Dual-purpose chamber-cooling system
MPO-10467  B68-10506  02
Properties of air and combustion products of fuels with air
LEWIS-11030  B69-10711  03

GAS VALVES
Probe measures characteristics of hot gas stream
M-PS-240  B65-10133  02
Vapor pressure measured with inflatable plastic bag
GSFC-281  B65-10136  03
Quick-closing valve is actuated by explosive discharge
ABC-55  B66-10233  05
Pneumatic binary encoder replaces multiple solenoid system
M-PS-665  B66-10374  01
Gas-injection valve operates at high speed
EQ-49  B66-10381  05
Modified McLeod pressure gage eliminates measurement errors
ABC-62  B66-10481  01
System automatically supplies precise analytical samples of high-pressure gases
M-PS-1814  B67-10090  01
Piezoelectric linear actuator
KSC-13104  B69-10469  02
Chromatographic detection and analysis of traces of hydrocarbons
KSC-10386  B69-10716  02

GAS VISCOSITY
Direct indication of particle size in fluidized beds
ABG-10130  B69-10083  05

GAS WELDING
Simple device facilitates inert-gas welding of tubes
M-PS-558  B66-10155  05
Effect of welding position on porosity formation in aluminum alloy welds
M-PS-2518  B67-10177  05
Microprobe investigation of brittle segregates in aluminum KIG and TIG welds
M-PS-14720  B68-10334  03

GASEOUS DIFFUSION
Cryogenic filter method produces super-pure helium and helium isotopes
JPL-374  B63-10235  03
Impurity diffusion process for silicon

SUBJECT INDEX
Semiconductors is fast and precise
GSFC-397  B65-10300  01
Gas diffuser facilitates withdrawal of cryogenic liquids from tanks
M-PS-397  B66-10342  05
Reducing bubbles in glass coatings improves electrical breakdown strength
LEWIS-10278  B68-10214  03
Device separates hydrogen from solution in water at ambient temperatures
MSC-13335  B69-10635  03

GASEOUS ROCKET PROPELLANTS
One-dimensional reacting gas nonequilibrium performance program
MSC-11777  B66-10375  06

GASES
Filter for high-pressure gases has easy take-down, assembly
JPL-373  B63-10234  03
Pulsed plasma accelerator operates repetitively without complex controls
LANL-48  B65-10062  01
Special treatment reduces helium permeation of glass in vacuum systems
EQ-25  B66-10372  02
Selective tube roughening increases heat transfer capability
M-PS-599  B66-10610  05
Between-bearing shaft seal, a concept
M-PS-18179  B68-10286  02
Mass spectograph analysis
M-PS-13239  B69-10112  02
Coatings decrease metal fatigue failure
ARC-10015  B69-10134  06
Handbook for design of containers of fluids and gases for spacecraft
M-PS-20502  B69-10279  05
Leakage tester for flat conductor cable connector
M-PS-20927  B69-10284  05
Spiral-flow apparatus for measuring permeation of solids by gases
M-PS-16517  B69-10357  03
Concept for improved vacuum pressure measuring device
M-PS-20172  B69-10421  02
High voltage pulse generator
MSC-12178  B69-10548  01
Molecular radiation - Its application in physical measurements and analyses
M-PS-14016  B69-10562  02
Control for maintaining constant level of a cryogenic liquid
WPO-11177  B69-10573  05
Elimination of dissolved gases in hypergolic engine propellants
M-PS-16179  B69-10692  03

GASKETS
Flexible plastic ring assembly makes durable shaft seal

</table>
High-speed camera synchronization

Fluiddic-thermochromic display device

Circuitry selectively limits data storage in general purpose computer

Multichannel analyzers at high rates of input

Linear voltage-to-frequency converter

An electronic circuit for sensing malfunctions in test instrumentation

Automatic tuning of hydrogen masers

Simplified, reliable circuit sorts binary numbers in order of magnitude

Pulse-code-modulation baseline correction for low signal-to-noise ratio

GATEs (OPENINGS)

Gate value with ceramic-coated base operates at high temperatures

Low-power transistorized circuit provides staircase waveform

GAUSS EQUATION

Computer program VARI QUIR 3 provides solution of steady-state, multigroup, two-dimensional neutron diffusion equations

Conditioning of pulses from aerosol-particle detectors

GEAR

Chain friction system gives positive, reversible drive

Self-lubricating gear

GEAR TEETH

Device measures curved surface finish on gear teeth

Rotating filters permit wide range of optical pyrometry

Unique gear design provides self-lubrication

Gear drive automatically indexes rotary table

GEARS

Shock absorber protects motive components against overloads

Bidirectional torque filter eliminates backlash

Hydraulic drive system prevents backlash

Unique gear design provides self-lubrication

SUBJECT INDEX

Torque wrench designed for restricted areas

Modified power tool rapidly drives series torque bolts

Sun-in with chemical additive protects gear surface

Intermediate rotating ring improves reliability of dynamic shaft seal

Compact actuator converts rotary to linear motion

Gear drive automatically indexes rotary table

Concept of planetary gear system to control fluid mixture ratio

Positive displacement cylinder measures corrosive liquid volume

Fluid logic control circuit operates nutator actuator sotor

Holc saw drill attachment has zero force reaction

Welding torch and wire feed manipulator

Hydraulic system provides smooth control of large tracking and antenna drive systems at very low tracking rates

Improved control system power unit for large parachutes

Electromechanical rotary actuator operates over wide temperature range

Magnetron tuner has locking feature

Diffusion bond method of jointing steel and a TFS-bronze composite

Precise gimbaling mechanism

Automatic leveling and equalizing hoist device

Improved camera for better X-ray powder photographs

GEIGER COUNTERS

Automatic bird watcher

Life detection

GELATINS

Gelatin coated electrodes allow prolonged bioelectronic measurements

Rate constants measured for hydrated electron reactions with peptides and proteins

I-28a

Glass coated single grid for charged particle acceleration

LEWIS-10106 B68-10215 03

Vacuum-type backup bar speeds weld repairs

M-PS-12 B62-10384 05

Flexible honeycomb structure can bend to fit compound curves

M-PS-13 B63-10305 05
Integral coolant channels supplied by pelt-out method

Flexible curtain shields equipment from intense heat fluxes

Fiber glass parts cured during filament winding eliminates oven, saves time

Fiber glass dies speed forming of large metal sheets

Adhesive-backed terminal board eliminates mounting screws

Aluminized fiberglass insulation conforms to curved surfaces

Spray-on technique simplifies fabrication of complex thermal insulation blanket

Hydrogen-atmosphere induction furnace has increased temperature range

Reflective insulator layers separated by bonded silica beads

Polytetrafluoroethylene lubricates ball bearings in vacuum environment

Nylon bit removes cork insulation without damage to substrate

Insulation for cryogenic tanks has reduced thickness and weight

Fiberglass container shells form contamination-free storage units

Stripppable grid facilitates removal of grid-surfaced conical workpiece from die

Inexpensive insulation is effective for cryogenic transfer lines

Composite gaskets are compatible with liquid oxygen, resist compression set

Electrical cabling withstands severe environmental conditions

Study made to control depth of potting compound for honeycomb sandwich fasteners

Nonwoven glass fiber mat reinforces polyurethane adhesive

Inexpensive cryogenic insulation replaces vacuum jacketed line

Liquid crystals detect voids in fiber glass laminates

Improved compression molding process

Jacketed cryogenic piping is stress relieved

M-PS-562 B66-10033 03

Developmental instrument supplies accurate attitude and attitude-rate data
HQ-57 B66-10607 01

Conceptual nonorthogonal gyro configuration for guidance and navigation
MSC-11363 B67-10433 01

Stable ac phase and amplitude comparator
M-PS-13086 B67-10459 01

Squeeze-fill gas bearing technology
M-PS-14821 B66-10180 05

Laser system used for dynamic balancing of gyros
M-PS-12218 B66-10225 05

Improved gas ring laser
MSC-11584 B66-10304 02

Compensation of pulse-rebalanced inertial instruments
MSC-13098 B69-10216 01

HAPTM

High-strength tungsten alloy with improved ductility
LEWIS-10257 B67-10340 03

HAPTN ALLOYS

New tungsten alloy has high strength at elevated temperatures
LEWIS-336 B66-10551 03

HAPTN OXIDES

Protective coating withstands high temperature in oxidizing atmosphere
M-PS-529 B66-10044 03

HAIL

Simulated hailstone fabrication and use in testing weatherability of structures
NPO-10783 B66-10552 03

HALIDES

Welding, brazing, and sealing of refractory metals by vapor deposition
LEWIS-123 B67-10232 03

Improved high-temperature silicide coatings
LEWIS-10617 B66-10266 03

Improved gyro-flotation /damping/ fluids
MSC-13217 B66-10360 03

Improved retort for cleaning metal powders with hydrogen
LEWIS-10718 B69-10466 03

Analysis of secondary cells with lithium anodes and immobilized fused-salt electrolytes
M-PS-10404 B69-10613 01

HALL EFFECTS

System measures arc energy dissipated in relay contact cycling
M-PS-10454 B68-10312 01

HALOGEN COMPOUNDS

Xenon fluoride solutions effective as fluorinating agents
ARG-217 B67-10133 03

Fire retardant foams developed to suppress fuel fires
ARG-10098 B66-10358 03

Zone purification of potassium chloride
ARG-10377 B69-10241 03

HALOGENATION

Synthesis of various highly halogenated monomers and polymers
M-PS-2143 B67-10100 03

Fire retardant foams developed to suppress fuel fires
ARG-10098 B66-10358 03

HALOGENS

Silazane elastomer remains resilient at 400 deg C
M-PS-1144 B66-10667 05

I-294
SUBJECT INDEX

Primary cells utilize halogen-organic charge transfer complex JPL-926 B66-10682 02

HAMMER
Versatile impact hand tool NF-20140 B66-10371 05

HAMSTER
Study of radiation effects on mammalian cells in vitro AHS-10191 B66-10294 02

HANDBOOKS
Pyrometry handbook describes practical aspects of surface temperature measurements of opaque materials LNWS-349 B66-10520 01
Materials data handbooks prepared for aluminum alloys 2014, 2219, and 5052, and stainless steel alloy 301 M-PS-1959 B67-10089 03
Materials data handbook, Inconel alloy 718 M-PS-2348 B67-10282 03
Materials data handbook, aluminum alloy 7075 M-PS-2349 B67-10301 03
Handbooks describe eddy current techniques used in nondestructive testing of metal parts and components M-PS-13172 B67-10374 03
Fluid properties handbook M-PS-13462 B67-10840 03
Handbook of cryogenic data in graphic form KSC-10009 B67-10610 02
Training manuals for nondestructive testing using magnetic particles M-PS-20187 B68-10391 03
Contamination control handbook M-PS-20185 B68-10392 03
Failure rates for accelerated acceptance testing of silicon transistors BRC-10198 B68-10541 01
Thermal expansion properties of aerospace materials M-PS-18335 B69-10055 03
Materials data handbook, aluminum alloy 6061 M-PS-20381 B69-10065 03
Tube welding and brazing M-PS-20348 B69-10085 05
Handbooks for nondestructive testing using ultrasound M-PS-20409 B69-10108 03
Welding, brazing, and soldering handbook M-PS-20504 B69-10264 05
Sterilization training manual M-PS-20437 B69-10277 04
Handbook for design of containers of fluids and gases for spacecraft M-PS-20502 B69-10279 05
Microelectronic device handbook BRC-10322 B69-10687 01
Handbook explaining the fundamentals of nuclear and atomic physics BRC-10330 B69-10705 02

