HIGH PERFORMANCE COMPUTING and
COMMUNICATIONS PROGRAM

Lee Holcomb

FEDERAL PROGRAM GOAL AND OBJECTIVES

- Extend U.S. leadership in high performance computing and computer communications

- Disseminate the technologies to speed innovation and to serve national goals

- Spur gains in industrial competitiveness by making high performance computing integral to design and production
"...we must invest now in a brighter future. That's why our administration fully supports high-performance computing, and math and science education."

"The development of high performance computing and communications technology offers the potential to transform radically the way in which all Americans will work, learn and communicate in the future. It holds the promise of changing society as much as the other great inventions of the 20th century, including the telephone, air travel and radio and TV."
