEB handbook which prohibit the disclosure of information to anyone who is not also participating in the same evaluation proceedings. After receipt of proposals, all information contained in the proposals submitted for evaluation will be protected and will be made available only to the members (voting and nonvoting) of the SEB and to properly designated committees and panels on a need-to-know basis. The right to information on a need-to-know basis does not extend to the normal chain of supervision of any member of the SEB or any individual having technical to responsibility for the effort being evaluated except as specifically approved by the SEB Chairperson on a case-by-case basis. Individuals so designated by the

18-70.303, App. I

NASA FAR SUPPLEMENT (NFS)

SEB Chairperson will be notified, in writing, of the privileged character of proposal information.

Signature of Designating Official

Date

# PART 18-70 NASA SUPPLEMENTARY REGULATIONS

18-70.303, App. I

# APPENDIX B: INDIVIDUAL CERTIFICATE FOR SOURCE EVALUATION BOARD PARTICIPANTS

1. I, the undersigned, a participant in the Source Evaluation Board (SEB) proceedings for the competition of the

contract, certify that I will not discuss or reveal any information concerning these SEB proceedings to anyone who is not also participating in the same SEB proceedings, and then only to the extent that such information is required in connection with such proceedings on a need-to-know basis.

2. I further agree that at any time I discover that I have an interest in, or connection with, a company submitting a proposal for evaluation by the Board or advisory committee on which I serve, I shall promptly report, in writing, the fact of my interest or connection, and the nature of it, to the person who has appointed me to the Board or advisory committee, through the SEB Chairperson. I recognize that a reportable interest or connection includes the following:

a. Ownership of a company's securities by myself or my spouse.

b. A close family relationship to an official of a company submitting a proposal or participating as a subcontractor.

c. Any other interest in or connection with a company which might tend to subject NASA to criticism on the basis that such interest or connection would impair my objectivity in participating on the Board or advisory committee of which I am a member.

3. I further certify that I have read and understand NHB 1900.1, "Standards of Conduct for NASA Employees."

In addition, I fully realize that 4. any breach by me of my obligation to disclose safeguard and not to unauthorized persons any information made available to me concerning the evaluation may result in appropriate disciplinary action, provided for by law or regulation, being taken against me by duly constituted authority.

# PART 18-70 NASA SUPPLEMENTARY REGULATIONS

18-70.303, App. I

# APPENDIX C: GUIDELINES FOR THE SEB REPORT AND PRESENTATION TO THE SOURCE SELECTION OFFICIAL

# I. INTRODUCTION

A. In preparing the SEB report and presentation, emphasis should be placed on substance. This Appendix C provides guidance on content and format of the SEB report and the oral presentation to the SSO. This guidance is designed to be appropriate for most procurements. If a specific procurement has peculiarities which cause the proposed format to be impractical, the SEB Chairperson may alter it in any manner that does not detract from the substance.

The findings of the SEB are В. presented in two parts, the written SEB report and an oral presentation. This Appendix sets forth the minimum requirements. The detail and use of additional schedules or other information are, of course, governed by the nature and scope of the subject being presented.

C. The SEB shall approve the written report and the graphic material to be used for the accompanying oral presentation. Viewgraph presentations are appropriate where the nature of the presentation permits. Copies of visual to be utilized for the oral aids presentation should be separately bound in a folder identified as "Briefing Charts" to accompany the written report.

D. A "Glossary of Terms" should be included in the SEB Report when appropriate to define acronyms or abbreviations.

E. Copies of the SEB report and related briefing charts shall be serially numbered and controlled by the Recorder and may be distributed or disclosed only to persons having responsibilities relating to the specific source evaluation proceeding involved, except as may otherwise be approved by the Administrator or designee.

#### II. WRITTEN SEB REPORT

## A. Description of the Requirement

Procurement Description. 1. Provide a narrative description of the technical requirement being procured together with its scientific objectives. Explain any follow-on effort which has been planned or for which program approval will be requested. Describe the relationship with other efforts in process planned. Explain or any particular technical complexities which had effect on an important the solicitation or the evaluation of proposals. Include a table of contents in the report.

2. <u>Funding</u>. State the funding applicable to the effort including:

a. The Government estimate for the procurement, if feasible.

b. The estimated amount to be obligated under the basic contract.

c. The estimated amount to be obligated under each priced option.

d. The estimated cost of any follow-on effort to be procured under separate contract, e.g., subsequent phases.

#### 3. <u>Procurement Approach</u>

a. State the date that the applicable procurement plan was approved. 18-70.303, App. I

b. Discuss any special procurement considerations which applied to the procurement being evaluated, e.g., the use of phased procurements.

c. Explain how the use of the type of contract approved in the procurement plan will advance NASA objectives; give reasons and rationale for the selection of contract type, including the applicability or inapplicability of the various incentive concepts (award fee, cost, performance, schedule, and multiple).

# B. <u>SEB Roster and Chronology of</u> Events

1. <u>SEB Roster</u>. Include the SEB designation letter and any changes to it. As a supplement, provide the names, functional titles, and organizational assignments of the chairpersons of any committees and panels used by the SEB.

2. <u>Chronology</u>. Provide a chronology of major events connected with the source evaluation, such as:

a. The date(s) the source list and the Statement of Work were received for consideration by the SEB.

b. The dates the evaluation factors, subfactors, elements, and their definitions for incorporation into the solicitation, the relative weights of factors and the qualification standards, if applicable, were approved.

c. The date(s) the SEB with the assistance of the cognizant procurement and program or project offices approved the source list and the RFP. d. The date the RFP was issued.

e. The date and place of any preproposal conference.

f. The date(s) of any RFP amendment(s).

g. The due date for receipt of proposals.

h. The date(s) and disposition of any late proposal(s) received.

i. The date the SEB was convened for proposal evaluation.

j. The date of the competitive range determination.

k. The dates and places of discussions with each offeror in the competitive range.

l. The date the request for BAFO's was issued.

m. The common cutoff datc for conclusion of discussions and receipt of BAFO's.

n. The date the SEB completed its findings.

o. The date of the presentation to the SSO.

3. <u>Sources</u>. Provide a composite list, in alphabetical order, of all sources solicited and sources submitting proposals by company name and address. The list should be footnoted to explain any code used. Include a list of team members and subcontractors for those companies that submitted proposals.

C. Evaluation and SEB Findings

1. Factors. Subfactors. Elements, and Weights

a. <u>Qualification</u> <u>Stand</u>-<u>ards</u>. State any specific qualification standards included in the RFP, and explain why each was necessary.

b. Evaluation Factors. Subfactors, and Elements. State the evaluation factors used in the evaluation and their relative order of importance. State the Mission Suitability subfactors and elements, if any, their definitions, weights assigned to each and the for rationale the Explain the proportionate weights assigned to each subfactor and element, if any, Set forth relevant excerpts from the RFP which the evaluation factors, describe subfactors, and elements, if any, and their relative importance.

# 2. Evaluation Process

a. Discuss assignments made to committees and panels. Identify the factors, subfactors, and/or elements assigned for review, and the rationale for assignment. Include any individual committee report necessary to understand the SEB results.

b. Discuss the adjective rating and numerical scoring methods and techniques used by the SEB.

c. Discuss the procedure used for the determination of the competitive range.

d. Describe the steps taken in verifying the offeror's relevant experience, past performance, and current capabilities, e.g., plant visits, customer checks, and audit reports.

e. Provide a summary of written questions common to all offerors

and specific written questions addressed to particular offerors.

f. State the common cutoff date for conclusion of discussions and receipt of BAFO's.

g. Include an exposition of the SEB proceedings that is sufficient to verify proper procedures were followed and sufficient to bring out any procedural irregularities that might exist. Procedural problem areas, if any, are to be covered specifically.

h. Include copies of all letters addressed to or from the SEB regarding the SEB proceedings.

3. <u>Initial Evaluation Find-</u> ings

a. <u>Summary</u> <u>Schedules</u>. Provide the following schedules:

single (1)А listing all proposals in schedule descending order of scores received for Mission Suitability stating the assigned score for each subfactor and weighted element. Each proposal should also be appropriate classified with the which indicates the adjectival rating SEB's composite appraisal of the Mission Suitability evaluation. In addition, the appropriate summary or adjectival rating for Cost, Relevant Experience and Past Performance, and Other Considerations should be included as a part of this schedule.

(2) Provide summary charts of what the SEB considers to be the significant discriminators.

#### b. Statement of Findings

(1) Discuss briefly each proposal determined to be unacceptable and the rationale for the decision.