HANDLES
Special pliers connect hose containing liquid under pressure JPL-IX-1003 B63-10291 05
Heavy-duty staple remover operated by hand JPL-IX-1004 B63-10292 05
Electronic assembly rack panels snap on and off GSFC-59 B64-10121 05
Torque wrench designed for restricted areas LEWIS-246 B66-10011 05
T-handle wrench has torque-limiting action MSC-200 B66-10065 05
Fingertip current control facilitates use of arc welding gun MSC-289 B66-10092 05
Latching mechanism operates in limited access area MSC-230 B66-10338 05
Tool facilitates installation of Marmon clamps M-PS-2039 B67-10105 05
Coaxial cable stripping device facilitates RF cabling fabrication MPO-10315 B67-10149 05

HANDLING EQUIPMENT
Filler device for handling hot corrosive materials MSC-05 B64-10166 03
Remotely operated clamping tool has positive grip NO-0020 B65-10254 05
Hollow plastic hoops protect thermocouple in storage and handling NO-0023 B65-10256 05
Dispenser leak-tests and sterilizes rubber gloves MSC-205 B66-10166 03
Universal transloader moves delicate equipment without stress MSC-658 B66-10384 05
Apparatus for fabrication of americium-beryllium neutron sources prevents capsule contamination ARG-104 B67-10202 05
Detachable caster adapter MSC-91215 B69-10164 05
Proposed technique for vertical alignment of a crane's cable M-PS-16496 B69-10202 05

HANKEL FUNCTIONS
Analysis of transient thermal stress in heat-generating plates and hollow cylinders caused by sudden environmental temperature changes ARG-10274 B69-10047 02
Numerical inversion of finite Toeplitz matrices and vector Toeplitz matrices ARG-10445 B69-10415 02

HARDWARE
Stringent cleaning technique assures reliable epoxy bond GSFC-161 B64-10142 03
Epoxy blanket protects milled part during explosive forming M-PS-307 B66-10029 03
Sprayable birefringent coating enables strain measurements on large surfaces M-PS-1084 B66-10578 03
Flowmeter determines mix ratio for viscous adhesives M-PS-2308 B67-10137 01

I-295
Removable preheater elements improve oxide induction furnace JPL-288 B63-10193 01

Quick-hardening problems are eliminated with spray gun modification which mixes resin and accelerator liquids during application LANGLEY-64 B63-10318 03

Boron-deoxidized copper withstands brazing temperatures N-FS-762 B66-10273 03

Quick-set temporary bonding clamps RPO-10695 B69-10406 03

Dry film lubricant is effective at extreme loads N-FS-626 B66-10256 03

Valve seat pores sealed with thermosetting monomer N-FS-900 B66-10322 03

Traveling wire electrode increases productivity of Electrical Discharge Machining / EDM/ equipment ABC-136 B67-10238 05

A new method for producing optical mirrors UQ-10227 B69-10529 02

Composite bulkhead fabrication development N-FS-1264 B66-10582 05

Computer program determines chemical equilibria in complex systems LEWIS-261 B66-10671 01

Data retrieval system provides unlimited hardware design information MSC-1144 B67-10170 01

Chemical milling solution reveals stress corrosion cracks in titanium alloy LANGLEY-10077 B67-10322 03

Multiple correlation computer program determines relationships between several independent and dependent variables N-FS-13024 B67-10327 06

Test device prevents weld joint damage by eliminating axial pin forces on unpotted modules LEWIS-16201 B67-10359 01

Eccentric drive mechanism is adjustable during operation N-FS-2576 B67-10373 05

Reidentifying hardware after loss of serial number N-FS-18133 B69-10059 05

Technique for assessing potential fire hazards HQ-10279 B69-10287 03

A method for using surface tension to determine the size of holes in hardware MSC-15194 B69-10595 03

Investigation of the development of cracks in solder joints N-FS-20448 B69-10807 01

Harmonic distortion analyzer speeds setup of magnetic tape recorders GSTC-10198 B68-10254 01

Large-amplitude inviscid fluid motion in an accelerating container MSC-11560 B68-10170 02

I-301
HEAT TRANSFER COEFFICIENTS

- Cooling of 2 kW H fuel cells
- Gage measures total radiation, including vacuum UV, from ionized high-temperature gases
- Instabilities encountered during heat transfer to a supercritical fluid
- Propagation of density disturbances in air-water flow
- Abrasion and resistant discharge valve developed
- Analysis of transient thermal stress in heat-generating plates and hollow cylinders caused by sudden environmental temperature changes
- Liquid-metal heat transfer in a cocurrent-flow, double-pipe heat exchanger is investigated
- Experimental prediction of performance by superconducting cables
- Effect of interparticle forces on the fluidization of fine particles
- Ultra-high-flux heat exchanger
- Improved liquid-level sensor for cryogenics
- Thermophysical properties of sodium
- Method for predicting pump cavitation performance
- A comparison of two methods of measuring particle size of Al2O3 produced by a small rocket motor
- Design of multilayer insulation systems
- New type pressure transducer for severe thermal environments
- Engineering thermal analyzer /BETA 2/

HEAT TRANSFER COEFFICIENTS

- Thin-film gage measures low heat-transfer rates
- Wide-range instrument monitors flow rates of chemically active fluids
- Bimetallic devices help maintain constant sealing forces down to cryogenic temperatures
- Computer program calculates steady-state temperature distribution within plane or axisymmetric solids

CINDA - Chrysler Improved Numerical

SUBJECT INDEX

- Differencing Analyzer computer program
- Evaluation of superconducting magnets, a study
- Heat transfer coefficients for liquid hydrogen turbopumps
- Monte Carlo direct view factor and generalized radiative heat transfer programs
- Instabilities encountered during heat transfer to a supercritical fluid
- Liquid-metal heat transfer in a cocurrent-flow, double-pipe heat exchanger is investigated
- A method for predicting interfacial freezing of a liquid flowing over a cold surface
- Technique for predicting temperature distribution in gases
- Surface-renewal models for heat-transfer between walls and fluidized beds
- New computer program solves wide variety of heat flow problems
- Experiments to investigate particulate materials in reduced gravity fields
- Solution of differential equations by application of transformation groups
- Computer program TRACK performs transient and/or steady state thermal analysis with coupled fluid flow and heat conduction
- Solving nonlinear heat transfer constant area fin problems
- Fiber glass parts cured during filament winding eliminates oven, saves time

HEAT TRANSMISSION

- Electronic device simulates respiration rate and depth
- Servo calorimeter measures material heating rate
- Apparatus measures thermal conductivity of honeycomb-core panels
- New computer program solves wide variety of heat flow problems
- Experiments to investigate particulate materials in reduced gravity fields
- Solution of differential equations by application of transformation groups
- Dynamics of moving bubbles in single and binary component systems
- Computer program TRACK performs transient and/or steady state thermal analysis with coupled fluid flow and heat conduction
- Solving nonlinear heat transfer constant area fin problems
- Fiber glass parts cured during filament winding eliminates oven, saves time

High-temperature, high-pressure spherical segment valve provides quick opening.
ARC-13 B63-10431 05

Safety restrainer prevents whipping of ruptured high-pressure hose.
LEWIS-99 B64-10348 05

Fluid-pressure measurement apparatus uses short-length manometer tubes.
LEWIS-28 B65-10279 05

High-pressure, low temperature electrical connector makes no-leak seal.
MSC-276 B66-10079 02

Radioactive tracer system detects oil contaminants in fluid lines.
M-PS-512 B66-10090 03

Transducer measures force in vacuum environment.
LEWIS-218 B66-10161 01

Bellows design features low spring rate and long life.
MSC-521 B66-10190 02

Quick-closing valve is actuated by explosive discharge.
ARC-55 B66-10233 05

Diffusion bonding makes strong seal at flanged connector.
M-PS-637 B66-10250 05

Flow ring valve is simple, quick-acting.
M-PS-752 B66-10255 05

Remotely controlled system couples and decouples large diameter pipes.
MU-0062 B66-10276 05

structures provide improved friction and wear
characteristics
LEWIS-320 B66-10373 03

Improved design provides faster response
time in photomultiplier
GSFC-451 B66-10526 01

Tantalum alloys resist creep deformation at
elevated temperatures
LEWIS-350 B66-10678 05

Feed-thru flange is useful in vacuum
applications to cryogenic temperatures
JPL-845 B66-10615 02

Improved rolling element bearings provide
low torque and small temperature rise in
ultrahigh vacuum environment
LEWIS-359 B66-10678 05

Combination double door high-vacuum valve
provides access to vacuum chamber
JPL-849 B66-10697 05

An improved soft X-ray photoionization
detector
GSFC-540 B67-10072 02

Environmental study of miniature slip rings
M-YS-2443 B67-10210 05

Machine tests slow-speed sliding friction in
high vacuum
M-YS-12347 B67-10379 05

Improved process for making thin-film sodium
niobate capacitors
NSC-11231 B68-10163 01

High-emittance coatings on metal substrates
LEWIS-10325 B68-10381 03

Study of high temperature bearing materials
LEWIS-10829 B69-10252 03

Evaluation of magnetic materials for static
inverters and converters
LEWIS-10343 B69-10306 01

HIGHER VOLTAGES

Efficient circuit triggers high-current,
high-voltage pulses
HSC-12178 B68-10347 05

Cold cathode ionization gage has rigid metal
housing
GSFC-445 B66-10041 01

Rod and dish cathode improves penning-type
vacuum gage
GSFC-447 B66-10082 01

Electric arc heater is self starting
LANGLEY-208 B66-10336 03

Dust particle injector for hypervelocity
accelerators provides high charge-to-mass
ratio
GSFC-509 B66-10347 01

Process reduces secondary resonant emission
in electronic components
JPL-934 B66-10085 01

Low input voltage converter/regulator
minimizes external disturbances
GSFC-127 B66-10689 01

High-energy-rate magnetohydraulmic metal
forming system
M-PS-2142 B67-10126 02

Hybrid solid state switch replaces motor-
driven power switch
JPL-931 B67-10165 01

Thermal neutron image intensifier tube
provides bright visible radiographic
pattern
ARG-120 B67-10296 02

High voltage pulse generator developed for
wide-gap spark chambers
ARG-10136 B68-10283 01

