

# Atmospheric Absorption Correction for Sounding Rockets

Nicolas Donders<sup>1</sup> (nicolas.donders@uah.edu)

Dr. Amy R. Winebarger<sup>2</sup>, Dr. Gary P. Zank<sup>1</sup>

<sup>1</sup> The University of Alabama in Huntsville, <sup>2</sup> NASA MSFC

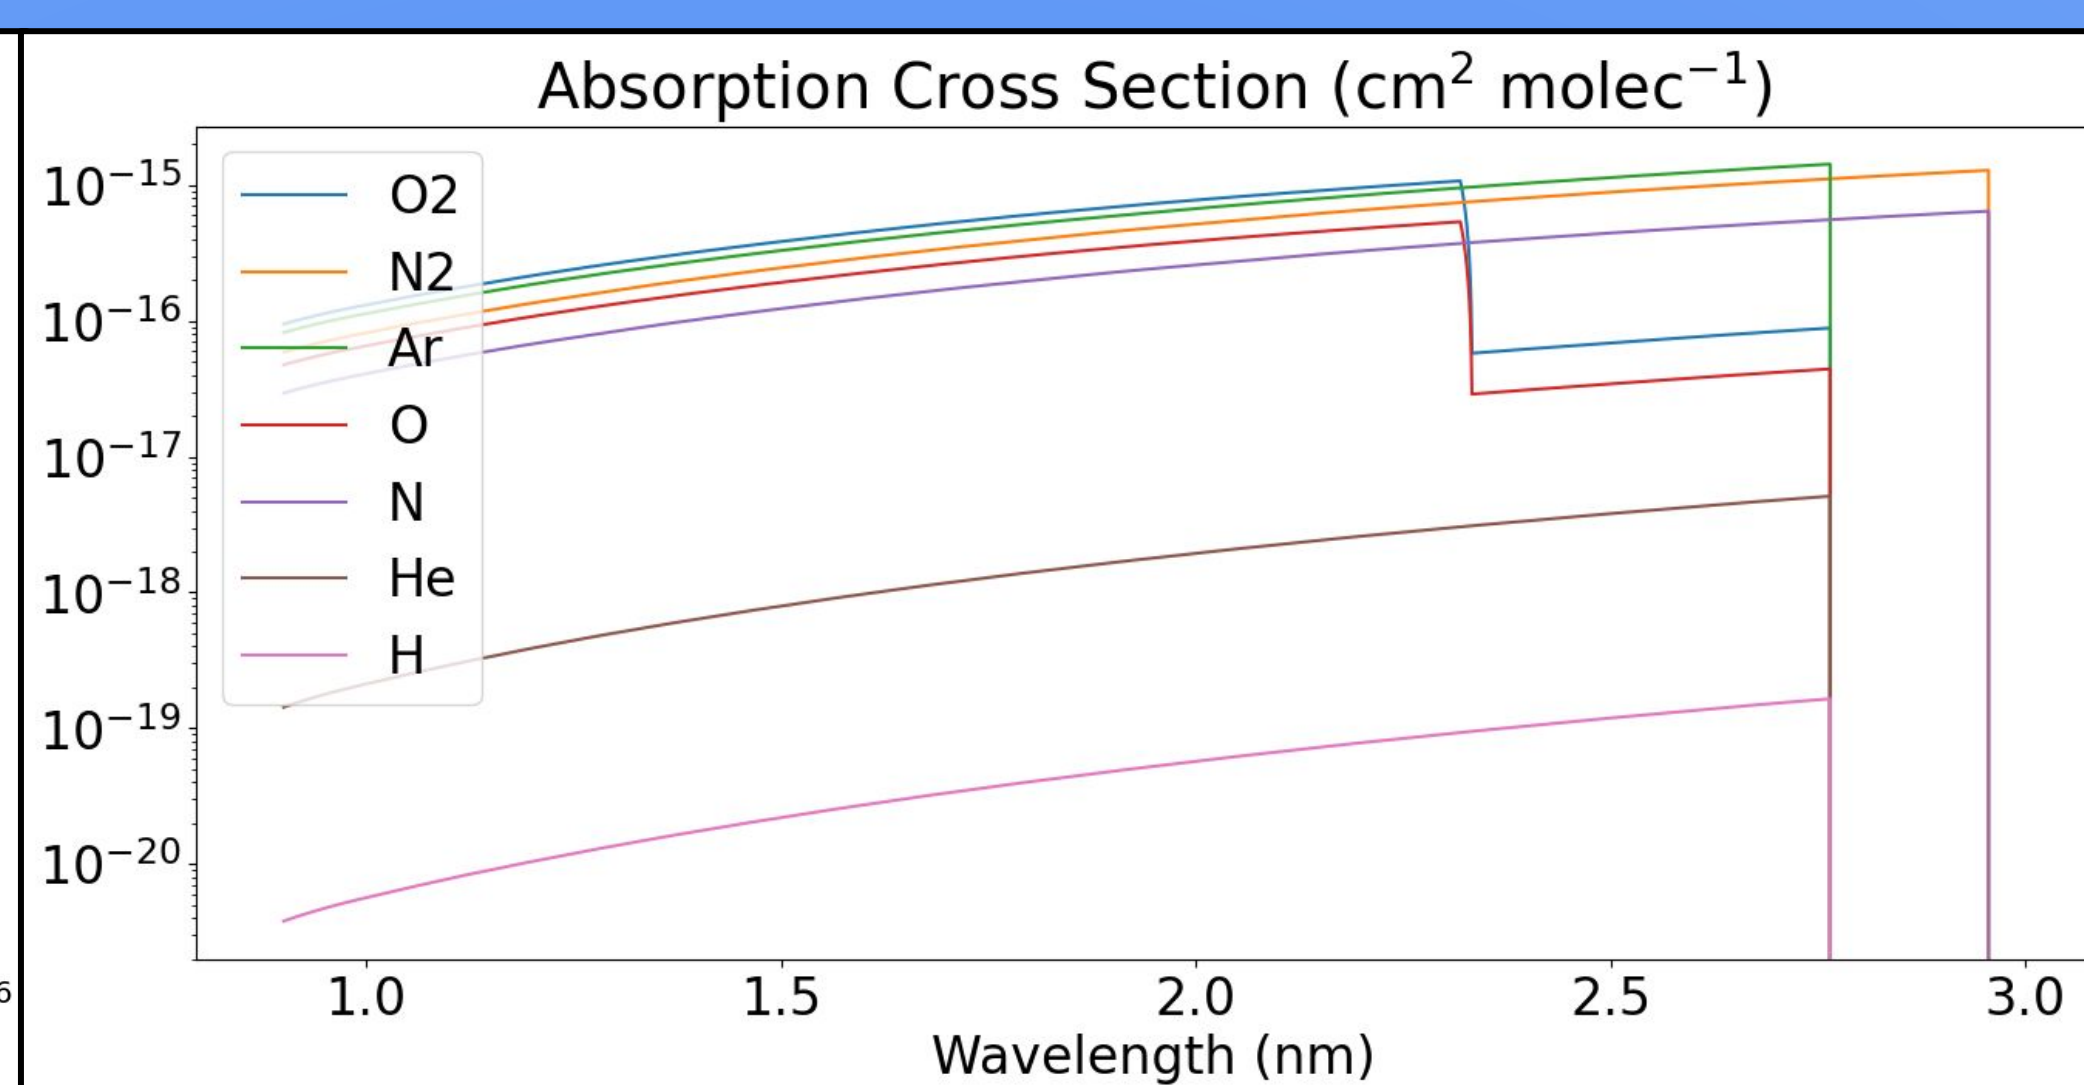

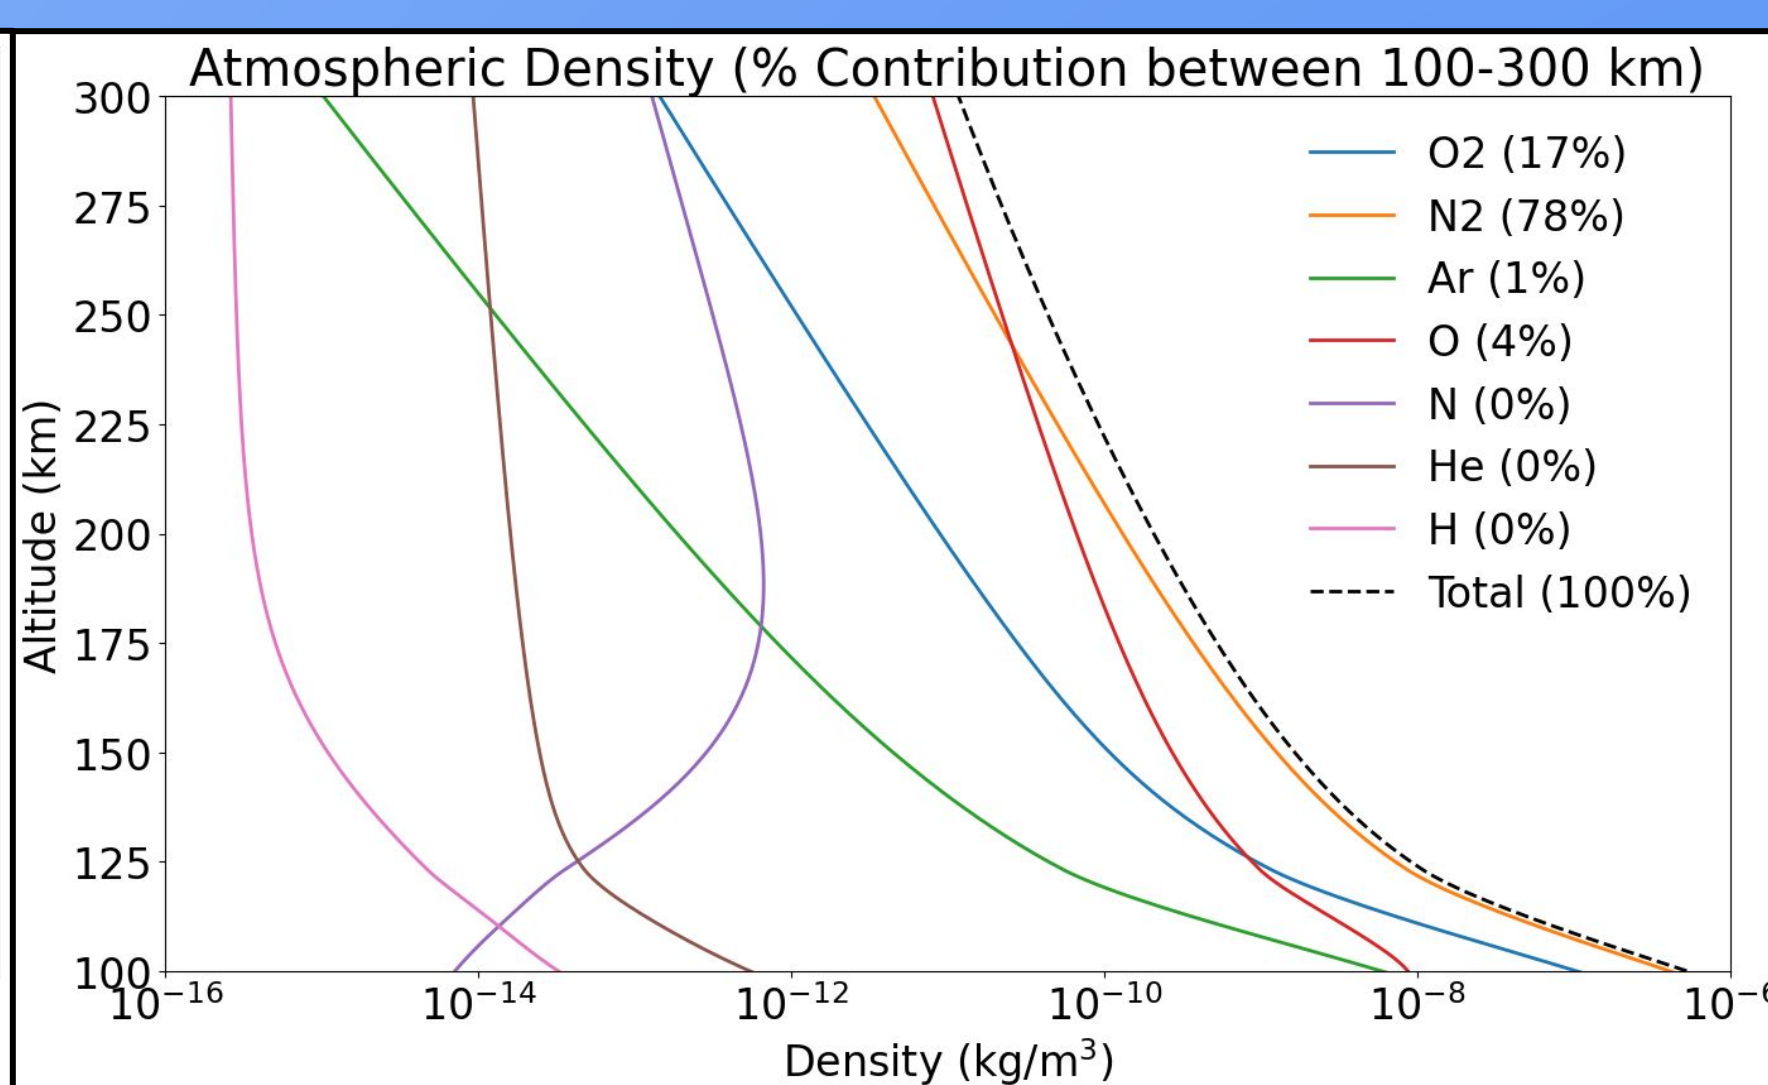

## Model Setup:

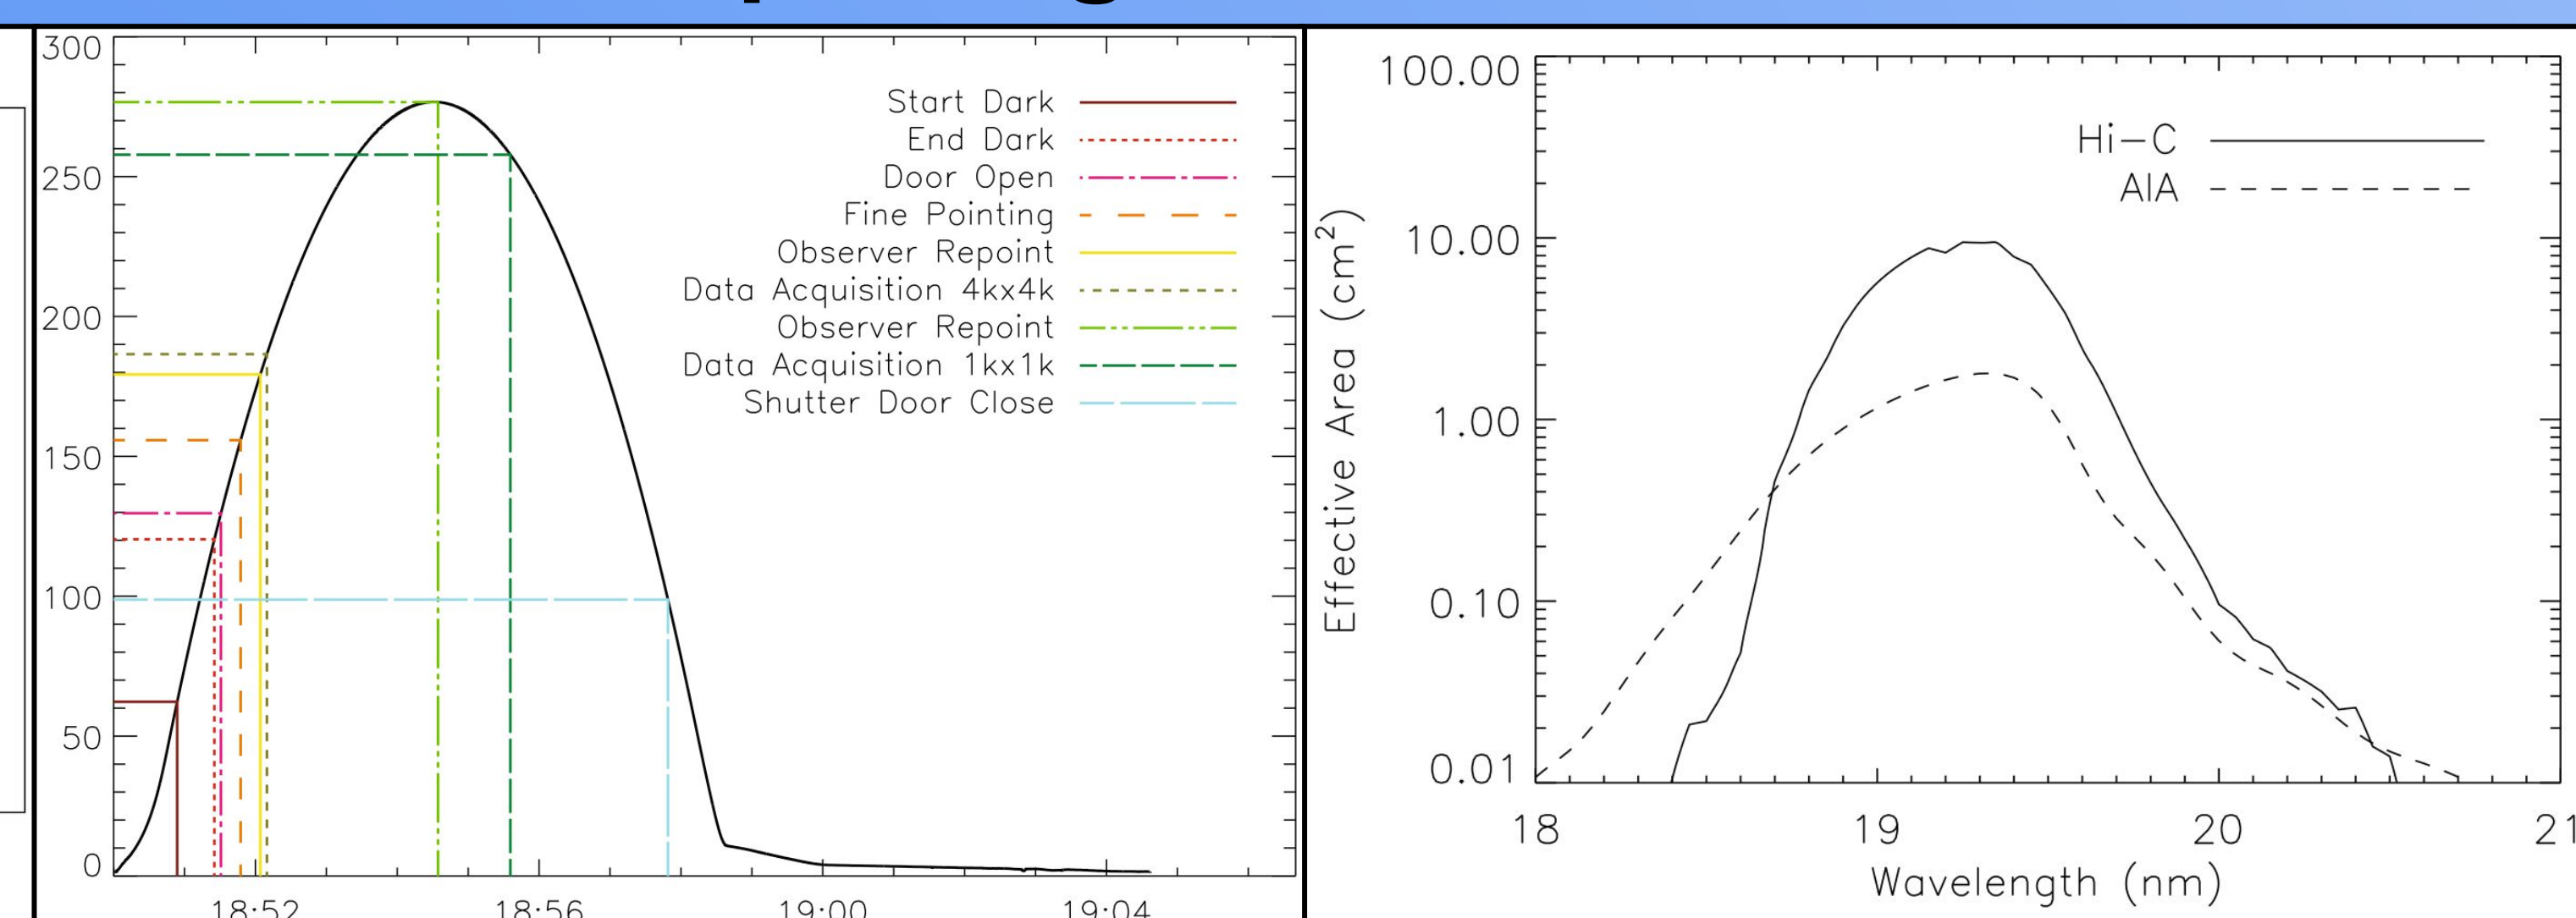