(2) Discuss each acceptable proposal in descending order of Mission Suitability scores. Include each offeror's estimated cost or price providing a breakdown by element (labor, material, subcontracts, overhead, G&A, and fee); provide the SEB's analysis and evaluation of the adequacy (for all offerors, including those not within the competitive range), realism (for all offerors determined to be within the competitive range), and most probable cost (for at a minimum, each proposal within the competitive range) of each respective cost proposal. Discuss the SEB's evaluation of Relevant Experience Past Performance and and Other Considerations. Include a discussion of the following considerations:

(a) Evaluation of the proposal as related to each factor, subfactor and element and to the approved evaluation plan in sufficient detail to permit examination of the findings of each evaluation phase and to discriminators the trace to final results. Where changes in rating or scoring have occurred during the process, a logical visible thread of the rationale for such changes in rating or scoring should be provided.

Provide a (b) discussion of the major and minor strengths and weaknesses of the proposal with an estimate of the potential for correction of weaknesses identified. Clearly list the strengths and weaknesses and identify them as major or minor, in addition to the narrative, to provide traceability throughout the clear evaluation process.

(c) Provide an analysis of key personnel.

(d) Discuss changes in proposal. significant the including the elimination of anv correctable weaknesses, that would have to be negotiated after selection with a the discussion of negotiation cost objectives associated with those changes.

(e) Discuss the evaluation of the Cost factor, including the effects of the proposed cost on the technical and management effort.

(f) Provide a best estimate of the probable cost of performance, if selected, together with an indication of the confidence in the SEB's estimate.

(g) Provide any information or analysis that would be helpful to the SSO in determining the impact of cost in making a selection decision.

(h) Provide information to reflect the offeror's financial capability to perform the contract effort. A listing of possible information includes:

(i) Complete name and location of the organizational element proposing the effort.

(ii) Complete name and location of the parent corporation, if any.

(iii) Place or places of performance of the proposed effort.

(iv) Recent history of sales (of the particular division or entity involved), by customer, including industry and Government customers.

18-70.303, App. I

(v) Sales projections, by customer, for the period involved in the procurement.

(vi) Recent history of earnings of the division or entity involved in the procurement, if available.

(i) Present а brief analysis of the fee arrangement including any incentive arrangement s proposed, e.g., how the rewards would be earned or lost, the benefit to NASA, and any changes to be sought in negotiations (target minimum or maximum fee levels, sharing formula, or ceiling) which will improve the coverage of the incentive toward the attainment of the NASA objectives. Indicate whether, and for what reason, any offeror took exception to or suggested an alternative to the arrangement contemplated in the RFP. Provide an analysis of the importance the SEB attaches to such an exception or alternative.

Provide (j) detailed information on Relevant Experience and Past Performance. Provide information on the offeror's response to the RFP requirements for data in this category, the evaluation of the data by the SEB, the sources or references contacted, etc.; summarize conclusions and highlight significant accomplishments or failures. Provide the rationale for the adjectival rating of the SEB.

(k) Discuss the evaluation of Other Considerations and the rationale for the adjectival assessment of each subfactor under this factor.

4. <u>Competitive Range Deter-</u> <u>mination</u>. Discuss the competitive range determination and the rationale for the decision, summarizing the evaluation findings that provided the basis for the decision.

# 5. <u>Written and/or Oral</u> Discussions

a. Summarize the content of the written and/or oral discussions, the personnel included in the proposal who were invited to participate, and the list of attendees, including both Government and offeror personnel.

b. Discuss the time allotted for receipt of BAFO's and each proposal revision received.

6. Final Evaluation Findings. Summarize the BAFO revisions and provide a discussion of the evaluation of the revised proposals and any resultant changes in rating or scoring. Provide the rationale for any changes. Clearly identify from the previous list of major and minor strengths and weaknesses any revisions, additions, and/or deletions to provide clear traceability throughout the evaluation process.

# 7. Oral Presentation

a. The SEB Chairperson is normally responsible for conducting the presentation to the SSO. It is the Chairperson's function to convey concisely and accurately the results of the SEB deliberations to permit an informed and objective selection of the best source for the particular procurement.

b. As a general rule, the SEB Chairperson's prepared oral presentation should not exceed an hour to be followed by a question and answer period. Copies of the viewgraphs to supplement the SEB report forwarded to the SSO are to be available to those 18-70.303, App. I

attending the oral presentation. Relevant backup material is to also be available at the presentation.

c. The main thrust of the oral presentation is to focus upon issues and problems identified by the SEB's findings and to highlight the reasonable alternative choices available to the SSO. This presentation must include an explanation of any applicable qualification standards; evaluation factors, subfactors, and elements; the major strengths and weaknesses of the offerors; the Government estimate, if applicable; the offerors' proposed cost/price; the probable cost; the proposed fee arrangements; the results of written and/or oral discussions; the BAFO's; the final evaluation findings; and the final adjectival ratings and scores. These aspects of the report are central to its meaning, and must be reviewed in the oral presentation despite the redundancy to the written report.

d. The presentation shall clearly indicate any discriminators. This requires the presentation of scores in enough detail to provide an adequate basis for the SSO to assess the validity of the judgments made by the SEB. This detail shall extend at least to all levels of subfactors and numerically scored elements.

e. A suggested progression of charts follows. Brevity and understandability are key. Charts should highlight the significant aspects of the comprehensive written report. They should prompt discussion. Sample charts are not included in this handbook since these tend to lead toward unnecessary or even inappropriate standardization. As appropriate, the Associate Administrator for Procurement will, from time to time, disseminate sample charts illustrative of approaches or techniques of exceptional merit and usefulness.

(1) <u>Identification of the</u> <u>Procurement</u>. This chart should identify the installation, the nature of the services or hardware to be procured, some quantitative measure including the Government estimate for the procurement, and the kind of contractual arrangement planned. Detailed objectives of the procurement should be avoided.

(2) <u>Background</u>. This item is useful to identify any earlier phases of a phased procurement or, as in the case of continuing support services, to identify the incumbent and any consolidations or proposed changes from the existing structure.

(3) Evaluation Fac- tors, Subfactors, and Elements. An explanation of any qualification standards and the evaluation factors, subfactors, and, if utilized, elements, along with assigned weights, is an important part of any presentation of SEB findings. The relative order of importance of the evaluation factors and, within Mission Suitability, the numerical weights of the subfactors and, if utilized, numerically scored elements should also be presented. The adjectival scoring system utilized as an aid in evaluation of Mission Suitability should be presented.

Sources. This chart will (4)indicate the number of potential offerors solicited, the number of potential offerors expressing interest, e.g., attendance at a preproposal conference, and the identification of offerors submitting proposals in response to the solicitation. Small businesses, small disadvantaged businesses, and women-owned businesses can be identified here. In

addition, a chart must be included for each offeror indicating the Chief Executive Officer, the location of the offeror, some representative products, and similar information for each major subcontractor proposed.

(5) Summary \_\_\_\_Of Findings. The summary chart shall, as simply as possible, list the initial Mission Suitability ratings and scores, the final Mission Suitability ratings and offerors' scores. the proposed costs/prices, and the SEB's assessment of the probable costs. In addition, any clear discriminator, problem, or issue which could have an effect upon the selection should be introduced at this time. The determination of competitive range must be addressed here.

(6) <u>Strengths</u> and <u>Weaknesses of Offerors</u>. These charts can be among the most valuable presented, and its preparation could initially assist the SEB Chairperson in distilling the essence of the SEB's findings. Certain guidelines should be followed in the preparation of these charts:

(a) Only the weaknesses of major strengths and individual offerors should be selected significance of for presentation. The strengths and weaknesses is lost when without lists exhibited in long distinction as to importance.

(b) The strengths and weaknesses should be directly related to the evaluation factors, subfactors, and elements.

(c) Strengths and weaknesses should be as clear as charting techniques and limitations will permit. Care should be taken to avoid an analysis of strengths and weaknesses based totally on numerical scores. This practice limits the SEB and the SSO in their evaluation and selection. For example, not all major weaknesses could be considered of equal value--some are correctable during negotiations and some are not.

(d) It is important to indicate the significance of major weaknesses. Can they be corrected during negotiations? If so, at what cost?

(e) The results and impact, if any, of written and/or oral discussions and BAFO's on ratings and scores must be clearly indicated.

(f) Key personnel charts must be included in the presentation, providing a list of the key personnel for each offeror together with, as appropriate , their educational background, general background, and any pertinent details applicable to this procurement.