Solid state high-voltage pulse generator
with low supply voltage
M-PS-14034 B68-10308 01

High voltage pulse generator
ASC-12178 B69-10548 01

Automated frequency control of
voltage-controlled oscillators
FEO-11064 B69-10569 01

Automated plotting of equipotentials
FEO-11134 B69-10570 01

HIGHWAYS

Thermophysical properties of sodium
ASC-10363 B69-10240 03

HINGES

Concealed hinge permits flush mounting of
doors and hatches
ASC-623 B66-10336 03

Device serves as hinge and electrical
connector for circuit boards
M-PS-14034 B66-10359 01

Simple motor drive system operates heavy
hinged door
H-0093 B66-10712 05

Adjustable hinge permits movement of knee
in plaster cast
M-PS-1756 B67-10056 04

Welding torch and wire feed manipulator
M-PS-13102 B67-10385 05

HISTOGRAMS

Algebraic Monte Carlo procedure reduces
statistical analysis time and cost factors
M-PS-1887 B67-10434 01

The response of monoenergetic gamma rays
in finite media are investigated
ARG-10295 B69-10080 02

HISTOLOGY

Foot-operated cell-counter
I-FS-18141 B69-10351 01

LABCON - Laboratory Job Control
program
M-PS-18141 B69-10106 06

HOLDERS

Holded elastomer provides compact ferrite-core
holder, simplifies assembly
JPL-584 B64-10084 01

Improved holder protects crystal during high
acceleration and impact
JPL-463 B65-10097 05

Carbon-arc rod holder has long life, reduces
arc splatter
ASC-144 B65-10095 03
SUBJECT INDEX

Insulator-holder protects transistors in dense electronic assemblies
MSC-214 B65-10389 01

Specimen holder design improves accuracy of X-ray powder analysis
JPL-SC-165 B66-10075 02

Pipe cutting tool is useful in limited space
MSC-36 B66-10102 05

Fixture aids soldering of electronic components on circuit board
ARC-56 B66-10162 01

Multisurface fixture permits easy grinding of tool bit angles
M-P-566 B66-10171 05

Tool post modification allows easy turret lathe cutting tool alignment
MSC-581 B66-10191 05

Soldering iron temperature is automatically reduced
ARC-57 B66-10203 01

Tool separates sleeve-type unions without heat
MSC-497 B66-10253 05

Fixed vacuum plate clamps styrofoam for machining
M-P-663 B66-10283 05

Sewing lathe jaw concept for holding irregular pieces
M-P-763 B66-10321 05

Inflatable holding fixture permits X-rays to be taken of inner weld areas
M-P-856 B66-10327 03

Inspection of fine wires simplified by capillary tube wire holder
MSC-358 B66-10329 01

Adapter assembly prevents damage to tubing during high pressure tests
MSC-563 B66-10330 02

Device serves as hinge and electrical connector for circuit boards
M-P-743 B66-10359 01

Versatile machine mills, saws light materials
M-P-827 B66-10364 05

Special tool kit aids heavily garmented workers
MSC-163 B66-10403 05

Flexible drive allows blind machining and welding in hard-to-reach areas
MSC-524 B66-10428 05

Heat-treatment of metal parts facilitated by sand exsudent
M-P-1543 B66-10616 03

Holding fixture facilitates pipe thread gage measurements
M-P-2009 B67-10066 05

Cable clamp bolt fixture facilitates assembly in close quarters
KSC-67-60 B67-10244 05

Tensile testing grips ensure uniform loading of bimetal tubing specimens
LEWIS-10267 B68-10248 05

Application of the solid lubricant molybdenum disulfide by sputtering
LEWIS-10544 B68-10340 03

Indium adhesion provides quantitative measure of surface cleanliness
SAN-10024 B68-10342 01

X-ray film holder permits single continuous picture of tubing joint
LEWIS-10382 B68-10343 05

Versatile impact hand tool
M-P-20146 B68-10371 05

Tape reading fixture
M-P-14146 B66-10098 05

HOLDING

Residual magnetism holds solenoid armature in desired position
LEWIS-343 B67-10038 01

Programmed schedule holds for improving launch vehicle holds
M-P-14502 B69-10602 03

HOLE DISTRIBUTION (ELECTRONICS)

Electroformed screens with uniform hole size
LEWIS-10317 B68-10107 05

Nondestructive evaluation of printed wiring boards by microhm resistance measurements
SAN-10034 B69-10272 01

HOLE DISTRIBUTION (MECHANICS)

Gear drive automatically indexes rotary table
M-P-753 B66-10393 05

Computer program calculates and plots surface area and pore size distribution data
GSEC-10362 B68-10005 06

A method for using surface tension to determine the size of holes in hardware
MSC-15194 B69-10595 03

HOLES

Ho1e saw drill attachment has zero force reaction
MSC-543 B66-10604 05

HOLLOW

Plugged hollow shaft makes fatigue-resistant shaft pin
LAGELY-195 B66-10077 05

Hollow needle used to cut metal honeycomb structures
MSC-486 B66-10244 05

Self-sealing closure enables access to several fluid containers
KFO-10123 B67-10207 04

HOLOGRAPHY

Improvement in recording and reading holograms
HSC-10151 B68-10347 02

Fine-line sensitivity for holographic interferograms
HQ-10348 B69-10663 02

Long range holographic contour mapping concept
HQ-10350 B69-10700 02

HOMOGENEITY

Stationary device produces homogeneous mixture of fluids
M-P-525 B66-10570 05

Improved compression molding process
LAGELY-10027 B67-10302 03

Spectrographic analysis of bismuth-tin eutectic alloys by spark-ignited low-voltage ac-arc excitation
ARG-10288 B69-10081 03

HOMOGENIZING

Thermodynamic properties of solid palladium-silver alloys and other alloys are investigated by torsion-effusion technique
ARG-277 B67-10724 03
## HONEYCOMB CORES

Sintering characteristics and properties of PUF and PUF are determined
ARG-10228

HONEYCOMB CORES
Flexible honeycomb structure can bend to fit compound curves
M-PS-13 B63-10385 05

Fastener distributes stress evenly from sandwich-panel-hung items
MSC-236 B65-10358 05

Apparatus measures thermal conductivity of honeycomb-core panels
LANGLEY-202 B66-10127 01

Insulation for cryogenic tanks has reduced thickness and weight
M-PS-236 B66-10183 02

Ultrasonic emission method enables testing of adhesive bonds
M-PS-799 B66-10341 01

Aluminum core structures brazed without use of flux
M-PS-659 B66-10360 05

Composite bulkhead fabrication development
M-PS-1264 B66-10582 05

HONEYCOMB STRUCTURES
Refractory ceramic has wide usage, low fabrication cost
M-PS-67 B63-10481 03

Apparatus permits flexure testing of specimens at cryogenic temperatures
M-PS-257 B65-10129 02

Adjustable knife cuts honeycomb material to specified depth
MSC-475 B66-10237 05

Hollow needle used to cut metal honeycomb structures
MSC-486 B66-10244 05

Ultrasonic quality inspection of bonded honeycomb assemblies in automated
MSC-659 B66-10544 01

Study made to control depth of potting compound for honeycomb sandwich fasteners
LEWIS-370 B66-10677 05

Detection of entrapped moisture in honeycomb sandwich structures
MSC-1103 B67-10116 01

Application of distorted models in developing scaled structural models
M-PS-2580 B67-10321 05

Analysis of stability-critical orthotropic cylinders subjected to axial compression
M-PS-12869 B67-10375 03

Heavy-gage bonded honeycomb sandwich as primary load-bearing structure
M-PS-12060 B67-10427 05

Nondestructive testing techniques used in analysis of honeycomb structure bond strength
M-PS-1214 B67-10574 01

Honeycomb seal backing ring increases turbopump disk life
M-PS-13303 B67-10607 05

Repair of honeycomb panels with welded breakaway studs
MSC-15046 B69-10261 05

Technique for anchoring fasteners to honeycomb panels
LEWIS-10888 B69-10265 03

### SUBJECT INDEX

Instrumentation for nondestructive testing of composite honeycomb materials
M-PS-20405 B69-10366 03

Nondestructive determination of cohesive strength of adhesive-bonded composites
M-PS-20397 B69-10464 03

Freon, T-11 cutting fluid
MSC-11486 B69-10485 05

Run-in with chemical additive protects gear surface
M-PS-548 B66-10569 05

Flexible honeycomb structure can bend to fit compound curves
M-PS-13 B63-10385 05

Apparatus measures thermal conductivity of honeycomb-core panels
LANGLEY-202 B66-10127 01

Insulation for cryogenic tanks has reduced thickness and weight
M-PS-236 B66-10183 02

Ultrasonic emission method enables testing of adhesive bonds
M-PS-799 B66-10341 01

Aluminum core structures brazed without use of flux
M-PS-659 B66-10360 05

Composite bulkhead fabrication development
M-PS-1264 B66-10582 05

Nondestructive testing techniques used in analysis of honeycomb structure bond strength
M-PS-1214 B67-10574 01

Honeycomb seal backing ring increases turbopump disk life
M-PS-13303 B67-10607 05

Repair of honeycomb panels with welded breakaway studs
MSC-15046 B69-10261 05

Technique for anchoring fasteners to honeycomb panels
LEWIS-10888 B69-10265 03

HORIZON

Star/horizon simulator used to test space guidance system
MSC-407 B67-10110 02

HORIZON SCANNERS

Sextant measures spacecraft altitude without gravitational reference
MSC-200 B66-10143 02

Special purpose reflectometer uses modified gilbert sphere
MSC-1135 B67-10109 02

Automatic star-horizon angle measurement system
MSC-11585 B69-10597 01

HORN ANTENNAS

Novel horn antenna reduces side lobes, improves radiation pattern
JPL-425 B63-10264 01

Shortened horn-reflector antenna
GSFC-502 B67-10017 01

HOSES

Special pliers connect hose containing liquid under pressure
JPL-IT-1003 B63-10291 05

Safety restrainer prevents whipping of ruptured high-pressure hose
LEWIS-99 B66-10348 05

Dispensing system eliminates tension in

One-piece transparent shell improves design of helmet assembly

Special tool kit aids heavily garmented workers

A phonocardiogram simulator

Electronic dummy for acoustical testing

Carbon offers advantages as implant material in human body

Direct reading of electrocardiograms and respiration rates

Improved electrode paste provides reliable measurement of galvanic skin response

Human transfer functions used to predict system performance parameters

Concentrations of the naturally occurring radionuclides Pb-210, Po-210, and Ra-226 in aquatic fauna

Materials physically tested in variable-environment chamber

Spray-on electrodes enable EKG monitoring of physically active subjects

Effect of surface irregularities on bellows fatigue life

New nut and sleeve improve flared connections

Device disconnects several couplings simultaneously

New class of compounds have very low vapor pressures

Primary radical yields in pulse irradiated electromagnetic torque motors

Bodied hydraulic braking system limits angular deceleration to safe values
Quick-response servo amplifies small hydraulic pressure differences

