This bibliography was prepared by the NASA Scientific and Technical Information Facility operated for the National Aeronautics and Space Administration by PRC Data Services Company.
SPECIAL NOTICE

The abstract sections of the monthly supplements of Aeronautical Engineering can be bound separately. Individual abstracts can be located readily by means of the page numbers given at each entry, e.g., p0627 N80-32324. To assist the user in binding Supplements SP-7037 (119) through SP-7037 (130), a title page is included in the back of this Cumulative Index.
A CUMULATIVE INDEX
TO
AERONAUTICAL ENGINEERING
A Special Bibliography

This Cumulative Index supersedes the indexes contained in supplements SP-7037(119) through SP-7037(130).
INTRODUCTION

WHAT THIS CUMULATIVE INDEX IS

This publication is a cumulative index to the abstracts contained in NASA SP-7037(119) through NASA SP-7037(130) of Aeronautical Engineering: A Continuing Bibliography. NASA SP-7037 and its supplements have been compiled through the cooperative efforts of the American Institute of Aeronautics and Astronautics (AIAA) and the National Aeronautics and Space Administration (NASA). Entries prepared by the two contributing organizations are identified as follows:

1. NASA entries by their STAR accession numbers (N80-10000 series).
2. AIAA entries by their IAA accession numbers (A80-10000 series).

HOW THIS CUMULATIVE INDEX IS ORGANIZED

This Cumulative Index includes a subject index, a personal author index, a corporate source index, a contract number index, and a report/accession number index.

HOW TO USE THE SUBJECT INDEX

Two types of cross-references appear in the subject index:

1. Use (U) references indicate that the subject term is not "postable," i.e., not a valid term, and the following term or terms are used instead. For example:

   AIRCRAFT PROTUBERANCES
   U PROTUBERANCES
   FLIGHT PERFORMANCE
   U FLIGHT CHARACTERISTICS

2. Narrower Term (NT) references refer the user to more specific headings in the same subject area, under which additional material on the subject may be found. For example:

   FLOW RESISTANCE
   NT AERODYNAMIC DRAG
   NT FRICTION DRAG
   NT SUPERSONIC DRAG

In addition, a searcher may use the title or title and title extension in the index to narrow further his quest for particular items. This is because subject terms readily include more than one class of document. For example:

   AIRLINE OPERATIONS
   All-weather operations, including
   pilot role, instrument landing
   systems and guidance aids.
   Airport congestion as constraint on
   air travel, considering runway
   capacity and adjusted demand.

illustrates a case where two references on different topics are listed under the same subject term.
HOW TO USE THE PERSONAL AUTHOR INDEX

All personal authors used in the abstract-section citations in the individual Supplements appear in the index. Differences in transliteration schemes may require multiple searching of the index for variants of an author's name. For example:

EMELIANOV, M. D.
and
YEMELYANOV, M. D.

HOW TO USE THE CORPORATE SOURCE INDEX

The corporate source index entries are abridged versions of the corporate sources used in the abstract-section citations in the individual Supplements. The corporate source supplementary (organizational component) does not appear in the index. For example:

BOEING CO., SEATTLE, WASH. MILITARY AIRCRAFT SYSTEMS DIV. (Source citation entry)

BOEING CO., SEATTLE, WASH. (Source index entry)

HOW TO USE THE CONTRACT NUMBER INDEX

All contract numbers that are identified in the abstract-section citations in the individual Supplements appear in this index. Changes by agencies in the style in which contract numbers are presented may require multiple searching for variants. For example:

AF 33(615)-71-C-1758
F33615-71-C-1758

HOW TO USE THE REPORT/ACCESSION NUMBER INDEX

All report numbers that have been assigned by the corporate source, monitoring agency or cataloging activity appear in this index. Variations in initial cataloging may result in different report number series. For example:

TP-924
ONERA-TP-924

IDENTIFICATION OF DESIRED SUPPLEMENT

The abstract and descriptive cataloging for any accession number selected from the indexes may be found in the appropriate Supplement. The page-number range of each Supplement appears on the inside front cover of this index. Once the range of page numbers containing the selected accession number is located in the second column, the desired Supplement number will be found in the first column. For example:

Page 331 will be found in Supplement 125.

AVAILABILITY OF DOCUMENTS

Information concerning the availability of documents announced in the Aeronautical Engineering supplements is found in the Introduction to the most currently issued monthly supplement.
TABLE OF CONTENTS

SUBJECT INDEX ............................................................................. A-1
PERSONAL AUTHOR INDEX .......................................................... B-1
CORPORATE SOURCE INDEX ........................................................ C-1
CONTRACT NUMBER INDEX ......................................................... D-1
REPORT/ACCESSION NUMBER INDEX ......................................... E-1
A-6 AIRCRAFT
Development of the A-6/circulation control wing flight demonstrator configuration
[AD-1081261] p0355 B30-22365
Circulation Control Wing (CCW) Flight Tests
[ASAE P1BB 80-81005] p0640 B30-33339

A-7 AIRCRAFT
The A-7 head-up display reliability program
[AD-1081283] p0251 B30-19539

A-10 AIRCRAFT
Practical method of fatigue crack growth analysis for damage tolerance assessment of aluminum structure in fighter type aircraft
[ATIA P1BB 80-04005] p0095 B30-19346
Development and flight test of a two-place night/adverse weather A-10 for the close-air support and battlefield attack mission
[SAP P1BB 751050] p0194 B30-26632
Night/adverse weather A-10 evaluator program
/A-10/ by W. E. Shaver
p0207 B30-27378
Night/adverse weather A-10 at the cross-roads
[p0509 B30-65499
Positional error analysis, A-10 aircraft on three-axis ground mount
[AD-1081264] p079 B30-12034
Evaluation of the aerodynamic characteristics of a 1/20-scale A-10 model at Mach numbers from 0.30 to 0.75
[AD-1081287] p0083 B30-13336
The A-10 and design-to-cost: How well did it work?
[AD-1081589] p0127 B30-15055
[AD-1081269] p0178 B30-17005
A statistical model for multipath reflection effects of antennas mounted on aircraft
[AD-1081034] p0261 B30-15105
Night/adverse weather A-10 evaluator program
/A-10B/ p0311 B30-21609

A-300 AIRCRAFT
Electroos beam and diffusion welding as an economic procedure for building airbus-flap tracks
[p0061 A30-16970
Failure and damage tolerance - A concept applied to the A-300
[p0607 A30-39580

Status and prospects of the Airbus family program
[DIAB P1BB 80-020] p0552 A30-62677
Protection against wing icing for airbus A300 and A310
[DIAB P1BB 80-045] p0522 A30-46296
In-flight handling qualities investigation of airbus A-310 DFC. Configurations on landing approach using the DFIAR-EBB 320 variable stability aircraft
[DFLIR-PB-79-10] p0394 B30-22319
Value analysis for the aircraft Airbus
[SHIA-792-10105] p0406 B30-27212

AIRCRAFT APPARATUS
Emergency in-flight egress opening for general aviation aircraft
[NASA-TE-80235] p0303 B30-21293
ABRASSION RESISTANCE
Development of improved abradable compressor gas path seal
[AD-1072171] p0046 B30-11474
Development of improved high pressure turbine outer gas path seal components --- abradability and thermal cycling test results
[AD-1081591] p0307 B30-21332
Applications of sprayed coatings
[p0438 B30-25507

ABSORBERS (EQUIPMENT)
Bifilar analysis study, volume 1
[NASA-CH-15927] p0602 B30-31362
ABSORBERS (MATERIAL)
Suppression of self-oscillations in combustion chambers by means of resonance sound absorbers
[p0326 B30-36400

QCSSE fan exhaust bulk absorber treatment evaluation
[ATIA P1BB 80-0987] p0337 A30-35952

ABSORPTION COEFFICIENT
U ABSORPTIVITY
ABSORPTIVITY INDEX
U ABSORPTIVITY
ABSORPTIVITY
Moisture absorption of polyester-E glass composites
[p0381 B30-37171
AC GENERATORS
High power density superconducting generator
[p071 A30-8219
Program for the development of a superconducting generator, phase 2 and 3
[AD-1072093] p0302 B30-10493
Detailed design, fabrication and testing of an engineering prototype compensated pulsed alternator
[ADCL-15213] p0556 B30-29595

ACCELERATED LIFE TESTS
Advanced composite serviceability program - Status review --- inspection of aircraft structures
[p0197 A30-26890
A quick look at current results of accelerated mission tests --- for gas turbine engines
[ATIA P1BB 80-1155] p0339 A30-39941
Generalized approach to aircraft gas turbine engine equivalent test regime determination
[p0564 A30-47613

ACCELERATION
Statistical review of counting accelerometer data for Navy and marine fleet aircraft
[p0340 B30-22308

ACCELERATION (PHYSICS)
BT ANGULAR ACCELERATION
BT HIGH ACCELERATION
BT IMPACT ACCELERATION
BT SPIN REDUCTION
BT PREDICTIVE GUIDANCE FOR INTERCEPTORS WITH TIME LAG IN ACCELERATION
[p0319 A30-32682
Response of nonlinear panels to random loads

ACOUSTIC GENERATORS
U SOUND GENERATORS
ACOUSTIC TURBOPROPs

The nonlinear impedance of perforated walls in the case of two-pore-tune excitation

Unsteady transonic flows in a two-dimensional

diffuser

[A0-409923] p0636 N00-32400

ACOUSTIC MEASUREMENTS

Acoustic measurements of three Prop-Fan models

[IAAE PAPER 80-0995] p0037 A00-35958

The development and operation of the BNC anechoic acoustic test facility

[IAAE PAPER 80-0982] p0392 A00-38633

Wing effect on jet noise propagation

[IAAE PAPER 80-1047] p0394 A00-38646

Noise measurement, noise assessment

[IAAE PAPER 80-04039] p0011 A00-40392

Ground effects on aircraft noise --- near grazing incidence

[NASA-TR-801605] p0075 N00-12820

Advanced turbo-prop airplane interior noise reduction concept definition

[NASA-CR-159668] p0085 N00-13882

Aeroacoustics measuring techniques in or outside turbulent flows

p0125 N00-14976

An experimental study of the structure and acoustic field of a jet in a cross stream --- Area 7 ft by 10-ft wind tunnel tests

[NASA-CR-163246] p0194 N00-15071

Ground run-up control facilities for civil aircraft: A survey

[AD-407736] p0174 N00-16067

Aeroacoustic and acoustic investigations of axial flow fan and compressor blade rows, including three-dimensional effects

[AD-4077772] p0243 N00-19116

Forward aerodynamic performance of a short-swallowed high-tip-speed fan (QF-13)

[NASA-TF-1668] p0357 N00-23100

Classification of operating conditions of turbomachines from solid born sound

p0170 N00-24200

Experimental aerodynamic and acoustic model testing of the Variable Cycle Engine (VCE) textured compressor exhaust nozzle system

[NASA-CR-159716] p0080 N00-26300

Experimental aerodynamic and acoustic model testing of the Variable Cycle Engine (VCE) textured compressor exhaust nozzle system: Comprehensive data report

[NASA-CR-159711] p0440 N00-26301

Community noise exposure resulting from aircraft operations. Volume 7: Acoustic data on aircraft ground runup noise suppressors

[AD-408730] p0502 N00-27837

[NASA-CR-159472] p0566 N00-29297

ACOUSTIC NOISE

Acoustic characteristics of jets issuing from ring-and-needle nozzles

p0327 A00-38404

ACOUSTIC PROPAGATION

Rigorous solutions for sound radiation from circular ducts with hyperbolic horns or infinite plane baffle

p0390 A00-37995

ACOUSTIC PROPERTIES

ACTIVE CONTROL

Digital active controls for L-1011:

- Technical evaluation report on the Fluid Dynamics Panel Symposium on Aerodynamic Characteristics of Controls: active control and control configured vehicle (NASA CR-152377)
- Analytical design and evaluation of an active control system for helicopter vibration reduction and gust response alleviation
  (NASA CR-152377)
- The logic of the electric flight control system experiment on the Concord: active longitudinal stability by active control
  (NASA CR-152363)
- Application of advanced technologies to small, short-haul transport aircraft (NASA CR-152363)

ACTUATORS

Non-electronic aspects of avionic system reliability actuation
- Flight verification of direct digital drive for an Advanced Flight Control Actuation System (AFCAS) in the T-34C aircraft (AD-A081925)
- The Actuator - A new concept in actuation for aerospace mechanisms (AIAA 80-0815)

ACTIVE FILTERS

Adaptive linear filtering in the presence of an evolution noise of poorly known variance:
- Design of an adaptive control system for the flight control system (NASA CR-152160)
Fatigue life prediction of a bonded splice joint [AIAA PAPER 80-0305]
Technology of adhesive bonding of aircraft parts /2nd revised and enlarged edition/ — Russian book
p0157 A80-23066

Honeycomb sandwich joints for primary structure — of aircraft [AIAA 80-0780]
A long European experience - The adhesive bonding of metals [AIAA PAPER MT 79-27]
30 years experience with primary adhesive bonded structures p0569 A80-48077
Primary Adhesively Bonded Structure Technology (PABST): General material property data --- bonding airframes [AD-A077891]
p0248 N80-19268
Primary Adhesively Bonded Structure Technology (PABST): Design handbook for adhesive bonding [AD-A082070]
p0418 N80-24299
The significance of peel stresses in cyclic debonding p0624 N80-24239
Primary Adhesive Bonded Structure Technology (PABST): Phase 3: Tooling, fabrication and quality assurance [AD-A083226]
p0499 N80-27486
The diffusion of water vapour in humid air into the adhesive layer of bonded metal joints [MAR-LIB-TRANS-2030]
p0539 N80-28497
A design study in crack patching [AFL-STEOC-BPIN-376]
p0654 N80-33798
ADHESIVES
The fabrication and testing of prototype OH-1 aircraft windshields manufactured with a sheet interlayer [AD-A077711]
p0238 N80-19080
Primary Adhesively Bonded Structure Technology (PABST): General material property data --- bonding airframes [AD-A077891]
p0240 N80-19268
Primary Adhesively Bonded Structure Technology (PABST): Phase 3: Tooling, fabrication and quality assurance [AD-A083226]
p0499 N80-27486

p0393 A80-36345
Fan noise source location from field measurements [AIAA PAPER 80-1054]
p0396 A80-36648
Ground reflection effects on aircraft low-frequency noise [AIAA PAPER 80-1059]
p0396 A80-36650
On the unsteady, wake induced lift on a slotted airfoil p0516 A80-45980
Aeroacoustic characterization of free jets p0666 N80-12025
Experimental and numerical results on a shear layer excited by a sound pulse [NASA-TM-80163]
p0075 N80-12821
Experimental study of acoustic loads on an upper-surface-blown STOL airplane configuration — Langley full-scale wind tunnel tests [NASA-TW-10977]
p0085 N80-13879
Assessment at full scale of exhaust nozzle to wing size on STOL-OTW acoustic characteristics [NASA-TM-79278]
p0085 N80-13881
Acoustically swept rotor — helicopter noise reduction [NASA-CASD-ARC-11106-1]
p0118 N80-14107
Applications of diffraction theory to aerocoustic --- aircraft noise p0125 N80-14870
Experimental and numerical results of sound scattering by a body --- interaction of aerodynamic noise and fuselage p0125 N80-14873
A second generation instrumentation system for measuring cross coupling derivatives —— from wind tunnel data

Aerofoils down to critical Reynolds numbers and the performance of remotely controlled gliders

Mini-RFP research

Aerodynamics and dynamics of aircraft flight —— Russian book

The effect of the law of control on the dynamics of the longitudinal motion of an aeroplane with a variable-geometry wing

The delta wing in oscillatory gusts

Aerodynamic characteristics of a concave large-aspect-ratio trapezoidal profile in a monochromatic free-solar cell radiator-gas flow in the case of specular-reflection interactions

Wings for human-powered flight

The P-15 wing development program

Conically cambered delta wings in supersonic flow.

I - Basic solutions

Theoretical investigation of the aerodynamics of double membrane sailplaning airfoil sections

Advanced research on helicopter blade airfoils

Types of leeside flow over delta wings

Study on the dynamics of small flight vehicles —— under gust loading

Unsteady aerodynamic measurement techniques for turbomachinery research

Processing and analysis of the data from a two spool gas turbine engine

On approximating the aerodynamic characteristics of a wing with two-element trailing flap

The IMP Lille rotation balance and associated experimental techniques —— for wind tunnel control loss simulation during high angle of attack flight

Synthesis of test results on the Concorde at high angle of attack

The method of matched asymptotic expansions in the hydrodynamics of wings —— Russian book

Computational methods for the design of adaptive airfoils and wings

Aerodynamic assessment of methods to simulate flight inflow characteristics during static testing

Application of aerodynamic characteristics of certain circular plano-convergent configurations to hybrid airships

Contract research on aerodynamic problems of turbomachinery vanes

Experiments with transonic profiles

Aircraft configuration optimization for ground attack mission

Zero-length, slotted-lip inlet for subsonic military aircraft

Theoretical and experimental determination of the aerodynamic characteristics of a helicopter rotor
Variable camber airfoils
Theoretical investigations of the release and trajectories of aircraft stores
Release experiments in DVLRE wind tunnels ---
An aerodynamic method for control and range
Improvement of rotary compressors
The aerodynamic significance of fillet geometry in turbomachinery blade rows
Calculation of wind tunnel characteristics of turbojet engines
Applied aerodynamics of helicopters
Analysis of the influence of the design parameters on the characteristics of an aircraft in spinning nose dive.
Experimental investigation of helicopter aerodynamics /2nd revised and enlarged edition/
A vortex-lattice method for the calculation of the compressible separation flow over delta wings
An experimental investigation of a wing with controlled mid-span flow separation
Full-scale wind-tunnel investigation of the effects of wing leading-edge modifications on the high angle-of-attack aerodynamic characteristics of a low-wing general aviation airplane
Aerodynamic design optimization of a fuel efficient high-performance, single-engine, business airplane
An analysis of thrust-induced effects on the longitudinal aerodynamics of STOL fighter configurations
Lift improvement of an aeroflot by periodic deformations
A streamtube concept for lift - with reference to the maximum size and configuration of aerial spray emmission
Flow studies of slender wing vortices
The aerodynamic characteristics of oscillating airfoils
Geometrical design of double-circular arc blades
Stall/spin flight results for the remotely piloted spin research vehicle
Spin prediction techniques
A dynamic analysis of the motion of a low-wing general aviation aircraft about its calculated equilibriums flat spin mode
Stability of asymmetric equilibriums flight states
A variational technique for smoothing flight-test and accident data
A determination of instrumentation errors from measured data using maximum likelihood method
Quantification of V/STOL equivalent system characteristics through analysis and ground-based simulation
Determination of an oblique wing aircraft's aerodynamic characteristics
Calculation of the supersonic flow past a slender delta wing at angles of attack and sideslip
Contribution to the theory of supersonic flow past three-dimensional wings
Aerodynamic characteristics of configurations consisting of half-cones and flat delta wings with supersonic leading edges
Influence of nonequilibrium on the aerodynamic characteristics of some wing profiles
Cement on 'Calculation of rotor impulse for articulated-rotor helicopters in forward flight'
Aerodynamic investigations of a bypass turbofan stage
Experimental and theoretical investigation of the lifting properties of a wing of deformable profile
Approximate determination of helicopter vertical rate of climb
Analytic design of turbine blade airfoil
The canard configuration and the conventional airplane --- aerodynamic characteristics of wings
The aerodynamic interaction between a close-coupled canard and a sweptback wing in transonic flow
Hydrodynamic development of the engine nacelle combination for the Boeing 767 airplane
High-alpha aerodynamic model identification of the T-2C aircraft using the BBF system identification method
Experimental and theoretical studies on helicopter blade tips at ONERA
A study of compressor blade stall flutter in a straight cascade wind-tunnel
Measurement and prediction of the aerodynamic damping of compressor blades
Experimental and theoretical determination of the transfer function of a compressor
Advanced missile technology. A review of technology improvement areas for cruise missiles --- including missile design, simulation of the configurations, and aerodynamic characteristics
Recent developments in ejeector technology in the Air Force: An overview
Low-speed wind-tunnel tests of a 1/10-scale model of an advanced arrow-wing supercritical cruise configuration designed for cruise at Mach 2.2
Prediction of aerodynamic characteristics of fighter wings at high lift
Aero-acoustic tests of duct-burning turbofan exhaust nozzles
Flight effects on the aero/acoustic characteristics of inverted profile conical nozzles
A digital wind-tunnel measuring unsteady pressure coefficients --- in a wind tunnel

The Forward Swept Ring - a unique design challenge

A simple apparatus for the experimental study of non-steady flow through-augmentor ejector configurations

Aerodynamic design of an extended-range guided bomb

Aerodynamic-structural analysis of dual bladed helicopter systems

Aerodynamic design and performance estimates for a supersonic aerodynamic window for the BAC vacuum system (UCCR-15051)

Aerodynamic analysis of dual bladed helicopter systems

Aerodynamic calculation of the interference effects between a supersonic jet and the fuselage of a swept wing

Aerodynamic study of a short m-shaped subsonic diffuser of a supersonic inlet

Aircraft sizing and performance computer program. Volume 2: Detailed design

A generalized panel method for the analysis and design of arbitrary configurations in incompressible flows --- boundary value problems

A general panel method for the analysis and design of arbitrary configurations in incompressible flows --- boundary value problems

A testing apparatus for subsonic/commercial transport aircraft

A digital wind-tunnel measuring unsteady pressure coefficients --- in a wind tunnel

A simple apparatus for the experimental study of non-steady flow through-augmentor ejector configurations
AERODYNAMIC FORCES

Liquid or gas flows in the case of crisis of drag

Airfoil with minimal relaxation drag

The potential for development of high performance light aircraft

Wind tunnel and flight test drag comparisons for a guided projectile with cruciform tails

Influence of the expansion on the effective thrust of jet engine exhaust nozzles

Induced drag and lift-drag ratio of swept wings at supersonic speeds

Class of shockfree airfoils producing the same lift

The determination of aerodynamic coefficients of a straight cascade whose blades have a small curvature and are very much inclined against the cascade axis

Reduction of aerodynamic drag of external spray boom and nozzles used on DC-6 aircraft

Recommenations for obtaining nozzle/afterbody drag data based on a comparison of wind tunnel and flight data

The annular jet technique for nozzle/afterbody drag data, effects due to sideslip: Nv and Yv

Optimization of the relaxation drag of slender profile arrangements in steady subsonic flow. I - Single profile

Effect of propeller slipstream on the drag and performance of the engine cooling system for a general aviation twin-engine aircraft

Some aspects of aircraft/engine interference for single-jet afterbodies and engine nozzles with particular consideration of boattail drag

Effect of several airflow/nozzle modifications on the drag of a variable-sweep bomber configuration: Conducted in Langley 16 foot transonic tunnel

Prediction of drag coefficients of a supersonic V/STOL configuration with various store arrangements

The minimum induced drag of airfoils

Undercarriage drag prediction methods

Transonic data memorandum: A framework relating the drag-rise characteristics of finite wing/body combinations to those of its basic aerfoil

Computational models for the viscous/inviscid analysis of jet aircraft exhaust plumes --- predicting afterbody drag

Dynamic behavior of a beam drag-force anemometer

The influence of ballistic damage on the aerelastic characteristics of lifting surfaces --- fighter aircraft

Feasibility study of applying laminar flow control to an LTA vehicle

SUBJECT INDEX

WT LIFT

WT ROTOR LIFT

WT SUPERSONIC DRAG

WT WING LOADING

Evaluation of the kernel of an integral equation for a wing performing harmonic oscillations in subsonic flow

Centrifugal forces on a thin wing in hypersonic flight at large angles of attack

Development of a metric half-span model for interference free testing

Numerical investigation of unstable interaction of a supersonic jet with a plane barrier

Experimental investigations on the vibration of blades due to a rotating stall

Preliminary measurements of aerodynamic damping of a transonic compressor rotor

Calculation of unsteady transonic aerodynamic forces on a three-dimensional wing

Wing-body yawing moment and sideforce derivatives due to sideslip: Nv and Yv

A survey of aerelastic problems

Normal force derivative and center of pressure movement due to Mach number on wing-body combinations with triangular wings of the same span and different aspect ratios at supersonic speeds

The aerodynamic forces on airship hulls

Elements of the wing section theory and of the wing theory

General theory of aerodynamic instability and the mechanism of flutter

Exploratory studies of the cruise performance of upper surface blown configuration: Experimental program, high-speed force tests

Exploratory studies of the cruise performance of upper surface blown configurations: Program analysis and conclusions

Development experience in active control technology

Problems of unsteady aerodynamics raised by the use of control surfaces as active controls

An investigation of T-16 nozzle-afterbody forces at transonic Mach numbers with emphasis on support system interference

Alleviation of the side force and the yawing moment acting on a slender cone-cylinder body at high angles of attack, using small jet injection at subsonic and transonic speeds

Direct forces from flight testing

Projectile/sabot discard aerodynamics

Effect of a fin mounted store on the flutter speed of a wing

V/STOL propulsion-induced aerodynamics hover calculation method

Measurement of external forces and torques on a large pointed system

Validity of small scale tests for turret/fairing loads and cavity effects
A study of nonadiabatic boundary-layer aero-optics overview --- laser applications

A simple method for converting frequency domain aerodynamics to the time domain

Heat transfer to a plane nail from a heated, ventilated plane jet --- in lift devices for STOL aircraft

A proposal for aerodynamically actuated self-stabilization time in a cryogenic tunnel for subsonic wind tunnels computational fluid

Thermosructural analyses of structural concepts for hypersonic cruise vehicles

Recent developments in aerothermodynamic test techniques at the AEDC von Karman gas dynamics facility

Hypersonic interference flow experiment design --- investigating aerodynamic heating and loads

Investigation of numerical techniques for predicting aerodynamic heating to flight vehicles

Numerical flow field program for aerodynamic heating analysis. Volume 1: Equations and results

Some aerodynamic considerations related to wind tunnel model surface definition

An experimental method for investigating the mutual aerodynamic interference of aircraft components at supersonic velocities

Numerical simulation of the wind tunnel environment by a panel method

The simulation and modeling of jet plumes in wind tunnel facilities

Development of a metric half-span model for interference free testing

Expected improvements from wind tunnel model testing at high angle of attack

A theoretical method for the simulation of the separation behavior of external stores from a carrier --- fighter aircraft

Calculation of the interaction between an exhaust jet and a high-lift wing

Two dimensional aerodynamic interference effects on oscillating airfoils with flaps in ventilated subsonic wind tunnels --- computational fluid dynamics

A perturbation theory of two-dimensional transonic wind tunnel wall interference

The reduction of dynamic interference by sound-absorbing walls in the BAE 3 foot wind tunnel
Comparison of wind tunnel and flight test investigation of trailing-edge noise on the acoustic power emitted by helicopter rotor.

Theoretical analysis of the transient response of loads calibrations of strain gage bridges on the application of identical aerodynamic functions.

Development and application of a subsonic unsteady pressure measurements on oscillating sections.

The prediction of mass loaded natural frequencies and forced response of complex, rib-stiffened structures.

Experimental study of airfoil trailing edge noise: noise generated aerodynamically.

Examination of the flap-lag stability of rigid articulated rotor blades.

Formulation of coupled rotor/fuselage equations of motion.

Determination of the spin and recovery characteristics of a typical low-wing general aviation design.
Aircraft store separation notion prediction via Computational aerodynamics on large computers

BASA general aviation stall/spin flight testing

A nonlinear unsteady one-dimensional theory for wings in extreme ground effect

Numerical solution of the Navier-Stokes equations for a family of three-dimensional corner geometries

AIRBOBBB SOBVaXLLABCE BADAB APPROACB
On-board precision approach system using HAVSTAB GPS
Overview of recent aero-optics flight tests
A Combined Environments Reliability Test (CERT) facility for testing of airborne equipment
Invicid Flow Field Effects: Experimental results -- optical distortions over airborne laser turrets
Overview of recent aero-optics flight tests
Optical measurements of degradation in aircraft boundary layers
Summary of aerodynamic vibration effects on all turret
Flow visualization techniques in the airborne Laser Laboratory program
Reduction of unsteady wind torques on an open port airborne optical turret
Measurement of external forces and torques on a large pointng system
Aero-optics overview -- laser applications
A 94/183 GHz aircraft radiometer system for Project Storm Fury (NASA-CR-160000)
A flight evaluation of a radar cursor technique as an aid to airborne-radar approaches
The Tornado all-weather high-speed low-level system
Atmospheric Electricity - Aircraft Interaction
AIBEROK RADAR APPROACH
Airborne radar approach flight test evaluating various track orientation techniques
AIBEROK SURVEILLANCE RADAR
2-3A Sentry, airborne, early warning and control for Europe
Required radar ranges, for AW aircraft
Evaluations of the performance of a defuor for an SSR noncooperative system -- Secondary Surveillance Radar
Back-door surveillan. -- Mark Three Biercard heralds imemce AWB boom -- UK surveillance aircraft
Airborne radar approach system flight test experiment (AD-007900)
The application of modeling and simulation to the development of the B-3A
Test and evaluation of the Airport Surveillance Radar (ASR)-8 wind shear detection system, phase 2
AIBEROK/SPACEEROK RADAR
Numerical computation of neighboring optimum feedback control schemes in real-time
Microprocessors as aircraft fatigue monitors
Design and simulation of a helicopter target hand-off computer
On-board precision approach system using NAVSTAR GPS
A simple Navstar receiver
Digital avionics -- from research to production
Self-organizing bus control -- on avionics modules and interfaces
Advanced avionic architectures for the 1980's -- A software view
The TI data flow architectures -- The power of concurrency for avionics
Applications of LSI to digital systems -- An overview of expectations and reality -- signal processing in avionics
Single chip custom LSI microcomputers for avionics applications
An LSI digital signal processor for airborne applications -- onboard computer for radar systems
LSI radar signal processor
A comparison of computer architectures for the NASA demonstration advanced avionics system
DACS -- A prototype general aviation digital avionics control system
An overview of the Sperry flight management computer system for the Boeing 757/767 airplanes
Airborne integrated communications system
DBAS -- A flexible data handling system for P-15 software performance evaluation
The anatomy of an avionics system development and integration laboratory
Software engineering system requirements
Advanced signal processing concepts for multi-function radio systems -- in airborne receiver design
Boreal Packaging for TIES --- Tactical Information Exchange System
The Fault Tolerant Multiprocessor engineering model /A report/ -- computer system design for avionics systems
Experiences of a 50 MIPs video recording and processing system for FLIR images
Advanced digital data processing for onboard missile guidance and control
Aurora /CP-140/ aircraft operational software system
A microprocessor controlled system for determining the height of clouds
Performability evaluation of the SIFT computer -- Software-implemented Fault Tolerance computer onboard commercial aircraft during transoceanic flight
Microprocessors and smart digital computers for avionics navigation systems
Microprocessors and small digital computers for avionics navigation systems
Microprocessor requirements for implementing modern control logic
Software for flight critical digital engine controls
Interfacer design and data handling in a high-vibration environment. IT - Data handling
Educational aspects of multi-microprocessor design used in flight simulation applications
Evaluation of data technology applied to the integrated navigation system of a tactical transport
Redundancy management considerations for a control-configured fighter aircraft triple digital fly-by-wire flight control system
The integrity of onboard computer progress: A solution
An assessment of and approach to the validation of digital flight control systems

Human factors in high-speed low-level accidents: A 15 year review p0559 N80-30013

Light twin-engine aircraft accidents following engine failures [FPHO-117306] p0588 N80-30287

Boundary Layer Separation

A numerical approach to subsonic viscous-inviscid interaction

Separation due to shock wave-turbulent boundary layer interaction

An experimental and numerical investigation of a three-dimensional shock wave separated turbulent boundary layer

The Mitsubishi Diamond I - What are its chances on the current market

A directionally sensitive hot-wire probe for detection of flow reversal in highly unsteady flows

Design of flat plate leading edges to avoid flow separation

Reflex cambered delta wings with leading edge separation

Test study of the vortex regime of highly sweptback wings by extrapolation of the Jones method

Boundary Layer Stability

A study of nonadiabatic boundary-layer stabilization times in a hypersonic tunnel for typical wing and fuselage models

Comparison of methods for prediction of transition by stability analysis

Verification of the experimentally determined laminar-turbulent transition on a swept wing

Nonparallel stability of three-dimensional compressible boundary layers. Part 1:

Stability analysis

Theoretical study of nonadiabatic boundary-layer stabilization times in a cryogenic wind tunnel for typical stainless steel wing and fuselage models

Boundary Layer Transition

Transition in the infinite swept attachment line boundary layer

Laminar separation bubble with transition /theory and experiment/

Comparison of methods for prediction of transition by stability analysis

Experimental studies of the laminar separation bubble on a two-dimensional airfoil at low Reynolds numbers

Boundary layer studies on highly loaded cascades using heated thin films and a traversing probe

Applications of modern hydrodynamics to aeronautics. Part 1: Fundamental concepts and the most important theorems. Part 2: Applications

Investigation of the boundary layer behavior on turbine airfoils

Detection of the transitional layer between laminar and turbulent flow areas on a wing surface --- using an accelerometer to measure pressure levels during wind tunnel tests

Explosatory study of a laminar-turbulent transition process close to laminar boundary layer separation

Aerodynamic characteristics of moving trailing-edge controls at subsonic and transonic speeds

Boundary Layers

ATmospheric Boundary Layer

AT Compressible Boundary Layer

HT Supersonic Boundary Layer

Subject Index

Separation pressure of a turbulent boundary layer in transonic interactions

Experimental studies of the laminar separation bubble on a two-dimensional airfoil at low Reynolds numbers

The effect of finite turbulence spatial scale on the amplification of turbulence by a contracting stream

Three-dimensional interactions and vortical flows with emphasis on high speeds

[p0247 N80-19195]
Dissemination, resuspension, and filtration of carbon fibers — aircraft fires
[p0247 N80-19196]
Evaluation of equipment vulnerability and potential shock hazards — carbon fibers
[p0247 N80-19197]
Large-scale fiber release and equipment exposure experiments — aircraft fires
[p0247 N80-19198]
Surveys of facilities for the potential collection of released carbon from airborne graphite fibers
[p0247 N80-19199]
Assessment of the risk due to release of carbon fiber in civil aircraft accidents
[p0247 N80-19200]
Assessment of risk due to the use of carbon fiber composites in commercial and general aviation
[p0247 N80-19201]
Perspective on the results
[p0247 N80-19202]
The vulnerability of commercial aircraft avionics to carbon fibers
[p0295 N80-20317]
Evaluation of micron size carbon fibers released from burning graphite composites
High voltage spark carbon fiber detection system
[NASA-CR-162995] p0355 880-22367
An assessment of the risk arising from electrical effects associated with the release of carbon fibers from general aviation aircraft fires
[NASA-CR-159206] p0608 880-26391
An assessment of the risk arising from electrical effects associated with carbon fibers released from commercial aircraft fires
[NASA-CR-159205] p0608 880-26392
Advanced risk assessment of the effects of graphite fibers on electronic and electronic equipment
[NASA-CR-159210] p0608 880-26393
An assessment of power system vulnerability to release of carbon fibers during commercial aviation accidents
[NASA-CR-159208] p0608 880-26394

An investigation of possible electrical hazards of carbon fiber composites
[ASA-TH-80217] p0538 880-26446
Carbon fiber counting — aircraft structures
[ASA-TH-80217] p0538 880-26446
Statistical aspects of carbon fiber risk assessment modeling — fire accidents involving aircraft
[NASA-CR-159318] 880-29432
Carbon/graphite composite material study — risk and hazards of fiber release
[PB80-175235] p0555 880-29442
A carbon fiber exposure test facility and instrumentation
[NASA-TH-80220] p0607 880-31882
Composite rotor blades for large wind energy installations
[NASA-TH-75822] p0611 880-31881
A review and analysis of fiber counting methods
[AD-A008240] p0637 880-32488
Carbon/graphite fiber risk analysis and assessment study: Assessment of risk to the Lockheed Model L-1011 commercial transport aircraft
[NASA-CR-159201] 880-33487
Carbon/graphite fiber risk analysis and assessment study: An assessment of the risk to Douglas commercial transport aircraft
[NASA-CR-159212] 880-33488
Experimental and analytical studies for the NASA carbon fiber risk assessment
[NASA-CR-159214] 880-33490
Electronic equipment vulnerability to fire released carbon fibers
[NASA-TH-80219] 880-33491
Carbon fiber plane sampling for large scale fiber tests at Dryden Proving Ground — fiber release during aircraft fires
[NASA-CR-159215] 880-33492
Process modifications for improved carbon fiber composites: Alleviation of the electrical hazards problem
[NASA-CR-163631] 880-33494
Carbon Monoxide
Circumpolar measurements of ozone, particles, and carbon monoxide from a commercial airliner
[p0247 A80-21460]
Indoor and outdoor carbon monoxide measurements at an airport
[p0247 A80-22942]
Carbon steels
Manufacture of low carbon astrology turbine disk shapes by hot isostatic pressing. Volume 2, Project 1
[NASA-CR-135410] 880-21329
Carbon tetrachloride
Gladstone-Dale constant for CF4 experimental design
[NASA-TH-80228] 880-24515
Advanced concept in aircraft crash firefighting using carbon tetrachloride

CERNS SYSTEM
On the dynamics of compressor surge

Effect of non-rotating passages on performance of centrifugal pumps and subsonic compressors

Aerodynamic performance of a centrifugal compressor with vaneless diffusers

A contribution to the design of radial compressor impellers with double-curved blades

Influence of the heterogeneity of flow at the rotor outlet on the performance of the diffuser of a centrifugal compressor

On the pressure losses due to the tip clearance of centrifugal compressors

Analysis of rotating stall in vaneless diffusers of centrifugal compressors

Status of centrifugal impeller internal aerodynamics. I - Inviscid flow prediction methods. II - Experiments and influence of viscosity

On centrifugal compressor output regulation by iris diaphragms

Identification of noise sources in FC centrifugal fan rotors

On the characteristics of centrifugal-reciprocating machines - cryogenic coolers

Extension of the operating range of a high compression ratio centrifugal compressor

Analysis and identification of subsonic resonance vibration in a high pressure parallel flow centrifugal compressor

Subsonic instability of a geared centrifugal compressor of overhang design

Asynchronous vibration problem of centrifugal compressor

Effect of fluid forces on rotor stability of centrifugal compressors and pumps

Centrifugal Force

Rotating stall in a vaneless diffuser of a centrifugal fan

Theoretical and experimental parameter studies of oscillating turbine blades in a centrifugal force field

Centrifugal Pumps

Effect of non-rotating passages on performance of centrifugal pumps and subsonic compressors

Effect of fluid forces on rotor stability of centrifugal compressors and pumps

Fluid forces on rotating centrifugal impeller with whirling motion

CIRCULAR CYLINDERS

Some introductory concepts based on the unsteady flow about circular cylinders

CIRCULAR PLATES

On wings of circular design [5]

CIRCULAR POLARIZATION

A broadband, circularly polarized, phase steered array

CIRCULAR TUBES

Wind tunnel tests of a tubular supersonic inlet for high speed aerodynamic characteristics of wings of aspect ratios 3 and 4 equipped with high lift systems

CIRCULATION

Geometry of circulation zones downstream of bluff bodies and gasdynamic screens of various forms and blockage ratios

Experimental investigation of a circulation control alleron

CIRCULATION CONTROL AIRFOILS

Advanced circulation control wing system for Navy STOL aircraft

Development of high lift devices for application to advanced Navy aircraft

CIRCULATION CONTROL ROTORS

A hybrid composite helicopter main rotor blade employing pneumatic lift control

CIVIL AVIATION

Electronic instrumentation in civil aviation

The market for large civil helicopters

Operation of airborne equipment and flight safety

Radio and optical flight support systems and communications in civil aviation

The role of technology as air transportation faces the fuel situation

Glider accidents in France in the last ten years

Maintenance of aircraft, helicopters, and aircraft engines /2nd revised and enlarged edition/ Russian book

Airport ground traffic services in the West German Republic and the US open-air policy - Critical remarks concerning Article 9 of the supplementary agreement of Nov. 1. 1978 to the German-American Air Traffic Agreement of 1955

Safety in aviation; achievements and targets

AEROPP - Message and data switching systems for aeronautical operations

SUBJECT INDEX

Shipping by air - Is the value of your time worth it

Production of wide-body aircraft — Russian book

Outlook for Global Positioning System (GPS) in civil aircraft operations

Multirole cargo aircraft options and configurations

The introduction of new sytems in international civil aviation

Adding more automation to the air traffic control system

Coming civil transport aircraft with 'active' control elements

Evidence in aircraft accident investigation and its evaluation

Determination of aircraft life factors according to GLS-2 requirements

Basic issues of reliability in aviation

The future of civil turbo-fan engines

Long range very large aircraft supply system for civil/military application with special emphasis on water based aircraft

Technology requirements as derived from accident rate analysis

Fuel consumption per units of transport work in airliner operation

Airworthiness certification of composite components for civil aircraft - The role of non-destructive evaluation

Transponders in civil aviation

COMPUTERIZED SIMULATION

Flight through thunderstorm outflows
Design and simulation of a helicopter target hand-off computer
A simulation model for aircraft sequencing in the near terminal area
On some realistic applications of identification methods
Error analysis of an algorithms for magnetic compensation of aircraft—microprocessor
Numerical derivation of linear perturbation model for nonlinear real-time vehicle simulations - A means of validation and increased credibility. --- computerized simulation for aircraft control:p0579 80-49838

Computer simulation of engine systems for powerplant subassembly units:p0595 80-15086

Analytical modeling of the dynamics of aircraft:p0558 80-15088

Computer simulation of engine systems --- for aircraft design:p0092 80-16253

Regression techniques applied to parametric turbine engine simulations:p0092 80-16253

Acoustic radiation from axisymmetric ducts - A comparison of theory and experiment:p0093 80-16268

Correlation of predicted longitudinal aerodynamic characteristics with full-scale wind tunnel data on the AV-8B aircraft:p0096 80-16268

Multiple aircraft combat performance evaluation system:p0096 80-16356

Code optimization for solving large 3D EMP problems --- electromagnetic scattering by aircraft structures:p101 80-19764

A simple design synthesis method used to estimate aircraft gross weight:p105 80-20667

Computer simulation of an air cargo small package sorting system:p106 80-20866

Covariance simulation of BCAS - An aircraft collision avoidance system:p107 80-20915

Numerical simulation of supersonic inlet using a three-dimensional viscous flow analysis:p108 80-20969

System analysis for planning of air fleets and maintenance facilities:p153 80-21395

Computational and simplified analytical treatment of transonic wing-fuselage-pylon-store interactions:p157 80-23013

