Introduction

WHAT THIS CUMULATIVE INDEX IS

This publication is a cumulative index to NASA SP-7011 (47) through NASA SP-7011 (58) of *Aerospace Medicine and Biology A Continuing Bibliography* NASA SP-7011, by means of supplements, serves as a current abstracting and announcement journal for references on bioscience and biotechnology. It is compiled through the cooperative efforts of the Aerospace Medicine and Biology Bibliography Project of the Library of Congress (LC), the American Institute of Aeronautics and Astronautics (AIAA), and the National Aeronautics and Space Administration (NASA).

Entries prepared by the three contributing organizations are identified as follows.

1. NASA entries by their STAR accession numbers (N68-10000 series);
2. AIAA entries by their IAA accession numbers (A68-10000 series);
3. LC entries identified by a number in the A68-80000 series.

HOW THIS CUMULATIVE INDEX IS ORGANIZED

This Cumulative Index includes a subject index, a corporate source index, and a personal author index.

HOW TO USE THE SUBJECT INDEX

Two types of cross-references appear in the subject index.

1. Use (U) references indicate that the subject term is not "postable," i.e., not a valid term, and that the following term or terms are used instead. For example:

COLUMBIUM
U NIOBIUM
ANNULAR JETS
U ANNULAR FLOW
U JET FLOW

2. Narrower Term (NT) references indicate that the subject terms following the NT notation represent more specific concepts than the terms used. For example:

EMISSION
NT ELECTRON EMISSION
NT NEUTRON EMISSION
NT THERMAL EMISSION

In addition, a searcher may use the notations of content in the index to narrow further his quest for particular items. This is because subject terms can readily include more than one class of document. For example:

CATHODES
Cesium plasma cathodes as
sources of high intensity elec-
tron beams
Cathode material testing in
electrochemical half cells

illustrates a case where two references on different topics are listed under the same subject term.

AVAILABILITY OF DOCUMENTS

Availability of this Bibliography

Copies of *Aerospace Medicine and Biology* (NASA SP-7011) and its supplements are available to the public from the Clearinghouse for Federal Scientific and Technical Information, Springfield, Virginia 22151, for \$3 each. Copies are available on initial distribution without charge to the following:

1. NASA Offices, Centers, contractors, subcontractors, grantees, and consultants;
2. Other U.S. Government agencies and their contractors,
3. Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public use
4. Other organizations in the United States having a need for NASA documents in work related to the aerospace program, and
5. Foreign government or academic organizations that have established appropriate reciprocal arrangements with NASA

STAR Entries

Availability of NASA Documents

NASA documents are identified by an asterisk in the *STAR* Entries section. NASA documents that have been microfiched⁽¹⁾ (identified by the # sign in the *STAR* Entries section) are available on microfiche without charge to an organization eligible to receive *Aerospace Medicine and Biology* without charge.

Availability of Non-NASA Documents

Non-NASA documents are those documents that do not carry an asterisk in the citation. Department of Defense documents (identified by the "AD" number in the citation and indexes) are available, subject to a service charge, in hard copy or microfiche from the Clearinghouse for Federal Scientific and Technical Information, Springfield, Virginia 22151. Microfiche copy of DOD reports will continue to be available to Defense Documentation Center users at no cost from the Defense Documentation Center, Cameron Station, Alexandria, Virginia 22314. National Lending Library (NLL) for Science and Technology translations are available from NLL at the price stipulated in the citation. Requests for purchase should be addressed to:

National Lending Library for Science and Technology
Boston Spa, Yorkshire, England.

Dissertations selected from Dissertation Abstracts are available in xerographic copy (HC) and on microfilm for sale from University Microfilms, Inc., Ann Arbor, Michigan, 48106. All requests should cite the author and Order Number as they appear in the citation. Note that the dissertations are provided on microfilm and not microfiche.

Other non-NASA documents are publicly available as indicated in the citations. Those documents which have been microfiched are available on microfiche without charge only to NASA Offices, Centers, contractors, subcontractors, and consultants.

How to Obtain Microfiche

If you are registered with NASA and eligible to receive reports as described above, send the completed *Document Request* (Facility Form 492) to:

NASA Scientific and Technical Information Facility
P.O. Box 33
College Park, Maryland 20740

(1) A microfiche is a transparent sheet of film, 105×148 mm in size, capable of containing up to 72 pages of information reduced to micro images (not to exceed 20:1 reduction).