Hydraulic fluid serves as mandrel for small diameter refractory tube drawing

Combination double door high-vacuum valve provides access to vacuum chamber

Orbital tube flaring system produces tubing connectors with zero leakage

Pressure levels and pulsation frequencies can be varied on high pressure/frequency testing device

Single-source mechanical loading system produces biaxial stresses in cylinders

Metal tube reducer is inexpensive and simple to operate

Hydraulic system provides smooth control of large tracking and antenna drive systems at very low tracking rates

Material fatigue data obtained by card-programmed hydraulic loading system

Accumulator isolator prevents malfunctioning of faulty hydraulic system

Hydraulic servo system increases accuracy in fatigue testing

Pressure variable orifice for hydraulic control valve

High-torque power wrench, a concept

Conceptual hermetically sealed elbow actuator

Conceptual apparatus for detecting leaks of nonconductive liquids

Hand-tightened, high-pressure seal

Torsion system for creep testing with multiple stress reversals

Two-step rocket engine bipropellant valve concept

Repair of weld defects in thin-walled stainless steel tubes

Vibration damper for Niles vertical boring mill ram

Hydraulic calipers

Temperature-controlled resistor

Improved solenoid valve design

Closed fluid system without moving parts controls temperature

Hydraulic fluid serves as mandrel for small diameter refractory tube drawing

Valve effectively controls amount of contaminant in flow stream

Hydraulic fluids Device disconnects several couplings simultaneously

Hydraulic fluids Closed fluid system without moving parts controls temperature

Hydraulic fluids Valve effectively controls amount of contaminant in flow stream

Hydraulic fluids Dual fluid system without moving parts controls temperature

Hydraulic fluids Single-source mechanical loading system produces biaxial stresses in cylinders

High-energy-rate magnetohydraulic metal forming system

Test instrumentation evaluates electrostatic hazards in fluid system

Accumulator isolator prevents malfunctioning of faulty hydraulic system

Hydraulics Pressure molding of powdered materials improved by rubber mold insert

Two-axis winch installer for heavy ducts in confined space

Prediction of performance of centrifugal pumps during starts under pressure

Automatic filter-blowback systems used with sintered-metal filters

Hydraulics Pressure molding of powdered materials improved by rubber mold insert

Hydrazines Solder flux leaves corrosion-resistant coating on metal

Hydrazines Magnetic fluid readily controlled in zero gravity environment

Gas chromatographic column enables analysis of propellant hydrazines

Addition of solid oxidizer increases liquid fuel specific impulse

Trace hydrazines in aqueous solutions accurately determined by gas chromatography

Hydrides Aluminum-titanium hydride-boride carbide composite provides lightweight neutron shield material

Effects of hydrogen on metals

Hydrocarbon fuels Sensor detects hydrocarbon oil contaminants in fluid lines

Hydrocarbon fuels Test instrumentation evaluates electrostatic
**HYDROCARBONS**

- Hazards in fluid system
  - BIDBOCABBOBS SUBJECT
  - I-FS-2277

- Variable-temperature wall regulates temperatures of structures
  - LANGLEY-25
  - B63-10528

- Vapor condensation process produces slurry of magnesium particles in liquid hydrocarbons
  - LEWIS-263
  - B66-10104

- Process reduces secondary resonant emission in electronic components
  - JPL-934
  - B66-10685

- New class of thermosetting plastic has improved strength, thermal and chemical stability
  - LEWIS-10108

- Improved isocratic ion exchange membranes
  - LEWIS-10737

- Improved primer for bonding polyurethane adhesives to metals
  - B-P-90591

- Chromatographic detection and analysis of traces of hydrocarbons
  - KSC-10388

**HYDROCHLORIC ACID**

- Solder flux leaves corrosion-resistant coating on metal
  - JPL-611
  - B66-10206

- Modification increases light output of injection-luminescent diodes
  - B-P-192

- Gage of 6.5 per cent Si-Fe sheet is chemically reduced
  - KSC-537

- Zone purification of potassium chloride
  - NIE-10377

- Improved performance of Inconel X-750
  - N-P-18600

**HYDROTHERMALS**

- Spiral-grooved shaft seals substantially reduce leakage and wear
  - LEWIS-10397

- Hydrodynamics of a new concept of primary containment by energy absorption
  - B-P-10242

- Self-sustained hydrodynamic oscillations in a natural-circulation two-phase-flow boiling loop
  - B-P-10461

- Foil bearing support for high-speed rotor
  - HQ-10315

**HYDROFLUORIC ACID**

- Nonhazardous acid etches weld samples
  - B-P-975

- Xenon fluoride solutions effective as fluorinating agents
  - NIE-217

- Copper and nickel adherently electroplated on titanium alloy
  - B-P-13952

- Transplutonium elements processed from rock debris of underground detonations
  - NIE-10222

- Improved nickel plating of Inconel X-750
  - B-P-16604

- A method for precision anodize stripping
  - KSC-15040

**HYDROGEN**

- Cryopumping of hydrogens in vacuum chambers is aided by catalytic oxidation of hydrogens
  - LEWIS-15

- Fuel cell serves as oxygen level detector
  - JPL-SC-072

- Impurity diffusion process for silicon semiconductors is fast and precise
  - GSFC-397

- Brazing method produces solid-solution bond between refractory metals
  - LEWIS-212

- Process reduces pore diameters to produce superior filters
  - WOO-093

- Oxygen-hydrogen torch is a small-scale steam generator
  - B-P-0042

- Dual regulator controls two gases from a single reference
  - MSC-227

- Liquid trap seals thermocouple leads
  - B-P-680

- Chromia oxide coatings improve thermal emissivity of alumina
  - WOO-263

- Boron-deoxidized copper withstands brazing temperatures
  - B-P-762

- Device removes hydrogen gas from enclosures
  - SFC-495

- Sniffer used as portable hydrogen leak detector
  - B-P-846

- Infrared television used to detect hydrogen fires
  - B-P-654

- Hydrogen fire detection system features sharp discrimination
  - B-P-643

- Auxiliary titanium sublimation pump produces ultrahigh pressure in vacuum chambers
  - LNGLY-212

- Large diameter metal ring seal prevents gas leakage at 5000 psi
  - B-P-1064

- Selective tube roughening increases heat transfer capability
  - B-P-599

- Hermetically sealed cells protected from internal gas pressure
  - GSFC-555

- Purification train produces ultrapure hydrogen gas
  - B-P-1913

- Clamp provides efficient connection for high-density currents
  - B-P-2417

**SUBJECT INDEX**

- I-320
HYDROGEN COMPOUNDS

radiation chemistry
LEWIS-10231 B69-10123 03
Primary radical yields in pulse irradiated alkaline aqueous solution
M-PS-10222 B69-10167 02
Automatic tuning of hydrogen masers
GSPC-10127 B69-10452 01

HYDROGEN COMPOUNDS

Stainless-steel elbows formed by spin forging
M-PS-122 B65-10990 05
Nonresonant support facilitates vibration testing of structures
M-PS-224 B65-10039 05
Weld leaks rapidly and safely detected
M-PS-362 B65-10265 01
Porous mandrels provide uniform deformation in hydrostatic powder metallurgy
M-PS-1972 B67-10209 03
Resilient bearing supports are gas controlled
LEWIS-10109 B67-10364 05
Hydrostatic testing of porous assemblies
M-PS-10298 B66-10439 05

HYDROGEN OXYGEN FUEL CELLS

Regenerative fuel cell combines high efficiency with low cost
WOO-090 B65-10363 01
Reaction heat used in static water removal from fuel cells
M-PS-552 B66-10013 01
Fluorescent oscillator used as humidity sensor
LEWIS-340 B67-10063 05
Cooling of 2 kW H subscript 2-0 subscript 2 fuel cell
M-PS-13737 B68-10544 01
Mass transport mechanism in porous fuel cell electrodes
HU-10343 B69-10135 01

HYDROGEN PEROXIDE

Plated nickel wire mesh makes superior catalyst bed
M-PS-216 B66-10321 03
Microorganisms detected by enzyme-catalyzed reaction
JPL-782 B66-10117 04
Gage of 6.5 per cent Si-Fe sheet is chemically reduced
M-PS-237 B66-10454 03
Study made of Raney nickel technology
M-PS-2054 B67-10208 03
Tube swaging device uses explosive force
LANGLEY-10092 B66-10235 05
Hydrogen peroxide etching proves useful for geranium
ARG-10170 B68-10454 03
Primary radical yields in pulse irradiated alkaline aqueous solution
Ano-10322 B69-10167 02
Improved nickel plating of Inconel X-750
M-PS-18604 B69-10463 05

HYDROGEN PRESSURE

Tritiated alumina serves as reagent for self-labeling analysis
ARG-209 B67-10315 03
Synthesis of polyethers of hexafluorobenzene and hexafluoropropandiol
M-PS-19462 B69-10636 03

HYDROGEN OXYGEN FUEL CELLS

Inorganic paint is durable, fireproof, easy to apply
GSPC-389 B66-10091 01
Preparation of high purity copper fluoride by fluorinating copper hydroxyfluoride
LEWIS-10794 B69-10136 03
Cobalt improves nickel hydroxide electrodes for batteries
LEWIS-10760 B69-10228 01
Laser action from a terbium beta-ketoenolate at room temperature
GSPC-10593 B69-10324 02

HYDROGEN OXYGEN FUEL CELLS

Storage-stable foamable polyurethane is activated by heat
LANGLEY-167 B66-10111 03
Tritiated alumina serves as reagent for self-labeling analysis
ARG-209 B67-10315 03
Synthesis of polyethers of hexafluorobenzene and hexafluoropropandiol
M-PS-19462 B69-10636 03

HYDROGEN OXYGEN FUEL CELLS

Health hazards of ultrafine metal and metal oxide powders
LEWIS-10878 B69-10268 04

HYDROGEN PEROXIDE

Refractory-metal compound impregnation of polytetrafluoroethylene
LEWIS-10733 B69-10072 03
Inhibition of browning in foodstuffs
BO-10777 B69-10493 04

HYDROGEN PEROXIDE

Electronic circuitry used to automate paper chromatography
JPL-840 B67-10201 01

HYDROGEN PEROXIDE

Airborne Fraunhofer Line Discriminator
M-PS-13746 B69-10594 02

HYDROGEN PEROXIDE

Mineral oil impregnation of insulating material
M-PS-15630 B67-10312 03

HYDROGEN PEROXIDE

Electronic circuitry used to automate paper chromatography
JPL-840 B67-10201 01

HYDROGEN PEROXIDE

Mineral oil impregnation of insulating material
M-PS-15630 B67-10312 03

HYDROGEN PEROXIDE

Electronic circuitry used to automate paper chromatography
JPL-840 B67-10201 01
Multi-feed cone for Cassegrainian antenna
M-PS-18556 B69-10146

