FOREWORD

This report Volume II presents transcriptions of recorded observations of crew members' activities made during one of the Tektite II Habitability Assessment Program missions. It is prepared to supplement the empirical observations presented in Volume I, AiResearch Report No. 71-6192-1, which describes the background, methods, procedures, and results of an empirical attempt to explore the habitability of an isolated undersea research and residence quarters.

Distribution of this volume of this report is strictly limited to qualified professionals engaged in on-going research in environmental psychology. These professionals are asked to treat the contents of the volume with care. Under no circumstances should this material be used in any way which might abrogate the responsibility of the author to preserve the anonymity of the research subjects. INTRODUCTION

This document was prepared under Contract No. NAS-8-25100 by AiResearch Manufacturing Company, a division of The Garrett Corporation, Los Angeles, California, for Marshall Space Flight Center, National Aeronautics and Space Administration. The contract monitor was Mr. H. Watters.

Because it is widely agreed that the field of environmental psychology is quite young, it was determined that a sample of recorded observations from a representative mission should be included in our report on Tektite to give the professional reader a better feeling of normal day-to-day life in the isolated habitat. Names of the crew members have been replaced with numbers and some off-color words have been replaced by more acceptable slang; some remarks have been omitted that might lead to easy identification of the subjects. Otherwise, the following pages are exactly as transcribed during the late afternoons and the evenings of the mission.

DAY 1

To begin this mission the crew dove off the dive platform at noon today, arriving in the habitat one-half hour later. Our observations of them begin at 5 p.m.

- 5:00 p.m. All five aquanauts are preparing together for a dive; they want to "get the lay of the land". The watch director asks to speak to No. 1 on the Bogen telephone, which is in the crew quarters. No. 1 asks if he can use the TV screen in the crew quarters to watch the watch director while talking; the others are talking in the bridge about their planned dive.
- 5:07 No. 4 asks for a better picture on the TV from topside.
- 5:12 No. 5 leafs through a magazine, No. 3 through a book on the fish of the region.
- 5:15 The aquanauts are still trying to decide about their dive. After glancing through their reading materials and not saying anything they are now back to figuring things out. No. 4 suggests following the sewer line out from the habitat. No. 1 has returned from the crew quarters.
- 5:20 No. 2, No. 5 and No. 4 go to the wet room to prepare for a dive.
- 5:21 No. 3 joins the others in the wet room, but he is not preparing to dive.
- 5:25 No. 1 puts on an audio cassette of the Beatles singing "On Our Way Home." No. 1 is in the bridge, but then he goes to the crew quarters. The others are in the wet room. No. 1 is organizing his personal gear in the crew quarters, and gets out some writing material.
- 5:30 No. 3 is going back and forth getting equipment together in the crew quarters and the wet room. No. 5, No. 4, and No. 2 are suiting up in the wet room. No. 1 is in the crew quarters arranging personal gear on his bunk. The music in the bridge can also be heard in the crew quarters.
- 5:40 No. 1 moves to a desk in the bridge, putting some of his things there.
- 5:41 No. 1 joins the group in the wet room; he stands and watches the others.
- 5:45 No. 2 stands beside him. Only two of the safety pingers work, so it looks as if only two divers can go. No. 4 looks disgusted. He then makes an arrangement with the watch director to carry a pinger with a defective switch in his hand, so that three divers can go

on the dive as planned. (NOTE: The divers must carry balloons, strobe lights and pingers for safety.)

5:55 No. 4 is the first in the water.

5:55 No. 1 returns to the bridge and puts on a new cassette, a Mozart violin concerto.

5:58 Everyone is now out on the dive except No. 3 and No. 1. No. 3 is fixing his sampler in the wet room.

6:02 No. 3 has just been notified he can leave the habitat on the hooka system. No. 1 will watch him. No. 1 is now waiting in the bridge to watch No. 3 when he goes out. (NOTE: The hooka system provides air via an umbilical tube and mouth piece. It is primarily for safety in case the habitat should flood, but it also can be used for work close to the habitat, within reach of the umbilical.)

6:03 No. 1 is looking over his writing material, waiting for No. 3, and still listening to the Mozart violin concerto.

6:10 No. 3 is now going out on the hooka system. No. 1 tries to watch him from the bridge on the outside TV camera. He can't get the picture, so instead he goes to the wet room to watch from the viewport there.

6:15 No. 1 is watching No. 3 through the viewport; he is the only one in the habitat.

6:17 No. 3 hands a basket to No. 1 up through the well, then No. 3 goes out for more.

6:25 No. 3 hands more things up to No. 1, then he goes out again.

