APPENDIX A	A-1

1. INTRODUCTION

The Space Shuttle Configuration Accounting Functional Design Specification provides an analysis of the requirements for an on-line automated system. The system must be capable of tracking the status of requirements and engineering changes and provide accurate and timely records. Although this system and the requirements described relate specifically to the Space Shuttle Program Configuration Accounting Levels II and III, the design of the system should be such that it can be applied to other projects and programs with a minimum of modification.

The functional design specification also provides the definition, description, and character length of the required data elements and the interrelationship of data elements to adequately track, display, and report the status of active configuration changes.

As changes to the Space Shuttle Program Levels II and III configuration are proposed, evaluated, and dispositioned, it is the function of the Configuration Management Office, WC2, to maintain records regarding changes to the baseline and to track and report the status of those changes. The Configuration Accounting System (CAS) will consist of a combination of computers, computer terminals, software, and procedures, all of which are designed to store, retrieve, display, and process information required to track proposed and approved engineering changes to maintain baseline documentation of the Space Shuttle Program Levels II and III. Closed-out changes will be relegated to history tapes and maintained in the JSC Library for the duration of the Shuttle Program plus.

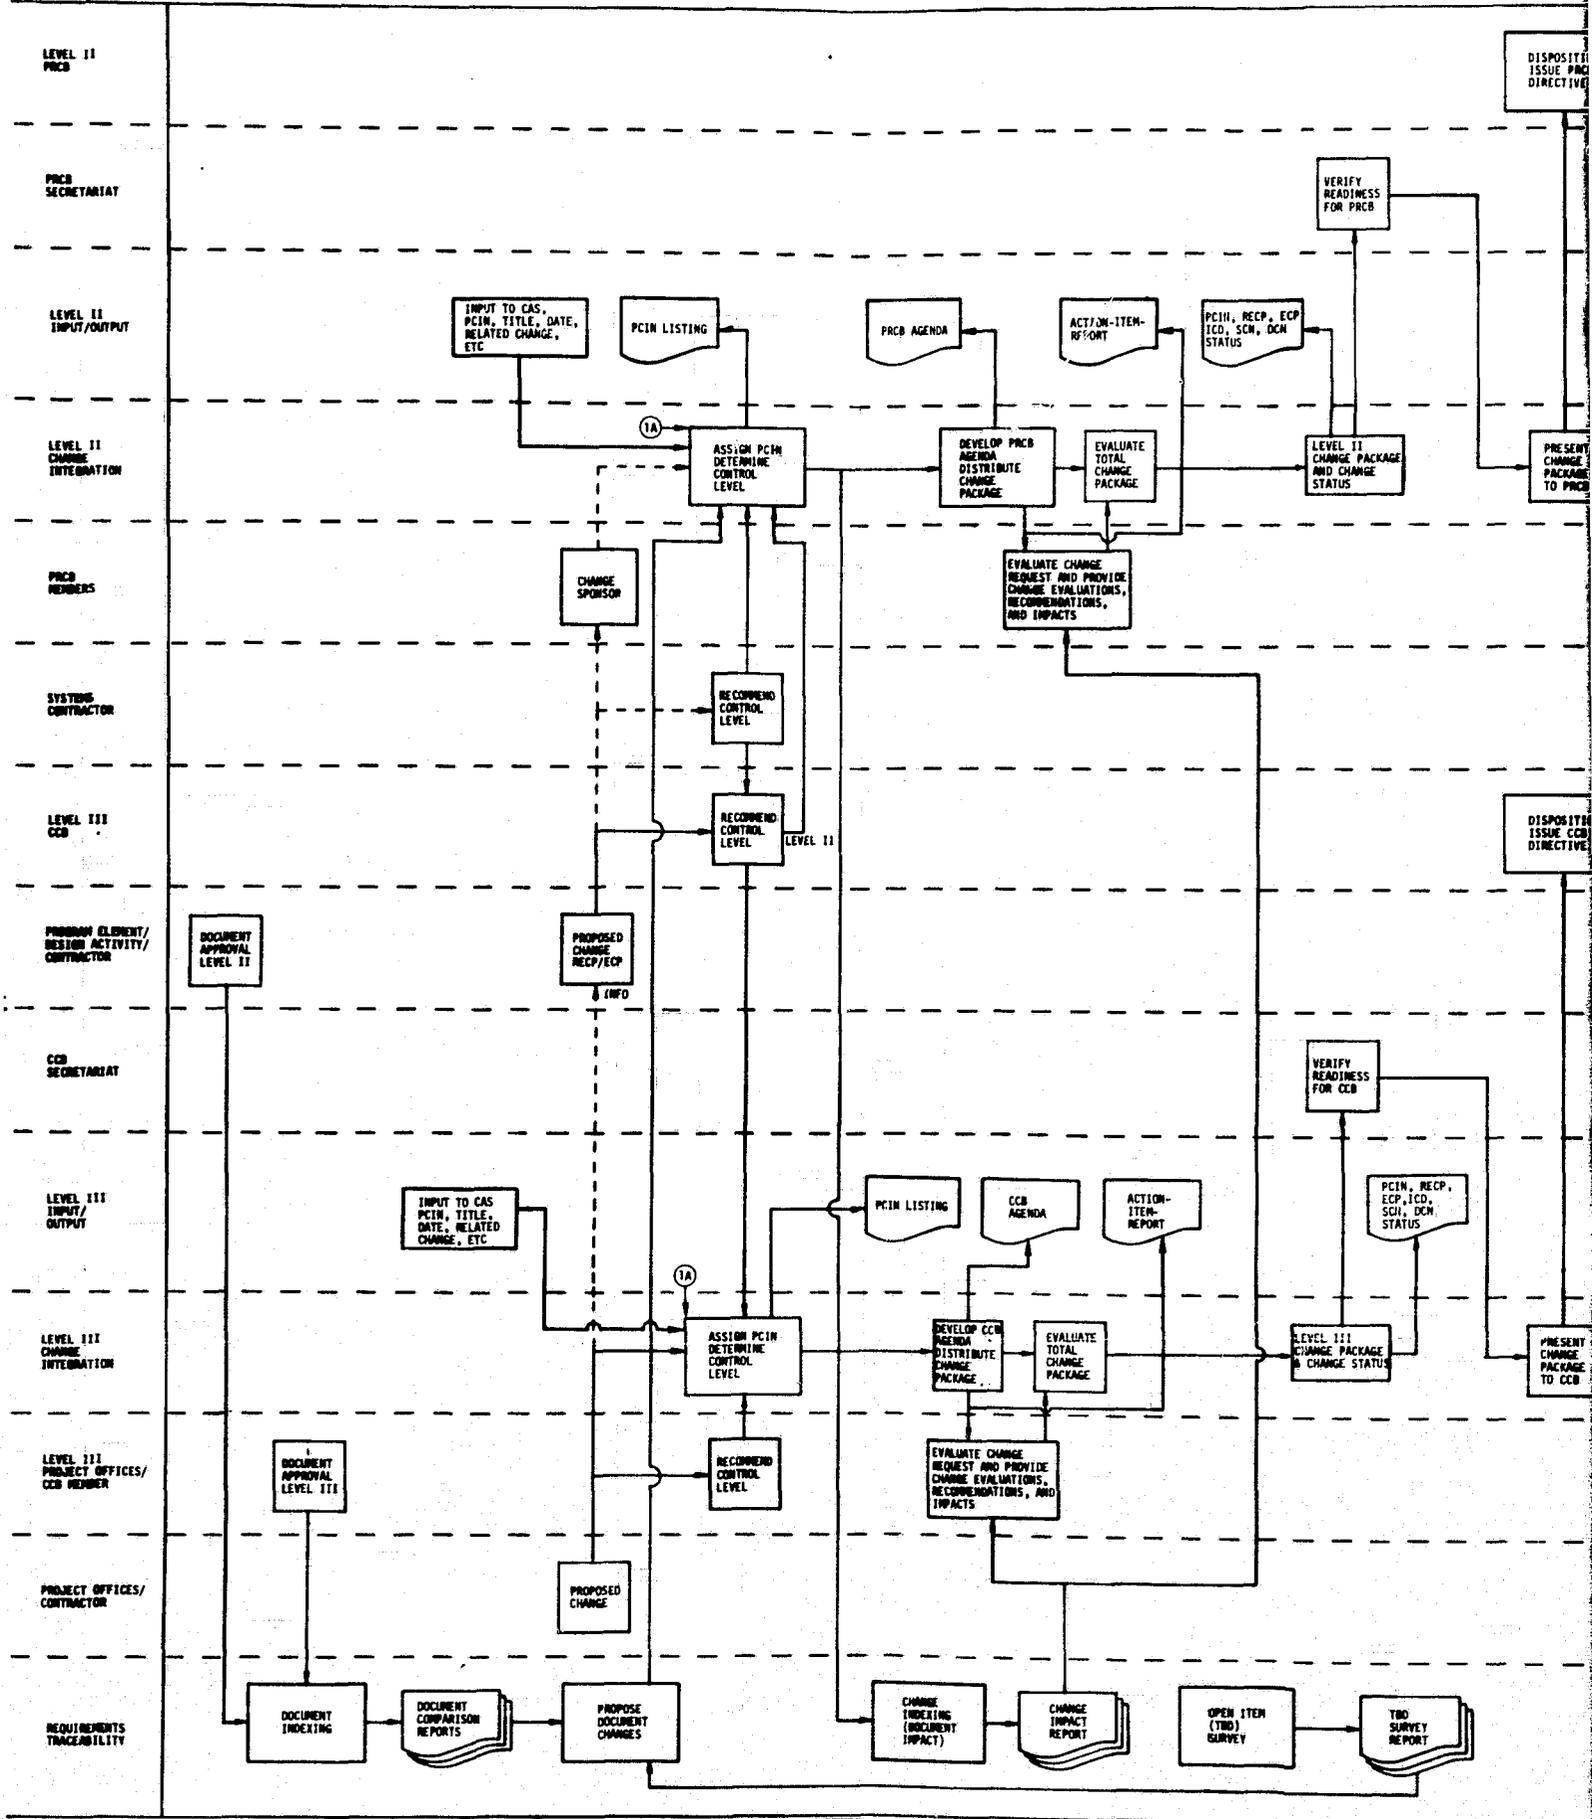

2. REQUIREMENTS

The requirements presented herein have been discussed in detail with the office of primary responsibility for the Space Shuttle Program Levels II and III configuration accounting application. Other center requirements have been included to the extent possible with some direct interface through configuration management working group (CMWG) meetings and telephone conversations. It is expected that small changes in requirements will occur throughout the program and the design of the system application must be flexible enough to accommodate these changes.

2.1 CAS User Requirements. The user requirements provide the basic platform for a generalized application. The design of the generalized application must be such that user interface complexity is minimized and user responsiveness is maximized.

2.1.1 CAS User Interface Requirements. The CAS user interface requirement is concerned primarily with the day-to-day man/machine interaction for inputting data and answering data queries. Discipline of change paper progression from receipt through implementation within configuration management strongly determines the effectiveness of the accounting system and provides the process of gathering data for input to the system and output to the user. The basic functions and relationships of configuration management activities are presented in Figure 2.1.1-1. The user will interface with the computer through terminal devices for demand processing and through punched cards or tapes for batch processing. Figure 2.1.1-2 illustrates the user interface method. The user interface requirements are as follows:

1. Generalized report capability
2. Prompting
3. Function keys
4. Input/output translation capability
5. Input validation
6. Processing interrupt