(7) <u>Final Mission</u> <u>Suitability Ratings and Scores</u>. This chart is to summarize, as simply as the material will permit, the evaluation subfactors and elements, the maximum points achievable, and the scores of the offerors in the competitive range.

Final Cost (8) This chart summarizes Evaluation. with each probable costs associated proposed fee including offeror arrangements. The data should be as therefore, SEB possible; accurate as adjustments to achieve comparability Further, should be shown. the presentation of this chart should include the measure of confidence the SEB has in the costs of the individual offerors, noting the reasons for low or high confidence.

57

18-70.303, App. I

(9) <u>Relevant Expe-</u> rience and Past Performance. This chart should reflect the summary conclusions. This information is to be supported and amplified by specific case data with particular emphasis on exemplary or inferior performance and its potential bearing on the instant procurement.

(10) <u>Other Consider-</u> ations. This chart lists and discusses the Other Considerations addressed in the RFP, providing an appropriate adjectival rating for each of the Other Considerations subfactors.

(11) <u>Special Inter-</u> <u>est</u>. This chart should include only information of special interest to the SSO that has not been discussed elsewhere, e.g., procedural errors or other matters that could have an effect on the selection decision.

# SUBPART 18-70.4 NASA CREDIT CARD SYSTEM

18-70.401 Purpose.

The NASA credit card system provides a means for using credit cards for small purchases.

# 18-70.402 System content.

(a) The regulations governing the use of credit cards are set forth at 18-13.7104.

(b) The system contains specific procedures for use by procurement personnel and by the wide range of individuals who participate in the credit card program. These procedures integrate diverse regulatory and operational information from numerous sources in a user-oriented document.

18-70.403 NASA procedures for the credit card system.

(a) Credit card procedures are prescribed by Appendix I to this section 18-70.403.

(b) NASA may reprint Appendix I as a separate document, provided the following conditions are met:

(1) The issuance date ("cover date") of the procedures shall be the date of the NASA FAR Supplement version from which the text is extracted.

(2) With the exception of availability. distribution and other special prefatory notices, any subsequent modification in the text shall be preceded by a change to the NASA FAR Supplement 18-70.403, Appendix I.

(3) The following notice shall be included in the prefatory material of the Handbook:

# IMPORTANT NOTICE

These procedures are a separately bound, verbatim version of NASA FAR Supplement (NFS) (48 CFR 1870.403) Section 18-70.403, Appendix I. Reference to other parts of the Federal Acquisition Regulation (FAR) and the NFS will be required for complete coverage of all procurement aspects. NASA reserves the right to make changes to NFS 18-70.403, Appendix I, without issuing a new edition of these procedures. In the event of conflict between apparent these procedures and the NFS, the NFS shall govern.

# **APPENDIX I TO 18-70.403**

NASA PROCEDURES FOR USING THE GOVERNMENTWIDE COMMERCIAL CREDIT CARD SERVICE

.

# NASA PROCEDURES FOR USING THE GOVERNMENTWIDE COMMERCIAL CREDIT CARD SERVICE

#### **I. INTRODUCTION**

(a) At the request of the Office of Management and Budget (OMB), the General Services Administration (GSA), Federal Supply Service (FSS) awarded a single (Federal schedule contract Supply Schedule No. OOCC 6150, Industrial Group 615, IG Class 6153) for Governmentwide commercial credit card service to Rocky BankCard System. Inc. Mountain (contractor). The contract is intended to provide, at the request of federal agencies. Governmentwide ordering commercial credit cards and associated to civilian and military services Government employees for the purpose of paying for purchases made for official Government purposes.

(b) These procedures are designed as the NASA supplement to the "Instructions for the Use of the U.S. Government Credit Card" distributed to the cardholder and "Approving Official Instructions for the Use of the U.S. Government Credit Card" distributed to the approving official at the time the card is issued. In the event these procedures conflict with the instructions provided by the contractor, procedures take precedent. All these purchases that will be paid for using the shall comply with the Federal card Acquisition Regulation (FAR), the NASA FAR Supplement (NFS) and these procedures.

#### 2. **DEFINITIONS**

(a) Administrative Office Contact. The Administrative Office Contact is the

focal point appointed by the Procurement Officer for coordination of the applications, issuance and destruction of cards, establishment of reports, and administrative training.

(b) **Approving Official.** The approving official is the person who reviews and approves the cardholder's monthly statement of purchases.

(c) Cardholder. The cardholder is the individual to whom a card is issued. The card bears this cardholder's name and may only be used by this individual to pay for authorized U.S. Government purchases.

(d) **Contractor**. The contractor is the organization that will maintain all accounts as required by the General Services Administration contract.

(e) I.M.P.A.C. I.M.P.A.C., which is printed on all cards furnished by the contractor, stands for "International Merchant Purchase Authorization Card." These initials will also appear on most forms provided by the contractor.

(f) Oral Procedure. Oral procedure means a procedure where an order is placed or a purchase is made through an oral agreement which is made in person or by telephone by providing the card for imprint by the vendor or the card number to the vendor. No written purchase order or contract is issued by the Government. The supplies or services are provided by the vendor and payment is made using the I.M.P.A.C.

(g) Statement of Account. The Statement of Account is a monthly listing of all payments authorized for purchase and credits made by the cardholder and billed by the merchant. 18-70.403, App. I

## NASA FAR SUPPLEMENT (NFS)

## 3. **RESPONSIBILITIES**

(a) Contractor. The contractor will issue cards to cardholders and send out statements cardholders. monthly to approving officials. and financial management offices. The contractor will pay merchants in a timely manner and will receive reimbursement from the financial office of each NASA management installation.

(b) Contracting Officer's Technical Representative (COTR). The COTR appointed by the Procurement Officer will serve as the liaison between the installation and the contractor. The COTR shall oversee the I.M.P.A.C. program and establish installation guidelines. The COTR shall establish authorization codes for controlling purchases. Changes limitations dollar ог authorized to merchant codes must be approved by the COTR.

(c) Cardholder. Each cardholder is to reconcile his/her monthly statement and the reconciled forward statement to his/her official. Detailed approving instructions are included in paragraph 12 the cardholder and in instructional pamphlet, "Instructions for the Use of the U.S. Government Credit Card," issued by the contractor.

(d) Approving Official. The approving official will review the cardholder's monthly statement and serve as liaison with the Administrative Office Contact, the Financial Management Office, and the COTR. Each approving official shall establish, after coordination with the Administrative Office Contact. а budgetary limit for each cardholder's monthly purchases. The approving official will certify the cardholder's monthly statements and ensure that payments are for purchases which are authorized and made in accordance with

FAR and NFS. Detailed instructions are included in paragraph 12 and in the approving official's instructional pamphlet, "Approving Official Use of Instructions for the U.S. Government credit card," issued by the contractor. The approving official will also assist the cardholder in resolving disputed payments. The approving official has authority to direct the COTR to instruct the contractor to cancel a card at any time.

Administrative Office Contact. The (e) Administrative Office Contact shall establish a budgetary limit for each office that does not exceed the sum of approving official's cardholders' the purchase limits. monthly The Administrative Office Contact, in conjunction COTR. with the shall coordinate. process and monitor resolution of all disputed purchases. credits or billing errors, unless the Procurement Officer designates another individual or office to perform this function.

(f) Financial Management Office Contact. The Financial Management Office Contact shall answer the contractor's questions about payment of monthly statements.

## 4. USE OF THE I.M.P.A.C.

The I.M.P.A.C. may be used to pay (a) for small purchases made in accordance with Part 13 of the FAR and the NFS. It may also be used to pay for orders placed against established requirements contracts or with established sources of supply (see FAR Part 8), when authorized by the contract or regulation requiring use of the source. However, installation stocks/inventories must be checked for availability prior to credit card purchase.

# PART 18-70 NASA SUPPLEMENTARY REGULATIONS

(b) The I.M.P.A.C. can be used to pay for supplies or services acquired using oral solicitation procedures. It may also be used to pay for supplies or services that are acquired through a purchase order or an individual order under a requirements contract where the contract specifically allows such payment method. Without exception, the I.M.P.A.C. may only be used to pay for authorized U.S. Government purchases.

