</table>
Air sampler collects and protects minute particles.

High-pressure gas facilitates calibration of turbine flowmeters for liquid hydrogen.

Computer program developed for flowsheet calculations and process data reduction.

Automatic calorimetry system monitors HF power.

Natural gas flow through critical nozzles.

Chromatographic detection and analysis of traces of hydrocarbons.

Dynamic calibration of turbine flowmeters.

FLUORESC
Neutron detector simultaneously measures fluence and dose equivalent.

FLUIDS
Magnetic field controls carbon arc tail flame.

FLUID AMPLIFIERS
Binary counter uses fluid logic elements.

Queuing register uses fluid logic elements.

Binary fluid amplifier solves stability and load problems.

Improved fluid control circuit operates on low power input.

Experimental scaling study of fluid amplifier elements.

Study indicates fluid digital computation systems are feasible.

Review of research and development in fluid logic elements.

Fluidic transducer gives pressure output as function of temperature.

Fluidic analog amplifier.

FLUID DYNAMICS
A theoretical model for determining turbine flowmeter sensitivity.

Computer program MCAP-TOSS calculates steady-state fluid dynamics of coolant in parallel channels and temperature distribution in surrounding heat-generating solid.

FLUID FILTERS
Process reduces pore diameters to produce superior filters.

Fiber length and orientation prevent migration in fluid filters.

Valve effectively controls amount of contaminant in flow stream.

Electron beam selectively seals porous metal filters.

Hydrostatic testing of porous assemblies.

Replacement of fluid-filter elements without interruption of flow.

Automatic filter-blowback systems used with sintered-metal filters.

FLUID FLOW
Vented piston seal prevents fluid leakage between two chambers.

Meter accurately measures flow of low-conductivity fluids.

Pressure transducer 3/8-inch in size can be faired into surface.

Ball bearing used in design of rugged flowmeter.

Nonresonant support facilitates vibration testing of structures.

Fluid control valve is independent of pressure drop.

Quick-disconnect coupling safe transfer of hazardous fluids.

Fluid check valve has fail-safe feature.

Electromechanical flowmeter accurately monitors fluid flow.

Practical new method of measuring thermal-neutron fluence

Crack growth measured on flat and curved surfaces at cryogenic temperatures

FOIL BEARINGS

FOILS

FOILS (MATERIALS)

Presented on single sheet

Metallic diffusion measured by a modified Knudsen technique

Screw locking cups quickly and neatly crimped

Thermocouple-to-instrumentation connector features quick assembly

Junction connectors permit strategic placement of television cameras

Interior servicing platform simplifies maintenance of storage tanks

Improved thermal insulation materials made of foamed refractory oxides

Newly developed foam ceramic body shows promise as thermal insulation material at 3000 deg F

Blast deflector traps smoke and debris from explosive trains

High-temperature bearing lubricants

FOCUSING

SUBJECT INDEX

Computer program analyzes and designs supersonic wing-body combinations

Improved electromagnetic master-slave manipulator

Effect of interparticle forces on the solidification of fine particles

Improved design of item in high speed rotating machinery

Instabilities encountered during heat transfer to a supercritical fluid

Four pi-recoil proportional counter used as...
neutron spectrometer  ARG-10101  B66-10326  02

FORECASTING
Probaabilitic approach to long range planning of manpower  NMC-1152A  B67-10510  06

Computerized Schedule Effectiveness
Technique /SP/ determines present and future schedule position  M-PS-13012  B67-10522  06

FOREIGN BODIES
Tool samples subsurface soil free of surface contaminants  NMC-10988  B67-10473  05

FORGING
Upsetting butt edge increases weld-joint strength  M-PS-175  B66-10164  05
Jig and fixture aid fabrication of tungsten rivets  LEWIS-185  B66-10101  05
Study made of procedures for externally loading and corrosion testing stress corrosion specimens  M-PS-12064  B67-10451  03

TRAINING MANUALS
Tooling frame facilitates handling of large objects  M-PS-16166  B66-10575  05

FORGINGS
High-energy, high-power, long-life battery  LEWIS-1072A  B66-10139  01
Primary radical yields in pulse irradiated alkaline aqeous solution  ARG-10322  B66-10167  02

FORMING TECHNIQUES
Integral ribs formed in metal panels by cold-press extrusion  M-PS-230  B66-10141  05
Metal parts hydrosized by explosive force  M-PS-209  B66-10170  05
Fiber glass dies speed forming of large metal sheets  M-PS-214  B66-10210  05
Angular glass tubing drawn from round tubing  HQ-20  B66-10235  05
Die and telescoping punch form convolutions in thin diaphragm  JPL-SC-135  B66-10393  05
Forming tool improves quality of tubing flares  WOO-231  B66-10001  05
Coiled sheet metal strip opens into tubular configuration  GSFC-825  B66-10009  03
Rotating mandrel speeds assembly of plastic inflatables  LANLEY-155  B66-10137  05
Process sequence produces strong, lightweight reflectors of excellent quality  LEWIS-331  B67-10010  05
Development of technology for hot-drape forming of large torus sections  LEWIS-331  B67-10136  01

FORMS (PAPER)
Improved system for documenting measurement data  M-PS-18269  B66-10513  01

FORMULAS (MATHEMATICS)
Minimum permissible leakage resistance established for instrumentation systems  M-PS-848  B66-10397  01
Thermal resistances of solder-boss/potting compound combinations  M-PS-12074  B66-10157  01

FORTRAN
FORTRAN program flow chart is automatically produced  M-PS-369  B66-10062  01
Computer program simplifies selection of structural steel columns  M-PS-0044  B66-10097  01
Computer program determines gas flow rates in piping systems  M-PS-443  B66-10300  01
Computer program generates mathematical equations  M-PS-441  B66-10364  01
Computer program reduces calculation time of normal response functions  M-PS-1456  B67-10077  01
Computer program calculates monotonic maximum likelihood estimates using method of reversals  M-PS-1517  B67-10108  01

A power-spectral-density computer program  
NPO-10126  B67-10160  01

Study of dynamic response of elastic space stations  
NPO-10124  B67-10169  06

Structural Analysis and Matrix Interpretive System /SAXIS/  
NPO-10130  B67-10171  01

Space trajectories program for IBM 7090  
NPO-10125  B67-10172  06

Linear circuit analysis program for IBM 1620 Monitor 2, 1311/1443 data processing system /CIICS/  
NPO-10131  B67-10173  06

Computer program simulates physical systems by solving the simultaneous differential equations describing the systems  
NPO-10019  B67-10193  06

A modal combination computer program for dynamic analysis of structures  
NPO-10129  B67-10217  06

Subroutines GEORGE and DRASTC simplify operation of automatic digital plotter  
NDC-10044  B67-10222  06

Calculation of resonance neutron absorption in two-region problems /the GAROL code/  
NDC-10045  B67-10223  06

Computer program calculates steady-state temperature distribution within plane or axisymmetric solids  
NDC-10049  B67-10224  06

Land landing couch dynamics computer program  
MSC-1210  B67-10233  06

Computer program simplifies design of rotating components of turbomachinery  
NDC-10046  B67-10235  06

Computer program samples digital data for CRT display  
MSC-999  B67-10249  01

CINDA - Chrysler Improved Numerical Differencing Analyzer computer program  
K-PS-2298  B67-10278  06

Computer program for determination of natural frequencies of closed spherical sandwich shells  
MSC-1246  B67-10279  06

Master control data handling program uses automatic data input  
K-PS-2259  B67-10280  06

Computer program predicts thermal and flow transients experienced in a reactor loss-of-flow accident  
NDC-10054  B67-10281  06

Computer program provides linear sampled-data analysis for high order systems  
K-PS-12821  B67-10287  06

Computer program determines thermal environment and temperature history of lunar orbiting space vehicles  
K-PS-12916  B67-10307  06

Computer program for mass optional solutions of some endpoint trajectory problems  
K-PS-12916  B67-10310  06

Transient Analysis Generator /TAG/ simulates behavior of large class of electrical networks  
NRO-10031  B67-10319  06

Computer program utilizes FORTRAN 4  

SUBJECT INDEX

subroutines for contour plotting  
NPO-10127  B67-10323  06

Multiple correlation computer program determines relationships between several independent and dependent variables  
K-PS-13024  B67-10327  06

Computer optimization program finds values for several independent variables that minimize a dependent variable  
K-PS-13030  B67-10328  06

Computer program resolves radiative, conductive, and convective heat transfer problems for variety of geometries  
K-PS-1910  B67-10329  06

General purpose computer programs for numerically analyzing linear ac electrical and electronic circuits for steady-state conditions  
K-PS-13094  B67-10331  06

Computer subroutine ISUDS accurately solves large system of simultaneous linear algebraic equations  
NDC-10051  B67-10344  06

Computer program VARI-QUIR 3 provides solution of steady-state, multigroup, two-dimensional neutron diffusion equations  
NDC-10052  B67-10345  06

Saturn S-2 Automatic Software System /SASS/  
K-PS-1741  B67-10405  06

Computer program for network synthesis by frequency response fit  
K-PS-12686  B67-10406  06

Earth orbit rendezvous evaluation program  
K-PS-13016  B67-10407  06

Computer program generates averaged value data tapes  
K-PS-12728  B67-10411  06

Computer program provides steady state analysis for liquid propellant propulsion systems  
MSC-10064  B67-10414  06

Computer program analyzes generalized environmental control and life support systems  
MSC-1157  B67-10415  06

Computer program FPIP-REV calculates fission product inventory for U-235 fission  
NDC-10089  B67-10450  06

Computer program MCAP-TGSS calculates steady-state fluid dynamics of coolant in parallel channels and temperature distribution in surrounding heat-generating solid  
NDC-10042  B67-10456  06

Computer program MCAP provides for steady state thermal and flow analysis of multiple parallel channels in heat generating solid  
NDC-10043  B67-10457  06

Computer program conducts facilities utilization and occupancy survey  
NDC-10326  B67-10476  06

KOPE /Kalendar Oriented Program Effort/ provides data for management decisions  
K-PS-12331  B67-10478  06

FORTRAN 4 program for two-impulse rendezvous analysis  
K-PS-13971  B67-10479  06

X-264

HIGH FREQUENCY WIDEBAND TRANSFORMER USES COAX TO ACHIEVE HIGH TURN RATIO AND FLAT RESPONSE

LOCAL MEASUREMENTS IN TURBULENT FLOWS THROUGH CROSS CORRELATION OF OPTICAL SIGNALS

VOLTAGE REGULATOR/AMPLIFIER IS SELF-REGULATED

COMPUTER PROGRAM FOR NETWORK SYNTHESIS BY FREQUENCY RESPONSE FIT

GENERAL FREQUENCY RESPONSE PROGRAM CALCULATES FREQUENCY RESPONSE OF SYSTEM, OPEN AT ANY SPECIFIED ELEMENT

DYANA - AN ADVANCED PROGRAMMING SYSTEM FOR LARGE CLASSES OF DYNAMIC AND EQUIVALENT SYSTEMS

CARDIACOMETER WITH LINEAR BEAT-TO-BEAT FREQUENCY RESPONSE

VICAR-DIGITAL IMAGE PROCESSING SYSTEM

NEW TYPE PRESSURE TRANSDUCER FOR SEVERE THERMAL ENVIRONMENTS

FREQUENCY STABILITY

Temperature-sensitive network drives astable multivibrator

Oscillator circuit measures liquid level in tanks

Electronic phase-locked-loop speed control system is stable

Damping technique gives accelerometer flat frequency response

Dielectricometer design permits measurement in vacuum under irradiation

TV synchronization system features stability and noise immunity

Design concepts using ring lasers for frequency stabilization

Hydrogen maser as a highly stable frequency reference

Glow discharge density sensor probe life is extended

Absolute frequency stabilization of laser oscillator against laser amplifier

Apparatus makes klystron operating frequency adjustable from remote point

General frequency response program calculates frequency responses of system, open at any specified element

Highly stable microwave delay line

Simple, accurate automatic frequency control circuit

FREQUENCY STANDARDS

Hydrogen maser as a highly stable frequency reference

Electronic frequency discriminator

Highly stable microwave delay line

Improved atomic resonance gas cell for use in frequency standards

FREQUENCY SYNCHRONIZATION

TV synchronization system features stability and noise immunity

FREQUENCY SYNTHESIZERS

Phase shift frequency synthesizer is efficient, small in size

An improved nuclear magnetic resonance spectrometer

Oscillator circuit operates as digitally controlled frequency synthesizer
Device enables calibration of microphones at high sound pressure levels
M-PS-11960 B67-10336 01

Flow liner extends operating life of high-angulation bellows
M-PS-12023 B67-10512 05

SUBJECT INDEX

ARG-10362  869-10767  02

GAUHY CRAWNS
Hydraulic system provides smooth control of large tracking and antenna drive systems at very low tracking rates
M-FS-10346  867-10418  05
Proposed technique for vertical alignment of a crane's cable
M-FS-16456  869-10202  05

GAPS
Spherical electrode eliminates high-voltage breakdown
LEWIS-105  865-10139  01
Shrinkable sleeve eliminates shielding gap in RF cable
WOO-207  865-10387  01
Dielectric prism would improve performance of quasi-optical microwave components
ERC-10011  867-10416  01
Journal gas bearing for curved surfaces
M-FS-20423  869-10182  05

GARNETS
Simplified technique demonstrates magnetic domain switching
M-FS-13153  867-10342  02

GAUHY ANALYSIS
Rapid helium-air analyzer can measure other binary gas mixtures
LANGT-16  863-10557  03
Plastic bags in evacuated chamber make lightweight gas sampling system
FEC-31  865-10264  01
Hot-wire detector for chemically active materials used in gas chromatography
MSC-269  866-10139  03
Subminiaturized gas chromatograph gives fast, efficient analysis
JPL-735  866-10182  01
Cold trap increases sensitivity of gas chromatography
M-FS-1617  866-10517  03
Gas chromatographic column enables analysis of propellant hydrazines
MSC-1161  866-10586  03
System automatically supplies precise analytical samples of high-pressure gases
M-FS-1814  867-10090  01

GAUHY BAGS
Vapor pressure measured with inflatable plastic bag
GSFC-281  865-10136  03

GAUHY BEARING
Elastic orifice automatically regulates gas bearings
JFL-135  863-10123  05
Pneumatic power is transmitted through air bearing
MSC-8  864-10141  05
Slit feeds reduce unbalanced torques in gas-lubricated bearings
JFL-264  865-10099  05
Air brake-dynamometer accurately measures torque
LEWIS-163  865-10312  05
Electron beam seals outer surfaces of porous bodies
M-FS-562  866-10033  03
A conceptual design for squeeze film bearings
M-FS-573  866-10226  05
Simulator effects partial gravity conditions
MSC-152  866-10339  05
Air bearing provides friction-free support for shaker system slip table
NB-0086  866-10708  05
Squeeze-film gas bearing technology
M-PS-14821  868-10180  05
Low friction servo valve
LEWIS-10647  868-10040  05
Low cost techniques for fabricating lobed bearings
LEWIS-10286  868-10041  05
Fluid power-transmitting gas bearing
ERC-10097  868-10503  05
Electronic visualization of gas bearing behavior
LEWIS-10711  869-10073  01
Journal gas bearing for curved surfaces
M-FS-20423  869-10182  05
High temperature coatings for gas bearings
LEWIS-11617  869-10200  03
Vole bearing support for high-speed rotor
NB-1035  869-10661  05

GAS CHROMATOGRAPHY
Hot-wire detector for chemically active materials used in gas chromatography
MSC-269  866-10139  03
Subminiaturized gas chromatograph gives fast, efficient analysis
JPL-735  866-10182  01
Cold trap increases sensitivity of gas chromatography
M-FS-1617  866-10517  03
Gas chromatographic column enables analysis of propellant hydrazines
MSC-1161  866-10586  03
System automatically supplies precise analytical samples of high-pressure gases
M-FS-1814  867-10090  01
Analytical technique characterizes all trace contaminants in water
MSC-11032  867-10243  03
Trace hydrazines in aqueous solutions accurately determined by gas chromatography
MSC-11222  867-10290  01
Effects of surface preparation on quality of aluminum alloy weldments
M-FS-13152  868-10302  03
Two systems developed for purifying inert atmospheres
ARG-10234  869-10026  03
Spiral-flow apparatus for measuring permeation of solids by gases
M-FS-16517  869-10357  03
Gas chromatograph injection port protective device
M-FS-18585  869-10788  03

GAS COMPOSITION
Bell nozzle kernel analysis program
M-PS-18450  869-10146  06

GAS COOLING
High-temperature, high-pressure spherical segment valve provides quick opening
ARC-13  863-10431  05
Improved cryogenic refrigeration system
JPL-731  867-10128  02

GAS DENSITY
Instrument accurately measures extremely low air densities
M-FS-193  865-10221  01
Propellant tank pressurization analysis
GAS DETECTORS

program
I-PS-1506 B67-10625 06
Magneticohydrodynamic generators using
two-phase liquid-metal flows
ARG-10168 B69-10162 01

GAS DETECTORS

Hot-wire detector for chemically active
materials used in gas chromatography
MSC-269 B66-10139 03
Subminiaturized gas chromatograph gives fast,
efficient analysis
JPL-735 B66-10162 01
Sniffer used as portable hydrogen leak
detector
I-PS-846 B66-10356 01
Portable detector set discloses helium
leak rates
I-PS-1733 B67-10065 01
Portable fixture facilitates pressure
testing of instrumentation fittings
I-PS-2032 B67-10121 03
Quartz crystals detect gas contaminants
during vacuum chamber evacuation
NPO-10144 B67-10205 01
New shield for gamma-ray spectroscopy
ANS-10386 B69-10344 02

GAS DISCHARGE TUBES

Neon isotopes cancel errors in gas laser
I-PS-1476 B66-10583 02
Design concepts using ring lasers for
frequency stabilization
I-PS-2448 B67-10143 01
Uranium isotopes quantitatively determined
by modified method of atomic absorption
spectrophotometry
I-PS-2277 B67-10145 01

GAS DISCHARGERS

Concept for cryogenic liquid reclamation
system
NPO-10322 B67-10420 02
Two-fluid, impinging-sheet injector
NPO-10547 B68-10338 05
Axisymmetric two-phase perfect gas
performance program
MSC-11774 B68-10374 06
Rapid-response, light-exposure control
system
I-PS-10236 B68-10502 01

GAS DYNAMICS

Advances in light-gas gun technology
I-PS-14270 B68-10583 02
Computer simulation of high-frequency
combustion instability and its suppression
BG-10351 B69-10368 06

GAS EVOLUTION

Plated nickel wire mesh makes superior
catalyst bed
MSC-216 B65-10321 03
A method for observing gas evolution during
plastic laminate cure
MSC-15592 B69-10530 03

GAS EXPANSION

Splice plate design assures structural
separation by mild explosive
MSC-137 B65-10166 05
Volume-ratio calibration system for vacuum
gages
Lewis-303 B66-10640 01

SUBJECT INDEX

Thermodynamic properties related to
expansion of two-component gas
MSC-1133 B67-10112 03
Development of detonation reaction engine
I-PS-19020 B67-10565 01
Axisymmetric two-phase perfect gas
performance program
MSC-11774 B68-10374 06
One-dimensional two-phase reacting gas
nonequilibrium performance program
MSC-11780 B68-10376 06
Liquid-metal-piston MHD generator
I-PS-10500 B69-10771 02

GAS EXPLOSIONS

Test instrumentation evaluates electrostatic
hazards in fluid system
I-PS-2277 B67-10185 01

GAS FLOW

Elastic orifice automatically regulates gas
bearings
JPL-135 B63-10123 05
High-pressure regulating system prevents
pressure surges
JPL-231 B63-10170 05
Low-cost insulation system for cryostats
eliminates need for a vacuum
Lewis-64 B63-10365 03
Connector for vacuum-jacketed lines cuts
tubing system cost
Lewis-66 B63-10367 05
Fine-particle filter prevents damage to vacuum
pumps
Lewis-106 B63-10489 05
Miniature oxygen-hydrogen cutting torch
constructed from hypodermic needle
JPL-545 B63-10517 05
Modified gas bearing is adjustable to optimum
stiffness ratio
I-PS-145 B64-10050 05

Blade valve isolates compartment in pipe,
opens to allow free flow
JPL-585 B64-10188 05

Apparatus measures concentration of suspended
droplets in gas streams
Langley-31 B64-10237 01

Gas diffusion cell removes carbon dioxide from
occupied airtight enclosures
MSC-118 B64-10319 03
Nitrogen dioxide produced by self-sustained
pyrolysis of nitrous oxide
Langley-32 B65-10074 05

Slit feeds reduce unbalanced torques in
gas-lubricated bearings
JPL-264 B65-10099 05

Instrument calibrates low gas-rate flowmeters
MSC-136 B65-10137 01

Fluid check valve has fail-safe feature
JPL-0019 B65-10207 05

Spiraled channels improve heat transfer between
fluids
JPL-694 B66-10291 02

Flowmeter measures low gas-flow rates
I-PS-215 B66-10336 01

Radioactive tracer system detects oil
contaminants in fluid lines
I-PS-512 B66-10090 03

GAS IONIZATION

Xenon forms stable compound with fluorine

Elimination of rocket engine asymmetric loads during tests at sea level

Diffusion of trace gases for leak detection - A study

GAS IONIZATION

Ionization vacuum gage starts quickly, is unaffected by spurious currents

Vacuum gage system for radiation environment

GAS LASERS

Neon isotopes cancel errors in gas laser

Laser Doppler flowmeter measures gas velocity

System enables more complete calibrations of dynamic-pressure transducers

Fresnel diffraction plates are simple and inexpensive

Improved gas ring laser

Repetitively pulsed, wavelength-selective carbon dioxide laser

Active frequency control system for argon FS laser

Rectangular-bore, high-gain laser plasma tube

Two-color holography

GAS-LIQUID INTERACTIONS

Mixer conditions temperature of liquified gas streams

Temperature-sensed cryogenic bleed maintains liquid state in transfer line

A rotating, noncapillary heat pipe

GAS LUBRICANTS

Journal gas bearing for curved surfaces

GAS MASERS

Hydrogen maser as a highly stable frequency reference

An improved atomic hydrogen frequency and time standard

GAS METERS

A radiometer- pyrometer

GAS DETECTORS

Rapid helium-air analyzer can measure other binary gas mixtures

Submicron holes in thin films increase sampling range of mass spectrometers

SUBJECT INDEX

Xenon forms stable compound with fluorine

Elimination of rocket engine asymmetric loads during tests at sea level

Diffusion of trace gases for leak detection - A study

Thermodynamic properties related to expansion of two-component gas

Lamp enables measurement of oxygen concentration in presence of water vapor

Program computes equilibrium normal shock and stagnation point solutions for arbitrary gas mixtures

GAS LASERS

Neon isotopes cancel errors in gas laser

Laser Doppler flowmeter measures gas velocity

System enables more complete calibrations of dynamic-pressure transducers

Fresnel diffraction plates are simple and inexpensive

Improved gas ring laser

Repetitively pulsed, wavelength-selective carbon dioxide laser

Active frequency control system for argon FS laser

Rectangular-bore, high-gain laser plasma tube

GAS METERS

A radiometer- pyrometer

GAS DETECTORS

Rapid helium-air analyzer can measure other binary gas mixtures

Submicron holes in thin films increase sampling range of mass spectrometers

X-280
Modified McLeod pressure gage eliminates measurement errors

ARC-62  B66-10481  01

Gas leak detector is simple and inexpensive

I-FS-1206  B66-10669  01

Hermetically sealed cells protected from internal gas pressure

OSP-555  B66-10692  01

Effects of helium and nitrogen as pressurants in nitrogen tetroxide transfer

MSC-924  B67-10083  03

Fixture facilitates helium leak testing of pipe welds

I-FS-2167  B67-10178  05

Porous mandrels provide uniform deformation in hydrostatic powder metallurgy

I-FS-1972  B67-10209  03

Single-source mechanical loading system produces biaxial stresses in cylinders

I-FS-12530  B67-10380  05

Analysis of dynamic systems with DAP computer program

I-FS-13999  B67-10523

Automatic transducer switching provides accurate wide range measurement of pressure differential

BUC-10001  B67-10540  01

Gas pressure in sealed electrochemical cells measured externally

GSFC-10004  B67-10551  03

Explosive-train initiated through solid bulkhead by pressure cartridge

MSC-11395  B67-10569  03

Compact monitoring and control console for pressurized gas bottles

I-FS-14874  B68-10401  05

Hydrogen flash lamps studied

ARG-10419  B69-10411  02

Calibratable solid-state pressure switch

I-FS-20474  B69-10437  05

GAS-TUBES

Characteristics of fluidized-packed beds

ARG-10049  B68-10278  03

GAS SPECTROSCOPY

A radiometer-pyrometer

LEWIS-289  B66-10606  01

GAS STEAMERS

Apparatus measures concentration of suspended droplets in gas streams

LANGLEY-31  B66-10237  01

Probe measures characteristics of hot gas stream

I-FS-240  B65-10133  02

Instrument calibrates low gas-rate flowmeters

MSC-134  B65-10137  01

Internal cooling increases range of immersion-type temperature probe

LEWIS-171  B65-10157  02

Submicron holes in thin films increase sampling range of mass spectrometers

JPL-SC-027  B66-10380  03

Multilayer refractory nozzles produced by plasma-spray process

WDC-318  B66-10611  05

Study made of Raney nickel technology

I-281

GAS TUBES

Automatic cryogenic liquid level controller is safe for use near combustible substances

LEWIS-195  B66-10882  01

GAS TRANSPORT

Grit blasting nozzle fabricated from mild tool steel proves satisfactory

I-PS-1420  B66-10597  05

GAS TUBING

Refractory metals welded or brazed with tungsten inert gas equipment

LEWIS-219  B65-10319  05

Tungsten wire and tubing joined by nickel brazing

I-FS-394  B65-10391  05

Argon purge gas cooled by chill box

I-FS-560  B66-10153  02

Large seals fabricated from small segments reduce procurement lead time

I-FS-1117  B66-10864  05

Continuous internal channels formed in aluminum fusion welds

I-PS-2399  B67-10162  01

Weld procedure produces quality welds for thick sections of Hastelloy-X

LEWIS-1002  B67-10167  05

Welding of AH350 and AM355 steel

I-FS-2314  B67-10292  05

Magnesium-lithium alloys developed for low temperature use

I-FS-1541  B67-10365  03

Protected, high-temperature connecting cable

LEWIS-1049  B67-10461  01

Dual wire weld feed proportioner

I-FS-18037  B68-10332  05

Microprobe investigation of brittle segregates in aluminum B5 and TIG welds

I-FS-14720  B68-10334  03

Effects of high frequency current in welding aluminum alloy 6061

I-FS-18337  B67-10365  03
Weld joint strength and mechanical properties in 2219-T81 aluminum alloy
LEWIS-10417 B69-10561 03
Welding skate with computerized controls
M-FS-20224 B69-10566 01
Mig welding offers advantages
M-FS-16413 B69-10454 05
Conversion of continuous-direct-current TIG welder to pulse-arc operation

Pneumatic binary encoder replaces multiple solenoid system
M-FS-665 B66-10374 01
Gas-injection valve operates at high speed
EQ-49 B66-10381 05
Modified 1cLeod pressure gage eliminates measurement errors
ABC-62 B66-10481 01
System automatically supplies precise analytical samples of high-pressure gases
M-FS-1814 B67-10090 01
Piezoelectric linear actuator
KSC-11904 B69-10469 02
Chromatographic detection and analysis of traces of hydrocarbons
KSC-10388 B69-10716 02
GAS VISCOSITY
Direct indication of particle size in fluidized beds
ABC-10130 B69-10083 05
GAS WELDING
Simple device facilitates inert-gas welding of tubes
M-FS-558 B66-10155 05
Effect of welding position on porosity formation in aluminum alloy welds
M-FS-2318 B67-10177 05
Microprobe investigation of brittle segregates in aluminum KIG and TIG welds
M-FS-14720 B68-10334 03
GASEOUS DIFFUSION
Cryogenic filter method produces super-pure helium and helium isotopes
JPL-10374 B63-10235 03
Impurity diffusion process for silicon
JPL-374 B63-10235 03
Pressure seal ring may be effective over wide temperature range

Composite gaskets are compatible with liquid oxygen, resist compression set

Rubber and alumina gaskets retain vacuum seal in high temperature EMF cell

Combination spacer and gasket provides effective static seal

Feed-thru flange is useful in vacuum applications to cryogenic temperatures

Silazane elastomer remains resilient at 400 deg C

Thin plastic sheet eliminates need for expensive plating

Combination double door high-vacuum valve provides access to vacuum chamber

Tools made of ice facilitate forming of soft, sticky materials

Inert gas spraying device aids in repair of hazardous systems

Computer circuit will fit on single silicon chip

Novel circuit combines pulse stretcher with NOR gate

Variable frequency magnetic multivibrator generates stable square-wave output

Logic circuit exhibits optimum performance

Analog-to-digital converter has increased reliability and reduced power consumption

Sensitive electrometer features digital output

Simple BCD circuit accurately counts to 24

Field effect transistor presents high input impedance in ac amplifier

Simple pulse counting circuit computes sum of squares

Nonlinear feedback reduces analog-to-digital converter error

Field-effect transistor replaces bulky transformer in analog-gate circuit

Frequency divider is free of spurious outputs

Simple circuit performs binary addition and subtraction

Queuing register uses fluid logic elements

Simplified circuit corrects faults in parallel binary information channels

Exclusive-or logic circuit has useful properties

Instrument automatically selects peak acceleration signal from several accelerometers

Solid state circuit controls direction, speed, and braking of dc motor

Security warning system monitors up to fifteen remote areas simultaneously

Multichannel pulse height analyzer is inexpensive, features low power requirements

Vibration analysis utilizing Mössbauer effect

Signal generator converts direct current to multiphase supplies

Improved circuit for measuring capacitive and inductive reactances

Unique frequency-shift-keyed demodulation system

Input gate circuit converted for use as linear amplifier

Self-correcting, synchronizing ring counter using integrated circuit devices

Electronic gating circuit and ultraviolet laser excitation permit improved dosimeter sensitivity

Parallel-to-serial biphase-data converter
High-speed camera synchronization
-PS-10662  B68-10282  02

Fluidic-thermochromic display device
BCC-10031  B68-10350  01

Circuitry selectively limits data storage in general purpose computer
GSFC-10605  B69-10121  01

Multichannel analyzers at high rates of input
ANG-10355  B69-10214  02

Linear voltage-to-frequency converter
GSFC-10546  B69-10220  01

An electronic circuit for sensing malfunctions in test instrumentation
KSC-10209  B69-10392  01

Automatic tuning of hydrogen masers
GSFC-10127  B69-10452  01

Simplified, reliable circuit sorts binary numbers in order of magnitude
NPO-10112  B69-10503  01

Pulse-code-modulation baseline correction for low signal-to-noise ratios
MSC-13268  B69-10750  01

GATES (OPENINGS)
Gate value with ceramic-coated base operates at high temperatures
ARC-23  B63-10562  03

Low-power transistorized circuit provides staircase waveform
GSFC-48  B64-10007  01

GAUSS EQUATION
Computer program VARI-QUIR provides solution of steady-state, multigroup, two-dimensional neutron diffusion equations
NWC-10052  B67-10345  06

Conditioning of pulses from aerosol-particle detectors
ZEC-10250  B69-10691  01

GEAR
Chain friction system gives positive, reversible drive
ARC-8  B63-10099  05

Self-lubricating gear
-PS-14971  B69-10408  05

GEAR TEETH
Device measures curved surface finish on gear teeth
W00-112  B65-10064  05

Rotating filters permit wide range of optical pyrometry
LANGLEY-33  B65-10100  02

Unique gear design provides self-lubrication

### GLASSWARE

| Method for X-ray study under extreme temperature and pressure conditions | M-SC-11232 | B67-10474 02 |
| Study of actinide chemistry in saturated potassium fluoride solution | ARG-10204 | B69-10004 03 |
| Control for maintaining constant level of a cryogenic liquid | NPO-11177 | B69-10573 05 |

### GLOVES

| Experiments with ceramic coatings | M-FS-10150 | B68-10355 03 |
| Double gloves reduce contamination of dry box atmosphere | LEWIS-211 | B65-10117 03 |
| Dispenser leak-tests and sterilizes rubber gloves | MUC-295 | B66-10166 03 |
| Self-contained clothing system provides protection against hazardous environments | M-FS-536 | B66-10201 05 |
| Protective clothing for workers with 5-kw and 20-kw short-arc lamps | NPO-11155 | B69-10218 01 |

### GLOW DISCHARGES

| Glow discharge density sensor probe life is extended | M-FS-1707 | B67-10299 01 |

### GLUCOSE

| Large volume continuous counterflow dialyzer has high efficiency | BQ-10055 | B67-10395 04 |
GLYCEROLS
Inhibition of browning in foodstuffs
HQ-10177  B69-10493  04

Improved conductive paste secures biomedical electrodes
MSC-107  B65-10015  03

Radiation effects on bacterial cells
ABG-10064  B68-10169  04

Development and test of flexible film coupon strips for use as a sampling technique
M-FS-20448  B69-10339  03

Sea dye marker provides visibility for 20 hours
MSC-714  B66-10313  03

Method for copper staining of germanium crystals
ABG-10403  B69-10257  03

Water-glycol system volume calculation
MSC-15193  B65-10563  02

Protective clothing for workers with 5-kW and 20-kW short-arc lamps
NPS-2049  B69-10211  01

Braze joint quality tested electromagnetically
J-FS-12795  B65-10250  03

Penetrant test device prevents weld joint damage by eliminating axial pin forces on unpotted modules
LBUIS-10201  B67-10359  01

Infrared radiometer
J-FS-13373  B67-10530  02

Inspection criteria ensure quality control of parallel gap soldering
J-FS-14530  B68-10257  05

Neutron diffractometer allows both magnetic and crystallographic analyses
ARG-10057  B68-10131  02
**GORES**

- Polycrystalline materials
- Rotating mandrel speeds assembly of plastic inflatables
- Electrical upsetting of metal sheet forms weld edge
- Composite bulkhead fabrication development
- Preformed stiffeners used to fabricate structural components for pressurized tanks

**GRADES**

- Radial furnace shows promise for growing straight boron carbide whiskers
- Grain-boundary migration in KCl bicrystals
- Surface profilometer for examining grain-boundary grooves
- Generation of sonic power during welding

**GRAIN BOUNDARIES**

- Effects of high frequency current in welding aluminum alloy 6061
- Grain-boundary migration in KCl bicrystals
- Surface profilometer for examining grain-boundary grooves
- Generation of sonic power during welding

**GRAINITY**

- Air bearing provides friction-free support for shake system slip table
- Metal flame spray coating protects electrical cables in extreme environment

**GRANULAR MATERIALS**

- Improved conductive paste secures biomedical electrodes
- Aluminum oxide filler prevents obstructions in tubing during welding
- Subminiaturized gas chromatograph gives fast, efficient analysis
- Improved thermal insulation materials made of foamed refractory oxides
- New weldable high strength aluminum alloy developed for cryogenic service

**GRAPHITE**

- Improved molybdenum disulfide-silver motor brushes have extended life
- Improved conductive paste secures biomedical electrodes
- Metal sheath improves thermocouple using graphite in one leg
- Graphite element serves as radiant heat source
- Angular glass tubing drawn from round tubing
- Boron carbide whiskers produced by vapor deposition
- Refractory coating protects intricate graphite elements from high-temperature hydrogen
- Dry film lubricant is effective at extreme loads
- Friction loading device enables accurate testing of brittle materials
- Primary cells utilize halogen-organic charge transfer complex
- Radioactive method enables determination of surface areas rapidly and accurately
- Resistance heating releases structural adhesive
- Sensing disks for slag-type calorimeters have higher temperature stability
- Modified blackbody device emits high-density radiation
- Standard surface grinder for precision machining of thin-wall tubing
- Control apparatus for spectral energy source
- Thoriated tungsten tube provides improved high temperature thermocouple sheath

**GRAPHIC ARTS**

- Disk calculator indicates legible lettering for slide projection
- Modified procedure speeds camera copy layout for offset printing
- Offset lenses add versatility to phototypesetting machine
- Instrument transmits vanishing point to illustration point
- Projection transparencies from printed material
- A polar graphic method for determining the attitude of rocket vehicles
Reaction rates of graphite with ozone measured by etch decoration
ABO-10086 B68-10101 03

Analytical techniques for determining boron in graphite
ABG-10107 B68-10102 03

Graphite cloth facilitates vacuum evaporation of silicon monoxide
M-FS-14764 B68-10256 03

Corrosion reduction of aluminum alloys in flowing high-temperature water
ABG-10244 B69-10029 03

Carbon offers advantages as implant material in human body
M-FS-18207 B68-10641 03

Analytical techniques for determining boron in graphite
ABG-10087 B68-10102 03

Graphite cloth facilitates vacuum evaporation of silicon monoxide
M-FS-14764 B68-10256 03

Corrosion reduction of aluminum alloys in flowing high-temperature water
ABG-10244 B69-10029 03

Carbon offers advantages as implant material in human body
M-FS-18207 B68-10641 03
GRavitational effects

Theory of a refined earth model  
N-FS-14679  B66-10228  02

Journal gas bearing for curved surfaces  
N-FS-20423  B66-10162  05

GUARDS (SHEILDs)

Key-locked guard prevents accidental switch actuation
MSC-419 B66-10235 05

GUIDANCE (MOTION)
Visual attitude orientation and alignment system
MSC-687 B67-10120 02
Earth orbit rendezvous evaluation program
N-PS-13016 B67-10407 06
Conceptual nonorthogonal gyro configuration for guidance and navigation
MSC-11363 B67-10433 01

Closed circuit TV system automatically guides welding arc
N-PS-20084 B68-10357 01

GUIDANCE SENSORS
The Quantasyn, an improved quantum detector
MSC-10748 B69-10443 01
Hermetically sealed vibration damper
MSC-10959 B69-10634 05
Image position sensor
N-PS-14101 B69-10783 02

GUNS (SUBSTANCES)
Sea dye marker provides visibility for 20 hours
MSC-714 B66-10313 03

GUNS
Shoulder adapter steadies spot welding gun
N-PS-321 B66-10076 05
Fingertip current control facilitates use of arc welding gun
MSC-289 B66-10092 05

GYROS
Oceanborne transponder platform has good stability
N-PS-171 B65-10035 05

Gypsum
Epoxy-resin patterns speed shell-molding of aluminum parts
N-PS-363 B65-10177 05

GYRATION
Study of high-speed angular-contact ball bearings under dynamic load
N-PS-20562 B69-10367 05

GYRATORS
Gyrator-type circuits replace ungrounded inductors
JAC-10606 B66-10084 01
Energy-storage of a prescribed impedance
N-PS-10428 B69-10431 02

GYROSCOPE FLUIDS
Improved gyro-flotation /damping/ fluids
MSC-13217 B69-10360 03

GYROSCOPES
Slit feeds reduce unbalanced torques in gas-lubricated bearings
JPL-264 B65-10099 05
Electron beam seals outer surfaces of porous bodies
N-PS-562 B66-10033 03
Developmental instrument supplies accurate attitude and attitude-rate data
HQ-57 B66-10607 01
Conceptual nonorthogonal gyro configuration for guidance and navigation
MSC-11363 B67-10433 01

Stable ac phase and amplitude comparator
N-PS-13086 B67-10459 01
Squeeze-film gas bearing technology
N-PS-14821 B68-10180 05
Laser system used for dynamic balancing of gyroes
N-PS-12218 B68-10225 05
Improved gas ring laser
MSC-11584 B68-10304 02
Compensation of pulse-rebalanced inertial instruments
MSC-13058 B68-10216 01

H

HAPHTON
High-strength tungsten alloy with improved ductility
LEWIS-10257 B67-10340 03

HAPHTON ALLOYS
New tungsten alloy has high strength at elevated temperatures
LEWIS-356 B66-10551 03

HAPHTON OXIDES
Protective coating withstands high temperature in oxidizing atmosphere
N-PS-529 B66-10084 03

HAIL
Simulated hailstone fabrication and use in testing weatherability of structures
NPO-10783 B68-10552 03

HALIDES
Welding, bonding, and sealing of refractory metals by vapor deposition
LEWIS-123 B67-10232 03
Improved high-temperature silicide coatings
LEWIS-10817 B69-10266 03
Improved gyro-flotation /damping/ fluids
MSC-13217 B69-10360 03
Improved retort for cleaning metal powders with hydrogen
LEWIS-10718 B69-10466 03
Analysis of secondary cells with lithium anodes and immobilized fused-salt electrolytes
N-PS-10452 B69-10613 01

HALL EFFECTS
System measures arc energy dissipated in relay contact cycling
N-PS-10454 B68-10312 01

HALOGEN COMPOUNDS
Xenon fluoride solutions effective as fluorinating agents
ARG-217 B67-10133 03
Fire retardant foams developed to suppress fuel fires
ARC-10098 B68-10356 03
Zone purification of potassium chloride
ARG-10377 B69-10241 03

HALOGENATION
Synthesis of various highly halogenated monomers and polyurea
N-PS-2143 B67-10100 03
Fire retardant foams developed to suppress fuel fires
ARC-10098 B68-10356 03

HALOGENS
Silazane elastomer remains resilient at 400 deg C
N-PS-1144 B66-10667 05
SUBJECT INDEX

Primary cells utilize halogen-organic charge transfer complex
JPL-926 B66-10682 02

HAMMERS
Versatile impact hand tool
H-PS-20140 B68-10371 05

HAMSTERS
Study of radiation effects on mammalian cells in vitro

M-PS-20409 B69-10108 03

Welding, brazing, and soldering handbook
M-PS-20504 B69-10264 05

Sterilization training manual
M-PS-20437 B69-10277 04

Handbook for design of containers of fluids and gases for spacecraft
M-PS-20502 B69-10279 05

Microelectronic device handbook
EMC-10322 B69-10687 01

Handbook explaining the fundamentals of nuclear and atomic physics
EMC-10330 B69-10705 02

HANDLES
Special pliers connect hose containing liquid under pressure
JPL-IT-1003 B63-10291 05

Heavy-duty staple remover operated by hand
JPL-IT-1004 B63-10292 05

Electronic assembly rack panels snap on and off
GSFC-59 B64-10121 05

Torque wrench designed for restricted areas
LEWIS-246 B66-10011 05

T-handle wrench has torque-limiting action
M-PS-2039 B66-10065 05

Fingertip current control facilitates use of arc welding gun
M-PS-289 B66-10092 05

Latching mechanism operates in limited access area
M-PS-230 B66-10338 05

Tool facilitates installation of Marmon clamps
M-PS-205 B67-10105 05

Coaxial cable stripping device facilitates RF cabling fabrication
NPO-10315 B67-10419 05

HANDLING EQUIPMENT
Filler device for handling hot corrosive materials
M-PS-85 B66-10166 03

Remotely operated clamping tool has positive grip
NU-0020 B65-10254 05

Hollow plastic hoops protect thermocouple in storage and handling
NU-0023 B65-10256 05

Dispenser leak-tests and sterilizes rubber gloves
M-PS-205 B66-10166 03

Universal transloader moves delicate equipment without stress
M-PS-654 B66-10384 05

Apparatus for fabrication of americium-beryllium neutron sources prevents capsule contamination
ARG-104 B67-10202 05

Detachable caster adapter
M-PS-91215 B69-10164 05

Proposed technique for vertical alignment of a crane’s cable
M-PS-16496 B69-10202 05

HANDEL FUNCTIONS
Analysis of transient thermal stress in heat-generating plates and hollow cylinders caused by sudden environmental temperature changes
ARG-10274 B69-10047 02

Numerical inversion of finite Toeplitz matrices and vector Toeplitz matrices
ARG-10445 B69-10415 02

HANDERS
Stringent cleaning technique assures reliable epoxy bond
GSFC-161 B64-10142 03

Epoxy blanket protects milled part during explosive forming
M-PS-307 B66-10029 03

Sprayable birefringent coating enables strain measurements on large surfaces
M-PS-1784 B66-10578 03

Flowmeter determines mix ratio for viscous adhesives
M-PS-2308 B67-10378 01
Removable preheater elements improve oxide induction furnace JPL-288 B63-10193 01

Quick-hardening problems are eliminated with spray gun modification which mixes resin and accelerator liquids during application LANGLEY-6A B63-10318 03

Boron-deoxidized copper withstands brazing temperatures N-FS-762 B66-10273 03

Quick-set temporary bonding clamps RPO-10695 B69-10406 03

Dry film lubricant is effective at extreme loads N-FS-628 B66-10256 03

Valve seat pores sealed with thermosetting monomer N-FS-900 B66-10322 03

Traveling wire electrode increases productivity of Electrical Discharge Machining /EDM/ equipment R65-136 B67-10238 05

A new method for producing optical mirrors HQ-10227 B69-10529 02

Composite bulkhead fabrication development N-FS-1264 B66-10582 05

Computer program determines chemical equilibria in complex systems LEWIS-281 B66-10671 01

**Heat Flux**

- Cantilever springs maintain tension in thermally expanded wires (LEWIS-136)
- Spiraled channels improve heat transfer between fluids (JPL-694)
- Reaction heat used in static water removal from fuel cells (M-PS-532)
- Self-contained clothing system provides protection against hazardous environments (M-PS-536)
- Closed loop operation eliminates need for auxiliary gas in high pressure pumping station (M-PS-893)
- Rotational fluid coupling eliminates hose entanglements (MSC-312)
- Coldplate of pin fin design makes efficient heat exchanger (MSC-1093)
- Tool facilitates installation of Marmo clamps (M-PS-2039)
- Development of dual solid cryogens for high reliability refrigeration system (GSFC-10188)
- Concept to comfort-condition subjects wearing restrictive clothing (MSC-10964)
- Liquid-metal heat transfer in a cocurrent-flow, double-pipe heat exchanger is investigated (MSC-10264)
- A method for predicting interfacial freezing of a liquid flowing over a cold surface (LEWIS-10813)
- Measurement of gas flow at extremely low pressures (MSC-11261)
- Cryogenic fluid flow instabilities in heat exchangers (M-PS-20438)
- Liquid-metal-piston MED generator (M-PS-15050)
- Flexible curtain shields equipment from intense heat fluxes (M-PS-48)
- Graphite element serves as radiant heat source (M-PS-105)
- Air-cured ceramic coating insulates against high heat fluxes (M-PS-150)
- Circular, explosion-proof lamp provides uniform illumination (MSC-382)
- Improved thermal insulation materials made of foamed refractory oxides (M-PS-735)
- Heat flux sensor design reduces extraneous source effects (MSC-400)
- Light-intensity modulator withstands high heat fluxes (MSC-246)

**Heat Generation**

- Study made of anodized aluminum circuit boards (M-PS-1358C)
- Computer program MCPAT-TOSS calculates steady-state fluid dynamics of coolant in parallel channels and temperature distribution in surrounding heat-generating solid (NUC-10042)
- Computer program MCPAT provides for steady state thermal and flow analysis of multiple parallel channels in heat-generating solid (NUC-10043)
- Study of thermal effects on nickel-cadmium batteries (GSFC-10003)
- Improved calorimeter provides accurate thermal measurements of space batteries (GSFC-10003A)
- Cooling of 2 kW H subscript 2 fuel cell (M-PS-13737)
- Analysis of transient thermal stress in heat-generating plates and hollow cylinders caused by sudden environmental temperature changes (ARG-10274)
- Thermal Network Analyzer Program (NUC-10540)
- Temperature-controlled resistor (NPO-10713)
Rate of heat extraction controller for environmental control

**HEAT SINKS**

Indium foil with beryllia washer improves
HEAT SOURCES

- Transistor heat dissipation
  GSFC-42  B63-10033  01

- Mounting for diodes provides efficient heat sink
  M-PS-197  B64-10283  01

- Wide-angle sensor measures radiant heat energy in corrosive atmospheres
  M-PS-228  B65-10019  05

- Automatic thermal switch accelerates cooling-down of cryogenic system
  JPL-655  B65-10068  01

- Refractory oxides evaluated for high-temperature use
  Langley-121  B65-10167  03

- Electronic modules easily separated from heat sink
  MSC-142  B65-10186  02

- Wire mesh isolator protects sensitive electronic components
  GSFC-347  B65-10216  05

- Servo calorimeter measures material heating rate
  EV-0024  B65-10247  01

- Boron nitride housing cools transistors
  W00-079  B65-10289  01

- Copper foil provides uniform heat sink path
  MSC-262  B66-10004  02

- Calorimeter accurately measures thermal radiation energy
  Langley-173  B66-10058  02

- Mounting improves heat-sink contact with beryllia washer
  MSC-194  B66-10144  01

- Jig protects transistors from heat while tinning leads
  MSC-515  B66-10240  05

- Rugged microelectronic module package supports circuitry on heat sink
  MSC-814  B66-10245  01

- Bypass rod transfers heat developed in thermionic diode
  JPL-SC-136  B66-10303  05

- Collector/collector guard ring balancing circuit eliminates edge effects
  JPL-SC-143  B66-10563  01

- Technique for measuring absorptance and emittance by using cyclic incident radiation
  Lewis-121  B66-10630  02

- Switching-type regulator circuit has increased efficiency
  MSC-1063  B67-10190  01

- Separable, high-density microelectronic module provides effective heat sink
  M-PS-13075  B67-10356  01

- Study made of anodized aluminum circuit boards
  M-PS-1350  B67-10425  01

- Aluminum heat sink enables power transistors to be mounted integrally with printed circuit board
  M-PS-13663  B67-10426  01

- Study made of transfer of heat energy through metal joints in vacuum environment
  M-PS-12534  B67-10465  02

- Plume sprayed dielectric coatings improve heat dissipation in electronic packaging
  M-PS-13569  B67-10534  01

SUBJECT INDEX

- Method of disjoining adhesively bonded electronic cordwood modules
  MSC-12060  B68-10086  01

- Transistorized Marx bank pulse circuit provides voltage multiplication with nanosecond rise-time

HEAT TRANSFER COEFFICIENTS

- Cooling of 2 kW H fuel cell N-PS-13737 B68-10544 01
- Gage measures total radiation, including vacuum UV, from ionized high-temperature gases NMP-03902 B69-10026 02
- Instabilities encountered during heat transfer to a supercritical fluid ANG-10266 B69-10042 02
- Propagation of density disturbances in air-water flow AOB-10260 B69-10043 02
- Abrasion and resistant discharge valve developed AOB-10219 B69-10044 05
- Analysis of transient thermal stress in heat-generating plates and hollow cylinders caused by sudden environmental temperature changes ANG-10274 B69-10047 02
- Liquid-metal heat transfer in a cocurrent-flow, double-pipe heat exchanger is investigated ANG-10261 B69-10091 02
- Experimental prediction of performance by superconducting cables ANG-10215 B69-10161 01
- Effect of interparticle forces on the fluidization of fine particles ANG-10264 B69-10195 03
- Ultra-high-flux heat exchanger N-PS-10135 B69-10201 02
- Improved liquid-level sensor for cryogenics ANG-10162 B69-10210 02
- Thermophysical properties of sodium ANG-10363 B69-10240 03
- Method for predicting pump cavitation performance LNWIS-10916 B69-10446 02
- A comparison of two methods of measuring particle size of Al203 produced by a small rocket motor NNO-11199 B69-10572 03
- Design of multilayer insulation systems ANG-10166 B69-10615 05
- New type pressure transducer for severe thermal environments N-PS-20208 B69-10652 01
- Engineering thermal analyzer /BETA 2/ N-PS-15055 B69-10760 06

HEAT TRANSFER COEFFICIENTS

- Thin-film gage measures low heat-transfer rates LANGLEY 205 B66-10160 01
- Wide-range instrument monitors flow rates of chemically active fluids MSC-166 B66-10205 01
- Bimetallic devices help maintain constant sealing forces down to cryogenic temperatures N-PS-600 B66-10325 02
- Computer program calculates steady-state temperature distribution within plane or axisymmetric solids NUC-10049 B67-10224 06
- CINDA - Chrysler Improved Numerical

SUBJECT INDEX

Remotely controlled system couples and decouples large diameter pipes
NU-0062 B66-10276 05
O-rings with mylar back-up provide high-pressure cryogenic seal

High pressure tube coupling requires no threads or flares

External linkage tie permits reduction in ducting system flange thickness

Adapter assembly prevents damage to tubing during high pressure tests

Shock-operated valve would automatically protect fluid systems

High pressure cryogenic liquid flow sight assembly provides streamlined flow for easy observation

Closed loop operation eliminates need for auxiliary gas in high pressure pumping station

Combustion chamber struts can be effectively transpiration cooled

Improved cryogenic refrigeration system

Line adapter provides quick disconnect under moderate side loading

A piezo-bar pressure probe

Automated tester permits precise calibration of pressure transducers from 0 to 1050 psi

High impact pressure regulator withstands impacts of over 15,000 g

Remotely operated high pressure valve protects test personnel

Radiation counting technique allows density measurement of metals in high-pressure, high-temperature environment

Segmented, arch-bound carbon seal is pressure loaded

Device enables calibration of microphones at high sound pressure levels

Soft metal plating enables hard metal seal to operate successfully in low temperature, high pressure environment

Pressure levels and pulsation frequencies can be varied on high pressure/frequency testing device

Study made of pneumatic high pressure piping materials /10,000 psi/

Reaction of steam with molybdenum is studied

Dynamic valve seal is reliable at cryogenic temperatures

Lead plated aluminum ring provides static high pressure seal for large diameter pressure vessel

Device dampens fluid pressure oscillations in vent valve

High-pressure gas facilitates calibration of turbine flowmeters for liquid hydrogen

High-torque power wrench, a concept

Performance of low pressure thermionic converters is evaluated

Computer program for high pressure real gas effects

Leakage measuring method

Abrasion and fracture testing in a high pressure hydrogen environment

High pressure real gas effects for helium and nitrogen

Effects of high pressure hydrogen on storage vessel materials

Electro-optic modulator for infrared laser using gallium arsenide crystal

Temperature or pressure controller

Instrumentation for potentiostatic corrosion studies with distilled water

Raster linearity of video cameras calibrated with precision tester

Plant respirometer enables high resolution of oxygen consumption rates

Means for improving apparent resolution of television

Surface irregularities detected by flare inspection instrument

Nondestructive testing of welds on thin-walled tubing

Magnetomotive forming for precision sizing and joining of large diameter tubes

A new method for producing optical mirrors

Miniaturized high-resolution mass/charge spectrometer /design study/
HIGH SPEED

Gauge senses depletion of lubricant in journal bearings

heavy objects
BQ-90 B67-10167 05

HYDROTHERMAL CRYSTAL GROWTH
Vapor grown silicon dioxide improves
transistor base-collector junctions
GSPC-389 B66-10091 01

HYDROXIDES

Inorganic paint is durable, fireproof, easy
to apply
GSPC-386 B65-10156 03

Chemical milling solution produces smooth
surface finish on aluminum
MSC-549 B66-10312 03

Improved fuel-cell-type hydrogen sensor
N-PS-14656 B68-10263 01

Preparation of high purity copper fluoride
by fluorinating copper hydroxylfluoride
LEWIS-10794 B69-10136 03

Cobalt improves nickel hydroxide electrodes
for batteries
LEWIS-10760 B69-10228 01

Laser action from a terbium beta-ketoenolate
at room temperature
MSC-10593 B69-10324 02

HYDROXYL COMPOUNDS

Storage-stable foambale polyurethane is
activated by heat
LANGLEY-167 B66-10111 03

Tritiated alumina serves as reagent for
self-labeling analysis
ARG-209 B67-10315 03

Syntesis of polyethers of hexafluorobenzene
and hexafluoropropenediol
N-PS-14962 B69-10636 03

HYGIENE

Health hazards of ultrafine metal and metal
oxide powders
LEWIS-10878 B69-10268 04

HYGROSCOPICITY

Dewpoint temperature inversions analyzed
ARG-10316 B69-10057 02

HYPERBOLAS

Glancing incidence telescope for far
ultraviolet and soft X-rays

Space trajectories program for IBM 7090
NPO-10125 B67-10172 06

CINDA - Chrysler Improved Numerical Differencing Analyzer computer program
M-FS-2298 B67-10278 06

Computer program for determination of natural frequencies of closed spherical sandwich shells
NRC-1246 B67-10279 06

Computer program utilizes FORTRAN 4 subroutines for contour plotting
NPO-10127 B67-10323 06

Computer programs for antenna feed system design and analysis
NPO-10359 B67-10504 06

DYANA - An advanced programming system for large classes of dynamic and equivalent systems
M-FS-12084 B67-10504 06

Computer program calculates gamma ray source strengths of materials exposed to neutron fluxes
NUC-10149 B67-10665 06

Computer program /P-1-ALS/ calculates the P-1 and P-3 transfer matrices for neutron moderation in a monatomic gas
NUC-10141 B67-10670 06

Computer program analyzes and designs supersonic wing-body combinations
ARC-10141 B68-10335 06

IBM 7094 COMPUTER

Computer program simplifies selection of structural steel columns
NU-0044 B66-10097 01

Computer program determines gas flow rates in piping systems
M-FS-443 B66-10300 01

New computer program solves wide variety of heat flow problems
M-FS-421 B66-10404 01

Subroutine allows easy computation in extended precision arithmetic
M-FS-1136 B66-10504 01

Computer routine adds plotting capabilities to existing programs
GSFC-490 B66-10511 01

Computer program performs statistical analysis for random processes
M-FS-723 B66-10525 01

Computer program simplifies transient and steady-state temperature prediction for complex body shapes
MRC-989 B66-10619 01

Computer program determines chemical composition of physical system at equilibrium
MSC-1119 B66-10670 01

Computer program determines chemical equilibria in complex systems
LAWIS-291 B66-10671 01

Computer program simulates design, test, and analysis phases of sensitivity experiments
M-FS-1496 B67-10077 01

A power-spectral-density computer program
NPO-10126 B67-10160 01

Study of dynamic response of elastic space stations
NPO-10124 B67-10169 06

Structural Analysis and Matrix Interpretive System /SAMIS/
NPO-10130 B67-10171 01

A modal combination computer program for dynamic analysis of structures
NPO-10129 B67-10217 06

Computer program calculates steady-state temperature distribution within plane or axisymmetric solids
NUC-10049 B67-10224 06

Land landing couch dynamics computer program
MSC-1210 B67-10233 06

Computer program simplifies design of rotating components of turbomachinery
NUC-10046 B67-10235 06

Master control data handling program uses automatic data input
M-FS-2259 B67-10280 06

Computer program predicts thermal and flow transients experienced in a reactor loss-of-flow accident
NUC-10054 B67-10281 06

Computer program provides linear sampled-data analysis for high order systems
M-FS-12821 B67-10287 06

Computer program uses Monte Carlo techniques for statistical system performance analysis
M-FS-2234 B67-10306 06

Computer program determines thermal environment and temperature history of lunar orbiting space vehicles
M-FS-12916 B67-10307 06

Computer program for mass optional solutions of some endpoint trajectory problems
M-FS-12976 B67-10310 06

Transient Analysis Generator /TAG/ simulates behavior of large class of electrical networks
NUC-10031 B67-10319 06

Multiple correlation computer program determines relationships between several independent and dependent variables
M-FS-13024 B67-10327 06

Computer program resolves radiative, conductive, and convective heat transfer problems for variety of geometries
M-FS-1910 B67-10329 06

General purpose computer programs for numerically analyzing linear ac electrical and electronic circuits for steady-state conditions
M-PS-13094 B67-10331 06

Computer subroutine ISUPS accurately solves large system of simultaneous linear algebraic equations
NUC-10051 B67-10344 06

Computer program FORTRAN 3 provides solution of steady-state, multigroup, two-dimensional neutron diffusion equations
NUC-10052 B67-10345 06

Earth orbit rendezvous evaluation program
M-FS-13016 B67-10407 06

Computer program generates averaged value
X-325
data tapes
I-PS-12728 B67-10411 06

Computer program provides steady state analysis for liquid propellant propulsion systems
MSC-10064 B67-10414 06

Computer program analyzes generalized environmental control and life support systems
MSC-1157 B67-10445 06

Computer program NCAF-TOSS calculates steady-state fluid dynamics of coolant in parallel channels and temperature distribution in surrounding heat-generating solid
NUC-10042 B67-10456 06

Computer program NCAF provides for steady-state thermal and flow analysis of multiple parallel channels in heat generating solid
NUC-10043 B67-10457 06

KOPP /Calendar Oriented Program Efforts/ provides data for management decisions
I-PS-12331 B67-10478 06

Numerical least-square method for resolving complex pulse height spectra
GSFC-10142 B67-10480 06

Computer program uses characteristics method for free-jet investigation
LANGLIEY-10117 B67-10490 06

Computer program performs aerothermodynamic flight test data correlation
MSC-10075 B67-10494 06

Multidimensional reaction kinetic ablation program /BEKAP/
MSC-10079 B67-10495 06

Computer programs for antenna feed system design and analysis
NPO-10359 B67-10504 06

Program computes equilibrium normal shock and stagnation point solutions for arbitrary gas mixtures
LANGLIEY-10090 B67-10509 06

Computer program performs rectangular fitting stress analysis
I-PS-13010 B67-10520 06

General frequency response program calculates frequency response of system, open at any specified element
I-PS-12817 B67-10521 06

Computerized Schedule Effectiveness Technique /SRE/ determines present and future schedule position
I-PS-13012 B67-10522 06

DYANA – An advanced programming system for large classes of dynamic and equivalent systems
I-PS-12084 B67-10524 06

Program computes zero lift wave drag of entire aircraft
LANGLIEY-10079 B67-10530 06

Computer program provides improved longitudinal response analysis for axisymmetric launch vehicles
LANGLIEY-10093 B67-10531 06

M-SAP and G-SAP neutron and gamma ray albedo model scatter shield analysis program
NUC-10126 B67-10536 06

SOC-DS computer code provides tool for design evaluation of homogeneous two-material nuclear shield
NUC-10542 B67-10537 06

Computer program calculates peripheral water injection cooling of axisymmetric subsonic diffuser
NUC-10541 B67-10543 06

Computer program ETC improves computation of elastic transfer matrices of Legendre polynomials P/0/ and P/1/
NUC-10070 B67-10566 06

Propellant tank pressurization analysis program
I-PS-1506 B67-10625 06

Computer program for Video Data Processing System /TEPS/
NPO-10042 B67-10630 06

Digital computer program predicts effects of local pressure transients on deformation and stresses in cylindrical ducts
I-PS-13058 B67-10631 06

HICON - Newton-Raphson calculus of variation with automatic transversalities
I-PS-1446E B68-10232 06

Computer program analyzes and designs supersonic wing-body combinations
ARC-10041 B67-10457 06

Computer program uses characteristics method for free-jet investigation

Aerial-image enables diagrams and animation to be inserted in motion pictures
ARG-165 B67-10398 02

Camera lens adapter magnifies image
M-PS-11955 B67-10431 02

Improved radiographic image amplifier panel
M-PS-15622 B68-10363 02

Shortened processing time technique for color industrial radiography
ARG-10235 B69-10001 02

VICAR-DEGITAL image processing system
NPO-10770 B69-10139 06

Image orthicon design concept for improved photo-scan tube
JPL-818 B67-10157 01

Electronic shutter gates image orthicon on and off
I-328
SUBJECT INDEX

IMAGE TUBES
Vibration tests on vidicons made by improved method
JPL-SC-115  B66-10042  01
Thermal neutron image intensifier tube provides bright visible radiographic pattern
ABC-120  B67-10296  02

IMAGE VELOCITY SENSORS
Plotter design simplifies determination of image sensor transfer characteristic
NPO-10164  B67-10206  01

IMAGES
Modified contour projector makes excellent contour densitometer
LANGLEY-93  B65-10084  02
Fresnel zone plate forms images at wavelengths below 1000 angstroms
GSFC-231  B65-10171  02
Improved head-controlled TV system produces high-quality remote image
ABC-128  B67-10317  01
Fluorescent photography of spray droplets using a laser light source
LWIS-10777  B69-10122  02
Improved combustion chamber optical probe
NSC-10953  B69-10142  02

IMAGING TECHNIQUES
Electro-mechanically operated camera shutter provides uniform exposure
JPL-357  B69-10227  01
Vibration tests on vidicons made by improved method
JPL-SC-115  B66-10042  02
Beam splitter used in dual filming technique
NSC-501  B66-10072  02
Screen of cylindrical lenses produces stereoscopic television pictures
NSC-273  B66-10086  02
Ultraviolet photographic pyrometer used in rocket exhaust analysis
NSC-499  B66-10095  02
Optical device enables small detector to see large field of view
WOO-253  B66-10263  02
Dot patterns provide reproducible flaw areas for study of adhesive bonds
NSC-862  B66-10367  05
Three-axis attitude and direction reference instrument has only one moving part
NSC-1019  B66-10644  01
Means for improving apparent resolution of television
H-SC-65  B67-10152  01
Design concept for improved photo-scan tube
JPL-818  B67-10157  01
Improved ultrasonic TV images achieved by use of Lamb-wave orientation technique
AMB-203  B67-10295  02
Glancing incidence telescope for far ultraviolet and soft X-rays
GSFC-10052  B67-10508  02
Electronic aperture control devised for solid state imaging system
NSC-12428  B68-10028  01
New camera tube improves ultrasonic

IMAGINATION
Focused examination of system
JPL-357  B69-10227  01
Vibration tests on vidicons made by improved method
JPL-SC-115  B66-10042  02
Thermal neutron image intensifier tube provides bright visible radiographic pattern
ABC-120  B67-10296  02

IMAGINATION LOADS
Improved inspection system
AMB-90237  B66-10088  01
Antiglare improvement for optical imaging systems
NPO-10337  B66-10090  02
Color-television medical microscopy
MSC-13086  B68-10314  01
Selective video blanking technique
NSC-20013  B69-10434  01
Imaging slitless spectrometer for X-ray astronomy
NSC-14309  B68-10546  02
Shortened procedure for obtaining reproducible copies of 35 mm color slides
KSC-09957  B68-10560  02
Selective vignetting of Type 1 X-ray telescopes
NSC-10534  B68-10676  01
System converts slow-scan to standard fast-scan TV signals
MSC-90254  B69-10748  01
Image position sensor
NSC-14101  B69-10780  02

IMMIGRATIONS
Pressure transducer 3/8-inch in size can be faired into surface
WOO-065  B64-10021  05
Accurate depth control provided for thermocouple junction locations
LANGLEY-289  B66-10632  01

IMMUNES
New rapid-curing, stable polyamide polymers with high-temperature strength and thermal stability
LWIS-10576  B69-10118  03

IMMUNES
Trace hyrazines in aqueous solutions accurately determined by gas chromatography
HSC-11222  B67-10290  03

IMPACT
Single wrench separates nuts from free-floating bolts
NUC-10013  B67-10158  05

IMPACT ACCELERATION
Kinetico-energy absorber employs frictional force between mating cylinders
LWIS-75  B63-10442  05
Improved holder protects crystal during high acceleration and impact
JPL-463  B65-10037  05
A piezo-bar pressure probe
LWIS-393  B67-10259  01

IMPACT LOADS
Epoxy blanket protects milled part during explosive forming
NSC-307  B66-10029  03
Temperature responsive valve withstands high impact loading
NPO-10186  B67-10225  05
A piezo-bar pressure probe
LWIS-393  B67-10259  01
Manual of typical low temperature

IIPACT BBSISTAUCB SUBJECT IBDBX

mechanical properties of several materials
N-PS-10331 B69-10179 03

IIPACT RESISTANCE

Improved holder protects crystal during high acceleration and impact
JPL-463 B65-10037 05

Seismometer designed for remote operation in random orientation
JPL-320 B66-10095 01

Critical parts are stored and shipped in environmentally controlled reusable container
N-PS-703 B66-10258 05

Impact and puncture resistant material protects parts free damage
MSC-747 B66-10375 05

One-piece transparent shell improves design of helmet assembly
MSC-187 B66-10390 05

High impact pressure regulator withstands impacts of over 15,000 g
WPO-10175 B67-10274 01

Damages in rolling element bearings may be detected early
HQ-10031 B67-10658 01

Thermal protective visor for entering high temperature areas
MSC-10285 B68-10277 05

IIPACT STRENGTH

Heat treatment study of aluminum casting
alloy #65
N-PS-2397 B67-10159 03

Study made of pneumatic high pressure piping materials /10,000 psi/
MSC-10133 B67-10437 03

Improved high-temperature-strength nickel-base superalloy
LEWIS-10279 B69-10352 03

A sterilizable high-impact antenna
WPO-10231 B69-10697 01

IIPACT TESTS

Break-up of metal tube makes one-time shock absorber, bars rebound
LANGLEY-1 A B63-10304 05

Analysis of problems related to slingshot shock machine high-velocity shock testing
WPO-11913 B69-10506 05

Strain-age cracking in Rene 41 alloy
N-PS-18450 B69-10605 03

IIPACT TOLERANCES

Land landing couch dynamics computer program
MSC-1210 B67-10233 06

High impact pressure regulator withstands impacts of over 15,000 g
WPO-10175 B67-10274 01

Nickel base alloy with improved stress rupture properties
LEWIS-10283 B68-10344 03

Balloon batteries, charged and heated by solar energy
GSPC-10769 B69-10585 01

IIPACTORS

Pneumatic wrench retains or discharges nuts or bolts as desired
WPO-90085 B66-10707 05

Air sampler collects and protects minute particles
HQ-10037 B67-10661 01

Versatile impact hand tool
N-PS-20140 B66-10371 05

IMPEDANCE

Transistorized trigger circuit is frequency-controllable
GSPC-11 B63-10553 01

High-pass RF coaxial filter rejects dc and low frequency signals
GSPC-73 B66-10173 01

Bandwidth switching is transient-free, avoids loss of loop lock
WPO-054 B64-10349 01

Circuit improvement produces monostable multivibrator with load-carrying capability
GSPC-34A B65-10011 01

Helical coaxial-resonator makes excellent RF filter
GSPC-243 B65-10012 01

Zener diode function generator requires no external reference voltage
JPL-0031 B65-10013 01

Photoelectric semiconductor switch operates with low level inputs
JPL-SC-068 B65-10033 01

Microparticle impact sensor measures energy directly
GSPC-252 B65-10048 01

Zener diode is starter for transistor regulated power supply
WPO-0015 B65-10052 01

Vibrating-seabase electrometer has high conversion gain
ARC-38 B65-10056 01

Synchronized pulse generator needs no external power
GSPC-274 B65-10072 01

Tiny biomedical amplifier combines high performance, low power drain
ARC-41 B65-10203 01

Electrometer preamplifier has drift correction feedback
JPL-SC-074 B65-10267 01

Zener diode controls switching of large direct currents
MSC-188 B65-10350 01

Remote preamplifier circuit maintains stability over wide temperature range
WPO-278 B66-10432 01

Miniature electrometer preamplifier effectively compensates for input capacitance
ARC-69 B66-10549 01

MOSFET analog memory circuit achieves long duration signal storage
N-PS-860 B66-10603 01

Transistor biased amplifier minimizes diode discriminator threshold attenuation
ARG-163 B67-10311 01

Field effect transistors improve buffer amplifier
N-PS-916 B67-10334 01

Multiplexer uses insulated gate-field effect transistors
N-PS-13096 B67-10396 01

Silicon strain sensors enable pressure measurement at cryogenic temperatures
N-PS-14703 B68-10262 01

Impurities

- Ceramic materials purified by experimental method
- Impurity diffusion process for silicon semiconductors is fast and precise
- Portable self-powered device detects internal flaws in tubular structures
- Trace levels of metallic corrosion in water determined by emission spectrography
- Simplified method introduces drift fields into cells
IN-FLIGHT MONITORING

Status of ultrachemical analysis for semiconductors
N-PS-2294 B67-10138 03

Trace hydrazines in aqueous solutions accurately determined by gas chromatography
MSC-11222 B67-10250 03

Process control introduction of selected impurities into semiconductor wafers
GSFC-523 B67-10303 01

Spectrographic analysis of bismuth-tin eutectic alloys by spark-ignited low-voltage ac-arc excitation
ARG-10288 B69-10081 03

Silicon carbide diode for increased light output
K-PS-20063 B69-10096 01

Improved method of fabricating planar gallium arsenide diodes
XMP-04235 B69-10271 01

Improved retort for cleaning metal powders with hydrogen
LEWIS-10718 B69-10468 03

Rectilinear display gives acceleration load factor and velocity information
USC-1045 B67-10248 01

Illuminated display panel is easily changed
MSC-1045 B67-10248 01

Improved carbon electrode reduces arc sputtering
MSC-219 B66-10003 05

Silicon solar cell monitors high temperature furnace operation
NOC-10163 B68-10148 01

Occulting-filter method for obtaining flashing-light visibility data
MSC-13097 B69-10167 02

Testing the flammability of materials exposed to arcs
MSC-15223 B69-10531 03

INCIDENCE

Simple control device senses solar position
JPL-638 B65-10061 01

Glancing incidence telescope for far ultraviolet and soft X-rays
GSFC-10052 B67-10508 02

Plastic shoe facilitates ultrasonic inspection of thin wall metal tubing
NOC-10010 B67-10542 02

INCIDENT RADIATION

Technique for measuring absorptance and existance by using cyclic incident radiation
LEWIS-321 B66-10630 02

Fast-acting calorimeter measures heat output of plasma gun accelerator
LEWIS-388 B67-10192 01

Uranium isotopes quantitatively determined by modified method of atomic absorption spectrophotometry
ARG-210 B67-10236 03

Ellipsoidal-mirror reflectometer accurately measures infrared reflectance of materials
GSFC-566 B67-10444 01

Optometric system facilitates colorimetric and fluorometric measurements

Precision capacitor has improved temperature and operational stability
ARG-189 B67-10313 01
Conceptual nonorthogonal gyro configuration for guidance and navigation
BSC-11933 B67-10433 01
Transistor sensor development
M-PS-13370 B67-10471 01
Low cost SCR lamp driver indicates contents of digital computer registers
GSFC-10221 B67-10656 01
Reflectometer for receiver input system
NPO-10843 B67-10657 01
Dampers in rolling element bearings may be detected early
HG-10031 B67-10658 01
Detection and location of metallic objects imbedded in nonmetallic structures
M-PS-14790 B68-10183 01
Automatic, nondestructive test monitors in-process weld quality
M-PS-14996 B68-10333 01

SUBJECT INDEX

Superconductive thin film makes convenient liquid helium level sensor
LANGLEY-10289 B69-10341 01
Remotely operated gripper provides vertical control rod movement
ARG-10560 B69-10589 05
Low-cost voltage-level detector
LEWIS-10685 B69-10217 01
Leakage tester for flat conductor cable connector
K-PS-20427 B69-10284 05
Identification of thermostate material
M-PS-18540 B69-10356 01
Battery charge-discharge controller
BSC-11836 B69-10747 01

INDICATORS

Test strips detect different CO2 concentrations in closed compartments
KSC-210 B65-10390 03
Conceptual apparatus for detecting leaks of nonconductive liquids
M-PS-14713 B68-10303 01

INDIUM

Indium foil with beryllia washer improves transistor heat dissipation
GSFC-82 B69-10031 01
Mounting for diodes provides efficient heat sink
M-PS-197 B68-10283 01
Mounting improves heat-sink contact with beryllia washer
M-PS-194 B66-10144 01
Environmental study of miniature slip rings
M-PS-2443 B67-10210 05
Practical new method of measuring thermal-neutron fluence
NPO-10086 B67-10352 02
Neutrons detector simultaneously measures fluence and dose equivalent
ARG-10071 B67-10597 02
Indium adhesion provides quantitative measure of surface cleanliness
SAN-10024 B68-10342 01

INDIUM ALLOYS

Gallium alloy films investigated for use as boundary lubricants
LEWIS-245 B66-10165 03
Cryogenic seal remains leak tight during thermal displacement
BSC-96 B67-10134 02

INDUCTANCE

Tiny sensor-transmitter can withstand extreme acceleration, given digital output
ARC-22 B65-10561 01
Simple circuit produces high-speed, fixed duration pulses
GSFC-285 B65-10228 01
Increased junction lead inductance ballasts high-frequency transistors
GSFC-387 B65-10259 01
Large capacitor provides a distributed parameter pulse line
LEWIS-176 B66-10291 01
Improved circuit for measuring capacitive and inductive reactances
M-PS-13083 B67-10513 01

Roebius resistor is noninductive and

**INFRARED DETECTORS**

- Infrared television used to detect hydrogen fires
  - B69-10184
Infrared radiometer
Development of dual solid cryogens for high reliability refrigeration system

Photoelectric sensor output controlled by eyeball movements

PTFE-aluminum films serve as neutral density filters

Infrared television used to detect hydrogen fires

Thin film thermal detector

Inexpensive infrared source improvised from flashlight

Infrared viewing permits human iris response studies

An infrared television system for hydrogen flame detection

Electro-optic modulator for infrared laser using gallium arsenide crystal

Repetitively pulsed, wavelength-selective carbon dioxide laser

Surface temperature mapping with infrared photographic pyrometry

IR-transmission glasses formed from oxides of bismuth and tellurium

Infrared shield facilitates optical pyrometer measurements

Wedge immersed thermistor bolometer measures infrared radiation

Inexpensive infrared source improvised from flashlight

Optical gyro pickup operates at cryogenic temperatures

High-speed furnace uses infrared radiation for controlled brazing

Gimbaled-mirror scanning system capable of spiral pattern

Optical integrating sphere operates at visible and infrared wavelengths

Standards for compatibility of printed circuit and component lead materials

Automatic, nondestructive test monitors in-process weld quality

Surface temperature mapping with infrared photographic pyrometry

Method for copper staining of germanium crystals

Thermal calibration target

Radiometric temperature reference

Multichannel spectroscopy guide

Spacecraft Thermal Radiation Environment Computer Program

Inexpensive infrared source improvised from flashlight

Optical video pickoff operates at cryogenic temperatures

Gimbaled-mirror scanning system capable of spiral pattern

A ceramic composite thermal insulation

Solid-state switching used to speed up capacitive integrator

Twin helix system produces fast scan in infrared detector

IR vidicon scanner monitors many test points

Gimbaled-mirror scanning system capable of spiral pattern

Calculation of infrared spectral transmittances of inhomogeneous gases

Study made of far infrared spectra of silicate minerals

Xenon fluorides show potential as fluorinating agents

Detection of molecular infrared spectra

Multilayer infrared beamsplitter film system

Molecular radiation - its application in physical measurements and analyses

Infrared spectrophotometers

Infrared spectroscopy
Automatic gain control circuit handles wide input range
MSC-166  B66-10089  01

Electropneumatic transducer automatically limits actuator current
LEWIS-253  B66-10160  01

Offset lenses add versatility to phototypesetting machine
EQ-9   B66-10173  02

Electronic circuit provides accurate sensing and control of dc voltage
RU-9089  B66-10591  01

MOSFET analog memory circuit achieves long duration signal storage

Transistor biased amplifier minimizes diode discriminator threshold attenuation
ARG-163  B66-10311  01

Field effect transistors improve buffer amplifier
M-FS-916  B67-10334  01

Limit circuit prevents overdriving of operational amplifier
NUC-10082  B67-10343  01

Digital-to-analog converter operates from low level inputs
JPL-907  B67-10357  01

Circuit automatically calibrates flowmeter against liquid-level gage reference
M-FS-2194  B67-10376  01

Algebraic Monte Carlo procedure reduces statistical analysis time and cost factors
M-FS-1887  B67-10434  01

Material fatigue data obtained by card-programmed hydraulic loading system
LANGLEY-10042  B67-10491  03

Input gate circuit converted for use as linear amplifier
M-FS-14265  B68-10015  01

Tool reconstructs data input points corresponding to first order output graph
M-FS-10003  B68-10158  02

Parallel-to-serial biphase-data converter
MSC-11600  B68-10241  01

Self-starting circuit for switching regulators
LEWIS-10686  B69-10128  05

MAGITY - Program for calculating velocities in magnified region of turbo machines
LEWIS-10789  B69-10132  06

Encode/Decode facility for FORTRAN
ARG-10335  B69-10169  06

Magnetically coupled emission regulator
GSFC-10056  B69-10213  01

Multichannel analyzers at high rates of input
ABO-10355  B69-10218  02

Low-cost voltage-level detector
LEWIS-10885  B69-10217  01

Simplified system displays complex curves corresponding to input data
EQ-10073  B69-10247  01

Root-cubing and general root-powering methods for finding zeros of polynomials
ARG-10444  B69-10424  02

Special purpose computer provides programmable digital filter for sampled-data control systems
M-FS-20290  B69-10454  06

Live-timer method of automatic dead-time correction for precision counting
ABO-10478  B69-10612  01

COGENT programming manual
ABO-10463  B69-10656  06

INPUT/OUTPUT ROUTINES
Human transfer functions used to predict system performance parameters
LANGLEY-203  B66-10379  01

System monitors discrete computer inputs
M-FS-1021  B66-10389  01

Polynomial manipulator AP-168
MSC-1231  B67-10103  01

Structural Analysis and Matrix Interpretive System /SAMIS/
ABO-10130  B67-10171  01

Computer program simulates physical systems by solving the simultaneous differential equations describing the systems
NUC-10049  B67-10193  06

An conceptual, parallel operating data compression processor
NUO-10068  B67-10204  01

Master control data handling program uses automatic data input
M-FS-2259  B67-10280  06

Computer program calculates gamma ray source strengths of materials exposed to neutron fluxes
NUC-10143  B67-10665  06

Reducing quantizer deadband with a range switching digital filter
M-FS-20419  B69-10259  01

JPL lookangle program
MSC-13179  B69-10370  06

Wide-band doubler and sine wave quadrature generator
ABO-11133  B69-10383  01

Simplified, reliable circuit sorts binary numbers in order of magnitude
NUO-10112  B69-10503  01

INSECTS
Investigation of temperature dependence of development and aging
ABO-10145  B69-10022  04

INSERTION LOSS
Improved insertion-loss tester
JPL-358  B64-10080  01

Microwave technique measures plasma characteristics
LANL-134  B65-10122  02

Composite filter steepens rejection slopes in microwave application
GSFC-480  B66-10393  01

