NASA
Applied Sciences Program
JACIE Workshop – November 8, 2004
The NASA Vision
To improve life here,
To extend life to there,
To find life beyond.

The NASA Mission
To understand and protect our home planet,
To explore the universe and search for life,
To inspire the next generation of explorers
... as only NASA can.
What's New: NASA Transformation

EARTH SYSTEM MODELS
- Aerosol Transport: GOCART
- Global-Regional Assimilations: RAQMS
- Atmospheric Chemistry: GEOS-CHEM
- Emissions: SMOKE
- Meteorology: MM5, ETA
- Air Trajectories: NOAA-Hysplit4

EARTH OBSERVATIONS
- Aerosols: Terra, Aqua, TOMS, Aura, Aeronet, AIRNow, INTEX, CALIPSO, Glory-APS
- Ozone & Precursors: TOMS, Aura, SAGE III, AIRNow, INTEX
- Trace Gases: Terra, Aqua, OCO
- Clouds: Terra, Aqua, CloudSAT, CALIPSO
- Land Use/Cover: Terra, Aqua, Landsat
- Atmospheric Parameters: GOES, POES, GIFTS, NPP, NPOES

DECISION SUPPORT TOOLS
CMAQ (Community Multiscale Air Quality modeling system)
- Assess emissions control strategies
- Develop achievable SIPs (State Implementation Plan)
- Assess compliance
- Waivers to air standards
- Quantify voluntary stationary emission reductions

AIRNow & AQI (Air Quality Index)
- Forecast transport of dust/pollutants
- Actions to reduce source emissions
- PM2.5 forecasts

INTERNATIONAL TREATIES

VALUE & BENEFITS
- Reduce lung-related diseases & premature death
- Reduce hospital admissions & use of medicines
- Reduce lost workdays and schooldays
- Improve visibility and reduce haze for tourism
- Improve resiliency of crops; increase yields
- Increase confidence in government
- Improve crop estimates
- Sensitive populations can change activities

The U.S. EPA has developed the AIRNow website to provide the public with easy access to national air quality information. This website offers daily Air Quality Index forecasts as well as real-time conditions for over 100 cities across the U.S.
Applied Sciences and JACIE

- NASA Research is Undertaken Utilizing Best Possible Data Sources AND Not Competing with Private Industry
- JACIE is integral to the Applied Sciences goal of incorporating commercial data sources into scientific research
  - Used by Earth System Science Research as an high resolution augmentation to NASA remote sensing assets
  - Used by Space Science to help characterize “Mars Analog” Features on Earth for Future Exploration
- Applied Sciences Annual Performance Goals Include:
  - Crosscutting Solutions: Work within the Joint Agency Committee on Imagery Evaluation and the Commercial Remote Sensing Policy Working Group through partnerships with NIMA, USGS, NOAA, and USDA to verify/validate at least two commercial remote sensing sources/products for Earth science research, specifically with respect to land use/land cover observations for carbon cycle and water cycle research.
Applied Sciences Solicitation:
Decision Support through Earth Science Results

A--NASA COOPERATIVE AGREEMENT NOTICE (CAN) APPLIED SCIENCES PROGRAM-2004

General Information

Document Type: Presolicitation Notice Solicitation Number:NN-H-04-Z-YO-010-CPosted Date:Sep 03, 2004Original Response Date:Dec 17, 2004Current Response Date:Dec 17, 2004Original Archive Date:Sep 03, 2005Current Archive Date:Sep 03, 2005Classification Code:A -- Research & Development

Description

The National Aeronautics and Space Administration (NASA) is announcing opportunities to participate in the Applied Sciences Program of the Science Mission Directorate. The Program requests innovative solutions to evaluate, verify and validate, and benchmark solutions that integrate NASA Earth and Space science results into decision-support tools of partnering organizations. Proposals are invited in two main areas: 1) Integrated Systems Solutions to integrate NASA Earth and Space science results into applications of national priority, demonstrate prototypes, and benchmark performance, and 2) Solutions Networks to improve the collective ability of Earth science organizations to interact and harness the results of NASA Earth and Space science research. Participation in the CAN is open to all categories of domestic and foreign organizations, including educational institutions, industry, non-profit institutions, NASA research centers, and other government agencies and laboratories. This solicitation will be available electronically on the release date via the Internet at the Science Mission Directorate ? Destination Earth Home Page: http://www.earth.nasa.gov/ under ?Research Opportunity.? Paper copies of the announcement will be available to those who do not have Internet access by calling (202) 358-3552 and leaving a voice-mail message. The following dates apply to this announcement: CAN Release Date: September 17, 2004 Step 1 (Pre-Proposals) Due: October 22, 2004 Step 2 (Final) Proposals Due: December 17, 2004 POC: Lawrence Friedl Program Manager, Science Applications Applied Sciences Program NASA Headquarters Washington, DC 20546 Phone: (202) 358-1599 Fax: (202) 358-3098 E-mail: Lawrence.A.Friedl@nasa.gov "This is a broad agency announcement as specified in FAR 6.102 (d) (2). Notwithstanding the posting of this opportunity at FedBizOpps.gov, Grants.gov, or at both sites, NASA reserves the right to determine the appropriate award instrument for each proposal selected pursuant to this announcement."
Questions or Comments, Contact:

Disaster Management
HAZUS-MH - Risk Assessment and Loss Estimation

Primary Partners:

Transfer of advanced event-modeling capabilities using next-generation hardware, software, and communications

Outcomes: Improvement of FEMA capabilities across all hazards and phases
Impacts: Reduce losses across all disasters

Land use/Land cover, changes in earth's surface topography and improved geodetic imaging, ocean measurements to track hurricanes

Outcomes: Improvement of FEMA planning, and response capabilities to weather and natural hazards
Impacts: Reduce losses across all weather-driven Disasters and earth movement

Improved measurements of soil moisture, global precipitation, water vapor, and wind

Outcomes: Improvement in wildfire prediction, HAZUS-MH High Winds Module Final Version
Impacts: Reduce losses related to hurricane, fire, and high wind disasters.

Understanding of Earth's gravity field And terrestrial reference frame changes in geomagnetic field and understanding of sea level change and climate

Outcomes: Improvement of the HAZUS-MH earthquake assessments And flood inundation for coastal areas
Impacts: Reduce losses related to hurricanes and earthquakes.

Production of assimilated data sets, reanalysis of long period observations

Outcomes: Improvement in climate data and information for risk assessments
Impacts: Reduce losses related to flood and wind disasters. Better community planning

State 1 - Earthquake Damage assessment

State 2 - Improved Hurricane prediction Flood prediction Severe Storm prediction Wildfire prevention and prediction Earthquake prediction

An operational decision support system for quantification and verification of solutions for natural hazard predictions.
Disaster Management
Integrated System Solution

EARTH SYSTEM MODELS
- Earthquake: MMI, Quakesim
- Hurricane: HURRSIM
- Flood: SLOSH, WAVEwatch, STWAVE, HURSURGE
- Land: GPS Network, SBEACH
- Building Cost Models: ATC-13
- Building Structure Models: EPEDAT

EARTH OBSERVATIONS
- Land: Landsat, SRTM, GPS, SCIGN, Terra, Aqua
- Ocean: QuickSCAT, IceSAT, GOES, POES, SSMI, JASON, TOPEX/POSEIDON
- Atmosphere: TRMM, GOES, POES, GPM, NPP, NPOESS

*Future Mission

DECISION SUPPORT TOOLS
- HAZUS-MH (Hazards U.S. - Multi Hazard)
- Disaster Recovery/Mitigation
- Land use decision
- Potential economic loss
- Estimation of direct damage, induced damage, direct losses, and indirect losses
- Accurate risk prediction to communities
- Loss estimates of buildings, essential facilities, transportation & utility lifelines, and population
- Social impacts

VALUE & BENEFITS
- Identify/ Prioritize high-risk communities
- Reduction in lives lost
- Reduction in damage cost
- Anticipate the scope of disaster-related damage
- Improve disaster response
- Community Planning
Disaster Management

EOSDIS Science Data Systems: DAACs

Tools for Decision Makers

HAZUS

can estimate losses from earthquakes, hurricane winds, and floods.

Use GIS technology to combine hazard layers with national databases and apply a standardized loss estimation and risk assessment methodology.

Nationwide database includes datasets on demographics, building stock, essential facilities, transportation, utilities, and high-potential-loss facilities.

Visit www.fema.gov/hazus for more information.

Electronic Transfer:
NASA performs human and robotic exploration in space

- About 40% of NASA’s budget is dedicated to the study of the Earth and the Universe using the unique vantage point of space
- Our fields of research include Climate Variability and Change, Astronomy, Weather, Heliophysics, Atmospheric Composition, Astrobiology, and more

One of the purposes of our scientific research is to increase knowledge of the Earth-Sun System to enable improved predictions of climate, weather, and natural hazards

The NASA Applied Sciences Program goal is to extend the results of our scientific research and knowledge beyond the science community to contribute to our partners’ applications of national priority.

The Program primarily optimizes benefits for citizens by contributing to partnering on applications that are used by state, local, and tribal governments.
