The NASA STI Office - in Profile

Since its founding, NASA has been dedicated to advancement of aerospace and space science. The NASA Scientific and Technical Information (STI) Office plays a key part in helping NASA achieve its mission.

The NASA STI Office provides access to the NASA database, the largest collection of aerospace-related information in the world. The Office, like NASA's laboratories, is engaged in the development of new technologies for research, development, and industry.

Specialized services that support a broad NASA community of users include:
- Creating products for access, management, and dissemination of research results.
- Providing support for research and development.
- Offering technical assistance.
- Conducting research on new technologies.
- Setting standards for data storage and retrieval.
- Working with external organizations to improve science and technology.
Index to NASA News Releases
1995

NASA TM-111674
May 1996

An index to selected news releases issued by NASA Headquarters during 1995.
This publication was prepared by the NASA Center for AeroSpace Information, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934, (301) 621-0390.
INTRODUCTION

This issue of the *Index to NASA News Releases* contains a listing of news releases distributed by the Office of Public Affairs, NASA Headquarters, during 1995. This index supplements the previous issues that were identified as *Index to NASA News Releases and Speeches 1963-1966*, and the supplements for 1967 through 1994.

The index is arranged in six sections—Subject Index, Personal Names Index, News Release Number Index, Accession Number Index, Speeches (see notes below), and News Releases.

Section 1, Subject Index, contains subject headings arranged alphabetically that describe the contents of the items indexed. Under each heading the user will find applicable references to news releases and speeches containing information on that subject entry and, in many cases, cross-references to related subject headings. Each entry contains the title, accession number, news release number, and reference section, such as 06 for Section 6, News Releases.

Two types of cross-references are used:
- S for ‘SEE’ directs the user to a subject heading where references can be found—
  
  **COMSAT**
  
  S COMMUNICATIONS SATELLITE CORP.

- SA for ‘SEE ALSO’ directs the user to related subject headings where additional references may be found—

  **COMMUNICATION SATELLITES**
  
  SA TELESAT SATELLITES

Section 2, Personal Names Index, contains personal names arranged alphabetically that identify the persons mentioned in the indexed items. Each entry contains the title, accession number, news release number, and the reference section.

Section 3, News Release Number Index, lists all numbered NASA News Releases arranged in news release number order, with the corresponding accession and reference numbers.

Section 4, Accession Number Index, lists all items indexed in this publication arranged in accession number order. Each entry contains the reference section and the corresponding news release number.

Section 5, Speeches. Listing of speeches has been discontinued.

Section 6, News Releases, lists the news releases, press briefings, news conference transcripts, and other public information releases indexed in this publication, arranged in accession number order. Each news release reference contains the title, date of release, news release number, if any, and other reference information.

Copies of documents listed in this index are available to NASA offices on request from the NASA Center for AeroSpace Information (CASI), 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934. Requests for copies of the index itself should also be addressed to CASI via letter, e-mail (help@sti.nasa.gov), fax (301-621-0134), or telephone (301-621-0390).

This index correlates each news release number with its corresponding accession number. Following the accession number is a two-digit number (06) identifying the index section where a more detailed citation appears. NASA release numbers that were assigned but not used in this index have been omitted from this listing.

This index correlates each accession number with its corresponding news release number, if assigned. The accession number is followed by a two-digit number (06) identifying the index section where a more detailed citation appears. The statement NO REPORT NUMBER appears for unnumbered news releases.
