Strategic Planning

Philippe Crane
ORIGINS THEME SCIENTIST

NASA / HQ

NASA Strategic Planning

• NASA Strategic Planning, Roadmaps, GPRA, and all that.
• Schedule, People, Origins/SEU
• Issues:
  – Decadal report priorities
  – Breadth of the Research
  – Content
NASA ADVISORY STRUCTURE

The Strategic Planning Process

National Academy Fundamental Science Questions

Roadmap Teams
Space Science Roadmaps
Long Range Program Alternatives

Community Strategic Planning

SSE Strategic Plan
Science Questions/Science Goals

SSAC & Subcomites

SSE Performance Plan & Metrics

External Community Assessment

SSE Performance Report

NASA Strategic Plan

President’s Budget Congressional Actions

Budget & Guidance
Purpose

- Fulfill the strategic planning requirements.
- Provide a guide to the science community in presenting research requests to NASA.
- Inform and inspire.
- Focus investments in technology and research for future missions.
- Provide the scientific and technical justification for augmentation requests.

Relevant Time Scales

- GPRA is an annual event, so the Roadmaps feed this exercise through the Enterprise Strategic Plan.
- Strategic Planning occurs on a 3 year cycle where the near term outlook is for 5 years.
- Roadmapping also is on a 3 year cycle, but looks out 10 years and 20 years.
  - For Origins, the next 5-8 years is well defined.
  - For SEU, funding beyond GLAST for LISA, and Con-X is uncertain.
## Second Workshop on New Concepts for Far-Infrared and Submillimeter Space Astronomy

### Activity Schedule

<table>
<thead>
<tr>
<th>Activity Name</th>
<th>Start Date</th>
<th>Finish Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Kickoff Telecon to set workplan</td>
<td>8/15/01</td>
<td></td>
</tr>
<tr>
<td>Identify/recruit committee members</td>
<td>8/15/01</td>
<td>12/1/01</td>
</tr>
<tr>
<td>Prepare Guidelines &amp; Distribute</td>
<td>8/15/01</td>
<td>11/1/01</td>
</tr>
<tr>
<td>Prepare Plan for OS Meeting</td>
<td>8/28/01</td>
<td>11/1/01</td>
</tr>
<tr>
<td>Prepare synthesize/issues</td>
<td>11/20/01</td>
<td>12/1/01</td>

### Some Related Activities

- **March:** 2nd Workshop on New Concepts in IR Submm Astronomy--Univ of Maryland
- **April:** Hubble Legacy Workshop--Chicago
- **April:** Astro-biology Conference--Ames
- **May:** Laboratory Astrophysics Workshop--Ames
- **May:** Astrophysics of Life--STScI
- **May:** Brown Dwarfs--Kona
- **May:** Origins 2002--Grand Teton
- **June:** International Virtual Observatory--Munich
- **June:** Research in Extra-solar planets--Washington
ORIGINS Roadmap Organization

**1 Co-Chairs**
- Phil Crane (HQ)
- Alan Dressler (Carnegie)

**2 Science Leads**
- Alan Dressler (Carnegie) – Lead
- Lou Allamandola (ARC)
- Adam Burrows (U of A)

**3 Technology/Instruments**
- Rich Capps (JPL) – Lead

**4 Research & Analysis**
- Hashima Hasan (HQ) – Lead

**5 Astrobiology**
- Carl Pilcher (HQ) – Lead

**6 Missions**
- Mike Devirian (JPL) – Lead

**7 Outreach**
- Carl Pilcher (HQ) – Lead
SEU Roadmap Team

**Roadmap team:**
Sterl Phinney* (Chair)
Sean Carroll                  Sarah Church               Roy Gould
Craig Hogan                  Steve Kahn                  Dan Lester*
Robert March                 Mike Shull                   Simon Swordy*
Nick White*                  Rocky Kolb* (SEUS Chair)

Paul Hertz (SEU Theme Scientist)
Paul DeMinco (SEU Program Integration Manager)

**ROADMAPPING Cont’d**

• ORIGINS Roadmap will be very similar to the 2000 version
  – Origins has a funded program.
    • HST, SIRTF, SIM, NGST, SOFIA, KEPLER, TPF.
    • New mission content in the next several years from Explorer, Discovery, or possibly from a new competed mission line.
  – Future strategic missions must define their science goals and technology needs.
    • Large filled aperture IR mission
    • UV/Optical mission in the 2020 time frame
The SEU Roadmap Team solicited community input in the form of white papers describing mission concepts

**Category 1 - Missions**
- Advanced Compton Telescope (ACT)
- Constellation-X
- Cosmic Microwave Background Polarization Experiment (CMBPOL)
  3a. Cosmic Microwave Background Polarization Experiment (CMBPOL) Addendum
- Energetic X-ray Imaging Survey Telescope (EXIST)
- Fresnel Microarcsecond Gamma Ray Imager
- Generation-X
- Gravitational Echoes Across Time Mission (GREAT)
- High-resolution Spectroscopic Imaging Mission (HSI)
- International Advanced Radio Interferometry between Space and Earth (iARISE)
- Laser Interferometer Space Antenna (LISA)
- MicroArcsecond X-ray Imaging Mission (MAXIM)
- Next Generation High-Energy Gamma-Ray Astrophysics Mission
- Orbiting Wide-angle Light-collectors (OWL)
- Probing the Invisible Universe: The Case for Far-IR/Submillimeter Interferometry
- Single Aperture Far InfraRed Observatory (SAFIR)
- Space UltraViolet/Optical Observatory (SUVO)
- The Stellar Imager (SI)
- A Facility Far-Infrared Spectrometer for SOFIA
- Supernova/Acceleration Probe (SNAP)
- Tests of Relativistic Gravity via Solar System Laser Ranging
- Ultra-High-Throughput X-ray Telescope Observatory (UXT)

**Category 2 - Non-Mission Activities**
- "Amicus Brief"
- Balloon Program
- Bridging the Gap From New Instruments and Data to New Science and Understanding
- The DART System for Far-IR/Submillimeter Space Missions
- Theory of Rotation in Big Bang Universe
Roadmap Issues

- Decadal Report Priorities and Requests
  - Specific Missions & Priorities
  - Competed Missions-- Call for medium size mission like Discovery
  - Other Issues-- Theory, NVO, Lab-Astro

- Origins/SEU Priorities
  - Astronomy & Physics Div. needs a funded SEU line for LISA, Con-X and for medium size competed missions
  - How to accommodate new content in the next several years

Reviews and Recommendations that guide the Roadmap priorities:
- NAS Committee on Gravitational Physics (1999)
- OSS/SEU 2000 Roadmap
- NAS Physics Survey Overview Committee (2001)
- NAS Astronomy and Astrophysics Survey Committee (2001)
- NAS Committee on Physics of the Universe (2002)
