INTRODUCTION

The Quarantine Document System (QDS) is a special purpose information system designed to collect and disseminate material pertinent to the mission of the Planetary Quarantine (PQ) Office of the National Aeronautics and Space Administration. In fulfilling its responsibility\(^1\) for the administration of the NASA Planetary Quarantine Program, the PQ Office must generate, receive and process extensive quantities of information and documentation related to the following:

- Contamination constraints and quarantine requirements
- Space Flight Project plans for fulfillment of such requirements
- Analyses and studies related to the establishment of quarantine requirements and to their fulfillment
- Execution of contamination and sterilization controls
- Verification that operational requirements have been met
- Compliance and certification of quarantine requirements.

To facilitate the handling of this information, the PQ Office contracted with Exotech Systems, Inc. for the design and implementation of the QDS\(^2\). The basic functions of this system are to systematize the handling of planetary quarantine related information and to provide the NASA Planetary Quarantine Officer with a continuous, up-to-date overview of the status and

---

progress of pertinent quarantine activities in flight programs. The collection is organized to facilitate rapid access in response to general and specific queries.

An important function in the successful utilization of the QDS is the indexing procedure. Indexing must be sufficiently detailed to facilitate rapid retrieval, but not so complex that information requests must be subjected to specialized interpretation before retrievals can be conducted. A simple, yet effective QDS indexing procedure has been developed based upon a thesaurus of indexing terms evolved through actual use of the system.

This report describes the QDS indexing procedure and the thesaurus of terms used for this purpose.

The QDS consists of 6 functional elements, depicted in Figure 1, and described in the following paragraphs.

ACQUISITION

Acquisition involves identification, location, and collection (of referencing) of documents pertinent to the objectives of the system. Identification is performed through periodic searches of selected listings of potential sources such as:

- Flight project files within the PQ Office
- George Washington University Biological Sciences Communication Project (GWUBSCP) abstracts
Figure 1. Operations Elements of QDS
Does Material Relate to PQ?

Yes

Is Information Pertinent to Review of any of the Following?
(a) PQ Requirement or Constraint
(b) Flight Project PQ Plan
(c) Flight Project Pre or Post-Launch Analysis
(d) Certification for Launch
(e) Request for Deviation

No

Does Material Exist in Ready Reference File?

Yes

Discard

No

Catalog, Index and Store

Figure 2. Acquisition Criteria
Exotech Systems, Inc. PQ files

American Institute of Biological Scientists (AIBS) Abstracts for Spacecraft Sterilization Seminars

Planetary Quarantine Advisory Panel (PQAP) meeting notes

PQ Office contractor reports.

The acquisition criterion presented in Figure 2 is used to screen the collected material for retention. Acquisition decisions and status are indicated by means of stamps (see Figure 3) applied to the upper right hand corner of the documents. Copies are made as necessary and collected for entry into the QDS.

Figure 3. Acquisition Accounting
CATALOGING

Documents selected for inclusion in QDS are cataloged in accordance with standard library practice. Accession numbers are assigned in numerical sequence. A listing is presented as Appendix A.

INDEXING

Indexing is performed in accordance with the procedure described in the following section. The assigned index terms are noted prior to document storage, and maintained in the retrieval request file with the accession numbers of the documents to which each term applies.

The thesaurus of keywords was developed through system use; i.e., each request made for information was screened to identify the terms and types of terms used by the requester. The thesaurus which was evolved has seven broad categories of terms; viz.;

- Medium or Format
- Originator
- Recipient
- Characteristics of content (purpose, status, etc.)
- Related flight projects and planets
- Associated places, organizations, etc.
- Subject Matter
Normally, at least one keyword is assigned from each category; often several are employed, especially in the last three categories cited.

The complete listing of terms currently employed is presented in Appendix B. No attempt has been made to develop an hierarchical arrangement for the subject matter category terms, which are listed in alphabetical order.

STORAGE

Documents are stored in three-ringed loose-leaf binders in a reserved area of the Exotech Systems offices on School Street, S.W. Arrangement is in numerical order by accession number. Withdrawals are carefully controlled; when extensive use is anticipated, copies are supplied.

RETRIEVAL

Document retrieval is effected through the catalog (by accession number, author or corporate author, title, subject) or by searching the keyword index terms. The choice depends upon the extent of identification available at the time of inquiry. Document requests are referred to the designated QDS retrieval operator, who records the request and conducts the search.

A significant aspect of the retrieval process is the interpretation of the request in a form commensurate with quick response to the requester. To
To ensure rapid and responsive retrieval, we have assigned this task to a member of the Exotech Systems, Inc. professional staff who is knowledgeable in the planetary quarantine program.
APPENDIX A

A Complete Listing of the Collection

United States space science program. Report to COSPAR. May 1968. 154 p., with 3 appendices. 11th Meeting, Tokyo, Japan.

Contents: U.S. organization and facilities; international activities; astronomy (stellar, solar, and planetary); particles and fields; upper atmospheric physics; earth sciences; life sciences; technological development; satellite and rocket launchings, 1967; planned launches for 1968; bibliography on space sciences, 1967.

Keywords: COSPAR, Space Science Board, Tokyo, Report, ETO

California Institute of Technology, Pasadena, California, Jet Propulsion Laboratory.

Preliminary flight path analysis orbit determination and maneuver strategy, Mariner Mars 1969. February 12, 1968. 10 Sections Project Document 138; 605-58

Contents: Trajectories; Aiming Point Selection Strategies; launch phase considerations; spacecraft maneuver analysis, considerations; orbit determination characteristics, introduction to; orbit determination accuracy, pre-maneuver; orbit determination accuracy, post-maneuver; orbit determination accuracy, encounter; orbit determination, special studies in.

Keywords: Mariner Mars 1969; Orbit; micrometeoroid dislodgement; efflux ejecta; JPL; Report; Maneuver
PQ-3

California Institute of Technology, Pasadena, California, Jet Propulsion Laboratory. Preliminary flight path analysis orbit determination and maneuver strategy, Mariner Mars 1969
250 p. Project Document 138, Appendix; 605-58

I Author II Title III Project Document, Appendix IV NASA Contract no. NAS7-100

Keywords: Mariner Mars 1969; Orbit; micrometeoroid dislodgement; efflux ejecta; JPL; report; maneuver

PQ-4

California Institute of Technology, Pasadena, California, Jet Propulsion Laboratory.
9 Sections, with 3 appendices. Project Document 610-18, Part 1

Martin Marietta Corporation, Denver, Colorado, Denver Division.
Invitation of Viking 73 planetary quarantine working group meeting.
1 p.

Martin Marietta Corporation, Denver Division Letter from
A. A. Rothstein, Manager Planetary Quarantine to NASA Headquarters,
Planetary Quarantine Office (Mr. L. B. Hall)

I Author II Title III MMC Letter

Keywords: Martin Marietta Corporation; Planetary Quarantine Working
Group; Meeting; Agneda; Viking; minutes

PQ-78

American Institute of Biological Sciences, Washington, D. C.
Review: Viking planetary quarantine plans.
3 p.

