BIBLIOGRAPHY OF AERONAUTICS

1920-1921

By PAUL BROCKETT
Smithsonian Institution

III

Preceding Page Blank

INTRODUCTION.

This work covers the literature published from January 1, 1920, to December 31, 1921, and continues the work of the Smithsonian Institution issued as Volume 55 of the Smithsonian Miscellaneous Collections, which covered the material published prior to June 30, 1909, and the work of the National Advisory Committee for Aeronautics as published in the Bibliography of Aeronautics for the years 1909 to 1916 and 1917 to 1919.

As in the Smithsonian volume and in the Bibliography of Aeronautics for the years 1909 to 1916 and 1917 to 1919, citations of the publications of all nations have been included in the languages in which these publications originally appeared. The arrangement is in dictionary form with author and subject entry and one alphabetical arrangement. Detail in the matter of subject reference has been omitted on account of the cost of presentation, but an attempt has been made to give sufficient cross reference for research in special lines.

The National Advisory Committee for Aeronautics will next present a bibliography for the year 1922.

JOSEPH S. AMES,
Chairman Executive Committee
National Advisory Committee for Aeronautics.

DECEMBER 9, 1924.

— Report of Advisory Committee for Aeronautics for the year 1919-20.

Aeronautics, Vol. 20, n. s., No. 383 (Feb. 17, 1921), London, pp. 110-112, 135-136, 169-170, 188-189, 207-209, 240.

— Technical report of the Advisory Committee for Aeronautics for the year 1916-17 (with appendices). Vol. I.

London, H. M. Stationery Office, 1920, pp. x, 371, ill., diags.

The appendices, 43 in number, include papers on aerodynamics, experiments on models of aeroplanes, bodies and controls, parts, struts, wires, stability, and airscrews.

— Technical report of the Advisory Committee for Aeronautics for the year 1916-17 (with appendices). Vol. II.

London, H. M. Stationery Office, 1920, pp. i-ix, 372-771, ill., diagr.

The appendices, 49 in number, include papers on aeroplane design, engines, radiators, magnetos, construction, seaplane floats, fabrics, dopes, varnishes, hydrogen, instruments, and meteorology.

— Technical Report of the Advisory Committee for Aeronautics for the year 1917-18 (with appendices). Vol. I. General questions, airships and model aeroplane research.

London, H. M. Stationery Office, 1921, pp. xiv, 276, [xv]-xiii, ill., diags.

Includes 39 technical reports and memoranda dealing with aerodynamics, wind channels, models, wings, tests on biplanes and triplanes, aeroplane bodies, fins, rudders, struts, and parts.

— Technical Report of the Advisory Committee for Aeronautics for the year 1917-18 (with appendices). Vol. II. Airscrews and full scale work on aeroplanes.

London, H. M. Stationery Office, 1921, pp. xiv, 277-762, [xv]-xxiii, ill., diags.

Includes 43 technical reports and memoranda dealing with airscrews, bodies, engine gearing, shafts, helicopters, aeroplanes, etc.

— Technical Report of the Advisory Committee for Aeronautics for 1917-18. Vol. III. Strength of construction.

London, H. M. Stationery Office, 1921, pp. xiv, 763-1191, xv-xi, ill.

This volume consists of 50 technical reports and memoranda dealing with seaplanes, fabrics, and instruments. The main subdivisions are: Strength of construction—(1) the stresses in loaded aeroplane structures; (2) the use of soap films for stress computation; (3) experiments on timber: Seaplane floats and flying-boat hulls, aeroplane fabrics, aluminum alloy sheet for aeroplane wings, permeability of fabrics and dopes to hydrogen, meteorology, etc.

GREAT BRITAIN. Privy council. Medical Research Council. The medical problems of flying, including reports Nos. I-VII of the Air Medical Investigation Committee.

London, H. M. Stationery Office, 1920, pp. 272, ill., diagrs., tables. (Special Report Series, No. 53).

Contents: 1. Report on the medical aspects of high flying. 2. A simple procedure for testing the effect of "oxygen want" on flying men, by Professor G. Dreyer. 3. The bag method for the investigation of air disabilities of aviators, by Lieut. Col. Martin Flack. 4. A study of the reaction of pilots and observers to diminish oxygen pressure, by the late C. D. H. Corbett and H. C. Bazett. 5. A report on the value of oxygen to aviators at relatively low altitudes by Lieut. Col. Martin Flack and Lieut. Col. C. B. Heald. 6. The selection of candidates for flying, by Lieut. Col. Martin Flack and Lieut. Col. A. P. Bowdler. 7. Tests for flying efficiency and flying strain, by Lieut. Col. Martin Flack. 8. Temperament and service flying, by J. L. Birley. 9. Respiratory tests for ability to stand high altitudes, by H. C. Bazett. 10. Observations on the respiration of airman, by Grace Briscoe. 11. The sense of stability and balance in the air, by Henry Head. 12. Mental aptitude for aviation, by W. H. R. Rivers and squadron leader T. S. Rippon, in collaboration with the late Lieut. E. G. Manuel. 13. "Reaction time" tests carried out on flight cadets, with description of apparatus, by the late L. E. Stamm.

UNITED STATES Bureau of Standards. *See* Noack, W. G.: Der Höhenprüfstand des "Bureau of Standards" in Amerika.

UNITED STATES Congress. House Committee on Naval Affairs. Naval policy of the United States. Hearings before the Committee on Naval Affairs, House of Representatives, Sixty-sixth Congress, third session, on naval policy of the United States, including discussions on limitation of armaments: naval building program, with comparisons of various types of seacraft and aircraft; development of aviation and the need for airplane carriers in the Navy; air bombing of the U. S. S. "Indiana"; the proposal for a united air service.

Washington, Government Printing Office, 1921, pp. 641-782.

— Report of latest Congressional investigation of billion dollar aircraft expenditures.

Aerial Age, Vol. 10, Nos. 20-21; Vol. 11, Nos. 1-23 (Mar. 1-Aug. 16, 1920), New York, pp. 720-721, 778-781; 58, 89-90, 124, 158, 192, 226, 260, 294, 332, 372, 406, 448, 514, 550, 584, 618, 656, 714, 752, 778; Vol. 12, No. 2 (Sept. 20), p. 52.

— Why Congress refuses to give additional appropriations for aeronautics. "Pernicious lobbying" of some members and employees of Manufacturers Aircraft Association charged—dissolution of Association expected.

Aerial Age, Vol. 10, No. 17 (Feb. 9, 1920), New York, pp. 621-623, 643.

— United air service . . . Hearing[s] before a subcommittee of the Committee on Military Affairs, House of Representatives, Sixty-sixth Congress, second session . . . Hearings of December 4-5, 8-13, 15, 20, 1919; February 3, 9, 12-13, 1920.

Washington, Government Printing Office, 1919-20, pp. 72, 73-189, ii, 191-487, 489-584.

UNITED STATES Hydrographic Office. Notice to aviators . . .

Washington, Government Printing Office, 1920, pp. v.

Published by the Hydrographic Office under the authority of the Secretary of the Navy.

UNITED STATES Joint Army and Navy Board. Report of the joint board on results of aviation and ordnance tests held during June and July, 1921, and conclusions reached.

Office of the Chief of Naval Operations, Navy Department, Washington, Government Printing Office, 1921, pp. 7, tables.

UNITED STATES Naval Academy. *See* Naval aeronautics: Aviation in Naval Academy courses.
