NASA

Applied Sciences Program

JACIE Workshop – November 8, 2004
The NASA Vision
To improve life here,
To extend life to there,
To find life beyond.

The NASA Mission
To understand and protect our home planet,
To explore the universe and search for life,
To inspire the next generation of explorers
... as only NASA can.
What's New: NASA Transformation

- NASA Transformation: Merge Office of Earth Science with Office of Space Science
- Science Mission Directorate Formed
- Sun-Earth System Division
  - Research Program
  - Missions Program
  - Applied Sciences Program
    - National Applications Program Element
      - 12 National Applications
    - Crosscutting Solutions Program Element
      - Integrated Benchmarked Systems Function
      - Solutions Networks Function
      - Human Capital Development Function
      - Geoscience Standards and Interoperability Function
Earth-Sun System Research

- Sun-Earth Connection
- Climate Variability and Change
- Earth Surface and Interior
- Weather
- Carbon Cycle and Ecosystems
- Atmospheric Composition
- Water & Energy Cycle
Turning Observations into Knowledge Products

**Petabytes $10^{15}$**
Multi-platform, multiparameter, high spatial and temporal resolution, remote & in-situ sensing

**Terabytes $10^{12}$**
Calibration, Transformation To Characterized Geophysical Parameters

**Gigabytes $10^{9}$**
Interaction Between Modeling/Forecasting and Observation Systems

**Megabytes $10^{6}$**

</table>
Simultaneous high-time & space resolved pollutants (O3, CO, NOx, SO2, HCHO, aerosols); local resolution in boundary layer. Nighttime chemistry & transport. Feedbacks between aerosols, O3, H20, climate. Chem-radiation coupling in GCMs. Quantify LRT in regional pollution.

AURA - SO2, NOx, NH3 and aerosol products & IMPROVE network. INTEX-West. NH3 emissions factors; air dispersion models (NOx, CO, PM); MM5 & assimilation of surface moisture, heat capacity, insulation. Nested model developments. RAQMS & DAS for daily 3-D ozone.

AURA - AURA - AURA. Trop. residuals (O3, NO2, SO2, HCHO); NRT NOx & VOC emission inventories (top-down/bottom-up) for CMAQ & ozone precursors; O3 assimilations in CMAQ; 3-D global trop. chemistry in GEOS-CHEM; aerosol pattern rendering.

INTEX continental inflow-outflow; ICESat - vertical distribution of dust & clouds; ASTER urban heat flux; Global-to-regional RAQMS - prototype BCs in CMAQ; DAS nested GCM to 0.5° grid. Pollution trajectories & BL deposition of LRT of aerosols. PM network.

MODIS AOD, MOPITT CO, TOMS ozone residuals - correlate to EPA ground measures. Large scale transport of aerosols. GOCART assimilations for B.C.s in models.

Policy-Forecasts-Health-Economics. Aerosol transport loops in EPA Air Quality Index (AQI) for regional forecasts. Improved siteing for surface monitoring network locations. Support EPA-developed tools for state/locals on regional haze. Evaluate exceptional events for effects on NAAQS violations. EPA PM transport rule making.

Accurate pollution forecasts updated regularly within day. Reduced hospital visits from extreme events. Improved NAAQS planning - fewer non-attainment areas. Insight on mobile emission fluctuations. Advanced, targeted mitigation of impacts from severe episodes.

Clear Skies NOx/SO2 Trading Program. Longer lead-time on source & destination of ozone and aerosols. Alerts to re-route airplanes. Alerts to hospitals to expect specific symptoms. Ozone attainment areas. Potential EPA SIP credits for heat island reduction approaches & corresponding state/city policies.

Forecasts of beginning & length of annual “pollution season.” Improvements from achievable SIPs - reduced haze, improved visibility in parks, cleaner water, healthier forest ecosystems, reduced lost work/school days. Support US treaty on long-range transport of organic pollutants.

Support 2004 NOx SIP call. State justify & EPA corroborates claims for foreign-born pollution waivers. Annual EPA analysis of worst 20 pollution events for trends. Extend PM/NOx forecasting to rural areas - warnings to farmers. Targeted mitigation approaches. Ozone loops in EPA’s AQI.