Simulated transonic flows for aircraft with nacelles, pylons, and winglets:p162 80-23933

Design of an electronic model of a microwave aircraft landing system:p193 80-26471

Simulation defines alternatives for Copenhagen terminal expansion:p204 80-27224

Have Bounce --- Validation of computer simulations of F-4 dynamic response to multiple runway repairs:p208 80-27382

Computational techniques for EMP interactions:p212 80-27777

Flight simulation techniques - The quest for realism:p231 80-31335

Computer simulation as a first step towards computer-aided design of fluid power systems:p373 80-36467

Prospects for computer modeling in ramjet combustors:p400 80-38962

The study of an RFP dipole antenna type simulator:p406 80-39411

Aircraft operations and logistics simulation:p408 80-40362

A theoretical method for the simulation of the separation behavior of external stores from a carrier --- fighter aircraft:p0456 80-41900

Importance of simulations of weapon and load drops in the testing of attack aircraft:p0456 80-41900

Pilot-aircraft system response to wind shear:p0455 80-41900

Analysis of air traffic control communications performances via computer simulation experiments:p0567 80-45660

A hybrid simulator for the BGM-10C multipurpose RFP:p0578 80-49828

Aircraft simulation data management - A prototype system:p0578 80-49832

Numerical simulation of engine systems for powerplant subassembly units:p0595 80-15086

Analytical modeling of the dynamics of aircraft:p0558 80-15088

Computer simulation of engine systems --- for aircraft design:p0092 80-16253

Regression techniques applied to parametric turbine engine simulations:p0092 80-16253

Acoustic radiation from axisymmetric ducts - A comparison of theory and experiment:p0093 80-16268

Correlation of predicted longitudinal aerodynamic characteristics with full-scale wind tunnel data on the AV-8B aircraft:p0096 80-16268

Multiple aircraft combat performance evaluation system:p0096 80-16356

Code optimization for solving large 3D EMP problems --- electromagnetic scattering by aircraft structures:p101 80-19764

The document contains a list of subjects and control units, which seem to be related to aerospace engineering and control systems. The subjects listed include aerodynamics, flight control, and related technologies. The control units listed are likely references to specific research studies or publications on the subject matter. The text appears to be a table of contents or index for a larger document, possibly a book or a report on aerospace engineering topics. The language is technical and specialized, typical of academic or technical literature in the field of aerospace engineering.
COBTBCTIOB OF V/STOL EQUIVALENT SYSTEM CHARACTERISTICS THROUGH ANALYSIS AND GROUND-BASE SIMULATION (FAAA-80-1629) p0520 A80-45916

The flying qualities of aircraft with augmented longitudinal and directional stability (AD-A078340) p0291 A80-20265

Design of a nonlinear adaptive filter for suppression of shuttle pilot-induced oscillation tendencies (NASA-TM-81349) p0309 A80-21355

Precise controllability of the YF-17 aircraft (NASA-TM-81677) p0366 B80-23277

Measurement of the handling characteristics of two light airplanes (NASA-TM-81636) p0436 B80-25345

Experimental pilot simulator study of the effects of winglets on handling qualities of a representative agricultural airplane (NASA-TM-81017) p0536 B80-28370

Evaluation of lateral and directional characteristics and spinning behavior (NASA-TM-81158) p0597 B80-31336

COBTBCTIOB OF V/STOL AIRCRAFT

Application of aerodynamic characteristics of certain circular plane-convex configurations to hybrid airships (CONVEXITY p0404 A80-39300)

ducts using the finite difference method
[AD-074233] p0125 880-14853
Experimental evaluation of a low emissions high
density performance duct burner for Variable Cycle
Engines (VCM) [NASA-CR-159694] p0160 880-17074

DUCTED FANS
Fan noise source location from field measurements
[AIAA PAPER 80-1054] p0394 880-38688
Cross flow fan experiment development and finite
element modeling p0201 880-10098
Acoustic analysis of aft noise reduction
techniques measured on a subsonic tip speed 50.8
cm (twenty inch) diameter fan --- quiet engine
program [NASA-CR-130891] p0133 880-15102
Investigation of fan blades shroud mechanical
damping [AD-078439] p0243 880-19120
On the sound field generated by a fan in a
hard-walled baffled duct with uniform flow
[BLD-79-7804-9] p0800 880-23106
High bypass turbofan component development.
Amendment 1: Small fan redesign
[AD-089067] p0648 880-33013

DUCFED FLOW
Acoustic radiation from axisymmetric ducts --- A
comparison of theory and experiment
[AIAA PAPER 80-0097] p0093 880-18286
Dispersion of sound in a combustion duct by fuel
droplets and soot particles p0108 880-20953
An analytical and experimental study of a short
S-shaped subsonic diffuser of a supersonic inlet
[AIAA PAPER 80-0386] p0108 880-20970
Effect of non-rotating passages on performance of
centrifugal pumps and subsonic compressors
[AD-1073707] p0210 880-27733
Evaluation of an analysis for axisymmetric
internal flows in turboachinery ducts
[NASA-CR-80211] 880-27742
Numerical solution of the steady flow in
turboachinery blades and ducts of arbitrary shape
[AIAA PAPER 80-38253] p0390 880-38253
Some aspects of the thermodynamics of duct jet flows
--- in turboachinery engines p0525 880-68686
High speed ejectors --- investigation of ejector
performance in compressible flow
[AD-0773378] p0081 880-13051

DUTILITY
Fracture analysis of ductile materials
[AD-1073707] p0618 880-52182
DYNAMIC MODELS

Validity of small scale tests for turret/fairing loads and cavity effects... p0430 B80-25611
Pavement evaluation and overlay design using vibratory nondestructive testing and layered elastic theory. Volume 1: Development procedure... [AD-A087186] p0591 B80-30808

DYNAMIC MODELS
A multiple transfer function model for air traffic control systems... p0151 A80-21687
Enhancing dynamic model fidelity for improved prediction of turbofan engine transient performance... [AIAA PAPER 80-1083] p0397 A80-38900
A computerized VSTOL/small platform landing dynamics investigation model... [AD-A073507] p0079 B80-13033
General aviation dynamics: The impact of cost recovery... p0488 B80-27300
A dynamic model of the air transport system... p0488 B80-27301

DYNAMIC MODULUS OF ELASTICITY
Shock loading of reinforced splice joints of ultra high modulus graphite/epoxy cone frustums... p0329 A80-34811

DYNAMIC PRESSURE
Estimation of dynamic windburst pressure on aircraft wing sections... [AD-A080557] p0304 A80-21297

DYNAMIC PROGRAMMING
Differential game of interception and aerial combat: Solution by differential dynamic programming... p0315 B80-22232

DYNAMIC PROPERTIES
U DYNAMIC CHARACTERISTICS
DYNAMIC RESPONSE
ST TRANSIENT RESPONSE
Have Bounce --- validation of computer simulations of F-4 dynamic response to multiple runway repairs... p0208 A80-27382
Non-linear dynamic analysis of rotors by finite element method... p0493 A80-40730
The effects of inhomogeneities in atmospheric turbulence on the dynamic response of an aircraft... [AIAA 80-1614] p0518 A80-45904
Flapping response of lifting rotor blades to spanwise uniform random excitation... p0518 A80-52321
Flying qualities research for highly augmented aircraft... [RL-562] p0027 B80-10194
A comparison of the pitching and plunging response of an oscillating airfoil... [NASA-Cr-3172] p0304 A80-11030
Linear systems analysis program, L224(QB). Volume 1: Engineering and usage... [NASA-Cr-2861] p0122 B80-14137
Unsteady flow and dynamic response analyses for helicopter rotor blades... [NASA-Cr-159100] p0123 B80-14355
Application of random time domain analysis to dynamic flight measurements --- B-1 aircraft... p0173 B80-16226
Initial study of the response of an aircraft to lateral gusts... [NASAP-TR-79-03] p0181 B80-17080
Calculation of natural frequencies and mode shapes of mass loaded aircraft structures... p0184 B80-17278
Damping in tapered annular seals for an incompressible fluid... [NASA-TP-1646] p0299 B80-19495
Axial flow rotor unsteady performance... p0326 A80-23308
Dynamic behavior of a beam drag-force anemometer... [NASA-TP-1667] p0426 B80-24595
Aircraft dynamic response to damaged runways... [AGARD-R-680] p0433 B80-25325
UK approach to aircraft dynamic response on damaged and repaired runways... [DO/ST-13151/F5] p0639 B80-32725

SUBJECT INDEX
Parameters affecting aircraft performance on runways in bad condition... p0434 B80-25327
Rotor-bearing dynamics technology design guide. Part 6: Cylindrical roller bearings... [AD-A082355] p0400 B80-25662
Recent advances in helicopter vibration control... p0485 B80-26687
Dynamic stall on advanced airfoil sections... [AD-A085809] p0541 B80-29252
A time response approach to equivalent aircraft of... [AD-A085873] p0546 B80-29291
Flow induced spring coefficients of labyrinth seals for application in rotor dynamics... p0557 B80-29717
Pavement evaluation and overlay design using vibratory nondestructive testing and layered elastic theory. Volume 1: Development procedure... [AD-A087186] p0593 B80-30808
Mathematical modeling of linear and non-linear aircraft structures... [AGARD-B-687] p0595 B80-31326
Effects of nonlinearities on wing-stall flutter... p0596 B80-31320
Gust response analysis by modal decomposition of the gust impingement distribution... p0605 B80-31406
Application of identical aerodynamic functions to aircraft structural crashworthiness... p0685 B80-33385
Investigation of vibration reduction through structural optimization... [AD-A089177] p0667 B80-33403
Flexible response to simulated disturbances of the model and fan inlet guide vanes in a transonic tunnel... [NACA-TR-81869] p0649 B80-33418
Nonstationary random response of structural systems to aerodynamic wind forces... p0653 B80-33775

Elasticity

Recent development of a jet-diffuser ejector [AIAA PAPER 80-0231]
Recent developments in high-speed aircraft [NASA-CP-2093]
Recent developments in ejector technology in the Air Force: An overview [NASA-CP-2094]
Integration of ejectors into high-speed aircraft
Some tests on small-scale rectangular throat ejector
Augmenting ejector endwall effects --- for V/STOL aircraft
Entrainment characteristics of unsteady subsonic jets --- for V/STOL aircraft
A simple apparatus for the experimental study of non-steady flow thrust-augmentor ejector configurations
Considerations of some critical ejector problems --- for the V/STOL aircraft
Interface concerns of ejector integration in V/STOL aircraft
Reaction control system augmentation for V/STOL aircraft
Design and test of a prototype scale ejector wing
The external augmentor concept for V/STOL aircraft
The XFV-12A Thrust-Augmented Wing (TAW) prototype aircraft
Evaluation of an ejector powered engine simulator at transonic Mach numbers
High speed ejectors --- investigation of ejector performance in compressible flow
An experimental study of static thrust augmentation using a 2-D variable area ejector
Theoretical performance for non-steady ejector thrust augmentors

Elastic Bar

A single-step method of optimizing statically indeterminate minimum-volume systems
Transverse bending of elastically rim-stiffened three-layer cantilever plates of variable layer thickness
Transverse bending of cantilevered three-layer plates with layers of variable thickness stiffened along the contours by elastic diaphragms
Free vibrations of a turbomachine rotor as a system of structural rotational symmetry
Synergy variational formulation of harmonic vibrations problem by coupling primal and dual principles. Application to fluid-structure coupled systems

EVALUATION

NT TRAINING EVALUATION

A new technique to evaluate performance of jet fuel filtration equipment
[NASA-TP-15747] p0577 A80-49714

Hanned engineering flight simulation validation,
Part 1. Simulation requirements and simulator motion system performance
[AD-A071394] p0311 A80-10235

Evaluation of the potential for reduced longitudinal spacing on final approach
[AD-1076434] p0169 A80-16049

Experiences with a Flying Data Recording System (FDRS) in German airforce fighter bomber wing after a troop tail
[AD-A074572] p0249 A80-25276

Localization of faults in jet engines by calculation of component characteristics
[AD-A074573] p0249 A80-25279

Description of the British Civil Aviation airworthiness data recording program
[AD-A074574] p0300 A80-25284

Evaluation of laminar flow control system concepts for subsonic commercial transport aircraft
[NASA-CR-159250] p0602 A80-31384

System description for the Airborne-Omega Data Bank
[AD-A087606] p0632 A80-32373

EVAPORATION

Development and characterization of an evaporative cold plate for thermal control of avionic equipment
[AD-A09-15614] p0055 A80-15229

Shielding effects of a meteoroid surface by reflecting and evaporating molecules. III - The case of strong shielding - The overall picture of the phenomenon
[p0373 A80-36457

EVAPORATIVE COOLING

NT FILM COOLING

EVASIVE ACTIONS

An approximate feedback solution of a variable speed non-linear pursuit-evaslon game between two airplanes in a horizontal plane
[AIAA 80-1597] p0517 A80-45890

EXECUTIVE AIRCRAFT

U GENERAL AVIATION AIRCRAFT

U PASSENGER AIRCRAFT

EXHAUST DIFFUSERS

Recent development of a jet-diffuser ejector
[AIAA PAPER 80-0231] p0093 A80-18277

Study of the nature of the working process of a gas turbine engine exhaustor with staged heat rejection
[p0565 A80-47431

An experimental investigation of two large annular diffusers with swirling and distorted inflow
[AIAA-TP-1628] p0219 A80-17994

EXHAUST EMISSION

Pollutant emissions from 'partially' mixed turbulent flames
[p0010 A80-11793

The effect of local parameters on gas turbine emissions
[AIAA PAPER 80-1200] p0401 A80-39006

Experimental and analytical evaluation of 3-dimensional exhaust flames
[AIAA PAPER 80-1399] p0507 A80-44152

Emission reduction
[p0028 A80-10207

Exhaust emissions characteristics for a general aviation light-aircraft Teledyne Continental Motors 6-205-B piston engine
[AD-A074348] p0080 A80-13042

Exhaust emission reduction for intermittent combustion aircraft engines
[NASA-CR-159577] p0121 A80-18130

Air pollution of a general aviation light-aircraft
[AD-A080433] p0170 A80-16060

Exhaust emissions characteristics for a general aviation light-aircraft Avco Lycoming TIO-540-J3BD piston engine
[AD-A075355] p0179 A80-17070

Experimental evaluation of a low emissions high performance duct barrier for Variable Cycle Engines (TCE)

EXHAUST GASES

[NASA-CR-159694] p0180 A80-17074

Measurements of jet dispersions simulated in an aeronautical wind tunnel
[AD-1076578] p0185 A80-17401

Centre of particulate emissions from turbine engine test cells by cooling water injection
[AD-1075947] p0231 A80-18567

Exhaust emissions characteristics for a general aviation light-aircraft Teledyne Continental Motors (TCE) GT210-320-K piston engine
[AD-A080434] p0202 A80-20270

Potential environmental effects of aircraft emissions
[UCBL-5286] p0427 A80-24887

Evaluation of HC (hydrocarbon) control strategies for general aviation piston engines
[PHBO-15532] p0486 A80-24971

Exhaust emissions characteristics for a general aviation light-aircraft Avco Lycoming C10-10-320-D1D piston engine
[AD-A080433] p0535 A80-28364

Pollution by aircraft traffic. Pollution forecast model in the vicinity of airports. Application to various airports: Orly and Noisyn-sur- France
[p0540 A80-28952

EXHAUST FLOW SIMULATION

NT FLIGHT SIMULATION

Numerical investigation of the external flow over the after-body and the flow within the nozzle for different jet regimes
[p0050 A80-16520

Scale model performance test investigation of exhaust system mixers for an Energy Efficient Engine /3/ propulsion system
[AIAA PAPER 80-0229] p0108 A80-20968

Static tests at model scale indicating rear-fuselage installation effects on engine exhaust noise
[AIAA PAPER 80-1046] p0340 A80-35991

A new type of flap valve for generating sonic booms in a pyramidal horn
[p0390 A80-38100

Investigation of infrared characteristics of three generic nozzle concepts
[AIAA PAPER 80-1160] p0450 A80-41508

EXHAUST GASES

Limitation of the content of harmful substances in aircraft engine exhaust gases - New requirements on combustion chambers
[p0053 A80-15085

An experimental model investigation of turbofan engine internal exhaust gas mixer configurations
[AIAA PAPER 80-0220] p0100 A80-19302

Dispersion of sound in a combustion duct by fuel droplets and soot particles
[p108 A80-20953

Circumpolair measurements of ozone, particles, and carbon monoxide from a commercial airliner
[p152 A80-21460

Combustion-gas temperature sensors for turbine and turbojet engines
[p0325 A80-38237

Model tests demonstrating under-wing installation effects on engine exhaust noise
[AIAA PAPER 80-1048] p0340 A80-35992

Advanced catalytic combustors for low pollutant emissions, phase 1
[NASA-CR-159535] p0080 A80-13048

Effect of degree of fuel vaporization upon emissions for a premixed partially vaporized combustion system for gas turbine engines
[NASA-TP-1582] p0120 A80-14125

Quiet Clean short-haul Experimental Engine (QCSEE) clean combuster test report
[p1033 A80-15104

Quiet Clean short-haul Experimental Engine (QCSEE)

[NASA-CR-159473] p0135 A80-15120

Exhaust emissions characteristics for a general aviation light-aircraft Teledyne Continental Motors (TCE) GTSO-520-K piston engine
[AD-A080433] p0202 A80-20270

Aircraft exhaust emissions testing
[AD-A080433] p051 A80-22332

Avco Lycoming QCSEE program design cycle, demonstrated performance and emissions
[p0351 A80-22332

Semi-experimental correlations for gas turbine emissions, ignition, and flame stabilization

Flight simulation fatigue crack propagation in 7071 and 7075 aluminum plate
Current developments in aircraft fatigue evaluation procedures
Low cycle fatigue testing, a necessary part of advanced development -- for military fighter aircraft gas turbine engines
A quick look at current results of accelerated life testing --- for gas turbine engines
Application of the method of electron emission to the quality control of gas-turbine engine components
Application of electromagnetic methods and means of nondestructive inspection in series production of aircraft
Endurance and failure characteristics of modified Vando I-2, CBS 600 and AHSI 9310 apron gears
Scatter of fatigue-life data for elements of full-scale light-aircraft wings under steady loads
Fatigue strength of some materials used in airframe structures
Digital load control applied to full-scale airframe fatigue tests
Model 540 rotor blade crack propagation investigation
Application of composite materials to turbofan engine fan exit guide vanes
High rotor box beam fatigue test
Ultrasonic and acoustic emission detection of fatigue damage in aluminum alloy 7075-T651
Generation of a representative load sequence for the fatigue testing of Bacchi HB 326G spar booms
Fatigue crack propagation in aluminum alloy sheet materials under maneuver spectrum and constant amplitude loading
Gust severity effects on fatigue crack propagation in aircraft semi-monocoque structure
A study of the reinforcement required for cutouts in aircraft semi-monocoque structure
Longitudinal stability and control in wind shear with energy height rate feedback
Feedback control
NT CASCADE CONTROL
Identification and dual adaptive control of a turbojet engine
Numerical computation of neighboring optimum feedback control schemes in real-time
A singular perturbation analysis of optimal aerodynamic and thrust magnitude control
Singular values and feedback - Design examples --- for CF-47 helicopter
Application of stochastic optimal reduced state feedback gain computation procedures to the design of aircraft gust alleviation controllers
A new procedure for linear optimal flight control
Fuzzy controls for maintenance scheduling in transportation based --- aircraft flight trajectory regulation
Improvement of control system dynamics of means of additional hydraulic load feedback
Fidelity of flight simulation image generation display system
Feasibility study for aircraft navigation and control
Multivariable synthesis with inverses
An application of model-following control for the design of aircraft gust alleviation controllers
Optimal design of a linear sampled data controller --- applied to turbofan engine regulator design
Optimal design of a linear sampled data controller using round robin output feedback
Measurement of control stability characteristics of a wind-tunnel model using a transfer function method
Finite element methods

1. Finite element analysis of rotating pretwisted asymmetric cross-section blades.
2. Evaluation of finite element formulations for deriving structural weight.
3. Application of the variational-difference method of straight lines to the calculation of wing middle surface deformation.
4. Effects of idealizing three-dimensional geometry with two-dimensional models in temperature and stress analysis of engine components.
6. Analysis of cracks at attachment Ings.
7. Application of the variational-difference method to the calculation of sing.
8. Analysis of cracks at attachment Ings.
9. Integration of flight and fire-control systems.
10. Design of an integrated flight/fire control system.
11. Fire control for air-to-air gunnery in high performance fighter aircraft.
12. Air to air helicopter fire control equations and control law design.
13. Control integration technology impact —— as a basis for improving the combat effectiveness of all tactical aircraft.
14. Full-scale flammability tests with experiments on movable gun and gimbaled line of sight tracker.
15. Air to air helicopter fire control equations and control law design.
16. Air to air helicopter fire control equations and control law design.
17. Air to air helicopter fire control equations and control law design.
18. Fireproof design with ACT in the presence of strakes.
The potential for damage from accidental release of carbon fibers from burning materials is an assessment of the risk arising from electrical effects associated with carbon fibers released from commercial aircraft fires (NASA CR-159205) (p. 80-26392).

Electronic equipment vulnerability to fire released carbon fibers (NASA CR-159209) (p. 80-33491).

Comparative evaluation of firefighting foam agents -- extinguishing jet & fuel fires (p. 80-13253). Advanced concept in aircraft crash firefighting (p. 80-13253).

Hybrid composites that retain graphite fibers on burning (p. 80-11454). Large-scale and small-scale flammability tests for aircraft seats (p. 80-35052).

Release-rate calorimetry of multilayered materials for aircraft seats (p. 80-34787). NASA technical advances in aircraft occupant safety (p. 80-35052).

Design concept for fuel fire facility scale-down (p. 80-32906). NASA technical advances in aircraft occupant safety -- clear air turbulence detectors, fire resistant materials, and crushworthiness (NASA TM-80851) (p. 80-15060).

Evaluation of existing flammability test methods (p. 80-32906). Validation of a simple fire model (p. 80-22432).
FLIGHT

Parameter identification of flexible flight vehicles assuming a low-reduced-frequency aerodynamic representation

Wing profile design of the world championship sailplane SB 11  
[NASA-TR-75029]  

FLIGHT ALTITUDE

Investigation of the permissible X Y phase space of safe landing maneuvers

The ground proximity warning system

Study of admissible safe prelanding maneuver X Y phase space

Measurement of aircraft speed and altitude  
[NASA-EP-1096]  

FLIGHT CHARACTERISTICS

Instrumentation for the determination of aircraft performance from dynamic maneuvers

Characteristics and operational conditions of aircraft turbojet engines  
[1111 80-12647]  

Propulsion characteristics of flapless aircraft

Centering and longitudinal static stability of canard aircraft

Aeroelasticity and dynamics of turbojet aircraft

Prediction of jet noise in flight from static tests

Designing light airplanes  
[1111 80-1467]  

Acoustic considerations of flight effects on jet noise suppressor nozzles

The structure-free thrust-doubling of insect-like aircraft  
-The possibility of using insect-flight/thrust-flight/ on a large technical scale

High-angle-of-attack flying qualities  
-An overview of current design considerations  
[SAE PAPER 790105]  

Measurements of control stability characteristics of a wind-tunnel model using a transfer function method

Review of five years of flying test the B-1

Implicit model following and parameter identification of unstable aircraft

Aerodynamics and dynamics of aircraft flight

Aerodynamics and dynamics of aircraft flight  
-Russian book

Possibilities for achieving trimmed minimum drag without sacrificing inherent stability

Location of aircraft and individualization of flight parameters for the requirements of air traffic control - Systems currently in use and desirable evolutions

Force equilibrium and performance balance of aircraft longitudinal motion graphically presented in the Korschner diagram

The influence of the thrust direction on the level flight of light airplanes

Applied aerodynamics of helicopters  
-Russian book

Analysis of the influence of the design parameters on the characteristics of an aircraft in spinning nose dive

Experimental investigation of helicopter aerodynamics  
-2nd revised and enlarged edition/  
-Russian book

Investigation of flight characteristics of the MECA-Tornado in the framework of the official flight testing. II

Investigations of the MECA Tornado flight characteristics within official flight tests. I

The dynamics of helicopter flight in limiting conditions

Departure and uncoordinated roll reversal boundaries for fighter configurations  
[1111 80-1566]  

Navy V/STOL hover and low-speed flying qualities criteria recent developments

Manoeuvre limitations of combat aircraft

Dynamic characteristics of flight simulator motion systems

Application of random time domain analysis to dynamic flight measurements  
-B- aircraft

Flight tests of the total automatic flight control system (Maccon) concept on a B-6 Twin Otter aircraft

Flight performance of the PCE B-737 airplane at Jorge Newbery Airport, Buenos Aires, Argentina using TBSB/B1S guidance

Proceedings of a Workshop on VSTOL Aircraft Aerodynamics, volume 2 --- conferences  
[AIRP-107909]  

Development of VTOL flying qualities criteria for low speed and hover

Characterization of the system applied to aircraft flight test data  
[AGARD-AR-1046]  

Airwork and flight test identification methods and their applications: Survey and future aspects

Identification evaluation methods

Analysis of aircraft performance stability and control measures

Wind tunnel and free flight model identification experience

Closed loop aspects of aircraft identification

Handling quality requirements for advanced aircraft design longitudinal mode

Airworthiness and flight characteristics evaluation. OR-SCC interim scout helicopter

Computer simulation of engine systems systems for aircraft design p0012 A80-12157
The flight simulation fatigue crack propagation in 7010 and 7075 aluminum plate p0279 A80-30711
Flight simulation techniques - The quest for realism p0321 A80-33135
Impact of flight effects on multiaxe suppressor performance [AIAA PAPER 80-1029] p0339 A80-35979
Simulation of high bypass ratio engine jet noise p0339 A80-35980
Effect of some aircraft loading program modifications on the fatigue life of open hole specimens p0341 A80-36076
Aerodynamic assessment of methods to simulate flight inflow characteristics during static testing [AIAA PAPER 80-1023] p0393 A80-36630
The development of inflow control devices for improved simulation of flight nose in static testing of a RBRE turbofan engine [AIAA PAPER 80-1024] p0393 A80-36639
Comparison of several inflow control devices for flight simulation of fan tone noise using a UT5D-1 engine [AIAA PAPER 80-1025] p0393 A80-36640
Characteristics of internal- and jet-noise radiation from a multi-lobe, multi-tube suppressor nozzle tested statically and under flight simulation [AIAA PAPER 80-1027] p0393 A80-36642
A quick look at current results of accelerated mission tests for gas turbine engines [AIAA PAPER 80-1155] p0399 A80-38941
The stability and control characteristics of the aerocoupe hybrid heavy lift vehicles p0803 A80-39292
Educational aspects of multi-microprocessor design used in flight simulation applications [AIAA PAPER 80-1852] p0471 A80-43306
Development and flight evaluation of automatic flare laws with improved touchdown dispersion [AIAA 80-1757] p0518 A80-45545
Single pilot IFB autopilot complexity/benefit tradeoff study [AIAA 80-1869] p0518 A80-45740
A study of stall deterrent systems for general aviation aircraft [NASA 80-1562] p0518 A80-45861
Pilot-aircraft system response to wind shear [AIAA 80-1569] p0518 A80-45880
An experimental investigation of VOR flying qualities requirements in shipboard landings [AIAA 80-1625] p0519 A80-45913
Flight simulation data management - A prototype system [NASA-CP-162419] p0578 A80-49832
A digital system for panoramic video display in flight training simulators p0584 A80-49932
Engineering application of fracture mechanics to flight simulation fatigue crack propagation [NASA 80-53439] p0623 A80-53439
Pilot performance during simulated approaches and landings made with various computer-generated visual glidepath indicators [AD-A066220] p0626 N80-10151
Experiments in sensing transient rotational acceleration cues on a flight simulator [AIAA-80-1537] p0627 N80-10193
Flight effects on the aero/acoustic characteristics of inverted profile coannular nozzles [NASA-CP-162419] p0627 N80-10193
Application of modified profile analysis to function testing of simulated CTL transport
Application of existing roll response criteria to transport aircraft with advanced flight control systems

[AAIA 80-1577] p0516 880-05871

Advanced simulator for pilot training (ASPT):
G-seat optimization

[AD-A066875] p0031 880-10233

Enhanced engineering flight simulation validation, Part 1. Simulation requirements and simulator motion system performance

[AD-A071394] p0031 880-10235

Training effectiveness of the CH-47 flight simulator

[AD-A072317] p0031 880-10236

Simulator for air-to-air combat motion system investigation

[AD-A072612] p0032 880-10238

Dynamic characteristics of flight simulator motion systems

[AGARD-AB-144] p0032 880-10238

Perception and performance in flight simulators: The contribution of vestibular, visual, and auditory information

[NASAG-162129] p0042 880-11103

Enhanced engineering flight simulation validation, Part 2: Software user's guide

[AD-A071395] p0042 880-11105

Application of modified profile analysis to function testing of the motion/no-motion issue in an aircraft ground-handling simulation --- statistical analysis procedure for an aircraft motion system flight simulation

[NASA-TP-1540] p0078 880-13924

Effects of varying visual display characteristics of the T-49, a T-37 flight simulator

[AD-A071410] p0164 880-15100

Feasibility and concept study to convert the NASA/AMES vertical motion simulator to a helicopter simulator

SSAMB: A system of equations for the simulation of aircraft in a modular environment

[ABT-TH-9008] p0179 880-17069

The influence of simulator motion wash-out filters on the performance of pilots when stabilizing aircraft attitude in turbulence

[NEL-TS-78-22U] p0182 880-17094

Computer synthesis of flight simulation visuals

[ABL/ST/NO-79-61] p0226 880-18053

Methods of sound simulation and applications in flight simulators

[NASA-TW-75768] p0285 880-19133

Design of a simulator for studying the helicopter - SDVR

[AGARD-AB-144] p0250 880-19829

Cost-effectiveness of flight simulators for military training

[AGARD-AB-144] p0255 880-19830

Using a language developed for aircraft simulators --- advantages and disadvantages of using FORTRAN and assembly language

[AGARD-AB-144] p0255 880-19831

BACTAC: A combat-worthy computerized opponent

[AGARD-AB-144] p0301 880-21273

Pilot assessment of two computer-generated display formats for helicopter instrument approach

[NASA-TH-80151] p0350 880-22321

Operations manual: Vertical Motion Simulator (VMS) 3.08

[NASA-TH-61100] p0362 880-23295

NAVY/DOCS dynamic flight simulator design and multipurpose crew station concept design and development plan

[AD-A019120] p0368 880-23335

Wind-shear encounters during visual approach at night. A piloted simulator study

[NASAG-19126] p0417 880-24291

Aeronautical systems technology needs-test facilities and test equipment

[AGARD-AB-160-VOL-10] p0467 880-33406

An evaluation of aircraft separation assurance concepts using airline flight simulators. Volume 1: Study report

[AD-A083986] p0469 880-27310

An evaluation of aircraft separation assurance concepts using airline flight simulators. Volume 2: Appendices

[AD-A083989] p0469 880-27311

Development of simulator instructional feature design guidance

[AD-80664420] p0537 880-28379

The use of simulators for training in-flight and emergency procedures

[FCRD-KG-248] p0606 880-31412

V/STOL equivalent systems analysis

[AD-A087283] p0606 880-31414

Helicopter application from flight simulator to full scale

[AD-A087295] p0606 880-31415

Advanced simulator for pilot training: Design of automated performance measurement systems

[AD-A0888855] p0649 880-33421

FLIGHT STABILITY TESTS

Stability of asymmetric equilibrium flight states

[AAIA 80-1610] p0515 880-45666

Helicopter stability and control test methodology

[AAIA 80-1610] p0516 880-45902

Comparison of stability and control parameters for a light, single-engine, high-winged aircraft using different flight test and parameter estimation techniques

[NASA-Th-80163] p0530 880-10225

Stability and control aspects of the C-130A

[NASA-Th-80163] p0530 880-10225

In flight tests of a parameter insensitive controller

[NASA-Th-80163] p0530 880-10225

Flight evaluation of nondimensional static longitudinal stability test methods

[AD-A082831] p0582 880-29429

Open loop gust alleviation

[SMRT-FW-79-10-01] p0555 880-29737

Comparison of wind tunnel and flight test measurements of static aerodynamic loading of a captive store

[AD-A087237] p0587 880-30261

A flight investigation of performance and loads for a helicopter with 10-64C main rotor blade sections

[NASA-Th-80163] p0641 880-33388

FLIGHT TEST TECHNICAL REPORT

FLIGHT TEST INSTRUMENTS

Are we spending too much on flight test instrumentation

[AD-A087222] p0205 880-27229

RIDS - The right tool for small test jobs --- Miniature Integrated Data Systems for inflight testing

[AD-A087222] p0205 880-27230

A low cost airborne data acquisition system

[AD-A087222] p0205 880-27231

Airborne video instrumentation/data reduction system

[AD-A087222] p0205 880-27232

VSTOL test techniques utilizing laser tracking

[AD-A087222] p0205 880-27234

Experience from testing the Viggen electronic systems utilizing existing aircraft capability

[AD-A087222] p0205 880-27235

Firebrand anti-ship missile target - Flight test program objectives and vehicle instrumentation requirements

[AD-A087222] p0206 880-27236

From tape measure to computer tape ---- development of flight recorders

[AD-A087222] p0207 880-27243

Determination of instrumentation errors from measured data using maximum likelihood method

[AAIA 80-1610] p0518 880-45959

B-17B mid-air flight test instrumentation

[AGARD-AB-160-VOL-10] p0647 880-33406

Pressure and flow measurement flight testing

[AGARD-AB-160-VOL-10] p0647 880-33407

FLIGHT TEST VEHICLES

Determination of the aerodynamic characteristics of a flight vehicle from onboard measurement data

[AGARD-AB-160-VOL-10] p0647 880-33407

Flight research techniques utilizing remotely piloted research vehicles

[AGARD-AB-160-VOL-10] p0597 880-31337

FLIGHT TESTS

AFLIGHT STABILITY TESTS

Microprocessors as aircraft fatigue monitors

[AGARD-AB-160-VOL-10] p0647 880-33406

Instrumentation for the determination of aircraft performance from dynamic maneuvers

[AGARD-AB-160-VOL-10] p0647 880-33406
Stochastic response secondary surveillance radar
Sonic measurements of gun blast on a light aircraft
Estimation of the accuracy of dynamic flight-deteriorated coefficients
Flight certification of the Cessna T205G amphibious floatplane
Flight and wind tunnel test results of the mechanical jet noise suppressor nozzle
Development and flight test of a two-place night/ adverse weather 1-10 for the close-air support and battlefield attack mission
Local skin friction and static pressure on a swept wing in flight
New requirements, test techniques, and development methods for high fidelity flight simulation of commercial transports
Control and data acquisition system for AICM flight tests --- Air Launched Cruise Missile
Wind tunnel and flight test drag comparisons for a guided projectile with cruciform tails
Achieving effective Radar Cross Section flight profiles on the B-1 aircraft
First experience with telemetry and real time data reduction at Gates Learjet
Tactical navigation system testing
Testing the F-18 at the U.S. Naval Air Test Center
Helicopter crash position indicator flight trials
Aircraft motion analysis using limited flight and radar data
P/H-18 status report
Night/adverse weather A-10 evaluato program /A/-10/-. W. H. Shawler
F-16 European test and evaluation
General aviation icing flight test
The development of the world's first twin-engine business jet, the Mitsubishi F-100
CI-600 Challenger
Review of five years of flight testing the B-1
Composite components on commercial aircraft
Instrumentation and techniques for parachute wind tunnel testing
Cockpit Display of Traffic Information /CDTI/
Airborne FLIR: Experiences from flight tests
Practical design considerations for a flightworthy higher harmonic control system --- for flight testing on OH-6A helicopter
Synthesis of test results on the Concorde at high angle of attack
Recommencements for obtaining nozzle/afterbody drag data based on a comparison of wind tunnel and flight data
Results from flight noise tests on a Viper turboprop fitted with ejection/suppressor nozzle systems
Flight tests for the study of radioelectric perturbations of electrostatic origin
Flight test of all-electronic propulsion control system
Effects of discontinuous drooped wing leading-edge modification on the operating characteristics of a low-wing general aviation airplane
Determination of an angle of attack sensor correction for a low-performance airplane at large angles of attack determined from wind tunnel and flight tests
Certification of avionics systems on the commercial airplanes of the 1980's
Prediction of suppressed jet engine exhaust noise data from static data
Investigation of flight characteristics of the NRA-Formado in the framework of the official flight testing, IX
Investigations of the NRA-Formado flight characteristics within official flight tests, I
Night/ adverse weather 1-10 at the cross-roads
Development and flight evaluation of automatic flare laws with improved touchdown dispersion
Forward swept wing flight demonstrator
A study of stall deterrent systems for general aviation aircraft
A dynamic analysis of the motion of a low-wing general aviation aircraft about its calculated equilibrium flat spin mode
Spin profile tailoring for the improved 2.75-inch rocket
A variational technique for smoothing flight-test and accident data
A number of an in-flight evaluation of control system response delay times using the F-10 DPB airplane
Low order equivalent models of highly augmented aircraft determined from flight data using maximum likelihood estimation
Determination of an oblique wing aircraft's aerodynamic characteristics
Identification of flexible aircraft from flight data
Identification of aerelastic parameters using a recursive sequential least squares method
Parameter identification of B-52E CCT flight test data including aerelastic effects
The agricultural aircraft PZL-106A and its testing at the agricultural aviation factory of IHTEBFLOG
Application of high-alpha control system concepts to a variable-sweep fighter airplane
Study of the feasibility aspects of flight testing an aerodynamically tailored forward swept research wind on a BGM-38F drone vehicle
Feasibility tests of use of the tri turbo-3 aircraft for arctic AESP drops
Flight flutter testing
Evaluation of steering and restraint systems conducted during fiscal year 1978
Beaver aircraft parameter identification: Technical preparations and preliminary results
Flight test of navigation and guidance sensor errors measured on STOL approaches
Aircraft Assessment and Acceptance Testing
[AGARD-LS-108] p0596 800-31329

Some comments on the problems involved in aircraft assessment and acceptance testing
p0596 800-31330

USAF development test and evaluation
p0596 800-31331

Some examples of procedures used in US for acceptance testing of aircraft produced by the aircraft industry under government contract
p0596 800-31332

A review of flight test instrumentation systems for acceptance testing of the production aircraft
p0596 800-31333

Performance testing production airlines
p0596 800-31334

Evaluation of longitudinal characteristics including stability handling and CG range
p0597 800-31335

Evaluation of lateral and directional characteristics and spinning behaviour
p0597 800-31336

Landing system reliability and safety model
[AD-A087529] p0601 800-31379

Helicopter-ship qualification testing
[ERL-MP-7907-01] p0603 800-31391

NASA general aviation stall/spin flight testing
p0640 800-33300

Aircraft crash survival design guide. Volume 3: Aircraft structural crashworthiness
[AD-A09104] p0645 800-33305

Propulsion 1-sector DMA tests
[AD-A089053] p0645 800-33388

Development and test results of a flight management algorithm for fuel conservative descents in a time-based metered traffic environment
[NASA-TP-1717] p0647 800-33304

FLIGHT SIMULATION

Preliminary test results of a flight management algorithm for fuel conservative descents in a time based metered traffic environment --- flight tests of an algorithm to minimize fuel consumption of aircraft based on flight time
[NASA-TP-80194] p0118 800-14114

FLIGHT TRAINING

New requirements, test techniques, and development methods for high fidelity flight simulation of commercial transports
[AIAA 80-0465] p0200 800-26949

A digital system for panoramic video display in flight training simulators
p0584 800-50990

Training effectiveness of the CR-47 flight simulators
[AD-A072317] p0031 800-10236

Platform motion contributions to simulator training effectiveness. Study 3: Interaction of motion with fields-of-view
[AD-A078026] p0367 800-23334

FLIGHT VEHICLES

Flight-vehicle equipment --- Russian book
p0011 800-10160

Automatic control systems for flight vehicles --- Russian book
p0099 800-14100

Hinged vehicle equations of motion
[AIAA PAPER 80-0364] p0095 800-18336

FLIGHT DETECTORS

Experiences of a 50 MBPS video recording and processing system for FLIR images
p0323 800-34163

Airborne FLIR - Experiences from flight tests
p0323 800-34174

CR-SI supersonic FLIR window
[AD-A078371] p0257 800-19988

FLOATING POINT ARITHMETIC

The array processor AP-120B/190L for simulation applications
p0005 800-11154

FLOW CHARACTERISTICS

ST BOUNDARY LAYER STABILITY
ST FLAMES STABILITY
ST FLOW DISTRIBUTION
ST FLOW STABILITY
ST FLOW VELOCITY
ST HEMICRITICAL STABILITY

Parameters of spatial flow past a hydrofoil near the free surface of a ponderable liquid
An experimental study of two-dimensional supersonic jet impingement on a flat plate

Data report for a test program to study transonic flow fields about wing-body/pylon/store combinations. Volume 1: Tunnel empty flow survey data, wing body force/moment/surface pressure data, and pressure store force/moment/surface pressure data

Viscous flowfields induced by two- and three-dimensional lift jets in ground effect

Laser-Busan flow-field diagnostics of two large hypersonic test facilities

An investigation of the quality of the flow generated by three types of wind tunnel (Ludwig tube, trans clean tunnel and injector driven tunnel)

Wake flowfields for Jovian probe

Operational implications of some NASA/BASA rotary wing induced velocity studies

The development of rapid predictive methods for three-dimensional transonic flow fields about fighter bomber aircraft, part 1

The graphical display of multi-dimensional aerodynamic flow field data

Study of rotor wakes at very low advance ratios

Aerodynamic performances of three fan stator designs operating with rotor having tip speed of 337 meters per second and pressure ratio of 1.54. Relation of analytical code calculations to experimental performance

Leverard flow over delta wings at supersonic speeds

Lee side flow for slender delta wings of finite thickness

Wind tunnel measurements of the mean flow in the turbulent boundary layer and wake in the region of the trailing edge of a swept wing at subsonic speeds

Flow visualization techniques in the Airborne Laser Laboratory program

Mutual interference of multiple bodies in the flow field of the F-111 aircraft in the transonic speed range — wind tunnel tests

Calculation of high speed inlet flows using the Navier-Stokes equations. Volume 2: User's and programmer's guide

Analysis and testing to improve the flow from the plenum of a subsonic cascade wind tunnel

The effects of ground wall-jet characteristics on fountains upwash flow formation and development

Flow quality for Turbine Engine Loads Simulator (TELS) facility

Calculations by a first order theory of supersonic flow around delta wings

Flow visualization study of the HIBM DPNS

An experimental study of multiple jet mixing

Numerical method for predicting flow characteristics and performance of nonaxisymmetric nozzles. Part 1: Applications