# (c) <u>Under no circumstances will the</u> <u>I.M.P.A.C. be used for cash advances.</u>

# 5. SETTING UP THE I.M.P.A.C. ACCOUNT

The contractor will provide the Administrative Office Contact with all application forms the necessary official. approving (cardholder, disputes, destruction notice etc.). The Administrative Office Contact will distribute the forms to the selected cardholders and approving officials for Upon completion, the completion. Office Contact shall Administrative process and forward the forms to the contractor. The card will be mailed to the cardholder within ten working days after the application is received by the contractor. When the cardholder receives the card, he/she must immediately return the enclosed notice to the contractor in order to notify the contractor that the card has been received. The contractor is capable of providing various reports to meet management and administrative needs. During the account setup process, the Administrative Office Contact will the various reports available discuss with management personnel and submit requirements to the COTR.

#### 6. SIGNATURE CARDS

When the account information is submitted to the Administrative Office Contact, a signature card must be completed by each approving official that states the approving official may approve the accuracy of the Statement of Account for payment. The signature card will be forwarded to the appropriate financial management office after completion. An alternate approving official must be designated to avoid statement processing delays and late payment penalties.

# 7. DOLLAR LIMITS ASSOCIATED WITH THE CARD

Use of the credit card by a cardholder is subject to a single purchase limit, a monthly cardholder limit and a monthly office limit. The purpose of these dollar limits is as follows:

Single Purchase Limit. The single (a) purchase limit is a limitation on the procurement authority delegated to the cardholder. This limit be cannot exceeded unless a revised delegation of authority is issued by the Procurement Officer raising the limit. A "single purchase" using the card may include items. However, no multiple single purchases may exceed the authorized single purchase limit established for each cardholder. The application for the cardholder will be completed in accordance with the Purchase Limit Matrix in the Federal Supply Schedule contract.

(b) Monthly Cardholder Limit. The monthly cardholder limit is a budgetary limit assigned by the approving official. The approving official shall coordinate with the Administrative Office Contact when determining a monthly limit. The total dollar value of purchases when using the card for any single month may not exceed the monthly purchase limit set by the approving official.

Monthly Office Limit. The monthly (c) office limit is a budgetary limit established by the Administrative Office Contact and shall not exceed the sum of the approving official's cardholders' monthly purchase limit and should reflect spending history as well as budgetary The total dollar trends. value of purchases using the card shall not exceed the monthly office limit.

# 8. ADMINISTRATIVE FEE

The monthly statement to each cardholder by the contractor will include an administrative fee which is calculated as a fixed percentage of the total dollar value of purchases. Each installation financial management office shall implement procedures to ensure funds to cover the monthly administrative fee are available.

# 9. AUTHORIZED USE OF THE CARD

(a) The unique I.M.P.A.C. VISA card that the cardholder receives has his/her name embossed upon it and may be used only by that cardholder. No other person is authorized to use the card. The card was specially designed showing the great seal of the U.S. and "United States of America" imprinted upon it to avoid being mistaken for a personal credit card.

(b) When issuing this card to an employee, authorization codes will be established bv the COTR and the Administrative Office Contact and will be incorporated in the card. Under normal circumstances, merchants are required to obtain authorization from the contractor for purchases over \$50.00. However, many merchants now use electronic authorization methods allowing them to obtain authorization for all purchases regardless of amount. When authorization is sought for a purchase by the merchant, the the contractor authorization system

will electronically check each individual cardholder's single purchase and monthly limits, the monthly office limit, and the type of merchant where the cardholder is making the purchase before authorization for the transaction will be granted.

(c) Use of the card must meet the following conditions:

(1) The total of a single purchase to be paid for using the card may be comprised of multiple items and cannot exceed the authorized single purchase limit. Purchases will be denied if the authorized single purchase limit is exceeded. Payment for purchases may not be split in order to stay within the single purchase limit.

(2) All items purchased over the counter to be paid for using the card must be immediately available. No back-ordering is allowed.

(3) All items purchased by а telephone order that will not be confirmed with a written order and be paid for using the card should generally be delivered by the merchant within the 30-day billing cycle. However, a longer period (up to 120 days for delivery) may be utilized by the installations. If the is elected, installation period longer procedures need to be established for proper reconciliation of the monthly bills, allowing for the carrying forward of items ordered but not received.

(4) All items purchased during one telephone transaction that will not be confirmed by a written order should generally be delivered in a single delivery. If a installation elects to allow partial deliveries. installation procedures must be implemented to ensure proper reconciliation of all such orders.

(5) All accountable personal property items purchased and paid for using the card must have the input and concurrence of the Supply and Equipment

## PART 18-70 NASA SUPPLEMENTARY REGULATIONS

Management Officer; the NASA Equipment Management System (NEMS) must be screened prior to purchase; and, the items purchased must be processed through the installation receiving function so the proper tagging can be done and the required accountability established. (See NHB 4200.1.)

(6) When purchasing items by phone or over the counter, the cardholder should inform the merchant that the purchase is for official U.S. Government purposes and therefore is not subject to state or local tax. The card will be imprinted with "US Govt Tax Exempt" for additional clarification.

(7) Prior to use of the card for an individual purchase, funds must be certified as available by an authorized individual within the installation Financial Management Office.

# 10. UNAUTHORIZED USE OF THE CARD

(a) The card must not be used for the following:

(1) Cash advances;

(2) Rental or lease of motor vehicles;

(3) Rental or lease of land or buildings;

(4) Purchase of airline, bus, train, or other travel related tickets;

(5) Purchase of meals, drinks, lodging, or other travel or subsistence costs;

(6) Purchase of gasoline or oil for Interagency Fleet Management automotive vehicles;

(7) Repair of Interagency Fleet Management automotive vehicles; and

(8) Purchases of telecommunications and telephone equipment.

(b) Purchases of the following items are specifically governed by the FAR and NFS. Compliance with the applicable regulations is required when purchasing these items.

(1) Non-expendable property

(2) Janitorial, yard and maintenance services, other than repair services

(3) Personal clothing or footwear, except emergency situations when required for safety

(4) Printing or copying services

(5) Telephone calls

# 11. ACQUISITION PROCEDURES FOR USE WHEN PAYING WITH THE I.M.P.A.C.

(a) General

When making purchases that will be paid for using the I.M.P.A.C., all the applicable acquisition regulations apply. Regardless of whether the open market purchase is made using oral procedures or using a written purchase order or contract, the cardholder must:

(1) Ensure that funds are available and certified to pay for the items being purchased. A funded Purchase Request (PR) shall support each credit card purchase. The PR may be bulk funded.

(2) Reserve small purchases for small business in accordance with P. L. 95-507 (FAR 13.105).

(A) The Law provides that each acquisition of supplies or services which has an anticipated value of \$25,000 or less and which is subject to small purchase procedures shall be reserved exclusively for small business concerns. Therefore, when offers are solicited, they should be from small business concerns only, unless the contracting officer (cardholder) makes a written determination that there is no reasonable expectation of obtaining quotations from 18-70.403, App. I

two or more responsible small business concerns (one, if the purchase does not exceed \$2,500) that will be competitive in terms of market price, quality, and delivery. If the purchase is not made from small business, the contracting officer must document the reason for not purchasing from a small business concern.

(B) The requirement for purchasing from small business does not waive the requirement to make purchases from required sources of supply or mandatory Federal Supply Schedules (FAR Part 8).

(3) Solicit competition for purchases in accordance with FAR 13.106.

(A) Oral solicitations should whenever Written be used possible. solicitations are mandatory under the FAR when purchasing construction work over addition. \$2.000. In written solicitations should be used when purchasing services which are subject to Service Contract Act wage determinations.

The FAR recommends that (B) written solicitations be used when (i) a large number of line items are included in a single proposed acquisition, (ii) quotations obtaining oral not is considered economical or practical, (iii) special specifications are required because items or services cannot be easily explained or (iv) suppliers are located outside the local trade area (there may be instances, however, where it is appropriate to use the cards for purchases outside the local trade area).

(C) Purchases not in excess of \$2,500 may be accomplished without securing competition if the contracting officer considers the prices to be reasonable. These purchases are to be distributed equitably among qualified suppliers. If practical, other than the previous supplier should be solicited when placing repeat orders.

(D) A reasonable number of

solicited sources must be (at least for purchases over \$2,500. If three) practical, two of these sources shall not have been previously solicited. If suppliers furnish standing price quotations or catalog prices on a recurring basis, verifying the quotations or prices for individual purchases is not necessary, but the prices should be periodically confirmed as current. When determining the number of sources to solicit, consider (i) the nature of the item or service to be purchased and whether it is highly competitive, (ii) information from recent purchases of the same or similar item or service, (iii) the urgency of the purchase, (iv) the dollar value of the purchase, and (v) past experience concerning dealers' prices.

