A composite image of the Moon and Mars against a starry space background. The Moon is the large, cratered grey sphere on the left, and Mars is the smaller, reddish-orange sphere on the right. The background is a deep blue space with scattered white stars.

NASA Ames Overview and Personal Journey from Intern to Director

Dr. Eugene L. Tu
Director, NASA Ames Research Center

2023 Asian Pacific American Heritage Month
Jet Propulsion Laboratory
May 23, 2023

What Does NASA Do?

Aeronautics Research

Transform Aviation through R&D

Space Operations

Launch and Space Operations

Deep Space Exploration Sys.

Moon to Mars Exploration

Science

Understand the Sun, Earth, and Universe

Space Technology

Develop and transfer revolutionary technologies

NASA Centers

Ames Research Center

Armstrong Flight Research Center

Jet Propulsion Laboratory

Glenn Research Center

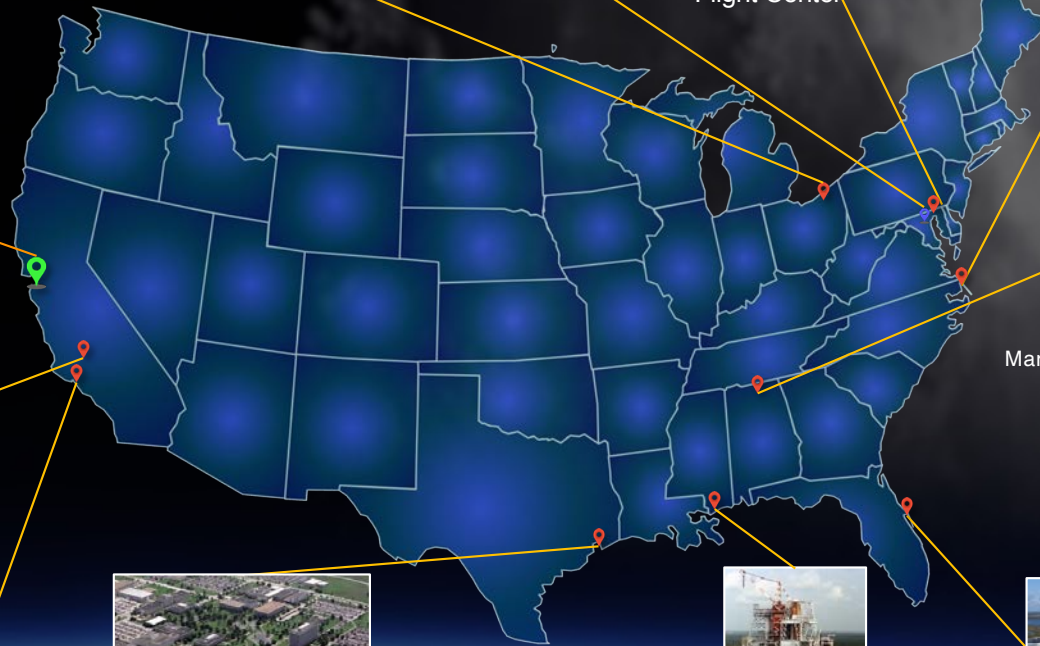

HQ

Goddard Space Flight Center

Langley Research Center

Marshall Space Flight Center

Johnson Space Center

Stennis Space Center

Kennedy Space Center

Ames Aeronautical Laboratory

NACA's Second Laboratory

Ames Today

Occupants (FY23)

*~1,300 civil servants; ~1,900 on-site contractors
~5,800 NRP workforce
~700 students (OSTEM, Pathway, NRP(CMU) & Chabot SCC)*

Real Property

*~1,900 acres; 400 acres security perimeter
5M building ft²
Airfield with ~9,000 and 8,000 ft. runways*

Budget (FY23)

~\$1B (includes reimbursable/EUL)

Core Competencies

Air Traffic Management

Entry Systems

Advanced Computing & IT

Intelligent / Adaptive Systems

Cost-Effective Space Missions

Aerosciences

Astrobiology & Life Science

Space & Earth Sciences

Major Research Facilities

Wind Tunnels

Arc Jet Complex

Simulators

Supercomputing

NASA Ames and Moffett Complex

- To advance NASA's overall mission
 - Helping NASA expedite its return to the Moon and the exploration of Mars
 - Helping NASA meet programmatic objectives
 - Providing positive financial returns
 - Keeping the Ames property useful to NASA goals
 - Helping NASA expand its base of support

- NASA Ames Campus, 406 Acres
- Eastside Airfield
 - Planetary Ventures, 1,000 Acres
 - California ANG (CAANG), 111 Acres
- NASA Research Park
 - Shenandoah Plaza Historic District, 64 Acres
 - University of California, 36 Acres
 - Mountain View Housing Ventures, 46 Acres
- Bay View – Planetary Ventures R&D, 42 Acres

Aeronautics Research

Transform aviation through revolutionary technology research, development, and transfer

Co-op Student —
Eugene L. Tu

Surface pressure contours on a B-747 configuration using the USM3D code
 $M_\infty = 0.84 \quad \alpha = 2.37^\circ$

Effect of a canard on the vortex structure and surface pressures on a generic wing-body configuration
 $M_\infty = 0.9 \quad \alpha = 12^\circ$

Information Technology

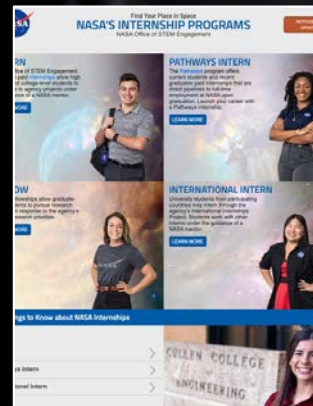

Opportunities at Ames

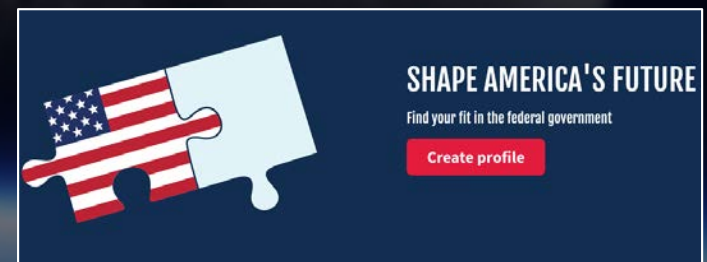

- Upcoming openings:
 - Computer Scientists
 - Engineers: Aerospace, Software, Electrical, Materials, Systems
 - Physical Scientists: Astrobiology, Biosciences, Space, and Earth Sciences
 - Business Operations (HR, Public Affairs, Procurement, IT)
- Pathways and Education Programs: Internships, Fellowships, Intern Employment and Recent Graduate Program
 - Engineering
 - Physical Scientist
 - Human Resources
 - Finance
 - Business Administration