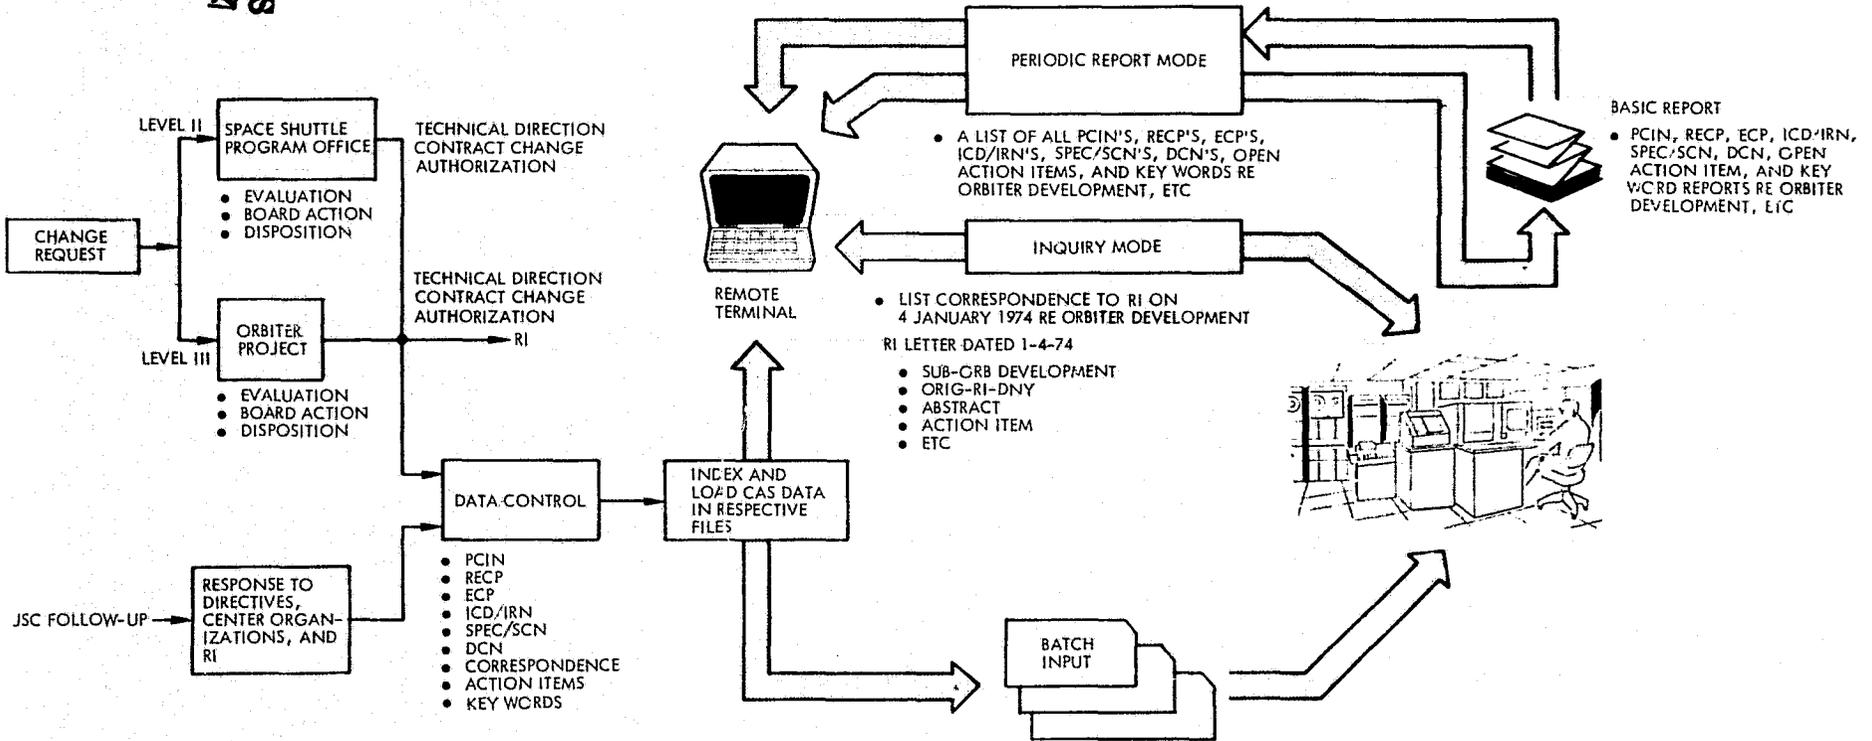

Figure 2.1.1-2. User Interface Method

7. Count (automatic)
8. Restart capability
9. English and procedural language
10. Temporary and permanent procedure retention
11. Response times
 - a) Wait for a line -0- 90%, 30 min. - 10% + priority system.
 - b) Waiting to make request - 30 sec. avg., 4 min. worse case.
 - c) Positive response during response delays of >30 sec.

2.1.1.1 CAS Users. The configuration accounting system users have been determined by centers/contractors and modes of use.

Center/Contractor

JSC/WC2	DEMAND AND BATCH
MSFC	BATCH INITIALLY (POSSIBLY EXPAND TO DEMAND WITHIN 1 YEAR)
KSC	BATCH INITIALLY (POSSIBLY EXPAND TO DEMAND WITHIN 1 YEAR)
RI	BATCH

2.2 CAS Input Requirements. The CAS data input requirements were derived through both direct interface discussions with the office of primary responsibility and by approximations based on previous experience in the amount of active configuration changes that are expected to be in the system at given time frames (specifically 1 July 1974 and 1 July 1976 [expected peak]). The input requirements are presented as 1) data element description and character length, 2) data file description and sizing, and 3) input event description.

2.2.1 CAS Data Element Description and Character Length. See Table 2.2.1-1. The compilation of data elements was derived from previous meetings between the NASA/JSC/KSC/MSFC personnel and the shuttle prime contractor (RI).

2.2.2 CAS File Description and Sizing. The configuration accounting changes separate into six logical files. The logical files are PCIN, RECP, ECP, ICD/IRN, SPEC/SCN,

Table 2.2.1-1. CAS Data Elements

PCIN DATA

DATA ELEMENT	FIELD TITLE	MAXIMUM CHARACTER LENGTH	DATA DESCRIPTION
PCIN NUMBER	PCIN NO.	15	LEVEL II OR LEVEL III NUMBERS ASSIGNED TO THE ECP, ICD, SPEC. (ASSIGNED BY THE SECRETARY OF THE LEVEL II OR LEVEL III BOARD)
ASSIGNMENT DATE	ASGNMT DATE	6	DATE PCIN NO. IS ASSIGNED. (ASSIGNED BY THE SECRETARY OF THE LEVEL II OR LEVEL III BOARD)
PCIN REVISION	PCIN REV.	2	REVISION OF A PCIN. (ASSIGNED BY THE SECRETARY OF THE LEVEL II OR III BOARD)
AFFECTED PROJECTS	AFFECTED PROJECTS	4	ORBITER SPACE SHUTTLE MAIN ENGINE EXTERNAL TANKS SOLID ROCKET BOOSTER AIR BREATHING ENGINE PAYLOAD LAUNCH AND LANDING (SOME OR ALL FOUND IN TEXT OF PRCBD)
DOCUMENTS AFFECTED (MULTI-FIELDS)	DOCUMENTS AFF.	15	NUMBERS OF THE PROGRAM DOCUMENTS AFFECTED BY THE CHANGE. (OBTAINED FROM TD'S, ECP'S, CORRESPONDENCE, CONTRACT DOCUMENTS)
PRCBD NO.	PRCBD NO.	12	PROGRAM REQUIREMENT CHANGE BOARD DIRECTIVE NO. (ASSIGNED BY THE PRCB. MAY BE THE PCIN NO.)
PRCBD DATE	PRCBD DATE	6	DATE THAT THE PROGRAM REQUIREMENT CHANGE BOARD DIRECTIVE WAS RELEASED. (ASSIGNED BY THE PRCB)

Table 2.2.1-1. CAS Data Elements (Continued)

PCIN DATA (CONTINUED)

DATA ELEMENT	FIELD TITLE	MAXIMUM CHARACTER LENGTH	DATA DESCRIPTION
TECHNICAL DIRECTIVES (MULTI-FIELDS)	TECHNICAL DIRECTIVES	12	NO. ASSIGNED TO CORRESPONDENCE TRANSMITTING TECHNICAL DIRECTION. (BOTH NASA AND CONTRACTOR NO'S. ARE LISTED. LEVEL II OR III DIRECTIVE)
TD DATES (MULTI-FIELDS)	TD DATE	6	DATE OF THE TECHNICAL DIRECTIVE.
CONTRACTOR NUMBER ASSIGNED TO TD (MULTI-FIELDS)	CONTRACTOR NO.	8	
NEXT ACTIONS FOR TD'S (MULTI-FIELDS)	NEXT ACTION	8	LEVEL II OR III ACTION REQUIRED ON THE PCIN. (OBTAINED VERBALLY OR ON DOCUMENTATION)
NEXT ACTION DATES - SCHEDULED OR ACTUAL (MULTI-FIELDS)	N/A DATE	6	DATE OF NEXT ACTION REQUIRED. (OBTAIN FROM TRANSMITTAL LETTER)
	S/A	1	SCHEDULED OR ACTUAL CODE OF NEXT ACTION. (OBTAIN FROM TRANSMITTAL LETTER)
CHANGE TITLE	PCIN TITLE	54	TITLE OF CHANGE. (ASSIGNED THE SAME TIME THE NUMBER IS ASSIGNED BY THE PRCB SECRETARY)
CHANGE REQUESTS - SCHEDULED OR ACTUAL (MULTI-FIELDS)	CHG REQUEST DATES	6	DATES THAT THE CHANGE REQUESTS ARE SCHEDULED OR COMPLETED. (OBTAIN BY EACH PROGRAM/PROJECT/ELEMENT CONTRACTOR/SYSTEM INTEGRATION CONTRACTOR)
	S/A	1	SCHEDULED OR ACTUAL CODE.