American Institute of Biological Sciences, Washington, D. C.,
Memorandum from Mary Frances Thompson-Coordinator, Special Science Pro-
jects to Viking Consultants, Dec. 5, 1969

I Author II Title III AIBS Memorandum

Keywords: AIBS; Planetary Quarantine Plan; Review Schedule; (Viking)
    memo
Exotech Systems, Inc., Washington, D. C.
July 22, 1970.

Lester D. Shubin, Senior Scientist, concerning Re: NASw-2062,
July 22, 1970

I Author: II Title: III Exotech Systems, Inc., Letter

Keywords: Organic Inventory; Principal Investigators; Letter;
Questionnaire; Shubin; request

COSPAR, Panel on Planetary Quarantine.
COSPAR abstracts at Seattle meeting. March 5, 1971.
COSPAR, Panel on Planetary Quarantine, Abstracts at Seattle Meeting, March 5, 1971

I Author: II Title: III COSPAR Abstracts

Keywords: COSPAR; Memorandum; Seattle; Paper; Approval; presentation; Neill
Mitchell, R. T.
Errata to preliminary flight path analysis orbit determination and maneuver strategy Mariner Mars 1969. May 7, 1968.

Keywords: Mariner Mars '69; Mars; Jet Propulsion Lab.; orbit; memo; revision; analysis

1. NAS-NRC, Washington, D. C., Space Science Board, Memorandum, (Concerning Review of Sterilization Parameter Probability of Growth (P_g), from D. P. Kastel, Secretary to Participants, Sterilization Parameter Review: Probability of Growth (P_g), Sept. 17, 1970

Keywords: Space Science Board; Meeting; Woods Hole; P_g; Conservatism minutes; Kastel; draft
PQ-83

National Aeronautics and Space Administration, Washington, D. C.,
Office of Space Science and Applications.
Viking project document, M73-109-0. March 5, 1969.
1 p. NASA/Washington Viking Project Document Memorandum, from
SB/Director to SL/Director, March 5, 1969

I Author II Title III Memorandum(NASA/Washington)

Keywords: Planetary Quarantine provisions; (Viking); Flight Project
Document; Approval; memo; Reynolds

PQ-84

Martin Marietta Corporation, Denver, Colorado, Denver Division.
Contract NAS1-9000, Meeting of planetary quarantine working group.
March 5, 1970.
1 p. with 2 Enclosures Martin Marietta Corporation, Denver
Division Minutes, March 5, 1970

I Author II Title III MMC Minutes

Keywords: Viking; MMC; meeting; PQWG; minutes
PQ-85

Exotech Systems, Inc., Washington, D.C.

Keywords: Viking; Sterilization Plan; Review; Comments; Memorandum; Overkill; Exotech

IQ-86

NASA/Ames Research Center, Moffett Field, California.

Keywords: Pioneer; Planetary Quarantine Plan; Jupiter; report; analysis; Ames; model
FQ-87

Exotech Systems, Inc., Washington, D. C.

I Author II Title III ESI Memorandum

Keywords: P(N); N; Mars; COSPAR; Viking; memo; Bacon; allocation; non-landers; landers

FQ-88

National Aeronautics and Space Administration, Washington, D. C.
Trajectory acceptance and planetary quarantine certification - Mariner 1969 Mars mission. N.D.
1 p. NASA/Washington Memorandum from Orr E. Reynolds, SB/Director of Bioscience Programs to S/Associate Administrator for Space Science and Applications

I Author II Title III NASA/Washington Memorandum

Keywords: Mariner '69; Mars; Memorandum; pre-launch analysis; approval; Reynolds; certification
National Aeronautics and Space Administration, Washington, D. C.
Planetary quarantine certification of Mariner 1969 mission. N.D.
1 p. NASA/Washington Memorandum from John E. Naugle, S/Associate Administrator for Space Science and Applications to Administrator. 

Author II Title III NASA/Washington Memorandum

Keywords: Memorandum; Mariner '69; Mars; Naugle

Horowitz, N. H.

Keywords: publication; analysis; ZOND; Venus; Mars; bus deflection Horowitz; science; report; relaxation; history
PQ-91

NASA/Langley Research Center, Hampton, Virginia.
Planetary quarantine working group meeting of January 12-13, 1970
Langley Research Center/Viking Project Office.

I. Author II. Title III. Minutes (LaRC)
PQWG

Keywords: Planetary Quarantine Working Group; Meeting; Minutes; Charter; Viking

PQ-92

Hagen, C. A.
November 20, 1970.

I-IV Authors V. Title VI. GWUBSCP Abstract

Keywords: GWUBSCP; abstract; ultraviolet = UV; sterilization; Mars; P(uv)
PQ-93

Reynolds, M. C.
Optimizing thermal and radiation effects for bacterial inactivation, by
M. C. Reynolds and D. M. Garst.
November 17, 1970.
1 p. George Washington University-Biological Sciences Communication

I Author II Title III GWUBSCP Abstract

Keywords: thermal radiation; GWUBSCP; abstract; Sandia; radiation;
sterilization

PQ-94

Pflug, I. J.
Dry heat destruction rates for micro-organisms on open surfaces, in mated
surface areas and encapsulated in solids of spacecraft hardware. Nov.
20, 1970.
1 p. George Washington University - Biological Sciences Communication
of the Open Meeting of Working Group V at the 12th Plenary Meeting of COSPAR,
Prague, 1969, p. 131-141

I Author II Title III GWUBSCP Abstract

Keywords: GWUBSCP; abstract; Minnesota; sterilization; D-value; Pflug; surface;
mated; buried
PQ-95

Martin Marietta Corporation, Denver, Colorado.

I-II Authors III Title IV GWUBSCP Abstract

Keywords: GWUBSCP; abstract; bioburden; prediction; model; JPL; MMC

PQ-96

U. S. Dept. of The Army, Frederick, Maryland, Fort Detrick.

I-VII Authors VIII Title IX GWUBSCP Abstract

Keywords: GWUBSCP; abstract; ETO; sterilization; Detrick; Phillips; tests
PQ-97

Keywords: GWUBSCP; abstract; General Electric; aseptic; maintenance; pressurization

PQ-98

Jet Propulsion Laboratory, Pasadena, California.

I-II Authors III Title IV GWUBSCP Abstract

Keywords: JPL; Mars; entry; GWUBSCP; abstract; Jet Propulsion Laboratory; facility; atmosphere; simulation
PQ-99

Puleo, J. R.

I-IV Authors V Title VI GWUBSCP Abstract

Keywords: Puleo; detection; GWUBSCP; bioburden; Apollo; Abstract

PQ-100

Sandia Laboratories, Albuquerque, New Mexico.

I-IV Authors V Title VI GWUBSCP Abstract

Keywords: GWUBSCP; thermoradiation; sterilization; Sandia; abstract
COSPAR, Panel on Planetary Quarantine.

