

# NASA TECH BRIEF

NASA Tech Briefs are issued to summarize specific innovations derived from the U.S. space program, to encourage their commercial application. Copies are available to the public at 15 cents each from the Clearinghouse for Federal Scientific and Technical Information, Springfield, Virginia 22151.

## Handbooks Describe Eddy Current Techniques Used in Nondestructive Testing of Metal Parts and Components

A series of handbooks on eddy current testing principles has been prepared for use in teaching technicians the latest techniques in the nondestructive testing of rocket components.

These handbooks could serve as basic instruction manuals and guides for personnel in any industry engaged in the nondestructive testing of metal parts and components.

The handbooks are dated January 1, 1967 and are titled as follows:

- (1) *Eddy Current Testing*, RQA/MI-533.17 (298 pages)
- (2) *Nondestructive Testing Eddy Current Basic Principles*, RQA/MI-5330.12 (V-I) (207 pages)

- (3) *Nondestructive Testing Eddy Current Equipment, Methods and Applications*, RQA/MI-5330.12 (V-II) (203 pages)

These handbooks are available from:

Technology Utilization Officer