Computations of steady inviscid transonic flows using pseudo-unsteady methods

Asymptotic integration of multicomponent chemical-inequilibrium boundary layer equations — hypersonic gas flow analysis

A method for assessing the impact of wake vortices of USAF operations

Viscous flow in the region of a rounded trailing edge

Transonic data memorandum: Numerical methods for solving the potential flow equations for two-dimensional aerfoils in subsonic and transonic flows, brief details, test cases and examples

Linearized methods in supersonic flow

FLOW TRANSPORT

FLOW IN THE ENVIRONMENT
Coupled bending-torsion flutter in cascades with applications to fan and compressor blades

Non-synchronous whirling due to fluid-dynamic forces in axial turbo-machinery rotors

Fluid forces on rotating centrifugal impeller with whirling motion

A compendium of computational fluid dynamics at the Langley Research Center [NASA-TR-81777]

Transport phenomena in labyrinth seals of turbomachines — French thesis

Influence of working-fluid issuance through a nozzle on the rate of flame front propagation in a pulsating-type combustion chamber

The basic models of mechanics of liquids and gases in the theory of the wing

Experimental and analytical studies of a true airspeed sensor

Preliminary evaluation of coal-fired fluid bed combustion-augmented compressed air energy storage power plants [NASA-CR-163261]

Active flutter suppression using Linear Quadratic Gaussian theory [AIAA 80-41366]

Fluid injection — Aerodynamics of hypersonic flows with fluid injection — Russian book

Fluid jet accelerators

Fluid jets

Fluid mechanics

Experimental and analytical studies of a true airspeed sensor

Preliminary evaluation of coal-fired fluid bed combustion-augmented compressed air energy storage power plants [NASA-CR-163261]

Noise from a vibrating propeller [AIAA PAPER 80-1011]

Effect of adding structural damping on a wing/macule type flutter mode

Nonlinear aerelastic vibration of interfering surfaces

Active flutter suppression using Linear Quadratic Gaussian theory [AIAA 80-1758]
A study of compressor blade stall flutter in a straight cascade wind-tunnel
[OMEBA TP NO. 1980-97] p0622 A80-53282
Aircraft flutter and dynamic response
p0065 H80-12010

Flight flutter testing
p0066 H80-12012
Aeroelastic response analysis of two dimensional, single and two degree of freedom airfoils in low-frequency, small-disturbance unsteady transonic flow
[AD-A073379] p0069 H80-12073
The development of the DAST 1 remotely piloted research vehicle for flight testing an active flutter suppression control system
p0070 H80-12083
Leading edge flutter of supercavitating hydrofoils
[AD-A073382] p0073 H80-12236
General theory of aerodynamic instability and the mechanism of flutter
[AIAA-496] p0127 H80-15047
Comparison of international flutter requirements and flying performance substantiation of light aircraft in the USA
p0138 H80-15142

Analysis of trunk flutter in an air cushion landing system
[AD-A079008] p0237 H80-19075
Developing, mechanizing and testing of a digital active flutter suppression system for a modified B-52 wind-tunnel model
[AD-A079150] p0252 H80-19566
Some recent measurements of structural dynamic damping in aircraft structures
p0253 H80-19576

-Wing/store flutter with nonlinear pylon stiffness
[NASA TM-81789] p0294 H80-20280
Analytical tools for active flutter suppression
p0309 H80-21350

Exterior store flutter suppression with active controls
p0309 H80-21351

Model order reduction using the balanced state representation theory, application and interactive software implementation
[AD-A080371] p0309 H80-21356
Decoupler pylon: Wing/store flutter suppressor

The application of output predictive digital control to wing flutter suppression and terrain following problems
[AD-A080419] p0354 H80-22361
Application of two design methods for active flutter suppression and wind-tunnel test results
[NASA-TP-1653] p0357 H80-22737

An aeroelastic analysis of the Sheriff wing
[BU-234] p0361 H80-22747
Status of NASA full-scale engine aeroelasticity research
[NASA-TR-81500] p0370 H80-23670

Minimum mass sizing of a large low-aspect ratio aircraft for flutter-free performance
[NASA-TP-81181] p0370 H80-23683

Further investigation of a finite difference procedure for analyzing the transonic flow about harmonically oscillating airfoils and wings
[NASA CR-3195] p0414 H80-24717

Flutter analysis of an airplane with multiple structural nonlinearities in the control system
[NASA-TP-1620] p0421 H80-24324
Initial development for a flutter analysis of damaged T-38 horizontal stabilators using WASTRAN
[AD-A082168] p0421 H80-24325
Experimental determination of unsteady blade element aerodynamics in cascades. Volume 1: Torsion mode cascade
[NASA CR-159831] p0434 H80-25335
Wind-tunnel experiments on divergence of forward-swept wings
[NASA-TP-1665] p0585 H80-29287
Calculation of the transient motion of elastic airfoils forced by control surface motion and gust
[NASA-TP-81351] p0627 H80-32239

Flutter Analysis
Evaluation of the intensity of heat-induced vibrations
p0090 A80-17565

Possibility of the onset of self-oscillations in cylindrical bodies situated in longitudinal liquid or gas flows in the case of crisis of drag p0217 A80-28851
Flutter analysis of a NASA 64A0604 airfoil in small disturbance transonic flow

Investigation of internal control laws for wing/store flutter suppression
[AIAA 60-0764] p0322 A80-35056
Active flutter suppression control law definition via least squares synthesis
[AIAA 60-0766] p0322 A80-35057
Design for active flutter suppression and gust alleviation using state-space aeroelastic modeling
[AIAA 60-0768] p0322 A80-35058
F-16 flutter suppression system investigation
[AIAA 60-0768] p0333 A80-35060
Recent development of the TF-17 active flutter suppression system
[AIAA 60-0769] p0333 A80-35061

Wind tunnel investigation of active controls technology applied to a DC-10 derivative
[AIAA 60-0771] p0333 A80-35062
Experimental investigation of flutter in mid-stage compressor designs — for aircraft axial flow gas turbine engines
[AIAA 60-0786] p0333 A80-35073

An optimal design method for the determination of the important flutter modes
[AIAA 60-0790] p0334 A80-35074
Wing/store flutter with nonlinear pylon stiffness
[AIAA 60-0792] p0334 A80-35075

System to measure the pressure distribution on fan aerofoil surfaces during flutter conditions
p0342 A80-36194
Theoretical and experimental parameter-studies of oscillating turbine blades in a centrifugal force field
p0392 A80-38350

The effect of aerodynamic phase lag on the twin vibration mode model of aeroengine fan flutter
[ASME PAPER 80-GT-166] p0461 A80-62275

Torsion mode cascade
[VKI-LEC-SBB-1979-8] p0522 H80-20280

Preliminary torsional vibrations of a wing
[p0525 A80-64681

Investigation of the influence of the parameters of a wing/edge combination on the critical flutter speed
p0525 A80-64671

Passive control of wing/store flutter
p0579 A80-50100

An application of system identification to flutter testing

Application of the discrete-phase method /DPM/ to the study and control of aircraft turbine engine blade vibrations. I

Review of superalloy powder metallurgy processing for aircraft gas turbine applications.

Gas curtains in turbine engines.

Study of homogeneous combustion chamber temperature field nonuniformity with primary zone parameter variation.

Selection of optimal parameters of heat-pipe heat exchanger for a gas turbine engine.

Systematization of simple detail parts of the nozzle of gas turbine engine.

Study of mass exchange between primary and secondary air jets in gas turbine engine combustion chambers.

On the influence of short shroud platforms on turbine stage operation.

Study of size distribution of oil drops formed in GTE oil system lines.

Development of an aircraft-derivative gas turbine with high performance and large output.

Lubricants for the aircraft gas turbine.

An optical technique for the investigation of flow in gas turbine combustors.

Pollutant emissions from 'partially' mixed turbulent flames.

Processing noise and vibration data for gas turbine engine development.

Measuring unsteady pressure on rotating compressor blades — with semiconductor strain gages under gas turbine engine operating conditions.

Turboaeica — the 'Naka' is in production — helicopter gas turbine engine.

Turbine blade cooling in aero engines — Some new results, future trends, and research requirements.

Utilization of dynamic simulators of aircraft turbine engines.

Reliability and life of aircraft gas turbine engines.

Characteristics of a Laval nozzle with gasdynamic regulation.

Fully mechanized circumferential welding for engines.

Analysis of programs for regulating helicopter turbine engines.

Gas turbine case and accessory vibration — Problems of measurement and analysis.

Evaluation of the intensity of heat-induced vibrations.

Estimation of source strengths in a gas turbine combustor.

Regression techniques applied to parametric turbine engine simulations.

Thermal barrier coatings for aircraft gas turbines.

Thermal state of structural members of aircraft engines — Russian book.

A method of evaluation of gas turbine engines.

Unification of oils for aircraft gas — turbine engines.

Determination of start-up pressure losses for gas-turbine engine compressors.

Some dynamic and time-averaged flow measurements in a turbine rig.

Application of the discrete-phase method /DPM/ to the investigation and monitoring of aircraft turbine engine blade vibrations. II.

A cooled laminated radial turbine technology demonstration.

Low cycle fatigue life model for gas turbine engine discs.

Transparent engines at Rolls-Royce — The application of high energy X-ray technology to gas turbine development.

Source book on materials for elevated-temperature systems.

Effect of wake-type nonuniform inlet velocity profiles on first appreciable stall in plane-wall diffusers.

Year of seal materials used in aircraft propulsion systems.

Model tests for the development of axial compressors.

Computer-aided designing of temperature fields for cooled gas-turbine blades.

The investigation of transient loads in gas turbine engine blades using spectral analysis methods.

Selective methods of determining the range of engine operation in aircraft crash investigations.

Combustion-gas temperature sensors for turbine and turbogas engines.

Aircraft gas turbine materials and processes.

Laser-optical blade tip clearance measurement system.

Fluid and structural measurements to advance gas turbine technology.

Vibration measurements on turbines on jet engines with optical probes.

A-216
The design, development and operation of gas turbine engine blades, displacement measurements, and the development of gas turbine radio telemetry systems. The impact of new instrumentation on advanced turbine research and the investigation of structural strength of ceramics used for circulating section components of gas turbine engines. 

Investigation of the effect of blade wakes on the performance of gas turbines and optimization of gas turbine combustors. Long cycle fatigue testing, a necessary part of gas turbine design considerations. The importance of timely finite element modelling in jet engine design and development of improved durability plasma sprayed ceramic coatings for gas turbine engines. 

Turbo-propulsion combustion - Trends and challenges, as well as an assessment of gas turbine engine augmentor technology and needs for the 40's. Dynamic modeling of augmentor fuel systems and optimization of gas turbine combustor stoichiometry and expanded operating range. Combustion modeling needs for the 80's and the effect of local parameters on gas turbine emissions. 

Plasma sprayed ceramic thermal barrier coatings for turbine vane platforms and the use of holographic speckle interferometry to study the stress-strain state of a gas turbine engine disk near a scarf joint with a blade. Application of the method of electron emission to the quality control of gas turbine engine components. 

European turbines and the development of gas turbine engines with increased efficiency and power output. Contract research on aerodynamic problems of turboshaft and turbosupercharger components. 

Fuel properties and engine characteristics of aircraft turbine engine combustors and experimental evaluation of catalytic flame stabilization for aircraft afterburners. Experimental evaluation of synthetic fuels in gas turbine combustors. 

Protected and specification of clutches to be used with gas turbine engines. Protection and specification of clutches to be used with gas turbine generators and the investigation of ingress for a simple shrouded rotating disk system with a radial outflow of coolant. 

Fuel property effects on life characteristics of aircraft turbine engine combustors and experimental evaluation of catalytic flame stabilization for aircraft afterburners. 

Protection and specification of clutches to be used with gas turbine generators and the investigation of ingress for a simple shrouded rotating disk system with a radial outflow of coolant. 

Fuel property effects on life characteristics of aircraft turbine engine combustors and the use of holographic speckle interferometry to study the stress-strain state of a gas turbine engine disk near a scarf joint with a blade. Application of the method of electron emission to the quality control of gas turbine engine components.

GENERAL AVIATION AIRCRAFT
ST AGRICULTURAL AIRCRAFT
Determination of the spin and recovery
characteristics of a typical low-wing general
aviation design
[AIIA PAPER 80-0169] p0096 B80-18351
Designing light airplanes — Russian book
p0101 B80-19415
A spin-recuperation parachute system for light general
aviation airplanes
p0147 B80-21122
A practical guide to airplane performance and design
— Book
p0153 B80-21276
Research programs in general aviation — Next
generation aircraft
p0157 B80-22983
The influence of wing, fuselage and tail design on
rotational flow aerodynamics data obtained
beyond maximum lift with general aviation
configurations
[AIIA 80-04551] p0200 B80-26555
General aviation icing flight test
p0208 B80-27383

The development of the world's first triengine
business jet, the Systere Falcon 50
CL-600 Challenger
p0208 B80-27383
Discriminant analysis of purchasers of general
aviation aircraft avionics
p0271 B80-30305
An approach to DABS data link avionics for general
aviation — Discrete Address Beacon System
p0281 A80-32428
A prototype general aviation digital
avionics control system
p0281 A80-32430
Annoyance caused by general aviation
[AD-A073553] p0389 B80-37206
Air traffic control system measures and data
p0399 B80-37706
General aviation propulsion for the next
[AIIA PAPER 79-1158] p0391 B80-38346
Lightweight diesel aircraft engines for general
divation
[AIIA PAPER 80-1238] p0400 B80-38983
An experimental aircraft to test new technologies
p0466 B80-42918
A theoretical and experimental investigation of
propeller performance methodologies
p0466 B80-43303
Effects of discontinuous drooped wing leading-edge
modifications on the spinning characteristics of a
low-wing general aviation airplane
[AIIA PAPER 80-1843] p0470 B80-33101
Full-scale wind-tunnel investigation of the
effects of wing leading-edge modifications on
the high angle-of-attack aerodynamic
characteristics of a low-wing general aviation
airplane
[AIIA PAPER 80-1844] p0470 B80-33402
Determination of an angle of attack sensor
[AD-A073552] p079 B80-13032
Shock wave characteristics of a composite
cabin windows
p0136 B80-15106
[AD-A073553] p0389 B80-37206
Mobility of small aircraft
[AIIA PAPER 80-1847] p0471 B80-33405
Effects of winglets on performance and handling
qualities of general aviation aircraft
[AIIA PAPER 80-1870] p0472 B80-33410
Effect of propeller slipstream on the
efficiency of the engine cooling system for a
general aviation twin-engine aircraft
p0472 B80-33415
Noise reduction characteristics of general
aviation type dual-pane windows
[AIIA PAPER 80-1874] p0472 B80-33417
Full scale test of a stall proof device
[AIIA PAPER 80-1899] p0473 B80-33330
The Lean Fan — A significant step toward fuel
efficient airplanes
[AIIA PAPER 80-1860] p0513 B80-45747
A study of stall deterrent systems for general
aviation aircraft
[AIIA 80-1562] p0514 B80-45661
A dynamic analysis of the motion of a low-wing
general aviation aircraft about its calculated
equilibrium flat spin mode
[AIIA 80-1565] p0515 B80-45864
General aviation operating requirements for the
1980's
[SAB-0070-306] p0073 B80-49668
The FAA satellite airport program
[SAB-0070-305] p0073 B80-49705
Allocating and accommodating small aircraft
operations in the Baltimore-Washington
[SAB-0070-306] p0073 B80-49705
Use of separate short runways for commuter and
general aviation traffic at major airports
[SAB-0070-307] p0077 B80-49707
Overview of stall/spin technology
[AIIA PAPER 80-1590] p0579 B80-50099
GENERAL AVIATION AIRCRAFT COSTS

SUBJECT INDEX

An acoustic sensitivity study of general aviation propellers [NASA-PAPER 80-1071] p0580 A80-50191
Spinning for safety's sake [NASA-TP-1677] p0580 A80-50225
Light airplane crash tests at three roll angles [NASA-TP-1681] p0593 A80-10512
New aircraft technology: Report on the Parkinson International Air Show [PB-299394/0] p0399 A80-11078
Light airplane crash tests at three pitch angles [NASA-TP-1681] p0044 A80-11505
Explanatory study of the effects of wing-leading-edge modifications on the stall/spin behavior of a light general aviation airplane [NASA-TP-1589] p0078 A80-13026
Exhaust emissions characteristics for a general aviation light airplane Teledyne Continental Motors 0-320/10-D piston engine [AD-A074738] p0080 A80-13042
Meteorological input to general aviation pilot training [AD-A084933] p0535 B80-28364
Accident investigation [AD-A087653] p0627 B80-32325
Design study of a low cost civil aviation GPS receiver system [NASA-CP-159176] p0128 A80-15062
The state-of-the-art of flutter substantiation procedures among US general aviation manufacturers [NASA-TP-15943] p0130 B80-15143
Transponder Performance Analyzer (TPA) [AD-A0757783] p0168 A80-16008
Air data system study requirements analysis for a FAA accident data system [AD-A0756411] p0176 A80-17003
Exhaust emissions characteristics for a general aviation light-airplane Avco Lycoming TT-560-228D piston engine [AD-A075355] p0179 A80-17070
A consideration of general aviation in the United Kingdom [TT-7902] p0219 A80-17982
General aviation airplane structural crashworthiness programer's manual [AD-A083727] p0221 A80-18008
Study of research and development requirements of small gas-turbine cossborders [NASA-CP-159796] p0224 A80-18040
An acoustic wind tunnel tests of a light twin-boom general-aviation airplane with free or shrouded-pusher propellers --- in the Langley full-scale tunnel [NASA-TP-800201] p0232 A80-19023
Rotary balance data for a typical single-engine general aviation design for an angle-of-attack range of 8 deg to 90 deg. 1: Low-wing model A -- fluid flow and vortices data for general aviation aircraft use determines aerodynamic characteristics for various designs [NASA-CP-3100] p0322 A80-19030
Estimation of the endurance of civil aircraft wing structures --- life estimate method for wing loading on general aviation aircraft [NASA-TH-79026] p0325 A80-19060
Assessment of risk due to the use of carbon fiber composites in commercial and general aviation [NASA-TH-79026] p0267 A80-19201
A spin-recovery parachute system for light general-aviation airplanes [NASA-TP-800237] p0267 A80-20227
A 150 and 300 kw lightweight diesel aircraft engine design study [NASA-CP-3250] p0292 A80-20271
High speed turboprops for executive aircraft, potential and recent test results [NASA-TP-800235] p0302 A80-21285
Emergency in-flight egress opening for general aviation aircraft [NASA-TP-800235] p0303 A80-21293
Designing low cost receivers for general aviation users [NASA-TH-78079] p0304 A80-21307
Design approaches for GPS receivers/processors [NASA-TP-800238] p0304 A80-21308
Airesearch QCGAT program --- quiet clean general aviation turboprop engines [NASA-CP-159758] p0306 A80-21311
Airesearch QCGAT engine, airplane, and nacelle design features [NASA-TH-80237] p0350 A80-22238
Airesearch QCGAT engine performance and emissions tests [NASA-TH-80237] p0351 A80-22239
Airesearch QCGAT engine; Acoustic test results [NASA-TH-80237] p0351 A80-22239
QCGAT aircraft/engine design for reduced noise and emissions [NASA-TH-80237] p0351 A80-22331
Avco Lycoming QCGAT program design cycle, demonstrated performance and emissions [NASA-TH-80237] p0351 A80-22332
Avco Lycoming quiet general aviation turboprop engine [NASA-TH-80237] p0351 A80-22333
New opportunities for future, small General-Aviation Turbine Engines (GATE) [NASA-TH-80237] p0351 A80-22335
An overview of NASA research on positive displacement general-aviation engines [NASA-TH-80237] p0351 A80-22336
Lightweight diesel aircraft engines for general aviation [NASA-TH-80237] p0352 A80-22338
NASA propeller noise research [NASA-TH-80237] p0353 A80-22347
Ultrasonic combustion in general aviation piston engines [NASA-TH-163001] p0356 A80-22430
A spin-recovery parachute system for light general-aviation airplanes [NASA-TH-163001] p0369 A80-23512
Mathematical model for the separation of gust and manoeuvre loads of civil aircraft [BP-141(1979)] p0370 A80-23674
Measurement of the handling characteristics of two light airplanes [NASA-TP-16361] p0436 A80-25345
Aircraft accident reports: Brief format, US civil aviation issue number 8, 1979 accidents [NASA-NA-80-6-10] p0470 A80-26286
An assessment of the risk arising from electrical effects associated with the release of carbon fibers from general aviation aircraft fires [NASA-CP-159266] p0480 A80-26391
General Aviation dynamics: The impact of cost recovery [NASA-CP-159266] p0488 A80-27300
Energy conservation potential of general aviation activity [NASA-TH-16361] p0495 A80-27355
Transparent materials for civil aircraft [NASA-TH-16361] p0533 A80-28346
Primary balance data for a typical single-engine general aviation design for an angle-of-attack range of 8 deg to 90 deg. 2: High-wing model C [NASA-TH-79026] p0627 A80-32225
General aviation accidents: Post-spillage fires and how to prevent or control them [NASA-TH-79026] p0629 A80-32354
A hybrid composite helicopter main rotor blade employing pneumatic lift control
New materials and helicopter certification
Moisture absorption of polyester-E glass composites
Elastic ribbons based on thermally stable low-modulus fibers for the anticolonelining forming of glass-plastic aircraft components
A fast method to control tachiness of fiber rest prepgres
Development and test of low-impact resistant towers
Application of composite materials to turbofan engine fan exit guide vanes
GEOS-3 SATELLITE
Reinforced plastics: Fiberglass reinforcement, volume I, Citations from the NTSI data base --- with polymer matrices
Fiberglass-reinforced plastic surfacing for rapid runway repair by naval construction
GLASS FIBERS
Glass age properties of composites
Investigation of a foam supported glass fiber D-box for a rigid wing hang glider
Artificial icing test CH-47C helicopter with fiberglass rotor blades
Traffic testing of a fiberglass-reinforced plastic surfacing for rapid runway repair
Composite rotor blades for large wing energy installations
GEODETIC SATELLITES
Determination of local horizontal coordinates for airborne navigation
Method for increasing the accuracy of an airborne geodetic radio rangefinder
GEODETIC SATELLITES
Method for increasing the accuracy of an airborne geodetic radio rangefinder
GEODETIC SATELLITES
Determination of mean sea level, volume 2, Citations from the BTIS data base
Fiberglass rotor blades
GEOGRAPHIC COORDINATES
A direction-cosine position coordinate system for air navigation
GLASS FIBERS
Development and test of low-impact resistant towers
GLASS FIBERS
Third body formation and the wear of pipe
GLASS FIBERS
Fiberglass rotor produced
GLIDE PATHS
A comparison of first and second order techniques for computing optimal horizontal gliding trajectories --- for low level weapons delivery
AIR-TRANS-2031
Determination of mean sea level, volume 2, Citations from the BTIS data base
GEOGRAPHIC COORDINATES
A direction-cosine position coordinate system for air navigation
GLASS FIBERS
Development and test of low-impact resistant towers
GLASS FIBERS
Third body formation and the wear of pipe
GROUND EFFECT MACHINES

A nonlinear unsteady one-dimensional theory for wings in extreme ground effect p0405 880-39527
Major results of the asymptotic theory of a low-flying wing - Method of matched asymptotic expansions p0453 880-41708
A technique for simulating the motion and ground effect of aircraft wake vortices p0479 880-43686
VTOL in-ground effect flows for closely spaced jets [AIAA PAPER 80-1880] p0529 880-46693
A Navier-Stokes scheme for the calculation of three-dimensional impinging jet flows p0573 880-89298
The criticality of engine exhaust simulations on VTOL model-measured ground effects [AD-A073174] p0071 880-12093
Vicarious flowfields induced by two- and three-dimensional lift jets in ground effect [AD-A070982] p0229 880-18343
Ground plane effects on a contoured surface at low subsonic velocities [AD-A079977] p0289 880-20327
V/STOL propulsion-induced aerodynamics hover calculation method [AD-A008068] p0419 880-24306
The effects of ground wall-jet characteristics on fountain upwash flow formation and development [AD-A086127] p0546 880-29292
Investigation of transient induced aerodynamics in a moving deck environment [AD-A088164] p0629 880-32350
GROUND EFFECT MACHINES
CLilot wing-in-ground effect vehicles --- amphibious aircraft design p0320 880-33105
The hovercraft comes of age p0407 880-39569
JEFF(A) mixed-flow model fan performance optimization [AD-A07571] p0173 880-16234
Research on the stability of air cushion systems [OPTAS-238] p0219 880-17785
Air cushion craft development, first revision [AD-A084740] p0638 880-32592
Conceptual plant design study of a new CV9 FEEDSLS CAS aircraft for 1995 IOC [AD-A080351] p0646 880-33400

An integrated strapdown guidance and control system for launch vehicle application

H-53 helicopter
A compilation and analysis of helicopter handling
as a contributor to aircraft interior noise ---
[ NASA-CR-159008 ]
p0428 B80-25100

Experimental unsteady aerodynamics of conventional and supercritical airfoils --- conducted in the AIAA 11 foot transonic wind tunnel
[ NASA-FR-81221 ]
p0691 B80-33345

HARMONIC EXCITATION
Blade excitation by elliptical whirling in viscous-damped jet engines
[ ASME PAPER 80-GT-668 ]
p0686 A80-42277
Excitation and analysis technique for flight flutter tests
[ HB-OP-1046 (O) ]
p0122 B80-14700

HARMONIC OSCILLATION
Analysis of transonic flow about harmonically oscillating airfoils and wings...
[ AIAA PAPER 80-0149 ]
p0097 A80-18367
A panel method for calculating the loads acting on a wing that performs harmonic oscillations in subsonic flow
[ AIAA 80-0668 ]
p0149 A80-21272
Evaluation of the kernel of an integral equation for a wing performing harmonic oscillations in subsonic flow
p0150 A80-21296
Unsteady pressure measurements on wing-store combinations in incompressible flow
p0193 A80-26536
Practical design considerations for a flightworthy higher harmonic control system --- for flight testing on 09-88 helicopter
[ AIAA 80-0668 ]
p0335 A80-35100
Harmonic oscillations of annular wing in steady ideal fluid flow
p0336 B80-11019
An investigation of several factors involved in a finite difference procedure for analyzing transonic flow about harmonically oscillating airfoils and wings
[ NASA-CR-159143 ]
p0114 B80-14056
Symmetric variational formulation of harmonic vibrations problem by coupling primal and dual principles. Application to fluid-structure coupled systems
p0316 B80-22245
The harmonically oscillating body in subsonic flow: Effect of compressibility
[ NASA-FR-584 ]
p0360 B80-13270
Further investigation of a finite difference procedure for analyzing the transonic flow about harmonically oscillating airfoils and wings
[ NASA-CR-3195 ]
p0414 B80-24271

Optimal receivers and discrete-signal processors for hyperbolic radar navigation systems

HYPERSONIC AIRCRAFT

Propulsion/airframe integration considerations for high altitude hypersonic cruise vehicles
Approach estimation of the least number and optimal distribution of landing airports for maneuvering hypersonic flight vehicles
Thermostructural analyses of structural concepts for hypersonic cruise vehicles
Integrated thermal-structural finite element analysis - for applications to hypersonic transport design
Aerodynamic characteristics of a hypersonic research airplane concept having a 70 deg swept double-delta wing at Mach numbers from 1.80 to 2.20, with summary of data from 0.80 to 6.0 --- Langley 8-ft transonic wind tunnel
Loading tests of a wing structure for a hypersonic aircraft
A preliminary assessment of the impact of 2-D exhaust-nozzle geometry on the cruise range of a hypersonic aircraft with top-mounted ramjet propulsion

HYPERSONIC BOUNDARY LAYER

Influence of an entropy layer on boundary layer separation in hypersonic flow

HYPERSONIC FLIGHT

Centripetal forces on a thin wing in hypersonic flight at large angles of attack
Nosed fluid dynamics of supersonic and hypersonic flight
Heat transfer at a breaking point of the leading edge of a plate in hypersonic flight
Hypersonic propulsion --- supersonic combustion
Trajectories optimization in hypersonic flight
Hypersonic interference flow flight experiment design --- investigating aerodynamic heating and loads

HYPERSONIC FLOW

Hypersonic viscous shock layer on sweptback wings of infinite span at different angles of attack
Stability derivatives of blunt slender cones at high Mach numbers
Hypersonic slipflow of a viscous gas over a slender delta wing
Influence of the leading-edge planform on the hypersonic flow over a small-aspect-ratio wing
Hypersonic flow of gas over a slender wing of variable shape
Aerodynamics of hypersonic flows with fluid injection --- Russian book
Asymptotic integration of multicomponent gas-chemical-inequilibrium boundary layer equations --- hypersonic gas flow analysis
Contribution to the theory of hypersonic flow past three-dimensional wings
Influence of nonequilibrium on the aerodynamic characteristics of some wing profiles
Contribution to the theory of the small-aspect-ratio wing in hypersonic flow
High Mach number dynamic stability of pointed cones at small angles of attack

INTERNATIONAL COOPERATION
The Tornado multi-function combat aircraft --- An accomplishment of international collaboration p0009 A80-11853
F-16 co-production --- An American point of view [NASA-TP-1712] p0012 A80-12315
BBCA Tornado - Achievement by international collaboration p0050 A80-14112
A preliminary assessment of the impact of 2-D exhaust-nozzle geometry on the cruise range of a hypersonic aircraft with top-mounted ramjet propulsion. ([NASA-TR-81841], p0636 A80-32397)

J-65 ENGINE
Tests of an improved rotating stall control system on a J-65 turbojet engine. ([ASME PAPER 89-DT-17], p0056 A80-42155)

J-79 ENGINE
Fuel character effects on J79 and F101 engine combustor emissions. ([ASME PAPER 80-GR-70], p0460 A80-42200)

Evaluation of fuel character effects on J79 engine combustion system.
Contribution to the study of nonstationary signals
Coannular jets - Are they really quiet and why
A review of the research at NASA concerning the infrasonic emission of the OK 8-4 engine
Aeroacoustic characterization of free jets
Visualization of the acoustic excitation of a
Preliminary analysis of minimal time and minimum prediction of unsuppressed jet engine exhaust noise
A linearized theory for swirling supersonic jets
The complexity of jet noise generation
Characteristics of internal and jet noise
Model tests demonstrating under-wing installation
Current problems and the future in advanced supersonic transport noise
Infrasonic emission of the OK 8-4 engine
Airframe self-noise studies on the Lockheed L 1011
Acoustic characteristics of the external upper surface blowing propulsion-lift configuration
Subsonic transport noise
Pan noise reduction by single- and double-wall barriers -- for turbojet engine shielding
Pressure fields generated by instability waves and coherent structures in an impinging jet
A model for broadband jet noise amplification study
Characteristics of internal- and jet-noise radiation from a multi-lobe, variable area suppressor nozzle tested statically and under flight simulation
Results from flight noise tests on a Viper turbojet fitted with ejector/suppressor nozzle systems
Focal linearization of broadband jet noise
Wing effect on jet noise propagation
Four noise source locations from field measurements
Prediction of free-field noise levels from pole microphone measurements
Quiet Clean short-haul Experimental Engine
Wing effect on jet noise propagation
ACM noise source location from field measurements
Prediction of free-field noise levels from pole microphone measurements
QCSEE JT9D engine powered-lift acoustic performance
Quiet Clean short-haul Experimental Engine Under the Wing
A linearized theory for swirling supersonic jets and its application to shock-cell noise
Noise suppressors for jet engine testing
Location and propagation of shock associated noise from supersonic jets
Prediction of unsuppressed jet engine exhaust noise in flight from static data
Preliminary analysis of minimum time and minimum noise landing approach trajectories
Infrasonic emission of the X 6-4 engine
Discrete frequency noise reduction modelling for application to fanjet engines
Vizualization of the acoustic excitation of a subsonic jet
Coannular jets - Are they really quiet and why
Contribution to the study of nonstationary signals coannular jets with inverted velocity profiles
Aeroacoustic characterization of free jets
Experimental and numerical results on a shear layer excited by a sound pulse
A review of the research at NASA concerning the effects of flight on engine exhaust noise
Correlation of thrust and discharge losses for chemically nonequilibrium flows in jet-engine nozzles
A jet engine integrated generator
Effect of swirl, wake parameter and wake Reynolds' number on recirculation in combustion chambers of jet engines
Impact damage on titanium leading edges from small hard objects --- in compressor blading in jet engines
VSCF technology definition study
Computer simulation of engine systems
Expanded study of feasibility of measuring in-flight jet engine loads, performance, clearance, and thermal data
Measurements of jet dispersions simulated in an aeronautical wind tunnel
Fatigue strength testing employed for evaluation and acceptance of jet-engine instrumentation probes
Structural analysis of hollow blades: Torsional stress analysis of hollow fan blades for aircraft jet engines
Perforographic and spectrophotometric analysis of oil sampled before and after failure of a jet engine
Alternatives for jet engine control
Aerosol filter loading data for a simulated jet engine test cell aerosol
Data analysis of P sub y/P sub x sub S noise probe testing on a 100 engine P680072 at NASA Lewis Research Center
CF6-6D engine short-term performance deterioration
Performance deterioration based on in-service engine data: Y790 jet engine diagnostics program
Vibrations of a compressor blade with slip at the root
Effect of oxidizing fuels on aircraft fuel system elastomers and sealants
Engine bleed air reduction in B-10
Measurement of turbine engine transient airflow in ground test facilities
Implications of new production of older aircraft types (less than 75,000 pounds) to meet amended noise standards
The criticality of engine exhaust simulations on VSTOL model-measured ground effects
Static calibration of a two-dimensional wedge nozzle with thrust vectoring and spanwise blowing
Computational models for the viscous/inviscid analysis of jet aircraft exhaust plumes
Prediction of uncontrolled jet engine exhaust deflection
Reduction of nitric oxide emissions from a combustor
Proposed jet engine nozzle internal modification
Numerical investigation of the external flow over the after-body and the flow within the nozzle for different jet regimes
The simulation and modeling of jet plumes in wind tunnel facilities
Strondal number influence on flight effects on jet noise radiated from convecting quadrupoles
Effect of temperature on surface noise
Heat transfer to a plane wall from a heated, subsonic jet
Radiation in a wall jet flow environment --- mathematical models for noise reduction of STOL airplanes
An aerodynamic method for control and range improvement of rotary compressors
Experimental and analytical evaluation of 3-dimensional exhaust plumes
Parameterization of jet engine exhaust noise in flight from static data
Application of viscous analysis to the design of jet exhaust powered lift installations
Calculation of the interaction between an exhaust jet and a high-lift wing
Considerations of some critical ejector problems --- for the V/STOL aircraft
Flight-measured afterbody pressure coefficients from an airplane having twin side-by-side jet engines for Mach numbers from 0.6 to 1.6
Aerodynamic characterization of free jets
The criticality of engine exhaust simulations on VSTOL model-measured ground effects
Air pollution from aircraft
Noise generation by jet-engine exhaust deflection
Analysis of experiments on the effects of jet plumes on pressure distribution over a cylindrical afterbody at transonic speeds
Static calibration of a two-dimensional wedge nozzle with thrust vectoring and spanwise blowing
Computational models for the viscous/inviscid analysis of jet aircraft exhaust plumes
Jet flap noise generation from a full-scale STOL jet engine system
Jet flap noise generation from a full-scale STOL jet engine system

LATERAL OSCILLATION
Wind tunnel measurement of lateral aerodynamic derivatives using a new oscillatory rig, with results and comparisons for the Su-27 aircraft
[ARC-BM-30847] p0600 A80-31356
LATERAL STABILITY
Effects of the aerodynamic cross-coupling and lateral acceleration derivatives on airplane dynamic characteristics
[IAIA PAPER 80-0170] p0089 A80-17659
Aircraft aerodynamics - Dynamics of longitudinal and lateral motion - Soviet book
p0101 A80-19378
MCAS design philosophy for fighter aircraft
p0164 A80-17661
Lateral rollover control
p0198 A80-19378
Exploratory investigation of the effects of vortex bursting on the high angle-of-attack lateral-directional stability characteristics of highly swept wings
[IAIA 80-0463] p0201 A80-26960
Comparison of stability and control parameters for a light, single-engine, high-winged aircraft using different flight test and parameter extinction techniques
[NASA TR-800163] p0303 A80-10225
AH-1G Lateral flight performance test
[BA-1072568] p0070 A80-12008
Initial study of the response of an aircraft to lateral gusts
[IAIA-NT-79-003] p0181 A80-17084
Digital computer solution of aircraft longitudinal and lateral directional dynamic characteristics
[AD-A076672] p0236 A80-19068
LATEROSITY
U LATERAL STABILITY
U LATERAL CONTROL
LATTICE (MATHEMATICS)
The quasi-vortex-lattice method for wings with edge vortex separation
[NASA CR-162530] p0116 A80-14052
LAUNCH ESCAPES
Prototype development passive, seat-mounted life retention system
[AD-A076271] p0234 A80-19053
LAUNCH VEHICLES
NT ARABIE LAUNCH VEHICLE
An integrated strutdown guidance and control system for launch vehicle application

NT AIRCRAFT LAUNCHING DEVICES
NT CATAPOULTS
NT GUN LAUNCHERS
BY HOEUTE LAUNCHERS
LAUNCHING
NT AIR LAUNCHING
New remotely piloted vehicle launch and recovery concepts. Volume 1: Analysis, preliminary design and performance/cost trade studies
[AD-A077475] p0236 B80-19066
LAVAL JET
Investigation of flows in Laval nozzles at small Reynolds numbers
p0467 A80-42569
LAW (JURISPRUDENCE)
BY INTERNATIONAL LAW
BY LEGAL LIABILITY
Evidence in aircraft accident investigation and its evaluation
p0277 A80-31593
LAW
BY SCALING LAWS
LEAD ACID BATTERIES
Sealed lead acid batteries for aircraft applications
p0571 A80-40482
LEADING EDGE SLATS
Performance improvement of delta wings at subsonic speeds due to vortex flaps
[IAIA PAPER 80-1802] p0669 A80-43208
Full-scale wind-tunnel investigation of the effects of leading-edge modifications on the high angle-of-attack aerodynamic characteristics of a low-wing general aviation airplane
[IAIA PAPER 80-1804] p0470 A80-33302
Airplane wing leading edge variable camber flap
p0369 A80-23514
LEADING EDGE SHEET
Steady flow over the pressure side of a piecewise-flat delta wing with supersonic leading edges
p0015 A80-12508
Stationary flow past the lower surface of a piecewise planar delta wing with supersonic leading edges
p0328 A80-34708
Careful numerical study of flowfields about asymmetric external conical corners
[IAIA PAPER 80-1229] p0451 A80-41562
Supersonic wings with significant leading-edge throat at cruise
[IAIA-TP-1632] p0302 B80-21279
Low-speed aerodynamic characteristics of a highly swept wing configuration with several deflected leading edge concepts
[NASA TR-80180] p0641 A80-33347
LEADING EDGES
BY SHARP LEADING EDGES
Investigation of leading-edge devices for drag reduction of a 60-degree-delta wing at high angles of attack
[IAIA PAPER 80-0310] p0999 A80-18309
Studies of leading-edge throat phenomena
[IAIA PAPER 80-0325] p0999 A80-18315
The effects of leading-edge modifications on the post-stall characteristics of wings
[IAIA PAPER 80-0199] p0997 A80-18175
Streamwise development of the flow over a delta wing
[IAIA PAPER 80-0200] p0997 A80-18376
Effects of forebody, wing and wing-body-LX flowfields on high angle of attack aerodynamics --- Leading Edge extensions
[SAE PAPER 791082] p0194 A80-26638
Numerical modeling of supersonic flow near a thin delta wing with discontinuous edge
p0203 A80-27147
Limit separation bubble with transition/therapy and experiment/
[ORRA, TP NO. 1900-20] p0204 A80-27203
Design of flat plate leading edges to avoid flow separation
p0272 A80-30571
Cosmally casedbored delta wings in supersonic flow. I - Basic solutions
p0285 A80-30571
Reflex casedbored delta wings with leading edge separation
p0285 A80-30571
Heat transfer at a breaking point of the leading edge of a plate in hypersonic flight
p0467 A80-42965
A-260
SUBJECT INDEX
Effects of discontinuous drooped wing leading-edge modifications on the spinning characteristics of a low-wing general aviation airplane [AIAA PAPER 80-1423] p0070 A80-33301
Controlled supercritical crossflow on supersonic wings - An experimental validation [AIAA PAPER 80-1423] p0070 A80-844158
Flow studies of slender wing vortices [AIAA PAPER 80-1423] p0057 A80-844159
Validation of a wing leading-edge stall prediction technique [AIAA 80-1620] p0051 A80-85808
Aerodynamic characteristics of configurations consisting of half-cylinders and flat delta wings with supersonic leading edges [AIAA 80-1620] p0052 A80-86853
Impact damage on titanium leading edges from small hard objects -- in compressor blades in jet engines p0061 A80-52297
Estimation of attainable leading-edge thrust for a computer program and supersonic speed [NASA TP-1500] p0022 H80-10105
Leading edge vortex-flap experiments on a 75 deg delta wing [NASA CR-195161] p0036 H80-11108
Measurements on a three-dimensional swept wing at low speeds. Part 1: The flow around the leading edge [NAA-130-PT-1] p0036 H80-11104
Impact damage on titanium leading edges from small soft body objects [AD-A072705] p0071 H80-12095
Leading edge flutter of supercavitating hydrofoils [AD-A073382] p0071 H80-12236
Explanatory study of the effects of wing-leading-edge modifications on the stall/spin behavior of a light general aviation airplane [NASA TP-1569] p0078 H80-13026
The quasi-vortex-lattice method for wings with edge vortex separation [NASA CR-162530] p0014 H80-14052
Aerodynamic investigation of C-141 leading edge modification for cruise drag reduction, volume 1. [AD-A076610] p0170 H80-17063
Aerodynamic investigation of C-141 leading edge modification for cruise drag reduction, volume 2 [AD-A077688] p0238 H80-19081
A computer program for calculating aerodynamic characteristics of low-aspect-ratio wings with partial leading-edge separation [NASA CR-165362] p0077 H80-26268
Study of an edge vortex by means of ultrasonic in a close field behind a rectangular wing in a wind tunnel [SPIE-11/1979] p0087 H80-30282
Basic studies of wing-body interference at high angles of attack and supersonic speeds [AIAA 80-13780] p0099 H80-31355
Evaluation of laminar flow control system concepts for subsonic commercial transport aircraft [NASA CR-159253] p0046 H80-33394

