This bibliography was prepared by the NASA Scientific and Technical Information Facility operated for the National Aeronautics and Space Administration by PRC Data Services Company.
SPECIAL NOTICE

The abstract sections of the monthly supplements of *Aeronautical Engineering* can be bound separately. Individual abstracts can be located readily by means of the page numbers given at each entry, e.g., p0627 N80-32324. To assist the user in binding Supplements SP-7037 (119) through SP-7037 (130), a title page is included in the back of this Cumulative Index.
A CUMULATIVE INDEX

TO

AERONAUTICAL ENGINEERING

A Special Bibliography

This Cumulative Index supersedes the indexes contained in supplements SP-7037(119) through SP-7037(130).
WHAT THIS CUMULATIVE INDEX IS

This publication is a cumulative index to the abstracts contained in NASA SP-7037(119) through NASA SP-7037(130) of Aeronautical Engineering: A Continuing Bibliography. NASA SP-7037 and its supplements have been compiled through the cooperative efforts of the American Institute of Aeronautics and Astronautics (AIAA) and the National Aeronautics and Space Administration (NASA). Entries prepared by the two contributing organizations are identified as follows:

1. NASA entries by their STAR accession numbers (N80-10000 series).
2. AIAA entries by their IAA accession numbers (A80-10000 series).

HOW THIS CUMULATIVE INDEX IS ORGANIZED

This Cumulative Index includes a subject index, a personal author index, a corporate source index, a contract number index, and a report/accession number index.

HOW TO USE THE SUBJECT INDEX

Two types of cross-references appear in the subject index:

1. Use (U) references indicate that the subject term is not "postable," i.e., not a valid term, and the following term or terms are used instead. For example:

   AIRCRAFT PROTUBERANCES
   U PROTUBERANCES
   FLIGHT PERFORMANCE
   U FLIGHT CHARACTERISTICS

2. Narrower Term (NT) references refer the user to more specific headings in the same subject area, under which additional material on the subject may be found. For example:

   FLOW RESISTANCE
   NT AERODYNAMIC DRAG
   NT FRICTION DRAG
   NT SUPersonIC DRAG

In addition, a searcher may use the title or title and title extension in the index to narrow further his quest for particular items. This is because subject terms readily include more than one class of document. For example:

   AIRLINE OPERATIONS
   All-weather operations, including
   pilot role, instrument landing
   systems and guidance aids.
   Airport congestion as constraint on
   air travel, considering runway
   capacity and adjusted demand.

illustrates a case where two references on different topics are listed under the same subject term.
HOW TO USE THE PERSONAL AUTHOR INDEX

All personal authors used in the abstract-section citations in the individual Supplements appear in the index. Differences in transliteration schemes may require multiple searching of the index for variants of an author's name. For example:

EMELIANOV, M. D.
and
YEMELYANOV, M. D.

HOW TO USE THE CORPORATE SOURCE INDEX

The corporate source index entries are abridged versions of the corporate sources used in the abstract-section citations in the individual Supplements. The corporate source supplementary (organizational component) does not appear in the index. For example:

BOEING CO., SEATTLE, WASH. MILITARY AIRCRAFT SYSTEMS DIV.

BOEING CO., SEATTLE, WASH.

HOW TO USE THE CONTRACT NUMBER INDEX

All contract numbers that are identified in the abstract-section citations in the individual Supplements appear in this index. Changes by agencies in the style in which contract numbers are presented may require multiple searching for variants. For example:

AF 33(615)-71-C-1758
F33615-71-C-1758

HOW TO USE THE REPORT/ACCESSION NUMBER INDEX

All report numbers that have been assigned by the corporate source, monitoring agency or cataloging activity appear in this index. Variations in initial cataloging may result in different report number series. For example:

TP-924
ONERA-TP-924

IDENTIFICATION OF DESIRED SUPPLEMENT

The abstract and descriptive cataloging for any accession number selected from the indexes may be found in the appropriate Supplement. The page-number range of each Supplement appears on the inside front cover of this index. Once the range of page numbers containing the selected accession number is located in the second column, the desired Supplement number will be found in the first column. For example:

Page 331 will be found in Supplement 125.

AVAILABILITY OF DOCUMENTS

Information concerning the availability of documents announced in the Aeronautical Engineering supplements is found in the Introduction to the most currently issued monthly supplement.

**A**

- **A-6 AIRCRAFT**
  - Development of the A-6/circulation control wing flight demonstrator configuration
  - [NASA-Paper 80-0087] p0035 B80-22365

- **A-7 AIRCRAFT**
  - The A-7 head-up display reliability program
  - [NASA-Paper 80-0088] p0251 B80-19539

- **A-10 AIRCRAFT**
  - Practical method of fatigue crack growth analysis for damage tolerance assessment of aluminum structure in fighter type aircraft
    - [AIAA-Paper 80-0087] p0095 B80-19346
  - Development and flight test of a two-place night/adverse weather A-10 for the close-air support and battlefield attack mission
    - [AIAA-Paper 791060] p0194 B80-26632
  - Night/adverse weather A-10 evaluator program
    - [AIAA-Paper 791061] p0195 B80-19543

- **A-100 AIRCRAFT**
  - 10-carriage loads test
    - [NASA-Paper 80-0082] p0079 B80-13034

- **A-1000 AIRCRAFT**
  - Positional error analysis, A-10 aircraft on three-axis ground mount
    - [NASA-Paper 80-0083] p0083 B80-13336

- **A-101 AIRCRAFT**
  - Evaluation of the aerodynamic characteristics of a 1/20-scale A-10 model at Mach numbers from 0.30 to 0.75
    - [NASA-Paper 80-0084] p0127 B80-15055

- **A-102 AIRCRAFT**
  - The A-10 and design-to-cost: How well did it work?
    - [NASA-Paper 80-10503] p0137 B80-17055

- **A-103 AIRCRAFT**
  - Avionic interface data summation: A-10a, B-4, B-4B, B-4G, B-17, B-111, B-111B, B-112, B-112B
    - [NASA-Paper 80-10504] p0261 B80-19105

- **A-104 AIRCRAFT**
  - A statistical model for multipath reflection effects of antennas mounted on aircraft
    - [NASA-Paper 80-10505] p0311 B80-21609

- **A-105 AIRCRAFT**
  - Night/adverse weather A-10 evaluator program (A-10B)
    - [NASA-Paper 80-10506] p0394 B80-31307

- **A-1000 AIRCRAFT**
  - Electros beam and diffusion welding as an economic procedure for building Airbus-1300 type aircraft
    - [NASA-Paper 80-0081] p0061 B80-16970

- **A-1000 AIRCRAFT**
  - Failure and damage tolerance - A concept applied to the A-300
    - [NASA-Paper 80-0082] p0407 B80-39580

**Subject Index**

- Status and prospects of the Airbus family program
  - [NASA-Paper 80-0083] p0522 B80-46296

- In-flight handling qualities investigation of Airbus A-300 DCL. Configurations on landing approach using the DVL-130 320 variable stability aircraft
  - [NASA-Paper 80-0084] p0394 B80-22319

- Value analysis for the aircraft Airbus
  - [NASA-Paper 80-0085] p0484 B80-27212

- ADOPT APPARATUS
  - Emergency in-flight egress opening for general aviation aircraft
    - [NASA-Paper 80-0086] p0303 B80-21293

- ABRASION RESISTANCE
  - Development of improved abrasion resistant compressor gas path seal
    - [NASA-Paper 80-0087] p0046 B80-11474

- ADVANCED EQUIPMENT
  - Bifilar analysis study, volume 1
    - [NASA-Paper 80-0088] p0602 B80-31382

- ADVANCED NATIVE INDEX
  - Suppression of self-oscillations in combustion chambers by means of resonance sound absorbers
    - [NASA-Paper 80-0089] p0326 B80-34400

- ABSORPTION COEFFICIENT
  - Moisture absorption of polyester-E glass composites
    - [NASA-Paper 80-0090] p0381 B80-37171

- AC GENERATORS
  - High power density superconducting generator
    - [NASA-Paper 80-0091] p0371 B80-48219

- ADVANCED LIFE TESTS
  - Program for the development of a superconducting generator, phase 2 and 3
    - [NASA-Paper 80-0092] p0303 B80-10439

- ADVANCED STRUCTURE
  - Detailed design, fabrication and testing of an engineering prototype compensated pulsed alternator
    - [NASA-Paper 80-0093] p0566 B80-29595

- ACCELERATED LIFE TESTS
  - Evaluation of the accelerators for fuel and water for first tests for the NACA-15213
    - [NASA-Paper 80-0094] p0566 B80-29595

- ACCELERATION
  - Statistical review of counting accelerometers data for Navy and marine fleet aircraft
    - [NASA-Paper 80-0095] p0348 B80-22308

- ACCELERATION (PHYSICS)
  - By angular acceleration
    - [NASA-Paper 80-0096] p0348 B80-22308

- ACCELERATION (AERONAUTICAL)
  - By angular acceleration
    - [NASA-Paper 80-0097] p0348 B80-22308
The effects of motion and g-seat cues on pilot simulator performance of three piloting tasks
[BASA-TP-1601] p0129 B80-15069

Azimuth observability enhancement during INS in-flight alignment
[TAR-362] p0630 B80-32360

ACCELERATION PROTECTION
A new approach to active control of rotorcraft vibration
[AIAA 80-1778] p0511 B80-45556

ACCELERATION TOLERANCE
Ejection seat for high G escape
[AD-A072044] p0037 B80-11054

ACCELEROMETERS
Methods for strap-down attitude estimation and navigation with accelerometers
[AD-A075226] p0112 B80-19038

The accelerometer methods of obtaining aircraft performance from flight test data dynamic performance testing
[AD-A075326] p0178 B80-17066

Inertially augmented approach couplers
[AD-A080589] p0290 B80-20248

ACCELERABILITY
Field impact evaluation report on the Electronic Tabular Display Subsystem (ETDS)
[AD-A076846] p0185 B80-17357

ACCEPTANCE
U ACCEPTABILITY
ACCIDENT INVESTIGATION
MT AIRCRAFT ACCIDENT INVESTIGATION
Aircraft accident report: Tharman L. Hanson, Cessna Citation 501, N15BY, near Canton, Ohio, August 2, 1979
[STSB-IAR-80-2] p0415 B80-28729

Equations for determining aircraft motions for accident data
[HASA-TR-78609] p0432 B80-25306

Critical interfaces between environment and organisms in class A mishaps: A retrospective analysis
[AD-A087431] p0600 B80-31371

ACCIDENT PREVENTION
Investigation can prevent aircraft accidents
[AD-A082973] p0026 B80-29773

A systems approach to airport safety
[SAE PAPER 800750] p0576 B80-49698

Collision avoidance systems. A bibliography with abstracts
[STIS/PS-75/0960/9] p0169 B80-16053

Lateral colliision protection concepts
[AD-A081120] p0416 B80-28284

ACCIDENTS
MT AIRCRAFT ACCIDENTS
MT BLED-AIRCRAFT COLLISIONS
ACCOMMODATION
Airports, railway stations and people --- passenger accommodations
[AD-A087341] p0600 B80-31371

ACCUTION
U DEPOSITION
ACCUmULATIONS
Evaluation of coatings for wear and corrosion - Protection in air (flight) accumulators --- for Navy aircraft carriers
[AD-A081120] p0662 B80-17327

ACOUSTIC ATTENUATION
MT SHOCK WAVE ATTENUATION
How effective can sound barriers be --- for aircraft noise reduction
[AD-A081120] p0047 B80-13182

Comparison of inlet suppressor data with approximate theory based on cutoff ratio
[AIAA PAPER 80-0100] p0108 B80-20964

Aircraft noise assessment
[AD-A081120] p0154 B80-22147

Determining the optimum fan silencer design of aircraft engines
[AD-A081120] p0326 B80-34936

Experimental investigation of sound absorption in a flow-carrying channel with a sound-absorbing lining
[AD-A081120] p0326 B80-34939

Models studies of acoustic resonators
[AD-A081120] p0327 B80-34940

Sound transmission into a laminated composite cylindrical shell
[AD-A081120] p0620 B80-52724

A method for predicting the noise levels of coaxial sets with inverted velocity profiles
[HASA-CH-3176] p0045 B80-11868

The acoustic characteristics of the BAE 1.5m wind tunnel --- modifications and test results
[BARA-TB-79002] p0082 B80-13062

Evaluation of approximate methods for the prediction of noise shielding by aircraft components
[HASA-TP-1004] p0137 B80-15129

The reduction of dynamic interference by sound-absorbing walls in the BAE 3 foot wind tunnel
[ARC-R-P-3837] p0182 B80-17093

The use of sound absorbing walls to reduce dynamic interference in wind tunnels
[ARC-R-P-3831] p0192 B80-7096

Experimental evaluation of a spinning-mode acoustic-treatment design concept for aircraft inlets --- suppression of TF-102 engine fan noise
[HASA-TP-1163] p0306 B80-21323

Atmospheric turbulence effects on aircraft noise propagation
[HASA-CR-15325] p0580 B80-29095

Exploratory studies on the design of acoustic splitters for wind tunnels
[BARA-TB-1929] p0607 B80-31417

ACOUSTIC COMBUSTION
U COMBUSTION STABILITY
ACOUSTIC DUCTS
Impact of flight effects on multitube suppressor design
[AD-A081120] p0339 B80-35979

Rigorous solutions for sound radiation from circular ducts with hyperbolic horns or infinite plane baffle
[AD-A081120] p0390 B80-78905

Noise suppression in jet inlets
[AD-A085403] p0551 B80-29334

A feasibility study of a 3-D finite element solution scheme for aerocoustic duct acoustics
[AD-A081120] p0655 B80-34216

ACOUSTIC EMISSION
On the acoustic power emitted by helicopter rotor blades at low tip speeds
[AD-A081120] p0012 B80-12375

A review of propeller discrete frequency noise prediction technology with emphasis on two current methods for time domain calculations
[HASA-CH-47656] p0567 B80-47656

Studies of the acoustic transmission characteristics of coaxial nozzles with inverted velocity profiles, volume 1 --- jet engine noise radiation through coaxial exhaust nozzles
[HASA-CH-196968] p0065 B80-11870

Ultrasound and acoustic emission detection of fatigue damage --- aluminum alloy 7075-T651
[AD-A079277] p0310 B80-21510

Experimental study of airfoil trailing edge noise: Instrumentation, methodology and initial results
[HASA-CH-163007] p0365 B80-32268

ACOUSTIC EXCITATION
A study of production and stimulated emission of sound by vortex flows
[AD-A081120] p0161 B80-23903

The nonlinear impedance of perforated walls in the case of two-tone tone excitation
[AD-A081120] p0274 B80-30810

A model for broadband jet noise amplification
[AD-A081120] p0392 B80-38535

Visualization of the acoustic excitation of a subsónico jet
[AD-A081120] p0620 B80-52717

Damping problems in acoustic fatigue
[AD-A081120] p0253 B80-19580

ACOUSTIC FATIGUE
Acoustic fatigue failure of inlet guide vanes due to intake flow distortions in an aircraft engine
[HASA-CH-16096] p0399 B80-16099

Sonic fatigue design data for bonded aluminum aircraft structures
[AIAA PAPER 80-1004] p0094 B80-18304

Selected topics from the structural acoustics program for the B-1 aircraft
[AD-A081120] p0184 B80-17299
A-5

SUBJECT INDEX

Fatigue life prediction of a bonded splice joint
[ATAA PAPER 80-0305]
p0094 A00-18306
Technology of adhesive bonding of aircraft parts
/2nd revised and enlarged edition/ --- Russian book
p0157 A00-23066
Honeycomb sandwich joints for primary structure
--- of aircraft
[ATAA 80-0780]
p0333 A00-35070
A long European experience - The adhesive bonding of metals
[AAAF PAPER WT 79-27]
p0379 A00-36662
30 years experience with primary adhesive bonded structures
p0569 A00-48077
Primary Adhesively Bonded Structure Technology
(PABST). General material property data --- bonding airframes
[AD-A077891]
p0248 N00-19268
Primary Adhesively Bonded Structure Technology
(PABST). Design handbook for adhesive bonding
[AD-A082070]
p0418 N00-24299
The significance of peel stresses in cyclic debonding
p0634 N00-24823
Primary Adhesive Bonded Structure Technology
(PABST). Phase 3: Tooling, fabrication and quality assurance
[AD-A077711]
p0238 N00-19060
The diffusion of water vapour in humid air into the adhesive layer of bonded metal joints
[HAP-LIB-TRANS-2030]
p0539 N00-28497
A design study in crack patching
[ARL-TR-975-376]
p0654 N00-33798
ADHESIVES
The fabrication and testing of prototype WH-1 aircraft windshields manufactured with a sheet interlayer
[AD-A077328]
p0699 N00-27486
Primary Adhesively Bonded Structure Technology
(PABST). General material property data --- bonding airframes
[AD-A077891]
p0240 N00-19268
Primary Adhesively Bonded Structure Technology
(PABST). Phase 3: Tooling, fabrication and quality assurance
[AD-A077828]
p0699 N00-27486
Chemical characterization and quality control for an adhesive
[AD-A087739]
p0607 N00-33558
ADMINISTRATION
U MANAGEMENT
ADVANCED AIRCRAFT COMMAND POST
U 9-4A AIRCRAFT
ADVANCED TECHNOLOGY LIGHT TWIN AIRCRAFT
U AIR CRAFT
AERIAL EXPLOSIONS
Airblast vulnerability envelopes for supersonic aerospace vehicles
p0028 N00-10201
AERIAL RECONNAISSANCE
U.S. Navy studies of surveillance airships
p0406 A00-39316
Concept of a research aircraft for remote sensing, using an integrated sensor/data system
[DO LR PAPER 00-05] p0523 A00-46300
AERIAL BORDERS
Instantary air forces on wings with an oscillating rudder
[DO LR PAPER 00-03] p0522 A00-46263
Flow design with ACT in the presence of strakes
p0147 N00-15167
AEREOACOUSTICS
On the acoustic power emitted by helicopter rotor blades at low tip speeds
p0012 A00-12375
Experimental studies of helicopter flight conditions and noise
p0049 A00-13699
Base pressure fluctuations --- aircraft acoustic loads
p0505 A00-14510
Parameter selection for aerodynamic design of propellers
p0503 A00-15083
Estimation of noise source strengths in a gas turbine combustor
[ATAA PAPER 80-0034] p0092 A00-18285
Assessment at full scale of exhaust nozzle-to-wing size on STOL-OTW acoustic characteristics
p0107 A00-20952
Acoustic considerations of flight effects on jet noise suppression techniques
[ATAA PAPER 80-0164] p0108 A00-20965
Near wake structure and unsteady pressures at trailing edges of airfoils --- an aeroacoustic sound generators
p0161 A00-23900
A ray-theory approach for high-frequency engine-intake noise
Effects of temperature on surface noise
p0216 A00-28419
The problems of aeroacoustic interactions //Review/
[AD-A083228]
p0260 A00-29070
p0273 A00-30066
Aeroacoustics --- Russian book
p0326 A00-38366
Determining the optimal fan silenced design of aircraft engines
p0326 A00-38396
Acoustic effects on the flow and the noise spectrum of supersonic jets
p0326 A00-38402
Aerodynamic characteristics of jets issuing from ring-and-needle nozzles
p0327 A00-38404
Helicopter rotor thickness noise
[ATAA PAPER 80-1012] p0339 A00-35970
Model rotor low frequency broadband noise at moderate tip speeds
[ATAA PAPER 80-1013] p0339 A00-35971
Impact of flight effects on multistage suppressor design
[ATAA PAPER 80-1029] p0339 A00-35979
Acoustic characteristics of the external upper surface blowing propulsive-lift configuration
[ATAA PAPER 80-1063] p0341 A00-36001
Upper surface blowing noise of the NASA-Amen quiet short-haul research aircraft
[ATAA PAPER 80-1064] p0341 A00-36002
An overview of NASA's propeller and rotor noise research
[ATAA PAPER 80-0992] p0373 A00-36325
Diffraction of sound by aircraft wing tip vortices
[ATAA PAPER 80-0975] p0392 A00-36531
The development and operation of the DMC anechoic test facility
[ATAA PAPER 80-0982] p0392 A00-38633
A model for broadband jet noise amplification
[ATAA PAPER 80-1004] p0392 A00-38635
Nonlinear due to tip vortex formation on lifting rotors
[ATAA PAPER 80-1010] p0393 A00-38636
Nonlinear propagation of broadband jet noise
[ATAA PAPER 80-1029] p0394 A00-38645
Fan noise source location from field measurements
[ATAA PAPER 80-1054] p0396 A00-38648
Graded reflection effects on aircraft slant power noise
[ATAA PAPER 80-1059] p0396 A00-38650
On the unsteady, wake induced lift on a slotted airfoil
p0516 A00-43940
Aerodynamic characterization of free jets
p0666 N00-12025
Experimental and numerical results on a sheet layer excited by a sound pulse
[ATAA PAPER 80-0962] p0075 N00-12821
Experimental study of acoustic loads on an upper-surface-blown STOL airplane configuration --- Langley full-scale wind tunnel tests
[ATAA-TN-1077] p0085 N00-13879
Assessment at full scale of exhaust nozzle to wing size on STOL-OTW acoustic characteristics
[ATAA-TN-7927] p0085 N00-13881
Acoustically swept rotor --- helicopter noise reduction
[ASA-CAST-MRR-11106-1] p0118 N00-14107
Applications of diffraction theory to aeroacoustics --- aircraft noise
p0125 N00-14870
Experimental and numerical results of sound scattering by a body --- interaction of aerodynamic noise and fuselage
p0125 N00-14873
Influence of the leading-edge planform on the aerodynamic characteristics of an aircraft by an influence coefficient method

Influence of losses on the evaluation of the aerodynamic characteristics of an aircraft in flight conditions

A practical guide to aircraft performance and design --- Book

Computational and simplified analytical treatment of transonic wing-fuselage-pylon-store interactions

The structure-free thrust-doubling of insect-like aircraft: the possibility of using insect-flight
dynamics for a large technical scale

Increasing aircraft efficiency through linear flow control

A system for measuring and recording wind-tunnel balance data

Towed slender wings at small angles of attack

One-dimensional aerodynamic control calculations for cooled gas turbines

Advances and new requirements, test techniques, and development methods for high fidelity flight simulation of commercial transports

The influence of wing, fuselage and tail design on rotational flow aerodynamics data obtained beyond maximum lift with general aviation configurations

Accurate determination of the aerodynamic performance of the main drive fan of the MB 5 metre pressurised low speed wind tunnel

Selected wind tunnel testing developments at the Boeing Aerodynamics Laboratory

Application of aerodynamic characteristics of a wing with two-element trailing flap to the design of aircraft in forward flight

A second generation instrumentation system for measuring cross-coupling derivatives --- from wind tunnel data

Aerofoils down to critical Reynolds numbers and the performance of remotely controlled gliders

Mini-RFP research

Aerodynamics and dynamics of aircraft flight --- Russian book

The effect of the law of control on the dynamics of the longitudinal motion of an aeroplane with a variable-geometry wing

The delta wing in oscillatory gusts

Aerodynamic characteristics of a concave large-aspect-ratio trapezoidal profile in a monochromatic free-shear layer at low Mach number in the case of specular-reflection interactions

Wings for human-powered flight

The 15 wing development program

Conically cambered delta wings in supersonic flow

Unsteady aerodynamic measurement techniques for turbomachinery research

Processing and analysis of the data from a supersonic gas turbine engine

On approximating the aerodynamic characteristics of a wing with two-element trailing flap

The IMP Lille rotation balance and associated experimental techniques --- for wind tunnel and control losses simulation during high angle of attack flight

Synthesis of test results on the Concorde at high angle of attack

The method of matched asymptotic expansions in the hydrodynamics of wings --- Russian book

Computational methods for the design of adaptive airfoils and wings

Aerodynamic assessment of methods to simulate flight inflow characteristics during static testing

Propulsive aerodynamics of an advanced nozzle/forward swept wing aircraft configuration

Application of aerodynamic characteristics of certain circular plano-convergent configurations to hybrid airships

Contract research on aerodynamic problems of turbomachinery vanes

Experiments with transonic profiles

Aircraft configuration optimization for ground attack mission

Zero-length, slotted-lip inlet for subsonic military aircraft

Theoretical and experimental determination of the aerodynamic characteristics of a helicopter rotor

A-7

AERODYNAMIC CHARACTERISTICS CONTD
Experimental investigation of a V/STOL equivalent system variational technique for smoothing flight-test Determination of instrumentation errors from Stability of asymmetric equilibrium flight states Stall/spin flight results for the remotely piloted Aerodynamic investigations of a bypass turbofan stage Experimental and theoretical investigation of the lifting properties of a wing of deformable profile Approximate determination of helicopter vertical rate of climb Analytic design of turbine blade airfoil The camard configuration and the conventional airplane --- aerodynamic characteristics of wings The aerodynamic interaction between a close-coupled camard and a sweepback wing in transonic flows The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The aerodynamic interaction between a close-coupled camard and a sweepback wing in transonic flows The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The aerodynamic interaction between a close-coupled camard and a sweepback wing in transonic flows The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The aerodynamic interaction between a close-coupled camard and a sweepback wing in transonic flows The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The aerodynamic interaction between a close-coupled camard and a sweepback wing in transonic flows The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The aerodynamic interaction between a close-coupled camard and a sweepback wing in transonic flows The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The aerodynamic interaction between a close-coupled camard and a sweepback wing in transonic flows The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The aerodynamic interaction between a close-coupled camard and a sweepback wing in transonic flows The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings The canard configuration and the conventional airplane --- aerodynamic characteristics of wings
Analytic formulas for wing profile aerodynamic characteristics in incompressible flow

On a smooth approximation method and its application to mathematical description of wing aerodynamic characteristics

Wind-tunnel/flight correlation study of aerodynamic characteristics of a large flexible supersonic cruise airplane (X-70-1). 1: Wind-tunnel tests of a 0.03-scale model at Mach numbers from 0.6 to 2.53

Aerodynamic characteristics of a hypersonic research airplane concept having a 70° swept double-delta wing at Mach numbers from 0.80 to 1.20, with summary of data from 0.20 to 6.0 — Langley 84303B/Atlantic wind tunnel

Summary of low-speed longitudinal aerodynamics of two powered close-coupled wing-canard fighter configurations — conducted in Langley C/STOL tunnel

Aerodynamic characteristics of a supersonic cruise aircraft research model with the engines suspended above the wing

Aerodynamic preliminary analysis system, Part 1: Theory — linearized potential theory

Effects of fuselage forebody geometry on low-speed lateral-directional characteristics of twin-tail fighter model at high angles of attack

Effects of relaxed static longitudinal stability on a single-stage-to-orbit vehicle design

The quasi-vortex-lattice method for wings with edge vortex separation

Theoretical study of aerodynamic characteristics of wings having vortex flow

Quiet short-haul research aircraft familiarization document — STOL

Applications of modern hydrodynamics to aeronautics, Part 1: Fundamental concepts and the most important theorems. Part 2: Applications

Quiet flight: Short-haul Experimental Configuration (QCSE). Aerodynamic and aeromechanical performance of a 50.8 cm (20 inch) diameter 1.34 PR variable pitch fan with core flow

Aerodynamic characteristics of controls — conferences

In-flight measured characteristics of combined flap-spoiler direct lift controls

Aerodynamic characteristics of moving trailing-edge controls at subsonic and transonic speeds

Unsteady aerodynamics of two-dimensional spoilers at low speeds

Aerodynamic interaction on a close-coupled canard wing configuration

On the effects of gaps on control surface characteristics

Investigation of ground effects on large and small scale models of a three fan V/STOL aircraft configuration

Wind-tunnel/flight correlation study of aerodynamic characteristics of a large flexible supersonic cruise airplane (X-70-1) 2: Extrapolation of wind-tunnel data to full-scale conditions

AERODYNAMIC CHARACTERISTICS CONT'D

The aerodynamics of a jet in a crossflow

Summary of theoretical and experimental investigations of vortex lift at high angles of attack

Parameter identification of flexible flight vehicles assuming a low-reduced-frequency aerodynamic representation

Comparison of analytical and flight test identified aerodynamic derivatives for a tandem-rotor transport helicopter

Initial study of the response of an aircraft to lateral gusts

An experimental investigation of two large annular and mechanical design

The aerodynamics of a jet in a crossflow

Comparison of analytical and flight test identified aerodynamic derivatives for a tandem-rotor transport helicopter

Effects of relaxed static longitudinal stability on a single-stage-to-orbit vehicle design

Effects of relaxed static longitudinal stability on a single-stage-to-orbit vehicle design

AERODYNAMIC CHORDS

Methodology
(AD-A086327)

Wind tunnel measurements of lateral aerodynamic
derivatives using a new oscillatory rig, with
results and comparisons for the Gnat aircraft
(ARC-R/EN-38074)

Aerodynamic characteristics of three helicopter
rotor airfoil sections at Reynolds number from
model scale to full scale at Mach numbers from
0.35 to 0.90 — conducted in Langley 6 by 28
inch transonic tunnel
([NASA-TP-1701])

Low speed aerodynamic characteristics of three
helicopter rotor airfoil sections on the
M-V22/9101180— conduction in Langley 6 by 28
inch transonic tunnel
([NASA-TP-1701])

Handling qualities of large flexible aircraft
([NASA-CR-163593])

Low-speed aerodynamic characteristics of Invite
swept wing configurations with several
deflected leading edge concepts
([NASA-TP-80140])

AERODYNAMIC CHORDS

0 AIRFOIL PROFILES

Estimation of the accuracy of dynamic
flight-determined coefficients
([AIRS PAPER 80-0171])

Calculation of the coefficient of secondary losses
in an axial compressor stage
([NASA-TP-16190])

The determination of aerodynamic coefficients of a
straight cascade whose blades have a small
curvature and are very much inclined against the
cascade axis
([NASA-TP-16190])

Note on the yawing moment due to side slip for
swpt-wing bodies
([NASA-CR-163593])

Aerodynamic coefficients in generalized unsteady
airflow
([NASA-TP-16190])

The effect of the axial velocity density ratio on the
aerodynamic coefficients of compressor
cascades
([NASA-TP-16190])

A determination of aerodynamic coefficients of Invite
swept-back wing configurations with several
deflected leading edge concepts
([NASA-CR-163593])

Selection of geometric parameters and location of
nose flap on swept wing root profile from tunnel
data, 2
([NASA-CR-163593])

Prediction of drag coefficients of a supersonic
V/STOL configuration with various store
arrangements
([NASA-TP-16190])

A comparison of calculated and experimental lift
and pressure distributions for several
helicopter rotor sections
([NASA-TP-16190])

Comparison of aerodynamic coefficients obtained
from theoretical calculations wind tunnel tests
and flight tests data reduction for the alpha
jet aircraft
([NASA-TP-16190])

Aerodynamic identification experience
([NASA-TP-16190])

Rotocraft identification experience
([NASA-TP-16190])

Identification experience in extreme flight regimes
([NASA-TP-16190])

Wind tunnel and free flight model identification
experience
([NASA-TP-16190])

Closed loop aspects of aircraft identification
([NASA-TP-16190])

Leeward flow over delta wings at supersonic speeds
([NASA-TP-16190])

Roll control of an attitude-controlled aerodynamic
vehicle which has strong roll-yaw coupling
([NASA-TP-16190])

Airfoils at sonic velocity —— Tricolor equation
([NASA-TP-16190])

Computation of spanwise distribution of circulation and lift coefficient for flapped
([NASA-TP-16190])
liquid or gas flows in the case of crisis of drag

Airfoil with minimum relaxation drag

The potential for development of high performance light aircraft

Wind tunnel and flight test drag comparisons for a guided projectile with cruciform tails

[IAIA 80-0426] p0202 B80-26968

Influence of the Emmanuel on the effective thrust of jet engine exhaust nozzles

Induced drag and lift-drag ratio of swept wings at supersonic speeds

Class of shockfree airfoils producing the same normal pressure

The determination of aerodynamic coefficients of a straight cascade whose blades have a small curvature and are very much inclined against the cascade axis

Reduction of aerodynamic drag of external spray booms and nozzles used on DC-6 aircraft

Recomendations for obtaining nozzle/afterbody drag data based on a comparison of wind tunnel and flight data

[IAIA PAPER 79-1169] p0391 B80-38347

The annular jet technique for nozzle/afterbody throat dependent drag testing

[IAIA PAPER 80-1163] p0399 B80-38945

Optimization of the relaxation drag of slender profile arrangements in steady subsonic flow. I - Single profile

Effect of propeller slipstream on the drag and performance of the engine cooling system for a general aviation twin-engine aircraft

[IAIA PAPER 80-1872] p0492 B80-43315

Some aspects of aircraft/engine interference for single-jet afterbodies and engine nozzles with particular consideration of boattail drag

[DGRL PAPER 80-032] p0522 B80-66284

Effect of several airflow/nozzle modifications on the drag of a variable-sweep bomber configuration - conducted in langley 16 foot transonic tunnel

[NASA-TN-00129] p0022 B80-10306

Prediction of drag coefficients of a supersonic V/STOL configuration with various store arrangements

[AD-A072999] p0070 B80-12085

The minimum induced drag of aerfoils

[NAACA-112] p0126 B80-15038

Undercarriage drag prediction methods

[ESDO-79015] p0232 B80-19028

Transonic data memorandum: A framework relating the drag-rise characteristics of侑ia wing/body combination to those of its basic aerfoil

[ESDO-78005] p0301 B80-21276

Transonic data memorandum: The lift achievable by aerfoils having a particular form of supercritical upper-surface pressure distribution that yields only small wave drag

[ESDO-78010] p0302 B80-21277

Computational models for the viscous/inviscid analysis of jet aircraft exhaust plumes --- predicting afterbody drag

Dynamic behavior of a beam drag-force anemometer

[NASA-TP-1667] p0426 B80-24595

The influence of ballistic damage on the aerelastic characteristics of lifting surfaces --- fighter aircraft

[AD-A082536] p0433 B80-25322

Feasibility study of applying laminar flow control to an LTA vehicle

[AD-A080146] p0629 B80-32351
### SUBJECT INDEX

Aero-optics overview --- laser applications  p0440 N80-25612
A proposal for aerodynamically actuated wall
streamlining subsonic wind tunnel walls  [AIAA-PAP-392]
  p0555 N80-29374
A simple method for converting frequency domain
aerodynamics to the time domain  [NASA-TR-81840]
  p0643 N80-33358
Special Course on Unsteady Aerodynamics
  [AGARD-R-679]
  p0643 N80-33363
Unsteady aerodynamics in turbomachinery
  p0643 N80-33369
Role of unsteady aerodynamics in aircraft response
  p0644 N80-33371
Nonstationary random response of structural
  systems to aerodynamic wind forces
  p0653 N80-33375

#### AERODYNAMIC HEAT TRANSFER

1. A study of nonadiabatic boundary-layer
   stabilization time in a cryogenic tunnel for
typical wing and fuselage models
   [AIAA PAPER 80-0407]
   p0198 A80-26932
Heat transfer to a plane wall from a heated,
ventilated plane jet --- in lift devices for
STOL aircraft
  p0263 A80-29469

#### AERODYNAMIC HEATING

Thermodynamic analysis of structural concepts
for hypersonic cruise vehicles
  [AIAA PAPER 80-0407]
  p0162 A80-23950
Recent developments in aerothermodynamic test
  techniques at the AEDC von Karmen gas dynamics
  facility
  p0263 A80-29477
Effects of aerodynamic heating and TPS thermal
  performance uncertainties on the Shuttle Orbiter
  [NASA 79-10627]
  p0395 N80-39714
Hypersonic interference flow experiment design
  --- investigating aerodynamic heating and loads
  [AD-A076661]
  p0233 N80-19044
Investigation of numerical techniques for
  predicting aerodynamic heating to flight vehicles
  [AD-A076121]
  p0288 N80-20234
Numerical flow field program for aerodynamic
  heating analysis. Volume 1: Equations and results
  [AD-A081471]
  p0359 N80-23255
Numerical flow field program for aerodynamic
  heating analysis. Volume 2: User's manual
  [AD-A081472]
  p0360 N80-23260
Some aerodynamic considerations related to wind
  tunnel model surface definition
  [NASA-TR-81820]
  p0633 N80-32376

#### AERODYNAMIC INTERFERENCE

An experimental method for investigating the
  mutual aerodynamic interference of aircraft
  components at supersonic velocities
  p0056 A80-15476
Numerical simulation of the wind tunnel
  environment by a panel method
  [AIAA 80-06219]
  p0198 A80-26933
The simulation and modeling of jet plumes in wind
  tunnel facilities
  [AIAA 80-0630]
  p0199 A80-26941
Development of a metric half-span model for
  interference free testing
  [AIAA PAPER 80-0469]
  p0268 A80-29590
Expected improvements from wind tunnel model
  testing at high angle of attack
  [TOWMER, TP WILM, 1980-36]
  p0444 A80-09804
A theoretical method for the simulation of the
  separation behavior of external stores from a
  carrier --- fighter aircraft
  [DGLR PAPER 79-091]
  p0454 A80-41900
Calculation of the interaction between an exhaust
  jet and a high-lift wing
  p0525 A80-46682
Two dimensional aerodynamic interference effects
  on oscillating airfoils with flaps in ventilated
  subsonic wind tunnels --- computational fluid
  dynamics
  [AIAA-CR-3210]
  p0113 N80-18047
A perturbation theory of two-dimensional transonic
  wind tunnel wall interference
  [AIAA 80-17167]
  p0102 N80-17092
The reduction of dynamic interference by
  sound-absorbing walls in the BAE 3 foot wind
  tunnel

#### AERODYNAMIC LOADS

A perturbation theory of two-dimensional transonic
  wind tunnel wall interference
  [AIAA-CR-3210]
  p0113 N80-18047
A simple method for converting frequency domain
  aerodynamics to the time domain
  [NASA-TR-81840]
  p0643 N80-33358
Special Course on Unsteady Aerodynamics
  [AGARD-R-679]
  p0643 N80-33363
Unsteady aerodynamics in turbomachinery
  p0643 N80-33369
Role of unsteady aerodynamics in aircraft response
  p0644 N80-33371
Nonstationary random response of structural
  systems to aerodynamic wind forces
  p0653 N80-33375

Extension of Prandtl's biplane theory to wing-tail
  combinations
  p0013 A80-12599
Base pressure fluctuations --- aircraft acoustic
  loads
  p0050 A80-14510
Influence of burnishing on the structure and
durability of elements operating under variable
  loads
  p0062 A80-17142
Propeller slipstream/wing interaction in the
  transonic regime
  [AIAA PAPER 80-0125]
  p0156 A80-22733
Structural design of transport airplanes for
transient environments
  p0213 A80-27698
A velocity potential panel method for the
  prediction of unsteady airloads on oscillating
  wings and bodies
  p0275 A80-30859
Development of a structural overload warning
  system for modern high performance aircraft
  p0300 A80-39974
Multicyclic control of a helicopter rotor
considering the influence of vibration, loads,
  and control action
  [AIAA 80-0673]
  p0330 A80-39998
Unsteady airloads on a harmonically pitching wing
  with external store
  [AIAA 80-0733]
  p0331 A80-35037
Unsteady aerodynamics of conventional and
  supercritical airfoils
  [AIAA 80-0734]
  p0331 A80-35038
Noise from a vibrating propeller
  [AIAA PAPER 80-1011]
  p0329 A80-35969
The effects of inhomogeneities in atmospheric
  turbulence on the dynamic response of an aircraft
  [AIAA 80-1619]
  p0518 A80-45904
Stationary air forces on wings with an
  oscillating c2bber
  [DGLR PAPER 80-031]
  p0522 A80-46283
Determination of loads applied to modern
  high-performance gliders
  p0618 A80-52194

### Effect of time dependent flight loads on JX0-7

#### Performance deterioration

[AIAA CR-155618]
  p0033 N80-10515
Improved methods for predicting spectrum loading
  effects, phase 1 report. Volume 2: Test data
  [AIAA 80-27387]
  p0039 N80-11070
Improved methods for predicting spectrum loading
  effects, phase 1 report, Volume 1: Results and
  discussion
  [AIAA 80-27386]
  p0039 N80-11071
Prediction of lateral aerodynamic loads on fighter
  aircraft at high angles of attack
  [AIAA 80-27493]
  p0399 N80-11073
Aeroelasticity from the viewpoint of the designer
  p0665 N80-12002

### Trestle wind tunnel study

[AIAA 80-07391]
  p0068 N80-12069
Experimental study of acoustic loads on an
  upper-surface-blow STOL airplane configuration
  --- Langley full-scale wind tunnel tests
  [NASA-TP-1577]
  p0085 N80-13879

Analysis of low-speed helicopter flight test data [AD-A074411] p0130 880-15079

Means for controlling aerodynamically induced twist --- equipment to control twisting of slender wings due to aerodynamic loads [NASA-CASP-LAB-12175-1] p0169 880-16055

Accuracy of hydrofoil loading predictions obtained from a lifting-surface computer program [AD-A074702] p0173 880-16233

Theoretical analysis of the transient response of a two-dimensional non-stationary buffet load model in aerelastic analysis --- using computer techniques [ARC-R-3833] p0187 880-17521

Hypersonic interference flow flight experiment design --- investigating aerodynamic heating and loads [AD-A078661] p0233 880-19044

Transonic unsteady loads on an energy efficient transport wing with oscillating control surfaces [NASA-TM-817866] p0287 880-20228

Aerodynamic characteristics and store weights of the 1/20-scale F-111 aircraft model with several external store loadings [AD-A078677] p0288 880-20235

The prediction of mass loaded natural frequencies and forced response of complex, rib-stiffened structures [AD-A079556] p0297 880-20625

Some calculated effects of non-uniform inflow on the radiated noise of a large wind tunnel [NASA-TR-81813] p0429 880-25104

Unsteady pressure measurements on oscillating delta wings in European wind tunnels [AD-A083248] p0478 880-26277

Development and application of a subsonic triangular vortex panel [AD-A085595] p0561 880-29256

Comparison of wind tunnel and flight test measurements of static aerodynamic loading of a captive store [AD-A097237] p0587 880-30281

A flight investigation of performance and loads for a helicopter with 10-64C main rotor blade sections [NASA-TR-81871] p0641 880-33348

Application of identical aerodynamic functions to loads calibrations of strain gage bridges on the DASA project aerospace Research Engine (WEB-1) [NASA-TR-81871] p0645 880-33372

Fatigue testing of vane blade [AHL/TPMC-REPORT-378] p0646 880-33399

AERODYNAMIC ROBOTS U STABILITY DERIVATIVES

AERODYNAMIC NOISE On the acoustic power emitted by helicopter rotor blades at low tip speeds [AD-A080-12375] p0042 880-12375

The effect of intermittent aircraft noise on sleep. III [AD-A080-15632] p0057 880-15632

Excess noise from supersonic underexpanded jets in flight, I [AIAPAPER 80-0349] p0162 880-23923

Minimizing axial flow fan noise [AHL/TPMC-REPORT-378] p0262 880-29143

Noise radiation from the side edges of flaps [AHL/TPMC-REPORT-378] p0272 880-30568

The modeling of the noise emitted by a profile in a turbulent flow by means of unsteady aerodynamic theories [AHL/TPMC-REPORT-378] p0273 880-30807

Some unique characteristics of supersonic cruise vehicles and their effect on airport community noise [AIAA PAPER 80-0859] p0319 880-32861

Model rotor low frequency broadband noise at moderate tip speeds [AIAA PAPER 80-1013] p0339 880-35971

Pressure fields generated by instability waves and coherent structures in an impinging jet [AIAA PAPER 80-0980] p0392 880-38632

Location and propagation of shock associated noise from supersonic jets [AIAA PAPER 80-0983] p0474 880-43599

Noise emitted by vortex tubes during their development [AHL/TPMC-REPORT-378] p0621 880-52913

Acoustically swept rotor --- helicopter noise reduction [NASA-CASP-M-1106-1] p0118 880-14107

Experimetal study of numerical results and sound scattering by a body --- interaction of aerodynamic noise and fuselage [AHL/TPMC-REPORT-378] p0125 880-14873

Research on helicopter rotor noise [AHL/TPMC-REPORT-378] p0187 880-17824

La Recherche Aerospatiale Bi-monthly Bulletin number 1979-1 [TSA-TF-599] p0315 880-22223

Noise generated aerodynamically [AHL/TPMC-REPORT-378] p0315 880-22224

Noise generated aerodynamically [AHL/TPMC-REPORT-378] p0316 880-22228

Noise generated by an eddy [AHL/TPMC-REPORT-378] p0316 880-22253

Experimental study of airfoil trailing edge noise: Instrumentation, methodology and initial results [NASA-CR-163007] p0345 880-22264

La Recherche Aerospatiale, Bimonthly Bulletin no. 1979-2 [TSA-TF-613] p0437 880-25485

Implications of requiring new production of older aircraft types (less than 75,000 pounds) to meet amended noise standards [AD-A080577] p0650 880-33967

Aircraft noise prediction program validation [NASA-CR-159333] p0655 880-36219

AERODYNAMIC STABILITY Measuring steady pressure on rotating compressor blades --- with semiconductor strain gages under gas turbine engine operating conditions [AHL/TPMC-REPORT-378] p0733 880-12630

Ermation of the flap-lag stability of rigid articulated rotor blades [AHL/TPMC-REPORT-378] p0054 880-15123

Formulation of coupled rotor/fuselage equations of motion [AHL/TPMC-REPORT-378] p0089 880-17717

Determination of the spin and recovery characteristics of a typical low-wing general aviation design [AIAA PAPER 80-0169] p0096 880-18351

Aircraft aerodynamics - Dynamics of longitudinal and lateral motion — Russian book [AIAA PAPER 81-18973] p0101 880-19374

Description of a new high-alpha, high-load, pitch-ruv dynamic stability test mechanism at ARDC [AIAA PAPER 80-0451] p0200 880-26952

Measurement of dynamic direct and cross-coupling derivatives due to oscillatory roll [AHL/TPMC-REPORT-378] p0200 880-26952
AERODYNAMICS

[NASA-TP-15869] p0078 880-13026

High angle of attack characteristics of different fighter configurations

[NASA-DPS-1483(0)] p0114 880-14058

Simulation study of stall/post-stall characteristics of a fighter airplane with relaxed longitudinal static stability — P-16

[NASA-TP-1538] p0201 880-14136

A parametric wing design study for a modern laminar flow wing

[NASA-TH-800158] p0127 880-15050

Dynamic stall on oscillating airfoils in oscillating free-streams

p0219 880-17983

Transient effects on a stalled airfoil in a pulsed flow: Comparison with results from a similar airflow undergoing horizontal shaking — during wind tunnel tests

Rotors in forward flight and dynamic stall

[NASA-AT-79-20] p0226 880-18050

Unsteady pressure measurements at stall and buffeting

[DPLR-DT-79-79-09] p0431 880-25300

Dynamic stall on advanced airfoil sections

[AD-A085809] p0546 880-29252

NASA general aviation stall/spin flight testing

p0640 880-33340

AERODYNAMICS

GENERAL

Solution of linear problems of flow about finite span wing

p0015 880-12912

Experimental study of confluence with separation on an afterbody of revolution

[OMEGA, TP NO. 1979-151] p0103 880-20088

The interaction of three shock waves

p0151 880-21313

Aircraft store separation motion prediction via grid data trajectories

[AD-A00-0462] p0201 880-26959

Computational aerodynamics on large computers

p0208 880-27415

Supersonic flow of gas over a slender wing of variable shape

p0277 880-31368

Modern fluid dynamics of subsonic and transonic flight

[AD-A00-0661] p0321 880-33274

Modern fluid dynamics of supersonic and hypersonic flight

[AD-A00-0662] p0321 880-33275

Wake vortex trajectories of low flying spray aircraft

p0327 880-34595

Direct and inverse problems of flow over a wing of finite span in the linear formulation

p0328 880-34712

Unsteady aerodynamics of conventional and supersonic airfoils

[AD-A00-0734] p0331 880-35038

Three-dimensional self-similar laminar boundary layer with longitudinal and transverse pressure gradient

p0376 880-36786

Unsteady wake behind a profile at variable incidence

[AD-A00-08-10] p0377 880-36841

Simulation - Acquisition - Treatment in the case of large motions — numerical filtering and processing programs for aircraft aerodynamic data

[AD-A00-08-16] p0377 880-36847

Experimental and numerical study of the flow in an air intake at high incidence

[AD-A00-08-19] p0378 880-36850

Test study of the vortex regime of highly sweptback wings by extrapolation of the Jones method

[AD-A00-08-25] p0378 880-36853

Aerodynamics of hypersonic flows with fluid injection — Russian book

p0385 880-37551

A nonlinear unsteady one-dimensional theory for wings in extreme ground effect

p0406 880-39527

Numerical solution of the Navier-Stokes equations for a family of three-dimensional corner geometries

p0451 880-15754

Comparison of methods for prediction of transition by stability analysis

[AD-A00-09-173] p0452 880-15888

Aerodynamics of wings in subsonic shear flow

[AD-A00-10-18] p0452 880-15812

Comparison of rotating stall in uniform and non-uniform flow

[AD-A00-17-18] p0456 880-20255

Investigations of an axial flow compressor with tandem cascades

[AD-A00-20-39] p0458 880-20217

Numerical simulation of three-dimensional boattail afterbody flow fields

[AD-A00-20-39] p0506 880-44132

Numerical methods of turbomachinery

p0509 880-44916

On the unsteady, wake induced lift on a slotted airfoil

p0514 880-45580

The linear and non-linear aerodynamics of three-surface aircraft concepts

[AD-A00-20-39] p0516 880-45788

Potential flow past a wing profile with a trailing edge of finite thickness

p0524 880-46627

Calculation of the flow in a supersonic air intake with allowance for the boundary layer on the fairings

p0525 880-46687

Modal analysis of aircraft structures

p0565 880-12001

Supersonic combustion, air dissociation through shock waves and aerodynamics of chemically reacting gases in a planar converging — diverging nozzles — supersonic combustion jet engines

[AD-A00-3135] p0701 880-12097

Inclusion of unsteady aerodynamics in longitudinal parameter optimization from flight data — use of vortices and mathematical models for parameterization from flight characteristics

[AD-A00-3136] p0800 880-12995

Modification of axial compressor streamline program for analysis of engine test data

[AD-A00-933] p0113 880-14051

Aeronautical Research Laboratories (ERRL) program for analysis of engine test data

[B80-70014] p0125 880-15026

Theoretical aerodynamic methods for active control devices

p0139 880-15150

A survey of experimental data on the aerodynamics of controls, in the light of future needs

p0139 880-15151

Fiscal year 1979 scientific and technical reports, articles, papers and presentations

[AD-A00-87250] p0174 880-17014

Workshop on Aircraft Surface Representation for Aerodynamic Computation

[AD-A00-87250] p0174 880-17014

Digital computer solution of aircraft longitudinal and lateral directional dynamic characteristics

[AD-A00-87250] p0236 880-19068

Application of the Estimation-Before-Modeling (EBM) system identification method to the high angle of attack/sideslip flight of the T-2C jet trainer aircraft. Volume 1: Executive summary

[AD-A00-87250] p0480 880-19073

Proceedings of a Workshop on V/STOL Aircraft aeroservoelasticity, volume 1

[AD-A00-97115] p0237 880-19074

FORTRAN program oblique in FL-format user's manual

[AD-A00-78009] p0257 880-19880

NASA authorization, 1982, program review, volume 2

[GPO-56-220] p0257 880-19988
AIB COOLING

Counter calculation of stationary temperature
fields in air-cooled turbine rotor blades

Computer calculation of stationary temperature
fields in cooled turbine discs

Applied technology in turbofan engines

Turbine blade cooling in aero engines - Some new
results, future trends, and research requirements

Optimization of turbine nozzle cooling by
combining impingement and film injection

High temperature radial turbine demonstration

One-dimensional aerodynamic control calculations
for cooled gas turbines

Computer-aided designing of temperature fields
for cooled gas-turbine blades

Study of cooling air inlet and exit geometries for
horizontally opposed piston aircraft engines

Design of air-cooled jet engine testing facilities

An investigation of ingress for a simple shrouded
rotating disc system with a radial outflow of
coolant

Investigation of the thermal state of
longitudinally cooled rotor blades

Investigation of some features of film cooling of
fixed and moving blades

On calculating gas turbine efficiency reduction
under the influence of air cooling

Influence of turbine first stator row cooling on
turbine inlet gas temperature

Temperature distribution planning for a cooled
gas-turbine blade using an electronic computer

Effects of design parameters on cooling air
requirement in a gas turbine combustor

Effects of a ceramic coating on metal temperatures
in a gas-turbine blade using an electronic computer

Algorithms for calculating turbine cooling flow and
the resulting decrease in turbine efficiency

Multidimensional, three-dimensional finite-element
analysis of an air-cooled turbine vane

Extension of similarity test procedures to cooled
gas turbine engine components with insulating ceramic coatings

AIB CARGO

Analog aircraft weight and balance computer

Computer simulation of an air cargo small package

Sorting system

Migration of cargo container utilization optimization

through modeling

The freight forwarder as an air carrier

Air deployment of satellite-tracked drifters

Multirole cargo aircraft options and configurations

--- economic analysis

Turbine technology options for an enhanced air cargo system

Cargo generation forecasting models

Airport activity statistics of certificated route

Design and analysis of C-47 external cargo

land system

Cargo Logistics Airfreight Systems Study (CLASS)

Volume 5: Summary

Air CONDITIONING

Reduced bleed air extraction for DC-10 cabin air
conditioning

[ASBE PAPER 79-1019] p0488 A80-41194

Air conditioning equipment

Chilled recirculation ECS for aircraft

[ASBE PAPER 79-1005] p0505 A80-15230

Aircraft humidification system development

[ASBE PAPER 79-1006-5] p0505 A80-15233

Investigation into the reliability of various
fuel, hydraulic and air conditioning components

in military aircraft

Air supply system approach for the Boeing Model

767 airplane

[ASBE PAPER 79-1006] p0194 A80-26631

The cabin air conditioning and temperature control
system for the Boeing 767 and 777 airplanes

[ASBE PAPER 80-1006-5] p0488 A80-43182

Optimizing the performance of the P-3C
environmental control system

[ASBE PAPER 80-1006-5] p0488 A80-31803

Heat reclamation from flight simulators

[AD-1001754] p0488 A80-26334

Heat reclamation from flight simulators

[AR-1007295] p0488 A80-31415

Air Cushion Landing Systems

Jeff (A) mixed-flow model fan performance
optimization

New remotely piloted vehicle launch and recovery
concepts: Computer program listings

New remotely piloted vehicle launch and recovery
concepts. Volume 1: Analysis, preliminary
design and performance/cost trade studies

Analysis of truck flutter in an air cushion
landing system

Easy ACLS dynamic analysis, volume 2. Part 2:
Component computer programs
flight tests --- Air Launched Cruise Missile [AIAA 80-0846] p0200 A80-26950
Spin profile tailoring for the improved 2.75-inch rocket [AIAA 80-1575] p0516 A80-45874
The analytical prediction of the separation behaviour of external stores after release from the carrier aircraft. Part 2: Applications [CSIR-RISC-79/103-PT-2] p0479 A80-26292

AIR NAVIGATION

NT ALL-WEATHER AIR NAVIGATION

NT AREA NAVIGATION

NT MAP-OF-THE-EARTH NAVIGATION

Theory of correlation-extrema navigation systems --- Russian book p0060 A80-16597
Performance evaluation of image correlation techniques --- for aircraft inertial navigation systems p0087 A80-17534
A strapdown inertial reference system for commercial airline use in navigation and flight control p0088 A80-17558

Navigation systems for modern aircraft

Outlook for Global Positioning System /GPS/ in civil aircraft operations p0190 A80-25158
The Federal Aviation Administration navigation program p0197 A80-26819
Tactical navigation system testing p0206 A80-27237
The laser gyro and its application to an helicopter navigation system p0214 A80-26221
The introduction of new systems in international civil aviation p0215 A80-28030
The new MLS landing system [SEE PAPER 79 1204] p0259 A80-29042
The NAVSTAB system [SEE PAPER 79 1206] p0259 A80-29044
Kalman-filter for terrain aided navigation p0267 A80-29667
Microwave landing system implementation. Volumes 1 & 2 --- Book [DO-166] p0278 A80-32001
Satellite navigation for helicopters p0279 A80-32203
Scalar update navigation algorithms for a low-cost NAVSTAR GPS receiver --- in general aviation aircraft avionics p0281 A80-32429

TIBS - An integrated CNI system in hardware feasibility demonstration --- Communication, Navigation and Identification p0283 A80-32451
Navigation for a group of aircraft /possibility of data processing and flight control procedures/ --- Russian book p0321 A80-33177
Satellite navigation in man's activity on sea and in air p0374 A80-36494
Theoretical fundamentals of long distance navigation systems. II p0375 A80-36770
Theoretical principles of long distance navigation. IV p0375 A80-36772
Microprocessors and small digital computers for avionics navigation systems p0396 A80-38841
All-weather landing --- of aircraft p0408 A80-39591
Air safety --- navigation system reliability p0408 A80-39591
Towards a reliable air traffic control p0408 A80-39592
The design of an air navigation services system p0446 A80-40977
Men, aircraft and systems of navigation --- an evaluation for the 1980s p0454 A80-41872

AIR POLLUTION

Automation of air navigation and air traffic control --- Russian book p0467 A80-43107
An extended Kalman filter for the estimation of transfer alignment errors to an airborne vehicle [AIAA 80-1720] p0510 A80-45522
New technology for the DOD-system and its reliability. I --- unidirectional beacon for civil aviation p0568 A80-47787
Navigation procedures to reduce aircraft noise p0570 A80-48138
ATC separation standards p0570 A80-48140
Man's role in the automation of aviation - All-weather landing systems p0570 A80-48142
Optimal algorithms and secondary processing devices --- for aircraft trajectory measurement p0573 A80-49635
The triple INS bonus --- C-5 aircraft conversion to inertial navigation p0580 A80-50200
A direction-cosine position coordinate system for air navigation p0621 A80-52993
Further analyses of position errors in navigation p0621 A80-52994
Modern Doppler navigation systems p0621 A80-52996
Airborne evaluation of the production AIR/NAV-133 Lorea-C navigator --- HH-3 and HH-52 aircraft flights [AD-1075444] p0177 A80-17057
Civil applications of global positioning systems p0304 A80-21305
Optimal estimation applied to redundant strapped down inertial sensors for navigation and flight control p0347 A80-22295
Measurement of interference-to-navigation/communication avionics from cable television (CATV) systems [AD-80041430] p0370 A80-23530
Wind factor simulation model: Model description [AD-8005733] p0350 A80-29274
Data analysis methodology for day/night inflight tactical navigation [AD-8002731] p0584 A80-29279
Checking of communications and radio navigation systems p0597 A80-31340

AIR POLLUTION

Pollutant emissions from 'partially' mixed turbulent flames p010 A80-11793
Limitation of the content of harmful substances in aircraft engine exhaust gases - New requirements on combustion chambers p0053 A80-15085
Circumpolar measurements of ozone, particles, and carbon monoxide from a commercial airliner p0152 A80-21460
Indoor and outdoor carbon monoxide measurements at an airport p0268 A80-29942
Production of synthetic hydrocarbon fuel, environmental aspects and comparison to hydrogen production from water p0382 A80-37332
Comparison of stack plume properties obtained from aircraft and spacecraft measurements p0402 A80-39217
Probe effects in gas turbine combustor emission measurements
AIB TBAFPIC COHTBOL CORD

Aircraft crash survival design guide. Volume 5: Aircraft postcrash survival [AD-A086790] AIBCBAFT p0601 88-31375
Medical and toxicological factors in aircraft accidents [AD-A087670] AIBCBAFT p0601 88-31376
A general statistical approach for using auxiliary information in the development of an impact acceleration injury prediction model [AD-A087810] AIBCBAFT p0601 88-31373
Aircraft crash survival design guide. Volume 5: Aircraft postcrash survival [AD-A087890] AIBCBAFT p0601 88-31374
Carbon fiber plaque sampling for large scale fiber tests at Pratt Proving Ground --- fiber release during aircraft fires [NASA-Ch-159215] AIBCBAFT p0851 88-33492
UHF coplanar-slot antenna for aircraft-to-satellite data communications [AD-A087586] AIBCBAFT p0855 88-11064
HF aircraft aerials - Some predicted and measured results [AD-A087810] AIBCBAFT p0568 88-15827
Some novel design techniques for conformal antennas [AD-A087810] AIBCBAFT p0568 88-15892
Controlling adaptive antenna arrays with the sample matrix inversion algorithm [AD-A087810] AIBCBAFT p0159 88-23263
Experimental procedure to determine limits of ILS equipment --- industrial, scientific and medical [AD-A087888] AIBCBAFT p0212 88-27760
Antennas for RFPs [AD-A087888] AIBCBAFT p0266 88-27666
Near-field pattern analysis of airborne antennas [AD-A087888] AIBCBAFT p0402 88-35169
Computation of aircraft sounding antenna radiation patterns at frequencies above 300 MHz - II [AD-A079309] AIBCBAFT p0568 88-47826
Hemispherical coverage of four-faced aircraft arrays [AD-A079309] AIBCBAFT p0804 88-11309

AIRCRAFT CARRIERS

Measurement of radiation patterns of aircraft antennas in non-steady flight [ML-TR-78018-0] p0160 88-17348
Comparison of measured data with V-77 propagation model predictions [AD-A0796502] p0228 88-18259
A standardization evaluation potential study of the cosmos multi-mode radar program [AD-A0796502] p0296 88-20459
A program for predicting antenna radiation patterns [AD-A0796502] p0304 88-21306
Research on near field pattern effects [AD-A079325] p0311 88-21640
Broadband electromagnetic sensors for aircraft lightning research --- electromagnetic effects of lightning on aircraft digital equipment [AD-A079325] p0312 88-21934
Transient corona effects on a wire overlaid on ground [AD-A079325] p0313 88-21942
A cavity-type broadband antenna with a steerable cardioid pattern [AD-A083226] p0845 88-26585
Radiation by sources on perfectly conducting convex cylinders with an impedance surface patch [AD-A084345] p0500 88-27573
Airborne antenna pattern code user's manual [AD-A086311] p0592 88-30591

AIRCRAFT APPROACHES

The collision avoidance problem requires a mix of partial solutions [AD-A079678] p0296 88-20459
A simulation model for aircraft sequencing in the near terminal area [AD-A079678] p0552 88-14839
Presentation of the STANAVSA trajectory system for landing trajectory system/ [AD-A079678] p0557 88-15631

ATC separation standards [AD-A079678] p0570 88-48490
Optimal flow control of air traffic [AD-A079678] p0291 88-20258
Opportunity analysis of potential advanced vortex systems separation standards [AD-A084179] p0361 88-23281
Procedural feasibility of reduced spacing under W2AS operation with applications to Atlanta and O'Hare [AD-A084180] p0362 88-23287
The integration of area navigation and the microwave landing system [AD-A084180] p0893 88-27337
Vortex advisory system. Volume 1: Effectiveness for selected airports [AD-A086582] p0598 88-30286
Development of advanced avionics systems applicable to terminal-configured vehicles [NASA-Ch-32600] p0601 88-31375
NASA aviation safety reporting system [NASA-Th-81197] p0629 88-32352

AIRCRAFT BASES

WING FLAPS

IN MILITARY AIR FACILITIES

AIRCRAFT BRAKES

Design and engineering of carbon brakes [AD-A08527] p0155 88-22271
Dynamics of the braking system of transport aircraft [AD-A08527] p0563 88-47368

AIRCRAFT CABINS

AIRCRAFT COMPARTMENTS

AIRCRAFT CARRIERS

Breaking V/STOL free of Catch 22 --- technology utilization and assessment [AD-A079678] p0193 88-26392
Factorial design of experiments in the test and evaluation of a complex control system --- for carrier-based aircraft landing [AD-A079678] p0206 88-27242
Aircraft Communication

Airplane skijump takeoff

CTOL/VSTOL comparison - A view from the deck

Impact of ramp launch technology on a Navy support aircraft

Compilation of data covering aircraft servicing facilities aboard aviation and amphibious aviation ships

Aircraft carrier exposure tests of aluminum alloys

Certification test procedures for aircraft approach control, AN/DSF-3, revision

A piloted simulator analysis of the carrier landing capability of the quiet short-haul research aircraft

Simulator results of an F-18A airplane utilizing an aileron-rudder interconnect during carrier approaches and landings

Aircraft Communication

Radar rerouting --- command and control center system for military air operations

AER Winrod system and operation --- for military aircraft communications

F-3A avionics, airborne early warning and control system for Europe

Stochastic response secondary surveillance radar

Radio and optical flight support systems and communications in civil aviation --- Russian book

A Doppler technique for measuring an aircraft's velocity from the spectrum of its HF transmissions

AEROP - Message and data switching systems for aeronautical operations

The effect of equatorial ionospheric disturbance on aircraft-to-satellite communications

Error rate performance of 8-ary DPSK systems in satellite/aircraft communications

Application of Metyag optical communications technology for aircraft to satellite links

Modelling of aircraft responses to EHP

Buoyant module VHF antenna design for submerged systems/aircraft communications

The NAVSTAR system

Communication to HFPS --- data link design for information transfer from ground terminal or other BP

Address Selective Surveillance Radar

An approach to DARS data link avionics for general aviation --- Discrete Address Beacon System

TISS - An integrated CHI system in hardware feasibility demonstration --- Communication, Navigation and Identification

Airborne integrated communications system

Advanced signal processing concepts for multi-function radio systems --- in airborne receiver design

Location of aircraft and individualization of flight parameters for the requirements of air traffic control - Systems currently in use and desirable evolutions

UNIGEN - Universal language of aviation

Automatic landing - Now a matter of course

Subject Index

Certification of avionics systems on the commercial airplanes of the 1980's

The Aircraft Reply and Interference Environment Simulator (ARIES). Volume 3: Programmer's manual

The role of HF in air-ground communications: An overview

HF communication to small low flying aircraft

Modern HF communications for low flying aircraft

Modeling and Simulation of Avionics Systems and Command, Control and Communications systems --- conferences

A JTIDS performance model for the E-3A sentry

Measurement of interference-to-navigation/communication avionics from cable television (CATV) systems

A dynamic evaluation of the Integrated Avionics Control System (IACS)

Audio systems characteristics and minimum performance standards. Aircraft microphones (except carbon), aircraft headsets and speakers and aircraft audio selector panels and amplifiers

Theoretical feasibility of digital communication over ocean areas by high frequency radio

The future cockpit - The safety factor

Ozone measurements in cabin air of Concorde

Large-scale and small-scale flammability tests for airplane cabin materials

The air conditioning and temperature control system for the Boeing 757 and 767 aircraft

Lexicon of aircraft transparency terms

Cabin hazards from a large external fuel fire

Full-scale flammability tests with experiments on animals in the Aeronautical Test Center of Toulouse

The interior design of wide bodied aircraft

Safety and comfort - The airliner cabin

Measurements of cabin and ambient ozone on board aircraft

Full-scale flammability tests with experiments on animals in the Aeronautical Test Center of Toulouse

Theoretical feasibility of digital communication over ocean areas by high frequency radio

Theoretical feasibility of digital communication over ocean areas by high frequency radio

The air conditioning and temperature control system for the Boeing 757 and 767 aircraft

Lexicon of aircraft transparency terms

Cabin hazards from a large external fuel fire

Ozone measurements in cabin air of Concorde

Large-scale and small-scale flammability tests for airplane cabin materials

The future cockpit - The safety factor

Fire-resistant materials for aircraft passenger seat construction

Simultaneous cabin and ambient ozone measurements on two Boeing 747 airplanes, volume 1

A study of partial coherence for identifying interior noise sources and paths on general aviation aircraft

Evaluation of aircraft windshield materials in a simulated supersonic flight environment

Analysis of vibratory excitation of gear systems as a contributor to aircraft interior noise --- helicopter cabin noise

Certification test procedures for aircraft

Conceptual point design study of a new CTOL SETOLs

The allocation of runway slots by auction, Volume 3: Theory and technical issues for implementation

Study of optical techniques for indirect generation of runway approach lights

Certification test procedures for aircraft approach control, AN/SPS-44, revision

Peripheral jet air cushion landing system

The allocation of runway slots by auction, Volume 1

The allocation of runway slots by auction, Volume 2

A method for administrative assignment of runway slots

A head-up display format for application to transport aircraft approach and landing

Simulator results of an F-16 airplane utilizing an aileron-rudder interconnect during carrier approaches and landings

The allocation of runway slots by auction, Volume 2: The airline management game and slot auction testing

A method for administrative assignment of runway slots

Advanced composite structure repair guide

Repair of advanced composite structure - in service

The practical aircraft hydraulic test stand

Operational maintenance policies for economic replacement of internal life-limited components in modular aircraft engines

On-condition maintenance - Review of military engines

F/A-18 automatic test equipment

P-16 avionics intermediate shop/ALIS/user involvement during development - technician/user evaluation of automated test equipment

AVT system acquisition for F-3A maturity/AVACS/

Design considerations for the automated maintenance of computerized avionics systems

Aircraft radio equipment adjustment and maintenance technology - Russian book

Costs of graphite composite fabrication and repair - aircraft structures

Advanced composite structure repair guide

Repair of advanced composite structures - in service

Composite in future transports. I - Non-metallics

Technical diagnosis and operation of engines according to technical condition

Technologies of aircraft maintenance. I

Titanium welding in aircraft maintenance

Application of fracture mechanics to USAF aircraft structural integrity requirements

Diagnostics of aircraft fuel and hydraulic units - Russian book

Improved gas turbine engine maintenance through management and analysis of engine performance data

Aircraft maintenance

A method for monitoring maintenance - The audit

The maintenance of transport aircraft at Air France

Analysis of fault isolation/criteria/techniques

An analysis of MIL-STD-471 test methods

New technology transport for fuel critical economy

Aircraft operations and logistics simulation

Aircraft launchers

Development and evaluation of a tower slant visual range system

Preliminary results of simulated vortex encounters by a twin-engine, commercial aircraft during final landing approach

Nondestructive evaluation of airport pavements.

Volume 3: Operation manual for MLGPAY program

Chicago monostatic acoustic vortex sensing system.

Volume 1: Data collection and reduction

An investigation of laser lighting systems to assist aircraft landing

SSILS initial evaluation report. Davis-Monthan AFB, Arizona, 16-20 November 1979

The development and test of a tactical self-contained landing system — landing of helicopters when the safe corridor is unknown

SINTAC-C TNA: Application of SINTAC-C in the terminal area, during landing and ground taxing --- integrated navigation, traffic control, collision avoidance and communication system

Study of optical techniques for indirect generation of runway approach lights

F/A-18 avionics intermediate shop/AIS/user involvement during development - technician/user evaluation of automated test equipment

Equipment

A-52
Aircraft maintenance technologies. II

Significance of the factors in a method for calculating the direct operating costs for commercial aircraft

Stage maintenance considered in relation to the conditions of Interflow

Living with the ageing structure - aircraft inspection and maintenance

Airline view of long life structures

Routine maintenance of high life structures

The development of maintenance schedules for aircraft structures

The inspectable aeroplane

Internationalizing aircraft maintenance practices

Study of turboprop system reliability and maintenance costs

Fleet hardnss variation - to determine aircraft survivability due to blast loads

Ground run-up noise control facilities for civil aircraft; A survey

Coaplation of data covering aircraft servicing facilities aboard aviation and amphibious aviation ships

Aircraft failure rate and logisitical cost analysis; supplemental study

Proceedings of the 7th Ann. Tri-Service Heeling Conferences

Estimating the time required to transition aircraft fleets to new scheduled maintenance intervals

The redundancy of scheduled and unscheduled maintenance

Analysis of helicopter maintenance fault isolation criteria/techniques

Survey of forced and precautionary landing costs

The STS flight data processing system

The use of AIDS data at ELM

On-line real-time management information systems and their impact upon user personnel and organizational structure in aviation maintenance activities

Aviation component repair program analysis, volume 1

Designing on-condition tasks for naval aircraft - preventive maintenance

The capabilities and operational roles of Royal Air Force Tornadoes

Production oriented maintenance organization: A critical analysis of sortie-generation capability and maintenance quality

Maintainability index model data base study

Aircraft Maintenance Effectiveness Simulation (AMES) model

Development of an effectiveness planning and evaluation model for Air Force Maintenance Organizations

Method for calculating wing loading during maneuvering flight along a three-dimensional curved path

Instrumentation for the determination of aircraft performance from dynamic maneuvers

Investigation of the permissible E x V phase space of safe landing maneuvers

Development, flight test and application of RFY control laws concepts for microprocessor based computers

Output feedback non-linear decoupled control synthesis and observer design for maneuvering aircraft

The EOD optoelectronic projection indicator systems. I

Analysis of the influence of the design parameters on the characteristics of an aircraft in spinning nose dive. I

Analysis of the influence of the design parameters on the characteristics of an aircraft in spinning nose dive. II

Pseudosteady state analysis of nonlinear aircraft maneuvers

Flying-qualities criteria for wings-level-turn maneuvering during an air-to-ground weapon delivery task

Overview of stall/spin technology

Study of admissible safe prelanding maneuver E-V phase space

Simulator for air-to-air combat motion system investigation

Aviation aircraft parameter identification; Technical preparations and preliminary results

Sonic-boom wave-front shapes and curvatures associated with maneuvering flight

The accelerometer methods of obtaining aircraft performance from flight test data dynamic performance testing

Aircraft Manuvers

The SYDAS flight data processing system

The SYDAS flight data processing system: Supplemental study

Optimization of tactical aircraft maneuvers utilizing high angles of attack

An approximate feedback solution of a variable speed non-linear pursuit-evasion game between two airplanes in a horizontal plane

The linear and non-linear aerodynamics of three-surface aircraft concepts

Sonic-boom wave-front shapes and curvatures associated with maneuvering flight

The inspeetable aeroplane

Internationalizing aircraft maintenance practices

Study of turboprop system reliability and maintenance costs

Fleet hardnss variation - to determine aircraft survivability due to blast loads

Ground run-up noise control facilities for civil aircraft; A survey

Coaplation of data covering aircraft servicing facilities aboard aviation and amphibious aviation ships

Aircraft failure rate and logisistical cost analysis; supplemental study

Proceedings of the 7th Ann. Tri-Service Heeling Conferences

  - [NASA-TP-1627] p0520 880-45915
- The EMB system identification technique and its application to high alpha/beta modeling of aircraft
  - [AIAA 80-1631] p0520 880-45919
- High-alpha aerodynamic model identification of the T-2C aircraft using the EMB system identification method
  - [AIAA PAPER 80-0172] p0580 880-50195
- Effect of winglets on a first-generation jet transport wing: 6: Stability characteristics for a full-span model at subsonic speeds --- conducted in Langley 8 foot transonic pressure tunnel

SUBJECT INDEX

[HASA-TB-81188] p0529 B80-28298
Glider accidents in France in the last ten years
A controversial subject - The minimal pilot crew
Aircraft Assessment and Acceptance Testing
Perception of aircraft separation with pilot-preferred symbology on a cockpit display
Dynamics of the new generation of combat aircraft with delta wings
A practical method for predicting roughness effects on aircraft
In-flight handling qualities investigation of Airbus A 310 DCL. Configurations on landing approach using the DFVLR-BF8 320 variable stability aircraft
Advanced turboprop potential for high speed
Theory for computing the size and shape of a maneuvering vehicle
Wind-tunnel tests of the XV-15 tilt rotor aircraft
UK approach to aircraft dynamic response on damaged and repaired runways
Parameters affecting aircraft performance on runways in bad condition
Subsonic aircraft: Evolution and the matching of size to performance
Fuel/engine/airframe tradeoff study, phase 1
The operational roles of the F-16
The Tornado all-weather high-speed low-level system
The development of the world's first triengine business jet, the Bystere Falcon 50
The challenge of the 600 challenger
Review of five years of flight testing the B-1
Aircraft Assessment and Acceptance Testing
Aeronautical Safety Test Developments
Some examples of procedures used in UK for acceptance testing of aircraft produced by the aircraft industry under government contract
A review of flight test instrumentation systems for acceptance testing of the production aircraft
Performance testing production airlines
Evaluation of lateral and directional characteristics and spinning behaviour
Aircraft turbulence simulation techniques with application to flight analysis
Handling qualities of large flexible aircraft
Air cushion craft development, first revision
Role of unsteady aerodynamics in aircraft response
Flying qualities design criteria
AIRCRAFT PILOTS
The impact of the limits of simulation in extending the use of simulators in training
Glider accidents in France in the last ten years
A controversial subject - The minimal pilot crew
AIRCRAFT PILOT'S
Parametric study of variation in cargo-airplane performance related to projection from current to spanloader designs
Full-scale wind tunnel-investigation of the Advanced Technology Light Twin-Engine airplane. (AVLT) --- Langley full scale tunnel
Aerodynamics of the new generation of combat aircraft with delta wings
A practical method for predicting roughness effects on aircraft
In-flight handling qualities investigation of Airbus A 310 DCL. Configurations on landing approach using the DFVLR-BF8 320 variable stability aircraft
Advanced turboprop potential for high speed
Theory for computing the size and shape of a maneuvering vehicle
Wind-tunnel tests of the XV-15 tilt rotor aircraft
Handling qualities of large flexible aircraft
Air cushion craft development, first revision
Role of unsteady aerodynamics in aircraft response
Flying qualities design criteria
AIRCRAFT PILOTS
The impact of the limits of simulation in extending the use of simulators in training
Glider accidents in France in the last ten years
A controversial subject - The minimal pilot crew
Investigation into the reliability of various fuel, hydraulic and air conditioning components in military aircraft

Fault-surviving flight control avionics

Reliability problems in avionics

Research programs in general aviation - Next generation aircraft

Methods of computer-aided aircraft design --- Russian book

The reliability of the mechanical components of flight vehicles --- Russian book

Helicopter/BSA/ in-flight escape system - Component qualification

Safety and comfort - The airliner cabin

Problems of older jet aeroplanes - A regulatory authority view

Production Eagle and its potential

EMC in lightweight helicopters - Special problems and experience in design and control

The fatigue performance of service aircraft and the relevance of laboratory data

Basic issues of reliability in aviation

Problems involved in the detection of aircraft defects

Airworthiness certification of composite components for civil aircraft - The role of non-destructive evaluation

A quantitative assessment of the variables involved in crack propagation analysis for in-service aircraft

Short distance multipurpose aircraft An-28

On determining the probabilities of the consequences of airplane system failures in evaluating the level of flight safety

Limits of application of the damage tolerance concept to combat aircraft

Diagnostics of aircraft fuel and hydraulic units --- Russian book

A review of nondestructive inspection reliability of aircraft structure

Certification --- of aircraft

Technical guidance for certification

Failure and damage tolerance - A concept applied to the A 300

The maintenance of transport aircraft at Air France

Aircraft operations and logistics simulation

Common Cause Failures - A dilemma in perspective

Newer users of older aircraft

Impact of aircraft vs logistics characteristics on operational readiness

The relationship between reliability and airworthiness --- Flight risk and failure estimation for civil aviation

The objective necessity of the fail-safe design philosophy

The effect of cross-shafting on engine-out vertical landing reliability of V/STOL aircraft

Calculation of aircraft wing reliability from sudden failures

Stage maintenance considered in relation to the conditions of Interflag

Reliability assurance of aircraft structures

Living with the ageing structure --- Aircraft inspection and maintenance

Routine maintenance of high life structures

Continuing structural airworthiness of civil transport aircraft

Airworthiness of long-life jet transport structures

Some recent advances in non-destructive testing applied to aircraft in service

Internationalising aircraft maintenance practices

Automatic recovery after sensor failure onboard

An evaluation of the ADIBA finite element program for application to aircraft overpressure vulnerability

Investigation of the crack-impact characteristics of advanced airframe structures

Aviation safety and its improvement

Fatigue data analysis system

Helicopter equipped with Multiple Target Helicopter (MULTISH)

Reliability management of the avionic system of a military strike aircraft

Preliminary airworthiness evaluation, AH-1G with installed

Fire on board transport aircraft and passenger

APPLICATIONS OF MATHEMATICS
Mathematics for computer graphics --- Book on numerical design engineering of aerospace systems p0050 A80-14598
A matrix method for airport site evaluation p0252 A80-32633
APPROACH
MT AERODOME RADAR APPROACH
MT INSTRUMENT APPROACH
Pilot performance during simulated approaches and landings made with various computer-generated visual glidepath indicators p0266 B80-10151
Altitude response of several airplanes during landing approach --- including space shuttle [NASA-TR-80186] p0122 B80-14139
Optimum intensity setting of approach and runway light systems [AD-A0754885] p0168 B80-16046
Evaluation of the potential for reduced longitudinal spacing on final approach [AD-A0768384] p0169 B80-16049
Analysis of fuel-conservative curved decelerating approach trajectories for powered-lift and CVOL jet aircraft [NASA-TP-1650] p0231 B80-19022
Flight evaluation of configuration management system concepts during transition to the landing approach for a powered-lift STOL aircraft [NASA-TR-81116] p0245 B80-19127
Inertially augmented approach couplers
[AD-A0804080] p0290 N80-20248
Study of optical techniques for indirect generation of runway approach lights
[AD-A0804536] p0499 N80-27398
Flight evaluation of a radar cursor technique as an aid to airborne radar approach
[AD-A0804015] p0531 N80-28331

APPROACH AND LANDING TESTS (SST)
Experience with an adaptive stick-gain algorithm to reduce pilot-induced-oscillation tendencies
[AIAA-80-1571] p0116 A80-45070
Orbiter landing loads math model description and correlation with ALT flight data
[NASA-TP-1056] p0172 N80-21609
Dynamic stability derivatives of space shuttle orbiter obtained from wind-tunnel and approach and landing flight tests
[NASA-TP-1634] p0307 N80-21336

APPROACH CONTROL
NDT RADAR APPROACH CONTROL
On-board precision approach system using NAVSTAR GPS
[p0190 A80-25162
Experience with an adaptive stick-gain algorithm to reduce pilot-induced-oscillation tendencies
[AIAA 80-1571] p0116 A80-45070
Preliminary analysis of minimum time and minimum noise landing approach trajectories
[AIAA 80-1590] p0517 A80-45961
Model development for automatic guidance of a VSOL aircraft to a small aviation ship
[AIAA 80-16177] p0519 A80-45907
Procedure approaches — human factor considerations for safe landing of aircraft
[NASA-TP-53558] p0124 A80-25174
An assessment of terminal air traffic control system performance with and without baseline metering and spacing automation
[AD-A0775456] p0037 N80-11057
Study for incorporating time-synchronized approach control into the CA-47/CVS digital navigation system
[NASA-CR-159151] p0037 N80-11058
Piloted flight simulation study of low-level wind shear, phase 4: All-weather landing systems, engineering services support project, task 2
[AD-A077764] p0180 N80-17080
A flight simulation investigation on the feasibility of curved approaches under MLS guidance
[p0256 N80-19844
Predicting field of view requirements for VSTOL aircraft approach and landing
[p0257 N80-19847
Analysis of the effects of higher order control systems on aircraft approach and landing longitudinal landing qualities
[AD-A080519] p0359 N80-22362
Wind-shear encounters during visual approaches at night: A piloted simulator study
[NAR-TE-79126] p0417 N80-24291
SIM-C-THA: Application of SIM-C in the terminal area, during landing and ground taxing — integrated navigation, traffic control, collision avoidance and communication system
[NASA-TP-69738] p0493 N80-27338
Analytical methodology for determination of helicopter IFR precision approach requirements — pilot workload and acceptance level
[NASA-CR-152367] p0531 N80-28330
Development of advanced avionics systems applicable to terminal-configured vehicles
[NASA-CR-3280] p0601 N80-31375
Airborne radar approach flight test evaluating various track orientation techniques
[AD-A080826] p0631 N80-32368
Test and evaluation of Texas Instruments small community microwave landing system
[AD-A080852] p0645 N80-33387

APPROACH INDICATORS
Airliner simulator census
[p0166 A80-24472
Establishment criteria for Distance Measurement Equipment (DME) with instrument landing system and/or localizer approach
[AD-A080918] p0077 N80-13016
Flight evaluation of a radar cursor technique
[AD-A0803027] p0438 N80-25519

An investigation of laser lighting systems to assist aircraft landing
[AD-A077722] p0490 N80-27315
SSSL initial evaluation report. Davis-Sonahan
[AD-A0806635] p0490 N80-27320

APPROPRIATIONS
National Aeronautics and Space Administration Authorization Act, 1981
[p0372 N80-24210

APPROXIMATION
MT FINITE DIFFERENCE THEORY
MT FINITE ELEMENT METHOD
MT LEAST SQUARES METHOD
MT RELAXATION METHOD (MATHETMATICS)
On a smooth approximation method and its application to mathematical description of wing aerodynamic characteristics
[p0346 N80-11011
Inequalities and approximation with applications to VSTOL aircraft — using control theory for optimal control approximations
[p0041 A80-25164
Parametric study of the Orbiter rollout using an approximate solution
[NASA-TN800837] p0082 N80-13188
Evaluation of approximate methods for the prediction of noise shielding by airborne components
[NASA-TP-1004] p0137 N80-15129
Development of stability methods for applications to nonlinear aeroelastic optimization
[AD-A077851] p0294 N80-20282
An integral method and its application to some three-dimensional boundary-layer flows
[BWGC-TR-79-139] p0312 N80-21705
An approximate factorization solution of the Navier-Stokes equations for transonic flow using body-fitted coordinates with application to NASA 64A070 airfoils

APPROXIMATION METHODS

ATMOSPHERIC CONDITIONS

U RHEOLOGY
- Dissipation, resuspension, and filtration of carbon fibers - aircraft fires
- Large-scale fiber release and equipment exposure experiments - aircraft fires
- Surveys of facilities for the potential effects from the fallout of airborne graphite fibers

ATMOSPHERIC EFFECTS
- Atmospheric effects on Martian ejection displacement
- French inflight program of study on the electromagnetic effects of lightning
- A survey of the high frequency effects associated with the lightning discharge
- Atmospheric electricity and military operations
- Another look at aircraft-triggered lightning
- Atmospheric Electricity-Aircraft Interaction
- ATMOSPHERIC ELECTRICITY
- Flight tests for the study of radioelectric perturbations of electrostatic origin
- French inflight program of study on the electromagnetic effects of lightning
- Atmospheric electricity and military operations
- Atmospheric Electricity-Aircraft Interaction

ATMOSPHERIC MISTAKES
- Free-flight experiments aircraft fires
- Phenomenology of lightning/aircraft interaction
- Susceptibility of avionics to lightning indirect effects
- Models for assessing hazards due to lightning
- Lightning test criteria for aircraft avionics systems
- Lightning testing for aircraft avionics systems
- Basic phenomenology of electrical discharges at atmospheric pressure

ATMOSPHERIC ENTRY
- Development of a program for controlling the angle of bank of an orbital aircraft during entry into the atmosphere
- Shielding effects of a meteoroid surface by reflecting and evaporating molecules. The case of strong shielding - The overall picture of the phenomenon
- Effects of aerodynamic heating and TPS thermal performance uncertainties on the Shuttle Orbiter
- Wake flowfields for Jovian probe

ATMOSPHERIC IMPACTS ON AIR POLLUTION

ATMOSPHERIC MODELS
- U DYNAMIC MODELS
- A numerical simulation of fog dissipation using passive burners. I - Model development and comparison with observations. II - Sensitivity experiments
- Meteorological and air pollution modeling for an urban airport
- A non-Gaussian atmospheric turbulence model for flight simulator studies of aircraft handling
Subjects Index

Methods for strap-down attitude estimation and navigation with accelerometers (p. 112)

Air speed and attitude probe [NASA-CR-11009-1] (p. 223)

Pilot assessment of a computer-generated display format for helicopter instrument approach [NASA-TR-80-151] (p. 350)

Auto simulation study of control and display augmentations for helicopters [NASA-CR-16351] (p. 605)

Attitude Stability

- Directional Stability
- Gyroscopic Stability
- Lateral Stability
- Longitudinal Stability

Fundamentals of design. V - Fin design for combat aircraft (p. 210)

A balloon-borne three axis stabilised platform for large astronomy experiments (p. 38)

Audio Equipment

- Headphones
- Microphones

Audio Frequencies

A unified theory for determining human response to sound - aircraft noise (p. 386)

A standard for RF modulation factor for instrument landing systems and VOR navigation systems (p. 109085)

Audio Visual Equipment

- TV TRAJECTORIES
- TV VISUAL AIDS

Auditory Perception

Perception and performance in flight simulators: The contribution of vestibular, visual, and auditory information [NASA-CR-162129] (p. 402)

Correction procedures for aircraft noise data. Volume 4: Tone perception [AD-A083075] (p. 560)

Auditory Signals

F-4 radar altimeter aural warning [AD-A072070] (p. 404)

Augmentation

- Stability Augmentation
- Thrust Augmentation

Australia

Sea King Mk 50 helicopter sonar dynamics study (p. 646)

Automated Guideway Transit Vehicles

Assessment of operational automated guideway systems - AIRTRAMS, phase 2 [P-80-182358] (p. 613)

Automatic Control

- Active Control
- Adaptive Control
- Automatic Flight Control
- Automatic Landing Control
- Cascade Control
- Dynamic Control
- Feedback Control
- Feedforward Control
- Learning Machines
- Numerical Control
- Optimal Control
- Open-Loop Adaptive Control Systems
- Sequential Control

At Time Optimal Control

Organization of automatic control systems for technological processes in aircraft mechanical engineering - Russian book

A link between sciences and applications of automatic control: Proceedings of the Seventh Triennial World Congress, Helsinki, Finland, June 12-16, 1978. Volumes 1, 2, 3 & 4

Aircraft aerodynamics - Dynamics of longitudinal and lateral motion - Russian book

Advanced flight controls for transport aircraft (p. 101)

Advanced computer program - for future automation and system performance improvements

Automatic Data Processing

- Automatic control of NASA Langley's 0.3-meter cryogenic test facility [AIAA 80-0416] (p. 198)
- Adding more automation to the air traffic control system (p. 215)
- Influence of air traffic on the concept of air traffic control (p. 216)
- Factorial interpolational method of analyzing the accuracy of nonlinear automatic control systems in the presence of random effects (p. 262)
- Design and verification of an automatic Bach number control system (p. 264)
- Navigation for a group of aircraft / Automation of data processing and flight control procedures/ - Russian book (p. 321)
- Towards a reliable air traffic control (p. 408)
- The automatic detection of collision risk for the control of air traffic in France (p. 570)
- The optimisation of air-traffic control techniques and the problems of operational capacity (p. 570)
- Integrated control techniques for advanced aircraft electrical power systems (p. 570)
- Reliability problems of adaptive automatic control systems /Review/ (p. 572)
- On modeling sensitivity of a linear system to reduction of its order by the infiniterational transformation method in the yaw motion control problem (p. 519)

A hydraulic actuator mechanism to control aircraft spoiler movements through dual input commands [NASA-CR-12451-1] (p. 38)

Failure detection, isolation and indication in highly integrated digital guidance and control system (p. 112)

Radar data utilization in automating the sequencing of aircrafts in terminal areas (p. 116)

Automatic systems for airport surface mobile media surveillance based on the use of secondary media (p. 117)

N旅游局, guidance, and control for helicopter automatic landings (p. 366)

Engineering and development program plan: Mn Route Control, Program 12 [AD-A082747] (p. 416)

Preliminary computer sizing estimates for Automated Mn Route ATC (ARMA) [AD-A082629] (p. 416)

The application of microprocessors to the regulation of military aircraft engines: The design of electronic regulators (p. 481)

Control of the engines for the new Airbus family: The design of electronic regulators (p. 482)

Air traffic control automation: Its impact and use in the selection and screening of air traffic controllers (p. 491)

Mid-air conflicts and their potential avoidance by progressive implementation of automation (p. 492)

Modeling and control of transonic cryogenic wind tunnels [NASA-CR-163508] (p. 637)

Automatic Control Valves

A new fuel supply control system for small turbomachines (p. 481)

Automatic Data Processing

U DATA PROCESSING
AUTOMATIC FLIGHT CONTROL

BY AUTOMATIC LANDING CONTROL
Flight-vehicle equipment — Russian book
Radio and optical flight support systems and communications in civil aviation — Russian book
Automatic control systems for flight vehicles — Russian book
Application of automated system to air traffic control — Russian book
Development of a program for controlling the angle of bank of an orbital aircraft during entry into the atmosphere
Synthesis of an adaptive flight control system
Aircraft instruments and automatic systems /3rd revised and enlarged edition/ — Russian book
Singularities of the numerical solution of the algebraic Riccati equation in matrix form by a modification of the Lax-Modgord method — for automatic aircraft control
Avionics — The leading technology in flight guidance and air traffic control
Avionics and controls in review
Preliminary design of an integrated redundant digital flight control system for the maritime patrol aircraft
A summary of the Speyer flight management computer system for the Boeing 757/767 airplanes
Continuous- to- discrete transformations for control system simulation — digital flight control filters for man-in-the-loop systems
Total aircraft flight-control system — Balanced open- and closed-loop control with dynamic trims maps
Digital Flight Control System /DFCS/ multimode development
Advanced digital avionics for the DC-9 Super 80
An Integrated Sensory Subsystem /ISS/ for V/STOL aircraft
The Fault Tolerant multiprocessor engineering model / report/ — computer systems design for avionics systems
All-weather landing — aircraft
Men, aircraft and systems of navigation — an evaluation for the 1980s
Automation of aircraft control under unstable flight conditions — Russian book
Automation of air navigation and air traffic control — Russian book
Pilot-aircraft system response to wind shear (AIAA 80-1569)
Impact of longitudinal flying qualities upon the design of a transport with active controls (AIAA 80-1570)
Electronic Flight Rules /EFR/ - a concept for enhanced freedom of airspace
Application of optimal constant output feedback to flight control system design
An assessment of terminal air traffic control system performance with and without basic metering and spacing automation

SUBJECT INDEX

Sea King Mk. 50 helicopter flight control systems
A mathematical model of the AFCS (autostabilizing-autopilot mode)
An assessment of and approach to the validation of digital flight control systems
Pilot control through the TAFCS automatic flight control system
Flight tests of the total automatic flight control system (Tafcs) concept on a DDC-6 Twin Otter aircraft
Design of an integrated flight/fire control system including movable gun and gimballed line of sight tracker
Control system design using vector-valued performance criteria with application to the control rate reduction in parameter insensitive control systems
An assessment of and approach to the validation of digital flight control systems
Validation of high angle-of-attack analysis methods
AUTOMATIC LANDING CONTROL
Follow-up and final-value control of a special non-linear process - study of optimal aircraft guidance during the final landing phase
Presentation of the STRADA trajectory system
Factorial design of experiments in the test and evaluation of a complex control system for carrier-based aircraft landing
Aircraft landing digital control system
Automatic landing - Now a matter of course
Development and flight evaluation of automatic flare laws with improved touchdown dispersion
Modal development for automatic guidance of a VTO\L aircraft to a small aviation ship
Application of the concept of dynamic trim control to automatic landing of carrier aircraft — utilizing digital feedforward control
A comparison of flight and simulation data for three automatic landing control laws for the Agamentor wing jet STOL research airplane
Validation of high angle-of-attack analysis methods
AUTOMATIC PILOTS
Verification of digital autopilot microprocessor hardware and software via hardware-in-the-loop simulation
Aircraft instruments and automatic systems /3rd revised and enlarged edition/ — Russian book
Selection of the characteristic polynomial of a closed-loop transfer function by minimizing integral quadratic estimates
Midcourse guidance for fire and forget missile — Modification of present homing missile
Single pilot IFB autopilot complexity/benefit tradeoff study
Model development for automatic guidance of a VTOL aircraft to a small aviation ship
Man's role in the automation of aviation - All weather landing systems
Hardware-in-the-loop simulation of a digital autopilot
A helmet-mounted sight using C.C.D. technology
Axial flow rotor unsteady performance

p0171 A80-16069

CARBON FIBER REINFORCED PLASTICS

Resin matrices and their contribution to composite properties
p0155 A80-22262

Tenn erosion of lightning protection coatings for carbon fibre composites
p0189 A80-25059

Graphite-epoxy panel compression strength reduction due to local impact
p0209 A80-27598

Airworthiness certification of composite components for civil aircraft - The role of non-destructive evaluation
p0328 A80-34766

New materials and helicopter certification
[AAAP PAPER 79-26] p0379 A80-36661

The development of the composite material engine nacelle
[AAAP PAPER 79-39] p0379 A80-36671
Advanced risk assessment of the effects of carbon fiber release from burning composites

The potential for damage from the accidental release of conductive carbon fibers from aircraft composites

Current and projected use of carbon composites in the United States aircraft industry

The transfer of carbon fibers through a commercial aircraft water separator and air cleaner

Carbon and graphite, Part 1: Carbon and graphite fibers and fiber composites, volume 4: A bibliography with abstracts

Data reduction and analysis of graphite fiber release experiments

Assessment of carbon fiber electrical effects

Approach to the assessment of the hazard — fire released carbon fiber electrical effects

Release of carbon fibers from burning composites

Dissemination, resuspension, and filtration of carbon fibers — aircraft fires

Evaluation of equipment vulnerability and potential shock hazards — carbon fibers

Large-scale fiber release and equipment exposure experiments — aircraft fires

Surveys of facilities for the potential consequences of the fallout of airborne graphite fibers

Assessment of the risk due to release of carbon fiber in civilian aircraft accidents, 1970-1979

Assessment of risk due to the use of carbon fiber composites in commercial and general aviation

Perspective on the results

The vulnerability of commercial aircraft avionics to carbon fibers

Evaluation of micron size carbon fibers released from burning graphite composites

High voltage spark carbon fiber detection system

An assessment of the risk arising from electrical effects associated with the release of carbon fibers from general aviation aircraft fires

An assessment of the risk arising from electrical effects associated with carbon fibers released from commercial aircraft fires

Advanced risk assessment of the effects of graphite fibers on electronic and electric equipment

An assessment of power system vulnerability to release of carbon fibers during commercial aviation accidents

An investigation of possible electrical hazards of carbon fiber composites

Carbon fiber counting — aircraft structures

Statistical aspects of carbon fiber risk assessment modeling — fire accidents involving aircraft

Carbon/graphite composite material study — risk and hazards of fiber release

A carbon fiber exposure test facility and instrumentation

Composite rotor blades for large wind energy installations

Carbon/graphite fiber risk assessment and analysis study: Assessment of risk to the Lockheed Model L-1011 commercial transport aircraft

Carbon/graphite fiber risk analysis and assessment study: An assessment of the risk to Douglas commercial transport aircraft

Electronic equipment vulnerability to fire released carbon fibers

Carbon fiber release experiments for large scale fire tests at Dayton Proving Ground — fiber release during aircraft fires

Process modifications for improved carbon fiber composites: Alleviation of the electrical hazards problem

Carbon monoxide: Circumferential measurements of ozone, particles, and carbon monoxide from a commercial airliner

Indoor and outdoor carbon monoxide measurements at an airport

Carbon steel: Manufacture of low carbon steel using water, iron, and coke in a commercial ladle

Carbon tetrafluoride: Gladstone-Dale constant for CF₄ — experimental design

Advanced concept in aircraft crash firefighting using carbon tetrafluoride

Carbon—carbon composites: Design and engineering of carbon brakes

CEREBRAL PROCESSING UNITS
Preliminary computer sizing estimates for automated on Kone A/S (JBA) [AD-A082628]

CENTRIFUGAL COMPRESSORS
Design solutions for highly loaded stages of radial compressors
On the dynamics of compressor surge
Effect of non-rotating passages on performance of centrifugal pumps and subsonic compressors
Aerodynamic performance of a centrifugal compressor with vaned diffusers
A contribution to the design of radial compressor impellers with double-curved blades
Compact diffusers for centrifugal compressors
Effect of fluid forces on rotor stability of a compressor
Asynchronous vibration problems of centrifugal compressors
Analysis and identification of subsynchronous vibrations in high pressure parallel flow centrifugal compressor
Subynchronous instability of a geared centrifugal compressor of overhung design
Asynchronous vibration problem of centrifugal compressor
Effect of fluid forces on rotor stability of centrifugal compressors and pumps

CENTRIFUGAL FANS
Rotating stall in a vaned diffuser of a centrifugal fan
Theoretical and experimental parameter-studies of oscillating turbine blades in a centrifugal force field

CENTRIFUGAL PUMPS
Effect of non-rotating passages on performance of centrifugal pumps and subsonic compressors
Effect of fluid forces on rotor stability of centrifugal compressors and pumps
Fluid forces on rotating centrifugal impeller with whirling motion

CERAMIC COATINGS
Thermal barrier coatings for aircraft gas turbines
Development of improved-durability plasma sprayed ceramic coatings for gas turbine engines
Plasma sprayed ceramic thermal barrier coatings for turbine vane platforms
Similarity tests of turbine vanes - Effects of ceramic thermal barrier coatings
Similarity tests of turbine vanes, effects of ceramic thermal barrier coatings
Development of improved-durability plasma sprayed ceramic coatings for gas turbine engines
Optimization of ceramic-to-metal coatings - Application of an improved durability plasma sprayed coating to cooled engine components

CERAMICS
State of-the-art of Silicon materials
Technologies conceived for the utilization of ceramics in turboengines
Investigation of structural strength of ceramics used for circulating section components of gas turbine engines
Significance of thermal contact resistance in two-layer, thermal-barrier-coated turbine vanes
Novel ceramic receiver for solar Brayton systems
Contact stress analysis of ceramic-to-metal interfaces - in gas turbine engines
Effects of a ceramic coating on metal temperatures of an air-cooled turbine vane
Novel ceramic turbine rotor concepts
Establishment of engineering design data for hybrid steel/ceramic bearings
Composite wall concept for high temperature turbine shrouds: Survey of low modulus strain isolator materials
Contact stress analysis of ceramic-to-metal interfaces - in gas turbine engines
Application of ceramic nozzles to 10 KW engine
Property screening and evaluation of ceramic turbine engine materials
Development of high temperature resistant ceramic parts for gas turbines
High-temperature ceramic heat exchanger
Reliability of ceramics for heat engine applications
Ceramics for turbine engine applications
Benefits of ceramics to gas turbines
Ceramics for small airborne engine applications
Requirements for materials for land vehicle gas turbines
Technologies for use of ceramics in turboengines
Silicon nitride turbine blade development
Duo-density ceramic turbine rotor: Concepts, materials processes and test results
Development of an integral ceramic blade-metal disk with circumferential blade attachment
Investigations of a hot-pressed silicon nitride turbine rotor

A-142
DELTA wings On supersonic flow with attached shock waves over delta wings
Steady flow over the pressure side of a piecewise-flat delta wing with supersonic leading edges
Analytical investigation of aerodynamic characteristics of highly swept wings with separated flow
Investigation of leading-edge devices for drag reduction of a 60-deg. delta wing at high angles of attack
\[ \text{(AIAA PAPER 80-0310)} \]
\[ \text{(AIAA PAPER 80-0126)} \]
\[ \text{(AIAA PAPER 80-3500)} \]
\[ \text{(AIAA 80-0444)} \]
\[ \text{(AIAA 80-08698)} \]
\[ \text{(AIAA 80-0269)} \]
\[ \text{(AIAA 80-3942)} \]
\[ \text{(AIAA 80-0269)} \]

Hypersonic slipflow of a viscous gas over a slender delta wing
Delta wing of optimal configuration in supersonic flow
Calculation of the supersonic flow past a winged bielliptical body
The nonlinear supersonic potential flow over delta wings
\[ \text{(AIAA PAPER 80-0269)} \]
\[ \text{(AIAA 80-0269)} \]
\[ \text{(AIAA 80-0269)} \]
\[ \text{(AIAA 80-0269)} \]

Numerical modeling of supersonic flow near a thin delta wing with discontinuous edge
Calculation of minimum-weight and maximum-rigidity structures in the presence of design constraints
Similarity of the aerodynamic characteristics of delta wing at supersonic speeds
The delta wing in oscillatory gusts
Conically cambered delta wings in supersonic flow. I - Basic solutions
Reflex cambered delta wings with leading edge separation
Conically cambered delta wings in supersonic flow. II - Optimal solutions
Types of leeside flow over delta wings
Stationary flow past the lower surface of a piecewise planar delta wing with supersonic leading edges

Measurement of shock waves around a delta-wing sailplane
Careful numerical study of flowfields about asymmetric external conical corners
Non-equilibrium flow over delta wings with detached shock waves
Performance improvement of delta wings at subsonic speeds due to vortex flaps
A vortex-lattice method for the calculation of the nonsteady separated flow over delta wings
Calculation of the supersonic flow past a slender delta wing at angles of attack and sideslip
Contribution to the theory of hypersonic flow past three-dimensional wings
Aerodynamic characteristics of configurations consisting of half-cones and flat delta wings with supersonic leading edges
Limiting values of the lift coefficient of lifting bodies with a flat surface at supersonic speeds
Contribution to the theory of the small-aspect-ratio wing in hypersonic flow
Flow-around small-aspect-ratio delta wing with vortex "bursting"
Overall aerodynamic characteristics of caret and delta wings at supersonic speeds
Leading edge vortex-flap experiments on a 74 deg delta wing
Normal force derivative and center of pressure movement due to Mach number on wing-body combinations with triangular wings of the same span and different aspect ratios at supersonic speeds
Aerodynamic characteristics of a hypersonic research airplane concept having a 70 deg swept double-delta wing at Mach numbers from 0.80 to 1.20, with summary of data from 0.20 to 6.0 — Langley 8-ft transonic wind tunnel
Summary of theoretical and experimental investigations of vortex lift at high angles of attack
Aerodynamics of the new generation of combat aircraft with delta wings
Leeuward flow over delta wings at supersonic speeds
Lee side flow for slender delta wings of finite thickness
Calculations by a first order theory of supersonic flow around delta wings
Supersonic pitch damping of a delta wing aircraft determined from flight measurements

Demand (ECONOMICS)
Discriminant analysis of purchasers of general aviation aircraft avionics
Demand evolution in heavy transport

SUBJECT INDEX

Flite test of all-electronic propulsion control systems for advanced technology engine [AIAA PAPER 80-1149] p0398 80-38938
Optimal output feedback for systems having direct feedthrough of control --- applied to turbofan engine regulator design p0165 80-20266
Flight test of all-electronic propulsion control systems [AIAA PAPER 80-1147] p0488 80-41187
Simplifying the development of programs for digital engine controllers [ASME PAPER 80-GT-29] p0457 80-42163
Software for flight critical digital engine controls [AIAA PAPER 80-GT-119] p0461 80-42235
New tasks and progressive integration in the area of flight and power plant control [SCIS PAPERS 80-048] p0523 80-46298
Control technology p0029 80-10215
Quiet Clean Short-haul Experimental Engine (QCSEB) over-the-wing control system design report [NASA-CR-135377] p0132 80-15092
Alternatives for jet engine control [NASA-CR-162911] p0293 80-20273
Data analysis of F sub S sub P sub S sub S noseboom probe testing on F 100 engine P680072 at NASA Lewis Research Center [NASA-CR-150916] p0307 80-21334
Technical evaluation report on the 5th(a) Propulsion and Energetics Panel Meeting on Advanced Control Systems for Aircraft Powerplants [AGARD-AR-152] p0436 80-25347
Experimental full-authority digital engine control on Concorde p0481 80-26308
Transducers for engine control systems p0481 80-26312
The application of microprocessors to the regulation of military aircraft engines: The design of electronic regulators p0481 80-26314
Design, evaluation and test of an electronic, multivariable control for the F100 turbofan engine p0481 80-26316
Determining the optimal control laws for setting the rpm's of a turbojet engine p0482 80-26318
Node control: A flexible control concept for military aircraft engines p0482 80-26319
Redundancy concepts in full authority electronic engine control, particularly dual redundancy p0482 80-26320

ENGINE DESIGN

Advanced Control Systems for Aircraft Powerplants p0041 80-10035
Computer calculation of stationary temperature fields in air-cooled turbine rotor blades p0033 80-10012
Selection of optimal parameters of heat-pipe heat exchanger for a gas turbine engine p0004 80-10013
Computer calculation of stationary temperature fields in cooled turbine discs p0004 80-10014
Systematization of simple detail parts of reguillable nozzle of gas turbine engine p0004 80-10016
Development of an aircraft-derivative gas turbine with high performance and large output p0005 80-10023
Characteristics and operational conditions of aircraft turbojet engines --- Russian book p0009 80-13775
New trends and possibilities of propeller development p0053 80-15082
Design solutions for highly loaded stages of radial compressors p0053 80-15084
Analytical modeling of the dynamics of aircraft powerplant subassembly units p0054 80-15088
Theory of aircraft gas turbines /3rd revised and enlarged edition/ --- Russian book p0059 80-16395
Engine airframe commonality p0060 80-16550
Preparing aircraft propulsion for a new era in energy and the environment p0090 80-17737
Computer simulation of engine systems --- for aircraft design [AIAA PAPER 80-0051] p0092 80-18253
Multi-variable cycle optimization by gradient methods --- for variable-cycle engines [AIAA PAPER 80-0052] p0092 80-18254
Regression techniques applied to parametric turbine engine simulations [AIAA PAPER 80-0053] p0092 80-18255
Flow in transonic compressors [AIAA PAPER 80-0124] p0096 80-18357
Technology of the Rolls-Royce RB211 engine p0098 80-18664
A pre-design code for predicting engine acquisition costs [AIAA PAPER 80-0055] p0099 80-19269
Installation effects on cycle selection for small turbo-fan engines [AIAA PAPER 80-0106] p0099 80-19280
Technologies conceived for the utilization of ceramics in turboengines [GOMMA, TV SO. 1975-132] p0102 80-20076
Research developments for aircraft safety p0154 80-22188
A cooled laminated radial turbine technology demonstration [AIAA PAPER 80-0300] p0156 80-22748
Designing aircraft-engine air ducts --- Russian book p0156 80-23067
Optimization methods in fine-finishing and designing gas-turbine engines --- Russian book p0158 80-23071
Frequency dependent precompensation for dominance in a four input/output these problem  
[IAIA PAPER 80-22925]

Design of a turbojet engine controller via eigenvectors/complex eigenvalues - a new  
sensitivity formulation  
[IAIA PAPER 80-22929]

Effects of idealizing three-dimensional geometry with two-dimensional models in temperature and  
stress analysis of engine components  
[IAIA PAPER 80-24310]

One-dimensional aerodynamic control calculations for cooled gas turbines  
[IAIA PAPER 80-26305]

Theory of by-pass ducted-fan engines - Russian book  
[IAIA PAPER 80-26349]

Opportunist maintenance policies for economic replacement of internal life-limited components in  
modular aircraft engines  
[IAIA PAPER 79-1011]

A contribution to the design of radial compressor impellers with double-curved blades

t subjective index
On the equations of motion about the mass centre of the jet aircraft considered an variable mass system

Pseudosteady state analysis of nonlinear aircraft maneuvers

Linear analysis of poststall gyrations

An application of system identification to flutter testing

Coupled rotor and fuselage equations of motion

Modal analysis of aircraft structures

Aircraft flutter and dynamic response

Formulation of the equations of motion of a deformable aircraft using Lagrange's equations in an arbitrary non-inertial frame of reference

The equations of motion of an aircraft embracing its whole-body and deformational degrees of freedom

A suggestion as to a general derivation of the equations of motion of a deformable aircraft for small perturbations which will be most generally acceptable

Example of performance analysis using data obtained concurrently in air-path, body and earth axes

Equations for determining aircraft motions for accident data

Air to air helicopter fire control equations and software generation

Vibrations of a compressor blade with slip at the root

Determination of the character of the lateral-directional motion of an airborne towed vehicle

Weather modernization: A preliminary simulation study

Calculation of the transient motion of elastic airfoils forced by control surface deflections and gusts

Longitudinal stability and control in wind shear with energy height rate feedback

Equatorial Atmosphere

The effect of equatorial ionospheric disturbance on aircraft-to-satellite communications

EQUIPMENT SPECIFICATIONS

Protection and specification of clutches to be used with gas turbine generators

Design criteria for dry lubricated flight control bearings -- wear tests to make design analysis and check equipment specifications

Comparison of specifications for Head-Up Displays in the Navy A-4A, A-7E, AY-8A, and F-14A aircraft

Standard avionics packaging, mounting, and cooling baseline study

Materials for helicopter gears

An analysis of the future requirements for materials handling equipment in the military airlift command

Automatic test equipment

lightning research — electromagnetic effects of lightning on aircraft digital equipment

P-111 AIRCRAFT
Modelling of aircraft responses to EMP

P-114 AIRCRAFT
Development of a mission adaptive wing system for a tactical aircraft

P-115 AIRCRAFT
A-10/A FG digital bow-boost system safety analysis

Wind tunnel test to investigate aerodynamic hysteresis phenomena of the P-4 and T-11 aircraft models

Thrust vectoring to eliminate the vertical stabilizer — to provide directional stability for F-111 aircraft while decreasing radar detectability

A method of determining the degree of variation of a function, caused by a change in one of its arguments — Contribution to the problem of factor analysis of the increment in the special-purpose efficiency of an aircraft

Lightning research — effects of lightning on aircraft digital equipment

F-105 ENGINE
Longitudinal aerodynamic characteristics of a conformal variable-ramp inlet for the F-16 airplane

Effect of conventional and square stores on the longitudinal aerodynamic characteristics of a F-16 aircraft with supersonic speeds — in the Langley unitary plan wind tunnel

F-106 AIRCRAFT
Broadband electromagnetic sensors for aircraft
Failure tolerant design and test considerations in the engine structural integrity program — for aircraft turbines

Analysis of fault isolation criteria/techniques

Fault-tolerant system optimization

The objective necessity of the fail-safe design philosophy

Digital active controls for L-1011

Failure detection, isolation and indication in highly integrated digital guidance and control systems

Report on the FAA task force on aircraft separation assurance. Volume 2: Concept description

Failure Analysis

Reliability of aircraft disconnect joints — Russian book

Evaluation of the effectiveness of case-hardening gas-turbine-engine components on the basis of fatigue-failure similarity equations

Acceleration of multicycle fatigue testing on aluminum structural alloys

On determining the probabilities of the consequences of airplane system failures in evaluating the level of flight safety

Reliability pays off — reliability program case history for Lead Computing Optical Sight System for Northrop F-5-5 aircraft

Analysis of fault isolation criteria/techniques

Common Cause Failures — A dilemma in perspective

Some applications of the methods of failure mechanics in analyzing the strength and service life of aircraft structures

Risk and failure analysis for improved performance and reliability; Proceedings of the Twenty-fourth Sagamore Army Materials Research Conference, Baguette Lake, B.Y., August 21-26, 1977

On turbine blade creep and fatigue analysis by special kinematic assumptions

An Investigation of advanced prognostic analysis techniques — failure analysis and wear tests of mechanical drive gears

Ferrogaphic and spectrographic analysis of oil sampled before and after failure of a jet engine

A simulation program for the determination of system reliability of complex avionic systems

Failure analysis in aviation

The failure of aircraft structures

Far-ahead control approach (RFACON) primary input power supply study

Localization of faults in jet engines by calculation of component characteristics

An automatic fault identification system (AFIS) on board

Failure analysis

Some experience in the design and evaluation of ceramic combustion chambers

Significance of a rotor blade failure for fleet operation, inspection, maintenance, design and certification

Response of nonlinear panels to random loads

Failure Modes

Common Cause Failures — A dilemma in perspective

Software/Hardware Integrated Critical Path Analysis (ICPAD)

Reliability prediction techniques for second generation marine and industrial gas turbines

Incendescent lamp life under random vibration

Nonoperating failure rates for avionics study

Fault-Tolerant System Optimization

U Military Aircraft

Airfield

'Fish-edge' fairing structure — of aircrafts

Development of a Kovar/PBN-15 reduced drag DC-9 nose fairing

Influence of mistuning on blade torsional flutter

Far field monitor for instrument landing systems, acquisition and application of transonic wing and divide-tip noise

Far field radiation of AFT turbofan noise

Acquisition and application of transonic wing noise to on the radiated noise of a large wind turbine

Far-field radiation of AFT turbofan noise

Some calculated effects of non-uniform inflow on far-field test data for three-dimensional wind turbine

The study of an EMP dipole antenna type simulator

Far-field radiation of AFT turbofan noise

Some calculated effects of non-uniform inflow on the radiated noise of a large wind turbine

Failure analysis

Some experience in the design and evaluation of ceramic combustion chambers

Significance of a rotor blade failure for fleet operation, inspection, maintenance, design and certification

Response of nonlinear panels to random loads

In Soviet service. VII - Miyokon Foxbat --- Soviet Mig-25 program
p0066 A80-10900

The 'Viggen' multimode radar
p0077 A80-11171

Forward sweep - Rockwell's new broom
p0948 A80-13504

Some measurements of gun blast on a lighting aircraft
p0560 A80-18414

Experimental determination of pure rotary stability derivatives using curved and rolling flow wind tunnel
[AIAA PAPER 80-0309] p094 A80-18308

Effects of non-planar strake-wing on the vortex lift characteristics of a twin-flet fighter configuration
[AIAA PAPER 80-0329] p0955 A80-18318

Enhanced departure/ spin recovery of fighter aircraft through control of the forebody vortex orientation
[AIAA PAPER 80-0173] p0966 A80-18352

Multiple tactical aircraft combat performance evaluation system
[AIAA PAPER 80-0189] p0966 A80-18358

Missile design philosophy for fighter aircraft departure and spin resistance
[SAE PAPER 791081] p0194 A80-26637

Effects of forebody, wing and wing-body flowfields on high angle of attack aerodynamics --- Leading Edge extensions
[SAE PAPER 791082] p0194 A80-26638

Control system techniques for improved departure/spin resistance for fighter aircraft
[SACE PAPER 791107] p0194 A80-26669

An approach to the runway denial problem
[SACE PAPER 791108] p0196 A80-26665

Experience from testing the Viggen electronic systems utilizing existing computer capacity
[SACE PAPER 791081] p0196 A80-26650

Fundamentals of design. V - Fin design for combat aircraft
p0210 A80-27235

The light fighter market . . . and a European proposal
p0210 A80-27272

Induced effects of lightning on an all composite aircraft
p0212 A80-27783

Evolution of the hybrid wing - YF-17/F-18 type
[AIAA 80-0345] p0276 A80-31013

The crew adaptive cockpit - Firefox: D3535 A80-26405 --- technology assessment of aircrew/aircraft digital avionics systems in military aircraft
[NASA-CP-159223] p0324 A80-32446

A solid state /CCD/ cockpit television system
p0324 A80-34190

New developments in US military fighter engines
p0324 A80-34217

Unsteady airloads on a harmonically pitching wing with external store
[AIAA 80-0733] p0331 A80-35037

Active flutter suppression control law definition via least squares synthesis
[AIAA 80-0765] p0332 A80-35057

Wing/store flutter with nonlinear pylon stiffness
[AIAA 80-0792] p0334 A80-35075

Development and application concepts for trainer and combat-trainer versions of combat jet aircraft
[AIAA 80-0518] p0351 A80-35183

First results obtained by the ADB-BA Society on the rotating assembly of JRF Lille --- for wind tunnel aircraft spin testing
[AAAP PAPER 80-14] p0377 A80-36805

Limits of application of the damage tolerance concept to combat aircraft
[AAAP PAPER 80-32] p0379 A80-36866

Durable propulsion means more air power
[SACE PAPER 80-26405] p0385 A80-37484

Propulsion-system integration for tactical aircraft
[SACE PAPER 80-26405] p0385 A80-37483

Low cycle fatigue testing, a necessary part of advanced development --- for military fighter aircraft gas turbine engines
[AIAA PAPER 80-1153] p0399 A80-38940

A-184
FIRE RETTINGHOURS

subject index

[AD-80-730] p0035 NASA-80-24280

Design concept for fuel fire facility scale-down [NASA-TD-800624] p0037 NASA-80-32006

Electromagnetic vulnerability to fire released carbon fibers [NASA-TP-802219] p0065 NASA-80-33491

FIRE RETTINGHOURS

Comparative evaluation of firefighting foam agents — extinguishing kerosene fires [AD-80-78690] p0003 NASA-80-12353

FIRE FIGHTING

Advanced concept in aircraft crash firefighting using carbon tetrafluoride [AD-80-2936] p0045 NASA-80-24281

FIRE PREVENTION

Fire on board transport aircraft and passenger safety [NASA-80-2079] p0032 NASA-80-34787

Hybrid composites that retain graphite fibers on burning [NASA-80-1654] p0009 NASA-80-11654

Large-scale and small-scale flammability tests for airplane cabin materials [NASA-80-10264] p0027 NASA-80-32006

FIRE PROTECTION

Design concept for fuel fire facility scale-down [NASA-AD-807864] p0037 NASA-80-32006

FIRES

Cabin hazards from a large external fuel fire adjacent to an aircraft fuselage [AD-80-73069] p0036 NASA-80-11050

Behavior of lightly confined high explosives in a jet-fuel fire [OCHEL-52659] p0063 NASA-80-11247

Airflow effects on fires, part 2 [NASA-AD-70786] p0083 NASA-80-13196

The potential for damage from the accidental release of conductive carbon fibers from burning compositions [NASA-80-80212] p0027 NASA-80-18108

Approach to the design of the hazard — fire released carbon fiber electrical effects [NASA-80-19194] p0027 NASA-80-19194

Large-scale fiber release and elevated exposure experiments — aircraft fires [NASA-80-19198] p0027 NASA-80-19198

FLAMABILITY

Full-scale flammability tests with experiments on animals in the Aeronautical Test Center of Toulouse

Safety and comfort - The airliner cabin

Large-scale and small-scale flammability tests for airplane cabin materials

Aircraft fuel system simulator tests with antistatic kerosene (Jet A fuel with FS-9 additive) - flammability tests

Assessment of the flammability of aircraft hydraulic fluids

Evaluation of existing flammability test methods by comparison of the flammability characteristics of interior materials

Antistatic kerosene --- reduced flammability during aircraft accident circumstances

Hybridized polymer matrix composites

Electronic equipment vulnerability to fire released carbon fibers

FLAMMABLE GASES

ST GASOUS FUELS

FLASH CONTROL

U AIRCRAFT CONTROL

U FLAPS (CONTROL SURFACES)

FLAPPING

Propulsion characteristics of flapping wings

Experimental study of flapping wing lift and propulsion

Flapping response of lifting rotor blades to spanwise nonuniform random excitation

Works on theory of flapping wing --- considering boundary layer

Comparison of calculated and measured helicopter rotor lateral flapping angles

Examination of the flap-lag stability of rigid articulated rotor blades

Effects of primary rotor parameters on flapping dynamics

FLAPS (CONTROL SURFACES)

ST EXTERNALLY BLOWN FLAPS

ST JET FLAPS

ST LEADING EDGE FLAPS

ST TRAILING-EDGE FLAPS

WING FLAPS

Selecting the geometric parameters and position of a nose flap on the root profile of a swept wing using tunnel test data, part 2

Selection of geometric parameters and location of nose flap on swept wing root profile from tunnel test data, 1

Leading edge vortex-flap experiments on a 74 deg delta wing

Direct side force and drag control with the aid of pylon split flaps

In-flight measured characteristics of combined flap-spudder direct lift controls

Some investigations concerning the effects of gaps and vortex generators on elevator efficiency and of landing flap sweep on aerodynamic characteristics

Summary of data required for the AGARD REP activity standard aerelastic configurations - two-dimensional configurations

FLAP LAMPS

A comparison of underwater helicopter-escape lights

FLASH TUBES

U FLASH LAMPS

FLAT PLATES

Design of flat plate leading edges to avoid flow separation

Heat transfer at a breaking point of the leading edge of a plate in hypersonic flight

Jet decay rate effects on hover jet-induced loads

An experimental study of two-dimensional supersonic jet impingement on a flat plate

FLAT SURFACES

Experimental facility for studying the thermal effect of supersonic gas jets on targets

Construction of cyclic and rigid surfaces by the method of generalized inversion

PLAN DESTRUCTION

U NONDESTRUCTIVE TESTS

PLANS

U EFFECTS

FLLEXIBILITY

Effect of a flexibly mounted store on the flutter speed of a wing

Flexible Bodies

Technical options for flexible dirigibles

Load specifications for the envelopes of a captive balloon and flexible airship

Demonstration of a unified approach to the balancing of flexible rotors

Identification of flexible aircraft from flight data

Contribution to the theory of a rotor spinning on a flexible shaft

Surface conforming thermal/pressure seal --- for control devices in space vehicles

Handling qualities of large flexible control-configured aircraft

Development of flexible rotor balancing criteria

Flexible Wings

Experimental and theoretical investigation of the lifting properties of a wing of deformable profile

Analyses and tests of the B-1 aircraft structural mode control system

SUBJECT INDEX
FLIGHT HAZARDS

Lightning protection for aircraft
Further encounters with clear air turbulence in research aircraft
Aircraft icing during low-level flights
Development of wind shear models and determination of wind shear hazards
Computer simulation of canopy-pilot response to bird-strike
Landing system reliability and safety models
Atmospheric electricity interactions with aircraft: An overview
Aircraft mishap experience from atmospheric electricity hazards
The coupling of lightning fields into aircraft and cables
Protection of aircraft avionics from lightning indirect effects
Lightning effects on aircraft: A cockpit perspective
Basic phenomenology of electrical discharges at atmospheric pressure
Static charging effects on avionic systems
Alleviation techniques for effects of static charging on avionics
Aircraft static charging testing
Aircraft crashworthiness studies: Findings in accidents involving an aerial research aircraft

FLIGHT INSTRUMENTS

Electronic flight instrument system for B-767/757 aircraft
P-4 radar altimeter aural warning
In-service improvements and modernization of all components of the instrument landing systems. Volume 1: Sections 1-10
In-service improvements and modernization of all components of the instrument landing systems. Volume 2: Sections 11 and 12
Aspects of flight test instrumentation - methods to derive aircraft performance and stability and control characteristics
Reliability and maintainability improvement program for the AV-8A HAT/RA barrier head-up display set. Volume 2: Modifications to display set control, C10626/AV9-30(V)

FLIGHT PATHS

Perception of aircraft separation with pilot-preferred symbology on a cockpit display of traffic information
Flight load recorders
Expanded study of feasibility of measuring in-flight 747/767 loads, performance, clearance, and thermal data
The application of a parametric method of fatigue load measurement to wings based on flight measurements of a Lightning RA 75
Flight through thunderstorm outflow
Pressure distribution in rectangular wing /blade sections due to curvilinear motion in an incompressible medium
Laboratory studies of flight mechanics using models in free flight
Bifurcation analysis of aircraft high angle-of-attack flight dynamics
Concepts for generating optimum vertical flight profiles
Summary of transponder data performance tests'

FLIGHT OPERATIONS

The importance of runway capacity - an analytical approach
Flight management systems
Aircraft operations and logistics simulation
Allocating and accommodating small aircraft operations in the Baltimore-Washington Bi-region
Approach procedures --- human factor considerations for safe landing of aircraft
Chart design and flight procedures standardization
Summary of transponder data --- performance tests of transponders and altimeters during flight operations

FLIGHT OPTIMIZATION

Nederlandse Vereniging voor Luchtvaarttechniek, Yearbook 1976
Soaring flight optimization theory and an application in sailplane design
Analytical and numerical studies of the effect of aircraft design parameters on the geometry of the circular transition-curve of an optimized transition- and climb-path for the jet-aircraft takeoff
Periodic optimal cruise of a hypersonic vehicle
Impact of longitudinal flying qualities upon the design of a transport with active controls
Beaver aircraft parameter identification: Technical preparations and preliminary results
Minimizing the cost of operating aircraft on multi-stop tours

FLIGHT PATHS

Constrained optimum trajectories with specified range
Analytical and numerical studies of the effect of aircraft design parameters on the geometry of the circular transition-curve of an optimized transition- and climb-path for the jet-aircraft
FLIGHT PERFORMANCE

FLIGHT SIMULATORS

touchdown-performance data (NASA-TP-1541) p0038 880-11069

Manned engineering flight simulation validation, part 2: Software user's guide (AD-A0771395) p0042 880-11105

Evaluation of transponder antenna coverage/VTRCS during simulated flights of aircraft (AD-A0735477) p0043 880-11275

Flight simulation fatigue crack propagation evaluation of candidate lower wing skin materials with particular consideration of spectrum truncation (NLTR-TR-77092-0) p0044 880-11520

V/STOL flight simulation (NASA-ES-81156) p0072 880-12100

Detonation in ground facilities of aerodynamic stability parameters of aircraft (AD-A0-26) p0072 880-12102

Review and evaluation of national airspace system models (AD-A0780505) p0176 880-17047

Piloted flight simulation study of low-level wind shear, phase 4. All-weather landing systems, engineering services support project, task 2 (AD-A077166) p0180 880-17080

Application of the Estimation-Before-Modeling (EBM) system identification method to the high angle of attack/sideslip flight of the T-2C jet trainer aircraft. Volume 2: Simulation study using T-2C wind tunnel model data (AD-A0799223) p0235 880-19061

Remarks on simulation. Objectives, areas of non-possibilities, limitations: An overview (AD-A255182) p0253 880-19812

Simulation of a night vision system for low level helicopter operations -- using helmet mounted display device (AD-A0805859) p0269 880-20242

Rotorcraft flight simulation, computer program C81. Volume 3: Programmer's manual (AD-A077345) p0291 880-20262

Evaluation of a Central Data Entry System (CDES) for transport aircraft (DUVB-PS-79-23) p0304 880-21298

An improved prediction model for the noise generated in flight by circular jets (NASA-TP-81870) p0310 880-22046

Preliminary investigation of motion requirements for the simulation of helicopter hover tasks (NASA-TP-81801) p0347 880-22034

Rotorcraft flight simulation, computer program C81. Volume 1: Engineer's manual (AD-A079631) p0348 880-22312

Rotorcraft flight simulation, computer program C81. Volume 2: User's manual (AD-A079632) p0348 880-22313

Air combat maneuvering performance measurement (AD-A077424) p0356 880-23336

Hybrid computer errors in engineering flight simulation (AD-A0819552) p0419 880-24077

A polychromatic reconfigurable simulator for parallel simulation (NASA-CH-163185) p0428 880-25010

Imaging display in the non-precision approach (NASA-TP-81167) p0479 880-26296

Low cost simulation of piloting tasks (AD-A0800856) p0483 880-26332

Heat reclamation from flight simulators (AD-A081754) p0488 880-26339

Application of flight simulator record/playback feature (AIAA 80-1568) p0484 880-26335

A pilot's assessment of helicopter handling-quality factors common to both agility and instrument flying tasks (NASA-TR-81217) p0532 880-29341

An experimental evaluation of head-up display formats (NASA-TP-1550) p0533 880-29349

Wesner helicopter/sonar dynamics study ARL program description and operation (ARL/ARO-WRS-365) p0545 880-29288

A head-up display format for application to transport aircraft approach and landing (NASA-TR-81199) p0546 880-29295

Helicopter electro-optical system display requirements. 2: Performance of helicopter pilots when using a low-light-level television system during simulated nap-of-the-earth flight (AD-A086855) p0590 880-30308

Store separation testing techniques at the Arnold Engineering Development Center. Volume 4: Description of dynamic drop store separation testing (AD-A087490) p0599 880-31358

A simulation investigation on the feasibility of curved approaches under Microwave Landing System (MLL) guidance (NLTR-TR-70035-0) p0601 880-31380

Effects of rotor parameter variations on handling qualities of unaugmented helicopters in simulated terrain flight (NASA-TP-81830) p0605 880-31407

Flight simulation fatigue crack propagation in 7010 and 7075 aluminum alloy plate (NLTR-TR-70035-0) p0611 880-31807

Development of high lift devices for application to advanced Navy aircraft (AD-A082247) p0633 880-32302

Experimental techniques in unsteady aerodynamics (AD-A082247) p0633 880-32373

Pilot/vehicle model analysis of simulation and motion cue requirements in flight simulation --- helicopter hovering (NASA-CH-3312) p0646 880-33398

Validation of the rotorcraft flight simulation program (C81) using operational loads survey flight test data (AD-A089908) p0650 880-33242

Effects of criteria on flight simulation study 1: Heading deviation tolerance (AD-A089896) p0650 880-33243

Dynamic evaluation of experimental integral fuel-tank sealants, part 1 (AD-A080573) p0651 880-33573

FLIGHT SIMULATORS

HY COCKPIT SIMULATORS

The impact of the limits of simulation in extending the use of simulators in training (AD-A077817) p0004 A80-10763

Recent and future engineering developments in flight training simulators (AD-A078817) p0005 A80-10776

The interrelationships between engineering development simulation and flight simulation --- aircraft design development simulator technology transfer to flight simulator and training program improvements (AD-A080005) p0005 A80-10777

Controllers for aircraft motion simulators (AIAA PAPRE 80-0050) p0092 A80-18252

Airliner simulator census (AD-A077424) p0166 880-24872

New requirements, test techniques, and development methods for high fidelity simulation of commercial transports (AIAA 80-0445) p0200 880-26999

Instrumentation for a tactical aircraft air-to-ground full-mission simulation (AIAA 80-1568) p0264 880-29999

High-resolution intensified video for low light level applications --- in aircraft flight simulators (AIAA 80-044630) p0508 880-46630

A non-Gaussian atmospheric turbulence model for flight simulator studies of aircraft handling qualities (AIAA 80-1568) p0515 880-45657

SUBJECT INDEX
Application of existing roll response criteria to transport aircraft with advanced flight control systems

Advanced simulator for pilot training (ASPT): G-seat optimization

Manned engineering flight simulation validation, Part 1. Simulation requirements and simulator motion system performance

Training effectiveness of the CH-47 flight simulator

Simulation for air-to-air combat motion system investigation

Perception and performance in flight simulators: The contribution of vestibular, visual, and auditory information

Manned engineering flight simulation validation, part 2: Software user's guide

Application of modified profile analysis to flight testing of the motion/no-motion issue in an aircraft ground-handling simulation --- statistical analysis procedure for man machine systems flight simulation

Effects of varying visual display characteristics of the T-45, a T-37 flight simulator

Feasibility and concept study to convert the NASA/AMES vertical motion simulator to a helicopter simulator

STABILITY: A system of equations for the simulation of aircraft in a modular environment

The influence of simulator motion wash-out filters on the performance of pilots when stabilizing aircraft attitude in turbulence

Computer synthesis of flight simulation visuals

Design of a simulator for studying the helicopter - SDVR

Cost-effectiveness of flight simulators for military training

Using a language developed for aircraft simulators --- advantages and disadvantages of using FORTRAN and assembly language

BACTAC: A combat-worthy computerized opponent

Pilot assessment of two computer-generated display formats for helicopter instrument approach

Applications manual: Vertical Motion Simulator (VMS) 3.08

NATURVACCS dynamic flight simulator design and development plan

Wind-shear encounters during visual approaches at night. A piloted simulator study

Aeronautical systems technology needs-test facilities and test equipment

An evaluation of aircraft separation assurance concepts using airline flight simulators

An evaluation of aircraft separation assurance concepts using airline flight simulators. Volume 1: Study report

An evaluation of aircraft separation assurance concepts using airline flight simulators. Volume 2: Appendices

Development of simulator instructional feature design guidelines

The use of simulators for training in-flight and emergency procedures

V/STOL equivalent systems analysis

High-g declination from flight simulator study summary

Advanced simulator for pilot training: Design of automated performance measurement system

FLIGHT STABILITY TESTS

Stability of asymmetric equilibrium flight states

Helicopter stability and control test methodology

Comparison of stability and control parameters for a light, single-engine, high-winged aircraft using different flight test and parameter estimation techniques

Perception and performance in flight simulators: An evaluation of aircraft separation assurance

VFLIGHT STABILITY TESTS

Flight stability test instrumentation

FLIGHT TESTS

FLIGHT TECHNICAL ERROR

FLIGHT TEST INSTRUMENTS

Are we spending too much on flight test instrumentation

HIDS - The right tool for small test jobs --- Miniature Integrated Data Systems for In-flight testing

A low cost airborne data acquisition system

Airborne video instrumentation/data reduction systems utilizing existing computer capacity

Firebrand anti-ship missile target - Flight test program objectives and vehicle instrumentation requirements

From tape measure to computer tape --- development of flight recorders

Determination of instrumentation errors from measured data using maximum likelihood method

Ballistic flight test instrumentation

Determination of the aerodynamic characteristics of a flight vehicle from onboard measurement data

Flight research techniques utilizing remotely piloted research vehicles

FLIGHT TESTS

FLIGHT STABILITY TESTS

Microprocessors as aircraft fatigue monitors

Instrumentation for the determination of aircraft performance from dynamic maneuvers
Stochastic response secondary surveillance radar
Sone measurements of gun blast on a lighting aircraft
Estimation of the accuracy of dynamic flight-determined coefficients
Flight certification of the Cessna T205G amphibious floatplane
Flight and wind tunnel test results of the mechanical jet noise suppressor nozzle
Development and flight test of a two-place flight and wind tunnel tests
Local skin friction and static pressure on a swept wing in flight
New requirements, test techniques, and development methods for high fidelity flight simulation of commercial transports
Control and data acquisition aircraft for AICM flight tests---Air Launched Cruise Missile
Wind tunnel and flight test drag comparisons for a guided projectile with cruciform tails
Achieving effective Radar Cross Section flight profiles on the B-1 aircraft
First experience with telemetry and real-time data reduction at Gales Filetjet
Tactical navigation system testing
Testing the F-18 at the U.S. Naval Air Test Center
Helicopter crash position indicator flight trials
Aircrew motion analysis using limited flight and radar data
P/F-18 status report
Night/Adverse Weather A-10 evaluator program
F-16 European test and evaluation
General aviation icing flight test
The development of the world's first triengine business jet, the Mystere Falcon 50
CI-600 Challenger
Review of five years of flight testing the B-1 aircraft
Composite components on commercial aircraft
Instrumentation and techniques for parachute wind tunnel testing
Cockpit Display of Traffic Information
Airborne FLIR -- Experiences from flight tests
Practical design considerations for a flightworthy higher harmonic control system --- for flight testing on OH-6A helicopters
Synthesis of test results on the Concord at high angle of attack
Recommendations for obtaining nozzle/afterbody drag data based on comparison of wind tunnel and flight data
Results from flight noise tests on a Viper turbine fitted with a jet engine suppressor nozzle systems
Flight tests for the study of radioelectric perturbations of electromotive origin
Flight test of all-electronic propulsion control system
Effects of discontinuous drooped wing leading-edge modification on the spinning characteristics of a low-wing general aviation airplane
Determination of an angle of attack sensor correction for a low-wing general aviation airplane at large angles of attack as determined from wind tunnel and flight tests
Certification of avionics systems on the commercial airplanes of the 1980's
Prediction of unconfined jet engine exhaust noise from static data
Investigation of flight characteristics of the NCA/Tornado in the framework of the official flight testing, II
Investigations of the NCA/Tornado flight characteristics within official flight tests, II
Night/Adverse Weather A-10 at the cross-roads
Development and flight evaluation of automatic flare laws with improved touchdown dispersion
Forward swept wing flight demonstrator
A study of stall detent systems for general aviation aircraft
A dynamic analysis of the motion of a low-wing general aviation aircraft about its calculated equilibrium flat spin node
Spin profile tailoring for the improved 2.75-inch rocket
A variational technique for smoothing flight-test and accident data
A number of in-flight evaluation of control system time delays during landing using the Y-8 OPV airplane
Low order equivalent models of highly augmented aircraft determined from flight data using maximum likelihood estimation
Determination of an oblique wing aircraft's aerodynamic characteristics
Identification of flexible aircraft flight data
Identification of aerelastic parameters using a recursive sequential least squares method
Parameter identification of B-52E CCV flight test data including aerelastic effects
The agricultural aircraft PFL-106A and its testing at the agricultural aviation factory of INTERBLOC
Application of high-alpha control system concepts to a variable-sweep fighter airplane
Study of the feasibility aspects of flight testing an aerodynamically tailored forward swept research wing on a BQM-34 drone vehicle
Feasibility tests of use of the trio turbo-3 aircraft for arctic KEP drops
Flight flutter testing
Evaluation of seating and restraint systems conducted during fiscal year 1978
Beaver aircraft parameter identification: Technical preparations and preliminary results
Flight test of navigation and guidance sensor errors measured on STOL approaches
FLIGHT TESTS

Asymptotic integration of multicomponent chemical-in equilibrium boundary layer equations

---- hypersonic gas flow analysis

A method for assessing the impact of wake vortices of OAYA aircraft operations

Viscous flow in the region of a rounded trailing edge

Data report for a test program to study transonic flow fields about wing-body/pylon/store combinations. Volume I: Tunnel empty flow survey data, wing body force/moment/surface pressure data, and pressure store force/moment/surface pressure data

Viscous flowfields induced by two- and three-dimensional lift jets in ground effect [AD-A077872]

Laser-based flow-field diagnostics of two large hypersonic test facilities [AD-A078289]

An investigation of the quality of the flow generated by three types of wind tunnel (Ludwig tube, Swan clean tunnel and injector driven tunnel)

Wake flowfields for Jovian probe [NASA-CN-159235]

Operational implications of some NASA/NASA rotary wing induced velocity studies [NASA-TR-80232]

The development of rapid predictive methods for three-dimensional transonic flow fields about fighter bomber aircraft, part I [AD-A078583]

The graphical display of multi-dimensional aerodynamic flow field data [AD-A080359]

Study of rotor wakes at very low advance ratio [AD-A080717]

Aerodynamic performances of three fan stator designs operating with rotor having tip speed of 337 meters per second and pressure ratio of 1.54. Relation of analytical code calculations to experimental performance [NASA-TP-16194]

Lee side flow over delta wings at supersonic speeds [NASA-TR-81187]

Lee side flow for slender delta wings of finite thickness [NASA-TR-75755]

Wind tunnel measurements of the mean flow in the turbulent boundary layer and wake in the region of the trailing edge of a swept wing at subsonic speeds [NASA-TR-75062]

Flow visualization techniques in the Airborne Laser Laboratory program

Mutual interference of multiple bodies in the flow field of the F-2C aircraft in the transonic speed range — wind tunnel tests [AD-A084708]

Calculation of high speed inlet flows using the Navier-Stokes equations. volume 2: User's and programmer's guide [AD-A084790]

Analysis and testing to improve the flow from the plenum of a subsonic cascade wind tunnel [AD-A084671]

The effects of ground wall-jet characteristics on fountain upwash flow formation and development [NASA-AED-86127]

Flow quality for Turbine Engine Loads Simulator (TELS) facility [AD-A086084]

Calculations by a first order theory of supersonic flow around delta wings [FFA-TR-80-410]

Flow visualization study of the IHAT BPUH [NASA-CR-163094]

An experimental study of multiple jet mixing [NASA-CR-163537]

Computation of steady inviscid transonic flows using pseudo-unsteady methods [OKNEVA, TP NO. 1975-156]
Flow measurements in a turbine scroll

Calibration of a two probe synchronous sampling technique for measuring flows behind rotors

A three-dimensional Laser Doppler Velocimeter (LDV) for use in wind tunnels

Laser anemometer measurements in a transonic axial flow compressor rotor

Fluid and structural measurements to advance gas turbine technology

Impact of new instrumentation on advanced turbine research

Experimental and numerical study of the flow in an air intake at high incidence

Influence of the heterogeneity of flow at the rotor outlet on the performance of the diffuser of a centrifugal compressor

Formulation of a 1980-1970 model

Prediction and measurement of turbulent aerodynamic trailing edge flows

Unsteady wake of a plunging airfoil

Aerodynamic losses in a gas turbine stage with film cooling

Temperature and flow measurements on near-freezing aviation fuels in a wing-tank model

A review of current methods and problems in making gas path measurements in aircraft gas turbine engines

Boundary layer studies on highly loaded cascades using heated thin films and a traversing probe

Measurement of the Reynolds stress tensor using a single rotating slanting hot wire

Aerodynamic investigations of a bypass turbofan stage

Measurements and calculations of the isothermal flow in axisymmetric models of combustor geometries

Aerodynamic characterization of free jets

Flow measurements in a rotating stall cell

Temperature and flow measurements on near-freezing aviation fuels in a wing-tank model

Effect of tip geometries on blade loading characteristics of a two-bladed rotor in hover

Hot film anemometry. A bibliography with abstracts

An investigation of the quality of the core of a rolled-up vortex sheet

Aero-thermodynamic measurements in a wind tunnel (Langley Research Center 8-Foot Transonic Tunnel)

A combined parallel-digital and pulse-duration modulated fuel metering system

Turbine flowmeters and their applications at the Naval Air Propulsion Center

Holographic flow visualization. Citations from the Engineering Index data base

Novel approaches for alleviation of electrical hazards of graphite-fiber composites — aircraft safety

The 737 graphite composite flight spoiler flight service evaluation

Preliminary design of graphite composite wing panels for commercial transport aircraft

Composite material application to the L-1011 aircraft wing substructure

Application of composite materials to the JT9D engine fan exit guide vanes

High voltage spark carbon fiber detection system

Study of the influence of hole quality on composite materials

SUBJECT INDEX
GROUNDED EFFECT MACHINES

A nonlinear unsteady one-dimensional theory for wings in extreme ground effect

Major results of the asymptotic theory of a low-flying wing - Method of matched asymptotic expansions

A technique for simulating the motion and ground effect of aircraft wake vortices

VSTOL in-ground effect flows for closely spaced jets

The criticality of engine exhaust simulations on VSTOL model-measured ground effects

Effect of sweep and aspect ratio on the longitudinal aerodynamics of a spanloader wing

Fluid flow fields induced by two- and three-dimensional lift jets in ground effect

Ground plane effects on a contoured surface at low subsonic velocities

VSTOL propulsion-induced aerodynamics hover calculation method

Analysis of the effect of time selection of a signal reflected from a surface on the accuracy of ground speed measurements

Ground effect machines

The hovercraft comes of age

JEPP(A) mixed-flow model fan performance optimization

Research on the stability of air cushion systems

Air cushion craft development, first revision

Conceptual point design study of a new VSTOL STOLS vehicle

Computer simulation of an air cargo small package sorting system

Models for freight access to air terminals

Air cargo container utilization optimization through modeling

GROUND SPEED

Analysis of the effect of time selection of a signal reflected from a surface on the accuracy of ground speed measurements

GROUND STATIONS

Method for increasing the accuracy of an airborne geodetic radio rangefinder

Communication to RPVs data link design for information transfer from ground terminal or other RPV

Experience in producing software for the ground station of a remotely piloted helicopter system

Standard engineering installation package. Air Traffic Radio Channel Control (ATRCC) equipment

GROUND SUPPORT EQUIPMENT

Hyzdrants or airfield fuelers

The operation of airports: Maintenance and upkeep / Handbook / Russian book on maintenance and repair

SUBJECT INDEX

WEL - An international approach to range instrumentation support --- Worldwide Engineering and Logistics Support

BACIS - A new lighting control system for Gatwick

Airport equipment and know-how from England - An airport forum survey

Down to earth operations centralized ground-based power distribution systems for aircraft fuel savings

Compilation of data covering aircraft servicing facilities aboard aircraft and amphibious aviation ships

Design and fabrication of a Helicopter Ground Mobility System (HMS)

Increased standardization would reduce costs of ground support equipment for military aircraft

GROUND SUPPORT SYSTEMS

Controlling the technical servicing at an air technical base

Airport ground access

GROUND TESTS

Flight Cold Flow Tests

FLY STATIC Firing

Test and analysis of the ASALS-PTV insulated combustion chamber

The practical aircraft hydraulic test stand

Have Bounce - validation of computer simulations of F-4 dynamic response to multiple runway repairs

A quick look at current results of accelerated mission tests for gas turbine engines

New methods for ground tests of aeronautical structures

A simplified ground vibration test procedure for sailplanes and light aircraft

The minimum cost approach to flutter clearance

Improved test methods for determining lightning-induced voltages in aircraft

GROUND-AIR GROUND COMMUNICATIONS

Crew collisions

Present-day problems of air traffic control in ground-to-air communications

ATC flow management - Fuel is the core and data links the key

The Discrete Address Beacon System (DABS) data link --- surveillance and communication system for ATC

FAA lightning protection study: Report of investigations relative to providing lightning protection for the Remote Center Air-to-Ground (RCAG)

Comparison of measured data with IP-77 propagation model predictions

High frequency communication to small low flying aircraft

Enhanced Terminal Information Services (ETIS) utilizing the Discrete Address Beacon System (DABS) data link-concept description

JTIDS: An integrated communications navigation and identification system, and its potential for air traffic management

H-53 HELICOPTER
A compilation and analysis of helicopter handling
SUBJECT INDEX

AIRCRAFT DESIGN

AIRCRAFT ATTITUDE INDICATORS

AIRCRAFT CONTROL

Analysis of rotor-fuselage coupling and its effect on rotorcraft stability and response

EBC in lightweight helicopters: Special problems and experience in design and control

Active control of rotor blade pitch for vibration reduction — wind tunnel demonstration

Future of helicopter rotor control

The promise of multicyclic control for helicopter vibration reduction

A hybrid composite helicopter main rotor blade employing pneumatic lift control

A simple system for helicopter individual-blade-control and its application to gust alleviation

Multicyclic control for helicopters — Research in progress at Ames Research Center

Multicyclic control of a helicopter rotor considering the influence of vibration, loads, and control motion

Practical design considerations for a flightworthy higher harmonic control system — flight testing on OH-6A helicopter

The stability and control characteristics of the aerocore hybrid heavy lift vehicle

Thanks, Coast Guard — We needed that — Short Range Recovery Helicopter avionics

A model for helicopter guidance on spiral trajectories

The dynamics of a helicopter flight in limiting conditions

A critique of handling qualities specifications for U.S. military helicopters

AIRCRAFT SIMULATION

A composite helicopter design test methodology

A compilation and analysis of helicopter handling qualities data — Volume 1: Data compilation

Pilot assessment of two computer-generated display formats for helicopter instrument approach

The design, testing and evaluation of the MIT individual-blade-control system as applied to gust alleviation for helicopters

Navigation, guidance, and control for helicopter automatic landings

A comprehensive analytical model of rotorcraft aerodynamics and dynamics. Part 3: Program manual

HELI-CoPTER DESIGN

Analytical methodology for determination of helicopter IFB precision approach requirements

A pilot’s assessment of helicopter handling-quality factors common to both agility and instrument flying tasks

Analytical design and evaluation of an active control system for helicopter vibration reduction and gust response alleviation

A mathematical representation of an advanced helicopter for piloted simulator investigations of control system and display variability

Effects of rotor parameter variations on handling qualities of un-augmented helicopters in simulated terrain flight

A simulator study of control and display augmentations for helicopters

Advanced rotorcraft noise

Experimental study of electrostatic dischargers for helicopters

Aerospatiale’s double squirrel twin engined helicopter

A nonlinear observer/command generator tracker

HASA gear research and its probable effect on helicopter hovering

Analysis of rotor-fuselage coupling and its effect on rotorcraft stability and response

EBC in lightweight helicopters: Special problems and experience in design and control

Active control of rotor blade pitch for vibration reduction — wind tunnel demonstration

Future of helicopter rotor control

The promise of multicyclic control for helicopter vibration reduction

A hybrid composite helicopter main rotor blade employing pneumatic lift control

A simple system for helicopter individual-blade-control and its application to gust alleviation

HELICOPTER ENGINE

Opportunities for development of future helicopter operations
[S A E P A P E R 000742] p0575 A80-49692

Computer program to prepare airfoil characteristic data for use in helicopter performance calculations
[S A E P A P E R 000743] p0576 A80-49695

Effects of primary rotor parameters on flapping dynamics
[S A E P A P E R 000744] p0576 A80-49698

Synthesis of unsteady aerodynamic problems concerning helicopters
[S A E P A P E R 000746] p0576 A80-49699

The potential use of helicopters in an airline role
[S A E P A P E R 000747] p0576 A80-49691
A simple system for helicopter individual-blade-control and its application to gust alleviation [ILAA 80-06661]

Vibration reduction with higher harmonic blade feathering for helicopters with two-bladed teetering and four-bladed hingeless rotors [ILAA 80-06701]

Multicycle control for helicopters - Research in progress at ARMS Research Center [ILAA 80-06711]

Design, manufacturing, and operational behaviour of helicopter composite blades p0041 A00-40465

Helicopter wakes

Unsteady wake behind a profile at variable incidence [AAAP PAPER 80-10]

Prediction of helicopter rotor downwash in hover and vertical flight [ABL/AEREO-HEPT-150]

Operational implications of some NACA/NASA rotary wing induced velocity studies [NASA TM-80232]

Study of rotor wakes at very low advance ratios [ADB-A080711]

Comparison of calculated and measured model rotor loading and wake geometry [NASA TM-81110]

Development and validation of a combined rotor fuselage induced flow field computational method [NASA TP-1656]

Millicycle control for helicopters - Research in progress at ARMS Research Center [ILAA 80-06711]

Design, manufacturing, and operational behaviour of helicopter composite blades p0041 A00-40465

Helicopters

Helicopters breaking the 200 km barrier - Three systems could do it this decade p0572 A00-4625

Corrosion fatigue behavior of coated 8340 steel for blade retention bolts of the AH-1 helicopter p0572 A00-48935

Helicopters - A solution to urban commercial transportation needs [SAE PAPER 800739]

Mechanical components p0029 N80-10213

Prediction of helicopter rotor downwash in hover and vertical flight [ABL/AEREO-HEPT-150]

New aircraft technology: Report on the Fairchild International Air Show [FBA-293845/0]

Helicopter canopy internal reflection investigation [A07038]

Computer description of Black Hawk helicopter [AD-A073444]

Application of the SIS concept to Navy helicopters - systems analysis of flight data recorders of flight conditions of helicopters for structural analysis [AD-A074801]

Feasibility and concept study to develop the NASA/ARMS vertical motion simulator to a helicopter simulator [NASA CR-152193]

Experimental study of the aerodynamics of a helicopter rotor blade model in a unsteady flow regime during wind tunnel tests [AAFP-39-79-27]

Airborne evaluation of the production AH/ABN-133

Design study of prestressed rotor spar concept [NASA CR-15086]

Investigation of the crash-impact characteristics of advanced airframe structures [AD-A075163]

Detailed design and fabrication of a Helicopter Ground Mobility System (GMS) [AD-A076932]

A study of the canopy design for the advanced attack helicopter by use of computer graphics [AD-A076291]

NADC ABC rotor maps [AD-A078802]

Simulation of a night vision system for low level helicopter operations -- using helmet mounted display device [A075804a]

Botocraft flight simulation, computer program C81.

Volume 3: Programmers manual [A077345]

Cost analysis of a helicopter transmission and drive train [AD-A080518]

Preliminary investigation of motion requirements for the simulation of helicopter hover tasks [NASA TM-81801]

Parametric study of helicopter aircraft systems costs and weights [NASA CR-152315]

The effect of shaft angle on performance of a circulation control high-speed rotor at an advance ratio of 0.7 [AD-A080953]

Investigations into an active vibration isolation system for helicopters with rigid and elastic airframe modelling [ASA TT-531]

The verification of a computer model of internal light reflections for helicopter canopy design [AD-A080473]

Decision analysis of Advanced Scout Helicopter candidates [AD-A080483]

Investigations of the design of active vibration isolation systems for helicopters with rigid and elastic modelling of the fuselage [ASA TT-556]

A-233

Lateral rollover protection concepts
[A-D0-80-0367] p0046 880-24284

Helicopter remote wind sensor flight test Results
[A-D0-827470] p0040 880-24313

Materials for helicopter gears

Sensor for measuring instantaneous angle of attack of helicopter blades

Evaluation of new materials for rotor hub journal bearings -- self lubricating materials
[A-D0-813798] p0049 880-25665

The design concept and experimental results using the intime 8080/8085 microprocessor -- gas turbine engine fuel control
[A-D0-80-0367] p0041 880-26315

Heat reclamation from flight simulators
[A-D0-80-0367] p0048 880-26334

Helicopter air traffic management system with civil/military interoperability
[A-D0-80-0367] p0091 880-27326

Study of cost/benefit tradeoffs available in helicopter noise technology applications
[A-D0-835955] p0045 880-27354

Air to air helicopter fire control equations and software generation
[A-D0-80-0367] p0046 880-27359

System description and analysis. Part 1: Feasibility study for helicopter/VTOL wide-angle simulation image generation display system
[NASA-CR-152376] p0049 880-27397

Assessment of the environmental compatibility of differing helicopter noise certification standards
[A-D0-80-0367] p0050 880-29173

A comprehensive analytical model of rotorcraft aerodynamics and dynamics. Part 1: Analysis development
[NASA-FR-81182] p0052 880-29296

Flight evaluation of a radar cursor technique as an aid to airborne radar approaches
[A-D0-80-0367] p0053 880-28331

A pilot's assessment of helicopter handling-quality factors common to both agility and instrument flying tasks
[NASA-TM-81217] p0052 880-28361

Conceptual design of a helicopter composite truss tail boom
[A-D0-80-0367] p0052 880-28342

Impact of modern materials on the development of helicopters
[SA-75-210-123] p0053 880-28347

Advanced subsystem status monitor
[A-D0-813798] p0054 880-28351

A mathematical representation of an advanced helicopter for pilot simulator investigations of control system and display variations
[NASA-FR-81203] p0056 880-28371

Whexx helicopter/sonar dynamics study ARL program description and operation
[ARL/ARNO-NOTE-385] p0054 880-29268

Non-contacting electro-optical contouring of helicopter rotor blades
[A-D0-80-0367] p0056 880-29293

An experimental investigation of the effects of aeroelastic couplings on aeroelastic stability of a helicopter rotor blade
[A-D0-80-0367] p0056 880-29294

Investigation of helicopter wire strike protection concepts
[A-D0-80-0367] p0056 880-30285

Evaluation of forged helicopter components processed with controlled solidification and thermal mechanical treatments
[A-D0-80-0367] p0056 880-30302

Helicopter electro-optical system display requirements. 2: Performance of helicopter pilots when using a low-light-level television system during simulated nap-of-the-earth flight
[A-D0-80-0367] p0059 880-30308

Progress report 3 of cooperative program for design, fabrication, and testing of high modulus composite helicopter shafting
[NASA-TM-82272] p0062 880-31387

Wessex modernization: A preliminary simulation study
[A-D0-87799] p0066 880-31410

Reduction in swing of a sonar body received from the sea by a helicopter
[AIAA-80-0367] p0608 880-31668

Aerodynamic characteristics of three helicopter rotor airfoil sections at Reynolds numbers from model scale to full scale at Mach numbers from 0.35 to 0.90 -- conducted in Langley 6 by 28 inch transonic tunnel
[A-D0-80-0367] p0628 880-32333

[A-D0-80-0367] p0634 880-32397

OB-58C helicopter mast mounted night/designator safety statement
[A-D0-80-0367] p0635 880-32390

Helicopter electro-optical system display requirements. 3: The effects of CRT display size and arrangement on dark adaptation of helicopter pilots
[A-D0-80-0367] p0635 880-32391

Civil helicopter wire strike assessment study. Volume 1: Findings and recommendations
[NASA-CR-152389] p0644 880-33381

Sea King Mk. 50 helicopter sonar dynamics study. A simplified control system mathematical model
[A-80-061] p0646 880-33395

Installation of C-6533 X(2-2)/ABC ICS in OB-18 helicopter
[A-D0-80-0367] p0652 880-33650

An evaluation of a computer code based on linear acoustic theory for predicting helicopter main rotor noise ---- CH-53A and S-76 helicopters
[NASA-CR-159339] p0655 880-34217

HELIPORTS

Helicopters and helicopters -- where have they been and are they coming back
[SNAME PAPER 800740] p0575 880-49690

SUBJECT INDEX

HYPERSONIC AIRCRAFT

Propulsion/airframe integration considerations for high altitude hypersonic cruise vehicles [AIAA PAPER 80-0111] p0093 A80-18272
Approximate estimation of the least number and optimal distribution of landing airports for maneuvering hypersonic flight vehicles p0152 A80-21335
Thermostructural analyses of structural concepts for hypersonic cruise vehicles [AIAA PAPER 80-0007] p0162 A80-23950
Integrated thermal-structural finite element analysis --- for applications to hypersonic transport design [AIAA 80-0717] p0335 A80-35098
Aerodynamic characteristics of a hypersonic research airplane concept having a 70 deg swept double-delta wing at Mach numbers from 0.80 to 1.20, with summary of data from 0.20 to 6.0 --- Langley 8-ft transonic wind tunnel [NASA TP-1552] p0068 880-12064
Loading tests of a wing structure for a hypersonic aircraft [NASA TP-1596] p0129 880-15068
A preliminary assessment of the impact of 2-D exhaust-nozzle geometry on the cruise range of a hypersonic aircraft with top-mounted ramjet propulsion [NASA TP-81041] p0636 880-32397

HYPERSONIC BOUNDARY LAYER

Influence of an entropy layer on boundary layer separation in hypersonic flow p0150 A80-21287

HYPERSONIC FLIGHT

Centrifugal forces on a thin wing in hypersonic flight at large angles of attack p0151 A80-21315
Laminar fluid dynamics of supersonic and hypersonic flight [AIAA PAPER 80-0862] p0321 A80-33275
Heat transfer at a breaking point of the leading edge of a plate in hypersonic flight p0467 A80-42965
Hypersonic propulsion --- supersonic combustion p0025 880-10217
Trajectories optimization in hypersonic flight [NASA CA-162986] p0232 880-19026
Hypersonic interference flow flight experiment design --- investigating aerodynamic heating and loads [AD-1078661] p0233 880-19044

HYPERSONIC FLOW

Hypersonic viscous shock layer on sweptback wings of infinite span at different angles of attack p0065 880-11208
Stability derivatives of blunt slender cones at high Mach numbers p0048 880-13571
Hypersonic slipflow of a viscous gas over a slender delta wing p0150 A80-21286
Influence of the leading-edge planform on the hypersonic flow over a small-aspect-ratio wing p0152 A80-21349
Hypersonic flow of gas over a slender wing of variable shape p0277 A80-31388
Aerodynamics of hypersonic flows with fluid injection --- Russian book p0385 A80-37551
Asymptotic integration of multicomponent chemical-inequilibrium boundary layer equations --- hypersonic gas flow analysis p0396 A80-37552
Contribution to the theory of hypersonic flow past three-dimensional wings p0528 A80-46829
Influence of nonequilibrium on the aerodynamic characteristics of some wing profiles p0525 A80-46955
Contribution to the theory of the small-aspect-ratio wing in hypersonic flow p0573 A80-49592
High Mach number dynamic stability of pointed cones at small angles of attack p0615 A80-51419

HYPERSONIC ROCKETs

Laser-Inborah flow-field diagnostics of two large
HYPersonic test facilities
[AD-A0702089] p0246 N80-19135

HYPersonic shock
Measurement of shock waves around a delta-wing seaplane
[AD-A0784633] p0550 N80-28324

HYPersonic vehicles
NT HYPersonic aircraft
NT lifting rotary vehicles
NT E-272 lifting body

Periodic optimal cruise of a hypersonic vehicle
[AD-A0704977] p0511 A80-65555

Hypersonic cruise aircraft propulsion integration study, volume 1

Hypersonic cruise aircraft propulsion integration study, volume 2

HYPersonic wind tunnels
NT cascade wind tunnels

Calculation of working process in 'slow-compression' piston-type aerodynamic tube
[AD-A0702089] p0390 A80-38031

Effect of the relative area of the flow core on the performance of a hypersonic wind tunnel
[AD-A078843] p0208 A80-27383

HYPERSONIC SHOCK ICE FORMATION

Hypersonic shock
Measurement of shock waves around a delta-wing seaplane
[AD-A0784633] p0550 N80-28324

Hypersonic vehicle coating for disconnect switches
[AD-A0784633] p0556 N80-29594

ICE RAPPING
Microwave radiometric aircraft observations of the Fabry-Perot interference fringes of an ice-water system
[AD-A0704977] p0507 A80-84232

The role of satellite altimetry in climate studies
[AD-A0704977] p0174 N80-16676

A 4/183 GHz multichannel radiometer for Convair flights
[AD-A0704977] p0639 N80-33047

ICE NOIZE
Airflow effects on rising measurements by a wing tip-mounted ice detector on the MC130E research airplane
[AD-A0707019] p0289 N80-20244

ICE OBSERVATION
U ICE REPORTING

ICE PACKS
U IRA ICE

ICE PREVENTION
Problems with the use of chemicals on runways during winter use
[AD-A0704977] p0375 A80-36767

Protection against wing icing for Airbus A300 and A310
[AD-A077196] p0454 A80-41889

Selection of tube diameters for aircraft deicing systems
[AD-A077196] p0581 A80-50463

Carburetor ice: A review
[AD-A077196] p0361 N80-23278

Carburetor ice: A review
[AD-A077196] p0361 N80-23279

Carburetor ice: A review
[AD-A077196] p0361 N80-23280

Determination of sea-ice boundaries and ice roughness using EROS-3 altimeter data
[AD-A077196] p0357 N80-22758

ICING
U ICE FORMATION

ICE FLUIDS
Calculation of the flow past a body of arbitrary configuration, moving in an ideal fluid above a flat surface
[AD-A0704977] p0150 A80-21283

Flow over a plate in the presence of a vortex ring
[AD-A0704977] p0150 A80-21295

Method of calculating the velocity at the surface of an arbitrary wing in an ideal fluid
[AD-A0704977] p0262 A80-29208

Optimal wing profile in the flow of an ideal incompressible fluid
[AD-A0704977] p0268 A80-29936

The basic models of mechanics of liquids and gases in the theory of the wing
[AD-A0704977] p0411 A80-40442

Method for calculating surface velocity of arbitrary wing in ideal fluid
[AD-A0704977] p0508 A80-50463

A test of the method of Pink and Sah for following vortex-sheet motion
[AD-A0704977] p0620 A80-52179

Blade-to-blade flow of ideal fluid with wall injection
[AD-A0704977] p0315 N80-22228

IDEAL GAS
Numerical method for calculating supersonic flow past a plane air intake with detached shock wave
[AD-A0704977] p0203 A80-27148

IDENTIFY FRIEND OR FOE
U IFF SYSTEMS (IDENTIFICATION)

IDENTIFYING
NT IFF SYSTEMS (IDENTIFICATION)
NT PARAMETER IDENTIFICATION
NT SYSTEM IDENTIFICATION
On some realistic applications of identification methods
[AD-A0704977] p0053 A80-14859

Maximum likelihood identification of linear discrete stochastic systems using estimating and parameter identification in stochastic processes
[AD-A0704977] p0031 N80-10229

A-214
Hybrid optical/digital processing for target identification

IFF for air defence aircraft - Identification

IFF system concept based on time synchronization

IFF (BOLES)

PROCESSING

Forer & Poo

Instrument Flight Rules

Ignition

K. Spake

Researching essential flow and ignition properties to anti-icing kerosene (AR) for turbine aircraft operations

[AD-A083797]

Autoignition characteristics of aircraft-type fuels

[NASA-CR-1530866]

IL-62 AIRCRAFT

The problem of the optimum cruising Mach number

[AD-A0078134]

CURRENTS

Transparent engines at Rolls-Royce - The application of high energy X-ray technology to gas turbine development

[AD-A0078134]

Correlations

Design and simulation of a helicopter target hand-off computer

[AD-A0078134]

Discontinuous registration of industrial radiographs using profile analysis and piecewise correlation techniques

[AD-A0078134]

Performance evaluation of image correlation techniques for aircraft inertial navigation systems

[AD-A0078134]

IMAGE ENHANCEMENT

Transparent engines at Rolls-Royce - The application of high energy X-ray technology to gas turbine development

[AD-A0078134]

IMAGE INTENSIFIERS

High-resolution intensified vidicons for low light level applications in aircraft flight simulators

[AD-A0078134]

IMAGE MOTION CORRECTION

Hybrid optical/digital processing for target identification

[AD-A0078134]

IMAGE PROCESSING

Tradeoff between picture element dimensions and monochromer averaging in side-looking airborne radar

[AD-A0078134]

Wire obstacle warning system /WOWS/ - A real-time airborne sensor for automatic detection and recognition of wirelike objects

[AD-A0078134]

Map-matching techniques for terminal guidance using Fourier phase information

[AD-A0078134]

Guidance system position update by multiple subarea correlation

[AD-A0078134]

Hybrid optical/digital processing for target identification

[AD-A0078134]

Methodology for target discrimination

[AD-A0078134]

Experiences of a SWRPS video recording and processing system for FLIR images

[AD-A0078134]

IMAGE RECONSTRUCTION

Interferometric measurements in a turbine cascade using image-plane holography

[AD-A0078134]

IMAGE TRANSDUCERS

A helmet-mounted sight using C.C.D. technology

[AD-A0078134]

IMAGE TUBES

Visual displays for air traffic control data

[AD-A0078134]

IMAGING TECHNIQUES

FT IMAGE ENHANCEMENT

FT RADAR IMAGING

The capability of CGI in flight simulation - computer generated imagery

[AD-A0078134]

Visually Coupled System: Computer Generated Imagery (VCS-CGI) engineering interface

[AD-A0078134]

System description and analysis, Part 1: Feasibility study for helicopter/VTOL wide-angle simulation image generation display system

[AD-A0078134]

IMPACT

FT ECONOMIC IMPACT

IMPACT ACCELERATION

A general statistical approach for using auxiliary information in the development of an impact acceleration injury prediction model

[AD-A0078134]

IMPACT DAMAGE

FT SAB OT IMPACT DAMAGE

Atmospheric effects on Martian ejecta emplacement

[AD-A0078134]

Impact damage on titanium leading edges from small hard objects in compressor blades in jet engines

[AD-A0078134]

Impact damage on titanium leading edges from small soft body objects

[AD-A0078134]

Soil analyses and evaluations at the impact dynamics research facility for two full-scale aircraft crash tests

[AD-A0078134]

Two-dimensional finite-element analyses of simulated rotor-fragment impacts against rings and beams compared with experiments

[AD-A0078134]

The influence of ballistic damage on the aerelastic characteristics of lifting surfaces - fighter aircraft

[AD-A0078134]

Runway surface roughness

[AD-A0078134]

UK approach to aircraft dynamic response on damaged and repaired runways

[AD-A0078134]

Parameters affecting aircraft performance on runways in bad condition

[AD-A0078134]

Soft body impact of cantilever beams - gas turbine fan blades due to impact by birds

[AD-A0078134]

Piercer-glass-reinforced plastic surfacing for rapid runway repair by naval construction

[AD-A0078134]

Crash tests of four identical high-wing single-engine airplanes

[AD-A0078134]

Navy Bounce

[AD-A0078134]
Subject Index

Impact Loads
The loads at landing impact — for aircraft
Analytical investigation of the landing dynamics of a large airplane with a load-control system
[NASA-TR-5555]
p0076 N80-13025
Orbiter landing loads with model description and correlation with alt flight data
[NASA-TP-5656]
p0172 N80-16091
Composite components under impact load and effects of defects on the loading capacity — Alpha Jet tail assembly
[NASA-TP-7555]
p0172 N80-16104
The scaling of bird impact loads
[FAD-A075215]
p0176 N80-17045
Flightworthy active control landing gear for a supersonic aircraft
[NASA-CP-5926]
p0094 N80-27350
Combined linear theory/impact theory method for analysis and design of high speed configurations
[NASA-CP-3316]
p0587 N80-30273
Impact Protection
Analysis of aircraft impact problems
p0387 A80-37650
A general statistical approach for using auxiliary information in the development of an impact acceleration injury prediction model
[AD-A007810]
p0601 N80-31378
Impact Pressures
U Impact Loads
Effect of damping on impact response of a two degrees of freedom system
p0270 A80-31817
NASA technical advances in aircraft occupant safety
— clear air turbulence detectors, fire resistant materials, and crashworthiness enhancements
[NASA-CP-58085]
p0120 N80-15060
Development and test of low-impact resistant towers
p0226 N80-18052
Impact Resistance
U Impact Resistance
Hybridized polymer matrix composites
[NASA-CP-16546]
p0650 N80-33899
Impact Testing Machines
LOI/GOE mechanical impact tester assessment
[NASA-TR-74106]
p0144 N80-15179
Impact Tests
Graphite-epoxy panel compression strength reduction due to local impact
p0209 A80-27598
Light airplane crash tests at three roll angles
[NASA-TR-14777]
p0033 N80-10512
Light airplane crash tests at three pitch angles
[NASA-TR-14697]
p0046 N80-11505
The scaling of bird impact loads
[AD-A075215]
p0176 N80-17045
Crank tests of four identical high-wing single-engine airplanes
[NASA-TR-1699]
p0588 N80-30296
Impact
MT ACOUSTIC IMPEDANCE
MT ELECTRICAL RESISTANCE
MT MECHANICAL IMPEDANCE
MT REACTANCE
Impact Matching
Radiation by sources on perfectly conducting convex cylinders with an impedance surface patch
[AD-A084396]
p0500 N80-27573
Impeller Blades
U Impeller Blades (Turbomachinery)
Impellers
A contribution to the design of radial compressor impellers with double-curved blades
p0261 A80-29113
Numerical strain and stress analysis of radial compressor impellers with riveted cover disks
p0261 A80-29114
Matching of turbocomponents described by the example of impeller and diffuser in a centrifugal compressor. I — Aerothermodynamic coupling of impeller and diffuser. II — Optimized stage efficiency of a centrifugal compressor
[ASME PAPER 79-GT-118]
p0365 A80-42058
On the pressure losses due to the tip clearance of centrifugal blowers
[ASME PAPER 80-GT-119]
p0662 A80-42252
An investigation of vane-island diffusers at high swirl
[ASME PAPER 80-GT-118]
p0663 A80-42260
The influence of blade profile and slots on the performance of a centrifugal impeller
[AD-A0082728]
p0425 N80-24581
Impact Defects
U Impact Defects
In-flight implementation
Gust response analysis by nodal decomposition of the gust imnplement distribution
p0605 N80-31006
In-flight Monitoring
U In-flight Monitoring
Microprocessors as aircraft fatigue monitors
p0348 A80-12640
Instrumentation for the determination of aircraft performance from dynamic maneuvers
p0018 A80-12647
Determination of the aerodynamic characteristics of a flight vehicle from onboard measurement data
p0150 A80-21293
Flight recording in the UK. I — Evolution
p0212 A80-27751
General aviation altimetry errors for collision avoidance systems
p0336 A80-35404
Propeller light aircraft noise at discrete frequencies
[ATIA PAPER 80-0097]
p0338 A80-35960
Objective control of pilotage accuracy — Russian book
p0381 A80-37110
F15/7100 engine diagnostic system
[ATIA PAPER 79-1201]
p0392 A80-38349
Engine condition monitoring using fibreoptic probes
[ASME PAPER 80-GT-118]
p0661 A80-42294
Airborne integrated data systems
p0584 A80-50957
Flight-measured afterbody pressure coefficients from an airplane having twin side-by-side jet engines for Mach numbers from 0.6 to 1.6
[NASA-TR-1540]
p0035 N80-11035
In-flight measured characteristics of combined flap-spoiler direct lift controls
p0142 N80-15165
Expanded study of feasibility of measuring in-flight 747/709 loads, performance, clearance, and thermal data
p0170 N80-16063
Specification for the installation of electrical resistance strain gauges on strals pairs counter aircraft — to monitor fatigue damage
[AD-A071363]
p0229 N80-18369
Aspects of flight test instrumentation — methods to derive aircraft performance and stability and control characteristics
p0240 A80-19098
System for use in conducting wake investigations for a wing in flight — differential pressure measurements for drag investigations
[NASA-CASE-PDC-1024-1]
p0529 N80-28300
Azimuth observability enhancement during IRS
In-flight alignment
[SAS-362]
p0630 A80-33260
Pressure and flow measurement — flight testing
[AGARD AG-160-YOL-11]
p0647 A80-33407
Incendiblam
Incendibl lamp life under random vibration
p0228 N80-18221
Incendibl
IN CONGRUENT FLOW
Modelling low Mach number noise
p0161 A80-23902
Unsteady pressure measurements on wing-store combinations in incompressible flow
p0193 A80-26269
Optimal wing profile in the flow of an ideal incompressible fluid
p0268 A80-29936
The method of matched asymptotic expansions in the hydrodynamics of wings — Russian book
p0380 A80-37104
Planar unsteady flow of inviscid and incompressible fluid around a system of profiles
p0391 A80-38273

A-243
to intake flow distortions in an aircraft engine

Acoustic radiation from axisymmetric ducts - A comparison of theory and experiment

Improved numerical simulation of high speed inlet flows using the Navier-Stokes equations

Numerical simulation of supersonic inlets using a three-dimensional viscous flow analysis

An analytical and experimental study of a short S-shaped subsonic diffuser of a supersonic inlet

The experimental modeling of uninstalled supersonic turbofan flutter

Numerical prediction of compressible potential flow for arbitrary geometries - in airliner air-inlet systems

Transonic inlet flow calculations using a general grid-generation scheme

Effect of wake-type nonuniform inlet velocity profiles on first appreciable stall in plane-wall diffusers

Pressure losses in the inlet and outlet channels of high-pressure single- and two-stage axial-flow fans

Fan noise caused by the ingestion of axisymmetric turbulence - A model based on axisymmetric turbulence theory

Experimental study of transonic flows in an air intake at high angle of attack

Experimental and numerical study of the flow in an air intake at high incidence

Aerodynamic assessment of methods to simulate flight inflow characteristics during static testing

The development of inflow control devices for improved simulation of flight noise levels during static testing of a HBPR turbofan engine

Comparison of several inflow control devices for flight simulation of fan noise using a JT15D-1 engine

Inlet flow distortion in turbomachinery, I - Comparison of theory and experiment in a transonic fan stage. II - A parameter study

Inlet drag and stability considerations for B/0 = 2.00 design

Calculation of high speed inlet flows using the Navier-Stokes equations

Influence of the heterogeneity of flow at the rotor outlet on the performance of the diffuser of a centrifugal compressor

Calculation of compressible inlet flows

The effect of blade-wakes on the performance of short-diffuser type combustor inlets

An analog editing system for inlet dynamic flow distortion, DYNACEG - Past, present and future

Evaluation of a statistical method for determining peak inlet flow distortion using F-15 and F-18 data

Compressor response to spatially repetitive and non-repetitive transients

Compressor rotating stall in uniform and non-uniform flows

Experimental study of low aspect ratio compressor blading

Performance of annular prediffuser-combustor systems

An aerodynamic method for control and range improvement of rotary compressors

A multi-grid code for 3-D transonic potential flow around axisymmetric inlets at angle of attack

The effect of finite turbulence spatial scale on the amplification of turbulence by a contracting stream

Top inlet system feasibility for transonic-supersonic fighter aircraft applications

An efficient user-oriented method for calculating compressible flow in an about three-dimensional inlet --- panel method

Computational fluid mechanics of internal flow

Temperature distortion --- in a compressor inflow

Unsteady pressure distortion --- in a compressor inflow

An analytical and experimental study of the S-shaped subsonic diffuser of a supersonic inlet

Unsteady transonic flows in a two-dimensional diffuser --- air breathing engines

Nature of inlet turbulence and strut flow distortions and their effect on turbomachinery noise

Calculation of high speed inlet flows using the Navier-Stokes equations, volume 2: User's and programmer's guide

Straight-walled, two-dimensional diffusers - Transitory stall and peak pressure recovery

Application of ceramic nozzles to 10 kW engine

An evaluation of statistical methods for the prediction of maximum time-variant inlet total pressure distortion

Evaluation of airjet distortion generator used to produce steady-state, total-pressure distortion at the inlet of a General Electric F101-GE-100 turbofan engine

Influence of turbine first stator row cooling on turbine inlet gas temperature

Low-pressure performance of annular, high-pressure (40 atm) high-temperature (2480 K) combustion system

US Army users outlook on air traffic management

Analytical methodology for determination of helicopter IFR precision approach requirements

[NT-AIAA PAPER 80-1527] p0399 A80-28939

--- pilot workload and acceptance [NT-NASA-Cr-152367] p0531 H80-28330

Analysis of general aviation single-pilot IFR incident data obtained from the NASA aviation safety reporting system

[NT-AIAA PAPER 80-0206] p0644 H80-33384

ibsibeBt approach --- Russian book

What brings us down tomorrow — Landing guidance systems for the 1980s

[NT-PO26 A80-10152]

Factorial design of experiments in the test and estimation of a complex control system for carrier-based aircraft landing

Experimental procedure to determine limits of ISM interference affecting navigational ILS equipment

System for measurement of Category II ILS

Algorithm and logic for incorporating ILS NASA TCV B-737 airplane area navigation

[NT-AIAA PAPER 80-0106] p009 A80-11653

Establishment criteria for Distance Measurement Equipment (DME) with instrument landing system and/or localizer approach

[NT-AIAA PAPER 80-1869] p0077 H80-13016

In-service improvements and modernization of all components of the instrument landing systems. Volume 1: Sections 1-10

[NT-AIAA PAPER 80-7042] p049 H80-13018

In-service improvements and modernization of all components of the instrument landing systems. Volume 2: Sections 11 and 12

[NT-AIAA PAPER 80-7042] p0077 H80-13019

A new weighting coefficient for adaptive state estimation

Dipole broadband glide slope array --- for landing systems

Computer study of Tulsa International Airport runway 17B glide slope sites

Multipath analysis of ILS glide path

Computer modeling of terrain effects on Instruement Landing System (ILS) glide slope systems

A standard for HP modulation factor --- for instrument landing systems and VOR navigation systems

In-flight handling qualities investigation of Airbus A 310 DCL. Configurations on landing approach using the DVRLS-RE1 320 variable stability aircraft

A standard for HP modulation factor --- for instrument landing systems and VOR navigation systems

Technical and operational factors concerning the licensing and introduction of a new microwave landing system for category 2

In-service improvements to reliability and maintainability of the instrument landing system

SSISL initial evaluation report. Davis-Romhtan AFB, Arizona, 16-20 November 1979

Technical and operational factors concerning the licensing and introduction of a new microwave landing system for category 2

Evolution and transition of today's military landing system to compatibility with present and future civil military systems --- multistate receiver and the marine remote area approach landing system

Field guide to instrument landing systems, phases 1 and 2

A new weighting coefficient for adaptive state estimation

A new weighting coefficient for adaptive state estimation
in acceleration p0319 A80-32682

Light Aircraft

Limiting values of the lift coefficient of lifting bodies with a flat surface at supersonic speeds

Lifting surface divergence and control effectiveness

Trajectories optimization in hypersonic flight

Unsteady pressure measurements on oscillating models in European wind tunnels

Lifting Entry Vehicles

NT N-2P2 LIFTING BODY

Investigation of numerical techniques for predicting aerodynamic heating to lifting vehicles

LIFTING MOTORS

Noise due to tip vortex formation on lifting rotors

Flapping response of lifting rotor blades to spanwise nonuniform random excitation

Effect of tip vortex structure on helicopter noise due to blade-vortex interaction

LIFTING SURFACES

U LIFT DEVICES

U LIFTING BODIES

U SURFACES

Light (Visible Radiation)

NT SKY RADIATION

Light Aircraft Multifunctional System

Avionics logistics support including V/STOL, LAMPS, and instrument repair

Light Aircraft

NT OH-6 HELICOPTER

NT OH-58 HELICOPTER

NT FIPES AIRCRAFT

Light turbine helicopters to the year 2000

Designing light airplanes —- Russian book

A light aircraft camera Pod - The Enviro-Pod

A method of simplifying weight and balance for small aircraft

A spin-recovery parachute system for light general aviation airplanes

The laminar lightplane or the aircraft performance revolution is upon us

Light aircraft as an example

New design and production principles, using a flight of light airplanes

Designing light airplanes Russian book

Light airplanes of the future

Avionics logistics support including V/STOL, LAMPS, and instrument repair

Light aircraft

The potential for development of high performance light aircraft

An induction gyrocompass

HNC in lightweight helicopters — Special problems and experience in design and control

Design and test of mini-HPV demonstrator engines

A study of light aircraft noise, I - Exhaust noise

Anomaly caused by general aviation

Study on the dynamics of small flight vehicles —— under gust loading

Propeller light aircraft noise at discrete frequencies

Noise transmission and control for a light, twin-engine aircraft

Effect of the architecture of light aircraft on their spin

Lightweight diesel aircraft engines for general aviation

The influence of the thrust direction on the lift of an STOL aircraft

Cost effective series production on the basis of new design and production principles, using a light aircraft as an example
LIQUID HYDROGEN

Title engine altitude chamber and flight testing with liquid hydrogen

Durability of foam insulation for LH2 fuel tanks of future subsonic transports

A plan for active development of LH2 for use in aircraft

Characteristics of liquid hydrogen-fueled aircraft

Safety of liquid hydrogen in air transportation

Preliminary studies of a turbofan engine and fuel system for use with liquid hydrogen

Liquid hydrogen engines

Design concept for LH2 airport facilities

A proposed liquid hydrogen development program for aircraft

Analysis and design of insulation systems for LH2-fueled aircraft

Hydrogen liquefaction, storage and transfer on an airport site

Prospects for hydrogen aircraft

Economics of hydrogen production and liquefaction updated to 1980

Safety of liquid hydrogen in air transportation

LIQUID INJECTION

LIQUID METALS

Liquid metal slip ring --- aerospace environments

LIQUID HYDROGEN

Preliminary tests in a cryogenic wind tunnel driven by induction

Modeling and control of transonic cryogenic wind tunnels

LIQUID OXIGEN

LOX/G0X mechanical impact tester assessment

LIQUID PROPPELLANT ROCKET ENGINES

STORAGINE ENGINES

Rockets for spin recovery (NASA-CR-159240)

LIQUID ROCKET PROPELLANTS

Nonpropellants

Slurry propellants

Investigation of critical burning of fuel droplets (NASA-CR-159697)

LIQUID-GAS MISTURES

NITROGEN

LIQUID HYDROGEN

LIQUID METALS

LIQUID OXIGEN

LIQUID ROCKET PROPELLANTS

Nonpropellants

Slurry propellants

LITERATURE

PROCEEDINGS

LOAD DISTRIBUTION (FORCES)

Extension of Prandtl's biplane theory to wing-tail combinations

Evaluation of strength safety factors under multicomponent loading with consideration of material properties scatter

Prandtl's biplane theory applied to canard and tandem aircraft

Multicyclic control of a helicopter rotor: considering the influence of vibration, loads, and control motion

SUBJECT INDEX

[ATAA 80-0673]

Structural design loads for future airplanes

[ATAA 80-0509]

Influence of nonequilibrium on the aerodynamic characteristics of some wing profiles

[ATAA 80-0685]

Jet decay rate effects on hover jet-induced loads

[ATAA 80-0724]

Determination of loads applied to modern high-performance aircraft

[A-10 carriage loads test]

[AD-A073642]

The rapid prediction of aircraft store loading distribution at transonic speeds, part 2

[AD-A082005]

[SAE PAPER 800227]

Current developments in aircraft fatigue evaluation procedures

[SAE PAPER NT 79-33]

Dynamic vibration exciters for full-scale structures

Elevated temperature structural testing of advanced missiles

Effect of some aircraft loading program modifications on the fatigue life of open hole specimens

Current developments in aircraft fatigue evaluation procedures

On experimental versus theoretical incident buckling of narrow graphite/epoxy plates in compression

Economics of hydrogen production and liquefaction updated to 1980

Safety of liquid hydrogen in air transportation

[ATAA 80-0646]

LH2-mechanical impact tester assessment

LOADING FORCES

A-266
Some civil engineering and management aspects of Cargo Logistics Airlift Systems Study (CLASS).

Computer simulation model of the logistic support impact of aircraft vs logistics characteristics on acquisition logistics management in naval aviation.

Design, development, and flight demonstration of an international approach to range determination of a representative load sequence for generation of a load specification for the envelopes of a captive balloon and flexible airship.

A comprehensive analytical model of rotocraft aerodynamics and dynamics. Part 2: User's manual

Optimal design of wing box structures with composite panel components.

A comprehensive study on the design, development, and flight demonstration of the loads and stability characteristics of a bearingless main rotor.

Cold-air investigation of a 4 1/2 stage turbine with stay and leading edge variable stator vane control system.

Evaluation of the impact of towing the L-1011 airplane at Boston-Logan Airport.

A new procedure for linear optimal flight control design of a nonlinear adaptive flight control system with a throttle-pilot-induced oscillation suppression system.

Analytic design of regulators for controlling elastic flight vehicle rotation: about the longitudinal axis.

A comparison of flight and simulation data for three automatic landing system control laws for the Augmentor wing jet STOL research airplane.

A comparison of flight and simulation data for three automatic landing system control laws for the Augmentor wing jet STOL research airplane.

Analytic design of regulators for controlling elastic flight vehicle rotation: about the longitudinal axis.

A new procedure for linear optimal flight control design of a nonlinear adaptive flight control system with a throttle-pilot-induced oscillation suppression system.

The design of a nonlinear adaptive flight control filter for suppression of shuttle pilot-induced oscillation tendencies.
evaluating the level of flight safety

Mechanical Devices
Mechanical fasteners dominating aerospace - aircraft and spacecraft structural joining techniques [p0159 80-23335]
Experimental investigation of the strength of rotor materials in the presence of surface cracks.

Evaluation of strength safety factors under multicomponent loading with consideration of material property scatter.

Resin matrices and their contribution to composite properties.

Cast aluminum primary aircraft structure.

Effects of thermally induced porosity on an as-cast powder metallurgy superalloy.

Experimental investigation of the strength of rotor materials with surface cracks.

Application of superalloy powder metallurgy to aircraft engines.

The physical and chemical characterization of ten military turbine engine lubricants.

Composite structural materials aircraft structures.

Introduction to the technology of graphite-resin composites and their application in the aeronautical industry.

Load specifications for the envelopes of a captive balloon and flexible airship.

Application of superalloy powder metallurgy to aircraft engines.

The physical and chemical characterization of ten military turbine engine lubricants.

Composite structural materials aircraft structures.

Engine environmental effects on composite behavior --polarity and temperature effects on mechanical properties.

Technique of graphite-resin composite materials and their application in the aeronautical industry.

Load specifications for the envelopes of a captive balloon and flexible airship.

Application of superalloy powder metallurgy to aircraft engines.

The shock and vibration digest, volume 12, number 7.

Mechanical behavior of airframe materials.

Time-temperature-stress capabilities of composite materials for advanced supersonic technology application, phase 1.

Mechanical behavior of airframe materials.

Time-temperature-stress capabilities of composite materials for advanced supersonic technology application, phase 1.
design

Interferometer design and data handling in a high-vibration environment. II - Data handling

POLAR CAP ABSORPTION
Initial data bank report: Fall 1978; winter, spring, summer, fall 1979, winter 1980
[AD-A086204] p0632 B80-33272

POLAR CAPS
The role of satellite altimetry in climate studies
[NASA-TP-1570] p0174 B80-16676

POLAR REGIONS
U ARCTIC REGIONS

POLARIZATION (WAVES)
U CIDRULAR POLARIZATION

POLARIZATION CHARACTERISTICS
The analysis of an elliptic twist reflecting Cassegrain antenna using QDD — geometrical theory of diffraction
[p0506 A80-15997

POLICIES
U ENERGY POLICY

POLISHING
Influence of burnishing on the structure and durability of elements operating under variable loads
[p0062 A80-17142

POLLYON
U AIR POLLUTION
U ENVIRONMENT POLLUTION
U NOISE POLLUTION

POLUTION CONTROL
Limitation of the content of harmful substances in aircraft engine exhaust gases - New requirements on combustion chambers
[p0535 A80-15085

Pollutant emission characteristics of future aviation jet fuels
[p0060 80-16826

Toward more effective evaluation and control of airport noise
[p0387 A80-37609

Abatement of aircraft noise and related regulatory actions
[p0307 A80-37611

Emission reduction
[p0028 B80-10207

Noise reduction
[p0029 B80-10208

Prenaxing quality and flame stability: A theoretical and experimental study
[NASA-CR-3216] p0071 B80-12090

Quiet Class Short-haul Experimental Engine (QCSS)
[NASA-CR-159973] p0135 B80-15120

Control of particulate emissions from turbine engine test cells by cooling water injection
[AD-A079594] p0231 B80-18587

Effect of water injection and off scheduling of variable inlet guide vanes, gas generator speed and power turbine nozzle angle on the performance of an automotive gas turbine engine
[NASA-TM-81415] p0292 B80-20272

Aerosol filter loading data for a simulated jet engine test cell aerosol
[AD-A078779] p0295 B80-20287

Exhaust emissions characteristics for a general aviation light-aircraft Avco Lycoming

[MACA-R-Y-3085] p0600 N80-31365
Pressure data for four analytically defined arrow
wings in supersonic flow --- Langley Unitary
Plan Wind Tunnel tests
[MACA-TX-81835] p0628 N80-32332
PRESSURE DRAG
BT INTERPERIENCE DRAG
BT SUPERSONIC DRAG
A comparison of jet temperature effects on
afterbody drag with those from jet molecular
weight and nozzle area ratio variations
[AAI PAPER 80-1161] p0488 ABO-41191
PRESSURE DRAG
Determination of start-up pressure losses for
gas-turbine engine compressors
[ASME PAPBB 80-GT-95] p0176 ABO-21052
Blade trailing edge heat transfer
[ASME PAPBB 80-GT-95] p0176 ABO-21052
PRESSURE EFFECTS
Class of shockfree airfoils producing the same
surface pressure
Influence of swirl chamber dimensions on the jet
angle of an air nozzle
Pressure in a liquid from a gas bubble generated
by blasting a high-explosive in an inertially
sealed parabolic chamber --- for explosive forcing
[P564 ABO-67407]
PRESSURE FIELDS
W PRESSURE DISTRIBUTION
PRESSURE GAGES
BT BAROMETERS
BT PIEZOELECTRIC GAGES
PRESSURE GRADIENTS
Pressure losses in the inlet and outlet channels of
high-pressure single- and two-stage
axial-flow fans
Three-dimensional self-similar laminar boundary
layer with longitudinal and transverse pressure
gradient
Use of nose cap and fuselage pressure orifices for
determination of air data for space shuttle
orbiter below supersonic speeds
[MACA-TP-1643] p0635 N80-32369
PRESSURE MEASUREMENTS
Unsteady pressure measurements on wing-store
combinations in incompressible flow
Pilot-static system - Errors and calibrations
Unsteady pressure measurements and data analysis
techniques in axial-flow compressors
Temperature and pressure measurement techniques
for an advanced turbine test facility
Aerodynamic loss in a gas turbine stage with full
cooling
Pressures due to the tip clearance of centrifugal blowers
On the pressure losses due to the tip clearance of
centrifugal blowers
Time-dependent measurement of base pressure in a
blowdown tunnel with varying unit Reynolds number
Measurements on a three-dimensional swept wing at
low speeds. Part 1: The flow around the leading
dge
Measurements on a three-dimensional swept wing at
low speeds. Part 2: The flow in the boundary
layer on the main wing
Aeracoustic measuring techniques in or outside
turbulent flows
Static pressure orifice system testing method and
apparatus
Detection of the transitional layer between
laminar and turbulent flow areas on a wing surface
--- using an accelerometer to measure pressure
levels during wind tunnel tests
The pressuremeter: Application of pavement design
--- airport runways
Surface pressure measurements at two tips of a
model helicopter rotor in hover
[ASA-CASB-LAB-12269-1] p0359 N80-23252
Hydropneumatic heat transfer test program in the VKI
longchot-facility
[AD-A081467] p0359 N80-23257
Afterbody drag and base pressure measurements on
a body of revolution at angles of incidence up to
alpha = 25 deg at subsonic and transonic Mach
numbers --- transonic wind tunnel measurements
[MACA-TX-569] p0360 N80-23268
Wind tunnel investigation of an all flush orifice
air data system for a large subsonic aircraft
--- conducted with a Langley 8 foot transonic
pressure tunnel
[MACA-TP-1642] p0368 N80-23304
Flight test evaluation of airborne tire pressure
indicating systems
[AD-A081586] p0368 N80-23305
Pressure and flow measurement --- flight testing
[AGARD-AG-160-7011] p0647 N80-33407
A digital unit for measuring unsteady pressure
coefficients --- in a wind tunnel
[AD-A081586] p0652 N80-33619
PRESSURE OSCILLATIONS
A velocity potential panel method for the
prediction of unsteady airloads on oscillating
wings and bodies
PRESSURE PROBES

Pressure fields generated by instability waves and coherent structures in an impinging jet
[IAIA PAPER 80-02941] p0392 880-38362

An experimental investigation of pressure oscillations in a side dump ramjet combustor
[IAIA PAPER 80-1117] p0398 880-38392

Aerodynamic characteristics of moving trailing-edge controls at subsonic and transonic speeds
[SAE-TH-STRUCT-9047] p0347 880-22281

PRESSURE PROBES U PRESSURE SENSORS

PRESSURE PULSES

Statistical characteristics of pressure fluctuations in the flow-separation zone on a plate behind a spoiler
P0059 880-13695

Base pressure fluctuations --- aircraft acoustic loads
P0050 880-19410

Experimental and numerical results on a shear layer excited by a sound pulse
[NASA-CM-80-0183] p0075 880-12821

PRESSURE RECOVERY

Effect of the relative area of the flow core on the performance of a hypersonic wind tunnel
P0084 880-17673

Straight-walled, two-dimensional diffusers --- Transitory stall and peak pressure recovery
P0214 880-29786

The hybrid diffuser --- for gas turbine engines
[ASME PAPER 80-GT-136] p0462 880-42249

An investigation of vane-island diffusers at high swirl
[ASME PAPER 80-GT-148] p0463 880-42260

PRESSURE REDUCTION

Secondary losses in axial compressor
P0260 880-29108

Reduced bleed air extraction for DC-10 cabin air conditioning
[IAIA PAPER 80-1197] p0468 880-41194

Engine bleed air reduction in DC-10
[NASA-CR-1590046] p0633 880-32378

PRESSURE SENSORS

Measuring unsteady pressure on rotating compressor blades --- with semiconductor strain gages under gas turbine engine operating conditions
P0013 880-12630

Some dynamic and time-averaged flow measurements in a turbine rig
P0147 880-21120

System to measure the pressure distribution on fan aerfoil surfaces during flutter conditions
P0342 880-36148

Steady-state performance of J85-21 compressor at 100 percent of design speed with and without interstage rake blockage
[IAIA-TH-61551] p0307 880-21333

Data analysis of P sub S/T sub S sub S sub S nosecone probe testing on P100 engine F680072 at NASA Lewis Research Center

Experimental study of airfoil trailing edge noise: Instrumentation, methodology and initial results
[NASA-CR-153007] p0365 880-22324

System for use in conducting wake investigation for a wing in flight --- differential pressure measurements for drag investigations

PRESSURE TRANSUCERS U PRESSURE SENSORS

PRESSURE WAVES U ELASTIC WAVES

PRESSURE WELDING U DT DIFFUSION WELDING U DT ULTRASONIC WELDING

PRESSURIZED CABINS

Helicopter environmental control --- Commercial and military solutions
[ASME PAPERS 79-ENAS-35] p0056 880-15259

Air supply system approach for the Boeing Model 767 Airplane
[SAE PAPERS 791068] p0194 880-26631

PRESSURIZATION

BTL FUEL TANK PRESSURIZATION

Crack development in panels of a pressurized fuselage under the combined effect of pressurization-induced cyclic loads and high-frequency vibrations

Summary of advanced methods for predicting high speed propeller performance
Numerical design and optimization of propellers
Propeller proplet optimization based upon analytical and experimental methods
Summary of advanced methods for predicting high speed propeller performance
Aeroacoustic wind-tunnel tests of a light twin-boom general-aviation airplane with free or shrouded-pusher propellers — in the Langley full-scale tunnel
High speed turboprops for executive aircraft, potential and recent test results
NASA propeller technology program
Low speed propellers: Impact of advanced technologies
Performance estimation for highly loaded six and ten blade propellers combined with an advanced turboprop technology turboshift engine
Subsonic aircraft: Evolution and the matching of size to performance
Propeller fans
Combined design of O-fan superchargers and multiblade propellers
Acoustic measurements of three Prop-Fan models
Acoustic pressures on a prop-fan aircraft fuselage surface
Potential benefits for propfan technology on derivatives of future short- to medium-range transport aircraft
Propfans for commercial air transports
Vortex shedding mechanisms in relation to tip clearance flows and losses in axial fans
Propeller slipstream
Propeller slipstream/slipstream in the transonic regime
Effect of propeller slipstream on the drag and performance of the engine cooling system for a general aviation twin-engine aircraft
Propellers
Variable pitch propellers
Application of certain optimal methods of propeller phase synchronization
Combined design of O-fan superchargers and multiblade propellers
Propeller signatures and their use — aircraft noise and vibration measurements and analysis
A theoretical and experimental investigation of propeller performance characteristics
Propeller proplet optimization based upon analytical and experimental methods
An acoustic sensitivity study of general aviation propellers
NASA propeller technology program
Low speed propellers: Impact of advanced technologies
High-speed-propeller wind-tunnel aeroacoustic results
Advanced propeller aerodynamic analysis
NASA aeroacoustics methodologies
NASA propeller noise research
Propeller dynamic and aerelastic effects
A comparison between an existing propeller noise theory and wind tunnel data
Influence of noise reduction on weight and cost of general aviation propellers
Investigation of performance, noise, and detectability characteristics of Remotely Piloted Vehicle (RPV) propellers
Proper omittal
The implementation and practical verification of a superposition method for the solution of elastic crack problems
PROPOJATION
NASA JET PROPOJATION

NT COAL

NT GASALLO WINGS

NT G-BLEND WINGS

ROLL

Measurement of dynamic direct and cross-coupling derivatives due to oscillatory roll [AIAA-TP-1431] p0679 A80-29995

A-342
Application of existing roll response criteria to transport aircraft with advanced flight control systems

Experiments in sensing transient rotational acceleration cues on a flight simulator

Light airplane crash tests at three roll angles

Real time digital model of a rolling airframe

Roll control of an attitude-controlled aerodynamic vehicle which has strong roll-Yaw coupling

ROLL CONTROL

6 LATERAL CONTROL

ROLL FORMING

Fabrication of double-curvature skins by rolling

ROLL BEARINGS

Operation of an all-ceramic mainshaft roller bearing is a 302 gas-turbine engine

Endurance and failure characteristics of modified Vasa X-2, CBS 600 and AIX 9310 spur gears

Hybrid bearings for aircraft engines

Improved capabilities to detect incipient bearing failures

Development of mainshaft high-speed cylindrical roller bearings for gas turbine engines

Quiet Clean Short-haul Experimental Engine (QCSEE) operation of an all-ceramic mainshaft roller bearing in a J-102 gas-turbine engine

Study of rolling element dynamic interactions with separator and raceway paths. Roller skewing measurements in roller bearings

Roto-bearing dynamics technology design guide. Part 9: Cylindrical roller bearings

Ceramics in rolling element bearings

Effect of cage design on characteristics of high-speed-jet lubricated 35-millimeter-bore ball bearing -- turbojet engines

ROLLING CONTACT LOADS

Rolling of a loaded rotor around a rigid bearing

ROLLING ROBOTS

Departure and uncoordinated roll reversal boundaries for lighter configurations

Parametric study of the Orbiter rollout using an approximate solution

Effect of spanwise gust variations

Experimental investigation of a circulation control aileron

BOOM TEMPERATURE

Fracture analysis of ductile materials

ROTARY DRIVES

9 MECHANICAL DRIVES

ROTARY STABILITY

GT GYROSCOPIC STABILITY

Experimental determination of pure rotary stability derivatives using curved and rolling flow wind tunnel

Experimental investigation of flotter in mid-stage compressor designs -- for aircraft axial flow gas turbine engine

A dynamic analysis of the motion of a low-wing general aviation aircraft about its calculated equilibriums flat spin mode

Roto dynamics -- structural analysis software review

ROTARY WINGS

Rotary balance data for a typical single-engine general aviation design for an angle-of-attack range of 8 degrees to 35 degrees. 3. Effect of wing leading-edge modifications, model A

The response of turbine engine rotors to interference rubs

Analysis and identification of sub-synchronous vibration for a high pressure parallel flow centrifugal compressor

Sub-synchronous instability of a geared centrifugal compressor of overhung design

The parameters and measurements of the destabilizing actions of rotating machines, and the assumptions of the 1950's

Asynchronous vibration problem of centrifugal compressor

Evaluation of instability forces of labyrinth seals in turbines or compressors

Damping in ring seals for compressible fluids

Flow induced spring coefficients of labyrinth seals for application in rotor dynamics

Effect of fluid forces on rotor stability of centrifugal compressors and pumps

Non-synchronous whirling due to fluid-dynamic forces in axial-turbo-machinery rotors

Fluid forces on rotating centrifugal impeller with whirling motion

Rotary balance data for a typical single-engine general aviation design for an angle-of-attack range of 8 deg to 90 deg. 2: High-wing model C

Rotorcraft identification experience

Rotorcraft flight simulation, computer program C81. Volume 1: Engineer's manual

Rotorcraft flight simulation, computer program C81. Volume 2: User's manual
Rotational noise of helicopter rotors
Fiber glass rotor producing
Pressure distribution in rectangular wing/blade sections during curvilinear motion in an incompressible medium
Operational implications of some NASA/ASA rotary wing induced velocity studies
Application of unsteady airfoil theory to rotary wings
Advanced aerocraft noise control systems
Active control of rotor blade pitch for vibration reduction - A wind tunnel demonstration
Future of helicopter rotor control
The promise of multicycle control for helicopter vibration reduction
Advanced research on helicopter blade airfoils
Construction of a nonstationary nonlinear theory of helicopter rotors
A hybrid composite helicopter main rotor blade employing pneumatic lift control
A simple system for helicopter individual-blade-control and its application to gust alleviation
Vibration reduction with higher harmonic blade feathering for helicopters with two-bladed and four-bladed hinged rotors
Multicycle control for helicopters - Research in progress at Ames Research Center
Multicycle control of a helicopter rotor - considering the influence of vibration, loads, and control motion
A collection of formulas for calculation of rotating blade noise - Compact and noncompact source results
Helicopter rotor thickness noise
Model rotor low frequency broadband noise at moderate tip speeds
An overview of NASA's propeller and rotor noise research
Unsteady wake behind a profile at variable incidence
Design, manufacture, and operational behaviour of helicopter composite blades
Non-linear dynamical analysis of rotors by finite element method
Theoretical and experimental determination of the aerodynamic characteristics of a helicopter rotor
Experimental investigation of helicopter aerodynamics 2nd revised and enlarged edition/ - Russian book
The aerodynamic characteristics of oscillating airfoils
Consent on 'Calculation of rotor impendence for articulated-roto helicopters in forward flight'
Definition of a new airfoil family for helicopter blades
[OMEGA TP NO. 1900-79]
Corrosion fatigue behavior of coated 4340 steel for blade retention bolts of the K-1 helicopter

Experimental and theoretical studies on helicopter blade tips at OMEGA
Semi-empirical model for the dynamic stall of airfoils in view of the application to the calculation of responses of a helicopter blade in forward flight
A flight investigation of performance and loads for a helicopter with WH-11 main-rotor blade sections
Coupled rotor and fuselage equations of motion
Prediction of helicopter rotor downwash in hover and vertical flight
Noise of a model helicopter rotor due to ingestion of turbulence

Analysis and correlation with theory of rotor lift-limit test data
Effect of tip path reform on blade loading characteristics for a two-bladed rotor in hover
Loomis: Electro-optical contouring of helicopter rotor blades
Investigation of the oscillatory and flight behavior of rotor systems in relation with atmospheric turbulence
Unsteady flow and dynamic response analyses for helicopter rotor blades
CH-46 composite rotor blade flight stress survey data. Volume 3: Plotted forward rotor blade chord, torsion and absolute loads
Analysis of low-speed helicopter flight test data
Model 500 rotor blade crack propagation investigation
Effects of primary rotor parameters on flapping dynamics
A comparison of calculated and experimental lift and pressure distributions for several helicopter rotor sections
Synthesis of unsteady aerodynamic problems concerning helicopters
Research on helicopter rotor noise
Dynamic stall on oscillating airfoils in oscillating free-streams
The aerodynamic design of an advanced rotor airfoil
Rotors in forward flight and dynamic stall
A flight investigation of blade section aerodynamics for a helicopter main rotor having WH-11 airfoil sections
Investigations of an active vibration isolation system for helicopters
The effect of shaft angle on performance of a circulation control high-speed rotor at an advance ratio of 0.7
ROTATING VEHICLES

Basic studies of rotating stall in axial flow compressors [AIAA PAPER 80-1281] p0242 A80-19109

U ROTATING BODIES

Oil and critical instabilities in rotor-bearing systems [NASA-TR-75822] p0611 A80-31881

COMPUTATIONAL FLOW

The Kirsten rotor as a wind turbine [AIAA 80-0673] p0330 480-34998

COMPUTATIONAL VORTICES

Experimental studies on helicopter blade vortex interactions [NASA-TP-1668] p0357 80-23100

ROTATIONAL VEHICLES

Comparison between optical measurements and a theoretical and experimental determination of the plane unsteady flow of inviscid and incompressible [AIAA 80-0666] p0328 480-31711

Characteristics of lightly loaded fan rotor wakes [NASA-CB-11106-1] p0318 80-14107

Effect of tip planform on blade loading [NASA-TP-1614] p0175 80-17035

Experimental study of the aerodynamics of a helicopter rotor blade model in an unsteady flow regime during wind tunnel tests [AIAA-TP-79-21] p0175 80-17036

Aerodynamic performances of three fan stator designs operating with rotor having tip speed of 337 meters per second and pressure ratio of 1.54. 1: Experimental performance [NASA-TP-1610] p0179 80-17071

Aerodynamic and acoustic investigations of axial flow fan and compressor blade rows, including three-dimensional effects [NASA-TP-79-21] p0175 80-17036

The effect of shaft angle on performance of a circulation control high-speed rotor at an advance ratio of 0.7 [AIAA-80-08095] p0395 80-22310

The design, testing and evaluation of the RT individual-blade-control system as applied to gust alleviation for helicopters [NASA-CH-ARC-11106-1] p0318 80-14107

Theoretical and experimental parameter studies of oscillating turbine blades in a centrifugal [AIAA 80-0666] p0330 480-34998

Theoretical and experimental determination of the aerodynamic characteristics of a helicopter rotor [NASA-TR-75822] p0611 A80-31881

Experimental investigation of helicopter aerodynamics /2nd revised and enlarged edition/ [AIAA-TH-81189] p0413 80-24262
Experimental investigation of compressor rotor wakes

Development and validation of a combined rotor and fuselage induced flow field computational method

--- Langley V/STOL tunnel

[AIAA-80-0796] p0336 880-35707

Experimental investigations on the vibration of blades due to a rotating stall

[AIAA-80-35912] p0337 880-36566

Vibration measurements on turbomachinery rotor blades with optical probes

[AIAA-80-36599] p0343 880-36146

Rotor blade cooling in high pressure turbines

[AIAA-80-36599] p0380 880-36998

Sailing Parries rotors

[AIAA-80-41033] p0446 880-41033

Investigation of the thermal state of longitudinally cooled rotor blades

[AIAA-80-83784] p0475 880-83784

Investigation of some features of film cooling of fixed and moving blades

[AIAA-80-84774] p0508 880-84774

Calculation of radial-axial turbine wheel thermal and stress states

[AIAA-80-87420] p0565 880-87420

Influence of upper and lower overlap on efficiency of partial-admission axial air microturbine

[AIAA-80-87438] p0566 880-87438

Design of blade attachment in compressor rotor annular slot

[AIAA-80-51079] p0615 880-51079

Long-lift STS operation based on technical condition --- fatigue and service life monitoring of turbine blades in aircraft engines

[AIAA-80-10027] p0617 880-10027

On the influence of short shroud platforms on turbine stage operation --- performance tests for shrouded rotor blades on gas turbine engines

[AIAA-80-10083] p0620 880-10083

Nonstationarity of heat transfer in axial turbine blading during engine startup

[AIAA-80-10089] p0621 880-10089

Characteristics of lightly loaded fan rotor blade wakes

[AIAA-80-3188] p0505 880-3188

Blade wake interference: Temperature effect --- on cascade flow

[AIAA-80-12335] p0573 880-12335

Experimental evaluation of active and passive means of alleviating rotor impulsive noise in deceleration flight

[AIAA-80-159186] p0174 880-16639

Aerodynamic-structural analysis of dual bladed helicopter systems

[AIAA-80-162756] p0178 880-17061

Axial flow rotor unsteady performance

[AIAA-80-17062] p0178 880-17062

A numerical and experimental study of the turbulent wakes of turbomachinery rotor blades, isolated airfoils, and a cascade of airfoils

[AIAA-80-22308] p0268 880-22308

Nature of inlet turbulence and strut flow disturbances and their effect on turbomachinery noise

[AIAA-80-23308] p0269 880-23308

The response of turbine engine rotors to interference rubs

[AIAA-80-23769] p0247 880-23769

Off-design correlation for losses due to part-span dampers on transonic rotors

[AIAA-80-26352] p0334 880-26352

Effect of fluid forces on rotor stability of centrifugal compressors and pumps

[AIAA-80-26352] p0350 880-26352

Non-synchronous whirling due to fluid-dynamic forces in axial turbomachinery rotors

[AIAA-80-29720] p0505 880-29720

 Fluid forces on rotating centrifugal impeller with whirling motion

[AIAA-80-29721] p0550 880-29724

Stabilization of aerodynamically excited turbomachinery with hydrodynamic journal bearings and supports

[AIAA-80-29731] p0558 880-29731

Bifilar analysis study, volume 1

[AIAA-80-159227] p0602 880-31182

Bifilar analysis users manual, volume 2

[AIAA-80-159228-VOL-2] p0602 880-31183

Comparisons of calculated and measured blade loads on a full-scale tilting propeller in a wind tunnel

[AIAA-80-12128] p0602 880-12128

Investigation of rotor blade unsteady loads in centrifugal fan

[AIAA-80-1010] p0339 880-35970

Design of blade attachment in compressor rotor annular slot

[BASA-CE-153858] p0386 B80-32720

The aerodynamics of contra-rotating axial flow wind power turbines

[BASA-CB-159506] p0638 B80-32720

Improvement of the convergence of the method of polynomials in designing small-aspect-ratio wings  

SHOCK ABSORBERS  
- Shock absorption for rotating parts of mechanisms  
- Investigation of rapidly deplorable plastic foam systems. Volume 1: System development  
- (NASP-676332)  
- p0183 A80-17222

SHOCK LOADS  
- Shock loading on reinforced splice joints of ultra high modulus graphite/epoxy cone frustums --- advanced interceptor structures  
- Measurement and correlation of structural response to inlet harschock phenomena on an F-16 airplane  
- p0330 A80-39795

SHOCK RESISTANCE  
- Simulating the shock protection performance of large transonic wings by means of small scale laboratory models --- applicable to aircraft engine power plant design  

SUBJECT INDEX

SHOCK ABSORBERS  
- Shock absorption for rotating parts of mechanisms  
- Measurement and correlation of structural response to inlet harschock phenomena on an F-16 airplane  
- p0184 A80-17293

SHOCK LOADS  
- Shock loading on reinforced splice joints of ultra high modulus graphite/epoxy cone frustums --- advanced interceptor structures  
- Measurement and correlation of structural response to inlet harschock phenomena on an F-16 airplane  
- p0330 A80-39795

SHOCK RESISTANCE  
- Simulating the shock protection performance of large transonic wings by means of small scale laboratory models --- applicable to aircraft engine power plant design  

The interaction of three shock waves  

Stationary fluid past the lower surface of a piecewise-flat delta wing with supersonic leading edges  

Measurement of shock waves around a delta-wing missile  

SHOCK WAVE PROPAGATION  
- Approximate method of determining the wave drag of a profile in the presence of a local supersonic region  
- Experiments on the diffraction of weak blast waves --- the von Neumann paradox  
- Numerical method for calculating supersonic flow past a plane air intake with detached shock wave  
- Steady-state entrainment of a body by a shock wave  
- A simplified shock-fitting solution to a supersonic internal corner flowfield  
- Location and propagation of shock associated noise from supersonic jets  
- Influence of nonequilibrium on the aerodynamic characteristics of some wing profiles  
- A theoretical investigation of the shock location on an asymmetric body and on a two dimensional airfoil in transonic flows affected by axial pressure gradients and shifts in pressure level  
- On supersonic flow with attached shock waves over delta wings  

SHOCK WAVE TRAVEL  
- Shock tests: Shock loading on reinforced splice joints of ultra high modulus graphite/epoxy cone frustums --- advanced interceptor structures  
- Forward acoustic performance of a shock-swallowing high-tip-speed fan (QF-13)  
- Inlet drag and stability considerations for R/0 = 2.00 design  
- Turbojet-exhaust-nozzle secondary-airflow pumping as an exit control of an inlet-stability bypass system for a Mach 2.5 axisymmetric mixed-compression inlet --- Lewis 10- by 10-ft. supersonic wind tunnel test  
- Separation due to shock wave-turbulent boundary layer interaction  
- Analysis of two-dimensional interactions between shock waves and boundary layers  
- The interaction of three shock waves  
- Separation pressure of a turbulent boundary layer in transonic interactions  
- A linearized theory for subsonic supersonic jets and its application to shock-cell noise  
- Sonic-boom wave-front shapes and curvatures associated with maneuvering flight  
- Steady flow over the pressure side of a piecewise-flat delta wing with supersonic leading edges  
- Stationary fluid past the lower surface of a piecewise planet delta wing with supersonic leading edges  
- Measurement of shock waves around a delta-wing missile  

SHOCK WAVE PROFILES  
- Steady flow over the pressure side of a piecewise-flat delta wing with supersonic leading edges  
- Stationary fluid past the lower surface of a piecewise planet delta wing with supersonic leading edges  
- Measurement of shock waves around a delta-wing missile  

SHOCK WAVE ATTENUATION  
- Shock attenuation: Forward acoustic performance of a shock-swallowing high-tip-speed fan (QF-13)  
- Inlet drag and stability considerations for R/0 = 2.00 design  
- Turbojet-exhaust-nozzle secondary-airflow pumping as an exit control of an inlet-stability bypass system for a Mach 2.5 axisymmetric mixed-compression inlet --- Lewis 10- by 10-ft. supersonic wind tunnel test  

SHOCK WAVE INTERACTION  
- Separation due to shock wave-turbulent boundary layer interaction  
- Analysis of two-dimensional interactions between shock waves and boundary layers  
- The interaction of three shock waves  
- Separation pressure of a turbulent boundary layer in transonic interactions  
- A linearized theory for subsonic supersonic jets and its application to shock-cell noise  
- Sonic-boom wave-front shapes and curvatures associated with maneuvering flight  
- Steady flow over the pressure side of a piecewise-flat delta wing with supersonic leading edges  
- Stationary fluid past the lower surface of a piecewise planet delta wing with supersonic leading edges  
- Measurement of shock waves around a delta-wing missile  

SHOCK WAVES  
- Shock tests: Shock loading on reinforced splice joints of ultra high modulus graphite/epoxy cone frustums --- advanced interceptor structures  
- Forward acoustic performance of a shock-swallowing high-tip-speed fan (QF-13)  
- Inlet drag and stability considerations for R/0 = 2.00 design  
- Turbojet-exhaust-nozzle secondary-airflow pumping as an exit control of an inlet-stability bypass system for a Mach 2.5 axisymmetric mixed-compression inlet --- Lewis 10- by 10-ft. supersonic wind tunnel test

Side-Looking Radar

NT Radar Imagery
**SIGNAL RECEIPTION**

- VLSI/VHDL device technology — Very High Speed
- Integration for military signal processing
- Applications

- Frequency independent sidelobe suppression and lobesharpening using broad beam antennas

- Walking-gate spatial signal averaging — signal processing for fatigue crack ultrasonic inspection system

- Survey of radar data-processing techniques in air-traffic-control and surveillance systems

- Acousto-optic devices for use in radio frequency target simulators

- A variational technique for smoothing flight-test and accident data

- Determination of instrumentation errors from measured data using maximum likelihood method

- The EMB system identification technique and its application to high alpha/beta modeling of aircraft

- Optical evaluation of angular coordinates of aircraft in multichannel radio direction finding

- Spectrum resource assessment in the 2.7-2.9 GHz band phase 2: Radar signal processing

**SIGNAL REFLECTION**

- NT SYMBOLS
  - Navigation error using rate of change of signal time of arrival from space vehicles

- Analysis of the effect of time selection of a signal reflected from a surface on the accuracy with which ground speed can be measured

- The suppression of reflected interrogation in secondary surveillance radar

**SIGNAL TO NOISE RATIOS**

- Use of sign statistics for sequential signal detection in a pulse radar system

- Correction procedures for aircraft noise data.
  - Volume 1: Pseudotones
  - Volume 2: Background noise considerations

- Initial data bank report: Fall 1978; winter, spring, summer, fall 1979, winter 1980

**SIGNAL TRANSMISSION**

- ND DATA TRANSMISSION
- NT INDUSPEHIC PROPAGATION
- NT MICROWAVE TRANSMISSION
- NT MULTIPATE TRANSMISSION
- NT RADAR TRANSMISSION
- NT RADIO TRANSMISSION
- NT SATELLITE TRANSMISSION
- NT SHORT WAVE RADIO TRANSMISSION
- NT SINGLE SIDEBAND TRANSMISSION
- NT TELEMETRY

- A sea-distress signal via satellites

**SIGNS (SYMBOLS)**

- SIGBATOBE AIAL1SIS
- SIGHAL TO BOISE BATIOS
- SIGNAL BECBPTIOB

**SILICON**

- Silicon nitrides: State-of-the-art SiAlON materials

**SILICATOS**

- High-temperature ceramic heat exchanger

**SILICON CARBIDES**

- High-temperature ceramic heat exchanger

**SILICON COMPOUNDS**

- High-temperature ceramic heat exchanger

**SILICON NITRIDE**

- High-temperature ceramic heat exchanger

**SIMULATION**

- NT ACOUSTIC SIMULATION
- NT COMPUTERIZED SIMULATION
- NT CONTROL SIMULATION
- NT DIGITAL SIMULATION
- NT ENVIRONMENT SIMULATION
- NT EXHAUST FLOW SIMULATION
- NT FLIGHT SIMULATION
SUBJECT INDEX

WT LANDING SIMULATION
  WT SYSTEMS SIMULATION
  Simulate Mission Endurance Test (SMET) for an aircraft engine to be used in a fighter/attack role
  [AD-A071070] p0040 880-11089
  Air traffic control/full beacon collision avoidance system, Knoxville simulation
  [AD-A074555] p0168 880-16043
  Simulation for integration with dynamic tests of the logical elements of principal onboard computers
  p0256 880-19842
  Wessex modernization: A preliminary simulation study
  [AD-A087799] p0606 880-31410

SIMULATOR TRAINING
  U TRAINING SIMULATORS
    WT COCKPIT SIMULATORS
    WT CONTROL SIMULATION
    WT ENVIRONMENT SIMULATORS
    WT FLIGHT SIMULATORS
    WT Langley Complex Coordinator
    WT MOTION SIMULATORS
    WT TARGET SIMULATORS
    WT TRAINING SIMULATORS
    WT VIBRATION SIMULATORS
  Aircraft fuel system simulator tests with antimisting kerosene (Jet A fuel with FF-9 additive) -- flammability tests
  [AD-A073237] p0123 880-14256
  Crew station design facility feasibility study
  [AD-A070138] p0235 880-19064
  K-3A navigational computer system real-time environmental simulator
  p0254 880-19824

SIMULATED IMAGE CORRELATOR
  U IMAGE CORRELATORS
  SINGLE SIDEBAND MODULATION
  SINGLE SIDEBAND TRANSMISSION
  New commutated doppler microwave landing system
  p0341 880-36019

SINGULARITY (MATHEMATICS)
  GSSABEC computer program development, versions B and C
  [NASA-CR-3227] p0302 880-21202
  The SEM description of interaction of a transient electromagnetic wave with an object
  p0313 880-21941

SINTERING
  HIP silicon nitride
  p0554 880-29360

SITES
  On site determination of vertical beam location and characteristics using statistical method -- radar tracking antennas
  p0558 880-15664
  A matrix method for airport site evaluation
  p0322 880-33293
  Methodology for the evaluation of a radar site
  p0115 880-14067

SIZE (DIMENSIONS)
  Technology requirements and readiness for very large aircraft
  [AIAA PAPER 80-0935] p0320 880-32997
  Study of heat-pipe heat exchanger in the small gas turbine engine system
  p0017 880-10022
  Subsonic aircraft: Evolution and the matching of size to performance
  [NASA-TP-1060] p0540 880-29245

SIZE DETERMINATION
  WT PRECIPITATION PARTICLE MEASUREMENT
  SIZE SEPARATION
  Possible methods for removing small airborne particles from the flow in the 5 meter pressurized low-speed wind tunnel
  [AIAA-TH-16-1825] p0606 880-31416

SIZE (SEPARATION)
  U SIZE SEPARATION

SIZE (SHAPING)
  The impact of propulsion performance parameters on V/STOL design and mixing
  [AIAA PAPER 80-1875] p0472 880-03318

SKID DEW
  Study of rolling element dynamic interactions with separator and raceway paths. Roller skating measurements in roller bearings
  [NASA-CE-163186] p0426 880-29622
  SKID LANDING
  Friction characteristic of steel skids equipped with skews on a lakebed surface -- landing gear
  [NASA-TP-01347] p0078 880-13027

SKIDDEW
  Reliability improvement on aircraft engine bearing by discriminant analysis
  p0271 880-30299

SKIN (STRUCTURAL DESIGNER)
  Propagation of edge cracks in laterally excited stiffened panels
  p0623 880-53465
  Protective coatings for aircraft composites in nuclear environments
  [AD-A074889] p0123 880-14199
  Effect of service environment on F-15 boron/epoxy stabilator
  [AD-A076493] p0178 880-17064

SKIN FRICTION
  WT AERODYNAMIC DRAG
  WT FRICTION DRAG
  WT SUPERSHOCK DRAG
  WT VELOCITIES DRAG
  An improved sensing element for skin-friction balance measurements -- supersonic drag measuring instrument
  [AIAA PAPER 80-0049] p0092 880-18251
  Local skin friction and static pressure on a swept wing in flight
  [AIAA-80-0043] p0199 880-26937
  Measurement of local skin friction and static pressure on a swept wing in flight
  [FPA-AU-1370] p0347 880-22202
  Some aerodynamic considerations related to wind tunnel model surface definition
  [NASA-TP-81202] p0633 880-32376

SKY RADIATION
  Aircraft program for target background, and sky radiation measurements
  [AD-A076959] p0231 880-18624

SKYR  HELICOPTER
  U CE-54 HELICOPTER

SKYLAB PROGRAM
  The role of satellite altimetry in climate studies
  [NASA-TP-1570] p0174 880-16676

SLANT PERCEPTION
  U SPACE PERCEPTION

SLEEP
  The effect of intersmittent aircraft noise on sleep. III
  p0057 880-15632

SLENDER BODIES
  WT SLENDER CORPS
  Active control of asymmetric vortex effects
  [AD-A081648] p0359 880-23254

SLENDER CORPS
  Stability derivatives of blunt slender cones at high Mach numbers
  p0088 880-13571
  Alleviation of the side force and the yawing moment acting on a slender cone-cylinder body at high angles of attack, using small jet injection at subsonic and transonic speeds
  [AD-A080317] p0303 880-21289

SLENDER WINGS
  WT INFINITE SPAN WINGS
  Some parametric relations for designing large-aspect wings
  p0150 880-21294
  Towed slender wings at small angles of attack
  p0192 880-26268
  Selection of a rational structure diagram for a large-aspect-ratio wing
  p0263 880-29227
  Hypersonic flow of gas over a slender wing of variable shape
  p0277 880-31388
  Calculation of pressure distribution on slender wings in supersonic flow
  p0376 880-36797
  Optimization of the relaxation drag of slender wing profile arrangements in steady subsonic flow. I - Single profile
  p0444 880-40895
  Flow studies of slender wing vortices
  [AIAA PAPER 80-1423] p0507 880-44159

A-361
SLIDING FRICTION

Calculation of the supersonic flow past a slender delta wing at angles of attack and sideslip  p0524 A80-46826

Investigation of the influence of the parameters of a wing/engine combination on the critical flutter speed  p0525 A80-46871

Experimental and theoretical investigation of the lifting properties of a wing of deformable profile  p0569 A80-47393

Low-frequency and small perturbation equation for transonic flow past wings  p0567 A80-47768

Selecting rational high-aspect-ratio wing structural stiffening scheme  p0582 A80-50482

Technical evaluation report on the fluid dynamics panel method on high angle of attack aerodynamics -- slender wings, bodies of revolution, and body-wing configurations  p0015 A80-10147

Some measurements of buffeting on an aeroelastic model of a slender wing aircraft  p0081 A80-13055

Means for controlling aerodynamically induced twist --- equipment to control twist of slender wings due to aerodynamic loads  [NASA-CASE-LAB-12175-1] p0169 A80-16055

On the swelling of rolled up vortex surfaces and the breakdown of the vortex core for slender wings  [NASA-TM-75662] p0041 A80-33346

SLIDING FRICTION

Dynamics of the braking system of transport aircraft  p0563 A80-47360

Determination of the loading capacity of wave transmissions with a slide generator  p0563 A80-47382

SLIP FLOW

Hypersonic slipflow of a viscous gas over a slender delta wing  p0150 A80-21286

SLIPSTREAMS

BT PROPELLER SLIPSTREAMS

SLOTS

BT GLIDE PATHS

SLOT ANTENNAS

UHF coplanar-slot antenna for aircraft-to-satellite data communications  p0051 A80-13064

Backsight errors induced by missile radomes  p0050 A80-16483

Radiation characteristics of printed slot antennas with a switchable parasitic slot  p0056 A80-15889

Boeing module VHF antenna design for submersed systems/aircraft communications  p0214 A80-28254

SLOTS

BT WING SLOTS

Design of blade attachment in compressor rotor annular slot  p0615 A80-51879

Wind tunnel force and pressure tests of a 21% thick general aviation airfoil with 20% aileron, 25% slotted flap and 10% slot-lip spoiler  [NASA-CR-3081] p0067 B80-12053

The influence of blade profile and slots on the performance of a centrifugal impeller  [AD-A082728] p0425 B80-26581

SLOTTED ANTENNAS

U SLOT ANTENNAS

SLOTTED WIND TUNNELS

Design of slotted transonic wind tunnels for supersonic flow development  p0275 A80-30976

A simplified model for the viscous crossflow in a slotted test section  [NASA-CR-3206] p0074 B80-12372

SLUBBY PROPELLANTS

Carbon slurry fuels for volume limited missiles  [AD-A084710] p0500 B80-27512

SMALL PERPUSATION FLOW

Flutter analysis of a NASA 64A006 airfoil in small disturbance transonic flow  p0217 A80-20851

Numerical solution of three-dimensional unsteady transonic flow over swept wings  [AIAA PAPER 80-1365] p0506 A80-44143

SUBJECT INDEX

Low-frequency and small perturbation equation for transonic flow past wings  p0567 A80-47768

Allowance for unsteady boundary layer effects in two-dimensional transonic calculations  p0623 A80-53298

SOUND

Size distribution and surface area measurements of gas turbine combustor soot  p0060 A80-16949

SOUNDING

BT DATA SMOOTHING

SHAKING

U LATERAL OSCILLATION

SOARING

Soaring flight optimization theory and an application in sailplane design  p0063 A80-17338

SOCIAL FACTORS

Organization of regional airports  p0155 A80-22725

SOCIOLOGY

BT SOCIAL FACTORS

SOLID

Analysis of the response of a thermal barrier coating to sodium and vanadium doped combustion gases  [NASA-TN-79205] p0032 B80-10344

SOLAR SENSORS

Improved Sun-sensing guidance system for high-altitude aircraft  [NASA-CASE-PEC-11052-1] p0290 B80-20249

SOLDER

Low-temperature solder for joining large cryogenic structures --- cooling coils for the National Transonic Facility  [NASA-TP-8336] p0637 B80-32690

SOLID MEDIA

Digital electrohydraulic control surface actuator, positioned by means of quick-acting solenoid valves  [DOLG PAPER 80-050] p0523 A80-46299

SOLID PROPELLANT ROCKET ENGINES

High energy X-ray study  [AD-A086279] p0591 B80-30311

SOLID PROPELLANTS

BT SOLID ROCKET PROPELLANTS

Experimental investigation of a solid fuel rocket  [DFVLR-PB-78-27] p0006 A80-13485

A primitive variable computer model for combustion within solid fuel rockets  [AD-A087001] p0365 B80-23319

SOLID ROCKET PROPELLANTS

The monopropellant isopropyl nitrate - Its characteristics and uses, and possible future applications  [AIAA PAPER 80-1293] p0042 A80-39008

SOLID ROTATION

0 ROTATING BODIES
SOLID SOLUTIONS
State-of-the-art of SiAlON materials
Comparative resistance of Beta-Si3B4 solid solutions to solute silicon attack

SOLID STATE DEVICES
PT ONE-COUPLED DEVICES
PT SEMICONDUCTOR DEVICES
SOLID LASERS
Power systems control study. Phase I: Integrated control techniques
Solid state power controller verification studies
Solid state power controllers (ISBN-2A)
SOLIDIFICATION
Contact stress analysis of ceramic-to-metal interfaces in gas turbine engines
SOLIDIFICATION
Application of rapidly solidified alloys
Evaluation of forged helicopter composite processed with controlled solidification and thermal mechanical treatments

SOLUTIONS
SODAL IONIC INTERFACES
The role of aluminum segregation in the wear of aluminum/bronze-steel interfaces under conditions of boundary lubrication in aircraft fuel systems

SOFT
Acoustic pressures on a prop-fan aircraft fuselage surface
Sound pressure and low frequency noise from a wind tunnel test article
A theoretical study of the coherence of jet noise
A theoretical study of the coherence of jet noise
Experimental study of acoustic loads on an upper-surface-blowed STOL airplane configuration

SOUND PROPAGATION
Dispersion of sound in a combustion duct by fuel droplets and soot particles
Fundamental characterization of alternative fuel effects in continuous combustion systems
Soot formation and burnout in flames
Effect of fuel molecular structure on soot formation in gas turbine combustion

SOUND ACOUSTICS
Solid-state power controller verification studies

SOUND ABSORPTION
Experimental and numerical results on a shear layer excited by a sound pulse

SOUND TRANSMISSION
Experimental verification of propeller noise prediction

SOUND ACOUSTIC VELOCITY
Theoretical prediction of nonlinear propagation effects on noise signatures generated by subsonic or supersonic propeller or rotor-blade tips

SOUND INTENSITY
On the noisiness of steady state and intermittent flight simulation noise
Prediction of jet noise in flight from static tests

SOUND GENERATORS
Some analytical consideration in jet noise prediction

SOUND MEASUREMENT
Acoustic pressures on a prop-fan aircraft fuselage surface
Experiments on acoustic loads on an upper-surface-blowed STOL airplane configuration

SOUND PERCEPTION
A unified theory for determining human response to sound -- aircraft noise

SOUND ENERGY
On the noisiness of steady state and intermittent noises

SOUND PRODUCTION
Methods of sound simulation and applications in flight simulation

SOUND RADIATION
USAF bioenvironmental noise data handbook. Volume 119: C-135B aircraft, near and far-field noise

SOUND RECEPTION
A theory of sonic boom phenomena

SOUND TREATMENT
A new type of flap valve for generating sonic booms in a pyramidal horn

SOMATIC
Wind-tunnel investigation of the validity of a sonic-boom simulation concept
A unitary plan wind tunnel test for supersonic transport design

SOLID BOOMS
Surface roughness effects on sonic boom reduction

SEDimentation
Explosive deposition of small particles on an impactor surface

SOLIDIFICATION
Reaction of the French population to the supersonic bang
Detection and assessment of secondary sonic booms in New England

SOUND FLOW
U TRANSITIC FLOW
SOUND SPEED
U ACOUSTIC VELOCITY
Acoustic pressures on a prop-fan aircraft fuselage surface
Experimental study of acoustic loads on an upper-surface-blowed STOL airplane configuration
A ray-theory approach for high-frequency engine-intake noise
Radiation in a wall jet flow environment -- mathematical models for noise reduction of STOL airplanes
SPECTRAL ANALYSIS

BY Raman Spectra
BY VIBRATIONAL SPECTRA
BY SPECTRAL ANALYSIS
BY SPECTRAL DISTRIBUTIONS
SPECTRAL RESOLUTION
Processing noise and vibration data for gas turbine engine development

SPECTRAL SIGNATURES
Propeller signatures and their use — aircraft noise and vibration measurements and analysis  
[AIAA PAPER 80-1035]  p0013 A80-12612
SPECTROMETERS
Frequency-scanning particle size spectrometer  
Particle-size analysis of engine oils: a supplement to spectrometric analysis  
[AD-A062230]  p0424 B80-24450
SPECTROMETERS
U SPECTROMETERS
SPECTROSCOPES
U SPECTROSCOPIC ANALYSIS
BY FLAME SPECTROSCOPY
Chemical characterization and quality control for an adhesive  
[AD-A087739]  p0607 B80-31558
SPECTROSCOPY
BY FLAME SPECTROSCOPY
SPECTROSCOPIC ANALYSIS
Ferrocographic and spectrographic analysis of oil sampled before and after failure of a jet engine  
[NASA-TM-81430]  p0269 B80-19497
SPECTRUM ANALYSIS
BY FLAME SPECTROSCOPY
The investigation of transient loads in gas turbine engine blades using spectral analysis methods  
[p0277 A80-31217
SPECTRUM
BY FLAME SPECTROSCOPY
Narrow-band spectrum analysis techniques for processing airplane flyover noise data  
[AIAA PAPER 80-1053]  p0394 A80-36647
A study of alternating stresses in gas-turbine engine blades by spectral analysis  
[p0625 A80-53644
Spectral analysis of non-stationary random processes. Application to noise of flyover type  

SPEECH
BY CONVERSATION
SPEECH DISCRIMINATION
SPEECH RECOGNITION
Vocabulary specification for automatic speech recognition in aircraft cockpits  
[AD-A073703]  p0023 H80-14303
SPEED
BY VELOCITY
SPEED CONTROL
Speed control of electrical pumps in aircraft and military vehicle applications  
[p0583 A80-55681
Automation of flight on-line strategic control: the case of speed control on pre-established routes  
[p0115 B80-14070
SPEED INDICATORS
ST. ANEMOMETERS
ST. HOT-FILM ANEMOMETERS
ST. HOT-WIRE ANEMOMETERS
ST. LASER ANEMOMETERS
Software for a correlation velocity sensor — for aircraft  
[p0282 A80-32443
Experimental and analytical studies of a true airspeed sensor  
SPEED REGULATION
BY SPEED CONTROL
SPEEDMETERS
BY SPECTRAL INDICATORS
SPIKE ANEMOMETERS
U MONOPOLE ANEMOMETERS
SPEED DYNAMICS
New directions in spin research  
[AIAA PAPER WT 80-12]  p0377 A80-36643
Analysis of the influence of structural parameters on the properties of an aircraft in downward spin. II

SUBJECT INDEX
OVERVIEW OF STALL/SPIN TECHNOLOGY
[AD-A05-1250]  p0569 A80-38123
SPEED CONTROL FOR SAFETY'S SAKE
[p0579 A80-50099
CONTRIBUTION TO THE THEORY OF A ROTOR SPINNING ON A FLEXIBLE SHAFT
[p0580 A80-50225
GLOBAL STABILITY AND CONTROL ANALYSIS OF AIRCRAFT AT HIGH ANGLES OF ATTACK
[AD-A090983]  p0536 B80-28374
SPECTRA REDUCTION
Control system techniques for improved departure/spin resistance for fighter aircraft  
[NAE PAPER 791083]  p0194 B80-26639
Hockets for spin recovery  
[NASA-TR-159260]  p0554 B80-93967
SPECTRA STABILIZATION
Stall/spin results for the remotely piloted spin research vehicle  
[AIAA 80-1956]  p0151 B80-05862
Spin prediction techniques  
[AIAA 80-1956]  p0151 B80-05862
SPEA TESTS
A spin-recovery parachute system for light general aviation airplanes  
[p0187 B80-21122
Effects of discontinuous drooped wing leading-edge modifications on the spinning characteristics of a low-wing general aviation airplane  
[AIAA PAPER 80-1643]  p0470 A80-43301
Spin prediction techniques  
[AIAA 80-1956]  p0151 B80-05862
Hockets for spin recovery  
Rotary balance data for a typical single-engine general aviation design for an angle-of-attack range of 8 deg to 90 deg. 2: High-wing model C  
[NASA-CR-3201]  p0628 B80-32335
SPIRAL ANTENNAS
Complementary cross-slot phased array antennas  
[NASA-CASE-8532-1]  p0556 B80-29543
SPIREF PREFERENCES
Spline curves and their application to the design of turbomachine blade profiles  
[p0512 B80-45704
Application of spline approximations to the calculation of wall pressures in three-dimensional supersonic nozzles

Statistical review of counting accelerometer data for Navy and Marine fleet aircraft [A80-22308]

Determination of the safety in a North Atlantic organized track system with reduced lateral separation --- statistical tests [A80-27323]

Three-dimensional velocity distribution between stator blades and unsteady force on a blade due to passing wakes [A80-10011]

Influence of turbine first stage row cooling on turbine inlet gas temperature [A80-51896]

Aerodynamic performances of three fan stator designs operating with rotor having tip speed of 337 meters per second and pressure ratio of 1.54. I: Experimental performance [NASA-TP-1610] p0179 A80-17071

Aerodynamic performances of three fan stator designs operating with rotor having tip speed of 337 meters per second and pressure ratio of 1.54. II: Validation of theoretical code calculations to experimental performance [NASA-TP-1614] p0306 A80-21324

Performance of single-stage axial-flow transonic compressor with rotor and stator aspect ratio of 1.19 and 1.26 respectively, and with design pressure ratio of 2.05 [NASA-TP-1659] p0306 A80-21325

Design and investigation of static pressure compressor cascades behind impeller-rotors [DFVLR-PR-79-17] p0353 A80-22353

On single-stage turbomachine blades and ducts of arbitrary shape [NASA-CASE-LEW-12277-3] p0228 A80-18300

Calculation of the aerodynamic characteristics of a semi-aircraft at supersonic speeds [AIAA PAPER 80-7388] p0648 A80-41162

Flow of a compressible fluid over an isolated airfoil and through a cascade [AIAA JOURNAL 22:7] p0149 A80-21255

Numerical solution of the steady flow in a tumboengine blader and ducts of arbitrary shape [NASA-TP-15097] p0390 A80-38253

Analysis of nonlifting and lifting airfoils in transonic flow by parametric differentiation [SABE PAPER 80-103] p0049 A80-13696

Experimental determination of unsteady blade element aerodynamics in cascades. Volume 1: [NASA-TP-15098] p0004 A80-10630

The effect of interblade phase angle and solidity on the time variant aerodynamic response of a compressor stator [AD-A076194] p0041 A80-11092

Determination of stress intensity factors in composite structural elements  
p0325 A80-34235

Collection and analysis of in service flight histories of the initiation of fatigue damage  
[BNW-FPW-79-10] p0186 A80-17518

On the fatigue life evaluation of jointed specimens undergoing load transfer with regard to stress concentration  

An investigation of residual stresses in simulated wing panels of 7075-T6 aluminum  
[AD-A080863] p0370 A80-23693

STRESS CORROSION CRACKING

STRESS Cycles

Low cycle fatigue life model for gas turbine engine disks  
[BNW-OUT-79-35] p0164 A80-24140

Low cycle fatigue testing, a necessary part of advanced development --- for military fighter aircraft gas turbine engines  
[AIAA PAPER 80-1155] p0399 A80-39400

STRESS INTENSITY FACTORS

Green's functions in fracture mechanics  
p0573 A80-90466

Propagation of edge cracks in laterally excited stiffened panels  
p0623 A80-53465

STRESS MEASUREMENT

Measurement of the Reynolds stress tensor using a single rotating blunting hot wire  
p0523 A80-46366

STRESS RELAXATION

Study of the relaxation of the tightening force of bolted joints --- in supersonic transport aircraft  
p0525 A80-46860

STRESS Rupture StRENGTH

U CHEAP RUPTURE STRENGTH  
p0523 A80-46366

STRESS Tension

Measurement of the Reynolds stress tensor using a single rotating blunting hot wire  
p0523 A80-46366

STRESS-StrAIN DiAGRAMS

Review of investigations into aeronautics related fatigue Federal Republic of Germany  
[LFB-5-142] p0124 A80-14822

STRESS-StrAIN DISTRIBUTION

STRESS CONCENTRATION  
p0523 A80-46366

STRESS-STRAIN RELATIONSHIPS

Application of the design diagram for a layered viscoelastic media to the evaluation of the stress-strain state of road and runway surfaces for moving loads  
p0012 A80-12357

Application of the variational-difference method of straight lines to the calculation of wing middle surface deformation  
p0199 A80-21276

A study of the stress-strain state of shaped hollow blades for radial superchargers  
p0326 A80-34351

Application of the calculation scheme for a layered viscoelastic media to the estimation of the stressed state of highway airport pavements with moving loads  
p0395 A80-39775

The use of holographic speckle interferometry to study the stress-strain state of a gas turbine engine disk near a scarf joint with a blade  
p0395 A80-39775

Comparison of elastic and elastic-plastic structural analyses for cooled turbine blade airfoils  
[NASA-TP-1679] p0501 B80-27719

Dynamic evaluation of experimental integral fuel-tank sealants, part 1  
[AD-A080853] p0651 B80-33573

STRESS-STRAIN RELATIONSHIPS

The viscoelastic behavior of a composite in a thermal environment  
[NASA-CH-163107] p0423 B80-24369

STRENGTHS

On sound transmission into a stiffened cylindrical shell with rings and stringers treated as discrete elements  
p0620 A80-52723

STRESs Resiilence

Stress resilience influence on flight effects on jet noise radiated from connecting quadruples  
p0215 A80-28418

STRUCTURAL ANALYsis

STRESS ANALYSIS

Fluid and structural measurements to advance gas turbine technology  
p0343 A80-36145

Wash definition by the conversational topological method and optimization in finite element structural calculations  
[PhD-79-30] p0379 A80-36864

Investigation of structural strength of ceramics used for circulating section components of gas turbine engines  
p0326 A80-34351

The outside has to be bigger than the inside --- volume requirements calculation and optimal design of supersonic aircraft  
[AIAA 80-0726] p0331 A80-35031

Structural design and analysis of flight data recorders of aircraft gas turbine engines  
[AIAA 80-10053] p0333 B80-10515

Effect of time dependent flight loads on JFD-7 performance deterioration  
[NASA-CH-159601] p0019 B80-12006

Design assessment of advanced technology lightweight, low-cost mission-configured gondola modules  
[AD-A073556] p0651 B80-12006

Application of the SIMS concept to Navy helicopters --- system analysis of flight data recorders of flight conditions of helicopters for structural analysis  
[AD-A074801] p0126 B80-15030

Computer simulation of engine systems  
[BAA-79-720] p0137 B80-15122

Aerodynamic-structural analysis of dual bladed helicopter system  
[NASA-CH-162756] p0178 B80-17061

The Shock and Vibration Bulletin. Part 3:  
Structure medium interaction, case studies in dynamics

Subject Index

[STBOCTOBAL DESIG1]

Structural analysis of hollow blades: torsional stiffness analysis of hollow fan blades for aircraft jet engines

The history of static test and Air Force structures testing
[AD-A077029] p0246 B80-19136

A computer based system for structural design, analysis and optimization
[AD-A081483] p0363 B80-23298

An aerelastic analysis of the Sheriff wing
[80-234] p0361 B80-23274

Improved packaging for the LH-31 inertial measurement unit (P-15 aircraft)
[AD-A081745] p0362 B80-23293

Decision analysis of Advanced Scout Helicopter candidates
[AD-A081843] p0363 B80-23298

Nonlinear transient analysis by energy minimization: a theoretical basis for the ACTION computer code --- predicting the response of a lightweight aircraft during a crash
[NASA-CR-32941] p0466 B80-26697

Flightworthy active control landing gear for a supersonic aircraft
[NASA-CR-32941] p0494 B80-27350

Comparison of elastic and elastic-plastic structural analyses for cooled turbine blade airfoils
[NASA-TP-1679] p0501 B80-27799

Mathematical modeling of linear and non-linear aircraft structures
[AGARD-R-587] p0595 B80-31326

Response of nonlinear panels to random loads

Development and analysis of the Learjet 54/55 fuselage FASTRAN model using substructure techniques
[p0653 B80-33794

Structural Bears
S BEARS (SUPOFACTS)

Structural Design

Mathematics for computer graphics --- Book on numerical design engineering of aerospace systems
[p0050 B80-14598

Design of damping systems and their application
[p0059 B80-16272

Sonic fatigue design data for bonded aluminum aircraft structures
[IAIA PAPER 80-0303] p0094 B80-18304

Assessment of analytic methods for the prediction of aerodynamic characteristics of arbitrary bodies at supersonic speeds
[IAIA PAPER 80-0071] p0101 B80-19308

Some parametric relations for designing large-aspect wings
[p0150 B80-21294

Principles of design of a carbon fibre composite aircraft wing
[p0155 B80-22270

Calculation of minimum-weight and maximum-rigidity structures in the presence of design constraints
[p0204 B80-27165

767 - a feeling for the 'eighties
[p0210 B80-27726

Structural design of transport airplanes for transient environments
[p0213 B80-27698

Minimum-mass designs of stiffened graphite/polyimide compression panels
[p0213 B80-27992

Selection of a rational structure diagram for a large-aspect-ratio wing
[p0263 B80-29227

Development of a structural overload warning system for modern high performance aircraft
[p0330 B80-36974

CAD produced aircraft drawings
[IAIA 80-0732] p0331 B80-35036

Preliminary design of composite wing-box structures for global damage tolerance
[IAIA 80-0755] p0332 B80-35099

Structural design loads for future airplanes
[IAIA 80-0813] p0335 B80-35094

Integrated thermal-structural finite element analysis --- for applications to supersonic transport design
[IAIA 80-0717] p0335 B80-35098

Optimal design studies on composite wings with static and dynamic constraints
[IAIA PAPER 80-29-291] p0379 B80-36683

A new type of flap valve for generating sonic booms in a pyramidal horn
[p0390 B80-38100

Low cycle fatigue testing, a necessary part of advanced development for military fighter aircraft gas turbine engines
[IAIA PAPER 80-1153] p0399 B80-38900

Design, manufacturing, and operational behaviour of helicopter composite blades
[p0411 B80-40465

Gas turbine combustor design challenges for the 1980's
[IAIA PAPER 80-1285] p0499 B80-41213

The economic impact of materials technology on supersonic transport selection
[IAIA PAPER 80-1842] p0470 B80-43300

The objective necessity of the fail-safe design philosophy
[p0511 B80-45697

Forward swept wing flight demonstrator
[p0514 B80-45750

Optimal designing of shells and plates with discrete stiffeners
[p0526 B80-47104

Construction of cyclic and ruled surfaces by the method of generalized inversion
[p0527 B80-47104

A 'three-dimensional' concept for multi-form hangars
[p0581 B80-50274

Selecting rational high-aspect-ratio wing structural stiffening scheme
[p0582 B80-50462

Designing for long-life aircraft structures
[p0582 B80-50585

Airport studies and designs: Handbook
[p0617 B80-51925

Considerations of some critical ejector problems --- for the V/STOL aircraft
[p0623 B80-10127

Use of wagner functions in airfoil design optimization
[AD-A072834] p0025 B80-10139

Aerodynamic from the viewpoint of the designer
[p0065 B80-12002

Aerodynamic design of an extended-range guided bomb
[LOG-C7791] p0078 B80-13023

Quiet Clean Short-haul Experimental Engine (QCSEE). The aerodynamic and mechanical design of the QCSEE over-the-wing fan
[NASA-CR-134915] p0132 B80-15089

Quiet Clean Short-haul Experimental Engine (QCSEE)

Over-The-Ring (OTW) boattail aeroshell design report
[NASA-CR-135168] p0133 B80-15099

Materials and structures research scientific report, 1978
[p0162 B80-17143

The aerodynamic design of an advanced rotor airfoi
[NASA-CR-2961] p0220 B80-17989

Design and test of a boron - aluminum high temperature wing
[AD-A075818] p0223 B80-18034

Advanced composite aileron for L-1011 transport aircraft
[NASA-CR-162863] p0226 B80-18103

Design considerations for attaining 250-knot test velocities at the aircraft landing dynamics facility
[NASA-TR-80222] p0285 B80-19132

Standard engineering installation package
[AD-A079776] p0290 B80-20254

Finite elements and the optimization of aeronautical structures
[p0301 B80-21268

Turbo-propulsion combustion technology assessment
[AD-A080748] p0366 B80-23323

A general panel method for the analysis and design of arbitrary configurations in incompressible flows --- boundary value problem
[NASA-CR-3079] p0414 B80-24268

High-temperature ceramic heat exchangers
[REHE-FP-1127] p0426 B80-24588

Development of the Learjet 28/29 wing using FASTRAN analysis

Supersonic Commercial Air Transport

Supersonic propulsion technology

variable cycle engines

p0029 880-10216

Supersonic Compressors

Inlet flow distortion in turbomachinery.

I - Comparison of theory and experiment in a transonic fan stage. II - A parameter study

[AIAA PAPER 80-1076] p0396 880-38895

Aerodynamic analysis of a supersonic cascade vibrating in a complex mode

p0514 880-45801

Design and investigation of static pressure components behind impeller-rotors

[DVFAB-FB-79-17] p0353 880-22353

Supersonic Cruise Aircraft Research

Advanced technology duct burner for variable cycle engines

[AIAA PAPER 80-1201] p0800 880-38966

Bach 2.2 F-16 development under way

p0474 880-38779

Some effects of cruise speed and engine matching of supersonic inlet design

[AIAA PAPER 80-1607] p0512 880-45734

Low-speed wind-tunnel tests of a 1/10-scale model of an advanced low-wing supersonic cruise configuration designed for cruise at Mach 2.2

--- Langley Full Scale Wind Tunnel

[AIAA-TN-80152] p0024 880-10135

Transonic aerodynamic characteristics of a supersonic cruise aircraft research model with the engines suspended above the wing - I - Basic solutions

[NASA-TN-80105] p0076 880-12997

Economic study of multipurpose advanced high-speed transport configurations

[NASA-CR-159126] p0086 880-13966

Flight control and configuration design considerations for highly maneuverable aircraft

p0160 880-15154

Example of performance analysis using data obtained concurrently in air-path, body and engine axes

[ESDO-79018] p0287 880-20225

Aerodynamic design and analysis of the AST-204, AST-205, and AST-206 blended wing-fuselage large supersonic transport configuration concepts

[NASA-CR-159223] p0268 880-20222

Supersonic cruise aircraft research: An annotated bibliography

[NASA-TP-81797] p0305 880-21316

Time-temperature-stress capabilities of composite materials for advanced supersonic technology application, phase I

[NASA-CR-159267] p0651 880-33496

Supersonic Drag

An improved sensing element for skin-friction drag measurement instrument

[AIAA PAPER 80-0049] p0092 880-18251

Inlet drag and stability considerations for 8/0 = 2.00 design

[AIAA PAPER 80-1105] p0397 880-38916

Prediction of drag coefficients of a supersonic V/STOL configuration with various store arrangements

[AD-1007999] p0070 880-12065

Supersonic Flight

An experimental method for investigating the mutual aerodynamic interference of aircraft components at supersonic velocities

p0056 880-15476

Investigation of leading-edge devices for drag reduction at high angles of attack

[AIAA PAPER 80-0310] p0094 880-18309

Modern fluid dynamics of supersonic and hypersonic flight

[AIAA PAPER 80-0562] p0321 880-33275

Calculation of pressure distribution on slender wings in supersonic flow

p0376 880-36797

Sixteen years of Bach 3 flight

p0466 880-42575

Evaluation of aircraft windshield materials in a simulated supersonic flight environment

[AD-4078673] p0238 880-19082

GB-II supersonic F2H window

p0257 880-19988

Data report for an extensive store separation test program conducted at supersonic speeds

[AD-4083848] p0047 880-27290

Detection and assessment of secondary sonic booms in New England

[AD-4080160] p0863 880-33362

Supersonic Flow

Installation for investigating the effect of non-steady-state supersonic gas flow on the blades of a plane cascade

p0600 880-11255

On supersonic flow with attached shock waves over delta wings

p0112 880-12598

Experimental check of a direct method for optimizing the aerodynamic shape of bodies in supersonic flows

p0506 880-15477

An improved sensing element for skin-friction balance measurements

--- supersonic drag measuring instrument

[AIAA PAPER 80-0049] p0092 880-18251

Bumer solutions for wing and wing-body combination at supersonic speed: leading-edge selection

[AIAA PAPER 80-0126] p0096 880-16359

Mach 3 hydrogen external/base burning

p0110 880-19311

Numerical simulation of supersonic inlets using a three-dimensional viscous flow analysis

[AIAA PAPER 80-0394] p0080 880-20969

An analytical and experimental study of a short S-shaped subsonic diffuser of a supersonic inlet

[AIAA PAPER 80-20970] p0152 880-21320

Delta wing of optimal configuration in supersonic flow

Calculation of the supersonic flow field with vortices behind a slender rectangular wing

p0152 880-21341

Delta wing configuration in supersonic flow

Calculation of the supersonic flow past a winged bieliptical body

p0152 880-21342

The nonlinear supersonic potential flow for delta wings

[AIAA PAPER 80-0269] p0162 880-23942

The experimental modeling of uninstalled supersonic turbine fan flutter

[AIAA PAPER 80-0454] p0201 880-26963

Influence of the angle of attack on the thermal flux at the stagnation point at supersonic speeds

p0203 880-27138

Numerical modeling of supersonic flow near a thin delta wing with discontinuous edge

p0203 880-27147

Numerical method for calculating supersonic flow past a plane air intake with detached shock wave

p0204 880-27148

Similarity of the aerodynamic characteristics of delta wings at supersonic speeds

p0204 880-27168

Experimental investigation of the flow past a wing of finite width

p0262 880-29222

Design of slotted transonic wind tunnels for supersonic flow development

p0275 880-30976

Conically cambered delta wings in supersonic flow.

I - Basic solutions

p0285 880-32526

Conically cambered delta wings in supersonic flow.

II - Optimal solutions

p0286 880-32531

Solution of boundary layer equations with the aid of series --- for supersonic gas flow

p0376 880-36791

Numerical solution of the Navier-Stokes equations for a family of three-dimensional cones

[AIAA PAPER 80-1389] p0451 880-41570

Complete viscous flowfield solutions about a blunt parabolic body in a supersonic stream

Aeroplane vehicle detection /AVD/ - Design trade-offs p0402 A80-39109

U.S. Navy studies of surveillance airships p0406 A80-39316

Discrete Address Beacon System (DABS) Description Functional [AD-A085169] p0531 N80-28336
A wind tunnel demonstration of the principle of aeroelastic tailoring applied to forward swept wings [AIAA 80-076] p0334 880-35077

Aeroelastic systems technology needs: Escape, rescue and survival [AD-A074906] p0114 880-14061

F-4 Phantom aircrew survival equipment evaluation [AD-A076330] p0269 880-20245

Natural aviation water survival program p0559 880-30015

Sweepback [AIAA 80-0905] p0334 880-35077

A wind tunnel demonstration of the principle of aeroelastic tailoring applied to forward swept wings [AIAA 80-076] p0334 880-35078

Propulsive aerodynamics of an advanced nozzle/forward swept wing aircraft configuration [AIAA PAPER 80-1158] p0399 880-38944

Forward swept wing flight demonstrator [AIAA PAPER 80-1882] p0514 880-85750

The Forward Swept Wing - A unique design challenge [AIAA PAPER 80-1885] p0514 880-85751

The weight-minimization problem for a forward-swept wing with constraints on the rate of wing divergence p0525 880-46870

Illustration of airfoil shape effect on forward-swept wing divergence p0619 880-52648

Study of the feasibility aspects of flight testing an aeroelastically tailored forward swept research wing on a BQM-34F drone vehicle [NASA-CR-159149] p0027 880-10195

Windtunnel experiments on divergence of forward-swept wings [NASA-TP-1665] p0545 880-29267

SUBJECT INDEX
A low budget experimental BPV system

Parachute recovery system. I - Parachute materials, applications and design - The recovery system as an integral part of vehicle design

BPV recovery systems

Use of a simulator in the development of a BPV system

Design of perfect model following system by geometric approach --- application of optimal control to improve aircraft flight control

Effect of damping on impact response of a two degrees of freedom system

Microwave landing system implementation. Volumes I & 2 --- Book

[AD-A077531] p0247 A80-19122

An analysis and synthesis of engine condition monitoring systems

[AD-A080025] p0237 A80-19073

Simulation of a night vision system for low level helicopter operations --- using helmet mounted display device

[AD-A080025] p0255 A80-19832

Avionics evaluation program: Simulation models for the effectiveness analysis of avionics

[AD-A080025] p0255 A80-19838

Technology requirements and readiness for very large aircraft [NASA-TM-81783] p0287 A80-20223

A study of two avionics life cycle cost models and their applicability in the communications-electronics-meteorological environment [AD-A076981] p0292 A80-20268

Computerized systems analysis and optimization of aircraft engine performance, weight, and life cycle costs

[AD-A076981] p0301 A80-21271

Experimentation of a generalizable fly-by-wire control system on the Concordia aircraft

[AD-A081165] p0308 A80-21340

Easy-ACIS dynamic analysis. User's manual

[AD-A081165] p0359 A80-23258

Computer simulation of auxiliary power systems [AD-A084858] p0535 A80-28358

Landing system reliability and safety model [AD-A087524] p0601 A80-31379

Inertial navigation and guidance. Citations from the NTIS data base [PB80-012415] p0645 A80-33389

Omega navigation system. Citations from the NTIS data base

[PB80-012712] p0645 A80-33390

Effects of criteria on flight simulation study 1; Heading deviation tolerance [AD-A088906] p0650 A80-33423

SYSTEMS COMPATIBILITY

System ERC - tendencies of a worldwide standardization and cooperation

A-387
Aircraft anti-icing/de-icing
[AD-A074120] p0130 880-15078

Design criteria for optimal flight control systems
-- study of optimal flight control systems
engineering for feedback control
[AD-A074092] p0138 880-15139

Boundary layer and wake modifications to
compressor design systems: The effect of
blade-to-blade flow variations on the mean flow
field of a transonic rotor
[AD-A076204] p0160 880-17075

Detailed design and fabrication of a Helicopter
Ground Robotic System (HGRS)
[AD-A076932] p0181 880-17087

A hingeless rotor IV-15 design integration
feasibility study. Volume 1: Engineering
design studies
[NASA-Cr-152313] p0223 880-18030

Vapor recovery passive, seat-mounted life
retention system
[AD-A076331] p0224 880-19053

Tests of an improved rotating stall control system
on a J-85 turbojet engine

Trends in reliability modeling technology for
fault tolerant systems
p0250 880-19534

Nonelectronic aspects of avionic system reliability
--- actuation
p0251 880-19535

Design and simulation of a C3 system for
surveillance purposes
[AD-A075487] p0254 880-19821

The application of modeling and simulation to the
development of the S-3A
[AD-A075487] p0254 880-19823

Design of a simulator for studying the helicopter
- SMH
p0254 880-19829

Designing low cost receivers for general aviation
users
p0304 880-21307

Active Control Technology, volume 1
Active control technology
p0307 880-21338

Engineering of control systems and implications on
control law design
p0308 880-21341

High integrity fiber optic data transmission
p0308 880-21342

Synthesis of a theoretical approach for employing
adaptive configuration management in
aeronautilc weapon system programs
p0358 880-23196

Visually Coupled System: Computer Generated
Imagery (VCS-CCI) engineering interface
[AD-A080931] p0360 880-23306
Practical optimal flight control system design for
[NASA-CS-3275] p0367 880-23328

Design, development and implementation of an
active control system for load alleviation for a
commercial transport airplane
[AD-A08-B-683] p0367 880-23331

The design of a commercial automatic ride-smoothing
systems using direct-lift control
[AD-TH-79046] p0422 880-26332
Control-system techniques for improved
departure/spin resistance for fighter aircraft
[NASA-TP-1669] p0560 880-29244
System research and development service report of
R and D activity --- National aviation system
and air traffic control
[AD-A085652] p0563 880-29273

SYSTEMS MANAGEMENT

techology to increase airport capacity
[AI A PAPER 80-0920] p0320 880-32890

System control of FAA communications
[AD-A082628] p0388 880-37701

An analysis of airport authority operating costs
[SAR PAPER 800774] p0578 880-49716
Preliminary computer sizing estimates for
Automated En Route TMC (AERNA)
[AD-A082628] p0416 880-24288

SYSTEMS SIMULATION

Perception of aircraft separation with
pilot-preferred symbology on a cockpit display of
traffic information

A-388

SYSTEMS STABILITY

Conditions for exciting natural vibrations in a
tricycle rolling along a straight line
[AD-A084121] p0449 880-31397

Bifurcation behavior of symmetrical rotational rotor systems
p0615 880-51514

Stability problems of rotor systems
p0608 880-31663

T-2 AIRCRAFT

High-alpha aerodynamic model identification of the
T-2C aircraft using the SSM system
[AI A PAPER 80-0172] p0580 880-50195

Application of the Estimation-Before-Modeling
(EBM) system identification method to the high
angle of attack/windslip flight of the T-2C jet
trainer aircraft. Volume 2: Simulation study using
T-2C wind tunnel model data
[AD-A079923] p0235 880-19061
Application of the Estimation-Before-Modeling
(EBM) system identification method to the high
angle of attack/windslip flight of the T-2C jet
trainer aircraft. Volume 3: Identification of
T-2C aerodynamics stability and control
characteristics from actual flight test data
[AD-A079924] p0237 880-19072
Application of the Estimation-Before-Modeling
(EBM) system identification method to the high
angle of attack/windslip flight of the T-2C jet
trainer aircraft. Volume 1: Executive summary
[AD-A080025] p0237 880-19073
Flight verification of direct digital drive for an
Advanced Flight Control Actuation System (AFCAS)
in the T-2C aircraft
[AD-A081925] p0422 880-24327

T-20 AIRCRAFT

Meteorological instrumentation system on the T-20
thunderstorm research aircraft
p0584 880-50686

The T-20B thunderbailor system penetration aircraft
p0125 880-14640

Direct effects of lightning on an aircraft during
intentional penetrations of thunderstorms
--- T-20 aircraft
p0313 880-21947

T-37 AIRCRAFT

Effects of varying visual display characteristics
on a T-4C, a T-37 flight simulator
[AD-A077410] p0143 880-15180

T-38 AIRCRAFT

Initial development for a flutter analysis of
damaged T-38 horizontal stabilizers using WEATN
[AD-A081268] p0421 880-24325
High-speed T-38A landing gear extension loads
[AD-A081226] p0432 880-25319

T-39 AIRCRAFT

Sabreliner 65
p0594 880-31315

T-63 ENGINE

Laser anemometer measurements at the exit of a T-63
coolant
p0210 880-27737

TABLES (DATA)

Computer data base for 767 avionics interface
control
p0282 880-32437

Rotary balance data for a typical single-engine
general aviation design for an angle-of-attack
range of 8 deg to 90 deg. 2: High-wing model C
[NASA-CB-159360] p0637 880-32004

TABS (CONTROL SURFACES)

Diagnosis of separated flow regions on wind-tunnel models using an infrared camera
p0264 A80-29494
A three-dimensional Laser Doppler Velocimeter /LDV/ for use in wind tunnels
p0265 A80-29507
Impact of new instrumentation on advanced turbine research
p0393 A80-36155
Numerical solution of the Navier-Stokes equations for a family of three-dimensional corner geometries
[ASME PAPBB 80-1139] p0451 A80-16174
Non-axisymmetric blade row interaction in axial turbomachinery
[ASME PAPBB 80-1133] p0461 A80-22246
Heat transfer at a breaking point of the leading edge of a plate in hypersonic flight
p0467 A80-29655
Three dimensional supersonic flow through a cascade of twisted flat plates
[ASME PAPBB 80-1128] p0474 A80-33333
Numerical simulation of three-dimensional boattail afterbody flow fields
[ASME PAPBB 80-1129] p0506 A80-44132
A multi-grid code for 3-D transonic potential flow about axisymmetric inlets at angle of attack
p0506 A80-44141
Numerical solution of three-dimensional unsteady transonic flow over swept wings
p0506 A80-44143
Grid generation and transonic flow calculations for three-dimensional configurations
[ASME PAPBB 80-1136] p0506 A80-44150
Experimental and analytical evaluation of 3-dimensional exhaust plumes
[ASME PAPBB 80-1139] p0506 A80-44150
Superovitalizing hydrofoils with wetted upper sides
p0507 A80-44152
Contribution to the theory of hypersonic flow past three-dimensional wings
p0524 A80-66829
Application of spline approximations to the calculation of wall pressures in three-dimensional supersonic nozzles
p0526 A80-66873
A Navier-Stokes scheme for the calculation of three-dimensional impinging jet flows
p0573 A80-69298
Contribution to the theory of the small-aspect-ratio wing in hypersonic flow
p0573 A80-69592
Pressure and velocity measurements in a three-dimensional wall jet
p0023 A80-10126
An efficient user-oriented method for calculating compressible flow in an about three-dimensional inlets. — panel method
[NASA CR-159578] p0024 A80-10139
Control of forebody three-dimensional flow separations
p0114 A80-15164
Coaptation of three-dimensional flow in turbofan airflows and comparison with experimental data
[NASA TM-81810] p0114 A80-15364
Nonparallel stability of three-dimensional compressible boundary layers. Part I: Stability analysis
[NASA CR-32825] p0173 A80-16296
Normalization of the three dimensional transonic unsteady aerodynamic problem
[AD-A975503] p0175 A80-17034
Interaction of a two-dimensional strip boundary layer with a three-dimensional transonic swept-wing code
[ER-TE-79060] p0220 A80-17988
Computational prediction of three-dimensional potential flow fields in which aircraft propellers...
Three-dimensional interactions and vortical flows
The development of rapid predictive methods for three-dimensional transonic flow fields about fighter bomber aircraft, part 1
Numerical flow field program for aerodynamic heating analysis. Volume 1: Equations and results

Three-dimensional flow investigation with a method of characteristics in the inlet region and the blade-to-blade channels of supersonic axial compressors

An improved panel method for the solution of three-dimensional leading edge vortex flows
Numerical method for predicting flow characteristics and performance of nonaxisymmetric nozzles. Part 2: Applications

Numerical program for calculation of three-dimensional potential compressible flow about wind turbine rotor blades

Three Dimensional Motion

Secondary Flow

Three Dimensional Flow

Method for calculating wing loading during maneuvering flight along a three-dimensional curved path
A velocity potential panel method for the prediction of unsteady airloads on oscillating wings and bodies
An analytical investigation of three-dimensional vibration in a gear-coupled rotor system

Thrusting

Analysis of experimental indicators of the hydrodynamic force at a needle-type throttle

Thrust

Jet Thrust

Rocket Thrust

Static Thrust

Studies of leading-edge thrust phenomena

The influence of the thrust direction on the level flight of light airplanes

An analysis of thrust-induced effects on the longitudinal aerodynamics of STOL fighter configurations

Estimation of attainable leading-edge thrust for wings at supersonic and supersonic speeds

Supersonic wings with significant leading-edge thrust at cruise

Estimation of wind shear and thrust loss during STOL aircraft landing approach

Investigation of axisymmetric and nonaxisymmetric nozzles installed on a 0.10 scale F-18 prototype airplane model — wind tunnel tests

Numerical optimization of circulation control airflow

Thrust Augmentation

Recent development of a jet-diffuser ejector

Large scale model tests of a new technology V/STOL concept

The structure-free thrust-doubling of insect-like aircraft - The possibility of using insect-flight /thrust-flight/ on a large technical scale

Dynamic modeling of augmentor fuel systems

Characteristics of afterburning bypass turbojet engine with oxygen injection into the afterburner chamber --- study of fuel injection into thrust chambers for thrust augmentation

Workshop on Thrust Augmenting Ejectors

Recent developments in ejector technology in the Air Force: An overview

Some tests on small-scale rectangular thrust ejector --- thrust augmentation for V/STOL aircraft

Augmenting ejector endwall effects --- V/STOL aircraft

An investigation of corner separation within a thrust augmenter having Conda jet

Entrainment characteristics of unsteady subsonic jets --- for V/STOL aircraft

A simple apparatus for the experimental study of non-steady flow thrust-augmenter ejector configurations

Pressure and velocity measurements in a three-dimensional wall jet

Considerations of some critical ejector problems --- for the V/STOL aircraft

Reaction control system augmentation for V/STOL aircraft

Design and test of a prototype scale ejector wing

The external augmentor concept for V/STOL aircraft

The XFY-12A Thrust-Augmented Wing (TAW) prototype aircraft

Method and apparatus for rapid thrust increases in a turbofan engine

Thrusted augmented spin recovery device

Effect of water injection and off scheduling of variable inlet guide vanes, gas generator speed and power turbine nozzle angle on the performance of an automotive gas turbine engine

An experimental study of static thrust augmentation using a 2-D variable ejector

Theoretical performance for non-static ejector thrust augmentors

A comprehensive approach in-flight thrust determination

A rotor supported without contact - Theory and application

The design and combustion performance of practical swirlers for integral rocket/ramjets

Characteristics of afterburning bypass turbojet engine with oxygen injection into the afterburner chamber --- study of fuel injection into thrust chambers for thrust augmentation

The design and dual adaptive control of a turbojet engine

A singular perturbation analysis of optimal aerodynamic and thrust magnitude control

A-399
In-flight evaluation of a severe weather avoidance

Lightning protection for aircraft

Flight through thunderstorm outflows

Jet transport performance in thunderstorm wind

Direct effects of lightning on an aircraft during intentional penetrations of thunderstorms

Storm hazards ’79: F-106B operations summary

In-flight evaluation of a severe weather avoidance systems for aircraft

Tilt vectoring to eliminate the vertical stabilizer --- to provide directional stability for f-111 aircraft while decreasing radar detectability

Reverse thrust performance of the QCSEE variable pitch turbofan engine

A stopping performance model for aircraft with forward or reverse thrust

The innovative application of boost engine technology to the design of a variety of tactical and strategic aircraft

Investigation of advanced thrust vectoring exhaust systems for high speed propulsive lift

Development of the ‘D’ vented thrust deflecting nozzle

Thrust vectoring to eliminate the vertical stabilizer --- to provide directional stability for f-111 aircraft while decreasing radar detectability

Static calibration of a two-dimensional wedge nozzle with thrust vectoring and spanwise blowing

PRELIMINARY STUDY OF VTO THRUST REQUIREMENTS FOR A STOL AIRCRAFT WITH LIFT PLUS LIFT/Cruise PROPULSION

A simple method for converting frequency domain aerodynamics to the time domain

An evaluation of statistical methods for the prediction of various time-variant inlet total pressure distortion

Time-dependent measurement of base pressure in a blowdown tunnel with varying unit Reynolds number

Application of the multistage axial-flow compressor time-dependent mathematical modeling technique to the TP41-x-1 modified block 76 compressor

A time response approach to equivalent aircraft dynamics

Parameter sensitivity in time varying linear systems, with an application to the dynamics of VTOL aircraft

An analysis of statistical methods for the prediction of various time-variant inlet total pressure distortion

A time dependent difference theory for sound propagation in ducts with flow --- characteristic of inlet and exhaust ducts of turbofan engines

A time response approach to equivalent aircraft dynamics

An integral-representation approach for time-dependent viscous flows

A rapid implicit-explicit solution to the two-dimensional time dependent incompressible Navier-Stokes equations

A simple method for converting frequency domain aerodynamics to the time domain

A time response approach to equivalent aircraft dynamics
Impact damage on titanium leading edges from small hard objects — in compressor blades in jet engines  p0618 A80-52297
Titanium combustion in turbine engines  [AD-4075657] p0170 A80-16059
Consolidation of titanium powder to near net shapes  [AD-4078093] p0267 A80-19239
Mechanical behavior of airframe materials  [AD-4085844] p0545 A80-25290

touchdown
Development and flight evaluation of automatic flaps with improved touchdown dispersion  [AIAA 80-1757] p0510 A80-45545
TOWED BODIES

Application of modified profile analysis to function testing of simulated CTOL transport touchdown-performance data  
[NASA-TP-1541] p0038 N80-11069

TOWED BODIES

Aircraft wingtip coupling experiments  
[p0595 N80-31319]

Determination of the character of the lateral-directional motion of an airborne towed vehicle  
[AD-A087445] p0603 N80-31389

TOWED TARGETS

U TOWED BODIES

TOWERS

UT AIRPORT TOWERS

Dynamic of a flexible rotor-tower system  
[AGRAB-IBD-1954-1] p0371 N80-23862

Evaluation of the impact of towing DC-9 transport airplanes at Boston-Logan Airport  
[AD-A086864] p0589 N80-30297

Evaluation of the impact of towing the L-1011 airplane at Boston-Logan Airport  
[AD-A086977] p0589 N80-30303

TOXIC HAZARDS

Full-scale flammability tests with experiments on animals in the Aeronautical Test Center of Toulouse  
[p0047 A80-13321]

Limitation of the content of harmful substances in aircraft engine exhaust gases - New requirements on combustion chambers  
[p0053 A80-15085]

TOXICOLOGY

Medical and toxicological factors in aircraft accidents  
[AD-A087590] p0553 A80-31373

Some practical aspects of the calibration of air data systems  
[p0098 A80-18865]

A nonlinear observer/command generator tracker approach to the XM-97 helicopter gun turret control law design  
[p0107 A80-20879]

The use of single-frequency Decca Navigator signals for remote position monitoring  
[p0107 A80-39562]

Avionics master plan data base mechanization architecture  
[AD-A071585] p0604 N80-11083

Precision controllability of the TF-17 airplane  
[NASA-TP-1677] p0366 N80-23327

Detection and assessment of secondary sonic booms in New England  
[AD-A088160] p0643 N80-33362

A survey of the stochastic filtering techniques for data processing in air-traffic control and surveillance systems  
[p0106 A80-20867]

TRACKING NETWORKS

ST RADAR NETWORKS

Study of a stereo electro-optical tracker system for the measurement of model deformations at the national transonic facility  
[NASA-CD-159164] p0333 N80-10476

Design and simulation of a C3 system for surveillance purpose  
[p0250 N80-19821]

TRACKING RADAR

WEL'S - An international approach to range instrumentation support — Worldwide Engineering and Logistics Support  
[p0277 A80-31249]

Cooperative estimation of targets by multiple aircraft  
[AD-A085799] p0631 N80-32366

SUBJECT INDEX

Airborne radar approach flight test evaluating various track orientation techniques  
[p0631 N80-32368]

TRACKING STATIONS

Measurement of radiation patterns of aircraft antennas in non-steady flight  
[ELR-TR-78016-0] p0104 N80-17348

TRACKING STUDIES

U TRACKING (POSITION)

Evaluation of a high performance fixed-ratio traction drive  
[NASA-TR-81425] p0230 N80-18004

TRACTS

U SITES

TRADEOFFS

The application of design to cost and life cycle cost to aircraft engines  
[AGAIB-LS-107] p0597 N80-31342

TRAFFIC

UT AIR TRAFFIC

UT AIR TRAFFIC CONTROL

Radar beacon trilateration sensor tests at Logan International Airport  
[p0389 A80-37705]

EXPERIMENTAL STUDIES

Experimental study of confluence with separation on an afterbody of revolution  
[ORBA, TP No. 1979-151] p0103 A80-20088

Flow over a plate in the presence of a vortex sink  
[p0150 A80-21295]

Near-wall structure and unsteady pressures at trailing edges of airfoils — as aeracoustic sound generators  
[p0161 A80-23900]

Investigation of trailing-edge noise  
[p0161 A80-23901]

Prediction and measurement of turbulent aerodynamic trailing edge flows  
[AIAA PAPER 80-1395] p0452 A80-41599

Blade trailing edge heat transfer  
[AIAA PAPER 80-CT-45] p0458 A80-42178

Computational transonic inverse procedure for wing design with automatic trailing edge closure  
[AIAA PAPER 80-1390] p0506 A80-44149

Asymmetric trailing-edge flows at high Reynolds numbers  
[AIAA PAPER 80-1396] p0506 A80-44151

Potential flow past a wing profile with a trailing edge of finite thickness  
[p0529 A80-46827]

The quasi-vortex-lattice method for wings with edge vortex separation  

Viscous flow in the region of a rounded trailing edge  
[AD-A078588] p0233 A80-19945

Experimental study of airfoil trailing edge noise: Instrumentation, methodology and initial results  
[NASA-CD-163007] p0305 N80-22264

Wind tunnel measurements of the mean flow in the turbulent boundary layer and wake in the region of the trailing edge of a swept wing at subsonic speeds  
[AIAA-TR-79062] p0815 N80-22870

Study of an edge vortex by means of ultrasound in a close field behind a rectangular wing in a wind tunnel  

Circulation Control Wing (CCW) Flight Tests  
[p0640 N80-33339]

TRAILING-EDGE FLAPS

Predicted jet thickness: effects on the lift of an augmentor wing  
[p0012 A80-12597]

On approximating the aerodynamic characteristics of a wing with two-element trailing flap  
[p0376 A80-36779]

Variable camber airfoils  
[p0453 A80-46827]

Pressure and velocity measurements in a three-dimensional wall jet  
[p0023 A80-10044]

On a smooth approximation method and its application to mathematical description of wing aerodynamic characteristics  
[p0034 A80-11011]
Influence of wing deformation on trailing-edge flap deflections

Unsteady effects of a control surface in two-dimensional, subsonic and transonic flow

Aerodynamic characteristics of moving trailing-edge controls at subsonic and transonic speeds

Unsteady effects with control surfaces measured in a wind tunnel

Aerodynamic characteristics of moving trailing-edge controls at subsonic and transonic speeds

High bypass turbofan component development. Phase I: Design detail design

High bypass turbofan component development. Phase 2: Detailed design

TRAINING AIRCRAFT

High bypass turbofan component development. Phase I: Design detail design

High bypass turbofan component development. Phase 2: Detailed design

TRAINING EVALUATION

Airliner simulator census

TRAINING SIMULATORS

MT COCKPIT SIMULATORS

MT FLIGHT SIMULATORS

The development and use of large-motion simulator systems in aeronautical research and development

Recent advances in control loading and motion systems used in simulation

The capability of CGI in flight simulation --- computer generated imagery

Synthesis of piloting properties of training simulators with allowance for the human factor

High-resolution intensified vidicon for low light level applications --- in aircraft flight simulators

A digital system for panoramic video displays in flight simulators

A mission training simulator for the Mirosz HB MK 2 and some aspects of the derivation and verification of its system models

Effects of criteria on flight simulation study 1: Heading deviation tolerance

TRAJECTORY OPTIMIZATION

Method for calculating wing loading during maneuvering flight along a three-dimensional curved path

Development of a program for controlling the angle of bank of an orbital aircraft during entry into the atmosphere

Aircraft store separation motion prediction via flight data trajectories

Objective control of piloting accuracy --- Russian book

Wind tunnel study of flight trajectories after separation of airborne stores in flight

Theoretical investigations of the release and trajectory of aircraft stores

Analysis of fuel-conservative curved decelerating approach trajectories for powered-lift and CTOL jet aircraft

Theory for computing the size and shape of a region of influence associated with a maneuvering vehicle

Equations for determining aircraft motions for accident data

Store separation trajectory analysis

Store separation testing techniques at the Arnold Engineering Development Center. Volume 4: Description of dynamic drop store separation testing

Fuzzy controls for maintenance scheduling in transportation systems --- aircraft flight trajectory regulation

Presentation of the STRADA trajectory system landing trajectory systems/

A singular perturbation analysis of minimum time long range intercept

Optimal algorithms and secondary processing devices --- for aircraft trajectory measurement

Cooperative estimation of targets by multiple aircraft

A comparison of first and second order techniques for computing optimal horizontal gliding trajectories --- for low level weapons delivery

Constrained optimum trajectories with specified range
A simple method for converting frequency domain aerodynamic data to the time domain [NASA-TN-81864] p0643 A80-33358

TRANSFER OF TRAINING

TRANSFER FUNCTIONS
A multiple transfer function model for air traffic control systems [NASA-TP-8493] p0811 N80-26312

Selection of the characteristic polynomial of a closed-loop transfer function by minimizing integral quadratic estimates [NASA-CR-159183] p0262 A80-29218

Experimental and theoretical determination of the transfer function of a compressor [ONERA, TP NO. 1980-100] p0622 A80-53285

The transfer of carbon fibers through a commercial aircraft water separator and air cleaner [NASA-CR-159108] p0262 A80-19359

Digital computer simulation of aircraft longitudinal and lateral directional dynamic characteristics (AD-A078672) p0236 N80-19068

Methods for determining undamped normal modes and transfer functions from receptance measurements --- with possible application to helicopter structures vibration testing [NASA-TP-79091] p0277 N80-24676

A simple method for converting frequency domain aerodynamic data to the time domain [NASA-TN-81864] p0643 A80-33358

TRANSFER OF TRAINING

TRANSFER FUNCTIONS
A multiple transfer function model for air traffic control systems [NASA-TP-8493] p0811 N80-26312

Selection of the characteristic polynomial of a closed-loop transfer function by minimizing integral quadratic estimates [NASA-CR-159183] p0262 A80-29218

Experimental and theoretical determination of the transfer function of a compressor [ONERA, TP NO. 1980-100] p0622 A80-53285

The transfer of carbon fibers through a commercial aircraft water separator and air cleaner [NASA-CR-159108] p0262 A80-19359

Digital computer simulation of aircraft longitudinal and lateral directional dynamic characteristics (AD-A078672) p0236 N80-19068

Methods for determining undamped normal modes and transfer functions from receptance measurements --- with possible application to helicopter structures vibration testing [NASA-TP-79091] p0277 N80-24676

A simple method for converting frequency domain aerodynamic data to the time domain [NASA-TN-81864] p0643 A80-33358
### SUBJECT INDEX

**TRANSONIC FLOW CONT**

- Simulated transonic flows for aircraft with nacelles, pylons, and winglets  
  [AIAA PAPER 80-0130]  
  p0162 A80-23933
- Stationary movement of wings in the transonic regime --- Spanish thesis  
  p0209 A80-27723
- Transonic inlet flow calculations using a general grid-generation scheme  
  p0211 A80-27744
- Flutter analysis of a NASA 54A006 airfoil in small disturbance transonic flow  
  p0217 A80-28051
- Class of shockfree airfoils producing the same surface pressure  
  p0218 A80-28057
- Direct computation of transonic solution for Niewland aerfoils  
  p0259 A80-29023
- Computation of steady inviscid transonic flows using pseudo-unsteady methods  
  [OHERA, TP NO. 1979-156]  
  p0260 A80-29083
- The present state in the axial-flow transonic compressor design  
  p0260 A80-29103
- Laser anemometer measurements in a transonic axial flow compressor rotor  
  p0342 A80-36141
- Experimental study of transonic flows in an air intake at high angle of attack  
  [AIAA PAPER 80-07]  
  p0377 A80-36408
- Separation pressure of a turbulent boundary layer in transonic interactions  
  p0390 A80-38015
- Evaluation of a minimum principle for transonic flow computations by finite elements  
  p0391 A80-38260
- Transonic flow over airfoils with tangential injection  
  p0391 A80-38260
- Computational methods for the design of adaptive airfoils and wings  
  p0391 A80-38276
- Experimental study of the interaction between a rapid subsonic aircraft wing and an engine nacelle at high dilution rates  
  [OHERA, TP NO. 1980-35]  
  p0403 A80-40003
- Calculation of transonic viscous flows past wing profiles  
  p0405 A80-40909
- Analysis of nonlifting and lifting airfoils in transonic flow by parametric differentiation  
  [AIAA PAPER 80-1304]  
  p0452 A80-41590
- Investigation of transonic flow in a cascade using an adaptive mesh  
  [AIAA PAPER 80-1430]  
  p0452 A80-41617
- Results from tests on a high work transonic turbine for an energy efficient engine  
  [ASME PAPER 80-GT-146]  
  p0463 A80-42250
- A multi-grid code for 3-D transonic potential flow about axisymmetric aerofoils at angle of attack  
  p0506 A80-44141
- Calculations of transonic flow over an airfoil in a wind tunnel  
  p0506 A80-44142
- Numerical solution of three-dimensional unsteady transonic flow over swept wings  
  p0506 A80-44412
- Computational transonic inverse procedure for wing design with automatic trailing edge closure  
  p0506 A80-44419
- Grid generation and transonic flow calculations for three-dimensional configurations  
  p0506 A80-44550
- Calculation of unsteady transonic aerodynamic forces on a three-dimensional wing  
  [AIAA PAPER 80-027]  
  p0522 A80-46281
- Heat transfer of the critical air flow in a nozzle. IV - The flow and heat transfer characteristics of an accelerated transonic air flow in a divergent nozzle  
  p0556 A80-47343
- Low-frequency and small perturbation equation for transonic flow past wings  
  p0556 A80-47768
- The aerodynamic interaction between a close-coupled canard and a sweepback wing in transonic flow  
  [OHERA, TP NO. 1980-30]  
  p0573 A80-49115

**Shockless airfoils for wings, compressors, and turbines**  
 p0581 A80-50311

**Allowance for unsteady boundary layer effects in two-dimensional transonic calculations**  
 [OHERA, TP NO. 1980-109]  
 p0623 A80-53298

**Remarks on the transonic flow past oscillating airfoils**  
 p0605 B80-12009

**Calculation of transonic flows around wings**  
 p0606 B80-12018

**Aerelastic response analysis of two-dimensional, single and two degree of freedoms airfoils in low-frequency, small-disturbance unsteady transonic flow**  
 [AD-A073379]  
 p0609 B80-12073

**An investigation of several factors involved in a finite difference procedure for analyzing the transonic flow about harmonically oscillating airfoils and wings**  
 [NASA-CR-159143]  
 p0714 B80-14056

**A user's guide for A304: A program using a finite difference method to analyze transonic flow over oscillating airfoils**  
 [NASA-CR-159141]  
 p0727 B80-15052

**Unsteady effects of a control surface in two-dimensional, subsonic and transonic flow**  
 p0742 B80-15168

**Unsteady transonic flows in a two-dimensional diffusing air breathing engine**  
 [AD-A075261]  
 p0755 B80-17033

**Formulation of the three-dimensional transonic unsteady aerodynamic problem**  
 [AD-A075403]  
 p0755 B80-17034

**Interaction of a two-dimensional strip boundary layer with a three-dimensional transonic swept-wing code**  
 [NASA-TM-78640]  
 p0757 B80-17988

**Data report for a test program to study transonic flow fields about wing-body/pylon/store combinations. Volume 1: Tunnel empty flow survey data, wing body force/moment/surface pressure data, and pressure store force/moment/surface pressure data**  
 [AD-A077718]  
 p0821 B80-18001

**Data report for a test program to study transonic flow fields about wing-body/pylon/store combinations. Volume 2: Flow field survey data for configurations 21 and 22**  
 [AD-A077718]  
 p0822 B80-18002

**An investigation of P-16 nozzle-afterbody forces at transonic Mach numbers with emphasis on support system interference**  
 [AD-A0778693]  
 p0825 B80-18046

**Unsteady effects with control surfaces --- measured in a wind tunnel**  
 [AIAA PAPER 79-267]  
 p0825 B80-18049

**The development of rapid predictive methods for three-dimensional transonic flow fields about fighter bomber aircraft, part 1**  
 [AD-A076681]  
 p0828 B80-20236

**Transonic data memorandum: A framework relating the drag-rise characteristics of a finite wing/boiler combination to those of its basic aerfoil**  
 [ESPO-78009]  
 p0830 B80-21276

**Transonic data memorandum: The lift achievable by aerfoils having a particular form of supercritical upper surface pressure distribution that yields only small wave drag**  
 [ESPO-78010]  
 p0830 B80-21277

**Transonic data memorandum: Numerical methods for solving the transonic flow equations for two-dimensional aerfoils in subsonic and transonic flows, brief details, test cases and examples**  
 [ESPO-78009]  
 p0830 B80-21278

**Subsonic and transonic flows on a variable sweep wing**  
 [ESPO-78009]

TRANSPORTATION NETWORKS

Germany, September 11-14, 1979, and Supplement

Preliminary studies of a turbofan engine and fuel systems for use with liquid hydrogen

Design concept for LII2 airport facilities

A proposed liquid hydrogen development program for aircraft

Fuel economy in the airplanes

Energy and civil aviation

A methodology for long range prediction of aircraft performance

The aerial relay system: An energy-efficient solution to the airport congestion problem

Utilization concerns of potential transportation fuels

Traveling wave tubes

Airborne radar coherent transmitters

Traveling waves

A new type of flap valve for generating sonic booms in a pyramidal horn

Wind tunnel development of airport surface traffic control radar

Triangular wings

U-287 wings

Thermodynamics

Another look at aircraft-triggered lightning

Triggers

U actuators

Turb (balance)

Aerodynamic balance

TU-154 aircraft

Pneumatic distributor for turbojet engine control system — TU-154 aircraft

Turbo

U pipes (tubes)

Tubular inert gas welding

U gas tungsten arc welding

Tungsten

U Schuler tuning

Tunable millimeter-wave communications

Influence of mistuning on blade torsional flutter

Biased analysis study, volume 1

Turbulent aircraft

U-T-154 aircraft

SUBJECT INDEX

Turbine blades

Application of the discrete phase method /DPM/ to the study and control of aircraft turbine engine blade vibrations. I

Component evaluation and engine demonstration of gas/a gas-prime-delta BS. 2331 solid turbine blades

Computer calculation of stationary temperature fields in air-cooled turbine rotor blades

On the influence of short shroud platforms on turbine stage operation

On axial turbine stage rotor blade twist with tangential tilt of the stator vanes

Nonstationarity of heat transfer in axial turbine blading during engine startup

Installation for investigating the effect of non-steady-state supersonic gas flow on the blades of a plane cascade

Applied technology in turbofan engines

Effect of the surface state of gas turbine blading on the blading's aerodynamic characteristics when operating on products of combustion of high-sulphur oil

Turbine blade cooling in aero engines - Some new results, future trends, and research requirements

Life prediction of turbine blades under low-cycle fatigue and creep

Dynamics analysis of rotating asymmetric cross-section blade packet

Finite element analysis of rotating pretwisted asymmetric cross-section blades

Discontinuous registration of industrial radiographs using profile analysis and piecewise correlation techniques

Optimisation of turbine nozzle cooling by combining impingement and film injection

Application of the discrete-phase method /DPM/ to the investigation and monitoring of aircraft turbine engine blade vibrations. II

High temperature radial turbine demonstration

Pratt and Whitney innovations in aeromachinery blade casting and hot isostatic pressing of turbine disks

Optimal twisting of blades in axial turbomachinery

Determination of the profile losses on the turbine blades

Secondary flow and losses in straight turbine cascades

Investigations on vortex frequencies in wakes of cascade blades

Calculation methods of the turbine stages with cylindrical blades

Effect of initial value on the behaviour of flow calculations for blade-to-blade flow through a turbomachine

System to measure the pressure distribution on fan aerfoil surfaces during flutter conditions

Digital system for dynamic turbine engine blade displacement measurements

Theoretical and experimental parameter-studies of oscillating turbine blades in a centrifugal force field

Full authority microprocessor digital control --- for advanced technology engine

Compact diffusers for centrifugal compressors

Energy Efficient Engine

Microprocessor requirements for implementing modern control logic

Fuel conservation through active control of rotor clearances

Influence of pressurized drives secondary flows on the behavior of turbofan forced mixers

Design study for a fuel efficient turbofan engine

The Energy Efficient Engine /B3/ -- Advancing the state of the art

Results from tests on a high work transonic turbine for an energy efficient engine

Future trends in subsonic transport energy efficient turbofan engines

CF6 fan performance improvement

Use of contingency ratings on a subsonic V/STOL propulsion system

Experimental and analytical evaluation of 3-dimensional exhaust plumes

Contingency rating options for AWB-576 aircraft

Some aspects of the thermodynamics of duct jet flows --- in turbofan engines

SUBJECT INDEX
Perforance estimation for highly loaded six and short-haul transport aircraft

Acoustic pressures on a prop-fan fuselage surface

Advanced turbo-prop airplane interior noise reduction-source definition

High speed turboprops for executive aircraft, potential and recent test results

Advanced turbo-prop potential for high speed

flow induced spring coefficients of labyrinth seals for application in rotor dynamics

Development of flexible rotor balancing criteria

Unsteady aerodynamics in turbomachinery

Turbo-Prop Aircraft

NT AN-24 AIRCRAFT

NT C-130 AIRCRAFT

NT CL-84 AIRCRAFT

NT Y-27 AIRCRAFT

Acoustic pressures on a prop-fan fuselage surface

Noise transmission and attenuation by stiffened panels

Short distance multipurpose aircraft An-28

Feasibility tests of use of the tri-tubo-3 aircraft for arctic ABT drops

Advanced turbo-prop airplane interior noise reduction-source definition

High speed turboprops for executive aircraft, potential and recent test results

Advanced turbo-prop potential for high speed

Acoustic test and analyses of three advanced turboprop models

Performance estimation for highly loaded six and ten blade propellers combined with an advanced technology turboshift engine

Evaluation of Aero Commander sidewall vibration and interior acoustic data: Static operations

Turboprop Engines

Acoustic measurements of three Prop-Fan models

Study of turboprop system reliability and maintenance costs

Preliminary study of advanced turboprop and turboshift engines for light aircraft --- cost effectiveness

Performance estimation for highly loaded six and ten blade propellers combined with an advanced technology turboshift engine

Turboshaft Engines

Performance estimation for highly loaded six and ten blade propellers combined with an advanced technology turboshift engine

The NASA high-speed turboprop program
**TURBULENT WAKES**

Influence of pressure driven secondary flows on the behavior of turbofan forced mixers
[AIAA PAPER 80-1870] p0452 A80-38324

Asymmetric trailing-edge flows at high Reynolds number
[AIAA PAPER 80-1296] p0506 A80-44151

Considerations of some critical ejector problems
for the V/STOL aircraft
---

Compensation of three-dimensional flow in turbomachinery at high Reynolds numbers and comparison with experimental data
[TSA-79-61] p0144 A80-15364

An experimental study of multiple jet wakes
[HASA-M-163537] p0610 B80-31760

**TURBULENT WAKES - NT PROPELLER FLIGHTS**

Near-wake structure and unsteady pressures at trailing edges of airfoils --- an aeroacoustic sound generators
p0161 A80-23900

High-resolution LDA measurements of Reynolds stress in boundary layers and wakes
[AIAA 80-0436] p0202 A80-26967

Experimental investigation of the two-dimensional asymmetric turbulent wake behind isolated airfoils --- induced disturbances in swirling flows
[ASME PAPER 80-GT-140] p0462 A80-42253

Vorticity modelling of blade wakes behind isolated airfoils - blade-row induced disturbances in swirling flows
---

Asymmetric trailing-edge flows at high Reynolds number
[AIAA PAPER 80-1296] p0506 A80-44151

Effect of swirl, wake parameter and wake Reynolds number on recirculation in combustion chambers of jet engines
p0617 A80-52021

A note on an instability mechanism for the core of a rolled-up vortex sheet
p0315 B80-22233

Wind tunnel measurements of the mean flow in the trailing boundary layer and wake in the region of the trailing edge of a swept wing at subsonic speeds
[HAB-TR-75062] p0815 B80-24278

A numerical and experimental study of the turbulent wakes of turbomachinery rotor blades, isolated airfoils, and a cascade of airfoils
p0486 B80-27277

**TURBULENT WAKES - B TWO DIBITBAL BODIES**

An experiment of lift interference on 2-dimensional wings in a wind tunnel with perforated walls
p0268 A80-29689

AGARD two-dimensional aerelastic considerations
[AGARD-AR-156] p0228 H80-10202

Transonic data memorandum: Numerical methods for solving the potential flow equation for two-dimensional airfoils in subsonic and transonic flows, brief details, test cases and examples
[FDDB-79009] p0302 H80-21278

Study for conceptual design of VTO, V/STOL exhaust nozzles
[HASA-CB-152388] p0648 A80-33397

**TWO DIMENSIONAL BODIES**

An experimental and numerical investigation of a three-dimensional shock wave separated turbulent boundary layer
[AIAA PAPER 80-0002] p0156 A80-22277

Allowance for unsteady boundary layer effects in two-dimensional transonic calculations

Interactions on a two-dimensional strip-boundary layer with a three-dimensional transonic swept-wing code
p0220 B80-17988

Engine aerodynamic installation by numerical simulation
[AIAA PAPER 80-0108] p0093 B80-18271

Improved numerical simulation of high speed inlets using the Navier-Stokes equations
[AIAA PAPER 80-0383] p0095 A80-18340

Separation due to shock wave-turbulent boundary layer interaction
[ONERA, TP NO. 1979-146] p0102 B80-20003

Analysis of two-dimensional interactions between shock waves and boundary layers
p0148 B80-21232

Flow of a compressible fluid over an isolated airfoil and through a cascade
p0151 A80-21302

Modelling low Mach number noise
p0161 A80-23902

Straight-walled, two-dimensional diffusers - Transitory stall and peak pressure recovery
p0211 B80-27746

Rotating stall and surge
p0271 A80-30567

Stability aspects of diverging subsonic flow
p0272 A80-30567

Design of slotted transonic wind tunnels for supersonic flow development
p0275 A80-30976

Effect of initial value on the behaviour of flow calculations for blade-to-blade flow through a turbine
p0286 A80-32528

Experimental investigation of the two-dimensional asymmetric turbulent wake behind a blade
p0322 A80-33282

Compensation of vortex flows by panel methods
p0382 A80-37238

Plane unsteady flow of inviscid and incompressible fluid around a system of profiles
p0391 A80-38327

Pressure fields generated by instability waves and coherent structures in an impinging jet
[CAA PAPER 80-0980] p0882 A80-38632

Analysis of nonlifting and lifting airfoils in transonic flow by parametric differentiation
p0552 A80-41598

Perturbing influence of the probe on the characteristics of a subsonic wake behind a two-dimensional model
p0475 A80-21323

Shockless airfoils for wings, compressors, and turbines
p0581 A80-50311

Lifting and nonlifting kernel functions for cascades and isolated airfoils
p0615 A80-51920

General potential theory of arbitrary wing sections
[JACA 80-0980] p0127 B80-15046

Unsteady effects of a control surface in two-dimensional, subsonic and transonic flow
p0742 B80-15168

---

**SUBJECT INDEX**

A-420
Unsteady transonic flows in a two-dimensional diffuser —— air breathing engines

[AD-A075261] p0142 B80-15168

Synthesis of unsteady aerodynamic problems concerning helicopters

[AAFP-BT-79-19] p0175 B80-17033

Experimental study of the aerodynamics of a helicopter rotor blade model in an unsteady flow regime during wind tunnel tests

[AAFP-BT-79-21] p0175 B80-17036

Description and report on the calibration of an unsteady flow wind tunnel, part 1. The unsteady lift generated on an airfoil at moderate incidence to a flow containing streaming oscillations, part 2

[IC-AEREO-79-09-P-1-2] p0176 B80-17040

The reduction of dynamic interference by sound-absorbing walls in the HAB 3 foot wind tunnel

[ARC-B-A-3037] p0182 B80-17093

The use of sound absorbing walls to reduce dynamic interference in wind tunnels

p0182 B80-17096

Transonic kernel function method for unsteady flow calculations using a unified linear pressure panel procedure

[AA-A080227] p0345 B80-22267

Summary of data required for the AGARD SMD activity standard aerelastic configurations — two-dimensional configurations

[SLR-UP-79015-0] p0361 B80-23273

Axial flow rotor unsteady performance

p0364 B80-23308

Unsteady pressure measurements at stall and buffeting

[DFVL-BT-TT-79-09] p0381 B80-25300

Experimental determination of unsteady blade element aerodynamics in cascades. Volume 1: Torsion mode cascade

[NASA-CR-159031] p0384 B80-25335

Steady, Oscillatory, and Unsteady Subsonic and Supersonic Aerodynamics, production version (SOUSSA-P 1.1). Volume 1: Theoretical manual

[NASA-CR-159130] p0377 B80-26269

Experimental studies of scale effects on oscillating airfoils at transonic speeds

Dynamic stall on advanced airfoil sections

[AD-A086875] p0591 B80-29252

Unsteady swirling flows in gas turbines

[AD-A088765] p0593 B80-30697

Special Course on Unsteady Aerodynamics (AGARD-8-679)

p0643 B80-33363

Some introductory concepts based on the unsteady flow about circular cylinders

p0643 B80-33364

Unsteady aerodynamics in turbomachinery

p0643 B80-33369

Unsteady flows associated with helicopter rotors

p0643 B80-33370

Role of unsteady aerodynamics in aircraft response

p0644 B80-33371

Unsteady State

Unsteady aerodynamics of conventional and supercritical airfoils

[AAFP-BT-80-0734] p0331 B80-35038

Unsteady pressure measurements and data analysis techniques in axial-flow compressors

[AAFP-BT-79-01] p0342 B80-36143

Unsteady effects with control surfaces —— measurements in a wind tunnel

[AAFP-BT-79-01] p0325 B80-18049

Experimental techniques in unsteady aerodynamics

p0644 B80-33373

Unsteady Aerodynamics

Unsteady aerodynamics in turbomachinery

p0644 B80-33373

Unsteady state

Unsteady aerodynamics of conventional and supercritical airfoils

[AAFP-BT-80-0734] p0331 B80-35038

Unsteady pressure measurements and data analysis techniques in axial-flow compressors

[AAFP-BT-79-01] p0342 B80-36143

Unsteady effects with control surfaces —— measurements in a wind tunnel

[AAFP-BT-79-01] p0325 B80-18049

Experimental techniques in unsteady aerodynamics

p0644 B80-33373

Unsteady Aerodynamics

Unsteady aerodynamics in turbomachinery

p0644 B80-33373

Unsteady state
A candidate V/STOL research aircraft design concept using an S-3A aircraft and 2 Pegasus '11 engines

Future V/STOL airplanes: Guidelines and techniques for acquisition program analysis and evaluation, executive summary

Integrated rack concept study for V/STOL type aircraft

V/STOL propulsion-induced aerodynamics hover calculation method

V/STOL rotary engine noise prediction model update and evaluation

Reliability and maintainability improvement system for the 7-8 A/TAF-8A barrier head-up display set. Volume 1: Modifications to digital display indicator IP-1351/AVQ-30 (v)

Phase 2 and 3 wind tunnel tests of the J-97 powered, external augmentor V/STOL model --- at Ames 40 by 80 wind tunnel

V/STOL equivalent systems analysis

Conceptual study of modifying an existing fighter for V/STOL capability and combat maneuvering enhancement

VACUUM APPARATUS
Vacuum arc switched inverter tests at 2.5 kVA

VACUUM SYSTEMS
A rotor supported without contact - Theory and application

Design study for ATA vacuum system aperture

Conceptual design and performance estimates for a supersonic aerodynamic window for the ATA vacuum system aperture

VACUUM TUBE OSCILLATORS
NT CATHODE BAY TUBES
NT IMAGE TUBES
NT TRAVELING WAVE TUBES
NT VIDECONS

VACUUM TUBES
NT CATHODE BAY TUBES
NT IMAGE TUBES
NT TRAVELING WAVE TUBES
NT VIDECONS

VALVE AIRCRAFT
U H-70 AIRCRAFT

VALUE ENGINEERING
Value analysis for the aircraft Airbus [SNIAAS-792-501-105] p0486 880-27212

The application of design to cost and life cycle cost to aircraft engines

Military engine programs with cost objectives

VALVES
NT AUTOMATIC CONTROL VALVES
NT DAMPERS (VALVES)
NT FOUL VALVES
NT SOLENOID VALVES

Single-stage electrohydraulic servosystems for actuating on airflow valve with frequencies to 500 hertz

NASA-TP-1678 p0554 880-29369

VANADINUM
Analysis of the response of a thermal barrier coating to sodium and vanadis doped combustion gases

NASA-TP-79205 p0032 880-10348

VANES
NT GUIDE VANES
NT JET VANES

An experimental investigation of endwall profiling in a turbine vane cascade

Analysis of rotating stall in vaneless differusers of centrifugal compressors

Analysis of rotating stall in vaneless differusers of centrifugal compressors

A candidate V/STOL research aircraft design

Aerodynamic performance of a centrifugal compressor with vaned differusers
Vertically Ailerons

Vertically Flaps

Vertically Stabilizers

Vertically Takeoff, Landing, and Approach Aircraft

The study of the effect of cross-shafting on engine-out vertical landing reliability of V/STOL aircraft

Vertically Takeoff and Landing (VTOL) propulsion technology

The effect of cross-shafting on engine-out vertical landing reliability of V/STOL aircraft

Vertical Takeoff and Landing (VTOL) propulsion technology

Feasibility and concept study to convert the NASA/AMES vertical motion simulator to a helicopter simulator

Operations manual: Vertical Motion Simulator (VMS) S.08

Vertical motion control: Executive summary

Parameter sensitivity in time varying linear systems, with an application to the dynamics of VTOL aircraft

Minimum sensitivity controllers with application to VTOL aircraft

Consistent takeoff and landing criteria for Naval aircraft of various basing concepts

A small ship-based VTOL aircraft - A design exercise

Weight impact of VTOL

Propulsion system (Tafcos) concept on a DHC-6 Twin Otter

Model development for automatic guidance of a VTOL aircraft to a small aviation ship

An experimental investigation of VTOL flying qualities requirements in shipboard landings

VTOL in-ground effect flows for closely spaced jets

A Navier-Stokes scheme for the calculation of three-dimensional impinging jet flows

Vertical Takeoff and Landing (VTOL) propulsion technology

Fuel minimal take-off path of jet lift VTOL aircraft, log no. C3558

The aerodynamics of a jet in a crossflow

Digital adaptive controllers for VTOL vehicles. Volume 1: Concept evaluation

Digital adaptive controllers for VTOL vehicles. Volume 2: Software documentation

Flight tests of the total automatic flight control system (Tafcos) concept on a DHC-6 Twin Otter aircraft
VIBRATION EFFECTS

Crack development in panels of a pressurized fuselage under the combined effect of preconsolidation-induced cyclic loads and high-frequency vibrations

VIBRATION ISOLATORS

Active multivariable isolation for an helicopter by decoupling and frequency domain methods

VIBRATION MEASUREMENT

Application of the discrete-phase method /DPR/ to the study and control of aircraft turbine engine blade vibrations. I

VIBRATION TESTS

Processing noise and vibration data for gas turbine engine development

Gas turbine carcase and accessory vibration - Problems of measurement and analysis

Application of the discrete-phase method /DPR/ to the investigation and monitoring of aircraft engine blade vibrations. I

Vibration measurements on turbine engine blades with optical probes

Digital system for dynamic turbine engine blade displacement measurements

Measurement and prediction of the aerodynamic damping of compressor blades

Digital system for dynamic turbine engine blade displacement measurements

Angular vibration measurement techniques -- airborne electro-optical package disturbances

Methods for determining undamped normal modes and transfer functions from receptance measurements -- with possible application to helicopter structures vibration testing

VIBRATION mode

Vibration characteristics of asymmetric cross-section bladed disk under rotation

Vibrational modes of an aircraft simulator motion system

An optimization method for the determination of the important flutter modes

The effect of aerodynamic phase lag on the twin vibration node model of aeroengine fan flutter

Redesign of structural vibration modes by finite-element inverse perturbation

Aerodynamic analysis of a supersonic cascade vibrating in a complex mode

Flexural torsional vibrations of a wing

Influence of the profile geometry on the eigenfrequency and normal modes of high-pressure turbine blades with allowance for conditions characteristic of aircraft gas turbines

Application of random time domain analysis to dynamic flight measurements -- b-1 aircraft

Calculation of natural frequencies and mode shapes of mass loaded aircraft structures

Methods for determining undamped normal modes and transfer functions from receptance measurements -- with possible application to helicopter structures vibration testing

The Shock and Vibration Digest, volume 12, no. 7

VIBRATION PROTECTION

U VIBRATION ISOLATORS

VIBRATION SIMULATORS

A dynamic vibration exciter for full-scale structures

Dynamic vibration exciter for full-scale structures

VIBRATION TESTING MACHINES

U VIBRATION SIMULATORS

VIBRATION TESTS

St Damping Tests

Installation for investigating the effect of non-steady-state supersonic gas flow on the blades of a plane cascade
Experimental evaluation of the predicted behavior of squeeze-film-bearing-supported rigid rotors

The influence of test equipment during resonance tests of light structures -- aircraft aeroelastic model

An application of system identification to flutter testing

Excitation and analysis technique for flight flutter tests

Flight testing of the buffeting behavior of combat aircraft

A simplified ground vibration test procedure for sailplanes and light aircraft

Dynamic Environmental Qualification Techniques

Civil aircraft equipment environment qualification

Pavement evaluation and overlay design using OSAF avionics procurements

A digital system for panoramic video display in flight training simulators

Investigation of vibration reduction through propeller signatures and their use -- aircraft dynamics

Application of the calculation scheme for a layered viscoelastic medium to the estimation of the stressed state of highway airport pavements with moving loads

The viscoelastic behavior of a composite in a thermal environment

Viscosity

Blade excitation by elliptical whirling in viscous-damped jet engines

Viscous-turbulent flow analysis

Viscous theory of surface noise interaction

Vibratory nondestructive testing and layered structures vibration testing

Viscous-damped jet engines

Fuel character effects on the J79 and F101 engine combustion systems

Viscous theory of surface noise interaction phenomena

Viscoscodynamics

Vibratory nondestructive testing and layered structures vibration testing

Viscous-damped jet engines

Fuel character effects on the J79 and F101 engine combustion systems

Viscous theory of surface noise interaction phenomena

Viscoscodynamics
A mixed compact Hermitian method for the numerical study of unsteady viscous flow around an oscillating airfoil

Calculation of transonic viscous flows past wing profiles

Complete viscous flowfield solutions about a blunt parabolic body in a supersonic stream

Heat transfer at a breaking point of the leading edge of a plate in hypersonic flight

Investigation of flows in Laval nozzles at small Reynolds numbers

Application of viscous analyses to the design of jet exhaust powered lift installations

Theoretical method for the analysis of airfoils in viscous flows

A simplified model for the viscous crossflow in a slotted test section

Viscous flowfields induced by two- and three-dimensional lift jets in ground effect

Viscous flow in the region of a rounded trailing edge

Calculation of viscous flow past wing profiles

Complete viscous flowfield solutions about a blunt parabolic body in a supersonic stream

Heat transfer at a breaking point of the leading edge of a plate in hypersonic flight

Application of viscous analyses to the design of jet exhaust powered lift installations

Theoretical method for the analysis of airfoils in viscous flows

A simplified model for the viscous crossflow in a slotted test section

Viscous flowfields induced by two- and three-dimensional lift jets in ground effect

Viscous flow in the region of a rounded trailing edge

Computational models for the viscous/inviscid analysis of aircraft exhaust plumes — predicting afterbody drag

An analysis method for multi-component airfoils in separated flow

An integral-representation approach for time-dependent viscous flows

A comprehensive investigation into the supersonic viscous flow about a slender cone at high angle of attack: Experimental and theoretical results

VISCOS FLUIDS

The basic models of mechanics of liquids and gases in the theory of the wing

Dynamics of flexible rotors partially filled with a viscous incompressible fluid

VISIBILITY

MT LOW VISIBILITY

The influence of colors on the visibility of aircraft and ground obstacles

Optical design of airport control tower cabs

Lidar visibility measurements

Infra-red clothing for U.S. airports

Remote sensing methods for determination of slant range visibility

Development and evaluation of a tower slant visual range system

Military member calculations for the NATO theater: Weather and Warplanes 8

VISION

MT NIGHT VISION

VISUAL AIDS

An investigation of laser lighting systems to assist aircraft landing

VISUAL DISPLAYS

U DISPLAY DEVICES

VISUAL AID

Visual accommodation responses in a virtual image environment

Predicting field of view requirements for VSTOL aircraft approach and landing

VISUAL FLIGHT

Pilot performance during simulated approaches and landings made with various computer-generated visual glidepath indicators

Visually Coupled System: Computer Generated Imagery (FCS-CGI) engineering interface

VISUAL FLIGHT RULES

FAA/ATC simulation tests with site adaptation

Remote sensing methods for determination of slant range visibility

Pilot/vehicle model analysis of visual and motion cue requirements in flight simulation — helicopter hovering

VISUAL TASKS

Optical design of airport control tower cabs

VISUAL TRACKING

SUBJECT INDEX
The application of output predictive digital control to wing flutter suppression and terrain following problems [AIAA-PAPER 80-0899] p0075 A80-22361
Further investigation of a finite difference procedure for analyzing the transonic flow about harmonically oscillating airfoils and wings [NASA-CP-3195] p0070 A80-24271

WING PANELS
Application of finite element analysis to deformation of structural weight [S1/10 PAPER 1271] p0104 A80-20627
Principles of design of a carbon fibre composite aircraft wing [NASA-CP-3195] p0075 A80-22361
Calculation of minimum-weight and maximum-rigidity structures in the presence of design constraints p0204 A80-27165
Minimum-gross designs of stiffened graphite/polyimide compression panels p0213 A80-27992
Preliminary design of composite wing-box structures for global damage tolerance [AIAA 80-0755] p0032 A80-35069
Repair of advanced composite structures in stressed aircraft [AIAA 80-0776] p0033 A80-35066
Wing/store flutter with nonlinear pylon stiffness [AIAA 80-0796] p0034 A80-35075
Fabrication of double-curvature skins by rolling --- for aircraft structures p0076 A80-36740
Construction of stiffness matrices of thin-wall systems using sliding interpolation p0276 A80-36745
Autocon-I ultrasonic fatigue-crack detector --- for military aircraft fastener sites p0381 A80-37221
Protection against wing icing for Airbus A300 and A310 [DOE PAPER 80-0466] p0523 A80-66296
Calculation of the interaction between an exhaust jet and a high-lift wing p0525 A80-66862
Flight simulation fatigue crack propagation evaluation of candidate lower wing skin materials with particular consideration of spectrum truncation [NLR-TR-77092-0] p0040 A80-11524
Elements of the wing section theory and of the wing theory [NACA-1911] p0126 A80-15000
Loading tests of a wing structure for a hypersonic aircraft [NACA-TP-1596] p0129 A80-15068
Preliminary design of graphite composite wing panels for commercial transport aircraft [NASA-CP-159150] p0183 A80-17168
An investigation of residual stresses in simulated wing panels of 7075-T6 aluminum [AO-A00863] p0370 A80-23693
Design studies of laminar Flow Control (LFC) wing concepts using superplastic forming and diffusion bonding (SPF/DB) [NASA-CP-159220] p0479 A80-26293
Multilevel optimum design of wing box structures with fiber composite panel components p0494 A80-27349

Boundary layer

[BSNO-75750] p0478 R80-26275

Boundary layer measurements on a two-dimensional wing with flap and a comparison with calculations

P0501 R80-27665

System for use in conducting wake investigation for a wing in flight --- differential pressure measurements for drag investigations

[BSNO-CASE-MRC-11024-1] p0529 R80-28300
Exploratory piloted simulator study of the effects of winglets on handling qualities of a representative agricultural airplane

Application of fully stressed design procedures to redundant and non-isotropic structures

Aerothermal analysis of a wing-elevator cove with variable leakage

[NASA-TP-1703] p0638 880-32692

Circulation Control Wing (CCW) Flight Tests

p0640 880-33339

EXPLORATORY ELECTRIC VIBRATIONS

Civil helicopter nire strike assessment study. Volume 1: Findings and recommendations

[NASA-CH-152389] p0619 B80-33381

Aircraft delays at major U.S. airports can be reduced

[SAE PAPER 800725] p0576 A80-49681

Axisymmetric dynamics of a sheet under large deflection conditions

p0376 A80-36782

Account for working fluid compressibility in the gas turbine engine transient operating regime

p0616 A80-51892

X-ray radiography of gas turbine ceramics

[AD-A080440] p0307 880-21335

X-ray apparatus

A pulsed radiography technique for studying the internal structure of fuel injection jet

p0327 A80-30588

High energy X-ray study

[AD-A086279] p0591 880-30311

X-ray inspection

Transparent engines at Rolls-Royce - The application of high energy X-ray technology to gas turbine development

p0191 A80-25497

High energy X-ray study

[AD-A086279] p0591 880-30311

X-wing brothers

Helicopters breaking the 200 kn barrier - Three systems could do it this decade

p0572 A80-48625

X-70 AIRCRAFT

U X-70 AIRCRAFT

XU-100A AIRCRAFT

U V-ATOL AIRCRAFT

XHOR LAMPS

detailed design, fabrication and testing of an engineering prototype compensated pulsed alternator

[UCRL-15213] p0556 880-29595

XJ-79/F-9-1 ENGINE

U J-79 ENGINE

XV-15 AIRCRAFT

Bell tilt-rotor - The next V/STOL

p0157 A80-22753

Synthesis of rotor test data for real-time simulation

[NASA-CP-15231] p0222 880-18029

A highefficiency rotor XV-15 design integration feasibility study. Volume 1: Engineering design studies

[NASA-CP-152310] p0223 880-18030

Wind-tunnel tests of the XV-15 tilt rotor aircraft

[NASA-TP-81177] p0417 A80-24294

YAG LASERS

Application of Nd:YAG optical communications technology for aircraft to satellite links

p0195 A80-26797

Design considerations for an active laser seeker

p0324 A80-34189

YAW

On modeling sensitivity of a linear system to reduction of its order by the infinitesimal transformation method in the yaw motion control problem

A-448

ZINC NICKEL BATTERIES

U NICKEL ZINC BATTERIES

ZIRCONIUM COMPOUNDS

UF ZIRCONIUM OXIDES

ZIRCONIUM OXIDES

Analysis of the response of a thermal barrier coating to sodium and vanadium doped combustion gases

[NASA-TP-79205] p0303 880-10304

[AD-A088797] p0612 B80-32030

AIR FORCE HUMAN RESOURCES LAB., BROOKS AFB, TX.

Advanced simulator for pilot training (ASPT): 6-seat optimization
[AD-A086447] p0031 B80-10233

Simulator for air-to-air combat notion systems assessment investigation
[AD-A072612] p0032 B80-10237

Effects of varying visual display characteristics of the T-4G, a T-37 flight simulator
[AD-A078140] p0100 B80-15180

Platform motion contributions to simulator training effectiveness. Study 3: Interaction of motion with fields-of-view
[AD-A078426] p0367 B80-23334

AIR FORCE HUMAN RESOURCES LAB., WILLIAMS AFB, AZ.

Application of flight simulator record/playback feature
[AD-A081752] p0404 B80-26335

Advanced simulator for pilot training: Design of automated performance measurement system
[AD-A088855] p0689 B80-33421

AIR FORCE INST. OF TECH., WRIGHT-PATTERSON AFB, OHIO.

Some tests on small-scale rectangular thrust ejector
[AD-A082462] p0023 B80-10120

A study to develop optimization algorithms for aircraft wing structures
[AD-A072466] p0027 B80-10196

The use of the Nauer factor for estimating the cost of a turbine engine in the early stages of development
[AD-A073016] p0041 B80-11095

Thrust vectoring to eliminate the vertical stabilizer
[AD-A077952] p0237 B80-19077

Minimum time turns with thrust reversal
[AD-A077952] p0237 B80-19078

An analysis and synthesis of engine condition monitoring systems
[AD-A077952] p0238 B80-19078

Ground plane effects on a contoured surface at low subsonic velocities
[AD-A079687] p0288 B80-20237

Development of a bird/aircraft strike hazard assessment methodology
[AD-A075568] p0290 B80-20246

A study of two avionics life cycle cost models and their applicability in the communications-electronics-meteorological environment
[AD-A076981] p0292 B80-20268

An operating and support cost model for avionics automatic test equipment
[AD-A077558] p0292 B80-20269

Velocity profiles in a long inlet duct employing a photon correlating laser velocimeter without seeding
[AD-A079787] p0293 B80-20278

An experimental study of static thrust augmentation using a 2-d variable ejector
[AD-A079857] p0294 B80-20279

The prediction of mass loaded natural frequencies and forced response of complex, rib-stiffened structures
[AD-A079856] p0297 B80-20625

The graphical display of multi-dimensional aerodynamic flow field data
[AD-A080019] p0303 B80-21288

Model order reduction using the balanced state representation theory, application and critical analysis of software implementation
[AD-A080371] p0309 B80-21356

A statistical model for multipath reflection effects of antennas mounted on aircraft
[AD-A080369] p0311 B80-21649

Evaluation of an improved parachute test data acquisition system
[AD-A080240] p0345 B80-22260

Using vertical gust alleviation to improve the target tracking capability of the control configuration TP-16
[AD-A080520] p0354 B80-22360

The application of output predictive digital control to wing flutter suppression and terrain following problems
[AD-A080619] p0354 B80-22361

Analysis of the effects of higher order control systems on aircraft approach and landing longitudinal handling qualities
[AD-A080519] p0354 B80-22362

Initial development for a flutter analysis of damaged T-38 horizontal stabilizers using FASTBAN
[AD-A082168] p0421 B80-24325

Development and application of a subsonic triangular vortex panel
[AD-A085555] p0581 B80-29256

Production oriented maintenance organization: A critical analysis of sortie-generation capability and maintenance quality
[AD-A087095] p0595 B80-31323

An analysis of the future requirements for materials handling equipment in the military airlift command
[AD-A087099] p0600 B80-31370

Some civil engineering and management aspects of conversion from JP-4 to JP-8 fuel by the United States Air Force in the continental United States
[AD-A087221] p0607 B80-31626

Cooperative estimation of targets by multiple aircraft
[AD-A085799] p0631 B80-32366

Criteria for applying commercial aircraft warranties in USAF aircraft purchases
[AD-A080774] p0640 B80-33343

Validation of the operating and support cost model for avionics automatic test equipment (OSCAT)
[AD-A080725] p0649 B80-33419

AIR FORCE LOGISTICS COMMAND, WRIGHT-PATTERSON AFB, OHIO.

Opportunistic Maintenance Engine Simulation model: ONENS 2
[AD-A072516] p0040 B80-11088

AIR FORCE MATERIALS LAB., WRIGHT-PATTERSON AFB, OHIO.

Vibrations of a compressor blade with slip at the root
[AD-A075670] p0183 B80-17263

An analysis of residual stresses and displacements due to radial expansion of fastener holes
[AD-A076730] p0252 B80-19569

Viscouselastic damping in USAF applications
[AD-A080825] p0253 B80-19582

Soft body impact of cantilever beams

parametric method of aircraft engine status diagnosis based on limited information

Influence of gas turbine engine combustion chambers geometric parameters on mixture formation characteristics

Determination of turning angle of a jet impinging on a bucket with visor

Study of heat-pipe heat exchanger in the small-gas turbine engine system

Analytical representation of noise characteristics in form convenient for computer calculation of GTE parameters

Long-lift GTE operation based on technical condition

Use of the method of variable directions for numerical study of the temperature states of a turbine disk with blades

Characteristics of afterburning bypass turbojet engine with oxygen injection into the afterburner chamber

Analytical design of regulators for controlling elastic flight vehicle rotation about the longitudinal axis

Optimal control of flight vehicle with elastic elements

Analog modeling in studying supersonic flow around a wing and its governing analog-criteria elements

Basic problem of aircraft gas turbine engine analytic design, part 1

Optimal control of flight vehicle with elastic elements

Analysis of thin-wall beams by the method of segments

Selecting the geometric parameters and position of a nose flap on the root profile of a swept wing using tunnel test data, part 2

Laminar boundary layer calculation based on experimental pressure distribution

On modeling sensitivity of a linear system to reduction of its order by the infinitesimal transformation method in the yaw motion control problem

On the empannage snap-through problem

Electrical charging of fabric and film materials

Notion of rectangular wing between parallel walls

Structural analysis of variable-sweep wings

Determination of strain fields near concentrators from strain gage indicators

On thin-wall beam effective stiffness

The VC-14 upper surface blown flap: A unique control surface.

New remotely piloted vehicle launch and recovery concepts: Computer program listings.

Incandescent lamp life under random vibration.

New remotely piloted vehicle launch and recovery concepts. Volume 1: Analysis, preliminary design and performance/cost trade-offs.

A JIBIS performance model for the E-3A.

PIPSI/Navy rapid evaluation of propulsion system effects for the Navy gas turbine engine code.

An improved panel method for the solution of three-dimensional leading edge vortex flows.

Evaluating and selecting the preferred air breathing weapon system.

Hybridized polymer matrix composites.

BOEING CO., SEATTLE, WASH.

Ch-16 composite rotor blade flight stress survey.

Analysis and correlation with theory of rotor test data for real-time simulation.

High-freezing-point fuel studies.

Further investigation of a finite difference procedure for analyzing the transonic flow over oscillating airfoils and wings.

A computational approach to design of arbitrary configurations in three-dimensional leading edge vortex flows.

Evaluating the crack gage concept for monitoring aircraft gas turbine engines.

Component computer programs.

Hybridized polymer matrix composites.

BOEING CO., SEATTLE, WASH.

Two-dimensional wind-tunnel tests of a NASA supercritical airfoil with various high-lift systems. Volume 1: Data analysis.

Two-dimensional wind-tunnel tests of a NASA supercritical airfoil with various high-lift systems. Volume 2: Test data.

Jet engine decoupled test cell exhaust system phase: Coanda/refraction noise suppression concept, advanced development.

Jet engine class C test cell exhaust system phase: Coanda/refraction noise suppression concept—advanced development.

Developing, mechanizing and testing of a digital active filter suppression system for a modified E-52 wind-tunnel model.

BOEING MILITARY AIRPLANE DEVELOPMENT, SEATTLE, WASH.

Flight control and configuration design considerations for highly maneuverable aircraft.

Fuselage of the three dimensional transonic unsteady aerodynamic problem.

Easy ACIS dynamic analysis, volume 2: Part 2: Co-processor computer program.

Design options study.

BOEING VERTOL CO., PHILADELPHIA, PA.

Helicopter canopy internal reflection investigation.

Analysis, wind correlation with theory of rotor lift-limit test data.

Ch-46 composite rotor blade flight test data.

Fault-tolerant system optimization.

A multi-grid code for 3-D transonic potential flow about axisymmetric inlets at angle of attack.

Economic study of multipurpose advanced high-speed transport configurations.

An investigation of several factors involved in a finite difference procedure for analyzing the transonic flow about harmonically oscillating airfoils and wings.

A users guide for A340: A program using a finite difference method to analyze transonic flow over oscillating airfoils and wings.

The 737 graphite composite flight spoiler flight service evaluation.

Improved tire/wheel concept.

The role of computational aerodynamics in airplane configuration development.

Airplane wing leading edge variable camber flap.

A general panel method for the analysis and design of arbitrary configurations in incompressible flows.

Further investigation of a finite difference procedure for analyzing the transonic flow about harmonically oscillating airfoils and wings.

Aviation fuels outlook.

Analytical investigation of fan tone noise due to ingestion of atmospheric turbulence.

Large scale wind tunnel investigation for future modifications to the quiet short-haul research aircraft.

Aircraft noise prediction program validation.

Analysis of transonic flow about harmonically oscillating airfoils and wings.

Analysis of transonic flow about harmonically oscillating airfoils and wings.

Upper surface blowing noise of the NASA-Ames quiet short-haul research aircraft.

Fault-tolerant system optimization.

Computational aerodynamics on large computers

The promise of multicyclic control

Total aircraft flight-control system - Balanced Computer/experiment integration for unsteady... on flight effects on.

Calculations of transonic flow about an airfoil

Effect of propeller slipstream on the drag and performance of the engine cooling system for a general aviation twin-engine aircraft

Effect of passenger windowstrips on the drag and performance of the engine cooling system for a general aviation twin-engine aircraft

Numerical simulation of three-dimensional bowtie afterbody flow fields

Calculations of transonic flow about an airfoil in a wind tunnel

Asymmetric trailing-edge flows at high Reynolds number

A new approach to active control of rotorcraft vibration

A Variational technique for smoothing flight-test and accident data

Model development for automatic guidance of a VTOL aircraft to a small aviation ship

A pilot modeling technique for handling-qualities research

[IEEE 80-1628] p0519 A80-45912

Flying-qualities criteria for wings-level-turn maneuvering during an air-to-ground weapon delivery task

[IEEE 80-1628] p0502 A80-45916

The future of short-haul transport aircraft

[IEEE PAPER 800755] p0576 A80-49703

Aircraft simulation data management - a prototype system

Workshop on Thrust Augmenting Ejectors

[NASA-CP-2093] p0022 A80-10107

NASA overview

Coupled rotor and fuselage equations of motion

Aerodynamic interactions from reaction controls for lateral control of the H2-F2 lifting-body entry configuration at transonic and supersonic and supersonic Mach numbers

Wind-tunnel/flight correlation study of aerodynamic characteristics of a large flexible supersonic cruise airplane Cn=70–71

1 Wind-tunnel tests of a 0.63-scale model at Mach numbers from 0.6 to 2.53

[NASA-2P-1514] p0308 A80-11068

V/STOL flight simulation

[NASA-TH-81156] p0072 A80-12100

Force and moment data from a wind-tunnel test of a tilt-nacelle V/STOL propulsion system with an attitude control vane

[IEEE 80-11517] p0077 A80-13003

Flight test of navigation and guidance sensor errors measured on STOL approaches

[NASA-81154] p0008 A80-13041

Fire-resistant materials for aircraft passenger seat construction

[NASA-TH-76617] p0083 A80-13255

Acoustically swept rotor

[NASA-TH-1106-1] p0118 A80-14107

Quiet short-haul research aircraft familiarization document

[NASA-EN-81149] p0118 A80-14108

Pilot control through the TAFCONS automatic flight control system

[NASA-81152] p0122 A80-14138

NASA/Army IV-15 tilt rotor research aircraft wind-tunnel test program plan

[NASA-TH-78562] p0129 A80-15067

The effects of motion and g-seat cues on pilot simulator performance of three piloting tasks

[NASA-TH-1601] p0129 A80-15069

Evaluation of approximate methods for the prediction of noise shielding by airframe components

[NASA-TH-1604] p0137 A80-15129

Effects of primary rotor parameters on flapping dynamics

[NASA-EN-1631] p0177 A80-15138

Control of forebody three-dimensional flow separations

[NASA-TH-1631] p0177 A80-15138

NASA quiet short-haul research aircraft experimenters' handbook

[NASA-TH-81152] p0141 A80-15164

Wing flapping with minimum energy

[NASA-81174] p0167 A80-16024

A comparison of calculated and experimental lift and pressure distributions for several helicopter rotor sections

[NASA-81160] p0160 A80-16035

Turbulence measurements in the boundary layer of a low-speed wind tunnel using laser velocimetry

[NASA-TH-81165] p0160 A80-16030

Flight tests of the total automatic flight control system (TAFCONS) concept on a BDC-6 Twin Otter aircraft

[NASA-TH-1513] p0160 A80-17081

An experimental investigation of two large annular diffusers with swirling and distorted inflow

[NASA-TH-1628] p0219 A80-17984

NASA aviation safety reporting system

[NASA-TH-78608] p0221 A80-18010
The effect of viewing time, time to encounter, and practice on perception of aircraft separation on a cockpit display of traffic information [NASA-TM-81173] p0224 880-18038
V/STOL/SD avionics system flight-test data on a UH-1H helicopter [NASA-TH-7859] p0225 880-18047
A summary of recent literature on aircraft aeroelastic and space attitude control [NASA-TM-81175] p0231 880-18995
Analysis of fuel-conservative curved decelerating approach trajectories for powered-lift and CTOL jet aircraft [NASA-TP-1650] p0231 880-19022
Laboratory experiments on aircraft surface representation for aerodynamic computation [NASA-TH-81170] p0232 880-19025
Application of the concept of dynamic tris to automatic landing of aircraft [NASA-TP-1512] p0294 880-19126
Pilot evaluation of configuration management system concepts during transition to the landing approach for a powered-lift STOL aircraft [NASA-TH-81146] p0265 880-19127
On the nonlinear deformation geometry of Euler-Bernoulli beams [NASA-TP-1566] p0297 880-20619
An acceptable role for computers in the aerodynamic design process [NASA-TP-1566] p0298 880-21246
Use of advanced computers for aerodynamic flow simulations [NASA-TH-81186] p0347 880-22297
Three-dimensional interactions and vertical flows with emphasis on high-speed flight [NASA-TP-1566] p0302 880-21286
An experimental evaluation of a helicopter rotor section designed by numerical optimization [NASA-TP-88062] p0303 880-21287
Conceptual studies of a long-range transport with an upper surface blowing propulsive lift system [NASA-TH-81196] p0358 880-23249
Low-speed flow over delta wings at supersonic speeds [NASA-TP-81187] p0358 880-23250
Static calibration of a two-dimensional wedge nozzle with thrust vectoring and spanwise blowing [NASA-TH-81161] p0365 880-23317
Comparison of calculated and measured model rotor loading and wake geometry [NASA-TH-81189] p0413 880-24262
A candidate V/STOL research aircraft design concept using an S-2A aircraft and 2 Pegasus engines [NASA-TH-81204] p0417 880-24293
Wind-tunnel tests of the XV-15 tilt rotor aircraft [NASA-TH-81177] p0417 880-24294
Equations for determining aircraft motions for accident data [NASA-TP-81609] p0432 880-25506
Large-scale wind-tunnel tests of inverting flaps on a STOL utility aircraft model [NASA-TH-81205] p0432 880-25518
Summary of all cycle II.5 shear and boundary layer measurements, aerodynamics [NASA-TH-81180] p0439 880-25604
A computer program to generate two-dimensional grids about airfoils and other shapes by the use of Poisson's equation [NASA-TH-81198] p0477 880-26266
Head-up display in the non-precision approach [NASA-TH-81171] p0477 880-26266
Experimental studies of scale effects on oscillating airfoils at transonic speeds
Investigation of trailing-edge noise

Thermomechanical analyses of structural concepts for hypersonic cruise vehicles

Full scale aircraft simulation with cryogenic tunnels and status of the National Transonic Facility

Control system techniques for improved [AIAA PAPER 80-0017] p0198 A80-26932
(cruise/steer) guidance for fighter aircraft

(AIAA PAPER 791083) p0194 A80-26639

Multirole cargo aircraft options and configurations

The National Transonic Facility - Status and operational planning

Automatic control of NASA Langley's 0.3-meter cryogenic test facility

A study of nonadiabatic boundary-layer stabilization time in a cryogenic tunnel for typical wing and fuselage models

Development of test methods for scale model simulation of aircraft in the NASA Langley Vortex Facility

A comparison of experimental and theoretical turbulence reduction from screens, honeycomb and honeycomb-screen combinations

Additional flow quality measurements in the Langley Research Center 6-Foot Transonic Pressure Tunnel

The influence of wing, fuselage and tail design on rotational flow aerodynamics data obtained beyond maximum lift with general aviation configurations

Exploratory investigation of the effects of vortex bursting on the high angle-of-attack characteristics of highly-swept wings

The potential for damage from the accidental release of conductive carbon fibers from aircraft composites

Graphite-epoxy panel compression strength reduction due to local impact

Operational implications of some NASA rotary wing induced velocity studies

Evaluation of finite element formulations for transient conduction forced-convective analysis

Development of a sectional half-span model for interference free testing

Noise radiation from the side edges of flat plates

Cockpit Display of Traffic Information /CDTI /

Design of slotted transonic wind tunnels for super sonic flow development

Some unique characteristics of supersonic aircraft vehicles and their effect on airport community noise

Technology requirements and readiness for very large aircraft

Modern fluid dynamics of subsonic and transonic flight

Modern fluid dynamics of supersonic and hypersonic flight

Current and projected use of carbon composites in United States aircraft

Preliminary design of composite wing-box structures for global damage tolerance

Wing-store flutter with nonlinear pylon stiffness

Integrated thermal-structural finite element analysis

A collection of formulas for calculation of rotating blade noise - Compact and noncompact source results

Noise transmission and control for a light, twin-engine aircraft

Prediction of noise constraints options takeoff procedures

An overview of NASA's propeller and rotor noise research

Output feedback non-linear decoupled control, synthesis and observer design for maneuvering aircraft

Aircraft noise-induced building vibrations

A model for broadband jet noise amplification

Comparison of stack plate properties obtained from aircraft and spacecraft measurements

Investigation of advanced thrust vectoring exhaust systems for high speed passenger lift

Careful numerical study of flowfields about asymmetric external conical corners

Numerical solution of the Navier-Stokes equations for a family of three-dimensional corner geometries

Complete viscous flowfield solutions about a blunt parabolic body in a supersonic stream

Analysis of nonlifting and lifting airfoils in transonic flow by parametric differentiation

Prediction and measurement of turbulent aerodynamic trailing edge flows

Complete viscous flowfield solutions about a supersonic internal corner flowfield

Effects of discontinuities dropped wing leading-edge modifications on the spinning characteristics of a low-wing general aviation airplane

Full-scale wind-tunnel investigation of the effects of wing leading-edge modifications on the high angle-of-attack aerodynamic characteristics of a low-wing general aviation airplane

Determination of an angle of attack sensor correction for a general aviation airplane at large angles of attack as determined from wind tunnel and flight tests

Aerodynamic design optimization of fuel-efficient high-performance, single-engine, business airplane

Effect of winglets on performance and handling qualities of general aviation aircraft

An analysis of thrust-induced effects on the longitudinal aerodynamics of STOL fighter configurations

Sensitivity of the optimal preliminary design of a transport to operational constraints and performance index

Location and propagation of shock associated noise from supersonic jets

C-32
Controlled supercritical crossflow on supersonic wings - an experimental validation

Microwave radiometric aircraft observations of the Fabry-Perot interference fringes of an ice-water system

Development and flight evaluation of automatic flare laws with improved touchdown dispersion

Active flutter suppression using Linear Quadratic Gaussian theory

Single pilot IFR autopilot complexity/benefit tradeoff study

Impact of longitudinal flying qualities upon the design of a transport with active controls

Commercial and non-linear aerodynamics of three-surface aircraft concepts

Pseudo-steady state analysis of nonlinear aircraft maneuvers

Determination of instrumentation errors from measured data using maximum likelihood method

A direct method for synthesizing low-order optimal feedback control laws with application to flutter suppression

Effects of wing and tail location on the aerodynamic characteristics of an airplane for Mach numbers from 0.25 to 4.63

A review of propeller discrete frequency noise prediction technology with emphasis on two current methods for time domain calculations

Reliability assurance of aircraft structures

Outlook for advanced concepts in transport aircraft

Simulated vortex encounters by a twin-engine commercial transport aircraft during final approach

Numerical derivation of linear perturbation model from nonlinear real-time vehicle simulations - a means of validation and increased credibility

Application of high-alpha control system concepts to a variable-sweep fighter aircraft

Overview of stall/spin technology

Passive control of wing/store flutter

Spinning for safety's sake

Time-dependent measurement of base pressure in a blowdown tunnel with varying unit Reynolds number

Fracture analysis of ductile materials

Illustration of airfoil shape effect on forward-sweep wing divergence

Effect of winglets on a first-generation jet transport wing: 4. Stability characteristics for a full-span model at subsonic speeds

Wiad-tunnel investigation of the validity of a sonic-boom-minimization concept

Estimation of attainable landing-edge thrust for wings at subsonic and supersonic speeds

Effect of several airframe/nozzle modifications on the drag of a variable-sweep configuration

Low-speed wind-tunnel tests of a 1/10-scale model of an advanced arrow-wing supersonic cruise configuration designed for cruise at Mach 2.2

A flight investigation of performance and loads for a helicopter with non-17 main rotor blade sections

Technical evaluation report on the fluid dynamics panel Symposium on High Angle of Attack aerodynamics

Algorithms and logic for incorporating ILS NASA TCV B-737 airplane area navigation system

Experiments in sensing transient rotational acceleration cues on a flight simulator

Two-dimensional aerelastic configurations

Control of stability and control effectiveness for a light, single-engine, high-winged aircraft using different flight test and parameter estimation techniques

Light airplane crash tests at three roll angles

Fuselage and nozzle pressure distributions on a 1/12-scale F-15 propulsion model at transonic speeds

Aircrew displays and avionics for application in a future national airspace system

Multirole cargo aircraft options and configurations

A hydraulic actuator mechanism to control aircraft spoiler movements through dual input commands

Application of modified profile analysis to function testing of simulated CTOL transport touchdown-performance data

Light airplane crash tests at three pitch angles

Aerodynamic characteristics of a hypersonic research airplane concept having a 70 deg swept double-delta wing at Mach numbers from 0.80 to 1.20, with summary of data from 0.20 to 6.0

Aerodynamic characteristics of a hypersonic airplane concepts at Mach numbers from 1.10 to 2.86

Technology options for an enhanced air cargo system

Behavior of aircraft antiskid braking systems on dry and wet runway surfaces. A slip-velocity-controlled, pressure-bias-modulated system

Preliminary design procedure for insulated structures subjected to transient heating

Validation Methods for Fault-Tolerant avionics and control systems, working group meeting 1

Ground effects on aircraft noise

Experimental and numerical results on a shear layer excited by a sound pulse

Summary of low-speed longitudinal aerodynamics of two powered close-coupled wing-canard fighter configurations

Inclusion of unsteady aerodynamics in longitudinal parameter estimation from flight data

Transonic aerodynamic characteristics of a supersonic cruise aircraft research model with the engines suspended above the wing

Experimental determination of position-estimate accuracy using back-azimuth signals from a...
microwave landing system [NASA-TP-1574]

- Application of modified profile analysis to function testing of the airfoil-landing system issue on an aircraft ground-handling simulation [NASA-TP-1589]
- Analytical investigation of the landing dynamics of a large airplane with a load-control system in the main landing gear [NASA-TP-1555]

Exploratory study of the effects of wing-leading-edge modifications on the stall/spin behavior of a light general aviation airplane [NASA-TP-1599]

- Effects of related static longitudinal stability on a single-stage-to-orbit vehicle design [NASA-TP-1594]

Experimental study of acoustic loads on an upper-surface-blown STOL airplane configuration [NASA-TP-1577]

- Effects of sound level fluctuations on annoyance caused by aircraft-flyover noise [NASA-TP-1576]

- Sonic-boom wave-front shapes and curvatures associated with maneuvering flight [NASA-TP-1641]

- A computerized method for calculating flutter characteristics of a system characterized by two degrees of freedom [NASA-TH-80153]

Preliminary test results of a flight management algorithm for fuel conservative descents in a time based metered traffic environment [NASA-TH-80196]

- Simulator study of stall/post-stall characteristics of a fighter airplane with relaxed longitudinal stability [NASA-TH-1538]

Altitude response of several airpanes during landing approach [NASA-TH-80186]

- Effect of spanwise gust variations [NASA-TH-80197]

Applications of diffraction theory to aerocoustics [NASA-TH-80197]

- Experimental and numerical results of sound scattering by a body [NASA-TH-80197]

Computer program to prepare airfoil characteristic data for use in helicopter performance calculations [NASA-TH-76287]

- A parabolic wing design study for a modern laminar flow wing [NASA-TH-80154]

Control considerations for CCV fighters at high angles of attack [NASA-TH-80150]

- A study of partial coherence for identifying interior noise sources and paths on general aviation aircraft [NASA-TH-80154]

Wind-tunnel/flight correlation study of aerodynamic characteristics of a large flexible supersonic cruise airplane (XB-701)

- Ectraction of wind-tunnel data to full-scale conditions [NASA-TH-1515]

- Means for controlling aerodynamically induced twist [NASA-CASL-LAB-12175-1]

Design considerations for obtaining 200-knot test velocities at the aircraft landing loads and traction facility [NASA-TH-80096]

Summary of aircraft results for 1978 southeastern Virginia urban plane measurement study of oxides, nitrogen oxides, and methane [NASA-TH-80146]

Comparison of analytical and flight test identified aerodynamic derivatives for a tandem-rotor transport helicopter [NASA-TH-1589]

- Interaction of a two-dimensional strip boundary layer with a three-dimensional transonic swept-wing code [NASA-TH-78640]

Effect of sweep and aspect ratio on the longitudinal aerodynamics of a spanloader wing in and out-of-ground effect [NASA-TH-80199]

The aerial relay system: An energy-efficient solution to the airport congestion problem [NASA-TH-80208]

Flight performance of the TCV B-737 airplane at Jorge Newbery Airport, Buenos Aires, Argentina using TS&MS guidance [NASA-TH-80223]

Terminal-configured vehicle program: Test facilities guide [NASA-TH-80214]

Early flight test experience with Cockpit Displayed Traffic Information (CDTI) [NASA-TH-80213]

Thrust augmented spin recovery device [NASA-TH-80212]

The potential for damage from the accidental release of conductive carbon fibers from burning composites [NASA-TH-80213]

Composite components on commercial aircraft [NASA-TH-80214]

- Static pressure orifice system testing method and apparatus [NASA-CASE-LAB-12269-1]

Improved tire/wheel concept [NASA-CASE-LAB-11695-2]

Computer programs for estimating civil aircraft economics [NASA-TH-80146]

- Aeroacoustic wind-tunnel tests of a light twin-boom general-aviation airplane with free or shrouded-pusher propellers [NASA-TH-80203]

- Military aircraft and missile technology at the Langley Research Center: A selected bibliography [NASA-TH-80204]

- A flight investigation of blade section aerodynamics for a helicopter main rotor having NLB-17 airfoil sections [NASA-TH-80146]

Identification evaluation methods [NASA-TH-80146]

- A theoretical analysis of simulated transonic boundary layers in cryogenic-nitrogen wind tunnels [NASA-TH-1531]

Design considerations for attaining 250-knot test velocities at the aircraft landing dynamics facility [NASA-TH-80222]

Development of the cryogenic tunnel concept and application to the US National Transonic Facility [NASA-TH-80224]

Assessment of Carbon Fiber Electrical Effects [NASA-CP-2119]

- Approach to the assessment of the hazard [NASA-TH-80196]

Release of carbon fibers from burning composites [NASA-TH-80198]

Dispersion, resuspension, and filtration of carbon fibers [NASA-TH-80195]

Large-scale fiber release and equipment exposure experiments [NASA-TH-80196]

- Perspective on the results [NASA-TH-80146]

Trends in reliability modeling technology for fault tolerant systems [NASA-TH-80153]

Technology requirements and readiness for very large aircraft [NASA-TH-80178]

- Detecting the transition layer between laminar and turbulent flow areas on a wing surface [NASA-CASE-LAB-12264-1]
Low-speed airspeed calibration data for a single-engine research-support aircraft

Preliminary results of simulated vortex encounters by a twin-engine, commercial aircraft during final landing approaches

Supporting statement for community study of noise exposure to aircraft noise

Effect of Reynolds number on stability characteristics of a cruciform wing-body

Flight investigation of cockpit-displayed traffic information utilizing coded symbology in an advanced operational environment

Hydrotunnel experiments on divergence of low-speed airfoils

Application of fully stressed design procedures to redundant and non-isotropic structures

Effects of conversation interference on annoyance due to aircraft noise

Crash tests of four identical high-wing single-engine airplanes

Simulation development and evaluation of an improved longitudinal velocity vector control wheel steering mode and electronic display format

A carbon fiber exposure test facility and instrumentation

Pressure data for four analytically defined arrow wings in supersonic flow

Aerodynamic characteristics of three helicopter rotor airflow sections at Reynolds number from model scale to full scale at Mach numbers from 0.35 to 0.90

Low-speed airspeed calibration data for a single-engine research-support aircraft

Preliminary results of simulated vortex encounters by a twin-engine, commercial aircraft during final landing approaches

Supporting statement for community study of noise exposure to aircraft noise

Effect of Reynolds number on stability characteristics of a cruciform wing-body

Flight investigation of cockpit-displayed traffic information utilizing coded symbology in an advanced operational environment

Hydrotunnel experiments on divergence of low-speed airfoils

Application of fully stressed design procedures to redundant and non-isotropic structures

Effects of conversation interference on annoyance due to aircraft noise

Crash tests of four identical high-wing single-engine airplanes

Simulation development and evaluation of an improved longitudinal velocity vector control wheel steering mode and electronic display format

A carbon fiber exposure test facility and instrumentation

Pressure data for four analytically defined arrow wings in supersonic flow

Aerodynamic characteristics of three helicopter rotor airflow sections at Reynolds number from model scale to full scale at Mach numbers from 0.35 to 0.90

Laser-beam measurement of advanced nozzle
systems

Laser anemometer measurements in a transonic
axial flow compressor rotor

Field and structural measurements to advance gas
turbine technology

Digital system for dynamic turbine engine blade
displacement measurements

Impact of new instrumentation on advanced
turbine research

Temperature and pressure measurement techniques
for an advanced turbine test facility

Airbreathing propulsion component technologies

Turbulent solutions for sound radiation from
circular ducts with hyperbolic horns or
infinite plane baffles

Comparison of several inflow control devices for
flight simulation of fan tone noise using a
JT15D-1 engine

Comparison of test data with
exhaust system mixers for an
Energy Efficient Engine

Experimental investigation of endwall
profiling in a turbine vane cascade

Development of improved-durability plasma
sprayed ceramic coatings for gas turbine engines

Significance of thermal contact resistance in
two-layer, thermal-barrier-coated turbine-vanes

Far-field radiation of AFT turbofan noise

Development of a Kerlar/Phenolic 15 reduced drag DR-9
disseal fairing

Reduced bleed air extraction for DC-10, cabin air
conditioning

Influence of pressure driven secondary flows on the
behavior of turbofan forced mixers

Influence of pressure driven secondary flows on the
behavior of turbofan forced mixers

Analytical and experimental investigations of the
effect of broad property fuels on combustors for
civilian aircraft gas turbine engines

Experimental study of low aspect ratio
compressor blade

Performance of annular prediffuser-combustor
systems

Atomizing characteristics of swirl can combustor
modules with swirl blast fuel injectors

Temperature and flow measurements on
near-freezing aviation fuels in a wing-turbine
model

NASA Broad-Specification Fuels Combustion
Technology Program - Status and description

Low NOx/soot heavy fuel combustor program

Results from tests on high work transonic
turbine for an energy efficient engine

CF6 fan performance improvement

A theoretical and experimental investigation of
propeller performance methodologies

J79-7A /6P jet engine performance
deterioration trends

NUMBER

AF PBOJ. 2104

Listings in this index are arranged atphanumerically by contract number. Under
each contract number, the accession numbers denoting documents that have
been produced as a result of research done under that contract are arranged in
ascending order with the IAA accession numbers appearing first. Preceding the
accession number is the page number where the citation may be found.

Listings in this index are arranged alphabetically by report number. The issue and page number indicate the actual Supplement and page where the citation may be located. The accession number denotes the number by which the citation is identified. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

This bibliography is a cumulative index to the abstracts contained in NASA SP-7037(119) through NASA SP-7037(130) of Aeronautical Engineering: A Continuing Bibliography. NASA SP-7037 and its supplements have been compiled through the cooperative efforts of the American Institute of Aeronautics and Astronautics (AIAA) and the National Aeronautics and Space Administration (NASA). This cumulative index includes subject, personal author, corporate source, contract, and report number indexes.
PUBLIC COLLECTIONS OF NASA DOCUMENTS

DOMESTIC

NASA distributes its technical documents and bibliographic tools to eleven special libraries located in the organizations listed below. Each library is prepared to furnish the public such services as reference assistance, interlibrary loans, photocopy service, and assistance in obtaining copies of NASA documents for retention.

CALIFORNIA
University of California, Berkeley
COLORADO
University of Colorado, Boulder
DISTRICT OF COLUMBIA
Library of Congress
GEORGIA
Georgia Institute of Technology, Atlanta
ILLINOIS
The John Crerar Library, Chicago

MASSACHUSETTS
Massachusetts Institute of Technology, Cambridge
MISSOURI
Linda Hall Library, Kansas City
NEW YORK
Columbia University, New York
OKLAHOMA
University of Oklahoma, Bizzell Library
PENNSYLVANIA
Carnegie Library of Pittsburgh
WASHINGTON
University of Washington, Seattle

NASA publications (those indicated by an "*" following the accession number) are also received by the following public and free libraries:

CALIFORNIA
Los Angeles Public Library
San Diego Public Library
COLORADO
Denver Public Library
CONNECTICUT
Hartford Public Library
MARYLAND
Enoch Pratt Free Library, Baltimore
MASSACHUSETTS
Boston Public Library
MICHIGAN
Detroit Public Library
MINNESOTA
Minneapolis Public Library and Information Center
NEW JERSEY
Trenton Public Library
NEW YORK
Brooklyn Public Library
Buffalo and Erie County Public Library
Rochester Public Library
New York Public Library
OHIO
Akron Public Library
Cincinnati and Hamilton County Public Library
Cleveland Public Library
Dayton Public Library
Toledo and Lucas County Public Library
TEXAS
Dallas Public Library
Fort Worth Public Library
WASHINGTON
Seattle Public Library
WISCONSIN
Milwaukee Public Library

An extensive collection of NASA and NASA-sponsored documents and aerospace publications available to the public for reference purposes is maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, New York 10019.

EUROPEAN

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. By virtue of arrangements other than with NASA, the British Library Lending Division also has available many of the non-NASA publications cited in STAR. European requesters may purchase facsimile copy of microfiche of NASA and NASA-sponsored documents, those identified by both the symbols "#" and "*", from: ESA - Information Retrieval Service, European Space Agency, 8-10 rue Mario-Nikis, 75738 Paris CEDEX 15, France.