Document the record regarding (4) competition and reasonableness of price as required by FAR 13.106(c). FAR 13.106(a)(4) cites two instances when action must be taken to verify price reasonableness of purchases not exceeding contracting officer | \$2.500: The (1)suspects or has information to indicate the price may not be reasonable or (2) when purchasing an item for which no comparable pricing information is available. The file must contain an explanation of how price reasonableness was determined in those instances.

Purchase only domestic (5) end products, except as provided in FAR 25.1. The Buy American Act requires that only domestic end products be procured unless (A) the products or materials are for use outside the United States; (B) the cost is unreasonable determined as in accordance with FAR 25.105; (C) the agency head determines that domestic preferences would be inconsistent with public's the interest: or (D) the products or materials are not mined. produced, or manufactured in the United States in sufficient commercial quantities or of a satisfactory quality.

## PART 18-70 NASA SUPPLEMENTARY REGULATIONS

### (b) Oral Purchase Procedures

(1) Oral procedures may be used to acquire supplies or services that can be described in sufficient detail so that the parties to the agreement have a clear understanding of what is being acquired; and a purchase order or contract is not required by either the supplier or the Government.

(2) When placing a telephone order to be paid using the I.M.P.A.C., the cardholder will:

(A) Notify the vendor that the purchase is tax exempt.

(B) Confirm that the vendor is aware of all required Government terms and conditions.

(C) Confirm that the vendor agrees to charge the credit card when shipment is made so that receipt of the supplies may be certified on the monthly Statement of Account.

(D) Instruct the vendor to include the following information with the shipping documents or packing slip: (i) Cardholder name and

mail code;

(ii) Building number, room number, street address, city and state;

(iii) Cardholder telephone number;

(iv) The term: Credit Card;

(v) Purchase Request or Purchase Order Number.

(3) This information will alert the receiving offices and the requisitioner that the supplies have been purchased with the credit card.

 (4) A log should be used to document or record telephone credit card
 orders of \$2,500 or less when competitive quotes are not solicited. If competitive quotes are solicited for
 purchases of \$2,500 or less, or if the purchase exceeds \$2,500 and therefore requires competition, the record shall be documented. The documentation should be held until the monthly billing statement is received and then attached to the statement when it is submitted to the approving official.

(c) Purchases requiring the issuance of a written order or contract

If the I.M.P.A.C. is used to pay for a purchase made by using one of the purchase order or contract forms, the vendor should be provided the necessary information from the card orally, either in person or by telephone, and the statement "Payment to be made by credit card" should be inserted on the form. Do not include specific information from the card on the purchase order. If the vendor requires an order, an authorized installation form may be used. The vendor is given its copy of the purchase order and the contracting officer (cardholder) maintains a copy.

# 12. DOCUMENTATION, RECONCILIA-TION AND PAYMENT PROCEDURES:

(a) Any time a purchase is made that will be paid using the card, whether it is done over the counter or by telephone, a document must be retained as proof of purchase. These documents will later be used to verify the purchases shown on the cardholder monthly statement.

(1) When a purchase is made over the counter, the cardholder is to obtain a customer copy of the charge slip, which will become the accountable document (make sure all carbons are destroyed).

(2) When making purchases by phone, the cardholder is to document the transaction on a log, annotate the PR, and attach any shipping documents associated with the order. 18-70.403, App. I

(b) The contractor will provide and distribute three monthly statements within five working days after the end of the 30-day billing cycle.

(1) Cardholder - will receive a statement showing all purchases, credits and other data on transactions the cardholder has made in the 30-day billing cycle.

(2) Approving official - will receive a copy of all cardholder statements for which he/she has approving authority and a summary sheet for these statements.

(3) Financial Management Office will receive a statement providing summary data by cardholder and approving official.

(c) At the end of each monthly billing cycle, the cardholder must reconcile the information on his/her statement. The cardholder must fill in the appropriate accounting classification in the accounting code block, if not the same as the Master Accounting Code. the organization or individual for whom the purchase was made, and a description, if not provided, for each purchase. The cardholder must then sign the statement, attach all supporting documentation and forward it to the approving official or designated alternate. It is important that the cardholder check each purchase on the statement to verify the accuracy. If an item has been returned and a credit voucher received, the cardholder will verify that the credit is reflected on the statement. If purchased items and credits are not on the next monthly statement, the transaction documentation will be retained by the cardholder until the purchase or credit appears on the statement. If the purchase or credit does not appear on the next monthly statement, the cardholder or approving official must notify the Administrative Office Contact to resolve and reconcile the statement.

(d) If for some reason the cardholder does not have documentation of the transaction to send with the statement, he/she must attach an explanation that includes a description of the item, date of purchase, merchant's name and why there is not supporting documentation.

(e) The cardholder must sign the monthly statement and forward it to the approving official within five working days of receipt. If the cardholder cannot review the statement at the time that it is received, the approving official is responsible for reviewing and certifying the cardholder's statement. The approving official will go over the cardholder's statement with the cardholder upon his/her return.

(f) The approving official is responsible for the following:

Supplying (1)the appropriate financial management office with the date services provided by the contractor were received and the date services were accepted. The date services were received will be the last day of the monthly billing cycle for the contractor. The date services were accepted will be the date the approving official signs the reverse side of the statement of account. If the approving official takes more than calendar seven days to accept the services. acceptance (for determining payment due date for compliance with prompt payment regulations only) will be deemed to occur seven calendar days after receipt of the services. If anv purchased items have not been received or accepted by the time the statement is received, the items should be disputed using the procedures in paragraph 13, in

## PART 18-70 NASA SUPPLEMENTARY REGULATIONS

order to prevent payment delays. It is critical that this information be supplied in order to avoid late payment penalties.

(2) Certifying and signing monthly cardholder-signed statements and summary statements;

(3) Forwarding signed cardholder statements and finance copies of receiving reports and supporting documents to the financial management office for payment.

(4) Forwarding monthly summary statements, and the cardholder statements to the appropriate financial management office in time to be received within 15 working days of receipt by the approving official to avoid late payment penalties;

Retaining copies of summary (5) fund certification. statements and solicitation and award documentation as supporting documentation on purchases. Records retention and disposition 4.805 should be procedures in FAR followed for documentation of purchases paid for using the credit card.

#### 13. BILLING ERRORS AND DISPUTES:

(a) If a cardholder receives a statement that lists a transaction for merchandise that has not been received, or a transaction which includes a sales tax, cardholder (or the approving the official) must notify the Administrative Office Contact and complete the Cardholder Questioned item form. The contractor will credit the transaction until the dispute is resolved. Īn addition, a copy of the form must be attached to the cardholder's monthly statement and sent to the appropriate financial management office.

(b) If items purchased with the card are found to be defective, the cardholder has the responsibility to obtain replacement or correction of the item as soon as possible. If the merchant refuses to replace or correct the faulty item, then the purchase of the item will be considered in dispute. Items in dispute are handled in the same manner as billing errors.

# 14. CONTACT WITH THE CONTRACTOR

The contractor should be contacted only to report a LOST OR STOLEN card. All other questions should be directed to the installation points of contact referenced in these procedures. Telephone numbers are listed in paragraph 15.

## 15. LOST OR STOLEN CARDS

(a) If the card is lost or stolen, it is important that the cardholder immediately notify Rocky Mountain BankCard System, Inc., at the following numbers:

(1) During business hours, Monday -Friday (8:00 AM - 4:30 PM (MST))

(A) Outside Colorado - 1-800-525-3717 x3900

(B) In Colorado - 1-303-629-5678

(C) Outside Continental U.S. -303-629-5678

(2) After business hours and weekends (MST)

(A) Outside Colorado - 1-800-525-5093

(B) In Colorado - 1-800-332-9840

(b) The cardholder must also notify the approving official of the lost or stolen card within one workday after discovering the card missing.

(c) The approving official will submit a written report through the Administrative Office Contact to the Contracting Officer's Technical Representative within five workdays. 18-70.403, App. I

(d) The report will include:

(1) the card number

(2) the cardholder's complete name

(3) the date and location of the loss

(4) if stolen, date reported to police

(5) date and time the contractor was notified

(6) any purchase(s) made on the day the card was lost/stolen

(7) any other pertinent information

(e) A new card will be mailed within two business days of the reported loss or theft. A card that is subsequently found by the cardholder after being reported lost or stolen will be cut in half and given to his/her approving official. The approving official will complete the destruction notice and forward the notice to the Administrative Office Contact.

