The NASA Space Food formulations in this document are provided as information only and may be used at your own risk. NASA is not responsible, and assumes no liability, for the use of this information. Food production involves many variables -- in raw materials, ingredients, preparation, equipment, etc. -- such that results can vary widely. This document includes most current formulations as of March 2024. NASA does not endorse any commercial brands and therefore those used in the formulations have been redacted.

PRODUCT FORMULATION AND MATERIALS

The formulation (% by weight) for each product is in each individual table. All ingredients/raw materials shall be clean and free from objectionable foreign matter, approved for food use and have a typical odor, color, and flavor. All fresh ingredients that are used shall be sound, free from blemishes and of good quality. Materials shall be in excellent condition at time of use and from the freshest lot available and stored as recommended by the manufacturer. Ingredients/products shall be inspected to determine if damage occurred in shipment that would cause them to be unsafe for use. Damaged units shall be rejected.