A-266
Determination of the loading capacity of wave transmissions with a slide generator

On the nosewheel, snap-through problem

A literature search and review of the dynamics of aircraft-surface interaction

Digital load control applied to full-scale airframe fatigue tests

Determination of the loading capacity of wave transmissions with a slide generator

Equations for determining aircraft notions for damaged runways

A comprehensive analytical model of rotorcraft aerodynamics and dynamics. Part 2: User's manual

Aircraft dynamic response to damaged runways

UK approach to aircraft dynamic response on damaged and repaired runways

Parameters affecting aircraft performance on runways in bad condition

Cold-air investigation of a 4 1/2 stage turbine with stage-loading factor of 4.66 and high specific work output. 2. Stage group performance

Multilevel optimum design of wing box structures with fiber composite panel components

A comprehensive analytical model of rotorcraft aerodynamics and dynamics. Part 2: User's manual

Design, development, and flight demonstration of the loads and stability characteristics of a bearingless main rotor

Calibration of Mirage IIII undercarriage to determine slide loads from measured strains

Evaluation of the impact of towing the 1-101 airplane at Boston-Logan Airport

Analysis of ground calibration data from strain gauges attached to the airframe of C47-A air couriers A19-031

Logic Design

Algorithm and logic for incorporating ZLS NASA C-135 aircraft area navigation system

Logic Design

Algorithm and logic for incorporating ZLS NASA C-135 aircraft area navigation system

LONGITUDINAL STABILITY

LONGITUDINAL STABILITY

AEROSPACE ENGINEERING

Aircraft operations and logistics simulation

Impact of aircraft vs logistics characteristics on operational readiness

Computer simulation model of the logistic support system for electrical engineering test equipment

Development of an effectiveness planning and evaluation model for Air Force Maintenance Organizations

Air Force Automatic Test Equipment (ATE) life cycle technical and logistics support considerations

Aerospace Engineering and Logistics Support

Acquisition logistics management in naval aviation

Avionics logistics support including V/STOL, LAMS, and instrument repair

Synthesis of a theoretical approach for employing adaptive configuration management in aeronautical weapon system programs

Helicopter air traffic management systems with civil/military interoperability

Logistics forecasting for achieving low life cycle cost — aircraft maintenance

Evaluating and selecting the preferred aircracht breathing weapon system

Some civil engineering and management aspects of conversion from JP-4 to JP-8 fuel by the United States Air Force in the continental United States

Cargo Logistics Aircraft Systems Study (CLASS)

Volume 5: Summary

LONGITUDINAL STABILITY
The effect of the law of control on the dynamics of the longitudinal motion of an aeroplane with variable geometry wing

On the stability of the longitudinal disturbed motion of an airplane with lift force control system

Force equilibrium and performance balance of aircraft longitudinal motion graphically presented in the Korsham diagram

Comparison of stability and control parameters for a light, single-engine, high-winged aircraft using different flight test and parameter estimation techniques

Result of a Loran-C flight test using an absolute digital phase-locked loop and HF front-end

Interference and noise in and adjacent to the experimental loop antennas for 60 KHz to 200 KHz

A possible effect of atmospheric waves on 100 KHz Loran-C signals

Results of a Loran-C flight test using as absolute data reference

Airborne evaluation of the production Loran-C navigator — HR-3 and HR-52 aircraft flights

West Coast Loran-C flight test

Interference and noise in and adjacent to the Loran-C spectrum at airports

Loran-based buoy position auditing systems: Analytical evaluation

A possible effect of the leading-edge planform on the characteristics of a fighter airplane with relaxed longitudinal static stability — P-16

Effect of sweep and aspect ratio on the longitudinal aerodynamics of a spanloader wing in and out-of-ground effect — conducted in Landing V/STOL wind tunnel

Digital computer simulation of aircraft longitudinal and lateral directional dynamic characteristics

Handling quality requirements for advanced aircraft design longitudinal mode

The flying qualities of aircraft with augmented longitudinal and directional stability

Effect of conventional and square stores on the longitudinal aerodynamic characteristics of a fighter aircraft model at supersonic speeds — in the Langley unitary plan wind tunnel

Flight evaluation of nondimensional static longitudinal stability test methods

Handling quality requirements for advanced aircraft design longitudinal mode

Contribution to the theory of the small-aspect-ratio wing — A navigation algorithm for single channel low-cost tactical navigation

Development of high lift devices for application to a single-stage-to-orbit vehicle design

Study of blade aspect ratio on a compressor front stage

Effect of sweep and aspect ratio on the small-aspect-ratio wing in hypersonic flow over a small-aspect-rectangular wing

Experimental study of low aspect ratio compressor blading

Minimum mass sizing of a large low-aspect-ratio wing — airframe for flutter-free performance

The capability of one low-cost advanced titanina structures

Data analysis methodology for day/night inflight tactical navigation

High-speed, low-level flight survival on ejection from high-speed, low-level flight profiles

The capabilities and operational roles of Royal Air Force Tornadoes

Low-aspect-ratio limit of the toroidal reactor — The spherocore

Analytical investigation of the nonlinear characteristics of a small-aspect-rectangular wing

Influence of the leading-edge planform on the hypersonic flow over a small-aspect-ratio wing

Analysis of the nonuniqueness of solutions to the problem of flow separation for small-aspect delta wings

Improvement of the convergence of the method of polynomials in designing small-aspect-ratio wings

Contribution to the theory of the small-aspect-ratio wing in hypersonic flow

A computer program for calculating aerodynamic characteristics of low aspect-ratio wings with partial leading-edge separation

Low speed aerodynamic characteristics of wings of aspect ratios 3 and 4 equipped with high lift systems

Scalar update navigation algorithms for a low-cost NAVSTAR GPS receiver — in general aviation aircraft avionics

A navigation algorithms for single channel low-cost GPS receiver

Built-up low-cost advanced titanium structures
evaluating the level of flight safety

BAA MACHINE SYSTEMS

Adaptive allocation of decisionmaking responsibility between human and computer in multitask situations

A statistical method applied to pilot behavior analysis in multiloop systems

Automation and air traffic control

Human factors in aircraft accidents

Aircraft collisions

Airliner simulator census

Instrumentation for a tactical aircraft air-to-ground full-mission simulation

The aircraft, the pilot, and flight safety — Russian book

Wings for human-powered flight

Application of advanced digital techniques and displays to the L-1011 flight engine to station

The crew adaptive cockpit — Firefox, here we come — technology assessment of airport/aircraft digital avionics systems in military aircraft

Continuous-to-discrete transformations for control system simulation — digital flight control filters for man-in-the-loop systems

Air Defense Ground environment — A case for automation

Flexible formats — The controller controls the computer

Front office for the new technology transport - 1990

Men, aircraft and systems of navigation — an evaluation for the 1980s

Synthesis of piloting properties of training simulators with allowance for the human factor

Theoretical-experimental synthesis of a multicriterial ergotic control system

BACIS - A new lighting control system for Gatwick

Experience with an adaptive stick-gain algorithm to reduce pilot-induced-oscillation tendencies

A pilot modeling technique for handling-qualities research

Air traffic control/full beacon collision avoidance system, Knoxville simulation

Experience with an adaptive stick-gain algorithm in an aircraft ground-handling simulation

Fire control using cockpit displays

Application of modified profile analysis to function testing of the motion/no-motion issue in an aircraft ground-handling simulation — statistical analysis procedure for man machine systems flight simulation

Vocabulary specification for automatic speech recognition in aircraft cockpits

Air traffic control/full beacon collision avoidance system, Florence simulation

Deforestation: High-resolution projection display development for air traffic control purposes

OPTIMIZATION METHODS IN FINE-FINISHING AND
DESIGNING GAS-TURBINE ENGINES --- RUSSIAN BOOK

LOW CYCLE FATIGUE LIFE MODEL FOR GAS TURBINE
ENGINE DISKS

AN APPLICATION OF MODEL-FOLLOWING CONTROL

NUMERICAL SIMULATION OF THE WIND TUNNEL
ENVIRONMENT BY A PANEL METHOD

FLIGHT CONTROL DESIGN BASED ON NONLINEAR MODEL
WITH UNCERTAIN PARAMETERS

IMPLICIT MODEL FOLLOWING AND PARAMETER
IDENTIFICATION OF UNSTABLE AIRCRAFT

NOISE RADIATION FROM THE SIDE EDGES OF FLAPS

THE MODELING OF THE NOISE EMMITED BY A PROFILE IN
A TURBULENT FLOW BY MEANS OF UNSTEADY
AERODYNAMIC THEORIES

MATHEMATICAL MODELING AND ANALYSIS OF THE
TECHNOLOGICAL PROCESSES OF AIR TRAFFIC CONTROL.

THE IMPORTANCE OF TIMELY FINITE ELEMENT MODELING
IN TET GEN DESIGN

ELEMENTARY CONSIDERATIONS FOR RAMJET MODELING

PROSPECTS FOR COMPUTER MODELING IN RAMJET ENGINES

COMBUSTION MODELING NEEDS FOR THE 80'S

THE BASIC MODELS OF MECHANICS OF LIQUIDS AND GASES
IN THE THEORY OF THE WING

METEOROLOGICAL AND AIR POLLUTION MODELING FOR AN
URBAN AIRPORT

A MODEL FOR HELICOPTER GUIDANCE ON SPIRAL
TRAJECTORIES

LOW ORDER EQUIVALENT MODELS OF HIGHLY AUGMENTED
AIRCRAFT DETERMINED FROM FLIGHT DATA USING
MAXIMUM LIKELIHOOD ESTIMATION

MATHEMATICAL MODELING AND ANALYSIS OF
TECHNOLOGICAL AIR TRAFFIC CONTROL PROCESSES. II

Energy conservation in terminal airspace through
fuel consumption modeling

High-alpha aerodynamic model identification of the
t-WC aircraft using the HBB system

A stopping performance model for aircraft with
forward or reverse thrust

Account for working fluid compressibility in the
gas turbine engine transient operating regimes

Analytical approaches to the analysis of the
behavior of the system

Semidefinite model for the dynamic stall of
airfoils in the theory of the wing

Calculation of responses of a helicopter blade
in forward flight

Propagation of edge cracks in laterally excited
stiffened panels

Parametric method of aircraft engine status
diagnostics based on limited information

Analytic representation of turbine characteristics
in a form convenient for computer calculation of
GT2 parameters

Application of the factor interpolation method in
flight vehicle landing gear analytic design

A study to develop optimization algorithms for
aircraft wing structures

Coupled rotor and fuselage equations of motion

Stability and control of aircraft using Lagrange's equations

A method for assessing the impact of wake vortices of
helicopters on their propeller

Inclusion of unsteady aerodynamics in longitudinal
parameter estimation from flight data —— used of
vortices and mathematical models for
parameterization from flight characteristics

Dimensional equations of motion of a
deformable aircraft using Lagrange’s equations
in an arbitrary non-inertial frame of reference

Aeroelastic modeling and analysis of aircraft
engine in view of the application to the
aerodynamics of aircraft engines

A mathematical model of the 1FCS

Parametric method of aircraft engine status
diagnostics based on limited information

Analytic representation of turbine characteristics
in a form convenient for computer calculation of

A mathematical model of the 1FCS
The development and operation of the BDC anechoic acoustic test facility

[ARRA PAPER 80-0962] p0392 A80-38633

Mechanical Devices

p0159 A80-23335

Pressure and flow measurement flight testing

[AIAA PAPEB 80-0049] p0092 A80-18251

Evaluation of the crack gage concept for monitoring aircraft flow growth potential Volume 1. Technical discussion

[AD-1076421] p0106 B80-17510

Lightning Technology: Proceedings of a technical symposium

[NASA-CP-2128] p0312 B80-21927

Instrumentation for calibration and control of a continuous-flow cryogenic tunnel

[AIAA TM-81825] p0413 B80-24265

Measurement of moments of inertia and principal inertia axis of a gnat aircraft

[AR-TR-79090] p0419 B80-24310

The P-4 service life tracking program crack growth gages

[AD-1083978] p0495 B80-27353

Pressure and flow measurement -- flight testing

The development and operation of the BDC anechoic acoustic test facility

[AIAA PAPER 80-0962] p0392 A80-38633
Analysis of coatings for wear and corrosion resistance on aluminum alloys.

Evaluation of coatings for wear and corrosion protection in aerospace applications.

Development and evaluation of processes for deposition of NiCrAlY coatings for gas turbine components.

A regression model of fatigue crack propagation under flight simulation loading.

Evaluation of the effectiveness of case-hardening and other surface treatments on aluminum alloys.

Crack-detectives oil film failure.

Evaluation of the effectiveness of case-hardening gas turbine engine components.

Fatigue and microstructure; Proceedings of the Materials Science Seminar, St. Louis, Mo., October 18, 1978.

Fatigue in machines and structures.

Fatigue in aluminum alloys.

Acceleration of multicycle fatigue testing on aluminum structural alloys.

The fatigue performance of service aircraft and the relevance of laboratory data.

Avoiding divergent stall in control-configured aircraft by using a canard arrangement.

Flight simulation fatigue crack propagation in 7010 and 7075 aluminum plates.

Experimental methodology and application of fracture mechanics concepts to metals.

Corrosion fatigue behavior of coated 4340 steel for blade retention bolts of the AH-1 helicopter.

Material considerations for gas turbine engines.

On turbine blade creep and fatigue analysis by special kinematic assumptions.

Pulse compression results using metallic reflective array lines.

Fatigue life prediction of a bonded splice joint.

The diffusion of water vapor in humid air into the adhesive layer of bonded metal joints.

Materials Science Seminar, St. Louis, Mo., October 14, 15, 1978.

Investigation of the wear particle content in oil by measurements of the reluctance and eddy current losses in an electric circuit.

Fatigue life prediction of a bonded splice joint.

Honeycomb sandwich joints for primary structure.

The use of holographic speckle interferometry to study the stress-strain state of a gas turbine engine disk near a scarf joint with a blade.

Study of the relaxation of the tightening force of bolted joints.

The diffusion of water vapor in humid air into the adhesive layer of bonded metal joints.

Materials Science Seminar, St. Louis, Mo., October 14, 15, 1978.

Investigation of the wear particle content in oil by measurements of the reluctance and eddy current losses in an electric circuit.

Fatigue life prediction of a bonded splice joint.

Honeycomb sandwich joints for primary structure.

The use of holographic speckle interferometry to study the stress-strain state of a gas turbine engine disk near a scarf joint with a blade.

Study of the relaxation of the tightening force of bolted joints.

The diffusion of water vapor in humid air into the adhesive layer of bonded metal joints.

Materials Science Seminar, St. Louis, Mo., October 14, 15, 1978.

Investigation of the wear particle content in oil by measurements of the reluctance and eddy current losses in an electric circuit.

Fatigue life prediction of a bonded splice joint.

Honeycomb sandwich joints for primary structure.

The use of holographic speckle interferometry to study the stress-strain state of a gas turbine engine disk near a scarf joint with a blade.

Study of the relaxation of the tightening force of bolted joints.

The diffusion of water vapor in humid air into the adhesive layer of bonded metal joints.

Materials Science Seminar, St. Louis, Mo., October 14, 15, 1978.

Investigation of the wear particle content in oil by measurements of the reluctance and eddy current losses in an electric circuit.

SUBJECT INDEX

Prediction of the interior noise levels of high-speed propeller-driven aircraft
AIAA PAPER 80-0012 p0338 A80-35961
Noise control prediction for high-speed, propeller-driven aircraft
AIAA PAPER 80-0013 p0338 A80-35962
An analytical model for study of interior noise control for high-speed, propeller-driven aircraft
AIAA PAPER 80-1005 p0338 A80-35963
A unique noisemander jet noise prediction procedure
AIAA PAPER 80-1013 p0339 A80-35968
Model rotor low frequency broadband noise at moderate tip speeds
AIAA PAPER 80-1021 p0339 A80-35971
Fan noise caused by the ingestion of anisotropic turbulence - A model based on axisymmetric turbulence theory
AIAA PAPER 80-1031 p0340 A80-35981
Analytical study of the effects of wind tunnel turbulence on a rotor noise
AIAA PAPER 80-1022 p0339 A80-35978
Prediction of flyover noise from single and continuous sources
AIAA PAPER 80-1031 p0340 A80-35981
Model tests demonstrating under-wing installation effects on engine exhaust noise
AIAA PAPER 80-1048 p0340 A80-35992
Prediction of noise constrained optimum takeoff procedures
AIAA PAPER 80-1055 p0340 A80-35996
Comparison of aircraft noise-contour prediction programs
AIAA PAPER 80-1057 p0341 A80-35998
Airframe self-noise studies on the Lockheed L 1011 TriStar aircraft
AIAA PAPER 80-1061 p0341 A80-36000
Subsonic transport noise
AIAA PAPER 80-0008 p0373 A80-36322
The development of inflow control devices for improved simulation of flight noise levels during static testing of a HBB turbofan engine
AIAA PAPER 80-1024 p0393 A80-36339
Prediction of free-field noise levels from pole microphone measurements
AIAA PAPER 80-0058 p0394 A80-36469
Ground reflection effects on aircraft flyover noise
AIAA PAPER 80-1059 p0394 A80-36450
Prediction of unassessed jet engine exhaust noise in flight from static data
AIAA PAPER 80-1006 p0508 A80-44491
A review of present discrete frequency noise prediction technology with emphasis on two current methods for noise data calculations
AIAA PAPER 80-47656
Discrete frequency noise reduction modeling for applications to fanjet engines
AIAA PAPER 80-0028 p0580 A80-50228
Noise of a model helicopter rotor due to ingestion of turbulence
AIAA PAPER 80-0031 p0338 A80-11067
A study of the prediction of cruise noise and laminar flow control noise criteria for subsonic air transports
AIAA PAPER 80-1006 p0508 A80-44491
An improved prediction method for the noise generated in flight by circular jets
AIAA PAPER 80-0006 p0375 A80-21961
Near-field noise prediction for aircraft in cruising flight methods manual - laminar flow control noise analysis
AIAA PAPER 80-15910 p0075 A80-12818
An improved prediction method for the noise generated in flight by circular jets
AIAA PAPER 80-81970 p0314 A80-22048
A research CGH engine: Acoustic test results
AIAA PAPER 80-22330 p0351 A80-22330
A comparison between an existing propeller noise theory and wind tunnel data
AIAA PAPER 80-21519 p0428 A80-25101
Interior noise control prediction study for high-speed propeller-driven aircraft
AIAA PAPER 80-15920 p0428 A80-25102
Some calculated effects of non-uniform inflow on the radiation noise of a large wind tunnel
AIAA PAPER 80-81813 p0429 A80-25104
Analytical study of interior noise control by fuselage design techniques on high-speed, propeller-driven aircraft
AIAA PAPER 80-15922 p0429 A80-25105
V/STOL rotary propeller noise prediction model update and evaluation

NOISE REDUCTION

Some effective sound barriers are --- for aircraft noise reduction
AIAA PAPER 80-11382 p0047 A80-25106
Parameter selection for aerodynamic design of propellers

Flight and wind-tunnel test results of the mechanical jet nozzle suppressor nozzle

Investigation of flow in Laval nozzles at small Reynolds numbers

Experimental and analytical evaluation of 3-dimensional exhaust plumes

Correlation of thrust and discharge losses for chemically nonequilibrium flows in jet-engine nozzles

Application of spline approximations to the calculation of wall pressures in three-dimensional supersonic nozzles

Influence of swirl chamber dimensions on the jet angle of an air nozzle

Influence of working-fluid interface through a nozzle on the rate of flame front propagation in a pulsed-type combustion chamber

Heat transfer of the critical air flow in a nozzle. I: The flow and heat transfer characteristics of an accelerated transonic air flow in a divergent nozzle

Workshop on Thrust Augmenting Ejectors

Workshop on Thrust Augmenting Ejectors

Evaluation of thrust augmenting ejectors

Calculation of the static characteristics of nozzle

Calculation of the static characteristics of nozzle

Calculation of the static characteristics of nozzle

Investigation of swirl chamber dimensions on the jet angle of an air nozzle

Correlation of thrust and discharge losses for chemically nonequilibrium flows in jet-engine nozzles

Heat transfer of the critical air flow in a nozzle. I: The flow and heat transfer characteristics of an accelerated transonic air flow in a divergent nozzle

Workshop on Thrust Augmenting Ejectors

Workshop on Thrust Augmenting Ejectors

Calculation of the static characteristics of nozzle

Calculation of the static characteristics of nozzle

Calculation of the static characteristics of nozzle

Investigation of swirl chamber dimensions on the jet angle of an air nozzle

Correlation of thrust and discharge losses for chemically nonequilibrium flows in jet-engine nozzles

Heat transfer of the critical air flow in a nozzle. I: The flow and heat transfer characteristics of an accelerated transonic air flow in a divergent nozzle

Workshop on Thrust Augmenting Ejectors

Workshop on Thrust Augmenting Ejectors
Flexible formats - The controller controls the computer

Air traffic control system measures and data

Full authority microprocessor digital control --- for advanced technology engine

Profile cutting with direct data allocation and real-time operation planning

Digital electrohydraulic control surface actuator, positioned by means of quick-acting solenoid valves

Optical GTE regulation program design --- Gas Turbine Engine

A unified digital approach to the control of a diverse range of engines

Advantages of the digital technology for the realization of engine control systems

The digital control system as part of an integrated accessory fit for future engines

Numerical Flow Visualization

A numerical simulation of fog dissipation using passive barrier liners. I - Model development and comparison with observations. II - Sensitivity experiments

Reynolds number and compressibility effects on dynamic stall of a NASA 0012 airfoil

Engine aerodynamic installation by numerical simulation

Improved numerical simulation of high speed inlets using the Navier-Stokes equations

Numerical simulation of supersonic inlets using a three-dimensional viscous flow analysis

An experimental and numerical investigation of a threeshadow shock wave separated turbulent boundary layer

Simulated transonic flows for aircraft with nacelles, pylons, and winglets

Numerical simulation of the wind tunnel environment by a panel method

Numerical modeling of supersonic flow near a thin delta wing with discontinuous edge

Transonic inlet flow calculations using a general grid-generation scheme

Numerical study of separated turbulent flow over airfoils

Non-symmetric blade row interaction in axial turbomachines

The determination of deviation angles at exit from the nozzles of an inward flow radial turbine

The status of theoretical methods for calculation of detached flows

Numerical simulation of three-dimensional bottail afterbody flow fields

Application of viscous analyses to the design of jet exhaust powered lift installations

Aerodynamic analysis of a supersonic cascade vibrating in a complex mode

Calculation of the supersonic flow past a slender delta wing at angles of attack and side-slip

Use of advanced computers for aerodynamic flow simulation

Aerodynamic performances of three fan stator designs operating with rotor having tip speed of 337 m per second and pressure ratio of 1.54, Relation of analytical code calculations to experimental performance

Numerical flow field program for aerodynamic heating analysis. Volume 1: Equations and results

Airfoils at sonic velocity --- Tricon equation

Computational and simplified analytical treatment of transonic wing-fuselage-pylon-store interactions

Minicomputer control of extracted radar data for advanced technology engine

Damping in ring seals for compressible fluids

Integral methods of solving thermal conduction problems and their application to heat exchange calculations in gas turbine engine components

Direct integration of transient rotor dynamics

The response of turbine engine rotors to interference rubs

An integral-representation approach for time-dependent viscous flows

Steady state spurious errors in shock-capturing numerical schemes

O Ring Seals

Damping in tapered annular seals for an incompressible fluid

Damping in ring seals for compressible fluids

Oblique Shock Waves

Oblique detonation wave ramjet

Steady state spurious errors in shock-capturing numerical schemes

Oblique Wings

Determination of an oblique wing aircraft's aerodynamic characteristics

Wind tunnel investigation of an oblique wing transport model at such numbers between 0.6 and 1.6

Some recent trends in aircraft flutter research --- analyses of flutter for aircraft design and use of oblique wings in aircraft configurations

The oblique wing-research aircraft

Operational implications of some NACA/NASA rotary wing induced velocity studies p0209 A80-27599

A-301
Why have none of the airship projects conceived during the last fifteen years not been realized to the present?

The pilot face to face with concrete realities — application of flight regulations and instructions to various flight problems.

Impact of aircraft vs logistics characteristics on operational readiness.

[IEEE Papers 80-1830]

ICRA Lagreb meeting — airport problems and prospects.

Operations Research.

Airport capacity and delays.

Mathematical modelling and analysis of the technological processes of air traffic control.

Estimating the time required to transition aircraft fleets to new scheduled maintenance intervals.

Minimum performance standards:
- Automatic Primary-ELT (AP).
- Automatic Portable-ELT (AP).
- Automatic Regional-ELT (AR).

On-line real-time management information systems and their impact upon user personnel and organizational structure in aviation maintenance activities.

Development of an effectiveness planning and evaluation model for Air Force Maintenance Organizations.

The effect of the Western Union Weather Data System on the preflight briefing position at the Chicago Flight Service Station.

Operations Research.

Flexible formats — the controller controls the computer.

Operations (Mathematics).

Method of conjugate gradients for optimal control problems with state variable constraints.

Operations (Personnel).

VT Aircraft Pilots.

VT Pilots (Personnel).

Allocation of limited airport facilities to improve utilization in the deregulation environment.

[IEEE Paper 800722]

Optical Absorption.

Light Transmission.

Optical Communication.

A fiber-optic link for high-speed, DAS-to-computer data transmission — Digital data acquisition system for ramjet engine test cell to base central data processing center.

Radio and optical flight support systems and communications in civil aviation — Russian book.

Application of VHF-FEG optical communications technology for aircraft to satellite links.

Intercommunications in real time, redundant, distributed computer system.

Optical Data Processing.

Hybrid optical/digital processing for target identification.

Optical Equipment.

VT Cameras.

VT Endoscopes.

VT Image Tubes.

VT Laser Doppler Velocitymeters.

VT Reflectorst.

VT Optical Gyrosopes.

VT Optical measuring Instruments.

Operations Research.

The pilot face to face with concrete realities — application of flight regulations and instructions to various flight problems.

Impact of aircraft vs logistics characteristics on operational readiness.

Intercommunications in real time, redundant, distributed computer system.

Optical remote sensing methods for determination of slant range visibility.

Optical tracking.

IR-camera for day and night fire control.

VTOL test techniques utilizing laser tracking.

Optics.

VT Geodetical Optics.

Optical control.

VT Time Optimal Control.

Numerical computation of neighboring optimal feedback control schemes in real-time.

A singular perturbation analysis of optimal aerodynamic and thrust magnitude control.
Optimal receivers and discrete-signal processors for hyperbolic radar navigation systems
Application of automated system to air traffic control --- Russian book
A new procedure for linear optimal flight control
Follow-up and final-value control of a special non-linear process - A study on optimal aircraft guidance during the final landing phase
Optimal washout for control of a moving base simulator - vertical motion flight simulation using linear filter
Fuzzy controls for maintenance scheduling in transportation systems -- aircraft flight trajectory regulation
Theory of correlation-extrema navigation systems --- Russian book
Optimization of flight-vehicle control on the basis of motion of a variable-component body
Controllers for aircraft motion simulators [AIAA PAPER 80-0050]
Constrained optimum trajectories with specified range
A nonlinear observer/command generator tracker approach to the YF-97 helicopter gun turret control law design
Development of a program for controlling the angle of bank of an orbital aircraft during entry into the atmosphere
Optimal output feedback for systems having direct feedthrough of control --- applied to turbofan engine regulator design
Optimal design of a linear sampled data control system using round robin output feedback
A single-step method of optimizing statically indeterminate minimum-volume systems
Minimum-weight wing in the presence of lift constraints
Application of geometrical programming to problems of optimal design
Flight control design based on nonlinear model with uncertain parameters
Implicit model following and parameter identification of unstable aircraft
Optimal control of flight vehicle motion in a turbulent atmosphere
Selection of the characteristic polynomial of a closed-loop transfer function by minimizing integral quadratic estimates
Design of perfect model following systems by geometric approach --- application of optimal control to improve aircraft flight control
Application of certain optimal methods of propeller phase synchronisation
Predictive guidance for interceptors with time lag in acceleration
Minimum sensitivity controllers with application to VTOL aircraft
Navigation for a group of aircraft - A combination of data processing and flight control procedures/
Optimal output feedback for systems having direct feedthrough of control --- Russian book
Optimization of air navigation and air traffic control --- Russian book
Active flutter suppression using linear quadratic Gaussian theory
A model-based technique for predicting pilot opinion ratings for large commercial transports
A direct method for synthesizing low-order optimal feedback control laws with application to flutter suppression
A pilot modeling technique for handling-qualities research
Controlling the technical servicing at an air technical base
The optimization of air-traffic control techniques and the problems of operational capacity
Application of optimal constant output feedback to flight control system design
Optimal GNSS regulation program design --- Gas Turbine Engine
Optimal control synthesis for systems with distributed parameters in the case of a local performance index
Optimal control of flight vehicle with elastic elements
Multivariable digital control systems
Method of conjugate gradients for optimal control problems with state variable constraints
Inequalities and approximation with applications to VTOL aircraft -- using control theory for optimal control approximations
Design criteria for optimal flight control systems --- study of optimal flight control systems engineering for feedback control
Closed loop models for analyzing engineering requirements for simulators
Optimal flow control of air traffic
Application of two design methods for active flutter suppression and wind-tunnel test results
Definition of a two-level control system for nonlinear motion of an aircraft
Determining the optimal control laws for setting the rpa's of a turbojet engine
Optimization and simulation of flight control laws under parameter uncertainty and external disturbances
Optimization
Advanced technology effects on V/STOL propulsive system weight

[AD-A089482]  p0537  H80-28379

The use of simulators for training in-flight and emergency procedures  
[AD-A00-284]  p0606  H80-34192

Advanced simulator for pilot training: Design of automated performance measurement system  
[AD-A088855]  p0649  H80-33421

PILOTLESS AIRCRAFT

MT DREAME AIRCRAFT

Pyrotechnic delay cutters for more severe accelerations and temperature environments --- Mid-Air Retrieval System (MARS) for remotely piloted vehicle  
[p0160 A80-23462

Flight research techniques utilizing remotely piloted research vehicles  
[p0597 H80-31337

PILOTS (PERSONNEL)

MT AIRCRAFT PILOT'S Aircrew displays and avionics for application in a future national airspace system  
[NASA-TM-80502]  p0036  H80-11052

Low cost simulation of piloting tasks  
[AD-A080856]  p0483  H80-26332

FLY PLOW

Effect of flow swirling on heat transfer in the cylindrical part of the presnose volume of a model chamber  
[p0002 A80-10196

Performance of conical diffusers up to the choking condition  
[p0261 A80-29130

Transmission of high frequency sound waves through a plug flow jet  
[p0337 A80-35944

PIPLINES (COMPUTERS)

Bit slices in a radar processor --- for target detectability improvement  
[p0160 A80-23530

PIPER AIRCRAFT

Aircraft accident report: COHAIB, Inc., Piper PA-31-310, Bariyo, N6442L, Greater Cincinnati Airport, Covington, Kentucky, 8 October 1979  
[FBST-AAR-80-8]  p0478  H80-26287

General aviation icing flight test  
[p0594 H80-33132

PIPFES (TUBES)

Selection of tube diameters for aircraft deicing systems  
[p0527 A80-47190

Mathematical formulation of the problem of selecting the tube diameters of aircraft deicing systems  
[p0564 A80-47405

PISTON ENGINES

MT DIESEL ENGINES

Experimental investigation of the characteristics of pneumatic transfer lines  
[p0099 A80-19052

Study of cooling air inlet and exit geometries for horizontally opposed piston aircraft engines  
[AIAA PAPER 80-1242]  p0401  A80-38984

Dynamic tests of a tent bed for piston engines  
[p0512 A80-42342

Hydrazine monopropellant reciprocating engine development  
[ASME PAPER 78-WA/AERO-12]  p0524  A80-65488

Exhaust emissions characteristics for a general aviation light aircraft Teledyne Continental Motors 6-285-B piston engine  
[AD-A07436]  p0520  H80-13042

Exhaust emission reduction for intermittent combustion aircraft engines  
[NASA-CR-155757]  p0121  H80-11430

Exhaust emissions characteristics for a general aviation light-aircraft Avco Lycoming TIO-540-J2BD piston engine  
[AD-A075735]  p0179  H80-17070

Exhaust emissions characteristics for a general aviation light-aircraft Teledyne Continental Motors (TCM) GTIO-520-K piston engines  
[AD-A08043]  p0292  H80-20270

The spark-ignition aircraft piston engine of the future  
[p0351 H80-22317

Ultralean combustion in general aviation piston engines  
[NASA-CR-163001]  p0356  H80-22430

Evaluation of HC (hydrocarbon) control strategies for general aviation piston engines  
[PB80-155393]  p0486  H80-26971

Exhaust emissions characteristics for a general aviation light-aircraft Avco Lycoming O-320/IO-320-DIAD piston engine  
[AD-A084933]  p0535  H80-28364

High power density superconducting generator
The challenge of designing reliable ECM transmitters

POWER EFFICIENCY
Wind-turbine power improvement with modern airfoil
Aerodynamic design optimisation for a fuel
efficient high-performance, single-engine, business aircraft
Fuel efficiency of small aircraft

Some aspects of the thermodynamics of ducted jet flows
--- in turbofan engines

Range of applicability and energetic
classification of small-scale high-pressure-gradient birotational turbines
Organizing multistage energy conversion systems

Influence of upper and lower overlap on efficiency of partial-admission axial air microturbine
Speed control of electrical pumps in aircraft and military vehicle applications

Effect of water injection and off scheduling of variable inlet guide vanes, gas generator speed and power turbine nozzle angle on the performance of an automotive gas turbine engine

PREDICTION TECHNIQUES

determination and identification of the high order
model (EBB) system identification method to the high order

A new approach for predicting the dynamic properties of a rotor

A new technique to evaluate performance of jet engine power plant design

A new method to evaluate performance of jet fuel filtration equipment

On turbine blade creep and fatigue analysis by special kinematic assumptions

Estimation of attainable leading-edge thrust for wings at subsonic and supersonic speeds

Prediction of helicopter rotor downwash in hover and vertical flight

Improved methods for predicting spectrum loading effects, phase 1 report, volume 2: Test data

Prediction of lateral aerodynamic loads on fighter aircraft at high angles of attack

A method for evaluating aircraft take-off performance

Remarks on the transonic flow past oscillating airfoils

An adaptation and validation of a primitive variable mathematical model for predicting the flows in turbojet test cells and solid fuel rockets

Prediction of dynamic properties of a rotor supported by hydrodynamic bearings using the finite element method

The YC-14 upper surface blown flap: A unique control surface

Analysis of fuel-conservative curved decelerating approach trajectories for powered-lift and STOL jet aircraft

Flight evaluation of configuration management system concepts during transition to the landing approach for a powered-lift, STOL aircraft

Application of the Estimation-Before-Bodeling (EBB) system identification method to the high angle of attack/sideslip flight of the 7-2C jet trainer aircraft. Volume 2: Simulation study using 7-2C wind tunnel model data

Application of the Estimation-Before-Bodeling (EBB) system identification method to the high angle of attack/sideslip flight of the 7-2C jet trainer aircraft. Volume 3: Identification of
SUBJECT INDEX

[AD-A072743] p0081 A80-13049
Investigations on unsteady pressure distribution measurements in rotating systems
[RASA-TW-503-RBY] p0042 A80-13059
Pressure distribution on Jonkowski wings
[NASA-TW-3346] p0126 A80-15036
The aerodynamic forces on airship hulls
[NASA-CA-159189] p0127 A80-15052
A comparison of calculated and experimental lift and pressure distributions for several helicopter rotor sections
[NASA-TW-81160] p0168 A80-16036
Theoretical solution of the aerodynamics of a helicopter rotor blade model in an unsteady flow regime during wind tunnel tests
[AAP-NT-79-21] p0175 A80-17036
Unsteady effects with control surfaces --- measured in a wind tunnel
[AD-A081467] p0359 A80-23259
Pressure distribution measurements on wedges at transonic and transonic velocities --- in a transonic wind tunnel
[ASA-TW-554] p0360 A80-23267
Documentation of cascade unsteady pressure difference program
[AD-A039879] p0497 A80-27368
Combined linear theory/impact theory method for analysis and design of high speed configurations
[NASA-Ch-3314] p0587 A80-30273
An experimental solution of lift loss for a round parabaloid with a central lifting jet
[AD-A006668] p0587 A80-30276
Jet interference on supercritical wings. Part 1: Experiments on a two-dimensional wing. Part 2: Experiments on a swept wing ---- wind tunnel tests
[NASA-R-T-3865] p0600 A80-31365
Pressure data for four analytically defined arrow wings in supersonic flow --- Langley Unitary Plan Wind Tunnel tests
[NASA-TW-81835] p0628 A80-32332
PRESSURE DRAG
MT EXPERIENCE DRAG
MT SUPERSONIC DRAG
A comparison of jet temperature effects on afterbody drag with those from jet molecular weight and nozzle area ratio variations
[AIIEEE Paper 80-1161] p0488 A80-41191
PRESSURE DRIFT
Determination of start-up pressure losses for gas-turbine engine compressors
[ASME Paper 80-GT-95] p0458 A80-42178
PRESSURE EFFECTS
Class of shockfree airfoils producing the same surface pressure
[ASME Paper 80-GT-95] p0488 A80-42178
Influence of swirl chamber dimensions on the jet angle of an air nozzle
[ASA-TW-554] p0526 A80-47801
Pressure in a liquid from a gas bubble generated by blasting a high-explosive in an inertiaally sealed parabolic chamber --- for explosive forcing
[ASA-TW-554] p0526 A80-47804
PRESSURE FIELDS
P PRESSURE DISTRIBUTION
PRESSURE OSCILLATIONS
PRESSURE GAGES
MT BAROMETERS
MT Piezometric GAGES
PRESSURE GRADIENTS
Pressure losses in the inlet and outlet channels of high-pressure single- and two-stage axial-flow fans
[AD-A081598] p0364 A80-36786
Three-dimensional self-similar laminar boundary layer with longitudinal and transverse pressure gradient
Use of nose cap and fuselage pressure orifices for determination of air data for space shuttle at Mach number below supersonic speeds

[NASA-TP-1643] p0635 A80-32389
PRESSURE MEASUREMENTS
Unsteady pressure measurements on wing-store combinations in incompressible flow
Pilot-static system - Errors and calibrations
Unsteady pressure measurements and data analysis techniques in axial-flow compressors
Temperature and pressure measurement techniques - for an advanced turbine test facility
Aerodynamic losses in a gas turbine stage with film cooling
On the pressure losses due to the tip clearance of centrifugal blowers
Time-dependent measurement of base pressure in a blowdown tunnel with varying unit Reynolds number
Measurements on a three-dimensional swept wing at low speeds. Part 1: The flow around the leading edge
Measurements on a three-dimensional swept wing at low speeds. Part 2: The flow in the boundary layer on the main wing
Aerodynamic measuring techniques in or outside turbulent flows
Static pressure orifice system testing method and apparatus
Detection of the transitional layer between laminar and turbulent flow areas on a wing surface --- using an accelerometer to measure pressure levels during wind tunnel tests

[NASA-CA-SLAB-12269-1] p0229 A80-18350
The pressure transducer: Application of pavement design --- airport runways
Surface pressure measurements at two tips of a model helicopter rotor in hover
Hypersonic heat transfer test program in the VKI low-speed facility
[AD-A081467] p0359 A80-23252
Afterbody drag and base pressure measurements on a body of revolution at angles of incidence up to alpha = 25 deg at subsonic and transonic Mach numbers --- transonic wind tunnel measurements
[ASA-TW-554] p0360 A80-23268
Wing tip investigations of an all flush orifice air data system for a large subsonic aircraft --- conducted on a Langley 8 foot transonic pressure tunnel
[NASA-TP-1642] p0364 A80-23304
Flight test evaluation of airborne tire pressure indicating systems
[AD-A081598] p0364 A80-32305
Pressure and flow measurement --- flight testing
A digital unit for measuring unsteady pressure coefficients --- in a wind tunnel

[NASA-TP-1643] p0635 A80-32389
PRESSURE OSCILLATIONS
A velocity potential panel method for the prediction of unsteady airloads on oscillating wings and bodies
Pressure fields generated by instability waves and coherent structures in an impinging jet [AIAA PAPER 80-0906]

An experimental investigation of pressure oscillations in a side dump ramjet combustor [AIAA PAPER 80-1117]

Aerodynamic characteristics of moving trailing-edge controls at subsonic and transonic speeds [AIAA-PH-STRUCT-947]

Pressure pulsing

Statistical characteristics of pressure fluctuations in the flow-separation zone on a plate behind a spoiler [NASA-CM-80-08183]

Base pressure fluctuations --- aircraft acoustic loads

Experimental and numerical results on a shear layer excited by a sound pulse [NASA-CM-80-08183]

Pressure recovery

Effect of the relative area of the flow core on the performance of a hypersonic wind tunnel [NASA-CM-80-16773]

Straight-walled, two-dimensional diffusers - Transitory stall and peak pressure recovery

The hybrid diffuser --- for gas turbine engines [ASME PAPER 80-GT-136]

An investigation of vane-island diffusers at high swirl [ASME PAPER 80-GT-148]

Pressure reduction

Secondary losses in axial compressor [NASA-CM-80-16773]

Reduced bleed air extraction for DC-10 cabin air conditioning [AIAA PAPER 80-1197]

Engine bleed air reduction in DC-10 [NASA-CM-159846]

Pressure sensors

Measuring unsteady pressure on rotating compressor blades --- with semiconductor strain gages under gas turbine engine operating conditions [NASA-CM-80-12630]

Some dynamic and time-averaged flow measurements in a turbine rig [NASA-CM-80-12630]

System to measure the pressure distribution on fan aerfoil surfaces during flutter conditions [NASA-CM-80-12630]

Steady-state performance of J85-21 compressor at 100 percent of design speed with and without interstage rake blockage [NASA-CM-80-12630]

Data analysis of P sub S sub f sub S and S sub T sub T sub S sub f sub S pressure probe testing on T100 engine F680072 at NASA Lewis Research Center [NASA-CM-159816]

Experimental study of airfoil trailing edge noise: Instrumentation, methodology and initial results [NASA-CM-159816]

System for use in conducting wake investigation for a wing in flight --- differential pressure measurements for drag investigations [NASA-CM-159816]

Pressure transducers

U pressure sensors

Pressure waves

U elastic waves

Pressure welding

MT diffusion welding

MT ultrasonic welding

Pressurized cabins

Helicopter environmental control - Commercial and military solutions [ASME PAPERS 79-ENAS-35]

Air supply system approach for the Boeing Model 767 Aircraft [ASME PAPERS 80-0906]