Table 2.2.1-1. CAS Data Elements (Continued)

PCIN DATA (CONTINUED)

DATA ELEMENT	FIELD TITLE	MAXIMUM CHARACTER LENGTH	DATA DESCRIPTION
CHANGE EVALUATIONS - SCHEDULED OR ACTUAL (MULTI-FIELDS)	EVAL. REQUEST DATES	6	DATE THAT THE EVALUATION REQUEST IS SCHEDULED OR COMPLETED. (OBTAIN FROM EVALUATION REQUEST)
	S/A	1	SCHEDULED OR ACTUAL CODE.
BASELINE CHANGE COMPLETION DATE - SCHEDULED OR ACTUAL	BASELINE CHANGES COMPLETION	6	DATE ENTERED WHEN SPEC/ICD OR CHANGES HAVE BEEN RELEASED. (INPUT BY INTEGRATION CONTRACTOR/ELEMENT CONTRACTOR)
	S/A	1	SCHEDULED OR ACTUAL CODE.

Table 2.2.1-1. CAS Data Elements (Continued)
 SPEC DATA (CONTINUED)

DATA ELEMENT	FIELD TITLE	MAXIMUM CHARACTER LENGTH	DATA DESCRIPTION
CONTRACTORS CONTROL NUMBERS (MULTI-FIELDS)	CONTRACTOR CONTROL NO.'S	12	CONTROL NUMBER ASSIGNED BY CONTRACTOR.
REMARKS	REMARKS	36	PERTINENT REMARKS AGAINST SPECIFICATION/PLAN ARE REQUIRED.
RELATED DOCUMENTS (MULTI-FIELDS)	ECP'S	15	
	ICD'S	15	
	PCIN'S	15	

and DCN. The single integral number that ties all related change paper together is the program change identification number (PCIN). Interrelationship must be provided file-to-file and in some cases also element-to-element. Provisions must be made to relate the current status and/or disposition of each piece of change paper.

In deriving the data base sizing, certain assumptions were made as follows:

- a) 3,400 active changes in the system by 1 July 1974.
- b) 26,250 active changes in the system by 1 July 1976.
- c) 6 logical data files.

Based on the above assumptions, the CAS data base files, records, attributes, and total characters are as follows:

<u>a) Logical Data Files (1 July 1974)</u>	<u>Records</u>
PCIN Records	3,400
RECP Records	2,720
ECP Records	2,312
SPEC/SCN Records	2,312
ICD/IRN Records	435
DCN Records	680

Total logical records: 11,859
 Average attribute per record: 20
 Average character per attribute: 25
 Total characters per record: $25 \times 20 = 500$
 Total characters per system: $500 \times 11,859$
 = 5,929,500

<u>b) Logical Data Files (1 July 1976)</u>	<u>Records</u>
PCIN Records	26,250
RECP Records	21,000
ECP Records	17,850
ICD/IRN Records	3,570
SPEC/SCN Records	17,850
DCN Records	5,250

Total logical records: 91,770
 Total characters: $500 \times 91,770 =$
 45,885,000

6 BIT per CHAR
 7,647,500 words (36 BIT)

c) Volume of Inputs by Mode

Demand

40 inquiry/entries per working day by Configuration Management Office (CMO)

Batch

Average 120 to 130 record entries per week for each of 3 files
Average 10 record entries per week for each of 3 files

2.2.3 CAS Input Event Description. See Table 2.2.3-1.

2.3 CAS Output Requirements. The output requirements have been determined based on the same assumptions as were used for the input requirements, direct interface with the office of primary responsibility, and interface with user organization.

2.3.1 CAS Volume of Output. The volume of output is presented by mode (demand and batch) projected to 1 July 1974 and 1 July 1976.

a) Volume of output by mode:

1) 1 July 1974

Demand

Approximately 40 to 50, 80 character lines per query
Two week PRCB agenda items approximately 40, 80 character lines
Weekly CCB agenda items approximately 10, 80 character lines

Batch

Weekly action item report, approximately 480, 132 character lines
Monthly PCIN status report, approximately 10,200, 132 character lines
Monthly RECP status report, approximately 7,000, 132 character lines
Monthly ECP status report, approximately 7,000, 132 character lines
Monthly status of ICD's by PCIN, approximately 1,200, 132 character lines
Monthly status of SCN's by PCIN, approximately 7,000, 132 character lines
Monthly status of DCN's by PCIN, approximately 1,800, 132 character lines

Special reports as required cross-indexed approximately 3,500, 132 character lines

Microfilm and reproducible hard copies 8" x 10-1/2" three hole punched for selected reports

Checkpoint tape required weekly

Closed out data printed to tape monthly and stored for duration of program plus.

2) 1 July 1976

Demand

Approximately 40 to 50, 80 character lines per query
Two week PRCB agenda items approximately 60, 80 character lines
Weekly CCB agenda items approximately 16 to 20, 80 character lines

TABLE 2.2.3-1. CONFIGURATION ACCOUNTING SYSTEM
INPUT EVENT DESCRIPTION

EVENT NUMBER	EVENT NAME	SEQUENTIAL RELATIONSHIP	FUNCTIONS	EVENT MODE	RESPONSE TIME	FREQUENCY	TIME PERIOD	VOLUME	OPERATIONS
1	Initial Input	Initial input to *primary number automatically establishes records in related files. Security required.	Create	Batch or demand	72 hours 4 min	Weekly Daily	Overnight/ Weekend 0700-1900	Demand 40 entries/day Batch 200 entries/week	Security re- quired at record level
2	Update Input	Edit for record existence. Security required.	Update	Batch or demand	72 hours 4 min	Weekly Daily	Overnight/ Weekend 0700-1900	Demand 40 entries/day Batch 200 entries/week	Security re- quired at record level
3	Query	Conditional search.	Retrieve	Batch or demand	72 hours 4 min	Weekly Daily	Overnight/ Weekend	Demand 20 entries/day Batch 40 entries/week	Interrelate elements

*CAS single authoritative number that links all change paper/occurrences.