# 16. CARD SECURITY

It is the cardholder's responsibility to safeguard the credit card and account number at all times. The cardholder must not allow anyone to use his/her card or account number. A violation of this trust will require that the card be withdrawn from the cardholder with the possibility of subsequent disciplinary action.

# **17. SEPARATION OF CARDHOLDER**

Upon separation of a cardholder, the cardholder must surrender the card to

his/her approving official who will complete the destruction notice and forward the notice to the Administrative Office Contact.

# 18. TRANSFER OF CARDHOLDER TO ANOTHER APPROVING OFFICIAL

If a cardholder is transferred to another different office with a approving official, the new approving official must determine if the employee will be a cardholder within his/her office. If it is determined that the card should be kept by the cardholder, the master file can be changed by requesting, in writing, that the Administrative Office Contact have the contractor add the cardholder to new approving official's the responsibility and delete him/her from the old file without issuing a new card.

# **19. UNAUTHORIZED PURCHASES OR CARELESS USE OF THE I.M.P.A.C.**

(a) A cardholder who makes unauthorized purchases or carelessly uses the card may be liable to NASA for the total dollar amount of unauthorized purchases made in connection with the misuse or negligence. Also, the cardholder may be subjected to disciplinary action for unauthorized or careless use.

(b) NASA will be liable for the use of I.M.P.A.C.s by authorized users (cardholders).

## SUBPART 18-70.5 NASA MAJOR SYSTEM ACQUISITION PHASED PROCUREMENT GUIDANCE

### 18-70.501 Purpose.

Major system acquisitions are among NASA's largest and most visible efforts, often requiring the investment of significant Government and contractor resources. These procurements may cover several distinct program phases over a number of years. In most cases, major system acquisitions are accomplished through a phased procurement process involving competitive down-selection In this process, multiple techniques. contracts are awarded during the initial phase and a down-selection is made from among those contractors to determine succeeding phase contractors. Eventually, a single contractor will be chosen for the final phase. Because of the importance and complexity of major systems, it is imperative that the procedures for their acquisition be efficient and effective.

# 18-70.502 Regulations.

The basic regulations governing major system acquisitions are Office of Management and Budget (OMB) Circular No. A-109, NASA Management Instruction (NMI) 7120.4 ("Management of Major System Program and Projects"), NASA Handbook (NHB) 7120.5 ("Management of Major System Program and Projects Handbook"), and NASA FAR Supplement In addition to these (NFS) 18-34. documents, detailed guidance on the planning and conduct of major system acquisitions appears at 18-70.503. This last guidance is designed for use by personnel and other procurement individuals who participate in the major system acquisition process. It will also help the public understand NASA's major system acquisition policies and procedures.

# 18-70.503 Major System Acquisition Procedures.

(a) Major system acquisition procedures are prescribed in Appendix I to this section 18-70.503.

(b) NASA may reprint Appendix I as a separate document, provided the following conditions are met:

(1) The issuance date ("cover date") of the procedures shall be the date of the NFS version from which the text is extracted.

(2) With the exception of availability, distribution, and other special prefatory notices, any subsequent modification in the text shall be preceded by a change to NFS 18-70.503, Appendix I.

(3) The following notice shall be included in the prefatory material of the document:

# **IMPORTANT NOTICE**

These procedures are a separately bound, verbatim version of NASA FAR Supplement (NFS) (48 CFR 18-70.503) section 18-70.503, Appendix I. Reference to other parts of the Federal Acquisition Regulation (FAR) and the NFS will be required for complete coverage of all procurement aspects. NASA reserves the right to make changes to NFS 18-70.503. Appendix I, without issuing a new edition of these procedures. In the event of apparent conflict between these procedures and the NFS, the NFS shall govern.

APPENDIX I TO 18-70.503 NASA PROCEDURES FOR CONDUCTING MAJOR SYSTEM ACQUISITIONS

- ---

## PART 18-70 NASA SUPPLEMENTATRY REGULATIONS

# NASA PROCEDURES FOR CONDUCTING MAJOR SYSTEM ACQUISITIONS

## 1. INTRODUCTION

(a) The acquisition of major systems presents a complex challenge for NASA. These acquisitions are among the agency's largest and often require the investment of significant Government and contractor resources over a number of years. These acquisitions are often accomplished in several distinct phases, from preliminary analysis through definition, design, development, and operation. The broad scope of programmatic activity in a major system acquisition demands an effective and efficient acquisition strategy.

(b) There are several approaches to accomplishing these multi-phase major system acquisitions ranging from separate acquisition of each phase to competitive down-selection of combined phases. The preferred technique in NASA is use of a competitive down-selection strategy, and the preferred variation of this strategy is the "progressive competition" approach. In a progressive competition down-selection, a single formal solicitation is issued for all phases, multiple contracts are awarded for the initial phase, and a down-selection from among these contractors is conducted to determine the succeeding phase contractors. Progressive competition procedures, when properly planned and executed, facilitate the realization of the desirable goals of effective and efficient acquisition of major systems, preservation of full and open competition throughout the process, and acquisition streamlining.

(c) This appendix describes the procedures to follow when using the progressive competition technique. Although this appendix addresses progressive competition, many of these procedures are applicable to other phased procurement strategies, and unless specifically prohibited herein, should be considered for use and adapted to accommodate the particulars of these other strategies. For example, the general guidance on the synopsis requirements and acquisition planning applies to all phased procurements, and most of the downselection procedures apply to all downselection strategies, not just progressive competitions. Some changes in these procedures may need to be made to recognize inherent differences in strategies, such as the use of new, formal solicitations for each phase of alternative downselection strategies.

#### 2. **DEFINITIONS**

(a) **Down-selection.** In a phased procurement, the process of selecting contractors for phases subsequent to the initial phase from among the preceding phase contractors.

(b) *Major System.* Any system that: is directed at and critical to fulfilling an agency mission; entails the allocation of a relatively large amount of resources; or warrants special management attention. Designation of a system as "major" is made in accordance with NASA Management Instruction (NMI) 7120.4, Management of Major System Programs and Projects," and NASA Handbook (NHB) 7120.5, "Management of Major System Programs and Projects Handbook."

(c) *Phased Procurement*. A program comprised of several distinct steps or phases (e.g., preliminary analysis, definition, design, and development) where the realization of program objectives requires a planned, sequential acquisition of each step or phase. The phases in a phased procurement may be acquired separately, in combination, or through a down-selection strategy.

(d) **Progressive Competition.** A type of down-selection strategy for a phased procurement. In this method, a single solicitation is issued for all phases of the program. The initial phase contracts are awarded, and the contractors for subsequent phases are expected to be chosen through a down-selection from among the preceding phase contractors. In each phase,

#### NASA FAR SUPPLEMENT (NFS)

progressively fewer contracts are awarded until a single contractor is chosen for the final phase. Normally, all down-selections are accomplished without issuance of a new, formal solicitation.

# 3. PHASES OF A MAJOR SYSTEM ACQUISITION

(a) As described in NMI 7120.4 and NHB 7120.5, there are five phases in the life cycle of a major system acquisition, three of which are normally included in a phased procurement: Phase B, Definition; Phase C, Design; and Phase D, Development. The most common approach in NASA for acquiring these phases involves two steps: (1) two (or more) competitively awarded Phase B contracts; and (2) down-selection from among the Phase B contractors to a single Phase C/D contractor. To be relevant to the predominant agency practice, the procedures in this appendix address this model. However, the focus on this model does not preclude adaptation of these procedures to suit other phase combinations.

(b) For a detailed description of the phases of a major system acquisition and their interrelationships, consult NHB 7120.5.

# 4. PLANNING A PROGRESSIVE COMPETITION

(a) Choice of the appropriate procurement strategy for a major system acquisition is accomplished through careful analysis of many factors. The decision to proceed with each phase separately or to use the progressive competition technique must consider, among other things, the number of viable alternative system concept approaches, the risks associated with those approaches, funding, schedule, requirements maturity, and the extent to which an offeror's ability to perform successfully in subsequent phases is tied to successful performance in prior phases.

(b) To be a candidate for a progressive

competition, all considerations must play together. Of paramount importance is the need for a clear understanding and expression of program requirements and goals. Also, the planning considerations must carefully address and justify the number and content of the phases, the acquisition schedule and funding for each phase, the number of contractors for each phase, the timing of the down-selection decision, and the planned contract types for each phase.