Potentially harmful effects of space experiments from the panel on planetary quarantine. 1969.

COSPAR, Panel on Planetary Quarantine, Report to the Consultative Group, Prague, May 17, 1969

I Author    II Title    III COSPAR, PQ Panel Report

Keywords: COSPAR; Planetary Quarantine Panel; N; Prague; Planetary Quarantine Requirements; SSB; meeting; minutes; T; deflection

COSPAR, Panel on Planetary Quarantine.

Interim Report of the Panel on planetary quarantine (Item 12), by Dr. Hedén.

COSPAR, Interim Report of the Panel on Planetary Quarantine

I Author    II Title    III COSPAR Report

Keywords: COSPAR; Contamination log; Leningrad; Jovian; PQ Panel; P(g); meeting; minutes
Clarification of NHB 8020.12, paragraph 2.2.4.3.1. Sept. 2, 1970.
2 p. NASA/Washington Memorandum from SB/Planetary Quarantine Officer Lawrence B. Hall to SL/Program Manager, Mariner Mars 1971, Sept. 2, 1970

I Author II Title III NASA/Washington Memorandum

Keywords: NHB 8020.12; Memorandum; verification; MM '71; assay; sampling; PMO; clarification; order; scope; PHS

A study of the probability of deposits viable organisms on Mars during the Mariner 1964 mission.

I Author II Title III NASA/Washington Letter-Report

Keywords: SSB; MM '64; pre-launch analysis; impact; Mars; Newell
FQ-105

National Aeronautics and Space Administration, Washington, D. C.
May 8, 1969.

I Author II Title III NASA/Washington Letter

Keywords: SSB; MM '69; Mars; post-launch analysis report; letter; transmittal

FQ-106

California Institute of Technology, Pasadena, California, Jet Propulsion Laboratory.
Mariner Venus 67 prelaunch analysis of contamination probability, by Norman R. Haynes.
May 1, 1967.
23 p. Jet Propulsion Laboratory, Pasadena, California, JPL Project Document 123

I-II Authors III Title IV JPL Document

Contents: Mathematical Model; Contaminating Venus, probability of; Mission profile; accidental vehicle impact, probability of; spacecraft ejecta contaminating Venus, probability of

Keywords: MV '67; prelaunch analysis; Jet Propulsion Laboratory; report
National Aeronautics and Space Administration, Washington, D. C.,
Office of Space Science and Applications,
5 p. NASA/Washington Memorandum, from Orr E. Reynolds, Direc-
tor, Bioscience Programs, Office of Space Science and Applications to
Mr. George Derbyshire, Secretary-Space Science Board of the National
Academy of Sciences, Washington, D. C., Jan., 1969

I Author II Title III NASA/Washington Memorandum

Keywords: D values; letter; status; SSB; P_r; P_g; letter; Reynolds; Derbyshire

National Aeronautics and Space Administration, Washington, D. C.,
Office of Space Science and Applications.
2 p. NASA/Washington, Memorandum from Lawrence B. Hall, Lunar and
Planetary Quarantine Officer, Bioscience Programs, Office of Space Science
and Applications to SL/Director, Jan., 1969

I Author II Title III NASA/Washington Memorandum

Keywords: Memorandum; SB; P_r; relaxation; Mars; environment; parameter value
PQ-109

National Aeronautics and Space Administration, Washington, D. C., Office of Space Science and Applications.
Planetary quarantine allocation for Mariner Mars '71 (MM '71) program.
1 p. NASA/Washington Memorandum from Orr E. Reynolds, SB Director, Bioscience Programs, Office of Space Science and Applications to SL/ Director, Jan., 1969

I Author II Title III NASA/Washington Memorandum

Keywords: P(N); Mars; MM '71; Memorandum; SB; N; Viking; allocation; Reynolds; official

PQ-110

National Aeronautics and Space Administration, Washington, D. C., Office of Space Science and Applications, Bioscience Programs.
Early preliminary Viking '73 schedule.
Feb. 18, 1969.
1 p. NASA/Washington Memorandum, from SB/Donald C. Fox, Sterility Control Officer to SB/Lawrence B. Hall, Feb., 1969

I Author II Title III NASA/Washington Memorandum

Keywords: Viking; Memorandum; SB; Schedule; contractor; procurement; Fox
PQ-111

I Author II Title III NASA/Washington Memorandum

Keywords: Sampling; Viking; Memorandum; SB; assay; agreement; LaRC

I-IV Authors V Title VI The Boeing Company Abstract

Keywords: Boeing; Test; impact; f; g

PQ-186

I-III Authors IV Title V The Boeing Company Final Report

Contents: Test I; Test II; Test III

Keywords: Boeing; test; impact; f; g
Beckman Instruments, Inc., Fullerton, California, Advanced Technology Operations.

I Author II Title III Beckman Instruments, Inc., Tech. Proposal
Contents: Technical Management; Technical Approach; Resumes; Selected References
Keywords: Beckman; proposal; Viking; L

Beckman Instruments, Inc., Fullerton, California, Advanced Technology Operations.

I Author II Title III Beckman Instruments, Inc., Addendum
Contents: Answers to NASA Questions; Beckman Annual Report; ATO Brochure
Keywords: Beckman; proposal; Viking; Meeting; LaRC
PQ-189

NASA/Manned Spacecraft Center, Houston, Texas.
Apollo interior spacecraft sampling. Dec. 11, 1970.

I Author II Title III NASA/Manned Spacecraft Center, Houston, Texas, Letter

Keywords: bioburden; Houston; Species; Apollo; sampling

PQ-190

Jet Propulsion Laboratory, Pasadena, California.
Jet Propulsion Laboratory, Pasadena, California Project Document # PD 610-18, Part I, Feb. 11, 1970

I-III Authors IV Title V JPL Project Document

Contents: Organization and Responsibilities; Probability of Contamination, Analysis Plan; Documentation; Data Treatment; Subcontractor PQ Requirements; Facilities; Schedules; New Technology

Keywords: Planetary Quarantine Plan; MM '71; Jet Propulsion Laboratory
PQ-191

Martin Marietta Corporation, Denver, Colorado, Denver Division. Viking '75 project planetary quarantine plan. August 20, 1970. 6 Sections, with appendices, tables, & figures Martin Marietta Corporation, Denver Division Coordination Draft # PL-3701009, August 20, 1970

I Author II Title III MHC Coordination Draft IV NASA Contract no. NAS1-9000

Contents: Applicable Documents; Viking Project Integration; Viking Lander Capsule System; Viking Orbiter System

Keywords: PQ Plan; Viking '75; Martin Marietta Corporation

PQ-192

I-II Authors III Title IV Exotech Systems, Inc., Paper

Keywords: SSB; Woods Hole; Meeting; Minutes; P_g
PQ-193

National Aeronautics and Space Administration, Washington, D.C., Office of Space Science and Applications.

Revision of the value of $p_g$ for Mars. Aug. 12, 1970.