2-20

Batch

Weekly action item report approximately 1,680, 132 character lines

Monthly PCIN status report approximately 100,000, 132 character lines

Monthly RECP status report approximately 80,000, 132 character lines

Monthly ECP status report approximately 76,000, 132 character lines

Special reports as required cross-indexed approximately 3,500, 132 character lines

Microfilm and reproducible hard copies 8" x 10 1/2" three hole punched for selected reports

Checkpoint tape required weekly

Closed out data printed to tape monthly and stored for duration of program plus

b) Frequency of output by mode:

Demand

40 inquiries per working day by CMO

20 inquiries per working day by each of 5 other on-line users

Two week PRCB agenda items

Weekly CCB agenda items

Batch

Weekly status report of action items

Monthly status reports of engineering changes by PCIN, RECP, ECP, CCA, and TD numbers

Monthly status reports of ICD's, SCN's, and DCN's by PCIN

Special reports as required cross-indexed

2.3.2 CAS Output Event Description. See Table 2.3.2-1.

TABLE 2.3.2-1. CONFIGURATION ACCOUNTING SYSTEM
OUTPUT EVENT DESCRIPTION

EVENT NUMBER	EVENT NAME	SEQUENTIAL RELATIONSHIP	FUNCTIONS	EVENT MODE	RESPONSE TIME	FREQUENCY	TIME PERIOD	VOLUME	OPERATIONS
1	Output to Users	No output during input. Conditional response to queries.	Retrieval	Demand	4 min	Daily	0700-1900	3000 lines/day	Sort 60 search keys maximum, 30 used frequently remote batch required, interrelate file-to-file, report format required.
2	Output to Users	No output during input. Conditional response to queries.	Retrieval	Batch	72 hours	Weekly	Overnight/Weekend	36,000 lines/month	Same as above.

3. FUNCTIONAL DESIGN

The CAS functional design provides the layout of what must be done to accomplish the application. The file layout, data elements, report output, and conditional queries are presented herein.

3.1 CAS Data Base Layout. The CAS data base has been designed to provide interrelationship file-to-file and where required element-to-element. The data base map is presented in Figure 3.1-1. The interrelationship of files and elements is reflected by the bridge create (B:C), bridge verify (B:V), joint store (JS), and spans (S).

3.2 CAS Data Elements By File. The CAS data elements are presented by file and shows the element, character length, and data description (see Table 3.2-1).

3.3 Report Output Format. The CAS report output formats are presented for both demand (on-line hardcopy printer) and batch (off-line printer). The formats will not be fixed in that on-line changes may be required and can easily be accomplished. Examples of the formats are as follows:

PCIN-REPORT as of date

Page No. 001

PCIN-NO	PCIN-DATE	PCIN-TITLE	REL-RECP	REL-ECP	PCIN-DISP	DSP-DATE
---------	-----------	------------	----------	---------	-----------	----------