(c) Certain factors may clearly dictate that the progressive competition technique should not be used. For example, if it is likely that NASA may introduce a design concept independent of those explored by the Phase B contractors, it is also likely that a new, formal solicitation is necessary for Phase C/D and all potential offerors should solicited. In this circumstance, progressive competition is inappropriate. Also, if there is no direct link between successful performance in the preceding phase and successful performance in the subsequent phase, progressive competition is also inappropriate. In both of these cases, the major system acquisition phases should be procured separately without a downselection between phases.

(d) It cannot be overemphasized that the success of a progressive competition is directly dependent on thorough planning before initiation. Progressive competition should not be used as a rationale for initiating an acquisition that is poorly planned, not well thought out, or merely a way to meet budget or schedule pressures. The need for clear technical requirements and program goals is in no way diminished by use of progressive competition. Where requirements and goals are not clear, the progressive competition approach shall not be used.

(e) The rationale for use of the progressive competition technique shall be thoroughly justified in the procurement plan or

## PART 18-70 NASA SUPPLEMENTATRY REGULATIONS

Acquisition Strategy Meeting (ASM) minutes. Because the Phase B solicitation will also lead to Phase C/D award, the decision to use the progressive competition strategy must be made prior to initiation of the Phase B procurement. Accordingly, both phases must be addressed in the initial acquisition strategy planning and documented in the procurement plan or ASM minutes.

# 5. PROGRESSIVE COMPETITION SYNOPSIS REQUIREMENTS

(a) Because of the importance of major system acquisitions, early identification of these programs to industry is encouraged. The research and development (R&D) advance notice described in FAR 5.205 is an effective tool to announce the program and identify the maximum number of qualified potential offerors. Although not required by regulation, use of R&D advance notices on major system acquisitions is strongly recommended.

To ensure that a progressive (b) competition provides for the maximum effective competition and complies with statutory and regulatory requirements for full and open competition, each phase must be synopsized unless one of the exceptions in FAR 5.202 applies. Based on the NASA model of acquiring Phases B and C/D, this means that a separate synopsis must be issued prior to releasing the solicitation for Phase B and again prior to requesting Phase C/D proposals from the Phase B contractors. Each synopsis must be prepared in accordance with by FAR 5.207 and NFS 18-34.005-1(d).

(c) Although a new, formal solicitation is normally not issued for Phase C/D under a progressive competition, the synopsis publication periods specified in FAR 5.203 still apply to the Phase C/D synopsis. In this case, the synopsis must be published at least 15 days before formally requesting the Phase C/D proposals from the Phase B contractors and at least 45 days prior to the Phase C/D proposal due date. (d) Notwithstanding the requirement to synopsize Phase C/D, in most cases there will not be any potential offerors for Phase C/D other than the Phase B contractors. However, proposals from other prospective offerors must be considered, and these offerors must be given all of the information necessary to compete for the next phase (e.g., the previously issued solicitation; the preceding phase contracts; the preceding phase system performance and design requirements; all proposal preparation instructions; and evaluation factors, subfactors, and elements). To avoid schedule disruptions, early publication of the Phase C/D synopsis is strongly encouraged. Potential offerors other than the Phase B contractors cannot be summarily dismissed solely because the program schedule did not anticipate their involvement.

(e) The following is a sample synopsis for Phase B of a progressive competition.

A-Presolicitation Notice: (PROGRAM NAME). NASA plans to conduct a progressive competition to define, design, develop, and produce the (PROGRAMNAME). This effort will be a full and open competition and will be acquired. in two distinct phases - Phase B, Definition, requiring preliminary system design of (PROGRAM NAME) and Phase C/D, Design and Development, requiring the detailed design, fabrication and delivery of (PROGRAM NAME). Two or more Phase B awards are anticipated leading to a single Phase C/D award. A progressive competition strategy will be used with down-selection of sources between Phases B and C/D. To be eligible for Phase B award, offerors must demonstrate the experience and capability, or ability to acquire the capability,

18-70.503, App. I

to perform both Phases B and C/D. The competition for Phase C/Dwill build on the results of Phase B. and the award criteria for Phase C/D will include successful completion of specified Phase B requirements. Accordingly, NASA anticipates that only the Phase B contractors will be capable of successfully competing for Phase C/D. NASA will synopsize the Phase C/D competition in accordance with FAR 5.201 and 5.203, but does not plan to issue a new, formal solicitation. Instead, proposals will be requested from the Phase B contractors by (INDICATE METHOD OF REQUESTING PROPOSALS, E.G., A LETTER) that will include detailed proposal preparation

instructions and evaluation criteria. Although a new, formal solicitation will not be issued, any responsible source may submit a proposal for Phase C/D, and these proposals will be considered by the agency. Prospective offerors for Phase C/D other than the Phase B contractors will be provided all the material furnished to the preceding phase contractors necessary to submit a proposal. To be considered for Phase C/Daward, offerors must demonstrate a design maturity equivalent to that of the Phase B contractors, such demonstration to include any Phase B deliverables upon which Phase C/D award may be based. Failure to fully and completely demonstrate the appropriate level of design maturity may render the proposal unacceptable with no further consideration for contract NASA anticipates award. releasing the solicitation for Phase B on or about (DATE OF RFP RELEASE). Detailed Phase B requirements are

## NASA FAR SUPPLEMENT (NFS)

(GIVE A SPECIFIC DESCRIPTION OF PHASE B REQUIREMENTS). It is anticipated that Phase C/D will consist of (GIVE ANTICIPATED PHASE C/D REQUIREMENTS). For further information, contact (NASA POINT OF CONTACT).

(f) The following is a sample synopsis for Phase C/D of a progressive competition.

A-Presolicitation Notice: (PROGRAM NAME). NASA is conducting a progressive competition to define, design, develop, and produce the (PROGRAMNAME). This effort is a full and open competition and is being acquired in two distinct phases - Phase B, Definition, requiring preliminary system design of (PROGRAM NAME) and Phase C/D, Design and Development, requiring the detailed design, fabrication and delivery of (PROGRAM NAME). The Phase B solicitation was described in (CITE DATE) the Commerce Business Daily. Phase B contracts were awarded to (CITE CONTRACTORS) on (CITE AWARD DATE). Α progressive competition strategy will be used with down-selection of sources from Phase B to determine the single Phase C/D contractor. The competition for Phase C/D will build on the results of Phase B, and the award criteria for Phase C/D includes successful completion of the Phase B requirements identified below. Accordingly, NASA anticipates that only the Phase B

# PART 18-70 NASA SUPPLEMENTATRY REGULATIONS

contractors will be capable of successfully competing for Phase C/D. A new, formal solicitation will not be issued for Phase C/D. Instead, proposals will be requested from the Phase B contractors by (INDICATE METHOD OF **REQUESTING PROPOSALS, E.G.,** A LETTER) that will include detailed proposal preparation instructions and evaluation criteria. However, any responsible source may submit a proposal for Phase C/D, and these proposals will be considered by the agency. Prospective offerors for Phase C/D other than the Phase B contractors will be provided all the material furnished to the preceding phase contractors necessary to submit a proposal. To be considered for Phase C/D award, offerors must demonstrate a design maturity equivalent to that of the Phase B contractors, such demonstration to include the following Phase B deliverables upon which Phase C/D award will be based: (CITE SPECIFIC PHASE B DELIVERABLES). Failure to fully and completely demonstrate the appropriate level of design maturity may render the proposal unacceptable with no further consideration for contract award. NASA anticipates requesting Phase C/D on or about (DATE) and proposals will be due (CITE NUMBER) days thereafter. Detailed Phase C/D requirements are (GIVE A SPECIFIC DESCRIPTION OF PHASE C/D REQUIREMENTS). For further information, contact

(CITE NASA POINT OF CONTACT).

### 6. PROGRESSIVE COMPETITION SOLICITATION

(a) One of the major benefits of the

progressive competition technique is that, in most circumstances, only one solicitation is This single solicitation not only used. covers the initial phase, but also all subsequent phases. That is, the solicitation for Phase B also satisfies the requirement for soliciting Phase C/D. Eliminating the need for a new, formal solicitation after the initial phase streamlines the process and should result in schedule economies. However, these savings will not be realized without proper planning. The potential for gaps between phases will still exist unless the Phase C/D down-selection is initiated during Phase B performance, allowing enough time to complete evaluation, make selection, and negotiate and award the Phase C/D contract not later than the conclusion of Phase B.

