Greenbelt, Maryland
PREFACE

This bibliography was prepared in response to a need for a comprehensive literature source to support research pertaining to remote sensing of water quality. This need was identified in 1980 as a priority by the working group on Remote Sensing of Water Quality associated with the American Society of Photogrammetry's Hydrospheric Sciences Committee (the Remote Sensing Applications Division). An attempt was made to compile as complete a listing as possible from domestic and foreign literature available in English as of March 1983.

We would like to thank the following people whose contributions were invaluable: Thomas Alfoldi, Ottawa, Canada; John C. Munday, Gloucester Point, Virginia; Charles Trees, College Station, Texas; Siamak Khorram, Durham, North Carolina; Robert Ragan, College Park, Maryland and all our other friends and colleagues who made reference materials available to us. Technical assistance by Joseph Langdon and Babu Banerjee is also gratefully acknowledged.

We are confident that this document will be valuable to researchers interested in issues relevant to remote sensing of water quality.

Elizabeth Middleton

Richard Marcell
# Table of Contents

## I Optical Properties and Measurement of Water Characteristics
- A. Theory of Water/Light Relationships 1
- B. Empirical and Scientific Investigations 6

## II Interpretation of Water Characteristics by Remote Sensing
- A. Color 10
- B. Transparency
  - 1. Turbidity 13
  - 2. Secchi Disc/Water Clarity 16
  - 3. Bathymetry/Subsurface Features 16
- C. Suspended or Dissolved Inorganic Matter
  - 1. Suspended Sediment 19
  - 2. Circulation Patterns 24
  - 3. Pollutants 27
- D. Biological Materials
  - 1. Plankton, Chlorophyll and Other Pigments 29
  - 2. Macroflora and Macrofauna 37
- E. Temperature 38
- F. Miscellaneous Parameters 40

## III Application of Remote Sensing for Water Quality Monitoring
- A. Monitoring for General Water Quality Conditions 41
- B. Monitoring for Determination of Eutrophication and Lake Classification 50
- C. Monitoring for Land Use/Water Quality Effects 56

## IV Application of Remote Sensing According to Water Body Type
- A. Oceans 61
- B. Coastal Waters 66
- C. Estuarine Waters 72
- D. Inland Water Bodies 75

## V Manipulation, Processing, and Interpretation of Remotely Sensed Digital Water Data
- A. Preprocessing/Processing, Calibrations and Corrections (Nonatmospheric) 86
- B. Atmospheric Effects 87
- C. Analysis and Interpretation (Special Techniques and Considerations for Water Studies) 90