1 p. NASA/Washington, Memorandum, from SB/Lawrence B. Hall, Planetary Quarantine Officer to SL/Earl Glahn, Mariner 1971 Program Manager, August 12, 1970

Keywords: Mariner '71; Mars; $p_g$; Memorandum; Woods Hole; SSB

---

PQ-194

COSPAR, Panel on Planetary Quarantine.

Sterilization and quarantine. 1967.

4 p. COSPAR, Panel on Planetary Quarantine, Report, 1967

Keywords: COSPAR; report; D values
PQ-195

NASA/Langley Research Center, Hampton, Virginia, Viking Project Office.
Viking 75 project. (Viking mission definition no. 3), by A. Thomas Young.
March 13, 1970.
37 p. NASA/Langley Research Center, Viking Project Office, Mission
Definition No. 3, M75-123-0, March 13, 1970

I-II Authors III Title IV NASA/Langley Mission Definition

Contents: Scientific Objectives; Science Requirements; Landing Sites;
Lifetime; Strategy for the Use of Two Spacecraft; Mission
Definition Schedule

Keywords: Viking; Project Plan; Langley Research Center; Science Package

PQ-196

National Aeronautics and Space Administration, Washington, D. C.
Comments on preliminary draft of Mariner Mars 1971 pre-launch
analysis of probability of planetary contamination, PD 610-18,
Part II, dated Jan. 12, 1971. NASA/Washington Memorandum, from SL/Planetary Quarantine Officer, Planetary Programs, OSSA-Lawrence B. Hall to SL/
Mariner Mars 71 Program Manager, Jan., 1971

I Author II Title III NASA/Washington Memorandum

Keywords: Planetary Quarantine Officer; Comments; Mariner; Mars; 1971; Pre-launch Analysis
PQ-197

Martin Marietta Corporation, Denver, Colorado, Denver Division.
Viking 75 lander system materials and processes plan, (coordination-copy).
July 1, 1970.
Martin Marietta Corporation, Denver Division, Coordination-Copy No. PL-3703005, July 1, 1970

I Author II Title III MMC, Denver Division Coordination-Copy

Keywords: Viking; DRL; Martin Marietta Corporation

PQ-198

Martin Marietta Corporation, Denver, Colorado, Denver Division.
7 Sections, with figures Martin Marietta Corporation, Denver Division, Coordination-Copy, Management Review Draft, No. PL-3701045, Nov. 16, 1970

I Author II Title III MMC, Denver Division Coordination-Copy

Contents: Applicable Documents; Approach to Contamination Control; Major Sources of Organic Contamination and Methods of Control; Additional Sources of Organic Contamination and Methods of Control; Other Contamination Sources and Methods of Control

Keywords: Viking; Contamination Plan; DRL; Martin Marietta Corporation
American Institute of Biological Sciences, Washington, D. C., Planetary Quarantine Advisory Committee.
Semiannual NASA spacecraft sterilization technology seminar. April, 1970.
American Institute of Biological Sciences (AIBS), Planetary Quarantine Advisory Committee, Abstracts, (Semi-Annual NASA Spacecraft Sterilization Technology Seminar, held in Atlanta, Georgia, April 15, 16, 1970)

I Author II Title III AIBS, Planetary Quarantine Advisory Committee, Abstracts

Keywords: American Institute of Biological Sciences (AIBS); Seminar; Atlanta; Agenda

Exotech Systems, Inc., Washington, D. C.
Jan., 1971.

I Author II Title III Exotech Systems, Inc., Memorandum

Keywords: Memorandum; Draft; Exotech; Comments; Mariner; Mars; 1971; Pre-launch Analysis
PQ-201

Martin Marietta Corporation, Denver, Colorado, Denver Division.

Martin Marietta Corporation, Denver Division, VIKING: Status of Viking Analyses

I Author II Title III MMC Viking Analyses

Contents: Potential Contamination Events; JPL Analyses (MM71 and Viking); MMC Analyses; Summary

Keywords: MMC; Viking; PQ; Analysis; Model; Entry; Ejecta; Recontamination; View Graphs; Planetary Quarantine Working Group

PQ-202

National Aeronautics and Space Administration, Washington, D. C.
March 26, 1970.

1 p. NASA/Washington, D. C., Letter from Lawrence B. Hall/Planetary Quarantine Officer to Mr. Samuel Schalkowsky, Director Exotech Inc., Systems Research Division, Washington, D. C., March 26, 1970

I Author II NASA/Washington, Letter

Keywords: Space Science Board; P; P; Mars; Planetary Quarantine Requirements
PQ-203

National Aeronautics and Space Administration, Washington, D. C.
Minutes of conservatism meeting.
2 p. NASA/Washington Memorandum, from SB/Planetary Quarantine Officer--Viking, to Distribution List (concerning the meeting of L. Hall, D. Fox, L. Daspit, J. Stern, R. Green, S. Schalkowsky, A. Neill and E. Bacon at NASA on Jan. 12, 1971 to discuss Conservatism in the Application of PQ Requirements)

I Author II Title III NASA/Washington Memorandum

Keywords: Memorandum; SB; Viking; Minutes; Conservatism

PQ-204

April 7, 1970.

I Author II NAS-NRS, Space Science Board Letter

Keywords: Space Science Board; PQ; Quarantine period; Mars; rate of consumption of $P_c$
PQ-205

I-II Authors III Title IV JPL Report

Contents: Mission Description; Mathematical Model; Analysis and Allocation of P; Small Population Sources

PQ-206

I Author II Title III NASA Policy Directive

Keywords: Lunar; Biological; Organic; Contamination; Policy; Directive
PQ-207

National Aeronautics and Space Administration, Washington, D. C.
Outbound planetary biological contamination control: Policy and responsibility.
Sept. 6, 1967.

I Author II Title III NASA Policy Directive

Keywords: Biological; Contamination; Policy; Directive; NASA

PQ-208

American Institute of Biological Sciences, Washington, D. C.

American Institute of Biological Sciences (AIBS), Planetary Quarantine Seminar, Abstracts, (Semi-Annual NASA Spacecraft Sterilization Technology Seminar, held in Williamsburg, Virginia, Dec. 1, 2, 1970)

I Author II Title III AIBS, Planetary Quarantine Seminar Abstracts

Keywords: Planetary Quarantine Seminar; Abstracts; Williamsburg; American Institute of Biological Sciences
PQ-209

National Aeronautics and Space Administration, Washington, D. C.,
Space Science and Applications.
7 p. NASA Report, from Homer E. Newell, Associate Administrator
for Space Science Applications, to Professor Harry H. Hess, Chairman,
Space Science Board, National Academy of Sciences, Washington, D. C.

