September 2000
Since its founding, NASA has been dedicated to the advancement of aeronautics and space science. The NASA Scientific and Technical Information (STI) Program Office plays a key part in helping NASA maintain this important role.

The NASA STI Program Office is operated by Langley Research Center, the lead center for NASA’s scientific and technical information. The NASA STI Program Office provides access to the NASA STI Database, the largest collection of aeronautical and space science STI in the world. The Program Office is also NASA’s institutional mechanism for disseminating the results of its research and development activities. These results are published by NASA in the NASA STI Report Series, which includes the following report types:

- **TECHNICAL PUBLICATION.** Reports of completed research or a major significant phase of research that present the results of NASA programs and include extensive data or theoretical analysis. Includes compilations of significant scientific and technical data and information deemed to be of continuing reference value. NASA’s counterpart of peer-reviewed formal professional papers but has less stringent limitations on manuscript length and extent of graphic presentations.

- **TECHNICAL MEMORANDUM.** Scientific and technical findings that are preliminary or of specialized interest, e.g., quick release reports, working papers, and bibliographies that contain minimal annotation. Does not contain extensive analysis.

- **CONTRACTOR REPORT.** Scientific and technical findings by NASA-sponsored contractors and grantees.

- **CONFERENCE PUBLICATION.** Collected papers from scientific and technical conferences, symposia, seminars, or other meetings sponsored or cosponsored by NASA.

- **SPECIAL PUBLICATION.** Scientific, technical, or historical information from NASA programs, projects, and mission, often concerned with subjects having substantial public interest.

- **TECHNICAL TRANSLATION.** English-language translations of foreign scientific and technical material pertinent to NASA’s mission.

Specialized services that complement the STI Program Office’s diverse offerings include creating custom thesauri, building customized databases, organizing and publishing research results . . . even providing videos.

For more information about the NASA STI Program Office, see the following:

- E-mail your question via the Internet to help@sti.nasa.gov
- Fax your question to the NASA Access Help Desk at (301) 621-0134

BOREAS Hardcopy Maps
Elizabeth Nelson, Jeffrey A. Newcomer

Summary

BOREAS hardcopy maps are a collection of approximately 1,000 hardcopy maps representing the physical, climatological, and historical attributes of areas covering primarily the Manitoba and Saskatchewan provinces of Canada. These maps were collected by BORIS and CCRS staff to provide basic information about site positions, manmade features, topography, geology, hydrology, land cover types, fire history, climate, and soils of the BOREAS study region. These maps are not available for distribution through the BOREAS project but may be used as an onsite resource. Information is provided within this document for individuals who want to order copies of these maps from the original map source.

Note that the maps are not contained on the BOREAS CD-ROM set. An inventory listing file is supplied on the CD-ROM to inform users of the maps that are available.

1. Data Set Overview

1.1 Data Set Identification
BOREAS Hardcopy Maps

1.2 Data Set Introduction
BOReal Ecosystem-Atmosphere Study (BOREAS) hardcopy maps are a collection of approximately 1,000 hardcopy maps representing the physical, climatological, and historical attributes of areas covering primarily the Manitoba and Saskatchewan provinces of Canada. These maps were collected by BOREAS Information System (BORIS) and Canada Centre for Remote Sensing (CCRS) staff to provide basic information about site positions, manmade features, topography, geology, hydrology, land cover types, fire history, climate, and soils of the BOREAS study region. These maps
are not available for distribution through the BOREAS project but may be used as an onsite resource. Information is provided within this document for individuals who want to order copies of these maps from the original map source.

### 1.3 Objective/Purpose

The BOREAS Staff Science effort covered project-level activities requiring uniform data collection procedures across sites and time. Locating and acquiring various map-based information over the BOREAS study areas was included in this undertaking. The maps were acquired to provide basic information about the geographic position of manmade features and potential sites, topography, geology, hydrology, land cover types, fire history records, climate, and soils of the BOREAS study area. The maps were used in the planning and execution stages of the experiment in site selection and use, in aircraft mission planning, and for providing baseline information to investigators about the historical and physical characteristics of the area.