If you are not registered with NASA and wish to receive information concerning registration, request *Registration Form—Technical Publications* (Facility Form 713) from the NASA Scientific and Technical Information Facility at the address given above. Others may obtain microfiche copies by purchase from

Clearinghouse for Federal Scientific and Technical Information
(CFSTI)
Springfield, Virginia 22151

U S. Government Sales Agencies

Publications with a CFSTI availability statement in the citation are sold in hard copy and microfiche copy by.

Clearinghouse for Federal Scientific and Technical Information
(CFSTI)
Springfield, Virginia 22151

The following unit price has been established by CFSTI: \$3.00 for hard copy, \$0.65 for microfiche.

Publications with a GPO availability statement in the citation are sold in hard copy by Superintendent of Documents, U S Government Printing Office (GPO)
Washington, D C 20402

NASA documents available from the GPO are also available from CFSTI at the GPO price given in the citation.

NOTE: Documents announced without specific availability statement may be requested from the issuing activity.

Bibliographic information, e.g., report number, etc., rather than the NASA accession number (i.e., N68-12345), should be provided when requesting a document from other than NASA.

IAA Entries

All cited documents are available from the AIAA Technical Information Service as follows: Paper copies are available at \$3.00 per document up to a maximum of 20 pages. The charge for each additional page is \$0.25. Microfiche are available at the rate of \$0.50 per microfiche for documents identified by the symbol # following the accession number. A number of publications, because of their special characteristics, are available only for reference in the AIAA Technical Information Service Library. Minimum air-mail postage to foreign countries is \$1.00.

Please refer to the accession number, e.g., A68-13193, when requesting documents. Address all inquiries and requests to:

Technical Information Service
American Institute of Aeronautics and Astronautics, Inc
750 Third Avenue, New York, N Y 10017

For further details please consult the *Introductions to STAR and IAA*, respectively.

LC Entries

Articles listed are available in the journals in which they appeared. They may be borrowed or consulted in libraries maintaining sets of these journals. In some instances, reprints may be available from the journal offices.

Typical Subject Index Entry Listing

The Notation of Content (NOC) rather than the title of the document is used to provide a more exact description of the subject matter. The NASA AIAA or LC accession number is included in each entry to assist the user in locating the abstract in the abstract section of an individual issue of *Aerospace Medicine and Biology*. If applicable, a report number is also included as an aid in identifying the document.

REDUCED BAROMETRIC PRESSURE EFFECTS ON PULMONARY
FUNCTIONS IN ALTITUDE SIMULATION STUDIES,
MEASURING VITAL CAPACITY AND EXPIRATION,
RESPIRATION AND VENTILATION RATES A68-14397

BIOCHEMICAL BLOOD INDICES SUCH AS P H, ALKALINE
RESERVE, OXYHEMOGLOBIN AND ADRENALIN CONCENTRATION
STABILIZATION DURING FUNCTIONING OF
CARDIOPULMONARY PREPARATION A68-24752

AGING PROFILE OF PROFESSIONAL PILOTS CAPACITIES
SKETCHED FROM STANDPOINT OF CARDIOVASCULAR,
PULMONARY PHYSIOLOGY AND EXPERIMENTAL PSYCHOLOGY
DISCUSSING NEUTRAL NOISE EFFECT A68-31852

POSTURAL BLOOD REDISTRIBUTION EFFECTS ON PULMONARY
MECHANICS, NOTING CHANGES IN THORACIC
CIRCUMFERENCE AND END-EXPIRATORY LUNG VOLUME AND
INTRATHORACIC PRESSURE A68-43641

OXYGEN ALVEOLAR-ARTERIAL TENSION DIFFERENCE AFTER
RECUMBENCY IN MAN A68-80014

MATHEMATICAL MODEL FACILITATING ANALYSIS OF
PULMONARY ARTERIAL OR AIRWAY CONDUCTANCE TO LUNG
VOLUME A68-80030

EFFECTS OF HYPOXIA AND HYPERCAPNIA ON RESPIRATORY
FREQUENCY AND TIDAL VOLUME IN DOGS A68-80061

EFFECT OF SQUATTING IN MAN ON PULMONARY FUNCTIONS
