PREFACE

The 1992 Quadrennial Ozone Symposium was held from June 4 to 13 at the University of Virginia in the United States of America. This was the seventeenth symposium organized by the International Ozone Commission and was equal in size to the symposium held in 1988. The symposium was devoted to all aspects of atmospheric ozone, covering both the troposphere and stratosphere. Almost 500 scientists from 35 countries participated in this international event. Over 400 papers were presented orally or as posters. The oral papers were divided into the following sessions:

Troposphere
(a) Ozone Trends and Climatology
(b) Global and Regional Modeling
(c) Ozone: The Human Impact

Stratosphere
(a) Ozone and Climate
(b) Measurements
(c) Results from Upper Atmosphere Research Satellite
(d) The Arctic
(e) The Antarctic
(f) Trends
(g) Theory and Modelling
(h) Volcanic Effects

Published in these two volumes are two hundred and thirty two of the presented papers. All papers have passed an initial review process. However, in order to produce this publication as quickly as possible, it was left to the authors to accommodate the reviewer’s comments without editorial scrutiny of their final submission. These papers have been divided into sections that do not necessarily follow those of the oral presentations. This is due partly to the fact that some presented papers were not submitted for publication, and partly because the poster papers did not always fit into the categories used for the oral papers.

The Editor wishes to acknowledge the assistance rendered by many colleagues who responded with time and effort to review the numerous manuscripts.

Robert D. Hudson
College Park
Maryland
CONTENTS

PART I

TROPOSPHERE

OZONE TRENDS AND CLIMATOLOGY

P.S. Low, P.M. Kelly and T.D. Davies......................... 3

Tropospheric Ozone at 45°S
W.A. Matthews............................................... 7

Measurements of Lower Tropospheric Ozone at Mid-Latitudes
of the Northern and Southern Hemisphere
H.E. Scheel, R. Sladkovic, E.G. Brunke, W. Seiler......... 11

Analysis of a 7 Year Tropospheric Ozone Vertical
Distribution at the Observatoire De Haute Provence
M. Beekmann, G. Ancellet and G. Megie...................... 15

Ozone Measurements from a Global Network of Surface Sites
S.J. Oltmans, H. Levy II.................................... 19

Broad Features of Surface Ozone Variations Over Indian Region
R.R. Shende, K. Jayaraman, C.R. Sreedharan
and V.S. Tiwari............................................. 24

Tropospheric Ozone Measurements at the Equatorial Region
(1980-88)
M. Ilyas....................................................... 33

Specific Features of Space-Time Variations of Ozone During
The Development of Intensive Tropical Disturbances
A.F. Nerushev and V.I. Vasiliev............................. 37

Annual Variability of Ozone Along Alpine Hillsides
E. Putz and W. Kosmus....................................... 41

The Vertical Distribution of Ozone at Pretoria from July
1990 to June 1991 and its Changes
M. Zunckel, R.D. Diab, C.B. Archer and
M.W.J. Scourfield.......................................... 45

Seasonal Budgets of Ozone and Oxidant Precursors in an
Industrial Coastal Area of Northern Italy
T. Georgiadis, L. Alberti, P. Bonasoni, F. Fortezza,
G. Giovanelli and V. Strocchi............................... 48

An Automated Optical Wedge Calibrator for Dobson Ozone Spectrophotometers
R.D. Evans, W.D. Komhyr and R.D. Grass.................. 749

The Updated Statistical Inversion Technique to the Evaluation of Umkehr Observations
A.D. Frolov and S.P. Obrazcov............................... 754

Ozone Height Profiles Using Laser Heterodyne Radiometer
S.L. Jain...................................................... 758

Ozone and Nitrogen Dioxide above the Northern Tien Shan
V.N. Aref‘ev, O.A. Volkovitsky, N.E. Kamenogradsky,
V.K. Semyonov and V.P. Sinyakov............................ 762

Ambient Temperature Effects on Broadband UV-B Measurements Using Fluorescent Phosphor (MgW$_0$)$_2$-Based Detectors
B.K. Dichter, D.J. Beaubien and A.F. Beaubien............. 766

Comparison Between Brewer Spectrometer, M 124 Filter Ozonometer and Dobson Spectrophotometer
U. Feister...................................................... 770

The Measurement of Ultraviolet Radiation and Sunburn Time Over Southern Ontario
W.F.J. Evans.................................................. 774