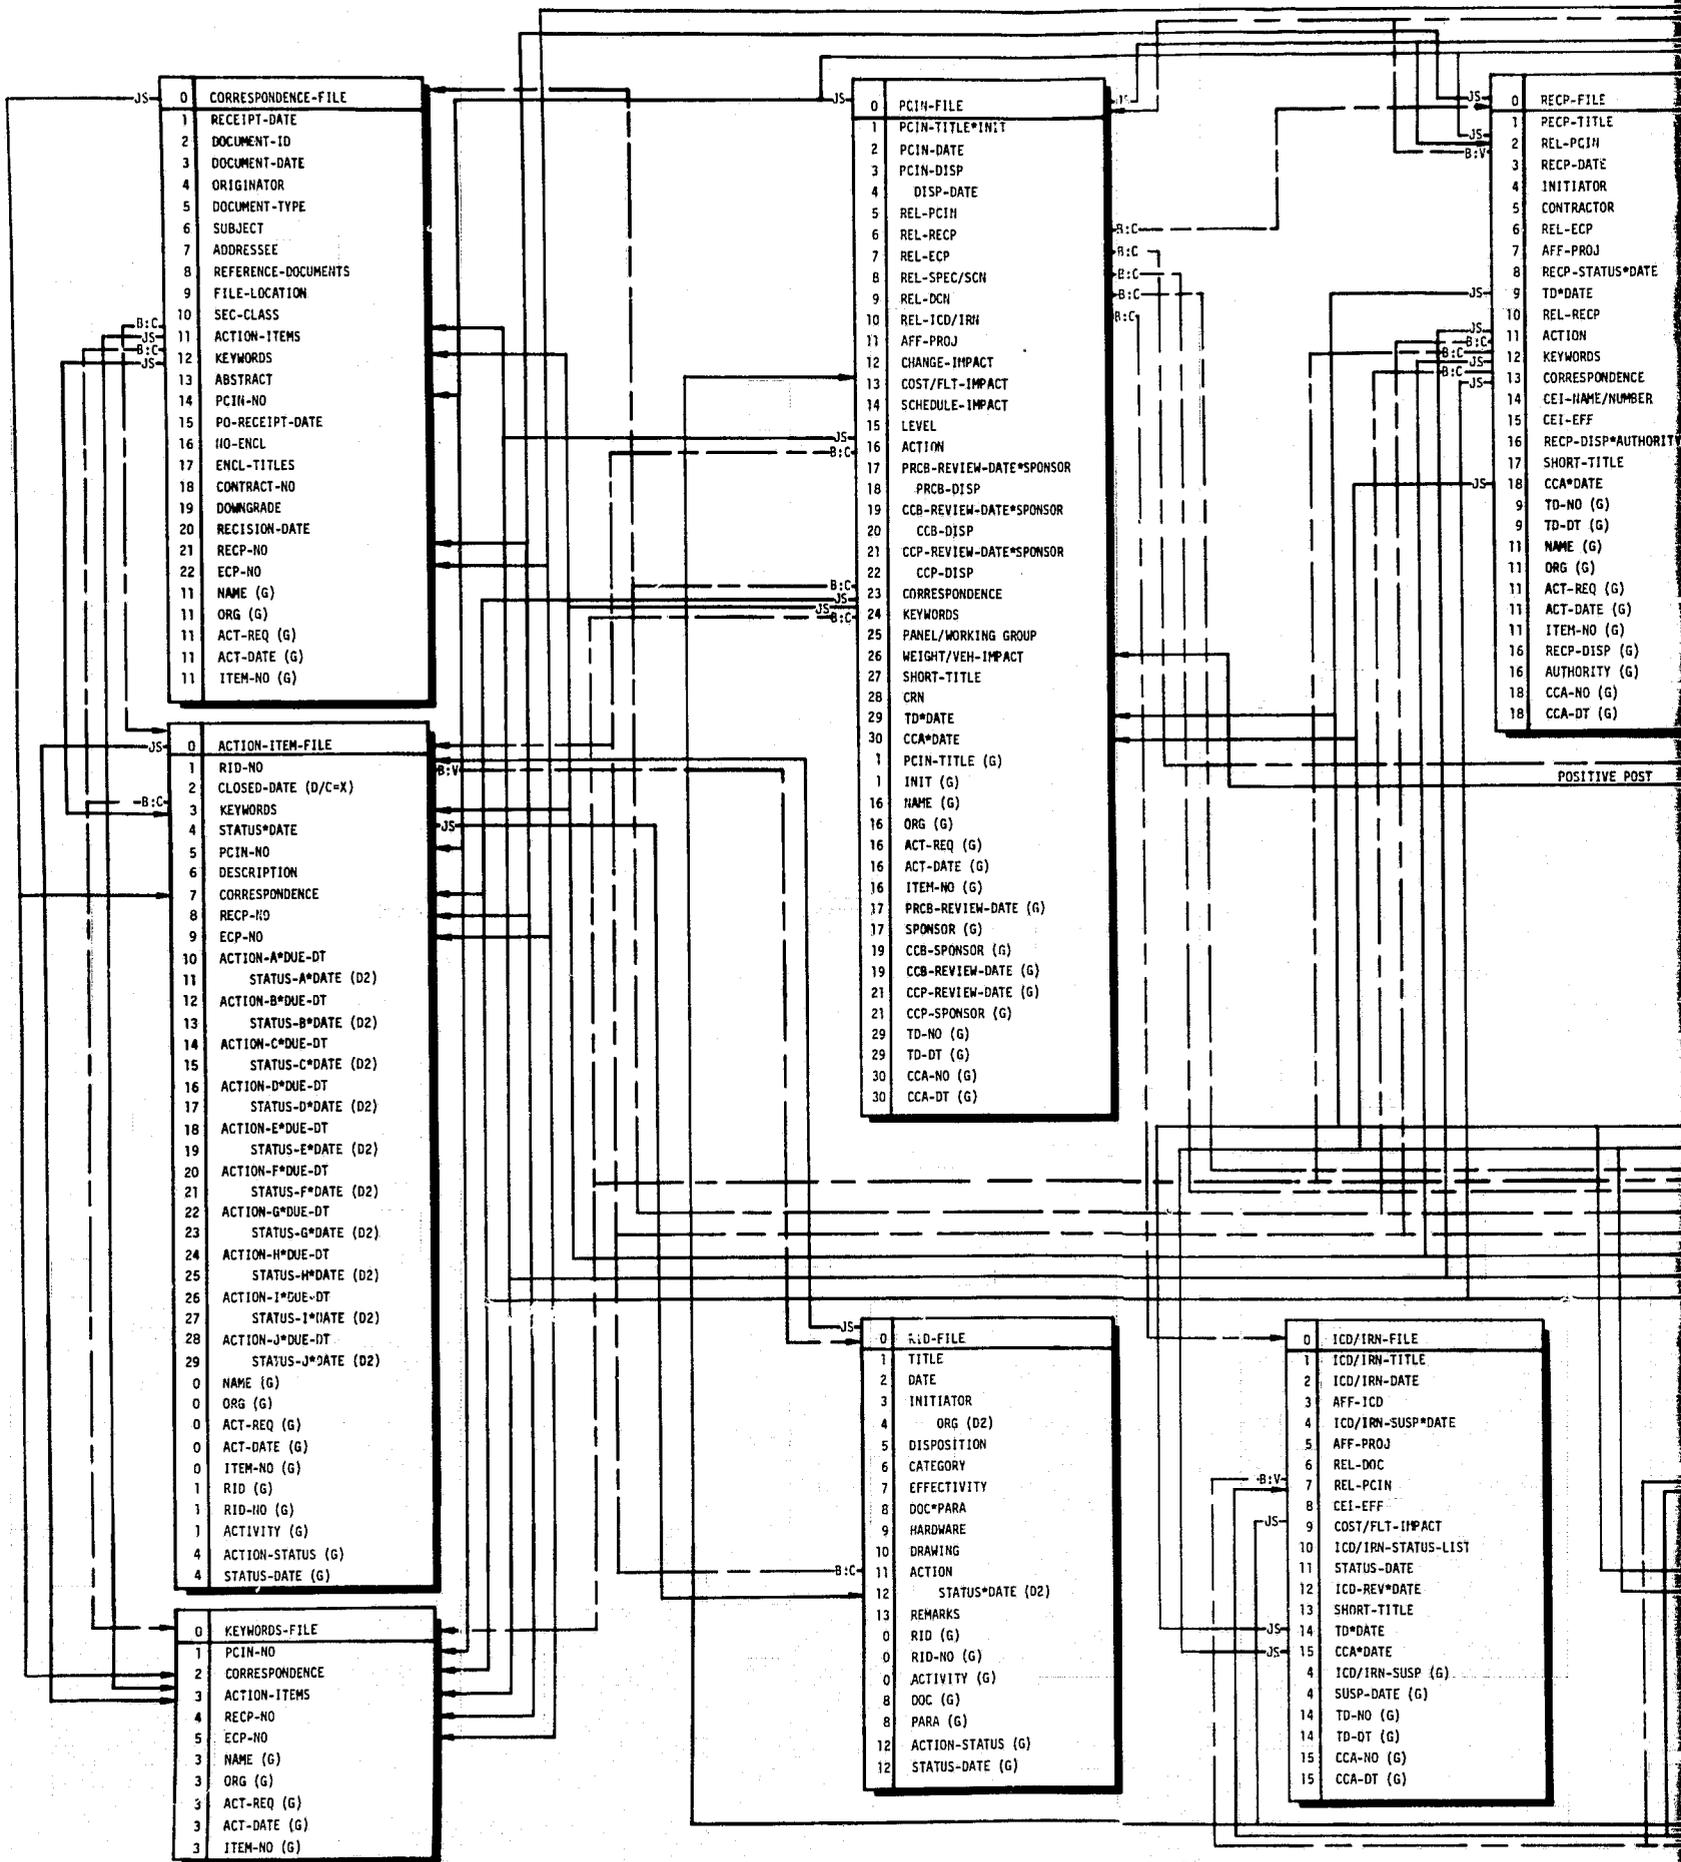

The data that will be contained in the above report will be sorted on PCIN number and will present the PCIN number, PCIN date, PCIN title, related RECP(s), related ECP(s), PCIN disposition, and disposition date. The as of date will be the day-month-year that the report will be generated.