### 1.4 Summary of Parameters

The map types found in the BOREAS collection include Bedrock, Climate, Fire History, Forest Cover, Geochemistry, Soils, Surficial Geology, Topography, and Water Resources, primarily of the Manitoba and Saskatchewan provinces.

### 1.5 Discussion

BOREAS staff interacted with numerous scientists and agency representatives in finding the maps that exist in this collection. The maps in the collection were purchased with project funds and are copyrighted. Because this is copyrighted information, BORIS cannot copy or distribute the maps. Contact information about the various maps is provided in Section 7.3.4 of this document.

### 1.6 Related Data Sets

- BOREAS Forest Cover Data Layers of the NSA in Raster Format
- BOREAS Elevation Contours over the NSA and SSA in ARC/INFO Generate Format
- BOREAS HYD-08 DEM Data over the NSA-MSA and SSA-MSA in the UTM Projection
- BOREAS Regional DEM in Raster Format and AEAC Projection

## 2. Investigator

### 2.1 Investigator Name and Title

BOREAS Staff Science

### 2.2 Title of Investigation

BOREAS Staff Science GIS Data Collection Program

### 2.3 Contact Information

**Contact 1:**

3. Theory of Measurements

The maps in the BOREAS collection were obtained from various sources. Map types and the original map sources are listed in detail in Section 7.3.4. Overall, the maps were derived and updated from interpretation of aerial photography and from ground surveys. Any details on the compilation and derivation for a particular map may be obtained by contacting the original map source.

4. Equipment

4.1 Sensor/Instrument Description
Unknown.

4.1.1 Collection Environment
Unknown.

4.1.2 Source/Platform
Unknown.

4.1.3 Source/Platform Mission Objectives
Unknown.

4.1.4 Key Variables
Bedrock, Climate, Fire History, Forest Cover, Geochemistry, Soils, Surficial Geology, Topography, and Water Resources.

4.1.5 Principles of Operation
Unknown.

4.1.6 Sensor/Instrument Measurement Geometry
Unknown.

4.1.7 Manufacturer of Sensor/Instrument
Unknown.

4.2 Calibration

4.2.1 Specifications
Unknown.

4.2.1.1 Tolerance
Unknown.
4.2.2 Frequency of Calibration
Unknown.

4.2.3 Other Calibration Information
Unknown.

5. Data Acquisition Methods
The BOREAS hardcopy maps were located and acquired from various sources by BOREAS staff at National Aeronautics and Space Administration (NASA) Goddard Space Flight Center (GSFC) and CCRS. Details on the map sources are given in Section 7.3.4 of this document.

6. Observations
6.1 Data Notes
None.

6.2 Field Notes
None.

7. Data Description
7.1 Spatial Characteristics
7.1.1 Spatial Coverage
The BOREAS map collection covers various portions of the Saskatchewan and Manitoba provinces as well as the entire Canadian region for some parameters. Details on specific coverage can be obtained by contacting the designated persons in Section 2.3 or by contacting the map sources given in Section 7.3.4.

The climatic map data cover the entire region of Canada, as does the topographic map index. All other maps cover areas in Universal Transverse Mercator (UTM) zone 13 and/or 14.