### Differential Path Length

### Example Density and Absorption Cross-Section

### Example Flight Profile/Passband

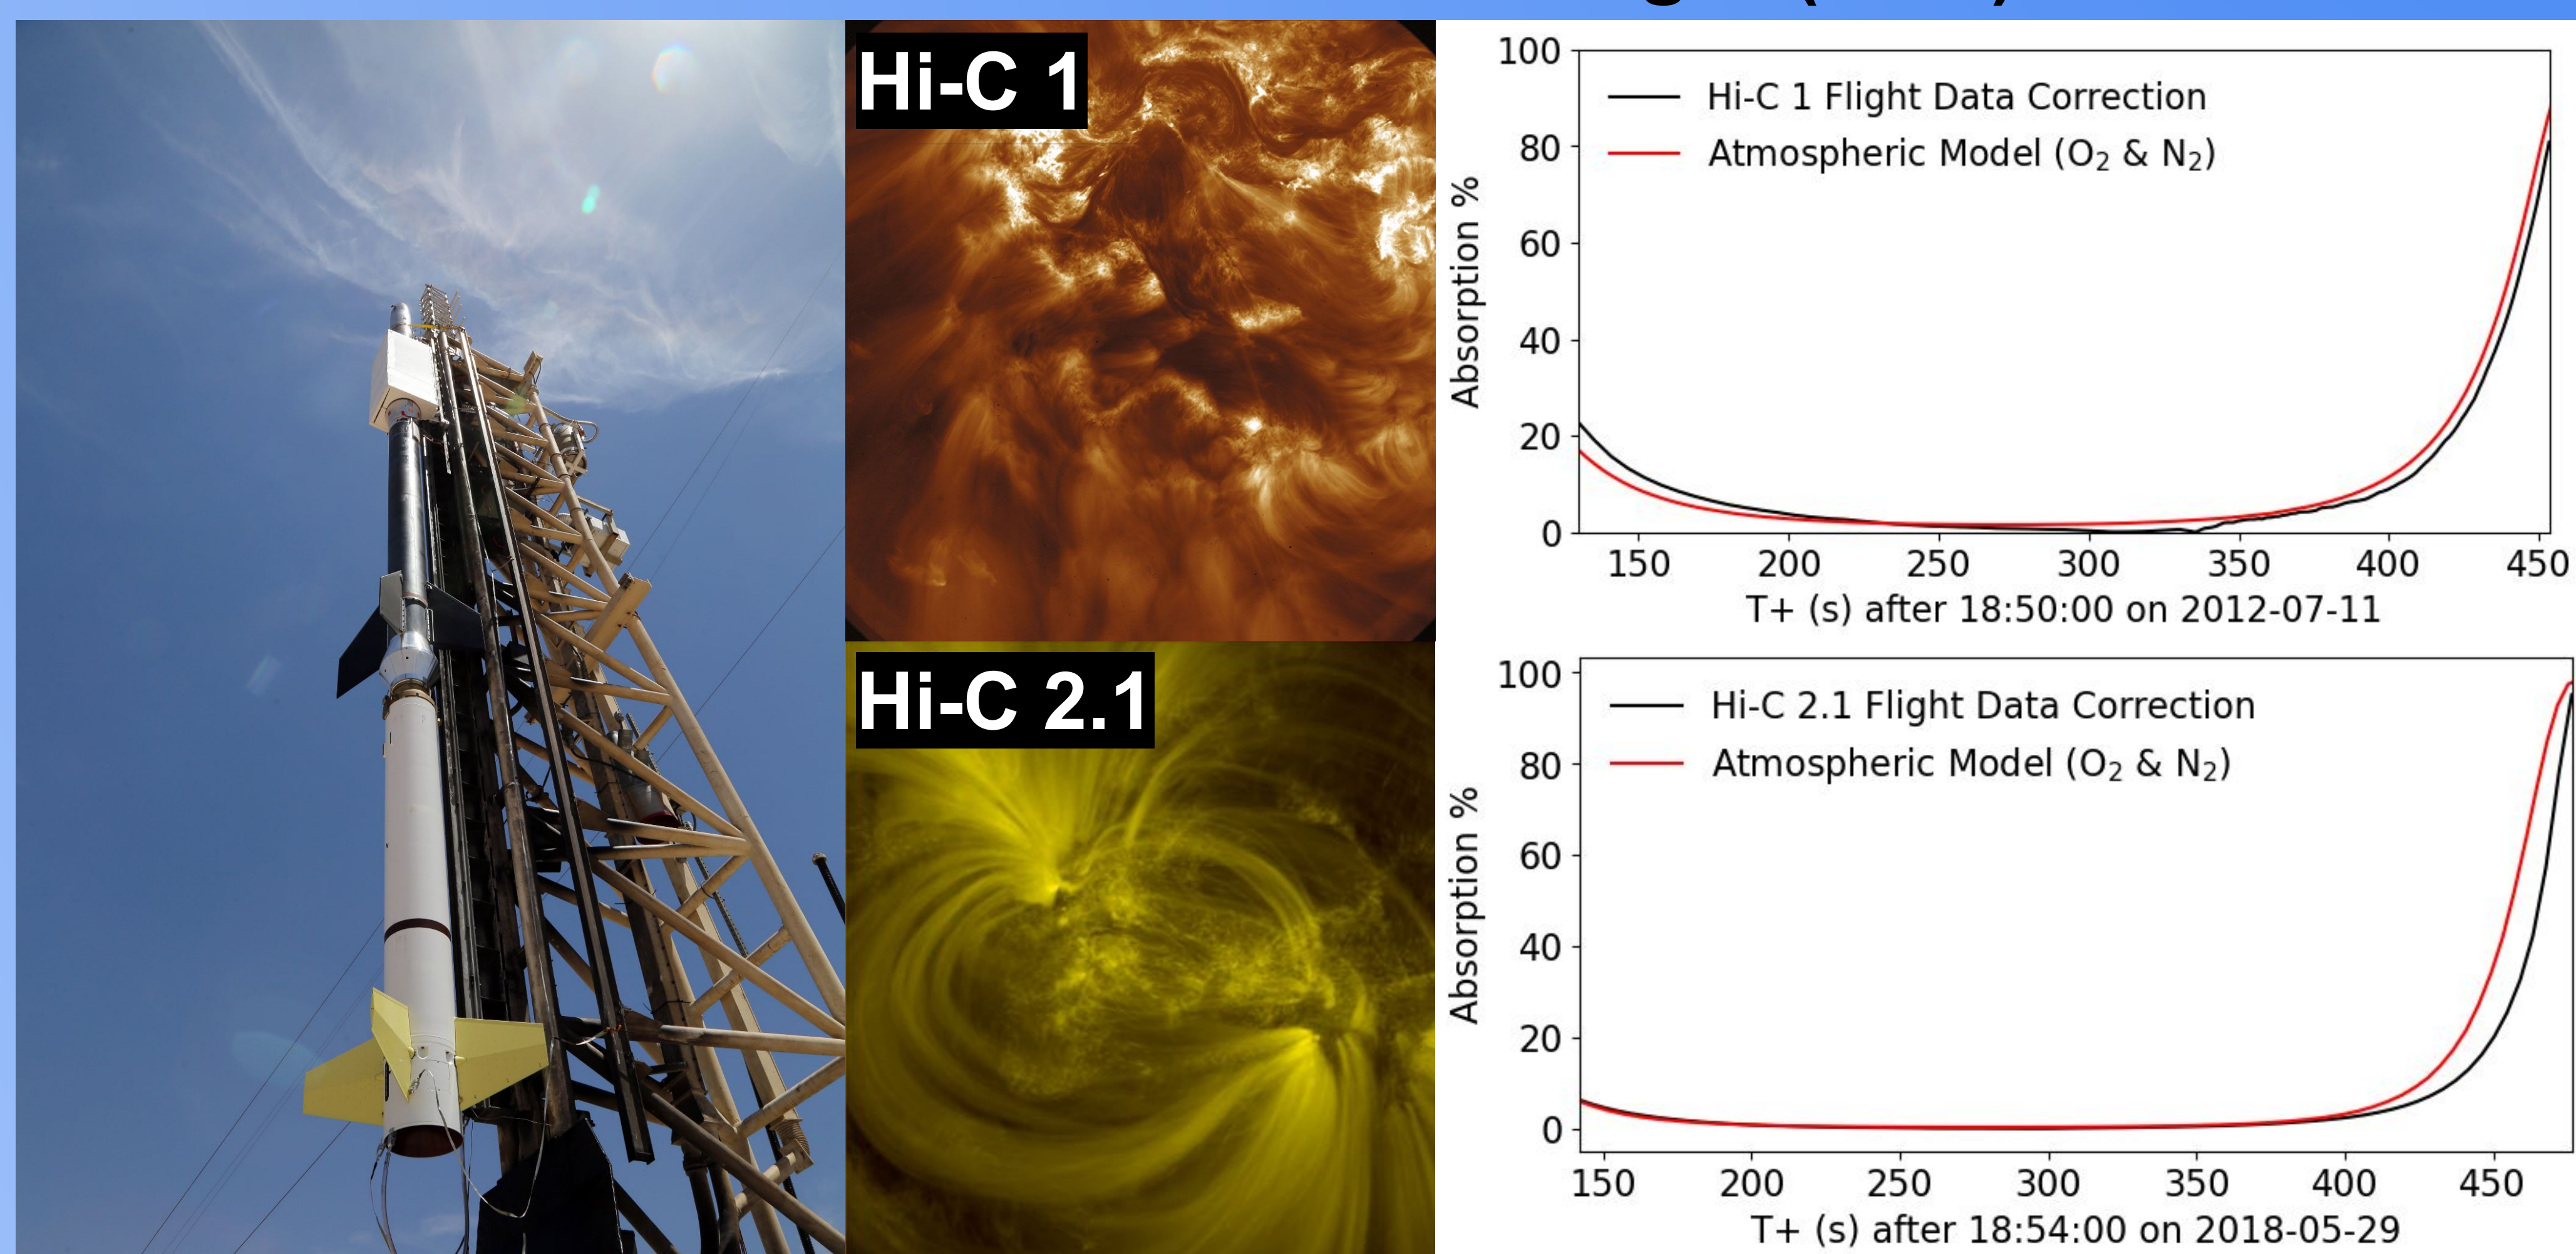

## Past Missions

### Marshall Grazing Incidence X-Ray Spectrometer (MaGIXS)

### Hi-Resolution Coronal