Low-loss C-band parasitic probe
KSC-09348  B69-10251  01

A compact rotary vane attenuator
NUO-10562  B69-10427  01

I-339
Rotary antenna attenuator
NFO-10648 B69-10502

Gate valve with ceramic-coated base operates
at high temperatures
ARC-23 B63-10562

Expandable insert serves as screw anchor
MSC-301 B66-10132

Insert sleeve prevents tube soldering
contamination
MSC-552 B66-10238

Study made to control depth of potting
compound for honeycomb sandwich fasteners
LEWIS-370 B66-10677

An improved nuclear magnetic resonance
spectrometer
JPL-762 B67-10234

Flared-tube fittings with replaceable seat
inserts
MSC-15372 B69-10519

An electrical connector pin protector
MSC-15660 B69-10742

Crack detection method is safe in presence of
liquid oxygen
M-FS-236 B65-10107

Surfactant for dye-penetrant inspection is
insensitive to liquid oxygen
M-FS-475 B66-10131

Ultrasonic recording scanner used for
nondestructive weld inspection
M-FS-284 B66-10220

Ultrasonic quality inspection of bonded
honeycomb assemblies is automated
MSC-829 B66-10546

System enables dimensional inspection of
very large structures
M-FS-2477 B67-10218

Improved ultrasonic TV images achieved by
use of Lamb-wave orientation technique
ARG-203 B67-10295

Thermal neutron image intensifier tube
provides brightly visible radiographic
patterns
ARG-120 B67-10296

Low-energy gamma ray inspection of brazed
aluminum joints
MSC-1189 B67-10337

Test and inspection for process control of
monolithic circuits
M-FS-13084 B67-10507

Plastic shoe facilitates ultrasonic
inspection of thin wall metal tubing
MUC-10010 B67-10542

Connector shorting cap provides pin
alignment, inspection, and stray voltage
protection
M-FS-13111 B67-10635

Optical system facilitates inspection of
printed circuit boards
GSPC-07971 B68-10021

New camera tube improves ultrasonic
inspection system
ARG-90237 B68-10088

Inspection criteria ensure quality control
of parallel gap soldering
M-FS-14530 B68-10257

Training manuals for nondestructive testing
using magnetic particles
M-FS-20187 B68-10391

Reidentifying hardware after loss of serial
number
M-FS-18133 B69-10059

Improved combustion chamber optical probe
MSC-10953 B69-10142

Surface irregularities detected by flare
inspection instrument
M-FS-20157 B69-10152

Instrumentation for nondestructive testing
of composite honeycomb materials
M-FS-20405 B69-10366

Low-cost tool minimizes damage to O-rings
during installation
MSC-140 B65-10116

Micro miniature thermocouple monitors own
installation
M-FS-1111 B66-10463

Pressure probe compensates for dimensional
tolerance variations
LEWIS-302 B66-10599

Thermocouples easily installed in hard-to-
get-to places
M-FS-1986 B66-10653

Tool facilitates installation of Marson
clamps
M-FS-2039 B67-10105

Application of distorted models in
developing scaled structural models
M-FS-2540 B67-10321

Vacuum jacketed transfer line installation
technique
M-FS-14896 B68-10125

Two-axis winch installer for heavy ducts
in confined space
M-FS-14254 B69-10062

Low-cost, fast-response drive circuit for
electromagnetic torque motors
LEWIS-10143 B68-10386

Coincident switch closing reduces error in
motor-driven timer
JPL-182 B63-10143

Computer program determines performance
efficiency of remote measuring systems
M-FS-1137 B66-10503

Instrument quickly transposes
ground reference
target to eye level
MSC-275 B66-10061

Seismometer designed for remote operation in
random orientation
JFL-320 B66-10085

Mount enables precision adjustment of
optical-instrumentation mirror
MSC-184 B66-10199

Three-axis attitude and direction reference
instrument has only one moving part
M-FS-1819 B66-10644

Improved ultrasonic TV images achieved by

Monopole mass spectrometer with improved sensitivity and reduced background
EQ-10476 B69-10666 01

ION CHARGER

Thin film thermal detector
JPL-943 B67-10505 01
SUBJECT INDEX

ION CURRENTS
- Cold cathode ionization gage has rigid metal housing
  GSPC-445  B66-10041  01

ION DENSITY (CONCENTRATION)
- New apparatus increases ion beam power density
  LEWIS-73  B63-10440  01
- A continuously operating source of vacuum ultraviolet below 500 angstrom
  GSPC-545  B66-10576  01
- Thin film thermal detector
  JPL-943  B67-10505  01
- Spherical ion source
  WIP-08888  B69-10186  01
- Ion mass spectrometer for special uses
  HG-10418  B69-10510  02

ION EMISSION
- New apparatus increases ion beam power density
  LEWIS-73  B63-10440  01
- Suppressor plate eliminates undesired arcing during electron beam welding
  N-PS-1126  B66-10337  05
- Detecting hydrogen-containing contaminants on metal surfaces
  N-PS-20456  B69-10192  03

ION ENGINES
- New apparatus increases ion beam power density
  LEWIS-73  B63-10440  01
- Apparatus measures very small thrusts
  WOO-048  B64-10284  05
- Wire winding increases lifetime of oxide coated cathodes
  LEWIS-154  B65-10032  03
- Wire bundle formed into grids with minute interstices
  WOO-089  B65-10372  03
- Study made of destructive sectioning of complex structures for examination
  LEWIS-341  B66-10676  05
- High power dc/dc and dc/ac electrical power conversion techniques developed
  N-PS-13227  B67-10350  01
- Reducing bubbles in glass coatings improves electrical breakdown strength
  LEWIS-10278  B68-10214  03
- Glass coated single grid for charged particle acceleration
  LEWIS-10106  B68-10215  03
- Full wave dc-to-dc converter using energy storage transformers
  LEWIS-10375  B69-10140  01
- Precise gimballing mechanism
  HG-11057  B69-10270  01

ION EXCHANGE MEMBRANE ELECTROLYTES
- Improved inorganic ion exchange membranes
  LEWIS-10737  B69-10451  03

ION EXCHANGE RESINS
- Nitric acid-organic mixtures surveyed for use in separation by anion exchange methods
  ARG-10065  B66-10425  03

ION EXCHANGING
- Iod exchange determines iodine-131 concentration in aqueous samples
  ARG-208  B67-10129  04
- Improved fuel-cell-type hydrogen sensor
  M-PS-14656  B68-10263  01

ION EXCITATION
- Nitric acid-organic mixtures surveyed for use in separation by anion exchange methods
  ARG-10065  B66-10425  03
- Separation of the rare earths by anion-exchange in the presence of lactic acid
  ARG-10436  B69-10377  03
- Novel multipurpose timer for laboratories
  ARG-10147  B69-10410  01

ION EXTRACTION
- Ion-retarding lens improves the abundance sensitivity of tandem mass spectrometers
  ARG-10341  B69-10168  03

ION EMISSION
- Complex surfaces plated by thin-film deposition in one operation
  ARG-10147  B69-10006  05
- Hydrogen peroxide etching proves useful for germanium
  ARG-10170  B68-10545  03

ION EMISSION
- High-temperature thermionic emission microscope
  WPO-10584  B68-10516  01

ION EXCITATION
- Ion pump provides increased vacuum pumping speed
  NRO-13  B65-10239  02
- Method for x-ray study under extreme temperature and pressure conditions
  MSC-11232  B67-10474  02

ION SCATTERING
- Electrochemical study of aluminum corrosion in boiling high purity water
  ARG-10306  B69-10033  03

ION SOURCES
- New apparatus increases ion beam power density
  LEWIS-73  B63-10440  01
- Magnetically coupled emission regulator
  GSPC-10056  B69-10213  01
- Miniaturized high-resolution mass/charge spectograph /design study/
  MSC-13279  B69-10554  02

IONIC MOBILITY
- Junction membrane battery separator
  WPO-10591  B69-10501  03

IONIC REACTIONS
- Improved fuel-cell-type hydrogen sensor
  M-PS-14656  B68-10263  01

IONIZATION
- Rapid helium-air analyzer can measure other binary gas mixtures
  LANDLEY-16  B63-10557  03
- Magnetic field controls carbon arc tail flame
  MSC-139  B65-10108  01
- Radon gas, useful for medical purposes, safely fixed in quartz
  ARG-2  B66-10468  04
- Complex surfaces plated by thin-film deposition in one operation
  ARG-10147  B67-10006  05
- Primary cell uses neither liquid nor fused electrolytes
  WPO-10001  B67-10275  01
- Self-discharge in bimetallic cells

IONIZATION
**IONIZATION CHAMBERS**

- Aluminaized thin-window proportional-counter tube is stronger, more responsive in long wavelength region.
  - JPL-689
  - B67-10015

- Gage measures total radiation, including vacuum UV, from ionized high-temperature gases.
  - EM-00902
  - B69-10028

**IONIZATION CHAMBERS**

- Handbooks explaining the fundamentals of nuclear and atomic physics.
  - MRC-10330
  - B69-10705

- Ion chambers simplify absolute intensity measurements in the vacuum ultraviolet.
  - MRC-10
  - B66-10439

- Logarithmic current simulator generates electrical currents accurately between 10^-11 and 10^-3 ampere.
  - NU-0087
  - B65-10156

- Precision capacitor has improved temperature and operational stability.
  - ARG-189
  - B67-10313

- Fast framing cameras provide high-speed multi-channel data recording.
  - ARG-10252
  - B69-10102

- Circuit counts pulses and indicates time of occurrence of slow pulses.
  - XNP-06234
  - B69-10313

- Accurate nine-decade temperature-compensated logarithmic amplifier.
  - ARG-10480
  - B69-10429

**IONIZATION GAGES**

- Precision gage measures ultrahigh vacuum levels.
  - GSFC-114
  - B63-10597

- Ionization vacuum gage starts quickly, is unaffected by spurious currents.
  - JPL-304
  - B65-10036

- Cold cathode ionization gage has rigid metal housing.
  - GSFC-445
  - B66-10041

- Rod and dish cathode improves penning-type vacuum gage.
  - ARG-447
  - B66-10082

- Volume-ratio calibration system for vacuum gages.
  - LEWIS-303
  - B66-10640

- Electron multiplier has improved performance and stability.
  - GSFC-346
  - B67-10060

- Solar X-ray spectrum reproduced in vacuum.
  - MSC-228
  - B67-10164

- Vacuum gage system for radiation environment.
  - LEWIS-10797
  - B69-10156

- Automated measurement of thermal conductivity.
  - M-FS-2045a
  - B69-10283

**IONIZATION POTENTIALS**

- High-intensity flashing beacon powered by mercury cells.
  - LANGLEY-80
  - B65-10361

- Spherical ion source.
  - XNP-08898
  - B69-10186

- Pulse protects circuit from voltage and current overloads.
  - MSC-12135
  - B69-10490

**IONIZED GASES**

- Highly sensitive solids mas spectrometer uses inert-gas ion source.
  - MRC-11
  - B66-10114

**IONIZATION RADIATION**

- Inorganic paint is durable, fireproof, easy to apply.
  - GSFC-366
  - B65-10156

- Irradiation improves properties of an aromatic polymer.
  - LANGLLEY-115
  - B65-10164

- Polymer film exhibits thermal and radiation stability.
  - LANGLLEY-100
  - B66-10043

- Review of physics, instrumentation and dosimetry of radioactive isotopes.
  - ARG-10037
  - B67-10640

**IONS**

- Sodium perxenate permits rapid oxidation of manganese for easy spectrophotometric determination.
  - ARG-262
  - B67-10421

- Fuel cell life improved by metallic sinter activation after electrode assembly welding.
  - MSC-10965
  - B66-10436

**IONIZATION VACUUM GADES**

- Talking gage system for radiation environment.
  - LEWIS-10797
  - B69-10156

- Primary radial yields in pulse irradiated alkaline aqueous solution.
  - ARG-10322
  - B69-10167

- Production of solvated electrons.
  - ARG-10486
  - B66-10430

- Pulse-height defect due to electron interaction in dead layers of Ge/Li/gamma-ray detectors.
  - ARG-10362
  - B69-10767

**TOTIONS**

- Gammadation improves properties of thin film dielectrics.
  - ARG-10486
  - B66-10430

- Ionization vacuum gage starts quickly, is unaffected by spurious currents.
  - JPL-304
  - B66-10430

- Rod and dish cathode improves penning-type vacuum gage.
  - GSPC-445
  - B69-10430

- Volume-ratio calibration system for vacuum gages.
  - LEWIS-303
  - B66-10640

- Electron multiplier has improved performance and stability.
  - GSFC-346
  - B67-10060

- Solar X-ray spectrum reproduced in vacuum.
  - MSC-228
  - B67-10164

- Vacuum gage system for radiation environment.
  - LEWIS-10797
  - B69-10156

- Automated measurement of thermal conductivity.
  - M-FS-2045a
  - B69-10283

**IONIZATION CHAMBERS**

- Ionization vacuum gage starts quickly, is unaffected by spurious currents.
  - JPL-304
  - B65-10036

- Cold cathode ionization gage has rigid metal housing.
  - GSFC-445
  - B66-10041

- Rod and dish cathode improves penning-type vacuum gage.
  - ARG-447
  - B66-10082

- Volume-ratio calibration system for vacuum gages.
  - LEWIS-303
  - B66-10640

- Electron multiplier has improved performance and stability.
  - GSFC-346
  - B67-10060

- Solar X-ray spectrum reproduced in vacuum.
  - MSC-228
  - B67-10164

- Vacuum gage system for radiation environment.
  - LEWIS-10797
  - B69-10156

- Automated measurement of thermal conductivity.
  - M-FS-2045a
  - B69-10283

**IONIZATION POTENTIALS**

- High-intensity flashing beacon powered by mercury cells.
  - LANGLEY-80
  - B65-10361

- Spherical ion source.
  - XNP-08898
  - B69-10186

- Pulse protects circuit from voltage and current overloads.
  - MSC-12135
  - B69-10490

**IONIZED GASES**

- Highly sensitive solids mass spectrometer uses inert-gas ion source.
  - MRC-11
  - B66-10114

**IONIZATION RADIATION**

- Inorganic paint is durable, fireproof, easy to apply.
  - GSFC-366
  - B65-10156

- Irradiation improves properties of an aromatic polymer.
  - LANGLLEY-115
  - B65-10164

- Polymer film exhibits thermal and radiation stability.
  - LANGLLEY-100
  - B66-10043

- Review of physics, instrumentation and dosimetry of radioactive isotopes.
  - ARG-10037
  - B67-10640

- Experimental study and evaluation of radioprotective drugs.
  - ARG-10322
  - B69-10167

- Rate constants measured for hydrated electron reactions with peptides and proteins.
  - ARG-10155
  - B66-10424

- Readout system for radiation detector.
  - BSC-90180
  - B66-10501

- Vacuum gage system for radiation environment.
  - LEWIS-10797
  - B69-10156

- Primary radial yields in pulse irradiated alkaline aqueous solution.
  - ARG-10322
  - B69-10167

- Production of solvated electrons.
  - ARG-10486
  - B66-10430

- Pulse-height defect due to electron interaction in dead layers of Ge/Li/gamma-ray detectors.
  - ARG-10362
  - B69-10767

**IONS**

- Sodium perxenate permits rapid oxidation of manganese for easy spectrophotometric determination.
  - ARG-262
  - B67-10421

- Fuel cell life improved by metallic sinter activation after electrode assembly welding.
  - MSC-10965
  - B66-10436

- Ion plating technique improves thin film deposition.
  - SAN-10006
  - B68-10212

- Pulsed high-voltage dc RF sputtering.
  - LEWIS-10920
  - B69-10699

**X-RAYS**

- Intergalactic metal phase increases thermal shock resistance of ceramic coating.
  - M-FS-1062
  - B66-10651

**TRIGS (MECHANICAL APERTURES)**

- Variable light source with a million-to-one intensity ratio.
  - JPL-WOO-008
  - B63-10424

- Camera shutter is actuated by electric signal.
  - ARC-20
  - B66-10212

- Iris-leaf core retainer for a surface drill.
  - MSC-11402
  - B69-10496
Modified filter prevents conduction of microwave signals along high-voltage power supply leads. JPL-63

Fine-mesh screen made by simplified method. WOO-104

Submicron metal powders produced by ball milling with grinding aids. LEWIS-188

Hollow spherical rotors fabricated by electroplating. JPL-SC-117

A continuously operating source of vacuum ultraviolet below 500 angstrom. GSPC-545

Zirconia alloys with small amounts of iron and copper or nickel show improved corrosion resistance in superheated steam. ABS-226

RF inductor has high Q, is stable at higher temperatures. JPL-1019

Iron serves as diffusion barrier in thermally regenerative galvanic cell. ARG-29

Simplified technique demonstrates magnetic domain switching. E-FS-13153

Eddy current probe measures size of cracks in nonmetallic materials. E-FS-18009

High-emittance coatings on metal substrates. LEWIS-10325

Improved ferrous shielding for flat cables. E-FS-19524

Electron interaction in matter. E-FS-18886

Iron alloy improved variable-reluctance transducer measures transient pressures. LANGLLEY-10

Gage of 6.5 per cent Si-Fe sheet is chemically reduced. SSC-537

Process yield Co-Fe alloys with superior high temperature magnetic properties. LEWIS-333

Study reveals effect of aluminum on saturation moment of Fe-Ni alloys. ARG-90259

Inspection criteria ensure quality control of parallel gap soldering. E-FS-14530

Handbook for design of containers of fluids and gases for spacecraft. E-FS-20502

Crack detection method is safe in presence of liquid oxygen. E-FS-236

Imprinting of confining sites for cell cultures on thermoplastic substrates. LANGLLEY-10495

New class of compounds have very low vapor pressures. ARG-115

Ceric and ferrous dosimeters show precision for 50-5000 rad range. ARG-10173

Separation technique provides rapid quantitative determination of cesium-137 in irradiated nuclear fuel. NUC-10047

Cryogenic filter method produces super-pure helium and helium isotopes. JPL-374

Separation technique provides rapid quantitative determination of cesium-137 in irradiated nuclear fuel. NUC-10194

Cryogenic filter method produces super-pure helium and helium isotopes. JPL-374

The thermodynamic properties of the wustite phase are studied. ARG-10200

Electron interaction in matter. I-FS-14886

Improved variable-reluctance transducer measures transient pressures. LANGLLEY-10

Improved variable-reluctance transducer measures transient pressures. LANGLLEY-10

Gage of 6.5 per cent Si-Fe sheet is chemically reduced. SSC-537

Process yield Co-Fe alloys with superior high temperature magnetic properties. LEWIS-333

Study reveals effect of aluminum on saturation moment of Fe-Ni alloys. ARG-90259

Inspection criteria ensure quality control of parallel gap soldering. E-FS-14530

Handbook for design of containers of fluids and gases for spacecraft. E-FS-20502

Crack detection method is safe in presence of liquid oxygen. E-FS-236

Imprinting of confining sites for cell cultures on thermoplastic substrates. LANGLLEY-10495

New class of compounds have very low vapor pressures. ARG-115

Ceric and ferrous dosimeters show precision for 50-5000 rad range. ARG-10173

Separation technique provides rapid quantitative determination of cesium-137 in irradiated nuclear fuel. NUC-10047

Cryogenic filter method produces super-pure helium and helium isotopes. JPL-374

Separation technique provides rapid quantitative determination of cesium-137 in irradiated nuclear fuel. NUC-10194

Cryogenic filter method produces super-pure helium and helium isotopes. JPL-374

The thermodynamic properties of the wustite phase are studied. ARG-10200

Ambient temperature catalyst for hydrogen ignition. LEWIS-10551

A continuously operating source of vacuum ultraviolet below 500 angstrom. GSPC-545

Zirconium alloys with small amounts of iron and copper or nickel show improved corrosion resistance in superheated steam. ARG-226

A prototype high power portable lamp. H-PS-20229

Tungsten thermal neutron dosimeter. LEWIS-10880

Beryllia insubstantialized with crosslinking agent. NPO-10834

Swiveling lathe jaw concept for holding irregular pieces. E-FS-783

Special mandrel permits uniform welding of out-of-round tubing. E-FS-706

Special purpose reflectometer uses modified Ulbricht sphere. I-349
I-350

ISEOTROPIC PROCESSES

Computer program for high pressure real
gas effects
LEWIS-10820 B69-10222 06
High pressure real gas effects for helium
and nitrogen
LEWIS-10819 B69-10669 06
Natural gas flow through critical nozzles
LEWIS-11031 B69-10712 02

ISCERATES

Storage-stable foamable polyurethane is
activated by heat
LANGLEY-187 B66-10111 03
Process produces chlorinated aromatic
isocyanate in high yield
M-PS-1658 B66-10646 03
Improved primer for bonding polyurethane
adhesives to metals
M-PS-90591 B69-10540 03

ISOLATION

High-pass RF coaxial filter rejects dc and
low frequency signals
GSFC-73 B64-10173 01
Field-effect transistor replaces bulky
transformer in analog-gate circuit
GSFC-351 B65-10294 01
Transmission system isolates pressure
transducer from severe environment
MOC-239 B66-10064 01
Mechanism isolates load weighing cell during
lifting of load
MSC-297 B66-10071 05
Study of fast response thermocouple
measurement of temperatures in cryogenic
gases
M-PS-1659 B66-10661 01
Amplifier provides dual outputs from a
single source with complete isolation
MSC-10056 B67-10221 01
Remotely operated high pressure valve
protects test personnel
MSC-11010 B67-10291 05
Method of improving contact bonds in
silicon integrated circuits
M-PS-1753 B67-10335 01
Pocket-size manual tape reader device aids
computer tape checking
MSC-10056 B67-10361 01
Multiple meter monitoring circuits served
by single alarm
MSC-10884 B67-10369 01
Conceptual monorthogonal gyro configuration
for guidance and navigation
MSC-11363 B67-10433 01
Biological isolation garment
MSC-12206 B68-10500 04
Isolated, multiple-output voltage dc-to-dc
converter
M-PS-14976 B69-10014 01
Conceptual techniques for reducing
parasitic current gain of lateral pnp
transistors
MSC-13199 B69-10244 01
Self-shielding printed circuit boards for
high frequency amplifiers and transmitters
NQ-10433 B69-10314 01

MODIFICATION TO IMPROVE SELF-ISOLATING
TRANSISTOR ARRAYS

Modification to improve self-isolating
transistor arrays
M-PS-20499 B69-10676 01

ISOLATORS

Electro pneumatic rheostat regulates high
current
ARC-44 B65-10299 01
Accumulator isolator prevents
 malfunctioning of faulty hydraulic system
M-PS-1415 B67-10528 05
Analog buffer isolates high impedance
source from low impedance load
M-PS-14881 B67-10544 01
Solid state single-ended switching
dc-to-dc converter
M-PS-13598 B67-10558 01
Improved traveling wave maser amplifier
NFO-10548 B69-10424 01

ISOPROPYL ALCOHOL

This transparent films formed from powdered
glass
GSFC-352 B65-10217 03

ISOTROPIC PRESSURE

Isostatic compression process converts
polyaromatics into structural material
JPL-892 B67-10168 03
Porous mandrels provide uniform
deformation in hydrostatic powder
metallurgy
M-PS-1972 B67-10209 03

ISOTHERMAL FLOW

Study of thermal effects on
nickel-cadmium batteries
GSFC-10003 B67-10614 01
Improved calorimeter provides accurate
thermal measurements of space batteries
GSFC-10003A B67-10615 01

ISOTHERMAL PROCESSES

Superconductivity in zirconium-rhodium
alloys
ARG-10223 B69-10010 03
Prediction of thermal radiation from a
rocket*^ exhaust plume
M-PS-20414 B69-10371 02

ISOTHERMIS

Computer program calculates steady-state
temperature distribution within plane or
axisymmetric solids
MSC-10049 B67-10224 06
Real fluid properties of normal and
parahydrogen
LEWIS-10858 B68-10361 06
Isothermal drop calorimeter provides
measurements for alpha active, pyrophoric
materials
ABG-10186 B69-10002 02

ISOPHOBIC

Calculation of resonance neutron absorption
in two region problems /the GARGOL code/
MSC-10045 B67-10223 06
Computer program calculates gamma ray
source strengths of materials exposed to
neutron fluxes
MSC-10143 B67-10665 06
Portable, high intensity isotopic neutron
source provides increased experimental
accuracy
ARG-90250 B68-10243 02

Isotopically pure magnesium isotope-24 is
prepared from magnesium-24 oxide
Ion-retarding lens improves the abundance sensitivity of tandem mass spectrometers

Substitution of stable isotopes in Chlorella

Measurement of gas flow at extremely low pressures

Handbook explaining the fundamentals of nuclear and atomic physics

ISOTOPIC LABELING
Experiments shed new light on nickel-fluorine reactions

Isotopic Turbulence
Experimental design for research on shock-turbulence interaction

ISOTROPY
Structure of the isotropic transport operators in three independent space variables

ITERATION
Computer modification reduces time of performing iterative division

Computer program for network synthesis by frequency response fit

ITERATIVE SOLUTION
Computer program reduces calculation time of normal response functions

Computer subroutine ISUDS accurately solves large system of simultaneous linear algebraic equations

Computer program VARI-CUUR 3 provides solution of steady-state, multigroup, two-dimensional neutron diffusion equations

Computer program provides steady state analysis for liquid propellant propulsion systems

Computer program analyzes generalized environmental control and life support systems

Computer program MCAP-TGSS calculates steady-state fluid dynamics of coolant in parallel channels and temperature distribution in surrounding heat-generating solid

Computer program MCAP provides for steady state thermal and flow analysis of multiple parallel channels in heat generating solid

Study of optimum discrete estimators in measurement analysis

J-2 ENGINE
Solid state annunciator facilitates complex system troubleshooting

Computer optimization program finds values for several independent variables that minimize a dependent variable

Dynamically stable check valve concept for wide flow range

Jackets
Leak locator for vacuum jacketed pipelines eliminates need for removal of outer jacket

Electrical cabling withstands severe environmental conditions

Technique cuts time and cost of bending jacketed piping

Inexpensive cryogenic insulation replaces vacuum jacketed line

Consolidation and fabrication techniques for vanadium-20 w/o titanium

Automatic calorimetry system monitors RF power

Heat-shrinkable jacket holds fluid in contact with tensile test specimen

A new method for fabrication of flexible vacuum purge jackets

JACKETS (LIFTS)
Heavy duty precision leveling jacks expedite setup time on horizontal boring mill

Combination double door high-vacuum valve provides access to vacuum chamber

Jet Aircraft
Nickel base alloy with improved stress rupture properties

Jet Amplifiers
Binary fluid amplifier solves stability and load problems
Jet Control

Jet Engine Fuels
Centrifugal device separates liquid from gas
NESC-282 B65-10394 05
Ru-in with chemical additive protects gear surface
N-PS-548 B66-10069 05
Vapor condensation process produces slurry of magnesium particles in liquid hydrocarbons
LEWIS-263 B66-10104 03
Properties of air and combustion products of fuels with air
NESC-11030 B69-10711 03

Jet Engine
Perforations in jet engine supersonic inlet increase shock stability
NESC-8 B66-10530 05
Pre-weld heat treatment improves welds in Rene 81
N-PS-18174 B66-10205 03
New rapid-curing, stable polyamide polymers with high-temperature strength and thermal stability
LEWIS-10576 B69-10118 03
Improved design of item in high speed rotating machinery
N-PS-18441 B69-10373 05

Jet Exhaust
Jet engine powers large, high-temperature wind tunnel
N-PS-13544 B67-10621 02

Jet Flow
Binary fluid amplifier solves stability and load problems
EBC-15 B66-10177 01

Jet Mixing Flow
Computer program calculates peripheral water injection cooling of axisymmetric subsonic diffuser
NESC-10541 B67-10543 06

Jigs
Jig and fixture aid fabrication of tungsten rivets
LEWIS-185 B65-10101 05
Peel resistance of adhesive bonds accurately measured
GSFC-320 B65-10173 03
Spiral heater coils hand-formed with fixture
LEWIS-208 B65-10192 05
Assembly jig assures reliable solar cell modules
GSFC-255 B66-10040 05
Tool provides constant purge during tube welding
N-PS-547 B66-10093 05
Depth indicator and stop aid machining to precise tolerances
N-PS-553 B66-10149 05
Jig protects transistors from heat while tinning leads
NESC-515 B66-10240 05
Heat treatment stabilizes welded aluminum jigs and tool structures
NESC-800 B66-10458 03

Joining
Captive nut fastener securely joins brittle materials

Subject Index

99-0008 B65-10245 05
Packaging of electronic modules
JPL-801 B66-10664 01
Method of improving contact bonds in silicon integrated circuits
N-PS-1753 B67-10335 01
Standards for compatibility of printed circuit and component lead materials
N-PS-14531 B68-10310 01
Tube welding and brazing
N-PS-20346 B69-10085 05
Tool repairs tube components in situ
NESC-15346 B69-10379 05
Magnetomechanical forming for precision sizing and joining of large-diameter tubes
N-PS-20481 B69-10422 05

Joints (Junctions)
Modular chassis simplifies packaging and interconnecting of circuit boards
JPL-236A B63-10174 01
Lightweight universal joint transmits both torque and thrust
JPL-375 B63-10236 05
Special pliers connect hose containing liquid under pressure
JPL-TT-1003 B63-10291 05
New method used to fabricate lightweight heat exchanger for rocket motor
LEWIS-43 B63-10346 02
Stainless-steel elbows formed by spin forging
N-PS-122 B63-10590 05
Circuit reliability boosted by soldering pins of disconnect plugs to sockets
JPL-447 B64-10002 01
Flexible fastener allows thermal expansion
LEWIS-4C B64-10165 05
Viscous-pendulum damper suppresses structural vibrations
LANGLBY-45 B64-10272 05

Knob linkage permits one-hand control of several operations
NESC-30 B65-10022 05
Titanium treatment improves brazed joints
NESC-127 B65-10153 05
Splice plate design assures structural separation by mild explosive
NESC-137 B65-10166 05
Ball and socket joints provide accurate biaxial gimbal
JPL-658 B65-10205 05
Thoriated nickel bonded by solid-state diffusion method
LANGLBY-116 B65-10220 03
Thermocouple-to-instrumentation connector features quick assembly
80-0022 B65-10246 05
Universal bellows joint restraint permits angular and offset movement
W00-102 B65-10371 05
Photosensors used to maintain welding electrode-to-joint alignment
NESC-243 B65-10401 05
Flexible coiled spline securely joins mating cylinders
W00-270 B66-10172 05

LABORATORY EQUIPMENT

KNUDSEN FLOW
Thermodynamic properties of solid palladium-silver alloys and other alloys are investigated by torsion-effusion technique ARG-277 B67-10324 03

KNUDSEN FLOORS
Metallic diffusion measured by a modified Knudsen technique KQ-10145 B69-10309 03

KOVAR (TRADEMARK)
Multichip packaging with thermal insulation N-PS-14076 B68-10119 02

Indium adhesion provides quantitative measure of surface cleanliness SAN-10024 B68-10342 01

KRYPTON
Electroless discharge lamp is easily started, has high stability WGO-030 B66-10015 01

KRYPTON-55
Radioactive method enables determination of surface areas rapidly and accurately BO-0088 B66-10710 03

LABORATORIES

Experiments to investigate particulate materials in reduced gravity fields N-PS-13306 B67-10394 02

Computer program conducts facilities utilization and occupancy survey NPO-10326 B67-10476 06

Chemistry laboratory safety manual available SAN-10030 B68-10419 03

Rotary-knife stripper facilitates removal of X-ray film from pack N-PS-14837 B68-10509 05

LABCON - Laboratory Job Control program N-PS-18141 B69-10106 06

An improved atomic hydrogen frequency and time standard GSPC-10706 869-10341 02

LABORATORY EQUIPMENT

Mouthpiece adapter for pipettes protects mouth from harmful liquids LANSLEY-87 B65-10043 03

Double gloves reduce contamination of dry box atmosphere LEWIS-211 B65-10117 03

Multiple test tubes stirred mechanically ARG-42 B65-10120 01

Flowmeter measures low gas-flow rates M-PS-215 B66-10036 01

Apparatus enables accurate determination of alkali oxides in alkali metals LEWIS-256 B66-10296 03

Apparatus enables automatic microanalysis of body fluids JPL-962 B66-10515 04

Automated microsyringe is highly accurate and reliable NPO-10142 B67-10203 01

Thermodynamic properties of saturated liquid parahydrogen charted for important temperature range NRC-10018 B67-10346 03

Color-television medical microscopy
Product identification techniques used as training aids for analytical chemists
SAN-10025 B66-10373 03

Heat-load simulator for heat sink design
MSC-15170 B66-10510 02

Dispensing graduate for butadiene
NFO-10070 B66-10524 03

Mass culture of photobacteria to obtain luciferase
GSFC-10563 B66-10294 04

Novel multipurpose timer for laboratories
ARG-10417 B66-10410 01

Life detection
NFO-10510 B66-10475 04

Labyrinth-type valve seat increases valve life by decreasing fluid velocity
I-FS-192 B67-10067 05

Modification increases light output of injection-luminescent diodes
I-FS-192 B67-1006 01

Inexpensive infrared source improvised from flashlight
I-FS-494 B67-10096 02

Coating permits use of strain gage in water and liquid hydrogen
I-FS-594 B66-10192 01

Lactic acid
Separation of the rare earths by anion-exchange in the presence of lactic acid
ARG-10436 B69-10377 03

Ladders
Adjustable, self-locking ladder includes optional work platform
I-FS-1922 B67-10067 05

Lamb waves
Improved ultrasonic TV images achieved by use of Lamb-wave orientation technique
ARG-203 B67-10295 02

Lamb waves increase sensitivity in nondestructive testing
ARG-10009 B67-10605 02

Labyrinth boundary layer
Thin-film gage measures low heat-transfer rates
LANGLEY 205 B66-10180 01

Labyrinth flow
Concept for passive system to control gas flow independently of temperature
I-FS-962 B66-10343 05

High pressure cryogenic liquid flow sight assembly provides streamlined flow for easy observation
LEWIS-310 B66-10394 01

Improved atmospheric particle analyzer
BEC-33 B67-10231 01

Computer program calculates velocities and streamlines in turbo machines
LEWIS-10252 B66-10097 06

Prediction of friction coefficients for gases
LEWIS-10774 B69-10112 02

Microbiological aspects of sterilization development laboratories
NFO-11197 B69-10593 04

Flow properties of suspensions rich in solids
ARG-10841 B69-10622 02

Flexible curtain shields equipment from intense heat fluxes
I-FS-46 B65-10044 03

Peel resistance of adhesive bonds accurately measured
GSFC-320 B65-10173 03

Device detects unbonded areas in plastic laminates
WOO-206 B65-10380 01

Drill bit design assures clean holes in laminated materials
WOO-098 B65-10386 05

Polymer film exhibits thermal and radiation stability
LANGLEY-100 B66-19043 03

Coating permits use of strain gage in water and liquid hydrogen
I-FS-594 B66-10192 01

Silazane polymers show promise for high-temperature application
I-FS-866 B66-10194 03

Self-contained clothing system provides protection against hazardous environments
I-FS-536 B66-10201 05

Inexpensive insulation is effective for cryogenic transfer lines
MSC-618 B66-10348 02

Aluminum core structures brazed without use of flux
I-FS-659 B66-10360 05

Impact and puncture resistant material protects parts from damage
I-FS-747 B66-10375 05

Composite gaskets are compatible with liquid oxygen, resist compression set
I-FS-455 B66-10395 03

Multilayer refractory nozzles produced by plasma-spray process
WOO-318 B66-10611 05

Dispersion of borax in plastic is excellent fire-retardant heat insulator
ARG-5 B67-10016 03

Thin film process forms effective electrical contacts on semiconductor crystals
I-FS-2343 B67-10182 01

Oxide film on metal substrate reduced to form metal-oxide-metal layer structure
ARG-48 B67-10187 03

Liquid crystals detect voids in fiber glass laminates
LEWIS-10104 B67-10286 03

Repairable, high-density microelectronic module provides effective heat sink
I-FS-13075 B67-10356 01

Polarized light reveals stress in machined laminated plastics
LEWIS-10018 B67-10383 03

Adhesives for laminating polyimide insulated flat conductor cable
I-FS-13892 B67-10429 03

Warpage eliminated in copper-clad microwave circuit laminates
I-FS-13992 B67-10454 03
Panelized high performance multilayer insulation
M-FS-14023  B66-10031  03

Molding a high-density laminate
LANGLEY-10251  B68-10092  03

Laminated sheet composites reinforced with modular filament sheet
M-FS-14575  B66-10146  03

Multilayer plated wire shows promise as memory device
MSC-11587  B69-10205  01

Improved process for epitaxial deposition of silicon on prediffused substrates
M-FS-14910  B66-10390  03

Conditioning flat conductors for flat conductor cable production
M-FS-14914  B69-10429  01

Diffusion bond method of joining steel and a TFE-bronze composite
M-FS-20482  B69-10237  03

Multilayer infrared beamsplitter film system
XGS-11036  B69-10260  02

A method for observing gas evolution during plastic laminate cure
MSC-15592  B69-10530  03

LAND
Land landing couch dynamics computer program
MSC-1210  B67-10233  06

LANDING AIDS
Break-up of metal tube makes one-time shock absorber, bars rebound
LANGLEY-1A  B63-10304  05

Land landing couch dynamics computer program
MSC-1210  B67-10233  06

LANDING GEAR
Kinetic-energy absorber employs frictional force between mating cylinders
LNWIS-75  B63-10442  05

LANGUAGE PROGRAMMING
FORTAN program flow chart is automatically produced
M-FS-369  B66-10062  01

Assembly processor program converts symbolic programming language to machine language
M-FS-13262  B67-10493  06

JFLIP-JPL FORTAN language with interval pre-processor
NPO-10635  B69-10187  06

Determination of quadric equation coefficients describing three-dimensional surfaces, their constraint and skewed planes, and view point areas
M-FS-15043  B69-10435  06

Automatic computation of data-set definitions
ARG-10475  B69-10608  06

COGENT programming manual
ARG-10463  B69-10656  06

LANTHANUM COMPOUNDS
Nitric acid-organic mixtures surveyed for use in separation by anion exchange methods
ARG-10065  B69-10425  03

LAP JOINTS
Lightweight door seal cryogenic container against diaphragm type loading
M-FS-476  B65-10402  05

Solar cell submodule design facilitates assembly of lightweight arrays
JFL-720  B66-10231  02

Differential expansion provides pressure for diffusion bonding of large diameter rings
M-FS-588  B66-10269  05

Mechanical properties of a lap joint under uniform clamping pressure
M-FS-14538  B69-10141  05

Tool repairs tube components in situ
MSC-15348  B69-10379  05

LAPLACE EQUATION
Computer program simplifies transient and steady-state temperature prediction for complex body shapes
MSC-989  B66-10619  01

LAPLACE TRANSFORMATION
Computer determines high-frequency phase stability
GSFC-173  B63-10555  01

Polynomial manipulator AF-168
MSC-1231  B67-10103  01

General frequency response program calculates frequency response of system, open at any specified element
M-FS-12817  B67-10521  06

Symbolic reduction of block diagrams using FORTRAN
LEWIS-10409  B68-10423  06

One-dimensional Coulomb-damped wave motion in prismatic bar
N-FS-14815  B66-10568  02

Analysis of transient thermal stress in heat-generating plates and hollow cylinders caused by sudden environmental temperature change
ARG-10274  B69-10047  02

Aerodynamic forces of fluttering cylindrical and/or planar structures
M-FS-20497  B69-10781  02

LARGE SCALE INTEGRATION
Literal readout of identification signals in Morse code
LANGLEY-10222  B69-10479  01

LASER MODES
Neon isotopes cancel errors in gas laser
N-FS-1476  B66-10583  02

Absolute frequency stabilization of laser oscillator against laser amplifier
N-FS-2559  B67-10255  01

LASER OUTPUTS
Design concepts using ring lasers for frequency stabilization
N-FS-2448  B67-10255  01

Absolute frequency stabilization of laser oscillator against laser amplifier
N-FS-2559  B67-10255  01

Laser system generates single-frequency light
N-FS-2556  B67-10288  02

Wideband, high efficiency optical modulator requires less than 10 watts drive power
N-FS-12733  B67-10289  01

Nonreciprocals gain control for ring laser
N-FS-14041  B69-10653  02

Feasibility study of wireless power transmission systems
N-FS-14051  B69-10309  01

X-357
LASERS

Laser-Doppler gas-velocity instrument
I-PS-20039 B68-10349 02

Digital laser-beam deflection sensor
I-PS-14785 B68-10525 01

Optical frequency waveguide and ion transmission system
HQ-10541 B69-10746 01

LASEs
Modification increases light output of injection-luminescent diodes
I-PS-192 B65-10006 01

Laser beam transmits electric power
GSFC-293 B65-10158 01

Interferometer combines laser light source and digital counting system
MSC-151 B65-10161 01

Communication system uses modulated laser beam
GSFC-377 B65-10333 01

Laser measuring system accurately locates point coordinates on photograph
AEG-74 B66-10560 02

Optical superheterodyne receiver uses laser for local oscillator
I-PS-1605 B66-10584 01

Concept for using laser beams to measure electron density in plasmas
I-PS-965 B66-10645 01

Accuracy of laser measurements improved by pulse autocorrelator electronic system
MSC-1033 B67-10338 01

Proposed method of rotary dynamic balancing by laser
I-PS-12422 B67-10452 02

Laser communication system is insensitive to atmospherically induced noise
GSFC-10396 B67-10587 01

Development of Curie point switching for thin films, random access, memory device
NPO-10402 B67-10633 02

Flow tube used to cool solar-pumped laser
MSC-11026 B68-10010 02

Electronic gating circuit and ultraviolet laser excitation permit improved dosimeter sensitivity
AEG-10109 B68-10077 02

Feasibility study of wireless power transmission systems
I-PS-14691 B68-10309 01

Improved electro-optical tracking system
I-PS-14791 B68-10311 01

Rapid-response, light-exposure control system
NPO-10238 B68-10502 01

Digital laser-beam deflection sensor
I-PS-14785 B68-10525 01

Optically induced free carrier light modulator
GSFC-10216 B69-10114 01

Welding, brazing, and soldering handbook
I-PS-20504 B69-10264 05

Laser action from a terbium beta-ketoenolate at room temperature
GSFC-10593 B69-10324 02

Laser interferometer micrometer system
I-PS-14747 B69-10633 02

SUBJECT INDEX

Electrolytic separation of crystals of transition-metal oxides
AEG-10506 B69-10642 03

Fine-line sensitivity for holographic interferograms
HQ-10348 B69-10663 02

Long range holographic contour mapping concept
HQ-10350 B69-10700 02

Latches
Magnetic latches provide positive overpressure control
NU-0057 B66-10279 05

Latching mechanism operates in limited access area
MSC-230 B66-10338 05

Electrically controlled optical latch and switch requires less current
JPL-SC-111 B66-10414 01

Work platform is supported by self-locking blades
I-PS-1229 B67-10180 05

Combined actuator and latch for cartridge powered actuator
MSC-11242 B67-10488 05

Toggle operated double latch
MSC-11377 B68-10117 05

Boyd bolt, a positive-latch, simple-release fastener
MSC-13061 B68-10512 05

Astronaut's tool for withdrawing/replaceing computer cards
I-PS-12422 B67-10183 05

Electrothermal linear actuator
NPO-10637 B69-10296 05

Lethal control
Conceptual techniques for reducing parasitic current gain of lateral pnp transistors
NPO-13199 B69-10244 01

Lethal stability
Sleeve and cutter simplify disconnecting welded joint in tubing
JPL-384 B63-10240 05

Lateral ring metal elastic wheel absorbs shock loading
I-PS-1132 B66-10663 05

Lather
Refractory thermal insulation for smooth metal surfaces
I-PS-160 B64-10099 03

Submicron holes in thin films increase sampling range of mass spectrometers
JPL-SC-097 B66-10380 03

Method accurately measures mean particle diameters of monodisperse polystyrene latexes
AEG-207 B67-10054 02

Lathes
Lathe converted for grinding aspheric surfaces
GSFC-115 B63-10556 05

Collar positions strip stock used to form coil on mandrel
JPL-198 B65-10130 05

Metal bellows custom-fabricated from tubing
LEWIS-192 B65-10150 05

Lathe attachment used to machine elliptical cones
I-358

- **and velocity in fluid streams**
  - B66-10668 01
- **Laser Doppler flowmeter measures gas velocity**
  - M-FS-1747
  - B66-10693 02
- **Design concept for improved photo-scan tube**
  - JPL-81
  - B67-10577 01
- **Simplified technique demonstrates magnetic domain switching**
  - M-FS-13153
  - B67-10342 02
- **Aerial-image enables diagrams and animation to be inserted in motion pictures**
  - ARG-165
  - B67-10398 02
- **Optical integrating sphere operates at visible and infrared wavelengths**
  - M-FS-14248
  - B68-10126 02
- **Improved gas ring laser**
  - MSC-11584
  - B68-10304 02
- **System converts optical phase changes to RF phase changes**
  - M-FS-20091
  - B68-10630 01
- **Occulting-filter method for obtaining flashing-light visibility data**
  - MSC-13097
  - B69-10107 02
- **Method for copper staining of germanium crystals**
  - ARG-10403
  - B69-10257 03
- **Concept for improved vacuum pressure measuring device**
  - M-FS-20172
  - B69-10421 02
- **System expands the electro-optic modulators for amplitude modulation of light**
  - M-FS-14268
  - B68-10275 02

Circuit board hole coordinate locator concept
H-FS-14737  B69-10539  01
Long range holographic contour mapping concept
HQ-10350  B69-10700  02
A simple electrometer for measuring small photoelectric currents
GSPC-10603  B69-10734  01
LIGHT SPEED
Frequency offset in linear Pk/CW transponder eliminates clutter
H-FS-249  B65-10146  01
LIGHT TRANSMISSION
Blood oxygen saturation determined by transmission spectrophotometry of hemolyzed blood samples
MSC-11010  B67-10252  04
Self-balancing line-reversal pyrometer automatically measures gas temperatures
LEWIS-348  B67-10260  01
Portable spectrometer monitors inert gas shield in welding process
H-FS-12144  B67-10326  02
Computer program for optical systems ray tracing
FRC-10017  B67-10549  06
Technique developed for measuring transmittance of optical birefringent networks
H-FS-14267  B66-10260  02
Method of making comical fiber optical components
XHP-09745  B69-10020  02
LIGHTING EQUIPMENT
Panels illuminated by edge-lighted lens technique
MSC-871  B66-10507  02
Surface irregularities detected by flare inspection instrument
H-FS-20157  B69-10152  01
A prototype high power portable lamp
H-FS-20229  B69-10189  02
LIMITER AMPLIFIERS
PCB magnetic tape system efficiently records and reproduces data
GSPC-375  B65-10311  01
LIMITER CIRCUITS
Variable frequency magnetic multivibrator generates stable square-wave output
GSPC-AR-21  B65-10124  01
High-speed square-wave current limiter operates efficiently
JPL-SC-073  B66-10233  01
Electrically controlled optical latch and switch requires less current
JPL-SC-111  B66-10814  01
Linear signal noise smasher accurately determines and controls S/N ratio
JPL-SC-152  B66-10433  01
Limit circuit prevents overdriving of operational amplifier
MSC-10082  B69-10343  01
Current-limiting voltage regulator
MSC-11824  B68-10305  01
Improved limiter for turn-on current transient
GSPC-10413  B68-10384  01
Millivolt signal limiter
LEWIS-90297  B69-10015  01
Circuitry selectively limits data storage in general purpose computer
GSPC-10605  B69-10121  01
FCR bit detection with correction for intersymbol interference
GSPC-10155  B69-10153  01
Automatic Gaussian random-noise limiter
HFO-10169  B69-10349  01
LIMITS (MATHEMATICS)
Computer program determines exact two-sided tolerance limits for normal distributions
H-FS-18045  B66-10508  06
Maximum RMS error comparison of several redundancy techniques
H-FS-15075  B69-10297  01
LINE CURRENT
Tracer of electrical conduit or pipes
MSC-15223  B66-10347  01
LINE SHAPE
Parallel line raster eliminates ambiguities in reading timing of pulses less than 500 microseconds apart
JPL-805  B66-10386  01
LINE SPECTRA
Electrodeless discharge lamp is easily

Test instrumentation evaluates electrostatic hazards in fluid system

Electronic circuit provides automatic level control for liquid nitrogen traps

Cryogenic liquid level measuring probe

Superconductive thin film makes convenient liquid helium level sensor

Improved liquid-level sensor for cryogenics

LIQUID LEVELS

Improved liquid-level sensor for cryogenics

Method for predicting pump cavitation performance

Modified cryogenic storage tank subsystem

Two-functional seal for hose connection

Technique for predicting the thermal expansion coefficients of cryogenic metallic alloys

LIQUID INJECTION

Quick-hardening problems are eliminated with spray gun modification which mixes resin and accelerator liquids during application

Elimination of rocket engine asymmetric loads during tests at sea level

A method of determining combustion gas flow

LIQUID LASERS

Liquid laser cavities

LIQUID METALS

Double gloves reduce contamination of dry box atmosphere

Fluid damping reduces bellows seal fatigue failures

Inductive system detects level of conducting fluids

Rubber and alumina gaskets retain vacuum seal in high temperature EMF cell

Flowmeter measures flow rates of high temperature fluids

Crucible cast from beryllium oxide and refractory cement in impervious to flux and molten metal

Use of steel and tantalum apparatus for molten Cd-Zn alloys

Two techniques enable sampling of filtered and unfiltered molten metals

Solubility data are compiled for metals in liquid zinc

Substituting gold for silver improves electrical connections

Design for high-temperature /1600 deg F/ liquid metal pressure transducer

Calibration technique for electromagnetic flowmeters

Concept to convert electrical power

Levitation-melting technique for metals

Magnetohydrodynamic generators using two-phase liquid-metal flows

Studies of cycles for liquid-metal magnetohydrodynamic generation of power

Induction probe determines levels of liquid metals

Analysis of cell performance and thermal regeneration of a lithium-tin cell having
LIQUID NITROGEN

an immobilized fused-salt electrolyte
ARG-10453 B69-10627 03

Self-discharge in bimetallic cells containing alkali metal
ARG-10347 B69-10631 01

LIQUID NITROGEN

Cryogenic filter method produces super-pure helium and helium isotopes
JPL-374 B63-10235 03

Level of super-cold liquids automatically maintained by levelometer
JPL-397 B63-10250 01

Helium tube separates nitrogen gas from liquid nitrogen
JPL-398 B63-10251 05

Cryopumping of hydrogen in vacuum chambers is aided by catalytic oxidation of hydrogen
LEWIS-15 B63-10340 05

Low-cost insulation system for cryostats eliminates need for a vacuum
LEWIS-64 B63-10365 03

Refractory ceramic has wide usage, low fabrication cost
M-FS-67 B63-10461 03

Insulation accelerates rate of cooling with cryogenic fluid
MSC-161 B65-10240 02

Complementary system vaporizes subcooled liquid, improves transformer efficiency
M-FS-550 B66-10045 02

Mount makes liquid nitrogen-cooled gamma ray detector portable
LEWIS-259 B66-10103 01

Bismuth alloy potting seals aluminum connector in cryogenic application
WGO-260 B66-10138 03

Cryogenic liquid transfer system reduces residual boiloff
LEWIS-274 B66-10157 02

Differential expansion provides pressure for diffusion bonding of large diameter rings
M-FS-598 B66-10269 05

Closed loop operation eliminates need for auxiliary gas in high pressure pumping station
M-FS-893 B66-10408 05

Cryogenic cooling reduces high voltage arcing between electrodes operating in a vacuum
ARG-109 B66-10499 02

Cold trap increases sensitivity of gas chromatography
M-FS-1617 B66-10517 03

Technique for stripping Teflon insulated wire
M-FS-1774 B67-10048 05

Purification train produces ultrapure hydrogen gas
M-FS-1913 B67-10078 03

Inexpensive cryogenic insulation replaces vacuum jacketed line
NDC-10061 B67-10264 02

Study made of dielectric properties of promising materials for cryogenic capacitors
M-FS-13620 B67-10366 03

Concept for cryogenic liquid reclamation system
NPO-10322 B67-10420 02

Infrared radiometer
M-FS-13373 B67-10422 01

Technique eliminates high voltage arcing at electrode-insulator contact area
LEWIS-10133 B67-10470 01

Self-aligning rod prevents eccentric loading of tensile specimens
NDC-10525 B67-10594 05

Polystyrene cryostat facilitates testing tensile specimens under liquid nitrogen
NDC-10522 B67-10613 02

Test system accurately determines tensile properties of irradiated metals at cryogenic temperatures
NDC-10521 B67-10617 02

Tensile testing grips are easily assembled under liquid nitrogen
NDC-10524 B67-10628 05

Electronic circuit provides automatic level control for liquid nitrogen traps
KSC-10127 B68-10061 01

Viscosity and density of methanol/water mixtures at low temperatures
M-FS-10991 B68-10274 03

Dual-purpose chamber-cooling system
NPO-10567 B68-10506 02

Levitation-melting technique for metals and alloys
ARG-10240 B69-10066 03

Teflon-packed flexible joint
LEWIS-90252 B69-10049 03

Direct measurement of carbon-14 in carbon dioxide by liquid scintillation counting
ARG-10237 B69-10092 03

Bismuth alloy potting seals aluminum connector in cryogenic application
WGO-260 B66-10138 03

Improved liquid-level sensor for cryogenics
ARG-10162 B69-10210 02

Four-bar linkage for thermal compensation in test mounts for structures
NPO-11059 B69-10298 05

Direct in-vial collection for liquid-scintillation assay of carbon-14 and tritium
ARG-10245 B69-10412 03

Thermal calibration target
XGS-11144 B69-10419 01

Cryogenic fluid flow instabilities in heat exchangers
N-FS-20438 B69-10541 02

Burst diaphragm leak detector
N-FS-15000 B69-10543 03

Control for maintaining constant level of a cryogenic liquid
NPO-11177 B69-10573 05

LIQUID OXIDIZERS

Wide-range instrument monitors flow rates of chemically active fluids
MSC-196 B66-10205 01

Two-fluid, impinging-sheet injector
NPO-10547 B68-10338 05

LIQUID OXYGEN

Crack detection method is safe in presence of liquid oxygen
M-FS-236 B65-10107 03

Protective coating withstands high temperature in oxidizing atmosphere
M-FS-529 B66-10048 03

- Large-amplitude inviscid fluid motion in an accelerating container

I-373
LIQUIDS

Dynamics of moving bubbles in single and binary component systems
E-FS-14845 B68-10339 02

LIQUIDS

Automated microsyringe is highly accurate and reliable
NPO-10142 B67-10203 01

Liquid microfluid chamber and microsyringe designs allow more efficient micromanipulations
ARG-251 B67-10305 04

Device enables calibration of microphones at high sound pressure levels
E-RS-11980 B67-10336 01

Vibration damping composition has flush-away feature
E-RS-597 B67-10432 03

Miniature paint-spray gun for recessed areas
MSC-13060 B68-10387 05

Dispensing graduate for butadiene
NPO-10070 B68-10524 03

Instruction manuals for liquid penetrant nondestructive testing
I-FS-14010 B69-10278 05

Leakage tester for flat conductor cable connector
E-RS-20427 B69-10284 05

Laser action from a terbium beta-ketoenate at room temperature
GSFC-10593 B69-10324 02

A method for using surface tension to determine the size of holes in hardware
MSC-15194 B69-10595 03

Direct determination of lead-210 by liquid-scintillation counting
ARG-10462 B69-10611 03

Dynamic calibration of turbine flowmeters
LEWIS-11014 B69-10764 01

LISTS

Computerized parts list system coordinates engineering releases, parts control, and manufacturing planning
NOC-10073 B67-10348 06

LITERATURE

Principles of optical-data processing techniques
GSFC-10271 B68-10069 01

LITHIUM

Simplified method introduces drift fields into cells
GSFC-572 B67-10102 03

Process controls introduction of selected impurities into semiconductor wafers
GSFC-523 B67-10303 01

One-dimensional two-phase reacting gas nonequilibrium performance program
MSC-11780 B68-10376 06

Lithium-tellurium bimetallic cell has increased voltage
ARG-10141 B68-10400 01

High resolution Ge/Li/ spectrometer reduces rate-dependent distortions at high counting rates
ARG-10144 B68-10420 01

Ge-diode detector combined with crystal-diffraction spectrometer permits high-resolution gamma ray spectroscopy
ARG-10190 B69-10005 02

High-energy, high-power, long-life battery
LEWIS-10724 B69-10131 01

Technical report on galvanic cells with fused-salt electrolytes
ARG-10297 B69-10155 01

Neutron therapy of cancer
ARG-10310 B69-10203 04

Multichannel analyzers at high rates of input
ARG-10355 B69-10214 02

Development of structural test articles from magnesium-lithium and beryllium
E-RS-14859 B69-10417 03

Analysis of secondary cells with lithium anodes and immobilized fused-salt electrolytes
ARG-10452 B69-10613 01

Analysis of cell performance and thermal regeneration of a lithium-tin cell having an immobilized fused-salt electrolyte
ARG-10453 B69-10627 03

Adding calcium improves lithium ferrite core
ERC-10036 B69-10686 06

Pulse-height defect due to electron interaction in dead layers of Ge/Li/gamma-ray detectors
ARG-10362 B69-10767 02

LITHIUM ALLOYS

Lightweight magnesium-lithium alloys show promise
E-RS-17 B63-10389 03

Adherent protective coatings plated on magnesium-lithium alloy
E-RS-365 B65-10294 03

Coating protects magnesium-lithium alloys against corrosion
E-RS-2846 B67-10149 03

Magnesium-lithium alloys developed for low temperature use
E-RS-1541 B67-10365 03

LITHIUM ALUMINUM HYDRIDES

Mixed ether bath for electrodeposition of aluminum
LANGLEY-10200 B69-10737 03

LITHIUM COMPOUNDS

Screening technique makes reliable bond at room temperature
E-RS-227 B65-10004 03

Uranyl phthalocyanines show promise in the treatment of brain tumors
ARG-100 B67-10188 04

Self-discharge in bimetallic cells containing alkali metal
ARG-10347 B69-10631 01

LITHIUM FLUORIDES

Cesium iodide crystals fused to vacuum tube faceplates
GSFC-67 B63-10476 03

Fluoride coatings make effective lubricants in molten sodium environment
LEWIS-229 B66-10005 03

Thermal neutron image intensifier tube provides brightly visible radiographic pattern
ARG-120 B67-10296 02

I-374
**LITHIUM HYDROGENS**
Iron serves as diffusion barrier in thermally regenerative galvanic cell
ABG-29 B67-10189
Vanadium diaphragm electrode serves as hydrogen diffuser in lithium hydride cell
ABG-10048 B67-10499

**LITHIUM SULFATES**
Trace levels of metallic corrosion in water determined by emission spectrography
ISC-1193

**LOAD DISTRIBUTION (FORCES)**
Equations provide tabular information on effects of uniform and variable loads on thin, flat, circular plates
ABG-151
Spherical pipe joint delivers loads equally to mating flange
N-FS-807
Elimination of rocket engine asymmetric loads during tests at sea level
M-PS-1730
Development of helical seal for high temperature /2000 degrees F/ application
M-PS-13304
Shock-absorbing caster wheel is simple and compact
SAM-10019
Modified multihopp lifting surface loading program
LANGLET-10375
Mechanical properties of a lap joint under uniform clamping pressure
M-PS-14538
Automatic leveling and equalizing hoist device
M-PS-16549

**LOAD TESTING MACHINES**
Apparatus permits flexure testing of specimens at cryogenic temperatures
M-PS-257
Friction loading device enables accurate testing of brittle materials
NU-0051
Device measures reaction engine thrust vector deviations
JPL-SC-163
Web belt load measuring instrument has excellent stability
M-PS-D21

**LOADS (FORCES)**
Structure
M-PS-14972 B68-10353
Calibrated water tank facilitates proof-loading of cranes and derricks
M-PS-15059 B69-10109
Optimum structural design based on reliability and proof-load testing
NPO-11228 B69-10723

**LOADING**
PFC thermistor protects multiloaded power supplies
GSFC-236
Experiments with ceramic coatings
M-PS-18150 B69-10355

**LOADING OPERATIONS**
Rapid billet loader aids extrusion of refractory metals
LEWIS-50
Self-balancing beam permits safe, easy load handling under overhang
M-PS-84
Speed-sensing device aids crane operators
US-4
Compressed gas system operates semitrailer brakes during winching operation
JPL-0036
Universal transloader moves delicate equipment without stress
MSC-654
Self-actuating grapple automatically engages and releases loads from overhead cranes
NPO-81
Carriage system remotely moves drawer over extended distance
NU-0092
Hydrostatic force used to handle oversized, heavy objects
HQ-90

**LOADING RATE**
Shock absorber operates over wide range
MSC-168
Cut-through tester accurately measures insulation failure rates
M-PS-12506 B67-10354
Single-source mechanical loading system produces biaxial stresses in cylinders
M-PS-12530 B67-10380

**LOADS (FORCES)**
Elastic orifice automatically regulates gas bearings
JPL-135
Self-balancing beam permits safe, easy load handling under overhang
M-PS-84
Circuit controls transients in SCR inverters
GSFC-120
Buckle joins web straps quickly, adjusts easily
LANGLET-21
Ring counter may be advanced or retarded by command signal
GSFC-101
Threading hook facilitates safe recovery of heavy loads
MSC-46
Shock absorber protects motive components
LOCKING

against overloads
Woo-092 B65-10008 05

Circuit improvement produces monostable
multivibrator with load-carrying capability
GSPC-341 B65-10011 01

Fluid pressure used to test turbopump bearings
NU-0001 B65-10024 03

Leaf-spring suspension provides accurate
parallel displacements
JPL-480 B65-10104 05

Variable load automatically tests dc power
supplies
GSPC-291 B65-10105 01

Unijunction frequency divider is free of
backward loading
JPL-W00-010 B65-10112 01

Lightweight door seals cryogenic container
against diaphragm type loading
M-F5-476 B65-10402 05

Run-in with chemical additive protects gear
surface
M-F5-548 B66-10069 05

Mechanism isolates load-weighing cell during
lifting of load
MSC-297 B66-10071 05

Calculations enable optimum design of
magnetic brake
LEWIS-251 B66-10073 05

Plugged hollow shaft makes fatigue-resistant
shear pin
LANGLEY-195 B66-10077 05

Computer program simplifies selection of
structural steel columns
NU-0044 B66-10097 01

Mechanism continuously measures static and
dynamic cable loads
MSC-217 B66-10107 05

Binary fluid amplifier solves stability and
load problems
BCC-15 B66-10177 01

Circuit increases capability of hysteresis
synchronous motor
MSC-1080 B67-10008 01

Web belt load measuring instrument has
excellent stability
MSC-921 B67-10242 01

Rectilinear display gives acceleration load
factor and velocity information
MSC-1045 B67-10248 01

Improved computer program for elastic
analysis of highly redundant structural
configurations
M-F5-13087 B67-10330 06

Heavy-gage bonded honeycomb sandwich as
primary load-bearing structure
M-F5-12060 B67-10427 05

Pump simulator provides variable
pressure-flow characteristics
LEWIS-10122 B67-10453 05

Computer program performs rectangular
fitting stress analysis
M-F5-13010 B67-10520 06

Computer program provides improved
longitudinal response analysis for
axisymmetric launch vehicles
LANGLEY-10093 B67-10531 06

Electronic load for testing power

GENERATING DEVICES

Experiments with ceramic coatings
M-FS-18150 B68-10355 03

Improved limiter for turn-on current
transient
GSPC-10413 B68-10384 01

Internal velocity factors
NUC-15002 B68-10403 06

Mass loading effects on vibrated ring and
shell structures
M-F5-14975 B68-10532 03

Computer program analyzes whirl critical
speeds and bearing loads for shafts coupled
by nonlinear springs to machine housing
NUC-10308 B69-10034 06

General series solution technique for
bending of irregular laterally loaded
flat plates
NUC-10170 B69-10035 06

Determination of permissible applied load
stress in structural elements
M-F5-16556 B69-10823 02

LOCKING

Simple mechanism combines positive locking and
quick-release features
Woo-4 B63-10420 05

Instrument adjustment knob locks to prevent
accidental maladjustment
M-F5-190 B64-10249 05

Screw locking cups quickly and neatly crimped
NU-0009 B65-10094 05

Coiled spring makes self-locking device for
threaded fasteners
MSC-149 B65-10135 05

Solar cell submodule design facilitates
assembly of lightweight arrays
JPL-728 B66-10231 02

Flexible drive allows blind machining and
welding in hard-to-reach areas
MSC-524 B66-10428 05

Adjustable, self-locking ladder includes
optional work platform
M-F5-1922 B67-10067 05

Safety yoke would protect construction
workers from falling
MSC-10075 B67-10445 05

Megatron tuner has locking feature
XNP-09771 B69-10119 05

Improved design of item in high speed
rotating machinery
M-F5-18441 B69-10373 05

LOCKS (FASTENERS)

Simple key locks turbine rotor blades
Woo-103 B66-10023 05

Key-locked guard prevents accidental switch
actuation
MSC-419 B66-10235 05

Latching mechanism operates in limited access
area
MSC-230 B66-10338 05

Lock-disconnect mechanism gives positive
release to joined bodies
M-F5-2147 B67-10123 05

Work platform is supported by self-locking
blades
M-F5-2297 B67-10180 05

I-376
Line adapter provides quick disconnect under moderate side loading

Reconnect mechanism

Boydbolt, a positive-latch, simple-release fastener

Astronaut's tool for withdrawing/replacing computer cards

Piezoelectric lock mechanism resists lockpicking

Countersunk headscrew retainer

Removal of retaining washers of the waffle-spring type

LOG PERIODIC ANTENNAS

Antenna configurations provide polarization diversity

LOGARITHMIC RECEIVERS

Transistor circuit increases range of logarithmic current amplifier

Use of both linear and logarithmic transfer functions to increase dynamic range of visual channel

LOGARITHMS

Logarithmic amplifier uses field effect transistors

Simple scale interpolator facilitates reading of graphs

Stress calculator speedily converts strain data

Solubility data are compiled for metals in liquid zinc

SiC/Si diode trigger circuit provides automatic range switching for log amplifier

General purpose computer programs for numerically analyzing linear ac electrical and electronic circuits for steady-state conditions

Study of corrosion of 1100 aluminum

Linear-log counting-rate meter uses transconductance characteristics of a silicon planar transistor

Accurate nine-decade temperature-compensated logarithmic amplifier

LOGIC

Parallel-to-serial biphase-data converter

Fluidic-thermochronic display device

LOGIC CIRCUITS

Frequency-shift-keyer circuit improves PCM

conversion for radio transmission

Computer circuit will fit on single silicon chip

Ring counter may be advanced or retarded by command signal

Novel circuit combines pulse stretcher with NOR gate

Pneumotachometer counts respiration rate of human subject

Logic redundancy improves digital system reliability

System selects framing rate for spectrophotograph camera

Logic circuit exhibits optimum performance

Delayed ripple counter simplifies square-root computation

Simple circuit performs binary addition and subtraction

Queuing register uses fluid logic elements

New television camera eliminates vidicon tube

Simulifed circuit corrects faults in parallel binary information channels

Binary sequence detector uses minimum number of decision elements

Exclusive-or logic circuit has useful properties

Single channel pulse-height analyzer operates in subnanosecond range

Logic system aids in evaluation of project readiness

Instrument automatically selects peak acceleration signal from several accelerometers

Bipolar current driver for memory circuits

Digital system provides superregulation of nanosecond amplifier-discriminator circuit

Nixie tube display unit employs time-shared logic

Apparatus enables automatic microanalysis of body fluids

One-count memory circuit prevents machine mode interaction
Fluid logic control circuit operates nutator actuator motor

Logic circuitry used to automatically test shielded cables

Hybrid solid state switch replaces motor-driven power switch

Computer program simulates physical systems by solving the simultaneous differential equations describing the systems

Solid state circuit averages multiple signals and rejects those varying significantly from the average

Current steering commutator offers versatility

Logic realization of simple majority voting connectives

Logic circuit detects both present and missing negative pulses in superimposed wave trains

Self-correcting, synchronizing ring counter using integrated circuit devices

Digital filter suppresses effects of nonstatistical noise bursts on multichannel scaler digital averaging systems

Sinusoidal angle sensor

Closed circuit TV system automatically guides welding arc

Short circuit protection for a power distribution system

Isolated, multiple-output voltage dc-to-dc converter

Simple tunnel diode circuit for accurate zero crossing timing

Integrated circuit with multiple collector current source

Self-starting circuit for switching regulators

Miniaturization of magnetic logic circuitry

Pneumatic analog-to-pulse frequency converter

Visual task analysis /VISTA/

Special purpose computer provides programmable digital filter for sampled-data control systems

Technique for improving solid state mosaic images

Pulse-code-modulation baseline correction for low signal-to-noise ratios

Delayed ripple counter simplifies square-root computation

Review of research and development in fluid logic elements

Exact minimal-state system reliability analysis

Programmed schedule holds for improving launch vehicle holds

Digital logic elements provide additional functions from analog input

Circuit maintains digital decision threshold at preset level

Frequency discriminator with binary output eliminates tuned circuits

Binary counter accumulates time by complementary preset

Queueing register uses fluid logic elements

Simplified circuit corrects faults in parallel binary information channels

Binary sequence detector uses minimum number of decision elements

Technique for improving solid state mosaic images

Design and sparing techniques to meet specified performance life

Closed circuit TV system automatically guides welding arc

Visual task analysis /VISTA/

Self-starting circuit for switching regulators

Miniaturization of magnetic logic circuitry

Pneumatic analog-to-pulse frequency converter

Visual task analysis /VISTA/

Special purpose computer provides programmable digital filter for sampled-data control systems

Technique for improving solid state mosaic images

Pulse-code-modulation baseline correction for low signal-to-noise ratios

Delayed ripple counter simplifies square-root computation

SUBJECT INDEX

Pocket-sized tone-modulated FM transmitter
MPO-11160 B69-10725 01

LOOPS
Variable frequency magnetic multivibrator generates stable square-wave output
GSFC-AP-21 B65-10124 01
Sensitive electrometer features digital output
GSFC-200 B65-10206 01
Simple BCD circuit accurately counts to 24
GSFC-317 B65-10225 01
Field effect transistor presents high input impedance in ac amplifier
JPL-500 B65-10232 01
Electronic phase-locked-loop speed control system is stable
JPL-SC-084 B66-10232 01
An investigation of phase-lock loop swept-frequency synchronization
M-FS-656 B66-10423 01
System precisely controls oscillation of vibrating mass
M-FS-1075 B67-10276 01
Torque meter aids study of hysteresis motor rings
M-FS-12219 B67-10412 01
Circuit measures hysteresis loop areas at 30 Hz
M-FS-13069 B67-10519 01
General frequency response program calculates frequency response of system, open at any specified element
M-FS-12817 B67-10521 06
Improved phase locked loop receiver
GSFC-09561 B68-10008 01
Phase-lock loop frequency control and the dropout problem
M-FS-13948 B68-10130 01
Performance statistics of the FORTRAN 4 library for the IBM system 360
ARG-10299 B69-10157 06
Reducing quantizer deadband with a range switching digital filter
M-FS-20419 B69-10259 01
Sweep frequency detector
MPO-10669 B69-10289 01
New passive telemetry system
HQ-10214 B69-10312 01
Simple, accurate automatic frequency control circuit
KSC-10393 B69-10323 01
A method for reducing sampling jitter in digital control systems
MPO-11068 B69-10338 01
Wide-band doublor and sine wave quadrature generator
MPO-11133 B69-10383 01

LOSSES
Correction for losses in optical birefringent networks, a concept
M-FS-20088 B68-10571 02
Reidentifying hardware after loss of serial number
M-FS-18133 B69-10059 05

LOUDNOISE
Electronic dummy for acoustical testing

LOW FREQUENCIES

LOVE
Magnetic latches provide positive overpressure control
NU-0057 B66-10279 01

LOW CONCENTRATIONS
Apparatus automatically measures solute residue content of volatile solvents
SAM-10032 B69-10292 03

LOW COST
Low-cost insulation system for cryostats eliminates need for vacuum
LWID-36 B63-10365 03
Connector for vacuum-jacketed lines cuts tuning system cost
LEWIS-66 B63-10367 05
Portable display paneling has wide use, easy take down and assembly
ARC-17 B63-10435 05
Refractory ceramic has wide usage, low fabrication cost
M-FS-67 B63-10481 03
Fine-particle filter prevents damage to vacuum pumps
LEWIS-106 B63-10489 05
Low-cost tape system measures velocity of acceleration
GSFC-85 B63-10512 01
Metal-bending brake facilitates lightweight, close-tolerance fabrication
ARC-29 B64-10069 05
Welding procedures improves quality of welds, offers other advantages
M-FS-32 B64-10309 01
Illuminated display panel is easily changed
M-SC-108 B65-10003 05
Regenerative fuel cell combines high efficiency with low cost
W0-090 B65-10363 01
Theroplastic rubberlike material produced at low cost
JPL-793 B66-10453 03
Multichannel pulse height analyzer is inexpensive, features low power requirements
HQR-10020 B67-10258 01

LOW DENSITY MATERIALS
Organic reactants rapidly produce plastic foam
LANCASTY-37 B65-10288 03
LOW PASS FILTERS

Lor pass filters

Unmanned seismometer levels self, corrects drift errors
GSFC-100 B63-10551 01

Computer determines high-frequency phase stability
GSFC-113 B63-10555 01

Voltage variable oscillator has high phase stability
LANGLEY-123 B65-10204 01

Hybrid computer technique yields random signal probability distributions
ABC-34 B65-10208 01

PCM magnetic tape system efficiently records and reproduces data
GSFC-375 B65-10311 01

Noncontacting vibration transducer has constant sensitivity
LANGLEY-99 B65-10392 01

Compact microwave mixer has high conversion efficiency
GSFC-197 B66-10625 01

Polarimeter provides transient response in nanosecond range
JPL-890 B67-10021 02

Circuit multiplies pulse width modulation, exhibits linear transfer function
HQ-56 B67-10055 01

TV synchronization system features stability and noise immunity
JPL-915 B67-10118 01

Stable ac phase and amplitude comparator
N-PS-13086 B67-10559 01

Light-controlled resistors provide quadrature signal rejection for high-gain servo systems
W50-340 B67-10552 01

Design of dissipative linear phase filters
N-PS-16938 B68-10572 01

Analyses of silicon dioxide, magnesium oxide, lead fluoride, bismuth as low-pass velocity filters for neutrons
ARG-10220 B69-10090 01

A method for reducing sampling jitter in digital control systems
NPO-11088 B69-10338 01

Phase-locked-loop phase modulator with high modulation index, low distortion
MSC-12247 B69-10816 05

Data processing method for a weak, moving telemetry signal
NPO-11003 B69-10639 01

Low pressure

Cryogenic filter method produces super-pure helium and helium isotopes
JPL-374 B63-10235 03

Sensitive low-pressure relief valve has positive seating against leakage
W00-004 B64-10278 05

Transducer measures force in vacuum environment
LEWIS-218 B66-10161 01

Magnetic latches provide positive overpressure control
NU-0057 B66-10279 05

Low rate flow switch can be used for gas or liquid
JPL-067 B66-10696 01

Subject Index

Cryogenic seal remains leaktight during thermal displacement
ARG-96 B67-10134 02

Aspirator increases relief valve poppet stroke
EQ-77 B67-10154 05

New class of compounds have very low vapor pressures
ARG-115 B67-10184 03

Automated tester permits precise calibration of pressure transducers from 0 to 1050 psi
MSC-10067 B67-10263 01

Experiments to investigate particulate materials in reduced gravity fields
N-PS-13008 B67-10394 02

Absolute low-pressure calibration system
N-PS-13085 B68-10160 02

Performance of low-pressure thermionic converters is evaluated
ARG-10276 B69-10090 01

Concept for improved vacuum pressure measuring device
N-PS-20172 B69-10421 02

Measurement of gas flow at extremely low pressures
MSC-13261 B69-10522 03

Fluid sample collection and storage device
MSC-10962 B69-10816 05

Low resistance

This film process forms effective electrical contacts on semiconductor crystals
N-PS-2394 B67-10142 01

Low speed

Dry film lubricant is effective at extreme loads
N-PS-628 B66-10256 03

Low temperature

High-pressure, low temperature electrical connector makes no-leak seal
MSC-276 B66-10079 02

Cryostat modified to aid rotating beam fatigue test
N-PS-435 B66-10083 03

Storage-stable foamy polyurethane is activated by heat
LANGLEY-187 B66-10111 03

Compound improves thermal interface between thermocouple and sensed surface
NU-0028 B66-10121 02

Mylar thin films are superconductive in strong magnetic fields at low temperatures
JPL-9C-174 B66-10122 02

Optical gyro pickoff operates at cryogenic temperatures
N-PS-407 B66-10128 01

Cryogenic liquid transfer system reduces residual bolloff
LEWIS-274 B66-10157 02

Improved adhesive for cryogenic applications cures at room temperature
W00-132 B66-10185 03

Freon provides heat transfer for solid CO2 calibration standard
N-PS-664 B66-10257 02

O-rings with mylar back-up provide high-pressure cryogenic seal
N-PS-603 B66-10278 05

I-380
Bimetallic devices help maintain constant sealing forces down to cryogenic temperatures M-FS-800 B66-10325 02
Composite gaskets are compatible with liquid oxygen, resist compression set M-FS-455 B66-10395 03
Metal boot permits fabrication of hermetically sealed splices in metal sheathed instrumentation cables NO-0083 B66-10704 05
Improved cryogenic refrigeration system JPL-731 B67-10128 02
Study of yttrium iron garnet rods reveals new magnetostatic echo mode NRC-37 B67-10153 01
Heat treatment study of aluminum casting alloy M-FS-2397 B67-10159 03
Study made of Raney nickel technology M-FS-205a B67-10208 03
High-strength tungsten alloy with improved ductility LEWTS-10257 B67-10340 03
Soft metal plating enables hard metal seal to operate successfully in low temperature, high pressure environment NBC-10083 B67-10350 03
Magnesium-lithium alloys developed for low temperature use M-FS-1541 B67-10365 03
Study made of dielectric properties of promising materials for cryogenic capacitors M-FS-13620 B67-10366 03
Lamp enables measurement of oxygen concentration in presence of water vapor MSC-10043 B67-10387 01
Dynamic valve seal is reliable at cryogenic temperatures M-FS-12967 B67-10526 05
Lead plated aluminum ring provides static high pressure seal for large diameter pressure vessel NUC-10008 B67-10539 05
Development of dual solid cryogens for high reliability refrigeration system GSPC-10188 B67-10644 02
Cryogenic seal concept for static and dynamic conditions M-FS-12964 B67-10673 05
Fire retardant foams developed to suppress fuel fires ARC-10098 B68-10358 03
Fiber glass prevents cracking of polyurethane foam insulation on cryogenic vessels M-FS-20058 B68-10406 02
Materials data handbook, aluminum alloy 6061 M-FS-20361 B69-10065 03
Adhesive for cryogenic temperature applications LEWTS-10264 B69-10074 03
Manual of typical low temperature mechanical properties of several materials M-FS-18331 B69-10179 03
Method for copper staining of germanium crystals

H-M-10403 B69-10257 03
Thermal conductivity probe M-FS-20566 B69-10780 03

LOW TEMPERATURE BRAZING
Coating method enables low-temperature brazing of stainless steel NO-0030 B65-10250 03
Manganese-alumina-ceramic glass eliminates rigid controls necessary in bonding metals to ceramics SAE-10012 B68-10204 03

LOW TEMPERATURE ENVIRONMENTS
Gallium useful bearing lubricant in high-vacuum environment LEWTS-12 B63-10337 03
Fluoride coatings make effective lubricants in molten sodium environment LEWTS-229 B66-10005 03
Self-contained clothing system provides protection against hazardous environments M-FS-536 B66-10201 05
Fluid damping reduces bellows seal fatigue failures M-BS-565 B66-10249 05
Resistance thermometer has linear resistance-temperature coefficient at low temperatures WO0-190 B66-10612 01
New weldable high strength aluminum alloy developed for cryogenic service M-FS-737 B66-10613 05
Cold solid propellant motor has stop-restart capability JPL-836 B66-10673 03
Excellent spring properties developed in two nickel alloys for use at cryogenic temperatures NUC-10094 B67-10349 03
Superconducting switch permits measurement of small voltages at cryogenic temperatures ARG-90260 B68-10007 01
Electrochemical cell has internal resistive heater element GSFC-10358 B68-10325 01

LOW TEMPERATURE PHYSICS
Development of low temperature battery LEWTS-10326 B67-10546 01
Synthesis of pure aromatic glycicyl esters for use as adhesives M-FS-12705 B67-10647 03

LOW TEMPERATURE TESTS
Cryogenic fatigue data developed for Inconel 718 M-FS-702 B67-10049 03
Dual-purpose chamber-cooling system NPO-10467 B68-10506 02
Tensile and fatigue properties of Inconel 718 at cryogenic temperatures M-FS-18192 B69-10068 03
Self-lubricating gear M-FS-14971 B69-10408 05

LOW VOLTAGE
Circuit protects regulated power supply against overload current GSPC-453 B66-10292 01
Wideband, high efficiency optical modulator requires less than 10 watts drive power M-FS-12733 B67-10289 01
Thermionic diode switching has high temperature application  

Solid state high-voltage pulser operates with low supply voltage  

Millivolt signal limiter  

LUBRICANT TESTS  
Polybifluoride disulfide mixtures make effective high-vacuum lubricants  

Electron bombardment improves vacuum chamber efficiency  

Machine tests slow-speed sliding friction in high vacuum  

High-temperature bearing lubricants  

LUBRICANTS  
Gallium useful bearing lubricant in high-vacuum environment  

Polybifluoride disulfide mixtures make effective high-vacuum lubricants  

Burnishing technique improves lubrication of threaded fasteners  

Run-in with chemical additive protects gear surface  

Gallium alloy films investigated for use as boundary lubricants  

Copper-acrylic enamel serves as lubricant for cold drawing of refractory metals  

Film coating permits low-force scribing  

Improved rolling element bearings provide low torque and small temperature rise in ultrahigh vacuum environment  

Valve effectively controls amount of contaminant in flow stream  

Development of technology for hot-drape forming of large torus sections  

Improved sample capsule for determination of oxygen in hemolyzed blood  

Electromechanical rotary actuator operates over wide temperature range  

Tools made of ice facilitate forming of soft, sticky materials  

Diffusion bond method of joining steel and a TPE-bronze composite  

Remote balance weighs accurately under high radiation  

A new solid lubricant  

LUBRICATING OILS  
Ohmmeter senses depletion of lubricant in journal bearings  

Unique gear design provides self-lubrication  

Radioactive tracer system detects oil contaminants in fluid lines  

Solid state high-voltage pulses operates with low supply voltage  

Design concept to decrease relative speed of ball bearings  

High-temperature bearing lubricants  

Dynamic-reservoir lubricating device  

Radioactive tracer system detects oil contaminants in fluid lines  

LUBRICATION SYSTEMS  
Miniature bearings lubricated by sonic dispersion method  

Squeeze-film gas bearing technology  

Dynamic-reservoir lubricating device  

Nozzles for size reclassification of microfog particles  

Self-lubricating gear  

LOGS  
Improved solderless connector is easily disconnected  

T-handle wrench has torque-limiting action  

Calibrated water tank facilitates proof-
loading of cranes and derricks  I-FS-15059 B69-10109 05
Adjustable wrench for electronic connectors  B69-10184 05
An improved method for electrical cable terminations  B69-10327 01

Simple circuit continuously monitors thermocouple sensor  B63-10567 01
Attachment converts microscope to point source autocollimator  B64-10124 05
Electronic device simulates respiration rate and depth  B64-10255 01
Electrodeless discharge lamp is easily started, has high stability  B66-10015 01
Lamp automatically switches to new filament on burnout  B66-10046 01
Thin carbon film serves as UV bandpass filter  B66-10060 02
Circular, explosion-proof lamp provides uniform illumination  B66-10156 02
Two-light circuit continuously monitors ac ground, phase, and neutral wires  B66-10163 01
Multicolor stroboscope pinpoints resonances in vibrating components  B66-10223 01
High-speed furnace uses infrared radiation for controlled brazing  B66-10268 02
A radiometer-pyrometer  B66-10606 01
Self-balancing line-reversal pyrometer automatically measures gas temperatures  B67-10268 01
Lamp enables measurement of oxygen concentration in presence of water vapor  B67-10387 01
Proposed method of rotary dynamic balancing by laser  B67-10452 02
Low cost SCR lamp driver indicates contents of digital computer registers  B67-10656 01
Superconductive thin film makes convenient liquid helium level sensor  B68-10341 01
Flow angle sensor and readout system  B69-10050 01
Automatic frequency control of voltage-controlled oscillators  B69-10569 01

Modification increases light output of injection-luminescent diodes  B65-10006 01
Luminescent screen composition for cathode ray tubes  B68-10056 01

Preparation of silver-activated zinc sulfide thin films  B68-10271 03
Rocket sonde measurements of ozone in the upper atmosphere  B69-10077 02
Mass culture of photobacteria to obtain luciferase  B69-10294 04

Rapid-response, light-exposure control system  B69-10238 01
Occulting-filter method for obtaining flashing-light visibility data  B69-10107 02

Solar-angle sensor has no moving parts  B63-10260 02
Variable light source with a million-to-one intensity ratio  B63-10424 03
System selects framing rate for spectrograph camera  B65-10086 01
High-intensity flashing beacon powered by mercury cells  B65-10361 01
Optical output enhances flowmeter accuracy  B65-10395 02
Small, high-intensity flasher permits continuous close-in photography  B66-10119 03
Apparatus presents visual display of semiconductor surface characteristics  B66-10200 01
Point-source light sensor circuit is insensitive to background light  B66-10502 01
Light-intensity modulator withstands high heat fluxes  B66-10532 02
Photocell shadowing technique improves light source detector  B66-10564 01
Cleanroom air sampler counts, categorizes, and records particle data  B67-10076 01
Self-balancing line-reversal pyrometer automatically measures gas temperatures  B67-10268 01
Nonreciprocal gain control for ring laser  B67-10653 02
Improvement in recording and reading holograms  B68-10347 02
Laser-Doppler gas-velocity instrument  B68-10349 01
Automatic solar lamp intensity control system  B68-10399 01
Fluorescent photography of spray droplets using a laser light source  B69-10177 02
Improved method of fabricating planar gallium arsenide diodes  B69-10271 01

MAGNETIC RECORDING

Circuit converts AC signals to FM for
magnetic recording
GSFC-227 B65-10001 01

Hybrid computer technique yields random
signal probability distributions
ARC-34 B65-10208 01

PCN magnetic tape system efficiently records
and reproduces data
GSFC-375 B65-10311 01

An improved magnetic tape recorder
GSFC-08259 B67-10646 01

Degas in rolling element bearings may be
detected early
BG-10031 B67-10658 01

Scan rate converter for tape recording and
playback of TV pictures
NFO-10166 B67-10676 01

Harmonic distortion analyzer speeds setup of
magnetic tape recorders
GSFC-10198 B68-10254 01

Method of reducing time base error in

IAGNETIC RECORDER

Circuit converts AC signals to FM for
magnetic recording
GSFC-227 B65-10001 01

MAGNETIC RESONANCE

Magnetometer measures orthogonal components
of magnetic fields
GSFC-395 B65-10315 01

Coordination chemistry in fused-salt
solutions
ABG-10469 B69-10423 03

MAGNETIC SHIELDING

Electron beam welding of copper-nickel
facilitated by circular magnetic shields
M-FS-569 B66-10215 05

Improved ferrous shielding for flat cables
M-FS-14524 B69-10401 01

MAGNETIC SIGNALS

Magnetometer measures orthogonal components
of magnetic fields
GSFC-395 B65-10315 01

A theoretical study of radar backscatter
from distributed targets with emphasis on
polarization dependence
M-FS-13775 B69-10560 02

MAGNETIC STORAGE

Transfluxor circuit amplifies sensing current
for computer memories
JPL-406 B63-10255 01

Density trace made with computer printout
GSFC-322 B65-10200 01

Multipulse current source offers low power
losses and high reliability
LANGLEY-68 B67-10603 01

Optically exciting a magnetic memory - A
feasibility study
M-FS-14054 B69-10060 02

MAGNETIC TAPES

Small digital recording head has parallel bit
channels, minimizes cross talk
JPL-0029 B63-10284 01

Low-cost tape system measures velocity of
acceleration
GSFC-85 B63-10512 01

Compact cartridge drives coded tape at
constant readout speed
JPL-872 B64-10222 01

Security warning system monitors up to
fifteen remote areas simultaneously
ESC-66-39 B66-10546 01

Digital computer processing of X-ray photos
JPL-792 B67-10005 04

Data retrieval system provides unlimited
hardware design information
MSC-1164 B67-10170 01

Structural Analysis and Matrix
Interpretive System /SMIS/
NFO-10130 B67-10171 01

Computer program samples digital data for
CRT display
ESC-999 B67-10249 01

Transient Analysis Generator /TAG/
simulates behavior of large class of
electrical networks
NFO-10031 B67-10319 06

Saturn S-2 Automatic Software System
/SSB/ S-FS-1741 B67-10405 06

Computer program generates averaged value
data tapes

SUBJECT INDEX

M-PS-12728 B67-10411 06
Technique for measuring magnetic tape interlayer adhesion NPO-10011 B67-10417 03
Device measures static friction of magnetic tape GSFC-10360 B67-10586 03
Conceptual serve technique for controlling tape drive M-PS-12955 B67-10595 01
X-Y plotter adapter developed for SDS-930 computer NPO-10011 B68-10417 03
Analysis of flutter in tape transport systems M-PS-11970 B68-10027 01
Computer magnetic tape rehabilitation study GSFC-10283 B68-10355 05
Magnetic tape transport controlled by rotating transducer heads GSFC-463 B68-10079 01
Fully automatic telemetry data processor GSFC-10576 B68-10336 01
A request-oriented information selection program LEWIS-10255 B68-10451 06
Long-term data storage and retrieval system, a concept M-PS-14789 B68-10505 01
Weight Control System M-PS-15028 B69-10041 06
Dewpoint temperature inversions analyzed ARG-10316 B69-10057 02
Electronic visualization of gas bearing behavior LEWIS-10711 B69-10073 01
Microscopes and computers combined for analysis of chromosomes ARG-10256 B69-10088 04
Structural Analysis and Matrix Interpretive System /SAMIS/ NPO-10839 B69-10093 01
On-line computer system for use with low-energy nuclear physics experiments is reported ARG-10257 B69-10094 01
ABTRAN on-site tracking prediction program NPO-10836 B69-10103 06
SPAN - Terminal sterilization process analysis program NPO-10804 B69-10104 06
VICAR-DIGITAL image processing system NPO-10770 B69-10139 06
Data processing method for a weak, moving telemetry signal NPO-11003 B69-10639 01
Biomedical bulk data processing program PBC-10015 B69-10720 06
Solar activity history model M-PS-20529 B69-10776 01

MAGNETIC VARIATIONS
Study of yttrium iron garnet rods reveals new magnetostatic echo mode ERE-37 B67-10153 01

MAGNETIZATION
Study reveals effect of aluminum on saturation moment of Fe-Mn alloys ARG-90259 B68-10172 03

MAGNETOHYDRODYNAMIC FLOW
Study of convective magnetohydrodynamic channel flow ARG-10102 B68-10181 02

MAGNETOHYDRODYNAMIC GENERATORS
Segmented electrode increases operating pressure of MHD accelerator LANGLEY-95 B65-10356 02
Magnetohydrodynamic generators using two-phase liquid-metal flows ARG-10168 B69-10162 01
Channel-wall limitations in the magnetohydrodynamic induction generator ARG-10126 B69-10255 02
Liquid-metal-piston MHD generator ARG-10500 B69-10771 02

MAGNETOHYDRODYNAMICS
Wire winding increases lifetime of oxide coated cathodes LEWIS-154 B65-10032 03
Studies of cycles for liquid-metal magnetohydrodynamic generation of power ARG-10256 B69-10194 02

MAGNETOMETERS
Improved magnetometer uses toroidal gating coil GSFC-249 B65-10103 01
Electromechanical flowmeter accurately monitors fluid flow GSFC-357 B65-10273 01
Magnetometer measures orthogonal components of magnetic fields GSFC-395 B65-10315 01
Thermal motor positions magnetometer sensors ARC-51 B66-10078 05
A polar graphic method for determining the attitude of rocket vehicles GSFC-10860 B69-10591 02

MAGNETORESISTIVITY
Magnetoresistors monitors relay performance M-PS-1754 B66-10650 01

MAGNETOSTATIC FIELDS
Study of yttrium iron garnet rods reveals new magnetostatic echo mode ERE-37 B67-10153 01

MAGNETOSTRICTION
A conceptual design for squeeze film bearings M-PS-573 B67-10153 01
Ultrasonic temperature measuring device LEWIS-10446 B66-10319 01

MAGNETORONS
Ion pump provides increased vacuum pumping speed NPO-13 B65-10239 02
Magneton tuner has locking feature XWP-09771 B69-10119 05

MAGNETS
Stepping switch with simple actuator provides many contacts in small space JPL-122 B63-10118 01
Ball bearing used in design of rugged flowmeter LEWIS-159 B68-10170 05
Spring loaded beaded cable makes efficient...

NU-0029 B65-10249 01

Back mount device quickly inserts or extracts chassis units
MSC-244 B65-10385 05

Fingertip current control facilitates use of arc welding gun
MSC-299 B66-10092 05

Soldering tool heats workpieces and applies solder in one operation
LEWIS-247 B66-10115 05

Hand drill adapter limits holes to desired depth
MSC-346 B66-10123 05

Safety switch permits emergency bridge crane shutdown
M-PS-549 B66-10168 05

Tool enables proper mating of accelerometer and cable connector
M-PS-611 B66-10208 05

Hand tool permits shrink sizing of assembled tubing
MSC-504 B66-10239 05

Lathe chuck key incorporates safety feature
MSC-506 B66-10243 05

Modified soldering iron speeds cutting of synthetic materials
M-PS-725 B66-10246 05

Ultrasound hand tool allows convenient scanning of spot welds
M-PS-539 B66-10289 02

Latching mechanism operates in limited access area
MSC-230 B66-10338 05

Tool forms right angles in component leads
M-PS-722 B66-10346 05

Human transfer functions used to predict system performance parameters
LANGLEY-203 B66-10379 01

Special tool kit aids heavily garmented workers
MSC-163 B66-10403 05

Rigid-body motion extracted from total motion of a flexible body
ARC-63 B67-10081 05

Tool facilitates installation of Marmon clamps
M-PS-2039 B67-10105 05

Tester automatically checks insulation of individual conductors in multiple-strand cables
MSC-10068 B67-10260 01

Pocket-size manual tape reader device aids computer tape checking
KSC-10058 B67-10361 01

Multiple meter monitoring circuits served by single alarm
MSC-10984 B67-10369 01

Eccentric drive mechanism is adjustable during operation
M-PS-2576 B67-10373 05

Use of color-coded sleeve shutters accelerates oscillograph channel selection
KSC-10092 B67-10382 01

Continuous wave detector has wide frequency range
M-PS-1049 B67-10386 01

Automatic telemetry checkout system
M-PS-12580 B67-10402 01

Versatile impact hand tool
M-PS-20140 B68-10371 05

Gun facilitates adhesive bonding of studs to surfaces
M-PS-20299 B69-10009 05

Two-axis winch installer for heavy ducts in confined space
M-PS-14254 B69-10062 05

J-beveling of pipe ends with a hand-held tool
KSC-10356 B69-10229 05

Foot-operated cell-counter
ARG-10315 B69-10351 01

Improved perceptual-motor performance measurement system
H-PS-10123 B69-10385 01

MANUALS
Workmanship standards for fusion welding
NUC-10050 B67-10200 05

Handbooks describe eddy current techniques used in nondestructive testing of metal parts and components
M-PS-13172 B67-10374 03

Static structural analysis of shell-type structures
MSC-11555 B68-10066 03

Numerical Control Machine Data Manual
M-PS-14342 B68-10080 05

Manual of industrial diamonds plus dressing and grinding criteria for machining superalloys
M-PS-14582 B68-10239 05
Hydrogen safety manual
LEWIS-10487 B68-10323 01

Training manuals for nondestructive testing using magnetic particles
I-FS-20187 B68-10391 03

Chemistry laboratory safety manual available
SAN-10030 B68-10419 03

Training manual on optical alignment instruments
I-FS-20292 B68-10574 02

Manual of typical low temperature mechanical properties of several materials
I-FS-18331 B69-10179 03

Sterilization training manual
I-FS-20437 B69-10277 04

Instruction manuals for liquid penetrant nondestructive testing
I-FS-14010 B69-10278 05

COBRA II programming manual
ARG-10463 867-10282 06

Bicroelectronic device data handbook
ERC-10322 B69-10687 01

Bellows design features low spring rate and long life
MSC-521 B68-10190 05

Vis-A-Plan /visualize a plan/ management technique provides performance-time scale
ESC-10073 B67-10260 06

Materials data handbook, Inconel alloy 718
I-FS-2348 B67-10282 03

Computerized parts list system coordinates engineering releases, parts control, and manufacturing planning
NWC-10073 B67-10348 06

Effect of surface irregularities on bellows fatigue life
I-FS-14914 B68-10229 05

An investigation of particle mixing in a gas-fluidized bed
ARG-10182 B68-10407 05

Conditioning flat conductors for flat conductor cable production
I-FS-14914 B68-10429 01

Low cost techniques for fabricating loped bearings
LEWIS-10296 B68-10441 05

Environmental test planning, selection and standardization aids available
SAN-10028 B68-10445 06

Rocket engine analog simulation
I-FS-16511 B68-10511 01

Integrated metal transistor leads
GSFC-90536 B68-10518 01

Vertical boring mill capacity is increased
I-FS-16196 B68-10530 05

FFS-fluorocarbon liners for flexible hoses
I-FS-16480 B68-10288 05

Possible correlation between work-hardening and fatigue-failure
ARG-10371 B69-1044 03

A new method for fabrication of flexible vacuum purge jackets
I-FS-12646 B69-10564 03

Sealed container sampling device
GSFC-10690 B69-10682 03

Photoelectric scanner makes detailed work function maps of metal surface
JPL-SC-176 B66-10440 01

Optical automatic gain channel
I-FS-1550 B66-10599 02

Moveable RF probe eliminates need for calibration in plasma accelerators
LEWIS-10127 B67-10362 01

Surface temperature mapping with infrared photographic pyrometry
LEWIS-10763 B69-10113 01

Combination ranging system and mapping radar
NPO-11001 B69-10325 01

Magnetic field mapper
LEWIS-10762 B69-10476 01

Long range holographic contour mapping concept
HQ-10350 B69-10700 02

Visual task analysis /VISTA/
I-FS-14716 B69-10394 06

Concentrations of the naturally occurring radionucleides Pb-210, Po-210, and Ra-226 in aquatic fauna
ARG-10345 B69-10258 02

An overview of electromagnetic interference problems in spacecraft
NPO-11170 B69-10362 01

Solid state detectors monitor relay contacts
JPL-785 B66-10396 01

Sea dye marker provides visibility for 20 hours
MSC-714 B66-10313 03

A calibration means for spectrum analyzers
MSC-10987 B67-10254 01

Technique for strip chart recorder time notation
GSFC-473 B67-10196 01

Tritiated alumina serves as reagent for self-labeling analysis
ARG-209 B67-10315 03

Computer program utilizes FORTRAN 4 subroutines for contour plotting
NPO-10127 B67-10323 06

Effect of preparation procedures on intensity of radioautographic labeling is studied
ARG-10032 B67-10500 04

Reidentifying hardware after loss of serial number
I-FS-10133 B69-10059 05

Control jet placement on spacecraft
MSC-13365 B69-10671 01

Space trajectories program for MBH 7090
NPO-10125 B67-10172 06

Parametric up-converter increases flexibility

I-396
SUBJECT INDEX

BASS
SPECTROBETERS
of maser
KSC-67-98 867-10104 01
Highly stable microwave delay line
NPO-09828 867-10642 01

MASERS
Development of dual solid cryogens for
high reliability refrigeration system
GSFC-10188 867-10644 02
One hundred MHz voltage-controlled
oscillator
NPO-11004 869-10133 01
Sweep frequency detector
NPO-10669 869-10289 01
Automatic tuning of hydrogen masers
GSFC-10127 869-10452 01
Electrolytic separation of crystals of
transition-metal oxides
ANS-10506 869-10642 03

MASKING
Reusable neoprene jacket protects parts for
chemical etching
W00-071 865-10179 03
Optical device enables small detector to see
large field of view
W00-253 866-10263 02
Process facilitates photosensitive mask
alignment on SiC crystals
M-FS-2308 867-10184 01
Multiple-mask chemical etching
MSC-13114 869-10221 01
Improved method of fabricating planar gallium
arsenide diodes
XNP-04235 869-10271 01
Masking of aluminum surface against
anodizing
M-FS-12964 869-10335 05

MASKS
Protective clothing for workers with 5-kw
and 20-kw short-arc lamps
NPO-11155 869-10218 01

MASS
Device enables measurement of moments of
inertia about three axes
GSFC-49 865-10176 05
Quartz crystals detect gas contaminants
during vacuum chamber evacuation
NPO-10144 867-10205 01
System precisely controls oscillation of
vibrating mass
M-FS-1875 867-10276 01
Application of distorted models in
developing scaled structural models
M-FS-2540 867-10321 05
Eddy current probe measures size of cracks
in nonmetallic materials
M-FS-14059 867-10645 03
Water-glycol system volume calculation
MSC-15193 869-10563 02
Deposition monitor and control
NPO-10706 869-10722 01

MASS DISTRIBUTION
Equations provide tabular information on
effects of uniform and variable loads on
thin, flat, circular plates
ABG-151 866-10601 05
Device measures reaction engine thrust vector
deviations

MASS SPECTROMETERS
JPL-EC-163 866-10642 05
Substitution of stable isotopes in
Chlorella
ABG-10258 869-10197 04

MASS FLOW
Pump simulator provides variable
pressure-flow characteristics
LEWIS-10122 867-10453 05

MASS FLOW RATE
Instrument continuously measures density
of flowing fluids
LEWIS-309 867-10080 01
Computer program for high pressure real
gas effects
LEWIS-10820 869-10222 06

MASS RATIOS
Dust particle injector for hypervelocity
accelerators provides high charge-to-mass
ratio
GSFC-509 866-10347 01
Advances in light-gas gun technology
M-FS-14270 868-10288 05
Parameters for good welding of copper to
nickel
M-FS-20353 869-10302 05

MASS SPECTRA
Xenon fluorides show potential as
fluorinating agents
ABG-913 867-10185 03

MASS SPECTROMETERS
Ion pump provides increased vacuum pumping
speed
MEO-13 865-10239 02
Highly sensitive solids mass spectrometer
uses inert-gas ion source
ERG-11 866-10114 02
Subminiaturized gas chromatograph gives fast,
efficient analysis
JPL-735 866-10182 01
Submicron holes in thin films increase
sampling range of mass spectrometers
JPL-SC-097 866-10380 03
Leak locator for vacuum jacketed pipelines
eliminates need for removal of outer jacket
M-FS-888 866-10412 01
Fixture facilitates helium leak testing of
pipe welds
M-FS-2167 867-10178 05
Aluminum and stainless steel tubes joined
by simple ring and welding process
M-FS-13120 867-10472 05
Effects of surface preparation on quality
of aluminum alloy weldments
M-FS-13152 868-10302 03
Diffusion of trace gases for leak detection
- a study
M-FS-20254 869-10067 03
Ion-retarding lens improves the abundance
sensitivity of tandem mass spectrometers
ABG-10365 869-10166 02
Spherical ion source
MXP-08898 865-10186 01
Ion mass spectrometer for special uses
EQ-10418 865-10530 02
Miniaturized high-resolution mass/charge
spectrograph / design study /
MSC-13279 869-10554 02
MASS SPECTROSCOPY

Mass-spectrometric study of the rhenium-oxygen system
ARG-10421 B69-10645 02

Monopole mass spectrometer with improved sensitivity and reduced background
BQ-10476 B69-10666 01

MASS SPECTROSCOPY

Reliable method for testing gross leaks in semiconductor component packages
IEEE-10150 B68-10566 01

Mass spectograph analysis
ISC-13239 B69-10113 06

Qualitative and quantitative analysis of mixtures of compounds containing both hydrogen and deuterium
ARG-10312 B69-10177 04

MASS TRANSFER

Computer simulation program is adaptable to industrial processes
LEWIS-240 B66-10268 01

Characteristics of fluidized-packed beds
ARG-10049 B68-10278 03

An investigation of particle mixing in a gas-fluidized bed
ARG-10182 B68-10407 05

Mass transport mechanism in porous fuel cell electrodes
BQ-10343 B69-10135 01

MATCHING

Polarizing keys prevent mismatch of connector plugs and receptacles
MSC-443 B66-10251 01

Human transfer functions used to predict system performance parameters
LANGLEY-203 B66-10379 01

Device for diode tuning in a stripline varactor harmonic multiplier
N-PS-20153 B69-10013 01

MATERIAL ABSORPTION

Bidirectional torque filter eliminates backlash
GSFC-335 B65-10148 05

Precise doping of metals by small gas flows
LEWIS-10444 B68-10526 03

Rapid and precise analysis for calcium in blood serum
ARG-10246 B69-10160 04

MATERIALS

Tube welding and brazing
N-PS-20388 B69-10085 05

Manual of typical low temperature mechanical properties of several materials
N-PS-18331 B69-10179 03

Tools made of ice facilitate forming of soft, sticky materials
KSC-10262 B69-10199 05

MATERIALS HANDLING

Self-balancing beam permits safe, easy load handling under overhang
N-PS-84 B63-10571 05

Speed-sensing device aids crane operators
WS-4 B64-10006 05

Filler device for handling hot corrosive materials
MSC-85 B66-10166 03

Dispensing system eliminates torsion in deployed hoses
MSC-80 B65-10185 05

SUBJECT INDEX

Hollow plastic hoops prevent thermocouple in storage and handling
NQ-0023 B65-10256 05

Dispenser leak-tests and sterilizes rubber gloves
MSC-285 B66-10166 03

Body-fitted harness provides safe and easy component handling
N-PS-553 B66-10202 05

Adjustable cutting guide aligns and positions stacks of material
MSC-321 B66-10210 05

Fiberglass container shells form contamination-free storage units
WQ-0275 B66-10217 05

Critical parts are stored and shipped in environmentally controlled reusable container
N-PS-703 B66-10258 05

Impact and puncture resistant material protects parts from damage
MSC-747 B66-10375 05

Universal transloader moves delicate equipment without stress
MSC-654 B66-10384 05

Carriage system remotely moves drawer over extended distance
WQ-0092 B66-10711 05

Hydrostatic force used to handle oversized, heavy objects
EQ-90 B67-10167 05

Apparatus for fabrication of americium-beryllium neutron sources prevents capsule contamination
ARG-184 B67-10202 05

Computer magnetic tape rehabilitation study
GSFC-10283 B68-10035 05

High-temperature bearing-cage materials
LEWIS-10403 B68-10176 05

Packaging criteria for transportation and handling shock and vibration
N-PS-13007 B68-10219 05

Contamination control handbook
N-PS-20165 B68-10392 03

Inflatable bladder to facilitate handling of heavy objects - A concept
N-PS-14272 B69-10069 05

Cover protects critical electrical connectors against damage during handling
N-PS-15462 B69-10526 05

MATERIALS RECOVERY

Separation technique provides rapid quantitative determination of cesium-137 in irradiated nuclear fuel
N-PS-10047 B67-10194 03

Device for obtaining separation of oxygen
LANGLEY-11007 B69-10477 01

MATERIALS SCIENCE

Development of technology for hot-drape forming of large torus sections
N-PS-12141 B67-10341 05

MATERIALS TESTS

Graphite element serves as radiant heat source
N-PS-105 B65-10218 01

Multiple test chamber exposes materials to various environments
N-PS-179 B65-10268 01

</table>
Cut-through tester accurately measures insulation failure rates

Improved sample capsule for determination of oxygen in hemolyzed blood

Low energy ohmmeter can be used to test sensitive circuits, other meters

Random access-random release relay switching matrix

Liquid-metal heat transfer in a co-current-flow, double-pipe heat exchanger is investigated

Liquid gallium rotary electric contact

A laboratory method for precisely determining the micro-volume-magnitudes of liquid efflux

Pocket-sized tone-modulated FM transmitter

Mercury Analogs

Apparatus enables accurate determination of alkali oxides in alkali metals

Mercury ABS

Emission tester for high-power vacuum tubes

Mercury Compounds

Multiple port pressure scanner valve features greater accuracy, quicker data

Development of low temperature battery

Mercury Lamps

High-intensity flashing beacon powered by mercury cells

Mercury Vapor

Igniting system for mercury lamps protects transistorized sustaining supply

Neutrodial Flow

Computer program performs flow analysis through turbines

Mesh

Fine-mesh screen made by simplified method

Combustion chamber struts can be effectively transpiration cooled

Mounting method improves electrical and vibrational characteristics of screen electrodes

Adding calcium improves lithium ferrite core

Mercury Analogs

Apparatus enables accurate determination of alkali oxides in alkali metals

Neutrodial Flow

Computer program performs flow analysis through turbines

Mesh

Fine-mesh screen made by simplified method

Combustion chamber struts can be effectively transpiration cooled

Mounting method improves electrical and vibrational characteristics of screen electrodes

Adding calcium improves lithium ferrite core

Neurosphere

Rocket sonde measurements of ozone in the upper atmosphere

Metabolic Waste

Improved mouse cage provides versatility and ease in handling laboratory mice

Metabolism

Plant respirometer enables high resolution of oxygen consumption rates

Study made of relationship between growth and metabolism

Study of behavior of sterols at interfaces

Investigation of temperature dependence of development and aging

Qualitative and quantitative analysis of mixtures of compounds containing both hydrogen and deuterium

Life detection

Quantitative determination of flavin nucleotide using the bacterial bioluminescent reaction

Metal Bonding

Electronic modules easily separated from heat sink

Refractory metals welded or brazed with tungsten inert gas equipment

Brazing method produces solid-solution bond between refractory metals

Assembly jig assures reliable solar cell modules

Correlation established between heat transfer and ultrasonic transmission properties of copper braise bonds

Method of improving contact bonds in silicon integrated circuits

Integrated Metal Transistor Leads

Study of high temperature bearing materials

Explosive bonding of metal-matrix composites

Metal Coatings

Nickel/tin coating protects threaded fasteners in corrosive environment

FTFE-aluminum films serve as neutral density filters

Jig protects transistors from heat while tinning leads

Composites of porous metal and solid lubricants increase bearing life

Subject Index
Study to minimize hydrogen embrittlement of ultrahigh-strength steels
M-PS-2455 B67-10141 03

Sensing disks for slug-type calorimeters have higher temperature stability
M-PS-1867 B67-10161 01

Iron serves as diffusion harrier in thermally regenerative galvanic cell
ARG-29 B67-10189 03

Soft metal plating enables hard metal seal to operate successfully in low temperature, high pressure environment
UUC-10083 B67-10350 03

Metal flame spray coating protects electrical cables in extreme environment
UUC-10077 B67-10351 03

Electron beam selectively seals porous metal filters
LEWIS-10162 B68-10331 05

Investigation of spacecraft coatings
M-PS-20458 B69-10181 06

Sprayed shielding of plastic-encapsulated electronic modules
M-PS-13570 B69-10189 03

Metal COMBUSTION
Rapid-response, light-exposure control system
NPO-10238 B68-10502 01

Metal COMPOUNDS
Trace levels of metallic corrosion in water determined by emission spectrography
MSC-1193 B66-10701 03

Refractory-metal compound impregnation of polytetrafluoroethylene
LEWIS-10733 B69-10072 03

Production of metals and compounds by radiation chemistry
LEWIS-10231 B69-10123 03

Metal CUTTING
Threaded pilot insures cutting tool alignment
M-PS-527 B66-10074 05

Pipe cutting tool is useful in limited space
MSC-36 B66-10102 05

Portable power tool machines weld joints in field
M-PS-258 B66-10145 05

Adjustable knife cuts honeycomb material to specified depth
MSC-475 B66-10237 05

Hollow needle used to cut metal honeycomb structures
MSC-486 B66-10244 05

Vibrator improves spark erosion cutting process
BG-0071 B66-10333 01

Study made of explosive cutting in simulated space environments
M-PS-1397 B67-10040 01

Variable-speed, portable routing skate
M-PS-13772 B67-10525 05

Cold machining of high density tungsten and other materials
ARG-10289 B69-10110 05

J-beveling of pipe ends with a hand-held tool
KSC-10356 B69-10229 05

Metal FATIGUE
Study to minimize hydrogen embrittlement of ultrahigh-strength steels
M-PS-2455 B67-10141 03

Predicting fatigue life of metal bellows
M-PS-18096 B66-10026 05

Effect of surface irregularities on bellows fatigue life
M-PS-18480 B68-10229 05

Tensile and fatigue properties of Inconel 718 at cryogenic temperatures
M-PS-16192 B69-10068 03

Coatings decrease metal fatigue failure
ARC-10015 B69-10176 03

Metal Files
High permeability semiconductors permit close-tolerance soldering
GSFC-319 B65-10134 05

PTFE-aluminum films serve as neutral density filters
LANGLEY-189 B66-10017 02

Insulation for cryogenic tanks has reduced thickness and weight
M-PS-326 B66-10183 02

Aluminum core structures brazed without use of flux
M-PS-659 B66-10360 05

Self-supported aluminum thin films produced by vacuum deposition process
ARC-58 B66-10387 03

Nonelectrolytic tantalum capacitors developed
M-PS-1546 B66-10552 01

Mechanism facilitates coating of inner surfaces of metal cylinders
GSFC-515 B66-10698 05

Oxide film on metal substrate reduced to form metal-oxide-metal layer structure
ARG-48 B67-10187 03

Ultraminiature manometer-tipped cardiac catheter
ARC-10054 B67-10669 01
SUBJECT INDEX

Linear-log counting-rate meter uses transconductance characteristics of a silicon planar transistor ARG-10158 B69-10191 01

Improved vacuum deposition apparatus NPO-11005 B69-10365 02

Design of multilayer insulation systems ARC-10166 B69-10615 05

METAL FOILS

Ceramic-coated boat is chemically inert, provides good heat transfer LANGLEY-90 B65-10063 05

Weld leaks rapidly and safely detected N-PS-362 B65-10265 01

Superconductor shields test chamber from ambient magnetic fields JPL-627 B65-10297 02

Copper foil provides uniform heat sink path MSC-262 B66-10004 02

Spray-on technique simplifies fabrication of complex thermal insulation blanket M-PS-497 B66-10053 03

Reflective insulator layers separated by bonded silica beads MSC-215 B66-10070 03

Specimen holder design improves accuracy of X-ray powder analysis JPL-SC-165 B66-10075 02

Mounting improves heat-sink contact with beryllia washer MSC-194 B66-10144 01

Thin-film gage measures low heat-transfer rates LANGLEY 205 B66-10180 01

Standards for electron probe microanalysis of silicates prepared by convenient method GSFC-469 B66-10234 03

Large capacitor performs as a distributed parameter pulse line LWIS-176 B66-10291 01

Aluminum core structures brazed without use of flux M-PS-659 B66-10360 05

Impact and puncture resistant material protects parts from damage MSC-747 B66-10375 05

Non-electrolytic tantalum capacitors developed N-PS-1546 B66-10552 01

An improved soft X-ray photoionization detector GSFC-540 B67-10072 02

Fast-acting calorimeter measures heat output of plasma gun accelerator LWIS-386 B67-10192 01

Inexpensive cryogenic insulation replaces vacuum jacketed line NUC-10061 B67-10264 02

Study made of dielectric properties of promising materials for cryogenic capacitors M-PS-13620 B67-10366 03

Foil radiometer accessory improves measurements M-PS-12684 B67-10448 01

Improved cavity-type absolute total-radiation radiometer JPL-607 B67-10557 01

Neutron detector simultaneously measures fluence and dose equivalent ARG-10071 B67-10597 02

Analyses of silicon dioxide, magnesium oxide, lead fluoride, bismuth as low-pass velocity filters for neutrons ARG-10220 B69-10211 02

Design of a strain-gage probe ARG-10336 B69-10343 05

Foil bearing support for high-speed rotor HQ-10315 B69-10661 05

METAL HYDRIDES

Effects of hydrogen on metals M-PS-20364 B66-10138 03

Improved vacuum deposition apparatus NPO-11009 B69-10365 05

Design of multilayer insulation systems ARC-10166 B69-10615 05

METAL JOINTS

High pressure tube coupling requires no threads or flares MSC-600 B66-10285 05

Brazing process provides high-strength bond between aluminum and stainless steel M-PS-803 B66-10352 05

Thin plastic sheet eliminates need for expensive plating M-PS-1896 B66-10681 03

Braze joint quality tested electromagnetically M-PS-12795 B67-10333 01

Tube-to-header joint for bimetallic construction LWIS-10262 B67-10464 05

Study made of transfer of heat energy through metal joints in vacuum environment M-PS-12534 B67-10465 02

Nondestructive testing of welds on thin-walled tubing M-PS-18144 B67-10402 01

Use of medical and dental x-ray equipment for nondestructive testing MSC-13859 B69-10553 01

METAL-REACTOR BONDING

Self sealing disconnector for tubing forms metal seal after breakaway JPL-354 B69-10226 05

Stringent cleaning technique assures reliable epoxy bond GSFC-161 B64-10142 03

New alloy brazes titanium to stainless steel MSC-102 B65-10060 05

Stringent cleaning technique assures reliable epoxy bond GSFC-161 B64-10142 03

New alloy brazes titanium to stainless steel MSC-102 B65-10060 05

SUBJECT INDEX

H-FS-716 B66-10334 01
Gage of 6.5 per cent Si-Fe sheet is chemically reduced MSC-537 B66-10454 03

Prefaced stiffeners used to fabricate structural components for pressurized tanks H-FS-1796 B66-10688 05

Silver plating ensures reliable diffusion bonding of dissimilar metals H-FS-1975 B67-10124 03

Coating protects magnesium-lithium alloys against corrosion H-FS-2446 B67-10149 03

Welding of AlMg350 and AlMg355 steel H-FS-2314 B67-10292 05

Development of technology for hot-drape forming of large torus sections H-FS-12141 B67-10341 05

Reparable, high-density microelectronic module provides effective heat sink H-FS-13075 B67-10436 03

Fuel cell life improved by metallic sinter activation after electrode assembly welding H-FS-10965 B67-10436 03

Aluminum and stainless steel tubes joined by single ring and welding process H-FS-13120 B67-10472 05

Weld joint strength and mechanical properties in 2219-T81 aluminum alloy LEWIS-10479 B68-10032 05

Thermal radiation shields for piping in vacuum environments LEWIS-10899 B69-10187 05

Technique for anchoring fasteners to honeycomb panels LEWIS-10888 B69-10187 05

Explosive bonding of metal-matrix composites H-FS-20657 B69-10004 05

METAL SHEELS
Analysis of filament reinforced metal-shell pressure vessels LEWIS-10352 B69-10005 06

Magnetostatic foring for precision sizing and joining of large-diameter tubes H-FS-20481 B69-10262 06

METAL SPINNING
Stainless-steel elbows formed by spin forging H-FS-122 B69-10005 06

METAL STRIPS
Metal strip forms 21 foot boom, rolls up for compact storage GSFC-151 B69-10005 05

Mounting for diodes provides efficient heat sink H-FS-197 B69-10187 01

Simple control device senses solar position JPL-638 B69-10187 01

Compact retractor protects cabling loops H-FS-561 B69-10187 05

Sheet metal strip unrolls to form circular boom GSFC-423 B69-10187 05

New television camera eliminates vidicon tube H-FS-472 B69-10187 05

Diffusion bonding makes strong seal at flanged connector H-FS-637 B69-10187 05

Calibrating ultrasonic test equipment for checking thin metal strip stock NSC-10069 B67-10250 05

Machine tests slow-speed sliding friction in high vacuum H-FS-12341 B67-10379 05

Composite solar cell matrix is reliable, lightweight and flexible NPS-10821 B67-10503 05

Development of helical seal for high temperature /2000 degrees F/ application M-FS-13304 B67-10655 05

Inspection criteria ensure quality control of parallel gap soldering M-FS-16330 B68-10257 05

Helical tape forming device GSFC-10830 B69-10187 05

Load integral with the internal interconnection that penetrate the molded wall of a package LANGLEY-10228 B69-10436 05

Heat-shrinkable jacket holds fluid in contact with tensile test specimen MSC-13195 B69-10495 05

METAL SURFACES
Gate value with ceramic-coated base operates at high temperatures ARC-23 B63-10562 03

Refractory thermal insulation for smooth metal surfaces M-FS-160 B64-10099 03

Elastomers bonded to metal surfaces seal electrochemical cells GSFC-168 B64-10113 03

Solder flux leaves corrosion-resistant coating on metal JPL-611 JPL-611 B64-10206 05

Fluoride coatings make effective lubricants in molten sodium environment LEWIS-229 B66-10005 03

Etching process mills PH 14-8 Mo alloy steel to precise tolerances MSC-270 B66-10110 03

Surfactant for dye-penetrant inspection is insensitive to liquid oxygen H-FS-475 B66-10131 03

Nylon bit removes cork insulation without damage to substrate MSC-381 B66-10152 05

Device spot-laps spheres to very close tolerances JPL-SC-176 B66-10152 05

Rubber-coated bellows improves vibration damping in vacuum lines LEWIS-273 B66-10175 05

Portable sandblaster cleans small areas NSC-523 B66-10242 05

Brass alloys used as temperature indicators NUC-0063 B66-10274 01

Photoelectric scanner makes detailed work function maps of metal surfaces JPL-SC-176 B66-10440 01

Adhesive for polymer film cures at room temperature, has high initial tack
**IBTAL VAPORS**

**Technique for measuring absorptance and emittance by using cyclic incident radiation**

LEWIS-321  B66-10630  02

Thermoelectric metal comparator determines composition of alloys and metals

Solubility data are compiled for metals in liquid zinc

X-ray source uses interchangeable target anodes to vary X-ray wavelength

Radiation counting technique allows density measurement of metals in high-pressure/high-temperature environment

Handbooks describe eddy current techniques used in nondestructive testing of metal parts and components

Ultrasonics used to measure residual stress

Test system accurately determines tensile properties of irradiated metals at cryogenic temperatures

Detection and location of metallic objects imbedded in nonmetallic structures

Resistivity measurements of neutron-irradiated pure metals and Al-Zn alloys

Nondestructive method for measuring residual stresses in metals, a concept

Electromotive series established for metals used in aerospace technology

Levitation-melting technique for metals and alloys

Fractography can be used to analyze failure modes in polytetrafluoroethylene

Calibration of a resistance thermometer down to 0.04 degrees K

Remote balance weighs accurately high radiation

Metallic diffusion measured by a modified Knudsen technique

Generation of sonic power during welding

Reducing contact resistance at semiconductor to metal or aluminum to metal interfaces

Pulsed high-voltage dc RF sputtering

Microprobe investigation of brittle segregates in aluminum MIG and TIG welds

Rectangular-bore, high-gain laser plasma tube

Microprobe investigation of brittle segregates in aluminum MIG and TIG welds

Rectangular-bore, high-gain laser plasma tube
SUBJECT INDEX

METHODOLOGY

Handbooks describe eddy current techniques used in nondestructive testing of metal parts and components
H-FS-13172 B67-10374 03

Tube welding and brazing
H-FS-20348 B69-10085 05

Conceptual techniques for reducing parasitic current gain of lateral pnp transistors
H-FS-13199 B69-10244 01

NITROGEN ALCOHOLS

Corrosion of aluminum alloys by chlorinated hydrocarbon/methanol mixtures
H-FS-11345 B67-10842 03

Viscosity and density of methanol/water mixtures at low temperatures
H-FS-14991 B68-10274 03

Nitric acid-organic mixtures surveyed for use in separation by anion exchange methods
ARG-10065 B68-10425 03

Coolants with selective optical filtering characteristics for ruby laser applications
H-FS-20180 B68-10508 02

Separation of the rare earths by anion-exchange in the presence of lactic acid
ARG-10436 B69-10377 03

METHYL COMPOUNDS

Stringent cleaning technique assures reliable epoxy bond
GSFC-161 B64-10142 03

Fabrication method produces high-grade alumina crucibles
H-FS-216 B65-10078 05

Flexible protective coatings made from silicon-nitrogen materials
H-FS-528 B66-10027 03

Sea dye marker provides visibility for 20 hours
MSC-714 B66-10313 03

High-energy, high-power, long-life battery
LBWIS-10724 B69-10131 01

Microdetermination of urea in urine using p-dimethylaminobenzaldehyde (PDAB)
NPO-10715 B69-10317 04

Technique for ultrasonic cleaning with volatile solvents eliminates need for hoods or condensers
MSC-15641 B69-10552 03

METHYLACRYLATE

Thermocouple-flexible cable connector insulator is highly reliable
H-00062 B66-10709 01

Adhesives for laminating polyamide insulated flat conductor cable
H-FS-12066 B67-10429 03

MICA

Electro-optic modulator for infrared laser using gallium arsenide crystal
GSFC-10686 B68-10255 02

Device for diode tuning in a stripline varactor harmonic multiplier
H-FS-20153 B69-10013 01

MICROCAPS

Welding torch and wire feed manipulator
H-FS-13102 B67-10385 05

Standard surface grinder for precision machining of thin-wall tubing

MICRONS

Improved mouse cage provides versatility and ease in handling laboratory mice
H-FS-12250 B69-10124 04

MICROELECTRON INTERFEROMETERS

System enables more complete calibrations of dynamic-pressure transducers
H-FS-2063 B67-10099 01

System converts optical phase changes to RF phase changes
H-FS-20091 B68-10430 01

Fine-line sensitivity for holographic interferograms
H-Q-10348 B69-10663 02

MICROANALYSIS

Corrosion of metal samples rapidly measured
H-00041 B66-10140 03

Standards for electron probe microanalysis of silicates prepared by convenient method
GSFC-869 B66-10234 03

Apparatus enables automatic microanalysis of body fluids
JPL-962 B66-10515 04

Automated microsyringe is highly accurate and reliable
NPO-10142 B67-10203 01

Microprobe investigation of brittle segregates in aluminum HIG and TIG welds
H-FS-14720 B69-10330 03

Imaging slitless spectrometer for X-ray astronomy
H-FS-14309 B68-10546 02

Microdetermination of urea in urine using p-dimethylaminobenzaldehyde (PDAB)
NPO-10715 B69-10317 04

MICROBIOLOGICAL

Evaporant feed device facilitates flash vapor deposition process in vacuum
NPO-10232 B67-10130 03

Tool samples subsurface soil free of surface contaminants
MSC-10988 B67-10473 05

Continuous microbial cultures maintained by electronically-controlled device
ARG-177 B67-10556 04

A microalgal technique for the culture of mammalian cells
LANGLEY-10407 B68-10554 04

Microscope device for cell cultures on thermoplastic substrates
LANGLEY-10495 B69-10236 04

Technique for highly efficient recovery of microbiological contaminants
MSC-13250 B69-10273 04

Sterilization training manual
H-FS-20437 B69-10277 04

Sampling and handling of desert soils
NPO-11171 B69-10304 04

Life detection
NPO-10510 B69-10475 04

Microbiological aspects of sterilization development laboratories
NPO-11197 B69-10593 04

Study of radiation effects on mammalian cells in vitro
ARG-10191  B68-10298  02

MITOSIS

Quick-hardening problems are eliminated with spray gun modification which mixes resin and accelerator liquids during application
LANGLEY-6A  B63-10318  03

Plastic plus stainless-steel fibers make resilient, impermeable material
WOO-246  B65-10374  03

Two-fluid, impinging-sheet injector
WPO-10547  B68-10338  05

An investigation of particle mixing in a gas-fluidized bed
ARG-10182  B68-10407

Diffusion of trace gases for leak detection - A study
E-FS-20254  B66-10067  03

Preparation of thorium magnesium-zinc reduction
ARG-10285  B69-10079  03

Single-element coaxial injector for rocket fuel
WPO-11095  B69-10547

MITOSIS

Added diodes increase output of balanced mixer circuit
GSFC-354  B65-10276  01

Single-sideband modulator accurately reproduces phase information in 2-Mc signals
E-FS-664  B66-10437  01

Compact microwave mixer has high conversion efficiency
GSFC-197  B66-10625  01

Electronic frequency discriminator
E-FS-2634  B67-10151  01

Voltage regulator/amplifier is self-regulated
ARG-1240  B67-10156  01

ELECTRODICS

New computer system simplifies programming of mathematical equations
E-FS-441  B66-10361  01

On-line computer system for use with low-energy nuclear physics experiments is reported
ARG-10257  B69-10094  01

MOBILITY

Special tool kit aids heavily garmented workers
MSC-163  B66-10403  05

Integrated mobility measurement and notation system
MSC-726  B67-10114  04

Improved head-controlled TV system produces high-quality remote image
ARG-128  B67-10317  01

Movable RF probe eliminates need for calibration in plasma accelerators
LEWIS-10127  B67-10362  01

Improved electromechanical master-slave manipulator
ARG-10027  B69-10372  05

Detachable caster adapter
MSC-91215  B69-10164  05

MODE RESPONSE

A modal combination computer program for analyzing dynamic behavior of structures
UPO-10129  B67-10217  06

Computer program provides improved longitudinal response analysis for axisymmetric launch vehicles
LANGLEY-10093  B67-10531  06

Computer program determines vibration in three-dimensional space of hydraulic lines excited by forced displacements
E-FS-12226  B68-10159  06

Analysis of space vehicle structures using the transfer-function concept
WPO-11162  B69-10337  06

MODE TRANSFORMERS

Improved gas ring laser
MSC-11584  B68-10304  02

MODELS

High purity electroforming yields superior metal models
ARC-6  B63-10007  05

Pressure transducer 3/8-inch in size can be faired into surface
WOO-065  B64-10021  05

System automatically provides dynamic launch decision criteria
E-FS-13063  B67-10363  01

Probabilistic approach to long range planning of manpower
MSC-11524  B67-10510  06

Development of lunar drill to take core samples to 100-foot depths
E-FS-13015  B67-10529  05

Shell design computer program
LEWIS-10734  B69-10175  06

Technique for assessing potential fire hazards
HQ-10279  B69-10287  03

Surface-renewal models for heat-transfer between walls and fluidized beds
ARG-10372  B69-10772  02

MODERATORS

Neutron detector simultaneously measures fluence and dose equivalent
ARG-10071  B67-10597  02

MODES

Quick-acting clutch disengages idle drive motor
GSFC-143  B64-10028  05

Thermionic diode switching has high temperature application
WPO-10404  B67-10672  01

Detection of molecular infrared spectra
HQ-10377  B69-10172  02

Identification and evaluation of linear damping models in beam vibrations
ARG-10275  B69-10196  03

MODULATION

Nulling pyrometer uses Kerr cell shutter for fast responses
NU-0010  B65-10050  01

Frequency offset in linear FM/CW transponder eliminates clutter
E-FS-249  B65-10146  01

Instrument accurately measures extremely low air densities
E-FS-193  B65-10221  01

An improved method for testing performance of vidicons during vibration
MODULES

Study made of application of stereoscopic display system to analog computer simulation
GSPC-10216 B69-10144 01

Amplifier provides dual outputs from a single source with complete isolation
NUC-10056 B67-10221 01

Interference effects eliminated in random oriented space station antenna system
ASC-11004 B67-10435 01

High-power microwave power divider concept
HRO-11031 B69-10290 01

Estimation of signal-to-noise ratios
XRF-05254 B69-10557 01

Pocket-sized tone-modulated FM transmitter
HRO-11180 B69-10725 01

Frequency-shift-keyer circuit improves communication system uses modulated laser beam
GSPC-377 B65-10333 01

High-gain amplifier has excellent stability and low power consumption
GSPC-272 B65-10138 01

Phase shift frequency synthesizer is efficient, small in size
H-PS-250 B65-10169 01

Added diodes increase output of balanced mixer circuit
GSPC-354 B65-10276 01

Communication system uses modulated laser beam
GSPC-377 B65-10333 01

Linear signal noise numerator accurately determines and controls S/N ratio
JPL-SC-152 B66-10433 01

Single-sideband modulator accurately reproduces phase information in 2-Mc signals
M-PS-664 B66-10437 01

Device to color modulate a stationary light beam gives high intensity
HQ-64 B66-10476 01

Polarimeter provides transient response in nanosecond range
JPL-880 B67-10021 02

Double emitter suppressed carrier modulator uses commercially available components
M-PS-2494 B67-10101 01

Laboratory pulse modulator uses minority carrier storage diodes
M-PS-2442 B67-10226 01

Solid state phase detector replaces bulky transformer circuit
ASC-11004 B67-10253 01

Interference effects eliminated in random oriented space station antenna system
ASC-11004 B67-10435 01

Lasers communication system is insensitive to atmospherically induced noise
GSPC-10396 B67-10587 01

Electro-optic modulator for infrared laser using gallium arsenide crystal
GSPC-10686 B66-10255 02

Analysis of magnetically-controlled processes in pulse-modulation systems
GSPC-10241 B69-10070 01

Optically induced free carrier light
MOISTURE METERS
Detection of entrapped moisture in honeycomb sandwich structures
HSC-1103 B67-10116 01

MOISTURE DETECTORS
Plastic plus stainless-steel fibers make resilient, impermeable material
WOO-246 B65-10374 03

MOISTURE DETECTION
Spray-on technique simplifies fabrication of complex thermal insulation blanket
H-FS-497 B66-10053 03

BIODEGRADABLE MATERIALS
Cork is used to make tooling patterns and molds
HSC-625 B66-10328 01

BIODEGRADABLE MATERIALS
Thermoplastic rubberlike material produced at low cost
HSC-425 B66-10328 01

BIODEGRADABLE MATERIALS
Improved compression molding process
LANGLEY-10027 B67-10302 03

BIODEGRADABLE MATERIALS
Modular packaging technique for combining integrated circuits and discrete components
GSFC-10369 B69-10453 03

MOISTURE METERS
A method for observing gas evolution during plastic laminate cure
HSC-15592 B69-10530 03

MOISTURE METERS
Vacuum forming of thermoplastic sheet results in low-cost investment casting patterns
ABC-7 B63-10008 05

MOISTURE METERS
Improved silylbenzyl disulfide-silver metal brushes have extended life
H-FS-66 B63-10479 03

MOISTURE METERS
Refractory ceramic has wide usage, low fabrication cost
H-FS-67 B63-10481 03

MOISTURE METERS
Plastic molds reduce cost of encapsulating electric cable connectors
H-FS-69 B63-10568 05

MOISTURE METERS
Molded elastomer provides compact ferrite-core holder, simplifies assembly
JPL-584 B64-10084 05

MOISTURE METERS
Plastic films for reflective surfaces reproduced from masters
GSFC-188 B64-10084 05

MOISTURE METERS
Pressure molding of powdered materials improved by rubber mold insert
WOO-100 B64-10151 03

MOISTURE METERS
Epoxy-resin patterns speed shell-molding of aluminum parts
H-FS-303 B65-10177 05

MOISTURE METERS
Spray-on technique simplifies fabrication of complex thermal insulation blanket
H-FS-497 B66-10053 03

MOISTURE METERS
Split glass tube assures quality in electron beam brazing
H-FS-564 B66-10151 05

MOISTURE METERS
Cork is used to make tooling patterns and molds
HSC-625 B66-10328 01

MOISTURE METERS
Strippable grid facilitates removal of grid-surfaced conical workpiece from die
H-FS-716 B66-10334 01

MOISTURE METERS
Plug replaces weld filler as seal in complex casting
NU-0049 B66-10489 05

MOISTURE METERS
Isostatic compression process converts polyacrylamides into structural material
JPL-892 B67-10168 03

SUBJECT INDEX

Plastic preforms facilitate fabrication of welded cordwood electronic modules
LEWIS-90339 B68-10063 01

Improved molding process ensures plastic parts of higher tensile strength
LANGLEY-10033 B68-10132 05

Standards for compatibility of printed circuit and component lead materials
D-FS-14531 B68-10310 01

Compressible sleeve provides automatic centering for grinding or turning of cylinders
SAN-10021 B68-10318 05

Tools made of ice facilitate forming of soft, sticky materials
HSC-10262 B69-10199 05

Photomicroscopy
H-FS-14556 B69-10736 01

MOLECULAR CHAINS
New class of thermosetting plastics has improved strength, thermal and chemical stability
LEWIS-10108 B67-10197 03

MOLECULAR CHAINS
Production of crystalline polymers via liquid crystal monomers
HQ-10235 B69-10744 03

MOLECULAR COLLISIONS
Quantum mechanical calculations of reactive scattering cross sections in biomolecular encounters
H-FS-13594 B67-10527 03

MOLECULAR DIFFUSION
Large volume continuous countercurrent dialyzer has high efficiency
EQ-10055 B67-10395 04

MOLECULAR FLOW
Test device prevents molecular bounce-back
GSFC-82 B63-10546 03

MOLECULAR INTERACTIONS
Molecular radiation - Its application in physical measurements and analyses
H-FS-14616 B69-10562 02

MOLECULAR SPECTRA
Detection of molecular infrared spectra
HQ-10377 B69-10717 02

MOLECULAR SPECTROSCOPY
Submicron holes in thin films increase sampling range of mass spectrometers
JPL-EC-097 B66-10380 03

MOLECULAR STRUCTURE
The thermodynamic properties of the wustite phase are studied
ARG-10200 B68-10408 03

MOLECULAR STRUCTURE
The preparation, identification and properties of chlorophyll derivatives
ARG-10205 B68-10409 03

MOLECULAR STRUCTURE
Recent development in organic scintillators
ARG-10344 B69-10198 03

MOLECULAR WEIGHT
Irradiation improves properties of an aromatic polymer
LANGLEY-115 B65-10164 03

MOLECULAR WEIGHT
Synthesis of polyethers of hexafluorobenzene and hexafluoropentanediol
H-FS-14962 B69-10636 03

MOLECULAR WEIGHT
Large volume continuous countercurrent dialyzer has high efficiency

Simple circuit provides reliable multiple signal average and reject capability

Monoatomic gases
Study to minimize hydrogen embrittlement of ultrahigh-strength steels

Electron beam welding of copper-Monel facilitated by circular magnetic shields

Capacitive system detects and locates fluid leaks

Two-light circuit continuously monitors ac ground, phase, and neutral wires

Solid state thermostat has integral probe and circuitry

Fuel cell serves as oxygen level detector

Auxiliary circuit enables automatic monitoring of BEGs

Electromechanical flowmeter accurately monitors fluid flow

Rugged pressed disc electrode has low contact potential

Photoelectric system continuously monitors liquid level

Radioactive tracer system detects oil contaminants in fluid lines

Capacitive system detects and locates fluid leaks

Mechanical continuously measures static and dynamic cable loads

Phonocardiograph system monitors heart sounds

Electropneumatic transducer automatically limits motor current

Two-light circuit continuously monitors ac ground, phase, and neutral wires

Solid state thermostat has integral probe and circuitry

Simple circuit provides reliable multiple signal average and reject capability

Phonocardiograph microphone is rugged and moistureproof

Sniffer used as portable hydrogen leak detector

System monitors discrete computer inputs

Solid state detectors monitor relay contacts

Plant respirometer enables high resolution of oxygen consumption rates

Optical monitor panel provides flexible test panel configurations

Security warning system monitors up to fifteen remote areas simultaneously

Resistor monitors transfer of liquid helium

Magnetoresistor monitors relay performance

Gas leak detector is simple and inexpensive

Low rate flow switch can be used for gas or liquid

Monitoring system determines amplitude and time of vibration channel peaks

Monitor assures availability and quality of communication channels

Test instrumentation evaluates electrostatic hazards in fluid system

Means for improving apparent resolution of television

Closed circuit TV system monitors welding operations

A phonocardiogram simulator

IR vidicon scanner monitors many test points

Improved head-controlled TV system produces high-quality remote image

Portable spectrometer monitors inert gas shield in welding process

Multiple meter monitoring circuits served by single alarm

Continuous wave detector has wide frequency range

Study made of acoustical monitoring for mechanical checkout

Multichannel implantable telemetry system ARC-10083 B68-10065 01
Diversity RF receiving system with improved phase-lock characteristics IGS-01222 B68-10068 01
Past framing cameras provide high-speed multi-channel data recording ARG-10252 B69-10102 02
Direct determination of lead-210 by liquid-scintillation counting ARG-10462 B69-10611 03
Versatile telemonitoring system ARG-10339 B69-10655 01

MULTILAYER INSULATION
Reflective insulator layers separated by bonded silica beads MSC-215 B66-10070 03
Inexpensive cryogenic insulation replaces vacuum jacketed line NUC-10061 B67-10264 02
Development of dual solid cryogens for high reliability refrigeration system GSFC-10186 B67-10644 02
Design of multilayer insulation systems ARC-10166 B69-10615 05

MULTIPATH TRANSMISSION
Improved VHF direction finding system H-FS-20443 B69-10378 01
MULTIPHASE FLOW

Signal generator converts direct current to multiphase supplies
MSC-11043 B67-10368 01
Flowmeter determines mix ratio for viscous adhesives
N-PS-2308 B67-10378 01

MULTIPLEXING

Microphone multiplex system provides multiple outlets from single source
GSFC-426 B66-10308 01
Security warning system monitors up to fifteen remote areas simultaneously
KSC-66-39 B66-10548 01
Multiplexer uses insulated gate-field effect transistors
N-PS-13096 B67-10396 01
Seismographic recording of large rocket engine operation
N-PS-20545 B69-10756 01

MULTIPLEXER

Binary system generates sidereal rate from standard solar rate
GSFC-190 B64-10200 01
Video signal processing system uses gated current mode switches to perform high speed multiplication and digital-to-analog conversion
MSC-781 B66-10429 01
Stress calculator speedily converts strain data
N-PS-2021 B67-10182 03
Improved electromechanical master-slave manipulator
ARS-10027 B68-10372 05
Numerical inversion of finite Toeplitz matrices and vector Toeplitz matrices
ARS-10445 B69-10415 02

MULTIPLEXERS

Computer determines high-frequency phase stability
GSFC-113 B63-10555 01
Precision gage measures ultrahigh vacuum levels
GSFC-114 B63-10597 01
Digital cardiometer computes and displays heartbeat rate
MSC-93 B64-10258 01
Variable load automatically tests dc power supplies
GSFC-291 B65-10165 01
Photoresistance analog multiplier has wide range
GSFC-360 B65-10287 01
Circuit multiplies pulse width modulation, exhibits linear transfer function
EQ-56 B67-10055 01
Improved d& voltage multiplier
N-PS-14042 B68-10074 01
Conceptual hermetically sealed elbow actuator
N-PS-14710 B68-10300 05
System measures arc energy dissipated in relay contact cycling
N-PS-14541 B68-10312 01
System measures response time of photomultiplier tubes
LEWIS-10437 B68-10382 01

SUBJECT INDEX

A 35 GHz solid state transmitter/driver
H-PS-20152 B68-10545 01
Device for diode tuning in a stripline varactor harmonic multiplier
N-PS-20153 B69-10013 01
Automatic calorimetry system monitors RF power
N-PS-11033 B69-10384 01

MULTIPOL

An improved atomic hydrogen frequency and time standard
GSFC-10706 B69-10341 02
Multi-stage rocket vehicles
Shock and vibration response of multistage structure
N-PS-18972 B68-10353 05

MULTIVIBRATORS

Temperature-sensitive network drives astable multivibrator
GSFC-137 B63-10609 01
Inexpensive, stable circuit measures heart rate
MSC-95 B65-10010 01
Stepping motor drive circuit designed for low power drain
GSFC-198 B65-10026 01
Simulator produces physiological waveforms
MSC-94 B65-10091 01
Variable frequency transistor inverters use multiple core transformers
GSFC-183 B65-10119 01
Variable frequency magnetic multivibrator generates stable square-wave output
GSFC-20-21 B65-10124 01
Auxiliary circuit enables automatic monitoring of EEG's
MSC-106 B65-10142 01
Digital-output cardiometer measures rapid changes in heartbeat rate
MSC-133 B65-10143 01
Solid-state switching used to speed up capacitive integrator
LANGLEY-104 B65-10159 01
PCB magnetic tape system efficiently records and reproduces data
GSFC-375 B65-10311 01
Frequency divider is free of spurious outputs
GSFC-308 B65-10334 05
Frequency discriminator with binary output eliminates tuned circuits
N-PS-376 B65-10349 01
Circuit exhibits power efficiency greater than 75 percent
MSC-254 B66-10034 01
Miniature bioelectric device accurately measures and telemeters temperature
ARC-52 B66-10057 01
Electronic phase-locked-loop speed control system is stable
JPL-SC-084 B68-10232 01
Electronic circuit delivers pulse of high internal stability
MSC-673 B66-10501 01
Prerecautator feedback circuit utilizes Light Actuated Switch
N-PS-1180 B66-10542 01
Security warning system monitors up to...
fifteen remote areas simultaneously
KSC-66-39 B66-10548 01

Miniature telemetry system accurately
measures pressure
ARC-74 B66-10624 01

Automatic system determines moments
of inertia of asymmetrical objects
M-PS-1769 B66-10636 01

Laboratory pulse modulator uses minority
carrier storage diodes
M-PS-2442 B67-10226 01

Glow discharge density sensor probe life is
extended
M-PS-1707 B67-10229 01

A phonocardiogram simulator
KSC-67-94 B67-10239 01

An efficient, temperature-compensated
subcarrier oscillator
JPL-SC-091 B67-10251 01

A calibration means for spectrum analyzers
MSC-10987 B67-10254 01

Signal generator converts direct current
to multiphase supplies
MSC-11043 B67-10368 01

Circuit automatically calibrates flowmeter
against liquid-level gage reference
M-PS-2198 B67-10376 01

Blood pressure reprogramming adapter
assists signal recording
MSC-265 B67-10475 01

Temperature-stabilized, triggerable
microelectronic astable multivibrator
starts reliably
MSC-1173 B67-10624 01

One-shot pulse shaper circuit
XGS-11379 B68-10012 01

Schmitt trigger multivibrator
MSC-10955 B69-10143 01

Linear voltage-to-frequency converter
GSPC-10546 B69-10220 01

Foot-operated cell-counter
ARG-10315 B69-10351 01

An unconventional magnetically-coupled
multivibrator
HQ-10226 B69-10480 01

Constant-frequency, variable-duty-cycle
multivibrator
XGS-10033 B69-10512 01

MUSCLES
Automated urinalysis technique determines
concentration of creatine and creatinine by
colorimetry
ARG-10149 B67-10245 04

MUTATIONS
Investigation of temperature dependence of
development and aging.
ARG-10145 B69-10022 04

NYLON (TRADEMARK)
Insulation for cryogenic tanks has reduced
thickness and weight
M-PS-326 B66-10183 02

O-rings with mylar back-up provide high-
pressure cryogenic seal
M-PS-603 B66-10278 05

Leak locator for vacuum-jacketed pipelines
eliminates need for removal of outer jacket
M-PS-688 B66-10412 01

Nylon film eliminates silk screening of
equipment panels
MSC-798 B66-10555 05

Aluminized thin-window proportional-counter
tube is stronger, more responsive in long
wavelength region
JPL-689 B67-10015 01

Inexpensive cryogenic insulation replaces
vacuum-jacketed line
NUC-10061 B67-10264 02

N-P-N JUNCTIONS
Two-stage emitter follower is temperature
stabilized
MSC-20 B63-10493 01

High efficient square-wave oscillator
operator at high power levels
GSPC-112 B63-10554 01

Transistor voltage comparator performs own
sensing
GSPC-228 B65-10028 01

Synchronized pulse generator needs no external
power
GSPC-274 B65-10072 01

Low-power ring counter drives high-level
loads
GSPC-431 B66-10106 01

Electrically controlled optical latch and
switch requires less current
JPL-SC-111 B66-10414 01

Semiconductors can be tested without
removing them from circuitry
M-PS-1163 B66-10447 01

Equivalent circuit for a field effect
transistor established for computer
simulation
M-PS-1752 B66-10690 01

N-TYPE SEMICONDUCTORS
Radiation used to temperature compensate
semiconductor strain gages
LANGLEY-207 B66-10186 02

Solar cell submodule design facilitates
assembly of lightweight arrays
JPL-728 B66-10231 02

Simplified method introduces drift fields
into cells
GSPC-572 B67-10102 03

Thin film process forms effective electrical
contacts on semiconductor crystals
M-PS-2343 B67-10142 01

Process facilitates photosist mask
alignment on SiC crystals
M-PS-2394 B67-10144 01

Efficient millimeter wave 1140 GHz diode
for harmonic power generation
HQ-61 B67-10166 01

Silicon carbide diode for increased light
output
M-PS-20063 B67-10096 01

NYPHULANE
Technique for ultrasonic cleaning with
volatile solvents eliminates need for
hoods or condensers
MSC-15611 B69-10552 03
BAVIGATION

Conceptual nonorthogonal gyro configuration for guidance and navigation
MSC-11363 B67-10433 01

BAVIGATION AIDS

Improved magnetometer uses toroidal gating coil
GSPC-249 B65-10103 01

GMS/local-time conversion chart
GSPC-10521 B67-10548 01

Ring laser angle encoder
MSC-13099 B69-10115 01

A polar graphic method for determining the attitude of rocket vehicles
GSPC-10860 869-10597 01

Automatic star-horizon angle measurement system
MSC-11565 B69-10597 01

BAVIGATION INSTRUMENTS

Optical automatic gain channel
I-PS-12518 B66-10657 01

Developmental instrument supplies accurate attitude and attitude-rate data
HQ-57 B66-10607 01

Three-axis attitude and direction reference instrument has only one moving part
M-PS-1819 B66-10644 01

Hermetically sealed vibration damper
MSC-10559 B69-10634 05

NEAR INFRARED RADIATION

Solid-state laser transmitter is amplitude modulated
MSC-12 I-PS-12538 01

NEEDLES

Miniature oxygen-hydrogen cutting torch constructed from hypodermic needle
JPL-545 B63-10517 05

Hollow needle used to cut metal honeycomb structures
MSC-486 B66-10244 05

Modified algosimeter provides accurate depth measurements
MSC-616 B66-10647 04

Self-sealing closure enables access to several fluid containers
NPO-10123 B67-10207 04

Device enables calibration of microphones at high sound pressure levels
M-PS-11980 B67-10336 01

Sealed container sampling device
GSPC-10650 B69-10682 03

NEGATIVE CONDUCTANCE

Logic circuit detects both present and missing negative pulses in superimposed wave trains
M-PS-12518 B67-10565 01

NEGATIVE FEEDBACK

Electrometer preamplifier has drift correction feedback
JPL-SC-074 B65-10267 01

Frequency discriminator with binary output eliminates tuned circuits
M-PS-376 B65-10349 01

Feedback loop compensates for rectifier nonlinearity
M-PS-384 B66-10382 01

Negative feedback system reduces pump oscillations

Subject Index

M-PS-1852 B67-10064 05

Integrator can easily be set and reset with an electronic switch
ARC-10002 B67-10135 01

Positive and negative output circuits
LEWIS-10715 B69-10151 01

Current-switching technique for analog pulse circuits
ARC-10479 B69-10484 01

NEGATIVE RESISTANCE CIRCUITS

Miniature backward-diode pressure sensor features stability and low power consumption
ERC-10229 B69-10650 01

NEODIUM ALLOYS

Simple technique determines ac properties of hard superconductive materials
M-PS-1818 B66-10657 02

NEON

Laser Doppler flowmeter measures gas velocity
MSC-1747 B66-10693 02

Fresnel diffraction plates are simple and inexpensive
M-PS-12731 B67-10297 02

Rectangular-bore, high-gain laser plasma tube
HQ-10234 B69-10193 02

High-temperature, gas-filled ceramic rectifiers, thyratrons, and voltage-reference tubes
LEWIS-90271 B69-10376 01

Two-color holography
HQ-10349 B69-10662 02

NEON isotopes cancel errors in gas laser
MSC-1747 B66-10583 02

NEOPLASMS

Neutron therapy of cancer
ARS-10310 B69-10203 04

NEPHELOMETERS

Improved atmospheric particle analyzer
ERC-33 B67-10231 01

NEPTUNIUM

Study of actinide chemistry in saturated potassium fluoride solution
ARS-10204 B69-10004 03

NETS

Explosive force of primacord grid forms large sheet metal parts
M-PS-316 B66-10014 05

NETWORK ANALYSIS

Zener diode function generator requires no external reference voltage
JPL-0031 B65-10013 01

Computer program simplifies transient and steady-state temperature prediction for complex body shapes
MSC-989 B66-10619 01

Transient Analysis Generator /TAG/ simulates behavior of large class of electrical networks
NPO-10031 B67-10319 06

GERT EXCLUSIVE-OR combining paths and loops of electrical networks
ERC-10206 B68-10435 06

Performance analysis of electrical circuits /PARK/
M-PS-15001 B68-10448 06
**SUBJECT INDEX**

**GERT** simulation program for GERT network analysis
ERC-10209 B66-10457 06

Locating **sneak paths** in electrical circuitry
ERC-10209 B66-10565 01

Visual task analysis /VISTA/
ERC-10209 B66-10394 06

Punch-magnet delay eliminated by modification of circuit
ERC-10209 B66-10416 01

 Locating **sneak paths** in electrical circuitry

**NEUTRON SYNTHESIS**

Boron trifluoride nuclear detector preamplifier uses single-cable connection
LEWIS-178 B65-10255 01

Computer program for network synthesis by frequency response fit
ERC-10209 B66-10406 06

Active rc networks of low sensitivity for integrated circuit transfer function
ERC-10209 B66-10210 01

Technique developed for measuring transmittance of optical birefringent
circuits
ERC-10209 B66-10260 02

Study of optimum discrete estimators in measurement analysis
ERC-10209 B66-10398 02

GERT EXCLUSIVE-OR combining paths and loops of electrical networks
ERC-10209 B66-10435 06

**NETWORKS**

High frequency wide-band transformer uses coax to achieve high turn ratio and flat
response
ARG-10333 B66-10600 01

Accuracy of laser measurements improved by pulse autocorrelator electronic system
MSC-10033 B66-10338 01

**NEUTRONS**

Review of research and development in fluid logic elements
ERC-10209 B66-10438 01

**NEUTRAL PARTICLES**

Primary radical yields in pulse irradiated alkaline aqueous solution
ARG-10322 B66-10167 02

**NEUTRON ABSORBERS**

Calculation of resonance neutron absorption in two-region problems /the GAROL code/
NUC-10045 B66-10223 06

Alumina-titanium hydride-boron carbide composite provides lightweight neutron
shield material
NUC-10069 B66-10265 03

Portable, high intensity isotopic neutron source provides increased experimental
accuracy
ARG-90250 B66-10243 02

**NEUTRON ACTIVATION ANALYSIS**

Nondestructive test method accurately sorts mixed bolts
ERC-10209 B66-10574 01

Neutron activation analysis traces copper artifacts to geographical point of origin
ARG-119 B66-10036 02

Status of ultrachemical analysis for semiconductor materials
ERC-10209 B66-10138 03

**WEAR STUDIES**

Wear studies made of slip rings and gas bearing components
ERC-10209 B67-10403 05

**NEUTRON ACTIVATION**

Compilation of detection sensitivities in thermal-neutron activation
ARG-10068 B67-10641 03

Detection sensitivities in 3-8 MeV neutron activation
ARG-10210 B68-10298 02

Separation of traces of metal ions from sodium matrices
ARG-10341 B69-10168 03

Zone purification of potassium chloride
ARG-10077 B69-10241 03

**NEUTRON BEAMS**

Neutron diffractometer allows both magnetic and crystallographic analyses
ERC-10069 B67-10131 02

N-SAP and G-SAP neutron and gamma ray albedo model scatter shield analysis program
NUC-10126 B67-10536 06

Analyses of silicon dioxide, magnesium oxide, lead fluoride, bismuth as low-pass
velocity filters for neutrons
ARG-10220 B69-10211 02

**NEUTRON COUNTERS**

Boron trifluoride nuclear detector preamplifier uses single-cable connection
LEWIS-178 B65-10255 01

Detection of entrapped moisture in honeycomb sandwich structures
ECC-1103 B67-10116 01

Current pulse amplifier transmits detector signals with minimum distortion and
temperature
NUC-10055 B67-10347 01

Neutron detector simultaneously measures fluence and dose equivalent
ARG-10071 B67-10597 02

Detection sensitivities in 3-8 MeV neutron activation
ARG-10210 B68-10298 02

Improved pulse shape discriminator for fast neutron-gamma ray detection system
ARG-10515 B69-10461 01

Manganese-56 coincidence-counting facility precisely measures neutron-source strength
ARG-10261 B69-10621 01

**NEUTRON CROSS SECTIONS**

GARRET program
NUC-10243 B69-10433 06

Molybdenum-uranium alloys with voids of predetermined size and total volume
ARG-10490 B69-10641 03

**NEUTRON DIFFRACTION**

Neutron diffractometer allows both magnetic and crystallographic analyses
ERC-10069 B67-10131 02

**NEUTRON DISTRIBUTION**

Synthesis of calculational methods for design and analysis of radiation shields for
nuclear rocket systems
ERC-10209 B66-10447 06

**NEUTRON FLUX DENSITY**

A fast-neutron spectrometer of advanced design
ERC-10209 B66-10555 01

**NEUTRON IRRADIATION**

Alpha particle backscattering measurements
used for chemical analysis of surfaces
ARG-116 B67-10186 03

Radiation counting technique allows density measurement of metals in high-pressure/ high-temperature environment
ARG-124 B67-10316 02

Neutron irradiation of Au-241 effectively produces curium
ARG-10030 B67-10501 03

SOD-DS computer code provides tool for design evaluation of homogeneous two-material nuclear shield
WUC-10142 B67-10537 06

Computer program calculates gamma ray source strengths of materials exposed to neutron fluxes
WUC-10143 B67-10665 06

Procedure developed for reporting fast-neutron exposure
ARG-10035 B68-10190 02

Resistivity measurements of neutron-irradiated pure metals and Al-Zn alloys
ARG-10108 B68-10200 03

Neutron therapy of cancer
ARG-10310 B69-10203 04

NEUTRON PHYSICS
Multichannel pulse height analyzer is inexpensive, features low power requirements
BNW-10020 B67-10258 01

Practical new method of measuring thermal-neutron fluence
WUC-10066 B67-10352 02

NEUTRON SCATTERING
Computer program VARI-QUIR 3 provides solution of steady-state, multigroup, two-dimensional neutron diffusion equations
NWC-10052 B67-10345 06

Computer program /P1-GAS/ calculates the P-0 and P-1 transfer matrices for neutron moderation in a monatomic gas
WUC-10141 B67-10678 06

Isotopically pure magnesium isotope-24 is prepared from magnesium-24 oxide
ARG-10154 B68-10293 02

Computer program calculates the effective temperature for a crystalline solid /DETS/
WUC-10161 B69-10036 06

Analyses of silicon dioxide, magnesium oxide, lead fluoride, bismuth as low-pass velocity filters for neutrons
ARG-10220 B69-10211 02

NEUTRON SOURCES
Detection of entrapped moisture in honeycomb sandwich structures
MSC-1103 B67-10116 01

Apparatus for fabrication of americium-beryllium neutron sources prevents capsule contamination
ARG-184 B67-10202 05

Portable, high intensity isotopic neutron source provides increased experimental accuracy
ARG-90250 B68-10243 02

Dual-mode operation of a neutron source, a concept
EQ-10106 B69-10240 02

Manganese-56 coincidence-counting facility precisely measures neutron-source strength

NEUTRON PHYSICS
SPECTRA
Low scatter lightweight fission spectrometer constructed for biological research
ARG-10039 B68-10174 02

Ge-diode detector combined with crystal-diffraction spectrometer permits high-resolution gamma ray spectroscopy
ARG-10190 B69-10005 02

NEUTRON SPECTROMETERS
A fast-neutron spectrometer of advanced design
M-FS-1664 B66-10555 01

Four pi-recell proportional counter used as neutron spectrometer
ARG-10101 B68-10326 02

NEUTRENS
Status of ultrachemical analysis for semiconductors
M-FS-2254 B67-10138 03

Uranyl phthalocyanines show promise in the treatment of brain tumors
ARG-100 B67-10188 04

Training course for radiation safety technicians
ARG-216 B67-10477 02

Neutron therapy of cancer
ARG-10310 B68-10230 04

NEWTON-RAPSHON METHOD
Computer program reduces calculation time of normal response functions
M-FS-1517 B67-10108 01

Computer program for mass optional solutions of some endpoint trajectory problems
M-FS-12976 B67-10310 06

Computer program for network synthesis by frequency response fit
M-FS-12686 B67-10406 06

Computer program provides steady state analysis for liquid propellant propulsion systems
MSC-10064 B67-10414 06

Program computes equilibrium normal shock and stagnation point solutions for arbitrary gas mixtures
LANGLEY-10090 B67-10509 06

Computer program offers new method for constructing periodic orbits in nonlinear dynamical systems
M-FS-14654 B68-10217 06

HICOF - Newton-Raphson calculus of variation with automatic transversalities
M-FS-14456 B68-10232 06

Buckling of Shells of Revolution /BOSOR/ with various wall constructions
LANGLEY-10441 B69-10300 06

NEWTON THEORY
Real fluid properties of normal and parahydrogen
LEWIS-10458 B68-10361 06

NICHEROME (TRADEMARK)
Heater decomposes oil backstreaming from high-vacuum pumps
GSPC-356 B65-10224 02

Viscosity and density of methanol/water mixtures at low temperatures
M-FS-14991 B68-10274 03

Induction probe determines levels of liquid metals

I-437
Study reveals effect of aluminum on saturation moment of Fe-Wi alloys

Weld microfissuring in Inconel 718 minimized by minor elements

Inspection criteria ensure quality control of parallel gap soldering

Pre-weld heat treatment improves welds in Rene 41

Ultrasonic temperature measuring device

Weld microfissuring in Inconel 718 minimized by minor elements

Inspection criteria ensure quality control of parallel gap soldering

Pre-weld heat treatment improves welds in Rene 41

Ultrasonic temperature measuring device

Nickel-base superalloy's excellent properties promote its service to 2200 degrees F

Method for removing surface-damaged layers from nickel alloys

Evaluation of lubricants for ball bearings at high temperatures

Study of fluoride corrosion of nickel alloys

Hot-cracking studies of Inconel 718 weld-heat-affected zones

Tensile and fatigue properties of Inconel 718 at cryogenic temperatures

High strength, superplastic superalloy

Device for obtaining separation of oxygen

Nickel Cadmium Batteries

Dysonium compound improves nickel-cadmium cell

Hermetically sealed cells protected from internal gas pressure

Battery charge regulator is coulometer controlled

Study of thermal effects on nickel-cadmium batteries

Charge control of nickel-cadmium batteries by coulometer and third electrode method

Battery case shear

Balloon batteries, charged and heated by solar energy

Application of cryptanalytic techniques to the analysis of NiCd space batteries

Nickel Coatings

Electroless nickel resist used in alkaline etching of aluminum

Nickel Compounds

Dysonium compound improves nickel-cadmium cell

Thoriated nickel bonded by solid-state diffusion method

Application of the solid lubricant polyethylene disulfide by sputtering

High temperature coatings for gas bearings

Nickel Fluids

Experiments shed new light on nickel-fluorine reactions

Nickel Oxides

Thermoelectric cell and sealing technique

Cobalt improves nickel hydroxide electrodes for batteries

Nickel Plate

Electroless nickel resist used in alkaline etching of aluminum

Modular thermoelectric cell is easily packaged in various arrays

Titanium diaphragm makes excellent amplitron cathode support

Nickel solution prepared for precision electroforming

Plated nickel wire mesh makes superior catalyst bed

Nickel/tin coating protects threaded fasteners in corrosive environment

Copper wire plated with nickel and silver resists corrosion

Electrical cabling withstands severe environmental conditions

Rotating magnetic poles used to pump mercury

Electroless nickel plating on stainless steels and aluminum

Nondestructive test method accurately sorts mixed bolts

Helical recorder

Improved nickel plating of Inconel X-750

Nickel Steels

Diaphragm eliminates leakage in cryogenic fluid duct coupling

Nickel-Cadmium Rocket Vehicle

Rocket sonde measurements of ozone in the upper atmosphere

Oil-smeared models aid wind tunnel measurements
LANGLEY-4 B63-10311 03

Fine-particle filter prevents damage to vacuum pumps
LEWIS-106 B63-10489 05

Nonresonant support facilitates vibration testing of structures
M-FS-224 B65-10039 05

Beater decomposes oil backstreaming from high-vacuum pumps
GSFC-356 B65-10224 02

Oil-damped mercury pool makes precise optical alignment tool
GSFC-353 B65-10253 02

Tensile-strength apparatus applies high strain-rate loading with minimum shock
JPL-20 B66-10063 05

Sensor detects hydrocarbon oil contaminants in fluid lines
M-FS-522 B66-10068 01

Fluid damping reduces bellows seal fatigue failures

Subject Index

M-FS-565 B66-10249 05

Vibrator improves spark erosion cutting process
HQ-0071 B66-10333 01

Valve effectively controls amount of contaminant in flow stream
M-FS-1771 B66-10663 05

Method accurately measures mean particle diameters of monodisperse polystyrene latexes
MBC-207 B67-10054 02

Accumulator isolator prevents malfunctioning of faulty hydraulic system
M-FS-1415 B67-10528 05

Conceptual apparatus for detecting leaks of nonconductive liquids
M-FS-14713 B66-10303 01

Teflon fluorocarbon liners for flexible hoses
M-FS-14850 B69-10288 05

Apparatus automatically measures soluble residue content of volatile solvents
SAN-10032 B69-10292 03

Freon, T-81 cutting fluid
MSC-11486 B69-10485 05

Synthesis of polyethers of hexafluorobenzene and hexafluoropentanediol
M-FS-10962 B66-10636 03

Device for reflowing electrodeposited solder on terminals
M-FS-10921 B69-10670 01

Discrimination of fish oil and mineral oil slicks on sea water
HQ-10412 B69-10673 01

Oleic Acid

Magnetic fluid readily controlled in zero gravity environment
LEWIS-126 B65-10335 03

Olivine

Epitaxial crystalline growth upon cold substrates
MSC-11196 B69-10494 01

One-Dimensional Antennas

Lightweight load support serves as vibration dumper
JPL-661 B65-10444 05

Omnidirectional antennas transmit and receive over large bandwidth
GSFC-436 B66-10133 01

Interference effects eliminated in random oriented space station antenna system
MSC-11004 B67-10435 01

On-Line Programming

New computer system simplifies programming of mathematical equations
M-FS-441 B66-10361 01

Computer program simulates physical systems by solving the simultaneous differential equations describing the systems
NPO-10019 B67-10193 06

Computer graphics data conditioning
M-FS-14695 B68-10296 06

Simplified system displays complex curves corresponding to input data
HQ-10073 B69-10247 01

One Dimensional Flow

One-dimensional reacting gas nonequilibrium performance program
MSC-11777 B68-10375 06
SUBJECT INDEX

OPACITY
Opaque microfiche masthead permits easy reading
HQ-7 B65-10306 01
Optically driven switch turn-off time reduced by opaque coatings
JPL-SC-107 B66-10141 01
Pyrometry handbook describes practical aspects of surface temperature measurements of opaque materials
LEWIS-349 B66-10520 01
Technique for predicting temperature distribution in gases
LEWIS-10318 B69-10329 01

OPENINGS
Expandable rubber plug seals openings for pressure testing
NU-0048 B66-10229 05
Interior servicing platform simplifies maintenance of storage tanks
M-PS-1360 B66-10425 05

OPERATING TEMPERATURE
Precision capacitor has improved temperature and operational stability
ABB-189 B67-10313 01
Transient sensor development
M-PS-13370 B67-10471 01
Liquid crystal calibrator
M-PS-14151 B66-10221 03

OPERATIONAL HAZARDS
Economical and maintenance-free gas system operates railroad switches
NU-0045 B66-10124 05
Lifting clamp positively grips structural shapes
M-PS-593 B66-10176 05

OPERATIONAL PROBLEMS
Logic system aids in evaluation of project readiness
MSC-753 B66-10457 05
Electrochemical cell has internal resistive heater element
GSFC-10358 B66-10325 01
Design and sparing techniques to meet specified performance life
HQ-10200 B68-10528 02

OPERATIONS RESEARCH
Queuing register uses fluid logic elements
M-PS-317 B66-10100 05

OPERATOR PERFORMANCE
Optical projectors simulate human eyes to establish operator’s field of view
WOO-250 B66-10011 02
Shoulder adapter steadies spot welding gun
M-PS-321 B66-10076 05
Tape reading fixture
M-PS-14146 B68-10008 05
Astronaut*s tool for withdrawing/replacing computer cards
M-PS-20453 B69-10183 05

OPERATORS (MATHEMATICS)
Structure of the isotropic transport operator in three independent space variables
ABG-10040 B69-10432 06

OPERATORS (PERSONNEL)
Human transfer functions used to predict system performance parameters
LANGLEY-203 B66-10379 01

REMOTE OPERATIONS
Remotely operated high pressure valve protects test personnel
N-PS-11010 B67-10291 05

OPTICAL COMMUNICATION
Local measurements in turbulent flows through cross correlation of optical signals
M-PS-1268 B67-10030 01
Laser communication system is insensitive to atmospherically induced noise
GSFC-10396 B67-10587 01
Site survey for optimum location of Optical Communication Experimental Facility
M-PS-13155 B69-10050 06
Repetitively pulsed, wavelength-selective carbon dioxide laser
HSC-1978 B68-10564 02
Occulting-filter method for obtaining flash-lights visibility data
M-PS-13097 B69-10107 02
Multipurpose binocular scanning apparatus
NFO-11002 B66-10311 02
Method of directing a laser beam with very high accuracy
NFO-11087 B69-10508 02

OPTICAL CORRECTION PROCEDURE
Oil-damped mercury pool makes precise optical alignment tool
GSFC-353 B65-10253 02
Image position sensor
M-PS-14101 B69-10708 02

OPTICAL COUPLING
Automatic frequency control of voltage-controlled oscillators
NFO-11064 B68-10569 01

OPTICAL DENSITY
PTFE-aluminum films serve as neutral density filters
LANGLEY-189 B66-10017 02
Digital computer processing of X-ray photographs
JPL-792 B67-10005 04
Blood oxygen saturation determined by transmission spectrophotometry of hemolyzed blood samples
M-PS-11018 B67-10252 04
Sodium peroxinate permits rapid oxidation of nascent for easy spectrophotometric determination
ABB-262 B67-10421 03

VICAR-DIGITAL image processing system
NFO-11070 B69-10139 06

OPTICAL EQUIPMENT
Optics used to measure torque at high rotational speeds
LEWIS-13 B63-10338 01
Mirror device aligns machine surface perpendicular to sight lines
WOO-5 B63-10421 02
Microsachining produces optical apertures to micron dimensions
GSFC-206 B64-10211 05
Radiation-detector optical-imaging device is of simplified construction
GSFC-251 B64-10299 01
Simple optical system used to align spectrophotograph
LANGLEY-92 B65-10071 02
Computer programs simplify optical system analysis

I-451
Light ray modulation controls optical system alignment
GSPC-171  B65-10211  02

Oil-damped mercury pool makes precise optical alignment tool
GSPC-353  B65-10253  02

Multiple test chamber exposes materials to various environments
MSC-179  B65-10268  01

Interferometer construction assures parallelism of critical components
JPL-704  B65-10292  02

Unique construction makes interferometer insensitive to mechanical stresses
JPL-725  B65-10295  02

Nickel solution prepared for precision electroforming
WOO-070  B65-10303  03

Optical projectors simulate human eyes to establish operator's field of view
WOO-250  B66-10010  02

Electrodeless discharge lamp is easily started, has high stability
WOO-030  B66-10015  01

Improved carbon electrode reduces arc sputtering
MSC-219  B66-10026  01

Instrument quickly transposes ground reference target to eye level
MSC-275  B66-10061  05

Optically driven switch turn-off time reduced by opaque coatings
JEL-SC-107  B66-10141  01

Optical device enables small detector to see large field of view
WOO-253  B66-10263  02

Instrument transmits vanishing point to illustration point
MSC-267A  B66-10324  01

Electrically controlled optical latch and switch requires less current
JEL-SC-111  B66-10414  01

Optical monitor panel provides flexible test panel configurations
MSC-66-18  B66-10494  01

Simplified fixture permits precision alignment of an optical target
M-PS-1181  B66-10556  01

Sensors measure surface ablation rate of reentry vehicle heat shield
LANGLEY-287  B66-10592  01

Visual attitude orientation and alignment system
MSC-647  B67-10120  02

Portable spectrometer monitors inert gas shield in welding process
M-PS-12144  B67-10326  02

Machining heavy plastic sections
M-PS-12720  B67-10381  03

Foil radiometer accessory improves measurements
M-PS-12684  B67-10448  01

Automatic design of optical systems by digital computer
NPO-10265  B67-10632  06

Optical system facilitates inspection of printed circuit boards
GSPC-07971  B68-10021  02

Antiglare improvement for optical imaging systems
NPO-10337  B68-10090  02

Circuit enhances vertical resolution in raster scanning systems
MSC-12123  B68-10121  01

Optical integrating sphere operates at visible and infrared wavelengths
HSC-11688  B68-10245  02

Multiple test chamber exposes materials to various environments
HSC-179  B65-10268  02

Optical projectors simulate human eyes to establish operator's field of view
WOO-070  B65-10303  03

Training manual on optical alignment instruments
M-PS-20292  B66-10574  02

Method of making conical fiber optical components
XRF-09745  B69-10020  02

Improved combustion chamber optical probe
MSC-10953  B69-10142  02

Rectangular-bore, high-gain laser plasma tube
HQ-10234  B69-10193  02

Liquid laser cavities
GSPC-10592  B69-10592  02

Multipurpose binocular scanning apparatus
NPO-11002  B69-10311  02

A new method for producing optical mirrors
HQ-10227  B69-10529  02

Ultraviolet photographic pyrometer used in rocket exhaust analysis
I-PS-499  B66-10095  02

Inexpensive infrared source improvised from flashlight
NPO-11002  B69-10096  02

Proposed acousto-optic filter
HQ-10440  B69-10466  02

Visual attitude orientation and alignment system
MSC-647  B67-10120  02

Solvent residue content measured by light scattering technique
M-PS-550  B66-10320  01

Laser measuring system accurately locates point coordinates on photograph
ARG-74  B66-10560  02

Special purpose reflectometer uses modified Hilbert sphere
MSC-1135  B67-10109  02

Star/horizon simulator used to test space guidance system
MSC-407  B67-10110  02

I-452
SUBJECT INDEX

Improved atmospheric particle analyzer
ERC-33 B67-10231 01

Computer program for optical systems ray
tracing
PBC-10017 B67-10549 06

Improved optical diffractometer
MSC-12055 B68-10071 02

Ring laser angle encoder
MSC-13099 B69-10115 01

OPTICAL MEASURING INSTRUMENTS
Ellipsoidal optical reflectors reproduced by
electroforming
GSFC-92 B63-10547 05

Optical output enhances flowmeter accuracy
M-PS-482 B65-10395 02

Optical gyro pickoff operates at cryogenic
temperatures
M-PS-407 B66-10128 01

Mount enables precision adjustment of
optical-instrumentation mirror
MSC-104 B66-10199 02

Dielectrometer design permits measurement in vacuums under irradiation
M-PS-359 B66-10401 01

Direction indicator system does not require complicated optics
WOO-305 B66-10407 01

Point-source light sensor circuit is insensitive to background light
JPL-776 B66-10502 01

Optical superheterodyne receiver uses laser
for local oscillator
M-PS-1605 B66-10584 01

Optical automatic gain channel
M-PS-1550 B66-10596 02

Laser Doppler flowmeter measures gas velocity
M-PS-1747 B66-10693 02

Fatigue zones in metals identified by
polarized light photography
WOO-206 B67-10082 02

System enables dimensional inspection of very large structures
M-PS-2477 B67-10214 05

Optometric system facilitates colorimetric and fluorometric measurements
MPO-10233 B68-10316 01

Detection of effect of deposits on optical windows of pyrometer measurements
LEWIS-10866 B68-10367 01

Improved method of optical design
GSFC-10743 B69-10405 02

Airborne Fraunhofer Line Discriminator
MSC-13166 B69-10594 02

Automatic star-horizon angle measurement system
MSC-11505 B69-10597 01

OPTICAL MICROSCOPES
Color-televisioned medical microscopy
MSC-13086 B68-10314 01

OPTICAL PATHS
Photoelectric system continuously monitors liquid level
M-PS-417 B65-10382 01

OPTICAL POLARIZATION
Fatigue zones in metals identified by
polarized light photography
WOO-206 B67-10082 02

OPTICAL SCANNERS

OPTICAL PROPERTIES
Attachment converts microscope to point source
autocollimator
JPL-499 B64-10124 05

Lamp enables measurement of oxygen concentration in presence of water vapor
MSC-10483 B67-10387 01

Properties of optics at high temperature and their measurement, a study
M-PS-14696 B68-10240 02

Ultraviolet detector monitors organic contamination of optical surfaces
M-PS-20246 B68-10413 01

Correction for losses in optical birefringent networks, a concept
M-PS-20098 B68-10571 02

Selective view-glassing of Type 1 X-ray telescopes
GSFC-10682 B69-10075 02

Laser microprobe facility used in the elemental analysis of small feature of a sample
ARC-10359 B69-10165 02

OPTICAL PUMPING
Magnetometer measures orthogonal components of magnetic fields
GSFC-395 B65-10315 01

Optically exciting a magnetic memory — A feasibility study
M-PS-14854 B69-10060 02

OPTICAL PYROMETERS
Infrared shield facilitates optical pyrometer measurements
LANL-133 B65-10272 02

Hydrogen-atmosphere induction furnace has increased temperature range
LEWIS-153 B66-10055 05

Ultraviolet photographic pyrometer used in rocket exhaust analysis
M-PS-499 B66-10095 02

High temperature thermocouple operates in reduction atmosphere
NU-0046 B66-10134 01

Pyrometry handbook describes practical aspects of surface temperature measurements of opaque materials
LEWIS-389 B66-10520 01

OPTICAL REFLECTION
Plastic films for reflective surfaces reproduced from masters
GSFC-108 B64-10151 03

Improved electro-optical tracking system
M-PS-14791 B68-10311 01

OPTICAL RESONANCE
Magnetometer measures orthogonal components of magnetic fields
GSFC-395 B65-10315 01

OPTICAL SCANNERS
 Sextant measures spacecraft altitude without gravitational reference
MSC-200 B66-10143 02

Scanning photometer system automatically determines atmospheric layer height
MSC-245 B66-10170 01

Apparatus presents visual display of semiconductor surface characteristics
JPL-665 B66-10200 01
Multicolor stroboscope pinpoints resonances in vibrating components
JPL-0033 B66-10223 01

Design concept for improved photo-scan tube
JPL-818 B67-10157 01

OPTICAL TRACKING
Precision CW laser automatic tracking system investigated
M-PS-1606 B66-10629 01

Improved electro-optical tracking system
M-PS-14791 B68-10311 01

OPTICS
Optics used to measure torque at high rotational speeds
LEWIS-13 B63-10338 01

Liquid-level meter has no moving parts
H-PS-3 B63-10378 03

Lathe converted for grinding aspheric surfaces
GSFC-115 B63-10956 05

System measures angular displacement without contact
LAMLEY-46 B65-10073 01

Photosensors used to maintain welding electrode-to-joint alignment
MSC-243 B65-10401 05

Screen of cylindrical lenses produces stereoscopic television pictures
M-PS-273 B66-10086 02

New camera tube improves ultrasonic inspection system
ARG-90237 B68-10088 01

Properties of optics at high temperature and their measurement; a study
M-PS-18696 B68-10240 02

Improved relay optical element for spectroradiometer using cryogenically cooled detector
MSC-11688 B68-10245 02

Fluorescent particles enable visualization of gas flow
M-PS-14583 B68-10259 02

FORTRAN optical lens design program
NPO-10603 B68-10354 06

UV detector monitors organic contamination of optical surfaces
M-PS-20246 B68-10413 01

Optically induced free carrier light modulator
GSFC-10216 B69-10114 01

Determination of the absolute contours of optical flats
ARG-10352 B69-10209 05

OPTIMAL CONTROL
Design techniques - Stochastic controllers
MSC-11554 B68-10234 02

OPTIMIZATION
Computer program determines inventory size
M-PS-1115 B66-10506 01

A design procedure for the weight optimization of straight finned radiators
GSFC-547 B66-10618 05

Packaging of electronic modules
JPL-801 B66-10664 01

Computer program for mass optimal solutions of some endpoint trajectory problems
M-PS-12976 B67-10310 06

Computer optimization program finds values for several independent variables that minimize a dependent variable
M-PS-13036 B67-10320 06

High-strength tungsten alloy with improved ductility
LEWIS-10257 B67-10340 03

Computer programs for antenna feed system design and analysis
NPO-10359 B67-10504 06

SOC-DS computer code provides tool for design evaluation of homogeneous two-material nuclear shield
NOC-10142 B67-10537 06

Automatic planning concept - An analysis of optimum scheduling
M-PS-14198 B68-10127 06

Assembly, checkout, and operation optimization analysis technique for complex systems
M-PS-14105 B68-10222 05

Computer program analyzes and designs supersonic wing-body combinations
ARC-10141 B68-10335 06

Silicon strain sensors enable pressure measurement at cryogenic temperatures
M-PS-14703 B68-10262 01

New camera tube improves ultrasonic inspection system
ARG-90237 B68-10088 01

FORTRAN optical lens design program
NPO-10603 B68-10354 06

Single degree of freedom antenna pointing program /ANTENA/
ARC-10141 B68-10335 06

Computer program for parameter optimization
ARC-10168 B68-10449 06

Radial inflow turbine design charts
LEWIS-10720 B68-10567 05

Design and testing of liquid hydrogen-cooled, ultrahigh-speed ball bearings
M-PS-18453 B69-10178 05

OPTICAL MECHANICS
Generalized Newton-Raphson trajectory optimization-generator 1
M-PS-15024 B68-10422 06

OPTICAL RENDITIONS
Generalized Newton-Raphson trajectory optimization-generator 1
M-PS-15020 B68-10422 06

OPTICAL SPACE STATIONS
Study indicates fluid digital computation systems are feasible
M-PS-520 B67-10181 01

Feasibility study of wireless power transmission systems
M-PS-14691 B68-10309 01

OPTICS
Computer program for two-impulse rendezvous analysis
M-PS-13971 B67-10479 06

Computer program offers new method for constructing periodic orbits in nonlinear dynamical systems
M-PS-14654 B68-10217 06

Decode/Decode facility for FORTRAN 4
ARG-10335
Magnetically coupled emission regulator
GSPC-10056  B69-10213  01
Calibratable solid-state pressure switch
N-FS-20474  B69-10437  05
Special purpose computer provides
programmable digital filter for sampled-data
control systems
N-FS-20290  B69-10454  06
High voltage pulse generator
MSC-12778  B69-10548  01
Highly stable high-rate discriminator for
nuclear counting
ARG-10483  B69-10614  01

Adjustable thermal tree
MSC-15556  B69-10485  01

Pressure sensor responds only to shock wave
N-FS-238  B66-10184  01
Magnetic latches provide positive
overpressure control
NU-0057  B66-10279  05
Hermetically sealed cells protected from
internal gas pressure
GSPC-555  B66-10692  01
Integral valve provides automatic relief
and remote venting
N-FS-12134  B69-10545  05

Circuit protects regulated power supply
against overload current
GSPC-853  B66-10292  01
Triphase spark gap actuates overvoltage
relay
ARC-68  B66-10557  01
Low energy chopper can be used to test
sensitive circuits, other meters
SAR-10013  B66-10269  01
Current-limiting voltage regulator
MSC-11824  B66-10305  01
Transistorized Marx bank pulse circuit
provides voltage multiplication with
nanosecond rise-time
ARG-10110  B66-10328  01
Nondestructive test determines overload
and destruction characteristics of current
limiter fuses
XGS-08566  B69-10364  01
Low-cost voltage-level detector
LEWIS-10885  B69-10217  01
Fuse protects circuit from voltage and
current overloads
MSC-12135  B69-10490  01

Cryopumping of hydrogen in vacuum chambers is
aided by catalytic oxidation of hydrogen
LEWIS-15  B63-10340  05
Impurity diffusion process for silicon semiconductors is fast and precise

GSFC-397 B65-10300 01

Improved tool easily removes brazed tube connectors

MSc-263 B66-10003 05

Process reduces pore diameters to produce superior filters

WOO-093 B66-10037 03

Protective coating withstands high temperature in oxidizing atmosphere

K-FS-529 B66-10044 03

Tool provides constant purge during tube welding

K-FS-547 B66-10053 05

High temperature thermocouple operates in reduction atmosphere

ND-0046 B66-10134 01

Device removes hydrogen gas from enclosed spaces

GSFC-495 B66-10340 03

Thin-film ferrites vapor deposited by one-step process in vacuum

MSc-259 B66-10398 03

Radioactive method enables determination of surface areas rapidly and accurately

ND-0086 B66-10710 03

Ion exchange determines iodine-131 concentration in aqueous samples

ARG-208 B67-10129 04

Process facilitates photoresist mask alignment on SiC crystals

K-FS-2394 B67-10144 01

Sodium perxenate permits rapid oxidation of manganese for easy spectrophotometric determination

ARG-262 B67-10421 03

Ultrasonics used to measure residual stress

K-FS-1349 B67-10428 02

Reaction of steam with molybdenum is studied

ARG-295 B67-10502 03

Silicon oxide films grown in microwave discharge

K-FS-14634 B66-10171 01

Studies in zirconium oxidation

ARG-10099 B66-10199 03

Manganese-alumina-ceramic glass eliminates rigid controls necessary in bonding metals to ceramics

SAN-10012 B68-10204 03

Preparation of silver-activated zinc sulfide thin films

GSFC-10667 B68-10271 03

Ignition of binary alloys of uranium

ARG-10057 B68-10280 01

Precise doping of metals by small gas flows

LEWIS-10444 B68-10526 03

Study of actinide chemistry in saturated potassium fluoride solution

ARG-10204 B69-10004 03

Electrochemical study of aluminum corrosion in boiling high purity water

ARG-10306 B69-10033 03

Technical report on galvanic cells with fused-salt electrolytes

ARG-10297 B69-10155 01

Technique for pinpointing submicron particles in the electron microprobe

HQ-10043 B69-10466 01

OXIDATION RESISTANCE

Nickel-base superalloys developed for high-temperature applications

LEWIS-226 B66-10222 03

Reinforced thermal-shock resistant ceramics

LEWIS-10376 B66-10085 03

High strength nickel-base alloy with improved oxidation resistance up to 2200 degrees F

LEWIS-10145 B68-10094 03

High-temperature bearing lubricants

LEWIS-10408 B68-10249 05

High temperature alloy

LEWIS-10377 B66-10253 03

Nickel base alloy with improved stress rupture properties

LEWIS-10263 B66-10344 03

Tungsten fiber-reinforced nickel superalloy

LEWIS-10424 B66-10369 03

Nickel-base superalloy with excellent properties promote its service to 2200 degrees F

LEWIS-10355 B68-10380 03

Improved high-temperature silicide coatings

LEWIS-10817 B69-10266 03

OXIDIZERS

Reference black body is compact, convenient to use

ABC-3 B63-10004 03

Removable preheater elements improve oxide induction furnace

JEL-288 B63-10193 01

Improved thermal insulation materials made of foamed refractory oxides

K-FS-735 B66-10286 03

Apparatus enables accurate determination of alkali oxides in alkali metals

LEWIS-256 B66-10296 03

Multilayer refractory nozzles produced by plasma-spray process

K-FS-310 B66-10611 05

Refractory oxide insulated thermocouple designed and analyzed for high temperature applications

ARG-10022 B66-10055 03

Multiple-mask chemical etching

MSc-13114 B69-10221 01

Improved retort for cleaning metal powders with hydrogen

LEWIS-10718 B69-10468 03

Improved method of producing oxide-dispersion-strengthened alloys

HQ-10461 B69-10536 03

Electrolytic separation of crystals of transition-metal oxides

ARG-10506 B69-10642 02

Mass-spectrometric study of the chromium-oxygen system

ARG-10421 B68-10645 02

Reducing contact resistance at semiconductor to metal or aluminum to metal interfaces

ERG-10254 B66-10689 01

OXIDIZERS

Fuel and oxidizer valve assembly employs
OXYACETYLENE

single solenoid actuator
MSC-1046

Spherical pipe joint delivers loads equally to mating flange
M-FS-007

Addition of solid oxidizer increases liquid fuel specific impulse
JPL-861

Ignition of binary alloys of uranium
ARG-10057

Between-bearing shaft seal, a concept
I-PS-18179

Multiple-orifice throttle valve
XNP-09698

Two-step rocket engine bipropellant valve concept
MSC-10951

OXYACETYLENE

Electric arc heater is self starting
LANGLEY-200

OXYGEN

Cryopumping of hydrogen in vacuum chambers is aided by catalytic oxidation of hydrogen
LEWIS-15

Gas diffusion cell removes carbon dioxide from occupied airtight enclosures
MSC-118

Heated die facilitates tungsten forming
LEWIS-25A

Microorganisms detected by enzyme-catalyzed reaction
JPL-782

Oxygen-hydrogen torch is a small-scale steam generator
NU-0082

Dual regulator controls two gases from a single reference
MSC-227

Apparatus enables accurate determination of alkali oxides in alkali metals
LEWIS-256

Sniffer used as portable hydrogen leak detector
M-FS-846

Cold trap increases sensitivity of gas chromatography
M-FS-1617

Grit blasting nozzle fabricated from mild tool steel proves satisfactory
M-FS-1420

Hermetically sealed cells protected from internal gas pressure
GSFC-555

Portable spectrometer monitors inert gas shield in welding process
M-FS-12144

Wear studies made of slip rings and gas bearing components
M-FS-12062

Adhesives for laminating polyimide insulated flat conductor cable
M-FS-12066

Fluid properties handbook
M-FS-13462

Evaluation of ignition mechanisms in selected nonmetallic materials

SUBJECT INDEX

MSC-11645

Saran film is fire-retardant in oxygen atmosphere
MSC-11604

Zinc-oxygen primary cell yields high energy density
M-FS-14661

Improved fuel-cell-type hydrogen sensor
M-FS-14656

Eating of electrical wires in vacuum environments
MSC-15108

One-dimensional reacting gas nonequilibrium performance program
MSC-11777

One-dimensional two-phase reacting gas nonequilibrium performance program
MSC-11780

Axisymmetric reacting gas nonequilibrium performance program
MSC-11781

Precise doping of metals by small gas flows
LEWIS-10444

Two systems developed for purifying inert atmospheres
ARG-10234

Coatings decrease metal fatigue failure
ARC-10015

Plasma-heating by induction
LANGLEY-10528

Improved anode design for metal-oxygen cells
LEWIS-10871

Improved inorganic ion exchange membranes
LEWIS-10737

Device for obtaining separation of oxygen
LANGLEY-11007

Rate of heat extraction controller for environmental control
BG-10318

Adding calcium improves lithium ferrite core
ERC-10036

Chromatographic detection and analysis of traces of hydrocarbons
MSC-10388

Burn-rate testing apparatus
MSC-10947

OXYGEN ANALYZERS

Fuel cell serves as oxygen level detector
JPL-SC-072

New electrolyte may increase life of polarographic oxygen sensors
MSC-1049

Blood oxygen saturation determined by transmission spectrophotometry of hemolyzed blood samples
MSC-11018

Leak enables measurement of oxygen concentration in presence of water vapor
MSC-10043

Improved sample capsule for determination of oxygen in hemolyzed blood
MSC-11017

I-462
OXYGEN BREATHING
Respiratory transfer value has fail-safe feature
ARC-1 B65-10369 01

OXYGEN COMPounds
Miniature oxygen-hydrogen cutting torch constructed from hypodermic needle
JVL-545 B63-10517 05
Substitution of stable isotopes in Chlorella
ARC-10258 B69-10197 04

OXYGEN CONSUMPTION
Plant respirometer enables high resolution of oxygen consumption rates

OXYGEN SUPPL Y EQUIPMENT
Respiratory transfer value has fail-safe feature
ARC-1 B65-10369 01
Hollow needle used to cut metal honeycomb structures
MSC-486 B66-10244 05
Plant respirometer enables high resolution of oxygen consumption rates
HQ-47 B66-10406 04
Improved chlorate candle provides concentrated oxygen source
MSC-1137 B67-10095 03

OXYGENATION
Process reduces pore diameters to produce superior filters
WGO-093 B66-10037 03
Blood oxygen saturation determined by transmission spectrophotometry of hemolyzed blood samples
MSC-11018 B67-10252 04

OXYHEMOGLOBIN
Blood oxygen saturation determined by transmission spectrophotometry of hemolyzed blood samples
MSC-11018 B67-10252 04

OZONE
Porous glass makes effective substrate for ozone-sensing reagent
GSPC-388 B65-10364 03
Reaction rates of graphite with ozone measured by etch decoration
ASG-10386 B68-10101 03
Rocket sonde measurements of ozone in the upper atmosphere
GSPC-10580 B69-10077 02

P-N JUNCTIONS
Lasor beam transmits electric power
GSPC-293 B65-10158 01
Pre-regulator feedback circuit utilizes Light Actuated Switch
N-FS-1180 B66-10542 01

P-TYPE SEMICONDUCTORS
Simplified method introduces drift fields into cells
GSPC-572 B67-10102 03
Process facilitates photosensit mask alignment on SiC crystals
JPL-SC-111 B65-10077 01
High efficiency square-wave oscillator operator at high power levels
GSPC-112 B63-10554 01
Novel circuit combines pulse stretcher with NOR gate
GSPC-187 B64-10150 01
Economical fabrication process produces high quality junction transistors
JPL-SC-065 B66-10330 01
Transistor voltage comparator performs own sensing
GSPC-228 B65-10028 01
Synchronized pulse generator needs no external power
GSPC-274 B65-10072 01
Electrolytes controlled optical latch and switch requires less current
JPL-SC-111 B66-10414 01
Semiconductors can be tested without removing them from circuitry
N-FS-1163 B66-10447 01
Equivalent circuit for a field effect transistor established for computer simulation
N-FS-1752 B66-10690 01
Conceptual techniques for reducing parasitic current gain of lateral pnp transistors
MSC-13199 B69-10244 01
Lateral pnp bipolar transistor with aiding field diffusions
MSC-13072 B69-10741 01

P-REGENERATION
Substrate anode transmits electric power
GSPC-293 B65-10158 01
Pre-regulator feedback circuit utilizes Light Actuated Switch
N-FS-1180 B66-10542 01

P-TYPE SEMICONDUCTORS
Miniature stress transducer has directional capability
JPL-591 B65-10023 01
Radiation used to temperature compensate semiconductor strain gages
LANGL-207 B66-10186 02
Solar cell submodule design facilitates assembly of lightweight arrays
JPL-728 B66-10231 02
Semiconductor forms biomedical radiation probe
MSC-320 B66-10252 04
Simplified method introduces drift fields into cells
GSPC-572 B67-10102 03
Process facilitates photosensit mask alignment on SiC crystals
JPL-SC-111 B65-10077 01
Silicon carbide diode for increased light output

Battery-package design provides for cell cooling and constraint

Lightweight magnesium-lithium alloys show promise

New inflatable liferaft is non-tippable

Hollow plastic hoops protect thermocouple in storage and handling

Frequency discriminator with binary output eliminates tuned circuits

Epoxy-coated containers easily opened by wire band

Critical parts are stored and shipped in environmentally controlled reusable container

Packaging of electronic modules

Repairable, high-density microelectronic module provides effective heat sink

Aluminum heat sink enables power transistors to be mounted integrally with printed circuit board

Cone and column solar energy concentrator

Piggy-back mounting would increase microcircuit packaging density

Packaging criteria for transportation and handling shock and vibration

Low energy chaser can be used to test sensitive circuits, other meters

Standards for compatibility of printed circuit and component lead materials

Food products for space applications

One-dimensional reacting gas nonequilibrium performance program

Contamination control handbook

Microelectronic device data handbook

PACKAGING

Library of documents compressed into lap-held display kit

The response of nonoenergetic gamma rays in finite media are investigated.

ARG-10295

Cryopumping of hydrogen in vacuum chambers is aided by catalytic oxidation of hydrogen.

LNHS-15

New alloy brazes titanium to stainless steel.

MSC-102

Device removes hydrogen gas from enclosed spaces.

GSFC-695

Sniffer used as portable hydrogen leak detector.

N-PS-846

Purification train produces ultrapure hydrogen gas.

N-PS-11974

High-temperature, gas-filled ceramic rectifiers, thyatrons, and voltage-reference tubes.

LNHS-90271

Device separates hydrogen from solution in water at ambient temperatures.

MSC-13335

Trace levels of metallic corrosion in water determined by emission spectrography.

MSC-1193

Quantitive determination of flavin nucleotide using the bacterial bioluminescent reaction.

GSFC-10565

Laser doppler flowmeter measures gas velocity.

N-PS-1747

Aerodynamic forces of fluttering cylindrical and/or planar structures.

N-PS-20497

Portable display paneling has wide use, easy take down and assembly.

ARC-17

Electronic assembly rack panels snap on and off.

GSFC-59

Intrnument adjustment knob locks to prevent accidental maladjustment.

N-PS-190

Illuminated display panel is easily changed.

MSC-108

Screening technique makes reliable bond at room temperature.

N-PS-227

Flexible curtain shields equipment from intense heat fluxes.

N-PS-48

Transducer senses displacements of panels subjected to vibration.

ARC-37

Galvanic corrosion reduced in aluminum fabrications.

N-PS-272

Integral rims forced in metal panels by cold-press extrusion.

N-PS-230

Expandable insert serves as screw anchor.

MSC-301

Concealed hinge permits flush mounting of doors and hatches.

MSC-623

Ultrasonic emission method enables testing of adhesive bonds.

N-PS-799

Veratilbe machine mills, saves light materials.

N-PS-627

Impact and puncture resistant material protects parts from damage.

MSC-747

Study made to control depth of potting compound for honeycomb sandwich fasteners.

LEWIS-370

Preformed stiffeners used to fabricate structural components for pressurized tanks.

N-PS-2540

Application of distorted models in developing scaled structural models.

N-PS-1796

Roll diffusion bonding of titanium alloy panels.

N-PS-2540

Simulated hailstonle fabrication and use in testing weatherability of structures.

NRO-10783

Compound taper milling machine.

MSC-1574

Pressure-control purge panel for automatic butt welding.

N-PS-18465

Electronic circuitry used to automate paper chromatography.

JPL-840

Mechanism continuously measures static and dynamic cable loads.

MSC-217

Expandable takeup reel facilitates paper tape removal.

WG-271

Coded photographic proof paper could serve.
PARA HYDROGEN

as convenient densitometer
M-FS-13374 B67-10443 02

Investigation of temperature dependence of
development and aging
ARG-10145 B69-10022 04

Technique for highly efficient recovery
of microbiological contaminants
MSC-13250 B69-10273 04

PARA HYDROGEN

Real fluid properties of normal and
parahydrogen
LEWIS-10458 B68-10361 06

PARABOLIC ANTENNAS

computer programs for antenna feed system
design and analysis
NPO-10359 B67-10504 06

PARABOLIC BODIES

cone and column solar energy concentrator
LANGLEY-210 B67-10517 01

Multi-feed cone for Cassegrainian antennas
NPO-10539 B69-10269 01

PARABOLIC REFLECTORS

trommel cup reflector directed maximum energy
from light source
JPL-424 B63-10263 03

Interferometer construction assures
parallelism of critical components
JPL-704 B65-10292 02

Unique construction makes interferometer
insensitive to mechanical stresses
JPL-725 B65-10295 02

Small, high-intensity flasher permits
continuous close-in photography
BU-0043 B66-10119 03

scanning means for Cassegrainian antennas
JPL-946 B67-10174 05

Glancing incidence telescope for far
ultraviolet and soft X-rays
GSPC-10052 B67-10508 02

Energy-storage of a prescribed impedance
NPO-10303 B69-10380 01

PARABOLOID MIRRORS

wide-aperture solar energy collector is light
in weight
JPL-SC-055 B65-10046 02

Circuit board hole coordinate locator
concept
S-FS-14737 B69-10539 01

PARACHUTE DESCENT

Nylon shock absorber prevents injury to
parachute jumpers
MSC-226 B66-10080 05

PARACHUTES

Improved control system power unit for
large parachutes
MSC-12052 B67-10677 05

Quick-attach clamp
XPE-05421 B68-10250 05

Rocket sonde measurements of ozone in the
upper atmosphere
GSPC-10580 B69-10077 02

PARACHUTING INJURY

Nylon shock absorber prevents injury to
parachute jumpers
MSC-226 B66-10080 05

PARAFFINS

Variable-transparency wall regulates
temperatures of structures

SUBJECT INDEX

LANGLEY-25 B63-10528 03

High-temperature bearing lubricants
LEWIS-10408 B68-10249 05

PARALLAX

Multipurpose binocular scanning apparatus
NPO-11002 B69-10311 02

Stereo TV enhancement study
M-FS-14805 B69-10497 01

PARALLEL PLATES

Absolute viscosity measured using
instrumented parallel plate system
JPL-874 B67-10041 01

Machining heavy plastic sections
M-FS-12720 B67-10381 03

Electrochemical cell has internal resistive
heater element
GSPC-10358 B66-10325 01

PARALLELIPIPEDS

Computer program resolves radiative,
conductive, and convective heat transfer
problems for variety of geometries
N-FS-1910 B67-10329 06

PARALYSIS

Human transfer functions used to predict
system performance parameters
LANGLEY-203 B66-10379 01

New method used to fabricate gallium arsenide

I-479
 POTENTIAL APPLICATIONS
Photovoltaic cells

- **Photovoltaic device**
  - WO-0052

- **Cuprous selenide and sulfide as improved photovoltaic barriers**
  - WO-0052

- **Optics used to measure torque at high rotational speeds**
  - Lewis-13

- **Laser beam transmits electric power**
  - GSFC-293

- **Cuprous selenide and sulfide as improved photovoltaic barriers**
  - WO-0052

- **Solar cell submodule design facilitates assembly of lightweight arrays**
  - JPL-728

- **Feasibility study of wireless power transmission systems**
  - B68-10309

- **Photovoltaic effect in organic polymer-iodine complex**
  - B67-10634

- **Method for copper staining of germanium crystals**
  - ARG-10403

- **Optimizing solar-cell grid geometry**
  - B69-10460

- **Uranyl phthalocyanines show promise in the treatment of brain tumors**
  - B67-10188

- **Apparatus presents visual display of semiconductor surface characteristics**
  - JPL-665

- **Production of solvated electrons**
  - ARG-10416

- **Improved electrode gives high-quality biological recordings**
  - MSC-17

- **Spray-on electrodes enable EKG monitoring of physically active subjects**
  - FBC-36

- **Special tool kit aids heavily garmented workers**
  - MSC-176

- **Study of hydrogen slush-hydrogen gel utilization**
  - M-PS-13068

- **Photomicroscopy**
  - M-PS-14556

- **Simulator effects partial gravity conditions**
  - MSC-152

- **Substituted silane-diol polymers have improved thermal stability**
  - M-PS-469

- **Siloxane elastomer remains resilient at 400 deg C**
  - M-PS-1144

- **Materials data handbooks prepared for aluminum alloys, 2014, 2219, and 5456, and stainless steel alloy 301**

High temperature coatings for gas bearings
LEWIS-10793 B69-10200 03

I-488
PLASMA TEMPERATURE
Microwave technique measures plasma characteristics
LANGLEY-134 B65-10122 02

PLASMAS (PHYSICS)
Computer programs calculate potential and charge distributions in a plasma
M-PS-671 B66-10553 01

Sensors measure surface ablation rate of reentry vehicle heat shield
LANGLEY-287 B66-10592 01

movable RF probe eliminates need for calibration in plasma accelerators
LEWIS-10127 B67-10362 01

Potassium plasma cell facilitates thermionic energy conversion process
ARG-10010 B67-10399 01

PLASTERS
Spray-on technique simplifies fabrication of complex thermal insulation blanket
M-PS-497 B66-10053 03

Cork is used to make tooling patterns and molds
MSC-425 B66-10328 01

PLASTIC COATINGS
Flexible magnetic planning boards are easily transported
M-PS-340 B65-10219 05

Fogging technique used to coat magnesium with plastic
LEWIS-10316 B67-10594 03

Sprayed shielding of plastic-encapsulated electronic modules
M-PS-13570 B69-10607 01

PLASTIC DEFORMATION
New package for Belleville spring permits rate change, easy disassembly
JPL-392 B63-10247 05

Plastic plus stainless-steel fibers make resilient, impermeable material
MGC-294 B65-10374 03

Rubber-coated bellows improves vibration damping in vacuum lines
LEWIS-273 B66-10187 02

Treatment increases stress-corrosion resistance of aluminum alloys
M-PS-1840 B66-10595 05

Hydrodynamics of a new concept of primary containment by energy absorption
ARG-10242 B69-10046 05

PLASTIC FLOW
Integral ribs formed in metal panels by cold-press extrusion
M-PS-230 B65-10141 05

PLASTIC PROPERTIES
High strength superplastic superalloy
LEWIS-10805 B69-10293 03

PLASTIC TAPES
Calibrating ultrasonic test equipment for checking thin metal strip stock
NWC-10009 B67-10127 01

Automated microorganism Sample Collection Module
SQ-10421 B69-10223 04

Masking of aluminum surface against anodizing
M-PS-12964 B69-10335 05

Helical recorder
GSFC-10614 B69-10340 01

PLASTICIZERS
Mechanical properties of plastics predetermined by empirical method
ARC-20 B64-10068 03

PLASTICS
Quick-hardening problems are eliminated with spray gun modification which mixes resin and accelerator liquids during application
LANGLEY-64 B65-10318 03

Flexible honeycomb structure can bend to fit compound curves
M-PS-13 B63-10385 05

Portable flooring protects finished surfaces, is easily moved
M-PS-15 B63-10387 05

Variable-transparency wall regulates temperatures of structures
LANGLEY-25 B63-10528 03

Connector for thermocouple leads saves costly wire, makes reliable connectors
LANGLEY-26 B63-10529 01

A technique for making animal restraints
ARC-25 B63-10564 05

Plastic molds reduce cost of encapsulating electric cable connectors
M-PS-69 B63-10568 05

Front and back printed circuit layouts presented on single sheet
GSFC-93 B69-10596 01

Cryogenic waveguide window is sealed with plastic foam
JPL-559 B63-10613 01

Modified RF coaxial connector ends vacuum chamber wiring problems
GSFC-150 B64-10010 01

Mechanical properties of plastics predetermined by empirical method
ARC-20 B64-10068 03

Plastic films for reflective surfaces reproduced from masters
GSFC-188 B64-10151 03

Gas diffusion cell removes carbon dioxide from occupied airtight enclosures
MSC-118 B64-10319 03

Polychart contour plotter enables data extrapolation from multiple plotting charts
M-PS-37 B64-10406 05

Illuminated display panel is easily changed
MSC-100 B65-10003 05

Helical coaxial-resonator makes excellent RF filter
GSFC-243 B65-10012 01

Optical arrangement increases useful light output of semiconductor diodes
JPL-SC-064 B65-10020 05

Seismic transducer measures small horizontal displacements
M-PS-01 B65-10029 05

Improved holder protects crystal during high acceleration and impact
JPL-463 B65-10037 05

Thermistor connector assembly increases accuracy of measurements
LANGLEY-62 B65-10045 01

Spherical model provides visual aid for cubic crystal study
LEWIS-108 B65-10065 03
Simple scale interpolator facilitates reading of graphs
LANGLEY-86 B65-10070 05

Compact assembly generates plastic foam, inflates flotation bag
LANGLEY-96 B65-10090 05

Vapor pressure measured with inflatable plastic bag
GSFC-281 B65-10136 03

Epoxy-resin patterns speed shell-molding of aluminum parts
M-PS-303 B65-10177 05

Inexpensive electrical connector is moisture and corrosion-proof
ISC-164 B65-10196 01

Hollow plastic hoops protect thermocouple in storage and handling
NU-0023 B65-10256 05

Organic reactants rapidly produce plastic foam
LANGLEY-37 B65-10288 03

Removable well in reaction flask facilitates carbon dioxide collection
ABC-47 B65-10316 03

Inert-gas welding and brazing enclosure fabricated from sheet plastic
LEWIS-220 B65-10338 05

Improved poppet valve provides positive damageproof seal
M-PS-293 B65-10346 05

Fastener distributes stress evenly from sandwich-panel-hung items
MSC-236 B65-10358 05

Flexible plastic ring assembly makes durable shaft seal
WOO-227 B65-10367 05

Respiratory transfer value has fail-safe feature
ABC-1 B65-10369 01

Plastic plus stainless-steel fibers make resilient, impermeable material
WOO-246 B65-10374 03

Device detects unbonded areas in plastic laminates
WOO-206 B65-10380 01

Drill bit design assures clean holes in laminated materials
WOO-098 B65-10386 05

Shrinkable sleeve eliminates shielding gap in RF cable
WOO-207 B65-10387 01

Beach vise adapter grips tubing securely and safely
MSC-279 B66-10056 05

Plastic scintillator converts standard photomultiplier to ultraviolet range
BBC-9 B66-10108 02

Rotating sandrel speeds assembly of plastic inflatables
LANGLEY-155 B66-10137 05

Corrosion of metal samples rapidly measured
NU-0041 B66-10140 03

Silazane polymers show promise for high-temperature application
M-PS-466 B66-10194 03

Special tool seals conductors with combination of plastic sleeves
M-PS-579 B66-10209 05

Flow ring valve is simple, quick-acting
M-PS-752 B66-10255 05

Electrically conductive fibers thermally isolate temperature sensor
GSFC-456 B66-10349 01

Device serves as hinge and electrical connector for circuit boards
M-PS-743 B66-10359 01

Alignment tool facilitates pin placement on irregular horizontal surfaces
LANGLEY-219 B66-10410 05

Plastic tubing protects flexible copper hose
M-PS-772 B66-10588 05

Thin plastic sheet eliminates need for expensive plating
M-PS-1896 B66-10681 03

Thermocouple-flexible cable connector insulation is highly reliable
NU-0062 B66-10709 01

Dispersion of borax in plastic is excellent fire-retardant heat insulator
ABG-5 B66-10116 03

Static electricity of polymers reduced by treatment with iodine
WOO-10062 B66-10132 03

Cryogenic seal remains leaktight during thermal displacement
ABG-96 B66-10134 02

Improved compression molding process
LANGLEY-10027 B66-10302 03

Pocket-size manual tape reader device aids computer tape checking
KSC-10058 B66-10361 01

Machining heavy plastic sections
M-PS-12720 B66-10381 03

Polarized light reveals stress in machined laminated plastics
LEWIS-10018 B66-10383 03

Dielectric prisms would improve performance of quasi-optical microwave components
BBC-10011 B66-10416 01

Adhesives for laminating polyimide insulated flat conductor cable
M-PS-12066 B66-10429 03

Warpage eliminated in copper-clad microwave circuit laminates
M-PS-13892 B66-10454 03

Plastic shoe facilitates ultrasonic inspection of thin wall metal tubing
NUC-10010 B67-10416 01

Epoxy resins produce improved plastic scintillators
ABG-241 B67-10596 03

Dynamic captive plastic seal
M-PS-12988 B67-10600 03

Connector shorting cap provides pin alignment, inspection, and stray voltage protection
M-PS-13111 B67-10635 01

Heat-shrink plastic tubing seals joints in glass tubing
LEWIS-10329 B66-10940 05

Plastic preforms facilitate fabrication of welded cordwood electronic modules
LEWIS-90339 B66-10963 01

Improved molding process ensures plastic
evaluation of a fluorocarbon plastic used in cryogenic valve seals

parts of higher tensile strength

fine-mesh screen made by simplified method

finite element analysis of compressible solids with nonlinear material properties

Hydraulic calipers
M-PS-10952  B69-10399  05

PHOTOMETRY

Electronic device simulates respiration rate and depth
MSC-89  B66-10255  01

Pneumotachometer counts respiration rate of human subject
MSC-92  B64-10259  01

Gelatin coated electrodes allow prolonged bioelectronic measurements
MSC-153  B66-10088  01

PODS (EXTERNAL STORES)

Program computes zero lift wave drag of entire aircraft
LANGLEY-10019  B67-10530  06

POIKILOMETRY

Investigation of temperature dependence of development and aging
ARG-10145  B69-10022  04

POIUNT DEFECTS

Resistivity measurements of neutron-irradiated pure metals and Al-Zn alloys
ARG-10108  B66-10200  03

POIUNT SOURCES

Point-source detection system rejects spatially extended radiation sources

GSFC-486  B66-10622  01

POINT TO POINT COMMUNICATIONS

Omnidirectional antennas transmit and receive over large bandwidth
GSFC-436  B66-10133  01

POINTS (MATHEMATICS)

The X square statistic and goodness of fit test
GSFC-10547  B66-10136  02

POISONING

Product identification techniques used as training aids for analytical chemists
SAN-10025  B68-10373  03

POISON DENSITY FUNCTIONS

Improved design of item in high speed rotating machinery
B-FS-10441  B69-10373  05

POISSON EQUATION

Design and sparing techniques to meet specified performance life
BG-10200  B69-10528  02

POISSON RATIO

Contact stresses calculated for miniature slip rings
M-PS-280  B65-10098  05

Computer program for determination of natural frequencies of closed spherical sandwich shells
MSC-1246  B67-10279  06

An ultrasonic method for studying elastic moduli as a function of temperature
ARG-10167  B69-10082  02

Damping of thermoelastic structures
M-PS-20002  B69-10467  02

POLAR COORDINATES

Radiation-detector optical-imaging device is of simplified construction
GSFC-251  B64-10299  01

A polar graphic method for determining the attitude of rocket vehicles
GSFC-10860  B69-10591  02

POLARIMETERS

Polarimeter provides transient response in nanosecond range
JPL-890  B67-10021  02

POLARITY

Circuit switches latching relay in response to signals of different polarity
WGO-055  B63-10508  01

Threshold detector produces narrow pulses at high repetition rates
GSFC-383  B65-10310  01

Simple, nondestructive test identifies metals
MSC-525  B66-10305  03

Shaft encoder presents digital output

Positive and negative output circuits
LEWIS-10715  B69-10151  01

Magnetic field mapper
LEWIS-10782  B69-10476  01

POLARIZATION

Magnetic field controls carbon arc tail flame
MSC-139  B65-10188  01

Isotopically pure magnesium isotope-24 in

I-495
POLARIZATION (CHARGE SEPARATION)

Prepared from magnesium-24 oxide
ARO-10154 B69-10293 02

POLARIZATION (CHARGE SEPARATION)

Polarizing keys prevent mismatch of connector plugs and receptacles
MSC-443 B66-10251 01

Electrochemical study of aluminum corrosion in boiling high purity water
ARO-10306 B69-10033 03

High-power microwave power divider concept
NFO-11031 B69-10290 01

Storage of electric and magnetic energy in passive non-reciprocal networks
ARO-10360 B69-10630 01

POLARIZATION (WAVES)

Wideband, high efficiency optical modulator requires less than 10 watts drive power
M-PS-12733 B67-10289 01

Range recording technique enables four-way polarization measurements
M-PS-12447 B67-10460 01

Electro-optic modulator for infrared laser using gallium arsenide crystal
GSFC-10686 B68-10255 02

Energy-storage of a prescribed impedance
NFO-10303 B69-10380 01

Instrumentation for potentiostatic corrosion studies with distilled water
ARO-10409 B69-10413 03

Proposed acousto-optic filter
HQ-10440 B69-10466 02

Rotary antenna attenuator
NFO-10648 B69-10502 01

POLARIZATION CHARACTERISTICS

Meter accurately measures flow of low-conductivity fluids
JPL-0021 B67-10280 01

Antenna configurations provide polarization diversity
GSFC-74 B66-10066 01

A theoretical study of radar-backscatter from distributed targets with emphasis on polarization dependence
M-PS-13775 B69-10560 02

POLARIZED LIGHT

Servo system facilitates photoelastic strain measurements on resins
JPL-504 B64-10280 01

Photosensitive filler minimizes internal stresses in epoxy resins
M-PS-1880 B67-10227 03

Simplified technique demonstrates magnetic domain switching
M-PS-13153 B67-10342 02

Polarized light reveals stress in machined laminated plastics
LEWIS-10018 B67-10383 03

Aerial-image enables diagrams and animation to be inserted in motion pictures
ARO-165 B67-10398 02

Synthesis of electro-optic modulators for amplitude modulation of light
M-PS-14268 B68-10275 02

Flow angle sensor and readout system
LEWIS-90298 B69-10050 01

Optically exciting a magnetic memory - A feasibility study

I-496

SUBJECT INDEX

M-PS-14855 B69-10060 02

POLARIZED RADIATION

Improved circularly polarized planar-array antenna
NPO-10301 B69-10382 01

A sterilizable high-impact antenna
NPO-10231 B69-10697 01

POLARIZERS

Servo system facilitates photoelastic strain measurements on resins
JPL-504 B64-10280 01

Walling pyrometer uses Kerr cell shutter for fast responses
WU-0060 B65-10050 01

Rapid-response, light-exposure control system
NFO-10238 B68-10502 01

POLAROGRAPHY

New electrolyte may increase life of polarographic oxygen sensors
MSC-1049 B67-10003 03

Coordination chemistry in fused-salt solutions
ARO-10469 B69-10423 03

Rate of heat extraction controller for environmental control
HQ-10318 B69-10516 01

POLES

Threading hook facilitates safe recovery of heavy loads
MSC-46 B64-10185 05

POLISHING

Ellipsoidal optical reflectors reproduced by electroforming
GSFC-92 B63-10547 05

Portable tool cleans pipes and tubing
MSC-238 B65-10375 05

Seal surfaces protected during assembly
WU-0067 B66-10266 05

Inspection of fine wires simplified by capillary tube wire holder
MSC-358 B66-10329 01

Study made of destructive sectioning of complex structures for examination
LEWIS-381 B66-10676 05

Process sequence produces strong, lightweight reflectors of excellent quality
LEWIS-331 B67-10010 05

Chemical milling solution reveals stress corrosion cracks in titanium alloy
LEWIS-10077 B67-10322 03

Machine heavy plastic sections
M-PS-12720 B67-10381 03

Silicon carbide diode for increased light output
M-PS-20063 B69-10096 01

Raman-plane metallography of deformed pyrolytic carbon
NPO-11196 B69-10888 03

Automatic sample rotator for metallographic polishing
NPO-11015 B69-10596 03

POLUTIOE

New method for critical failure prediction of complex systems
M-PS-14133 B68-10252 02
Concentrations of the naturally occurring radionuclides Pb-210, Po-210, and Ra-226 in aquatic fauna

Improved poppet valve provides positive damage-proof seal

Buoyant stokes litter assembly used for sea rescue operations

Improved adhesive for cryogenic applications cures at room temperature

Sea dye marker provides visibility for 20 hours

Phonocardiograph microphone is rugged and moisture proof

Impact and puncture resistant material protects parts from damage

Adhesive for polyester films cures at room temperature, has high initial tack

Primary cell utilizes neither liquid nor fused electrolytes

Quick-release hook-and-loop fastener

Polymer film exhibits thermal and radiation stability

New class of thermosetting plastics has improved strength, thermal and chemical stability

One-piece transparent shell improves design of belt assembly

Thermocouple-flexible cable connector insulator is highly reliable

Quick-release hook-and-loop fastener

POLYCRYSTALLS

Cuprous selenide and sulfide form improved photovoltaic barriers

Analyses of silicon dioxide, magnesium oxide, lead fluoride, bisulfate an low-pass velocity filters for neutrons

Preferred-orientation analysis of polycrystalline materials

POLYESTERS

Adhesive for vacuum environments resists shock and vibration

Aluminum alloys protected against stress-corrosion cracking

Improved adhesive for vacuum environments resists shock and vibration

Buoyant stokes litter assembly used for sea rescue operations

Improved adhesive for cryogenic applications cures at room temperature

Improved primer for bonding polyurethane adhesives to metals

Modified filter prevents conduction of microwave signals along high-voltage power supply leads

Adhesive for polyester films cures at room temperature

Dispersion of borax in plastic is excellent fire-retardant heat insulator

Multi-feed cone for Cassegrainian antenna

Thermal protective visor for entering high temperature areas

Improved primer for bonding polyurethane adhesives to metals

Polyester improves properties of an aromatic polymer

High-temperature bearing lubricants

A concept for magazine Bimat processor

Quick-release hook-and-loop fastener

Polyester resin fabricated from sheet plastic

Synthesis of polyethers of hexafluorobenzene and hexafluoropropenadiol

Polyester resin modified filter prevents conduction of microwave signals along high-voltage power supply leads

POLYETHERS

Inert-gas welding and brazing enclosure fabricated from sheet plastic

Primary cells utilize halogen-organic charge transfer complex

Trace hydrazines in aqueous solutions accurately determined by gas chromatography

Vibration damping composition has flash-away feature
**POLYIMIDE RESINS**

- Rapid and precise analysis for calcium in blood serum
  ARG-10246 B69-10160 04

**POLYIMIDE RESINS**

- New rapid-curing, stable polyimide polymers with high-temperature strength and thermal stability
  LEWIS-10576 B69-10118 03

- Precision mounting for instrument optical elements provided by polyimide bonding
  B66-10081 03

**POLYIMIDE FILMS**

- Film coating permits low-force scribing
  B66-10609 03

**POLYISOBUTYLENE**

- New class of thermosetting plastics has improved strength, thermal and chemical stability
  LEWIS-10576 B69-10118 03

**POLYURETHANES**

- New rapid-curing, stable polyimide polymers with high-temperature strength and thermal stability
  LEWIS-10576 B69-10118 03

**POLYISOPRENE**

- New class of thermosetting plastis with improved strength, thermal and chemical stability
  LEWIS-10576 B69-10118 03

**POLYMER FILMS**

- Plastic films for reflective surfaces reproduced from masters
  GSFC-198 B64-10151 03

- Efficient thin film heating element takes minimum space
  GSFC-289 B65-10123 01

- Encapsulation process sterilizes and preserves surgical instruments
  JPL-484 B64-10066 05

**POLYURETHANE FILMS**

- Static electricity of polymers reduced by treatment with iodine
  B67-10132 03

**POLYETHYLENE FILMS**

- Substituted silane-diol polymers have improved thermal stability
  I-FS-469 B66-10259 03

**POLYURETHANE FILMS**

- Primary cells utilize halogen-organic charge transfer complex
  B66-10682 02

**POLYOXYMethylene FILMS**

- Photosensitive filler minimizes internal stresses in epoxy resins
  B67-10227 03

**POLYESTERS**

- New method for observing gas evolution during plastic laminate cure
  B69-10530 03

**POLYAMIDE FILMS**

- New isostatic compression process converts polyaromatics into structural material
  B66-10744 03

**POLYETHYLENE FILMS**

- Apparatus measures swelling of membranes in electrochemical cells
  B64-10179 05

**POLYETHYLENE FILMS**

- Low-cost seal compensates for surface irregularities
  B66-10299 03

**POLYETHYLENE FILMS**

- Primary cell utilizes halogen-organic charge transfer complex
  B66-10682 02

**POLYETHYLENE FILMS**

- Photosensitive filler minimizes internal stresses in epoxy resins
  B67-10227 03

**POLYESTER FILMS**

- Encapsulation process sterilizes and preserves surgical instruments
  JPL-484 B64-10066 05

**POLYETHYLENE FILMS**

- Machine tests crease durability of sheet materials
  JPL-604 B64-10179 05

**POLYESTERS**

- Vapor diffusion electrode improves fuel cell operation
  LEWIS-187 B66-10281 03

**POLYETHYLENE FILMS**

- Polyelectrolyte electrolyte produces swelling of membranes in electrochemical cells
  GSFC-198 B65-10087 01

**POLYETHYLENE FILMS**

- New rigid-curing, stable polyimide polymers with high-temperature strength and thermal stability
  LEWIS-10576 B69-10118 03

**SUBJECT INDEX**

- Cone and column solar energy concentrator
  B67-10517 01

- Storage-stable foamy polyurethane is activated by heat
  B66-10111 03

- Substituted silane-diol polymers have improved thermal stability
  B66-10259 03

- Primary cells utilize halogen-organic charge transfer complex
  B66-10682 02

- Photosensitive filler minimizes internal stresses in epoxy resins
  B67-10227 03

- Synthesis of pure aromatic glycidyl esters for use as adhesives
  B67-10647 03

- New rapid-curing, stable polyimide polymers with high-temperature strength and thermal stability
  B69-10118 03

- Heparin insolubilized with crosslinking agent
  B69-10295 03

- Development of improved potting and conformal coating compounds
  B69-10559 03

- Production of crystalline polymers via liquid crystal monomers
  B69-10744 03

- Low-cost seal compensates for surface irregularities
  B66-10299 03

- Metal plates on fluorocarbon polymers
  B63-10528 03

- Encapsulation process sterilizes and preserves surgical instruments
  B64-10066 05

- Machine tests crease durability of sheet materials
  JPL-604 B64-10179 05

- Apparatus measures swelling of membranes in electrochemical cells

SUBJECT INDEX

Closed circuit TV system automatically guides welding arc 
M-FS-20084 B66-10364 05

Device for diode tuning in a stripl ine varactor harmonic multiplier 
M-FS-20153 B69-10013 01

Helical tape forming device 
GSPC-10830 B69-10137 05

Astronaut's tool for withdrawing/replacing computer cards 
M-FS-20453 B69-10183 05

Camera mount for close-up stereo photographs 
LANGLEY-10442 B69-10226 02

Semiautomatic inspection of microfilm records 
M-FS-20240 B69-10301 02

Surface profilometer for examining grain-boundary grooves 
ARG-10290 B69-10345 05

Piezoelectric linear actuator 
ARG-13194 B69-10469 05

Apparatus alters position of objects to facilitate demagnetization 
GSFC-234 B64-10277 05

Jig and fixture aid fabrication of tungsten rivets 
LEWIS-1085 B65-10101 05

Thermal motor positions magnetometer sensors 
ARG-51 B66-10978 05

Adjustable cutting guide aligns and positions stacks of material 
MSC-321 B66-10210 05

Device facilitates centering of workpieces in lathe chuck 
M-FS-685 B66-10277 05

Inflatable holding fixture permits X-rays to be taken of inner weld areas 
M-FS-656 B66-10327 03

Alignment tool facilitates pin placement on irregular horizontal surfaces 
LANGLEY-219 B66-10410 05

Heavy duty precision leveling jacks expedite setup time on horizontal boring mill 
M-FS-1084 B66-10441 05

Motion drive system is accurately controlled in the 1-micron range 
JPL-684 B66-10695 05

Welding torch and wire feed manipulator 
M-FS-13102 B67-10385 05

X-ray film holder permits single continuous picture of tubing joint 
LEWIS-10382 B66-10334 05

Remotely operated gripper provides vertical control rod movement 
ARG-10160 B66-10359 05

High-torque precision stepping drive 
M-FS-14772 B66-10549 05

Two-axis winch installer for heavy ducts in confined space 
M-FS-149254 B69-10062 05

Positive Feedback
Efficient dc to dc converter eliminates large stray magnetic fields 
GSFC-463 B66-10376 01

POTASSIUM COMPOUNDS

Positive and negative output circuits 
LEWIS-10715 B69-10151 01

Radiometric temperature reference 
MSC-13276 B69-10507 01

POTASSIUM CHLORIDES

Gelatin coated electrodes allow prolonged biochemical measurements 
MSC-153 B66-10088 01

Grain-boundary migration in KCl bicrystals 
ARG-10181 B69-10455 03

Zone purification of potassium chloride 
ARG-10377 B69-10241 03

POTASSIUM CHROMATES

A rapid stress-corrosion test for aluminum alloys 
M-FS-20175 B68-10536 03

POTASSIUM COMPOUNDS

Crack detection method is safe in presence of liquid oxygen 
M-FS-236 B65-10107 03

Air-cured ceramic coating insulates against high heat fluxes 
M-FS-150 B65-10357 03

Submicron metal powders produced by ball milling with grinding aids 
LEWIS-188 B66-10221 03

Separation technique provides rapid quantitative determination of cesium-137 in irradiated nuclear fuel

POTASSIUM HYDROXIDES

NC-10047  B67-10194  03

Development of low temperature battery
LEWIS-10356  B67-10546  01

A ceramic composite thermal insulation
PS-3-13591  B67-10608  03

Study of actinide chemistry in saturated potassium fluoride solution
ARG-10204  B67-10004  03

Self-discharge in birefringent cells containing alkali metal
ARG-10147  B67-10631  01

POTASSIUM HYDROXIDES
Regenerative fuel cell combines high efficiency with low cost
WOO-090  B67-10363  01

New energy storage concept uses tapes
LEWIS-239  B66-10998  02

Device removes hydrogen gas from enclosed spaces
GSFC-495  B66-10340  03

Cobalt improves nickel hydroxide electrodes for batteries
LEWIS-10760  B67-10228  01

POTASSIUM NITRATES
Hydrated multivalent cations are new class of solen salt mixtures
ARG-211  B67-10033  03

POTASSIUM OXIDES
Glass formulation has high coefficient of thermal expansion
NO-084  B66-10705  03

POTASSIUM SILICATES
Inorganic paint is durable, fireproof, easy to apply
GSFC-366  B65-10156  03

Pigmented coating resists thermal shock
JPL-3C-083  B65-10354  03

Multilayer refractory nozzles produced by plasma-spray process
WOO-318  B66-10611  05

POTENTIAL ENERGY
Increased junction lead inductance ballasts high-frequency transistors
GSFC-387  B65-10259  01

Quantum mechanical calculations of reactive scattering cross sections in bimolecular encounters
PS-13594  B67-10527  03

Storage of electric and magnetic energy in passive nonreciprocal networks
ARG-10360  B69-10630  01

POTENTIAL FLOW
Acoustic wave analysis
PS-160176  B68-10265  02

POTENTIAL GRADIENTS
Density trace made with computer printout
GSFC-322  B65-10200  01

POTENTIOMETERS
Tension is servo controlled in film advance system
LANGLEY-54  B65-10075  05

System selects framing rate for spectrograph camera
LANGLEY-55  B65-10086  01

Simulator produces physiological waveforms
MSC-94  B65-10091  01

Variable load automatically tests dc power

supplies
GSFC-291  B65-10105  01

Simple circuit reduces transistor switching time
GSFC-314  B65-10234  01

Electropneumatic rheostat regulates high current
ARG-44  B65-10299  01

Photonsensors used to maintain welding electrode-to-joint alignment
MSC-243  B65-10401  05

Microminiature thermocouple monitors own installation
PS-1111  B66-10463  05

Double emitter suppressed carrier modulator uses commercially available components
PS-2494  B67-10101  01

(BISITBBTS)

Light-sensitive potentiometer measures product of two variables
GSFC-240  B65-10076  01

Inexpensive infrared source improvised from flashlight
PS-394  B66-10996  02

Accuracy of laser measurements improved by pulse autocorrelator electronic system
RSC-10033  B67-10338  01

Stable ac phase and amplitude comparator
PS-13086  B67-10459  01

Fixture facilitates soldering operations
PS-14456  B68-10573  05

Digital computer technique for setup and checkout of an analog computer
PS-13569  B68-10576  06

Two devices for analysis of nystagmus
HG-01273  B69-10224  01

Instrumentation for potentiostatic corrosion studies with distilled water
ARG-10409  B69-10413  03

Measuremen technique for the determination of antenna directivity
PS-12799  B69-10677  01

POTENTIOMETERS (RESISTORS)
Meter accurately measures flow of low-conductivity fluids
JPL-0021  B63-10280  01

Control system maintains selected liquid level
PS-4-70  B66-10039  01

High voltage potential divider calibrated by simple device
ARG-83  B66-10497  01

Variable-pulse switching circuit accurately controls solenoid-valve actuations
PS-13595  B67-10022  01

Capacitance-coupled wiper increases potentiometer life
ARG-10060  B68-10175  01

Improved dc voltage regulator

I-504
POWDER METALLURGY

Low-cost insulation system for cryostats eliminates need for a vacuum LEWIS-64 B63-10365 03

Fine-particle filter prevents damage to vacuum pumps LEWIS-106 B63-10489 03

Lead oxide ceramic makes excellent high-temperature lubricant LEWIS-144 B64-10116 03

Thin transparent films formed from powdered glass GSPC-352 B65-10217 03

Specimen holder design improves accuracy of X-ray powder analysis JPL-SC-165 B66-10075 02

Improved adhesive for cryogenic applications LEWIS-307 B69-10749 03

POWDER (PARTICLES)

Grain growth inhibitor for porous tungsten LEWIS-198 B66-10203 03

Composite of porous metal and solid lubricants increases bearing life LEWIS-307 B67-10007 03

Porous mandrels provide uniform deformation in hydrostatic powder metallurgy LEWIS-198 B67-10209 03

Alumina-titanium hydride-boron carbide composite provides lightweight neutron shield material NUC-10069 B67-10265 03

Practical new method of measuring thermal-neutron fluence NUC-10086 B67-10352 03

POWER SUPPLIES

Circuit switches latching relay in response to signals of different polarity
  WGO-055  863-10508  01

Comfortable, lightweight safety helmet holds radio transmitter, receiver
  RSC-53  864-10015  05

Emission tester for high-power vacuum tubes
  JPL-628  864-10158  01

PTC thermistor protects multiloaded power supplies
  GSFC-236  864-10281  01

Carbon arc ignition improved by simple auxiliary circuit
  RSC-103  865-10018  01

Pulse height analyzer operates at high repetition rates, low power
  WGO-046  865-10041  01

Zener diode is starter for transistor regulated power supply
  RG-0015  865-10052  01

Fiber glass parts cured during filament winding eliminates oven, saves time
  M-P-FS-16  865-10068  03

Variable voltage supply uses Zener diode as reference
  GSFC-262  865-10097  01

Variable load automatically tests dc power supplies
  GSFC-291  865-10105  01

Dc to ac converter operates efficiently at low input voltages
  GSFC-130  865-10178  01

Improved wire memory matrix uses very little power
  JPL-SC-167  865-10359  01

High-intensity flashing beacon powered by mercury cells
  LANGLEY-80  865-10361  01

Photoelectric system continuously monitors liquid level
  M-PS-417  865-10382  01

Linear signal noise summer accurately determines and controls S/N ratio
  JPL-SC-152  866-10433  01

Standard arc welders provide high asperage

POWER SUPPLY CIRCUITS

- direct current source
  LANGLEY-267  866-10441  01

- Rectilinear accelerometer possesses self-calibration feature
  M-P-FS-1840  866-10452  01

- Preregulator feedback circuit utilizes Light Actuated Switch
  M-P-1180  866-10582  01

- Recharge unit provides for optimum recharging of battery cells
  GSFC-10686  866-10273  01

- High-torque power wrench, a concept
  M-P-1819  866-10299  05

- Electrochemical cell has internal resistive heater element
  GSFC-10358  868-10325  01

- High-efficiency step-up regulator
  M-P-20049  868-10432  01

- Field Effect Transistor /FET/ circuit for variable gain amplifiers
  GSFC-10116  869-10322  01

- Generation of sonic power during welding
  M-P-2030  869-10404  05

- Analysis of secondary cells with lithium anodes and immobilized fused-salt electrolytes
  GSFC-10452  869-10613  01

- Cryogenic flux-concentrator
  AG-10494  869-10654  02

POWER SUPPLY CIRCUITS

- Igniting system for mercury lamps protects transistorized sustaining supply
  JPL-421  863-10262  01

- Modular thermoelectric cell is easily packaged in various arrays
  GSFC-339  865-10199  01

- Dual-voltage power supply has increased efficiency
  LEWIS-107A  866-10002  01

- Circuit exhibits power efficiency greater than 75 percent
  M-P-254  866-10034  01

- Soldering iron temperature is automatically reduced
  ARC-57  866-10203  01

- Control circuit maintains unity power factor of reactive load
  RSC-192  866-10431  01

- Digital-to-analog converter operates from low level inputs
  JPL-907  867-10357  01

- Circuit detects voltage decrease in computer power supply
  RSC-67-12C  866-10019  01

- Short circuit protection for a power distribution system

POWER TRANSMISSION

Laser beam transmits electric power
GSFC-293 B65-10158 01

Compact actuator converts rotary to linear motion
JPL-786 B66-10245 05

Flexible drive allows blind machining and welding in hard-to-reach areas
MSC-524 B66-10428 05

Feasibility study of wireless, power transmission systems
M-FS-14691 B68-10309 01

PREAMPLIFIERS

Auxiliary circuit enables automatic monitoring of EKG's
MSC-106 B65-10142 01

Boron trifluoride nuclear detector preamplifier uses single-cable connection
LEWIS-178 B65-10255 01

Electrometer preamplifier has drift correction feedback
JPL-SC-074 B65-10267 01

Phonocardiograph system monitors heart sounds
MSC-185 B66-10154 04

Microphone multiplexer system provides multiple outlets from single source
GSFC-426 B66-10308 01

Remote preamplifier circuit maintains stability over wide temperature range
MSC-278 B66-10432 01

Point-source light sensor circuit is insensitive to background light
JPL-778 B66-10502 01

Miniature electrometer preamplifier effectively compensates for input capacitance
ARC-69 B66-10549 01

Current pulse amplifier transmits detector signals with minimum distortion and attenuation
NUC-10055 B67-10347 01

Improved relay optical element for spectroradiometer using cryogenically cooled detector
MSC-11688 B68-10245 02

Laser-Doppler gas-velocity instrument
M-FS-20039 B68-10349 02

Low-cost, fast-response drive circuit for electromechanical torque motors
LEWIS-10143 B68-10386 01

High resolution Ge/Li/ spectrometer reduces rate-dependent distortions at high counting rates
ARG-10144 B68-10420 01

PRECIPITATION

Crack detection method is safe in presence of liquid oxygen
M-FS-236 B65-10107 03

PRECIPITATION (CHEMISTRY)

Standards for electron probe microanalysis of silicates prepared by convenient method
GSFC-869 B66-10234 03

Process for preparing dispersions of alkali metals
JPL-794 B66-10639 03

Ion exchange determines iodine-131 concentration in aqueous samples
ARG-208 B67-10129 04

SUBJECT INDEX

Static electricity of polymers reduced by treatment with iodine
MFC-10062 B67-10132 03

PRECIPITATION HARDENING

Tantalum alloys resist creep deformation at elevated temperatures
LEWIS-350 B66-10558 03

Treatment increases stress-corrosion resistance of aluminum alloys
M-FS-1840 B66-10595 05

Weld microfissuring in Inconel 718 minimized by minor elements
M-FS-18185 B68-10251 03

Strain-age cracking in Rene 41 alloy
M-FS-18650 B69-10605 03

PRECISION

Instrument quickly transposes ground reference target to eye level
MSC-275 B66-10061 05

Threaded pilot insures cutting tool alignment
M-FS-527 B66-10076 05

Etching process mills PH 14-8 Mo alloy steel to precise tolerances
MSC-270 B66-10110 03

Depth indicator and stop aid machining to precise tolerances
M-FS-553 B66-10149 05

Mount enables precision adjustment of optical-instrumentation mirror
MSC-184 B66-10199 02

Parallel line raster eliminates ambiguities in reading timing of pulses less than 500 microseconds apart
JPL-805 B66-10386 01

Heavy duty precision leveling jacks expedite setup time on horizontal boring mill
M-FS-1084 B66-10411 05

Braking mechanism is self-actuating and bidirectional
M-FS-1299 B66-10484 05

Motion drive system is accurately controlled in the 1-micron range
JPL-864 B66-10695 05

Micromanipulation tool is easily adapted to many uses
JPL-129 B67-10004 05

Hydrogen maser as a highly stable frequency reference
M-FS-2437 B67-10146 01

Traveling wire electrode increases productivity of Electrical Discharge Machining /EDM/ equipment
ARG-136 B67-10238 05

Standard surface grinder for precision machining of thin-wall tubing
ARG-10014 B67-10400 05

Precision metal molding
M-FS-13305 B67-10423 05

Automatic transducer switching provides accurate wide range measurement of pressure differential
NUC-10001 B67-10540 01

Precision trimmer aids in preparing biomedical specimen blocks for ultrathin sectioning
ARG-242 B67-10541 05

Modified size bar device measures small
angles with high accuracy  
GSFC-438

N-PS-20427 B69-10284 05

TFE-fluorocarbon liners for flexible hoses
N-PS-16480 B69-10288 05

Hermetically sealed pump
LEW-10837 B69-10320 05

Vibration damper for Miles vertical boring mill ram
MSC-15529 B69-10348 05

Hydraulic calipers
N-PS-18052 B69-10399 05

Stud made of thin-walled pipe response to turbulent fluids
I-FS-1321 B67-10518 05

Computer program analyzes and designs supersonic wing-body combinations
ABC-10141 B68-10335 06

Computer program TRACK performs transient and/or steady state thermal analysis with coupled fluid flow and heat conduction
NUC-10189 B68-10450 06

Mechanical properties of a lap joint under uniform clamping pressure
N-PS-14538 B69-10141 05

Computer programs for axial flow compressor design
LEW-10765 B69-10174 06

Vented piston seal prevents fluid leakage
Quick-acting backup tool for welding ducts between two chambers
I-PS-18404 B69-10396 05

Integral coolant channels supply made by Universal bellows joint restraint permits angular and offset movement
1100-102 B65-10371 05

Fluid-pressure meter can be calibrated without removal from flow line
N-PS-98 B63-10502 05

Molibden thin films are superconductive in strong magnetic fields at low temperatures
JPL-SC-174 B66-10122 02

Expandable rubber plug seals openings for pressure testing
BU-0048 B66-10229 05

Portable lightweight cell provides controlled environment
MSC-648 B66-10370 05

Automatic cryogenic liquid level controller is safe for use near combustible substances
LEW-195 B66-10482 01

Rugged switch responds to minute pressure differentials
N-PS-12704 B67-10389 01

Improved method of dicing integrated circuit wafers into chips
SRC-10138 B69-10441 01

Two-part valve acts as quick coupling
JPL-478 B64-10223 05

Calibrated clamp facilitates pressure application
MSC-290 B66-10059 05

Post-stressed concrete foundation may reduce machinery vibration
ARG-130 B67-10237 05

Computer program provides steady state analysis for liquid propellant propulsion systems
MSC-10064 B67-10414 06

Computer program NCAP-TOSS calculates steady-state fluid dynamics of coolant in parallel channels and temperature distribution in surrounding heat-generating solid
NUC-10042 B67-10456 06

Computer program NCAP provides for steady state thermal and flow analysis of multiple parallel channels in heat generating solid
NUC-10043 B67-10457 06

Study made of thin-walled pipe response to turbulent fluids
N-PS-1321 B67-10518 05

Distillation device supplies cesium vapor at constant pressure
XNP-08124 B69-10020 03

Computer programs TRACK performs transient and/or steady state thermal analysis with coupled fluid flow and heat conduction

Plant respirometer enables high resolution of oxygen consumption rates

Indicator system provides complete data of engine cylinder pressure variation

Design concept for pressure switch calibrator

Pressure probe compensates for dimensional tolerance variations

Miniature telemetry system accurately measures pressure

Gas leak detector is simple and inexpensive

Laser Doppler flowmeter measures gas velocity

System enables more complete calibrations of dynamic-pressure transducers

A piezo-bar pressure probe

Automated tester permits precise calibration of pressure transducers from 0 to 1050 psi

Pressure levels and pulsation frequencies can be varied on high pressure/frequency testing device

Pump simulator provides variable pressure-flow characteristics

Design for high-temperature/1800 deg F/liquid metal pressure transducer

Automatic transducer switching provides accurate wide range measurement of pressure differential

Instrumentation monitors transported material through variety of parameters

Gas pressure in sealed electrochemical cells measured externally

Pneumatic pressure wave generator provides economical, simple testing of pressure transducers

Ultraminiature manometer-tipped cardiac catheter

Dual rate pressure relief valve

Miniature pressure transducer for stressed member application

Silicon strain sensors enable pressure measurement at cryogenic temperatures

Cooled miniature pressure transducers effective at high temperatures

Automatic calibration system for pressure transducers

Combination probe for airflow measurements

Pressure-sensitive bonded junction transducers

Direct indication of particle size in fluidized beds

Cryogenic pressure transducer

New type pressure transducer for severe thermal environments

Miniature backward-diode pressure sensor features stability and low power consumption

Inflatable bladder provides accurate calibration of pressure switch

Indicator system provides complete data of engine cylinder pressure variation

Calibratable solid-state pressure switch

Cryogenic filter method produces super-pure helium and helium isotopes

New method forms bond line free of voids

Lightweight door seals cryogenic container against diaphragm type loading

Bismuth alloy potting seals aluminum connector in cryogenic application

Pressure seal ring may be effective over wide temperature range

Pressure vessels fabricated with high-strength wire and electroformed nickel

Expandable rubber plug seals openings for pressure testing

Vapor diffusion electrode improves fuel cell operation

Fluid logic control circuit operates nutator actuator motor

Prefurred stiffeners used to fabricate structural components for pressurized tanks

Purification train produces ultrapure hydrogen gas

Ultrasonics permits brazing complex stainless steel assembly without flux

Crack growth measured on flat and curved surfaces at cryogenic temperatures

H-PS-91326 B67-10108 02

Study of cryogenic container thermodynamics during propellant transfer
I-PS-19278 B67-10471 05
PROPELLANTS

M-PS-14340 B66-10108 02

Gas chromatographic column enables analysis of propellant hydrazines
MSSC-1511 B66-10586 03

Device measures reaction engine thrust vector deviations
JPL-SC-163 B66-10642 05

Axisymmetric two-phase perfect gas performance program
MSSC-11774 B66-10374 06

Axisymmetric reacting gas nonequilibrium performance program
MSSC-11781 B66-10377 06

PROPORTIONAL CONTROL

Heater control circuit provides both fast and proportional control
M-PS-906 B67-10097 01

PROPORTIONAL CONTROLLERS

A fast-neutron spectrometer of advanced design
M-PS-1644 B66-10555 01

Non-dispersive X-ray emission analysis for geochronal exploration
GSFC-10568 B69-10011 02

A simple electrometer for measuring small photoelectric currents
GSFC-10603 B69-10734 01

PROPELLER

Analysis of secondary cells with lithium anodes and immobilized fumed-salt electrolytes
ARC-10452 B69-10613 01

PROPELLER SYSTEM PERFORMANCE

Computer program provides steady state analysis for liquid propellant propulsion systems
MSSC-10605 B67-10414 06

Rocket engine analog simulation
M-PS-14211 B68-10511 01

PROFILES

Special tool seals conductors with combination of plastic sleeves
M-PS-579 B66-10209 05

PROSTHETIC DEVICES

Bearing alloys with hexagonal crystal structures provide improved friction and wear characteristics
LEWIS-320 B66-10373 03

Human transfer functions used to predict system performance parameters
LANGLAY-203 B66-10379 01

Carbon offers advantages as implant material in human body
M-PS-118207 B69-10087 04

PROTECTION

Portable flooring protects finished surfaces, is easily moved
M-PS-15 B63-10387 05

PTC thermistor protects multiloaded power supplies
GSFC-236 B64-10281 01

Shock absorber protects motive components against overloads
NWW-092 B65-10008 05

Mouthpiece adapter for pipettes protects mouth from harmful liquids
LANGLAY-47 B65-10043 03

Compact retractor protects cabling loops

SUBJECT INDEX

M-PS-561 B66-10018 05

Tool permits damage-free removal of solar cell
GSFC-867 B66-10219 05

Seal surfaces protected during assembly
NU-0667 B66-10626 05

Shock-operated valve would automatically protect fluid systems
M-PS-801 B66-10335 03

Impact and puncture resistant material protects parts from damage
MSSC-747 B66-10375 05

Metal Oxide Silicon /MES/ transistors protected from destructive damage by wire
ARC-65 B66-10419 01

In-tank shutoff valve is provided with maximum blast protection
M-PS-1529 B66-10514 05

Hermetically sealed cells protected from internal gas pressure
GSFC-555 B66-10692 01

Remote operated high pressure valve protects test personnel
MSSC-11010 B67-10291 05

Training course for radiation safety technicians
MPS-216 B67-10477 02

Connector shorting cap provides pin alignment, inspection, and stray voltage protection
M-PS-13111 B67-10635 01

Mechanical shielding reduces weld surface cracking in 6061 T6 aluminum
MSSC-11494 B68-10022 05

Panelized high performance multilayer insulation
M-PS-14023 B68-10031 03

Cover protects critical electrical connectors against damage during handling
MSSC-15662 B69-10526 01

Glass fabric fire barrier for silicone rubber parts
MSSC-15555 B69-10629 03

An electrical connector pin protector
MSSC-15660 B69-10742 01

PROTECTIVE CLOTHING

Comfortable, lightweight safety helmet holds radio transmitter, receiver
MSSC-53 B64-10015 05

Double gloves reduce contamination of dry box atmosphere
LEWIS-211 B65-10117 03

Self-contained clothing system provides protection against hazardous environments
MSSC-536 B66-10201 05

Flexible fastener effects airtight material closure
JPL-684 B66-10304 05

Special tool kit aids heavily garmented workers
MSSC-163 B66-10403 05

Concept to comfort-condition subjects wearing restrictive clothing
MSSC-10964 B68-10178 02

Thermal protective visor for entering high temperature areas
MSSC-10285 B68-10277 05
SUBJECT INDEX

Biological isolation garment
MSC-12206 B66-10500 04

Protective clothing for workers with 5-kW and 20-kW short-arc lamps
NPO-11155 B69-10218 01

PROTECTIVE COATINGS

New cobalt alloys have high-temperature strength and long life in vacuum environments
LEWIS-87 B63-10351 03

Galvanic corrosion reduced in aluminum fabrications
N-PS-272 B65-10140 03

Aluminum alloys protected against stress-corrosion cracking
N-PS-235 B65-10172 03

Thin transparent films formed from powdered glass
GSFC-352 B65-10217 03

Burning technique improves lubrication of threaded fasteners
LEWIS-217 B65-10302 03

Air-cured ceramic coating insulates against high heat fluxes
N-PS-150 B65-10357 03

Fluoride coatings make effective lubricants in molten sodium environment
LEWIS-229 B66-10005 03

Flexible protective coatings made from silicon-nitrogen materials
N-PS-528 B66-10027 03

Epoxy blanket protects milled part during explosive forming
N-PS-307 B66-10029 03

Protective coating withstands high temperature in oxidizing atmosphere
N-PS-529 B66-10044 03

Run-in with chemical additive protects gear surface
N-PS-548 B66-10069 05

Refractory coating protects intricate graphite elements from high-temperature hydrogen burnoff
N-PS-10027 B66-10084 01

Vapor grown silicon dioxide improves transistor base-collector junctions
GSFC-389 B66-10091 01

Epoxy-coated containers easily opened by wire band
N-PS-592 B66-10174 05

Coating permits use of strain gage in water and liquid hydrogen
N-PS-594 B66-10192 01

White primer permits a corrosion-resistant coating of minimum weight
N-PS-304 B66-10207 03

Substituted silane-diol polymers have improved thermal stability
N-PS-469 B66-10259 03

Electroless nickel plating on stainless steels and aluminum
GSFC-533 B66-10479 03

Intergranular metal phase increases thermal shock resistance of ceramic coating
N-PS-1862 B66-10651 03

Study to minimize hydrogen embrittlement of ultrahigh-strength steels
N-PS-2455 B67-10141 03

Coating protects magnesium-lithium alloys against corrosion
N-PS-2446 B67-10149 03

New class of thermosetting plastics has improved strength, thermal and chemical stability
LEWIS-10108 B67-10197 03

Metal flame spray coating protects electrical cables in extreme environment
NUC-10077 B67-10351 03

Encapsulation technique eliminates thermal stresses in welded electronic modules
N-PS-14581 B68-10307 01

Miniature paint-spray gun for recessed areas
MSC-13060 B68-10387 05

Structural thermal-control coatings
NPO-10785 B68-10553 03

Corrosion protection of aluminum alloys in contact with other metals
N-PS-18526 B69-10098 03

Renewal of corrosion protection of coated aluminum after welding
N-PS-20361 B69-10150 05

Improved high-temperature silicon dioxide coatings
LEWIS-10817 B69-10266 03

Nondestructive evaluation of printed wiring boards by microh probe resistance measurements
SAE-10034 B69-10272 01

Improved fire resistant radio frequency anechoic materials
N-PS-16600 B69-10450 05

PROTONS

Large volume continuous counterclockwise dialyzer has high efficiency
HQ-10055 B67-10395 04

Effect of preparation procedures on intensity of radioautographic labeling is studied
ARG-10032 B67-10500 04

Study of behavior of sterols at interfaces
ARG-10085 B68-10281 03

Rate constants measured for hydrated electron reactions with peptides and proteins
ARG-10195 B68-10424 04

Neutron therapy of cancer
ARG-10310 B68-10203 04

Purification and characterization of two fully deuterated enzymes
ARG-10314 B69-10207 04

Inhibition of browning in foodstuffs
EQ-10177 B69-10493 04

PHOTO TRAINS

Beam profiles measured with thalamoluminescent dosimeters
ARG-10229 B69-10024 02

PHOTON IRRADIATION

Semiconductor forms biomedical radiation probe
MSC-320 B66-10252 04

PHOTONS

Status of ultrachemical analysis for semiconductors
N-PS-2254 B67-10138 03

Four pl-recoil proportional counter used as neutron spectrometer
ARG-10101 B68-10326 02

X-521
Rate constants measured for hydrated electron reactions with peptides and proteins

Handbook explaining the fundamentals of nuclear and atomic physics

Application of distorted models in developing scaled structural models

A prototype high power portable lamp

Precise gimballing mechanism

Cytopology is advanced by studying effects of deuterium environment

Setting angles on machine tools speeded by magnetic protractor

Spherical model provides visual aid for cubic crystal study

Spiral heater coils hand-formed with fixture

Experimental program to investigate transonic flow around protuberances

Remote control thermal actuator

Improved circuit minimizes generation time of pseudonoise check bits

PW acquisition demodulator achieves automatic synchronization of a telemetry channel

Interference effects eliminated in random oriented space station antenna system

Acquisition of pseudonoise signals by sequential estimation

Communication system features dual mode range acquisition plus time delay measurement

Combination ranging system and mapping radar

Improved electrode paste provides reliable measurement of galvanic skin response

Tool for reading psychrometric charts

Rate constants measured for hydrated electron reactions with peptides and proteins

Handbook explaining the fundamentals of nuclear and atomic physics

Communication system features dual mode range acquisition plus time delay measurement

Combination ranging system and mapping radar

Improved electrode paste provides reliable measurement of galvanic skin response

Tool for reading psychrometric charts

PULLEYS

Chain friction system gives positive, reversible drive

Rapid billet loader aids extrusion of refractory metals

Quick-acting clutch disengages idle drive motor

Apparatus alters position of objects to facilitate demagnetization

Mechanism continuously measures static and dynamic cable loads

Carriage system remotely moves drawer over extended distance

Space-saving hoist for tank manholes

Automatic leveling and equalizing hoist device

PULLING

Spring loaded headed cable makes efficient wire puller

Fastener provides bolt misalignment and quick release of flange

Indium adhesion provides quantitative measure of surface cleanliness

PULSE AMPLITUDE

Pulse height analyzer operates at high repetition rates, low power

Simple device produces accelerometer calibration pulse

Threshold detector produces narrow pulses at high repetition rates

Instrument performs nondestructive chemical analysis, data can be telemeasured

Circuit provides accurate four-quadrant multiplication

Single channel pulse-height analyzer operates in subnanosecond range

Simple, one transistor circuit boosts pulse amplitude

Pulse stretcher has improved dynamic range and linearity

Correlation established between heat transfer and ultrasonic transmission properties of copper braze bonds

Solid-state time-to-pulse-height converter developed

Modified univibrator compensates for output timing errors

SUBJECT INDEX

Logic
ARG-117  B66-10512  01

One-count memory circuit prevents machine mode interaction
ARG-90  B66-10559  01

Run numbering system for use with data recorders
K-PS-2557  B67-10215  01

Glow discharge density sensor probe life is extended
K-PS-1707  B67-10229  01

Current steering commutator offers versatility
JPL-812 B67-10215  01

Damage in rolling element bearings may be detected early
HQ-10031  B67-10658  01

One-shot pulse shaper circuit
IGS-11379  B68-10012  01

High-voltage pulse generator developed for wide-gap spark chambers
ARG-10136  B68-10283  03

Solid state high-voltage pulser operates with low supply voltage
K-PS-14034  B68-10308  01

Transistorized Marx bank pulse circuit provides voltage multiplication with nanosecond rise-time
ARG-10110  B68-10328  01

Thin transducers used for generating short-duration stress pulses in thin specimens
ARG-10232  B69-10045  01

Remotely-actuated biomedical switch
ARC-10105  B69-10117  01

Design for a rapid automatic sync acquisition system
NFO-10214  B69-10538  01

High voltage pulse generator
HSC-12178  B69-10548  01

PULSE MODULATION
Efficient circuit triggers high-current, high-voltage pulses
KSC-14  B64-10024  01

Frequency divider is free of spurious outputs
GSFC-308  B65-10334  05

Digitally controlled pulse-level discriminator operates over wide voltage range
GSFC-324  B65-10129  01

Electronic filter discriminates between true and false reflections
K-PS-55  B67-10071  02

Means for improving apparent resolution of television
ERC-65  B67-10152  01

Acquisition of pseudonoise signals by sequential estimation
K-PS-13998  B68-10258  01

Analysis of magnetically-controlled processes in pulse-modulation systems
GSFC-10241  B69-10070  01

Magnetically coupled emission regulator
GSFC-10056  B69-10213  01

An electronic circuit for sensing malfunctions in test instrumentation
KSC-10209  B69-10392  01

PULSE POSITION MODULATION
Four pi-recoil proportional counter used as neutron spectrometer
ARG-10101  B68-10326  02

PULSE RATE
Ball bearing used in design of rugged flowmeter
LEWIS-159  B66-10170  05

Phase detector circuit synthesizes own reference signal
K-PS-247  B65-10080  01

Electronic ampere-hour integrator is accurate to one percent
GSFC-203  B65-10308  01

Threshold detector produces narrow pulses at high repetition rates
GSFC-303  B65-10310  01

Parallel line raster eliminates ambiguities in reading timing of pulses less than 500 microseconds apart
K-PS-805  B66-10386  01

Instrument sequentially samples ac signals from several accelerometers
JPL-888  B67-10029  01

Laboratory pulse modulator uses minority carrier storage diodes
K-PS-2482  B67-10226  01

Transistorized Marx bank pulse circuit provides voltage multiplication with nanosecond rise-time
ARG-10110  B68-10328  01

Multichannel analyzers at high rates of input
ARG-10355  B69-10214  02

Circuit counts pulses and indicates time of occurrence of slow pulses
XNP-06234  B69-10313  01

Tracer of electrical conduit or pipes
KSC-15223 B69-10347  01

Conversion of continuous-direct-current TIG welder to pulse-arc operation
K-PS-16411  B69-10393  05

PULSE TIME MODULATION
Large capacitor performs as a distributed parameter pulse line
LEWIS-176  B66-10291  01

Modified univibrator compensates for output timing errors
ARG-85  B67-10130  01

Magnetic forming of resistive materials
K-PS-20417  B69-10397  03

PULSE WIDTH AMPLITUDE CONVERTERS
Multichannel pulse height analyzer is inexpensive, features low power requirements
HGB-10020  B67-10258  01

Linear analog dc voltage-to-pulse-width converter
GSFC-556  B69-10003  01

PULSED LASERS
Laser system used for dynamic balancing of gyrors
K-PS-12218  B68-10225  05

Repetitively pulsed, wavelength-selective carbon dioxide laser
ERC-10178  B69-10564  02

Laser microprobe facility used in the elemental analysis of small feature of a sample
## PULSED RADIATION

### PULSED RADIATION

- Single channel pulse-height analyzer operates in subnanosecond range
  - LEWIS-267 | B66-10377 | 01 |
- Primary radical yields in pulse irradiated alkaline aqueous solution
  - ARG-10322 | B69-10167 | 02 |
- Dual-mode operation of a neutron source, a concept
  - HQ-10106 | B69-10240 | 02 |

## PULSES

- Auxiliary circuit enables automatic monitoring of EKG's
  - MSC-106 | B65-10142 | 01 |
- Digital-output cardiotachometer measures rapid changes in heartbeat rate
  - MSC-133 | B65-10143 | 01 |
- Boron trifluoride nuclear detector preamplifier uses single-cable connection
  - LEWIS-178 | B65-10255 | 01 |
- Simple pulse counting circuit computes sum of squares
  - GSFC-391 | B65-10260 | 01 |
- Binary counter uses fluid logic elements
  - H-FS-323 | B65-10377 | 01 |
- Polarimeter provides transient response in nanosecond range
  - JPL-890 | B66-10021 | 02 |
- Current pulse amplifier transmits detector signals with minimum distortion and attenuation
  - NUC-10055 | B67-10347 | 01 |
- Ultrasonic temperature measuring device
  - LEWIS-10446 | B68-10319 | 01 |
- Thick transducers used for generating short-duration stress pulses in thin specimens
  - ARG-10232 | B69-10045 | 01 |
- Positive and negative output circuits
  - LEWIS-10715 | B69-10151 | 01 |
- Hydrogen flash lamps studied
  - ARG-10419 | B69-10411 | 02 |

## PUNCHCARDS

- Thermal conductivity and dielectric constant of silicate materials
  - H-FS-10456 | B68-10351 | 03 |
- PUMP SUPPLIERS
  - This plastic sheet eliminates need for expensive plating
    - H-FS-1096 | B66-10681 | 03 |
  - Prediction of performance of centrifugal pumps during starts under pressure
    - LEWIS-10900 | B69-10263 | 05 |
  - Method for predicting pump cavitation performance
    - LEWIS-10916 | B69-10446 | 02 |
- PUMP SEALS
  - Visco seal design offers zero-leakage and wear-free characteristics
    - WGO-329 | B67-10047 | 05 |
  - Hermetically sealed pump
    - LEWIS-10837 | B69-10320 | 05 |
- PUMPING
  - Rocket sonde measurements of ozone in the upper atmosphere
    - GSFC-10580 | B69-10077 | 02 |

### SUBJECT INDEX

- PUMPS
  - Vented piston seal prevents fluid leakage between two chambers
    - JPL-179 | B63-10141 | 05 |
  - Level of super-cold liquids automatically maintained by levelometer
    - JPL-397 | B63-10250 | 01 |
  - Air brake-dynamometer accurately measures torque
    - LEWIS-163 | B65-10312 | 05 |
  - Flexible plastic ring assembly makes durable shaft seal
    - WGO-227 | B65-10367 | 05 |
  - Rotating magnetic poles used to pump mercury
    - LEWIS-276 | B66-10434 | 05 |
  - Quick-response servo amplifies small hydraulic pressure differences
    - ARG-99 | B66-10498 | 05 |
  - Single pump maintains liquid helium level in cryostat
    - N-FS-1763 | B67-10039 | 05 |
  - Concept for cryogenic liquid reclamation system
    - NFO-10322 | B67-10420 | 02 |
  - Pump simulator provides variable pressure-flow characteristics
    - LEWIS-10122 | B67-10053 | 05 |
  - A laboratory method for precisely determining the micro-volume-magnitudes of liquid efflux
    - ARG-10052 | B69-10295 | 05 |
  - Repair of weld defects in thin-walled stainless steel tubes
    - N-FS-16293 | B69-10305 | 05 |

- PUNCHCARDS
  - Computer program performs statistical analysis for random processes
    - H-FS-723 | B66-10525 | 01 |
  - Improved computer program for elastic analysis of highly redundant structural configurations
    - N-FS-13087 | B67-10330 | 06 |
  - Computer program conducts facilities utilization and occupancy survey
    - NFO-10326 | B67-10476 | 06 |
  - Fully automatic telemetry data processor
    - GSFC-10576 | B68-10336 | 01 |
  - Nondispersive X-ray emission analysis for geochemical exploration
    - GSFC-10568 | B69-10011 | 02 |
  - SPAN C - Terminal sterilization process
    - NFO-10805 | B69-10039 | 06 |
  - On-line computer system for use with low-energy nuclear physics experiments is reported
    - ARG-10257 | B69-10094 | 01 |
  - Astronauts' tool for withdrawing/replacing computer cards
    - H-FS-20453 | B67-10183 | 05 |
  - Visual task analysis /VISTA/
    - N-FS-14716 | B69-10394 | 06 |
  - GAMEIT program
    - NUC-10243 | B69-10433 | 06 |

- PUNCHCARDS
  - Compact cartridge drives coded tape at constant readout speed
    - JPL-472 | B68-10222 | 01 |

**Purity**

- Niobium thin ﬁlms are superconductive in strong magnetic ﬁelds at low temperatures JPL-SC-135
- Xenon ﬂuorides show potential as ﬂuorinating agents ARG-10113
- Experiments shed new light on nickel-ﬂuorine reactions ARG-10008
- Tool samples subsurface soil free of surface contaminants MSc-10989
- Preparation of high purity copper ﬂuoride by ﬂuorinating copper hydroxyﬂuoride LWHIS-10794
- Apparatus automatically measures soluble residue content of volatile solvents SAN-10032
- Phase inverter provides variable reference push-pull output HQ-23
- Circuit provides overcurrent protection to push-pull ampliﬁer MSc-12033
- Adaptive control circuit prevents ampliﬁer saturation ERC-10026
- Low-cost, fast-response drive circuit for electromagnetic torque motors LWHIS-10143
- Fluidic analog ampliﬁer ERC-10102
- Transmission system isolates pressure transducer from severe environment WGO-239

**Pyramidal Bodies**

- Image position sensor N-FS-14101
- Test device prevents molecular bounce-back GSFC-82
- Antenna conﬁgurations provide polarization diversity GSFC-74
Separation of traces of metal ions from sodium matrices
ARG-10341 B69-10168 03

Colloidal suspension simulates linear dynamic pressure profile
WGO-266 B66-10214 05

Fluid-bed fluoride volatility process recovers uranium from spent uranium alloy fuels
ARG-232 B67-10032 03

Nitrogen dioxide produced by self-sustained pyrolysis of nitrous oxide
LANGELY-32 B65-10074 05

Impurity diffusion process for silicon semiconductors in fast and precise
GSFC-397 B65-10300 01

Welding, bonding, and sealing of refractory metals by vapor deposition
LEWIS-123 B67-10232 03

Analytical technique characterizes all trace contaminants in water
MSC-11032 B67-10243 03

Fire retardant foams developed to suppress fuel fires
ANC-10096 B68-10358 03

Basal-plane metallography of deformed pyrolytic carbon
NPO-11196 B69-10488 03

Nulling pyrometer uses Kerr cell shutter for fast responses
NU-0010 B65-10050 01

Internal cooling increases range of immersion-type temperature probe
LEWIS-171 B65-10157 02

A radioisotope-thermometer for determining gas temperatures
LEWIS-194 B66-10056 01

Self-balancing line-reversal pyrometer automatically measures gas temperatures
LEWIS-1348 B67-10268 01

Detection of effect of deposits on optical windows of pyrometer measurements
LEWIS-10366 B68-10367 01

Study made of Raney nickel technology
N-PZ-2054 B67-10208 03

Steel test panel helps control additives in pyrophosphate copper plating
LEWIS-10101 B67-10358 05

Isothermal drop calorimeter provides measurements for alpha active, pyrophoric materials
ARG-10186 B69-10002 02

Electrically heated diaphragm eliminates use of pyrotechnics
MSC-241 B65-10400 01

Improved system measures output energy of pyrotechnic devices
WGO-256 B66-10159 01

High-speed blowdown system provides rapid pressure loss
LEWIS-375 B67-10043 05

Explosive-train initiated through solid bulkhead by pressure cartridge

SUBJECT INDEX

MSC-11395 B67-10589 03

Pyrotechnic device provides one-shot heat source
LEWIS-10131 B68-10062 03

Pyrotechnic-actuated cable release
TRF-10849 B68-10535 05

Q FACTORS

RF inductor has high Q, is stable at higher temperatures
JPL-1019 B67-10106 01

System precisely controls oscillation of vibrating mass
E-PS-1875 B67-10276 01

Apparatus makes klystron operating frequency adjustable from remote point
NPO-99321 B67-10514 01

Active RC networks of low sensitivity for integrated circuit transfer function
ARC-10146 B68-10210 01

RF noise suppression using the photodiode effect in semiconductors
E-PS-12259 B69-10225 01

Automatic tuning of hydrogen masers
GSPC-10127 B69-10427 01

Fluorescent photography of spray droplets using a laser light source
LEWIS-1777 B69-10122 02

Laser microprobe facility used in the elemental analysis of small feature of a sample
ARG-10359 B69-10165 02

Composite filter steepens rejection slopes in microwave application
GSFC-480 B66-10393 01

Dielectrometer design permits measurement in vacuum under irradiation
E-PS-359 B66-10401 01

A theoretical model for determining turbine flowmeter sensitivity
E-PS-1177 B67-10177 01

Determination of quadratic equation coefficients describing three-dimensional surfaces, their skew and skewed planes, and view point areas
E-PS-15043 B69-10343 01

Composite filter steepens rejection slopes in microwave application
GSFC-480 B66-10393 01

A theoretical model for determining turbine flowmeter sensitivity
E-PS-1177 B67-10177 01

Determination of quadratic equation coefficients describing three-dimensional surfaces, their skew and skewed planes, and view point areas
E-PS-15043 B69-10343 01

Light-controlled resistors provide quadrature signal rejection for high-gain servo systems
WGO-340 B67-10552 01

Combination ranging system and mapping radar
NPO-11001 B69-10325 01

Ion mass spectrometer for special uses
EQ-10418 B69-10510 01

A theoretical model for determining turbine flowmeter sensitivity
E-PS-1177 B67-10177 01

Determination of quadratic equation coefficients describing three-dimensional surfaces, their skew and skewed planes, and view point areas
E-PS-15043 B69-10343 01

Light-controlled resistors provide quadrature signal rejection for high-gain servo systems
WGO-340 B67-10552 01

Combination ranging system and mapping radar
NPO-11001 B69-10325 01

Ion mass spectrometer for special uses
EQ-10418 B69-10510 01

Apparatus enables accurate determination of alkali oxides in alkali metals
LEWIS-256 B66-10296 03

Simple, nondestructive test identifies metals
ARG-525 B68-10305 03

Study made of application of stereoscopic display system to analog computer simulation

Miniature servo accelerometer is force-balanced
JPL-155 B65-10340 01

Plastic scintillator converts standard photomultiplier to ultraviolet range
ERC-9 B66-10108 02

SUBJECT INDEX

High-speed furnace uses infrared radiation for controlled brazing
NU-0047 B66-10268 02

Special treatment reduces helium permeation of glass in vacuum systems
BO-25 B66-10372 02

Radon gas, useful for medical purposes, safely fixed in quartz
ARG-208 B66-10468 04

Crystal microbalance measures condensable molecular fluxes
JPL-845 B67-10012 03

A piezo-bar pressure probe
LEWIS-393 B67-10259 01

Precision capacitor has improved temperature and operational stability
ARG-189 B67-10313 01

Movable EF probe eliminates need for calibration in plasma accelerators
LEWIS-10127 B67-10362 01

Dielectric prisms would improve performance of quasi-optical microwave components
NRC-10021 B67-10816 01

Nonreciprocal gain control for ring laser
M-PS-10041 B67-10653 02

Technique developed for measuring transmittance of optical birefringent networks
M-PS-14267 B69-10260 02

Preparation of silver-activated zinc sulfide thin films
GSPC-10687 B68-10271 03

Superconductive thin film makes convenient liquid helium level sensor
LANGLEY-10289 B68-10341 01

Thermal conductivity and dielectric constant of silicate materials
1-35-14856 B68-10351 03

Protective clothing for workers with 5-kW and 20-kW short-arc lamps
NPO-11155 B69-10218 01

Zone purification of potassium chloride
ARG-10377 B69-10241 03

Proposed acousto-optic filter
HQ-10440 B69-10466 02

Deposition monitor and control
NPO-10706 B69-10722 01

A simple electrometer for measuring small photoelectric currents
GSPC-10602 B69-10734 01

QUANTUM LAMPS

Infrared shield facilitates optical pyrometer measurements
LANGLEY-133 B65-10272 02

Electron microscope thermocouple monitors own installation
M-PS-1111 B66-10463 05

QUANTUM TRANSCEIVERS

Quartz crystals detect gas contaminants during vacuum chamber evacuation
NPO-10744 B67-10205 01

QUASI-STeadY STATES

Analysis of transient thermal stress in heat-generating plates and hollow cylinders caused by sudden environmental temperature changes
ARG-10274 B69-10047 02
Aerodynamic forces of fluttering cylindrical and/or planar structures  
M-PS-20497  B69-10781  02

QUATERNARY ALLOYS  
Braze alloy holds bonding strength over wide temperature range  
LPSI-237  B66-10519  03

QUENCHING  
Recent development in organic scintillators  
ARG-10344  B69-10198  03

Measurements of thermoelectric power in annealed and quenched gold-platinum alloys  
ARG-10303  B69-10206  03

QUENCHING (COOLING)  
New sintering process adjusts magnetic value of ferrite cores  
GSPC-129  B66-10100  01

Measurements of thermoelectric power in annealed and quenched gold-platinum alloys  
ARG-10303  B69-10206  03

RAILWAY TRACKING  
Shock absorber protects motive components against overloads  
LPSI-237  B69-10781  02

Thermal conductivity and dielectric constant of silicate materials  
M-PS-14856  B66-10351  03

RADAR TRACKERS  
FM/CW system measures aircraft attitude  
M-PS-276  B66-10290  01

INDEX RADIANT FLUX DENSITY

RAILWAY DISTRIBUTION  
Radial coolant channels fabricated by simplified method  
LPSI-237  B66-10267  05

Radial furnace shows promise for growing straight boron carbide whiskers  
LPSI-237  B66-10267  05

RADAR EQUIPMENT  
Circuit converts AM signals to FM for magnetic recording  
GSPC-227  B65-10001  01

RADAR MOPS  
Combination ranging system and mapping radar

RADAR MEASUREMENT  
Study made of application of stereoscopic display system to analog computer simulation  
M-PS-1263  B66-10590  01

RADIANT COOLING  
Graphite cloth facilitates vacuum evaporation of silicon monoxide  
M-PS-14764  B66-10256  03

RADIANT FLUX DENSITY  
Ion chambers simplify absolute intensity measurements in the vacuum ultraviolet  
EHC-10  B66-10839  01

Fast-acting calorimeter measures heat output of plasma gas accelerator  
LEWIS-388  B67-10192  01

Foil radiometer accessory improves measurements  
M-PS-12684  B67-10448  01

Improved cavity-type absolute total-radiation radiometer  
JPL-807  B67-10557  01

Automatic solar lamp intensity control system  
JGS-10017  B66-10399  01

Flame radiation program  
I-531
RADIANT HEATING

Gage measures total radiation, including vacuum UV, from ionized high-temperature gases EXF-09802 B69-10026 02

Radiant heater for vacuum furnaces offers high structural rigidity, low heat loss LEWIS-39 B63-10342 01

Graphite element serves as radiant heat source H-FS-105 B65-10416 01

Circular, explosion-proof lamp provides uniform illumination MSC-382 B66-10156 02

Improved system measures output energy of pyrotechnic devices WOO-256 B66-10159 01

Self-supported aluminum thin films produced by vacuum deposition process ARC-3 B66-10387 03

Computer program simplifies transient and steady-state temperature prediction for complex body shapes MSC-989 B66-10619 01

Fast-acting calorimeter measures heat output of plasma gun accelerator LEWIS-388 B67-10192 01

Radiant heat source, vacuum bag, provide portable bonding oven MSC-11342 B67-10570 03

Thermal Network Analyzer Program NUC-10540 B69-10239 06

Thermal radiation shields for piping in vacuum environments LEWIS-10899 B69-10262 03

Technique for predicting temperature distribution in gases LEWIS-10918 B69-10329 01

RADIATION

Indium foil with beryllia washer improves transistor heat dissipation GSFC-42 B63-10033 01

Wide-angle sensor measures radiant heat energy in corrosive atmospheres H-FS-1220 B65-10019 05

Improved atomic resonance gas cell for use in frequency standards MSC-11666 B68-10230 01

Analysis of annular combustors LEWIS-10399 B68-10356 06

The response of nonenergetic gassless rays in sintered media are investigated ARG-10295 B69-10080 01

Silicon carbide diode for increased light output H-FS-20063 B69-10096 01

Optically induced free carrier light modulator GSFC-10216 B69-10114 01

Production of metals and compounds by radiation chemistry LEWIS-10231 B69-10123 03

A computer program for a line-by-line calculation of spectra from diatomic molecules and atoms assuming a Voigt line profile ARC-10221 B69-10232 06

Subject Index

Deposition monitor and control BFC-10706 B69-10722 01

RADIATION ABSORPTION

Reference black body is compact, convenient to use ARC-3 B63-10004 03

Flange on microwave antenna subreflector cuts ground noise JPL-362 B63-10229 01

Variable-transparency wall regulates temperatures of structures LANGLEY-25 B63-10528 03

Lamp enables measurement of oxygen concentration in presence of water vapor MSC-10043 B67-10387 01

Coolants with selective optical filtering characteristics for ruby laser applications H-FS-20186 B68-10508 02

A computer program for a line-by-line calculation of spectra from diatomic molecules and atoms assuming a Voigt line profile ARC-10221 B69-10232 06

RADIATION BELTS

Radiation tolerant silicon nitride insulated gate field effect transistors GSFC-10581 B69-10253 01

RADIATION COUNTERS

Multiaxial analyzer detects low-energy electrons GSFC-329 B65-10213 01

Boron trifluoride nuclear detector preamplifier uses single-cable connection LEWIS-178 B65-10255 01

Aluminized thin-window proportional-counter tube is stronger, more responsive in long wavelength region JPL-689 B67-10015 01

Ion exchange determines iodine-131 concentration in aqueous samples ARG-208 B67-10129 04

Radiation counting technique allows density measurement of metals in high-pressure/high-temperature environment ARG-124 B67-10316 02

Compilation of detection sensitivities in thermal-neutron activation ARG-10068 B67-10641 03

Four pi-recoil proportional counter used as neutron spectrometer ARG-10101 B68-10326 02

Fast framing cameras provide high-speed multi-channel data recording ARG-10252 B69-10102 02

Ion mass spectrometer for special uses HGC-10518 B69-10510 02

Conditioning of pulses from aeromol-particle detectors ERC-10250 B69-10691 01

RADIATION DAMAGE

Aluminum doping improves silicon solar cells LEWIS-206 B66-10181 02

Simplified method introduces drift fields into cells GSFC-572 B67-10102 03

RADIATION DETECTORS

Radiation-detector optical-imaging device is of simplified construction GSFC-251 B68-10299 01
Instrument accurately measures extremely low air densities  H-PS-193  B65-10221  01

Instrument performs nondestructive chemical analysis, data can be telemetered  JPL-72-076  B65-10317  01

Calorimeter accurately measures thermal radiation energy  LANGLEY-73  B66-10058  02

Mount makes liquid nitrogen-cooled gamma ray detector portable  LEWIS-259  B66-10103  01

Plastic scintillator converts standard photomultiplier to ultraviolet range  ERC-9  B66-10108  02

Improved system measures output energy of pyrotechnic devices  WO-226  B66-10159  01

Semiconductor forms biomedical radiation probe  MEC-320  B66-10252  04

Hydrogen fire detection system features sharp discrimination  H-PS-643  B66-10368  01

Detector measures power in 50 to 30,000 GHz radiation band  HEC-26  B66-10581  01

A radiometer-pyrometer  LEWIS-204  B66-10606  01

Alpha particle backscattering measurements used for chemical analysis of surfaces  ARG-116  B67-10816  03

Infrared radiometer  H-PS-13373  B67-10422  01

Compilation of detection sensitivities in thermal-neutron activation  ARG-10068  B67-10641  03

Improved relay optical element for spectroradiometer using cryogenically cooled detector  MEC-11688  B68-10245  02

Automatic solar lamp intensity control system  XGS-10017  B68-10399  01

Readout system for radiation detector  MEC-90160  B68-10501  01

The response of monoenergetic gamma rays in finite media are investigated  H-PS-10295  B69-10080  02

The quantasyn, an improved quantum detector  HEC-10148  B69-10443  01

Manganese-56 coincidence-counting facility precisely measures neutron-source strength  ARG-90261  B69-10621  01

Pulse-height defect due to electron interaction in dead layers of Ge/Li/ gamma-ray detectors  ARG-10362  B69-10767  02

RADIATION DISTRIBUTION

Novel horn antenna reduces side lobes, improves radiation pattern  JPL-425  B63-10264  01

Fluid pressure used to test turbopump bearings  WU-6001  B65-10024  03

Electron beam parallel X-ray generator  MEC-11022  B67-10372  02

Computer programs for antenna feed system design and analysis  NFO-10359  B67-10504  06

Noise study of single stage compressor rotor-stator interaction  LANGLEY-137  B67-10516  02

High-temperature, gas-filled ceramic rectifiers, thyatrons, and voltage-reference tubes  LEWIS-90271  B69-10376  01

Long range holographic contour mapping concept  EQ-10350  B69-10700  02

RADIATION DOSAGE

Variable-transparency wall regulates temperatures of structures  LANGLEY-25  B63-10528  03

N-SAP and G-SAP neutron and gamma ray albedo model scatter shield analysis program  NUC-10126  B67-10536  06

SOC-DS computer code provides tool for design evaluation of homogeneous two-material nuclear shield  NUC-10142  B67-10537  06

RADIATION EFFECTS

Irradiation improves properties of an aromatic polyester  LANGLEY-115  B65-10164  03

Dielectrometer design permits measurement in vacuum under irradiation  H-PS-359  B66-10401  01

Test system accurately determines tensile properties of irradiated metals at cryogenic temperatures  NUC-10521  B67-10617  02

Deep gamma ray penetration in thick shields  H-PS-14388  B68-10143  02

Deflection circuit monitors force on object under water  NWC-10147  B68-10147  01

Readout system for radiation detector  HSC-90180  B68-10501  02

Radiation effects on bacterial cells  ARG-10264  B68-10169  04

Susceptibility of irradiated steels to hydrogen embrittlement  ARG-10115  B68-10194  03

Study of radiation effects on mammalian cells in vitro  ARG-10191  B68-10294  02

Effects of surface preparation on quality of aluminum alloy weldments  H-PS-13152  B68-10302  03

Experimental study and evaluation of radioprotective drugs  ARG-10196  B68-10320  04

CIRCUS--A digital computer program for transient analysis of electronic circuits  H-PS-15002  B66-10416  06

Rate constants measured for hydrated electron reactions with peptides and proteins  ARG-10195  B68-10424  04

Plume radiation program 
RADIATION HAZARDS

M-PS-13202  B68-10447  06
Hydrogen peroxide etching proves useful for germanium
ARG-10170  B68-10454  03
Diffusion bond method of joining steel and a Teflon-kromel composite
M-PS-20482  B69-10237  03
Gamma radiation characteristics of plutonium dioxide fuel
NPO-11220  B69-10733  02

RADIATION MEASUREMENT

Spherical electrode eliminates high-voltage breakdown
LEWIS-155  B65-10139  01
Training course for radiation safety technicians
ARG-216  B67-10477  02

IONIZATION MEASUREMENT

General computer program for calculation of ionization
E-PS-10  B66-10439  01
Gage measures total radiation, including vacuum UV, from ionized high-temperature gases
XNF-09802  B69-10028  02

RADIATION MEASURING INSTRUMENTS

Mechanical device accurately measures rf phase differences in vhf or uhf ranges
M-PS-1738  B66-10694  05
General computer program for calculation of radiation from inhomogeneous, nonisobaric, nonisothermal rocket exhaust plume
M-PS-19434  B66-10044  06
Gage measures total radiation, including vacuum UV, from ionized high-temperature gases
XNF-09802  B69-10028  02
Measurement technique for the determination of antenna directivity
M-PS-12799  B69-10677  01

RADIATION PROTECTION

Simple control device senses solar position
JPL-638  B65-10061  01
One-piece transparent shell improves design of helmet assembly
NCC-107  B66-10390  05
Method prevents secondary radiation in radiographic inspection
M-PS-13333  B67-10391  02
Double copper sheath multiconductor instrumentation cable in durable and easily installed in high thermal or nuclear radiation area
NUC-10007  B67-10538  01
Control of radiation protection
M-PS-20105  B68-10392  03

RADIATION PYROMETER

Graphite element serves as radiant heat source
M-PS-105  B65-10210  01
Ultraviolet photographic pyrometer used in rocket exhaust analysis
M-PS-899  B66-10095  02

RADIATION SHIELDING

Apparatus facilitates high-temperature tensile testing in vacuum
LEWIS-42  B63-10345  03
Simple control device senses solar position
JPL-638  B65-10061  01

SUBJECT INDEX

Refractory metal shielding/Insulation/Increases operating range of induction furnace
LEWIS-202  B65-10186  02
Infrared shield facilitates optical pyrometer measurements
LANGLEY-133  B65-10272  02
Aluminized fiber glass insulation conforms to curved surfaces
M-PS-677  B66-10024  03
Densitometer system for liquid hydrogen has high accuracy, fast response
M-PS-909  B66-10438  01
Carriage system remotely moves drawer over extended distance
NU-0092  B66-10711  05
Simple motor drive system operates heavy hinged door
NU-0093  B66-10712  05
Swing-out rail system separates overhead crane rails
B66-10713  05
Mechanism of superconductivity investigated by nuclear radiation
M-PS-1944  B67-10057  02
Apparatus for fabrication of americium-beryllium neutron sources prevents capsule contamination
ARG-194  B67-10202  05
Aluminum-titanium hydride-boride carbide composite provides lightweight neutron shield material
NUC-10069  B67-10265  03
N-SAF and G-SAF neutron and gamma ray albedo model scatter shield analysis program
NUC-10126  B67-10536  06
SOC-DS computer code provides tool for design evaluation of homogeneous two-material nuclear shield
NUC-10142  B67-10537  06
Graphite cloth facilitates vacuum evaporation of silicon monoxide
M-PS-14764  B68-10256  03
Isotopically pure magnesium isotope-24 is prepared from magnesium-24 oxide
ARG-10154  B68-10293  02
Miniaturized King furnace permits absorption spectroscopy of small samples
ARG-10177  B68-10418  02
Honzsburger vibration calibration system evaluated
M-PS-20014  B69-10125  01
Synthesis of calculational methods for design and analysis of radiation shields for nuclear rocket systems
M-PS-14447  B69-10158  06
Thermal radiation shields for piping in vacuum environments
LEWIS-10899  B69-10262  03
New shield for gamma-ray spectrometry
ARG-10388  B69-10344  02

RADIATION SOURCES

New sintering process adjusts magnetic value of ferrite cores
GSFC-129  B63-10606  01
Multiple element soft x-ray source produces wide range of radiation
GSFC-286  B65-10082  02
Radon gas, useful for medical purposes,
safely fixed in quartz
ABG-2 866-10468 04

High intensity radiation heat source is capable of sustained operation
ARC-61 866-10547 02

A continuously operating source of vacuum ultraviolet below 500 angstrom
GSPC-545 866-10576 01

Modified blackbody device emits high-density radiation
M-PS-12744 867-10388 02

Computer program FFIP-B6V calculates fission product inventory for U-235
NDC-10089 867-10450 06

Silicon surface barrier detectors used for liquid hydrogen density measurement
M-PS-14115 866-10166 01

RADIATION THERAPY
Uranyl phthalocyanines show promise in the treatment of brain tumors
ARG-100 867-10188 04

Experimental study and evaluation of radioprotective drugs
ARG-10196 868-10320 04

Neutron therapy of cancer
ARG-10310 869-10203 04

RADIATION TOLERANCE
Aluminum doping improves silicon solar cells
LEWIS-206 866-10181 02

Simplified method introduces drift fields into cells
GSPC-572 867-10102 03

Butterfly valve with metal seals controls flow of hydrogen from cryogenic through high temperatures
NRC-10034 867-10567 05

Improved radiographic image amplifier panel
M-PS-14522 866-10363 02

Stratification of centrifuged amoeba nuclei investigated by electron microscopy
ARG-10161 866-10366 04

Abrasion and resistant discharge valve developed
ARG-10219 869-10044 05

Radiation tolerant silicon nitride insulated gate field effect transistors
GSPC-10581 869-10253 01

Improved retort for cleaning metal powders with hydrogen
LEWIS-10718 869-10468 03

Development of improved potting and conformal coating compounds
M-PS-20219 869-10559 03

Balloon batteries, charged and heated by solar energy
GSPC-10769 869-10585 01

RADIATIVE HEAT TRANSFER
Inexpensive insulation is effective for cryogenic transfer lines
MSC-618 866-10348 02

Computer program resolves radiative, conductive, and convective heat transfer problems for variety of geometries
M-PS-1910 867-10329 06

Thermal conductivity and dielectric constant of silicate materials
M-PS-14856 868-10351 03

High-emittance coatings on metal substrates
LEWIS-10325 B68-10381 03

Monter Carlo direct view factor and generalized radiative heat transfer programs
M-PS-15051 B69-10038 06

Molecular radiation - Its application in physical measurements and analyses
M-PS-14816 B69-10562 02

RADIATORS
Heat flux sensor design reduces extraneous source effects
MSC-400 866-10531 01

RADIATION TREATMENT
Automatic gain control circuit handles wide input range
MSC-166 B66-10089 01

RADIO COMMUNICATION
Compatible, lightweight safety helmet holds radio transmitter, receiver
MSC-53 B64-10015 05

Literal readout of identification signals in Morse code
LANGLEY-10222 B69-10479 01

RADIO DETECTION FINDERS
Improved TVR direction finding system
M-PS-20439 B69-10378 01

RADIO EQUIPMENT
Concept for a multifunctional oscilloscope probe
M-PS-16390 B69-10129 01

Flexible rivet-set
M-PS-20317 B69-10459 05

RADIO FILTERS
Helical coaxial-resonator makes excellent RF filter
GSPC-243 B65-10012 01

Improved S/N meter
MSC-11654 B68-10151 03

RADIO FREQUENCIES
Tiny sensor-transmitter can withstand extreme acceleration, given digital output
ARC-22 B63-10561 01

Modified RF coaxial connector ends vacuum chamber wiring problem
GSPC-150 B64-10010 01

I-535
SUBJECT INDEX

GSFC-354 B65-10276 01

Miniature bioelectric device accurately measures and telemeters temperature
ARC-52 B66-10057 01

Seismometer designed for remote operation in random orientation
JPL-320 B66-10085 01

Automatic patient respiration failure detection system with wireless transmission
ARC-10174 B68-10365 01

RADIO WAVES

Mechanical device accurately measures RF phase differences in VHF or UHF ranges
J-FS-1738 B66-10694 05

RADIOACTIVE CONTAMINANTS

Apparatus for fabrication of americium-beryllium neutron sources prevents capsule contamination
ARG-184 B67-10202 05

RADIOACTIVE DECAY

Neutron irradiation of Am-241 effectively produces curium
ARG-10303 B67-10501 03

Computer program calculates gamma ray source strengths of materials exposed to neutron fluxes
NUC-10143 B67-10665 06

Daughter growth in freshly separated Ba-226, Ac-227 and U-232
ARG-10226 B69-10003 02

Concentrations of the naturally occurring radionuclides Pb-210, Po-210, and Ba-226 in aquatic fauna
ARG-10345 B69-10258 02

Live-timer method of automatic dead-time correction for precision counting
ARG-10478 B69-10512 01

Highly stable high-rate discriminator for nuclear counting
ARG-10483 B69-10614 01

Manganese-56 coincidence-counting facility precisely measures neutron-source strength
ARG-90261 B69-10621 01

Synthesis of perbronates
ARG-10459 B69-10647 03

RADIOACTIVE ISOTOPES

Single channel pulse-height analyzer operates in subsensusecond range
LEWIS-267 B66-10377 01

Low-energy gamma ray inspection of brazed aluminum joints
MSC-1189 B67-10337 02

N-SAP and G-SAP neutron and gamma ray albedo model scatter shield analysis program
NUC-10126 B67-10536 06

Review of physics, instrumentation and dosimetry of radioactive isotopes
ARG-10037 B67-10640 02

Detection sensitivities in 3-8 MeV neutron activation
ARG-10219 B68-10298 02

An economical method for the continuous production of iodine-123
LEWIS-10518 B66-10433 03

Daughter growth in freshly separated Ba-226, Ac-227 and U-232
ARG-10226 B69-10003 02

Nondispersive X-ray emission analysis

RADIOACTIVITY

Fluid-bed fluoride volatility process recovers uranium from spent uranium alloy fuels
ARG-232 B67-10032 03

Tritiated alumina serves as reagent for self-labeling analysis
ARG-209 B67-10315 03

Experiments shed new light on nickel-fluorine reactions
ARG-10008 B67-10397 03

Direct indication of particle size in fluidized beds
ARG-10130 B69-10083 05

Remote balance weighs accurately and high radiation
ARG-10387 B69-10242 05

Handbook explaining the fundamentals of nuclear and atomic physics
NUC-10330 B69-10705 02

RADIOBIOLOGY

Semiconductor forms biomedical radiation probe
MSC-320 B66-10252 04

Ceric and ferrous dosimeters show precision for 50-5000 rad range
ARG-10173 B68-10426 02

An economical method for the continuous production of iodine-123
LEWIS-10518 B68-10433 03

Neutron therapy of cancer
ARG-10310 B69-10203 04

RADIOBIOLOGY

or geochemical exploration
GSFC-10568 B69-10011 02

Recent development in organic scintillators
ARG-10344 B69-10198 03

Concentrations of the naturally occurring radionuclides Pb-210, Po-210, and Ba-226 in aquatic fauna
ARG-10345 B69-10258 02

Automatic bird watcher
ARG-10342 B69-10286 02

New shield for gamma-ray spectrometry
ARG-10388 B69-10344 02

RADIOACTIVE MATERIALS

Double gloves reduce contamination of dry box atmosphere
LEWIS-211 B65-10117 03

Radioactive tracer system detects oil contaminants in fluid lines
M-FS-512 B66-10090 03

Semiconductor forms biomedical radiation probe
MSC-320 B66-10252 04

Radioactive method enables determination of surface areas rapidly and accurately
NU-0088 B66-10710 03

Fused silica method of measuring thermal-neutron fluence
MSC-10006 B67-10352 02

Improved electromechanical master-slave manipulator
ARG-10027 B68-10372 05

RADIOACTIVE WASTES

Fluid-bed fluoride volatility process recovers uranium from spent uranium alloy fuels
ARG-232 B67-10032 03

Handbook explaining the fundamentals of nuclear and atomic physics
NUC-10330 B69-10705 02

I-537
RADIOCEMISTRY

Effect of preparation procedures on intensity of radioautographic labeling is studied
ARG-10032 B67-10500 04

Compilation of detection sensitivities in thermal-neutron activation
ARG-10068 B67-10641 03

RADIOGRAPHY

Magnets position X-ray film for weld inspection
M-PS-253 B65-10110 05

Radioactive tracer system detects oil contaminants in fluid lines
M-PS-512 B66-10090 03

Commercial film produces positive X-ray photo in ten seconds
M-PS-521 B66-10307 02

Inflatable holding fixture permits X-rays to be taken of inner weld areas
M-PS-856 B66-10327 03

Digital computer processing of X-ray photos
JPL-792 B67-10005 04

Polaroid film helps locate objects in inaccessible areas quickly
MSC-960 B67-10008 02

Detection of entrapped moisture in honeycomb sandwich structures
M-PS-1103 B67-10116 01

Improved television signal processing system
NPO-10146 B67-10246 01

Thermal neutron image intensifier tube provides brightly visible radiographic pattern
ARG-120 B67-10296 02

Method prevents secondary radiation in radiographic inspection
M-PS-13383 B67-10391 02

Effect of preparation procedures on intensity of radioautographic labeling is studied
ARG-10032 B67-10500 04

Mechanized X-ray inspection system for large tanks
M-PS-12067 B67-10564 02

Evaluation of methods for nondestructive testing of brazed joints
ARG-90175 B68-10191 03

X-ray film holder permits single continuous picture of tubing joint
LEWIS-10382 B68-10343 05

Improved radiographic image amplifier panel
M-PS-14522 B68-10363 02

Nondestructive testing of brazed rocket engine components
M-PS-18191 B68-10394 03

Shortened processing time technique for color industrial radiography
ARG-10235 B69-10001 02

Radiographic threshold detection levels of aluminum weld defects
M-PS-20467 B69-10418 01

Use of medical and dental X-ray equipment for nondestructive testing
M-PS-13389 B69-10553 01

Direct determination of lead-210 by liquid-scintillation counting
ARG-10462 B69-10611 03

RADIOLOGY

Radon gas, useful for medical purposes, safely fixed in quartz
M-PS-32 B66-10468 04

N-SAP and G-SAP neutron and gamma ray albedo model scatter shield analysis program
NUC-10126 B67-10536 06

Live-timer method of automatic dead-time correction for precision counting
ARG-10478 B69-10612 01

Electron interaction in matter
M-PS-18086 B69-10674 02

RADIOLYSIS

Polymer film exhibits thermal and radiation stability
LANGLEY-100 B66-10503 02

Reduction by monovalent zinc, cadmium, and nickel cations
ARG-10328 B69-10170 03

Production of solvated electrons
ARG-10416 B69-10430 03

HYDROGEN FIRE DETECTION SYSTEM FEATURES SHARP DISCRIMINATION
M-PS-643 B66-10368 01

A radiometer-pyrometer
LEWIS-284 B66-10660 01

Blackbody cavity radiometer has rapid response
JPL-521 B66-10679 01

Modified blackbody device emits high-density radiation
M-PS-12744 B67-10388 02

Infrared radiometer
M-PS-13373 B67-10422 01

Foil radiometer accessory improves measurements
M-PS-12684 B67-10446 01

Improved cavity-type absolute total-radiation radiometer
JPL-507 B67-10557 01

Gimballed-mirror scanning system capable of spiral pattern
GSFC-10170 B67-10609 02

Properties of optics at high temperature and their measurement, a study
M-PS-14696 B68-10240 02

Use of both linear and logarithmic transfer functions to increase dynamic range of visual channel
GSFC-10675 B69-10037 01

Dewpoint temperature inversions analyzed
ARG-10316 B69-10057 02

Separation of traces of metal ions from sodium matrices
ARG-10341 B69-10168 03

A computer program for a line-by-line calculation of spectra from diatomic molecules and atoms assuming a Voight line profile
ARC-10221 B69-10232 06

Multilayer infrared beamsplitter film system
XS-11036 B69-10260 02

SUBJECT INDEX

Effects of high-pressure hydrogen on storage vessel materials

RAF'S [PRESSURES]
Materials physically tested in variable-environment chamber

RJPL-789 B66-10130 01

Vibration dampener for Miles vertical boring mill ram
ESC-15529 B69-10348 01

RANDOM ACCESS MEMORY
Development of Curie point switching for thin film, random access, memory device
NFO-10402 B67-10633 02

The compatible conversion system
F-PS-15010 B69-10031 06

RANDOM ERRORS
Study of optimum discrete estimators in measurement analysis
B-PS-14915 B69-10348 02

RANDOM NOISE
Instrument sequentially samples ac signals from several accelerometers
JPL-88a B67-10029 01

A power-spectral-density computer program
BNO-10126 B67-10160 01

Study of random process theory aids digital data processing
B-PS-1475 B67-10309 06

Accuracy of laser measurements improved by pulse autocorrelator electronic system
ESC-10033 B67-10338 01

PHC hit detection with correction for intersymbol interference
GSFC-10155 B69-10153 01

HF noise suppression using the photodielectric effect in semiconductors
ESC-12259 B66-10225 01

On the bound of first excursion probability
FNO-11158 B69-10324 06

Automatic Gaussian random-noise limiter
FNO-10169 B69-10349 01

RANDOM PROCESSES
Computer program performs statistical analysis for random processes
B-PS-723 B66-10525 01

Study of random process theory aids digital data processing
B-PS-1475 B67-10309 06

New technique for determination of cross-power spectral density with damped oscillators
FNO-14022 B67-10602 02

Random access-random release relay switching matrix
B-PS-12590 B68-10301 01

Study of optimum discrete estimators in measurement analysis
B-PS-14915 B68-10348 02

RANDOM SIGNALS
Hybrid computer technique yields random signal probability distributions
ARC-34 B65-10208 01

RANDOM VARIABLES
Independent doubly truncated gamma variables
B-PS-20143 B66-10348 02

RANDOM VIBRATION
A power-spectral-density computer program
BNO-10126 B67-10160 01

Study made of thin-walled pipe response to turbulent fluids
B-PS-1321 B67-10518 05
**SUBJECT**

**RANGE (EXTERNS)**

- **T-handle wrench has torque-limiting action**
  - MSC-280 B66-10065 05
- **Hand drill adapter limits holes to desired depth**
  - MSC-346 B66-10123 05
- **Depth indicator and stop aid machining to precise tolerances**
  - M-PS-533 B66-10149 05
- **SiC/Si diode trigger circuit provides automatic range switching for log amplifier**
  - M-PS-1879 B67-10314 01
- **Method for reducing snap in magnetic amplifiers**
  - LEWIS-10388 B68-10388 01
- **Health hazards of ultrafine metal and metal oxide powders**
  - M-PS-16556 B69-10268 04

**RANGEFINDING**

- **Communication system features dual mode range acquisition plus time delay measurement**
  - M-PS-14323 B68-10306 01
- **Combination ranging system and mapping radar**
  - MPO-11001 B69-10325 01

**RANGER PROJECT**

- **Solid state detectors monitor relay contacts**
  - JPL-765 B66-10396 01

**RARE EARTH ALLOYS**

- **Traveling wire electrode increases productivity of Electrical Discharge Machining /EDM/ equipment**
  - ARG-136 B67-10238 05
- **Improved carbon electrode reduces arc spattering**
  - MSC-219 B66-10026 01

**RARE EARTH COMPOUNDS**

- **Crystal structure analysis of intermetallic compounds**
  - ARG-10092 B66-10198 03
- **Transplutonium elements processed from rock debris of underground detonations**
  - ARG-2022 B69-10054 03
- **Optically exciting a magnetic memory - A feasibility study**
  - M-PS-14854 B69-10060 02
- **Separation of traces of metal ions from sodium matrices**
  - ARG-10341 B69-10168 03
- **Separation of the rare earths by anion-exchange in the presence of lactic acid**
  - ARG-10436 B69-10377 03
- **Dielectric materials for use in thin-film capacitors**
  - M-PS-20471 B69-10387 02

**RARE GASES**

- **Novel clamps align large rocket cases, eliminate back-up bars**
  - M-PS-1 B63-10376 05
- **Hot-air soldering technique prevents overheating of electrical components**
  - GSPC-91 B63-10536 01
- **Welding procedures improve quality of welds, offers other advantages**
  - M-PS-32 B64-10309 01
- **Inert gas spraying device aids in repair of hazardous systems**
  - LEWIS-88 B65-10115 05
- **Double gloves reduce contamination of dry box atmosphere**
  - LEWIS-211 B65-10117 03
- **Thermoelectric elements diffusion-bonded to tungsten electrodes**
  - GSPC-346 B65-10309 01
- **Refactory metals welded or brazed with tungsten inert gas equipment**
  - LEWIS-219 B65-10319 05
- **Improved tool easily removes brazed tube connectors**
  - M-PS-263 B66-10003 05
- **Protective coating withstands high temperature in oxidizing atmosphere**
  - M-PS-529 B66-10044 03
- **Hydrogen-atmosphere induction furnace has increased temperature range**
  - LEWIS-153 B66-10055 05
- **Cryostat modified to aid rotating beam fatigue test**
  - ARG-435 B66-10083 03
- **Solid-film lubricant is effective at high temperatures in vacuum**
  - LEWIS-220 B66-10087 03
- **Tool provides constant purge during tube welding**
  - M-PS-547 B66-10093 05
- **Highly sensitive solids mass spectrometer uses inert-gas ion source**
  - ERC-11 B66-10114 02

  - M-PS-222 B66-10125 05
- **Simple device facilitates inert-gas welding of tubes**
  - M-PS-558 B66-10155 05
- **Brazing process using Al-Si filler alloy reliably bonds aluminum parts**
  - M-PS-446 B66-10241 05
- **Differential expansion provides pressure for diffusion bonding of large diameter rings**
  - M-PS-588 B66-10265 05
- **Ion chambers simplify absolute intensity measurements in the vacuum ultraviolet**
  - ERC-10 B66-10439 01
- **Yttrum forms stable compound with fluorine**
  - ARG-4 B66-10467 03
- **Complex surfaces plated by thin-film deposition in one operation**
  - LEWIS-292 B67-10006 05
- **Portable spectrometer monitors inert gas shield in welding process**
  - I-540
Two systems developed for purifying inert atmospheres
ARG-10234 B69-10026 03

Mixing weld gases offers advantages
K-FS-16413 B69-10145 05

Protective clothing for workers with 5-kW and 20-kW short-arc lamps
NRO-11155 B69-10218 01

Zone purification of potassium chloride
ARG-10377 B69-10241 03

High strength, superplastic superalloy
LEWIS-10805 E69-10293 03

High-temperature, gas-filled ceramic rectifiers, thyristors, and voltage-reference tubes
LEWIS-90271 B69-10293 03

Conversion of continuous-direct-current TIG welder to pulse-arc operation
I-PS-16411 B69-10393 05

Improved retort for cleaning metal powders with hydrogen
LEYIS-10718 B69-10468 03

Fluorocarbon seal replaces metal piston ring in low density gas environment
LEYIS-10277 B67-10591 05

Computer circuit calculates cardiac output
MSC-274 B66-10006 01

Quantum mechanical calculations of reactive scattering cross sections in bimolecular encounters
H-PS-13594 B67-10527 03

Scan rate converter for tape recording and playback of TV pictures
MNO-10546 B67-10676 01

Liquid-metal heat transfer in a cocurrent-flow double-pipe heat exchanger is investigated
ARG-10263 B69-10091 02

Device for obtaining separation of oxygen
LANGLEY-11007 B69-10477 01

System converts slow-scan to standard fast-scan TV signals
M5C-90534 B69-10748 01

Rapid helium-air analyzer can measure other binary gas mixtures
LANGLEY-16 B63-10557 03

Digital-output cardiocapmeter measures rapid changes in heartbeat rate
MSC-133 B65-10143 01

High frequency wide-band transformer uses coax to achieve high turn ratio and flat response
ARG-107 B66-10600 01

Eddy current probe measures size of cracks in nonmetallic materials
K-FS-14059 B67-10645 03

Ratio matching of half-bridge weldable strain gages, computer program
MSC-10032 B69-10040 06

Thick transducers used for generating short-duration stress pulses in thin specimens

RAY TRACING
Computer programs simplify optical system analysis
GSFC-306 B65-10093 01

Computer program for optical systems ray tracing
FHC-10017 B67-10549 06

Automatic design of optical systems by digital computer
NRO-10265 B67-10632 06

SELECTIVE VIGNETTING OF TYPE 1 X-RAY TELESCOPES
B69-10356 06

Improved method of optical design
GSFC-10743 B69-10405 02

RAYLEIGH-RITZ METHOD
Computer program provides improved longitudinal response analysis for axisymmetric launch vehicles
LANGLEY-10093 B67-10531 06

RAYLEIGH SCATTERING
Improvement in recording and reading holograms
HSC-10151 B68-10347 02

The response of monoenergetic gamma rays in finite media are investigated
ARG-10295 B69-10080 02

RAZOR BLADES
Reference black body is compact, convenient to use
RAC-3 B63-10004 03

RC CIRCUITS
Low-power transistorized circuit provides staircase waveform
GSFC-48 B64-10007 01

Stepping motor drive circuit designed for low power drain
GSFC-198 B65-10026 01

Simulator produces physiological waveforms
MSC-94 B65-10091 01

Thin-film resistors used in functional electronic blocks
GSFC-380 B65-10305 01

High-performance RC bandpass filter is adapted to miniaturized construction
ABC-60 B66-10309 01

Solid-state switch increases switching speed
WGO-299 B66-10430 01

Subminiature deflection circuit operates integrated sweep circuits in TV camera
MSC-1253 B67-10155 01

Multiple meter monitoring circuits served by single alarm
MSC-10984 B67-10369 01

Blood pressure reprogramming adapter assists signal recording
MSC-265 B67-10475 01

Active rc networks of low sensitivity for integrated circuit transfer function
ABC-1046 B68-10210 01

Active rc filter permits easy trade-off of amplifier gain and sensitivity to gain
**REACTANCE**

- ARC-10042  B68-10539  01
  Multichannel analyzers at high rates of input
  ARG-10355  B69-10214  02

- Wide-band doubler and siren wave quadrature generator
  BPG-11133  B69-10383  01

**REACTANCE**

- Control circuit maintains unity power factor of reactive load
  MSC-192  B66-10431  01

- Improved circuit for measuring capacitive and inductive reactances
  B-PS-13083  B67-10513  01

- Moebius resistor is noninductive and nonreactive
  SAM-10620  B68-10267  01

- Microelectronic oscillator, 2
  GSFC-10387  B69-10063  01

- Microelectronic oscillator
  GSFC-10375  B69-10064  01

**REACTION CONTROL**

- Fuel and oxidizer valve assembly employs single solenoid actuator
  MSC-1046  B66-10468  05

- Piezoelectric linear actuator
  MSC-13194  B69-10469  02

- Elimination of dissolved gases in hypergolic engine propellants
  B-PS-16179  B69-10692  03

**REACTION KINETICS**

- Improved system measures output energy of pyrotechnic devices
  WGO-256  B66-10159  01

- Computer simulation program is adaptable to industrial processes
  LEVIS-240  B66-10426  01

- Axisymmetric reacting gas nonequilibrium performance program
  MSC-11781  B68-10377  06

- Titanium-nitrogen reaction investigated for application to gettering systems
  ARG-10208  B68-10414  03

- Rate constants measured for hydrated electron reactions with peptides and proteins
  ARG-10195  B68-10424  04

**REACTION TIME**

- Reaction rates of graphite with ozone measured by etch decoration
  ARG-10086  B68-10101  03

- Cryogenic liquid level measuring probe
  ARG-10138  B68-10291  01

- System measures response time of photomultiplier tubes
  LEVIS-10437  B68-10382  01

- Method for making small pointed thermocouples
  SAN-10014  B68-10389  01

- Gamma radiation characteristics of plutonium dioxide fuel
  BPO-11220  B69-10733  02

**REACTION WHEELS**

- Global angle sensor
  GSFC-10305  B68-10315  01

**REACTION WHEELS**

- Improved process for making thin-film sodium niobate capacitors
  MSC-11231  B68-10163  01

- Reduction by monovalent zinc, cadmium, and nickel cations
  ARG-10326  B69-10170  03

**REACTION CODES**

- Analysis of transient thermal stress in heat-generating plates and hollow cylinders caused by sudden environmental temperature changes
  ARG-10274  B69-10047  02

- Fuel element concept for long life high power nuclear reactors
  LEVIS-10309  B69-10154  03

- Identification and evaluation of linear damping models in beam vibrations
  ARG-10275  B69-10196  03

**REACTION DESIGN**

- SOC-DS computer code provides tool for design evaluation of homogeneous two-material nuclear shielding
  NUC-10142  B67-10537  06

**REACTION MATERIALS**

- Computer program calculates the effective temperature of a crystalline solid
  ARG-10147  B68-10147  01

**REACTION PHYSICS**

- Fast framing cameras provide high-speed multi-channel data recording
  ARG-10252  B69-10102  02

- Handbook explaining the fundamentals of nuclear and atomic physics
  NUC-10330  B69-10705  02

**REACTION TECHNOLOGY**

- Hydrodynamics of a new concept of primary containment by energy absorption
  ARG-10242  B69-10046  05

- Studies of cycles for liquid-metal magnetohydrodynamic generation of power
  ARG-10250  B69-10194  02

**READERS**

- Tester automatically checks paper tape punch and reader after maintenance
  ARC-66  B67-10267  01

- Pocket-size manual tape reader device aids computer tape checking
  KSC-10058  B67-10361  01

- Long-term data storage and retrieval system, a concept
  B-PS-14789  B68-10505  01

**READOUT**

- Optics used to measure torque at high rotational speeds
  LEVIS-13  B63-10338  01

- Fluid-pressure meter can be calibrated without removal from flow line
  B-PS-98  B63-10502  05

RECTANGULAR BEAMS
Application of distorted models in developing scaled structural models M-PS-2540 B67-10321 05

RECTANGULAR PANELS
Apparatus measures thermal conductivity of honeycomb-core panels LANGLEY-202 B66-10127 01

RECTIFICATION
Substituting transistor for diode improves rectifying means GSPC-474 B66-10295 01

RECTIFIERS
Transistorized trigger circuit is frequency-controllable GSPC-111 B63-10553 01
Simple circuit continuously monitors thermocouple sensor M-PS-61 B63-10567 01
Ring counter may be advanced or retarded by command signal GSPC-101 B64-10144 01
Helmholzer tester for high-power vacuum tubes JPL-628 B64-10158 01
Motor position sensor switches currents in brushless dc motors GSPC-315 B65-10151 01
Circuit reduces distortion of FM modulator GSPC-257 B65-10152 01
Electrostatics has automatic zero bias control GSPC-350 B65-10242 01
Noncontacting vibration transducer has constant sensitivity LANGLEY-99 B65-10392 01
Dual-voltage power supply has increased efficiency LEWIS-107A B66-10002 01
Thin-film semiconductor rectifier has improved properties M-PS-207 B66-10012 01
Feedback loop compensates for rectifier nonlinearity M-PS-384 B66-10138 01
Electronic test instrument generates extremely small current signals ARG-276 B67-10318 01
High power dc/dc and dc/ac electrical power conversion techniques developed M-PS-13227 B67-10390 01
Control apparatus for spectral energy source LEWIS-391 B67-10404 01
Feasibility study of wireless power transmission system M-PS-14691 B68-10309 01
Remotely-actuated biomedical switch AMC-10105 B69-10117 01
Automatic Gaussian random-noise limiter NPO-10169 B69-10349 01
High-temperature, gas-filled ceramic rectifiers, thyratrons, and voltage-reference tubes LEWIS-90271 B69-10376 01
An electronic circuit for sensing malfunctions in test instrumentation

REDD SHIFT
Hydrogen maser as a highly stable frequency reference M-PS-2437 B67-10146 01

REDUCED GRAVITY
Magnetic fluid readily controlled in zero gravity environment LEWIS-126 B65-10335 03
Simulator effects partial gravity conditions M-PS-152 B66-10339 05

REDUCTION
Metal tube reducer is inexpensive and simple to operate ARG-49 B67-10401 05
Advances in aluminum anodizing M-PS-14600 B69-10144 05

REDUCTION (CHEMISTRY)
Process reduces pore diameters to produce superior filters WGO-093 B66-10037 03
High temperature thermocouple operates in reduction atmosphere NU-0046 B66-10134 01
Apparatus enables accurate determination of alkali oxides in alkali metals LEWIS-256 B66-10296 03
Electroless nickel plating on stainless steels and aluminum GSPC-533 B66-10479 03
Ion exchange determines iodine-131 concentration in aqueous samples ARG-208 B67-10129 04
Static electricity of polymers reduced by treatment with iodine NPO-10062 B67-10132 03
Oxide film on metal substrate reduced to form metal-oxide-metal layer structure ARG-48 B67-10187 03
Study made of Raney nickel technology M-PS-2054 B67-10208 03
Welding, bonding, and sealing of refractory metals by vapor deposition LEWIS-123 B67-10232 03
Magnesium-zinc reduction is effective in preparation of metals ARG-10050 B67-10579 03
Metabolic and toxicological effects of water-soluble xenon compounds are studied ARG-90239 B68-10076 04
Improved fuel-cell-type hydrogen sensor M-PS-14656 B68-10263 01

SUBJECT INDEX

Advances in aluminum anodizing
M-FS-14600 B69-10144 05

Multilayer infrared beamsplitter film system
IUS-1036 B69-10260 02

Discrimination of fish oil and mineral oil slicks on sea water
HG-10412 B69-10673 01

REFLECTED WAVES

Concept for using laser beams to measure electron density in plasmas
M-FS-965 B66-10645 01

Fatigue zones in metals identified by polarized light photography
WDO-286 B67-10082 02

REFLECTING TELESCOPES

Glancing incidence telescope for far ultraviolet and soft X-rays
GSPC-10052 B67-10508 02

Telescope mount with azimuth-only primary
NFO-10466 B67-10671 02

Improved electro-optical tracking system
M-FS-14791 B68-10311 01

Image position sensor
M-FS-14101 B67-10783 02

REFLECTION

Liquid-level meter has no moving parts
K-FS-3 B63-10378 03

Variable-transparency wall regulates temperatures of structures
LANGLEY-25 B63-10528 03

Attachment converts microscope to point source autocollimator
JEL-499 B64-10124 05

System measures angular displacement without contact
LANGLEY-46 B65-10073 01

Light-sensitive potentiometer measures product of two variables
GSPC-240 B65-10076 01

Pulse technique provides more accurate checkout of exploding bridge wire device
HQ-62 B66-10561 01

Optical automatic gain channel
M-FS-1550 B66-10596 02

Electronic filter discriminates between true and false reflections
HQ-55 B67-10071 02

Dielectric prisms would improve performance of quasi-optical microwave components
HRC-10011 B67-10416 01

Casera lens adapter magnifies image
K-FS-11955 B67-10431 02

Fluidic-thermochromic display device
HRC-10031 B68-10350 01

Automatic system nondestructively monitors and records fatigue crack growth
LANGLEY-10091 B68-10379 01

Thick transducers used for generating short-duration stress pulses in thin specimens
ARG-10232 B69-10045 01

Flow angle sensor and readout system
LEWIS-90290 B69-10050 01

Optically exciting a magnetic memory - A feasibility study

REFLECTORS

M-FS-14854 B69-10060 02

An ultrasonic method for studying elastic moduli as a function of temperature
ARG-10187 B69-10082 02

Surface irregularities detected by flare inspection instrument
M-FS-20157 B69-10152 01

RECEIVERS

Special purpose reflectometer uses modified ulbricht sphere
HSC-1135 B67-10109 02

Ellipsoidal-mirror reflectometer accurately measures infrared reflectance of materials
GSPC-566 B67-10444 01

Reflectometer for receiver input system
NPO-10843 B67-10657 01

Plume on microwave antenna subreflector cuts ground noise
JPL-362 B63-10229 01

Optics used to measure torque at high rotational speeds
LEWIS-13 B63-10338 01

Test device prevents molecular bounce-back
GSPC-82 B63-10546 03

Ellipsoidal optical reflectors reproduced by electroforming
GSPC-92 B63-10547 05

Plastic films for reflective surfaces reproduced from masters
GSPC-188 B64-10151 03

Optical arrangement increases useful light output of semiconductor diodes
JPL-SC-064 B65-10020 05

Sensitive level sensor made with spirit level, gives electrical output
LANGLEY-49 B65-10067 01

Oil-damped mercury pool makes precise optical alignment tool
GSPC-353 B65-10253 02

Infrared shield facilitates optical pyrometer measurements
LANGLEY-113 B65-10272 02

Nickel solution prepared for precision electroforming
WDO-070 B65-10303 03

Communication system uses modulated laser beam
GSPC-377 B65-10333 01

Reflective insulator layers separated by bonded silica beads
MSC-215 B66-10070 03

Optical device enables small detector to see large field of view
WDO-253 B66-10263 02

High-speed furnace uses infrared radiation for controlled brazing
WDO-0047 B66-10268 02

Optical monitor panel provides flexible test panel configurations
HSC-66-18 B66-10494 01

Process sequence produces strong, lightweight reflectors of excellent quality
LEWTS-331 B67-10010 05

Scanning means for Cassegrainian antenna
JEL-946 B67-1017a 05

Cone and column solar energy concentrator
REFRACTED WAVES

Telescope mount with azimuth-only primary  
NRO-10468  B67-10517  01

Resonant microwave dichroic surface  
GSFC-10668  B67-10671  02

A new method for producing optical mirrors  
HQ-10227  B67-10529  02

N-FS-14101  B69-10783  02

REFRACTED WAVES

Fatigue zones in metals identified by  
polarized light photography  
WGO-286  B67-10082  02

REFRACTION

Liquid-level meter has no moving parts  
N-PS-3  B63-10378  03

Aerial-image enables diagrams and animation  
to be inserted in motion pictures  
ARG-146  B67-10398  02

FORTRAN optical lens design program  
NRO-10603  B68-10354  06

REFRACTIVITY

Star/horizon simulator used to test space  
guidance system  
MSC-407  B67-10110  02

Accuracy of laser measurements improved by  
pulse autocorrelator electronic system  
MSC-10033  B67-10338  01

Computer program for optical systems ray  
tracing  
FRC-10017  B67-10549  06

Method of making conical fiber optical  
components  
XM-09745  B69-10020  02

REFRACTORITIES

Motion drive system is accurately controlled  
in the 1-micron range  
JPL-864  B66-10695  05

REFRACTOMETERS

Laser-Doppler gas-velocity instrument  
N-PS-20039  B68-10349  02

REFRACTORY MATERIALS

Apparatus facilitates high-temperature tensile  
testing in vacuum  
LEWIS-42  B63-10345  03

Refractory ceramic has wide usage, low  
fabrication cost  
N-PS-67  B63-10481  03

Refractory thermal insulation for smooth  
metal surfaces  
N-PS-150  B66-10099  03

Refractory oxides evaluated for  
high-temperature use  
LANGLEY-121  B65-10167  03

Silazane polymers show promise for high-  
temperature application  
N-PS-466  B66-10194  03

Fibers of newly developed refractory ceramics  
produced by improved process  
WGO-169  B66-10196  03

Improved thermal insulation materials made of  
foamed refractory oxides  
LEWIS-10817  B69-10266  03

SUBJECT INDEX

Crucible cast from beryllium oxide and  
refractory cement is impervious to flux  
and molten metal  
ARG-22  B66-10527  03

Multilayer refractory nozzles produced by  
plasma-spray process  
WGO-318  B66-10611  05

Decomposition vessel  
GSFC-10343  B69-10104  03

Refractory oxide insulated thermocouple  
designed and analyzed for high temperature  
applications  
ARG-10202  B69-10053  03

Study of high temperature bearing materials  
LEWIS-10829  B69-10252  03

Mass-spectrometric study of the  
rhenium-oxygen system  
ARG-10421  B69-10645  02

REFRACTORY METAL ALLOYS

New cobalt alloys have high-temperature  
strength and long life in vacuum  
environments  
LEWIS-47  B63-10351  03

Copper-acrylic enamel serves as lubricant  
for cold drawing of refractory metals  
ARG-24  B66-10471  05

New tungsten alloy has high strength  
at elevated temperatures  
LEWIS-336  B66-10551  03

Tantalum alloys resist creep deformation at  
elevated temperatures  
LEWIS-350  B66-10558  03

Welding, bonding, and sealing of refractory  
metals by vapor deposition  
LEWIS-123  B67-10232  03

Design for high-temperature /1800 deg F/  
liquid metal pressure transducer  
LEWIS-10144  B67-10458  01

Cold machining of high density tungsten  
and other materials  
ARG-10289  B69-10110  05

Improved high-temperature silicide coatings  
LEWIS-10817  B69-10266  03

REFRACTORY METALS

Radiant heater for vacuum furnaces offers high  
structural rigidity, low heat loss  
LEWIS-39  B63-10342  01

Wire winding increases lifetime of oxide  
coated cathodes  
LEWIS-154  B65-10032  03

Pulsed plasma accelerator operates  
repetitively without complex controls  
LANGLEY-46  B65-10062  01

Ceramic-coated boat is chemically inert,  
provides good heat transfer  
LANGLEY-90  B65-10063  05

Apparatus facilitates pressure-testing of  
metal tubing  
LEWIS-174  B65-10131  05

Refractory metal shielding /insulation/  
increases operating range of induction  
furnace  
LEWIS-202  B65-10188  02

Refractory metals welded or brazed with  
tungsten inert gas equipment  
LEWIS-219  B65-10319  05

Braking method produces solid-solution bond  
I-548
Regenerative fuel cell combines high efficiency with low cost
Woo-090  B65-10363  01

Iron serves as diffusion barrier in thermally regenerative galvanic cell
Arg-29  B67-10189  03

Regenerative fuel cell combines high efficiency with low cost
Woo-090  B65-10363  01

Iron serves as diffusion barrier in thermally regenerative galvanic cell
Arg-29  B67-10189  03

Hybrid circuit achieves pulse regeneration with low power drain

Report on a cryogenic gyroscope
Npo-11200  B69-10504  02

Chemical regeneration of emitter surface increases thermionic diode life
Lewis-17  B66-10435  02

New method used to fabricate light-weight heat exchanger for rocket solor
Lewis-43  B63-10346  02

New method used to fabricate light-weight heat exchanger for rocket solor
Lewis-43  B63-10346  02
Reinforcing Fibers

Resilient clamp holds fuel cell stack through thermal cycle

Lightweight, all-metal hose assembly has high flexibility and strength over wide range of temperature and pressure

Pipe joints reinforced in place with fitted aluminum sleeves

Method for reinforcing tubing joints

Boron carbide whiskers produced by vapor deposition

Composite gaskets are compatible with liquid oxygen, resist compression set

Tungsten fiber-reinforced copper composites form high strength electrical conductors

Nonwoven glass fiber mat reinforces polyurethane adhesive

Tungsten fiber-reinforced nickel superalloy

Boron fiber-reinforced aluminum alloy tubing /experimental/

Simple circuit provides reliable multiple signal average and reject capability

Composite filter steepens rejection slopes in microwave application

Solid state circuit averages multiple signals and rejects those varying significantly from the average

Theory of a refined earth model

Temperature-controlled resistor

Fortran 4 program calculates velocities and streamlines in a tandem blade turbine machine

Uni-junction frequency divider is free of backward loading

High-intensity flashing beacon powered by mercury cells

Circuit exhibits power efficiency greater than 75 percent

One-dimensional reacting gas nonequilibrium performance program

RELAY

Circuit switches latching relay in response to signals of different polarity

Pulse generator permits nondestructive testing of component breakdown voltage

Triphasing spark gap actuates overvoltage relay

Instrument sequentially samples ac signals from several accelerometers

Improved relay optical element for spectroradiometer using cryogenically cooled detector

RELIABILITY

Simple mechanism combines positive locking and quick-release features

Instrument adjustment knob locks to prevent accidental maladjustment

Cylindrical claw clamp has quick release feature

Fastener provides for bolt misalignment and quick release of flange

Pneumatic separator gives quick release to heavy loads

Flexible fastener effects airtight material closure

Sea dye marker provides visibility for 20 hours

Controlled release device prevents damage from dynamic stresses

Lock-disconnect mechanism gives positive release to joined bodies

Pyrotechnic-actuated cable release

Tool facilitates sealing of metal fill tubes

Liquid switch is remotely operated by low dc voltage

Compact coaxial connector for printed circuit adds reliability

Logic redundancy improves digital system reliability

Improved holder protects crystal during high acceleration and impact

Solid-state laser transmitter is amplitude modulated

Stabilizing stainless steel components for cryogenic service
M-PS-13127 B67-10377 05

Machining heavy plastic sections
M-PS-12720 B67-10381 03

Ultrasoundics used to measure residual stress
M-PS-12449 B67-10428 02

Electrochemical cell has internal resistive heater element
GSFC-10558 B68-10325 01

Nondestructive method for measuring residual stresses in metals, a concept
KSC-10237 B68-10378 03

Techniques for controlling warpage and residual stresses in welded structures
M-PS-20307 B69-10086 05

RESIDUES

Solvent residue content measured by light scattering technique
M-PS-850 B66-10320 01

Film coating permits low-force scribing
MSC-990 B66-10609 03

Xenon fluoride solutions effective as fluorinating agents
ARG-217 B67-10133 03

Wear studies made of slip rings and gas bearing components
M-PS-12802 B67-10403 05

Apparatus automatically measures soluble residue content of volatile solvents
SAN-10032 B69-10292 03

RESILIENCE

Comfortable, lightweight safety helmet holds radio transmitter, receiver
MSC-53 B68-10015 05

Plastic plus stainless-steel fibers make resilient, impermeable material
WOO-246 B65-10374 03

Thermoplastic rubberlike material produced at low cost
JPL-753 B66-10453 03

Silane-crosslinked elastomer remains resilient at 400 deg C
M-PS-1144 B66-10667 05

Resilient bearing supports are gas controlled
LEWIS-10109 B67-10364 05

Fiber glass prevents cracking of polyurethane foam insulation on cryogenic vessels
M-PS-20058 B68-10406 02

Pressure transducer
NPO-10853 B69-10364 01

Precisely repeatable rotary mechanisms
NPO-10679 B69-10696 05

RESIN BONDING

Insulation for cryogenic tanks has reduced thicknesses and weight
M-PS-326 B66-10183 02

Improved adhesive for cryogenic applications cures at room temperature
WOO-132 B66-10185 03

Coating permits use of strain gage in water and liquid hydrogen
M-PS-594 B66-10192 01

Dry film lubricant is effective at extreme loads
M-PS-628 B66-10256 03

A new method for fabrication of flexible vacuum purge jackets
M-PS-12646 B69-10564 03

RESINS

Quick-hardening problems are eliminated with spray gun modification which mixes resin and accelerator liquids during application
LANGLLEY-6A B63-10318 03

Servo system facilitates photoelastic strain measurements on resins
JPL-504 B64-10280 01

Fiber glass parts cured during filament winding eliminates oven, saves time

Integrated circuit with multiple collector current source

Calibration of a resistance thermometer down to 0.04 degrees K

Linear-log counting-rate meter uses transconductance characteristics of a silicon planar transistor

Improved liquid-level sensor for cryogenics

Technique for abrasive cutting of thick-film conductors for hybrid circuits

Continuous analysis of nitrogen dioxide in gas streams of plants

Punch-magnet delay eliminated by modification of circuit

Concept for improved vacuum pressure measuring device

Temperature-controlled resistor

Fuse protects circuit from voltage and current overloads

Radiometric temperature reference

Constant-frequency, variable-duty-cycle multivibrator

Miniature backward-diode pressure sensor features stability and low power consumption

Gapped toroid provides infinite resolution of delay-line pickup

Modified developer increases line resolution in photosensitive resist

Local measurements in turbulent flows through cross correlation of optical signals

Ultraminature television camera

Lamb waves increase sensitivity in nondestructive testing

Circuit enhances vertical resolution in raster scanning systems

Improved gas ring laser

Mounting method improves electrical and vibrational characteristics of screen electrodes

Fluorescent photography of spray droplets using a laser light source

Spherical ion source

Semiautomatic inspection of microfilm records

Combination ranging system and mapping radar

Thermal calibration target

Lamb waves increase sensitivity in nondestructive testing

Improved atomic resonance gas cell for use in frequency standards

Device for diode tuning in a stripline varactor harmonic multiplier

Calculation of resonance neutron absorption in two-region problems /the GAROL code/

Remote rapidly varying pressures accurately measured

Friction device damps linear motion of rotating shaft

Damping technique gives accelerometer flat frequency response

Resonant frequency can be adjusted on vibration mount

Process reduces secondary resonant emission in electronic components

Simple pump maintains liquid helium level in cryostat

Liquid hydrogen densitometer utilizes open-ended microwave cavity

Hydrogen maser as a highly stable frequency reference

Computer program simplifies design of rotating components of turbomachinery

Post-stressed concrete foundation may reduce machinery vibration
System precisely controls oscillation of vibrating mass
MSC-1246  B67-10279  06

Computer program provides improved longitudinal response analysis for axisymmetric launch vehicles
LANGLEY-10093  B67-10531  06

Mounting method improves electrical and vibrational characteristics of screen electrodes

Nosepiece respiration monitor
ERC-10136  B68-10438  01

Study indicates fluid digital computation systems are feasible
M-P-520  B67-10101  01

Computer program simulates physical systems by solving the simultaneous differential equations describing the systems
NSO-10019  B67-10193  06

Fast-response frequency-to-analog converter
M-P-709  B67-10257  01

Inductor flyback characteristic gives voltage regulator fast response
GSFC-361  B65-10257  01

Differential pressure gauge has fast response
M-P-358  B65-10285  05

Computer program reduces calculation time of normal response functions
M-P-1517  B67-10108  01

Computer program calculates monotonic maximum likelihood estimates using method of reversals
M-P-1516  B67-10136  01

SHOULDER ADJUSTMENTS
Shoulder adapter steadies spot welding gun
N-P-321  B66-10076  05

RESTARTABLE ROCKET ENGINES
Cold solid propellant motor has stop-start capability
JPL-836  B66-10673  03

STORAGE
Multisurface fixture permits easy grinding of tool bit angles
N-P-586  B66-10171  05

Ultrasonic cleaning restores depth-type filters
N-P-540  B66-10298  03

RETAILING
Screw locking cups quickly and neatly crimped
FU-0009  B65-10049  05

High-temperature bearing-cage materials
LEWIS-10403  B68-10176  05

Removal of retaining washers of the waffle-spring type
SUBJECT INDEX

BSC-15531  B69-10350  05
Iris-leaf core retainer for a surface drill  BSC-17402  B69-10496  05
An electrical connector pin protector  BSC-15660  B69-10742  01

RETARDANTS
Punch-magnet delay eliminated by modification of circuit  ARG-10333  B69-10416  01

RETARDERS (DEVICES)
Electron beam parallel X-ray generator  KSC-11022  B67-10372  02

RETENTION
Gage measures electrical connector pin retention force  JPL-SC-071  B65-10034  03
Study of behavior of steels at interfaces  ARG-10333  B69-10416  01

RETICLES
Master linearity of video cameras calibrated with precision tester  GSPC-200  B64-10209  01

RETRACTABLE EQUIPMENT
Sheet metal strip unrolls to form circular boom  GSPC-423  B66-10032  05
Cylindrical claw clamp has quick release feature  KPS-513  B66-10213  05

RETRIEVAL
System locates randomly placed remote objects  LANGLEY-209  B66-10315  01
Reidentifying hardware after loss of serial number  KPS-18133  B65-10059  05

RETROFLEXTION
Optical superheterodyne receiver uses laser for local oscillator  KPS-1605  B66-10584  01

REVERSED FLOW
Check valve installation in pilot operated relief valve prevents reverse pressurization  KPS-1925  B66-10655  05
Automatic filter-blowback systems used with sintered-metal filters  ABC-10324  B69-10342  05

REVERSING
Ring counter may be advanced or retarded by command signal  GSPC-101  B64-10144  01
Thermal motor positions magnetometer sensors  ABC-51  B66-10078  05
Ring counter-circuit switches multiphase motor direction of rotation  JPL-SC-160  B66-10101  01

REVISED
Modified power tool rapidly drives series torque bolts  KPS-221  B66-10054  05
Plastic scintillator converts standard photomultiplier to ultraviolet range  ABC-9  B66-10108  02
Modified drill permits one-step drilling operation  KPS-559  B66-10169  05
Tool post modification allows easy turret lathe cutting-tool alignment  KPS-581  B66-10191  05

REVIVED
Improved cryogenic refrigeration system  JPL-731  B67-10128  02
Study made of ductility limitations of aluminum-silicon alloys  KPS-12524  B69-10392  03
An improved magnetic tape recorder  GSPC-02859  B67-10646  01

RHEOMY
High temperature thermocouple operates in reduction atmosphere  B66-2056  B66-10134  01
Study shows effect of surface preparations on improving thermionic emission  JPL-SC-140  B66-10493  01
High-strength tungsten alloy with improved
ductility  867-10340  03
Reinforced thermal-shock resistant ceramics  868-10085  03
Fabrication techniques developed for small-diameter, thin-wall tungsten and tungsten alloy tubing  868-10284  05
Nickel base alloy with improved stress rupture properties  868-10344  03
Tungsten wire and tubing joined by nickel brazing  865-10391  05
Lower-cost tungsten-rhenium alloys  866-10528  03
Tungsten-rhenium alloy thermocouples effective for high-temperature measurements  868-10105  03
Refractory oxide insulated thermocouple designed and analyzed for high temperature applications  869-10053  03
Refractory compounds: Refractory-metal compound impregnation of polytetrafluoroethylene  869-10072  03
Mass-spectrometric study of the rhenium-oxygen system  869-10045  02
Rheo-electrical simulation: Logarithmic current simulator generates electrical currents accurately between 10 to the minus 11 ampere to 10 to the minus 3 ampere  866-10706  01
Rheology: Study of high-speed angular-contact ball bearings under dynamic load  869-10367  05
Rhenium: Subminiaturized gas chromatograph gives fast, efficient analysis  866-10182  01
Sensing disks for slug-type calorimeters have higher temperature stability  867-10161  01
Rhodium-plated barrier against high-temperature fusion bonding  869-10544  05
Rhodium alloys: Superconductivity in zirconium-rhodium alloys  869-10010  03
Rubbers: Gas leak detector is simple and inexpensive  866-10669  01
Improved method of edge coating flat ribbon wire  866-10684  03
Fast-acting calorimeter measures heat output of plasma arc accelerator  867-10192  01
Helical tape forming device  869-10137  05
Leads integral with the internal interconnection that penetrate the molded wall of a package  869-10436  01
Ribo nucleic acids: Purification and characterization of two fully deuterated enzymes  869-10207  04
Ribs (Supports): Integral ribs formed in metal panels by cold-press extrusion  865-10141  05
Rigid mounting: Special mount improves remote transducer accuracy  866-10021  01
Electrolytically conductive fibers thermally isolate temperature sensor  866-10349  01
Combination double door high-vacuum valve provides access to vacuum chamber  866-10697  05
Teflon sheet permits valve and valve operator to move as a single unit in a cryogenic pipe line  866-10702  05
Post-stressed concrete foundation may reduce machinery vibration  867-10237  05
Connect/disconnect coupling for preadjusted rigid shafts  869-10375  05
Rigid motors: Valve effectively controls amount of contaminant in flow stream  869-1771  05
Rigid structures: Apparatus of small size can be extended into long, rigid boom  863-10200  05
Collapsible truss structure is automatically expandable  865-10126  05
Extendible column can be stowed on drum  865-10191  05
Vacuum chamber provides improved insulation and support for cryostat  865-10368  02
Cold cathode ionization gage has rigid metal housing  866-10041  01
Bellows design features low spring rate and long life  866-10190  05
Fibers of newly developed refractory ceramics produced by improved process  866-169  03
Rugged microelectronic module package supports circuitry on heat sink  866-10245  01
Compact actuator converts rotary to linear motion  866-10265  05
Friction loading device enables accurate testing of brittle materials  866-10345  05
Lateral ring metal elastic wheel absorbs shock loading  866-10663  05
Prefared stiffeners used to fabricate
structural components for pressurized tanks
M-PS-1796 B66-10688 05

Work platform is supported by self-locking blades
M-PS-2297 B67-10180 05

Quick-release hook-and-loop fastener
MSC-10550 B69-10388 05

Modular packaging technique for combining integrated circuits and discrete components
GSFC-10369 B69-10453 01

RIGIDITY
Spring loaded beaded cable makes efficient wire puller
WOO-108 B65-10031 05

Heat treatment stabilizes welded aluminum rings and tool structures
MSC-800 B66-10458 03

A mechanically extendible boom
KPO-11118 B69-10328 05

RING DISCHARGE
Laser system generates single-frequency light
M-PS-2556 B67-10288 02

RING LASERS
Neon isotopes cancel errors in gas laser

Automatic planning concept - An analysis of optimum scheduling
N-PS-14188

DSN seven day/twelve week schedule program
EPPO-10752

Visual task analysis /VISTA/
M-PS-14716

Programmed schedule holds for improving launch vehicle holds
M-PS-14502

SCHOOLS

Handbooks for nondestructive testing using ultrasonics
M-PS-20409

SCINTILLATION

Thin carbon film serves as UV bandpass filter
B66-10060

Tunnel diode circuit used as nanosecond-range time marker
ARG-90164

Dual-mode operation of a neutron source, a concept
HQ-10106

Direct in-vial collection for liquid-scintillation assay of carbon-14 and tritium
ARG-10424

SCINTILLATION COUNTERS

Cesium iodide crystals fused to vacuum tube faceplates
CSFC-67

Plastic scintillator converts standard photomultiplier to ultraviolet range
ERC-9

Nondestructive test method accurately sorts mixed bolts
M-PS-1426

Radioactive method enables determination of surface areas rapidly and accurately
NS-0088

Thermal neutron image intensifier tube provides brightly visible radiographic pattern
ARG-120

New electron microscope employs new video display technique
ARG-158

Epoxy resins produce improved plastic scintillators
ARG-241

The response of monoenergetic gamma rays in finite media are investigated
ARG-10295

Mossbauer vibration calibration systems evaluated
M-PS-20014

Recent development in organic scintillators
ARG-10344

Combustion method for assay of biological materials labeled with carbon-14 or tritium, or double-labeled
ARG-10331

Improved pulse shape discriminator for fast neutron-gamma ray detection system
ARG-10462

Manganese-56 coincidence-counting facility precisely measures neutron-source strength
ARG-90261

Electro-Plan /visualize a plan/ management technique provides performance-time scale
KSC-10073

Recent development in organic scintillators
ARG-10344

Direct measurement of carbon-14 in carbon dioxide by liquid scintillation counting
ARG-10237

Improved method of dicing integrated circuit wafers into chips
ERC-10138

Direct in-vial collection for liquid-scintillation assay of carbon-14 and tritium
ARG-10424

COATING

Run-in with chemical additive protects gear surface
M-PS-548

Film coating permits low-force scribining
M-PS-990

Scribable coating for plastic films
M-PS-11194

Coaxial cable stripping device facilitates RF cabling fabrication
EPPO-10315

Restricted-flow junction between liquids
FPO-10682

Improved method of dicing integrated circuit wafers into chips
ERC-10138

Mounting method improves electrical and vibrational characteristics of screen electrodes
M-PS-20169

Mounting method improves electrical and vibrational characteristics of screen electrodes
M-PS-20169

SCREEN EFFECT

Luminescent screen composition for cathode ray tubes
ERC-19

Mounting method improves electrical and vibrational characteristics of screen electrodes
M-PS-20169

SCREENS

Technique for abrasive cutting of thick-fil conductors for hybrid circuits
B66-10235

Filter for high-pressure gases has easy take-down, assembly
JPL-373

Servo system facilitates photoelastic strain measurements on resins
JPL-504

Fine-mesh screen made by simplified method
WOO-104

I-574
Screening technique makes reliable bond at room temperature
M-FS-227 B65-10004 03

Library of documents compressed into lap-held display kit
MSC-125 B65-10030 01

Nozzles for size reclassification of microfog particles
LEWIS-10705 B65-10076 05

Electrochemical sintering process for producing electrodes from cadmium felt and a nickel or silver grid
GSFC-10764 B66-10227 05

SCREWS
V-slotted screw head and matching driving tool facilitate insertion and removal of screw fasteners
PMC-16 B63-10023 05

Screw locking cups quickly and neatly crimped
RU-0009 B65-10049 05

Coiled spring makes self-locking device for threaded fasteners
MSC-149 B65-10135 05

Electrochemical flowmeter accurately monitors fluid flow
GSFC-357 B65-10273 01

Die and telescoping punch form convolutions in thin diaphragms
JPL-SC-135 B65-10393 05

Adhesive-backed terminal board eliminates mounting screws
MSC-173 B65-10396 01

Expandable insert serves as screw anchor
MSC-301 B66-10132 05

Mounting facilitates removal and installation of flame-detector rods
M-FS-555 B66-10150 05

Quick-attach clasp
XFR-05421 B68-10250 05

Countersunk head screw retainer
M-FS-16481 B69-10282 05

Shock-absorbent mountings for bearings
WPO-10626 B69-10331 05

Removal of retaining washers of the waffle-spring type
MSC-15531 B69-10350 05

Precisely repeatable rotary mechanism
WPO-10679 B69-10696 05

SDS 930 COMPUTER
Computer program for Video Data Processing
System /VPDPS/ WPO-10042 B67-10630 06

X-Y plotter adapter developed for SDS-930 computer
WPO-10220 B67-10654 06

ABTAJ on-site tracking prediction program
WPO-10836 B69-10103 06

SEA WATER
Emergency solar still desalts seawater
MSC-135 B65-10214 03

Buoyant stokes’ litter assembly used for sea rescue operations
MSC-131 B66-10019 05

Sea dye marker provides visibility for 20 hours
MSC-714 B66-10313 03

Proposed gas generation assembly would recover deeply submerged objects
SAR-10007 B68-10211 05

Separation of traces of metal ions from sodium matrices
ABS-10341 B69-10168 03

SEALERS
Oil-smear models aid wind tunnel measurements
LANGley-4 B63-10311 03

Composite seal reduces alkaline battery leakage
GSFC-337 B65-10271 01

Liquid trap seals thermocouple leads
I-FS-688 B66-10212 05

Thermoplastic rubberlike material produced at low cost
JPL-337 B67-10350 03

Screw locking cups quickly and neatly crimped
NU-0009 B65-10049 03

Soft metal plating enables hard metal seal to operate successfully in low temperature, high pressure environment
NUC-10083 B67-10350 03

Coiled spring makes self-locking device for threaded fasteners
ISC-149 B65-10135 03

Dynamic captive plastic seal
I-FS-10705 B66-10076 03

Electrochemical flowmeter accurately monitors fluid flow
GSPC-357 B65-10273 01

Inspection criteria ensure quality control of parallel gap soldering
I-35-14530 B68-10257 05

Die and telescoping punch form convolutions in thin diaphragms
JPL-SC-135 B65-10393 05

Electromechanical flowmeter accurately monitors fluid flow
GSPC-357 B65-10273 01

Thermoplastic rubberlike material produced at low cost
JPL-337 B67-10350 03

Cooled miniature pressure transducers effective at high temperatures
LEWIS-10401 B65-10370 01

Fratography can be used to analyze failure modes in polytetrafluoroethylene of flame-detector rods
H-18-20294 B66-10257 05

Inspection criteria ensure quality control of parallel gap soldering
I-35-14530 B68-10257 05

Ductile iron facilitates forming of soft, sticky materials
KSC-10262 B69-10331 05

Improved cure method for single component silicone rubber
MSC-12230 B69-10749 03

Vented piston seal prevents fluid leakage between two chambers
JPL-179 B63-10141 05

Packless valve with all-metal seal handles wide temperature, pressure range
JPL-361 B63-10228 05

Design of valve permits sealing even if the stem is misaligned
LEWIS-38 B63-10341 05

Liquid-level meter has no moving parts
M-FS-3 B63-10370 03

Vacuum-type backup bar speeds weld repairs
M-FS-12 B63-10384 05

Tool facilitates sealing of metal fill tubes
MSC-24 B63-10519 05

Cryogenic waveguide window is sealed with plastic foam
JPL-559 B69-10519 05

Blade valve isolates compartment in pipe, opens to allow free flow
JPL-585 B64-10188 05

Pressure molding of powdered materials improved by rubber mold insert
WPO-190 B64-10270 03

SILICON POLYMERs

Flexible protective coatings made from
silicon-nitrogen materials
K-FS-528 B66-10027 03

Silazane polymers show promise for high-
Temperature application

Substituted silane-diol polymers have improved thermal stability

Silicon radiation detectors
Silicon surface barrier detectors used for liquid hydrogen density measurement

Silicon tetrachloride
Impurity diffusion process for silicon semiconductors is fast and precise

Silicon transistors
Zener diode is starter for transistor regulated power supply

Temperature transducer has high output, is time stable

Vapor grown silicon dioxide improves transistor base-collector junctions

Transistor circuit increases range of logarithmic current amplifier

Metal oxide silicon / MOS/ transistors protected from destructive damage by wire

Miniature electrometer preamplifier effectively compensates for input capacitance

New microelectronic power amplifier

Failure rates for accelerated acceptance testing of silicon transistors

Linear-log counting-rate meter uses transconductance characteristics of a silicon planar transistor

Accurate nine-decade temperature-compensated logarithmic amplifier

Highly stable high-rate discriminator for nuclear counting

Silicone resins
Special coatings control temperature of structures

Silicone rubber
Thermally conductive metal wool-silicone rubber material can be used as shock and vibration damper

Pressure molding of powdered materials improved by rubber mold insert

Shock mount isolates pressure transducers from vibration

High-intensity flashing beacon powered by mercury cells

Copper foil provides uniform heat sink path

Capacitive system detects and locates fluid leaks

Split glass tube assures quality in electron beam brazing

Circular, explosion-proof lamp provides uniform illumination

Rubber-coated bellows improves vibration damping in vacuum lines

Rubber and alumina gaskets retain vacuum seal in high temperature RF cell

Encapsulation technique eliminates thermal stresses in welded electronic modules

Battery-package design provides for cell cooling and constraint

Tools made of ice facilitate forming of soft, sticky materials

Glass fabric fire barrier for silicone rubber parts

Improved electrode gives high-quality biological recordings

Gas diffusion cell removes carbon dioxide from occupied airtight enclosures

Flexible curtain shields equipment from intense heat fluxes

Lightweight load support serves as vibration damper

Organic reactants rapidly produce plastic foam

Coating permits use of strain gage in water and liquid hydrogen

Damping technique gives accelerometer flat frequency response

Electrical cabling withstands severe environmental conditions

Improved method of edge coating flat ribbon wire

Self-sealing closure enables access to several fluid containers

Process controls introduction of selected impurities into semiconductor wafers

Study made of dielectric properties of promising materials for cryogenic capacitors

Technique eliminates high voltage arcing at electrode-insulator contact area H6-10133 01
Improved cavity-type absolute total-radiation radiometer H6-10557 01
High-voltage pulse generator developed for wide-gap spark chambers H6-10283 01
Electroactive series established for metals used in aerospace technology H6-10385 03
Electrolytic silver ion cell sterilizes water supply H6-10555 01
Mass transport mechanism in porous fuel cell electrodes H6-10383 01
Electrochemical sintering process for producing electrodes from cadmium felt and a nickel or silver grid H6-10277 05
Metallurgical diffusion measured by a modified Kundsen technique H6-10309 03
SILVER ALLOYS
New brazing alloy eliminates metal-stress cracking H6-10397 03
Silver-base ternary alloy proves superior for slip ring lead wires H6-10580 03
Silver-palladium alloy recovered from masking materials H6-10645 03
Cryogenic seal remains leaktight during thermal displacement H6-10134 02
Thermodynamic properties of solid palladium-silver alloys and other alloys are investigated by torsion-effusion technique H6-10277 03
Device for obtaining separation of oxygen H6-10477 01
SUBJECT INDEX

Device separates hydrogen from solution in water at ambient temperatures
MSC-13335 E69-10635 03

SILVER CADMIUM BATTERIES
Auxiliary silver electrode eliminates two-step voltage discharge characteristic of silver-zinc cells
GSFC-169 B64-10114 01
Hermetically sealed cells protected from internal gas pressure
GSFC-555 B66-10692 01

SILVER CHLORIDES
Cesium iodide crystals fused to vacuum tube faceplates
GSFC-67 B63-10476 03

SILVER CEMENTS
Improved electrode gives high-quality biological recordings
MSC-158 B65-10320 01

Ion exchange determines iodine-131 concentration in aqueous samples
ARG-208 B67-10129 04

SILVER COMPOUNDS
New energy storage concept uses tapes
LEWIS-239 B66-10098 02
Preparation of silver-activated zinc sulfide thin films
GSFC-10687 B68-10271 03

SILVER NITRATES
Preparation of silver-activated zinc sulfide thin films
GSFC-10687 B68-10271 03

SILVER IODIDES
Ion exchange determines iodine-131 concentration in aqueous samples
ARG-208 B67-10129 04

SILVER ZINC BATTERIES
Auxiliary silver electrode eliminates two-step voltage discharge characteristic of silver-zinc cells
GSFC-169 B64-10114 01
Device removes hydrogen gas from enclosed spaces
GSFC-495 B66-10340 03
Hermetically sealed cells protected from internal gas pressure
GSFC-555 B66-10692 01
Separator for alkaline batteries
GSFC-10173 B68-10557 03
High-energy, high-power, long-life battery
LEWIS-10724 B69-10131 01

SILVER ZINC OXIDES
Auxiliary silver electrode eliminates two-step voltage discharge characteristic of silver-zinc cells
GSFC-169 B64-10114 01

SIMPLIFICATION
Subroutines GEORGE and DRASTC simplify operation of automatic digital plotter
NUC-10044 B67-10222 06

A simplified PERT system
M-PS-2267 B67-10241 05
Simplified method measures changes in tensile yield strength using least number of specimens
NUC-10075 B67-10266 03

Tool simplifies machining of pipe ends for precision welding
KSC-10361 B69-10231 05

SIMULATION
Optical projectors simulate human eyes to establish operator's field of view
WOO-250 B66-10010 02
GERMINY-A new management training concept
GSFC-574 B67-10092 01

Computer program uses Monte Carlo techniques for statistical system performance analysis
M-PS-2234 B67-10306 06

Experiments to investigate particulate materials in reduced gravity fields
M-PS-13308 B67-10398 02

Torque meter aids study of hysteresis motor rings
M-PS-12219 B67-10412 01

Algebraic Monte Carlo procedure reduces statistical analysis time and cost factors
M-PS-1887 B67-10438 01

Simulated hailstone fabrication and use in testing weatherability of structures
MUF-10783 B68-10552 03

Electronic visualization of gas bearing behavior
LEWIS-10711 B69-10073 01

SIMULATORS
Analog device simulates physiological waveforms
MSC-51 B64-10109 01

Electronic device simulates respiration rate and depth
MSC-89 B64-10255 01

Simulator produces physiological waveforms
MSC-94 B65-10091 01

Antenna simulator permits preinstallation system checkout
GSFC-522 B66-10518 01

Pump simulator provides variable pressure-flow characteristics
LEWIS-10122 B67-10453 05

Fully automatic telemetry data processor
GSFC-10576 B68-10336 01

Exploding bridgewire detonator simulator
M-PS-02191 B69-10782 01

SINWAR
Computer program simulates physical systems by solving the simultaneous differential equations describing the systems
WRO-10019 B67-10193 06

CINDA-Chrysler Improved Numerical Differentiating Analyzer computer program
M-PS-2298 B67-10278 06

Computer program provides linear sampled-data analysis for high order systems
M-PS-12821 B67-10782 01

Computer subroutine ISUDS accurately solves large system of simultaneous linear algebraic equations
NUC-10051 B67-10344 06

SINE SERIES
Measurement technique for the determination of antenna directivity
M-PS-12799 B69-10677 01
SINE WAVES

Metal diaphragm used to calibrate miniature transducers
H-PS-207  B65-10059  01

Field effect transistor presents high input impedance in ac amplifier
JFZ-500  B65-10232  01

Pressure transducers dynamically tested with sinusoidal pressure generator
LWIS-268  B66-10031  01

Circuit operates as sine function generator
MSC-255  B66-10038  01

Feedback loop compensates for rectifier nonlinearity
H-PS-384  B66-10382  01

Edge-type connectors evaluated by electrical noise measurement
H-PS-2243  B67-10125  01

A modal combination computer program for dynamic analysis of structures
MHO-10129  B67-10217  06

Glow discharge density sensor probe life is extended
H-PS-1707  B67-10229  01

System precisely controls oscillation of vibrating mass
H-PS-1875  B67-10276  01

Improved circuit for measuring capacitive and inductive reactances
H-PS-13063  B67-10513  01

Circuit measures hysteresis loop areas at 30 Hz
H-PS-13069  B67-10519  01

Analysis of dynamic systems with DAP8 computer program
H-PS-13999  B67-10523  06

Computer program provides improved longitudinal response analysis for axisymmetric launch vehicles
LANGLEY-10093  B67-10531  06

Pneumatic pressure wave generator provides economical, simple testing of pressure transducers
NWC-10024  B67-10664  05

Vibration testing and dynamic studies of relays
H-PS-14542  B68-10268  01

Modified sine bar device measures small angles with high accuracy
GSFC-438  B68-10322  02

Flow angle sensor and readout system
LWIS-90239  B69-10050  01

An unconventional magnetically-coupled multivibrator
HQ-10226  B69-10480  01

Conditioning of pulses from aerosol-particle detectors
ERC-10250  B69-10691  01

SINGLE CRYSTALS

Single-crystal semiconductor films grown on foreign substrates
WOO-076  B66-10225  01

Indium adhesion provides quantitative measure of surface cleanliness
SAN-10024  B66-10342  01

Improved method of dicing integrated circuit wafers into chips
ESC-10138  B69-10441  01

SINGLE SIDEBAND TRANSMISSION

Single-sideband modulator accurately reproduces phase information in 2-Mc signals
H-PS-664  B66-10437  01

SINKING

Wall-thickness changes predicted in hollow-drawn tubing
ARG-10425  B69-10428  02

SINS

Circuit detects errors in address currents for magnetic core arrays
H-PS-234  B65-10047  01

Improved compression molding process
LANGLEY-10227  B67-10302  03

SINTERING

Improved polybenaum disulfide-silver motor brushes have extended life
H-PS-64  B63-10047  03

New sintering process adjusts magnetic value of ferrite cores
GSFC-129  B63-10066  01

Electron beam seals outer surfaces of porous bodies
H-PS-562  B66-10033  03

Process reduces pore diameters to produce superior filters
WCO-693  B66-10307  03

Fibers of newly developed refractory ceramics produced by improved process
WOO-169  B66-10196  03

Fiber length and orientation prevent migration in fluid filters
H-PS-541  B66-10319  05

Concept for passive system to control gas flow independently of temperature
H-PS-982  B66-10343  05

Combustion chamber struts can be effectively transpiration cooled
H-PS-1830  B66-10643  03

Porous mandrels provide uniform deformations in hydrostatic powder metallurgy
H-PS-1972  B67-10209  03

Fuel cell life improved by metallic sinter activation after electrode assembly welding
MSC-10965  B67-10436  03

Electron beam selectively seals porous metal filters
LANGLEY-10162  B68-10331  05

Grain growth inhibitor for porous tungsten materials
LANGLEY-10035  B68-10527  03

Improved high-temperature silicide coatings
LANGLEY-10139  B68-10528  03

Sintering characteristics and properties of PuS and PuP are determined
ARG-10228  B69-10058  03

Electrochemical sintering process for producing electrodes from cadmium felt and a nickel or silver grid
GSFC-10764  B69-10227  05

Improved incorganic ion exchange membranes
LANGLEY-10137  B69-10266  03

Improved retort for cleaning metal powders

SUBJECT INDEX

SLUDGE

SLURRIES

SOAPS

SOAKING

Soil diffuser facilitates withdrawal of cryogenic liquids from tanks

Versatile machine mills, saws light materials

Mechanism facilitates coating of inner surfaces of metal cylinders

Tensile testing grips ensure uniform loading of bimetal tubing specimens

Global angle sensor

Adjustable wrench for electronic connectors

High-temperature bearing lubricants

Vacuum forming of thermoplastic sheet results in low-cost investment casting patterns

Vapor condensation process produces slurry of magnesium particles in liquid hydrocarbons

Storage-stable foamable polyurethane is activated by heat

Freon provides heat transfer for solid CO₂ calibration standard

Process produces chlorinated aromatic isocyanate in high yield

Valve effectively controls amount of contaminant in flow stream

Coating protects magnesium-lithium alloys against corrosion

Tungsten fiber-reinforced nickel superalloy

Hydrostatic testing of porous assemblies

Improved high-temperature silicate coatings

Study of hydrogen slush-hydrogen gel utilization

Concept for modifying drafting instruments to minimize smearing

Device spot-laps spheres to very close tolerances

Improved method facilitates debulking and curing of phenolic impregnated asbestos

A method for precision anodize stripping

Instrument calibrates low gas-rate flowmeters

Scribable coating for plastic films

Metals plated on fluorocarbon polymers

Scribable coating for plastic films

Proposed gas generation assembly would recover deeply submerged objects

Technical report on galvanic cells with fused-salt electrolytes

Separation of traces of metal ions from sodium matrices

Thermophysical properties of sodium

Zone purification of potassium chloride

Analysis of cell performance and thermal regeneration of a lithium-tin cell having an immobilized fused-salt electrolyte

New bimetallic EMF cell shows promise in direct energy conversion

Process produces chlorinated aromatic isocyanate in high yield

Study of stress corrosion in aluminum alloys

Preparation of silver-activated zinc sulfide thin films

Electromotive series established for metals used in aerospace technology

A rapid stress-corrosion test for aluminum alloys

Production of metals and compounds by radiation chemistry

Calibration of a resistance thermometer down to 0.04 degrees K

Vibration damping composition has flush-away feature

Crack detection method is safe in presence of liquid oxygen

Submicron metal powders produced by ball milling with grinding aids

Chemical milling solution produces smooth surface finish on aluminum
Sea dye marker provides visibility for 20 hours
MCC-714 B66-10313 03
Dispersion of borax in plastic is excellent fire-retardant heat insulator
ARG-5 B67-10016 03
Improved chlorate candle provides concentrated oxygen source
MSC-1137 B67-10095 03
Self-balancing line-reversal pyrometer automatically measures gas temperatures
LEWIS-348 B67-10268 01
Sodium perxenate permits rapid oxidation of manganese for easy spectrophotometric determination
ARG-262 B67-10421
Spectrophotometric technique quantitatively determines NaMBT inhibitor in ethylene glycol-water solutions
MSC-11496 B67-10573 03
Improved process for making thin-film sodium niobate capacitors
MCC-11231 B68-10163 03
Detection sensitivities in 3-8 MeV neutron activation
ARG-10270 B68-10298 02
Improved pH buffering agent for sodium hypochlorite
MSC-15443 B69-10084 03
Self-discharge in bimetallic cells containing alkali metal
ARG-3047 B69-10631 01
Pure xenon hexafluoride prepared for thermal properties studies
ARG-10056 B67-10577 03
Quantitative determination of flavin nucleotide using the bacterial bioluminescent reaction
GSFC-10565 B69-10715 04
Radioactive method enables determination of surface areas rapidly and accurately
NW-0088 B66-10710 03
Plastic scintillator converts standard photomultiplier to ultraviolet range
ERK-9 B66-10108 02
Performance of low-pressure thermionic converters is evaluated

SOLDERING
Improved variable-reluctance transducer
measures transient pressures
LANGLEY-10 B63-10321 01
Flexible honeycomb structure can bend to fit compound curves
N-PS-13 B63-10385 05
Cesium iodide crystals fused to vacuum tube faceplates
GSFC-67 B63-10476 03
Hot-air soldering technique prevents overheating of electrical components
GSFC-91 B63-10536 01
Metals plated on fluorocarbons polymers
JPL-544 B63-10612 03
Circuit reliability boosted by soldering pins of disconnect plugs to sockets
JPL-447 B64-10022 01
Modified RF coaxial connector ends vacuum chamber wiring problem
GSFC-150 B64-10010 01
Compact coaxial connector for printed circuit adds reliability
MSC-57 B64-10016 01
Molded elastomer provides compact ferrite-core holder, simplifies assembly
JPL-584 B64-10084 05
High-pass RF coaxial filter rejects dc and low frequency signals
GSFC-73 B64-10173 01
Solder flux leaves corrosion-resistant coating on metal
JPL-611 B64-10206 03
Mounting for diodes provides efficient heat sink
N-PS-197 B64-10283 01
Optical arrangement increases useful light output of semiconductor diodes
JPL-SC-064 B65-10020 05
Thermistor connector assembly increases accuracy of measurements
LANGLEY-62 B65-10045 01
Feed-through has polyterminal feature
N-PS-25 B65-10057 01
Probe tests microweld strength
W00-118 B65-10111 05
High permeability semiconductors permit close-tolerance soldering
GSFC-319 B65-10134 05
Assembly jig assures reliable solar cell modules
GSFC-455 B66-10040 05
Soldering tool heats workpieces and applies solder in one operation
LEWIS-247 B66-10115 05
Fixture aids soldering of electronic components on circuit board
ARC-56 B66-10162 01
Soldering iron temperature is automatically reduced

SUBJECT INDEX

Tool permits damage-free removal of solar cell
GSFC-467 B66-10219 05
Insert sleeve prevents tube soldering contamination
MSC-552 B66-10238 05
Modified soldering iron speeds cutting of synthetic materials
N-PS-725 B66-10246 05
Copper wire plated with nickel and silver resists corrosion
N-PS-761 B66-10421 03
Substituting gold for silver improves electrical connections
N-PS-2390 B67-10228 03
Polarized light reveals stress in machined laminated plastics
LEWIS-10016 B67-10383 03
Composite solar cell matrix is reliable, lightweight and flexible
NPO-10821 B67-10503 01
Thermal resistances of solder-boss/potting compound combinations
MSC-12074 B66-10157 01
Miniature pressure transducer for stressed member application
MSC-11865 B66-10246 01
Inspection criteria ensure quality control of parallel gap soldering
N-PS-14530 B66-10257 05
Standards for compatibility of printed circuit and component lead materials
N-PS-14531 B66-10310 01
Fixture facilitates soldering operations
N-PS-14456 B66-10573 05
Imprinting of confining sites for cell cultures on thermoplastic substrates
LANGLEY-10495 B66-10236 04
Novel terminal strips for transformers
NPO-10842 B66-10246 01
Welding, brazing, and soldering handbook
N-PS-20504 B66-10264 05

SOLDER
Modular thermoelectric cell is easily packaged in various arrays
GSFC-339 B65-10199 01
Telescoping of instrumentation tubing eliminates swaging
N-PS-546 B66-10116 05
Brass alloys used as temperature indicators
NU-0063 B66-10274 01
Solubility data are compiled for metals in liquid zinc
ARG-149 B67-10191 03
Device for reflowing electrodeposited solder on terminals
N-PS-13821 B66-10670 01

SOLENOID VALVES
Circuit exhibits power efficiency greater than 75 percent
MSC-254 B66-10034 01
High-pressure, low temperature electrical connector makes no-leak seal
MSC-276 B66-10079 02
Radioactive tracer system detects oil contaminants in fluid lines
SUBJECT INDEX

System proportions fluid-flow in response to demand signals
GSPC-457  B66-10094  01

Economical and maintenance-free gas system operates railroad switches
W0-0045  B66-10124  05

Flow ring valve is simple, quick-acting
N-FS-752  B66-10255  05

Modified hydraulic braking system limits angular deceleration to safe values
GSPC-476  B66-10310  05

Automatic protective vent has fail-safe feature
LANGLEY-218  B66-10369  05

Monitoring circuit accurately measures movement of solenoid valve
M-FS-1829  B66-10568  01

Cryogenic fluid sampling device permits testing under hazardous conditions
M-FS-1927  B66-10654  02

Variable-pulse switching circuit accurately controls solenoid-valve actuations
M-FS-1895  B67-10022  01

High speed blowdown system provides rapid pressure loss
LEWIS-375  B67-10043  05

Solenoid valve design has one moving part
WPO-10039  B67-10219  05

Dual photochemical replenisher system reduces chemical losses
KSC-67-111  B67-10485  02

Automatic transducer switching provides accurate wide range measurement of pressure differential
MSC-1001  B67-10540  01

Continuous microbial cultures maintained by electronically-controlled device
ARG-177  B67-10556  04

Test system accurately determines tensile properties of irradiated metals at cryogenic temperatures
NUC-10521  B67-10617  02

Environmental control system for cryogenic testing of tensile specimens
NUC-10523  B67-10618  02

Fire extinguisher control system provides reliable cold weather operation
M-FS-13031  B67-10622  05

Ferromagnetic core valve gives rapid action on minimum energy
LEWIS-10135  B67-10623  05

Solenoid hammer valve developed for quick-opening requirements
LEWIS-10134  B67-10639  05

Solenoid valve design minimizes vibration and sliding wear problem
M-FS-14079  B67-10667  05

Calibratable solid-state pressure switch
M-FS-20474  B67-10437  05

SOLENOMDS

Solenoid permits remote control of stop watch and assures restarting
FRC-17  B63-10024  01

Stepping switch with simple actuator provides many contacts in small space
JFL-122  B63-10118  01

Electromechanically operated camera shutter provides uniform exposure
JPL-357  B63-10227  01

Camera shutter is actuated by electric signal
ARC-20  B63-10560  05

Improved magnetometer uses toroidal gating coil
GSPC-249  B65-10103  01

System measures unidirectional forces, excludes extraneous forces
LEWIS-170  B65-10154  05

Device disconnects several couplings simultaneously
JPL-226  B65-10163  05

Force controlled solenoid drives microweld tester
W00-125  B65-10182  01

Gapped toroid provides infinite resolution of delay-line pickup
GSPC-370  B65-10258  01

Multiple test chamber exposes materials to various environments
MSC-179  B65-10268  01

Optical output enhances flowmeter accuracy
M-FS-882  B65-10395  02

Pneumatic binary encoder replaces multiple solenoid system
M-FS-665  B66-10374  01

Solenoid magnetic fields calculated from superposed semi-infinite solenoids
LEWIS-184  B66-10490  01

A continuously operating source of vacuum ultraviolet below 500 angstrom
GSPC-545  B66-10576  01

Power arc welder touch-started with consumable electrode
M-FS-1485  B66-10641  05

Fuel and oxidizer valve assembly employs single solenoid actuator
MSC-1046  B66-10648  05

Simple technique determines ac properties of hard superconductive materials
M-FS-1918  B66-10657  02

Logic circuitry used to automatically test shielded cables
HQ-60  B66-10659  01

Residual magnetism holds solenoid armature in desired position
LEWIS-343  B67-10038  01

Simple pump maintains liquid helium level in cryostat
M-FS-1763  B67-10039  05

High-torque power wrench, a concept
M-FS-18194  B68-10299  05

High-speed pulse camera
MSC-13453  B68-10329  02

Temperature or pressure controller
LEWIS-10297  B68-10337  01

Propagation of density disturbances in high-speed air-water flow
ARS-10260  B69-10043  02

Continuous analysis of nitrogen dioxide in gas streams of plants
ARG-1026  B69-10254  03

Separation simulator
KSC-67-15  B69-10315  01

X-607
SOLID LUBRICANTS

Automatic filter-blowback systems used with sintered-metal filters
ABG-10324 B69-10342 05

Testing the flammability of materials exposed to arcs
MSC-15225 B69-10531 03

Improved solenoid valve design
GSFC-10607 B69-10704 05

SOLID LUBRICANTS

Fluoride coatings make effective lubricants in molten sodium environment
LEWIS-229 B66-10005 03

Friction device damps linear motion of rotating shaft
WOO-214 B66-10030 05

Polytetrafluoroethylene lubricates ball bearings in vacuum environment
H-PS-379 B66-10081 03

Solid-film lubricant is effective at high temperatures in vacuum
LEWIS-228 B66-10087 03

Dry film lubricant is effective at extreme loads
H-PS-628 B66-10256 03

Composites of porous metal and solid lubricants increase bearing life
LEWIS-307 B67-10007 03

Environmental study of miniature slip rings
H-PS-2443 B67-10210 05

Development of lunar drill to take core samples to 100-foot depths
H-PS-13016 B67-10529 05

Bearings use dry self-lubricating cage materials
LEWIS-10432 B68-10165 05

Application of the solid lubricant molybdenum disulfide by sputtering
LEWIS-10544 B68-10340 03

Evaluation of lubricants for ball bearings at high temperatures
LEWIS-10578 B69-10025 03

Self-lubricating gear
H-PS-10971 B69-10408 05

SOLID PHASES

Solubility data are compiled for metals in liquid zinc
ARG-149 B67-10191 03

SOLID PROPELLANT ROCKET ENGINES

Study of vortex valve for medium temperature solid propellants
LANGLEY-204 B66-10524 01

Cold solid propellant motor has stop-restart capability
JPL-836 B66-10673 03

SOLID SOLUTIONS

Brass method produces solid-solution bond between refractory metals
LEWIS-212 B65-10370 05

Brass alloy holds bonding strength over wide temperature range
LEWIS-337 B66-10519 03

New tungsten alloy has high strength at elevated temperatures
LEWIS-336 B66-10551 03

Tantalum alloys resist creep deformation at elevated temperatures
LEWIS-350 B66-10558 03

Study of actinide chemistry in saturated potassium fluoride solution
ARG-10204 B69-10004 03

Flow properties of suspensions rich in solids
ARG-10481 B69-10622 02

Thoriated nickel bonded by solid-state diffusion method
LAUGLEY-115 B65-10220 03

Primary cells utilize halogen-organic charge transfer complex
JPL-926 B66-10682 02

Electronic aperture control devised for solid state imaging system
H-PS-12426 B66-10028 01

Testing the flammability of materials exposed to arcs
HSC-15225 B69-10531 03

Plow properties of suspensions rich in solids
HSC-15225 B69-10622 03

Improved solenoid valve design
GSFC-10607 B69-10704 05

SOLID STATE

Friction device damps linear motion of rotating shaft
WOO-214 B66-10030 05

Electronic aperture control devised for solid state imaging system
I-FS-12426 B68-10028 03

Polytetrafluoroethylene lubricates ball bearings in vacuum environment
LEWIS-228 B66-10087 03

Welding, brazing, and soldering handbook
I-FS-20504 B66-10081 03

Hetallic diffusion measured by a modified Knudsen technique
BQ-10145 B66-10309 03

Composites of porous metal and solid lubricants increase bearing life
LEWIS-307 B67-10007 03

High efficient square-wave oscillator operator at high power levels
GSFC-112 B69-10554 01

Digital cardiometer computes and displays heartbeat rate
MSC-93 B69-10258 01

Logarithmic amplifier uses field effect transistors
JPL-509 B65-10145 01

Analog-to-digital converter has increased reliability and reduced power consumption
GSFC-246 B65-10194 01

Tiny biomedical amplifier combines high performance, low power drain
ARC-81 B65-10203 01

Thin-film resistors used in functional electronic blocks
GSFC-380 B66-10305 01

Electronic meter-hour integrator is accurate to one percent
GSFC-203 B65-10308 01

Threshold detector produces narrow pulses at high repetition rates
GSFC-383 B65-10310 01

Hybrid circuit achieves pulse regeneration with low power drain
GSFC-382 B65-10314 01

Instrument performs nondestructive chemical analysis, data can be telemetered
JPL-SC-278 B65-10317 01

Ring counter circuit switches multiphase motor direction of rotation
JPL-SC-166 B66-10101 01

Optical gyro pickup operates at cryogenic temperatures
H-PS-407 B66-10128 01

Solid state thermostat has integral probe and circuitry
H-PS-434 B66-10193 01

Circuit provides accurate four-quadrant multiplication
WOO-272 B66-10331 02
Solid-state switch increases switching speed
WGO-298 B66-10430 01

Single-sideband modulator accurately
reproduces phase information in 2-8c signals
M-FS-1264 B66-10347 01

Instrument automatically selects peak
acceleration signal from several
cellocosimeters
JPL-616 B66-10462 01

Solid state circuit switches ac load
JPL-798 B66-10465 01

Solid state circuit controls direction, speed,
and braking of dc motor
JPL-757 B66-10486 01

Solid state annunciator facilitates complex
system troubleshooting
M-FS-1258 B66-10505 01

A fast-neutron spectrometer of advanced
design
M-FS-1664 B66-10555 01

Miniature telemetry system accurately
measures pressure
ARC-74 B66-10624 01

Solid-state recoverable fuse functions as
circuit breaker
GSFC-560 B66-10691 01

Variable-pulse switching circuit accurately
controls solenoid-valve actuations
M-FS-1895 B67-10022 01

Solid-state time-to-pulse-height converter
developed
ARC-170 B67-10053 01

Hybrid solid state switch replaces motor-
driven power switch
JPL-931 B67-10165 01

Low speed, long term tracking electric
drive system has zero backlash
WFO-10173 B67-10220 01

Laboratory pulse modulator uses minority
carrier storage diodes
M-FS-2462 B67-10226 01

Solid state circuit averages multiple signals
and rejects those varying significantly
from the average
ASC-10066 B67-10262 01

Primary cell uses neither liquid nor fused
electrolytes
WFO-10061 B67-10275 01

Solid state single-ended switching
dc-to-dc converter
M-FS-13598 B67-10558 01

Solid state zero-bias bilateral switch
GSFC-532 B67-10559 01

Teleprinter uses thermal printing technique
MSC-11327 B67-10572 01

Cardiotachometer with linear beat-to-beat
frequency response
ARC-10033 B67-10598 01

Concept for sleeve induction motor with
7-msec mechanical time constant
ARG-10124 B68-10185 01

Solid state high-voltage pulser operates
with low supply voltage
M-FS-14034 B68-10308 01

Temperature or pressure controller
LEWIS-10297 B68-10337 01

A 35 GHz solid state transmitter/driver
M-FS-20152 B68-10545 01

Isolated, multiple-output voltage dc-to-dc
converter
M-FS-14976 B69-10014 01

Linear-log counting-rate meter uses
transconductance characteristics of a
silicon planar transistor
ARG-10158 B69-10191 01

Radiation tolerant silicon nitride insulated
gate field effect transistors
GSFC-10581 B69-10253 01

Semiautomatic inspection of microfilm
records
M-FS-20240 B69-10301 02

Foot-operated cell-counter
ARG-10315 01

Improved dc voltage regulator
IXS-06467 B69-10369 01

Technique for improving solid state
mosaic images
M-FS-20532 B69-10676 01

SOLID STATE LASERS
Solid-state laser transmitter is amplitude
modulated
MSC-121 B65-10238 01

SOLID SURFACES
Electron beam seals outer surfaces of porous
bodies
WFO-562 B66-10033 03

Surface profilometer for examining
grain-boundary grooves
ARG-10290 01

Colloidal suspension simulates linear
dynamic pressure profile
WGO-266 B66-10214 05

Standards for electron probe microanalysis of
silicates prepared by convenient method
GSFC-469 B66-10234 03

Flow properties of suspensions rich in
solids
ARG-10481 B69-10622 02

SOLIDIFICATION
Single-crystal semiconductor films grown on
foreign substrates
WGO-076 B66-10225 01

Study made of ductility limitations of
aluminum-silicon alloys
M-FS-12524 B67-10392 01

Nickel-base superalloys excellent
properties promote its service to 2200
degrees F
LEWIS-10355 B68-10380 01

Levitation-melting technique for metals
and alloys
ARG-10240 B69-10006 01

Improved high-temperature-strength
nickel-base superalloy
LEWIS-10874 B69-10352 03

SOLIDIFIED GASES
Development of dual solid cryogens for
high reliability refrigeration system
GSFC-10188 B67-10644 02

SOLIDS
Computer program calculates steady-state
temperature distribution within plane or
axisymmetric solids
NGC-10049 B67-10224 01
Computer program ICAP-TOSS calculates steady-state fluid dynamics of coolant in parallel channels and temperature distribution in surrounding heat-generating solid
NUC-10042 B67-10056 06

Computer program ICAP provides for steady-state thermal and flow analysis of multiple parallel channels in heat generating solid
NUC-10043 B67-10457 06

Bi-metal sensor averages temperature of non-uniform profile
LEWIS-10362 B66-10007 01

Thermal conductivity and dielectric constant of silicate materials
I-FS-14856 B66-10351 03

A new solid lubricant
LERIS-10812 B66-10250 03

Spiral-flow apparatus for measuring permeation of solids by gases
I-FS-16517 B66-10357 03

Self-sealing closure enables access to several fluid containers
NFO-19123 B67-10207 04

Trace hydrazines in aqueous solutions accurately determined by gas chromatography
MSC-11222 B67-10290 03

Sensitive bridge circuit measures conductance of low-conductivity electrolyte solutions
ARG-197 B67-10298 01

Chemical milling solution reveals stress corrosion cracks in titanium alloy
LARGLEST-10077 B67-10322 03

Large volume continuous counterflow dialyzer has high efficiency
H0-10055 B67-10395 04

Study of stress corrosion in aluminum alloys
M-FS-13906 B67-10533 03

Electromotive series established for metals used in aerospace technology
M-FS-18327 B68-10385 03

Primary radical yields in pulse irradiated alkaline aqueous solution
ARG-10322 B69-10167 02

Method for copper staining of germanium crystals
ARG-10403 B69-10257 03

A method for precision anodize stripping
MSC-15040 B69-10581 03

SOLVENTS

Solution of differential equations by application of transformation groups
I-FS-14802 B68-10276 02

SOLUTIONS

Solubility data are compiled for metals in liquid zinc
ARG-149 B67-10191 03

Electrolytic separation of crystals of transition metal oxides
ABG-10506 B66-10642 03

SOLUBLE

Silver-palladium braze alloy recovered from masking materials
M-FS-1845 B66-10631 03

SOLVENTS

Method of welding joint in closed vessel improves quality of seam
JPL-190 B63-10139 05

Fine-mesh screen made by simplified method
WGC-194 B64-10282 03

Modification increases light output of injection-luminescent diodes
I-FS-192 B65-10006 01

Miniature bearings lubricated by sonic dispersion method
M-FS-202 B65-10106 03

Soluble undercoating facilitates removal of foamed-in-place insulation
LEWIS-193 B65-10344 03

Surfactant for dye-penetrant inspection is insensitive to liquid oxygen
M-FS-875 B66-10131 03

Solvent residue content measured by light scattering technique
M-FS-850 B66-10320 01

Sprayable birefringent coating enables strain measurements on large surfaces
M-FS-1484 B66-10578 03

Use of steel and tantalum apparatus for molten Cd-Mg-Zn alloys
ARG-199 B66-10594 03

Degreasing of titanium to minimize stress corrosion
LEWIS-382 B67-10147 03

Liquid oxygen dictating cleaned by falling film method
M-FS-11016 B67-10299 03
SUBJECT INDEX

Adhesives for laminating polyimide insulated flat conductor cable
I-FS-12066  B67-10429  03

Solvent permits solid curing agents to be used at room temperatures
I-FS-13434  B67-10593  03

Effects of surface preparation on quality of aluminum alloy weldments
I-FS-13152  B68-10302  03

Welded repairs of punctured thin-walled aluminum pressure vessels
I-FS-18836  B68-10501  05

Induction probe determines levels of liquid metals.
ARG-10245  B69-10256  03

Apparatus automatically measures soluble residue content of volatile solvents
SAB-10032  B69-10292  03

Coordination chemistry in fused-salt solutions
ARG-10465  B69-10423  03

Freon, T-B1 cutting fluid
MSC-11466  B69-10465  05

Technique for ultrasonic cleaning with volatile solvents eliminates need for hoods or condensers
MSC-15611  B69-10552  03

SONAR
System locates randomly placed remote objects
LANGLEY-209  B66-10315  01

SONIC BOOMS
Computer program calculates sonic-boom pressure signatures
LANGLEY-10096  B69-10489  06

Sonic boom propagation in stratified atmosphere
LANGLEY-10480  B69-10391  06

SORPTION
Comparative chromatography of chloroplast pigment
ARG-10645  B69-10425  03

SOUND AMPLIFICATION
Noise figure measurement concept for acoustic amplifiers
GSFC-10066  B68-10272  01

Power consumption in acoustic amplifiers under conditions of maximum stable gain
GSFC-10067  B68-10327  01

SOUND FIELDS
Study made of interaction between sound fields and structural vibrations
EQ-26  B67-10068  02

SOUND GENERATORS
Device detects unbonded areas in plastic laminates
NFO-206  B65-10380  01

System enables more complete calibrations of dynamic-pressure transducers
I-FS-2063  B67-10099  01

SOUND INTENSITY
Device enables calibration of microphones at high sound pressure levels
I-FS-11690  B67-10336  01

SOUND PRESSURE
Electronic dummy for acoustical testing
MSC-206  B67-10298  01

SOUND TRANSMISSION
Flow tube used to cool solar-pumped laser
I-FS-14296  B68-10033  06

SPACE EXPLORATION

MSC-11026  E66-10010  02

SOUND WAVES
Small foamed polystyrene shield protects low-frequency microphones from wind noise
I-FS-123  B66-10579  01

Ultrasonic emission method enables testing of adhesive bonds
I-FS-799  B66-10341  01

Study of random process theory aids digital data processing
I-FS-1475  B67-10309  06

Noise study of single stage compressor rotor-stator interaction
LANGLEY-137  B67-10516  02

Acoustic wave analysis
I-FS-18076  B68-10265  02

An ultrasonic method for studying elastic moduli as a function of temperature
ARG-10167  B65-10082  02

Experimental design for research on shock-turbulence interaction
I-FS-2093  B69-10604  02

SOUNDING
Tracker of electrical conduit or pipes
MSC-15223  B69-10347  01

SOUNDING ROCKETS
Rocket sonde measurements of ozone in the upper atmosphere
GSC-10580  B66-10077  02

SOURCES
Circuit detects errors in address currents for magnetic core arrays
I-FS-233  B66-10047  01

SPACE CHARGE
Potassium plasma cell facilitates thersonic energy conversion process
ARG-10010  B67-10399  01

Thin film thermal detector
JEL-943  B67-10505  01

SPACE COMMUNICATION
Personal communication system combines high performance with miniaturization
MSC-720  B67-10119  01

Deep space FM system, a concept
MSC-11825  B68-10289  01

A positive taper traveling-wave tube
LANGLEY-10263  B69-10407  01

Estimation of signal-to-noise ratios
XRF-05254  B69-10557  01

SPACE DETECTION AND TRACKING SYSTEM
An investigation of phase-lock loop swept-frequency synchronization
I-FS-656  B66-10423  01

SPACE ENVIRONMENT SIMULATION
Mechanical properties of wire insulation automatically determined
MSC-10963  B67-10370  01

Concept for cryogenic liquid reclamation system
NFO-10322  B68-10420  02

SPACE EXPLORATION
Solid-state switching used to speed up capacitive integrator
LANGLEY-104  B65-10159  01

Computer program for interplanetary conic patching
I-FS-14296  B68-10033  06
SPACE FLIGHT
Advanced mission analysis programs
GSPC-10575

SPACE FLIGHT FEEDING
Food products for space applications
MSC-11697

SPACE MECHANICS
Channel-wall limitations in the magnetohydrodynamic induction generator
ARG-10128

SPACE MISSIONS
Conceptual nonorthogonal gyro configuration for guidance and navigation
MSC-11363

SPACE NAVIGATION
Special purpose reflectometer uses modified ultraviolet sphere
MSC-1135

SPACE MOBILIZATION
Hydrogen maser as a highly stable frequency reference
N-PS-2437

SPACE PERCEPTION
Instrument transmits vanishing point to illustration point
MSC-267A

SPACE PHOTONS
Space trajectories program for IBM 7090
NPO-10125

SPACE PROGRAMS
Studies of cycles for liquid-metal magnetohydrodynamic generation of power
ARG-10250

SPACE RATINGS
Food products for space applications
MSC-11697

SPACE SIMULATORS
Star/horizon simulator used to test space guidance system
MSC-407

SPACE STATIONS
Study of dynamic response of elastic space stations
NPO-10124

SPACE STORAGE
One-dimensional reacting gas nonequilibrium performance program
MSC-11777

SPACE SUITS
Flexible fastener effects airtight material closure
JPL-684

SUBJECT INDEX
Integrated mobility measurement and notation
system
MSC-726

Personal communication system combines high performance with miniaturization
MSC-720

Astronaut space suit communication antenna
MSC-12101

SPACE TOOLS
Electrical cable connector-clamp has smooth exterior surface
MSC-154

High-strength tungsten alloy with improved ductility
LEWIS-10257

SPACE VEHICLE CHECKOUT PROGRAM
Automatic telemetry checkout system
N-PS-12580

SPACECRAFT
High purity electroforming yields superior metal models
ARC-6

Ultra-sensitive transducer advances micro-measurement range
ARC-26

Control of component differential hardness increases bearing life
LEWIS-190

Plastic bags in evacuated chamber make lightweight gas sampling system
FRC-31

Special coatings control temperature of structures
MSC-948

Sensors measure surface ablation rate of reentry vehicle heat shield
LANGLEY-287

Crystal microbalance measures condensable molecular fluxes
JPL-945

Advances in light-gas gun technology
N-PS-14270

Study of optimum discrete estimators in measurement analysis
N-PS-14915

Advances in aluminum anodizing
N-PS-14600

Four-bar linkage for thermal compensation in test mounts for structures
NPO-11059

Automatic star-horizon angle measurement system
MSC-11585

SPACECRAFT ANTENNAS
Sheet metal strip unrolls to form circular boom
GSPC-423

SPACECRAFT CABINs
Mechanical properties of wire insulation automatically determined
MSC-10983

SPACECRAFT COMMUNICATION
Parametric up-converter increases flexibility of maser
MSC-67-98

Hydrogen maser as a highly stable frequency reference
N-PS-2437

I-612
SUBJECT INDEX

SPACERIGHT CRAFT COMPONENTS

Development of dual solid cryogens for high reliability refrigeration system
GSFC-10188 B67-10644 02

Improved phase-shift-keyed detector
M-FS-20064 B69-10101 01

SPACERIGHT CRAFT CONFIGURATIONS

Improved sensor counts micrometeoroid penetrations
LEWIS-76 E63-10443 01

Apparatus alters position of objects to facilitate demagnetization
GSFC-238 B64-10277 05

Titanium treatment improves brazed joints
MSC-127 B65-10153 05

Computer program uses Monte Carlo techniques for statistical system performance analysis
M-FS-2234 E67-10306 06

Tube swaging device uses explosive force
LANLEY-10092 B68-10235 05

IR lookangle program
MSC-13179 B69-10370 06

SPACERIGHT CRAFT CONSTRUCTION MATERIALS

Investigation of spacecraft coatings
M-FS-20458 B69-10181 06

Replacement of fluid-filter elements without interruption of flow
MSC-15690 B69-10245 05

Improved high-temperature silicide coatings
LEWIS-10617 B69-10266 03

Handbook for design of containers of fluids and gases for spacecraft
M-FS-20502 B69-10279 05

SPACERIGHT CRAFT CONTROL

Knob linkage permits one-hand control of several operations
MSC-30 B65-10022 05

Plated nickel wire mesh makes superior catalyst bed
MSC-216 B65-10321 03

A nodal combination computer program for dynamic analysis of structures
NPO-10129 B67-10217 06

Control jet placement on spacecraft
MSC-1365 B69-10671 01

SPACERIGHT CRAFT DESIGN

Technique for measuring magnetic tape interlayer adhesion
NFO-10031 B67-10417 03

A new method for fabrication of flexible vacuum purge jackets
M-FS-12646 B69-10564 03

SPACERIGHT CRAFT DOCKING

Visual attitude orientation and alignment system
MSC-647 B67-10120 02

Fuel transfer system permits rapid coupling
M-FS-91326 B68-10039 05

SPACERIGHT CRAFT ELECTRONIC EQUIPMENT

Modular Porous Plate Sublimator /NPS/ requires only water supply for coolant
M-FS-1374 E66-10409 01

Evaluation of high temperature stranded hookup wire
M-FS-2478 B67-10122 03

Hybrid solid state switch replaces motor-driven power switch
JPL-931 B67-10165 01

Beta-estremic conformal coating for electronic components
GSFC-10007 B67-10599 03

Gas radiation characteristics of plutonium dioxide
NPO-11220 B69-10733 02

SPACERIGHT CRAFT ENVIRONMENTS

Liquid switch is remotely operated by low dc voltage
GSFC-119 B63-10599 01

Phonocardiograph system monitors heart sounds
MSC-185 B66-10154 04

Method for X-ray study under extreme temperature and pressure conditions
MSC-11232 B67-10474 02

Food products for space applications
MSC-11697 B68-10324 04

Relic recorder
GSFC-10614 B69-10340 01

Spacecraft Thermal Radiation Environment Computer Program
M-FS-15054 B69-10574 06

SPACERIGHT CRAFT GUIDANCE

Star/horizon simulator used to test space guidance system
MSC-467 B67-10110 02

Hydrogen maser as a highly stable frequency reference
M-FS-2437 B67-10146 01

Study indicates fluid digital computation systems are feasible
M-FS-520 B67-10181 01

Advanced mission analysis programs
GSFC-10575 B69-10171 06

SPACERIGHT CRAFT INSTRUMENTS

Rectilinear display gives acceleration load factor and velocity information
MSC-1045 B67-10248 01

IR vidicon scanner monitors many test points
M-FS-1937 B67-10277 01

Improved calorimeter provides accurate thermal measurements of space batteries
GSFC-10003A B67-10615 01

SPACERIGHT CRAFT LANDING

Break-up of metal tube makes one-time shock absorber, bars rebound
LANLEY-1A B63-10304 05

Kinetic-energy absorber employs frictional force between mating cylinders
LEWIS-75 B63-10442 05

Land landing couch dynamics computer program
MSC-1270 B67-10233 06

A sterilizable high-impact antenna
NPO-10231 B69-10697 01

SPACERIGHT CRAFT LUBRICATION

Unique gear design provides self-lubrication
JPL-SC-075 B65-10366 03

SPACERIGHT CRAFT MAINTENANCE

Stable ac phase and amplitude comparator
M-FS-13086 B67-10459 01

I-613
SPACER CRAFT MODELS

Midcourse maneuver operations program
NPO-10735 B69-10105 06

SPACER CRAFT MODELS
High-torque precision stepping drive
N-PS-14772 B68-10549 05

SPACER CRAFT ORBITS
Oceanborne transponder platform has good stability
N-PS-177 B65-10035 05

Sextant measures spacecraft altitude without gravitational reference
MSC-200 B66-10143 02

Computer program determines thermal environment and temperature history of lunar orbiting space vehicles
N-PS-12916 B67-10307 06

SPACER CRAFT POSITION INDICATORS
Improved electro-optical tracking system
N-PS-14791 B68-10311 01

SPACER CRAFT POWER SUPPLIES
Modular Porous Plate Sublimator /MPPS/
requires only water supply for coolant
N-PS-1374 B66-10409 01

Zinc-oxygen primary cell yields high energy density
N-PS-14661 B68-10218 01

Spiral-grooved shaft seals substantially reduce leakage and wear
LEWIS-10397 B68-10270 05

SPACER CRAFT PROPULSION
Segmented electrode increases operating pressure of MHD accelerator
LANGLEY-95 B65-10356 02

High temperature alloy
LEWIS-10377 B68-10253 03

SPACER CRAFT RADIAIORS
A design procedure for the weight optimization of straight finned radiators
GSFC-547 B66-10610 05

SPACER CRAFT RECOVERY
Threading hook facilitates safe recovery of heavy loads
MSC-46 B64-10185 05

System locates randomly placed remote objects
LANGLEY-209 B66-10315 01

SPACER CRAFT RELIABILITY
New method for critical failure prediction of complex systems
N-PS-14133 B68-10252 02

SPACER CRAFT SHIELDING
Fire retardant foams developed to suppress fuel fires
ARC-10096 B68-10358 03

SPACER CRAFT STABILITY
Land landing couch dynamics computer program
MSC-1210 B67-10233 06

Electronic analog equalization for vibrational testing
NPO-10544 B69-10472 01

SPACER CRAFT STERILIZATION
SPAN C - Terminal sterilization process
analysis program
NPO-10805 B69-10039 06

SPAN - Terminal sterilization process
analysis program
NPO-10804 B69-10104 06

Sterilization training manual
N-PS-20437 B69-10277 04

SUBJECT INDEX

Microbiological aspects of sterilization development laboratories
NPO-11197 B69-10593 04

SPACER CRAFT STRUCTURES
Automatic fluid separator supplies own driving power
WGO-085 B66-10008 02

System automatically provides dynamic launch decision criteria
NPS-13063 B67-10363 01

Computer program provides improved longitudinal response analysis for axisymmetric launch vehicles
LANGLEY-10093 B67-10531 06

SPACER CRAFT TELEVISION
Computer program for Video Data Processing System /VDPs/
NPO-10042 B67-10630 06

Isolated, multiple-output voltage dc-to-ac converter
N-PS-14976 B69-10014 01

SPACER CRAFT TRACKING
Oceanborne transponder platform has good stability
N-PS-171 B65-10035 05

Frequency offset in linear FM/CW transponder eliminates clutter
N-PS-249 B65-10146 01

Hydrogen maser as a highly stable frequency reference
N-PS-2437 B67-10146 01

Low speed, long term tracking electric drive system has zero backlash
NPO-10173 B67-10220 01

Communication system features dual mode range acquisition plus time delay measurement
NPS-1423 B68-10306 01

ABBAJ on-site tracking prediction program
NPO-10836 B69-10103 06

Midcourse maneuver operations program
NPO-10735 B69-10105 06

SPACER CRAFT TRAJECTORIES
Internal velocity factors
MSC-15002 B68-10403 06

Midcourse maneuver operations program
NPO-10735 B69-10105 06

Combination ranging system and mapping radar
NPO-11001 B69-10325 01

Fast Fourier Transform Spectral Analysis Program
N-PS-15062 B69-10434 06

SPACER CRAFT THERMAL
Thermally conductive metal wool-silicone rubber material can be used as shock and vibration damper
JPL-321 B63-10207 03

Modular thermoelectric cell is easily packaged in various arrays
GSFC-339 B65-10199 01

Electropneumatic rheostat regulates high current
ARC-44 B65-10299 01

Insulator-holder protects transistors in dense electronic assemblies
MSC-214 B65-10389 01

I-619
Inert gas spraying device aids in repair of hazardous systems

Bidirectional torque filter eliminates backlash

Lead oxide ceramic makes excellent high-temperature lubricant

Extenedible column can be stowed on drum

Spray-on electrodes enable EKG monitoring of physically active subjects

Discrimination of fish oil and mineral oil slicks on sea water

Solenoid permits remote control of stop watch and assures restarting

New package for Belleville spring permits rate change, easy disassembly

Leaf-spring suspension provides accurate parallel displacements

Collapsible truss structure is automatically expandable

Cylindrical claw clamp has quick release feature

Lathe chuck key incorporates safety feature

Seal surfaces protected during assembly

Device facilitates centering of workpieces in lathe chuck

Subject Index

Extended column can be stowed on drum

OXYGEN-HYDROGEN TORCH IS A SMALL-SCALE STEAM GENERATOR

IMPROVED SYSTEM MEASURES OUTPUT ENERGY OF PYROTECHNIC DEVICES

GALLIUM ALLOY FILMS INVESTIGATED FOR USE AS BOUNDARY LUBRICANTS

MULTISURFACE FIXTURE PERMITS EASY GRINDING OF TOOL HOLE ANGLES

WIDE-RANGE INSTRUMENT MONITORS FLOW RATES OF CHEMICALLY ACTIVE FLUIDS

SOFT-SEAL VALVE HOLDS HAZARDOUS FLUIDS SAFELY

SUBMICRON METAL POWDERS PRODUCED BY BALL MILLING WITH GRINDING AIDS

ELECTRIC ARC HEATER IS SELF STARTING

MODIFIED SOLDERING IRON SPEEDS CUTTING OF SYNTHETIC MATERIALS

PRESSURE-WELDED FLANGE ASSEMBLY PROVIDES LEAKTIGHT SEAL AT REDUCED BOLT LOADS

DIFFERENTIAL EXPANSION PROVIDES PRESSURE FOR DIFFUSION BONDING OF LARGE DIAMETER RINGS

ELECTROLYTIC ETCHING PROCESS PRODUCES EFFECTIVE BONDING SURFACE ON STAINLESS STEEL

SYSTEM LOCATES RANDOMLY PLACED REMOTE OBJECTS

FIBER LENGTH AND ORIENTATION PREVENT MIGRATION IN FLUID FILTERS

BIMETALLIC DEVICES HELP MAINTAIN CONSTANT SEALING FORCES DOWN TO CRYOGENIC TEMPERATURES

INSPECTION OF FINE WIRES SIMPLIFIED BY CAPILLARY TUBE WIRE HOLDER

NONHARMONIC ACID ETCHES WELD SAMPLES

ELECTROLESS NICKEL PLATING ON STAINLESS STEELS AND ALUMINUM

BRAZING PROCESS PROVIDES HIGH-STRENGTH Bonds BETWEEN ALUMINUM AND STAINLESS STEEL

ELECTROCHEMICAL MILLING REMOVES BURRS AND SOLDER FROM TUBING ENDS

NONHARMONIC ACID ETCHES WELD SAMPLES

ELECTROLESS NICKEL PLATING ON STAINLESS STEELS AND ALUMINUM

BRAZING PROCESS PROVIDES HIGH-STRENGTH BONDS BETWEEN ALUMINUM AND STAINLESS STEEL

ELECTROCHEMICAL MILLING REMOVES BURRS AND SOLDER FROM TUBING ENDS

SUBMICRON METAL POWDERS PRODUCED BY BALL MILLING WITH GRINDING AIDS

I-625
Possible correlation between work-hardening and fatigue-failure

Placed-tube fittings with replaceable seat inserts

Liquid oxygen-compatible insulation system

Explosive bonding of metal-matrix composites

Vacuum forming of thermoplastic sheet results in low-cost investment casting patterns

Computer program reduces calculation time of normal response functions

Estimation of signal-to-noise ratios

Electrometer has automatic zero bias control

Standards for electron probe microanalysis of silicates prepared by convenient method

Structural Analysis and Matrix Interpretive System / SAMIS /

Multiple port pressure scanner valve features greater accuracy, quicker data

Analytical technique characterizes all trace contaminants in water

Checking flat conductor cable spacing by means of a moire pattern

System converts slow-scan TV signals

Improved ultrasonic TV images achieved by use of Lamb-wave orientation technique

Electronic shutter gates image orthicon on and off

Instrument quickly transposes ground reference target to eye level

Point-source light sensor circuit is insensitive to background light

Special purpose reflectometer uses iodine

### SUBJECT INDEX

#### STATIC LOADS
- Lightweight load support serves as vibration damper
  - JPL-661 865-10144 05
- Refractory oxides evaluated for high-temperature use
  - LANGLY-121 865-10167 03
- Pressure responsive seal handles static and dynamic loads
  - GSFC-4N1 865-10327 05
- Mechanism continuously measures static and dynamic cable loads
  - NSC-217 866-10107 05

#### STATIC PRESSURE
- Averaging probe reduces static-pressure sensing errors
  - LANGLY-36 865-10114 05
- Computer program determines gas flow rates in piping systems
  - N-PS-6N3 866-10300 01
- Combination spacer and gasket provides effective static seal
  - N-PS-1397 866-10485 05
- Pressure probe compensates for dimensional tolerance variations
  - LWIS-302 869-10599 01

#### STATIC TESTS
- Materials physically tested in variable-environment chamber
  - JPL-789 866-10130 01
- Effects of high frequency current in welding aluminum alloy 6061
  - N-PS-18337 868-10383 05

#### STATICS
- Static seal concept to accommodate seat tolerances
  - N-PS-4854 867-10285 05
- Cryogenic seal concept for static and dynamic conditions
  - N-PS-12986 867-10673 05

#### STATISTICAL ANALYSIS
- Computer program performs statistical analysis for random processes
  - N-PS-723 866-10525 01
- Computer program performs spectral analyses of up to seven time series
  - N-PS-1133 866-10539 01
- Welding of AH350 and AH355 steel
  - N-PS-2316 867-10292 05
- Computer program uses Monte Carlo techniques for statistical systems performance analysis
  - N-PS-2234 867-10306 06
- Algebraic Monte Carlo procedure reduces statistical analysis time and cost factors
  - N-PS-1887 867-10430 01

#### STATISTICAL DISTRIBUTIONS
- Design reliability goal developed from small sample
  - N-PS-403 866-10405 05
- Computer program calculates monotonic maximum likelihood estimates using method of reversals
  - N-PS-1516 867-10136 01
- Probabilistic approach to long range planning of manpower
  - NSC-11524 867-10510 06
- Study made of mechanics of deformation and fracture of fibrous composites
  - EQ-10035 867-10660 03

#### STATISTICAL MECHANICS
- Computer program for calculation of ideal gas thermodynamic data
  - LWIS-10224 866-10025 06

#### STATISTICS
- GERT EXCLUSIVE-OR combining paths and loops of electrical networks
  - EBC-10206 866-10435 06
- GERT simulation program for GERT network analysis
  - EBC-10209 866-10457 06
- Failure rates for accelerated acceptance testing of silicon transistors
  - EBC-10198 866-10541 01

#### STATORS
- Brushless dc motor uses electron beam switching tube as commutator

---

**STATORS**

- Study of thin-walled pipe response to turbulent fluids
  - N-PS-1321 867-10518 05
- New method for critical failure prediction of complex systems
  - N-PS-14133 868-10252 02
- Study of optimum discrete estimators in measurement analysis
  - N-PS-14915 868-10348 02
- Performance analysis of electrical circuits
  - EBC-15001 868-10448 06
- Micrometers and computers combined for analysis of chromosomes
  - N-PS-10256 869-10088 04
- Numerical inversion of finite Toeplitz matrices and vector Toeplitz matrices
  - N-PS-10445 869-10415 02
- A theoretical study of radar backscatter from distributed targets with emphasis on polarization dependence
  - N-PS-13775 869-10560 02
- Live-timer method of automatic dead-time correction for precision counting
  - N-PS-10478 869-10612 01

**STATISTICAL CORRELATION**

- The X square statistic and goodness of fit test
  - GSFC-10547 868-10136 02

**STATISTICAL DISTRIBUTIONS**

- Design reliability goal developed from small sample
  - N-PS-403 866-10405 05
- Computer program calculates monotonic maximum likelihood estimates using method of reversals
  - N-PS-1516 867-10136 01
- Probabilistic approach to long range planning of manpower
  - NSC-11524 867-10510 06
- Study made of mechanics of deformation and fracture of fibrous composites
  - EQ-10035 867-10660 03

**STATISTICAL MECHANICS**

- Computer program for calculation of ideal gas thermodynamic data
  - LWIS-10224 866-10025 06

**STATISTICS**

- GERT EXCLUSIVE-OR combining paths and loops of electrical networks
  - EBC-10206 866-10435 06
- GERT simulation program for GERT network analysis

**X-627**
Flexible magnetic planning boards are easily transported

GSFC-340 B65-10219 05

Computer program simplifies selection of structural steel columns

BU-0044 B66-10097 01

Combination spacer and gasket provides effective static seal

PS-1397 B66-10645 05

Nondestructive test method accurately sorts mixed bolts

PS-1426 B66-10574 01

Effects of heat input rates on T-1 and T-1A steel welds

PS-2475 B67-10163 03

Modified sine bar device measures small angles with high accuracy

LEWIS-1083 C66-10322 02

Helical tape forming device

LEWIS-1083 C66-10322 02

A magnifying scratch-gage force transducer

LEWLEY-10496 B66-10212 01

Improved table for cutting and welding

IEC-15537 B69-10357 05

STEELS

Gallium useful bearing lubricant in high-vacuum environment

LEWIS-12 B63-10337 03

Pressure molding of powdered materials improved by rubber mold insert

WCO-100 B64-10270 03

Forming blocks speed production of strain gage grids

LEWIS-182 B65-10009 05

Spring loaded beaded cable makes efficient wire puller

WCO-108 B65-10311 05

Etching process mills Fe 14-8 Mo alloy to precise tolerances

BSC-270 B66-10110 03

Critical parts are stored and shipped in environmentally controlled reusable container

P-PS-703 B66-10258 05

Friction loading device enables accurate testing of brittle materials

BU-0051 B66-10345 05

Impact and puncture resistant material protects parts from damage

BSC-747 B66-10375 05

Use of steel and tantalum apparatus for molten Cd-Bi-Ge alloy

BSC-199 B66-10594 03

Grit blasting nozzle fabricated from mild tool steel proves satisfactory

P-PS-1420 B66-10597 05

Controlled ferrite content improves weldability of corrosion-resistant steel

P-PS-568 B67-10099 05

Effects of heat input rates on T-1 and T-1A steel welds

PS-2475 B67-10163 03

High-strength braze joints between copper and steel

PS-2519 B67-10211 05

Welding of AM350 and AM355 steel

PS-2314 B67-10292 05

STEEL STRUCTURES

Frictional wedge shock mount in inexpensive, has good damping characteristics

JPL-PZ-1001 B63-10289 05

**STORAGE BATTERIES**

Primary cells use neither liquid nor fused electrolytes | B66-10001 | B67-10275 | 01 |

**STORAGE STABILITY**

Storage-stable foamy polyurethane is activated by heat | LANGLEY-167 | B66-10111 | 03 |

**STORAGE TANKS**

Helium tube separates nitrogen gas from liquid nitrogen | JPL-398 | B63-10251 | 05 |

Integral coolant channels supply made by melt-out method | M-PS-91 | B63-10497 | 05 |

Control system maintains selected liquid level | M-PS-470 | B66-10039 | 01 |

Gas diffuser facilitates withdrawal of cryogenic liquids from tanks | M-PS-915 | B66-10342 | 05 |

Closed loop operation eliminates need for auxiliary gas in high pressure pumping station | M-PS-893 | B66-10408 | 05 |

Large diameter metal ring seal prevents gas leakage at 5000 psi | | | |
Calibrated water tank facilitates pressure testing of instrumentation fittings

Test instrumentation evaluates electrostatic hazards in fluid system

Glass bead shot peening retards stress corrosion failure of titanium tanks

Computer program provides steady state analysis for liquid propellant propulsion systems

Study made of pneumatic high pressure piping materials /10,000 psi/

Calibrated water tank facilitates proof-loading of cranes and derricks

Effects of hydrogen on metals

Control for maintaining constant level of a cryogenic liquid

Analysis of stability-critical orthotropic cylinders subjected to axial compression

Angular acceleration measured by deflection in sensing ring

New anemometer has fast response, measures dynamic pressure directly

Rapid helium-air analyzer can measure other binary gas mixtures

Forcing blocks speed production of strain gage grids

Interferometer combines laser light source and digital counting system

Differential pressure gauge has fast response

Improved strain-wire flowmeter has fast response time

Direct force-measuring transducer used in blood pressure research

Mechanism continuously measures static and dynamic cable loads

Bismuth alloy potting seals aluminum connector in cryogenic application

Improved system measures output energy of pyrotechnic devices

Transducer measures force in vacuum environment

Radiation used to temperature compensate semiconductor strain gages

Coating permits use of strain gage in water and liquid hydrogen

Colloidal suspension simulates linear dynamic pressure profile

Improved system measures output energy of pyrotechnic devices

Device measures static friction of magnetic tape

Improved control system power unit for large parachutes

Miniature pressure transducer for stressed member application

Silicon strain sensors enable pressure measurement

Compact coaxial connector for printed circuit adds reliability

Upsetting butt edge increases weld-joint strength

Tests show that aluminum welds are improved by bead removal

Weld microstructure in Inconel 718 minimized by minor elements

Fabrication techniques developed for small-diameter, thin-wall tungsten and tungsten alloy tubing

Improved method of producing oxide-dispersion-strengthened alloys

Helmet system broadcasts electroencephalograms of wearer

Servo system facilitates photoelastic strain measurements on resins

Computer program simplifies selection of structural steel columns

Equations provide tubular information on effects of uniform and variable loads on thin, flat, circular plates

Stress calculator speedily converts strain data

A modal combination computer program for dynamic analysis of structures

Computer program calculates steady-state temperature distribution within plane or axisymmetric solids

Computer program simplifies design of rotating components of turbomachinery

Simplified method measures changes in tensile yield strength using least number of specimens

Improved computer program for elastic analysis of highly redundant structural

STRESS FUNCTIONS

M-PS-20175  B68-10536  03
Stress-corrosion-induced property changes in aluminum alloys

STRESS FUNCTIONS

M-PS-20209  B68-10568  03
Finite element analysis of compressible solids with nonlinear material properties

STRESS MEASUREMENT

JPL-591   B65-10023  01
Miniature stress transducer has directional capability

Angular acceleration measured by deflection in sensing ring

MSC-250   B66-10105  01
Polymer deformation gage measures thickness change in tensile tests

Colloidal suspension simulates linear dynamic pressure profile

UOC-266   B66-10214  05
Ultrasonic emission method enables testing of adhesive bonds

JPL-745   B66-10341  01
Stress calculator speedily converts strain data

Simple test for physical stability of cryogenic tank insulation

STRESS RATIO

JPL-616   B65-10189  03
Testing device subjects elastic materials to biaxial deformations

STRESS RELAXATION

M-PS-12547 B66-10448  03
Thermal stress-relief treatments for 2219 aluminum alloy are evaluated

JPL-12720 B67-10381  03
Machining heavy plastic sections

STRESS RELIEVING

B65-10185  05
Dispensing system eliminates torsion in deployed hoses

MSC-80    B66-10230  05
Insert sleeve prevents tube soldering contamination

Large sheets fabricated from small segments reduce procurement lead time

M-PS-1117 B66-10464  05
Process yield Co-Fe alloys with superior high temperature magnetic properties

B66-10535  03
Heat-treatment of metal parts facilitated by sand embedment

M-PS-1543 B66-10616  03
Jacketed cryogenic piping is stress relieved

M-PS-985   B67-10308  05
Warpage eliminated in copper-clad microwave circuit laminates

M-PS-13692 B67-10454  03
STRESS-STRAIN DIAGRAMS

M-PS-517   B66-10284  05
Strain gage measures changes in tensile yield strength using least number of specimens

NUC-10075 B67-10266  03
Study made of mechanics of deformation and fracture of fibrous composites

Eq-10035 B67-10660  03
Possible correlation between work-hardening and fatigue-failure

ARG-10371 B69-10414  03
STRESS-STRAIN-TIME RELATIONS

B67-10519  01
Circuit measures hysteresis loop areas at

Contact stresses calculated for miniature slip rings

B65-10141  05
Integral ribs formed in metal panels by cold-press extrusion

B65-10295  02
Improved fluid control valve extends diaphragm life

B65-10147  05
Unique construction makes interferometer insensitive to mechanical stresses

JPL-725 B65-10295  02
Universal transloader moves delicate equipment without stress

M-PS-654 B66-10384  05
Biniature pressure transducer for stressed member application

B66-10383  03
Polarized light reveals stress in machined laminated plastics

B67-10651  06
Development of reliability prediction technique for semiconductor diodes

MSC-11869 B68-10246  01
Miniature pressure transducer for stressed member application

LEWIS-333 B66-10531  05
Development of technology for hot-drape forming of large torus sections

LEWIS-333 B66-10535  03
Heat-treatment of metal parts facilitated by sand embedment

B66-10616  03
Jacketed cryogenic piping is stress relieved

M-PS-1543 B66-10616  03
Warpage eliminated in copper-clad microwave circuit laminates

M-PS-13692 B67-10454  03
STRETCHERS

B65-10019  05
Orthopedic stretcher with average-sized person can pass through 18-inch opening

M-PS-517 B65-10019  05
Orthopedic stretcher with average-sized person can pass through 18-inch opening

M-PS-654 B66-10019  05
Development of technology for hot-drape forming of large torus sections

B66-10384  05
Polarized light reveals stress in machined laminated plastics

Development of reliability prediction technique for semiconductor diodes

M-PS-11869 B66-10301  05
Miniature pressure transducer for stressed member application

B66-10314  05
Development of technology for hot-drape forming of large torus sections

B66-10573  05
STRIPPING
Cutter and stripper reduces coaxial cable connection time
M-AP-40 B65-10094 05
Technique for stripping Teflon insulated wire
M-FS-1774 B67-10048 05
Tools for applying lead tape to flat conductor cabling for chemical stripping
M-FS-20429 B69-10190 05
STROBOSCOPES
Multicolor stroboscope pinpoints resonances in vibrating components
JPL-0033 B66-10223 01
STROBOSCOPE 90
Silicon surface barrier detectors used for liquid hydrogen density measurement
M-FS-14115 B68-10166 01
STRUCTURAL ANALYSIS
Computer program simplifies transient and steady-state temperature prediction for complex body shapes
M-AP-289 B66-10619 01
Neutron diffractometer allows both magnetic and crystallographic analyses
ANQ-191 B67-10131 02
Structural Analysis and Matrix Interpretive System /SAMIS/
NPO-10130 B67-10171 01
Improved computer program for elastic analysis of highly redundant structural configurations
M-FS-13067 B67-10330 06
Survey made of refractory metals
LEWIS-10380 B68-10032 03
Computer program performs stiffness matrix structural analysis
NPO-10502 B68-10096 06
Fatigue of reinforced concrete beams under dynamic loading
M-FS-14946 B68-10515 05
Fractography can be used to analyze failure modes in polytetrafluoroethylene
M-FS-20294 B69-10066 03
Fatigue failure in metal bellows due to flow-induced vibrations
M-FS-18363 B69-10071 05
Structural Analysis and Matrix Interpretive System /SAMIS/
NPO-10839 B69-10093 01
Mechanical properties of a lap joint under uniform clamping pressure
M-FS-14530 B69-10141 05
STRUCTURAL DESIGN
A conceptual design for squeeze film bearings
M-FS-573 B66-10226 05
Solar cell submodule design facilitates assembly of lightweight arrays
JPL-728 B66-10231 02
Integrated mobility measurement and notation system
MSC-726 B67-10114 04
Land landing cushion dynamical computer program
MSC-1210 B67-10233 06
Computer program simplifies design of rotating components of turbomachinery
NUC-10046 B67-10235 06
Application of distorted models in developing scaled structural models
N-PS-2540 B67-10321 05
Study made of large amplitude fuel sloshing
M-FS-12381 B67-10439 03
Computer programs for antenna feed system design and analysis
NPO-10359 B67-10504 06
Study of crack initiation phenomena associated with stress corrosion of aluminum alloys
M-FS-14283 B68-10153 03
Improved traveling wave maser amplifier
NPO-10548 B68-10244 01
Design of fluid-duct bends with low pressure loss
M-FS-20176 B68-10395 05
Analysis of filament reinforced metal-shell pressure vessels
LEWIS-10352 B68-10405 06
Improved mouse cage provides versatility and ease in handling laboratory mice
M-SC-12250 B69-10124 04
Optimum structural design based on reliability and proof-load testing
NPO-11228 B69-10723 31
Determination of permissible applied load stress in structural elements

Fractography can be used to analyze failure modes in polytetrafluoroethylene
M-FS-20294 B69-10066 03
Techniques for controlling warpage and
residual stresses in welded structures
M-PS-20307 B66-10086 05

Threaded split ring connector separates structural sections
LANGLEY-145 B66-10086 05

Epoxy blanket protects milled part during explosive forming
M-PS-307 B66-10029 03

Lifting clamp positively grips structural shapes
M-PS-593 B66-10176 05

Aluminum/steel wire composite plates exhibit high tensile strength
M-PS-401 B66-10242 05

Instrument calculates moments of inertia of complex plane figures
MSC-628 B66-10306 01

Modified hydraulic braking system limits angular deceleration to safe values
GSFC-476 B66-10310 05

Metal tube can be folded for compact stowage, is self-ejecting
LEWIS-288 B66-10450 05

Preformed stiffeners used to fabricate structural components for pressurized tanks
M-PS-1796 B66-10668 05

Proposed method of rotary dynamic balancing by laser
M-PS-12422 B67-10452 02

Miniature pressure transducer for stressed member application
MSC-11869 B68-10246 01

A magnifying scratch-gage force transducer
LANGLEY-10496 B69-10212 01

Boron fiber-reinforced aluminum alloy tubing /experimental/
MSC-15633 B69-10509 05

Lightweight universal joint transmits both torque and thrust
JPL-375 B63-10236 05

New method used to fabricate light-weight heat exchanger for rocket motor
LEWIS-43 B63-10346 02

High efficient square-wave oscillator operating at high power levels
GSFC-112 B63-10554 01

New method forms bond line free of voids
LANGLEY-20 B63-10558 05

Leaf-spring suspension provides accurate parallel displacements
JPL-480 B65-10104 05

Low-cost tool minimizes damage to O-rings during installation
MSC-140 B65-10116 05

Intermediate rotating ring improves reliability of dynamic shaft seal
M-PS-575 B66-10197 05

Brazing process using Al-Si filler alloy reliably bonds aluminum parts
MSC-448 B66-10241 05

Design reliability goal developed from small sample
M-PS-403 B66-10405 05

Warpage eliminated in copper-clad

microwave circuit laminates
M-PS-13892 B67-10454 03

Tensile and fatigue properties of Inconel 718 at cryogenic temperatures
M-PS-18192 B69-10068 03

Adhesive for cryogenic temperature applications
LEWIS-10264 B69-10074 03

Seismographic recording of large rocket engine operation
M-PS-20545 B69-10756 01

Modular chassis simplifies packaging and interconnecting of circuit boards
JPL-236A B63-10174 01

Radiant heater for vacuum furnaces offers high structural rigidity, low heat loss
LEWIS-39 B63-10342 01

Flexible honeycomb structure can bend to fit compound curves
M-PS-13 B63-10385 05

New inflatable life raft is non-tippable
MSC-4A B64-10001 05

Spring loaded beaded cable makes efficient wire puller
NOO-108 B65-10031 05

Nonresonant support facilitates vibration testing of structures
M-PS-224 B65-10339 05

Modular thermoelectric cell is easily packaged in various arrays
GSFC-339 B65-10199 01

Sheet metal strip unrolls to form circular booms
GSFC-423 B66-10032 05

Bellows design features low spring rate and long life
MSC-521 B66-10190 05

Heat treatment stabilizes welded aluminum jigs and tool structures
MSC-800 B66-10458 03

Reparable, high-density microelectronic module provides effective heat sink
M-PS-13075 B67-10356 01

Heavy-gage bonded honeycomb sandwich as primary load-bearing structure
M-PS-12060 B67-10427 05

Computer program provides improved longitudinal response analysis for axisymmetric launch vehicles
LANGLEY-10093 B67-10531 06

High temperature alloy
LEWIS-10377 B68-10253 03

Nickel-base superalloy's excellent properties promote its service to 2200 degrees F

STUDS (STRUCTURAL MEMBERS)
Gun facilitates adhesive bonding of studs to surfaces M-PS-20299 B69-10099 05
Repair of honeycomb panels with welded breakout studs M-PS-15046 B69-10261 05

STRENGTH
Warpage eliminated in copper-clad microwave circuit laminates M-PS-13692 B67-10454 03
STYROFOAM (TRADEMARK)
Mill profiler machines soft materials accurately M-PS-692 B66-10254 05
Fixed vacuum plate clamps styrofoam for machining M-PS-683 B66-10283 05

SUBASSEMBLIES
Computerized parts list system coordinates engineering releases, parts control, and manufacturing planning MUC-10073 B67-10348 06
Replacement of fluid-filter elements without interruption of flow RSC-15499 B69-10245 05

SUBDIVISIONS
Simple scale interpolator facilitates reading of graphs LEWIS-92 B66-10302 05

SUBHARMONIC GENERATORS
Experimental coherent fractional frequency multiplier at S-band M-PS-2427 B66-10250 01

SUBLIMATION
Pfco provides heat transfer for solid C02 calibration standard M-PS-644 B66-10257 02
Auxiliary titanium sublimation pump produces ultrahigh 10^-10 torr vacuum LANGLEY-2 B66-10388 02
Modular Porous Plate Sublimator /WPS/ requires only water supply for coolant M-PS-1374 B66-10409 01
Chemical regeneration of emitter surface increases thermionic diode life LEWIS-17 B66-10435 02
Radioactive method enables determination of surface areas rapidly and accurately RU-0088 B66-10710 03
Development of dual solid cryogens for high reliability refrigeration system GSPC-1018e B67-10644 02
Measurement of gas flow at extremely low pressures MSC-13261 B69-10522 03

SUBMERGED BODIES
System locates randomly placed remote objects LANGLEY-209 B66-10315 01
Ballast barge concept for underwater structures KSC-10919 B68-10168 05
Proposed gas generation assembly would recover deeply submerged objects
Internal cooling increases range of immersion-type temperature probe

Coating permits use of strain gage in water and liquid hydrogen

Sea dye marker provides visibility for 20 hours

Perioelectric bolometer measures RF absolute power at millimeter wavelengths

Subminiature biotelemetry unit permits remote physiological investigations

Subminiatureized gas chromatograph gives fast, efficient analysis

Shortened horn-reflector antenna

Computer programs for antenna feed system design and analysis

Computer program calculates gammaray source strengths of materials exposed to neutron fluxes

Computer programs simplify optical system analysis

Subroutine allows easy computation in extended precision arithmetic

Computer routine adds plotting capabilities to existing programs

Computer program simulates design, test, and analysis phases of sensitivity experiments

A power-spectral-density computer program

Subroutines GEODE and DEASTC simplify operation of automatic digital plotter

Computer program utilizes FORTRAN 4 subroutines for contour plotting

Computer subroutine ISUDS accurately solves large system of simultaneous linear algebraic equations

Computerized parts list system coordinates engineering releases, parts control, and manufacturing planning

Saturn S-2 Automatic Software System /SASS/ E-PS-1741

Computer program generates averaged value data tapes E-PS-12728

Thermodynamic properties of solid palladium-silver alloys and other alloys are investigated by torsion-effusion technique

Technique eliminates high voltage arcing at electrode-insulator contact area

Effect of surface irregularities on bellows fatigue life

Detecting hydrogen-containing contaminants on metal surfaces

High temperature coatings for gas bearings

Camera mount for close-up stereo photographs

Electromagnetic hammer removes weld distortions from aluminum tanks

Study of behavior of sterols at interfaces

Insulated weld tooling permits uniform, high quality welds

Rotating holder permits accurate grinding of metallurgical microsamples

Electron beam seals outer surfaces of porous bodies

Run-in with chemical additive protects gear surfaces

Etching process mills PH 14-6 Mo alloy steel to precise tolerances

Device spot-laps spheres to very close tolerances

Portable sandblaster cleans small areas

Dry film lubricant is effective at extreme loads

Seal surfaces protected during assembly

Electrolytic etching process provides effective bonding surface on stainless steel

Chemical milling solution produces smooth surface finish on aluminum

Valve seat pores sealed with thermosetting monomer

Cork is used to make tooling patterns and molds

Strippable grid facilitates removal of grid-surfaced conical workpiece from die

System for etching thick aluminum layers minimizes bridging and undercutting

Oscilloscope used as X-Y plotter or two-dimensional analyzer
LEWIS-311 B67-10269 01

SWEEP FREQUENCY
Frequency offset in linear FM/CW transponder eliminates clutter
M-FS-249 B65-10146 01

Circuit operates as sine function generator
ISC-255 B66-10038 01

Parallel line raster eliminates ambiguities in reading timing of pulses less than 500 microseconds apart
JPL-605 B66-10386 01

An investigation of phase-lock loop swept-frequency synchronization
M-FS-656 B66-10423 01

Plotter design simplifies determination of image sensor transfer characteristic
NPO-10164 B67-10206 01

Concept for automatic Doppler compensation in two-way communication systems
GSPC-10213 B67-10545 01

Sweep frequency detector
NPO-10669 B66-10289 01

SWELLING
Apparatus measures swelling of membranes in electrochemical cells
GSPC-280 B65-10087 01

SWITCHES
Camera shutter is actuated by electric signal
ABC-20 B63-10560 05

Photoelectric semiconductor switch operates with low level inputs
JPL-SC-068 B65-10033 01

Automatic thermal switch accelerates cooling-down of cryogenic system
JPL-605 B65-10060 01

Rotor position sensor switches currents in brushless dc motors
GSPC-315 B65-10151 01

Electron-beam deflection controlled by digital signals
GSPC-385 B65-10283 02

Selenium bond decreases ON resistance of light-activated switch
JPL-SC-101 B65-10324 01

Three-position rocker switch actuator has positive centering
M-SC-261 B65-10376 01

Economical and maintenance-free gas system operates railroad switches
NO-0045 B66-10124 05

Optically driven switch turn-off time reduced

High voltage potential divider calibrated by simple device
ARG-83 B66-10497 01

Apparatus enables automatic microanalysis of body fluids
JPL-962 B66-10515 04

Preregulator feedback circuit utilizes Light Actuated Switch
M-FS-1180 B66-10542 01

Sensors measure surface ablation rate of reentry vehicle heat shield
LANGLEY-287 B66-10592 01

MOSFET analog memory circuit achieves long duration signal storage
M-FS-360 B66-10603 01

Electrical continuity scanner facilitates identification of wires for soldering to connectors
MSC-626 B66-10605 01

High transients suppressed in electromagnetic devices
KES-66-13 B67-10031 01

Circuit automatically calibrates flowmeter against liquid-level gage reference
M-FS-2194 B67-10376 01

Continuous wave detector has wide frequency range
M-FS-1849 B67-10386 01

Rugged switch responds to minute pressure differentials
M-FS-12704 B67-10389 01

Saturn S-2 Automatic Software System
JPL-500 B67-10405 06

Stable ac phase and amplitude comparator
M-FS-13086 B67-10459 01

Series transistors isolate amplifier from flyback voltage
MSC-11023 B66-10468 01

Multipulse current source offers low power losses and high reliability
LANGLEY-68 B66-10603 01

Hydraulic servo system increases accuracy in fatigue testing
LANGLEY-217 B67-10637 01

Semiconductor ac static power switch
LEWIS-10349 B66-10224 01

Superconductive thin film makes convenient liquid helium level sensor
LANGLEY-10289 B68-10341 01

An integrated circuit switch
NPO-11073 B69-10326 01

Foot-operated cell-counter
ARG-10315 B69-10351 01

Novel multipurpose timer for laboratories
ARG-10147 B69-10410 01

An interferometer tracking radar system
M-FS-10556 B69-10523 01

Integral valve provides automatic relief and remote venting
M-FS-12134 B69-10545 05

High voltage pulse generator
M-S-12178 B69-10548 01
A simple electrometer for measuring small photoelectric currents
GSPC-10603 B69-10734 01

SWITCHING

Bandwidth switching is transient-free, avoids loss of loop lock
WOD-054 B64-10349 01

Knob linkage permits one-hand control of several operations
MSC-30 B65-10022 05

Magnetic-shift-register circuit controls step motor operation
GSPC-340 B65-10226 01

Zener diode controls switching of large direct currents
MSC-188 B65-10350 01

Lamp automatically switches to new filament on burnout
M-FS-498 B66-10046 01

Ring counter circuit switches multiphase motor direction of rotation
JPL-SC-166 B66-10101 01

Omnidirectional antennas transmit and receive over large bandwidth
GSFC-436 B66-10133 01

Switching mechanism senses angular acceleration
GSPC-462 B66-10158 01

Multiple temperatures sampled using only one reference junction
GSPC-485 B66-10260 01

Exclusive-or logic circuit has useful properties
LANGLEY-214 B66-10272 01

Circuit provides accurate four-quadrant multiplication
WOD-272 B66-10331 02

Brushless dc motor has high efficiency, long life
GSPC-181 B66-10355 01

Simple, one transistor circuit boosts pulse amplitude
GSPC-501 B66-10480 01

Nine tube display unit employs time-shared logic
ARG-117 B66-10512 01

Design concept for pressure switch calibrator
EQ-36 B66-10598 01

Automatic channel switching device
MSC-832 B67-10086 01

Simplified technique demonstrates magnetic domain switching
M-FS-13153 B67-10342 02

Review of research and development in fluid logic elements
M-FS-620 B67-10438 01

Optically exciting a magnetic memory - A feasibility study
M-FS-74054 B67-10438 01

A prototype high power portable lamp
M-FS-20229 B69-10060 02

Time-shared Cathode Ray Tube
MSC-12238 B69-10243 06

An unconventional magnetically-coupled multivibrator
EQ-10226 B69-10480 01

Phase-locked-loop phase modulator with high modulation index, low distortion
MSC-12247 B69-10487 01

Simplified, reliable circuit sorts binary numbers in order of magnitude
NPO-10112 B69-10503 01

SWITCHING CIRCUITS

Coincident switch closing reduces error in motor-driven timer
JPL-182 B63-10143 05

Double-throw microwave device switches two lines quickly
JPL-410 B63-10258 01

Digital logic elements provide additional functions from analog input
MSC-64 B64-10064 01

Electronic device simulates respiration rate and depth
MSC-99 B64-10255 01

Variable frequency transistor inverter's use multiple core transformers
GSPC-183 B65-10119 01

Solid-state switching used to speed up capacitive integrator
LANGLEY-104 B65-10159 01

DC to AC converter operates efficiently at low input voltages
GSPC-130 B65-10178 01

Logic circuit exhibits optimum performance
LANGLEY-129 B65-10193 01

Simple circuit reduces transistor switching time
GSPC-314 B65-10234 01

Improved circuit minimizes generation time of pseudonoise check bits
JPL-698 B65-10275 01

Case-operated limit switch features safe fuse replacement
MSC-216 B65-10322 01

New television camera eliminates vidicon tube
M-FS-472 B66-10112 01

Tester periodically registers dc amplifier characteristics
MSC-190 B66-10148 01

Efficient dc to dc converter eliminates large stray magnetic fields
GSPC-463 B66-10376 01

Junction connectors permit strategic placement of television cameras
MSC-66-22 B66-10391 01

Electrically controlled optical latch and switch requires less current
JPL-SC-111 B66-10414 01

Electronic bidirectional valve circuit prevents crossover distortion and threshold effect
MSC-193 B66-10420 01

Video signal processing system uses gated current mode switches to perform high speed multiplication and digital-to-analog conversion
MSC-781 B66-10429 01

Solid-state switch increases switching speed
WOD-298 B66-10430 01

Basic suppression techniques are evaluated
M-FS-067 B66-10449 01

Solid state circuit switches ac load

TANKS (CONTAINERS)
Two-part valve acts as quick coupling.  
JPL-478  B64-10223  01
Oscillator circuit measures liquid level in tanks.  
M-FS-285  B65-10209  01
Weld leak rapidly and safely detected.  
M-FS-362  B65-10265  01
Economical and maintenance-free gas system operates railroad switches.  
NU-0045  B66-10124  01
Device without electrical connections in tank measures liquid level.  
WOO-235  B66-10198  01
Study made to establish parameters and limitations of explosive welding.  
M-FS-13006  B67-10393  05
Computer program performs rectangular fitting stress analysis.  
M-FS-13501  B67-10520  06
Variable-speed, portable routing skate.  
M-FS-13772  B67-10525  05
Portable, high intensity isotopic neutron source provides increased experimental accuracy.  
ABG-90250  B68-10243  02
High-torque power wrench, a concept.  
M-FS-18194  B68-10299  05
Renewal of corrosion protection of coated aluminum after welding.  
M-FS-20361  B69-10150  05
Space-saving hoist for tank manholes.  
M-FS-16508  B69-10180  05
Handbook for design of containers of fluids and gases for spacecraft.  
M-FS-20502  B69-10279  05
Instrumentation for nondestructive testing of composite honeycomb materials.  
M-FS-20405  B69-10366  03
Integral valve provides automatic relief
and remote venting
M-FS-12134 B69-10545 05

A comparison of two methods of measuring particle size of Al2O3 produced by a small rocket motor
FPO-11198 B69-10572 03

Sealed container sampling device
GSFC-10690 B69-10682 03

TANTALUM
Apparatus facilitates high-temperature tensile testing in vacuous
LEWIS-42 B63-10345 03

Wire winding increases lifetime of oxide coated cathodes
LEWIS-154 B65-10032 03

Ceramic-coated boat is chemically inert, provides good heat transfer
LANGLEY-90 B65-10063 05

Cantilever springs maintain tension in thermally expanded wires
LEWIS-136 B65-10149 05

Tantalum cathode improves electron-beam evaporation of tantalum
JPL-MO-002 B65-10175 03

Thermoelectric elements diffusion-bonded to tungsten electrodes
GSPC-346 B65-10309 01

Wire bundle formed into grids with minute interstices
WOO-089 B65-10372 03

Bimetallic devices help maintain constant sealing forces down to cryogenic temperatures
N-FS-600 B66-10325 02

Nonelectrolytic tantalum capacitors developed
N-FS-1546 B66-10552 01

Use of steel and tantalum apparatus for molten Cd-Mg-Zn alloys
ARG-199 B66-10594 03

Thin film process forms effective electrical contacts on semiconductor crystals
M-FS-2343 B67-10142 01

Modified blackbody device emits high-density radiation
M-FS-12744 B67-10388 02

Potassium plasma cell facilitates thermionic energy conversion process
ARG-10010 B67-10399 01

Isotopically pure magnesium isotope-24 is prepared from magnesium-24 oxide
ARG-10154 B68-10293 02

Nickel base alloy with improved stress rupture properties
LEWIS-10283 B68-10344 03

Nickel-base superalloy's excellent properties promote its service to 2200 degrees F
LEWIS-10355 B68-10380 03

Miniaturized King furnace permits absorption spectroscopy of small samples
ARG-10177 B68-10418 02

Refractory oxide insulated thermocouple designed and analyzed for high temperature applications
ARG-10202 B69-10053 03

Preparation of thorium magnesium-zinc reduction
ARG-10245 B69-10079 03

TAPES
Metal strip forms 21 foot boon, rolls up for compact storage
GSPC-151 B64-10011 05

New energy storage concept uses tapes
LEWIS-239 B66-10098 02

Capacitive system detects and locates fluid leaks

Buckling strength of filament-wound cylinders under axial compression is investigated AQ-10032 B67-10660 03

Tensile testing grips ensure uniform loading of bimetal tubing specimens LEWIS-10267 B68-10198 05

Analysis of problems related to slingshot shock machine high-velocity shock testing NPO-11193 B69-10506 05

Apparatus facilitates high-temperature tensile testing in vacuum LEWIS-42 B68-10345 03

Peel resistance of adhesive bonds accurately measured GSPC-320 B65-10173 03

Force controlled solenoid drives microweld tester W00-125 B65-10182 01

Testing device subjects elastic materials to biaxial deformations JPL-616 B65-10186 03

Tensile-strength apparatus applies high strain-rate loading with minimum shock JPL-28 B66-10660 05

Mechanism continuously measures static and dynamic cable loads BSAC-217 B66-10107 05

Polymer deformation gage measures thickness change in tensile tests JPL-745 B66-10147 01

Boron-deoxidized copper withstands brazing temperatures M-PS-762 B66-10273 03

Extensometer automatically measures elongation in elastomers M-PS-517 B66-10284 05

Ultrasonic emission method enables testing of adhesive bonds M-PS-799 B66-10341 01

Friction loading device enables accurate testing of brittle materials NPO-10051 B66-10345 05

Composite weld rod corrects individual filler weaknesses M-PS-1923 B67-10107 05

Self-aligning rod prevents eccentric loading of tensile specimens NDC-10525 B67-10594 05

Polystyrene cryostat facilitates testing tensile specimens under liquid nitrogen NUC-10522 B67-10613 02

Test system accurately determines tensile properties of irradiated metals at cryogenic temperatures

I-663
Environmental control system for cryogenic testing of tensile specimens
NUC-10521 B67-10617 02

Tensile testing grips are easily assembled under liquid nitrogen
NUC-10524 B67-10628 05

Buckling strength of filament-wound cylinders under axial compression is investigated
SO-10032 B67-10659 03

Tensile testing grips ensure uniform loading of bimetal tubing specimens
LEWIS-10267 B68-10248 05

One hundred angstrom niobium wire
LEWIS-10128 B68-10279 03

Machining technique prevents undercutting in tensile specimens
LANGLEY-10261 B68-10352 05

Fractography can be used to analyze failure modes in polytetrafluoroethylene
K-FS-20294 B69-10066 03

Abrasion and fracture testing in a high-pressure hydrogen environment
K-FS-18480 B69-10457 03

Heat-shrinkable jacket holds fluid in contact with tensile test specimen
SSC-13195 B69-10495 05

Literature review on pickling inhibitors and cadmium electroplating processes
K-FS-18421 B69-10606 03

Effects of high-pressure hydrogen on storage vessel materials
K-FS-18605 B69-10730 03

TENSION

Tension is servo controlled in film advance system
LANGLEY-54 B65-10075 05

Cantilever springs maintain tension in thermally expanded wires
LEWIS-136 B65-10149 05

Automatic reel controls filler wire in welding machines
SSC-416 B66-10236 05

Sole saw drill attachment has zero force reaction
SSC-543 B66-10604 05

Single-source mechanical loading system produces biaxial stresses in cylinders
K-FS-12530 B67-10380 05

Two-functional seal for hose connection
K-FS-14062 B69-10588 05

TERRIUM

Liquid laser cavities
GSFC-10592 B69-10234 02

Mass culture of photobacteria to obtain luciferase
GSFC-10563 B69-10294 04

Laser action from a terbium beta-ketocarbonate at room temperature
GSFC-10593 B69-10324 02

TERRIUM ISOTOPE

Optically exciting a magnetic memory - A feasibility study
K-FS-14064 B69-10060 02

TERMINALS

Auxiliary silver electrode eliminates two-step
Reliable method for testing gross leaks in semiconductor component packages
EFC-10150  B68-10562  01
Stress-testing of the throat of a rocket nozzle
NPO-10311  B69-10358  05
Calibratable solid-state pressure switch
H-FS-20474  B69-10437  05
Adjustable thermal "tree"
MSC-15556  B69-10484  01
Testing the flammability of materials exposed to arc
MSC-15225  B69-10531  03
Vacuum gage calibration system for 10 to the minus 8th power to 10 torr
LEWIS-11032  B69-10713  01
Burn-rate testing apparatus
MSC-10947  B69-10740  03

TEST EQUIPMENT
Test device prevents molecular bounce-back
GSFC-62  B63-10546  03
Continuity tester screens out faulty socket connections
JPL-596  B64-10065  01
Emission tester for high-power vacuum tubes
JPL-628  B64-10156  01
Machine tests crease durability of sheet materials
JPL-604  B64-10178  05
Master linearity of video cameras calibrated with precision tester
GSFC-200  B64-10209  01
Circuit converts AM signals to FM for magnetic recording
GSFC-227  B65-10001  01
Fluid pressure used to test turbopump bearings
N-0001  B65-10024  03
Circuit detects errors in address currents for magnetic core arrays
H-FS-234  B65-10047  01
Piezoresistive gage tests pin-connector sockets
JPL-675  B65-10128  01
Testing device subjects elastic materials to biaxial deformations
JPL-616  B65-10189  03
Novel probe simplifies electronic component testing
GSFC-342  B65-10243  01
Simple device produces accelerometer calibration pulse
H-FS-363  B65-10269  01
Air brake-dynamometer accurately measures torque
LEWIS-163  B65-10312  05
Noncontacting vibration transducer has constant sensitivity
LANGLY-99  B65-10392  01
Tensile-strength apparatus applies high strain-rate loading with minimum shock
JPL-28  B66-10063  05
Dispenser leak-tests and sterilizes rubber gloves
MSC-285  B66-10166  03
Matching flow characteristics of standard shutoff valves eliminates need for custom fabricated valves
H-FS-1069  B66-10416  05
Semiconductors can be tested without removing them from circuitry
N-PS-1163  B66-10447  01
Modified thermocouple is effective from minus 250 deg to 5000 deg F
MSC-420  B66-10461  01
Low level accelerometer test methods are investigated
H-FS-908  B66-10510  01
Antenna simulator permits preinstallation system checkout
LEWIS-10351  B66-10659  01
Tester for study of rolling element bearings
LEWIS-305  B67-10050  01
Flow-test device fits into restricted access passages
MSC-1078  B67-10074  01
Tester automatically checks paper tape punch and reader after maintenance
ARC-66  B67-10267  01
Electronic test instrument generates extremely small current signals
ARG-276  B67-10318  01
Low-energy gamma ray inspection of brazed aluminum joints
MSC-1189  B67-10337  02
Practical new method of measuring thermal-neutron fluence
NUC-10086  B67-10352  02
Steel test panel helps control additives in pyrophosphate copper plating
LEWIS-10101  B67-10358  05
Automatic telemetry checkout system
H-FS-12580  B67-10402  01
Jet engine powers large, high-temperature wind tunnel
H-FS-12584  B67-10621  02
Pneumatic pressure wave generator provides economical, simple testing of pressure transducers
NUC-10024  B67-10664  05
Harmonic distortion analyzer speeds setup of magnetic tape recorders
GSFC-10198  B68-10254  01
Conceptual dead weight device to provide pressure calibration
H-FS-14672  B68-10264  01
Environmental test planning, selection and standardization aids available
SAM-10028  B68-10445  06
Insertion device for pressure testing
MSC-15185  B69-10061  03
One hundred MHz voltage-controlled oscillator
NPO-11004  B69-10133  01
Leakage tester for flat conductor cable connector
H-FS-20427  B69-10268  05
Radiographic threshold detection levels of aluminum weld defects
H-FS-20487  B69-10418  01
Checking flat conductor cable spacing by means of a moire pattern  
H-FS-20426  B69-10456  05

Analysis of problems related to slinghot shock machine high-velocity shock testing  
NPO-11193  B69-10506  05

TEST FACILITIES

A technique for making animal restraints  
ARC-25  B63-10564  05

Complementary system vaporizes subcooled liquid, improves transformer efficiency  
H-FS-550  B66-10045  02

Infrared television used to detect hydrogen fires  
H-FS-654  B66-10363  01

Monitoring circuit accurately measures movement of solenoid valve  
H-FS-1829  B66-10568  01

Workmanship standards for fusion welding  
NUC-10050  B67-10200  05

Pressure levels and pulsation frequencies can be varied on high pressure/frequency testing device  
LEWIS-10205  B67-10360  05

Saturn S-2 Automatic Software System  
/SASS/  H-FS-1741  B67-10405  06

Pump simulator provides variable pressure-flow characteristics  
LEWIS-10122  B67-10453  05

Technique eliminates high voltage arcing at electrode-insulator contact area  
LEWIS-10133  B67-10470  01

Continuous analysis of nitrogen dioxide in gas streams of plants  
ARG-10356  B69-10254  03

Improved dc voltage regulator  
KS-06467  B69-10369  01

TEST PILOTS

High- and low-pressure pneumotachometers measure respiration rates accurately in adverse environments  
FRC-10012  B68-10188  01

TEST STANDS

High pressure tube coupling requires no threads or flares  
HSC-600  B66-10285  05

Four-bar linkage for thermal compensation in test mounts for structures  
HPO-11059  B69-10298  05

TEST VEHICLES

Interference effects eliminated in randol oriented space station antenna system  
NSC-11004  B67-10435  01

TESTING TIME

Novel probe simplifies electronic component testing  
GSFC-342  B65-10243  01

TESTS

Built-in templates speed up process for making accurate models  
LANGLEY-23  B63-10526  05

Apparatus facilitates pressure-testing of metal tubing  
LEWIS-174  B65-10131  05

Weld leaks rapidly and safely detected  
H-FS-362  B65-10265  01

Test strips detect different CO2 concentrations in closed compartments  
MSC-270  B65-10390  03

Rectilinear accelerometer possesses self-calibration feature  
H-FS-1480  B66-10452  01

Low level accelerometer test methods are investigated  
H-FS-908  B66-10510  01

Method for predicting frictional loss in metal bellows and flexible hose  
H-FS-883  B66-10662  05

Multiple correlation computer program determines relationships between several independent and dependent variables  
H-FS-13024  B67-10327  06

Excellent spring properties developed in two nickel alloys for use at cryogenic temperatures  
NUC-10084  B67-10349  03

Cut-through tester accurately measures insulation failure rates  
H-FS-12506  B67-10354  03

Review of research and development in fluid logic elements  
H-FS-420  B67-10438  01

Beryllium fastener technology  
H-FS-20306  B69-10019  05

Techniques for controlling warpage and residual stresses in welded structures  
H-FS-20307  B65-10086  05

Integrated sequence display device  
KSC-10381  B69-10316  01

Simple test indicates degree of cure of polyimide coatings  
MSC-15487  B69-10330  03

Application of cryptanalytic techniques to the analysis of NiCd space batteries  
GSPC-10565  B69-10731  01

TETHERLINES

Body-fitted harness provides safe and easy component handling  
H-FS-533  B66-10202  05

TETRACHLORIDES

Process produces chlorinated aromatic isocyanate in high yield  
I-FS-1658  B66-10646  03

TETRODES

FH oscillator uses tetrode transistor  
JPL-82  B65-10055  01

TEXTBOOKS

Handbooks for nondestructive testing using ultrasonics  
H-FS-20405  B69-10108  03

THERMOLINES

Instruction manuals for liquid penetrant nondestructive testing  
H-FS-14010  B69-10278  05

THERMOMETERS

Optical automatic gain channel  
H-FS-1550  B66-10596  02

Training manual on optical alignment instruments  
H-FS-20292  B68-10574  02

THERORE PROVING

COGENT programming manual  
ARG-10463  B69-10656  06

THEORETICAL PHYSICS

Self-sustained hydrodynamic oscillations in a natural-circulation two-phase-flow system...
boiling loop
ARG-10461 B69-10620 02

Storage of electric and magnetic energy
in passive nonreciprocal networks
ARG-10360 B69-10630 01

Self-discharge in bimetallic cells
containing alkali metal
ARG-10347 B69-10631 01

THERAPY
Simulator effects partial gravity conditions
MSC-152 B66-10339 05

THERMAL CONDUCTIVITY
Indium foil with beryllia washer improves
transistor heat dissipation
GSFC-42 B63-10033 01

Method of welding joint in closed vessel
improves quality of seam
JPL-170 B63-10139 05

Thermally conductive metal wool-silicone
rubber material can be used as shock and
vibration damper
JPL-321 B63-10207 03

New sintering process adjusts magnetic value
of ferrite cores
GSFC-129 B63-10606 03

Simple transducer measures low heat-transfer
rates
JPL-466 B64-10122 01

Ceramic-coated boat is chemically inert, provides good heat transfer
LANGLY-90 B65-10063 05

Carbon-arc rod holder has long life, reduces arc splatter
MSC-144 B65-10095 03

Insulation accelerates rate of cooling with
cryogenic fluid
MSC-161 B65-10240 02

Boron nitride housing cool? transistors
WOO-079 B65-10289 01

Copper foil provides uniform heat sink path
MSC-262 B66-10004 02

Aluminized fiber glass insulation conforms
to curved surfaces
N-PS-477 B66-10024 03

Calorimeter accurately measures thermal
radiation energy
LANGLY-173 B66-10055 02

Mount makes liquid nitrogen-cooled gama ray
detector portable
LEWIS-259 B66-10103 01

Compound improves thermal interface between
thermocouple and sensed surface
NO-0028 B66-10121 02

Apparatus measures thermal conductivity of
honeycomb-core panels
LANGLY-202 B66-10127 01

Mounting improves heat-sink contact with
beryllia washer
MSC-194 B66-10144 01

Subminiaturized gas chromatograph gives fast, efficient analysis
JPL-735 B66-10182 01

Insulation for cryogenic tanks has reduced
thickness and weight
N-PS-326 B66-10183 02

Control system maintains compartment at constant temperature

THERMAL CYCLING TESTS

Wide-range instrument monitors flow rates
of chemically active fluids
MSC-186 B66-10205 01

Rugged microelectronic module package supports circuitry on heat sink
MSC-81A B66-10245 01

Boron-deoxidized copper withstands brazing temperatures
N-PS-762 B66-10273 03

Portable detector set discloses helium leak rates
N-PS-1733 B66-10065 01

Aluminum-titanium hydride-boron carbide composite provides lightweight neutron shield material
MSC-10069 B67-10265 03

Development of dual solid cryogens for high reliability refrigeration system
GSFC-10188 B67-10644 02

Method of measuring thermal conductivity of high performance insulation
N-PS-14088 B68-10103 02

Thermal conductivity and dielectric constant of silicate materials
N-PS-14856 B68-10351 03

Fiber glass reinforced structural materials for aerospace application
N-PS-14806 B68-10360 03

Consolidation and fabrication techniques for vanadium-29 w/o titanium /V-29/
ARG-10148 B68-10368 03

High condutance vapor thermal switch
GSFC-10109 B68-10519 02

Automated measurement of thermal conductivity
N-PS-20454 B69-10283 03

A method for predicting interfacial freezing of a liquid flowing over a cold surface
LEWIS-10813 B69-10321 02

Thermally conducting electron transfer polymers
GSFC-10703 B69-10511 03

Thermal conductivity probe
N-PS-20566 B69-10780 03

THERMAL CONDUCTORS
Cooling method prolongs life of hot-wire transducer
LEWIS-41 B63-10344 02

Mounting for diodes provides efficient heat sink
N-PS-197 B64-10283 01

Automatic thermal switch accelerates cooling down of cryogenic system
JPL-655 B65-10068 01

Study made of anodized aluminum circuit boards
N-PS-13580 B67-10425 01

THERMAL CYCLING TESTS
Brazing process provides high-strength bond between aluminum and stainless steel
N-PS-803 B66-10352 05

Fixture tests bellows reliability through repetitive pressure/temperature cycling
MSC-1176 B67-10111 01

Thermal and bias cycling stabilizes planar

Improved thermal insulation materials made of foamed refractory oxides
M-PS-735 B66-10288 03

Inexpensive insulation is effective for cryogenic transfer lines
MSC-618 B66-10348 02

Acceleration-compensated pressure transducer has fast response
LANGLEY-113 B66-10353 01

Dispersion of borax in plastic is excellent fire-retardant heat insulator
ARG-5 B67-10016 03

Tool facilitates installation of Marmon clamps
M-PS-2039 B67-10105 05

Inexpensive cryogenic insulation replaces vacuum jacketed line
NUC-10061 B67-10264 02

Development of technology for hot-drape forming of large torus sections
M-PS-12744 B67-10394 05

Experiments to investigate particulate materials in reduced gravity fields
M-PS-13308 B67-10934 02

Concept for cryogenic liquid reclamation system
NUC-10322 B67-10420 02

Newly developed foam ceramic body shows promise as thermal insulation material at 3000 deg F
M-PS-13268 B67-10448 01

A ceramic composite thermal insulation
M-PS-1399 B67-10608 03

Feed-thru conduit minimizes heat pickup
JPL-947 B67-10619 05

Multichip packaging with thermal insulation
M-PS-14076 B67-10119 02

Temperature or pressure controller
LEWIS-10297 B66-10337 01

Fire retardant foams developed to suppress fuel fires
ARG-10098 B66-10358 03

Structural thermal-control coatings
M-PS-10785 B66-10553 03

Channel-wall limitations in the magnetohydrodynamic induction generator
ARG-10128 B69-10255 02

Automated measurement of thermal conductivity
M-PS-20454 B69-10283 03

Thermal conductivity probe
M-PS-20566 B69-10780 03

THERMAL NEUTRONS
Nondestructive test method accurately sorts mixed bolts
M-PS-1926 B66-10574 01

Detection of entrapped moisture in honeycomb sandwich structures
MSC-1403 B67-10116 01

Thermal neutron image intensifier tube provides brightly visible radiographic pattern
ARG-120 B67-10296 02

Practical new method of measuring thermal-neutron fluence
NUC-10086 B67-10352 02

Glancing-incidence telescope for far ultraviolet and soft X-rays
GSFC-10052 B67-10508 02

Compilation of detection sensitivities in thermal-neutron activation
ARG-10568 B67-10641 03

Computer program calculates gamma ray source strengths of materials exposed to neutron fluxes
NUC-10143 B67-10665 06
**TEBBIAL BOISE SUBJECT INDEX**

| Computer program /PI-GAS/ calculates the P-0 and P-1 transfer matrices for neutron moderation in a monatomic gas | B67-10678 | 06 |
| Computer program calculates the effective temperature for a crystalline solid /DETS/ | B69-10161 | 06 |
| Neutron therapy of cancer | B69-10203 | 04 |
| Analyses of silicon dioxide, magnesium oxide, lead fluoride, bismuth as low-pass velocity filters for neutrons | B69-10211 | 02 |
| Dual-mode operation of a neutron source, a concept | B69-10246 | 02 |
| Tungsten thermal neutron dosimeter | B69-10249 | 02 |
| GAMBIT program | B69-10433 | 06 |
| THERMAL NOISE | | |
| Thermal short improves sensitivity of cryogenically cooled maser | B69-10059 | 01 |
| THERMAL FLASMAS | | |
| Microwave technique measures plasma characteristics | B65-10122 | 02 |
| THERMAL PROTECTION | | |
| Predicting surface heating rates and pressures resulting from hot exhaust gases | B66-10633 | 05 |
| Study of fast response thermocouple measurement of temperatures in cryogenic gases | B66-10661 | 01 |
| Extrusion of small-diameter, thin-wall tungsten tubing | B67-10355 | 05 |
| Eutectic fuse provides current and thermal protection under high vibration | B67-10535 | 01 |
| Double copper sheath multiconductor instrumentation cable is durable and easily installed in high thermal or nuclear radiation area | B67-10530 | 01 |
| Development of dual solid cryogens for high reliability refrigeration system | B67-10644 | 02 |
| Thermal protective visor for entering high temperature areas | B66-10277 | 05 |
| Two-fluid, impinging-sheet injector | B68-10338 | 05 |
| THERMAL RADIATION | | |
| Variable-transparency wall regulates temperatures of structures | B63-10528 | 03 |
| Thermistor connector assembly increases accuracy of measurements | B65-10045 | 01 |
| Refractory metal shielding /insulation/ increases operating range of induction furnace | B65-10198 | 02 |
| Air-cured ceramic coating insulates against high heat fluxes | B65-10357 | 03 |

**SUBJECT INDEX**

| Calorimeter accurately measures thermal radiation energy | B66-10058 | 02 |
| Ultraviolet photographic pyrometer used in rocket exhaust analysis | B66-10095 | 02 |
| Chromium oxide coatings improve thermal emissivity of alumina | B66-10227 | 03 |
| Calculation of infrared spectral transmittance of inhomogeneous gases | B66-10554 | 02 |
| Computer program determines thermal environment and temperature history of lunar orbiting space vehicles | B67-10307 | 06 |
| Electron beam parallel X-ray generator | B67-10372 | 02 |
| Infrared radiometer | B67-10422 | 01 |
| Double copper sheath multiconductor instrumentation cable is durable and easily installed in high thermal or nuclear radiation area | B67-10538 | 01 |

Radiometric temperature reference
MSC-13276 B69-10507 01

THERMOCOUPLE PYROMETERS

High temperature thermocouple operates in reduction atmosphere
NU-0046 B66-10134 01

THERMOCOUPLES

Apparatus facilitates high-temperature tensile testing in vacuum
LEWIS-42 B63-10345 03

Connector for thermocouple leads saves costly wire, makes reliable connectors
LANGLEY-26 B63-10529 01

Simple circuit continuously monitors thermocouple sensor
M-FS-51 B63-10567 01

Simple transducer measures low heat-transfer rates
JPL-66 B64-10122 01

Apparatus measures concentration of suspended droplets in gas streams
LANGLEY-31 B64-10237 01

Wide-angle sensor measures radiant heat energy in corrosive atmospheres
M-FS-228 B65-10019 05

Metal sheath improves thermocouple using graphite in one leg
NU-0041 B65-10051 01

Transducer measures temperature differentials in presence of strong electromagnetic fields
ARC-27 B65-10089 01

Apparatus facilitates pressure-testing of metal tubing
LEWIS-174 B65-10131 05

Vapor pressure measured with inflatable plastic bag
GSFC-281 B65-10136 03

Internal cooling increases range of immersion-type temperature probe
LEWIS-171 B65-10157 02

Thermocouple-to-instrumentation connector features quick assembly
NU-0022 B65-10246 05

Servo calorimeter measures material heating rate
NU-0024 B65-10247 01

Hollow plastic hoops protect thermocouple in storage and handling
NU-0023 B65-10256 05

Protective coating withstands high temperature in oxidizing atmosphere
M-FS-529 B66-10044 03

Ferroelectric bolometer measures RF absolute power at submillimeter wavelengths
GSFC-422 B66-10051 01

Calorimeter accurately measures thermal radiation energy
LANGLEY-173 B66-10058 02

Auxiliary coil controls temperature of RF induction heater
GSFC-428 B66-10067 01

Composil improves thermal interface between thermocouple and sensed surface
NU-0028 B66-10121 02

Materials physically tested in variable-environment chamber
JPL-789 B66-10130 01

Liquid trap seals thermocouple leads
M-FS-688 B66-10212 05

Multiple temperatures sampled using only one reference junction
GSFC-485 B66-10260 01

High-speed furnace uses infrared radiation for controlled brazing
NU-0047 B66-10268 02

Braze alloys used as temperature indicators
NU-0063 B66-10274 01

Modified thermocouple is effective from minus 250 deg to 5000 deg F
MSC-420 B66-10461 01

Microthermocouple sensors own installation
M-FS-1111 B66-10463 05

Heat flux sensor design reduces extraneous source effects
MSC-400 B66-10531 01

Thermocouples electrically checked while connected to data system
LANGLEY-182 B66-10623 01

Accurate depth control provided for thermocouple junction locations
LANGLEY-289 B66-10632 01

Instrument accurately measures small temperature changes on test surface
LANGLEY-174 B66-10637 01

Thermocouples easily installed in hard-to-get-to places
M-FS-1946 B66-10653 01

Study of fast response thermocouple measurement of temperatures in cryogenic gases
M-FS-1659 B66-10661 01

Metal boot permits fabrication of hermetically sealed splices in metal sheathed instrumentation cables
NU-0083 B66-10704 05

Thermocouple-flexible cable connector insulator is highly reliable
NU-0082 B66-10709 01

Tester for study of rolling element bearings
LEWIS-305 B66-10709 01

Multipurpose instrumentation cable provides integral thermocouple circuit
NU-0104 B66-10709 01

Sensing disks for slug-type calorimeters have higher temperature stability
M-FS-1867 B67-10161 01

Development of technology for hot-drape forming of large torus sections
M-FS-12141 B67-10341 05

Poll radiometer accessory improves measurements
M-FS-12684 B67-10448 01

High temperature thermocouple design provides gas cooling without increasing overall size of unit
MSFC-10515 B67-10497 01

Calibration technique for electromagnetic flowmeters
LEWIS-10328 B67-10554 01

Improved cavity-type absolute total-radiation radiometer
JPL-807 B67-10557 01

Vapor deposition process provides new
method for fabricating high temperature thermocouples
NUC-10152 B67-10616 01

Test system accurately determines tensile properties of irradiated metals at cryogenic temperatures
NUC-10521 B67-10617 02

Environmental control system for cryogenic testing of tensile specimens
NUC-10523 B67-10618 02

Thoriated tungsten tube provides improved high temperature thermocouple sheath
NUC-10145 B67-10627 03

Development of dual solid cryogens for high reliability refrigeration system
GSFC-10188 B67-10644 02

Tungsten-rhenium alloy thermocouples effective for high-temperature measurement
ARG-10059 B68-10109

Ultrasonic temperature measuring device
LEWIS-10446 B68-10319

Cooled miniature pressure transducers effective at high temperatures
LEWIS-10401 B68-10370

Method for making small pointed thermocouples
SAN-10014 B68-10389

Heat-load simulator for heat sink design
MSC-15170 B68-10510

Temperature controlled strain gaged extensometer
LEWIS-10353 B68-10530

Combination probe for airflow measurements
LEWIS-10202 B69-10053

Thermodynamic Cycles

THERMODYNAMIC CYCLES

Closed fluid system without moving parts controls temperature
LEWIS-222 B65-10331 02

Resilient clamp holds fuel cell stack through thermal cycle
MSC-313 B66-10035 05

Protective coating withstands high temperature

SUBJECT INDEX

in oxidizing atmosphere
M-FS-529 B66-10044 03

Hydrogen-atmosphere induction furnace has increased temperature range
LEWIS-153 B66-10055 05

Improved cryogenic refrigeration system
JPL-731 B67-10128 02

Sensing disks for slug-type calorimeters have higher temperature stability
M-FS-1867 B67-10161 01

THERMODYNAMIC EFFICIENCY

Multidimensional reaction kinetic ablation program /ERAP/ MSC-10079 B67-10495 06

THERMODYNAMIC EQUILIBRIUM

Special mount improves remote transducer accuracy
LEWIS-269 B66-10021 01

Computer program determines chemical composition of physical system at equilibrium
MSC-1119 B66-10670 01

Computer program calculates steady-state temperature distribution within plane or axisymmetric solids
NUC-10049 B67-10224 06

Self-balancing line-reversal pyrometer automatically measures gas temperatures
LEWIS-348 B67-10268 01

ELAS - A general purpose computer program for the equilibrium problems of linear structures
MPC-10956 B68-10187 06

Dynamics of moving bubbles in single and binary component systems
M-FS-14845 B68-10339 02

A computer program for a line-by-line calculation of spectra from diatomic molecules and atoms assuming a Voight line profile
ARC-10221 B69-10232 06

THERMODYNAMIC PROPERTIES

Assembly jig assures reliable solar cell modules
GSFC-455 B66-10040 05

Effects of helium and nitrogen as pressurants in nitrogen tetroxide transfer
MSC-924 B67-10083 03

Thermodynamic properties related to expansion of two-component gas
MSC-1133 B67-10112 03

Thermodynamic properties of solid palladium-silver alloys and other alloys are investigated by torsion-effusion technique
ARC-277 B67-10324 03

Computer program resolves radiative, conductive, and convective heat transfer problems for variety of geometries
M-FS-1910 B67-10329 06

Thermodynamic properties of saturated liquid parahydrogen charted for important temperature range
NUC-10018 B67-10346 03

Experiments to investigate particulate materials in reduced gravity fields
M-FS-13308 B67-10394 02

Study of hydrogen slush-hydrogen gel utilization
M-FS-13068 B67-10413 02

THERMODYNAMIC CYCLES

Closed fluid system without moving parts controls temperature
LEWIS-222 B65-10331 02

Resilient clamp holds fuel cell stack through thermal cycle
MSC-313 B66-10035 05

Protective coating withstands high temperature

SUBJECT INDEX

THRESHOLDS (PERCEPTION)
- Modified algemeister provides accurate depth measurements
  MSC-616 B66-10647 04
- Computer program reduces calculation time of normal response functions
  N-FS-1517 B67-10108 01
- Oscillating-filter method for obtaining flashing-light visibility data
  MSC-13097 B69-10107 02

THROATS
- Bell nozzle kernel analysis program
  NPO-1031 B69-10358 05
- Stress-testing of the throat of a rocket nozzle
  NPO-10547 B68-10338 05
- Semi-toroidal-diaphragm cavit sting valve designed for bipropellant flow control
  XNP-09704 B69-10016 05
- Multiple-orifice throttle valve
  XNP-09698 B69-10030 05

THRUST
- Lightweight universal joint transmits both torque and thrust
  JPL-375 B63-10236 05
- Elimination of rocket engine asymmetric loads during tests at sea level
  N-FS-1730 B66-10674 05
- Computer program for mass optional solutions of some endpoint trajectory problems
  N-FS-12976 B67-10310 06
- Earth orbit rendezvous evaluation program
  N-FS-13016 B67-10407 06
- Computer program provides steady state analysis for liquid propellant propulsion systems
  MSC-10064 B67-10414 06
- Fortran 4 program for two-impulse rendezvous analysis
  N-FS-13571 B67-10479 06
- Electrothermal linear actuator
  NPO-10637 B69-10296 05
- Elimination of dissolved gases in hypergolic engine propellants
  N-FS-16179 B69-10692 03

THRUST BEARINGS
- Torque wrench designed for restricted areas
  LEWIS-246 B66-10011 05
- Hermetically sealed pump
  LEWIS-10837 B69-10320 05

THRUST CHAMBERS
- Plated nickel wire mesh makes superior catalyst bed
  MSC-216 B65-10321 03
- New brazing alloy eliminates metal-stress cracking
  WOO-249 B65-10397 03
- Special mount improves remote transducer accuracy
  LEWIS-269 B66-10021 01
- Beam splitter used in dual filming technique
  N-FS-501 B66-10072 02
- Microminiature thermocouple monitors own installation

MACHINES
- Machining heavy plastic sections
  N-FS-12720 B67-10381 03
- Development of detonation reaction engine
  N-FS-14020 B67-10652 01

THERMOCOUPLE
- Cold solid propellant motor has stop-restart capability
  JPL-836 B66-10673 03
- Two-step rocket engine bipropellant valve concept
  N-FS-10551 B69-10280 05
- Piezoelectric linear actuator
  MSC-13194 B69-10469 02

THERMOMETRY
- Apparatus measures very small thrusts
  WOO-048 B64-10284 05
- Doppler reduces effects of resonance on force transducer
  MSC-121 B66-10550 05
- Device measures reaction engine thrust vector deviations
  JPL-SC-163 B66-10642 05
- A comparison of two methods of measuring particle size of Al2O3 produced by a small rocket motor
  B69-10572 03

THERMAL EXPANSION
- Study of vortex valve for medium temperature solid propellants
  LANGLEY-204 B66-10524 01
- Phase plane displays detect incipient failure in servo system testing
  HQ-10018 B67-10662 01

THERMAL CONDUCTIVITY
- Effect of preparation procedures on intensity of radioautographic labeling is studied
  ARC-10032 B67-10500 04

THERMAL REGISTRANTS
- Solid state detectors monitor relay contacts
  JPL-785 B66-10396 01
- High-temperature, gas-filled ceramic rectifiers, thyatrons, and voltage-reference tubes
  LEWIS-90271 B69-10376 01
- Hydrogen flash lamps studied
  ARG-10419 B69-10411 02

TIGHTNESS
- Tool pre-tensions covers prior to lacing
  MSC-631 B66-10305 01

TIME
- Commercial film produces positive X-ray photo in ten seconds
  N-FS-521 B66-10307 02
- Sea dye marker provides visibility for 20 hours

Frequency discriminator with binary output eliminates tuned circuits
M-PS-376 B65-10349 01

Optically driven switch turn-off time reduced by opaque coatings
JPL-SC-107 B66-10141 01

Pneumatic shutoff and time-delay valve operates at controlled rate
M-PS-602 B66-10189 05

Means for improving apparent resolution of television
NRC-65 B67-10152 01

Study of yttrium iron garnet rods reveals new magnetostrictive echo mode
NRC-37 B67-10153 01

Cytopathy is advanced by studying effects of deuterium environment
ARG-205 B67-10304 04

Communication system features dual mode range acquisition plus time delay measurement
M-PS-18323 B66-10306 01

Transistorized Marx bank pulse circuit provides voltage multiplication with nanosecond rise-time
ARG-10110 B66-10328 01

Reducing quantizes deadband with a range switching digital filter
M-PS-20419 B69-10259 01

Combination ranging system and mapping radar
NPO-11001 B69-10325 01

A method for reducing sampling jitter in digital control systems
NPO-11068 B69-10338 01

Dynamic calibration of turbine flowmeters
LEWIS-11014 B69-10764 01

TIME MEASUREMENT

Volumetric system calibrates meters for large flow rates
WCO-130 B65-10323 05

Binary counter accumulates time by complementary preset
MSC-242 B65-10399 01

Single channel pulse-height analyzer operates
Nanosecond-range variable-pulse switching circuit accurately controls solenoid-valve actuations (Lewis-267).

Modified univibrator compensates for output timing errors (ARS-85).

Hydrogen maser as a highly stable frequency reference (Lewis-2437).

Vibrator elapsed time is automatically controlled (Lewis-2573).

Algebraic Monte Carlo procedure reduces statistical analysis time and cost factors (Lewis-1887).

KOPE/Kalendar Oriented Program efforts provide data for management decisions (Lewis-12331).

Communication system features dual mode range acquisition plan time delay measurement (Lewis-14323).

Ultrasonic temperature measuring device (Lewis-10446).

Simple tunnel diode circuit for accurate zero crossing timing (Lewis-10399).

Performance statistics of the FORTRAN 4 library for the IBM system/360 (Lewis-10299).

Tosone seahorse battery separator (Lewis-11091).

TIME MEASURING INSTRUMENTS
Vibration analysis utilizing Mossbauer effect (Lewis-11974).
Tunnel diode circuit used as nanosecond-range time marker (Lewis-90146).

TIME OF FLIGHT SPECTROMETERS
Analyses of silicone dioxide, magnesium oxide, lead fluoride, bismuth as velocity filters for neutrons (Lewis-10220).

TIME OPTICAL CONTROL
Computer program VARIS-QUID 3 provides solution of steady-state, multigroup, two-dimensional neutron diffusion equations (Lewis-10025).
Computerized parts list system coordinates engineering releases, parts control, and manufacturing planning (Lewis-10073).

TIME RESPONSE
Densitometer systems for liquid hydrogen have high accuracy, fast response (Lewis-909).
Improved design provides faster response time in photomultiplier (Lewis-451).
Study of fast response thermocouple measurement of temperatures in cryogenic gases (Lewis-1659).

DYANA - An advanced programming system for large classes of dynamic and equivalent systems (Lewis-12084).

TIME SERIES ANALYSIS
Computer programs perform spectral analyses of up to seven time series (Lewis-1133).

Technique for strip chart recorder time notation (Lewis-473).

Instrumentation monitors transported material through variety of parameters (Lewis-12938).

Phase plane displays detect incipient failure in servo system testing (Lewis-10018).

Manganese-56 coincidence-counting facility precisely measures neutron-source strength (Lewis-90261).

TIME SHARING
New computer system simplifies programming of mathematical equations (Lewis-441).
Nixie tube display unit employs time-shared logic (Lewis-117).

Multiplexer uses insulated gate-field effect transistors (Lewis-13096).

Time-shared Cathode Ray Tube (Lewis-12238).

Simplified system displays complex curves corresponding to input data (Lewis-10073).

Special purpose computer provides programmable digital filter for sampled-data control systems (Lewis-20290).

TIME SIGNALS
PKM magnetic tape system efficiently records and reproduces data (Lewis-391).

Recording and time expansion technique for high-speed, single-shot transient video signal (Lewis-10003).

Subminature deflection circuit operates integrated sweep circuits in TV camera (Lewis-1263).

Method of reducing time base error in digital magnetic recorders (Lewis-10408).

TIME DEVICES
Solenoid permits remote control of stop watch and assures restarting (Lewis-909).

Coincident switch closing reduces error in motor-driven timer (JPL-182).

Electro-mechanically operated camera shutter provides uniform exposure (JPL-357).

Unijunction frequency divider is free of backward loading (JPL-100-0).

High-intensity flashing beacon powered by...
SUBJECT INDEX

Mercury cells
LANGELBY-80 B65-10361 01

Flowmeter measures low gas-flow rates
B-PS-215 B66-10036 01

Modified McLeod gage records automatically
LEWIS-290 B66-10290 02

Parallel line raster eliminates ambiguities in reading timing of pulses less than 500 microseconds apart
JPL-805 B66-10386 01

Technique for strip chart recorder time notation
GSFC-473 B67-10196 01

Cut-through tester accurately measures insulation failure rates
B-PS-12506 B67-10354 03

Long time constant timer requires no recovery time
GSFC-10693 B67-10578 01

System measures arc energy dissipated in relay contact cycling
B-PS-14541 B68-10312 01

Circuit counts pulses and indicates time of occurrence of slow pulses
XNP-06234 B69-10313 01

Automatic filter-blowback systems used with sintered-metal filters
ARG-10324 B69-10342 05

Improved dc voltage regulator
XKS-06467 B69-10369 01

Novel multipurpose timer for laboratories
ARG-10147 B69-10410 01

Load current sensor for a pulse width modulator power regulator

Uranyl phthalocyanines show promise in the treatment of brain tumors
ARG-100 B67-10188 04

Effect of preparation procedures on intensity of radioautographic labeling is studied
ARG-10032 B67-10500 04

Simple colorimetric method determines uranium in tissue
ARG-10039 B67-10560 03

Study of radiation effects on mammalian cells in vitro
ARG-10191 B68-10294 02

Experimental study and evaluation of radioprotective drugs
ARG-10196 B68-10320 04

Method for making small pointed thermocouples
SAR-10014 B68-10389 01

Combustion method for assay of biological materials labeled with carbon-14 or tritium, or double-labeled
ARG-10331 B69-10208 04

TITANIUM

Air-cured ceramic coating insulates against high heat fluxes
B-PS-150 B65-10357 03

High-resistance coatings on metal substrates
LEWIS-10325 B68-10381 03

TITANIUM

New alloy brazes titanium to stainless steel
MSC-102 B65-10060 05

Lightweight aluminum casting alloy is useful at cryogenic temperatures
B-PS-267 B65-10092 03

Titanium treatment improves brazed joints
MSC-127 B65-16153 05

Ion pump provides increased vacuum pumping speed
NEO-13 B65-10239 02

Titanium diaphragm makes excellent amplitron cathode support
Reflective insulator layers separated by bonded silica beads

MSC-215

Hot-wire detector for chemically active materials used in gas chromatography

MSC-269

Aluminum/steel wire composite plates exhibit high tensile strength

N-PS-401

Auxiliary titanium sublimation pump produces ultrahigh 10^-11 torr/ vacuum

LANGLEY-212

Lateral ring metal elastic wheel absorbs shock loading

N-PS-1312

Process reduces secondary resonant emission in electronic components

JPL-934

Silver plating ensures reliable diffusion bonding of dissimilar metals

M-PS-1975

Aluminum-titanium hydride-boron carbide composite provides lightweight neutron shield material

MUC-10069

Crack growth measured on flat and curved surfaces at cryogenic temperatures

LEWIS-389

Aluminum and stainless steel tubes joined by simple ring and welding process

N-PS-113120

Magnesium-zinc reduction is effective in preparation of metals

ARG-10050

Nickel base alloy with improved stress rupture properties

LEWIS-10283

Titanium-nitrogen reaction investigated for application to gettering systems

ARG-10208

Two systems developed for purifying inert atmospheres

ARG-10234

An ultrasonic method for studying elastic moduli as a function of temperature

ARG-10187

Silicon carbide diode for increased light output

N-PS-20063

Precision mounting for instrument optical elements provided by polyimide bonding

N-PS-20293

Effects of hydrogen on metals

N-PS-20364

Galvanic corrosion reduced in aluminum fabrications

N-PS-272

Nickel-base superalloys developed for high-temperature applications

LEWIS-226

Brazing process provides high-strength bond between aluminum and stainless steel

N-PS-803

Bearing alloys with hexagonal crystal structures provide improved friction and wear characteristics

LEWIS-320

Simple technique determines ac properties of hard superconductive materials

M-PS-1918

Degreasing of titanium to minimize stress corrosion

LEWIS-382

Glass bead shot peening retards stress corrosion failure of titanium tanks

LANGLEY-319

Auxiliary titanium sublimation pump produces ultrahigh 10^-11 torr/ vacuum

LANGLEY-10077

Copper and nickel adherently electroplated on titanium alloy

M-PS-13952

Boll diffusion bonding of titanium alloy panels

M-PS-14743

Consolidation and fabrication techniques for vanadium-20 w/o titanium /TV-20/

ARG-10148

Corrosion protection of aluminum alloys in contact with other metals

M-PS-18526

Handbook for design of containers of fluids and gases for spacecraft

M-PS-20502

Titanium carbides study of high temperature bearing materials

TORSION

Dispensing system eliminates torsion in deployed booms
MSC-80 B65-10185 05

Miniature servo accelerometer is force-balanced
JPL-155 B65-10340 01

Sheet metal strip unrolls to form circular boom
GSPC-423 B66-10032 05

Resilient clamp holds fuel cell stack through thermal cycle
MSC-313 B66-10035 05

Noncontacting transducer measures shaft torque
M-FS-474 B66-10048 01

Thermodynamic properties of solid palladium-silver alloys and other alloys are
investigated by torsion-effusion technique

Torsion system for creep testing with multiple stress reversals

Torsional stress

Bellows joint absorbs torsional deflections in duct system

Pipe joints reinforced in place with fitted aluminum sleeves

Thermodynamic properties of solid palladium-silver alloys and other alloys are investigated by torsion-effusion technique

Buckling strength of filament-wound cylinders under axial compression is investigated

Torsional vibration

Computer program for determination of natural frequencies of closed spherical sandwich shells

Torsuses

Tors elements used in effective shock absorber

Inflatable holding fixture permits X-rays to be taken of inner weld areas

Fixture facilitates helium leak testing of pipe welds

Development of technology for hot-drape forming of large torus sections

Toughness

Improved primer for bonding polyurethane adhesives to metals

Strain-age cracking in Rene 41 alloy

Retention of ductility in high-strength steels

Towed bodies

Quick-attach clamp

Towers

Wind tower influence study

Towing

Quick-attach clamp

Toxic hazards

Dispenser leak-tests and sterilizes rubber gloves

Self-contained clothing system provides protection against hazardous environments

Weldable aluminum alloy has improved mechanical properties

Product identification techniques used as training aids for analytical chemists

Heat-shrinkable jacket holds fluid in contact with tensile test specimen

TOXICITY

Liquid microscopy chamber and microsyringe designs allow more efficient micromanipulations

Study made of anodized aluminum circuit boards

Metabolic and toxicological effects of water-soluble xenon compounds are studied

Experimental study and evaluation of radioprotective drugs

Torsional stress

SUBJECT INDEX

Product identification techniques used as training aids for analytical chemists

Heat-shrinkable jacket holds fluid in contact with tensile test specimen

TOXICITY

Liquid microscopy chamber and microsyringe designs allow more efficient micromanipulations

TOXICITY AND SAFETY HAZARD

Health hazards of ultrafine metal and metal oxide powders

Trace contaminants

Trace levels of metallic corrosion in water determined by emission spectrography

Analytical technique characterizes all trace contaminants in water

Trace hydrazines in aqueous solutions accurately determined by gas chromatography

Separation of traces of metal ions from sodium matrices

Trace elements

Wear studies made of slip rings and gas bearing components

Control apparatus for spectral energy source

Weld microfissuring in Inconel 718 minimized by minor elements

Ignition of binary alloys of uranium

Diffusion of trace gases for leak detection - a study

Direct in-vial collection for liquid-scintillation assay of carbon-14 and tritium

Trackers

Radioactive tracer system detects oil contaminants in fluid lines

Portable detector set discloses helium leak rates

 usher manner of gas flow

Trajectory optimization using regularized variables
MSC-13770 B69-10810 02

TRANSUCERS
High purity electroforming yields superior metal models
ARC-6 B63-10007 05
Improved variable reluctance transducer measures transient pressures
LANGLEY-10 B63-10321 01
Cooling method prolongs life of hot-wire transducer

SUBJECT INDEX

Study of theory and application of long duration heat flux transducers
M-FS-1265  B66-10614  01

Motion drive system is accurately controlled in the 1-micron range
JPL-864  B66-10695  05

Multipurpose instrumentation cable provides integral thermocouple circuit
NU-0108  B67-10046  01

Cleanroom air sampler counts, categorizes, and records particle data
M-FS-2221  B67-10076  01

Ultrasone permits brazing complex stainless steel assembly without flux
NU-0115  B67-10094  05

Calibrating ultrasonic test equipment for checking thin metal strip stock
NUC-10009  B67-10127  01

Solid state circuit averages multiple signals and rejects those varying significantly from the average
NUC-10066  B67-10262  01

IR vidicon scanner monitors many test points
M-FS-1937  B67-10277  01

Vibration analysis utilizing Mossbauer effect
M-FS-11974  B67-10339  01

Transducer measures embedment stresses in electronic modules
M-FS-13486  B67-10367  01

System measures unidirectional forces, excludes extraneous forces
LEWIS-170  B67-10542  01

Interferometer combines laser light source and digital counting system
MSC-151  B67-10605  01

Detector circuit compensates for vidicon beam current variations
GSFC-310  B67-10606  01

Electropneumatic rheostat regulates high current
ARC-44  B67-10607  01

Direct force-measuring transducer used in blood pressure research
ARC-53  B67-10608  01

Noncontacting vibration transducer has constant sensitivity
LANLEY-99  B67-10609  01

Device without electrical connections in tank measures liquid level
WOO-235  B67-10610  01

Wide-range instrument monitors flow rates of chemically active fluids
MSC-186  B67-10611  01

Ultrasonic quality inspection of bonded honeycomb assemblies is automated
MSC-859  B67-10612  01

Dasher reduces effects of resonance on force transducer
WOO-321  B67-10613  01

Ultrasonic water column probe speeds up testing of welds

Fast Fourier Transform Spectral Analysis Program
N-PS-15062 B69-10434 06

Current-switching technique for analog pulse circuits
ARC-10479 B69-10445 01

TRANSFER ORBITS
Computer program for mass optimal solutions of some endpoint trajectory problems
N-PS-12974 B67-10310 06

Generalized Newton-Raphson trajectory optimization-generator
N-PS-15020 B68-10422 06

TRANSFER
Rapid billet loader aids extrusion of refractory metals
LEWIS-50 B63-10354 05

Study of theory and application of long duration heat flux transducers
N-PS-1265 B66-10614 01

Irradiated gases transferred without contamination or dilution
Two-light circuit continuously monitors ac ground, phase, and neutral wires

Soldering iron temperature is automatically reduced

Substituting transistor for diode improves rectifying means

Microphone multiplex system provides multiple outlets from single source

Efficient dc to dc converter eliminates large stray magnetic fields

Control circuit maintains unity power factor of reactive load

Thermionic scanner pinpoints work function of emitter surfaces

Rectilinear accelerometer possesses self-calibration feature

Process yield Co-Fe alloys with superior high temperature magnetic properties

High frequency wide-band transformer uses coax to achieve high turn ratio and flat response

Amplifier provides dual outputs from a single source with complete isolation

Solid state phase detector replaces bulky transformer circuit

Ultrasonic wrench produces leaktight connections

Signal generator converts direct current to multiphase supplies

High power dc/ac and ac/dc electrical power conversion techniques developed

Blood pressure reprogramming adapter assists signal recording

Converter provides constant electrical power at various output voltages

Light-controlled resistors provide quadrature signal rejection for high-gain servo systems

Electronic skewing circuit monitors exact position of object underwater

Compensation circuit improves operation of inductive coupling transformers

Solid state high-voltage pulser operates with low supply voltage

Concept to convert electrical power

Transistorized trigger circuit is frequency-controllable
GSFC-111 863-10553 01

High efficient square-wave oscillator operator at high power levels
GSFC-112 863-10554 01

Monostable circuit with tunnel diode has fast recovery
GSFC-132 863-10603 01

Low-power transistorized circuit provides staircase waveform
GSFC-48 864-10007 01

Blocking oscillator uses low triggering voltage
MSC-28 864-10017 01

Novel circuit combines pulse stretcher with NOR gate
GSFC-187 864-10150 01

Temperature-compensation circuit stabilizes performance of vidicons
JPL-486 864-10226 01

PTC thermistor protects multiloaded power supplies
GSFC-236 864-10281 01

Tunnel-diode circuit features zero-level clipping
GSFC-247 865-10002 01

Circuit Improved produces monostable multivibrator with load-carrying capability
GSFC-344A 865-10011 01

Circuit detects errors in address currents for magnetic core arrays
F-PS-234 865-10047 01

Pulse generator permits nondestructive testing of component breakdown voltage
MSC-122 865-10054 01

Feedback oscillator functions as low-level pulse stretcher
GSFC-261 865-10069 01

Synchronized pulse generator needs no external power
GSFC-274 865-10072 01

Simple circuit functions as frequency discriminator for PPM signals
GSFC-267 865-10102 01

Variable load automatically tests dc power supplies
GSFC-291 865-10105 01

Unijunction frequency divider is free of backward loading
JPL-500-010 865-10112 01

Motor position sensor switches currents in brushless dc motors
GSFC-315 865-10151 01

Dc to ac converter operates efficiently at low input voltages
GSFC-130 865-10178 01

Voltage controlled oscillator is easily aligned, has low phase noise
JPL-510 865-10223 01

Magneto-spike register circuit controls step motor operation
GSFC-340 865-10226 01

Boron trifluoride nuclear detector preamplifier uses single-cable connection
LEWIS-178 865-10255 01

Constant-current regulator improves tunnel diode threshold-detector performance
GSFC-239 865-10282 01

Boron nitride housing cools transistors
WO-079 865-10289 01

Insulator-holder protects transistors in dense electronic assemblies
MSC-214 865-10389 01

Mounting improves heat-sink contact with beryllia washer
MSC-194 866-10144 01

Complementary monostable circuits achieve low power drain and high reliability
GSFC-433 866-10179 01

Jig protects transistors from heat while tinning leads
MSC-515 866-10240 05

Function generator eliminates necessity of series summation
GSFC-214 866-10351 01

Brushless dc motor has high efficiency, long life
GSFC-181 866-10355 01

Solid-state switch increases switching speed
WO-298 866-10380 01

Semiconductors can be tested without removing them from circuitry
F-PS-1163 866-10447 01

Pulse generator using transistors and silicon controlled rectifiers produces high current pulses with fast rise and fall times
MSC-405 866-10456 01

Solid state circuit switches ac load
JPL-798 866-10465 01

Bipolar current driver for memory circuits
GSFC-213 866-10469 01

Simple, one transistor circuit boosts pulse amplitude
GSFC-501 866-10480 01

Solid state annunciator facilitates complex system troubleshooting
F-PS-1259 866-10505 01

Computer program searches characteristic data of diodes and transistors
GSFC-493 866-10529 01

Preregulator feedback circuit utilizes Light Actuated Switch
F-PS-1180 866-10542 01

Collector/collector guard ring balancing circuit eliminates edge effects
JPL-SG-143 866-10563 01

Circuit provides overcurrent protection to push-pull amplifier

**SUBJECT INDEX**

**TRANSLATIONAL MOTION**

- Eccentric drive mechanism is adjustable during operation
  M-FS-2576 B67-10373 05
- Magnifying scratch-gage force transducer
  LANGLEY-10496 B69-10212 01
- Precisely repeatable rotary mechanism
  NFO-10679 B69-10696 05

**TRANSLUCENCE**

- Setting of angles on machine tools speeded by magnetic protractor
  ARC-5 B63-10006 01
- Areas of irregular, discontinuous patterns rapidly and accurately measured
  GSPC-10184 B67-10674 01

**TRANSMISSION**

- Bearing transmits rotary and axial motion
  LANGLEY-27 B64-10130 05
- Pneumatic power is transmitted through air
  MSC-8 B64-10141 05
- IR-transmission glasses formed from oxides of bismuth and tellurium
  M-FS-279 B65-10190 03
- Optically exciting a magnetic memory, a feasibility study
  M-FS-11854 B69-10600 02
- Resonant microwave dichroic surface
  GSPC-10658 B69-10274 01
- High voltage pulse generator
  MSC-12178 B69-10548 01

**TRANSMISSION CIRCUITS**

- TV synchronization system features stability and noise immunity
  JPL-915 B67-10118 01
- Current pulse amplifier transmits detector signals with minimum distortion and attenuation
  NUC-10055 B67-10347 01
- Optometric system facilitates colorimetric and fluorometric measurements
  NFO-10233 B68-10316 01
- Technique for tuning antenna systems producing negligible signal radiation
  KSC-10060 B69-10215 01

**TRANSMISSION LINES**

- Igniting system for mercury lamps protects transistorized sustaining supply
  JPL-144 B67-10262 01
- Plastic molds reduce cost of encapsulating electric cable connectors
  M-FS-69 B63-10568 05
- High-pass RF coaxial filter rejects dc and low frequency signals
  GSPC-73 B64-10173 01
- Thermistor connector assembly increases accuracy of measurements
  LANGLEY-62 B65-10045 01
- Electrical cable connector-clamp has smooth exterior surface
  MSC-154 B65-10201 05
- Oscillator circuit measures liquid level in tanks
  M-FS-245 B65-10209 01
- Electromagnetic hammer removes weld distortions from aluminum tanks
  M-FS-287 B65-10342 05

**TRANSMISSIVITY**

- Single connector provides safety fuses for multiple lines
  NUC-199 B66-10050 01
- Electrical cabling withstands severe environmental conditions
  M-FS-1585 B66-10827 01
- Video signal processing system uses gated current mode switches to perform high speed multiplication and digital-to-analog conversion
  M-781 B66-10429 01
- Remote preamplifier circuit maintains stability over wide temperature range
  WCO-278 B66-10432 01
- Pulse technique provides more accurate checkout of exploding bridge wire device
  HQ-62 B66-10561 01
- Electrical continuity scanner facilitates identification of wires for soldering to connectors
  M-852 B66-10605 01
- Improved memory word line configuration allows high storage density
  GSPC-559 B66-10617 01
- Cable clamp bolt fixture facilitates assembly in close quarters
  KSC-67-80 B67-10244 01
- Metal flame spray coating protects electrical cables in extreme environment
  WUC-10077 B67-10351 03
- Cut-through tester accurately measures insulation failure rates
  M-FS-12506 B67-10354 03
- Temperature-sensed cryogenic bleed maintains liquid state in transfer line
  M-FS-12681 B67-10424 01
- Adhesives for laminating polyimide insulated flat conductor cable
  MSC-12066 B67-10429 03
- Rectangular configuration improves superconducting cable
  ARG-90088 B68-10098 02
- Solid state high-voltage pulser operates with low supply voltage
  M-FS-14034 B68-10308 01
- Automatic colorimetry system monitors RF power
  NFO-11033 B69-10384 01

**TRANSMITTANCE**

- Shock and vibration response of multistage structure
  M-FS-14972 B68-10353 05

**TRANSMITTANCE**

- Calculation of infrared spectral transmittances of inhomogeneous gases
  M-FS-1563 B68-10554 02
- Exposure Value /EV/ system expanded to include filter factors and transmittance
  LANGLEY-150 B66-10602 02
- Detection of effect of deposits on optical windows of pyrometer measurements
  LBW-10366 B68-10367 01
- Correction for losses in optical birefringent networks, a concept
  M-FS-20086 B66-10571 02

**TRANSMITTER RECEIVERS**

- Frequency offset in linear FM/CW transponder eliminates clutter
  M-FS-249 B65-10146 01
Improved electro-optical tracking system
N-PS-14791 B68-10311 01
Combination ranging system and mapping radar
NPO-11001 B69-10325 01
Emission tester for high-power vacuum tubes

High temperature thermocouple operates
in reduction atmosphere
NT-0046 B66-10134 01

Chromium oxide coatings improve thermal
emissivity of alumina
WOO-263 B66-10227 03

Chemical regeneration of emitter surface
increases thermionic diode life
LEWIS-17 B66-10435 02

Study shows effect of surface preparations
on improving thermionic emission
JPL-SC-140 B66-10493 01

Tungsten insulated susceptor cup for high
temperature induction furnace eliminates
contamination
LEWIS-283 B66-10538 03

Tungsten fiber-reinforced copper composites
form high strength electrical
conductors
LEWIS-338 B66-10572 03

Sensors measure surface ablation rate of
reentry vehicle heat shield
LANGLEY-287 B66-10592 01

Plasma jet electrode has longer operating
life
NU-0098 B67-10024 02

Sensing disks for slug-type calorimeters
have higher temperature stability
M-FS-1067 B67-10161 01

Electron beam welder X-rays its own welds
LEWIS-10111 B67-10216 02

Welding, bonding, and sealing of refractory
metals by vapor deposition
LEWIS-123 B67-10232 03

Water cooled anode increases life of high
temperature arc lamp
N-P0-10180 B67-10247 02

Self-balancing line-reversal pyrometer
automatically measures gas temperatures
LEWIS-348 B67-10268 01

Portable spectrometer monitors inert gas
shield in welding process
M-FS-12144 B67-10326 02

Extrusion of small-diameter, thin-wall
tungsten tubing
LEWIS-90335 B67-10355 05

Electron beam parallel X-ray generator
MSC-11022 B67-10372 02

Torsion meter aids study of hysteresis
motor rings
M-FS-12215 B67-10412 01

Thoriated tungsten tube provides improved
high temperature thermocouple sheath
NUC-10145 B67-10627 03

Reinforced thermal-shock resistant ceramics
LEWIS-10376 B68-10085 03

High temperature alloy
LEWIS-10377 B68-10253 03

Fabrication techniques developed for small-
diameter, thin-wall tungsten and tungsten
alloy tubing
ARG-10100 B68-10284 05
Application of the solid lubricant molybdenum disulfide by sputtering LEWIS-10544 B68-10340

Nickel-base alloy with improved stress rupture properties LEWIS-10283 B68-10344

Nickel-base superalloys excellent properties promote its service to 2200 degrees F LEWIS-10355 B68-10380

Grain growth inhibitor for porous tungsten materials LEWIS-10535 B68-10527

Method for controlling density and permeability of sintered powdered metals LEWIS-10393 B68-10528

Cold machining of high density tungsten and other materials ARG-10289 B69-10110

Tungsten thermal neutron dosimeter LEWIS-10369 B68-10249

Study of high temperature bearing materials LEWIS-10629 B69-10252

High strength, superplastic superalloy LEWIS-10874 B69-10293

Improved high-temperature-strength nickel-base superalloy LEWIS-10352 B68-10352

Conversion of continuous-direct-current TIG welder to pulse-arc operation N-PS-16141 B69-10393

Discrimination of fish oil and mineral oil slicks on sea water Bq-10412 B69-10673

TUNGSTEN ALLOYS Brazing method produces solid-solution bond between refractory metals LEWIS-212 B65-10370

Nickel-base superalloys developed for high-temperature applications LEWIS-226 B66-10222

Lower-cost tungsten-rhenium alloys LEWIS-332 B68-10528

New tungsten alloy has high strength at elevated temperatures LEWIS-336 B68-10551

Low-energy gamma ray inspection of brazed aluminum joints NESC-1189 B67-10337

High-strength tungsten alloy with improved ductility LEWIS-10257 B67-10340

Cobalt-tungsten, ferromagnetic high-temperature alloy LEWIS-10376 B68-10095

Tungsten-rhenium alloy thermocouples effective for high-temperature measurement ARG-10059 B68-10109

Fabrication techniques developed for small-diameter, thin-wall tungsten and tungsten alloy tubing ARG-10100 B68-10284

Tungsten fiber-reinforced nickel superalloy LEWIS-10424 B68-10369

Refractory oxide insulated thermocouple designed and analyzed for high temperature applications

TUNGSTEN CARBIDES Continuous internal channels formed in aluminum fusion welds N-PS-2399 B67-10183

Flare angles measured with ball gage N-PS-16695 B68-10030

TUNGSTEN FLUORIDES Refractory-metal compound impregnation of polytetrafluoroethylene LEWIS-10733 B69-10072

TUNGSTEN OXIDES Multilayer refractory nozzles produced by plasma-spray process WOD-318 B66-10611

TUNING Helical coaxial-resonator makes excellent RF filter GSFC-243 B65-10012

Device for diode tuning in a stripline varactor harmonic multiplier N-PS-20153 B69-10013

Technique for tuning antenna systems producing negligible signal radiation KSC-10060 B69-10215

Resonant microwave dichroic surface GSFC-10658 B69-10274

Simple, accurate automatic frequency control circuit KSC-10393 B69-10323

Automatic tuning of hydrogen masers GSFC-10127 B69-10452

Proposed acousto-optic filter Bq-10440 B69-10466

TUNNEL DIODES Monostable circuit with tunnel diode has fast recovery GSFC-132 B65-10603

Circuit converts AM signals to FM for magnetic recording GSFC-227 B65-10001

Tunnel-diode circuit features zero-level clipping GSFC-241 B65-10002

Synchronized pulse generator needs no external power GSFC-274 B65-10072

Simple circuit produces high-speed, fixed duration pulses GSFC-285 B65-10228

Constant-current regulator improves tunnel diode threshold-detector performance GSFC-239 B65-10282

Threshold detector produces narrow pulses at high repetition rates GSFC-383 B65-10310

Hybrid circuit achieves pulse regeneration with low power drain GSFC-382 B65-10314

Digitally controlled pulse-level discriminator operates over wide voltage range GSFC-324 B66-10129

Circuit protects regulated power supply against overload current GSFC-453 B66-10292

Solid-state time-to-pulse-height converter developed

LEWIS-274  B66-10157  02

Vapor diffusion electrode improves fuel cell operation
LEWIS-167  B66-10281  03

Radial furnace shows promise for growing straight boron carbide whiskers
H-50  B67-10070  03

Thermodynamic properties related to expansion of two-component gas
M-1133  B67-10112  03

Control apparatus for spectral energy source
LEWIS-391  B67-10404  01

Viscosity and density of methanol/water mixtures at low temperatures
M-PS-14991  B68-10274  03

Isotopically pure magnesium isotope-24 is prepared from magnesium-24 oxide
ARG-10154  B68-10293  02

Dispensing graduate for butadiene
ABG-10240  B69-10067  03

Levitation-melting technique for metals and alloys
ABG-10070  B69-10068  03

Technical report on galvanic cells with fused-pelt electrolytes
ABG-10297  B69-10155  01

Technique for ultrasonic cleaning with volatile solvents eliminates need for hoods or condensers
MSC-15611  B69-10552  03

Control for maintaining constant level of a cryogenic liquid
NPO-11177  B69-10573  05

Liquid-metal-piston MHD generator
ABG-10500  B69-10771  02

VARACTOR DIODES
Efficient millimeter wave 1140 GHz diode for harmonic power generation
M-PS-20430  B69-10541  02

Varactor diodes
I-PS-12986  B67-10666  06

Device for diode tuning in a stripline varactor harmonic multiplier
M-PS-20153  B69-10013  01

An improved atomic hydrogen frequency and time standard
GSPC-10706  B69-10341  02

Automatic tuning of hydrogen masers
GSPC-10127  B69-10452  01

VARIABILITY
Phase inverter provides variable reference push-pull output

VARIABLES
Computer program utilizes FORTRAN 4 subroutines for contour plotting
NPO-10127  B67-10323  06

VARIABLE SLEEP WINGS
Computer program calculates wing aerodynamic characteristics for fixed wings with dihedral and variable-sweep wings at subsonic speeds
LEWIS-10391  B67-10666  06

VARIATIONAL PRINCIPLES
Computer program VARI-MIX 3 provides solution of steady-state, multigroup, two-dimensional neutron diffusion equations
NUC-10052  B67-10345  06

VARIATIONS
Magnetically coupled emission regulator
GSPC-10056  B69-10213  01

VARNISHES
Basic suppression techniques are evaluated
M-PS-867  B68-10449  01

VARNISHES
White primer permits a corrosion-resistant coating of minimum weight
M-PS-304  B66-10406  01

VARIANTS
Silicon carbide whiskers in electrical insulations improve dielectric constant
LEWIS-10917  B67-10466  03

CONTROLING NUMERICAL INVERSION
Numerical inversion of finite Toeplitz matrices and vector Toeplitz matrices
ARG-10445  B69-10415  01

VARYING VELOCITY
Study of optimum discrete estimators in measurement analysis
M-PS-14915  B68-10348  02

VECTOR SPACES
Computer program for mass optimal solutions of some endpoint trajectory problems
M-PS-12976  B67-10310  06

VECTORS
Inhibition of browning in foodstuffs
H-50-23  B66-10344  01

VECTORS (MATHEMATICS)
Computer program for network synthesis by frequency response fit
M-PS-12686  B67-10406  06

Tunable bandpass filter with variable selectivity
ARC-10191  B69-10130  01

VECTORS
Study of optimum discrete estimators in measurement analysis
M-PS-12976  B67-10310  06

VECTORS (MATHEMATICS)
Device measures reaction engine thrust vector deviations
JPL-SC-163  B66-10642  05

VECTORS (MATHEMATICS)
Improved computer program for elastic analysis of highly redundant structural configurations
M-PS-13087  B67-10330  06

VECTORS (MATHEMATICS)
Global angle sensor
GSPC-10305  B68-10315  01

VECTORS (MATHEMATICS)
Numerical inversion of finite Toeplitz matrices and vector Toeplitz matrices
ARG-10445  B69-10415  02

VEGETABLES
Economical and maintenance-free gas system operates railroad switches
NU-0045  B66-10124  05

VEGETABLES
Inhibition of browning in foodstuffs
H-50-23  B66-10493  04

VEGETABLES
Economical and maintenance-free gas system operates railroad switches
NU-0045  B66-10124  05

VELOCITY
Digital system accurately controls velocity of electromechanical drive
GSPC-287  B65-10069  01

VELOCITY
Study made to establish parameters and limitations of explosive welding
M-PS-13006  B67-10393  05

VELOCITY
Digital system accurately controls velocity of electromechanical drive
GSPC-287  B65-10069  01

VELOCITY
Study made to establish parameters and limitations of explosive welding
M-PS-13006  B67-10393  05

I-715
Interference effects eliminated in random oriented space station antenna system MSC-11004 B67-10435 01

Fortran 4 program for two-impulse rendezvous analysis M-PF-12449 B67-10428 02

Design and testing of liquid hydrogen-cooled, ultrahigh-speed ball bearings M-PF-18453 B69-10176 05

Prediction of performance of centrifugal pumps during starts under pressure LEWIS-10905 B69-10263 05

Study made of large amplitude fuel sloshing by laser M-PF-12381 B67-10439 03

Proposed method of rotary dynamic balancing by laser M-PF-12422 B67-10452 02

Computer program calculates velocities and streamlines in turbomachines LEWIS-10252 B68-10097 06

Large-amplitude inviscid fluid motion in an accelerating container MSC-11560 B68-10170 02

Dynamics of moving bubbles in single and binary component systems M-PF-14845 B68-10339 02

Design of fluid-duct bends with low pressure loss M-PF-20176 B68-10395 05

Magnity - Program for calculating velocities in amplified region of turbomachines LEWIS-10769 B69-10132 06

FORTRAN 4 program calculates velocities and streamlines in a tandem blade turbomachine LEWIS-16743 B69-10219 06

Low-cost tape system measures velocity of acceleration GSFC-85 B63-10512 01

Ion pump provides increased vacuum pumping speed NHO-13 B65-10239 02

Photographic method measures particle size and velocity in fluid stream M-PF-1536 B66-10668 01

Laser Doppler flowmeter measures gas velocity M-PF-1747 B66-10693 02

Rectilinear display gives acceleration load
SUBJECT INDEX

VENTS
Vented piston seal prevents fluid leakage between two chambers
JPL-179 B63-10141 05

High speed blowdown system provides rapid pressure loss
LEWIS-375 B67-10043 05

Toroidal ring prevents gas ignition at vent stack outlet
K-PS-2042 B67-10098 05

Concept for cryogenic liquid reclamation system
NPO-10322 B67-10420 02

Temperature-sensed cryogenic bleed maintains liquid state in transfer line
K-PS-12807 B67-10424 01

Vent and relief valve maintains low leakage rate over broad temperature range
K-PS-13290 B68-10078 05

Device damp fluid pressure oscillations in vent valve
K-PS-13290 B68-10078 05

Control for maintaining constant level of a cryogenic liquid
NBO-11777 B69-10573 05

VENTURI TUBES
Mixer conditions temperature of liquefied gas streams
K-PS-1784 B66-10565 02

Venturi meter with separable diffuser
LEWIS-10463 B68-10295 05

Piezoelectric linear actuator
ESC-13194 B69-10469 02

VENUS (PLANET)
Space trajectories program for IBM 7090
KPO-10125 B67-10172 06

Molecular radiation—Its application in physical measurements and analyses
K-PS-14816 B69-10562 02

VERSATILITY
Metal-bending brake facilitates lightweight, close-tolerance fabrication
ABC-29 B64-10069 05

Offset lenses add versatility to phototypesetting machine
HQ-9 B66-10173 02

Versatile impact hand tool
K-PS-20140 B68-10371 05

Improved mouse cage provides versatility and ease in handling laboratory mice
ESC-12250 B69-10124 04

VERTICAL DISTRIBUTION
Proposed technique for vertical alignment of a crane's cable
K-PS-16496 B69-10202 05

VERTICAL MOTION
Remotely operated gripper provides vertical control rod movement
ABC-10460 B68-10359 05

Air-cushion lift pad
K-PS-14665 B69-10448 05

VHF HIGH FREQUENCIES
Mechanical device accurately measures phase differences in vhf or uhf ranges
K-PS-1738 B66-10694 05

Survey of man-made electrical noise affecting radio broadcasting
HQ-10290 B69-10308 01

Self-shielding printed circuit boards for high frequency amplifiers and transmitters
HQ-10433 B69-10314 01

Improved VHF direction finding system
K-PS-20439 B69-10378 01

VESSELS
Method of welding joint in closed vessel improves quality of seam
JPL-170 B63-10139 05

Method prevents secondary radiation in radiographic inspection
K-PS-13383 B67-10391 02

VESTIBULAR TESTS
Two devices for analysis of nystagmus
HQ-10273 B69-10224 01

VHF OMNIRANGE NAVIGATION
Literal readout of identification signals in Morse code
LANLEY-10222 B69-10479 01

VIABILITY
Technique for highly efficient recovery of microbiological contaminants
MSC-13250 B69-10273 04

VIBRATION
Adhesive for vacuum environments resists shock and vibration
MSC-56 B65-10016 03

Improved holder protects crystal during high acceleration and impact
JPL-463 B65-10037 05

Vibrating-membrane electrometer has high conversion gain
ANC-38 B65-10056 01

Internal cooling increases range of immersion-type temperature probe
LEWIS-171 B65-10157 02

Back mount device quickly inserts or extracts chassis units
MSC-244 B65-10385 05

Electrical cabling withstands severe environmental conditions
K-PS-1585 B66-10427 01

Plastic tubing protects flexible copper hose
K-PS-772 B66-10588 05

Instrument continuously measures density of flowing fluids
LEWIS-309 B67-10080 01

Device enables calibration of microphones at high sound pressure levels
K-PS-11980 B67-10336 01

Coaxial cable stripping device facilitates RF cabling fabrication
NPO-10315 B67-10419 05

Ultrasonics used to measure residual stress
K-PS-12449 B67-10426 02

Study made of actusical monitoring for mechanical checkout
K-PS-13372 B67-10430 02

Stable ac phase and amplitude comparator
K-PS-13086 B67-10459 01

Double copper sheath multiconductor instrumentation cable is durable and easily installed in high thermal or nuclear radiation area
NOC-10007 B67-10536 01

Bacteriostatic conformal coating for electronic components
GSPC-10007 B67-10599 03

I-717
VIBRATION DAMPING

Pneumatic pressure wave generator provides economical, simple testing of pressure transducers
NWC-10024 B67-10664 05

Packaging criteria for transportation and handling shock and vibration
M-PS-13007 B66-90219 05

Between-bearing shaft seal, a concept
M-PS-18179 B68-10286 05

Mass loading effects on vibrated ring and shell structures
M-PS-14979 B68-10532 03

Fatigue failure in metal bellows due to flow-induced vibrations
M-PS-10363 B69-10071 05

Mounting method improves electrical and vibrational characteristics of screen electrodes
M-PS-20169 B69-10097 01

Precision mounting for instrument optical elements provided by polystyrene bonding
M-PS-20293 B69-10310 05

Analysis of space vehicle structures using the transfer-function concept
MPO-11162 B69-10337 06

Air-cushion lift pad
M-PS-14665 B69-10448 05

Improved inorganic ion exchange membranes
LNWS-10737 B69-10451 03

Optim structural design based on reliability and proof-load testing
MPO-11226 B69-10723 31

VIBRATION DAMPING

Thermally conductive metal wool-silicone rubber material can be used as shock and vibration damper
JPL-321 B66-10207 03

Shock mount isolates pressure transducers from vibration
JPL-631 B66-10113 05

Lightweight load support serves as vibration damper
JPL-661 B66-10144 05

Oil-damped mercury pool makes precise optical alignment tool
GSFC-353 B65-10253 02

Rubber-coated bellows improves vibration damping in vacuum lines
LNWS-273 B66-10187 02

Fluid damping reduces bellows seal fatigue failures
M-PS-565 B66-10249 05

Miniature capacitive accelerometer is especially applicable to telemetry
ARC-72 B66-10491 01

Resonant frequency can be adjusted on vibration mount
JPL-SC-134 B66-10672 05

Tester for study of rolling element bearings
LIVES-305 B67-10009 01

Post-stressed concrete foundation may reduce machinery vibration
ARC-130 B67-10237 05

Vibration damping composition has flush-away feature
M-PS-597 B67-10432 03

Solenoid valve design minimizes vibration
and sliding wear problems
M-PS-14079 B67-10667 05

Identification and evaluation of linear damping models in beam vibrations
ARG-10275 B69-10196 03

Nondestructive determination of cohesive strength of adhesive-bonded composites
M-PS-20397 B69-10464 03

Hermetically sealed vibration damper
MSC-10959 B69-10634 05

VIBRATION EFFECTS

Angular acceleration measured by deflection in sensing ring
MSC-250 B66-10105 01

Vibrator improves spark erosion cutting process
MPO-0071 B66-10333 01

Variable reluctance switch avoids contact corrosion and contact bounce
MSC-1178 B67-10137 01

Application of distorted models in developing scaled structural models
M-PS-2540 B67-10321 05

Study made of thin-walled pipe response to turbulent fluids
M-PS-1321 B67-10518 05

Eutectic fuse provides current and thermal protection under high vibration
M-PS-13664 B67-10535 01

VIBRATION ISOLATORS

Wire mesh isolator protects sensitive electronic components
GSFC-347 B65-10216 05

Tensile-strength apparatus applies high strain-rate loading with minimum shock
JPL-28 B66-10063 05

Friction brake cushions acceleration and vibration loads
MSC-715 B66-10608 05

Metal flange spray coating protects electrical cables in extreme environment
MPO-10077 B67-10351 03

Machining heavy plastic sections
M-PS-12720 B67-10381 03

Sleeved damper limits spring surging
MSC-12071 B66-10111 05

Improved active vibration isolator
LANGLEY-9106 B68-10123 05

Vibration damper for miles vertical boring mill ram
MSC-15529 B69-10388 05

Modular packaging technique for combining integrated circuits and discrete components
GSFC-10365 B65-10453 01

Hermetically sealed vibration damper
MSC-10959 B69-10634 05

VIBRATION MEASUREMENT

Device calibrates vibration transducer at amplitudes up to 20 g
M-PS-86 B63-10572 01

Transducer senses displacements of panels subjected to vibration
ARC-37 B65-10085 01

Noncontacting vibration transducer has constant sensitivity
LANGLEY-99 B65-10392 01
MONITORING SYSTEM

Determines amplitude and time of vibration channel peaks
JPL-879  B66-10699  01

INSTRUMENT

Sequentially samples ac signals from several accelerometers
JPL-884  B67-10029  01

VIBRATION ANALYSIS

Utilizing Mossbauer effect
N-PS-11974  B67-10339  01

RELIABLE, SELF-CALIBRATING VIBRATION TRANSUDER

LANGLEY-89  B66-10124  01

Mossbauer vibration calibration systems evaluated
N-PS-20014  B69-10125  01

Seismographic recording of large rocket engine operation
N-PS-20545  B69-10756  01

VIBRATION METERS

Interferometer combines laser light source and digital counting system
ISC-151  B65-10161  01

Precision capacitor has improved temperature and operational stability
ARG-189  B67-10313  01

VIBRATION SPECTRA

Nonresonant support facilitates vibration testing of structures
N-PS-224  B65-10039  05

Multicolor stroboscope pinpoints resonances in vibrating components
JPL-0033  B66-10223  01

Monitoring system determines amplitude and time of vibration channel peaks
JPL-879  B66-10699  01

Quartz crystals detect gas contaminants during vacuum chamber evacuation
NPO-10144  B67-10205  01

Post-stressed concrete foundation may reduce machinery vibration
ARG-130  B67-10237  05

System precisely controls oscillation of vibrating mass
N-PS-1875  B67-10276  01

Study made of thin-walled pipe response to turbulent fluids
N-PS-1321  B67-10515  05

Quantum mechanical calculations of reactive scattering cross sections in biomolecular encounters
NPO-13594  B67-10527  03

Computer program calculates the effective temperature for a crystalline solid
JPL-10161  B65-10036  06

VIBRATION STRESS

Wire material reduces compressor blade vibration
LEWIS-357  B66-10666  03

Pipe joints reinforced in place with fitted aluminum sleeves
MSC-11109  B67-10271  01

Nondestructive testing of brazed rocket engine components
N-PS-18191  B68-10394  03

Fatigue of reinforced concrete beams under dynamic loading
N-PS-1490C  B68-10515  05

I-719
VIBRATORY LOADS
Pressure-welded flange assembly provides leaktight seal at reduced bolt loads
B-FS-640 066-10247 05
Beat exchanger tubes supported in high vibration environment
B-FS-1401 066-10567 05
Highly linear, sensitive analog-to-digital converter
KSC-13110 069-10230 01
VIBRATORY POLISHING
Metallographic holding fixture permits polishing of soft metals on vibratory lapping machine
ABC-42 066-10562 05
VIDEO DATA
Recording and time expansion technique for high-speed, single-shot transient video signal
ABC-10003 067-10139 01
Video synchronization processor overcomes poor signal-to-noise ratio
KSC-10002 067-10515 01
Computer program for Video Data Processing System /VDP/ /NPO-10042/ 067-10630 05
Scan rate converter for tape recording and playback of TV pictures
NPO-10166 067-10676 01
Technique for improving solid state mosaic images
M-FS-20532 069-10676 01
System converts slow-scan to standard fast-scan TV signals
KSC-90534 069-10748 01
VIDEO EQUIPMENT
Vibration tests on vidicons made by improved method
JPL-SC-115 066-10042 01
Screen of cylindrical lenses produces stereoscopic television pictures
M-FS-273 066-10086 02
Video signal processing system uses gated current mode switches to perform high speed multiplication and digital-to-analog conversion
KSC-781 066-10429 01
Security warning system monitors up to fifteen remote areas simultaneously
KSC-66-39 066-10548 01
Miniature electrometer preamplifier effectively compensates for input capacitance
ABC-69 066-10549 01
Recording and time expansion technique for high-speed, single-shot transient video signal
ABC-10003 067-10139 01
Design concept for improved photo-scan tube
JPL-618 067-10157 01
New electron microscope employs new video display technique
ABC-158 067-10312 03
System remotely inspects, measures, and records internal irregularities in piping
M-FS-14056 068-10149 01
Facsimile video enhancement device
GSFC-10185 068-10207 01
Solid state high-voltage pulser operates
WITH LOW SUPPLY VOLTAGE

Viscosity and density of methanol/water mixtures at low temperatures
M-PS-1401  B68-10274  03

REAL fluid properties of normal and parahydrogen
LEWIS-10458  B68-10361  06
Flow properties of suspensions rich in solids
ARG-10451  B69-10622  02
Production of crystalline polymers via liquid crystal monomers
BG-10235  B69-10744  03

VISCOUS DAMPING
Viscous-pendulum damper suppresses structural vibrations
LANGLEY-45  B64-10272  05
Nonresonant support facilitates vibration testing of structures
M-PS-224  B65-10039  05
Oil-damped mercury pool makes precise optical alignment tool
GSFC-353  B65-10253  02
Damping technique gives accelerometer flat frequency response
M-PS-471  B66-10293  01
Dumper reduces effects of resonance on force transducer
WSO-321  B66-10550  05

VISCOS DOMAG
Improved strain-wire flowmeter has fast response time
LEWIS-241  B65-10304  01
Flowmeter measures flow rates of high temperature fluids
LEWIS-328  B66-10521  01

VISCOS FLUIDS
Viscous-pendulum damper suppresses structural vibrations
LANGLEY-45  B64-10272  05
Damper reduces effects of resonance on force transducer
WSO-321  B66-10550  05
Improved gyro-flotation/damping fluids
MSC-13017  B69-10360  03

VISIBILITY
Split glass tube assures quality in electron beam brazing
M-PS-564  B66-10151  05
Scanning photometer system automatically determines atmospheric layer height
MSC-245  B66-10170  01
Special tool kit aids heavily garmented workers
MSC-163  B66-10403  05
Improved head-controlled TV system produces high-quality remote image
ARG-128  B67-10317  01
Thermal protective visor for entering high temperature areas
MSC-10285  B68-10277  05
Improved combustion chamber optical probe
MSC-10953  B69-10142  02
An infrared television system for hydrogen flame detection
KSC-10366  B69-10354  01

VISORS
One-piece transparent shell improves design of helmet assembly
MSC-187  B66-10390  05
Thermal protective visor for entering high temperature areas
MSC-10285  B68-10277  05

VISUAL AIDS
Single projector accommodates slides of different size and format
GSFC-439  B66-10016  02
Chart case opens to form briefing easel
MSC-349  B66-10135  05
Multicolor strobescope pinpoints resonances in vibrating components
JPL-0033  B66-10223  01
Simple scale interpolator facilitates reading of graphs
LEWIS-92  B66-10302  05
Sea dye marker provides visibility for 20 hours
MSC-714  B66-10313  03
Chart system simplifies identification of complex design assemblies
VISUAL CONTROL

MSC-752  B66-10460  05

Visual attitude orientation and alignment system
MSC-647  B67-10120  02

Vis-a-Plan /visualize a plan/ management technique provides performance-time scale.
KSC-10073  B67-10240  06

New electron microscope employs new video display technique
ABS-158  B67-10312  03

Low cost SCR lamp driver indicates contents of digital computer registers
GSFC-10221  B66-10644  01

VISUAL CONTROL
Visual attitude orientation and alignment system
MSC-647  B67-10120  02

VISUAL FIELDS
Optical projectors simulate human eyes to establish operator's field of view
WOO-250  B66-10010  02

Optical device enables small detector to see large field of view
WOO-253  B66-10263  02

One-piece transparent shell improves design of helmet assembly
MSC-187  B66-10390  05

VISUAL OBSERVATION
Use of photographs speeds inspection of printed-circuit boards
MSC-72  B66-10118  01

High-speed furnace uses infrared radiation for controlled brazing
NR-0047  B66-10268  02

High pressure cryogenic liquid flow sight assembly provides streamlined flow for easy observation
LEWIS-310  B66-10394  01

Quality control criteria for acceptance testing of cross-wire welds
MSC-627  B66-10587  05

Fused diode provides visual indication of fuse condition
KSC-67-16  B67-10230  01

Simplified technique demonstrates magnetic domain switching
K-PS-13153  B67-10342  02

Automatic patient respiration failure detection system with wireless transmission
ARC-10174  B66-10365  01

Visual task analysis /VISTA/
M-PS-14716  B69-10394  06

Cryogenic fluid flow instabilities in heat exchangers
K-PS-20438  B69-10541  02

A method for precision anodize stripping
MSC-15040  B69-10581  03

Long range holographic contour mapping concept
HQ-10350  B69-10700  02

VISUAL PERCEPTION
Distant objects detected visually with optical filters
LANGLEY-466  B65-10252  02

Instrument quickly transposes ground reference target to eye level
MSC-275  B66-10061  05

Screen of cylindrical lenses produces stereoscopic television pictures
K-PS-273  B66-10086  02

Torque wrench allows readings from inaccessible locations
K-PS-598  B66-10204  05

Instrument transmits vanishing point to illustration point
KSC-267A  B66-10324  01

Infrared television used to detect hydrogen fires
K-PS-654  B66-10363  01

Three-axis attitude and direction reference instrument has only one moving part
K-PS-1819  B66-10644  01

Polarized light reveals stress in machined laminated plastics
WUS-10018  B67-10383  03

VISUAL SIGNALS
Speed-sensing device aids crane operators
WUS-4  B66-10006  05

Device detects unbonded areas in plastic laminates
WOO-206  B65-10380  01

Conceptual apparatus for detecting leaks of nonconductive liquids
K-PS-18172  B69-10303  01

Automatic patient respiration failure detection system with wireless transmission
ARC-10174  B66-10365  01

Use of both linear and logarithmic transfer functions to increase dynamic range of visual channel
GSFC-10675  B69-10037  01

Occulting-filter method for obtaining flashing-light visibility data
MSC-13097  B66-10107  02

VITREOUS MATERIALS
Selenium bond decreases ON resistance of light-activated switch
JPL-SC-101  B65-10324  01

VLASOV EQUATIONS
Computer programs calculate potential and charge distributions in a plasma
K-PS-871  B66-10553  01

VOCODERS
Analog voicing detector responds to pitch
GSFC-10085  B67-10571  01

VOICE
Electronic dummy for acoustical testing
MSC-206  B67-10298  01

VOICE COMMUNICATION
Electrocardiograph transmitted by RF and telephone links in emergency situations
FRC-10031  B68-10233  01

Pocket-sized tone-modulated FM transmitter
WGO-11180  B69-10725  01

VOID RATIO
Mathematical relation predicts achievable densities of compacted particles
ARB-10082  B67-10592  03

Fuel element concept for long life high power nuclear reactors
LEWIS-10309  B69-10154  03

VOIDS
Liquid crystals detect voids in fiber glass laminates
LEWIS-10104  B67-10286  03

I-722
Vibration damping composition has flush-away feature 667-10432 03
Plastic shoe facilitates ultrasonic inspection of thin wall metal tubing 667-10542 02
Niobium-uranium alloys with voids of predetermined size and total volume 669-10641 03

**VOLT-EFFECT**
A computer program for a line-by-line calculation of spectra from diatomic molecules and atoms assuming a Voigt line profile 669-10232 06

**VOLATILITY**
New cobalt alloys have high-temperature strength and long life in vacuous environments LEWIS-47 663-10351 03
Solvent residue content measured by light scattering technique 666-10320 01
Fluid-bed fluoride volatility process recovers uranium from spent uranium alloys ARG-232 667-10032 03
Improved compression molding process LANGLBP-10027 667-10302 03

Apparatus automatically measures soluble residue content of volatile solvents 669-10032 03
A method for observing gas evolution during plastic laminate cure MSC-15592 669-10530 03
Technique for ultrasonic cleaning with volatile solvents eliminates need for hoods or condensers MSC-15611 669-10552 03

**VOLT-ANDER CHARACTERS**
Didymium compound improves nickel-cadmium cell GSFC-295 665-10083 03
Adaptive control circuit prevents amplifier saturation 667-10026 02
Simple quasi-exponential slope generator EFO-11130 669-10439 01

**VOLTAGE AMPLIFIERS**
Field effect transistor presents high input impedance in ac amplifier JPL-500 665-10232 01
Solid state thermostat has integral probe and circuitry 666-10193 01
NEGEM analog memory circuit achieves long duration signal storage 666-10603 01
Voltage regulator/amplifier is self-regulated MSC-1240 667-10156 01
Plotter design simplifies determination of image sensor transfer characteristic 650-10164 667-10206 01

**VOLTAGE REGULATORS**
Amplifier provides dual outputs from a single source with complete isolation NUC-10056 667-10221 01
Vibrator elapsed time is automatically controlled M-FS-2573 667-10284 01
Limit circuit prevents overdriving of operational amplifier NUC-10082 667-10343 01
Current pulse amplifier transmits detector signals with minimum distortion and attenuation NUC-10055 667-10347 01
Adaptive control circuit prevents amplifier saturation ENC-10026 667-10648 02
Improved dc voltage multiplier M-FS-14042 668-10074 01
Highly linear, sensitive analog-to-digital converter MSC-13110 669-10230 01

**VOLTAGE GENERATORS**
Pressure sensor responds only to shock wave M-FS-238 665-10184 01
Modular thermoelectric cell is easily packaged in various arrays GSFC-339 665-10199 01
Electron-beam deflection controlled by digital signals GSFC-385 665-10283 02
Dual-voltage power supply has increased efficiency LEWIS-1076 666-10002 01
Simple, one transistor circuit boosts pulse amplitude GSFC-501 666-10480 01
Circuit increases capability of hysteresis synchronous motor MSC-1080 667-10084 01
Superconducting switch permits measurement of small voltages at cryogenic temperatures ARG-90260 668-10087 01
System measures response time of photomultiplier tubes LEWIS-10437 668-10382 01
Linear voltage-to-frequency converter GSFC-10546 669-10220 01
Synchronizing redundant power oscillators KGS-09377 669-10546 01
Dual-voltage power supply has increased efficiency
LEWIS-101A  B66-10002  01

Circuit exhibits power efficiency greater than 75 percent
MSC-254  B66-10034  01

Improved chopper circuit uses parallel transistors
M-PS-468  B66-10113  01

Soldering iron temperature is automatically reduced
ARC-57  B66-10203  01

Circuit protects regulated power supply against overload current
GSPC-853  B66-10292  01

Circuit prevents overcharging of secondary cell batteries
GSPC-854  B66-10492  01

Pre-regulator feedback circuit utilizes Light Actuated Switch
M-PS-1160  B66-10542  01

Electronic circuit provides accurate sensing and control of dc voltage
BS-0089  B66-10591  01

Low input voltage converter/regulator minimizes external disturbances
GSPC-527  B66-10689  01

Voltage regulator/amplifier is self-regulated
MSC-1240  B67-10156  01

Switching-type regulator circuit has increased efficiency
MSC-1063  B67-10190  01

An efficient, temperature-compensated subcarrier oscillator
JPL-SC-094  B67-10251  01

Circuit provides overcurrent protection to push-pull amplifier
MSC-12033  B67-10300  01

Digital-to-analog converter operates from low level inputs
JPL-907  B67-10357  01

Battery charge regulator is coulometer controlled
GSPC-561  B67-10446  01

Digital voltage-controlled oscillator
GSPC-512  B67-10449  01

MOSFET improves performance of power supply regulator
GSPC-10022  B67-10569  01

Circuit detects voltage decrease in computer power supply
KSC-67-120  B68-10019  01

Deep space FM system, a concept
MSC-11825  B68-10289  01

Current-limiting voltage regulator

WHITE BLOOD CELLS

Foot-operated cell-counter
ARG-10315 B69-10351 01

WHITE NOISE

On the bound of first excursion probability
FPO-11158 B69-10334 06

SUBJECT INDEX

Optimal FM pre-emphasis
MSC-10151 B69-10359 01

WICKS

Improved anode design for metal-oxygen cells
LEWIS-10871 B69-10318 01

WIRELESS COMMUNICATION

Unidirectional antennas transmit and receive over large bandwidth
GSPC-436 B66-10133 01

Wideband, high efficiency optical modulator requires less than 10 watts drive power
K-FS-12733 B67-10289 01

RF noise suppression using the photodiodelectric effect in semiconductors
MSC-12259 B69-10225 01

WIDTH

System enables dimensional inspection of very large structures
K-FS-2477 B67-10214 05

Edgy current probe measures size of cracks in nonmetallic materials
K-FS-14059 B67-10645 03

WINDERS

Compressed gas system operates semitrailer brakes during winching operation
JPL-0036 B67-10306 05

Hoisting frame facilitates handling of large objects
K-FS-16166 B68-10575 05

Two-axis winch installer for heavy ducts in confined space
K-FS-14254 B69-10062 05

Space-saving hoist for tank manholes
K-FS-16508 B69-10180 05

WIND (METEOROLOGY)

Small foamed polystyrene shield protects low-frequency microphones from wind noise
ARG-50 B67-10579 06

Efficient millimeter wave 1140 GHz diode sounding balloons for harmonic power generation
ARG-80193 B68-10202 01

Wind tower influence study
K-FS-20239 B69-10653 01

WIND EFFECTS

Suspended chains damp wind-induced oscillations of tall flexible structures
LANGLEY-10193 B69-10057 02

WIND MEASUREMENT

New anemometer has fast response, measures dynamic pressure directly
LANGLEY-26 B63-10530 05

Fast-response cup anemometer features cosine response
ARG-90193 B68-10202 01

Wind tower influence study
K-FS-20239 B69-10653 01

WIND PROFILES

New anemometer has fast response, measures dynamic pressure directly
LANGLEY-26 B63-10530 05

Rough surface improves stability of air-sounding balloons
K-FS-320 B65-10326 05

A method of determining combustion gas flow
K-FS-13757 B67-10455 03

WIND SHEAR

Oil-measured models aid wind tunnel measurements
LANGLEY-4 B63-10311 03
WIND TUNNEL APPARATUS

- Electric arc heater is self starting
  LANGLEY-208  B66-10230  03
- Jet engine powers large, high-temperature wind tunnel
  ARC-TP-15544  B67-10621  02

WIND TUNNEL MODELS

- Welded pressure transducer made as small as 1/8th-inch in diameter
  ARC-11  B63-10429  03
- Built-in templates speed up process for making accurate models
  LANGLEY-23  B63-10526  05
- Flexible fastener allows thermal expansion
  LANGLEY-40  B64-10145  05

WIND TUNNEL STABILITY TESTS

- Rapid helium-air analyzer can measure other binary gas mixtures
  LANGLEY-16  B63-10557  03

WIND TUNNELS

- Oil-smeared models aid wind tunnel measurements
  LANGLEY-4  B63-10311  03
- Laser-Doppler gas-velocity instrument
  N-PS-20039  B68-10349  02
- Experimental design for research on shock-turbulence interaction
  N-PS-20031  B69-10604  02

WIND VELOCITY

- Dewpoint temperature inversions analyzed
  ARG-10316  B69-10057  02
- Crossed-beam technique for measuring horizontal winds
  N-PS-20160  B69-10447  02

WIND VELOCITY MEASUREMENT

- Independent doubly truncated gamma variables
  N-PS-20143  B69-10345  02

WINDING

- Simple transducer measures low heat-transfer rates
  JPL-466  B64-10122  01
- Variable frequency transistor inverters use multiple core transformers
  GSFC-183  B65-10119  01
- Variable frequency magnetic multivibrator generates stable square-wave output
  GSFC-AE-21  B65-10124  01
- Rotor position sensor switches currents in brushless d.c. motors
  GSFC-315  B65-10151  01
- Spiral heater coils hand-formed with fixture
  LEWIS-200  B65-10192  05
- High frequency wide-band transformer uses coax to achieve high turn ratio and flat response
  ARG-107  B66-10600  01
- An improved magnetic tape recorder
  GSFC-08259  B67-10646  01
- Improved control system power unit for large parachutes
  MSC-12052  B67-10677  05
- Induction probe determines levels of liquid metals
  ARG-10348  B69-10256  03

WINDOWS (APERTURES)

- Plastic scintillator converts standard photomultiplier to ultraviolet range
  BRC-9  B66-10108  02
- High pressure cryogenic liquid flow sight assembly provides streamlined flow for easy observation
  LEWIS-310  B66-10394  01
- Aluminized thin-window proportional-counter tube is stronger, more responsive in long wavelength region
  JPL-689  B67-10015  01
- Detection of effect of deposits on optical windows of pyrometer measurements
  LEWIS-10366  B68-10367  01

WING CANON

- Computer program analyzes and designs supersonic wing-body combinations
  ARC-10141  B68-10335  06
- Modified Multhopp mean camber computer program
  LANGLEY-10376  B68-10446  06

WING PANELS

- Computer program analyzes and designs supersonic wing-body combinations
  ARC-10141  B68-10335  06

WING PLANFORMS

- Computer program calculates wing aerodynamic characteristics for fixed wings with dihedral and variable-sweep wings at subsonic speeds
  LANGLEY-10191  B67-10666  06
- Modified Multhopp lifting surface loading program
  LANGLEY-10375  B68-10452  06

WING PROFILES

- Computer program analyzes and designs supersonic wing-body combinations
  ARC-10141  B68-10335  06

WINGS

- Program computes zero lift wave drag of entire aircraft
  LANGLEY-10079  B67-10530  06

WIRE

- Thermocompression bonding produces efficient surface-barrier diode
  JPL-SC-066  B65-10007  05
- Forming blocs speed production of strain gage grids
  LEWIS-182  B65-10009  05
- Cantilever springs maintain tension in thermally expanded wires
  LEWIS-136  B65-10149  05
- Improved solderless connector is easily disconnected
  JPL-SC-060  B65-10197  01
- Improved wire memory matrix uses very little power
  JPL-SC-167  B65-10359  01
- Vacuum chamber provides improved insulation and support for cryostat
  N-PS-415  B65-10368  02
- Wire bundle forged into grids with minute interstices
  WOO-089  B65-10372  03
- Tungsten wire and tubing joined by nickel brazing
  N-PS-394  B65-10391  05
- Mechanism continuously measures static and dynamic cable loads
  MSC-217  B66-10107  05

Wire mesh isolator protects sensitive electronic components
GSFC-397 B65-10216 05

Plated nickel wire mesh makes superior catalyst bed
BSC-216 B65-10321 03

Three-dimensional wire-mesh capacitor system measures fluid density
WOC-194 B65-10379 01

Strainer fits inside flared-tube fittings
LANGLEY-180 B65-10388 05

Centrifugal device separates liquid from gas
MSC-282 B65-10394 05

Flexible electrochemical cell and sealing technique
XGS-10010 B59-10056 01

WIRE WINDING

Wire winding increases lifetime of oxide coated cathodes
LEWIS-154 B65-10032 03

Magnetic field test coils are temperature compensated
GSFC-294 B65-10081 02

Fiber glass parts cured during filament winding eliminates oven, saves time
S-FS-14 B65-10088 03

Automatic reel controls filler wire in welding machines
MSC-416 B66-10226 05

High transients suppressed in electromagnetic devices
ESC-66-13 B67-10031 01

Variable reluctance switch avoids contact corrosion and contact bounce
MSC-1178 B67-10137 01

WIRELESS COMMUNICATIONS

Phase shift frequency synthesizer is efficient, small in size
S-FS-250 B65-10169 01

Feasibility study of wireless power transmission systems
S-FS-16651 B68-10309 01

WIRING

Circuit reliability boosted by soldering pins of disconnect plugs to sockets
JPL-847 B66-10002 01

Modified RF coaxial connector ends vacuum chamber wiring problem
GSFC-150 B64-10010 01

Compact retractor protects cabling loops
S-FS-561 B66-10018 05

Copper wire plated with nickel and silver resists corrosion
S-FS-761 B66-10421 03

Electrical continuity scanner facilitates identification of wires for soldering to connectors
MSC-626 B66-10565 01

Instrument accurately measures small temperature changes on test surface
LANGLEY-174 B66-10637 01

Thermocouples easily installed in hard-to-get-to places
S-FS-1946 B66-10653 01

Logic circuitry used to automatically test shielded cables
HQ-60 B66-10659 01

Separable, high-density microelectronic module provides effective heat sink
B-PS-13075 B67-10356 01

Flat pack interconnection structure simplifies modular electronic assemblies
JPL-619 B67-10560 01

Multichannel wireway adapter box
MSC-30645 B66-10052 05

Nondestructive evaluation of printed wiring boards by micro-resistance measurements
SANS-10034 B66-10272 01

Pressure transducer
BFO-10653 B66-10364 01

WOOD

Cork is used to make tooling patterns and molds
MSC-425 B56-10056 01

WOODEN STRUCTURES

Built-in templates speed up process for making accurate models
LANGLEY-223 B63-10526 05

Nylon bit removes cork insulation without damage to substrate
MSC-381 B66-10152 05

Alignment tool facilitates pin placement on irregular horizontal surfaces
LANGLEY-219 B66-10110 05

WOOL

Thermally conductive metal wool-silicone rubber material can be used as shock and vibration damper
JPL-321 B56-10207 01

WORDS (LANGUAGE)

Detection system ensures positive alarm activation in digital message loss
WOO-208 B66-10287 01

Variable reluctance switch avoids contact corrosion and contact bounce
MSC-1178 B67-10137 01

Feasibility study of wireless power transmission systems
S-FS-16651 B68-10309 01

WRENCHES

Torque wrench designed for restricted areas
LEWIS-246 B66-10110 05

T-handle wrench has torque-limiting action
BSC-260 B66-10065 05

Torque wrench allows readings from inaccessible locations
B-PS-598 B66-10204 05

Tool enables proper mating of accelerometer
I-739
SUBJECT INDEX

MSC-11232 B67-10474 02

X RAY ASTRONOMY
Imaging slitless spectrometer for X-ray astronomy
M-PS-14309 B68-10546 02

X RAY DIFFRACTION
Spherical model provides visual aid for cubic crystal study
LEWIS-108 B65-10065 03

IR-transmission glasses formed from oxides of bismuth and tellurium
M-PS-279 B65-10190 03

Ion pump provides increased vacuum pumping speed
EIO-13 B65-10239 02

Specimen holder design improves accuracy of X-ray powder analysis
JPL-SC-165 B66-10075 02

Thin-film ferrites vapor deposited by one-step process in vacuum
MSC-259 B66-10398 03

Mass-spectrometric study of the rhenium-oxygen system
ABO-10421 B69-10645 02

X RAY FLUORESCENCE
Nondispersive X-ray emission analysis for geological exploration
GSFC-10568 B65-10011 02

X RAY INSPECTION
New method forms bond line free of voids
LANGLEY-20 B63-10558 05

Magnets position X-ray film for weld inspection
M-PS-253 B65-10110 05

Multiple test chamber exposes materials to various environments
MSC-179 B65-10268 01

Inflatable holding fixture permits X-rays to be taken of inner weld areas
M-PS-856 B66-10327 03

Polaroid film helps locate objects in inaccessible areas quickly
MSC-960 B67-10008 02

Electron beam welder X-rays its own welds
LEWIS-10111 B67-10216 02

Mechanized X-ray inspection system for large tanks
M-PS-12867 B67-10564 02

X-ray film holder permits single continuous picture of tubing joint
LEWIS-10382 B66-10343 05

Mixing weld gases offers advantages
M-PS-16413 B69-10145 05

X RAY IRRADIATION
Dielectrometer design permits measurement in vacuum under irradiation
M-PS-359 B66-10401 01

Electronic shutter gates image orthicon on and off
EQ-96 B67-10270 01

Study made of relationship between growth and metabolism
ABO-10046 B67-10604 04

Production of crystalline polymers via liquid crystal monomers
BQ-10235 B69-10744 03

and cable connector
M-PS-611 B66-10208 05

Hand tool permits shrink sizing of assembled tubing
MSC-504 B66-10239 05

Pneumatic wrench retains or discharges nuts or bolts as desired
8U-0085 B66-10707 05

Single wrench separates nuts from free-floating bolts
MSC-10013 B67-10158 05

Ultrasonic wrench produces leaktight connections
M-PS-12561 B67-10353 05

Magnetically controlled torque wrench prevents overtorquing
SAN-10002 B68-10209 05

High-torque power wrench, a concept
M-PS-16194 B68-10299 05

Adjustable wrench for electronic connectors
M-PS-18547 B69-10184 05

One-handed hammer-spanner for chucks
M-PS-18581 B69-10398 05

BQ-10235 B69-10744 03
X RAY SPECTROSCOPY
- Glancing incidence telescope for far ultraviolet and soft X-rays: GSFC-10052, E67-10508
- Imaging slitless spectrometer for X-ray astronomy: N-FS-14309, E68-10546
- Non-dispersive X-ray emission analysis for geochemical exploration: GSFC-10568, E69-10011

X RAY STRESS ANALYSIS
- Ultrasoneics used to measure residual stress: GSFC-10052

X RAY TELESCOPES
- Imaging slitless spectrometer for X-ray astronomy: N-FS-14309, E68-10546
- Selective vignetting of Type 1 X-ray telescopes: GSFC-10682, E69-10075

X RAYS
- Precision gage measures ultrahigh vacuum levels: GSFC-114, E63-10597
- Multiple element soft X-ray source produces wide range of radiation: GSFC-286, E65-10082
- An improved soft X-ray photoionization detector: GSFC-540, E67-10072
- Improved television signal processing system: EPO-10140, E67-10246
- Training course for radiation safety technicians: ARG-216, E67-10477
- Numerical least-square method for resolving complex pulse height spectra: GSFC-10142, E67-10480
- Weld microfissuring in Inconel 718 minimized by minor elements: N-FS-18185, E68-10251
- Rotary-knife stripper facilitates removal of X-ray film from pack: N-FS-14837, E68-10509
- Primary radical yields in pulse irradiated alkaline aqueous solution: ARG-10322, E69-10167
- Preferred-orientation analysis of polycrystalline materials: NFO-10064, E69-10336
- New shield for gamma-ray spectrometry: ARG-10388, E69-10344
- A simple electrometer for measuring small photoelectric currents: GSFC-10603, E69-10734

X-Y PLOTTERS
- System remotely inspects, measures, and records internal irregularities in piping: N-FS-14545, E68-10149
- Two devices for analysis of nystagmus: HQ-10273, E69-10224
- Automated plotting of equipotentials: NFO-11134, E69-10570
- Direct determination of lead-210 by liquid-scintillation counting: ARG-10462, E69-10611

XENON
- Densitometer system for liquid hydrogen has high accuracy, fast response: N-FS-909, B66-10438
- An improved soft X-ray photoionization detector: GSFC-540, B67-10072
- High-temperature, gas-filled ceramic rectifiers, thyristors, and voltage-reference tubes: LEWIS-90271, B69-10376

XENON COMPOUNDS
- Xenon forms stable compound with fluorine: ARG-8
- Xenon fluoride solutions effective as fluorinating agents: ARG-217
- Xenon fluorides show potential as fluorinating agents: ARG-113
- Pure xenon hexafluoride prepared for thermal properties studies: ARG-10239, E69-10076

XENON LAMPS
- High-intensity flashing beacon powered by mercury cells: LANGLEY-6C, B65-10361
- Lamp enables measurement of oxygen concentration in presence of water vapor: BSC-10043, E67-10387
- Laser action from a terbium beta-ketoenolate at room temperature: GSFC-10593, E69-10324

XEROGRAPHY
- Shortened procedure for obtaining reproducible copies of 35 mm color slides: KSC-09957, B66-10560

XYLENE
- Special coatings control temperature of structures: GSFC-944, B65-10337
- Process produces chlorinated aromatic isocyanate in high yield: N-FS-1658, B66-10646

YAGI ANTENNAS
- Modified interelement spacing improves Yagi antenna array: LANGLEY-150, B65-10183

YAW
- Knob linkage permits one-hand control of several operations: BSC-30, B65-10022

YIELD STRENGTH
- Novel shock absorber features varying yield strengths: BSC-63A, B64-10138
- Lightweight aluminum casting alloy is useful at cryogenic temperatures:

ALLEN, W. R.

- Various likelihood estimates using method of reversals
  N-P5-1516 B67-10136 01

ALLEN, W. N.

- Microparticle impact sensor measures energy directly
  GSFC-252 B65-10048 01

ALFREEDSON, P. G.

- Computer program developed for flowsheet calculations and process data reduction
  ARG-10134 B69-10023 06

ALLAN, K. R.

- Cooling of 2 kw n subscript feed 2 subscript fuel cell
  N-P5-13737 B68-10544 01

ALLER, R. C.

- Nonhazardous acid etches weld samples
  N-FS-975 B66-10376 05

Allen, B. C

- Semiconductors can be tested without removing them from circuitry
  N-FS-1163 B66-10447 01

ALLER, G. P.

- Spiral-grooved shaft seals substantially reduce leakage and wear
  LEWIS-10397 B68-10270 05

ALLER, J. H., Sr.

- Lathe attachment used to machine elliptical cones
  M-100 B65-10168 05

ALLEN, L. B.

- Method of directing a laser beam with very high accuracy
  N-10187 B69-10508 02

ALLAN, W. K.

- Travelling-wave tube circuit simplifies microwave relay
  GSFC-299 B65-10127 01

ALLER, W. W.

- Automatic calibration apparatus for telemetry systems
  NPO-10540 B68-10514 01

ALLISTON, W.

- Master control data handling program uses automatic data input
  N-P5-2259 B67-10280 06

ALMOND, J. C.

- New computer program solves wide variety of heat flow problems
  N-P5-421 B66-10400 01

ALBROTH, E. G.

- Computer program analyzes Buckling of Shells Of Revolution with various wall constructions
  NPO-10150 B68-10226 06

ALRASBY, W. N.

- Instrument transmits vanishing point to illustration point
  MSC-207A B66-10324 01

AMBRUCH, R.

- Digital computer technique for setup and checkout of an analog computer
  N-FS-13969 B68-10576 06

AMBER, W. E. G.

- Technique developed for measuring transmittance of optical birefringent networks
  N-FS-14267 B68-10260 02

- Synthesis of electro-optic modulators for amplitude modulation of light
  N-FS-14268 B68-10275 02

- Correction for losses in optical birefringent networks, a concept
  N-FS-20888 B68-10571 02

INDEX

PERSONAL AUTHOR INDEX

ANDERMAN, R. L.

- Pressure variable orifice for hydraulic control valve
  MSC-11233 B68-10120 05

ANASTASSII, L. J.

- Computer program developed for flowsheet calculations and process data reduction
  ARG-10134 B69-10023 06

ANDERSON, E. A.

- Electronic aperture control devised for solid state imaging system
  N-P5-12428 B68-10028 01

ANDERSON, G. E.

- Portable detector set discloses helium leak rates
  N-FS-1733 B67-10065 01

ANDERSON, J. W.

- Solenoid valve design has one moving part
  NPO-10039 B67-10219 05

ANDERSON, K. F.

- Ratio matching of half-bridge weldable strain gages, computer program
  FRC-10032 B69-10040 06

ANDERSON, R. J.

- Design eliminates radial thermal expansion in turbine stator components
  N-P5-18146 B68-10531 05

ANDERSON, W. R.

- Neutrons irradiation of Am-241 effectively produces curium
  AFS-10030 B67-10501 03

ANDERSON, T. G.

- Improved circuit minimizes generation time of pseudonoise check bits
  B65-10275 01

- Monitoring system determines amplitude and time of vibration channel peaks
  JPL-797 B66-10699 01

- A conceptual, parallel operating data compression processor
  NPO-10069 B67-10204 01

- Logic realization of simple majority voting connectives
  JPL-727 B67-10511 06

- Simple first order data compression processor concept
  NPO-10338 B67-10553 01

- Simplified, high-speed binary data decoder
  NPO-10118 B68-10058 01

- A method for reducing sampling jitter in digital control systems
  NPO-11089 B69-10338 01

- Simple quasi-exponential slope generator
  NPO-11130 B69-10439 01

- Simplified, reliable circuit sorts binary numbers in order of magnitude
  NPO-10172 B69-10503 01

- Design for a rapid automatic sync acquisition system
  NPO-10214 B69-10538 01

ANDERSON, W. J.

- Control of component differential hardness increases bearing life
  LEWIS-190 B65-10251 05

- Shallow grooves in journal improve air bearing performance
  LEWIS-10396 B68-10134 05

- Bearings use dry self-lubricating cage materials
  LEWIS-10432 B68-10165 05

- High-temperature bearing-cage materials
  LEWIS-10403 B68-10176 05

- High-temperature bearing lubricants
  LEWIS-10408 B68-10249 05

ANDERSON, W. W., JR.

- Calorimeter accurately measures thermal radiation energy
  Langley-173 B66-10058 02

ANDERSON, C. A.

- Improved first order interpolator
  MSC-11085 B68-10291 02

ANDERSON, S. D., JR.

- Aerial-image enables diagrams and animation to be inserted in motion pictures
  ARG-165 B67-10398 02

ANGELIE, V.

- Contact-spring forming machine for flat
ANGELL, C. A. Hydrated multivalent cations are new class of molten salt mixtures. ARG-211  B67-10033  03

ANHIS, J. P. Rate of heat extraction controller for environmental control. E-10310  B69-10516  01

APPEN, R. H. Adjustable thermal **tree**. RSC-15556  B69-10648  01

APPTRAM, R. B. Synthesis of perbromates. ARG-10459  B69-10647  03

ARMS, F. R. Detector measures power in 50 to 30,000 GHz radiation band. EBC-26  B66-10581  01

ARNEB, W. Z. Modular chassis simplifies packaging and interconnecting of circuit boards. JPL-236A  B63-10174  01

ARGENTINO, F. D. The t square statistic and goodness of fit test. GSFC-10547  B68-10136  02

ARGOUD, M. J. Protective clothing for workers with 5-kW and 20-kW short-arc lamps. ARG-1155  B69-10218  01

ARYAS, A. Improved retort for cleaning metal powders with hydrogen. LEWIS-10716  B69-10468  03

ARMBRIGHT, N. C. Cooled miniature pressure transducers effective at high temperatures. LEWIS-10401  B68-10370  01

ARMSTRONG, G. C. System transmits mechanical vibration into hazardous environment. M-0025  B65-10248  05

ARMSTRONG, G. M. Development of low temperature battery. LEWIS-10326  B67-10546  01

ARMSTRONG, J. L. Laboratory arc furnace features interchangeable hearths. ABO-125  B67-10052  05

ARMSTRONG, T. W. Deep gamma ray penetration in thick shields. E-PS-14380  B68-10143  02

ARMSTRONG, W. P. Flow properties of suspensions rich in solids. ARG-10481  B69-10622  02

ARNST, G. D. BF noise suppression using the photodielectric effect in semiconductors. RSC-12259  B69-10225  01

ARNST, J. H. Optical device enables small detector to see large field of view. WO-253  B66-10263  02

ARNOLD, J. G. A computer program for a line-by-line calculation of spectra from diatomic molecules and atoms assuming a Voigt line profile. ABC-10221  B69-10232  06

ARNOTT, R. J. Electrolytic separation of crystals of transition-metal oxides. ABO-10506  B69-10642  03

ARREST, J. D. Zirconium-nitrogen reaction investigated for application to gettering systems. ARG-10208  B68-10144  03

ARRANCE, B. C. Improved anode design for metal-oxygen cells. LEWIS-10371  B69-10318  01

AROTTE, J. S. Threading hook facilitates safe recovery of heavy loads. M-04-46  B69-10185  05

ASHBROOK, R. L. New cobalt alloys have high-temperature strength and long life in vacuum environments. LEWIS-47  B63-10351  03

ABEST, W. C. Dewpoint temperature inversions analyzed. ARG-10316  B69-10057  02

ASTON, R. Multidimensional reaction kinetic ablation program / RHEKAP/ M-10079  B67-10495  06

ATTISSON, M. A. Coaxial capacitor used to determine fluid density. LEWIS-232  B65-10296  02

ATLA, N. D. Comfortable, lightweight safety helmet holds radio transmitter, receiver. M-53  B64-10015  05

ATOJ, E. Neutron diffractometer allows both magnetic and crystallographic analyses. ARG-191  B67-10131  02

ATTWOOD, S. W. Phase-lock loop frequency control and the dropout problem. E-FS-13948  B68-10130  01

AAMASON, J. L. Communication system features dual mode range acquisition plus time delay measurement. M-PS-14323  B68-10306  01

AUGOAL, F. Rotation fluid coupling eliminates hose entanglements. HSC-312  B66-10585  05

AULT, E. M. Survey made of refractory metals. LEWIS-10380  B68-10032  03

AUTIO, J. G. Compact cartridge drives coded tape at constant readout speed. JPL-472  B68-10222  01

AUTIO, J. G. Viscosity and density of methanol/water mixtures at low temperatures. E-PS-14991  B68-10274  03

AUTIO, W. L. Estimating reliability by application of matrix representation. M-10286  B69-10793  02

AUTLEB, R. A. Mechanism of superconductivity investigated by nuclear radiation E-FS-1944  B67-10057  02

AVERY, H. W. Device spot-laps spheres to very close tolerances. JPL-SC-119  B66-10175  05

Hollow spherical rotors fabricated by electroplating. JPL-SC-117  B66-10366  05
AYELE, J. E.
Mathematical relation predicts achievable densities of compacted particles
ARS-10082 B67-10592 03

AYELE, J. E.
System for measuring spatial distribution of ejected droplets, a concept
NPO-10165 B68-10402 01

BAEBLE, C. V.
Measurements of thermoelectric power in annealed and quenched gold-platinum alloys
ARS-10303 B69-10206 03

BABA, P. R.
Miniaturization of magnetic logic circuitry
LANGLEY-10037 B69-10148 06

BABINE, B. D.
Technique for stripping Teflon insulated wire
HPS-1774 B67-10048 05

BACHE, W. H.
A mechanically extendible boom
NPO-11118 B69-10328 05

BACICAPUI, A. J.
Spherical model provides visual aid for cubic crystal study
LEWIS-108 B65-10065 03

BADSTEIN, C. G.
Phase-locked-loop phase modulator with high modulation index, low distortion
MSC-12247 B69-10487 01

BALKIILL, R. V.
New method used to fabricate light-weight heat exchanger for rocket motor
WIS-43 B63-10346 02

BAKER, V. R.
Recharge unit provides for optimum recharging of battery cells
ARINC-10688 B68-10273 01

BAKER, H. H.
ANalog solar system model relates celestial bodies spatially
JPL-195 B66-10413 01

BAKERS, W. G.
Effect of interparticle forces on the fluidization of fine particles
ARS-10264 B69-10195 03

BAILEY, B. N.
Cryogenic flux-concentrator
GSPC-10654 B69-10564 02

BAILEY, J. W.
Electronic assembly rack panels snap on and off
GSFC-59 B64-10121 05

BAILEY, L. R.
Cryogenics: an overview of present and future trends in superconductivity and its application
GSFC-152 B69-10247 01

BAILEY, R.
A special system for radiation detector
ARS-10160 B68-10113 02

BAILEY, W. N.
Study made of ductility limitations of aluminum-silicon alloys
ARS-12524 B67-10392 03

BAJOWIZE, W.
Connect-disconnect coupling for preadjusted rigid shafts
MSC-12470 B69-10375 05

Baker, E. B.
Readout system for radiation detector
RSOC-10160 B68-10501 01

Baker, C. D.
An improved method for electrical cable terminations
NPO-10694 B69-10327 01

Baker, R. B.
Pressure transducer
NPO-10364 B69-10364 01

Baker, R. D.
Quick-set temporary bonding clamps
NPO-10695 B69-10406 03

Baker, V. L.
Combustion chamber inlet manifold separates vapor from liquid
HPS-531 B66-10052 05

Baker, D. L.
Stationary device produces homogeneous mixture of fluids
HPS-525 B66-10570 05

BAKER, E. H.
Static structural analysis of shell-type structures
MSC-11552 B68-10066 03

BAKER, E. U.
Cut-through tester accurately measures insulation failure rates
M-FS-12506 B67-10354 03

BAKER, L. B.
Plotter design simplifies determination of image sensor transfer characteristic
NPO-10164 B67-10206 01

BAKER, L. J.
Ignition of binary alloys of uranium
NPO-10057 B68-10280 01

BAKER, R.
Bidirectional torque filter eliminates backlash
GSPC-335 B65-10148 05

BAKER, W. H.
Ultrasonics permits brazing complex stainless steel assembly without flux
NOS-10115 B67-10302 05

BALDWIN, J. M.
Laser microprobe facility used in the elemental analysis of small feature of a sample
NPO-10359 B69-10165 02

BALDWIN, L. V.
Cooling method prolongs life of hot-wire transducer
LEWIS-81 B63-10344 02

BALES, T. T.
Thoriated nickel bonded by solid-state diffusion method
LANGLEY-116 B65-10220 03

BALLEW, J. T.
Method of making coaxial fiber optical components
XRP-09745 B69-10020 02

BALL, L. L.
Tomography thermal neutron dosimeter
LEWIS-10880 B69-10249 02

BALL, N.
Triple Modular Redundancy /TMR/ computer operation improved
MSC-831 B67-10085 01

BALLEW, J. T.
Computerized Schedule Effectiveness Technique /SET/ determines present and future schedule position
M-FS-13012 B67-10522 06

BALLOW, V. J.
Flared-tube fittings with replaceable seat inserts
MSC-15372 B69-10519 05

BAND, K. H.
Lightweight universal joint transmits both torque and thrust
JPL-375 B63-10236 05

BANFORD, R. H.
A modal combination computer program for dynamic analysis of structures
NPO-10129 B67-10217 06

BANFORD, R. H.
Computer program performs stiffness matrix structural analysis
NPO-10502 B68-10096 06

BANDLIN, M.
Multiple meter monitoring circuits served by single alarm
MSC-10694 B67-10369 01

BANCE, W. M.
Sodium perxenate permits rapid oxidation of manganese for easy spectrophotometric determination
NPO-262 B67-10421 03

BANKS, D. L.
Reducing bubbles in glass coatings improves electrical breakdown strength
LEWIS-10278 B68-10214 03

BANKS, D. A.
Glass coated single grid for charged
particle acceleration
LEWIS-10106 B68-10215 03

BANKS, W.
Series transistors isolate amplifier from flyback voltage
MSC-11023 B67-10468 01

BANKSTON, B. Y.
Stress-corrosion-induced property changes in aluminum alloys
M-FS-20209 B68-10568 03

BARBOUR, J. R.
Universal transloader moves delicate equipment without stress
MSC-654 B68-10384 05

BAREISS, B. T.
Toggle operated double latch
MSC-11377 B68-10117 05

BARDOS, R. D.
Study reveals effect of aluminum on saturation moment of Fe-Ni alloys
ARG-90840 B68-10172 03

BAUER, E. H.
Linear systems of equations solved using mathematical algorithms
ARG-10184 B68-10292 06

BEACH, J. J.
Fluid-bed fluoride volatility process recovers uranium from spent uranium alloy fuels
ARG-232 B67-10032 03

BAULL, R. H., JR.
Fortran 4 program for two-impulse rendezvous analysis
M-FS-13971 B67-10479 06

BARNES, R. F.
Improved dc voltage regulator
IKS-06467 B69-10369 01

BARRANGER, J. P.
Process yields Co-Fe alloys with superior high temperature magnetic properties
LEWIS-333 B66-10535 03

BARETT, C. A.
Precise doping of metals by small gas flows
LEWIS-10444 B68-10526 03

BARTHOLOMEW, R. C.
Process controls introduction of selected impurities into semiconductor wafers
GSFC-253 B67-10303 01

BARTLET, D. H.
Fiber glass reinforced structural materials for aerospace application
M-FS-14806 B68-10360 03

BAXTER, B.
Effect of preparation procedures on intensity of radioautographic labeling in studied
ARG-10332 B67-10500 04

BASILL, L. J.
Daughter growth in freshly separated Na-226, Ac-227 and U-232
ARG-10226 B69-10003 02

BASELIS, A.
Distillation device supplies cesium vapor at constant pressure
IMP-00126 B68-10020 03

BASLOW, H. W.
Seater control circuit provides both fast and proportional control
M-FS-206 B67-10097 01

BASTINN, E. C.
Multilayer infrared beamsplitter film system
IGS-11036 B69-10260 02

BASTONI, J. G.
An overview of electromagnetic interference problems in spacecraft
NPO-11770 B69-10362 01

BATCHelor, B.
Computer program performs stiffness matrix

structural analysis
NPO-10502 B68-10096 06

BATES, L. E., JR.
Low rate flow switch can be used for gas or liquid
JPL-967 B66-10696 01

BATSCH, F. P.
Elastic orifice automatically regulates gas bearings
JPL-113 B68-10123 03

BATTEN, W. G.
Exclusive-or logic circuit has useful properties
LANGLEY-214 B66-10272 01

BATTLES, J. E.
Neutron-spectroscopic study of the rhodium-oxygen system
NPO-10421 B69-10645 02

BAUDE, J.
Signal generator converts direct current to multiphase supplies
MSC-11043 B67-10368 01

BAUER, B. E.
Electronic dummy for acoustical testing
MSC-206 B67-10298 01

BAURENRUBEN, J. R., JR.
Explosives actuate nonmagnetic indexing device
GSFC-237 B65-10017 05

BAUER, E. A.
High-temperature, gas-filled ceramic rectifiers, thyatrons, and voltage-reference tubes
LEWIS-90271 B69-10376 01

BAUMAN, G. J.
Solder flux leaves corrosion-resistant coating on metal
JPL-611 B64-10206 03

BAUER, W. E.
Reusable chelating resins concentrate metal ions from highly dilute solutions
JPL-758 B66-10451 03

BAWNER, C.
Circuit counts pulses and indicates time of occurrence of slow pulses
XM-06234 B69-10313 01

BEACH, R.
Measurement of mechanical properties of uranium compounds
ARG-10074 B68-10197 03

BECKER, B. D.
Study of mechanisms of the occurrence of slow pulses
JPL-610 B66-10100 02

BECK, C. C.
Visual attitude orientation and alignment
MSC-647 B67-10120 02

BECK, R.
Modified interelement spacing improves Yagi antenna array
LANGLEY-150 B65-10183 01

BECK, P. A.
Study reveals effect of aluminum on saturation moment of Fe-Ni alloys
ARG-90259 B68-10172 03

BECKER, G. W.
Testing device subjects elastic materials to biaxial deformations
JPL-616 B65-10189 03

BECKER, R. H.
Superconductive thin film aterS convenient
Beckley, J. K., Jr.

Liquid helium level sensor

Beckley, J. E., Jr.

Tool permits damage-free removal of solar cell

GSPC-467

Beckwith, W. B.

Wideband, high efficiency optical modulator requires less than 10 watts drive power

E-PS-12733

Bedard, W. E.

Automated patient monitoring system

E-PS-10552

Beer, J.

Unique construction makes interferometer insensitive to mechanical stresses

E-65-10295

Beere, D. R.

System measures unidirectional forces, excludes extraneous forces

LEWIS-170

Bell, V. L., Jr.

Irradiation improves properties of an aromatic polyester

LANGLEY-115

Polymer film exhibits thermal and radiation stability

LANGLEY-100

Bell, M. E.

Electrodes discharge lamp is easily started, has high stability

E-66-10015

Belmont, G. E.

Teflon-packed flexible joint

LEWIS-9252

Bennah, T. Y.

Jet engine powers large, high-temperature wind tunnel

E-PS-13544

Bennett, A. G.

Computer program for mass optional solutions of some endpoint trajectory problems

E-PS-12976

Earth orbit rendezvous evaluation program

E-PS-13016

Computer program offers new method for constructing periodic orbits in nonlinear dynamical systems

E-PS-14654

Bennett, L. F.

Four pi recoil proportional counter used as neutron spectrometer

ARU-10101

Bennett, G. A.

Use of steel and tantalum apparatus for solenoid Cd-My-Zn alloys

ARG-199

- Method permits mechanical and electrical checkout of piezoelectric transducers while installed in a system
- White primer permits a corrosion-resistant coating of minimum weight
- Dual regulator controls two gases from a single reference
- Channel-wall limitations in the magnetohydrodynamic induction generator
- Study made of anodized aluminum circuit boards
- New camera tube improves ultrasonic inspection system
- Instrument continuously measures density of flowing fluids
- Improved gyro-flotation /damping/ fluids
- Self-sustained hydrodynamic oscillations in a natural-circulation two-phase-flow boiling loop
- Offset lenses add versatility to photoprinting machine
- Silicon surface barrier detectors used for liquid hydrogen density measurement
- Pickup device reads pressures from ports in rotating mechanisms
- Rhodium-plated barrier against high-temperature fusion bonding
- Synchronized pulse generator needs no external power
- Continuous wave detector has wide frequency range
- Experiments shed new light on nickel-fluorine reactions
- Computer program aids dual reflector antenna system design
- Crucible cast from beryllium oxide and refractory cement is impervious to flux and molten metal
- Magnetic forcing studies
- Power arc welder touch-started with consumable electrode
- Surface profiler for examining grain-boundary grooves
- Electro pneumatics rheostat regulates high current
- Computer programs calculate potential and charge distributions in a plasma

JENKINS, R. S.

Low level accelerometer test methods are used to determine high-frequency phase stability of electromechanical drive systems.

A method for observing gas evolution during reaction in thin films is described. The technique involves the use of a quartz crystal microbalance and a high vacuum system.

Study made of resistance of stainless steels to zinc-vapor corrosion.

A new shield for gamma-ray spectrometry is described. The shield consists of a lead panel with a thin aluminum window.

A new microelectronic power amplifier is described. The amplifier is designed for use in high-power applications.

Computer program performs statistical analysis for random processes.

New shield for gamma-ray spectrometry.

Radiation tolerant silicon nitride insulated gate field effect transistors are studied. The devices are capable of withstanding high temperatures.

Computer program performs statistical analysis for random processes.

Detection and location of metallic objects using a glancing incidence telescope for far ultraviolet and soft X-rays is described. The telescope is designed to detect metallic objects at a range of distances.

A new microelectronic power amplifier is described. The amplifier is designed for use in high-power applications.

Detection and location of metallic objects using a glancing incidence telescope for far ultraviolet and soft X-rays is described. The telescope is designed to detect metallic objects at a range of distances.

Use of steel and tantalum apparatus for study of molten Cd-Ifg-Zn alloys.

New microelectronic power amplifier is described. The amplifier is designed for use in high-power applications.

Shotgun timer provides quick opening of segment valve.

Screen of cylindrical lenses produces stereoscopic television pictures. The technique involves the use of cylindrical lenses to produce a three-dimensional image.

Computer program performs statistical analysis for random processes.

New microelectronic power amplifier is described. The amplifier is designed for use in high-power applications.

New shield for gamma-ray spectrometry is described. The shield consists of a lead panel with a thin aluminum window.

Radiation tolerant silicon nitride insulated gate field effect transistors are studied. The devices are capable of withstanding high temperatures.

New shield for gamma-ray spectrometry is described. The shield consists of a lead panel with a thin aluminum window.

Direct force-measuring transducer used in blood pressure research.

Bimetallic strain gage provides audible signal to facilitate checkout of connector pins.

Technique for abrasive cutting of thick-film conductors for hybrid circuits is described. The technique involves the use of a abrasive wheel to cut the conductors.

lightweight gas sampling system

Pulsed high-voltage dc RF sputtering

A piezo-bar pressure probe

Test device prevents molecular bounce-back

Heater decomposes oil backstreaming from high-vacuum pumps

Fastener distributes stress evenly from sandwich-panel-hung items

Rugged switch responds to minute pressure differentials

Tester automatically checks insulation of individual conductors in multiple-strand cables

Automated tester permits precise calibration of pressure transducers from 0 to 1050 psi

Neutron therapy of cancer

Effect of surface irregularities on yellow fatigue life

Tunnel diode circuit used as a nanosecond-range time marker

Monitor senses amount of contamination deposited on surfaces

Distillation device supplies cesium vapor at constant pressure

Xenon fluoride solutions effective as fluorinating agents

Thermionic diode switching has high temperature application

Lithium-tellurium bimetallic cell has increased voltage

New bimetallic EMF cell shows promise in direct energy conversion

Technical report on galvanic cells with fused-salt electrolytes

Analysis of secondary cells with lithium anodes and immobilized fused-salt electrolytes

Analysis of cell performance and thermal regeneration of a lithium-tin cell having an immobilized fused-salt electrolyte

Self-discharge in bimetallic cells containing alkali metal

Thermal cycle deviations

X-ray source uses interchangeable target anodes to vary X-ray wavelength

Fluid properties handbook

Pigmeat

Optimum structural design based on reliability and proof-load testing

Analysis of problems related to slingshot shock machine high-velocity shock testing

Weld microfissuring in Inconel 718 minimized by minor elements

Miniature oxygen-hydrogen cutting torch constructed from hypodermic needle

</table>
Solid-film lubricant is effective at high temperatures in vacuum. Lead oxide ceramic makes excellent composites of porous metal and solid lubricants. Evaluation of lubricants for ball bearings at high temperatures shows a new solid lubricant effective. 

Circuitry selectively limits data storage in general purpose computer. Cardiotachometer will fit on single silicon chip. 

Calculation of resonance neutron absorption in two-region problems/the GMOL code/LEWIS-10065. 

A theoretical model for determining turbine efficiency—production of iodine-123.

Rubber-coated bellows improves vibration damping in vacuum lines.

A new low-level a-c amplifier provides improved frequency response in passive nonreciprocal networks. 

A new solid lubricant increases bearing life at high temperatures. 

Rubber-coated bellows improves vibration damping in vacuum lines.

A new experimental laser is effective at high temperatures. 

A new design concept for pressure switch calibrator reduces costs. 

A new fluid film damper provides accurate calibration of pressure switch. 

A new electronic module is effective at high temperatures.

A new solid lubricant increases bearing life at high temperatures.

A new solid lubricant increases bearing life at high temperatures.

Originator/Tech Brief Number Index

The left hand column identifies the originator number; to the right of each originator number is the Tech Brief number, e.g., B69-10063, followed by a two-digit number, e.g., 01, which identifies the subject category containing the entire citation.

Tech Brief/Originator Number Index

The left hand column identifies the Tech Brief number, e.g., 863-10003, followed by a two-digit number, e.g., 01, which identifies the subject category containing the entire citation. Following the subject category number is the originator number.

NASA-Langley, 1970 – 34
I-877
"The aeronautical and space activities of the United States shall be conducted so as to contribute . . . to the expansion of human knowledge of phenomena in the atmosphere and space. The Administration shall provide for the widest practicable and appropriate dissemination of information concerning its activities and the results thereof."

— National Aeronautics and Space Act of 1958

NASA TECHNOLOGY UTILIZATION PUBLICATIONS

These describe science or technology derived from NASA's activities that may be of particular interest in commercial and other non-aerospace applications. Publications include:

TECH BRIEFS: Single-page descriptions of individual innovations, devices, methods, or concepts.

TECHNOLOGY SURVEYS: Selected surveys of NASA contributions to entire areas of technology.

OTHER TU PUBLICATIONS: These include handbooks, reports, conference proceedings, special studies, and selected bibliographies.

Details on the availability of these publications may be obtained from:

National Aeronautics and Space Administration
Code UT
Washington, D.C. 20546

Technology Utilization publications are part of NASA's formal series of scientific and technical publications. Others include Technical Reports, Technical Notes, Technical Memorandums, Contractor Reports, Technical Translations, and Special Publications.

Details on their availability may be obtained from:
