

Data dictionary for file 'reminder_groups.csv'

Author: Nathan B. Cruze, NASA Langley Research Center

Date: 03/07/2024

This minimal data set contains anonymized study subject identifier (PARTICIPANT_ID) and non-response follow up group type (group) from the single events surveys conducted during the Quiet Supersonic Flights 2018 risk reduction study in Galveston, Texas, in November 2018.

Nonresponse follow up groups and procedures are as defined and discussed in Page et al. 2020, Section 6.2 (NASA/CR-2020-220589/Volume I). The data cleaning conventions are consistent with the assumptions of Lee et al. in the treatment of the single events survey data (Lee, Rathsam, Wilson (2020). Journal of the Acoustical Society of America. 147, doi: 10.1121/10.0001021).

Filename: reminder_groups.csv

Dimensions: 371 rows by 2 columns.

Variables: PARTICIPANT_ID, group

PARTICIPANT_ID: numeric (integer, six digits)

group: character string taking one of four values ('Email - No Reminder' (count=77); 'Email - Reminder' (102); 'Text - No Reminder' (73); 'Text - Reminder' (119)).