RECP-REPORT as of date

Page No. 001

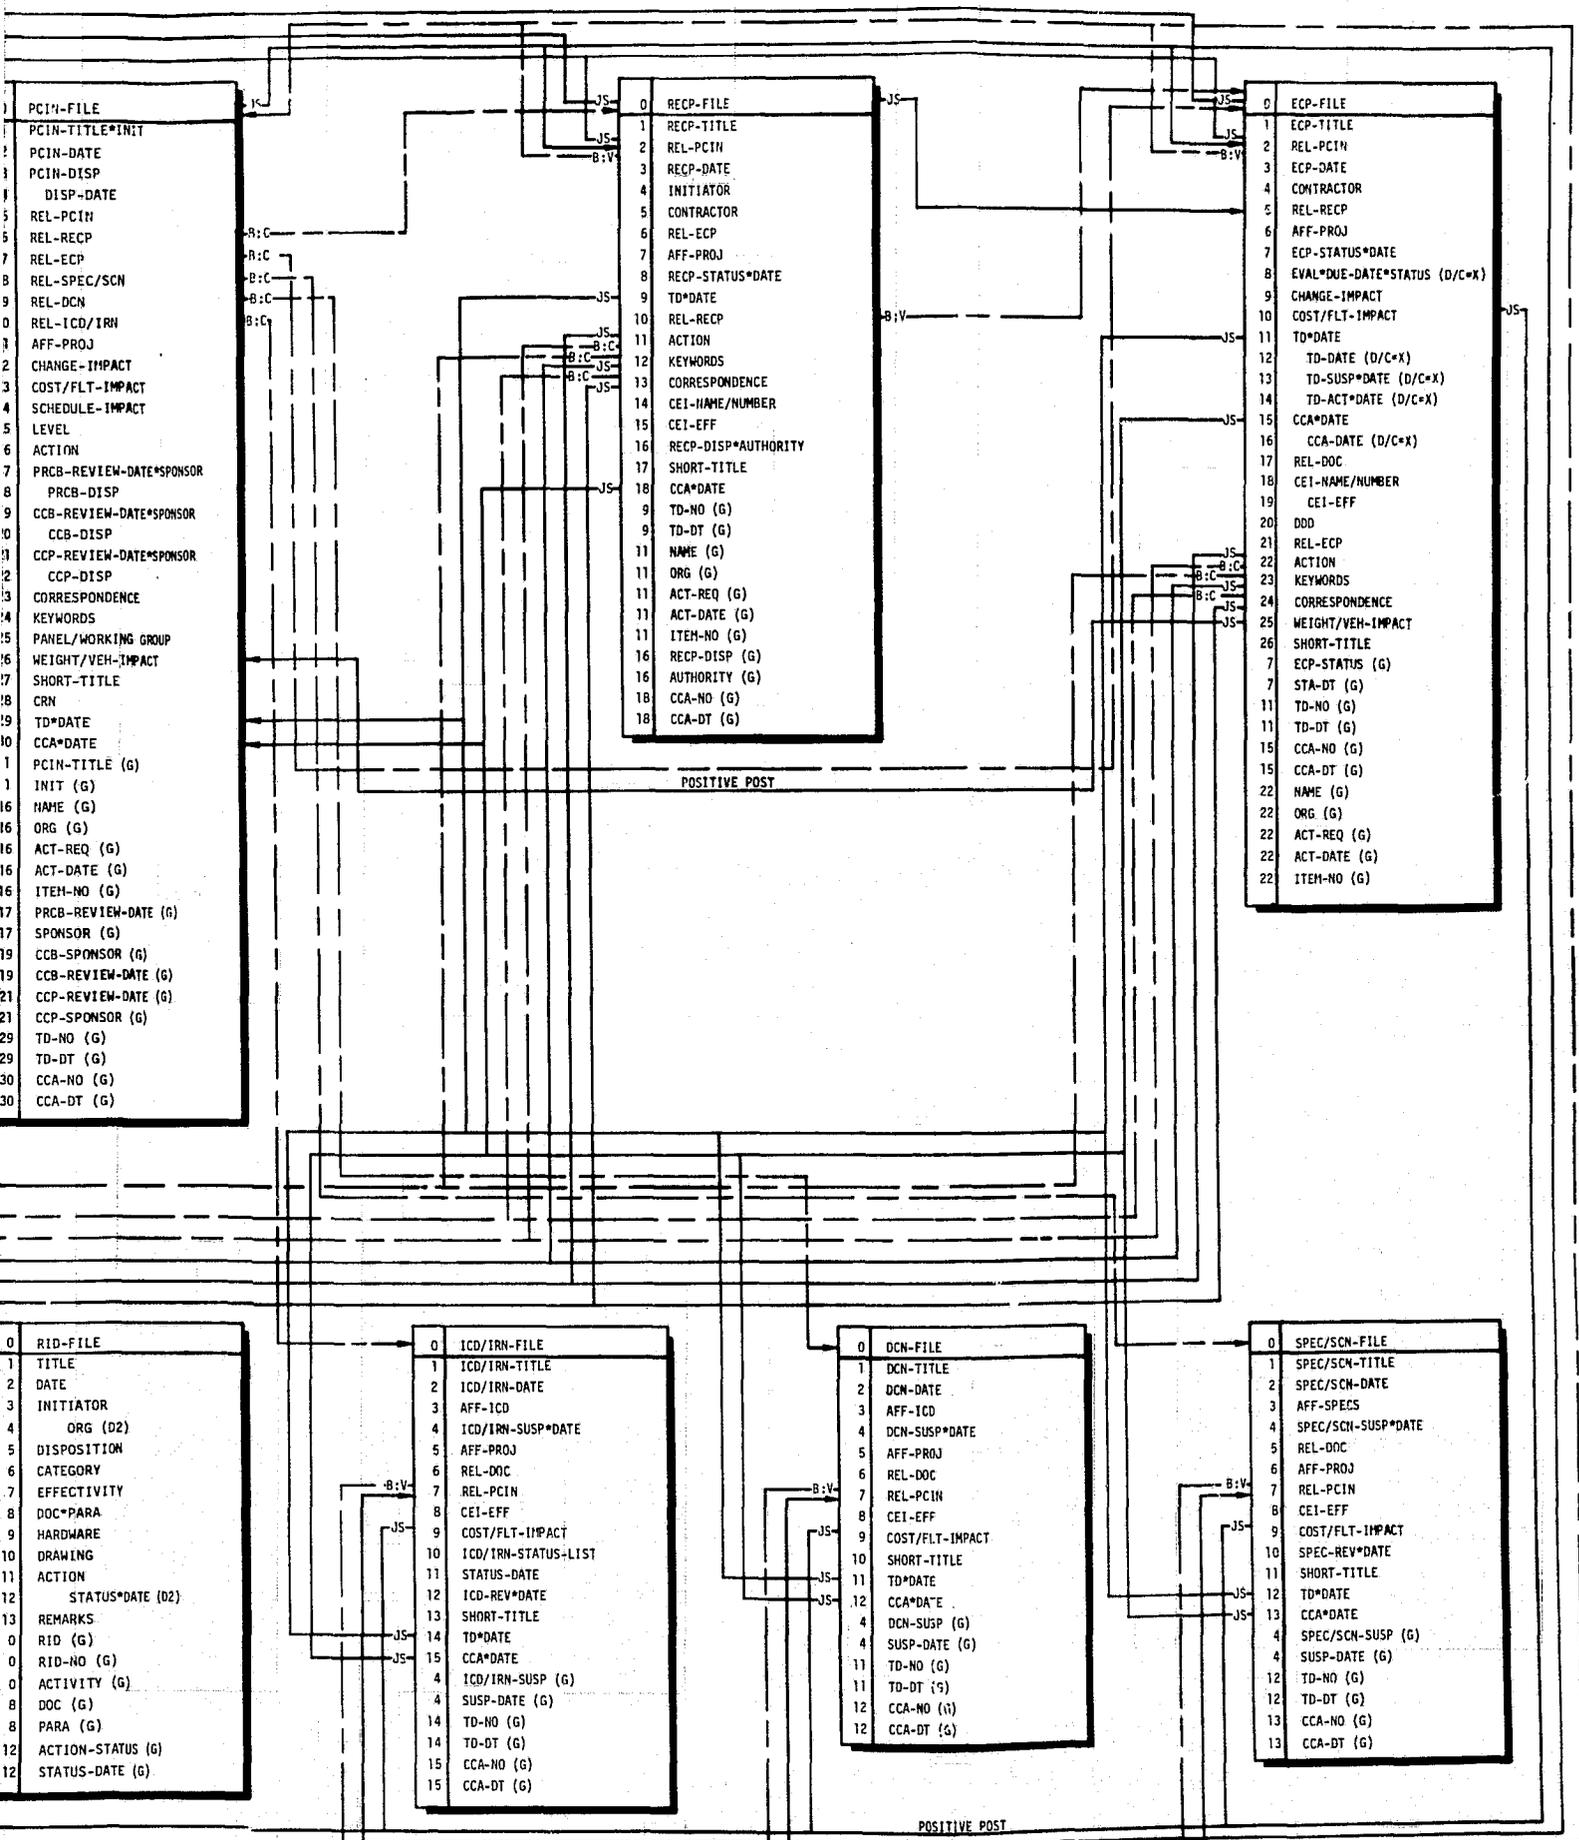

RECP-NO	RECP-DATE	RECP-TITLE	REL-PCIN	REL-ECP	AFF-PROJ	RECP-STATUS	STATUS-DATE
---------	-----------	------------	----------	---------	----------	-------------	-------------

The data that will be contained in the RECP-REPORT will be sorted on RECP number and will present the RECP number, RECP date, RECP

PCIN-FILE

DATA ELEMENT	CHARACTER LENGTH	DATA DESCRIPTION
PCIN-FILE	8	RECORD ID, UP TO 8 DIGIT ALPHA-NUMERIC PROGRAM CHANGE IDENTIFICATION NUMBER (PCIN)
PCIN-TITLE*INIT	54*12	UP TO 54 DIGIT ALPHA-NUMERIC PCIN TITLE WITH UP TO 12 DIGIT ALPHA NAME OF PCIN INITIATOR
PCIN-DATE	11	11 DIGIT ALPHA-NUMERIC DATE PCIN WAS INITIATED
PCIN-DISP	7	7 DIGIT ALPHA PRESENTING DISPOSITION AS OPEN (BEING EVALUATED PRE-BOARD), PENDING (AWAITING ACTION BY CONTRACTOR OR OTHERS-POST BOARD), PARTIAL (PORTION(S) OF THE CHANGE HAS BEEN COMPLETED), WITHDRN (NO REQUIREMENT), CANCEL (NO REQUIREMENT), CLOSED (CHANGE FULLY IMPLEMENTED)
DISP-DATE	11	11 DIGIT ALPHA-NUMERIC PRESENTING DATE OF DISPOSITION
REL-PCIN	8	5 TO 8 DIGIT ALPHA-NUMERIC PRESENTING ALL PCIN'S RELATED TO RECORD ID
REL-RECP	10	UP TO 10 DIGIT ALPHA-NUMERIC PRESENTING REQUEST FOR ENGINEERING CHANGE PROPOSAL (RECP) RELATING TO RECORD ID
REL-ECP	9	UP TO 9 DIGIT ALPHA-NUMERIC PRESENTING ENGINEERING CHANGE PROPOSAL (ECP) RELATED TO RECORD ID
REL-SPEC/SCN	18	UP TO 18 DIGIT ALPHA-NUMERIC PRESENTING SPECIFICATION(S) OR SPECIFICATION CHANGE NOTICE(S) RELATING TO RECORD ID
REL-DCN	18	UP TO 18 DIGIT ALPHA-NUMERIC PRESENTING DOCUMENT CHANGE NOTICE(S) RELATING TO RECORD ID

ASTERISK DEFINITION (*) - CONCATENATION (GIM UNIQUE) LINKS ELEMENTS TOGETHER

title, related PCIN(s), related ECP(s), projects affected, status of the RECP, and the date of the RECP status. The as of date will be the day-month-year that the report will be generated.

ECP-REPORT as of date

Page No. 001

ECP-NO ECP-DATE ECP-TITLE REL-PCIN REL-RECP CCA CCA-DATE TD TD-DATE

The ECP-REPORT will provide the change documentation for the ECP number, ECP date, ECP title, related PCIN(s), related RECP(s), contract change authorization, the date of the contract change authorization, technical direction, and the date of the technical direction. The primary sort is ECP number and the as of date will be the day-month-year that the report will be generated.