The Ground-Based Measurement of Ozone in the 9.6 Micron Band
W.F.J. Evans and E. Puckrin................................. 778

Lidar measurements and Umkehr Observations of the Ozone Vertical Distribution at the Observatoire de Haute Provence
A-M. Lacoste, S. Godin and G. Megie........................ 782

Comparison of UV-B Measurements Performed with a Brewer Spectrophotometer and a New UVB-1 Broad Band Detector
A.F. Bais, C.S. Zerefos, C. Meleti and I.C. Ziomas....... 786

Inclusion of the Second Umkehr in the Conventional Umkehr Retrieval Analysis as a Means of Improving Ozone Retrievals in the Upper Stratosphere
K. Gioulgkidis, R.P. Lowe and C.T. McElroy............... 790
The Canadian Ozone Watch and UV-B Advisory Programs

SAGE II-Umkkehr Case Study of Ozone Differences and Aerosol Effects from October 1984 to April 1989
M.J. Newchurch and D.M. Cunnold. ......................... 798

AIRCRAFT, BALLOON, AND SONDE MEASUREMENTS

The 1991 WMO Ozone Sonde Intercomparison
J.B. Kerr, C.T. McElroy, H. Fast, S.J. Oltmans,
J.A. Lathrop, E. Kyro, A. Paukkunen, H.J. Claude,
U. Kohler, C.R. Sreedharan, T. Tako and Y. Tsukagoshi... 807

Measurements of Stratospheric Ozone by Rocket Ozonesondes in Japan
T. Watanabe and T. Ogawa............................. 811

The Discrepancy Between Stratospheric Ozone Profiles From Balloon Soundings and From Other Techniques: A Possible Explanation
D. De Muer and H. De Backer............................. 815

Stratospheric Ozone Measurements at the Equator
M. Ilyas................................................ 819

Vertical Distribution of CH₄ and N₂O Over the Tropical Site Hyderabad
S. Lal, B.H. Subbaraya, P. Fabian and R. Borchers...... 823

1990 Vertical Distribution of Two Important Halons - F-12B1 and F-13B1 - in the Tropics
O.N. Singh, R. Borchers, S. Lal, B.H. Subbaraya,
B.C. Kruger and P. Fabian............................... 827

Balloon Measurements of Stratospheric HCl and HF By Far Infrared Emission Spectroscopy
K. Shibasaki, K.V. Chance, D.G. Johnson, K.W. Jucks
and W.A. Traub........................................ 831

Universal Trace Pollutant Detector for Aircraft Monitoring of the Ozone Layer and Industrial Areas
I.V. Filiouguine, S.V. Kostiouchenko, N.N. Koudriavtsev. 835

First Ozone Profiles Measured with Electrochemical and Chemiluminescent Sondes, Developed in Russia
A.M. Zvyaguintsev, S.P. Perov and Y.A. Ryabov........... 839
The MIPAS Balloon Borne Trace Constituent Experiment
H. Oelhaf, Th. V. Clarmann, H. Fischer, F. Friedl-Vallon,
Chr. Friztzsche, Chr. Piesch, D. Rabus, M. Seefeldner
and W. Volker........................................... 842

Local Fluctuations of Ozone From 16 km to 45 km Deduced from
in Situ Vertical Ozone Profile
G. Moreau and C. Robert................................. 846

Aircraft Measurements of NO and NO$_y$ at 12 km Over the Pacific
Ocean
M. Koike, Y. Kondo, Y. Makino and Y. Sugimura........... 849

On the Laminated Structure of Ozone in the Sub-Tropical
Atmosphere
C. Varotsos, P. Kalabokas and G. Chronopoulos............ 854

The Latitudinal Distribution of Ozone to 35 km Altitude From
ECC Ozonesonde Observations, 1982-1990
W.D. Komhyr, S.J. Oltmans, J.A. Lathrop, J.B. Kerr
and W.A. Matthews......................................... 858

Lidar Observation of Ozone Over Tsukuba (36°N, 140°E)
H. Nakane, S. Hayashida, I. Matsui, N. Sugimoto,
A. Minato and Y. Sasano................................. 863

On Vertical Profile of Ozone at Syowa
S. Chubachi............................................. 867

