This document contains about 7600 references on the metric system and conversion to the metric system. These references include all known documents on the metric system as of December 1975, the month of enactment of the Metric Conversion Act of 1975. This bibliography includes books, reports, articles, presentations, periodicals, legislation, motion pictures, TV series, film strips, slides, posters, wall charts, education and training courses, addresses for information, and sources for metric materials and services. The bibliography is comprehensively indexed for quick retrieval.
FOREWORD

Work on this document and its forerunners was begun in 1970 when the George C. Marshall Space Flight Center received a number of inquiries on the metric system and metrification. At that time, information in this field was not readily available. To alleviate this shortcoming, a decision was made to collect references on all known metric material. The availability and sources of metric information were to be the guide for the envisioned document to be compiled in cooperation with the U. S. Metric Association, Inc., and the Metric Information Office of the National Bureau of Standards. Since then, many copies have been distributed especially to the education community. To keep up with the rapid progress in this field, several editions have been prepared. This represents the seventh and last edition in this series.

ACKNOWLEDGEMENTS

The author expresses his appreciation for the invaluable assistance and cooperation given by Louis F. Sokol, President, U. S. Metric Association, Inc., and Valerie Antoine, Vice President, U. S. Metric Association, Inc., and Director, Metric Planning, Litton Data Systems, and Nancy Z. Spillman, Director, Center for Economic Education, Associate Professor of Economics, Los Angeles Trade-Technical College.

### NOTES:

Legal Disclaimer: NASA-MSFC is not responsible for the correctness and completeness of the information given in this document. Referencing of persons and organizations producing or selling metric items, or rendering metric services does not represent endorsement of such persons and organizations.

References of the U. S. Metric Association's "Bibliography of the Metric System," by John T. Milek and Valerie Antoine, 1968, are included in this document. The U. S. Metric Association has been authorized to reproduce this document.

Since this document was printed by computer (which does not provide lower case letters), metric symbols used will be given in capital letters even though lower case letters are required in certain cases.

Most of the referenced publications can be obtained from the Library of Congress, Washington, D.C. 20540. Local libraries, in turn, can obtain publications from the Library of Congress through inter-library procedures.

Sources for obtaining the items listed in this document are given as abbreviations, at times, to conserve space. These may consist of items like "GPO," "ANSI," "NBS," "SABS," "CITB," etc. The abbreviations are explained in the section called "Abbreviations Used," and addresses for the sources of the items are given in the section called "Addresses for Information." Headquarters addresses for professional organizations listed as sources of some items are usually obtainable in directories for these groups in public libraries. Books can be obtained from libraries by using the call numbers given on the right-hand margin in Section A.

Additions, corrections and improvement suggestions are invited and will be considered for future editions. They should be sent to MSFC, Marshall Space Flight Center, Alabama, 35812, Code EE01, or U. S. Metric Association, Inc., Sugarloaf Star Route, Boulder, CO 80302. The numerous contributions to this document by many persons and organizations are hereby gratefully acknowledged.

"The aeronautical and space activities of the United States shall be conducted so as to contribute ... to the expansion of human knowledge of phenomena in the atmosphere and space. The Administration shall provide for the widest practicable and appropriate dissemination of information concerning its activities and the results thereof."
—NATIONAL AERONAUTICS AND SPACE ACT OF 1958

NASA SCIENTIFIC AND TECHNICAL PUBLICATIONS

TECHNICAL REPORTS: Scientific and technical information considered important, complete, and a lasting contribution to existing knowledge.

TECHNICAL NOTES: Information less broad in scope but nevertheless of importance as a contribution to existing knowledge.

TECHNICAL MEMORANDUMS:
Information receiving limited distribution because of preliminary data, security classification, or other reasons. Also includes conference proceedings with either limited or unlimited distribution.

CONTRACTOR REPORTS: Scientific and technical information generated under a NASA contract or grant and considered an important contribution to existing knowledge.

TECHNICAL TRANSLATIONS: Information published in a foreign language considered to merit NASA distribution in English.

SPECIAL PUBLICATIONS: Information derived from or of value to NASA activities. Publications include final reports of major projects, monographs, data compilations, handbooks, sourcebooks, and special bibliographies.

TECHNOLOGY UTILIZATION PUBLICATIONS: Information on technology used by NASA that may be of particular interest in commercial and other non-aerospace applications. Publications include Tech Briefs, Technology Utilization Reports and Technology Surveys.

Details on the availability of these publications may be obtained from:
