Fifth International Conference on
Squeezed States and Uncertainty Relations

D. Han, J. Janszky, Y.S. Kim, and V.I. Man'ko, Editors

Proceedings of a conference held at
Balatonfured, Hungary
May 27–31, 1997

National Aeronautics and
Space Administration
Goddard Space Flight Center
Greenbelt, Maryland 20771

May 1998
The Fifth International Conference on Squeezed States and Uncertainty Relations was held at Balatonfüred, Hungary, on 27–31 May 1997. This series was initiated in 1991 at the College Park Campus of the University of Maryland as the Workshop on Squeezed States and Uncertainty Relations. The scientific purpose of this series was to discuss squeezed states of light, but in recent years the scope is becoming broad enough to include studies of uncertainty relations and squeeze transformations in all branches of physics including quantum optics and foundations of quantum mechanics. Quantum optics will continue playing the pivotal role in the future, but the future meetings will include all branches of physics where squeeze transformations are basic transformation. As the meeting attracted more participants and started covering more diversified subjects, the fourth meeting was called an international conference. The Fourth International Conference on Squeezed States and Uncertainty Relations was held in 1995 was hosted by Shanxi University in Taiyuan, China. The fifth meeting of this series, which was held at Balatonfüred, Hungary, was also supported by the IUPAP. In 1999, the Sixth International Conference will be hosted by the University of Naples in 1999. The meeting will take place in Ravello near Naples.
PRINCIPAL ORGANIZERS

J. Janszky (Crystal Physics Lab, Budapest)
Y. S. Kim (Univ. of Maryland at College Park)
V. I. Man'ko (Lebedev Physical Institute)

INTERNATIONAL ORGANIZING COMMITTEE

P. Adam (Crystal Physics Laboratory, Budapest)
V. Buzek (Slovak Academy of Sciences)
J. Bergou (City University of New York)
D. Han (NASA Goddard Space Flight Center)
V. A. Isakov (Lebedev Institute)
M. S. Kim (Sogang University, Seoul)
H. Paul (Humboldt Univ.)
K. C. Peng (Shanxi University)
M. Rubin (Univ. of Maryland Baltimore County)
W. Schleich (Univ. of Ulm)
A. Sergienko (Boston University)
Y. H. Shih (Univ. of Maryland Baltimore County)
S. Solimeno (Univ. di Napoli)
G. Szabo (Univ. of Szeged)
L. A. Wu (Chinese Academy of Sciences)
A. Zeilinger (Univ. of Innsbruck)
INTERNATIONAL ADVISORY COMMITTEE

G. S. Agarwal (Univ. of Hyderabad)
H.-A. Bachor (Australian National University)
B. A. Bambah (Univ. of Hyderabad)
J. F. Carinena (Univ. of Zaragoza)
A. S. Chirkin (Moscow State University)
G. D'Ariano (Univ. di Pavia)
J. S. De Hesa (Univ. of Granada)
F. DeMartini (Univ. di Roma)
V. Dodonov (Moscow Physical Technical University)
A. Ekert (Oxford University)
E. Giacobino (Univ. of Pierre et Marie Curie)
F. Haake (Univ. of Essen)
S. Haroche (Lab. de Spectroscopie Hertzienne)
O. Hirota (Tamagawa University, Tokyo)
P. Holland (Univ. of the West of England)
S. Kilin (Inst. of Physics, Minsk)
J. R. Klauder (Univ. of Florida)
D. N. Klyshko (Moscow State University)
P. L. Knight (Imperial College)
T. Kobayashi (Univ. of Tsukuba)
V. A. Kostelecky (Indiana University)
G. Kurizki (Weizmann Institute)
L. Lugiato (Univ. di Milano)
L. Mandel (Univ. of Rochester)
M. Man'ko (Lebedev Physical Institute)
G. Milburn (Univ. of Queensland)
M. Namiki (Waseda University)
D. Page (Univ. of Alberta)
J. Perina (Palacky University)
H. Rauch (Austrian University)
B. E. H. Saleh (Boston University)
M. O. Scully (Texas A&M University)
J. H. Shapiro (Massachusetts Inst. of Tech.)
A. Shimony (Boston University)
S. Stenholm (Helsinki University)
E. C. G. Sudarshan (Univ. of Texas)
R. Tanas (Adam Mickiewicz University)
M. Teich (Boston University)
P. Tombesi (Univ. di Camerino)
A. Vinogradov (Lebedev Physical Institute)
A. Vourdas (Univ. of Liverpool)
H. Walther (Max Planck Institute, Garching)
K. Wodkiewicz (Univ. of Warsaw)
K. B. Wolf (Univ. Nacional Auto. de Mexico)
C. Xie (Shanxi University)
H. Yuen (Northwestern University)
F. Zaccaria (Univ. di Napoli)
W. Zurek (Los Alamos National Laboratory)
This Conference is supported in part by

International Union of Pure and Applied Physics (IUPAP)
Goddard Space Flight Center of the U.S. National Aeronautics and Space Administration
University of Maryland at College Park
Lebedev Physical Institute of the Russian Academy of Sciences
Hungarian Academy of Sciences
Hungarian National Committee for Technological Development (New)
University of Szeged, Hungary
Budapest Technical University, Hungary
Crystal Physics Laboratory, Hungary
PREFACE

The fifth International Conference on Squeezed States and Uncertainty Relations was held at Balatonfured, Hungary, on 27–31 May 1997. In this edition of the proceedings, we allocated six pages for every participant. As a result, young participants had the same page allocation as their senior colleagues. We hope to keep this tradition in order to encourage more young physicists to come to future meetings of this conference.

This series was initiated in 1991 at the College Park Campus of the University of Maryland as the Workshop on Squeezed States and Uncertainty Relations. The Second Workshop was hosted in 1992 by the Lebedev Physical Institute of the Academy of Science of the U.S.S.R in Moscow. The third meeting of this series was held in 1993 at the Baltimore County Campus of the University of Maryland in Catonesville, Maryland, U.S.A.

As the meeting attracted more participants and started covering more diversified subjects, the fourth meeting was called an international conference. The Fourth International Conference on Squeezed States and Uncertainty Relations was held in 1995 was hosted by Shanxi University in Taiyuan, China. This Conference was sponsored by the International Union of Pure and Applied Physics. The fifth meeting of this series, which was held at Balatonfured, Hungary, was also supported by the IUPAP.

In 1999, the Sixth International Conference will be hosted by the University of Naples in 1999. The meeting will take place in Ravello near Naples. For the fifth meeting which was held in Hungary, we are happy to acknowledge financial and other forms of supports provided by the following agencies and institutions.

- International Union of Pure and Applied Physics
- Lebedev Physical Institute of the Russian Academy of Sciences
- Goddard Space Flight Center of the National Aeronautics and Space Administration, U.S.A.
- University of Maryland, U.S.A.
- Hungarian Academy of Sciences
- Hungarian National Committee for Technological Development
- Crystal Physics Laboratory, Hungary
- University of Szeged, Hungary
- Budapest Technical University, Hungary
REGISTERED PARTICIPANTS AND AUTHORS

Adam, Gerhard, gadam@tph.tuwien.ac.at, Institut fur Theoretische Physik, Technische Universitat, Wien

Adam, Peter, adam@thunderbird.crystal.core.hu, Research Laboratory for Crystal Physics, Budapest and Janus Pannonius University, Pec