6:30 No. 3 is now back in the habitat. No. 1 goes back to the bridge, and when he goes there he immediately puts on the violin concerto again (the other side of the cassette).

(We have just learned a strobe has been fired by one of the divers in the water.)

No. 3 begins working with his equipment in the wet room. No. 1 is listening to music and watching the two-way TV in the bridge. Topside asks No. 3 to turn the volume on the pinger-receiver up; a pinger is definitely sounding.

6:35 No. 4 appears in the well. The volume on the pinger receiver is so loud he and topside can't hear anything.

- 6:39 No. 1 leaves the bridge momentarily to confer with No. 4 in the wet room, then he returns to the bridge. He still is listening to the concerto, watching the two-way TV, and writing. No. 3 is still working in the wet room. All divers are OK, and the dive is continuing in the water. Apparently the pinger was turned on by accident. No. 4 is back with the other divers.
- 6:45 No. 1 is now reading magazines, and listening to Vivaldi in the bridge.
- 6:50 No. 1 goes to the crew quarters. No. 4 returns to the wet room. No. 1 pulls out a bun, a plate, and spends 4 minutes looking for jam.
- 6:51 No. 4 forgot his pinger. He left it outside, and will bring it in tomorrow.
- 6:54 No. 1 is opening a can of juice. No. 4 is in a long conversation with topside from the wet room about pingers. The other two aquanauts who were on the dive are now swimming near the wet room viewport. No. 3 is waving and pointing through the viewport of the wet room, having fun with them.
- 7:01 No. 1 is cleaning up his dishes. No. 4 is looking for something to help No. 3 make a piece of research equipment to put outside to attract various types of marine fauna.
- 7:04 No. 1 is now arranging personal gear again on his bunk. No. 3 is still trying to put together the outside equipment for attracting fauna, and No. 4 is helping him make it. The other two divers are still out, doing some pleasure diving.
- 7:07 No. 2 and No. 5 return.
- 7:08 No. 1 goes to the cupola, then he goes to the leisure area in the bridge (the area where books, TV films, games, magazines, drawing materials, etc. are stored).
- 7:11 No. 1 puts a new cassette in the tape recorder; it doesn't play. He returns to the leisure area, then he goes to read in front of the TV; he spends more time watching the two-way TV than reading while there.
- 7:15 No. 4 goes outside alone in the water to emplace the equipment for No. 3. No. 2 is drying off, No. 5 is unsuiting, No. 3 is working on equipment in the wet room, and No. 1 is reading and spending a fair amount of time just watching the two-way TV in the bridge.
- 7:20 No. 1 goes to the wet room and gets a towel to dry his hands. No. 1 and No. 2 talk, and No. 3 and No. 5 talk, all in the wet room.

- 7:21 No. 4 appears in the well and asks some questions about the working of the outside equipment of No. 3.
- 7:22 No. 4 goes back out in the water.
- 7:23 No. 1 goes to his bunk in the crew quarters; all is quiet.
- 7:24 No. 4 returns from the water for good. No. 1 is fixing some equipment while in his bunk. The situation continues. In the wet room No. 3 is working, No. 5 is standing around, No. 4 is dressing, and No. 2 is tinkering with equipment that is sitting on a small bench placed in his bunk.
- 7:35 No. 5 is watching the fish swimming in the well. He then does some chatting with No. 2.
- 7:38 No. 1 is on his bed and he closes the curtains to take a nap. The other four aquanauts are in the wet room; No. 4 and No. 3 are still working out arrangements for No. 3's gear. No. 2 is tinkering with his diving equipment, and No. 5 is watching the fish and the other aquanauts.
- 7:43 No. 4 goes to the crew quarters. He checks out what food is available for supper, then gets some vegetables from the freezer in the engine room. No. 3 watches him in the engine room. No. 2 goes to the bridge and walks around. No. 4 goes to the stove in the crew quarters. No. 5 is still working in the wet room. No. 3 returns to the wet room.
- 7:49 No. 5 goes to the cupola, then he returns to the wet room. No. 3 goes to the crew quarters, No. 2 also goes to the crew quarters, No. 5 again goes to the cupola. No. 3 goes to the bridge. No. 2 is helping No. 4 with the cooking.

- 8:05 No. 3 goes to the crew quarters.
- 8:06 No. 3 says he likes the way the present watch director talks: clearly and distinctly. No. 4 finds the cooking pots are too small, but he finds more stored behind a panel in the wall.
- 8:08 No. 4 and No. 2 cook. No. 5 lies in his bunk and rests. No. 3 watches the others and chats with No. 5. No. 1 is sleeping.
- 8:11 No. 3 goes to the cupola. No. 5 gets up, stands beside his bunk, and works on some equipment.