Improved capabilities to air quality managers to assess, plan & implement sound-science, emissions control strategies, policy, & air quality forecasts.
**EARTH SYSTEM MODELS**

- Aerosol Transport: GOCART
- Global-Regional Assimilations: RAQMS
- Atmospheric Chemistry: GEOS-CHEM
- Emissions: SMOKE
- Meteorology: MM5, ETA
- Air Trajectories: NOAA-Hysplit4

**DATA**

**EARTH OBSERVATIONS**

- Aerosols: Terra, Aqua, TOMS, Aura, Aeronet, AIRNow, INTEX, CALIPSO, Glory-APS
- Ozone & Precursors: TOMS, Aura, SAGE III, AIRNow, INTEX
- Trace Gases: Terra, Aqua, OCO
- Clouds: Terra, Aqua, CloudSAT, CALIPSO
- Land Use/Cover: Terra, Aqua, Landsat
- Atmospheric Parameters: GOES, POES, GIFTS, NPP, NPOES

**DECISION SUPPORT TOOLS**

- Ambient State parameters
- Global-to-regional concentrations
- Emissions inventories
- Regional-Global transport
- Trace Gas Sources
- Aerosol properties
- Ozone profiles & columns
- Global-regional boundary conditions
- Data fusion techniques
- Ground-satellite data comparison techniques

**Predictions**

**AIRNow & AQI (Air Quality Index)**

- Forecast transport of dust/pollutants
- Actions to reduce source emissions
- PM$_{2.5}$ forecasts

**International Treaties**

**VALUE & BENEFITS**

- Reduce lung-related diseases & premature death
- Reduce hospital admissions & use of medicines
- Reduce lost workdays and schooldays
- Improve visibility and reduce haze for tourism
- Improve resiliency of crops; increase yields
- Increase confidence in government
- Improve crop estimates
- Sensitive populations can change activities

Public Access

Current Air Quality Conditions

The U.S. EPA has developed the AIRNow website to provide the public with easy access to national air quality information. This website offers daily Air Quality Index forecasts as well as real-time conditions for over 100 cities across the U.S.
Applied Sciences and JACIE

- NASA Research is Undertaken Utilizing Best Possible Data Sources AND Not Competing with Private Industry
- JACIE is integral to the Applied Sciences goal of incorporating commercial data sources into scientific research
  - Used by Earth System Science Research as an high resolution augmentation to NASA remote sensing assets
  - Used by Space Science to help characterize “Mars Analog” Features on Earth for Future Exploration
- Applied Sciences Annual Performance Goals Include:
  - Crosscutting Solutions: Work within the Joint Agency Committee on Imagery Evaluation and the Commercial Remote Sensing Policy Working Group through partnerships with NIMA, USGS, NOAA, and USDA to verify/validate at least two commercial remote sensing sources/products for Earth science research, specifically with respect to land use/land cover observations for carbon cycle and water cycle research.
Applied Sciences Solicitation:
Decision Support through Earth Science Results

A--NASA COOPERATIVE AGREEMENT NOTICE (CAN) APPLIED SCIENCES PROGRAM-2004

General Information

Document Type: Presolicitation Notice Solicitation Number: NN-H-04-Z-YO-010-C
Posted Date: Sep 03, 2004
Original Response Date: Dec 17, 2004
Current Response Date: Dec 17, 2004
Archive Date: Sep 03, 2005
Classification Code: A -- Research & Development

Description

The National Aeronautics and Space Administration (NASA) is announcing opportunities to participate in the Applied Sciences Program of the Science Mission Directorate. The Program requests innovative solutions to evaluate, verify and validate, and benchmark solutions that integrate NASA Earth and Space science results into decision-support tools of partnering organizations. Proposals are invited in two main areas: 1) Integrated Systems Solutions to integrate NASA Earth and Space science results into applications of national priority, demonstrate prototypes, and benchmark performance, and 2) Solutions Networks to improve the collective ability of Earth science organizations to interact and harness the results of NASA Earth and Space science research. Participation in the CAN is open to all categories of domestic and foreign organizations, including educational institutions, industry, non-profit institutions, NASA research centers, and other government agencies and laboratories. This solicitation will be available electronically on the release date via the Internet at the Science Mission Directorate ? Destination Earth Home Page: http://www.earth.nasa.gov/ under Research Opportunity. Paper copies of the announcement will be available to those who do not have Internet access by calling (202) 358-3552 and leaving a voice-mail message. The following dates apply to this announcement: CAN Release Date: September 17, 2004 Step 1 (Pre-Proposals) Due: October 22, 2004 Step 2 (Final) Proposals Due: December 17, 2004 POC: Lawrence Friedl Program Manager, Science Applications Applied Sciences Program NASA Headquarters Washington, DC 20546 Phone: (202) 358-1599 Fax: (202) 358-3098 E-mail: Lawrence.A.Friedl@nasa.gov "This is a broad agency announcement as specified in FAR 6.102 (d) (2). Notwithstanding the posting of this opportunity at FedBizOpps.gov, Grants.gov, or at both sites, NASA reserves the right to determine the appropriate award instrument for each proposal selected pursuant to this announcement."
Questions or Comments, Contact:

Disaster Management
Integrated System Solution

EARTH SYSTEM MODELS
- Earthquake: MMI, Quakesim
- Hurricane: HURRSIM
- Flood: SLOSH, WAVEwatch, STWAVE, HURSURGE
- Land: GPS Network, SBEACH
- Building Cost Models: ATC-13
- Building Structure Models: EPEDAT

EARTH OBSERVATIONS
- Land: Landsat, SRTM, GPS, SCIGN, Terra, Aqua
- Ocean: QuickSCAT, IceSAT, GOES, POES, SSmi, JASON, TOPEX/POSEIDON
- Atmosphere: TRMM, GOES, POES, GPM, NPP, NPOESS

DECISION SUPPORT TOOLS
- HAZUS-MH (Hazards U.S. - Multi Hazard)
- Disaster Recovery/Mitigation
- Land use decision
- Potential economic loss
- Estimation of direct damage, induced damage, direct losses, and indirect losses
- Accurate risk prediction to communities
- Loss estimates of buildings, essential facilities, transportation & utility lifelines, and population
- Social impacts

VALUE & BENEFITS
- Identify/ Prioritize high-risk communities
- Reduction in lives lost
- Reduction in damage cost
- Anticipate the scope of disaster-related damage
- Improve disaster response
- Community Planning

Tools for Decision Makers

HAZUS

can estimate losses from earthquakes, hurricane winds, and floods.

Use GIS technology to combine hazard layers with national databases and apply a standardized loss estimation and risk assessment methodology.

Nationwide database includes datasets on demographics, building stock, essential facilities, transportation, utilities, and high-potential-loss facilities.

  - Environmental Data from Central American countries

**Environmental Monitoring & Decision Support Products**

- Red Tide - El Salvador fishing industry saved $M
- Fires
- Land Cover/Use/Change
- Rapid Response, ftp, e-mail, etc.

**Goals**

- Rapid Response
- Corridor Preservation
- Species Preservation
- Sustained Development
- Better Living Conditions
- Policy Changes

**SERVIR Partners**

Data & Algorithms

**SiAM-SERVIR Partners**

- University of Arkansas (World Bank Funding)
NASA performs human and robotic exploration in space

- About 40% of NASA’s budget is dedicated to the study of the Earth and the Universe using the unique vantage point of space
- Our fields of research include Climate Variability and Change, Astronomy, Weather, Heliophysics, Atmospheric Composition, Astrobiology, and more

One of the purposes of our scientific research is to increase knowledge of the Earth-Sun System to enable improved predictions of climate, weather, and natural hazards

The NASA Applied Sciences Program goal is to extend the results of our scientific research and knowledge beyond the science community to contribute to our partners’ applications of national priority.

The Program primarily optimizes benefits for citizens by contributing to partnering on applications that are used by state, local, and tribal governments.