Pressurized

MT fuel tank pressurization

Crack development in panels of a pressurized fuselage under the combined effect of pressurization-induced cyclic loads and high-frequency vibrations

Pressure probes

U pressure sensors

Pressure pulses

Investigation into adaptive control of a helicopter [AIAA PAPER 80-1595]

Organization of automatic control systems for flying qualities design criteria [NASA-CM-159318]

Designing on-condition tasks for naval aircraft [NASA-CM-159318]

Primary BATTERIES

U nickel zinc batteries

Primary sailings

U sailings

Primary circuits

U large scale integration

Private aircraft

U general aviation aircraft

Probability

U probability theory

Probability distribution functions

Development of a normalized probability distribution for lateral load factors due to aircraft ground turning [AD-0107507]

Probabilities of vertical overlap: A sensitivity analysis --- vertical separation standards for aircraft [NASA-CM-159319]

Probability theory

Factorial interpolational method of analyzing the accuracy of nonlinear automatic control systems in the presence of random effects

Solution of the steady-state heat conduction problem by a probability method --- temperature calculation for gas turbine engine components

On determining the temperatures at given points of cooled turbine blades made from multilayer perforated materials

Statistical aspects of carbon fiber risk assessment modeling --- fire accidents involving aircraft [NASA-CM-159319]

Problem solving

U asymptotic methods

U iterative solution

A computerized method for calculating flutter characteristics of a system characterized by two degrees of freedom

Procedures

U finite element method

U panel method (fluid dynamics)

Proceedings

Flying qualities design criteria [AD-0108629]

Process control

U industry

Organizations of automatic control systems for technological processes in aircraft mechanical engineering --- Russian book

Refining and upgrading of synfuels from coal and oil shales by advanced catalytic processes [AIAA PAPER 80-0906]

Investigation into adaptive control of a slip-cast, reaction-bonded silicon-nitride process via adaptive learning network modeling [AD-0103730]

Refining and upgrading of synfuels from coal and oil shales by advanced catalytic processes [AIAA PAPER 80-0906]
Cost analyses for avionics acquisition
The integrated management of reliability and maintainability in procurement

Product development
The interrelationships between engineering development simulation and flight simulation --- aircraft design development simulator technology transfer to flight simulator and training program improvements

NASA gear research and its probable effect on rotorcraft transmission design

Development and flight test of a two-place night/ adverse weather A-10 for the close-air support and battlefield attack mission

Crossing the Channel in the Gossamer Albatross

Flight recording in the UK. I - Evolution

Airbus family concept for the 1990s
The aerodynamics of future transport aircraft and the role of the wind tunnel during development
Test program set development process used for P3 Orion avionics support
The anatomy of an avionics system development and integration laboratory

The hovercraft comes of age
Planning technology development to achieve consistent component technology and flexibility of application --- for military airbreathing propulsion systems

The development and application of improved combustor wall cooling techniques

Development and field experience of a new 29000 HP gas turbine

Product performance enhancement in the United States Air Force

Development of lightweight transformers for airborne high power supplies

PRODUCTION ENGINEERING

Production planning
Organization of automatic control systems for technological processes in aircraft mechanical engineering --- Russian book

Diffusion bonding as a production process --- Book

Composites in aircraft manufacturing - An impressive rise --- in Western Europe

The shapes of things to come - An introduction to the capabilities of the British Aerospace Numerical Master Geometry System --- computer-aided design and manufacturing of aerodynamic surfaces

NASAIR pushes SPP/08 for structures --- in naval aircraft design and construction

Fiberglass rotor produced

Pratt and Whitney innovations --- turboshaft blade casting and hot isostatic pressing of turbine disks

CAD on the F-18 program --- Computer aided Design and Drafting

New materials and methods for airframe and propulsion systems

CAD/CAM in packaging aerospace electronics

Technology and commercial aspects of aircraft production

Profile cutting with direct data allocation and real-time operations planning

Cost effective series production on the basis of new design and production principles, using a light aircraft as an example

Integration of CAD/CAM systems for production of structural components

Advanced manufacturing development of a composite spaceplane component for 1-1011 aircraft

Manufacture of low carbon astrology turbine disk shapes by hot isostatic pressing. Volume 2, project 1

Parametric study of helicopter aircraft systems costs and weights

Some examples of procedures used in UK for acceptance testing of aircraft produced by the aircraft industry under government contract

Production management
F-16 co-production - An American point of view

Value analysis for the aircraft Airbus

Costs and benefits of requiring new production of older aircraft types to meet amended noise standards

The application of design to cost and life cycle costs and weights

Cost estimating relationships for airframes in the development and production phases

Product performance enhancement in the United States Air Force

Development of lightweight transformers for airborne high power supplies

PRODUCTION METHODS

Production planning
Planning technology development to achieve consistent component technology and flexibility of application --- for military airbreathing propulsion systems

Production methods
Profile method (forecasting)

IPF aircraft handled forecast by air route traffic control center, fiscal years 1979-1990

Application of modified profile analysis to function testing of simulated CTOL transport touchdown-performance data

Technological forecasting- aircraft design. Citations from the International Aerospace Abstracts data base

Cargo generation forecasting models

Discontinuous registration of industrial
Wind tunnel investigation of an oblique wing transport model at Mach numbers between 0.6 and 1.4

A-352
**SUBJECT INDEX**

**AERODYNAMIC DESIGN**

- Boundary layer separation
- Unsteady flow separation
- Statistical characteristics of pressure fluctuations in the flow-separation zone on a plate behind a spoiler
- Certain types of separated flow over slotted wings
- Analytical investigation of aerodynamic characteristics of highly swept wings with separated flow
- Experimental study of confluence with separation on an afterbody of revolution
- Analysis of the nonuniqueness of solutions to the problem of flow separation for small-aspect ratio delta wings
- Diagnosis of separated flow regions on wind-tunnel models using an infrared camera
- The delta wing in oscillatory gusts
- Noise due to tip vortex formation on lifting rotors

**AERODYNAMIC MEASUREMENTS**

- Numerical study of separated turbulent flow over airfoils
- The states of theoretical methods for calculation of detached flows
- A vortex-lattice method for the calculation of the unsteady separated flow over delta wings
- An experimental investigation of a wing with controlled mid-span flow separation
- Structures of flow separations over swept wings
- An investigation of corner separation within a thrust augmenter having Coanda jets
- The gushi-vortex-lattice method for wings with edge vortex separation
- High angle of attack characteristics of different fighter configurations
- An analytical and experimental study of a short s-shaped supersonic diffuser of a supersonic inlet
- Control of forebody three-dimensional flow separations
- Identification of noise sources in PC centrifugal fan rotors
- Three-dimensional interactions and vortical flows with emphasis on high speeds

**FRICTIONAL RESISTANCE**

- Suppression of self-oscillations in combustion chambers by means of resonance sound absorbers
- Simple turbulence models and their application to boundary layer separation
- A computer program for calculating aerodynamic characteristics of low aspect-ratio wings with partial leading-edge separation
- The analytical prediction of the separation behavior of external stores after release from the carrier aircraft
- An analysis method for multi-component airfoils in separated flow
- Concerning the separated flow about an inflating parachute

**INTEGRATION AND SYSTEMS**

- Effects of aircraft power plant usage on turbine engine relative durability/life
- Time between overhaul vs premature removal rates
- High pressure turbine blade life sensitivity
- Life prediction of turbine blades under low-cycle fatigue and creep
- Reliability and life of aircraft gas turbine engines
- Is the structural life of an aircraft engine limited
- Handling problems through compressor deterioration
- Determination of aircraft life factors according to MILL-2 requirements

**ECONOMIC LIFE CRITERIA**

- Economic life criteria for metallic airframes
- High pressure turbine blade life sensitivity
- Life and utilization criteria in design for balanced life and performance of aircraft gas turbine engine
- Effect of aircraft power plant usage on turbine engine relative durability/life
- Life and utilization criteria in design for balanced life and performance of aircraft gas turbine engine
- Navy operational and support cost model of aircraft engines
- Time between overhaul vs premature removal rates as turbine design considerations
- Fuel property effects on life characteristics of aircraft turbine engine combustors
- Experience in extending the life of gas turbine blades

**SPECIALIZED SYSTEMS**

- Aircraft radiometers based on semiconductor devices
- Simple turbulence models and their application to boundary layer separation
- A computer program for calculating aerodynamic characteristics of low aspect-ratio wings with partial leading-edge separation
- The analytical prediction of the separation behavior of external stores after release from the carrier aircraft
- An analysis method for multi-component airfoils in separated flow
- Concerning the separated flow about an inflating parachute
- Effects of aircraft power plant usage on turbine engine relative durability/life

Improvement of the convergence of the method of polynomials in designing small-aspect-ratio wings

SHOCK LOADS

FT BLAST LOADS

Shock loading on reinforced spliced joints of ultra high modulus graphite/epoxy cone frustums - advanced interceptor structures

Measurement and correlation of structural response to inlet hammerhead phenomena on an F-16 airplane

Shock resistance

Impact resistance

Simulating the shock protection performance of large transit packs by means of small scale laboratory models - applicable to aircraft engine power plant design

Subject index

Shock tests

Shock loading on reinforced spliced joints of ultra high modulus graphite/epoxy cone frustums - advanced interceptor structures

Shock wave attenuation

Forward acoustic performance of a shock-swallowing high-tip-speed fan (QF-13)

Shock wave control

Inlet drag and stability considerations for R/O = 2.00 design

[IAIA PAPER 80-1105]

Turbojet-exhaust nozzle-secondary-airflow pumping as an exit control of an inlet-stability bypass system for a Mach 2.5 axisymmetric mixed-compression inlet - Lewis 10- by 10-ft. supersonic wind tunnel test

Shock wave interaction

Separation due to shock wave-turbulent boundary layer interaction

[OPERA TF No. 1979-146]

Analysis of two-dimensional interactions between shock waves and boundary layers

[IAIA PAPER 80-20288]

The interaction of three shock waves

Separation pressure of a turbulent boundary layer in transonic interactions

[IAIA PAPER 80-36035]

A linearised theory for swirling supersonic jets and its application to shock-cell noise

[IAIA PAPER 80-41628]

Sonics-booze wave-front shapes and curvatures associated with maneuvering flight

[ISPA-TP-14069]

Shock wave profiles

Steady flow over the pressure side of a piecewise-flat delta wing with supersonic leading edges

[IAIA PAPER 80-12313]

Stationary flow past the lower surface of a piecewise plane delta wing with supersonic leading edges

Measurement of shock waves around a delta-wing sesmione

[IAIA PAPER 80-36031]

Shock wave propagation

Approximate method of determining the wave drag of a profile in the presence of a local supersonic region

Experiments on the diffraction of weak blast waves - The von Neumann paradox

Numerical method for calculating superersonic flow past a plane air intake with attached shock wave

Steady-state entrainment of a body by a shock wave

A simplified shock-fitting solution to a supersonic internal corner flowfield

Location and propagation of shock associated noise from supersonic jets

Influence of nonequilibrium on the aerodynamic characteristics of some wing profiles

A theoretical investigation of the shock location on an axisymmetric body and on a two dimensional airfoil in transonic flows affected by axial pressure gradients and shifts in pressure level

On supersonic flow with attached shock waves over delta wings

[IAIA PAPER 80-0002]

An experimental and numerical investigation of a three-dimensional shock wave separated turbulent boundary layer

[IAIA PAPER 80-22727]

Quiet Short-Haul Experimental Engine (QCSEE) ball spline pitch change mechanism whirligig test report [NASA-CR-135326]

Quiet Short-Haul Experimental Engine (QCSEE) Under-The-Wing (OTW) boiler plate nacelle and core exhaust nozzle design report [NASA-CR-135056]

Quiet Short-Haul Experimental Engine (QCSEE) whirl test of cone/harmonic pitch change actuation system [NASA-CR-135140]

Quiet Short-Haul Experimental Engine (QCSEE) Under-The-Wing (OTW) composite nacelle [NASA-CR-135352]

Quiet Short-Haul Experimental Engine (QCSEE): The Quiet Short-Haul Experimental Engine (QCSEE) Preliminary analyses and design report, volume 1 [NASA-CR-134838]

Quiet Short-Haul Experimental Engine (QCSEE): Preliminary analyses and design report [NASA-CR-134839]

Quiet Short-Haul Experimental Engine (QCSEE): Quiet short-haul research aircraft experiments' handbook [NASA-TM-81162]

QCSEE OTW engine powered-lift acoustic performance [NASA-TM-81504]

Static and transient performance of T7-102 engine with up to 14 percent core bleed for the quiet short-haul research aircraft [NASA-TM-81520]

A piloted simulator analysis of the carrier landing capability of the quiet short-haul research aircraft [NASA-TM-81508]

Quiet Short-Haul Experimental Engine (QCSEE) under-the-wing engine-composite fan blade [NASA-TM-81530]

Quiet Short-Haul Experimental Engine (QCSEE): Preliminary design test report [NASA-TM-81986]

Reverse thrust performance of the QCSEE variable pitch turbofan engine [NASA-TM-81988]

Large scale wind tunnel investigation for future modifications to the quiet short-haul research aircraft — New 60- by 80-ft wind tunnel [NASA-CR-152349]

Application of advanced technologies to small, short-haul transport aircraft [NASA-CR-152360]

Application of advanced technologies to small, short-haul transport aircraft [NASA-CR-152350]

The TC-14 upper surface blown flap: A unique control surface [NASA-TM-81150]

Evaluation of approximate methods for the prediction of noise shielding by airframe components [NASA-TM-81048]

Application of advanced technologies to small, short-haul transport aircraft [NASA-CR-152349]

Application of advanced technologies to small, short-haul transport aircraft [NASA-CR-152350]

Evaluation of approximate methods for the prediction of noise shielding by airframe components [NASA-TM-81048]

Flight tests of the total automatic flight control system (TACFOS) concept on a DBC-6 Twin Otter aircraft [NASA-TM-81153]
SUBJECT INDEX

SYNOPSIS

[NASA-79-7597] p0225 N80-19047
Development of the A-6/circulation control wing flight demonstrator configuration [AD-A0124721] p0355 N80-22365
Estimation of wind shear and thrust loss during STOL aircraft landing approach [AD-A0124721] p0363 N80-23296
Phase 1 wind tunnel tests of the J-97 powered, external augmentor V/STOL model [NASA-CR-152152] p0529 N80-28303
A piloted simulator analysis of the carrier landing capability of the quiet short-haul research aircraft [NASA-TM-70505] p0532 N80-28338
Design of an adaptive control system for the FB72D STOL aircraft with provisions for eigenvalue and eigenvector selection [V/STOL equivalent systems analysis] p0605 N80-31405
[AD-A087620] p0606 N80-31414
Development of a nozzle to improve the turning of supersonic Coanda jets [AD-A087709] p0610 N80-31765
A comparison of flight and simulation data for three automatic landing system control laws for the augmenter wing jet STOL research airplane [NASA-CR-152365] p0623 N80-32338
Development of high lift devices for application to advanced Navy aircraft [AD-A089226] p0633 N80-32382
SHORT WAVE RADIATION BY MILLIMETER WAVES
SHORT WAVE RADIO TRANSMISSION A new technique for measuring an aircraft's velocity from the spectrum of its RF transmissions p0050 N80-14495
SHRINKAGE Shrinkage-compensating cement for airport pavement, phase 2 p0173 N80-16197
SHROUDED BODIES U SHROUDS SHROUDED TURBINES
On the influence of short shroud platforms on turbine stage operation p0004 N80-10627
Dynamic analysis of rotating asymmetric cross-section blade packet [ASME PAPERS 79-DIA-93] p0057 N80-15761
Gas path seal [NASA-CAS8-HPO-12131-3] p0230 N80-18490
The response turbine shroud study [AD-A080602] p0353 N80-22352
Composite seal for turbomachinery p0405 N80-26658
SHROUDED On the pressure losses due to the tip clearance of centrifugal blowers [ASME PAPERS 80-GT-121] p0462 N80-42252
On the influence of short shroud platforms on turbine stage operation --- performance tests for shrouded rotor blades on gas turbine engines p0200 N80-10083

SLIDING FRICTION

Calculation of the supersonic flow past a slender delta wing at angles of attack and sideslip
p0525 A80-46826

Investigation of the influence of the parameters of a wing/engine combination on the critical flutter speed
p0525 A80-46871

Experimental and theoretical investigation of the lifting properties of a wing of deformable profile
p0568 A80-47393

Low-frequency and small perturbation equation for transonic flow past wings
p0567 A80-47768

Selecting rational high-aspect-ratio wing structural stiffening scheme
p0582 A80-50442

Technical evaluation report on the fluid dynamics panel symposium on high angle of attack aerodynamics --- slender wings, bodies of revolution, and body-wing configurations
p0015 A80-10147

Some measurements of buffeting on an aeroelastic model of a slender wing aircraft
p0081 A80-13055

Means for controlling aerodynamically induced twist --- equipment to control twisting of slender wings due to aerodynamic loads
p0015 A80-13064

On the swirling of rolled-up vortex surfaces and the breakdown of the vortex core for slender wings
p0641 A80-33346

SLIDING FRICTION

Dynamics of the braking system of transport aircraft
p0563 A80-47368

Determination of the loading capacity of wave transmissions with a slide generator
p0563 A80-47382

SLIP FLOW

Supersonic slipflow of a viscous gas over a slender delta wing
p0150 A80-21266

SLIPSTREAMS

NT PROPELLER SLIPSTREAMS

SLIDING

SLIPSTREAMS

ST PROPELLER SLIPSTREAMS

SLOTS

SLIP STREAMS

SLOTS ANTENNAS

UHF coplanar-slot antenna for aircraft-to-satellite data communications
p0050 A80-14883

Bore sight errors induced by missile radomes
p0058 A80-15889

Radiation characteristics of printed slot antennas with a switchable parasitic slot
p0058 A80-15889

Buoyant module VHF antenna design for submersed systems/aircraft communications
p0214 A80-28254

SLOTS

NT WING SLOTS

Design of blade attachment in compressor rotor annular slot
p0615 A80-51879

Wind tunnel force and pressure tests of a 2% thick general aviation airfoil with 20% slendor, 25% slotted flap and 10% slot-lip spoiler
p0067 B80-12053

The influence of blade profile and slots on the performance of a centrifugal impeller
p0425 B80-24581

SLIDED ANTENNAS

U SLOT ANTENNAS

SLIDED WIND TUNNELS

Design of slotted transonic wind tunnels for supersonic flow development
p0275 A80-30976

A simplified model for the viscous crossflow in a slotted test section
p0074 B80-12372

SLUBBY PROPELLANTS

Carbon slubby fuels for volume limited missiles
p0500 B80-27512

SHALL PROPELLETS

Flutter analysis of a NASA 60A006 airfoil in small disturbance transonic flow
p0217 B80-28051

Numerical solution of three-dimensional unsteady transonic flow over swept wings
p0506 A80-44143

SUBJECT INDEX

Low-frequency and small perturbation equation for transonic flow past wings
p0567 A80-47768

Allowance for unsteady boundary layer effects in two-dimensional transonic calculations
p0623 A80-53298

SHEAR

Size distribution and surface area measurements of gas turbine combustor soot
p0060 A80-16949

SMOOTHING

NT DATA SMOOTHING

SNACKING

U LATERAL OSCILLATION

SOARING

Soaring flight optimization theory and an application in sailplane design
p0063 A80-17338

SOUND TRANSDUCERS

Noise from a vibrating propeller
AIAA PAPER 80-1011
p0278 A80-31616

Refraction of sound by aircraft wing tip vortices
AIAA PAPER 80-0975
p0319 A80-35669

Ground effects on aircraft noise --- near grazing incidence
NASA-TH-80165
p0075 N80-12820

A time dependent difference theory for sound propagation in ducts with flow --- characteristic of inlet and exhaust ducts of turbofan engines
[ NASA-TH-79302]
p0075 N80-12823

The analysis of sound propagation in jet engine ducts using the finite difference method
[AD-A074233]
p0125 N80-14853

Atmospheric turbulence effects on aircraft noise propagation
[ NASA-CR-159325]
p0540 N80-29095

SOUND TRANSMISSION

Determining the optimal fan silencer design of aircraft engines
p0326 A80-34396

Experimental investigation of sound absorption in a flow-carrying channel with a sound-absorbing lining
p0326 A80-34399

Suppression of self-oscillations in combustion chambers by means of resonance sound absorbers
p0326 A80-34400

Model studies of acoustic resonators
p0327 A80-34403

Transmission of high frequency sound waves through a slug flow jet
AIAA PAPER 80-0969
p0337 A80-35944

Noise transmission and control for a light, twin-engine aircraft
AIAA PAPER 80-1036
p0340 A80-35964

On sound transmission into a stiffened cylindrical shell with frames and stringers treated as discrete elements
p0620 A80-52723

Sound transmission into a laminated composite cylindrical shell
p0620 A80-52724

Studies of the acoustic transmission characteristics of coaxial nozzles with inverted velocity profiles, volume 1 --- jet engine noise radiation through coaxial exhaust nozzles

SUBJECT INDEX

Overview of stall/spin technology

Spin prediction techniques

Contribution to the theory of a rotor spinning on a flexible shaft

Global stability and control analysis of aircraft at high angles of attack

Spin reduction techniques for improved departure/spin resistance for fighter aircraft

Rockets for spin recovery

Spin stabilization techniques for the remotely piloted spin research vehicle

Spin prediction techniques

A dynamic analysis of the motion of a low-wing general aviation aircraft about its calculated equilibria flat spin node

Spin tests

A spin-recovery parachute system for light general aviation airplanes

Effects of discontinuous drooped wing leading-edge modifications on the spin characteristics of a low-wing general aviation airplane

A study of alternating stresses in gas-turbine engine blades by spectral analysis

Spectral analysis of non-stationary random processes. Application to noise of flyover type

Spline curves and their application to the design of turboshaft blade profiles

Application of spline approximations to the calculation of wall pressures in three-dimensional supersonic nozzles

SPOILERS
Statistical characteristics of pressure fluctuations in the flow-separation zone on a plate behind a spoiler

Full scale test of a stall/spin technology

A hydraulic control mechanism to control aircraft spoiler movements through dual input commands

Hind tunnel force and pressure tests of a 21% thick general aviation airfoil with 25% slotted flap and 10% slat-lip spoiler

Roll control by digitally controlled segment spoilers

In-flight measured characteristics of combined flap/spoiler direct lift controls

Unsteady aerodynamics of two-dimensional spoilers at low speeds

The 737 graphite composite flight spoiler flight service evaluation

Spot welds

Contribution on resistance spot welding of aluminum alloys in airframe manufacturing

Developments in ultrasonic welding for aircraft

Loading tests of a wing structure for a hypersonic aircraft

A-366
The development of inflow control devices for improved simulation of flight noise levels during static testing of a BBPR turbofan engine

[IAA PAPER 80-4929] p039 IIA-80-38639

The history of static test and Air Force structures testing

[AD-A077029] p0286 80-19136

An improved prediction method for the noise generated in flight by circular jets

[NASA-TP-81670] p0318 80-22048

Static and transient performance of F-102 engine with up to 14 percent core bleed for the quiet short-haul research aircraft

[NASA-TP-16022] p0435 80-25339

Phase 2 and 3 wind tunnel tests of the J-97 powered, external augmentor V/STOL model --- at statics 40 by 90 wind tunnel

[NASA-CR-163578] p0598 80-3150

**STATISTICAL TESTS**

An experimental study of static thrust augmentation using a 2-d variable ejector

[AD-A079657] 80-20279

[NASA-CR-159318] p055 80-29432

**Atmospheric turbulence simulation techniques with application to flight**

p055 80-29961

**STEADY FLOW**

Production oriented maintenance organization: a critical analysis of sortie-generation capability and maintenance quality

p0595 80-31323

Atmospheric turbulence simulation techniques with application to flight analysis

[NASA-CR-3309] p0612 80-32025

A review and analysis of fiber counting methods

[AD-A085200] p0637 80-32448

**STATISTICAL COMMUNICATION THEORY**

**COMMUNICATION THEOR**

**STATISTICAL CORRELATION**

Statistical correlation models of 55 monopulse responses received during aircraft illumination

p036 80-38857

**STATISTICAL DISTRIBUTIONS**

**NT PROBABILITY DISTRIBUTION FUNCTIONS**

**STATISTICAL PROBABILITY**

**0 PROBABILITY THEORY**

**STATISTICAL TESTS**

Determination of the safety in a North Atlantic organized track system with reduced lateral separation --- statistical tests

p0492 80-27322

**STATE BLADES**

Three-dimensional velocity distribution between stator blades and unsteady force on a blade due to passing wakes

p0001 80-10011

Influence of turbine first stator row cooling on turbine inlet gas temperature

p0616 80-51896

Aerodynamic performances of three fan stator designs operating with rotor having tip speed of 337 meters per second and pressure ratio of 1.54. 1: Experimental performance

p0179 80-17071

Aerodynamic performances of three fan stator designs operating with rotor having tip speed of 337 meters per second and pressure ratio of 1.54. 2: Experimental performance

p0306 80-21324

Performance of single-stage axial-flow transonic compressor with rotor and stator aspect ratio of 1.19 and 1.26 respectively, and with design pressure ratio of 2.05

[NASA-TP-1659] p036 80-21325

Design and investigation of static pressure compressor cascades behind impeller-rotors

[DDFL-PR-79-17] p0353 80-22353

**STATIONS**

On axial turbine stage rotor blade twist with tangential fift of the stator vanes

p0004 80-10630

The effect of interblade phase angle and solidity on the time variant aerodynamic response of a compressor stator

[AD-A076187] p0041 80-11092

Liquid metal slip ring --- aerospace environments

[NASA-CASE-LEW-12777-3] p0228 80-18300

**STEADY FLOW**

Calculation of the aerodynamic characteristics of an aircraft at supersonic speeds

p0199 80-21255

Flow of a compressible fluid over an isolated airfoil and through a cascade

p0151 80-21302

Numerical solution of the steady flow in turbine blade and ducts of arbitrary shape

p0390 80-38523

Optimization of the relaxation drag of slender profile arrangements in steady subsonic flow. I --- Single profile

p0444 80-40895

Analysis of nonlifting and lifting airfoils in transonic flow by parametric differentiation

[IAA PAPER 80-31505] p0452 80-41590

Experimental determination of unsteady blade element aerodynamics in cascades. Volume 1:
STEADY STATE FLOW

Torsion mode cascade
[NASA-CR-159833] p0241 H80-25335
Steady, Oscillatory, and Unsteady Subsonic and Supersonic Aerodynamics, production version
[SOUSSA-P 1.1] Volume 1: Theoretical manual

STRAIN GAGES
Measuring unsteady pressure on rotating compressor blades — with semiconductor strain gages under gas turbine engine operating conditions
[p0113 A80-12630
Low profile strain gage applications telemetered from rotating machinery
[p0343 A80-36153
Determination of strain fields near concentrators from strain gage indicators
[p0019 H80-10054
Specification for the installation of electrical resistance strain gauges on strain pairs counter
Subject Index

Aircraft — to monitor fatigue damage

Fatigue damage estimation for the BAe 146 aircraft

Fatigue data analysis system

 Loads calibrations of strain gage bridges on the DAST project Aeroelastic Research Wing (ABW-1)

Strain softening

U Plastic deformation

Stresses

Effects of forebody, wing and wing-body-LXI flowfields on high angle of attack aerodynamics

Leading Edge extensions

Strapdown inertial guidance

Design of a strapdown navigator aided by position measurements

Calibration of a low cost strapdown inertial guidance system

Instrumentation for the determination of aircraft performance from dynamic maneuvers

Development aspects of a dynamically tuned gyro for strapdown — ABBS — Attitude and Heading Reference System

A strapdown inertial reference system for commercial airline use in navigation and flight control

An integrated strapdown guidance and control system for launch vehicle application

Modular strapdown guidance unit with embedded microprocessors

The experimental strapdown system of DFVLR —— for inertial guidance and navigation of civil aircraft

The laser gyro and its application to an helicopter navigation system

A description of a velocity-damped Schuler excited ABBS system — Attitude and Heading Reference System

Development of aiding GPS/strapdown inertial navigation system

Methods for strap-down attitude estimation and navigation with accelerometers

Optical estimation applied to redundant strapped down inertial sensors for navigation and flight control

Inertial navigation and guidance. Citations from the RTIS data base

Stratoplane aircraft

U-52 aircraft

Stratosphere

Superpressurized balloons — A new type of superpressurized balloon conceived in large scale for stratospheric flight

Potential environmental effects of aircraft emissions

Stratobusines aircraft

U-135 aircraft

Streamline flow

U laminar flow

Streamlined bodies

Nt pairings

Technical options for flexible dirigibles

Hydrodynamic visualization on streamlined bodies of vortex flows particular to high angles of attack

Streamlining

A proposal for aerodynamically actuated self streamlining subsonic wind tunnel walls

Stress analysis

Selected data from a transonic flexible walled test section

Strength of materials

U Mechanical properties

Stress (physiology)

Human factors in high-speed low-level accidents: A 15 year review

Stress analysis

Fatigue life prediction of a bonded splice joint

Effects of idealizing three-dimensional geometry with two-dimensional models in temperature and stress analysis of engine components

Influence of interface on composite failure

Numerical strain and stress analysis of radial compressor impellers with riveted cover disks

The investigation of transient loads in gas turbine engine blades using spectral analysis methods

Structural design loads for future airplanes

The influence of prior engine usage data on the selection of structural design criteria

Calculation of radial-axial turbine wheel thermal and stress states

Green's functions in fracture mechanics

 Prestressed pavements for airports

Design of blade attachment in compressor rotor annular slot

Fracture mechanics in engineering application; Proceedings of the International Conference, Bangalore, India, March 26-30, 1979

A study of alternating stresses in gas-turbine engine blades by spectral analysis

Contact stress analysis of ceramic-to-metal interfaces — in gas turbine engines

Thermo-mechanical stress analysis of advanced turbine blade cooling configuration

Additional information about FASTAFF fighter aircraft loading standard for fatigue evaluation

Structural analysis of hollow blades: Torsional stress analysis of hollow fan blades for aircraft jet engines

Analysis of residual stresses and displacements due to radial expansion of fastener holes

Analysis of ground calibration data from strain gauges attached to the airframe of CT4-A engine blades by spectral analysis

Proceedings of the International Conference, number 1979-3

Le Recherche Aerospatiale Bi-monthly Bulletin number 1979-3

Evaluation of the stress distribution in the surface layer of aircraft engine components

Stress Calculations

Stress analysis

Stress concentration

Determination of the stress intensity factor of composite structural members

Variations in crack growth rate behavior

Stress-intensity factors for two symmetrical cracks

Measurement of stress distribution in sandwich beams under four-point bending

Distribution of forces and stresses along rows of bolted connections

Investigation of the stress distribution in the surface layer of aircraft engine components
STRESS CORROSION

Determination of stress intensity factors in composite structural elements

p0325 A80-34235

Determination of strain fields near concentrators from strain gage indicators

p0382 A80-37289

Collection and analysis of in-service flight histories of the initiation of fatigue damage

[NBG-PFW-79-10] p0186 B80-17518

On the fatigue life evaluation of jointed specimens undergoing load transfer with regard to stress concentration

[NBG-PFW-79-11] p0186 B80-17519

An investigation of residual stresses in simulated wing panels of 7075-T6 aluminum

[AD-A080663] p0370 B80-23693

STRESS CORROSION CRACKING

Aircraft carrier exposure tests of aluminum alloys

[AD-A081060] p0368 B80-23433

STRESS CORROSION CRACKING

Experimental methodology and application of fracture mechanics concepts to metals

[BABP PAPER NT 79-35] p0379 A80-36869

STRESS CYCLES

Low cycle fatigue life model for gas turbine engine disks

Applying pressure...Relieving stress-stress cycling aircraft structures

p0207 A80-27257

Low cycle fatigue testing, a necessary part of advanced development—-for military fighter aircraft gas turbine engines

[AI AA PAPER 80-1153] p0399 A80-38940

STRESS DISTRIBUTION

U STRESS CONCENTRATION

STRESS INTENSITY FACTORS

Green's functions in fracture mechanics

p0573 A80-49966

Propagation of edge cracks in laterally excited stiffened panels

p0623 A80-53465

STRESS MEASUREMENT

Measurement of the Reynolds stress tensor using a single rotating slanting hot wire

p0523 A80-46366

STRESS RATIO

A special crack tip element for three-dimensional crack problems

[AML/STRUC-BOT3-374] p0074 B80-12436

STRESS RELAXATION

Study of the relaxation of the tightening force of bolted joints—-in supersonic transport aircraft

p0525 A80-46860

STRESS RUPURE STRENGTH

### SUBJECT INDEX

**CAST ALUMINUM STRUCTURES TECHNOLOGY (CAST). Phase 5: Structural test and evaluation. Part 1: Full scale test** *(AD-A097807)*

**STRUCTURAL FATIGUE**

**STRUCTURAL INFLUENCE COEFFICIENTS**
- Structural parameters that influence the noise reduction characteristics of typical general aviation materials *(AIAA PAPER 80-0036)*
- Calculation of some aerodynamic characteristics of a flexible aircraft by an influence coefficient method *(p0152 A80-21343)*

**STRUCTURAL MATERIALS**

**CONSTRUCTION MATERIALS**

**STRUCTURAL RELIABILITY**
- Reliability of aircraft disconnect joints --- Russian book *(p0001 A80-16594)*
- Is the structural life of an aircraft wing limited *(p0040 A80-17335)*
- Design for continuing structural integrity --- of commercial aircraft *(p0164 A80-24138)*
- Fatigue in machines and structures - aircraft *(p0196 A80-26731)*
- Technical diagnosis and operation of engines according to technical condition *(p0374 A80-36763)*
- Application of fracture mechanics to OSAY aircraft structural integrity requirements *(p0378 A80-36860)*
- Limits of application of the damage tolerance concept to combat aircraft *(AAP PAPER PT 79-25)*
- Current developments in aircraft fatigue evaluation procedures *(p0379 A80-36866)*
- The objective necessity of the fall-safe design philosophy *(p0511 A80-35697)*
- Reliability assurance of aircraft structures *(p0573 A80-48938)*
- Airline view of long life structures *(p0582 A80-50582)*
- Continuation of structural airworthiness of civil transport aircraft *(p0582 A80-50584)*
- Airworthiness of long-life jet transport structures *(p0582 A80-50586)*
- Build 2 of an accelerated mission test of a TR-41 with block 76 hardware --- investigation of structural reliability of engine parts of a turbofan engine *(p0081 A80-13050)*
- Fatigue damage estimation for the BAe aircraft fatigue data analysis system *(p0089 A80-30301)*
- Advanced structures concepts r and a/cost assessments --- helicopter airframe maintainability and life cycle costs *(p0062 A80-32374)*

**STRUCTURAL RIGIDITY**

**STRUCTURAL STABILITY**
- Transient, nearly periodic rotor oscillations --- Russian book *(p0001 A80-10124)*
- Experimental investigation of the strength of rotor materials in the presence of surface cracks *(p0003 A80-10482)*
- Seminar on Vibration Control, Pennsylvania State University, University Park, Pa., October 8-12, 1979, Proceedings *(p0059 A80-16271)*
- Evaluation of strength safety factors under multicomponent loading with consideration of material properties scatter *(p0060 A80-16831)*
- An analytical method of testing pavement strength *(p0091 A80-17998)*
- Some parametric relations for designing large-aspect wings *(p0150 A80-21294)*
- The reliability of the mechanical components of flight vehicles --- Russian book *(p0158 A80-23086)*
- Minimum-weight wing in the presence of lift constraints *(p0203 A80-27136)*
- Application of geometrical programming to problems of optimal design *(p0203 A80-27137)*
- Distribution of forces and stresses along rows of bolted connections *(p0203 A80-27143)*
- Selection of a rational structure diagram for a large-aspect-ratio wing *(p0263 A80-29227)*
- Experimental investigation of the strength of rotor materials with surface cracks *(p0278 A80-32044)*
- Active flutter suppression control law definition via least squares synthesis *(p0332 A80-35057)*
- F-16 flutter suppression system investigation *(p0333 A80-35060)*
- Elevated temperature structural testing of advanced missiles *(p0335 A80-35093)*
- Application of the integrating matrix method to solution of boundary-value problems with normal form of the differential equations and isoperimetric edge conditions --- for structural analysis *(p0376 A80-36790)*
- A review of nondestructive inspection reliability on aircraft structure *(p0381 A80-37203)*
- Effect of adding structural damping on a wing/nacelle nump type flutter node *(p0407 A80-41159)*
- Study of the relaxation of the tightening force of bolted joints --- in supersonic transport aircraft *(p0525 A80-46860)*
- Experience in correcting dynamic designs on the basis of resonance test data --- aircraft structures *(p0526 A80-46872)*
- Selecting rational high-aspect-ratio wing structural stiffening scheme *(p0582 A80-50482)*
- On the espansione map-through problem *(p0019 A80-10047)*
- An empirical approach for checking flutter stability of gliders and light aircraft *(p0139 A80-15194)*
- On interfacing structural information and loading data in aeroelastic analysis --- using computer techniques *(AEC-N/3633)*
- Aircraft sonic boom: Effects on buildings. Citations from the HTIS data base *(p0431 A80-25304)*
- Rotor-bearing dynamics technology design guide. Part 1: Flexible rotor dynamics *(AD-A087806)* *(p0611 A80-31802)*

**AIRCRAFT NOISE**
- Study of the relaxation of the tightening force of bolted joints --- in supersonic transport aircraft *(p0525 A80-46860)*
- Experience in correcting dynamic designs on the basis of resonance test data --- aircraft structures *(p0526 A80-46872)*
- Selecting rational high-aspect-ratio wing structural stiffening scheme *(p0582 A80-50482)*
- On the espansione map-through problem *(p0019 A80-10047)*
- An empirical approach for checking flutter stability of gliders and light aircraft *(p0139 A80-15194)*
- On interfacing structural information and loading data in aeroelastic analysis --- using computer techniques *(AEC-N/3633)*
- Aircraft sonic boom: Effects on buildings. Citations from the HTIS data base *(p0431 A80-25304)*
- Rotor-bearing dynamics technology design guide. Part 1: Flexible rotor dynamics *(AD-A087806)* *(p0611 A80-31802)*

**AIRCRAFT STRUCTURAL DYNAMICS**
- A review of Australian investigations on aeronautical fatigue during the period April 1977 to March 1979 --- structural strains and fatigue life studies on aircraft structures and construction materials *(p0611 A80-31802)*
Approximate method for calculating plane cascade flow at high subcritical Mach numbers

\[ \text{LATTICE (MATHEMATICS)} \]

SUBRANGES
\[ \text{SOB14TMCES} \]

SOB6BAVIIY
\[ \text{SOBBIBIBLS} \]

ilBCBiPT

SOBSOBIC

FLO!

Digital adaptive controllers for VIOL vehicles.

EES: A system of equations for the simulation of aircraft in a modular environment.
[RAE-TR-79008] p0179 N80-17069

Easy ACIS dynamic analysis, volume 2. Part 2: Computer-aided design program.
[AD-079403] p0237 N80-19076

The VIBRA-8 subsonic aerodynamic nuclear gas vulnerability code.
[AD-081722] p0359 N80-23256

Bifilar analysis users manual, volume 2.

