A Summary of Research Report
Grant No. NGT-1-52101

Integrated Task and Data Parallel Programming

Submitted to:

National Aeronautics and Space Administration
Langley Research Center
Hampton, VA 23681-0001

Attention:
Ms. Barbara Thomson, LaRC Grant Officer
M/S 128

Submitted by:
A. S. Grimshaw
Associate Professor

Emily A. West
Graduate Student

Department of Computer Science
SCHOOL OF ENGINEERING AND APPLIED SCIENCE
UNIVERSITY OF VIRGINIA
CHARLOTTESVILLE, VIRGINIA

Report No. UVA/528538/CS99/101
November 1998
National Aeronautics and Space Administration
Langley Research Center
Hampton, VA 23681-0001

October 19, 1998

Subject: NASA Langley Research Center (LaRC) Training Grant NGT-1-52101 — Notice of Delinquent Summary of Research Report Submission
(Student: Emily A. West, Mentor: Dr. Andrew B. Grimshaw)

The purpose of this letter is to inform you that your institution is beyond the 90-day grace period allowed for the submission of the Summary of Research report required by the subject training grant. The grant expired on 6/30/98 (Supplement No. 2).

Pursuant to the NASA Grant and Cooperative Agreement Handbook, Section 1260.21, a Summary of Research report is due within 90 days after the expiration of the training grant, regardless of whether or not support is continued under another training grant. There is no specified format for this report; however, it should include, as a minimum, a comprehensive summary of significant accomplishments made throughout the total period of the grant.

Inasmuch as the Summary of Research report is the only deliverable required under the subject training grant, it is imperative that the LaRC Grant Officer, Mail Stop 126, receive this report. Copies of the report should also be submitted to 139/Dr. David H. Rudy, LaRC Technical Officer, and to the NASA Center for AeroSpace Information (CASI). The CASI copy should be micro-reproducible and should be submitted to CASI's NEW address below:

Attn: Accessioning Department, Parkway Center
NASA Center for AeroSpace Information (CASI)
7121 Standard Drive
Hanover, MD 21076-1320

If the Summary of Research report has not been submitted to the undersigned by November 20, 1998, the Center will withhold all future grants, grant supplements, and/or payments to your institution. You should contact the LaRC Grant Administrator, Ms. Barbara Thomson at (757) 864-8042 or her email at b.s.thomson@larc.nasa.gov to make arrangements for submitting this delinquent report. If you have other questions regarding this requirement, contact me at (757) 864-2477 or email me at r.t.locks@larc.nasa.gov.

R. Todd Locks
LaRC Grant Officer
To: Sherry Fitzgerald

From: Andrew Grimshaw

Reference: NASA 5-28538, Emily West

Emily West was a student of mine for approximately eighteen (18) months of this fellowship. In February 1997, Ms. West dropped out of the Ph.D. program. Emily finished her Masters but did not complete the Ph.D. - she is ABD. Emily subsequently moved to Chapel Hill, NC (her husband took a job there) and entered the CS program at UNC.

Integrated Task and Data Parallel Programming
Language Design

NASA Graduate Student Researchers Program
Langley Research Center

Emily A. West, University of Virginia
Andrew S. Grimshaw, Faculty Advisor, University of Virginia
Manuel D. Salas, Technical Advisor, Langley Research Center

Proposed Research This research investigates the combination of task and
data parallel language constructs within a single programming language. There
are an number of applications that exhibit properties which would be well served
by such an integrated language. Examples include global climate models, aircraft
design problems, and multidisciplinary design optimization problems.

Our approach incorporates data parallel language constructs into an existing,
object oriented, task parallel language. The language will support creation and
manipulation of parallel classes and objects of both types (task parallel and data
parallel). Ultimately, the language will allow data parallel and task parallel classes
to be used either as building blocks or managers of parallel objects of either type,
thus allowing the development of single and multi-paradigm parallel applications.

1995 Research Accomplishments In February I presented a paper at Fron-
tiers '95 describing the design of the data parallel language subset. During the
spring I wrote and defended my dissertation proposal. Since that time I have de-
veloped a runtime model for the language subset. I have begun implementing the
model and hand-coding simple examples which demonstrate the language subset.
I have identified an astrophysical fluid flow application which will validate the
data parallel language subset.

1996 Research Agenda Milestones for the coming year include implement-
ing a significant portion of the data parallel language subset over the Legion
system. Using simple hand-coded methods, I plan to demonstrate (1) concurrent
task and data parallel objects and (2) task parallel objects managing both task
and data parallel objects. My next steps will focus on constructing a compiler
and implementing the fluid flow application with the language. Concurrently, I
will conduct a search for a real-world application exhibiting both task and data
parallelism within the same program.

Additional 1995 Activities During the fall I collaborated with Andrew
Grimshaw and Adam Ferrari to write a book chapter which will be included in
Parallel Processing in C++ edited by Gregory Wilson. I also finished two courses,
Compilers and Advanced Compilers, in 1995. These courses complete my class
requirements at the University of Virginia. I have only my dissertation research
and defense to complete.
June 6, 1997

Mr. Roger Hathaway  
NASA Langley Research Center  
Office of Education  
Mail Stop 400  
Hampton, VA 23681

Dear Mr. Hathaway

During the Fall semester of 1996 I took a leave of absence from the University of Virginia in order to resolve a personal problem. To the best of my knowledge, my previous advisor, Dr. Andrew Grimshaw did not contact NASA and inform you of this development because he wanted to wait until the situation was resolved. I realize now that it was also partly my responsibility to notify NASA, however at the time I was unaware of the proper policies. I do apologize for not contacting you when the difficulties began. I was re-enrolled at UVA for the Spring semester 1997, which has just been completed, and I intend to register for the Summer session on June 9th during the registration period.

I have since resolved the problems, in part, by finding a new advisor (Jim French) at UVA and beginning to search for a new dissertation topic that would be acceptable under the GSRP guidelines for my fellowship. At this time Dr. French and I submitted the request for a no-cost extension to the GSRP grant.

Since that time, my husband has accepted a faculty position at the University of North Carolina. In conjunction with this, the Computer Science department at UNC has accepted my application for transfer beginning in the Fall semester of 1997. In many ways, this is an ideal solution to the entire situation. There are two faculty members at UNC who could be my advisor. Each of their research areas is closely related to my previous course of study and dissertation topic while I worked with Dr. Grimshaw. (If I were to remain at UVA and work with Dr. French I would change my focus to a different area of parallel computing.) Therefore, transferring to UNC affords me the opportunity to continue in the area of my original GSRP proposal and to complete my Ph.D. degree.
In light of this situation, I would very much like to retain my current GSRP fellowship through this summer and next year since the support I have received thus far has helped me greatly. If the no-cost extension for this fellowship is granted, I would then like to submit an additional request to have the balance of the fellowship transferred to UNC. If I do submit this additional request, then I would like to seek your advice on the proper procedures. This summer I intend to prepare for the upcoming semester at UNC by continuing my readings in my research area, reviewing the research programs of both potential advisors at UNC and by reviewing the prerequisite materials for the course I will be taking in the Fall. UNC has required that I take at least two additional courses.

Sincerely,

Emily A. West
