A Bibliography of Aspect-Oriented Software Development, Version 1.1

Robert E. Filman

RIACS Technical Report 03.01
January 2003
A bibliography of the literature related to Aspect-Oriented Software Development.

This work was supported in part by the National Aeronautics and Space Administration under Cooperative Agreement NCC 2-1006 with the Universities Space Research Association (USRA).

This report is available online at http://www.riacs.edu/trs/
A Bibliography of Aspect-Oriented Software Development
Version 1.1

Robert E. Filman
Research Institute for Advanced Computer Science
NASA Ames Research Center
Moffett Field, California
January 8, 2003

A bibliography of the literature related to Aspect-Oriented Programming.
My thanks to Mario Südholt, Karl Lieberherr, Sacher Dominik, Guenter Knesiel, Bart de Win, Lee Carver, and Curtis Clifton for their contributions.
This is meant to be an evolving document. Please send additions, corrections, comments and disagreements to the author at rfilman@mail.arc.nasa.gov. There's more detail in the bibtex version of this file (see, for example, http://www.aosd.net/aosd-bibliography.bib).