I Author II Title III NASA Report

Keywords: COSPAR; Space Science Board; Post-launch; MM'64

PQ-210

National Aeronautics and Space Administration, Washington, D. C.
9 p. United States/NASA Report to the Space Science Board,
National Academy of Sciences, National Research Council on The
Probability of Contamination of the Planet Venus by the U. S.
Mariner 1967 Mission

I Author II Title III NASA Report

Keywords: COSPAR; Space Science Board; Post-launch; VM'67
National Aeronautics and Space Administration, Washington, D. C.
Post-launch analysis report: Mars Mariner '69.

Author: Nikander, J.
Title: Some problems posed by the Planet Venus, by J. Nikander.

Keywords: COSPAR; Space Science Board; Post-launch; MM'69

Keywords: GWUBSCP; Venus; surface; atmosphere
PQ-213

Cameron, R. E.
Bacterial growth in agar subjected to freezing and thawing, by R. E. Cameron, G. B. Blank and N. H. Horowitz.

I-III Authors IV Title V GWUBSCP Abstract

Keywords: GWUBSCP; Horowitz; Bacteria; Growth; Freezing; Thawing

PQ-214

Cornell, R. G.

I-II Authors III Title IV GWUBSCP Abstract

Keywords: GWUBSCP; contamination; models; estimation
PQ-215

Phillips, G. B.

Keywords: GWUBSCP; sampling; vacuum probe; Becton, Dickinson; NASA; Langley

PQ-216

Martin Marietta Corporation, Denver, Colorado.

Keywords: Viking; Martin Marietta Corporation; Document; Status
PQ-217

Battelle Memorial Institute, Columbus, Ohio.
1 p. The George Washington University-Biological Sciences Communication Project Abstract, from Battelle Memorial Institute on Research conducted from 1 Sept. 1968 to 30 June 1970

I-III Authors IV Title V GWUBSCP Abstract

Keywords: Battelle; Report; Spacecraft; materials; nutrient; fungicide; Abstract

PQ-218

National Aeronautics and Space Administration, Washington, D. C.
Outbound planetary biological and organic contamination control: Policy and responsibility.
3 p. NASA Policy Directive & NPD 8020.10A

I Author II Title III NASA Policy Directive

Keywords: NPD 8020.10A; Policy Directive; Directive; NASA
Exotech Systems, Inc., Washington, D. C.

I Author II Title III Exotech Systems, Inc., Memorandum

Keywords: Memorandum; Comments; Exotech; Swenson; Survivability; Entry; Jovian

---

Exotech Systems, Inc., Washington, D. C.

I Author II Title III Exotech Systems, Inc., Memorandum

Keywords: Seattle; Memorandum; Exotech; Listing; Tasks; Semi-Annual Seminar
PQ-221

NASA/GSFC, Greenbelt, Maryland.
Planetary Explorer/Venus mission. Section 7 - Planetary quarantine.

NASA/GSFC, Greenbelt, Maryland, Planetary Explorer/Venus Mission,
Report, Section 7 - Planetary Quarantine

I Author II Title III NASA/GSFC Report

Contents: Requirements; Assessment; Procedures and Facilities;
Documentation; Orbital Maneuvers; Contamination Danger

Keywords: Planetary Explorer; Analysis; Venus; Report; Goddard
Space Flight Center (GSFC)

PQ-222

Exotech Systems, Inc., Washington, D. C.
Review of Section 7 of a Report on Planetary Explorer/Venus

3 p. Exotech Systems, Inc., Washington, D. C., Memorandum,
to NASA, Code SL, March 11, 1971

I Author II Title III Exotech Systems, Inc., Memorandum

Keywords: Memorandum; Exotech; Planetary Explorer; Venus; Comments;
Analysis
PQ-223

National Aeronautics and Space Administration, Washington, D. C.
Review of section 7 planetary quarantine of a report on planetary
Planetary Quarantine Officer, to GSFC/Paul Marcotte THRU SL/Ronald
Toms, March 11, 1971

I Author II Title III NASA/Washington, Memorandum
Keywords: Memorandum; SL; Planetary Explorer; Venus; Comments; Phase A

PQ-224

California Institute of Technology, Pasadena, Calif., Jet Propulsion Lab.
March 9, 1971.
2 p. Jet Propulsion Lab., Pasadena, Calif., Letter from Dan
Schneiderman, Manager/Mariner Mars 1971 Project, to SL/Earl W. Glahn,
MM 71 Program Manager, NASA/Washington, March 9, 1971 and Enclosure
date March 4, 1971

I Author II JPL Letter and Enclosure
Keywords: Letter; JPL; MM '71; Pre-launch Analysis; Revision
PQ-225

NASA/Ames Research Center, Moffett Field, California.

7 p. NASA/Ames Research Center, Moffett Field, California, Document No. PC-204, Revision no. 1, Jan. 15, 1971

I Author II Title III NASA/Ames Document

Contents: Scope; Applicable Documents; Planetary Quarantine Requirements; Activities Plan; Contractor Planetary Quarantine Requirements; Documentation; Data Treatment

Keywords: Ames; Pioneer; Planetary Quarantine Plan; Jupiter

PQ-226

Jet Propulsion Laboratory, Pasadena, California.

1 p. Jet Propulsion Laboratory, Pasadena, California, Abstract, Feb., 1971

I-III Authors IV Title V JPL Abstract

Keywords: Jet Propulsion Lab.; Outer Planet Planetary Quarantine; Seattle; COSPAR; Abstract
Sandia Laboratories, Albuquerque, New Mexico.
April 8, 1971.
1 p. Sandia Laboratories, Albuquerque, New Mexico, Letter from H. D. Sivinski, Manager, Planetary Quarantine Dept. to Lawrence B. Hall, Planetary Quarantine Officer, NASA Headquarters, April 8, 1971

Author II Sandia Laboratories Letter

Keywords: Sandia; Letter; Seattle; Title; COSPAR; Papers

Author II U. S. Dept. of Health, Education, and Welfare, Letter

Keywords: Favero; Letter; Phoenix; Seattle; COSPAR; Paper

1 p. NASA/Washington, Letter, from Lawrence B. Hall, Planetary Quarantine Officer to Dr. Wolf Vishniac, Dept. of Biology, University of Rochester, April 14, 1971

Keywords: NASA; Hall; Letter; Seattle; Vishniac; COSPAR

---

1 p. NASA/Washington, Memorandum, from Earl W. Glahn SL/Manager, Mariner Mars '71, to SL/Chief, Planetary Quarantine, April 15, 1971(with 2 attachments)

Keywords: Memorandum; NASA/SL; Mariner Mars '71; Revision A; Planetary Quarantine Plan
PQ-231

The Boeing Company, Seattle, Washington.

I-III Authors IV Title V The Boeing Co., Abstract

Keywords: JPL; COSPAR; Seattle; Abstract; D. M. Taylor; Erosion; Release

PQ-232

Jet Propulsion Laboratory, Pasadena, California.

