The USL/DBMS NASA/RECON Working Paper Series contains a collection of reports representing results of activities being conducted by the Computer Science Department of the University of Southwestern Louisiana pursuant to the specifications of National Aeronautics and Space Administration Contract Number NASW-3846. The work on this contract is being performed jointly by the University of Southwestern Louisiana and Southern University.

THE DESIGN OF PC/MISI, A PC-BASED
COMMON USER INTERFACE TO REMOTE
INFORMATION STORAGE AND RETRIEVAL SYSTEMS:
PRESENTATION VISUALS

Philip P. Hall

The University of Southwestern Louisiana
Center for Advanced Computer Studies
Lafayette, Louisiana

April 24, 1985
THE DESIGN OF PC/MISI, A PC-BASED COMMON USER INTERFACE TO REMOTE INFORMATION STORAGE AND RETRIEVAL SYSTEMS

A Thesis
Presented to
The Graduate Faculty of
The University of Southwestern Louisiana
In Partial Fulfillment of the Requirements for the Degree
Master of Science

Philip P. Hall
April 1985
OUTLINE

*** Problem Definition
*** The Personal Computer Solution
*** Goals of System Design
*** Design Description
*** Future Considerations
*** The Research Environment
*** Conclusions
PROBLEM DEFINITION

RATIONALE FOR COMMON INTERFACE

... Content of IS&R Systems
... Problems In Providing Access
... Increase in PC Processing Power
... Research Possibilities
DEFINING THE CASUAL USER

*** 70% of User Population

*** Characteristics

*** No Desire to Memorize Command Languages

*** Infrequent Access to System

*** Limited Knowledge of Programming

*** Limited Knowledge of Command Languages

*** Extensive Knowledge of Subject Field

*** IS&R Access not REQUIRED By Job

*** Job Enhancement Thru IS&R Access
CURRENT ACCESS METHOD

PROBLEM DEFINITION

INTERFACE

INFORMATION SPECIALIST

END USER
THE PERSONAL COMPUTER SOLUTION

REQUIRED PROCESSING CAPABILITIES

*** Translate User Input into Host System Commands

*** Interpret Host System Responses

*** Storage and Manipulation of Accessions Retrieved from Host

*** Utilization of Specialized Input Devices

*** Modification of Screen Display Characteristics
THE PERSONAL COMPUTER SOLUTION

POSSIBLE ACCESS METHODOLOGIES

*** Terminal -> Host

*** Terminal -> Gateway -> Host

*** Terminal -> Local Mainframe -> Host

    +-- Host

*** Personal Computer -> Gateway -> Host
    +-- Local Mainframe -> Host

*** Distribution of Functionality

USER
THE PERSONAL COMPUTER SOLUTION

FEASABILITY OF IMPLEMENTATION

1) The identification of host system functions which are used by casual users

2) The determination that these functions are provided by the target systems

3) The identification of local processing needs

4) The development of a standard set of commands to be mapped into the required host system functions

5) The mapping of the standard command set into commands recognizable by the host system

6) The identification of hardware requirements for the implementation of the system.
GOALS OF SYSTEM DESIGN

GOAL 1: Design a system which allows ease of access to multiple information systems to both the casual user and the experienced user.

GOAL 2: Utilize the local processing capabilities of the personal computer to enhance the search and retrieval process.

GOAL 3: Design a system which provides the user with sufficient guidance and interactive capability to allow the utilization of his subject knowledge in the development of system search strategies.

GOAL 4: Design a system which utilizes state-of-the-art interface design tools available for personal computers while retaining maximum portability.

GOAL 5: Design a system which may be used for research activities related to the improvement of access to IS&I systems and which provides the necessary monitoring and evaluation tools for such research.