OPEN-ACTION-ITEM-REPORT as of date

Page No. 001

PCIN-NO ITEM-NO ACT-REQ ACT-DATE ACTIONEE ORG

The OPEN-ACTION-ITEM-REPORT will provide those actions open with PCIN number, action item tracking number, action required, action due date, the individual the action is assigned to, and the organization of the individual. The primary sort is on action due date. Secondary sorts are PCIN number, Item number, organization, and actionee. The as of date will be the day-month-year that the report will be generated.

PRCB-AGENDA as of date

Page No. 001

PCIN-NO PRCB-REVIEW-DATE PCIN-TITLE RECP ECP SPONSOR

The PRCB-Agenda will provide the automatic report of the next PRCB agenda items. Presented will be the PCIN number, PRCB review date, PCIN title, RECP, ECP, and the name of the

sponsor for the change. The primary sort will be on PCIN number. Secondary sorts will be on RECP number, ECP number, and sponsor. The as of date will be the day-month-year that the report will be generated.

CCB-AGENDA as of date

Page No. 001

The CCB-AGENDA will present the same information as the PRCB-AGENDA except that CCB review date will be reflected.

It is expected that approximately 40 to 50 different types of report formats will be required for this application. Report formatting is a feature of the GIM and can be accomplished on-line. This feature does not require additional storage because the system creates a utility file to provide the report and deletes the utility file when the user signs off.

3.4 CAS Conditional Queries. This application must be capable of limiting the amount of data output for both demand (on-line) and batch (off-line) queries. The amount of change data that is expected in the Space Shuttle Program and the dynamic operation dictates that a method must be provided to allow the user to condition his question so that the output response provides only the information requested. The GIM provides this capability through conditional queries. Some examples of conditional queries are as follows:

Query: 001 * >COUNT DICT PCIN-FILE WITH V/CONV "D" #

Computer Response: NUMBER OF ACCEPTABLE ITEMS = 4

Query: 002 * >LIST DICT PCIN-FILE WITH V/CONV "D" #

Computer Response: PCIN-FILE : 4