1 p. Jet Propulsion Laboratory, Pasadena, California, Abstract, Feb., 1971

I-III Authors IV Title V JPL Abstract

Keywords: COSPAR; Seattle; Abstract; JPL; Mansour; Recontamination
PQ-233

Jet Propulsion Laboratory, Pasadena, California.
A re-evaluation of material effects on microbial release from solids,
by D. M. Taylor, S. J. Fraser, E. A. Gustan, R. L. Olson, and R. H.
Green.  
Feb., 1971.
1 p. Jet Propulsion Laboratory, Pasadena, California, Abstract,
Feb., 1971

I-VI Authors VII Title VIII JPL Abstract

Keywords: P$_e$; Jet Propulsion Laboratory; COSPAR; Seattle; Abstract;
Taylor

PQ-234

Naugle, John E.
1 p. Naugle, John E., Letter from, to Mr. Charles H. Townes, Chairman,
24, 1970

I Author II Letter from John E. Naugle

Keywords: NASA; Space Science Board; P$_e$; Letter; Woods Hole
PQ-235

National Aeronautics and Space Administration, Washington, D.C., Office of Space Science and Applications.
1 p. NASA/Washington, Memorandum from Donald G. Fox, Ph.D, Planetary Quarantine Program Officer to (See Distribution List), attached, Sept. 1, 1970

I Author II Title III NASA/Washington Memorandum

Keywords: NASA/SI; Memorandum; Fox; Review; Viking; Planetary Quarantine Plan; Schedule

PQ-236

February 8, 1971.

I Author II U.S. Dept. of Health, Education, and Welfare, Letter

Keywords: Favero; Phoenix; Letter; Buried load; grinder
PQ-237

I Author II NASA/Washington, Letter

Keywords: Letter; NASA/SC; Policy; Viking; Allocation; UV

PQ-238

I Author II Title III Martin Marietta Presentation

Keywords: Martin Marietta; Presentation; Recontamination; Viking; Bioshield Release; P<sub>C</sub>; UV; Langley
PQ-239

National Aeronautics and Space Administration, Washington, D.C., Office of Space Science and Applications.

1 p. NASA/Washington, Memorandum, from SL/Planetary Quarantine Officer Lawrence B. Hall, to SL/Program Manager, Mariner Mars '71 and SL/Program Manager, Viking '75, Jan. 8, 1971

I Author II Title III NASA/Washington, Memorandum

Keywords: NASA/SL; Memorandum; $P_G$; Mars

---

PQ-241

National Aeronautics and Space Administration, Washington, D.C.

Outbound spacecraft: Basic policy relating to lunar and planetary contamination control. Sept. 6, 1967.

I Author II Title III NASA Policy Directive

Keywords: Biological; Contamination; Policy; Directive; National Aeronautics and Space Administration
PQ-242

Estimation of encapsulated (buried) microbial burden, by Samuel Schalkowsky.

I-II Authors III Title IV Citation

Denver; buried burden; Exotech; estimation; PQAP

PQ-243

Probability of microbial release, by Samuel Schalkowsky.

I-II Authors III Title IV Citation

Denver; PQAP; Pr; Exotech; Viking; Mars
PQ-244

1 p. Memorandum to Lawrence B. Hall, Chief, PQO/NASA from S. Schalkowsky.

I-II Authors III Title IV Memorandum

Memorandum; Exotech; Mariner Mars '71; post launch analysis; review

PQ-245

California Inst. of Technology, Pasadena, Calif., Jet propulsion lab.
Mariner Mars 1971 post-launch analysis of compliance with COSPAR recommendations,
20 p. includes figures and tables. JPL Report.

I-III Authors IV Title V Series note

Mariner Mars '71; post launch analysis; Jet Propulsion Lab; Mars
California Inst. of Technology, Pasadena, Calif. Jet propulsion lab.

a. Results of microbiological assay of MM71-2 (ESF Assay 1), by A. Hoffman.

b. Results of encapsulation microbiological assay of MM71-1, by A. Hoffman.

   JPL Interoffice Memo. IOM 2945-2290, May 18, 1971.

d. Revised spacecraft ejecta efflux estimates for Mariner 71-2, by A. Hoffman.

Levinthal, Elliott

Viking '75 project mission design requirements, objectives and constraints, document no. IR-3720055, letter from E. Levinthal of Stanford University Medical Center, Dept. of Genetics to C.H. Robbins, NASA/Langley Research Center, May 21, 1971.

2 p.
PQ-248

California Inst. of Technology, Pasadena, Calif. Jet propulsion lab.

Mariner Mars 1971 spacecraft contamination control plan, by M. R. Christensen.

I-II Authors III Title IV Series note

Jet Propulsion Lab.; report; Mariner Mars; contamination control; cleaning

PQ-249

Martin Marietta, Denver, Colo. Denver division, Aerospace group.

Viking 75 project planetary quarantine documentation integration and control status.

6 Sections [PQ Milestone Document; PQ Document Tree; PQ DRL's; PQ DRD's; PQ Document Schedules; PQ Pert Net]. 1971

I Author II Title

Viking; MMC; report; documentation control; PQ schedule; milestones
PQ-250

Martin Marietta Corp., Denver, Colo. Denver div., Viking project.
Viking '75 Project planetary quarantine plan. Draft document.
6 Sections, 2 appendices; figures & tables. DRL Control no. PO-0022, report on contract

I Author II Title III Series note IV Contract

PQ Plan; Viking; Langley; draft

Contents: I. Introduction; II. Applicable Documents; III. Viking Project Integration;
IV. Viking Lander Capsule System; V. Viking Orbiter System; VI. Viking
Launch Vehicle System, Appendix A. Planetary quarantine status (PQS) and
directory (PQD) systems and Appendix B. Planetary quarantine plan glossary.

---

PQ-251

Martin Marietta Corp., Denver, Colo., Denver div., Viking project.
Viking lander bioburden tabulation.

I Author II Title

Viking; Langley; burden; prediction; buried; MMC; presentation
PQ-252

Letter to Dr. Hugh Odishaw, NAS-NRC, Space Science Board, by Lawrence B. Hall.

I-II Authors III Title IV Subject-Developments of NASA PQ Program. V Series note
Space Science Board; letter; NASA/Hdqts.; PQ status; Odishaw

PQ-253

General Electric vu graphs on Viking Project Support Services (VPSS). n.d.

I Title II Series note
General Electric; data; management; Viking; Langley
PQ-254

Martin Marietta Corp., Denver, Colo. Denver div., Viking project
Planetary quarantine requirements, by A.A. Rothstein.
23 p. [Charts and illustrations] n.d.

I-II Authors III Title IV (Period of Quarantine: 20 years, beginning Jan. 1, 1969)
MMC; Viking; presentation; Langley; PQ requirements; constraints; vu graphs

PQ-257

Comments on draft Viking planetary quarantine plan, by Lawrence B. Hall.

I-II Authors III Title IV Series note

NASA/Hdqts.; PQ plan; Viking; comments; memorandum
PQ-258

I-II Authors III Title IV Series note

NASA/Hdqts; memo; Viking; sterilization plan; comments; PQAP

PQ-259

I-II Authors III Title IV JPL, Schneiderman

NASA/Hdqts.; Mariner Mars '71; assay plan; approval; JPL; letter

I-II Authors III Title IV Series note

NASA/Hdqts.; Mariner Mars '71; assay plan; comments; approval; memo.

