Fall 2018 A-Train MOWG 4-6 Dec 2018

Agenda

- **CARA Operational Highlights**
- **CARA Devolution Status**
- **CARA Software Enhancements**
- **CARA Statistics**
- **Questions and Discussion**

CARA OPERATIONAL HIGHLIGHTS

CARA Operational Highlights

- **Launch Support/New Missions**

- ICESat-2: 9/15/18
- METOP-C: 11/7/18
- AEROCUBE 7B & 7C
 - New CubeSat added to CARA mission set

- **Upcoming launch support**

- STPSat-5: 11/19/18
- ICON: TBD

- **Recent removals**

- QUIKSCAT (EOL)
- RHESSEI (EOL)

CARA Supported Constellation Missions

Aqua
Aura
CloudSat*
CALIPSO*
GCOM-W1
OCO-2
Terra

*CloudSat and CALIPSO have left the A-Train and were removed from the ESC report. Some statistics presented here include their event data.

CARRA DEVOLUTION STATUS

Devolution Overview

- **Basic Philosophy**

- CARA Operations functions move to missions
- Governance under new Agency CA requirements (NPR, Standard, and Handbook)
- Mission CA operations process, training and tools certified by CARA
- CARA continued to serve as Agency SME for CA, including performing R&D
- Screenings continue to be support by CARA OSAs located at the CSpOC

- **Benefits**

- Spreads expected workload increase due to Space Fence and Large Constellations over Mission FOT workforce in addition to CARA
- Support more customizable for specific mission operational needs

Devolution Status

- **Working pilot program with ESMO team**

- Developing extensive documentation which will serve as templates for other devolution missions

- Agency CA NPR, Standard, and Handbook to describe mission devolution requirements as well as amplifying technical information
- MOU between CARA and mission
- Parallel operations plan
- CONOPS for CARA and mission
- CA Training and certification materials
- Tool validation materials

- Planning for 6+ month parallel operations period

- **Working to transfer CARA standalone CA tools to missions and to place essential CA algorithms and test cases into Software Development Kits.**

- Patent Counsel and Techn Transfer Office working process

- **Second pilot with less experienced mission required by HQ once ESMO pilot completed**

Devolution Path Forward

- **After pilot programs complete, SMD to decide:**
 - Whether to allow/continue devolution
 - Whether devolution will be optional or required for missions
 - Opportunity to revisit decision yearly
- **Considerations that may delay/prevent full devolution**
 - Foreign partners may require CA support under international agreements
 - Missions already on-orbit or significantly far along in development may not be able to change CONOPS to permit devolution

CARA SOFTWARE STATUS

Upcoming: 9.0 Major Release

- **CAS 9.0**

- Release NET Jan 2019
- System preparation for Space Fence with automation streamlining and performance enhancements
- Update to 9-digit SatIDs
- No report updates/changes included in this release