Resonant microwave dichroic surface
GSPC-10658 B69-10274

HYPERSOLIC FUNCTIONS
Bell nozzle kernel analysis program
M-PS-18456 B69-10146

HYPERSOLIC ROCKET PROPELLANTS
Two-step rocket engine bipropellant valve concept
MSC-10591 B69-10280

Elimination of dissolved gases in hypergolic engine propellants
M-PS-16179 B69-10692

HYPERSOLIC HEAT TRANSFER
Thin-film gage measures low heat-transfer rates
LANGLEY 205 B66-10180

HYPERSOLIC NOZZLES
High-temperature, high-pressure spherical segment valve provides quick opening
ARC-13 B66-10431

HYPERSOLIC SHOCK
Acceleration-compensated pressure transducer has fast response
LANGLEY 113 B66-10353

HYPERSOLIC SPEED
Parallel line raster eliminates ambiguities in reading timing of pulses less than 500 microseconds apart
JEL-805 B66-10386

Program computes equilibrium normal shock and stagnation point solutions for arbitrary gas mixtures
LANGLEY-10090 B67-10509

HYPERSOLIC TEST APPARATUS
Metal diaphragm used to calibrate miniature transducers
M-PS-207 B65-10059

HYPERSOLIC VEHICLES
Molecular radiation - its application in physical measurements and analyses
M-PS-14816 B69-10562

HYPERVERSICITY GUNS
Dust particle injector for hypervelocity accelerators provides high charge-to-mass ratio
GSPC-509 B66-10347

Advances in light-gas gun technology
M-PS-14270 B68-10288

HYPERVERSICITY IMPACT
High impact pressure regulator withstands impacts of over 15,000 g
NPO-10175 B67-10274

HYPERVERSICITY PROJECTILES
Advances in light-gas gun technology
M-PS-14270 B68-10288

HYPERVERSICITY MISSILES
High-temperature, high-pressure spherical segment valve provides quick opening
ARC-13 B63-10431

Segmented electrode increases operating pressure of HED accelerator
LANGLEY-95 B65-10356

Thin-film gage measures low heat-transfer rates
LANGLEY 205 B66-10180

Experimental investigation of megawatt dc arc heating of nitrogen
LEWIS-313 B66-10508

MINIATURE CAPACITOR FUNCTIONS AS PRESSURE SENSOR
JPL-903 B67-10020

HYSTERESIS
Now package for Belleville spring permits rate change, easy disassembly
JPL-392 B63-10247

Diaphragm spring gives clutch over-center toggle effect
GSPC-499 B66-10297

Process yield Co-Fe alloys with superior high temperature magnetic properties
LEWIS-333 B66-10535

Device measures reaction engine thrust vector deviations
JPL-SC-163 B66-10642

Metallic guides reduce hysteresis effect in Belleville spring package
JPL-910 B67-10011

Circuit increases capability of hysteresis synchronous motor
MSC-1080 B67-10085

SiC/Si diode trigger circuit provides automatic range switching for log amplifier
M-PS-1079 B67-10314

Torque meter aids study of hysteresis motor rings
M-PS-12219 B67-10412

Design for high-temperature /1800 deg F/ liquid metal pressure transducer
LEWIS-10144 B67-10456

Circuit measures hysteresis loop areas at 30 Hz
M-PS-13069 B67-10519

Schmitt trigger multivibrator
MSC-10955 B69-10143

Evaluation of magnetic materials for static inverters and converters
LEWIS-10343 B69-10306

Calibratable solid-state pressure switch
M-PS-20474 B69-10377

Adding calcium improves lithium ferrite core
ER-10036 B69-10686

I BEAMS
Self-balancing beam permits safe, easy load handling under overhang
M-PS-98 B63-10571

Safety yoke would protect construction workers from falling
KSC-10075 B67-10445

Fiber glass reinforced structural materials for aerospace application
M-PS-14816 B66-10360

Two-axis winch installer for heavy ducts in confined space
M-PS-14254 B69-10062

Calibrated water tank facilitates proof-loading of cranes and derricks
M-PS-15059 B69-10109

IBM COMPUTERS
Computer optimization program finds values for several independent variables that minimize a dependent variable
M-PS-13030 B67-10328

Computer program for network synthesis by frequency response fit
Subject Index

IBM 360 Computer

CIRCUS--A digital computer program for transient analysis of electronic circuits
N-PS-15002  B68-10416  06

FORTRAN 4 program calculates velocities and streamlines in a tandem blade turbomachine
LEWIS-10743  B69-10219  06

Sonic boom propagation in stratified atmosphere
LANGLET-10480  B69-10391  06

Computer program reduces and provides profile plot of surface plate calibration data
M-PS-13666  B67-10492  06

Propellant tank pressurization analysis program
M-PS-12623  B69-10097  06

Variable-mesh method of solving differential equations
M-PO-10515  B69-10017  02

Monte Carlo direct view factor and generalized radiative heat transfer program
M-PS-15051  B69-10038  06

VICAR-DIGITAL image processing system
M-PO-10770  B69-10139  06

Bell nozzle kernel analysis program

Space trajectories program for IBM 7090
NPO-10125 B67-10172 06

CINDA - Chrysler Zapped Numerical
Differencing Analyzer computer program
M-FS-2298 B67-10278 06

Computer program for determination of
natural frequencies of closed spherical
sandwich shells
NDC-1246 B67-10279 06

Computer program utilizes FORTRAN 4
subroutines for contour plotting
NPO-10127 B67-10323 06

Computer programs for antenna feed system
design and analysis
NPO-10359 B67-10504 06

DYAAA - An advanced programming system for
large classes of dynamic and equivalent
systems
M-FS-12084 B67-10504 06

Computer program calculates gamma ray
source strengths of materials exposed to
neutron fluxes
NUC-10149 B67-10665 06

Computer program //FS-2255// calculates the
P-0 and P-1 transfer matrices for neutron
moderation in a monatomic gas
NUC-10141 B67-10678 06

Computer program analyzes and designs
supersonic wing-body combinations
ARC-10141 B68-10335 06

IBM 7094 COMPUTER

Computer program simplifies selection of
structural steel columns
NU-0044 B66-10097 01

Computer program determines gas flow rates in
piping systems
M-FS-443 B66-10300 01

New computer program solves wide variety of
heat flow problems
M-FS-421 B66-10404 01

Subroutine allows easy computation in
extended precision arithmetic
M-FS-1136 B66-10404 01

Computer routine adds plotting capabilities
to existing programs
OSPC-490 B66-10511 01

Computer program performs statistical
analysis for random processes
M-FS-723 B66-10525 01

Computer program simplifies transient and
steady-state temperature prediction for
compact body shapes
MFC-993 B66-10619 01

Computer program determines chemical
composition of physical systems at
equilibrium
MSC-1119 B66-10670 01

Computer program determines chemical
equilibria in complex systems
MSC-2291 B66-10671 01

Computer program simulates design, test,
and analysis phases of sensitivity
experiments
M-FS-1496 B67-10077 01

IBM 7094 COMPUTER

A power-spectral-density computer program
NPO-10126 B67-10160 01

Study of dynamic response of elastic space
stations
NPO-10124 B67-10169 06

Structural Analysis and Matrix
Interpretive System //SAMIS//
NPO-10130 B67-10171 01

A modal combination computer program for
dynamic analysis of structures
NPO-10129 B67-10217 06

Computer program calculates steady-state
temperature distribution within plane or
axisymmetric solids
NUC-10049 B67-10224 06

Land landing couch dynamics computer program
MSC-1210 B67-10233 06

Computer program simplifies design of
rotating components of turbomachinery
NUC-10046 B67-10235 06

Master control data handling program uses
automatic data input
M-FS-2255 B67-10280 06

Computer program predicts thermal and flow
transients experienced in a reactor loss-of-flow accident
NUC-10054 B67-10281 06

Computer program provides linear sampled-
data analysis for high order systems
M-FS-1285 B67-10287 06

Computer program uses Monte Carlo
techniques for statistical system
performance analysis
M-FS-2234 B67-10306 06

Computer program determines thermal
environment and temperature history of
lunar orbiting space vehicles
M-FS-12916 B67-10307 06

Computer program for mass optional solutions
of some endpoint trajectory problems
M-FS-12976 B67-10310 06

Transient Analysis Generator //TA//
simulates behavior of large class of
electrical networks
NUC-10031 B67-10319 06

Multiple correlation computer program
determines relationships between several
independent and dependent variables
M-PS-13024 B67-10327 06

Computer program resolves radiative,
conductive, and convective heat transfer
problems for variety of geometries
M-FS-1910 B67-10329 06

General purpose computer programs for
numerically analyzing linear ac electrical
and electronic circuits for steady-state
conditions
M-PS-13094 B67-10331 06

Computer subroutine ISUDS accurately solves
large system of simultaneous linear algebraic
equations
NUC-10051 B67-10344 06

Computer program PARAMODE 3 provides
solution of steady-state, multigroup,
two-dimensional neutron diffusion equations
NUC-10052 B67-10345 06

Earth orbit rendezvous evaluation program
M-PS-13016 B67-10407 06

Computer program generates averaged value
data tapes  B67-10911  06

Computer program provides steady state analysis for liquid propellant propulsion systems  B67-10414  06

Computer program analyzes generalized environmental control and life support systems  B67-10415  06

Computer program NCAP-FOSS calculates steady-state fluid dynamics of coolant in parallel channels and temperature distribution in surrounding heat-generating solid  B67-10456  06

Computer program NCAP provides for steady state thermal and flow analysis of multiple parallel channels in heat generating solid  B67-10457  06

KOPE /Calendar Oriented Program Efforts/ provides data for management decisions  B67-10978  06

Numerical least-square method for resolving complex pulse height spectra  B67-10480  06

Computer program uses characteristics method for free-jet investigation  B67-10490  06

Computer program performs aerothermodynamic flight test data correlation  B67-10494  06

Multidimensional reaction kinetic ablation program /REKAP/  B67-10495  06

Computer programs for antenna feed systems design and analysis  B67-10504  06

Program computes equilibrium normal shock and stagnation point solutions for arbitrary gas mixtures  B67-10509  06

Computer program performs rectangular fitting stress analysis  B67-10520  06

General frequency response program calculates frequency response of system, open at any specified element  B67-10521  06

Computerized Schedule Effectiveness Technique /SEF/ determines present and future schedule position  B67-10522  06

DYANA - An advanced programming system for large classes of dynamic and equivalent systems  B67-10524  06

Program computes zero lift wave drag of entire aircraft  B67-10530  06

Computer program provides improved longitudinal response analysis for axisymmetric launch vehicles  B67-10531  06

H-SAP and G-SAP neutron and gamma ray albedo model scatter shield analysis program  B67-10536  06

SOC-DS computer code provides tool for design evaluation of homogeneous two-material nuclear shield  B67-10537  06

Computer program calculates peripheral water injection cooling of axisymmetric subsonic diffuser  B67-10543  06

Computer program ETC improves computation of elastic transfer matrices of Legendre polynomials P/0 and P/1/  B67-10566  06

Propellant tank pressurization analysis program  B67-10625  06

Computer program for Video Data Processing System /VIFPS/  B67-10630  06

Digital computer program predicts effects of local pressure transients on deformation and stresses in cylindrical ducts  B67-10631  06

RICOG - Newton-Raphson calculus of variation with automatic transversalities  B68-10232  06

Computer program analyzes and designs supersonic wing-body combinations  B68-10335  06

FORTRAN optical lens design program  B68-10354  06

Analysis of annular combustors  B68-10356  06

Real fluid properties of normal and parahydrogen  B68-10361  06

Axisymmetric two-phase perfect gas performance program  B68-10374  06

One-dimensional reacting gas nonequilibrium performance program  B68-10375  06

One-dimensional two-phase reacting gas nonequilibrium performance program  B68-10376  06

Axisymmetric reacting gas nonequilibrium performance program  B68-10377  06

Internal velocity factors  B68-10403  06

Analysis of filament reinforced metal-shell pressure vessels  B68-10405  06

DSN seven day/twelve week schedule program  B68-10410  06

Computer program for machine design of Cassegrain feed systems  B68-10421  06

Symbolic reduction of block diagrams using FORMAC  B68-10423  06

Plume radiation program  B68-10447  06

Single degree of freedom antenna pointing program /ANTENA/  B68-10449  06

A request-oriented information selection program  B68-10451  06
SUBJECT INDEX

Computer program for parameter optimization
ARC-10168 868-10453 06

Computer program analyzes whirl critical speeds and bearing loads for shafts coupled by nonlinear springs to machine housing

Computer program for off-design performance of radial inflow turbines
LEWIS-10764 869-10267 06

Visual task analysis /VIsta/
M-PS-14716 869-10394 06

System for computing operational probability equations
M-PS-16410 869-10566 06

Biomedical bulk data processing program
FRC-10015 869-10720 06

ICE
Tools made of ice facilitate forming of soft, sticky materials
KSC-10262 869-10199 05

ICE FORMATION
A method for predicting interfacial freezing of a liquid flowing over a cold surface
LEWIS-10813 869-10321 02

IDEAL GAS
Computer program determines gas flow rates in piping systems
M-PS-443 866-10300 01

Computer program for calculation of ideal gas thermodynamic data
LEWIS-10254 868-10025 06

IDENTIFYING
Simple, nondestructive test identifies metals
MSC-525 866-10305 03

Chart system simplifies identification of complex design assemblies
MSC-752 866-10460 05

Electrical continuity scanner facilitates identification of wires for soldering to connectors
MSC-626 866-10605 01

Process produces accurate registry between circuit board prints
LANGLEY-288 866-10660 02

Run numbering system for use with data recorders
M-PS-2557 867-10215 01

Product identification techniques used as training aids for analytical chemists
SAM-10025 866-10373 03

Reidentifying hardware after loss of serial number
M-PS-18133 869-10059 05

Identification and evaluation of linear damping models in beam vibrations
ARG-10275 869-10196 03

Improved camera for better X-ray powder photographs
H-10424 869-10537 01

IDLES
Chain friction system gives positive, reversible drive
MSC-8 863-10009 05

A mechanically extendible boom
NPO-11118 869-10328 05

IGNITERS
Study made of Raney nickel technology
M-PS-2054 867-10208 03

IGNITION
Explosive-train initiated through solid bulkhead by pressure cartridge
KSC-11395 867-10589 03

Ignition of binary alloys of uranium
ARG-10057 868-10280 01

Testing the flammability of materials exposed to arcs
MSC-15225 869-10531 03

IGNITION SYSTEMS
Igniting system for mercury lamps protects transistorized sustaining supply
JPL-427 863-10262 01

Circuit controls transients in SCR inverters

Synchronous charge-constrained electroquasistatic generator  B65-10231  01
Design of printed circuit coils  B69-10665  01

INDUCTION
Evaluation of magnetic materials for static inverters and converters  B69-10306  01

INDUCTION HEATING
Removable preheater elements improve oxide induction furnace  B63-10193  01
Apparatus facilitates pressure-testing of metal tubing  B65-10131  05
Refractory metal shielding increases operating range of induction furnace  B65-10188  02
Complementary system vaporizes subcooled liquid, improves transformer efficiency  B66-10045  02
Hydrogen-atmosphere induction furnace has increased temperature range  B66-10055  05
Auxiliary coil controls temperature of RF induction heater  B66-10067  01
Refractory coating protects intricate graphite elements from high-temperature hydrogen  B66-10094  01
Rotating magnetic poles used to pump mercury  B66-10034  05
Tungsten insulated susceptor cup for high temperature induction furnace eliminates contamination  B66-10538  03
Miniaturized King furnace permits absorption spectroscopy of small samples  B66-10418  02
Plasma-heating by induction  B69-10185  02
Nibiobium-uranium alloys with voids of predetermined size and total volume  B69-10641  03

INDUCTORS
Circuit controls transients in SCR inverters  B63-10020  01
Tunnel-diode circuit features zero-level clipping  B65-10002  01
Carbon arc ignition improved by simple auxiliary circuit  B65-10018  01
Voltage controlled oscillator is easily aligned, has low phase noise  B65-10223  01
Simple circuit produces high-speed, fixed duration pulses  B66-10045  02

INELASTIC COLLISIONS
The response of monoenergetic gamma rays in finite media are investigated  B69-10295  02

INERTIAL ATOMOSPHERE

Apparatus facilitates high-temperature tensile testing in vacuum
LEWIS-42 B69-10248 02

Cerium iodide crystals fused to vacuum tube faceplates
GSPC-67 B69-10345 03

Double gloves reduce contamination of dry box atmosphere
LEWIS-211 B65-10117 03

Thoriated nickel bonded by solid-state diffusion method
LANGLITE-116 B65-10220 03

Ceramic materials purified by experimental method
LEWIS-225 B65-10270 03

Refractory metals welded or brazed with tungsten inert gas
LEWIS-219 B65-10319 05

Inert-gas welding and brazing enclosure fabricated from sheet plastic
LEWIS-220 B65-10330 05

Tungsten wire and tubing joined by nickel brazing
M-PS-394 B65-10391 05

Flexible drive allows blind machining and welding in hard-to-reach areas
MSC-524 B66-10428 05

Process for preparing dispersions of alkali metals
JPL-734 B66-10639 03

Laboratory arc furnace features interchangeable hearths
ARG-125 B67-10052 05

Quasi-static vapor pressure measurements on reactive systems in inert atmosphere box
ARG-90142 B68-10236 01

Titanium-nitrogen reaction investigated for application to gettering systems
ARG-10206 B68-10414 03

Isothermal drop calorimeter provides measurements for alpha active, pyrophoric materials
ARG-10186 B69-10002 02

Two systems developed for purifying inert atmospheres
ARG-10234 B69-10026 03

Calibratable solid-state pressure switch
M-PS-20474 B69-10437 05

XERTIA

Angular acceleration measured by deflection in sensing ring
NESC-250 B66-10105 01

Concept for sleeve induction motor with 1-msec mechanical time constant
ARG-10124 B68-10185 01

Compensation of pulse-rebalanced inertial instruments
NESC-13098 B69-10216 01

XERTIAL GUIDANCE

Optical automatic gain channel
M-PS-1550 B66-10596 02

Ring laser angle encoder
NESC-13099 B69-10115 01

Hermetically sealed vibration damper
NESC-10959 B69-10634 05

INERTIAL NAVIGATION

Ring laser angle encoder
NESC-13099 B69-10115 01

INERTIAL REFERENCE SYSTEMS

Conceptual nonorthogonal gyro configuration for guidance and navigation
NESC-11363 B67-10433 01

INFLATABLE STRUCTURES

New inflatable liferaft is nontippable
NESC-44 B66-10001 05

Inflatable bladder provides accurate calibration of pressure switch
M-PS-367 B65-10279 01

Buoyant stokes litter assembly used for sea rescue operations
NESC-131 B66-10019 05

Rotating mandrel speeds assembly of plastic inflatables
LANGLITE-115 B66-10137 05

Self-inflating lifevest stores in small package
MSC-51 B66-10184 04

Flexible fastener effects airtight material closure
JPL-66 B66-10304 05

Inflatable holding fixture permits X-rays to be taken of inset weld areas
N-PS-856 B66-10327 03

Portable lightweight cell provides controlled environment
MSC-648 B66-10370 05

Inflatable O-ring seal would ease closing of hatch cover plate
NESC-740 B66-10385 05

Pneumatic raft automatically reforms after rupture of buoyant member
NESC-11562 B66-10011 05

Inflatable bladder to facilitate handling of heavy objects - A concept
M-PS-16272 B69-10069 05

INFLATING

Buoyant stokes litter assembly used for sea rescue operations
NESC-131 B66-10019 05

INFORMATION

Encode/Decode facility for FORTRAN 4
ARG-10335 B69-10169 06

INFORMATION RETRIEVAL

Pickup device reads pressures from ports in rotating mechanisms
LEWIS-158 B65-10021 05

opaque microfiche masthead permits easy reading
HQ-7 B65-10306 01

Computer program searches characteristic data of diodes and transistors
GSPC-493 B66-10529 01

Hydra 1 data display system
NESC-11594 B68-10155 01

Infrared spectroscope Study made of far infrared spectra of...
INFRARED TRACKING

silicate minerals
E-FS-1811 B67-10075 02

Quantum mechanical calculations of reactive scattering cross sections in bimolecular encounters
E-FS-13594 B67-10527 03

The preparation, identification and properties of chlorophyll derivatives
ARG-10205 B66-10409 03

Aggregation of metallochlorophylls - Examination by spectroscopy
ARG-10273 B69-10163 04

INFRARED TRACKING
Point-source detection system rejects spatially extended radiation sources
GSFC-486 B66-10622 01

INORGANS
Coating protects magnesium-lithium alloys against corrosion
E-FS-2446 B67-10149 03

Magnesium-lithium alloys developed for low temperature use
E-FS-1541 B67-10365 03

Some purification of potassium chloride
ARG-10377 B69-10241 03

INHIBITORS
Spectrophotometric technique quantitatively determines NMDA inhibitor in ethylene glycol-water solutions
MSC-11496 B67-10573 03

Literature review on pickling inhibitors and cadmium electroplating processes
E-FS-11442 B69-10606 03

INHOMOGENEITY
Calculation of infrared spectral transmittances of inhomogeneous gases
E-FS-1563 B66-10554 02

Improved ultrasonic TV images achieved by use of Lamb-wave orientation technique
ARG-103 B67-10295 02

INJECTION
Economical fabrication process produces high quality junction transistors
JPL-5C-065 B64-10330 01

INJECTION GUIDANCE
Space trajectories program for IBM 7090
HPO-10125 B67-10172 06