- 8:18 No. 4 has to change the Baralyme because the carbon dioxide level in the habitat is getting too high. He has just been notified of this from topside. He instructs No. 2 on how to continue with the cooking, then goes to the engine room. No. 2 cooks. (NOTE: Baralyme, or barium hydroxide, is used to filter carbon dioxide from the habitat air.)
- 8:21 No. 2 tries to get the TV over the stove to come on while he is cooking. (NOTE: They are frying food and are not supposed to.)
- 8:25 No. 5 is still standing in the crew quarters, working at things in his bunk. (No. 3 and No. 1 have chosen bunks on one side of the crew quarters, No. 1 in the lower, No. 3 in the upper, while No. 5 is in the upper on the other side and No. 2 in the lower. No. 4 will sleep in the bridge.)

- 10:36 No. 1 criticizes the depth limitation imposed on the divers. He says most research involved in the project doesn't really justify the habitat concept, it could be done as well from the surface. No. 1 plans to write an article just on that, and he feels there are too many sightseers involved in the project.
- 10:40 No. 1 says, "We need someone with power here. The people who are now directing Tektite talk out of both sides of their mouth. The training program is so weak it's ridiculous. I've even seen aquanauts go down to the habitat with no fins. One director says X; another says Z; and the third says either. Too many people forget, it's a privilege to go down here. I will say they've done everything that can be done to see everything goes well down here, but there is too much in the way of politics up there. We need to track the problem out here, not in Washington. The only ones concerned about us and the work that has to be done here are a bunch of 14-year-old kids. It hurts. It may be five years before this can happen again. We need a team with professional thrust. You have to hit it straight on. We need someone to be a leader here. This multiorganization thing is a big problem here. Don't tell me it can't be done; it has been done and it can be done."
- 10:50 No. 1 continues, "I can put together a team right now that could work together and in a few months could make everyone sit up and say 'what?'." No. 4 replies, "I believe it, but could you pay for it? There's undoubtedly another habitat available now for someone who can fund it." No. 1 says, "I'm so close to it now. I need about two more key people in my laboratory and I'll be all set. This world is too timorous right now, there's only a few people with courage and foresight. No one will stick his neck out." - 10:59 No. 1 goes to the crew quarters and gets a snack. He goes back to the bridge.
- 11:00 No. 4 talks about the fact that one of the directors of the project is strong and persistent even if he isn't a good administrator. No. 1 complains strongly about the interorganizational character of the project, making it especially difficult to recognize any one line of leadership. "One group puts in some money, then wants to call some shots, and those guys up there let them get away with it,

just because the group put some money into it. I would have them take the money and stuff it up their nose. I would have got the money from the Chinese Government instead if I would have had to, because the money to start would pay off later wherever it came from. The directors here either can't see the picture, or they can, but aren't forceful and are just interested in politics."

- 11:07 No. 1 continues to talk about the administrative difficulties inherent in the interorganizational structure of the program and complains about the lack of coordination resulting for the scientists. Too often the program just lets the scientists "wander around" he feels. He also complains about the minitiat, and No. 4 joins him on that issue.
- 11:16 No. 3 puts some things in his bed. No. 5 works on the bridge, listening at times to the conversation between No. 1 and No. 4. No. 3 tapes a picture into a log he is keeping. No. 1 and No. 4 continue to talk. No. 4 is saying a cost analysis should have been done on the project.

No. 5 says something about the evasion pattern of the little fish that the tarpon chase. No. 3 reads Playboy during the conversation. There is more discussion about eardrops, and No. 4 proposes ultraviolet light in the habitat to kill harmful germs. No. 4 says that the topside director told him he had a cable from Washington wanting to know if No. 1 had used the new head.

- 11:49 No. 5 goes to the crew quarters. The lights are out. He gets in his bunk and puts on his bunk light. No. 3 watches the two-way TV, checks the view from the engine room viewport, and goes to bed.
- 11:50 No. 1 and No. 4 are out in the water. No. 5 reads in his bunk.
- 11:52 No. 5 goes to sleep.
- 12:20 No. 1 returns from his dive.

- 12:27 No. 5 gets out of his bunk, and goes to the wet room to get something.
- 12:29 No. 5 goes back to his bunk in the crew quarters. No. 1 says to No. 4, "No. 4, you're a gentleman and a scholar. Thanks for your help." No. 4 replies, "I enjoyed it." No. 1 says, "Going out there, it's like being on a stroll in the woods! I get carried away with that."
- 12:34 No. 4 goes to the head.