SUBSONIC AIRCRAFT

The case of subsonic jet aircraft --- noise reduction near airports.
[0153 A80-21961]

Durability of foam insulation for LH2 fuel tanks of future subsonic transports.
[0155 A80-22687]

Advanced high speed commercial aircraft - 2000
[AIAA PAPER 80-0937] p0320 N80-32998

Subsonic transport noise
[AIAA PAPER 80-0858] p0373 N80-36322

Multivariate optimum design of subsonic jet passenger airplane
[0380 A80-36999]

Hydrogen fueled high bypass turbofans in subsonic aircraft.
[0384 A80-37348]

Experimental study of the interaction between a rapid subsonic aircraft wing and an engine nozzle at high dilution rate
[0143 A80-40803]

Zero-length, slotted-lip inlet for subsonic military aircraft
[AIAA PAPER 80-1245] p0409 A80-41203

Future trends in subsonic transport energy efficient turbofan engines
[0464 A80-42283]

Development of the 'D' vented thrust deflecting nozzle
[AIAA PAPER 80-1656] p0471 A80-43308

Sensitivity of the optimal preliminary design of a transport to operational constraints and performance index
[AIAA PAPER 80-1395] p0473 A80-43320

A survey of the literature on surface roughness effects on the drag of subsonic aircraft
[TPA-AR-1228] p0336 N80-11049

Wind tunnel investigation of an all flush orifice air data system for a large subsonic aircraft --- conducted in a Langley 8 foot transonic pressure tunnel
[NASA TP-1642] p0364 N80-23304

SUBSONIC FLOW

Calculations of inviscid supersonic subsonic flow past a lifting profile of arbitrary thickness --- German thesis
[p0088 A80-13456]

Statistical characteristics of pressure fluctuations in the flow-separation zone on a plate behind a spoiler
[p0094 A80-13695]

A numerical approach to subsonic viscous-inviscid interaction
[p0094 A80-13695]

Summary of advanced methods for predicting high speed propeller performance
[AIAA PAPER 80-0225] p0108 A80-20966

A panel method for calculating the loads acting on a wing that performs harmonic oscillations in subsonic flow
[p0109 A80-21792]

Evaluation of the kernel of an integral equation for a wing perfoming harmonic oscillations in subsonic flow
[p0109 A80-21792]

SUBSONIC FLUID

Airfoil with minimum relaxation drag
[p0150 A80-21296]

Effect of non-rotating passages on performance of centrifugal fans and subsonic compressors
[p0157 A80-22914]

Experimental results on axial flow compressor stages with high subsonic Mach numbers
[p0210 A80-27733]

Stability aspects of diverging subsonic flow
[p0260 A80-29097]

A velocity potential panel method for the prediction of unsteady airflow on oscillating wings and bodies
[p0275 A80-30859]

Influence of S-shaped air intake inlet section ellipticity on outlet flow uniformity --- for aircraft engines
[p0376 A80-36778]

Optimization of the relaxation drag of slender profile arrangements in steady subsonic flow.
[p0444 A80-40895]

Aerodynamics of wings in subsonic shear flow
[p0452 A80-41612]

Perturbing influence of the probe on the characteristics of a subsonic wake behind a two-dimensional model
[p0475 A80-43787]

Asymmetric trailing-edge flows at high Reynolds number
[AIAA PAPER 80-1396] p0506 A80-44151

Visualization of the acoustic excitation of a subsonic jet
[p0620 A80-52717]

Entrainment characteristics of unsteady subsonic jets --- for V/STOL aircraft
[p0023 N80-10124]

Two dimensional aerodynamic interference effects on oscillating airfoils with flaps in ventilated subsonic wind tunnels --- computerized fluid dynamics
[NASA CR-3210] p0131 N80-16047

Summary of advanced methods for predicting high speed propeller performance
[NASA TP-81009] p0172 N80-15051

Unsteady effects of a control surface in two dimensional, subsonic and transonic flow
[p0102 N80-15168]

Average gust frequencies subsonic transport aircraft
[ESDO-69023-A-B-C] p0167 N80-16029

Development of panel methods for subsonic analysis and design
[NASA CR-3234] p0167 N80-16033

Unsteady effects with control surfaces measured in a wind tunnel
[AAAP-WT-79-01] p0225 N80-18049

Transonic data memorandum: Numerical methods for solving the potential flow equations for two-dimensional aerfoils in subsonic and transonic flows, brief details, test cases and examples
[ESDO-79009] p0376 A80-21728

Blade-to-blade flow of ideal fluid with wall injection
[p0315 N80-22228]

Subsonic and transonic flows on a variable sweep wing
[p0316 N80-22240]

The harmonically oscillating body in subsonic flow: Effect of compressibility
[ESA-PT-5084] p0360 N80-23270

Steady, Oscillatory, and Onsteady Subsonic and Transonic Flows on a Variable Sweep Wing
[NASA-TP-1222] p0600 N80-31368

Method for inviscid subsonic flows about aircraft configurations
[p0643 N80-33368]

SUBSONIC FLUID

The development of active control and its application to flutter suppressors --- wind tunnel test results

SUBSONIC FLUID

The development of active control and its application to flutter suppressors --- wind tunnel test results

A-377
SUPERSONIC COMMERCIAL AIR TRANSPORT

ramjet engines (AD-1073135) p0071 880-12097

Thermal-structural design study of an airframe-integrated scramjet
[NASA-Cr-159039] p0034 880-25334

Conceptual model of turbulent flameholding for scramjet combustor
[NASA-TP-1503] p0064 880-33409

SUPERSONIC COMMERCIAL AIR TRANSPORT

supersonic propulsion technology --- variable cycle engines p0029 880-10216

SUPERSONIC COMPRESSORS

Inlet flow distortion in turbomachinery. I - Comparison of theory and experiment in a transonic fan stage. II - A parameter study [AIAA PAPER 80-1076] p0396 880-38895

Aerodynamic analysis of a supersonic cascade vibrating in a complex mode p0514 880-48581

Design and investigation of static pressure components cascades behind impeller-rotors [FDYL-PR-79-17] p0353 880-22353

SUPERSONIC CRUISE AIRCRAFT RESEARCH

Advanced technology duct burner for variable cycle engines [AIAA PAPER 80-1201] p0400 880-38966

High 2.2 F-16 development under way p0474 880-33739

Some effects of cruise speed and engine matching of supersonic inlet design [AIAA PAPER 80-1607] p0512 880-48734

Low-speed wind-tunnel tests of a 1/10-scale model of an advanced low-wing supersonic cruise configuration designed for cruise at Mach 2.2 --- Langley Full Scale Wind Tunnel [NASA-TM-80152] p0024 880-10135

Transonic aerodynamic characteristics of a supersonic cruise aircraft research model with the engines suspended above the wings [NASA-TM-80105] p0076 880-12997

Economic study of multipurpose advanced high-speed transport configurations [NASA-CR-159126] p0086 880-13986

Flight control and configuration design considerations for highly maneuverable aircraft p0160 880-15154

Example of performance analysis using data obtained concurrently in air-path, body and Earth axes [FSND-79016] p0267 880-20225

Aerodynamic design and analysis of the AST-204, AST-205, and AST-206 blended wing-fuselage large supersonic transport configuration concepts [NASA-CR-159223] p0268 880-20232

Supersonic cruise aircraft research: A bibliography [NASA-R-80-1737] p0055 880-21316

SUPERSONIC DRAG

An improved sensing element for skin-friction balance measurements --- supersonic drag measuring instrument [AIAA PAPER 80-0049] p0092 880-18251

Inlet drag and stability considerations for 8/0 = 2.00 design [AIAA PAPER 80-1105] p0397 880-38916

Prediction of drag coefficients of a supersonic V/STOL configuration with various store arrangements (AD-1072999) p0070 880-12085

SUPERSONIC FLIGHT

An experimental method for investigating the mutual aerodynamic interference of aircraft components at supersonic velocities p0056 880-15476

Investigation of leading-edge devices for drag reduction of a 60-deg. delta wing at high angles of attack [AIAA PAPER 80-0310] p0094 880-18309

Modern fluid dynamics of supersonic and hypersonic flight [AIAA PAPER 80-0862] p0321 880-33275

Calculation of pressure distribution on slender wings in supersonic flow p0376 880-36797

Sixteen years of Bach 3 flight p0466 880-42575

GB-II supersonic F/0/ window [AIAA PAPER 80-131] p0257 880-19980

Data report for an extensive store separation test program conducted at supersonic speeds [AIAA-8038848] p0047 880-27290

SUPERSONIC FLOW

Installation for investigating the effect of non-steady-state supersonic gas flow on the blades of a plane cascade p0006 880-11255

On supersonic flow with attached shock waves over delta wings p0012 880-12598

Experimental check of a direct method for optimizing the aerodynamic shape of bodies in supersonic flows p0056 880-15477

An improved sensing element for skin-friction balance measurements --- supersonic drag measuring instrument [AIAA PAPER 80-0049] p0092 880-18251

Fliner solutions for wing and wing-body combination at supersonic speed with leading-edge separation [AIAA PAPER 80-0126] p0096 880-16359

Mach 3 hydrogen external/base burning [NASA PAPER 80-19311] p0101 880-20969

Calculation of the supersonic flow field with vortices behind a slender rectangular wing p0152 880-21320

Delta wing of optimal configuration in supersonic flow p0152 880-21341

Calculation of the supersonic flow past a winged bielliptical body p0152 880-21342

The nonlinear supersonic potential flow over delta wings [AIAA PAPER 80-0269] p0162 880-23942

The experimental modeling of uninstalled supersonic turbofan flutter [AIAA PAPER 80-0454] p0201 880-26963

Influence of the angle of attack on the thermal flow at the stagnation point at supersonic speeds [AIAA PAPER 80-0366] p0203 880-27138

Numerical modeling of supersonic flow near a thin delta wing with discontinuous edge [AIAA PAPER 80-27147]

Numerical method for calculating supersonic flow past a plane air intake with detached shock wave [AIAA PAPER 80-27148]

Similarity of the aerodynamic characteristics of delta wings at supersonic speeds [AIAA PAPER 80-27148]

Experimental investigation of the flow past a wing of finite width [AIAA PAPER 80-29222]

Design of slotted transonic wind tunnels for supersonic flow development [AIAA PAPER 80-30976]

Conically cambered delta wings in supersonic flow. I - Basic solutions p0285 880-35256

Conically cambered delta wings in supersonic flow. II - Optimal solutions p0286 880-35251

Solution of boundary layer equations with the aid of series --- for supersonic gas flow [AIAA PAPER 80-36671]

Numerical solution of the Navier-Stokes equations for a family of three-dimensional cones [AIAA PAPER 80-1349] p0451 880-41570

Complete viscous flowfield solutions about a blunt parabolic body in a supersonic stream [AIAA PAPER 80-1351] p0451 880-41576

A-380
A simplified shock-fitting solution to a supersonic internal corner flowfield
([AIAA PAPER 80–1425]) p0652 A80–41615
Three dimensional supersonic flow through a cascade of twisted flat plates
([AIAA PAPER 80–FP–3]) p0470 A80–43333
Calculation of the supersonic flow past a slender delta wing at angles of attack and sideslip
p0524 A80–46826
Limiting values of the lift coefficient of lifting bodies with a flat surface at supersonic speeds
p0525 A80–46661
Application of spline approximations to the calculation of wall pressures in three-dimensional supersonic nozzles
p0526 A80–46793
Experimental facility for studying the thermal effect of supersonic gas jets on targets
p0526 A80–47178
Colorimetric sensor for measuring temperature fields generated by intense heat sources
p0526 A80–47179
Analog modeling in studying supersonic flow around a wing and its governing analog-criteria
p0018 A80–10038
Investigation of the boundary condition at a lifting wing-body mid at low supersonic speed
([AD-A072099]) p0025 A80–10143
Summary of advanced methods for predicting high speed propeller performance
([NASA-TP-01609]) p0127 A80–15051
Steady, Oscillatory, and Unsteady Subsonic and Supersonic Aerodynamics, production version
([SOUSAP–P 1, Volume 1: Theoretical manual])
Steady, Oscillatory, and Unsteady Subsonic and Supersonic Aerodynamics, production version
([SOUSAP–P 1, Volume 1: Theoretical manual])
Effect of Reynolds number on stability characteristics of a cruciform wing-body
([NASA–TP–1683]) p0487 A80–27283
Calculation of high speed inlet flows using the Navier-Stokes equations, Volume 2: User's and programmer's guide
([AO–A00497]) p0530 A80–28319
Calculation techniques for inviscid two-dimensional supersonic airflow
([AO–A00527]) p0542 A80–29257
Basic studies of wing-body interference at high angles of attack and supersonic speeds
([AO–A00713]) p0559 A80–31355
Calculations by a first order theory of supersonic flow around delta wings
([PFA–TS–A0–810]) p0559 A80–31362
Pressure data for four analytically defined arrow wings in supersonic flow — Langley Unitary
Plan Wind Tunnel tests
([NASA–PB–18135]) p0620 A80–32332
A comprehensive investigation into the supersonic viscous flow about a slender cone at high angle of attack: Experimental and theoretical results
p0640 A80–33344
Linearised methods in supersonic flow
p0650 A80–33380
SUPERSONIC FLOW INLETS

SUPERSONIC FLOUTTER
The experimental modeling of uninstalled supersonic turbofan flutter
([AIAA 80–0056]) p0201 A80–26963
Active controls for flutter suppression and gust alleviation in supersonic aircraft
([AIAA PAPER 79–0792]) p0443 A80–40796
Aerodynamic analysis of a supersonic cascade vibrating in a complex mode
p0514 A80–45841
SUPERSONIC INLETS
Improved numerical simulation of high speed inlets using the Navier-Stokes equations
([AIAA PAPER 80–0183]) p0695 A80–18340
Inlet flow distortion in turbomachinery. I — Comparison of theory and experiment in a transonic fan stage. II — A parameter study
([AIAA PAPER 80–1076]) p0396 A80–38905
Inlet drag and stability considerations for n0/0 = 2.00 deg
([AIAA PAPER 80–1105]) p0397 A80–38916
Small-scale supersonic inlet test facility
([AIAA PAPER 80–1145]) p0398 A80–38937
Calculation of the flow in a supersonic air intake with allowance for the boundary layer on the fairings
([AIAA PAPER 80–46847]) p0525 A80–46847
Dynamic response of a Mach 2.5 axisymmetric inlet and turbojet engine with a poppet value controlled inlet stability bypass system when subjected to internal and external airflow transients
([NASA–TP–1531]) p0120 A80–14232
Turbomach-exhaust-nozzle secondary-airflow panning as an exit control of an inlet-stability bypass system for a Mach 2.5 axisymmetric mixed-compression inlet — Lewis 10– by 10– ft.
supersonic wind tunnel test
([NASA–TP–1532]) p0120 A80–14242
An overall and experimental study of a short a-shaped subsonic diffuser of a supersonic inlet
([NASA–TF–11046]) p0137 A80–15136
Wind tunnel tests of a tubular supersonic inlet for projectiles
([DPVL–TF–79–26]) p0436 A80–25367
Luminescence of a supersonic air stream with fuel combustion before the critical nozzle section
p0326 A80–34042
A linearized theory for swirling supersonic jets and its application to shock-cell noise
([AIAA PAPER 80–16497]) p0553 A80–41628
Location and propagation of shock associated noise from supersonic jets
([AIAA PAPER 80–09630]) p0874 A80–43599
Conceptual design and performance estimates for a supersonic aerodynamic window for the NASA vacuum system aperture
([CHEM–15051]) p0140 A80–15183
An experimental study of two-dimensional supersonic jet impingement on a flat plate
p0220 A80–17996
SUPERSONIC NOZZLES
Aircraft engine nozzle
([NASA–CAS–AE–10977–1]) p0635 A80–32392
SUPERSONIC SPENDS
Assessment of analytic methods for the prediction of aerodynamic characteristics of arbitrary bodies at supersonic speeds
([AIAA PAPER 80–0071]) p0101 A80–19308
Effect of chord and lift-drag ratio of swept wings at supersonic speeds
p0208 A80–27175
Estimation of attainable leading-edge thrust for wings at subsonic and supersonic speeds
([NASA–TP–1500]) p0222 A80–10105
Overall aerodynamic characteristics of caret and delta wings at supersonic speeds
p0354 A80–11022
SUPERSONIC TRANSPORTS
MT CONCORDE AIRCRAFT
MT SUPERSONIC COMMERCIAL AIR TRANSPORT
The next supersonic transport p0103 A80–20214
Flight and wind tunnel test results of the mechanical jet noise suppressor nozzle
([AIAA PAPER 80–0165]) p0109 A80–20971
The changing horizons for technical progress. II
p0207 A80–27270
Some unique characteristics of supersonic cruise vehicles and their effect on airport community noise
([AIAA PAPER 80–0859]) p0319 A80–32861
Prediction of noise constrained optimum takeoff procedures
([AIAA PAPER 80–1055]) p0340 A80–35996
Current problems and the future in advanced supersonic transport noise
([AIAA PAPER 80–1056]) p0341 A80–35997
The economic impact of materials technology on supersonic transport selection
([AIAA PAPER 80–1852]) p0170 A80–43300

Temperature measuring instruments

Impact of new instrumentation on advanced turbine research

Temperature and pressure measurement techniques for an advanced turbine test facility

Temperature and flow measurements on near-freezing aviation fuels in a wing-task model

Calorimetric sensor for measuring temperature fields generated by intense heat sources

Method of studying the working-medium temperature of aircraft gas-turbine engines for transient modes

Temperature measuring instruments

Temperature profiles

Temperature and flow measurements on near-freezing aviation fuels in a wing-task model

Temperature sensors

Combustion-gas temperature sensors for turbine and turbojet engines

Tensile strength

Blade tip and knife edge rub testing of full-scale seals

High modulus/high strength organic fibers

Tensile stress

A design study in crack patching

Tensile stress tensors

Therm: Design of a strapdown navigator aided by position measurements

Kalman-filter for terrain aided navigation

Terminal configured vehicle program

Flight performance of the TCV B-737 airplane at Jorge Newberry Airport, Buenos Aires, Argentina using TEBG/MRL guidance

Terminal configured vehicle program: Tent facilities guide

Flight performance of the TCV B-737 airplane at Montreal/Dorval International Airport, Montreal, Canada, using TEBG/MRL guidance

Longitudinal stability and control in wind shear with energy height rate feedback

Terminal facilities

Requirements for short instrument runways

A simulation model for aircraft sequencing in the near terminal area

Marseille - Metamorphosis of an airport

Centralized ground power systems conserve energy

Computer simulation of an air cargo small package sorting system

Models for freight access to air terminals

Hydrogen liquefaction, storage and transfer on an airport site

Wind shear detection with Doppler radar

The Air Products/Prodair helium infrastructure at airship bases

Airport equipment and know-how from England - An airport form survey

Temperature maximizing instruments

Temperature profiles

Temperature and flow measurements on near-freezing aviation fuels in a wing-task model

Temperature sensors

Combustion-gas temperature sensors for turbine and turbojet engines

Three-dimensional interactions and vortical flows

Numerical flow field program for aerodynamic testing analysis. Volume 1: Equations and results

Three-dimensional flow investigation with a method of characteristics in the inlet region and the blade-to-blade channels of supersonic axial compressors

Three-dimensional flow field analysis with emphasis on high-speed flow

Numerical method for predicting flow characteristics and performance of non-axisymmetric nozzles. Part 2: Applications

Three-dimensional potential compressible flow about wind turbine rotor blades

Three-dimensional transonic flow fields about wings and bodies

A simple apparatus for the experimental study of non-steady flow-thrust-augmentor ejection configurations

Pressure and velocity measurements in a three-dimensional wall jet

Considerations of some critical ejection problems

Reaction control system augmentation for V/STOL aircraft

Design and test of a prototype scale ejector wing

The external augmentor concept for V/STOL aircraft

Insect-flight /thrust-flight/ on a large technical scale

Dynamic modeling of augmentor fuel systems

Characteristics of afterburning bypass turbojet engine with oxygen injection into the afterburner chamber — study of fuel injection into thrust chambers for thrust augmentation

Workshop on Thrust Augmenting Ejectors

Recent developments in ejector technology in the Air Force: An overview

Some tests on small-scale rectangular throat ejection

Augmenting ejection endwall effects --- for V/STOL aircraft

An investigation of corner separation within a thrust augmenter having Coanda jets

Entrainment characteristics of unsteady subsonic jets --- for V/STOL aircraft

Three-dimensional leading-edge vortex flows

Three-dimensional effects on the thrust of a jet-vane augmentor

Considerations of some critical ejector problems

Method and apparatus for rapid thrust increases in a turbofan engine

The design and combustion performance of practical swirlers for integral rocket/ejectors

Characteristics of afterburning bypass turbojet engine with oxygen injection into the afterburner chamber — study of fuel injection into thrust chambers for thrust augmentation

Recent developments in a jet-diffuser ejector

Large scale model tests of a new technology V/STOL concept

The structure-free thrust-doubling of insect-like aircraft — The possibility of using
Part-span variable inlet guide vanes for V/STOL fan thrust modulation
[AIAA PAPER 80-1268] p0601 A80-38087
Reaction control system augmentation for V/STOL aircraft
[NASA-TH-81077] p002a A80-10130

THRUST POWER
[2] U THROU

THRUST REVERSAL
Minimum time turns with thrust reversal — high performance aircraft trajectory control
[AIAA PAPER 80-1268] p0617 A80-45888
The linking of development problems with the example of thrust reversals and landing gear loads
[DGLR PAPER 80-045] p0523 A80-04295
Study of clamshell reverser operation downstream of nozzle
[AM/EE-80-1556] p0566 A80-187083
Some characteristics of the operation of T3E with reverser during airplane landing — Turbojet Engine
[AM/EE-80-1556] p0566 A80-51090
Quiet Clean Short-Haul Experimental Engine (QCSEE)
[AM/EE-80-1556] p0566 A80-51090
Thrusted vectoring to eliminate the vertical stabilizer — to provide directional stability for f-111 aircraft while decreasing radar detectability
[AD-A079055] p0230 A80-19070
Reverse thrust performance of the QCSEE variable pitch turbofan engine
[NASA-TH-81077] p0604 A80-31399

THRUST TERMINATION
A stopping performance model for aircraft with forward or reverse thrust
[AM/EE-80-1556] p0584 A80-50701

THRUST VECTOR CONTROL
The innovative application of boost engine technology to the design of a variety of tactical and strategic aircraft
[AIAA PAPER 80-0190] p0156 A80-22740
Investigation of advanced thrust vectoring exhaust systems for high speed propulsive lift
[AIAA PAPER 80-1159] p0684 A80-41190
Development of the "D" vented thrust deflecting nozzle
Thrust vectoring to eliminate the vertical stabilizer — to provide directional stability for f-111 aircraft while decreasing radar detectability
[AD-A0799852] p0237 A80-19077
Static calibration of a two-dimensional wedge nozzle with thrust vectoring and spanwise blowing
[NASA-TH-81161] p0365 A80-23317

THRUST-WEIGHT RATIO
Preliminary study of VTO thrust requirements for a V/STOL aircraft with lift plus lift/cruise propulsion
[NASA-TH-81429] p0242 A80-19110

THRUSTWORMS
U NOCKET ENGINES
THUNDERSTORMS
Flight through thunderstorms outflow
Lightning protection for aircraft
Meteorological instrumentation system on the T-28 thunderstorms research aircraft
Jet transport performance in thunderstorm wind shear conditions
Jet transport performance in thunderstorm wind shear conditions
Direct effects of lightning on an aircraft during intentional penetrations of thunderstorms — T-28 aircraft
Storm hazards '79: F-106B operations summary
In-flight evaluation of a severe weather avoidance system for aircraft
[AD-A087426] p0601 A80-31376

SUBJECT INDEX

TIRING and altitude requirements for fast inflating parachutes

[AD-A077548] TIRING MEASURING INSTRUMENTS

[AD-A077548]

TIME OPTIMAL CONTROL

Minimum time turns with thrust reversal --- high performance aircraft trajectory control

[ATA 80--1595] p0517 880-45808

Optimization of tactical aircraft maneuvers utilizing high angles of attack

[ATA 80--1596] p0517 880-45809

An approximate feedback solution of a variable speed non-linear pursuit- evasion game between two airplanes in a horizontal plane

[ATA 80--1597] p0517 880-45809

Preliminary analysis of minimum time and minimum noise landing approach trajectories

[ATA 80--1598] p0517 880-45809

A singular perturbation analysis of minimum time long range intercept

p0291 880-20261

TIME SERIES ANALYSIS

Excitation and analysis technique for flight flutter tests

[HB-99-Urge-1446(0)] p0122 880-14140

TIME SHARING

A time-shared monopulse approach to air/surface radar ranging

p0196 880-26791

TIME SIGNALS

Nova satellite time experiment --- global time synchronization using Cs clock transfer

[ATA 80-10268] p0002 880-10268

The Navstar Global Positioning System and time

p0190 880-25146

Applications of the spread-spectrum signals from the Nova satellites

p0190 880-25149

GPS NAVSTAR-4 and NTS-2 long term frequency stability and time transfer analysis

[AD-A088092] p0631 880-32370

TIME AND FREQUENCY

TIP SPEED

On the acoustic power emitted by helicopter rotor blades at low tip speeds

p0012 880-12375

Model rotor low frequency broadband noise at moderate tip speeds

[ATA 80--1013] p0339 880-35971

A flight investigation of performance and loads for a helicopter with 10-64C main rotor blade sections

[NASA-TM-81871] p0041 880-33348

TIPS

MT BLADE TIPS

MT NOSE TIPS

MT WING TIPS

MT AIRCRAFT TIPS

Evaluation of nondestructive inspection methods for aircraft tires

[AD-A082523] p0441 880-25681

TITANIUM

Built-up low-cost advanced titanium structures

[BLATS/ ATA 80-0765] p0331 880-35045

Titanium welding in aircraft maintenance

p0375 880-36773

Impact damage on titanium leading edges from small soft body objects

[AD-A072705] p0071 880-12095

TITANIUM ALLOYS

Series 86 welding of high-loaded titanium structures

p0061 880-16963

HAIRRA pushes SPDB for structures --- in naval aircraft design and construction

p0189 880-24739

New problems in materials and structures in aircraft engine technology

[AAAP PAPER NT 79-23] p0378 880-36858

Material considerations for gas turbine engines

p0618 880-52127

Impact damage on titanium leading edges from small hard objects --- in compressor blades in jet engines

p0618 880-52297

Titanium combustion in turbine engines

[AD-A075657] p0170 880-16059

Consolidation of titanium powder to near net shapes

[AD-A079039] p0267 880-19239

Mechanical behavior of airframe materials

[AD-A085604] p0545 880-29290

TOKAMAK DEVICES

Low-aspect-ratio limit of the toroidal reactor - The spheromak

p0090 880-17876

TOLERANCES (MACHINERY)

Discontinuous registration of industrial radiographs using profile analysis and piecewise correlation techniques

p0087 880-17521

USAF damage tolerant design handbook: Guidelines for the analysis and design of damage tolerant aircraft structures, revision A

p0236 880-19065

TOLERANCES (PHYSICAL)

NY ACCELERATION TOLERANCE

THURM TOLERANCES

Aircraft crash survival design guide. Volume 2: Aircraft crash environment and human tolerance

p032 880-25307

TOMAHAWK MISSILES

Environmental control system design for the Tomahawk Cruise Missile

[ASME PAPER 79-EMAS-7] p0055 880-15232

TOPOGRAPHY

A-ray radiography of gas turbine ceramics

[AD-A000040] p0307 880-21335

TOPOLOGY

MT VERTEX

TOPOLOGY

Mesh definition by the conversational topological method and optimization in finite element structural calculations

[AAAP PAPER NT 79-30] p0379 880-36864

TORNADO AIRCRAFT

U-SHAP AIRCRAFT

TOROIDAL PLASMAS

Low-aspect-ratio limit of the toroidal reactor - The spheromak

p0090 880-17876

TORQUES

Airship morphology - The toroidal solution

p0040 880-39295

TORQUE

Measurement of liquid pump torque in the starting regime

p0003 880-10611

Reduction of unsteady axial torques on an open port airborne optical turret

p0460 880-25609

Measurement of external forces and torques on a large pointing system

p0460 880-25610

TURRET TORQUES

Aircraft torque motors --- Russian book

p0099 880-19199

TORSIONAL STRESS

CH-66 composite rotor blade flight stress survey data. Volume 3: Plotted forward rotor blade chord, torsion and absolute loads

[AD-A075612] p0130 880-15077

Structural analysis of hollow blades: Torsional stress analysis of hollow fan blades for aircraft jet engines

TORSIONAL VIBRATION

Flexural torsional vibrations of a wing

p0525 880-46851

Influence of mistuning on blade torsional flutter

[NASA-CR-165137] p0519 880-1351

TOUCHDOWN

Development and flight evaluation of automatic flare laws with improved touchdown dispersion

[AAAP 80-1757] p0510 880-45545
Application of modified profile analysis to function testing of simulated CTOL transport touchdown-performance data  

[p0030 A80-110169]

TOPOGRAPHY

Airplane wingtip coupling experiments  

[p0595 A80-31319]

Determination of the character of the lateral-directional motion of an airborne towed vehicle  

[p0603 A80-31389]

TOURS

TO AIRPORT TOWERS  

[p0371 A80-23862]

Evaluation of the impact of towing DC-9 transport airplanes at Boston-Logan Airport  

[p0589 A80-30297]

Evaluation of the impact of towing the L-1011 airplane at Boston-Logan Airport  

[p0589 A80-30303]

TOXIC HAZARDS

Full-scale flammability tests with experiments on samples in the Aeronautical Test Center of Toulouse  

[p0047 A80-13321]

Limitation of the content of harmful substances in aircraft engine exhaust gases - New requirements on combustion chambers  

[p0053 A80-15085]

TOXICOLOGY

Medical and toxicological factors in aircraft accidents  

[p0601 A80-31373]

Some practical aspects of the calibration of air data systems  

[p0098 A80-18885]

A nonlinear observer/command generator/tracker approach to the XH-97 helicopter gun turret control law design  

[p0107 A80-20879]

The use of single-frequency Decca Navigator signals for remote position monitoring  

[p0400 A80-39562]

Avionics master plan data base mechanization architecture  

[p0643 A80-33362]

A survey of the stochastic filtering techniques for data processing in air-trafic control and surveillance systems  

[p0106 A80-20867]

TRACKING NETWORKS

Study of a stereo electro-optical tracker system for the measurement of model deformations at the national transonic facility  

[p0033 A80-10476]

Design and simulation of a C3 system for surveillance purpose  

[p0250 A80-19621]

TRACKING RADAR

WELS - An international approach to range instrumentation support --- Worldwide Engineering and Logistics Support  

[p0277 A80-31249]

Cooperative estimation of targets by multiple aircraft  

[p0631 A80-32366]

SUBJECT INDEX

Airborne radar approach flight test evaluating various track orientation techniques  

[p0631 A80-32368]

TRACKING STATIONS

Measurement of radiation patterns of aircraft antennas in non-steady flight  

[p0184 A80-17348]

TRACKING STUDIES

Evaluation of a high performance fixed-ratio traction drive  

[p0230 A80-18040]

TRAFFIC

The application of design to cost and life cycle cost to aircraft engines  

[p0597 A80-31342]

TRAFFIC CONTROL

Radar beacon trihlaration sensor tests at Logan International Airport  

[p0389 A80-37705]

TRAILING EDGES

Experimental study of confluence with separation on an afterbody of revolution  

[p0103 A80-20088]

Flow over a plate in the presence of a vortex sink  

[p0150 A80-21295]

Near-wall structure and unsteady pressures at trailing edges of airfoils --- as aeracooustics sound generators  

[p0161 A80-23900]

Investigation of trailing-edge noise  

[p0161 A80-23901]

Propulsion and measurement of turbulent aerodynamic trailing edge flow  

[p0452 A80-41599]

Blade trailing edge heat transfer  

[p0458 A80-42178]

Computational transonic inverse procedure for wing design with automatic trailing edge closure  

[p0506 A80-44149]

Asymmetric trailing-edge flows at high Reynolds numbers  

[p0506 A80-44151]

Potential flow past a wing profile with a trailing edge of finite thickness  

[p0524 A80-46827]

The quasi-vortex-lattice method for wings with edge vortex separation  

[p0114 A80-14052]

Viscous flow in the region of a rounded trailing edge  

[p0233 A80-19945]

Experimental study of airfoil trailing edge noise: Instrumentation, methodology and initial results  

[p0305 A80-22264]

Wind tunnel measurements of the mean flow in the turbulent boundary layer and wake in the region of the trailing edge of a swept wing at subsonic speeds  

[p0815 A80-28270]

Study of an edge vortex by means of ultrasound in a close field behind a rectangular wing in a wind tunnel  

[p0587 A80-30282]

Circulation Control Wing (CCW) Flight Tests  

[p0640 A80-33339]

TRAILING-EDGE FLAPS

Predicted jet thickness effects on the lift of an augmented wing  

[p0012 A80-12597]

On approximating the aerodynamic characteristics of a wing with two-element trailing flap  

[p0176 A80-36799]

Variable camber airfoils  

[p0453 A80-41780]

Pressure and velocity measurements in a three-dimensional wall jet  

[p0823 A80-10126]

On a smooth approximation method and its application to mathematical description of wing aerodynamic characteristics  

[p0034 A80-11011]

Low-frequency and small perturbation equation for transonic flow past wings
[OMEA, TP NO. 1980-1365] p0546 A80-47743
The aerodynamic interaction between a close-coupled canard and a sweepback wing in transonic flow
[OMEA, TP NO. 1980-34] p0573 A80-49145
Shockless airfoils for wings, compressors, and turbines
[OMEA, TP NO. 1980-5031] p0581 A80-5031
Aerodynamic response analysis of two-dimensional, single and two degree of freedom airfoils in low-frequency, small-disturbance unsteady transonic flows
[AD-A073379] p0609 B80-12073
An investigation of several factors involved in a finite difference procedure for analyzing the transonic flow about harmonically oscillating airfoils and wings
[OMEA, TP NO. 1980-34] p0711 B80-14056
A users guide for A34: A program using a finite difference method to analyze transonic flow over oscillating airfoils
[NASA-CR-159141] p0127 B80-15052
Unsteady effects of a control surface in two-dimensional, subsonic and transonic flow
[OMEA, TP NO. 1980-15168] p0342 B80-15168
Unsteady transonic flows in a two-dimensional diffuser --- air breathing engines
[AD-A075261] p0375 B80-17033
Formulation of the three dimensional transonic unsteady aerodynamic problem
[AD-A075403] p0375 B80-17034
Interaction of a two-dimensional strip boundary layer with a three-dimensional transonic swept-wing code
[NASA-TM-78640] p0220 B80-17004
Data report for a test program to study transonic flow fields about wing/body/pylon/store combinations. Volume 1: Tunnel empty flow survey data, wing body force/moment/surface pressure data, and pressure store force/moment/surface pressure data
[OMEA, TP NO. 1980-17101] p0221 B80-18001
Data report for a test program to study transonic flow fields about wing/body/pylon/store combinations. Volume 2: Flow field survey data for configurations 21 and 22
[OMEA, TP NO. 1980-17103] p0221 B80-18002
An investigation of F-16 nozzle-afterbody forces at transonic Mach numbers with emphasis on support system interference
[AD-A078693] p0225 B80-18046
Unsteady effects with control surfaces --- measured in a wind tunnel
[IAAP-79-19-10] p0225 B80-18049
The development of rapid predictive methods for three-dimensional transonic flow fields about fighter bomber aircraft, part 1
[AD-A076683] p0280 B80-20236
Transonic data memorandum: A framework relating the drag-rise characteristics of a finite wing/body combination to those of its basic aerofoil
[OMEA, TP NO. 1980-9009] p0301 B80-21276
Transonic data memorandum: The lift achievable by aerofoils having a particular supercritical upper-surface pressure distribution that yields only small wave drag
[OMEA, TP NO. 1980-9009] p0302 B80-21277
Transonic data memorandum: Numerical methods for solving the flow point equations for two-dimensional aerofoils in subsonic and transonic flows, brief details, test cases and examples
[OMEA, TP NO. 1980-9009] p0302 B80-21278
Subsonic and transonic flows on a variable sweep wing
[OMEA, TP NO. 1980-9009] p0316 B80-22248
Transonic wing DFL-284 as European test model
Transonic kernel function method for unsteady flow calculations using a unified linear pressure panel procedure
[AD-A0080022] p0345 B80-22260
Summary of data required for the AGARD SMP activity standard aeroelastic configurations ---- two-dimensional configurations
Further investigation of a finite difference procedure for analyzing the transonic flow about harmonically oscillating airfoils and wings.

Transonic field analysis for wing-fuselage configurations.

Numerical calculation of transonic axial turbomachinery flows.

An approximate factorization solution of the transonic interference of multiple bodies in the flow field of the F-4C aircraft in the transonic speed range -- wind tunnel tests.

Transonic wind tunnels.

A computer code to model swept wings in an adaptive wall transonic wind tunnel.

Full scale aircraft simulation with cryogenic tunnels and status of the National Transonic Facility.

Progress report on a cryogenic pilot transonic wind tunnel driven by induction.

The National Transonic Facility - Status and operational planning.

Automatic control of NASA Langley's 0.3-meter cryogenic test facility.

A comparison of experimental and theoretical turbulence reduction from screens, honeycomb and edge-seals, combinations.

Additional flow quality measurements in the Langley Research Center 8-Foot Transonic Pressure Tunnel.

Design and simplified analytical treatment of transonic wing-fuselage-pylon-store interactions.

Unsteady transonic flows in a two-dimensional diffuser.

Experimental unsteady aerodynamics of conventional and supercritical airfoils --- conducted in the Ames 11 foot transonic wind tunnel.

Calculation of three-dimensional unsteady transonic flow past helicopter blades.

A compendium of computational fluid dynamics at the Langley Research Center.

Active flutter control in transonic conditions.

Preliminary measurements of aerodynamic damping of a transonic compressor rotor.

Experimental and analytical transonic flutter characteristics of a geared-elevator configuration.

Evaluation of an ejeector powered engine simulator at transonic Mach numbers.

Aerodynamic characteristics of moving trailing-edge controls at subsonic and transonic speeds.

Transonic unsteady airloads on an energy efficient transport wing with oscillating control surfaces.

Analysis of experiments on the effects of jet plumes on pressure distribution over a cylindrical afterbody at transonic speeds.

Use of nose cap and fuselage pressure orifices for determination of air flow for space shuttle orbiter below supersonic speeds.

Real-time data acquisition system for the NASA Langley transonic dynamics tunnel.
Light turbine helicopters to the year 2000

Runners of circumferential seals - Requirements and performance

Frequency dependent pressure for dominance in a four input/output pressure model

Multivariable synthesis with inverse models

Effects of idealizing three-dimensional geometry with two-dimensional models in temperature and stress analysis of engine components

Damage tolerant design and test considerations in the engine structural integrity program

destabilizing actions of rotating machines, and
the assumptions of the 1950's.
Flow induced spring coefficients of labyrinth
seals for application in rotor dynamics
Development of flexible rotor balancing criteria
Unsteady aerodynamics in turboaluminery

Turboprop Aircraft

NT AN-24 Aircraft
NT C-130 Aircraft
NT CL-84 Aircraft
NT Y-27 Aircraft

Acoustic pressures on a prop-fan aircraft fuselage
surface
Noise transmission and attenuation by stifened
panels
Short distance multipurpose aircraft An-28
Feasibility tests of use of the tri-turbo-3
aircraft for arctic ABAT drops
Advanced turbo-prop airplane interior noise
reduction-source definition
Advanced turbo-prop airplane interior noise
reduction-source definition
High speed turboprops for executive aircraft,
potential and recent test results
Advanced turbo-prop potential for high speed
Advanced test and analyses of three advanced
turboprop models
Performance estimation for highly loaded six and
ten blade propellers combined with an advanced
technology turboshaft engine
Evaluation of Aero Commander sidewall vibration
and interior acoustic data: Static operations

Turboprop Engines

Acoustic measurements of three Prop-Fan models
Study of turboprop system reliability and
maintenance costs
Preliminary study of advanced turboprop and
turboshaft engines for light aircraft -- cost
effectiveness
Performance estimation for highly loaded six and
ten blade propellers combined with an advanced
technology turboshaft engine

The NASA high-speed turboprop program
Application of advanced technologies to small,
short-haul transport aircraft
Development of an aircraft-derivative gas turbine
with high performance and large output
Fuel conservation benefits and critical
technologies of recuperative and advanced
conventional cycle turboshaft engines
The Rolls-Royce Gem
Range of applicability and energetic
characteristics of small-scale
high-pressure-gradient birotational turbines
Inertia and electron beam welded turbine engine
pover shaft
Preliminary study of advanced turboprop and
turboshaft engines for light aircraft -- cost
effectiveness

Turbulent Effects
Evaluation of a new concept for reducing
free-stream turbulence in wind tunnels
A comparison of experimental and theoretical
turbulence reduction from screens, honeycomb and
honeycomb-screen combinations
Study on the dynamics of small flight vehicles
under gust loading
Review of nonstationary gust-responses of flight
vehicles
Fan noise caused by the ingestion of anisotropic
turbulence -- a model based on axisymmetric
turbulence theory
Analytical study of the effects of wind tunnel
turbulence on turboshaft rotor noise
On the stability of the longitudinal disturbed
motion of an airplane with lift force control
system
The effects of inhomogeneities in atmospheric
turbulence on the dynamic response of an aircraft
Covariance matrices
Time-domain computation of aircraft gust
coverage matrices
Effects of free-stream turbulence on diffuser
performance

Turbulent Boundary Layer
Separation due to shock wave-turbulent boundary
layer interaction
Analysis of two-dimensional interactions between
shock waves and boundary layers
Wind tunnel design and performance for rough wall
boundary layer
An experimental and numerical investigation of a
three-dimensional shock wave separated turbulent
boundary layer
TURBULENT WAKES

Influence of pressure driven secondary flows on the behavior of turbofan forced mixers
[AIAA PAPER 80-1264] p0853 80-4151
Asymmetric trailing-edge flows at high Reynolds number
[AIAA PAPER 80-1296] p0506 80-44151
Considerations of some critical ejector problems --- for the STOL aircraft
--- p0923 80-10127
Computation of three-dimensional flow in turbofan mixers and comparison with experimental data
[AIAA-TP-8110] p0184 80-15364
An experimental study of multiple jet mixing
[NASA-CP-163537] p0610 80-31760

TURBULENT WAKES II

Propel/er Slipstream
Near-wake structure and unsteady pressures at trailing edges of airfoils --- an aeroacoustic sound generators
[0161 80-23900
High-resolution LDA measurements of Reynolds stress in boundary layers and wakes
[AIAA 80-0436] p0202 80-26967
Experimental investigation of the two-dimensional asymmetrical wake behind isolated annular blade rows - induced disturbances in swirling flows
[ASPE PAPER 80-S-140] p0662 80-42253
Vorticity modeling of blade wakes behind isolated annular blade rows - induced disturbances in swirling flows
[ASPE PAPER 80-S-140] p0662 80-42253
A numerical and experimental study of the turbulent wakes of turbocharger impeller blades, isolated airfoils, and a cascade of airfoils
[0146 80-27277
A note on an instability mechanism for the core of a rolled-up vortex sheet
[0115 80-22233
Wind tunnel measurements of the mean flow in the trailing edge of a swept wing at subsonic speeds
[PS-TR-79062] p0815 80-29270
A numerical and experimental study of the turbulent wakes of turbocharger impeller blades, isolated airfoils, and a cascade of airfoils
[0146 80-27277

TURBULENT FLOW

Development of a program for controlling the angle of bank of an orbital aircraft during entry into the atmosphere
[0150 80-21279
Fundamental of design. V - Fin design for combat aircraft
[0210 80-27732
A study of vortex shears on performance and handling qualities of general aviation aircraft
[0210 80-1870] p0472 80-43316
A model for helicopter guidance on spiral trajectories
[0170 80-1721] p0510 80-45523
Minimum time turns with thrust reversal --- high performance aircraft trajectory control
[0170 80-1595] p0517 80-45888
Flying-flight criteria for wings-level-turn maneuvering during an air-to-ground weapon delivery task
[0170 80-1620] p0520 80-45916
Minimum time turns with thrust reversal --- using control theory
[AD-057895] p0230 80-19078

TVS (CONTROL)

U TRAFFIC VECTOR CONTROL

TVS II

On axial turbine stage rotor blade twist with tangential tilt of the stator vane
p0806 80-10530
Optimal twisting of blades in axial turbomachines
p0213 80-27739
Means for controlling aerodynamically induced twist --- equipment to control transverse twist of rotating vane due to aerodynamic loads

SUBJECT INDEX

TWO DIMENSIONAL BODIES

An experiment of lift interference on 2-dimension model wings in a wind tunnel with perforated walls
p0260 80-29689
Analysis of two-dimensional airfoil configurations
p0276 80-10202
Transonic data memorandum: Numerical methods for solving the potential flow equation for two-dimensional aerfoils in subsonic and transonic flows, brief descriptions, test cases and examples
[AR-007-99009] p0302 80-21278
Study for conceptual design of VTO, STOL exhaust nozzle
[NASA-CP-152388] p0646 80-33397

