CHRYSLER CORPORATION SPACE DIVISION - NEW ORLEANS, LOUISIANA

FOREWORD

This volume is one of a set of eleven volumes that describe mechanical and electro-mechanical systems of the Saturn I, SA-10 launch vehicle and launch complex 37B. The eleven-volume set is prepared for the Functional Integration Section, Systems Integration and Operations Branch, Vehicle Systems Division, P&VE Laboratory, MSFC, by Systems Engineering Branch, Chrysler Corporation Space Division under Contract NAS 8-4016. Volume titles are listed below:

Volume I	RP-1 Fuel System
Volume II	LOX System
Volume III	LH ₂ System
Volume IV	Nitrogen and Helium Storage Facility
Volume V	Pneumatic Distribution Systems
Volume VI	Environmental Conditioning Systems
Volume VII	Launch Pad Accessories
Volume VIII	H-1 Engine and Hydraulic System
Volume IX	RL10A-3 Engine and Hydraulic System
Volume X	Separation and Flight Termination Systems
Volume XI	Supplement: Legend and Composite Schematic

The technical content of this volume reflects the most up-to-date design information available from the S-I/S-IB Project Engineer, R-P&VE on August 1, 1964.

This volume contains a combined launch complex and vehicle mechanical schematic and an illustrated list of symbols used on this schematic and on the schematics appearing in volumes I through X.

The finding numbers appearing on the composite schematic correspond to those appearing in volumes I through X. For a more detailed description of components appearing on this schematic, see the index of finding numbers in the other ten volumes.

INDEX OF FINDING NUMBERS

This index contains an alphameric list, by finding number, of the mechanical and electromechanical systems of the Saturn I, SA-10 launch vehicle and launch complex 37B that function during a prelaunch countdown, during vehicle flight, or in the event of a launch cancellation. The finding numbers listed identify components on the system composite schematic. A break will occur in the alphameric sequence of finding numbers when a component or component series is not functional during the countdown, functional only in the event of a malfunction, functional only for a maintenance operation, or part of another functional system.

The letter prefix of a finding number identifies the component with either the launch complex or an area of the launch vehicle. The area associated with each prefix is noted below.

<u>FINDING NUMBER</u> <u>PREFIX</u>	<u>DESIGNATED AREA</u>