I-II Authors III Title

Jet Propulsion Lab.; Mariner Mars '71; assay; letter
PQ-262

Letter from Arthur H. Neill to CDC-Phoenix Labs, Attention: Dr. Favero, August 4, 1970.

I-II Authors III Title IV Series note

NASA/Hdqts.; Mariner Mars '71; assay; letter

PQ-263

Planetary quarantine parameters. n.d.
1 p. PQ Parameters for Planets.

I Author II Title III Series note

PG; P_C; NASA/Hdqts.; status; Mars; Venus; Mercury; Jupiter; Saturn; parameters
PQ-264

National Aeronautics & Space Admin., Washington, D.C.
Planetary quarantine status for approved planetary missions, n.d.

I Author II Title III Series note

NASA/Hqts.; PQ constraints; $P_c$; PQ plans; status; Viking; Mariner Mars; Pioneer; M-V-M

---

PQ-265

National Aeronautics and Space Admin., Washington, D.C. Planetary Quarantine Officer.
Minutes of conservatism meeting, Memorandum on...

I Author II Title III Memorandum

NASA/Headquarters; memo; conservatism = safety margins; meeting; Viking; buried load; $P_r$
PQ-266

Major planetary quarantine program activities.

1 p. Agenda, [Dec. 1970]

I Author II Title III Series note

NASA/Headquarters; agenda; PQAP; Atlanta; Seattle; program planning

PQ-267

Fifth quarterly progress report, contract NASw-2062, Planning, evaluation and analytical studies to implement planetary quarantine requirements, by E.J. Bacon.

I- II Authors III Title IV Series note

Exotech; quarterly report; progress
PQ-268

Proposed meeting of Space Science Board ad hoc committee on COSPAR Sterilization Standards.
1 p. Agenda, [April 1971]

I Author II Title III Series note

NASA/Headquarters; program planning; SSB; agenda

PQ-269

California. Institute of Technology, Pasadena, Calif. Jet propulsion lab.
Preliminary analysis on the effect of planetary quarantine on Venus-Mercury 1973,
by W. Stavro.

I-III Authors III Title IV Series note

MVM; JPL; report; bias; Mercury; Venus; maneuver; impact; P(r); memo.
PO-270

California. Institute of Technology, Pasadena, Calif., Jet propulsion lab.

I-II Authors III Title IV Series note
Letter; MVM; P(r); Mercury; Venus; impact; JPL; Green; Clarke

PQ-271

Microbiological contamination log for planet Venus, by E.J. Bacon.

I-II Authors III Title IV Series note
Exotech; log; Venus; contamination
PQ-272

I-II Authors III Title IV Series note

Exotech; log; Mars; contamination

PQ-273

I-II Authors III Title IV Series note

NASA/Headquarters; Hall; SSB; policy; parameter values; $P_G$; Mercury; outer planets; deflection; $T$
PQ-274

I Author II Title III Series note

Exotech; report; N; COSPAR; Mars; P_g; T; P(n)

PQ-275

Definition of probability of planetary contamination, Memorandum from E. Bacon to L.B. Hall. July 24, 1970.

I-II Authors III Title IV Series note

Exotech; memo; P_c; definitions; COSPAR
PQ-276

Hall, Lawrence B.

I Author  II Title  III Series note
Hall; report; PQ Program; policy; history; status; London; COSPAR

PQ-277

California. Institute of Technology, Pasadena, Calif. Jet propulsion lab.

I-IV Authors  V Title of Letter  VI Title of Memo  VII Series note
Letter; JPL Memo; JPL; MM '71; pre-launch analysis; revision; bio-burden; parameterer values; spacecraft efflux ejecta
PQ-278

L.B. Hall presentation to Space Science Board, August 20, 1971.
9 VuGraphs

I-II Authors III Title

SSB; NASA/Headquarters; L.B. Hall; vu graphs; policy; Pioneer; USSR; Sagan; Mercury;
presentation; parameters; values; model

PQ-279

Sixth quarterly progress report, contract NASw-2062, Planning, evaluation and
analytical studies to implement planetary quarantine requirements, by E.J. Bacon.
Includes Draft Specification.

I-II Authors III Title IV Series note

Exotech; report; status; ETO; m_d; specification
PQ-280

Planetary Quarantine Advisory Panel action items/suggestions: June 1971.
4 p. PQAP Action Items/Suggestions (Seattle, Wash.), June 1971

I Title II Series Note

PQAP; Seattle; minutes; meeting; P(r); d-value; suggestions

PQ-283

I-II Authors III Title IV Series note

Hall; memo; MM'71; post launch analysis; PQO; approval
PQ-284

Hall, Lawrence B.
Potential cost of planetary quarantine. n.d.
1 p.

I Author II Title
report; NASA; cost; Viking; Jovian; Mars

PQ-285

Hall, Lawrence B.
Status of thermoradiation, n.d.
1 p.

I Author II Title
report; NASA; thermoradiation; sterilization; Sandia; Viking; cost
PQ-286

Letter from L.B. Hall to Dr. Elliott C. Levinthal, Stanford University, Sept. 13, 1971.

I-II Authors III Title

NASA; PQO; letter; Viking; bioshield; UV; P_g

PQ-287

Questions for PQAP, 9/21/71
1 p.

I Title

PQAP; agenda; KSC; P(r); parameter values; m_b
PQ-288

Documented definitions of planetary contamination, by E.J. Bacon

I-II Authors III Title IV Series note
Exotech; Bacon; memo; definition; P_c; Woods Hole

PQ-290

Memorandum from E.J. Bacon to Job 053 File on notes — NASA presentation, August 27, 1970.

I-II Authors III Title IV Series note
Exotech; Bacon; memo; presentation; P_g; Viking
PQ-292
(see revised PQ-11)
Planetary programs.
Letter from L.B. Hall to E. Bacon on Viking document M75-127-1 revision.

I-III Authors III Title IV Series note

NASA/Headquarters; Hall; Viking; document; review

PQ-293

National aeronautics and space administration, Washington, D.C. Office of space science and applications.
Letter to Dr. Charles H. Townes, SSB, on planetary quarantine policies.

I Author II Title III Series note

Letter; Naugle; SSB; policy; request; review; P(g); Mercury; outer planets; bus deflection
PQ-294

National aeronautics and space administration, Washington, D.C. Office of space science and applications. Planetary quarantine officer.
Revised and new planetary quarantine policies, by Lawrence B. Hall.

I-II Authors III Title IV Series note

Hall; memo; policy; revision; authorization; SSB; official

PQ-295

National aeronautics and space administration, Washington, D.C. Office of space science and applications. Planetary quarantine officer.
Telecon with Mr. Dean Kaster — Space Science Board, by A.R. Hoffman.