Imager (Hi-C)

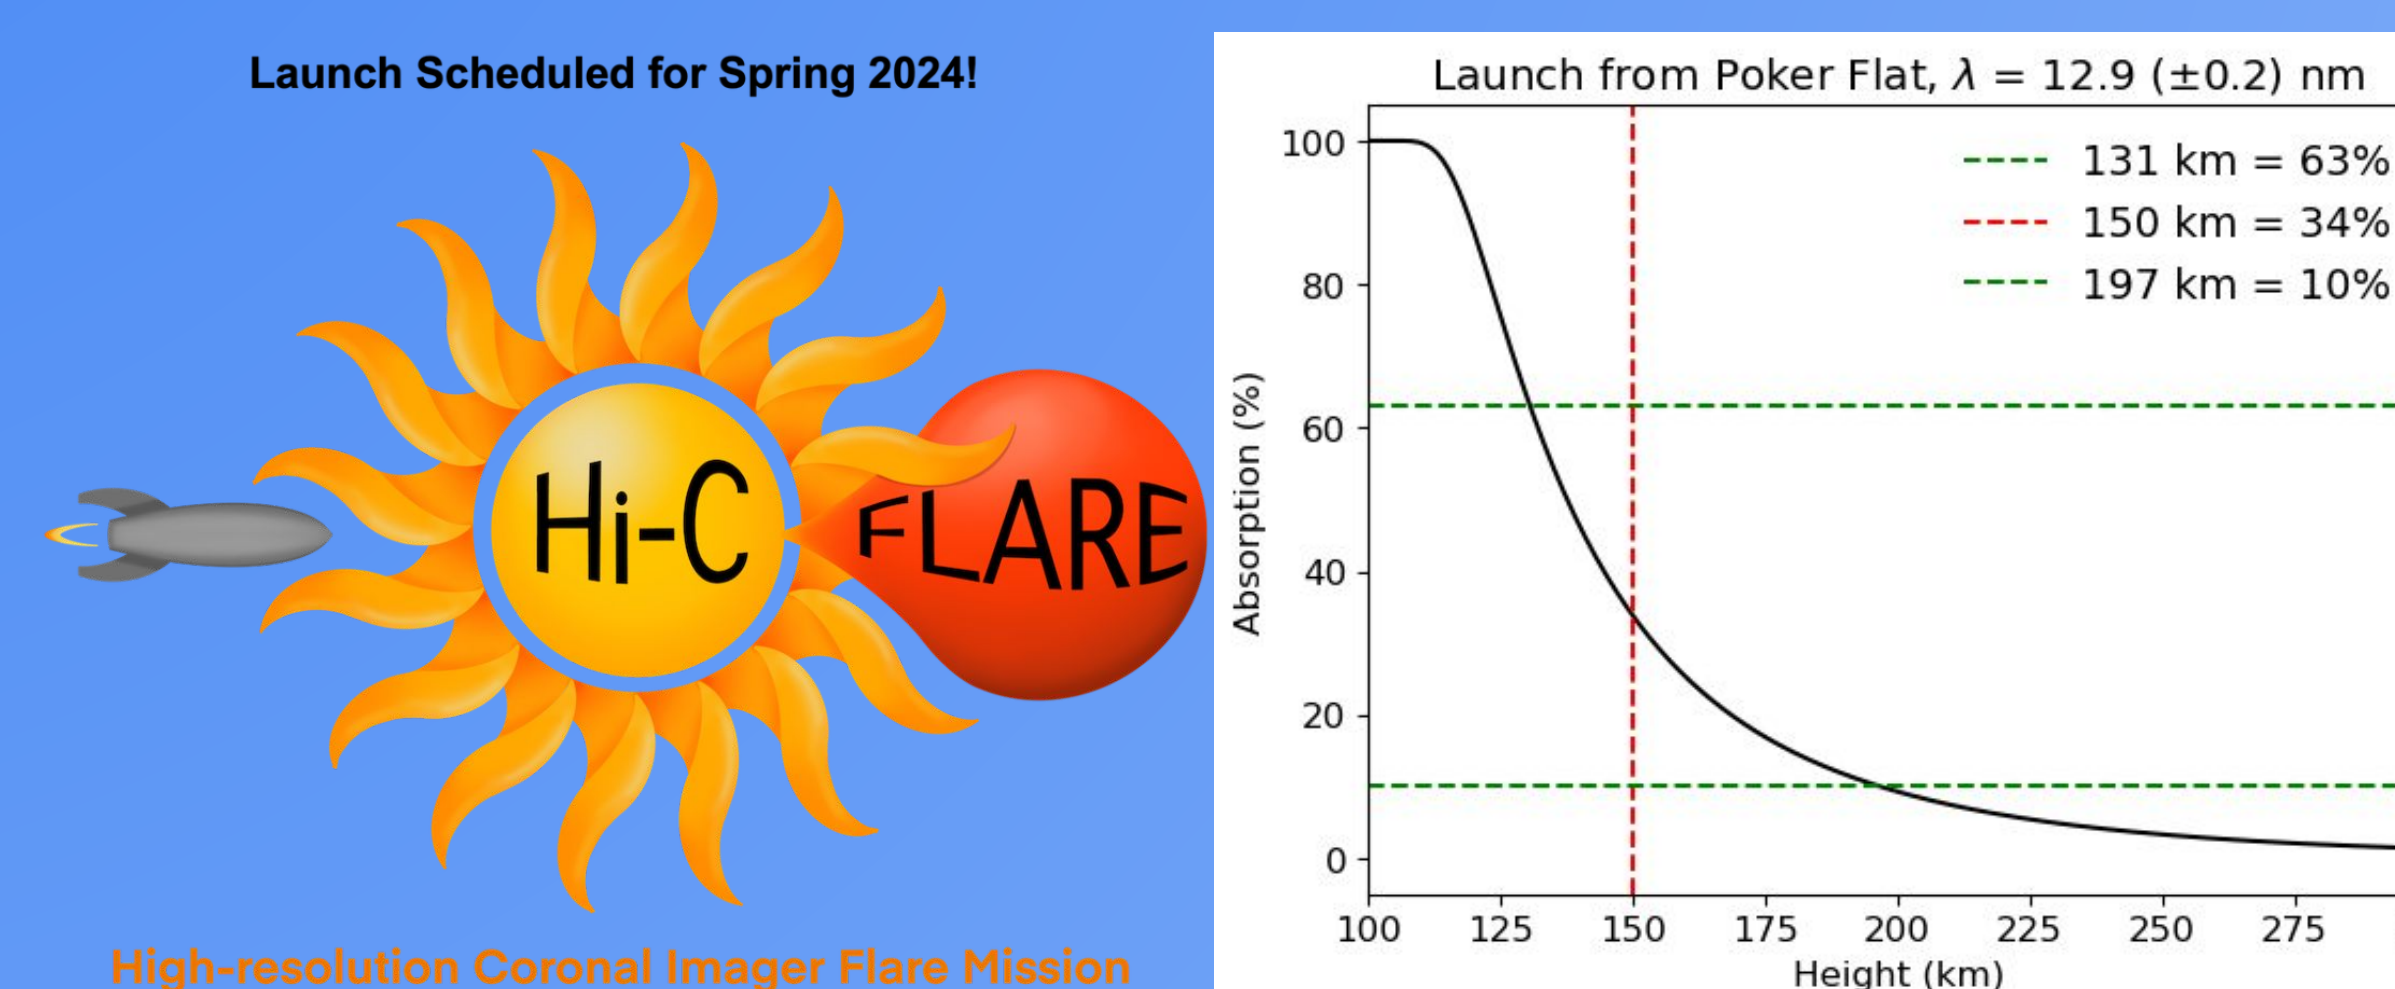

## Future Missions/Work

### Full-sun Ultraviolet Rocket Spectrograph (FURST)

