Access Vocabulary	1

A NOTE ON THE ACCESS VOCABULARY

The *Access Vocabulary* is made available as a ready reference tool to provide better access to the *NASA Thesaurus Volume 1 — Hierarchical Listing*. It utilizes pseudoterms (permuted terms), embedded terms, other word entries, nonpostable terms (cross references), and postable terms. It is kept up to date by Part 2 of the *NASA Thesaurus Supplement*.

PSEUDOTERMS

Pseudoterms are permuted terms where each word in the term is rearranged by the computer to give access to any word in the term. By looking up any word in a term, the user can locate the postable term.

As an example of the potential use of permuted terms, suppose that a user wants to find information on a specific band that he knows is named for a person, but he cannot remember the person's name. By looking up the word band, he will find 14 types of bands. If the band he was trying to remember was the Herzberg Band, he would find it listed and its presence would probably jog his memory. Without the *Access Vocabulary* this might be difficult if not impossible.

USE ABSORPTION SPECTRA

Bands, Herzberg
USE HERZBERG BANDS

EMBEDDED TERMS

Embedded terms are rearrangements of parts of a word that contain other words within the term. The feature of permuting such a word is valuable and provides access to information that might otherwise be unavailable. The word geomagnetism is thus permuted to become Magnetism, Geo and can be located under Magnetism in the *Access Vocabulary*. Permutations are also made in terms such as magneto.hydro.dynamics. Access is available through Hydro and Dynamics. These terms are manually selected and segmented for subsequent computer manipulation.

USE GEOMAGNETISM

OTHER WORD ENTRIES

These include chemical abbreviations and abbreviations of states.

Cs
USE CESIUM

KS
USE KANSAS

NONPOSTABLE AND POSTABLE TERMS

These terms without their hierarchies are included for the convenience of the user. Consult the *Hierarchical Listing* for complete information.

NUMBERS

One feature of a permuted index is that numbers are also permuted. You can look up any number that appears in a term. Numbers are found at the end of the alphabet.

102, Space Shuttle Orbiter
USE SPACE SHUTTLE ORBITER 102

GLOSSES

A part of a term, usually at the end of a term, that is put in parentheses and qualifies the main term is called a gloss. These glosses which are usually terms for broader qualifiers are accessible in the *Access Vocabulary*. For example there are 25 entries under the gloss (Biology). Parens are ignored in filing glosses due to permutation factors.

(Biology), Reproduction
USE REPRODUCTION (BIOLOGY)

RELATIONSHIP TO THE HIERARCHICAL LISTING

The *Access Vocabulary* is meant to be a complementary tool to the *Hierarchical Listing*. For convenience, the postable terms without their hierarchies and the nonpostable 'Use' terms have been repeated. The remainder of the *Access Vocabulary* contains unique 'access points' to the hierarchies in Volume 1. Once the desired postable term has been located the complete hierarchical information for that term should be consulted in the *Hierarchical Listing*.