Investigation of Catalytic Reduction and Filter Techniques
for Simultaneous Measurements of NO, NO$_2$, and HNO$_3$ in the
Stratosphere
J. Wendt, P. Fabian, G. Flentje and K. Kourtidis........ 870

**SATELLITE MEASUREMENTS**

Global Ozone Data from the Meteor-3/TOMS Ultraviolet
Spectrometer
J.R. Herman, A. Krueger, C. Cote, Z. Ahmad, M. Foreman,
C. Wellemeyer, W. Byerly, L. Pan, G. Jaross, R. Hudson,
V. Dosov, R. Salichov, Y. Borisov, A. Kondratiev,
B. Kugaenko and H. Samvelyn.............................. 877

Status of the Shuttle SBUV (SSBUV) Calibration of the NOAA
SBUV/2 Operational Ozone Sounders and the Detection of Trends
E. Hilsenrath, R.D. McPeters and R.P. Cebula............. 883

Ozone Determinations with the NOAA SBUV/2 System
and R.M. Nagatani........................................... 887
SPEAM-II Experiment for the Measurement of Stratospheric NO₂, O₃, and Aerosols

Mesospheric Ozone Measurements by SAGE II
D.A. Chu and D.M. Cunnold .......................................................... 895

A. G. Ishov .................................................................................. 899

A New Method for Monitoring Long Term Calibration of the SBUV and TOMS Instruments
Z. Ahmad, C. Seftor and C.G. Wellemeyer ............................... 903

Profile Shape Dependence in Backscattered Ultraviolet Satellite Retrievals of Total Ozone

External Comparisons of Reprocessed SBUV/TOMS Ozone Data
C.G. Wellemeyer, S.L. Taylor, R.R. Singh and R.D. McPeters .......................................................... 911

Effect of Stratospheric Aerosol Layers on the TOMS/SBUV Ozone Retrieval
O. Torres, Z. Ahmad, L. Pan, J.R. Herman, P.K. Bhartia and R. McPeters ............................................... 915

Effect of Partially-Clouded Scenes on the Determination of Ozone
C.J. Seftor, S.L. Taylor, C.G. Wellemeyer and R.D. McPeters .......................................................... 919

Procedures to Validate/Correct Calibration Error in Solar Backscattered Ultraviolet Instruments
S.L. Taylor, R.D. McPeters and P.K. Bhartia ........................................ 923

Changes in Photochemically Significant Solar UV Spectral Irradiance as Estimated by the Composite MG II Index and Scale Factors
M.T. Deland and R.P. Cebula .......................................................... 927

Performance Evaluation of the Solar Backscatter Ultraviolet Radiometer, Model 2 (SBUV/2) Inflight Calibration System
H. Weiss, R.P. Cebula, K. Laamann and R.D. McPeters ........................................ 931

The Accuracy of Temperature Distributions Used to Derive the Net Transport for a Zonally Averaged Model
E.E. Remsberg and P.P. Bhatt ..................................................... 934
The Use of Visible-Channel Data From NOAA Satellites to Measure Total Ozone Amount Over Antarctica  
R.D. Boime, S.G. Warren and A. Gruber...................... 938

Post Launch Performance of the METEOR-3/TOMS Instrument  
G. Jaross, Z. Ahmad, R.P. Cebula and A.J. Krueger........ 942

SSBUV Middle Ultraviolet Solar Spectral Irradiance Measurements  
R.P. Cebula and E. Hilsenrath........................................ 946

GOMOS—Global Ozone Monitoring by Occultation of Stars  
G.W. Leppelmeier, E. Kyrola, R. Pellinen, P. Merat,  
S. Korpela, J.L. Bertaux, E. Chassefiere, F. Dalaudier  
and G. Megie............................................................. 950

Simulation and Data Processing of GOMOS Measurements  
E. Krola, E. Sihvola, L. Oikarinen, J. Tamminen  
and H. Haario........................................................................ 954

Ozone Profile Retrievals from the ESA GOME Instrument  
R. Munro, B.J. Kerridge, J.P. Burrows and K. Chance...... 958

Ground-Based Intercomparisons of SBUV/2 Flight Instruments,  
the World Standard Dobson Spectrophotometer 83 and Overpass  
Observations from Nimbus-7 TOMS and NOAA-11 SBUV/2  
D.F. Heath, Z. Ahmad, O. Torres, R.D. Evans, R.D. Grass,  
W.D. Komhyr and W. Nelson.............................................. 962
