Today's Situation

- Slot Limits At Existing Airports
- Traffic Growth Outpacing New Airport Development
- Bigger Aircraft Required To Increase System Capacity & Productivity
- Heavy Airlift Military Aircraft To Be Replaced In Early 21st Century
Airport Congestion

Kennedy International Airport

International Passengers Vs Aircraft Movements
How Did We Get Here?

- No Significant Increases In Aircraft Capacity Since Early 1970's

Aircraft Size Growth Since 1940

Passengers (Standard): 500, 450, 400, 350, 300, 250, 200, 150, 100, 50, 0
VLST Missions

- Passenger Transport
  - 600 to 800 Passengers Over Global Distances

- Commercial Freighter
  - 6.5% Annual Cargo Growth
  - Increased Use Of ISO & Intermodal Containers

- Military Airlift
  - Payload Of C-5 Over Global Distances
Key Design Challenges

- Size Issues & Constraints
  - Clearances At Gates, Taxiways, & Runways
  - Ground Loading & Floatation

- Increased Aircraft Separation Requirements
  - Increased Power In Wing Vortex
  - Increased Separation Will Reduce Aircraft Throughput At Airport

How Much Money?

- $8-15 Billion Development Cost
  - More Than One Company Can Handle
- $200-300 Million Unit Cost
  - Larger Than Annual Profits For Many Airlines
  - Unlikely To Be Internally Financed By Airline & Leasing Companies
  - Resulting High Capital Cost For Operator
Summary

- VLST Is Technically Possible Now
- Airline Interest Has Decreased Recently Due To Financial Difficulties
- Major Aircraft Manufacturers Are Poised To Act Once Economics Improve
VLST - Argosies Of The Sky!

“For I dipt into the future, far as the human eye could see, Saw the Vision of the world, and the wonder that would be; Saw the heavens fill with commerce, argosies of magic sails, Pilots of the purple twilight, dropping down with costly bales.”
Lord Tennyson