TWO DIMENSIONAL FLOW

Engine aerodynamic installation by numerical simulation
[AIAA PAPER 80-0108] p0909 80-18271
Improved numerical simulation of high speed inlets using the Navier-Stokes equations
[AIAA PAPER 80-0383] p0263 80-53294
Separation due to shock wave-turbulent boundary layer interaction
[SPER TP NO. 1979-194] p0102 80-20083
Analyses of two-dimensional interactions between shock waves and boundary layers
p0140 80-21232
Flow of a compressible fluid over an isolated airfoil and through a cascade
p0151 80-21302
Modeling low Mach number noise
p0161 80-23902
Straight-walled, two-dimensional diffusers - Transitional and peak pressure effects
p0211 80-27736
Rotating stall and surge
p0271 80-30282
Stability aspects of diverging subsonic flow
p0272 80-30567
Design of slotted transonic wind tunnels for supersonic flow development
p0275 80-30976
Effect of initial value on the behavior of flow calculations for blade-to-blade flow through a turbomachine
p0286 80-32528
Experimental investigation of the two-dimensional asynchronous stall wake behind a blade
p0322 80-33232
Computation of vortex flows by panel methods
p0382 80-33232
Plane unsteady flow of inviscid and incompressible fluid around a system of profiles
p0391 80-38273
Pressure fields generated by instability waves and coherent structures in an impinging jet
[FARMAP PAPER 80-0280] p0386 80-38632
Analysis of nonlifting and lifting airfoils in two-dimensional airfoil and through a cascade
[AR-057895] p0230 80-19078
Shockless airfoils for wings, compressors, and turbines
p0581 80-50311
Lifting and nonlifting kernel functions for cascade and isolated airfoils
p0515 80-51920
General potential theory of arbitrary wing sections
p0127 80-15046
Unsteady effects of a control surface in two-dimensional, subsonic and transonic flow
p0142 80-15168
Unsteady transonic flows in a two-dimensional diffruser - air breathing engines

A perturbation theory of two-dimensional transonic wind tunnel wall interference

An experimental study of two-dimensional supersonic jet impingement on a flat plate

Blade-to-blade flow of ideal fluid with wall injection

La Recherche Aéronautique, Bi-monthly Bulletin no. 1979-5

Calculation techniques for inviscid two-dimensional supersonic airflow

A brief investigation of the two-dimensionality of the flow over an airfoil in the 8 foot by 6 foot transonic wind tunnel

Two stage turbines

Range of applicability and energetic characteristics of small-scale high-pressure-gradient birotational turbines

Two turboprop aircraft

U TUBES

U MACHINES

UH-1 HELICOPTER

A compilation and analysis of helicopter handling qualities data. Volume I: Data compilation

VTOL/Bird avionics system flight-test data on a 31 ft-1H helicopter

Navigation systems for approach and landing of VTOL aircraft

Preliminary Airworthiness Evaluation 31-1H helicopter equipped with Multiple Target Electronic Warfare System (MTEWS)

Vibration and testing of prototype 31-1H aircraft windshields manufactured with a sheet interlayer

Microphysical properties of artificial and natural clouds and their effects on 31-1H helicopter icing

UH-60A HELICOPTER

The 31.5. Army Digital Avionics Technology program

Ultra short wave radio equipment

Ultra high frequency radio equipment

Ultra high frequencies

UHF coplanar-slot antenna for aircraft-to-satellite Data communications

The effect of equatorial ionospheric disturbance on aircraft-to-satellite communications

Present-day problems of air traffic control in ground-to-air communications

L-band measurements in the air traffic channel to characterize secondary radar systems

Combined vibration/temperature/sideload environmental testing of UHF blade antennas

Precision 1-band DME tests

Ultrasonic flaw detection

Nondestructive evaluation of graphite composite aircraft structures

Walking-gate spatial signal averaging - signal processing for fatigue crack ultrasonic inspection systems

Acceptance limits of ultrasonic transducers for nondestructive inspection

Optimization of computer automated ultrasonic inspection systems

Ultrasonic and acoustic emission detection of fatigue damage - aluminum alloy 7075-T651

Nondestructive inspection of advanced composite aircraft structure - ultrasonic flaw detection

Ultrasonic tests

Ultrasonic wave transducers

Acceptance limits of ultrasonic transducers for nondestructive inspection

Autoscan-I ultrasonic fatigue-crack detector - for military aircraft fastener systems

Ultrasonic welding

Developments in ultrasonic welding for aircraft

Ultrasonics

Study of an edge vortex by means of ultrasound in a close field behind a rectangular wing in a wind tunnel

Combined vibration/temperature/sideload nondestructive inspection system

Acceptance limits of ultrasonic transducers for aircraft structures

Nondestructive inspection

Optimization of fatigue damage aluminum alloy 7075-T651 inspection system

Combined vibration/temperature/sideload nondestructive inspection

Autoscan-I ultrasonic fatigue-crack detector - for military aircraft fastener systems

Ultrasonics

Study of an edge vortex by means of ultrasound in a close field behind a rectangular wing in a wind tunnel

Combined vibration/temperature/sideload nondestructive inspection

Autoscan-I ultrasonic fatigue-crack detector - for military aircraft fastener systems

Ultrasonics

Study of an edge vortex by means of ultrasound in a close field behind a rectangular wing in a wind tunnel

Combined vibration/temperature/sideload nondestructive inspection

Autoscan-I ultrasonic fatigue-crack detector - for military aircraft fastener systems

A V/STOL ground effects test facility
The criticality of engine exhaust simulations on V/STOL model-measured ground effects
Large scale model tests of a new technology V/STOL concept
Tilt rotor - An effective V/STOL concept
Advanced technology effects on V/STOL propulsion system weight
Navy V/STOL - A continuing initiative
The innovative application of boost engine technology to the design of a variety of tactical and strategic aircraft
Breaking V/STOL free of Catch 22 --- technology utilization and assessment
AV-8A - A second generation V/STOL
Multi rotor concepts for heavy lift
VSTOL test techniques utilizing laser tracking
The changing horizons for technical progress. II
YF-83 status report
Aims to begin V/STOL model tests --- full scale wind tunnel tests of Grumman aircraft
An Integrated Sensory Subsystem /ISS/ for advanced V/STOL aircraft
Airplane skijump takeoff
V/STOL at the crossroads
Part-span variable inlet guide vanes for V/STOL fan thrust modulation
Stability analysis of the YF01 engine in the XP-12A aircraft
Environmental control system concept study for a Navy V/STOL aircraft
Control of V/STOL/VSTOL comparison - A view from the deck
Use of contingency ratings on a subsonic V/STOL propulsion system
Development of the 'D' vented thrust deflecting nozzle
The impact of propulsion performance parameters on V/STOL design and sizing
Contingency rating options for ASW/AW V/STOL aircraft
The effect of cross-shafting on engine-out vertical landing reliability of V/STOL aircraft
V/STOL over wing concept for V/STOL supersonic fighter
Navy V/STOL hover and low-speed flying qualities
Criteria Recent developments
Qualification of V/STOL equivalent system characteristics through analysis and ground-base simulation
Some tests on small-scale rectangular throat aircraft
Augmenting ejector endwall effects --- V/STOL aircraft
Entainment characteristics of unsteady subsonic jets --- for V/STOL aircraft
Considerations of some critical ejector problems --- for the V/STOL aircraft
Interface concerns of ejector integration in V/STOL aircraft
Reaction control system augmentation for V/STOL aircraft
The external augmentor concept for V/STOL aircraft
Height of spray produced by vertical takeoff and landing (VTOL) aircraft
The criticality of engine exhaust simulations on V/STOL model-measured ground effects
VSTOL flight simulation
Force and moment data from a wind-tunnel test of a tilt-nacelle V/STOL propulsion system with an attitude control vane --- conducted in Ames 40 by 80 foot wind tunnel
A computerized VSTOL/small platform landing dynamics investigation model
Investigation of ground effects on large and small scale models of a three fan V/STOL aircraft configuration
Recent research on V/STOL test limits at the University of Washington aeronautical laboratory
Low speed test of the aft inlet designed for a tandem fan V/STOL nacelle
Proceedings of a Workshop on V/STOL aircraft
Proceedings of a Workshop on V/STOL aircraft
Proceedings of a Workshop on V/STOL aircraft
Aerodynamics, volume 1
Avionics logistics support including V/STOL, LAMPS, and instrument repair
Preliminary study of V/STOL thrust requirements for a V/STOL aircraft with lift plus lift/thrust propulsion
Microprocessor control of low speed V/STOL flight
Predicting field of view requirements for VSTOL aircraft approach and landing
Flying qualities and piloting with respect to controls and displays

SUBJECT INDEX

\[ A-824 \]
Passive control of wing/store flutter
On the use of vibration self-damping materials in the manufacture of parts for rotating machinery
Vibrations of a compressor blade with slip at the root
Damping of an engine exhaust stack
Investigation of fan blades shroud mechanical damping
Some recent measurements of structural dynamic damping in aircraft structures
Damping problems in acoustic fatigue
Viscoelastic damping in USAR applications
Damping effects in joints and experimental tests on riveted specimens
Analytical design and evaluation of an active control system for helicopter vibration reduction and gust response alleviation
Stability problems of rotor systems

VIBRATION EFFECTS
Crack development in panels of a pressurized fuselage under the combined effect of pressurization-induced cyclic loads and high-frequency vibrations
Multicycle control of a helicopter rotor considering the influence of vibration, loads, and control motion
Airframe noise-induced building vibrations --- human annoyance responses
Interferometer design and data handling in a high-vibration environment. I - Interferometer design
Interferometer design and data handling in a high-vibration environment. II - Data handling
Dynamics of the braking system of transport aircraft
Combined vibration/temperature/altitude environmental testing of USF blade antennas
Aircraft sonic boom: Effects on buildings. Citations from the NTFI data base
Subynchronous instability of a geared centrifugal compressor of overhung design
Asynchronous vibration problems of centrifugal compressor

VIBRATION ISOLATORS
Active multivariable isolation for an helicopter by decoupling and frequency domain methods
Design of elastomer dampers for a high-speed flexible rotor
Viscoelastic damping in USAR applications
Investigations of an active vibration isolation system for helicopters
Investigations into an active vibration isolation system for helicopters with rigid and elastic airframe modeling
Decoupler pylon: Wing/store flatter suppressor
Investigations of the design of active vibration isolation systems for helicopters with rigid and elastic modeling of the fuselage
Bifilar analysis study, volume 1
Application of the discrete-phase method /DPH/ to the study and control of aircraft turbine engine blade vibrations. I
Processing noise and vibration data for gas turbine engine development
Gas turbine carcase and accessory vibration - Problems of measurement and analysis
Application of the discrete-phase method /DPH/ to the investigation and monitoring of aircraft engine blade vibrations. II
Vibration measurements on turbocharger engine blades with optical probes
Digital system for dynamic turbine engine blade displacement measurements
Measurement and prediction of the aerodynamic damping of compressor blades
Digital system for dynamic turbine engine blade displacement measurements
Angular vibration measurement techniques --- airborne electro-optical package disturbances
Methods for determining undamped normal modes and transfer functions from receptance measurements --- with possible application to helicopter structures vibration testing

VIBRATION MODE
Vibration characteristics of asymmetric cross-section blades. Disk under rotation
Vibrational modes of an aircraft simulator motion system
An optimization method for the determination of the important flutter modes
The effect of aerodynamic phase lag on the twin vibration node model of aeroengine fan flutter
Redesign of structural vibration modes by finite-element inverse perturbation
Aerodynamic analysis of a supersonic cascade vibrating in a complex mode
Flexible torsional vibrations of a wing
Influence of the profile geometry on the eigenfrequency and normal modes of high-pressure-temperature blades with allowance for conditions characteristic of aircraft gas turbines
Application of random time domain analysis to dynamic flight measurements — B-1 aircraft
Calculation of natural frequencies and mode shapes of mass loaded aircraft structures
Methods for determining undamped normal modes and transfer functions from receptance measurements --- with possible application to helicopter structures vibration testing
The Shock and Vibration Digest, volume 12, no. 4
VIBRATION PROTECTION
VIBRATION ISOLATORS
VIBRATION SIMULATORS
A dynamic vibration generator for full-scale structures
Dynamic vibration exciter for full-scale structures
VIBRATION TESTING MACHINES
VIBRATION SIMULATION
VIBRATION TESTS
Experimental evaluation of the predicted behavior of squeeze-film-bearing-supported rigid rotors

The influence of test equipment during resonance tests of light structures --- aircraft aeroelastic model

An application of system identification to flutter testing

Excitation and analysis technique for flight flutter tests

Flight testing of the buffeting behavior of combat aircraft

A simplified ground vibration test procedure for railplanes and light aircraft

Dynamic Environmental Qualification Techniques

Application of MIL-STD-810C dynamic requirements to SAF avionics procurements

Civil aircraft equipment environment qualification techniques

Analysis and identification of subsynchronous vibration for a high-pressure parallel flow centrifugal compressor

Pavement evaluation and overlay design using vibratory nondestructive testing and layered elastic theory. Volume 1: Development procedure

The investigation of transient loads in gas turbine engine blades using spectral analysis methods

A study of alternating stresses in gas-turbine engine blades by spectral analysis

Bifilar analysis study, volume 1

Bifilar analysis users manual, volume 2

Investigation of vibration reduction through structural optimization

The transient loads of gas turbine engine blades using spectral analysis methods

An analysis of correlation of test data from an advanced technology rotor system --- helicopter performance prediction

Analysis and correlation of test data from an advanced technology rotor system --- helicopter performance prediction

The duration of false alarms in surveillance radar

The airport video information system of Interflug

Airborne video instrumentation/data reduction

Experiences of a 50 MBPS video recording and processing system for FLIR imagers

A digital system for panoramic video displays in flight training simulators

US Army Test and Evaluation Command test operations procedures: Photographic and video image support aviation materiel

The Viscoelastic behavior of a composite in a thermal environment

Viscosity

Bifilar analysis users manual, volume 1

Bifilar analysis study, volume 1

A study of alternating stresses in gas-turbine engine blades using spectral analysis methods

The investigation of transient loads in gas turbine engine blades using spectral analysis methods

A study of alternating stresses in gas-turbine engine blades by spectral analysis

Bifilar analysis study, volume 1

Bifilar analysis users manual, volume 2

The Viscoelastic behavior of a composite in a thermal environment
A mixed compact Hermitian method for the numerical study of unsteady viscous flow around an oscillating airfoil  
Calculation of transonic viscous flows past wing profiles  
Complete viscous flowfield solutions about a blunt parabolic body in a supersonic stream  
Heat transfer at a breaking point of the leading edge of a plate in hypersonic flight  
Investigation of flows in Laval nozzles at small Reynolds numbers  
Application of viscous analyses to the design of jet exhaust powered lift installations  
Theoretical method for the analysis of airfoils in viscous flows  
A simplified model for the viscous crossflow in a slotted test section  
Viscous flowfields induced by two- and three-dimensional lift jets in ground effect  
Viscous flow in the region of a rounded trailing edge  
A velocity-split Navier-Stokes solution procedure for incompressible high Reynolds number external flows  
Computational models for the viscous/inviscid analysis of aircraft exhaust plumes --- predicting afterbody drag  
An analysis method for multi-component airfoils in separated flow  
An integral-representation approach for time-dependent viscous flows  
A comprehensive investigation into the supersonic viscous flow about a slender cone at high angle of attack: Experimental and theoretical results  
Viscous fluids  
The basic models of mechanics of liquids and gases in the theory of the wing  
Dynamics of flexible rotors partially filled with a viscous incompressible fluid  
Visibility  
Low visibility  
The influence of colors on the visibility of aircraft and ground obstacles  
Optical design of airport control tower cabs  
Lidar visibility measurements  
Infrared detection for U.S. airports  
Remote sensing methods for determination of slant range visibility  
Development and evaluation of a tower slant visual range system  
Military member calculations for the NATO theater: Weather and warplanes 8  
Vision  
Night vision  
Visual aids  
An investigation of laser lighting systems to assist aircraft landing  
Visual displays  
Visual fields  
Visual accommodation responses in a virtual image environment  
Predicting field of view requirements for VSTOL aircraft approach and landing  
Visual flight  
Pilot performance during simulated approaches and landings made with various computer-generated visual glidepath indicators  
Visually Coupled System: Computer Generated Imagery (VCS-CGI) engineering interface  
Airborne laser lighting systems to assist aircraft landing  
Lidar visibility measurements  
Remote sensing methods for determination of slant range visibility  
Visual accommodation responses in a virtual image environment  
Visual perception  
Space perception  
Perception and performance in flight simulators: The contribution of vestibular, visual, and auditory information  
Visual accommodation responses in a virtual image environment  
Development of a visual inspection technique (optical assessment of aircraft transparencies)  
Platform motion contributions to simulator training effectiveness. Study 3: Interaction of motion with fields-of-view  
Velocity/pilot/model analysis of visual and motion cue requirements in flight simulation — helicopter hovering  
Visual tasks  
Optical design of airport control tower cabs  
Visual tracking  
Optical tracking  
Visualization of flow  
Visual communication  
Voice data processing  
Management of a stored program controlled ATC communication system  
Unigen — Universal language of aviation  
Hypoxia-induced fatal aircraft accident revealed by voice analysis  
Vocabulary specification for automatic speech recognition in aircraft cockpits  
Visual confirmation of voice takeoff clearance (VICON) alternative study  
Voice data processing  
Voice data entry in air traffic control  
Volatile liquids  
Vaporizing  
Vortex breakdown  
Electric field effects  
Voltage generators  
Improved test methods for determining lightning-induced voltages in aircraft  
Voltage measurement  
Electrical measurement  
Voltage regulator  
An overvoltage safety system for direct current aircraft generators  
Effects of electric fluctuations in electric power systems of flight vehicles  
Radar approach control (Radar Control) primary input power supply study  
Voodoo aircraft  
V-101 aircraft  
VOR systems  
UHF omni-directional navigation  
Vortex breakdown  
Exploratory investigation of the effects of vortex bursting on the high angle of attack lateral-directional stability characteristics of
highly-swept wings [AIAA 80-0463] p0201 A80-26960
On the swelling of rolled up vortex surfaces and the breakdown of the vortex core for slender wings [NASA-TM-75362] p0641 N80-33346

VORTEX GENERATION
VORTEX DISTURBANCES
VORTEX FLOW

VORTEX GENERATION
Somewise development of the flow over a delta wing [AIAA PAPER 80-0200] p0097 A80-18376
Effects of forebody, wing and wing-body-LEX flowfields on high angle of attack aerodynamics --- Leading edge extensions [SAE PAPER 791082] p0194 A80-26638
Influence of external conditions on the generation and intensity of vortices at air-intakes [P0325 A80-34238]
Some investigations concerning the effects of gaps and vortex generators on elevator efficiency and of landing flap sweep on aerodynamic characteristics [P0163 B80-15178]
Subsonic and transonic flows on a variable sweep wing [P0316 B80-22268]
Development and application of a subsonic triangular vortex panel [AD-1085593] p0541 B80-29256

VORTEX INJECTORS
The linear and non-linear aerodynamics of three-surface aircraft concepts [AIAA 80-1581] p0516 A80-58978
Calculation of the static characteristics of two-hole swirl injectors [P0564 A80-47395]

VORTEX BLOTTERS
Concerning the separated flow about an inflating parachute [BAR-TEAMS-2031] p0626 B80-32336

VORTEX SHEETS
Yawed slender wings at small angles of attack [P0192 A80-26268]
Test study of the vortex regime of highly sweptback wings by extrapolation of the Jones method [AIAA PAPER WT 80-25] p0378 A80-36853
A test of the method of Fink and Soh for following vortex-sheet motion [P0620 A80-52719]
Noise emitted by vortex tubes during their development [P0621 A80-52913]
Vortex shedding mechanisms in relation to tip clearance flows and losses in axial fans [ARC-TN/DB-3929] p0180 B80-17077
A note on an instability mechanism for the core of a rolled-up vortex sheet [P0315 B80-22233]

VORTEX SHEETS

Hybrid vortex method for lifting surfaces with free-vortex flow [AIAA PAPER 80-0070] p0100 A80-19307
Perturbing influence of the probe on the characteristics of a subsonic wake behind a two-dimensional model [P0475 A80-43767]

VORTEX TUBES
U BLANCH TUBES
U VORTEXES

VORTICEES
BY WING TIP VORTEXES
Construction of a nonstationary nonlinear propeller theory [P0315 A80-12911]
Data and analysis procedures for improved aerial applications mission performance --- An agricultural aircraft wing geometry [SAE PAPER AA 79-001] p0555 A80-15220
Development of a vortex-lift-design method and application to a slender maneuver-wing configuration [AIAA PAPER 80-0327] p0094 B80-18316

Enhanced departure/spin recovery of fighter aircraft through control of the forebody vortex orientation [AIAA PAPER 80-0173] p0096 A80-18352
Summary of advanced methods for predicting high speed propeller performance [AIAA PAPER 80-0225] p0108 A80-20966
Flow over a plate in the presence of a vortex sink [NASA-TN-80-12295] p0140 B80-21320
Calculation of the supersonic flow field with vortices behind a slender rectangular wing [NASA-CR-18-51] p0140 A80-21320
A study of production and stimulated emission of sound by vortex flows [P0161 A80-23903]
Three-dimensional inviscid compressible rotational flows numerical results and comparison with analytical solutions [P0211 A80-27745]
Pressure rise of axial flow fans with whirling outflow [P0260 A80-29096]
Investigations on vortex frequencies in wakes of cascade blades [P0621 A80-29139]
Noise radiation from the side edges of flaps [P0722 A80-30568]
Construction of a nonstationary nonlinear theory of helicopter rotors [P0328 A80-34711]
Copartition of vortex flows by panel methods [P0302 A80-37238]
Influence of pressure driven secondary flows on the behavior of turbulent forced alse [AIAA PAPER 80-1198] p0451 A80-81515
The hybrid diffuser --- for gas turbine engines [ASME PAPER 80-GT-1136] p062 A80-42299
Vorticity modelling of blade wakes behind isolated annular blade-rows - Induced disturbances in swirling flows [ASME PAPER 80-GT-1140] p062 A80-42503
Performance improvement of delta wings at subsonic speeds due to vortex flaps [AIAA PAPER 80-1802] p069 A80-41285
A technique for simulating the motion and ground effect of aircraft wake vortices [P074 A80-41086]
Flow studies of slender wing vortices [AIAA PAPER 80-1823] p0507 A80-44159

Calculation of working process in 'low-compression' piston-type cryogenic tube [NASA-TR-16277] p0641 B80-10607
Measurements of the dynamic performance of the main drive fan of the NASA 5 metre pressurized low speed wind tunnel [NASA-80-0456] p0200 B80-26956
An investigation of the quality of the flow generated by three types of wind tunnel (Ludwig tube, Evans clean tunnel and injector driven tunnel) p0200 B80-19138

WIND TUNNEL MODELS

A V/STOL ground effects test facility p0013 B80-12618
Wind tunnel model deflection system p0013 B80-12620
Progress report on a cryogenic pilot transonic wind tunnel driven by induction [AD-A054-389] p0163 B80-24092
Experimental investigation of the interference-free flow field around a lifting wing-body model to establish cross flow characteristics for ventilated wind tunnel walls at low supersonic Mach numbers [AIAA 80-0444] p0200 B80-26968
Measurements of control stability characteristics of a wind-tunnel model using a transfer function method [AIAA 80-0457] p0200 B80-26957
A new rig for flight mechanics studies in the OPERA Aerothermodynamic Test Center of Rodane [NASA-00-046] p0201 B80-26561
A system for the measurement of the attitude of wind tunnel models [AIAA 80-0464] p0201 B80-26562
Development of a metric half-span model for interference-free testing [AAFP PAPER 80-0460] p0268 B80-29950
Experimental study of the interaction between a rapid supersonic aircraft wing and an engine nacelle at high dilution rate, wind tunnel [ONERA, TP 80-35] p0403 B80-40083
Wind tunnel flutter investigations p0065 B80-12011
Construction problems for high Reynolds number wind tunnel models [AAFP PAPER 80-0460] p0072 B80-12011
Optimized aerodynamic design process for subsonic transport wing fitted with winglets --- wind tunnel model p0264 B80-19139

x-438
WIND TUNNEL TESTS CONT'D

Measurement of dynamic direct and cross-coupling derivatives due to oscillatory roll
[p0264 A80-29495]

Instrumentation and techniques for parachute wind tunnel testing
[p0264 A80-29498]

A second generation instrumentation system for measuring cross-coupling derivatives -- from wind tunnel data
[p0265 A80-29502]

A three-dimensional Laser Doppler Velocimeter /LDV/ for use in wind tunnels
[p0265 A80-29507]

Anes to begin V/STOL model tests --- full scale wind tunnel tests of Grumman aircraft
[p0275 A80-30952]

Design of slotted transonic wind tunnels for supersonic flow development
[p0275 A80-30976]

Active control of rotor blade pitch for vibration reduction -- A wind tunnel demonstration
[p0321 A80-33121]

Experimental investigation of the two-dimensional asymmetrical turbulent wake behind a blade
[p0322 A80-33282]

Unsteady airloads on a harmonically pitching wing with external store
[IAEA 80-0733]

Wind tunnel investigation of active controls technology applied to a DC-10 derivative
[IAEA 80-0771]

Wing/store flutter with nonlinear pylon stiffness
[IAEA 80-0792]

A wind tunnel demonstration of the principle of aeroelastic tailoring applied to forward swept wings
[IAEA 80-0796]

Analytical study of the effects of wind tunnel turbulence on turbofan rotor noise
[IAEA PAPER 80-1022]

Simulation of high bypass ratio engine jet noise flight effects by model jet wind tunnel tests
[IAEA PAPER 80-1030]

Recommendations for obtaining nozzle/afterbody drag data based on a comparison of wind tunnel and flight data
[IAEA PAPER 79-1169]

A measurement of forward-flight effects on the noise from a JT150-1 turbofan engine in the NASA Ames 80- by 80-Foot Wind Tunnel
[IAEA PAPER 80-1026]

The anular jet technique for nozzle/afterbody throttle dependent drag testing
[IAEA PAPER 80-1163]

The captive balloon - Wind tunnel tests - Stability
[p0405 A80-39307]

Wind tunnel study of flight trajectories after separation of airborne stores in flight
[ONERA, TP NO. 1980-80]

Expected improvements from wind tunnel model testing at high angle of attack
[ONERA, TP NO. 1980-36]

Experiments with transonic profiles
[p044 A80-40804]

A comparison of jet temperature effects on afterbody drag with those from jet molecular weight and nozzle area ratio variations
[IAEA PAPER 80-1161]

Wind tunnel investigations of the release behavior of aircraft stores at low and high velocities
[DGLR PAPER 79-096]

Delay release experiments in DFPL wind tunnels --- external store separation
[DGLR PAPER 79-097]

External stores in supersonic wind tunnels --- for separation characteristics testing
[DGLR PAPER 79-098]

Aircraft model store trajectory testing at A. B.
[DGLR PAPER 79-099]

Performance improvement of delta wings at subsonic speeds due to vortex flaps
[IAEA PAPER 80-1802]

Effects of discontinuous drooped wing leading-edge modifications on the spinning characteristics of a low-wing general aviation airplane
[AIAA PAPER 80-1643]

Full-scale wind-tunnel investigation of the effects of wing leading-edge modifications on the high angle-of-attack aerodynamic characteristics of a low-wing general aviation airplane
[IAEA PAPER 80-1844]

Determination of an angle of attack sensor correction for a general aviation airplane at large angles of attack as determined from wind tunnel and flight tests
[IAEA PAPER 80-1845]

Full-scale test of a stall proof device
[IAEA PAPER 80-1833]

Controlled supercritical crossflow on supersonic wings - An experimental validation
[IAEA PAPER 80-1839]

Moving surface boundary layer control for aircraft operation at high incidence
[AIAA 80-1621]

Effects of wing and tail location on the aerodynamic characteristics of an airplane for Mach numbers from 0.25 to 4.63
[AIAA 80-1623]

Determination of an oblique wing aircraft's aerodynamic characteristics
[AIAA 80-1630]

Plane stabilization by laping jets in high-speed flow
[p0566 A80-4747]

The canard configuration and the conventional airplane --- aerodynamic characteristics of wings
[p0507 A80-46812]

Definition of a new airfoil family for helicopter blades
[ONERA TP NO. 1980-79]

Passive control of wing/store flutter
[p0569 A80-46812]

Aerodynamic testing in a straight cascade wind-tunnel
[ONERA, TP NO. 1980-98]

Holographic interferometer for aerodynamic flow analysis
[p0623 A80-53292]

Unitary Plan Wind Tunnel tests for supersonic flow
[HASA-CB-2214]

Low-speed wind-tunnel tests of a 1/10-scale model of an advanced arrow-wing supersonic cruise configuration designed for cruise at Mach 2.2
[HASATB-80152]

Aerodynamic interactions from reaction controls for lateral control of the N-2 P-2 lifting-body entry configuration at transonic and supersonic Mach numbers --- wind tunnel tests
[HASA-9P787562]

Wind-tunnel flight correlation study of aerodynamic characteristics of a large flexible supersonic cruise airplane C6-B-70-1)

V/STOL wind tunnel tests for superclosurc airplane at Mach numbers from 0.6 to 2.53
[HASATP-80152]

Wind tunnel flutter investigations
[p0038 A80-11068]

Normal force derivative and center of pressure movement due to Mach number on wing-body combinations with triangular wings of the same span and different aspect ratios at supersonic speeds
[p0065 A80-12011]

Wind tunnel force and pressure tests of a 21% normal force derivative and center of pressure
[RNEA, TP NO. 1980-80]

Expected improvements from wind tunnel model testing at high angle of attack
[ONERA, TP NO. 1980-36]

Experiments with transonic profiles
[p044 A80-40804]

A comparison of jet temperature effects on afterbody drag with those from jet molecular weight and nozzle area ratio variations
[IAEA PAPER 80-1161]

Wind tunnel investigations of the release behavior of aircraft stores at low and high velocities
[DGLR PAPER 79-096]

Delay release experiments in DFPL wind tunnels --- external store separation
[DGLR PAPER 79-097]

External stores in supersonic wind tunnels --- for separation characteristics testing
[DGLR PAPER 79-098]

Aircraft model store trajectory testing at A. B.
[DGLR PAPER 79-099]

Performance improvement of delta wings at subsonic speeds due to vortex flaps
[IAEA PAPER 80-1802]

Effects of discontinuous drooped wing leading-edge modifications on the spinning characteristics of a low-wing general aviation airplane

[p0065 A80-12011]
SUBJECT INDEX

WIND TUNNEL TESTS CONT'D

Wing-tunnel flight correlation study of an oblique wing transport model at Mach numbers between 0.6 and 1.0  p0059  880-12059
Rotary backup data for a typical single-engine general aviation design for an angle-of-attack range of 8 degrees to 35 degrees, J; Effect of wing leading-edge modifications, model A [NASA-CH-3162]  p0068  880-12060
Aerodynamic characteristics of a hypersonic research airplane concept having a 70 deg swept double-delta wing at Mach numbers from 0.60 to 1.20, with summary of data from 0.20 to 6.0 --- Langley 8-ft transonic wind tunnel [NASA-TP-1552]  p0068  880-12064
Trellis wind tunnel study [AA-A7279]  p0068  880-12069
Determination in ground facilities of aerodynamic stability parameters of aircraft [NASM-AD-242]  p0072  880-12102
Focus and moment data from a wind-tunnel test of a tilt-rotor V/STOL propulsion system with a transition control vane --- conducted in arcs 40 by 80 foot wind tunnel [NASA-TR-81517]  p0077  880-13003
A-10 carriage loads test [AD-A703462]  p0079  880-13034
Some measurements of buffeting on an aeroelastic model of a slender wing aircraft [RAE-TH-STRUCT-942]  p0081  880-13055
The development of active control and its application to flutter suppressors --- wind tunnel test results [AAAF-NT-79-02]  p0082  880-13056
Experimental study of acoustic loads on an upper-surface-blown STOL airplane configuration --- Langley full-scale wind tunnel tests [NASA-TP-1577]  p0085  880-13879
Two-dimensional aerodynamic interference effects on oscillating airfoils with flaps in ventilated subsonic wind tunnels --- computational fluid dynamics [NASA-CH-3210]  p0113  880-14047
Turbojet-exhaust nozzle secondary-airflow puzzling as an exit control of an inlet-stability bypass system for a Mach 2.5 axisymmetric mixed-compression inlet --- Lewis 10- by 10-ft. supersonic wind tunnel test [NASA-TP-1532]  p0120  880-14124
NASA/Aero IV-15 tilt rotor research aircraft wind-tunnel test program plan --- arcs 40-ft by 80-ft wind tunnel tests [NASA-TR-78542]  p0129  880-15067
Correlation of F-15 flight and wind tunnel test control effectiveness [NASP-I7-970-50]  p0180  880-15152
Some wind tunnel measurements of the effectiveness at low speeds of combined lift and roll controls [NASA-TR-78542]  p0180  880-15153
Pin design with ACT in the presence of strakes [NASA-CH-171]  p0141  880-15154
Wind-tunnel flight correlation study of aerodynamic characteristics of a large flexible supercritical cruise airplane (TR-701) 2; Extrapolation of wind-tunnel data to full-scale conditions [NASA-TP-1515]  p0167  880-16032
Recent research on V/STOL test model at the University of Washington aeronautical laboratory [NASA-CH-3227]  p0171  880-16068
Wind-tunnel flight correlation study of aerodynamic characteristics of a large flexible supercritical cruise airplane (TR-701) --- A comparison between characteristics predicted from wind-tunnel measurements and those measured in flight [NASA-TP-1516]  p0219  880-17986
Comparison of aerodynamic coefficients obtained from theoretical calculations wind tunnel tests and flight tests data reduction for the alpha jet aircraft [NASA-TR-75227]  p0220  880-17991
Programs for the transonic wind tunnel data processing installation. Part 7: Extended focal [AD-A073414]  p0226  880-18054
Aeroacoustic wind-tunnel tests of a light twin-boom general-aviation airplane with free or shrouded-pusher propellers --- in the Langley full-scale tunnel [NASA-TR-60203]  p0232  880-19023
Experimental investigation of a circulation control aileron [AD-A078826]  p0233  880-19046
Wind-tunnel results for an improved 21-percent-thick low-speed airfoil section [NASA-TR-78542]  p0246  880-21295
Dynamics stability derivatives of space shuttle orbiter obtained from wind-tunnel and approach and landing flight tests [NASA-TP-1634]  p0307  880-21336
Subsonic and transonic flows on a variable sweep wing [NASA-TR-78542]  p0316  880-22248
Transonic wing DPF-LR-F4 as an European test model [NASA-TR-75752]  p0345  880-22260
Supercritical wing design studies for transport aircraft. Volume 1: Wing design and wind tunnel measurements [NASA-TP-79-06-VOL-1]  p0346  880-22275
A comment on the origin of endwall interference in wind tunnel tests of aerofoils [NASA-TR-ABO-1616]  p0346  880-22280
High-speed-propeller wind-tunnel aeroacoustic results [NASA-TR-78542]  p0352  880-22334
Application of two design methods for active flutter suppression and wind-tunnel test results [NASA-TR-1653]  p0357  880-22337
Summary of data required for the AGARD SPN activity standard aeroelastic configurations - two-dimensional configurations [NASA-TR-79015-U]  p0361  880-23273
Investigation of axisymmetric and nonaxisymmetric nozzle installed on a 0.10 scale F-18 prototype airplane model --- wind tunnel tests [NASA-TR-16236]  p0414  880-24267
Wind tunnel measurements of the mean flow in the turbulent boundary layer and wake in the region of the trailing edge of a swept wing at subsonic speeds [NASA-TR-79062]  p0415  880-24278
Wind tunnel tests of the XV-15 tilt rotor aircraft [NASA-TR-78542]  p0417  880-24294

A-441
Harmonic oscillations of annular wing in steady ideal fluid flow p0034 A80-11019
Dynamical stall on oscillating airfoils in oscillating free-streams p0219 A80-17983
Experimental unsteady aerodynamics of conventional and supercritical airfoils --- conducted in the Ames 11 foot transonic wind tunnel [NASA-TM-81221] p0641 A80-33345
Method for calculating wing loading during maneuvering flight along a three-dimensional curved path p0009 A80-11667
Solution of linear problems of flow about finite span wing p0015 A80-12912
Application of finite element analysis to derivation of structural weight [SAE PAPER 1271] p0104 A80-20627
A panel method for calculating the loads acting on a wing that performs harmonic oscillations in subsonic flow p0109 A80-21772
Application of the variational-difference method of straight lines to the calculation of wing middle surface deformation p0109 A80-21776
The relationship between the critical reversal and divergence speeds for a straight wing p0151 A80-21310
Pressure distribution in rectangular wing/blade/sections during curvilinear motion in an incompressible medium p0203 A80-27157
Direct and inverse problems of flow over a wing of finite span in the linear formulation p0320 A80-304712
Calculation of pressure distribution on slender wings in supersonic flow p0376 A80-36797
The method of matched asymptotic expansions in the hydrodynamics of wings --- Russian book p0380 A80-37104
Instantary air forces on wings with an oscillating rudder [DGLR PAPER 80-031] p0522 A80-46283
Scatter of fatigue-life data for elements of full-scale light-aircraft wings under steady loads p0525 A80-46889
Calculation of aircraft wing reliability from sudden failures p0564 A80-87403
The application of a parameteric method of fatigue load measurement to wings based on flight measurements on a Lightning Mk T5 [ARC/NA её-3836] p0179 A80-17068
Additional information about FALSTAFF --- fighter aircraft loading standard for fatigue evaluation [ELR/TR-79056-V] p0186 A80-17508
Estimation of the endurance of civil aircraft wing structures --- life estimate method for wing loading on general aviation aircraft [NASDU-79024] p0235 A80-19006
Parametric study of variation in cargo-airplane performance related to progression from current to spanloader designs [NASA-TP-1625] p0305 A80-21318
Active control technology for gust alleviation p0388 A80-21385
Hockets for spin recovery [NASA-CH-159240] p0554 A80-29367
Computation of spanwise distribution of circulation and lift coefficient for flapped wings of arbitrary planform [NASA-CH-159329] p0599 A80-31353
Fatigue testing of vampire wings [AIAA PAPER 80-26378] p0666 A80-33399
WING NACELLE CONFIGURATIONS Model tests demonstrating under-wing installation effects on engine exhaust noise [AIAA PAPER 80-1048] p0308 A80-35992
Experimental study of the interaction between a rapid subsonic aircraft wing and an engine nacelle at high dilution rate [NASA/TP 80-1900-35] p0403 A80-80803
Investigation of the influence of the parameters of a wing/engine combination on the critical flutter speed p0525 A80-464771
Assessment at full scale of exhaust nozzle to wing size on STOL-OTW acoustic characteristics [NASA-TM-79279] p0805 A80-138681
WING OSCILLATIONS Large-amplitude fluctuations of velocity and incidence of an oscillating airfoil p0009 A80-11032
Analysis of transonic flow about harmonically oscillating airfoils and wings [AIAA PAPER 80-0199] p0097 A80-18367
A panel method for calculating the loads acting on a wing that performs harmonic oscillations in subsonic flow p0169 A80-21272
Evaluation of the kernel of an integral equation for a wing performing harmonic oscillations in subsonic flow p015 A80-21296
Computations of the pitching oscillation of a NASA 604-01T0 airfoil in the small disturbance limit [AIAA PAPER 80-0126] p0157 A80-23012
Steady motion of wings in the transonic regime --- Spanish thesis p0209 A80-27723
Application of unsteady airfoil theory to rotary wings p0217 A80-28056
Digital processing of unsteady periodic signals with application to the turbulence structure around oscillating airfoils p0265 A80-29505
A velocity potential panel method for the prediction of unsteady airloads on oscillating wings and bodies p0275 A80-30859
Active control of rotor blade pitch for vibration reduction -- a wind tunnel demonstration p0321 A80-33121
Future of helicopter rotor control p0321 A80-33122
The promise of multicycle control --- for helicopter vibration reduction p0321 A80-33123
Unsteady airloads on a harmonically pitching wing with external store p0331 A80-35037
Investigation of internal control laws for wing/store flutter suppression [DGLR PAPER 80-074] p0332 A80-35056
Active flutter suppression control law definition via least squares synthesis [AIAA 80-0765] p0332 A80-35057
Aerodynamic coefficients in generalized unsteady thin airfoil theory p0390 A80-38034
A mixed exact/verlet interpretation for the numerical study of unsteady viscous flow around an oscillating airfoil p0391 A80-38258
Effect of adding structural damping to a wing/nacelle system under flutter mode p0447 A80-41159
Instationary air forces on wings with an oscillating rudder [DGLR PAPER 80-031] p0522 A80-46283
Flexural torsional vibrations of a wing p0525 A80-46851
An investigation of several factors involved in a finite difference procedure for analyzing the transonic flow about harmonically oscillating airfoils and wings [NASA-CR-159143] p0114 A80-14056
### SUBJECT INDEX

The application of output predictive digital control to wing flutter suppression and terrain following problems (AIAA PAPER 80-0049) &p8358 A80-22361
Further investigation of a finite difference procedure for analyzing the transonic flow about harmonically oscillating airfoils and wings (NASA CR-13195) &p8018 A80-24271

</tbody>
</table>
Laminar boundary layer calculation from experimental pressure distribution

Analytic formulas for wing profile aerodynamic characteristics in incompressible flow

Synchronous oscillations of annular wing in steady ideal fluid flow

Exploratory study of the effects of wing-leading-edge modifications on the stall/spin behavior of a light general aviation airplane

Theoretical study of aerodynamic characteristics of wings having vortex flow

General potential theory of arbitrary wing sections

General theory of aerodynamic instability and the mechanism of flutter

A brief investigation of the two-dimensionality of the flow over an airfoil in the 8-foot by 6-foot transonic wind tunnel

Fatigue testing of vampire wings

WING ROOTS

Selecting the geometric parameters and position of a nose flap on the root profile of a swept wing using tunnel test data, part 2

Wing flapping with minimum energy - minimize the drag for a bending moment at the wing root

NACELLE: A shortened version of TWIST

WING SLATS

Certain types of separated flow over slotted wings

Some investigations concerning the effects of gaps and vortex generators on elevator efficiency and leading flap sweep on aerodynamic characteristics

WING SPAN

Steady flow over the pressure side of a piecewise-flat delta wing with supersonic leading edges

Solution of linear problems of flow about finite span wing

Weight minimization for a wing in the presence of constraints on the divergence speed

Development of a metric half-span model for interference free testing

Stationary flow past the lower surface of a piecewise planar delta wing with supersonic leading edges

Direct and inverse problems of flow over a wing of finite span in the linear formulation

An experimental investigation of a wing with controlled mid-span flow separation

WING TANKS

Temperature and flow measurements on near-freezing aviation fuels in a wing-tank model

Temperature and flow measurements on near-freezing aviation fuels in a wing-tank model

Effects of nonlinearity on wing-store flutter

WING TIP VORTEXES

Test study of the vortex regime of highly sweepback wings by extrapolation of the Jones method

Refraction of sound by aircraft wing tip vortices

Noise due to tip vortex formation on lifting rotors

Effect of tip vortex structure on helicopter noise

Full scale visualization of the wing tip vortices generated by a typical agricultural aircraft

WING TIPS

The significance of wing end configuration in airfoil design for civil aviation aircraft

Bilateral interferometry of carbon fiber reinforced plastic wingtips

Airflow effects on rime measurements by a wing tip-mounted ice detector on the UC130K research airplane

Aircraft wingtip coupling experiments

Development of high lift devices for application to combat fighter aircraft

Comprehensive and simplified analytical treatment of transonic wing-fuselage-pylon-store interactions

Unsteady pressure measurements on wing-store combinations in incompressible flow

Investigation of internal control laws for wing/store flutter suppression

Recent development of the TF-17 active flutter suppression system

Passive control of wing/store flutter

Simulation and computational analysis of transonic wing-fuselage-pylon-store interactions

WINGBOARDS

Simulated transonic flows for aircraft with nacelles, pylons, and winglets

Effect of winglets on performance and handling qualities of general aviation aircraft

Effect of winglets on a first-generation jet transport wing. 6: Stability characteristics for a full-span model at subsonic speeds - conducted in Langley 6-foot transonic pressure tunnel

Optimized aerodynamic design process for subsonic transport wing fitted with winglets - wind tunnel model

Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g., NASA report, translation, NASA contractor report). The page and accession numbers are located beneath and to the right of the title, e.g., p0079 N80-13032. Under any one author's name the accession numbers are arranged in sequence with the IAIA accession numbers appearing first.
ADARSH, T. C., JR.
Analysis of two-dimensional interactions between shock waves and boundary layers p0140 A80-15152

ADCOCK, C.
Application of advanced technologies to small, short-haul air transports [NASA-CH-152364] p0666 A80-33396

ADCOCK, J. B.
Full scale aircraft simulation with cryogenic tunnels and status of the National Transonic Facility p0163 A80-24090
A theoretical analysis of simulated transonic boundary layers in cryogenic-nitrogen wind tunnels [NASA-TP-1631] p0245 A80-19131

ADDELL, B.
Design for the future p0446 A80-40976

ADDIS, L.
Feasibility study for integrated flight trajectory control fighter [AD-A084708] p0591 A80-30314

ADELHAB, R. H.
Preliminary design procedure for insulated structures subjected to transient heating [NASA-TP-15235] p0074 A80-12438
Application of fully stressed design procedures to redundant and non-isotropic structures [NASA-TP-81092] p0958 A80-29767

Performance of single-stage axial-flow transonic compressor with rotor and stator aspect ratios of 1.19 and 1.26 respectively, and with design pressure ratio of 3.35. [NASA-TP-1659] p0306 A00-21325

Tradeoff between picture element dimensions and noncoherent averaging in side-looking airborne radar. [NASA-TP-1659] p0005 A00-19499

Enhanced departure/spin recovery of fighter aircraft through control of the forebody vortex orientation. [AIAA PAPER 80-0173] p0056 A00-18352

Effects of forebody, wing and wing-body-LEX flowfields on high angle of attack aerodynamics. [SAP PAPER 761009] p0194 A00-26638

Forebody vortex blowing: A novel control concept to enhance departure/spin recovery characteristics of fighter and trainer aircraft. p0143 A00-15172

Flying qualities design requirements for sidestick controllers. [AD-A085085] p0573 A00-28375

Flying qualities design criteria. [AD-A086629] p0647 A00-33002

Flight test of navigation and guidance sensor errors measured on STOL approaches. [NASA-TR-81154] p0080 A00-13041

Design of a wind shear detection radar for airports. p0152 A00-21929

The influence of losses on the evaluation of the 'rotating stall'. p0261 A00-29131

Far field monitor for instrument landing systems, phases 1 and 2. [AD-A079663] p0544 A00-29275

Large-scale wind-tunnel tests of inverting flaps on a STOL utility aircraft model. [NASA-TP-1696] p0432 A00-25318

Measurement of external forces and torques on a large pointing system. p0460 A00-25610

ATARS/ATC simulation tests with site adaptation logic in the Philadelphia terminal area. [AD-A083718] p0649 A00-27308

Advanced avionic architectures for the 1980's - A software view. p0280 A00-32420

Air traffic control/full scale collision avoidance system, Knoxville simulation. [AD-A074555] p0168 A00-16043

An evaluation of aircraft separation assurance concepts using airline flight simulators. Volume 1: Study report. [AD-A083896] p0469 A00-27310

An evaluation of aircraft separation assurance concepts using airline flight simulators. Volume 2: Appendices. [AD-A083897] p0489 A00-27311

On centrifugal compressor output regulation by iris diaphragms. p0617 A00-51905

Blade-to-blade flow of ideal fluid with wall injection. p0315 A00-22228

Error rate performance of M-ary DPSK systems in satellite/aircraft communications. p0192 A00-25995

Turboaera - The 'Kahila' is in production. [JASA-CR-159130] p0497 A00-52993

Composites in aircraft manufacturing - an impressive rise. p0153 A00-21923

A new procedure for linear optimal flight control. p0052 A00-14823

Aircraft engine status diagnostics based on limited information. p0017 A00-10003

A direction-cose position coordinate system for air navigation. p0621 A00-52993

Plane stabilization by impinging jets in high-speed flow. p0566 A00-47837

Lidar visibility measurements. p0573 A00-49159

Remote sensing of turbine engine gases. [AD-A084946] p0538 A00-28355

A computer based system for structural design, analysis and optimization. p0300 A00-21265

Air approach to aircraft dynamic response on damaged and repaired runways. p0434 A00-25327

A flight investigation of performance and loads for a helicopter with 10-64C main rotor blade sections. [NASA-TP-81871] p0641 A00-33348

A flight investigation of performance and loads for a helicopter with MLI-1T main-rotor blade sections. [NASA-TP-80165] p0025 A00-10136

A flight investigation of blade section aerodynamics for a helicopter main rotor having MLI-1T airfoil sections. [NASA-TP-80166] p0232 A00-19033

The viscoelastic behavior of a composite in a thermal environment. [NASA-CP-163167] p0423 A00-24369

Data and analysis procedures for improved aerial applications mission performance. [ASAR PAPER AA 79-001] p0055 A00-15220

Investigation of Air Force MIL-5506 hydraulic system malfunctions induced by chlorinated solvent contamination. [ASLE PAPER 80-AM-SC-2] p0468 A00-83178

Application of parametric weight and cost estimating relationships to future transport aircraft. [SAE PAPER 1292] p0105 A00-20637

A model for broadband jet noise amplification. [AIAA PAPER 80-1000] p0302 A00-38635

Experimental aerodynamic and acoustic model testing of the Variable Cycle Engine (VCE) tested conical exhaust nozzle system. [NASA-CP-159710] p0800 A00-26300

Experimental aerodynamic and acoustic model testing of the Variable Cycle Engine (VCE) tested conical exhaust nozzle system: Comprehensive data report. [NASA-CP-159711] p0480 A00-26301

AERONAUTICAL ENGINEERING/A Continuing Bibliography

1981 Cumulative Index

Typical Corporate Source Index Listing

The title of the document is used to provide a brief description of the subject matter. The page number and NASA accession number are included in each entry to assist the user in locating the abstract.
A study of production and stimulated emission of sound by vortex flows.

A survey of the literature on surface roughness effects on aircraft fuel consumption.

An experimental evaluation of the strength of occupant restraint systems in light aircraft.

Aeroelastic models for the viscous/inviscid analysis of jet aircraft exhaust plumes.

A practical method for predicting roughness effects on aircraft.

A review of Australian investigations on fatigue data analysis systems.

A proposal for aerodynamically actuated self-streamlining subsonic wind tunnel walls.

Aircraft pitching damping of a delta wing aircraft determined from flight measurements.

A simplified control systems mathematical model of the CB-47 (Chinook) helicopter.

Sea King Bk. 50 helicopter sonar dynamics study.

Aeroelastic models for the transonic wind tunnel data program description and operation.

A review of Australian investigations on aeronautical fatigue during the period April 1977 to March 1979.

A study of visual problems and night landing guidance of light aircraft.

A collection of a representative load sequence for helicopter rotor downwash in hover.

Sea King Mk. 50 helicopter flight control system: A mathematical model of the AFCS (AW) node.

Fatigue damage estimation for the BAeA aircraft.
A simulation support system, the development of the Air Force fuel mainburner/turbine effects programs, and the evaluation of fuel character on the J79 and F101. 

Regression modeling of turbine engine performance.  

Computer simulation of auxiliary power systems.  

Cargo generation forecasting models.  

Minimizing the sequenced delay time for escape from high-speed, low-level flight profiles.  

USAFA bioenvironmental noise data handbook.  

AEROSPACE SYSTEMS, INC., DURBULLING, MASS. 

Aerostructures, inc., BENNINGTON, VT. 

Crossing the channel in the Gossamer Albatross.  

AIR FORCE ACADEMY, COLO. 

Cargo generation forecasting models.  

Thermal oxidative stability test methods for JP75 jet fuel.  

Permanent magnet and superconducting generators in airborne, high power systems.  

An analytical and experimental study of aircraft hydraulic lines including the effect of sea flow.  

AIR FORCE ENGINEERING AND SERVICES CENTER, TYNDALL AFB, FLA. 

An evaluation of the bird/aircraft strike hazard at selected United Kingdom bases: RAF Mildenhall, RAFA Alconbury, RAF Upper Heyford, RAFF Bentwaters, RAF Fairford, RAF Lakenheath, and RAFF Woodbridge.  

An evaluation of the bird/aircraft strike hazard at Barksdale Air Force Base, Louisiana (SAC).  

Control of particulate emissions from turbine engine test cells by cooling water injection.  

Airflow surface roughness.  

AIR FORCE ENVIRONMENTAL TECHNICAL APPLICATIONS CENTER, SCOTT AFB, ILL. 

Wind factor simulation model: Model description.  

AIR FORCE FLIGHT DYNAMICS LAB., WRIGHT-PATTERSON AFB, OHIO. 

Recent developments in ejector technology in V/STOL aircraft.  

Pressure and velocity measurements in a three-dimensional wall jet.  

Interface concerns of ejector integration in V/STOL aircraft.  

Integration of flight and fire control.  

The analysis of sound propagation in jet engine structures testing.  

Angular vibration measurement techniques.  

Recovery system preliminary design.  

C-3
Unsteady pressure measurements on oscillating models in European wind tunnels
[AD-A0632348] p0870 B80-26277

Flying qualities design requirements for
sidestick controllers
[AD-A0605057] p0537 B80-28375

Computer simulation of ejection seat performance
and preliminary correlation with empirical data
[AD-A0762757] p0601 B80-31372

A compilation of computer software programs
available in the Flight Dynamics Laboratory,
1979
[AD-A0688504] p0654 B80-34156

AIR FORCE FLIGHT TEST CENTER, EDWARDS AFB, CALIF.
Performance testing production airliners
p0596 B80-31334

Qualitative assessment subsystem assessment
p0597 B80-31338

AIR FORCE GEOPHYSICS LAB., RANDSCOM AFB, MASS.
Preliminary assessment of an automated system
for detecting present weather
[AD-A0780311] p0253 B80-19706

Icing nozzle element optimization test, January
1979
[AD-A0811775] p0417 B80-24297

Development and evaluation of a tower alant
visual range system
[AD-A0823984] p0428 B80-24953

A demonstration test of the Modular Automated
Weather System (MAS)
[AD-A087370] p0612 B80-32030

AIR FORCE HUMAN RESOURCES LAB., BROOKS AFB, TEX.
Advanced simulator for pilot training (ASPT): 6-seat optimization
[AD-A0640475] p0031 B80-10233

Simulator for air-to-air combat motion system
investigation
[AD-A0726121] p0032 B80-10237

Effects of varying visual display
characteristics of the T-4G, a T-37 flight
simulator
[AD-A0784246] p0367 B80-23344

AIR FORCE HUMAN RESOURCES LAB., WILLIAMS AFB, ARIZ.
Application of flight simulator record/playback
feature
[AD-A081752] p0184 B80-26335

Advanced simulator for pilot training: Automated
performance measurement system
[AD-A083555] p0614 B80-33421

AIR FORCE INST. OF TECH., WRIGHT-PATTERSON AFB, OHIO.
Some tests on small-scale rectangular thruster
jector
p023 B80-10120

A study to develop optimization algorithms for
aircraft wing structures
[AD-A0726466] p027 B80-10196

The use of the Nauer factor for estimating the
cost of a turbine engine in the early stages of
development
[AD-A073016] p0041 B80-11095

Thrust vectoring to eliminate the vertical
stabilizer
[AD-A079852] p0237 B80-19077

Minimum time turns with thrust reversal
[AD-A079851] p0238 B80-19078

An analysis and synthesis of engine condition
monitoring systems
[AD-A079877] p0288 B80-20537

Ground plane effects on a contoured surface at
low subsonic velocities
[AD-A079677] p0288 B80-20237

Development of a bird/aircraft strike hazard
assessment methodology
[AD-A075598] p0290 B80-20246

A study of two airfoils life cycle cost models
and their applicability in the
communications-electronics-meteorological
environment
[AD-A076981] p0292 B80-20268

An operating and support cost model for avionics
automatic test equipment
[AD-A075556] p0292 B80-20269

Velocity profiles in a long inlet duct employing
a photon correlating laser velocimeter without
seeding
[AD-A079878] p0293 B80-20278

An experimental study of static thrust
augmentation using a 2-d variable ejector
[AD-A079857] p0294 B80-20279

The prediction of mass loaded natural frequencies
and forced response of complex
rib-stiffened structures
[AD-A079856] p0297 B80-20265

The graphical display of multi-dimensional
aerodynamic flow field data
[AD-A080089] p0301 B80-21288

Model order reduction using the balanced state
representation theory, application and
a critical analysis of software implementation
[AD-A080371] p0309 B80-21356

A statistical model for multipath reflection
experiments of antennas mounted on aircraft
[AD-A080369] p0311 B80-21649

Evaluation of an improved parachute test data
acquisition system
[AD-A080240] p0345 B80-22260

Using vertical gust alleviation to improve the
target tracking capability of the control
configured TP-16
[AD-A080520] p0354 B80-22360

The application of output predictive digital
control to wing flutter suppression and
terrain following problems
[AD-A080419] p0354 B80-22361

Analysis of the effects of higher order control
systems on aircraft approach and landing
longitudinal handling qualities
[AD-A080518] p0354 B80-22362

Initial development for a flutter analysis of
damaged T-38 horizontal stabilators using
MARTAN
[AD-A082168] p021 B80-24325

Development and application of a subsonic
triangular vortex panel
[AD-A065855] p0581 B80-29256

Production oriented maintenance organization: A
critical analysis of sortie-generation
capability and maintenance quality
[AD-A087095] p0595 B80-31323

An analysis of the future requirements for
materials handling equipment in the military
airlift command
[AD-A087094] p0600 B80-31370

Some civil engineering and management aspects of
conversion from JP-4 to JP-8 fuel by the
United States Air Force in the continental
United States
[AD-A087221] p0607 B80-31626

Cooperative estimation of targets by multiple
aircraft
[AD-A085799] p0631 B80-32366

Criteria for applying commercial aircraft
warranties in USAF aircraft purchases
[AD-A080774] p0640 B80-33343

Validation of the operating and support cost
model for avionics automatic test equipment
(OSCATE)
[AD-A080725] p0649 B80-33419

AIR FORCE LOGISTICS COMMAND, WRIGHT-PATTERSON AFB, OHIO.
Opportunistic Maintenance Engine Simulation
model: ONES 2
[AD-A072516] p0040 B80-11088

AIR FORCE MATERIALS LAB., WRIGHT-PATTERSON AFB, OHIO.
Vibrations of a compressor blade with slip at
the root
[AD-A076371] p0183 B80-17263

An analysis of residual stresses and
displacements due to radial expansion of
fastener holes
[AD-A076370] p0252 B80-19569

Viscoelastic damping in USAF applications
[AD-A082384] p0428 B80-24953

Soft body impact of cantilever beams
[AD-A081175] p0421 B80-24325
Application of the factor interpolation method in flight vehicle landing gear analytic design
Flow-around small-aspect-ratio delta wing with vortex "bursting"
Gas curtains in gas turbine engines
Study of homogeneous combustion characteristics of temperature field nonuniformity with primary zone parameter variation
Selection of optimal parameters of heat-pipe heat exchanger for a gas turbine engine
Systematization of simple detail parts of gas turbine engine
Dynamics of fuel cell combustion in turbulent flow
Study of mass exchange between primary zone and secondary air jets in gas turbine engine combustion chambers
Aerodynamic efficiency of gas turbine intake duct
On the influence of short shroud plastic on turbine stage operation
Study of combined operation of self-evacuating vortex tube with diffuser
Study of size distribution of oil drops formed in GTE oil
Nonstationarity of heat transfer in axial turbine blading during engine startup
Pneumatic distributor for turbojet engine control system
Statistical diagnostics aircraft engine
Optimal thermo-synthetic design of gas turbine engines using element prototypes
Selection of geometric parameters and location of some flap on swept wing root profile from tunnel test data
Analytic formulas for wing profile aerodynamic characteristics in incompressible flow
On a smooth approximation method and its application to mathematical description of wing aerodynamic characteristics
Influence of wing deformation on trailing-edge flap deflections
Harmonic osculations of annular wing in steady ideal fluid flow
Overall aerodynamic characteristics of caret and delta wings at supersonic speeds
Selecting the passenger airplane fuselage

ALLIS-CHALMERS ENG. CO., MILWAUKEE, WIS.
Subynchronous instability of a geared centrifugal compressor of overhung design

ALLIS-CHALMERS ENG. CO., MILWAUKEE, WIS.

ANALYTICAL SCIENCES CORP., READING, MASS.
F-3A multiprocessor computer system real-time environmental simulator
A plan for developing and validating a gas system design trade-off methodology
Validation of high angle-of-attack analysis methods

ANALYTICAL MECHANICS ASSOCIATES, INC., HUNTINGTON VIEW, CALIF.
Model development for automatic guidance of a VTOL aircraft to a small aviation ship
Concepts for generating optimal vertical flight profile
Navigation systems for approach and landing of VTOL aircraft
Analytical methodology for determination of helicopter TPS precision approach requirements

ANALYTICAL METHODS, INC., BELLBROOK, OHIO
Prediction of aerodynamic characteristics of fighter mass at high lift

APPLIED PHYSICS LAB., JOHN Hopkins univ., LAFAYETTE, MD.
Moving target detector data utilization investigation

ARDEC, INC., RAWAH, N.J.
Design study of prestressed rotor spar concept

AIRC Research Corp., ANNAPOLIS, MD.
Avionic master plan data base mechanization architecture
The application of reliability improvement warranty to dynamic systems
The application of failure data summary, Volume 1: Appendices
A mechanism architecture for enhancement of avionics planning data base
Standard avionics packaging, mounting, and cooling baseline study
An evaluation of aircraft separation assurance concepts using airline flight simulators, Volume 1: Study report
An evaluation of aircraft separation assurance concepts using airline flight simulators, Volume 2: Appendices
PAA communications cost model program documentation: Revised

AIRC Research Corp., SANTA ANA, CALIF.
Avionics installation (AVSALL) cost model for user equipment of NAVSTAR global positioning system

ARIZONA STATE univ., TEMPE.
Wake characteristics of buildings in disturbed boundary layers

Flight through thunderstorms outflows
[AD-A087237] p0010 N00-11648

Comparison of wind tunnel and flight test measurements of static aerodynamic loading of a captive store
[AD-A087237] p0010 N00-11648

A&AQ, INC., ARNOI AIR FORCE STATION, TENN.

Evaluation of an ejection powered engine simulator at transonic Mach numbers
[AD-A075157] p0041 N00-11095

A-10 carriage loads test
[AD-A073942] p0079 N00-10303

Evaluation of airjet distortion generator used to produce steady-state, total-pressure distortion at the inlet of a General Electric F100-GE-100 turbofan engine
[AD-A072743] p0081 N00-13049

Application of the multistage axial-flow compressor time-dependent mathematical modeling technique to the TF41-A-1 modified block 76 compressor
[AD-A074478] p0121 N00-14135

Evaluation of the aerodynamic characteristics of a 1/20-scale A-10 model at Mach numbers from 0.30 to 0.75
[AD-A077140] p0178 N00-15105

Separated and nonseparated turbulent flows about axisymmetric nozzle afterbodies. Part 1: Detailed surface measurements
[AD-A077140] p0178 N00-17032

Experiments for the reduction of wind tunnel wall interference by adaptive-wall technology
[AD-A076555] p0181 N00-17088

An investigation of F-16 nozzle afterbody forces at transonic Mach numbers with emphasis on support system interference
[AD-A078693] p0225 N00-18046

Wind tunnel test to investigate aerodynamic hysteresis phenomena of the F-4 and F-11 aircraft models
[AD-A077195] p0233 N00-19040

Laser-Bass flow-field diagnostics of two large hypersonic test facilities
[AD-A076209] p0266 N00-19135

Aircraft motion sensitivity to dynamic stability derivatives
[AD-A079421] p0297 N00-20203

Thermal response and reusability tests of advanced flexible Reusable Surface Insulation (RSI) and ceramic title RSI samples at surface temperatures to 1200 degrees F
[AD-A077887] p0295 N00-20399

Interference of multiple bodies in the flow field of the F-1C aircraft in the transonic speed range
[AD-A080479] p0948 N00-27296

Flow quality for Turbine Engine Loads Simulator (TELS) facility
[AD-A080865] p0551 N00-29338

Development of a noninterference technique for measurement of turbine engine compressor blade stresses
[AD-A086170] p0552 N00-29300

Store separation testing techniques at the Arnold Engineering Development Center.
Volume 4: Description of dynamic drop store separation testing
[AD-A080790] p0599 N00-31358

Measurement of turbine engine transient airflow in ground test facilities
[AD-A080866] p0698 N00-33410

ASSOCIATION AERONAUTIQUE ET ASTRONOMIQUE DE FRANCE, PARIS.

The development of active control and its application to flutter suppressors
[AAAF-WT-79-02] p0082 N00-13056

FOR UNMANNED VEHICLE SYSTEMS, DAYTON, OHIO.

Proceedings of the Association for Unmanned Vehicle Systems '79: 6th Annual Convention
[AD-A077877] p0258 N00-2018

ATMOSPHERIC SCIENCE ASSOCIATES, BEDFORD, MASS.

Airflow effects on icing measurements by a wing tip-mounted ice detector on the NC130 research airplane
[AD-A077019] p0289 N00-2024

Two-dimensional wind-tunnel tests of a NASA supercritical airfoil with various high-lift systems. Volume 2: Test data.

[NASA-CR-2215] p0067 880-12055

[NASA-CR-195693] p0080 880-13045

BOEING CO., WASHINGTON D.C.

Jet engine decontaminable test cell exhaust systems: Coanda/refraction noise suppression concept, advanced development.

[AD-A0765253] p0101 880-17090

Jet engine class C test cell exhaust system phase: Coanda/refraction noise suppression concept-advanced development.

[AD-A0752777] p0182 880-17091

Evaluation of the crack growth concept for monitoring aircraft flaw growth potential, Volume 2.

[AD-A076420] p0186 880-17509

[AD-A076421] p0186 880-17510

Developing, mechanizing and testing of a digital active flap suppression system for a modified E-2C wind-tunnel model.

[NASA-CR-159155] p0252 880-19566

BOEING COMMERCIAL AIRCRAFT CO., RENTON, WASH.

Development and flight evaluation of automatic flaps laws with improved touchdown dispersion.

[IAIA PAPER 80-0109] p0510 880-45545

BOEING COMMERCIAL AIRCRAFT CO., SEATTLE, WASH.

Analysis of transonic flow about harmonically oscillating airfoils and wings.

[IAIA PAPER 80-0109] p0097 880-18367

Upper surface blowing noise of the NASA-Ames quiet short-haul research aircraft.

[IAIA PAPER 80-1064] p0341 880-36002

Fault-tolerant system optimization.

[IAIA PAPER 80-40312] p0810 880-40312

A multi-grid code for 3-D transonic potential flow about axisymmetric inlets at angle of attack.

[IAIA PAPER 80-1365] p0506 880-80101

Economic study of multipurpose advanced high-speed transport configurations.

[NASA-CR-159126] p0223 880-11986

An investigation of several factors involved in a finite difference procedure for analyzing the transonic flow about harmonically oscillating airfoils and wings.

[NASA-CR-159103] p0114 880-14056

Linear system analysis program, 1224 (QB).

Volume 1: Engineering and usage.

A user's guide for A340: A program using a finite difference method to analyze transonic flow over oscillating airfoils.

The 737 graphite composite flight spoiler flight service evaluation.

[NASA-CR-159094] p0182 880-17147

Preliminary design of graphite composite wing panels for commercial transport aircraft.

[NASA-CR-159100] p0183 880-17148

Improved tire/wheel concept.

[NASA-CAS-1LAB-11695-2] p0230 880-18402

The role of computational aerodynamics in airplane configuration development.

[NASA-CB-156956] p0300 880-21260

Airplane wing leading edge variable camber flap.

[NASA-CB-2215] p0067 880-25154

A general panel method for the analysis and design of arbitrary configurations in incompressible flows.

[NASA-CR-10779] p0041 880-24268

Further investigation of a finite difference procedure for analyzing the transonic flow about harmonically oscillating airfoils and wings.

[NASA-CR-159095] p0041 880-24271

Airframe fuels outlook.

[NASA-CB-159096] p0547 880-29304

Analytical investigation of fan tone noise due to ingested atmospheric turbulence.

Large scale wind tunnel investigation for future modifications to the quiet short-haul research aircraft.

Aircraft noise prediction program validation.

BOERING COMPUTER SERVICES, INC., SEATTLE, WASH.

Analysis of transonic flow about harmonically oscillating airfoils and wings.

[IAIA PAPER 80-0109] p0097 880-18367

BOERING MILITARY AIRCRAFT DEVELOPMENT, SEATTLE, WASH.

Flight control and configuration design considerations for highly maneuverable aircraft.

[AD-A075103] p0140 880-15150

Forsulation of the three dimensional transonic unsteady aerodynamic problem.

[AD-A075403] p0175 880-17034

Easy ACLS dynamic analysis, volume 2. Part 2:

Compost computer program.

[AD-A078903] p0237 880-19076

Easy-ACLS dynamic analysis, User's manual.

[AD-A078750] p0359 880-23258

Design options study.

[AD-A082941] p0419 880-24309

High-freecing-point fuel studies.

[NASA-CB-3079] p0011 880-21260

Cast Aluminum Structures Technology (CAST).

Phase 5: Structural test and evaluation. Part 1:

Preliminary scale test.

[NASA-CB-3079] p0011 880-21260

BOERING VERTOL CO., PHILADELPHIA, PA.

Helicopter canopy internal reflection investigation.

[AD-A073084] p0076 880-12687

Analysis, design and configuration with theory of rotor lift-limit test data.

[NASA-CR-159139] p0078 880-13028

Ch-46 composite rotor blade flight test system survey data.

Volume 3: Flap forward rotor blade chord, torsion and absolute loads.

Synthesis of rotor test data for real-time simulation.

[NASA-CR-152311] p0222 880-18029

Computational aerodynamic design tools and investigation of the oscillator; and flight failure detection, isolation and indication in flight flutter testing.

Parameters affecting aircraft performance on runways in bad condition.

The tornado all-weather high-speed low-level system.

High angle of attack characteristics of different fighter configurations.

Excitation and analysis technique for flight flutter tests.

Stability and control aspects of the CFD-1046 system interactive aided design system for aircraft dynamic control problems.

Interactive design system for aircraft dynamic control problems.

Dynamic environments and test simulation for qualification of aircraft equipment and external stores.

A theoretical investigation of the shock location on an axisymmetric body and on a two-dimensional airfoil in transonic flows affected by axial pressure gradients and shifts in pressure level.

The effect of local parameters on gas turbine emissions.

Trajectories optimization in hypersonic flight.

Computer simulation model of the logistic support system for electrical engineering test equipment.
A perturbation theory of two-dimensional Composite components under impact load and Airbreathing propulsion component technologies Besearch developments for aircraft safety The significance of wing end configuration in Advanced transport aircraft technology A summary of lighter-than-air technology Backup flight control system for a highly maneuverable remotely piloted research vehicle The development and use of large-motion simulator systems in aeronautical research and development Formulation of coupled rotor/fuselage equations of motion Experimental and computational study of transonic flow about swept wings Constrained optimum trajectories with specified range Large scale model tests of a new technology Application of parametric weight and cost estimating relationships to future transport aircraft Toward new small transports for commuter airlines Small Transport Aircraft Technology An experimental and numerical investigation of a three-dimensional shock wave separated turbulent boundary layer Noise generation by a lifting wing/flap combination at Reynolds numbers to 2.8 x 10 to the 6th Transonic swept-wing analysis using asympototic and other numerical methods Measurements of control stability characteristics of a wind-tunnel model using a transfer function method
The effect of viewing time, time to encounter, and practice on perception of aircraft separation on a cockpit display of traffic information

[V/STOL/SB avionics system flight-test data on a DC-9 airplane helicopter]

Assessment of non-precision approach

[The Quiet short-haul Research Aircraft (QSAR)]

Experimental studies of scale effects on oscillating airfoils at transonic speeds
Friction characteristic of steel skids equipped with skews on a lakebed surface

Landing approach airframe noise measurements and analysis

Large-test windings for a large hypersonic aircraft

Wind-tunnel/flight correlation study of aerodynamic characteristics of a large flexible supersonic cruise airplane (X-70-1). 1: A comparison between characteristics predicted from wind-tunnel measurements and those measured in flight

Air speed and attitude probe

Airframe identification experience

Improved Sun-sensing guidance system for high-altitude aircraft

Apparatus for damping operator induced oscillations of a controlled system

Electrical servo actuator bracket

Design of a nonlinear adaptive filter for suppression of shuttle pilot-induced oscillation tendencies

Wind tunnel investigation of an all flush orifice air data system for a large supersonic aircraft

Precision controllability of the TF-17 airplane

Portable device for use in starting air-start-units for aircraft and having cable lead testing capability

System for use in conducting wake investigation for a wing in flight

Flight research techniques utilizing remotely piloted research vehicles

Calculation of the transient motion of elastic airfoils forced by control surface motion and gusts

Use of nose cap and fuselage pressure orifices for determination of air data for space shuttle orbiter below supersonic speeds

Multiple pure tone elimination strut assembly

The unique air research aircraft

Friction characteristic of steel skids equipped with skews on a lakebed surface

Landing approach airframe noise measurements and analysis

Large-test windings for a large hypersonic aircraft

Wind-tunnel/flight correlation study of aerodynamic characteristics of a large flexible supersonic cruise airplane (X-70-1). 1: A comparison between characteristics predicted from wind-tunnel measurements and those measured in flight

Design approaches for GPS receiver antennas [NASA CR-3270] p0040 B80-212308

TELEFREX TECHNOLOGICAL UNIV., COOKEVILLE.

Use of wave functions in airflow design optimization [AD-A072636] p0025 B80-10139

Identification of noise sources in PC centrifugal fan rotors [NASA CR-3271] p0229 B80-180395

TELEFREX UNIV., KNOXVILLE.

Prediction and assessment of turbulent aerodynamic trailing edge flows [NASA CR-3272] p0452 A80-41599

Atmospheric turbulence simulation techniques with application to flight [NASA CR-3273] p0559 B80-29961

TELEFREX UNIV., TULLahoma.

Pilot-aircraft system response to wind shear [NASA CR-3274] p0516 A80-45866

Boundary layer swirling flows in gas turbine combustors [NASA CR-3275] p0593 B80-30697

TELEFREX UNIV., Space INST., TULLahoma.

Flight through thunderstorms outflow fronts [NASA CR-3276] p0110 A80-11040

Aerodynamic analysis of a supersonic cascade vibrating in a complex mode [NASA CR-3277] p0514 A80-45841

The analysis of wing-body combinations at moderate angles of attack [NASA CR-3278] p0036 B80-11040

Current research on aviation weather [NASA CR-3279] p0125 B80-14651

Atmospheric turbulence simulation techniques with application to flight analysis [NASA CR-3280] p0612 B80-32025

TEXAS A&M UNIV., College Station.

A navigation algorithm for single channel low-cost GPS receiver [NASA CR-3281] p0284 A80-32457

TEXAS A&M UNIV., EL TELEFREX.

Cross flow fan experiment development and finite element modeling [NASA CR-3282] p0284 A80-32457

TEXAS A&M UNIV., Austin.

The influence of ballistic damage on the aeroelastic characteristics of lifting surfaces [AD-A082536] p0443 A80-25232

Detailed design, fabrication and testing of an experimental prototype camphorated pulsed alternator [NCIA-15213] p0556 B80-29595

A modeling technique for design and simulation of hydrostatic journal bearings [NASA CR-3283] p0653 B80-33745

TEXTEPL BELL HELICOPTER, Fort Worth, Tex.

Analysis of low-speed helicopter flight test data [AD-A074141] p0130 B80-15079

Investigation of the crash-impact characteristics of advanced airframe structures [NASA CR-3284] p0479 B80-17067

Improved maneuver criteria evaluation program [NASA CR-3285] p0480 B80-22310

AN-15 high-survivable transmission system [NASA CR-3286] p0348 B80-22311

Rotorcraft flight simulation, computer program [NASA CR-3287] p0348 B80-22312

Conceptual design of a helicopter composite trim tab boom [NASA CR-3289] p0612 B80-32025

TELEFREX TECHNOLOGICAL LABS., BUFFALO, N. T.

Development of lightweight transformers for airborne high power supplies [NASA CR-3290] p0165 B80-17366

THORSEN-CSP, Anceille (France).

SITFAC-C TRA: Application of SITFAC-C in the terminal area, during landing and ground taxiing [NASA CR-3291] p0493 B80-27338
CORPORATE SOURCE INDEX

UNIVERSITY OF SOUTHERN CALIFORNIA

[NASA-CH-159217] p0310 N80-21454
Carbon fiber plume sampling for large scale fire

tests at Drygap Proving Ground

[NASA-CH-159215] p0651 N80-33942
THE EQUIPMENT LABS., CLEVELAND, OHIO.
PHS components for advanced gas turbine engine
components (.AD-A075287)

TUEBERGERS, (WEST GERMANY).
Phenomenology of lighting/Aircraft interaction
p0609 N80-31746

UNITEH DEV. OF TECHNOLOGY, ENSCHEDE (NETHERLANDS).
Methods for strap-down attitude estimation
and navigation with accelerometers
p0112 N80-14034

ULTRASISTERS, INC., IRVINE, CALIF.
Fluid contamination of aircraft-cabin air and
breathing oxygen
p0543 N80-29268

UNION CARBIDE CORP., TOHANADA, N.T.
Economics of hydrogen production and
liquefaction updated to 1980
[NASA-CH-159163] p0043 N80-11238

UNITED AIR LINES, CHICAGO, ILL.
Current jet fuel trends
p0547 N80-29303

UNITED KINGDOM ATOMIC ENERGY AUTHORITY, ABBINGDON
(ENGLAND).
Models for assessing hazards due to lightning
p0599 N80-31748
The coupling of lightning fields into aircraft
and cables
p0609 N80-31751

UNITED KINGDOM ATOMIC ENERGY AUTHORITY,
SPRINGFIELDS (ENGLAND).
The fabrication and properties of HFPE silicon
carbon fiber in relation to gas turbine components
p0553 N80-29352

UNITED TECHNOLOGIES CORP., EAST HARTFORD, CONN.
External fuel vaporization study, phase 1
[NASA-CH-159580] p0437 N80-25453

UNITED TECHNOLOGIES CORP., WINDSOR Locks, CONN.
Influence of noise reduction on weight and cost
of general aviation propellers
[AD-A006210]

UNITED TECHNOLOGIES RESEARCH CENTER, EAST HARTFORD, CONN.
A comparison of the pitching and plunging
response of an oscillating airfoil
[NASA-CH-3172] p0034 N80-11030

Noise of a model helicopter rotor due to
ingestion of turbulence
[NASA-CH-3213] p0038 N80-11067

Experimental investigation of compressor rotor
wakes
[AD-A0081911] p0426 N80-28582

Analytical design and evaluation of an active
control system for a helicopter rotor
reduction and gust response alleviation
[NASA-CH-152377] p0536 N80-28369

Experimental study of turbine fuel thermal
stability in an aircraft fuel system simulator
p0550 N80-29325

Autoignition characteristics of aircraft-type
fuels
[NASA-CH-159866] p0592 N80-30535

Influence of mistuning on blade torsional flutter
[NASA-CH-165137] p0599 N80-31351

UNIVERSAL SYSTEMS, INC., ARLINGTON, VA.
.025m detonation wave range
[NASA-CH-159192] p0121 N80-14131

UNIVERSITE DES SCIENCES ET TECHNIQUES DE LILLE
(FRANCE).
Initial study of the response of an aircraft to
lateral gusts
[AAAP-BT-79-03]

UNIVERSITE LAVAL (QUEBEC).
Combustion modelling within gas turbine engines,
some applications and limitations
p0498 N80-27394

UNIVERSITY OF SOUTHERN CALIFORNIA, LOS ANGELES.
Transonic swept-wing analysis using asymptotic
and other numerical methods
[ATIA PAPER 80-0342] p0156 N80-22751

Analysis of transonic swept wings using
asymptotic and other numerical methods
station of a remotely piloted helicopter system
A qualitative discussion of dynamic stall
Unsteady flows associated with helicopter rotors
Application of identical aerodynamic functions
Wichita State Univ., Kansas.
Wind tunnel force and pressure tests of a 21% thick general aviation airfoil with 20% slotted and 10% slot-lip spoiler
Wichita State Univ., Kansas.
Structures in aeronautical phraseology: From English to Spanish
Wichita State Univ., Kansas.
Unsteady flow and dynamic response analyses for helicopter rotor blades
Woods Hole Oceanographic Institution, Massachusetts.
Air deployment of satellite-tracked drifters
Wright State Univ., Dayton, Ohio.
An approximate analysis of wing unsteady aerodynamics
Wyle Labs., Inc., El Segundo, California.
Correction procedures for aircraft noise data. Volume 1: Pseudotones
Wyle Labs., Inc., El Segundo, California.
Correction procedures for aircraft noise data. Volume 2: Background noise considerations
Wyle Labs., Inc., El Segundo, California.
Correction procedures for aircraft noise data. Volume 4: Tone perception
Wyle Labs., Inc., Hampton, Virginia.
A feasibility study of a 3-D finite element solution scheme for aeroengine duct acoustics
Xylex Information Corp., Canoga Park, California.
Aircraft Maintenance Effectiveness Simulation (AMES) model
Yang (Hai C.) and Associates, New York, N.Y.
Nondestructive evaluation of airport pavements. Volume 1: Program references
Yang (Hai C.) and Associates, New York, N.Y.
Nondestructive evaluation of airport pavements. Volume 3: Operation manual for HLGPAV program at TCC
C-57

Listings in this index are arranged alphabetically by contract number. Under each contract number, the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order with the NASA accession numbers appearing first. Preceding the accession number is the page number where the citation may be found.

### Typical Report/Accession Number Index Listing

Listings in this index are arranged alphabetically by report number. The issue and page number indicate the actual Supplement and page where the citation may be located. The accession number denotes the number by which the citation is identified. An asterisk (*) indicates that the item is a NASA report. A pound sign (£) indicates that the item is available on microfiche.

This bibliography is a cumulative index to the abstracts contained in NASA SP-7037(119) through NASA SP-7037(130) of Aeronautical Engineering: A Continuing Bibliography. NASA SP-7037 and its supplements have been compiled through the cooperative efforts of the American Institute of Aeronautics and Astronautics (AIAA) and the National Aeronautics and Space Administration (NASA). This cumulative index includes subject, personal author, corporate source, contract, and report number indexes.
PUBLIC COLLECTIONS OF NASA DOCUMENTS

DOMESTIC

NASA distributes its technical documents and bibliographic tools to eleven special libraries located in the organizations listed below. Each library is prepared to furnish the public such services as reference assistance, interlibrary loans, photocopy service, and assistance in obtaining copies of NASA documents for retention.

CALIFORNIA
University of California, Berkeley

COLORADO
University of Colorado, Boulder

DISTRICT OF COLUMBIA
Library of Congress

GEORGIA
Georgia Institute of Technology, Atlanta

ILLINOIS
The John Crerar Library, Chicago

MASSACHUSETTS
Massachusetts Institute of Technology, Cambridge

MISSOURI
Linda Hall Library, Kansas City

NEW YORK
Columbia University, New York

OKLAHOMA
University of Oklahoma, Bizzell Library

PENNSYLVANIA
Carnegie Library of Pittsburgh

WASHINGTON
University of Washington, Seattle

NASA publications (those indicated by an "*", following the accession number) are also received by the following public and free libraries:

CALIFORNIA
Los Angeles Public Library
San Diego Public Library

COLORADO
Denver Public Library

CONNECTICUT
Hartford Public Library

MARYLAND
Enoch Pratt Free Library, Baltimore

MASSACHUSETTS
Boston Public Library

MICHIGAN
Detroit Public Library

MINNESOTA
Minneapolis Public Library and Information Center

NEW JERSEY
Trenton Public Library

NEW YORK
Brooklyn Public Library
Buffalo and Erie County Public Library
Rochester Public Library
New York Public Library

OHIO
Akron Public Library
Cincinnati and Hamilton County Public Library
Cleveland Public Library
Dayton Public Library
Toledo and Lucas County Public Library

TEXAS
Dallas Public Library
Fort Worth Public Library

WASHINGTON
Seattle Public Library

WISCONSIN
Milwaukee Public Library

An extensive collection of NASA and NASA-sponsored documents and aerospace publications available to the public for reference purposes is maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, New York 10019.

EUROPEAN

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. By virtue of arrangements other than with NASA, the British Library Lending Division also has available many of the non-NASA publications cited in STAR. European requesters may purchase facsimile copy of microfiche of NASA and NASA-sponsored documents, those identified by both the symbols "#" and "*", from: ESA - Information Retrieval Service, European Space Agency, 8-10 rue Mario-Nikis, 75738 Paris CEDEX 15, France.
National Aeronautics and Space Administration  
WASHINGTON, D.C. 20546  

SPECIAL FOURTH CLASS MAIL  
Book  

NASA SP-7037  
AERONAUTICAL ENGINEERING  
Engineering, design, and operation of aircraft and aircraft components  

NASA SP-7039  
NASA PATENT ABSTRACTS BIBLIOGRAPHY  
NASA patents and applications for patent  

NASA SP-7041  
EARTH RESOURCES  
Remote sensing of earth resources by aircraft and spacecraft  

NASA SP-7043  
ENERGY  
Energy sources, solar energy, energy conversion, transport, and storage  

NASA SP-7500  
MANAGEMENT  
Program, contract, and personnel management, and management techniques  

Details on the availability of these publications may be obtained from:  
SCIENTIFIC AND TECHNICAL INFORMATION BRANCH  
NATIONAL AERONAUTICS AND SPACE ADMINISTRATION  
Washington, D.C. 20546