I-II Authors III Title IV Series note

PQO; Hall; PQO; SSB; Hoffman; memo; policy; review; opinion; P(g); Mars; SAG; Goody
PQ-296

Ad hoc Committee (Outer Planet) for Science Advisory Group.

I-II Authors III Title IV Series note

SAG; report; outer planets; PQ requirements; Jupiter; Saturn; Uranus; Neptune; penalty; Goody

PQ-297

2 pp. Letter to LB Hall, PQO, Code SL
I-II Authors III Title IV Series note

Exotech; letter; comments; review; Viking; PQ provisions; Hall; Bacon
PQ-298

Microbial growth in simulated Martian environment, by E.J. Bacon.
1 page. Memorandum to 053 file, July 20, 1970.

I-II Authors III Title IV Series note

Bacon; Mars; memo; atmosphere; survival; P(uv); P(vt); test; experiment; data

PQ-299

Documented definitions of planetary contamination, by E.J. Bacon.

I-II Authors III Title IV Series note

Bacon; Exotech; memo; Hall; definitions; Woods Hole; P_C; contamination
PQ-300

Status review—PQ support project, by E. J. Bacon.

I-II Authors III Title IV Series note

Exotech; Bacon; memo; report; meeting; status; contract; minutes

PQ-301

Microbiological contamination log for planet Mars, December 31, 1971, by E. J. Bacon.

I-II Authors III Title IV Series note

Bacon; report; log; Mars; contamination; COSPAR; Exotech
PQ-302

Microbiological contamination log for planet Venus, by E.J. Bacon.

I-II Authors III Title IV Series note

Bacon; Exotech; COSPAR; report; log; Venus; contamination

PQ-303

I-II Authors III Title IV Series note

Exotech; Bacon; Hall; letter; P(sa); Pioneer; review; comments; evaluation
PQ-304

Estimation of planetary contamination probabilities by non-landing vehicles, by S. Schalkowsky.

I-II Authors; III Title IV Series note

Exotech; Schalkowsky; report; \( P_c \); non-landing vehicles; probability of arrival; method; analysis

PQ-305

Exotech review of Viking planetary quarantine plan, by E.J. Bacon.

I-II Authors III Title IV Series note

Bacon; Exotech; memo; Viking; PQ plan; review; schedule; assignment
PQ-306

I-III Authors III Title IV Series note

Schalkowsky; Exotech; memo; Pioneer; prelaunch; comments; Jupiter; Swenson

PQ-307

PQAP's support of NASA's PQ program, by E.J. Bacon.
1 p. Outline by E.J. Bacon for PQAP meeting, Cape Kennedy, Jan. 1972.

I-III Authors III Title IV Series note

Exotech; Bacon; PQAP; Cape Kennedy; note; presentation; orientation
PQ-308

Comments on MM '71 microbiological assay and monitoring plan, by E.J. Bacon.

I-II Authors III Title IV Series note

Exotech; Bacon; Neill; NASA/SB; memo; comments; review; MM '71; assay plan

PQ-309

3 p. Memorandum from S. Schalkowsky to L. Hall, July 24, 1970....

I-II Authors III Title IV Series note

Exotech; Schalkowsky; memo; Hall; Viking; sterilization plan; review; comments; MMC
PQ-310

I-II Authors III Title IV Series note

Exotech; Bacon; memo; minutes; meeting; LRC; Viking; MMC; vu graphs; model; bioshield; models; requirements

PQ-311

I-II Authors III Title IV Series note

Exotech; Bacon; Schalkowsky; memo; Hall; PQ requirements; Pioneer; Jupiter; P(N); P(G); T; recontamination; revised
PQ-312

Comments on Pioneer P/G planetary quarantine plan, undated preliminary draft PC-204, from E.J. Bacon/via S. Schalkowsky.

I-II Authors III Title IV Series note

Exotech; Bacon; Schalkowsky; memo; Hall; Pioneer; PQ plan; review; comments

PQ-313

Summary of comments compiled during review of January 14 of coordination draft PQ plan as edited by D. Fox and Exotech.

I Author II Title III Series note (Memorandum on Viking '73 PQ Plan)

PQ plan; Viking; memo; comments; review; draft; Fox; Bacon; Exotech
PQ-314

National aeronautics and space administration, Washington, D.C. Office of space science and applications. Planetary quarantine officer.

Planetary quarantine certification of Pioneer F, by Lawrence B. Hall.

I-II Authors III Title IV Series note

PQO; memo; Pioneer; certification; launch; Jupiter; compliance; approval; recommendation; pre-launch analysis

PQ-315

Committee on Space Research (COSPAR). Secretariat.

1 p. Letter of transmittal.

I-II Authors III Title IV Series note

COSPAR; Secretariat; letter; MM '71; post-launch analysis
PQ-316

Meeting on mathematical analysis of the probability of contaminating the planets. April 25, 1967.

I Title III Series note

meeting; minutes; policy; model; N; P(N); T; COSPAR; NASA; Schalkowsky

PQ-317

National aeronautics and space administration, Washington, D.C. Space science, Deputy assoc. administrator.
2 p. with note. Letter/SL.

I Author II Title III Series note

Letter; note; Viking; policy; heat sterilization; M; Mars; elimination; review; SSB; Naugle
PQ-318

National aeronautics and space administration, Washington, D.C. Office of space science and applications. Planetary quarantine officer.

...Spacecraft sterilization technology seminar. Letter concerning information discussed at the..., by Lawrence B. Hall. Feb. 23, 1972.

I-II Authors III Title IV series note

Letter; Hall; Sagan; request; JPL; papers; seminar; reply

PQ-319

National aeronautics and space administration, Washington, D.C. Office of space science and applications. Planetary quarantine officer.

...Sterilization vs. off-loading science. Note to R.S. Kraemer, by L.B. Hall.

1 p. Note/SL.

I-II Authors III Title IV Series note

Note; Hall; off-loading; SSB; decision; heat sterilization; Viking; policy
PQ-320

National aeronautics and space administration, Washington, D.C. Office of space science and applications. Planetary quarantine officer.

1 p. Letter/SL.

I-II Authors III Title IV Series note

letter; spores; lifetime; P(vt); Hall

PQ-321

Hall, Lawrence B.

Rough estimate of minimum P.Q. — Viking, by L.B. Hall. n.d.
2 p. PQ Policy Considerations.

I-Author II Title III Series note

Hall; estimate; PQ (minimum); M; Mars; Viking; policy
PQ-322

Title Series note

COSPAR; SSB; USSR; request; assurance; international agreement; policy

PQ-323

Title Series note

Memo; Hall; SSB; policy; review; P(g); Mars; value; heat sterilization; meeting
PQ-324

I-II Authors III Title IV Series note

Memo; MVM '73; NASA/SL; P(N); Venus; deflection; aim point; atmosphere

PQ-325

I Title II Vu graphs on PQ Parameters, Viking.

Vu graphs; Viking; parameters; P(uv); P(r); Dv; values