The North American Datum of 1983 (NAD83) corner coordinates of the overall BOREAS region, which includes both the Southern Study Area (SSA) and the Northern Study Area (NSA), are:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Northwest</td>
<td>58.979 N 111.000 W</td>
</tr>
<tr>
<td>Northeast</td>
<td>58.844 N  93.502 W</td>
</tr>
<tr>
<td>Southwest</td>
<td>51.000 N 111.000 W</td>
</tr>
<tr>
<td>Southeast</td>
<td>50.089 N  96.969 W</td>
</tr>
</tbody>
</table>

The NAD83 corner coordinates of the BOREAS SSA are:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Northwest</td>
<td>54.321 N 106.228 W</td>
</tr>
<tr>
<td>Northeast</td>
<td>54.225 N  104.237 W</td>
</tr>
<tr>
<td>Southwest</td>
<td>53.515 N 106.321 W</td>
</tr>
<tr>
<td>Southeast</td>
<td>53.420 N  104.368 W</td>
</tr>
</tbody>
</table>
The NAD83 corner coordinates of the NSA are:

<table>
<thead>
<tr>
<th></th>
<th>Latitude</th>
<th>Longitude</th>
</tr>
</thead>
<tbody>
<tr>
<td>Northwest</td>
<td>56.249 N</td>
<td>98.825 W</td>
</tr>
<tr>

</tr>
<tr>
<td>Southeast</td>
<td>55.379 N</td>
<td>97.489 W</td>
</tr>
</tbody>
</table>

7.1.2 Spatial Coverage Map
Not available.

7.1.3 Spatial Resolution
The spatial resolution is specific to the scale of the individual maps.

7.1.4 Projection
The maps are in various projections and need to be referenced specifically for this information.

7.1.5 Grid Description
Not available.

7.2 Temporal Characteristics

7.2.1 Temporal Coverage
The original compilation and revision dates of the maps are specific to the individual map sheets.

7.2.2 Temporal Coverage Map
Not available.

7.2.3 Temporal Resolution
Not available.

7.3 Data Characteristics

7.3.1 Parameter/Variable
The maps in the collection provide information on the following features:

CLIMATE
FIRE HISTORY
FOREST COVER
GEOLOGY - BEDROCK
GEOLOGY - CHEMISTRY
GEOLOGY - PHOTOGRAPHY
GEOLOGY - QUATERNARY
GEOLOGY - SURFICIAL
FORESTRY - HYPSOMETRY
LAND CAPACITY
LAND COVER
LAND TYPE
OBSERVING STATIONS
PLANT COMMUNITY
RADIATION NETWORK
SOILS
SOIL CAPACITY
The parameters contained in the map inventory listing file on the CD-ROM are:

<table>
<thead>
<tr>
<th>Column Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PROVINCE</td>
<td>The Canadian province covered by the map. Examples include SASKATCHEWAN and MANITOBA.</td>
</tr>
<tr>
<td>MAP_NAME</td>
<td>The name of the map.</td>
</tr>
<tr>
<td>MAP_SUBJECT</td>
<td>The subject material covered by the map. Examples include GEOLOGY, FIRE, HISTORY, and FOREST COVER.</td>
</tr>
<tr>
<td>SCALE</td>
<td>The scale of the map. Examples include 1:24,000, 1:100,000, and 1:250,000.</td>
</tr>
<tr>
<td>MAP_FORM</td>
<td>The form in which the map data are stored. Examples include PAPER and DIGITAL</td>
</tr>
<tr>
<td>MAP_SOURCE</td>
<td>The source from which the map is available.</td>
</tr>
<tr>
<td>NW_LONGITUDE</td>
<td>The NAD83 based longitude coordinate of the northwest corner of the minimum bounding rectangle for the data.</td>
</tr>
<tr>
<td>NE_LONGITUDE</td>
<td>The NAD83 based longitude coordinate of the northeast corner of the minimum bounding rectangle for the data.</td>
</tr>
<tr>
<td>SE_LONGITUDE</td>
<td>The NAD83 based longitude coordinate of the southeast corner of the minimum bounding rectangle for the data.</td>
</tr>
<tr>
<td>SW_LONGITUDE</td>
<td>The NAD83 based longitude coordinate of the southwest corner of the minimum bounding rectangle for the data.</td>
</tr>
</tbody>
</table>
NW_LATITUDE  The NAD83 based latitude coordinate of the northwest corner of the minimum bounding rectangle for the data.

NE_LATITUDE  The NAD83 based latitude coordinate of the northeast corner of the minimum bounding rectangle for the data.

SE_LATITUDE  The NAD83 based latitude coordinate of the southeast corner of the minimum bounding rectangle for the data.

SW_LATITUDE  The NAD83 based latitude coordinate of the southwest corner of the minimum bounding rectangle for the data.

7.3.3 Unit of Measurement
The measurement units for the parameters contained in the inventory listing file on the CD-ROM are:

<table>
<thead>
<tr>
<th>Column Name</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PROVINCE</td>
<td>[none]</td>
</tr>
<tr>
<td>MAP_NAME</td>
<td>[none]</td>
</tr>
<tr>
<td>MAP_SUBJECT</td>
<td>[none]</td>
</tr>
<tr>
<td>SCALE</td>
<td>[none]</td>
</tr>
<tr>
<td>MAP_FORM</td>
<td>[none]</td>
</tr>
<tr>
<td>MAP_SOURCE</td>
<td>[none]</td>
</tr>
<tr>

</table>
Minimum Data Value -- The minimum value found in the column.
Maximum Data Value -- The maximum value found in the column.
Missing Data Value -- The value that indicates missing data. This is used to indicate that an attempt was made to determine the parameter value, but the attempt was unsuccessful.
Unrel Data Value -- The value that indicates unreliable data. This is used to indicate an attempt was made to determine the parameter value, but the value was deemed to be unreliable by the analysis personnel.
Below Detect Limit -- The value that indicates parameter values below the instruments detection limits. This is used to indicate that an attempt was made to determine the parameter value, but the analysis personnel determined that the parameter value was below the detection limit of the instrumentation.
Data Not Collected -- This value indicates that no attempt was made to determine the parameter value. This usually indicates that BORIS combined several similar but not identical data sets into the same data base table but this particular science team did not measure that parameter.

Blank -- Indicates that blank spaces are used to denote that type of value.
N/A -- Indicates that the value is not applicable to the respective column.
None -- Indicates that no values of that sort were found in the column.

7.4 Sample Data Record

A sample data record for the hardcopy maps is not applicable. The following are wrapped versions of the first few records from the hardcopy maps inventory table on the CD-ROM:

| PROVINCE, MAP_NAME, MAP_SUBJECT, SCALE, MAP_FORM, MAP_SOURCE, NW_LONGITUDE, NE_LONGITUDE, SE_LONGITUDE, SW_LONGITUDE, NW_LATITUDE, NE_LATITUDE, SE_LATITUDE, SW_LATITUDE |
| 'MANITOBA', 'T 75 R05 W', 'FC AUX', '15840', 'PAPER', 'MNR-FB', -98.23855, -98.08131, -98.08332, -98.24021, 55.5478, 55.54672, 55.46055, 55.46162 |
| 'MANITOBA', 'T 76 R04 W', 'FC AUX', '15840', 'PAPER', 'MNR-FB', -98.08331, -97.92573, -97.92808, -98.08532, 55.63508, 55.6338, 55.54781, 55.54908 |

8. Data Organization

8.1 Data Granularity

The maps can be obtained singly or in groups by contacting the sources indicated in Section 7.3.4.

8.2 Data Format

Each map varies in its size, format, and projection.

The CD-ROM inventory listing file consists of numerical and character fields of varying length separated by commas. The character fields are enclosed with single apostrophe marks. There are no spaces between the fields.
9. Data Manipulations

9.1 Formulae

9.1.1 Derivation Techniques and Algorithms
Not available.

9.2 Data Processing Sequence

9.2.1 Processing Steps
BORIS staff processed the maps by:
- Extracting geographic coordinate, scale, and thematic information from the maps and placing it in an American Standard Code for Information Interchange (ASCII) file on disk
- Reading the ASCII information in the disk file and loading the online data base with needed information