Advanced mission analysis programs
GSFC-10575 B69-10171 06

INJECTORS
Filler device for handling hot corrosive materials
MSC-65 B64-10166 03

Dust particle injector for hypervelocity accelerators provides high charge-to-mass ratio
GSFC-509 B66-10347 01

A method of determining combustion gas flow
E-FS-13757 B67-10455 03

Journal gas bearing for curved surfaces
E-FS-20423 B69-10182 05

Single-element coaxial injector for rocket fuel
NPO-11095 B69-10547 05

A method for using surface tension to determine the size of holes in hardware
MSC-15194 B69-10595 03

SUBJECT INDEX

Gas chromatograph injection port protective device
E-FS-18585 B69-10788 03

INLET FLOW
Fuel and oxidizer valve assembly employs single solenoid actuator
MSC-1046 B66-10648 05

Venturi meter with separable diffuser
LEWIS-10483 B68-10395 05

Modified cryogenic storage tank subassembly
MSC-10380 B69-10556 02

INLET NOZZLES
Venturi meter with separable diffuser
LEWIS-10483 B68-10295 05

INOCULATION
Automated microorganism sample collection module
HPO-10421 B69-10223 04

INORGANIC COATINGS
Anodization process produces opaque, reflective coatings on aluminum
E-FS-348 B65-10133 03

Air-cured ceramic coating insulates against heat fluxes
E-FS-150 B65-10357 03

INORGANIC COMPOUNDS
Inorganic paint is durable, fireproof, easy to apply
GSFC-366 B65-10156 03

Coordination chemistry in fused-salt solutions
ARG-10469 B69-10423 03

INORGANIC MATERIALS
Study made of dielectric properties of promising materials for cryogenic capacitors
E-FS-1362 C B67-10366 03

Reduction by monovalent zinc, cadmium, and nickel cations
ARG-10328 B69-10170 03

INPUT
Veitch diagram plotter simplifies Boolean functions
JPL-385 B63-10241 05

Double-throw microwave device switches two lines quickly
JPL-410 B63-10258 01

Digital logic elements provide additional functions from analog input
MSC-64 B64-10066 01

Field-effect transistor improves electrometer amplifier
ARC-36 B64-10183 01

Transistorized converter provides non-dissipative regulation
GSFC-238 B64-10305 01

Stepping motor drive circuit designed for low power drain
GSFC-198 B65-10026 01

Transistor voltage comparator performs own sensing
GSFC-228 B65-10028 01

Photoelectric semiconductor switch operates with low level inputs JPL-5C-086 B65-10303 01

Electrometer preamplifier has drift correction feedback
JPL-5C-074 B65-10267 01

I-338
Automatic gain control circuit handles wide input range
MSC-166 B66-10089 01

Electropneumatic transducer automatically limits actuator current
LEWIS-253 B66-10160 01

Offset lenses add versatility to phototypesetting machine
HQ-9 B66-10173 02

Electronic circuit provides accurate sensing and control of dc voltage
NU-0089 B66-10591 01

MOSFET analog memory circuit achieves long duration signal storage
NPS-860 B66-10603 01

Transistor biased amplifier minimizes diode discriminator threshold attenuation
ARG-163 B67-10311

Field effect transistors improve buffer amplifier
NPS-916 B67-10334 01

Limit circuit prevents overdriving of operational amplifier
NDC-10082 B67-10343 01

Digital-to-analog converter operates from low level inputs
JPL-907 B67-10357 01

Circuit automatically calibrates flowmeter against liquid-level gage reference
NPS-2194 B67-10376 01

Algebraic Monte Carlo procedure reduces statistical analysis time and cost factors
NPS-10087 B67-10434 01

Material fatigue data obtained by card-programmed hydraulic loading system
LANGLY-10042 B67-10491 03

Input gate circuit converted for use as linear amplifier
NPS-14265 B68-10015 01

Tool reconstructs data input points corresponding to first order output graph
NPS-10003 B68-10150 02

Parallel-to-serial biphase-data converter
MSC-11600 B68-10241 01

Self-starting circuit for switching regulators
LNWIS-10686 B69-10128 05

MAGNY - Progr with for calculating velocities in magnified region of turbomachines
LNWIS-10769 B69-10132 06

Encode/Decode facility for FORTRAN & ARG-10335 B69-10169 06

Magnetically coupled emission regulator
GSFC-10056 B69-10213 01

Multichannel analyzers at high rates of input
ARG-10355 B69-10214 02

Low-cost voltage-level detector
LNWIS-10985 B69-10217 01

Simplified system displays complex curves corresponding to input data
EQ-10073 B69-10247 01

Root-cubing and general root-powering methods for finding the zeros of polynomials
ARG-10444 B69-10424 02

Special purpose computer provides

programmable digital filter for sampled-data control systems
NPS-20290 B69-10454 06

Live-timer method of automatic dead-time correction for precision counting
ARG-10478 B69-10612 01

COGENT programming manual
ARG-10463 B69-10656 06

Input/output routines

Human transfer functions used to predict system performance parameters
LANGLEY-203 B66-10379 01

System monitors discrete computer inputs
NPS-1021 B66-10389 01

Polynomial manipulator AP-168
MSC-1231 B67-10103 01

Structural Analysis and Matrix Interpretive System /SAMIS/
NPS-10130 B67-10171 01

Computer program simulates physical systems by solving the simultaneous differential equations describing the systems
NPS-10019 B67-10193 06

A conceptual, parallel operating data compression processor
NPS-10068 B67-10204 01

Master control data handling program uses automatic data input
NPS-2259 B67-10280 06

Computer program calculates gamma ray source strengths of materials exposed to neutron fluxes
NDC-10183 B67-10665 06

Reducing quantizer deadband with a range switching digital filter
NPS-20419 B69-10259 01

LN Lookangle program
MSC-13179 B69-10370 06

Wide-band doubler and sine wave quadrature generator
NPS-11133 B69-10383 01

Simplified, reliable circuit sorts binary numbers in order of magnitude
NPS-10112 B69-10503 01

Insects

Investigation of temperature dependence of development and aging
ASB-10145 B69-10022 04

Insertion

Aerial-image enables diagram and animation to be inserted in motion pictures
ASB-165 B67-10398 02

Insertion device for pressure testing
MSC-15195 B69-10061 03

Insertion Loss

Improved insertion-loss tester
JPL-358 B64-10080 01

Microwave technique measures plasma characteristics
LANGLEY-124 B65-10122 02

Composite filter steepens rejection slopes in microwave application
GSFC-480 B66-10393 01

Low-loss C-band parasitic probe
KSC-09348 B69-10251 01

A compact rotary vane attenuator
NPS-10562 B69-10427 01
INSERTS

Rotary antenna attenuator
NFO-10648 B69–10502 01

Gate valve with ceramic-coated base operates
at high temperatures
ARC-23 B63–10562 03

Expandable insert serves as screw anchor
MSC-301 B66–10132 05

Insert sleeve prevents tube soldering
contamination
MSC-552 B66–10238 05

Study made to control depth of potting
compound for honeycomb sandwich fasteners
LEWIS-370 B66–10677 05

An improved nuclear magnetic resonance
spectrometer
JPL-762 B67–10234 01

Flared-tube fittings with replaceable seat
inserts
MSC-15372 B69–10519 05

An electrical connector pin protector
MSC-15660 B69–10742 01

Crack detection method is safe in presence of
liquid oxygen
M-FS-236 B65–10107 03

Surfactant for dye- penetrant inspection is
insensitive to liquid oxygen
M-FS-475 B66–10131 03

Ultrasonic recording scanner used for
nondestructive weld inspection
M-FS-294 B66–10220 01

Ultrasonic quality inspection of bonded
honeycomb assemblies is automated
MSC-829 B66–10546 01

System enables dimensional inspection of
very large structures
M-FS-2477 B67–10218 05

Improved ultrasonic TV images achieved by
use of Lamb-wave orientation technique
ARG-203 B67–10295 02

Thermal neutron image intensifier tube
provides bright visible radiographic
pattern
ARG-120 B67–10296 02

Low-energy gamma ray inspection of brazed
aluminum joints
MSC-1189 B67–10337 02

Test and inspection for process control of
monolithic circuits
M-FS-13084 B67–10507 01

Plastic shoe facilitates ultrasonic
inspection of thin wall metal tubing
NUC-10010 B67–10542 02

Connector shorting cap provides pin
alignment, inspection, and stray voltage
protection
M-FS-13111 B67–10635 01

Optical system facilitates inspection of
printed circuit boards
GGFC-07971 B68–10021 02

New camera tube improves ultrasonic
inspection system
ARG-90237 B68–10080 01

Inspection criteria ensure quality control
of parallel gap soldering
M-FS-14530 B68–10257 05

Training manuals for nondestructive testing
using magnetic particles
M-FS-20187 B68–10391 03

Reidentifying hardware after loss of serial
number
M-FS-18133 B69–10059 05

Improved combustion chamber optical probe
MSC-10953 B69–10142 02

Surface irregularities detected by flare
inspection instrument
M-FS-20157 B69–10152 01

Instrumentation for nondestructive testing
of composite honeycomb materials
M-FS-20402 B69–10366 03

Low-cost tool minimizes damage to O-rings
during installation
MSC-140 B65–10116 05

Microminiature thermocouple monitors own
installation
M-FS-1111 B66–10463 05

Pressure probe compensates for dimensional
tolerance variations
LEWIS-302 B66–10599 01

Thermocouples easily installed in hard-to-
get-to places
M-FS-1946 B66–10653 01

Tool facilitates installation of Marseo
clamps
M-FS-2039 B67–10105 05

Application of distorted models in
developing scaled structural models
M-FS-2546 B67–10321 05

Vacuum-jacketed transfer line installation
technique
M-FS-14496 B68–10125 05

Two-axis winch installer for heavy ducts
in confined space
M-FS-14254 B69–10062 05

Low-cost, fast-response drive circuit for
electromagnetic torque motors
LEWIS-10143 B68–10386 01

Coincident switch closing reduces error in
motor-driven timer
JPL-182 B63–10143 05

Computer program determines performance
efficiency of remote measuring systems
M-FS-1137 B66–10503 01

Literal readout of identification signals
in Morse code
LANGLEY-1 122 B69–10479 01

Instrument quickly transposes ground reference
target to eye level
MSC-275 B66–10061 05

Seismometer designed for remote operation in
random orientation
JPL-320 B66–10085 01

Mount enables precision adjustment of
optical-instrumentation mirror
MSC-184 B66–10199 02

Three-axis attitude and direction reference
instrument has only one moving part
M-FS-1819 B66–10644 01

Improved ultrasonic TV images achieved by

### INSULATORS

Automated plotting of equipotentials  
**NPO-1134**  
B69-10570 01

Balloon batteries, charged and heated by solar energy  
**GSPC-10769**  
B69-10585 01

Liquid oxygen-compatible insulation system  
**N-FS-16113**  
B69-10599 03

Reducing contact resistance at semiconductor to metal or aluminum to metal interfaces  
**ERC-10294**  
B69-10689 01