GOAL 6: Define future system enhancements.
DESIGN DESCRIPTION

FUNCTIONALITY REQUIRED

*** Remote Processing

*** Connect to System
*** Search Subject
*** Search Accession Number
*** Search Corporate Source
*** List Adjacent Terms
*** Boolean Operations
*** Print System News
*** Remote Print
*** Set Status
*** Sort Set

*** Local Processing

*** Save Accession
*** Merge Files
*** Name Download File
*** Display Accession
DESIGN DESCRIPTION

THE INTERFACE SUBSYSTEM

*** Three Levels of Interaction
  *** Menu-Driven Interaction
  *** Command-Driven Interaction
  *** Direct System Interaction

*** Batch Processing Capability

*** Error Handling
  *** Input Errors
  *** Host System Errors

*** Local Storage and Processing of Accessions
THE TRANSLATOR/INTERPRETER SUBSYSTEM

*** The Translator

*** Convert PC/MISI Commands into Host Commands
*** Send Results to Communication Subsystem
*** Uses System Command Table

*** The Interpreter

*** Accepts System Response from Communication Subsystem
*** Interprets System Response
*** Performs Necessary Transformations on Host Response
*** Passes Result to Interface Subsystem
DESIGN DESCRIPTION

THE COMMUNICATIONS SUBSYSTEM

- Initialize Communications Parameters
- Transmit Commands to Host System
- Accept and Store Host System Responses
- Reset Communications Parameters
DESIGN DESCRIPTION

THE ADMINISTRATIVE SUBSYSTEM

*** Create and Maintain System Files

*** Access Sequence Files

*** System Command Files

*** System Response Files

*** System Security File

*** Utilization of Evaluation Monitors
DESIGN DESCRIPTION

RESOURCE REQUIREMENTS

*** User Requirements

*** IBM PC or PC Compatible

*** Minimum 256K Memory

*** Dual Floppy Drives or Hard Disk

*** Hayes-1200 or Compatible Modem

*** Light Pen (Optional)

*** Development Requirements

*** Hardware

*** IBM PC/XT

*** Hayes-1200 or Compatible Modem

*** Color Monitor

*** Light Pen

*** Software

*** C Compiler

*** Window Generation Library

*** Statistical Support Package
FUTURE CONSIDERATIONS

FUTURE ENHANCEMENTS

*** Expert System / AI Applications
*** Enhance User Queries
*** "Advice" to Users
*** "Find" System With Information

*** Organize Information into Reports

*** Extension to Generalized DEVSs
FUTURE CONSIDERATIONS

RESEARCH POTENTIAL

*** Menu vs. Command vs. Direct Access (and later) vs. Common Commands vs. Natural Language

*** Interface Configurations

*** Input Devices

*** Display Characteristics

*** Expert System Applications

*** Extraction and Organization of Information
PC/MISI LEVELS

Level 5 Natural Language/Expert System

Level 4 Common Command Language

Level 3 Menu Driven System

Level 2 PC/MISI Command Language

Level 1 Direct Interaction With Host
NASA
Personal Computer
Research
and
Development
THE RESEARCH ENVIRONMENT

PC R&D

R&D Support Activities

Identification and Evaluation of Candidate R&D Projects

Continual Evaluation of New Hardware and Software

Procedure and Specification Formulation

Project Re-evaluation

Education Support

CONCLUSIONS

... Place of PC in Information Retrieval
... Feasibility of Implementation
... Research Potential
... Goal Attainment
OBJECTIVES OF SYSTEM DESIGN

OBJECTIVE 1: Provide Ease of Access to Multiple Systems.
OBJECTIVE 2: Provide for Addition of New Systems.
OBJECTIVE 3: Develop System Documentation
OBJECTIVE 4: Provide Multilevel Capabilities.
OBJECTIVE 5: Maintain User Orientation.
OBJECTIVE 6: Utilize User's Knowledge.
OBJECTIVE 7: Facilitate Downloading of Information.
OBJECTIVE 8: Provide Batch Processing Capabilities.
OBJECTIVE 9: Provide Error Handling Capabilities.
OBJECTIVE 10: Extract Maximum Benefit from Display Capabilities
OBJECTIVE 11: Identify Necessary Data for Evaluation.
OBJECTIVE 12: Design Data Collection Tools.
OBJECTIVE 13: Identify Uses of Artificial Intelligence for Future Enhancements.
OBJECTIVE 14: Identify Multi-User Conversion Possibilities
OBJECTIVE 15: Maximize Flexibility.
