Subject: Contract NAS9-13304, Monthly Progress Report for the Period  
1 November - 30 November 1973

Activity has been at a low level this month awaiting NASA action  
on the proposed change in Principal Investigator.

Computer programs which generate mean return waveforms are being  
modified to provide a graphical output on the computer CRT. Several  
discussions were held during the month with the Technical Monitor concerning  
the current status and plans for completion of the program.

No charges were made to the program during the month of November.  
A financial report for this period is included as Appendix A.