9.2.2 Processing Changes
None.

9.3 Calculations

9.3.1 Special Corrections/Adjustments
None.

9.3.2 Calculated Variables
None.

9.4 Graphs and Plots
None.

10. Errors

10.1 Sources of Error
Each of the map suppliers should be contacted regarding any errors in the maps.

10.2 Quality Assessment
Each of the map suppliers should be contacted regarding any quality information.

10.2.1 Data Validation by Source
Unknown.

10.2.2 Confidence Level/Accuracy Judgment
Unknown.

10.2.3 Measurement Error for Parameters
Unknown.

10.2.4 Additional Quality Assessments
Unknown.
10.2.5 Data Verification by Data Center
BORIS staff visually inspected at the maps to assess that they did in fact seem to depict the parameters listed but did not perform any ground checks of the accuracy. The inventory and description of the maps was deemed accurate.

11. Notes

11.1 Limitations of the Data
Individuals desiring to use the maps must acquire their own copies through the sources provided in Section 7.3.4.

11.2 Known Problems with the Data
None.

11.3 Usage Guidance
None.

11.4 Other Relevant Information
Not available.

12. Application of the Data Set
The maps can be used as visual references or can be digitized to create digital data sets for computer analyses.

13. Future Modifications and Plans
None.

14. Software

14.1 Software Description
BORIS staff tabulated the needed information in Microsoft Excel spreadsheet files and used the output spreadsheets to load the data base tables.

14.2 Software Access
Microsoft Excel is commercially available.

15. Data Access
Note that the maps are not contained on the BOREAS CD-ROM set. An inventory listing file is supplied on the CD-ROM to inform users of the maps that are available. This inventory listing is available from the Earth Observing System Data and Information System (EOSDIS) Oak Ridge National Laboratory (ORNL) Distributed Active Archive Center (DAAC). For hardcopies of the individual maps, contact the sources provided in Section 7.3.4.
15.1 Contact Information
For BOREAS data and documentation please contact:

ORNL DAAC User Services
Oak Ridge National Laboratory
P.O. Box 2008 MS-6407
Oak Ridge, TN 37831-6407
Phone: (423) 241-3952
Fax: (423) 574-4665
E-mail: ornldaac@ornl.gov or ornl@eos.nasa.gov

15.2 Data Center Identification
Earth Observing System Data and Information System (EOSDIS) Oak Ridge National Laboratory (ORNL) Distributed Active Archive Center (DAAC) for Biogeochemical Dynamics
http://www-eosdis.ornl.gov/

15.3 Procedures for Obtaining Data
Users may obtain data directly through the ORNL DAAC online search and order system [http://www-eosdis.ornl.gov/] and the anonymous FTP site [ftp://www-eosdis.ornl.gov/data/] or by contacting User Services by electronic mail, telephone, fax, letter, or personal visit using the contact information in Section 15.1.

15.4 Data Center Status/Plans
The ORNL DAAC is the primary source for BOREAS field measurement, image, GIS, and hardcopy data products. The BOREAS CD-ROM and data referenced or listed in inventories on the CD-ROM are available from the ORNL DAAC.

16. Output Products and Availability

16.1 Tape Products
None.

16.2 Film Products
None.

16.3 Other Products
The maps referenced here exist in hardcopy form.

17. References

17.1 Platform/Sensor/Instrument/Data Processing Documentation
None.

17.2 Journal Articles and Study Reports

17.3 Archive/DBMS Usage Documentation
None.

18. Glossary of Terms
None.

**Abstract**

BOREAS hardcopy maps are a collection of approximately 1,000 hardcopy maps representing the physical, climatological, and historical attributes of areas covering primarily the Manitoba and Saskatchewan provinces of Canada. These maps were collected by BORIS and CCRS staff to provide basic information about site positions, manmade features, topography, geology, hydrology, land cover types, fire history, climate, and soils of the BOREAS study region. These maps are not available for distribution through the BOREAS project but may be used as an onsite resource. Information is provided within this document for individuals who want to order copies of these maps from the original map source.