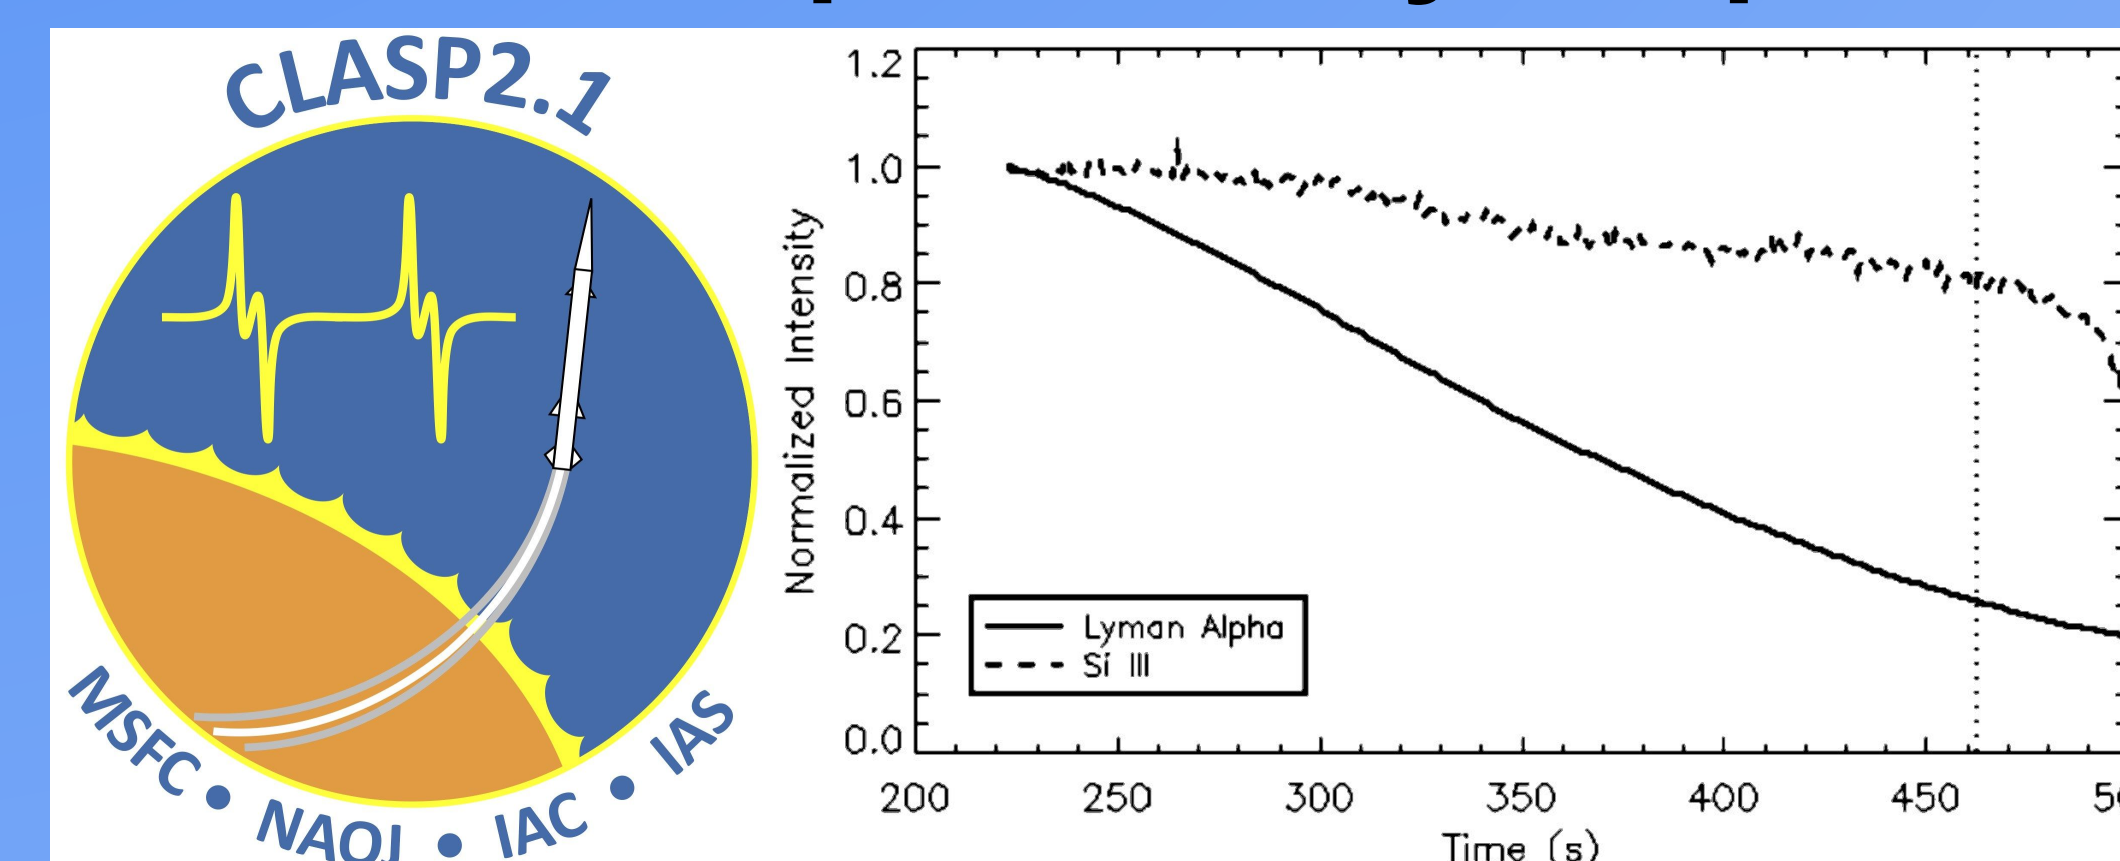

### Hi-C Flare

- Difficulties:**
- High latitude at Poker Flat, AK
  - Variable launch day/time
  - Heavy payload

### Chromospheric Layer SpectroPolarimeter (CLASP)

- Future Work:**
- Untangling absorption from water vapor