(b) Only phased procurements using the progressive competition technique can acquire all phases of the procurement through a single formal solicitation. All other phased procurements must issue new. formal solicitations for each phase. However, merely calling a major system acquisition a progressive competition does not in itself mean that the formal initial phase solicitation is sufficient to cover all subsequent phases. Under a progressive competition, a clause substantially the same as that in 18-52.234-71 must be included in the Phase B solicitation and contracts. (The clause at 18-52.234-70 should be used for other types of down-selection strategies). This clause may be modified to suit the particulars of a given procurement, but it must include the information in 18-34.005-170(a) and (b) as a minimum. Failure to include any of this information may call into question the integrity of progressive competition procedures and require a new, formal solicitation for Phase C/D.

(c) Because of the significant dollar value of major system acquisitions, formal Source Evaluation Board (SEB) procedures must be used for all phases of the procurement, unless one of the exceptions in 18-15.613-71(a) applies. Accordingly, a separate set of evaluation factors must be developed for each phase in a progressive competition. 18-70.503, App. I

#### NASA FAR SUPPLEMENT (NFS)

For the most part, these factors are developed the same way for a progressive competition as for any other NASA competitive procurement. However, there is one element inherent in the very nature of the progressive competition technique, or any other competitive down-selection strategy, that must be reflected in the evaluation factors for such procurements. Since these competitive down-selection strategies anticipate that one of the Phase B contractors will also be the Phase C/D contractor, the Phase B offerors must clearly demonstrate the ability to perform the subsequent phases. Accordingly, the evaluation factors for the Phase B award must specifically include the evaluation of the Phase B offerors' abilities to perform not only Phase B but also Phase C/D.

(d) Although a new, formal solicitation is normally not issued subsequent to the initial phase when using the progressive competition technique, this practice is not absolute in all cases. If the Government requirements or evaluation procedures change so significantly after award of the initial phase contracts such that a substantial portion of the information provided in the initial phase synopsis, solicitation, or contracts is invalidated, a new, formal solicitation for subsequent phases is required. To ensure that schedules are not compromised or the benefits of procurements diminished, phased contracting offers, beginning at Phase B award, should carefully monitor the degree to which the acquisition particulars may be If it appears that the changing. procurement circumstances have changed significantly, the contracting officer should take immediate action to begin generation of a formal solicitation for the next phase of the procurement.

# 7. PROGRESSIVE COMPETITION INITIAL CONTRACTS

(a) In general, the Phase B contracts awarded in a progressive competition will

look much like any other NASA contract for similar design efforts. There are certain features, however, that must be included (or must not be included) in these contracts to accommodate and authorize the continued use of this technique in the subsequent down-selection. One feature that must be included in the Phase B contracts is the clause that explains the progressive competition technique and the plans for the down-selection. As stated in paragraph 6(b) of this appendix, a clause substantially the same as that in 18-52.234-71 must be included in the Phase B contracts when using the progressive competition technique and 18-52.234-70 when using other down-selection strategies.

(b) An important feature of these clauses is the paragraph indicating that the Phase C/D proposals are not a contract requirement and the costs of preparing these proposals shall not be a direct charge to the Phase B contract or any other Government contract. To be consistent with this paragraph, the Phase B contracts shall not include any requirement for delivery of Phase C/D proposals nor shall they include remuneration mechanism а for the proposals. Options for such proposal activities, priced or unpriced. are prohibited.

(c) The rationale for these prohibitions is twofold. First, making the Phase C/D proposals a contract requirement can cause significant and contentious data rights problems over which party owns the data in the proposal. Unless this issue is clearly resolved, contractors may be reluctant to provide unique or innovative information, fearing that it may be appropriated and given to a competitor. The technical objectives of the procurement would then be compromised. Second, by requiring Phase C/D proposals and paying for them, an outside offeror may successfully protest that the Phase B contractors were given an unfair competitive advantage for Phase C/D. The procurement may then no longer be considered full and open competition.

(d) In addition to including the specific contract clause discussed above, the Phase B contracts should be carefully structured to allow down-selection at a discrete performance milestone such as a significant design review or at contract completion. Such advance planning will not only avoid gaps between phases but will also eliminate unnecessary duplication of effort or the need to terminate the remaining Phase B efforts of an unsuccessful Phase C/D offeror. It is critical to remember, however, that determination of the appropriate contract structure is not made based solely on schedule or contract considerations. Rather, it is also driven by, and reflective of, programmatic technical content and objectives.

(e) For example, if the acquisition strategy calls for formal completion of Phase B effort at Preliminary Design Review (PDR), but it is not financially practical or technically necessary (for Phase C/D selection and performance purposes) to carry all Phase B contractors through PDR, the Phase B contracts should be structured with a basic period of performance through a significant, discrete milestone before PDR with a priced option for the effort from that milestone through PDR. The downselection would be planned for the earlier milestone, the PDR option exercised for only the winner of the down-selection, and formal Phase C/D performance initiated at completion of the PDR option. In this scenario, the earlier milestone must be carefully chosen to ensure successful accomplishment of both program technical objectives and all activities leading to completion of the down-selection process. That is, design maturity at that point must be sufficient to accommodate an informed down-selection decision leading to successful accomplishment of Phase C/D.

(f) In other program strategies, it may be both affordable and technically desirable to have all the Phase B contractors complete PDR. In these cases, the contract should be structured as a basic effort through PDR, down-selection made at that point, and Phase C/D performance beginning thereafter.

(g) Regardless of the contract structure that is appropriate given the program objectives, the schedule leading to downselection must also be carefully crafted and followed. This schedule must allow ample time for synopsizing the Phase C/D downselection, responding to any other offeror's intention to submit a proposal, generation of whatever information is necessary for Phase C/D proposals (e.g., final technical requirements, proposal preparation instructions, and evaluation factors), submission and evaluation of the proposals, negotiation, and award. In some cases, the earliest of these activities will commence shortly after Phase B award. However, unless these activities are planned and executed in reasonable time periods to accommodate timely Phase C/D award, many of the benefits associated with the progressive competition technique, or any other down-selection strategy, will go unrealized.

## 8. REQUESTING PHASE C/D PROPOSALS

(a) Although a new, formal solicitation is normally not issued for Phase C/D when using the progressive competition technique, Phase C/D proposals must be formally requested and the offerors given all information necessary to submit a proposal. The preferred approach for requesting Phase C/D proposals is by letter. This letter shall include the following:

(1) A specific due date for the Phase C/D proposals along with a statement that FAR 52.215-10, Late Submissions, Modifications, and Withdrawals of Proposals, applies to this proposal due date.

(2) Complete instructions for proposal preparation, including page limitations, if any.

(3) Final evaluation factors.

# NASA FAR SUPPLEMENT (NFS)

(4) Any statement of work, specification, or other contract requirements that have changed since the Phase B solicitation.

(5) All required clause changes applicable to new work effective since Phase B contract award.

(6) Any representations or certifications, if required.

(7) Any other required contract updates. (E.g., Phase C/D small and small disadvantaged subcontracting goals.)

(b) Although the exception and not the rule, there are circumstances in which a new, formal solicitation must be issued for Phase C/D. Significant changes in paragraphs 8(a)(3) and (4) of this section, in particular, require a careful assessment as to whether a new solicitation should be issued. Determining the significance of changes is often subjective and difficult, however. These determinations should only be made after coordinated consultation among procurement, legal, and technical personnel. Some cases will be particularly clouded, and no clear resolution of the magnitude of the changes can be made. In these instances, the issue should be resolved on the side of caution and a new, formal solicitation issued.

## 9. PHASE C/D AWARD

(a) As stated in paragraph 6(c) of this appendix, evaluation of Phase C/D

proposals will normally be accomplished in accordance with formal SEB procedures. Phase C/D award may be made by either a new contract, or by a new work supplemental agreement to the existing Phase B contracts.

(b) Keep in mind that, no matter what is included in the original solicitation or Phase B contracts regarding the progressive competition technique, or any other alternative down-selection strategy, the Phase C/D effort is new work and not an in-scope change under the "Changes" clause, or any other clause, of the Phase B contract. If a supplemental agreement is used to implement Phase C/D, it shall cite the applicable "Phased Procurement" clause (either 18-52.234-70 or -71) included in the Phase B contracts as authority for award.

(c) Whether a new contract or new work supplemental agreement is used, the document must incorporate all applicable statutory and regulatory requirements (e.g., contract clauses) in effect as of its issuance. The Phase C/D award date is controlling and not the date of the Phase B awards.

(d) In addition, regardless of the time of Phase C/D award or the contract vehicle used to effect it, the Phase C/D period of performance should commence only upon completion of Phase B tasks.