**INSULATORS**

Welded pressure transducer made as small as 1/8th-inch in diameter  
**ARC-11**  
B63-10429 03

Modified RF coaxial connector ends vacuum chamber wiring problem  
**GSPC-150**  
B64-10010 01

Standoff tool speeds placement of friction-fit electrical terminals  
**WOO-029**  
B65-10348 05

Inusulator-holder protects transistors in dense electronic assemblies  
**MSC-21**  
B65-10389 01

Rugged switch responds to minute pressure differentials  
**H-FS-12704**  
B67-10389 01

Technique eliminates high voltage arcing at electrode-insulator contact area  
**LEWIS-10133**  
B67-10470 01

Simple switch actuated by force applied over wide solid angle  
**INF-09808**  
B69-10032 01

Pulsed high-voltage dc RF sputtering  
**LEWIS-10920**  
B69-10659 01

**INTAKE SYSTEMS**

Packless valve with all-metal seal handles wide temperature, pressure range  
**JPL-361**  
B63-10228 05

Spherical pipe joint delivers loads equally to mating flange  
**H-FS-807**  
B66-10665 05

Concept for sleeve induction motor with 1-msec mechanical time constant  
**ARG-10214**  
B68-10185 01

Method for predicting pump cavitation performance  
**LEWIS-10916**  
B69-10446 02

**INTEGRAL EQUATIONS**

Linear systems of equations solved using mathematical algorithms  
**ARG-1046**  
B68-10292 06

Calculation of resonance neutron absorption in two-region problems /the GAROL code/  
**NUC-10045**  
B67-10223 06

Computer program calculates the effective temperature for a crystalline solid /DEVS/  
**NUC-10161**  
B69-10036 06

Numerical inversion of finite Toeplitz matrices and vector Toeplitz matrices  
**ARG-10445**  
B69-10415 02

Finite element formulation for linear thermoelastic materials  
**NPO-11229**  
B69-10660 03

**INTEGRATED CIRCUITS**

Crystal measures short-term, large-magnitude forces  
**JPL-77**  
B65-10187 01

Field-effect transistor replaces bulky transformer in analog-gate circuit  
**GSPC-351**  
B65-10284 01

Frequency divider is free of spurious outputs  
**GSPC-308**  
B65-10339 05

Miniature bioelectric device accurately measures and telemeters temperature  
**ARC-52**  
B66-10057 01

Diffusion technique stabilizes resistor values  
**MSC-205**  
B66-10142 01

Binary fluid amplifier solves stability and load problems  
**ERC-15**  
B66-10177 01

Solid state thermostat has integral relay and circuitry  
**M-PS-434**  
B66-10224 01

Solid state phase detector replaces bulky transformer circuit  
**MSC-1007**  
B66-10224 01

High-performance RC bandpass filter is adapted to miniaturized construction  
**ARC-60**  
B66-10309 01

Circuit provides accurate four-quadrant multiplication  
**WOO-272**  
B66-10331 02

Sensitive bridge circuit measures conductance of low-conductivity electrolyte solutions  
**ARG-147**  
B67-10298 01

Method of improving contact bonds in silicon integrated circuits  
**H-FS-1753**  
B67-10335 01

Digital-to-analog converter operates from low level inputs  
**JPL-907**  
B67-10357 01

Transistor sensor development  
**H-FS-13376**  
B67-10471 01

Test and inspection for process control of monolithic circuits  
**N-FS-13084**  
B67-10507 01

Development of reliability prediction technique for semiconductor diodes  
**GSPC-10234**  
B67-10651 06

**SUBJECT INDEX**

Balloon batteries, charged and heated by solar energy  
**GSPC-10769**  
B69-10585 01

Diffusion technique stabilizes resistor values  
**MSC-205**  
B66-10142 01

Field-effect transistor replaces bulky transformer in analog-gate circuit  
**GSPC-351**  
B65-10284 01

Frequency divider is free of spurious outputs

Multiple-mask chemical etching  
ESC-13191  B69-10221  01

An integrated circuit switch  
NPO-11073  B69-10326  01

Automatic calorimetry system monitors RF power  
NPO-11033  B69-10384  01

Dielectric materials for use in thin-film capacitors  
N-PS-20471  B69-10387  02

Leads integral with the internal interconnection that penetrate the molded wall of a package  
LANGLEY-10228  B69-10436  01

Improved method of dicing integrated circuit wafers into chips  
ERC-10138  B69-10441  01

Modular packaging technique for combining integrated circuits and discrete components  
GSFC-10369  B69-10453  01

Special purpose computer provides programmable digital filter for sampled-data control systems  
N-PS-20290  B69-10456  06

Literal readout of identification signals in Morse code  
LANGLEY-10222  B69-10479  01

Phase-locked-loop phase modulator with high modulation index, low distortion  
MSC-12247  B69-10487  01

Folded stick module  
NPO-10854  B69-10498  01

Automatic frequency control of voltage-controlled oscillators  
NPO-11604  B69-10565  01

Highly stable high-rate discriminator for nuclear counting  
ARG-10483  B69-10641  01

Pulse-height analyzer with digital readout  
ARG-10503  B69-10640  01

Microelectronic device data handbook  
ERC-10322  B69-10667  01

INTEGRITY

Inexpensive, stable circuit measures heart rate  
ESC-95  B66-10020  01

System selects framing rate for spectrograph camera  
LANGLEY-55  B65-10086  01

Simple circuit functions as frequency discriminator for FM signals  
GSFC-267  B65-10102  01

Solid-state switching used to speed up capacitive integrator  
LANGLEY-104  B65-10159  01

Frequency correction device uses digital circuitry  
GSFC-268  B65-10307  01

Electronic ampere-hour integrator is accurate to one percent  
GSFC-203  B65-10308  01

Automatic system determines moments of inertia of asymmetric objects  
N-PS-1769  B66-10536  01

Integrator can easily be set and reset with an electronic switch  
ARC-10002  B67-10135  01

Accuracy of laser measurements improved by pulse autocorrelator electronic system  
ESC-10033  B67-10338  01

Digital voltage-controlled oscillator  
GSFC-512  B67-10449  01

Recharge unit provides for optimum recharging of battery cells  
GSFC-10688  B68-10273  01

Solution of differential equations by application of transformation groups  
N-PS-14802  B68-10276  02

System measures arc energy dissipated in relay contact cycling  
N-PS-18541  B68-10312  01

Improved phase-shift-keyed detector  
N-PS-20064  B69-10101  01

Tracer of electrical conduit pipes  
ESC-15223  B69-10347  01

Measurement technique for the determination of antenna directivity  
N-PS-12795  B69-10677  01

INTEGRITY

A computer program for a line-by-line calculation of spectra from diatomic molecules and atoms assuming a Voight line profile  
ERC-10221  B69-10232  06
Measuring coplanarity of surfaces  
HSC-12044  B67-10371  02

Interference effects eliminated in random oriented space station antenna system  
HSC-11004  B67-10435  01

Improvement in recording and reading holograms  
ERC-10151  B68-10347  02

FCM hit detection with correction for intersymbol interference  
GSFC-10155  B69-10153  01

INTERFERENCE FACTOR TABLE  
Basic suppression techniques are evaluated  
M-FS-867  B66-10449  01

INTERFEROMETERS  
Interferometer combines laser light source and digital counting system  
ESC-151  B65-10161  01

Interferometer construction assures parallelism of critical components  
JPL-704  B65-10292  02

Unique construction makes interferometer insensitive to mechanical stresses  
JPL-725  B65-10295  02

Communication system uses modulated laser beam  
GSFC-377  B65-10333  01

Motion drive system is accurately controlled in the 1-micron range  
JPL-864  B66-10695  05

Fresnel diffraction plates are simple and inexpensive  
N-FS-12731  B67-10297  02

An interferometer tracking radar system  
ESC-10556  B69-10523  01

Laser interferometer micrometer system  
N-FS-14747  B69-10630  02

INTERFEROMETRIC  
Measuring coplanarity of surfaces  
HSC-12044  B67-10371  02

Multilayer infrared beamsplitter film system  
HGS-11036  B69-10260  02

Two-color holography  
EQ-10349  B69-10662  02

Fine-line sensitivity for holographic interferograms  
EQ-10348  B69-10663  02

INTERGRANULAR CORROSION  
Boros-deoxidized copper withstands brazing temperatures  
R-PS-762  B66-10273  03

Weld microfissuring in Inconel 718 minimized by minor elements  
R-PS-18185  B68-10251  03

Effects of high frequency current in welding aluminum alloy 6061  
M-FS-1838  B66-10383  05

INTERLAMINAR  
Techniques for measuring magnetic tape interlayer adhesion  
HPO-10011  B67-10417  03

INTERMEDIATE FREQUENCY AMPLIFIERS  
Automatic gain control circuit handles wide input range  
MCS-166  B66-10089  01

INTERMETALLICS  
Brazing process provides high-strength bond  

Preformed stiffeners used to fabricate structural components for pressurized tanks
Silver plating ensures reliable diffusion bonding of dissimilar metals
Thin film process forms effective electrical contacts on semiconductor crystals
Method of improving contact bonds in silicon integrated circuits
Crystal structure analysis of intermetallic compounds
High temperature alloy
Microprobe investigation of brittle segregates in aluminum MIG and TIG welds
Levitation-melting technique for metals and alloys

INTERNAL COMBUSTION ENGINES
Indicator system provides complete data of engine cylinder pressure variation
Perforations in jet engine supersonic inlet increase shock stability
Direct determination of lead-210 by liquid-scintillation counting
Stress-corrosion-induced property changes in aluminum alloys
Transmission system isolates pressure transducer from severe environment
Improved system measures output energy of pyrotechnic devices
Control system maintains compartment at constant temperature
Diffusion bonding makes strong seal at flanged connector
Hermetically sealed cells protected from internal gas pressure
Investigation of pressurized toroidal shells
Buckling strength of filament-wound cylinders under axial compression is investigated
A biaxial weld strength prediction method
Solar activity history model

INTERPLANETARY SPACECRAFT
Earth orbit rendezvous evaluation program
Microwave maneuver operations program
Space trajectories program for IBM 7900
Computer program for interplanetary conic patching
Simple scale interpolator facilitates reading of graphs
Simple scale interpolator facilitates reading of graphs
Master control data handling program uses automatic data input
Computer program utilizes FORTRAN 4 subroutines for contour plotting
Computer program VARI-QUIR 3 provides solution of steady-state, two-dimensional neutron diffusion equations
Real fluid properties of normal and parahydrogen
Frequency offset in linear FM/CW transponder eliminates clutter
Fatigue cracks detected and measured without test interruption
Wire bundle formed into grids with minute interstices

INTERSTITIALS
Isostatic compression process converts polyaromatics into structural material
Preparation of superconducting thin films of transition-metal interstitial compounds

INTERNAL Pressures
Electronic circuit delivers pulse of high interval stability
Exposure Value /ET/ system expanded to include filter factors and transmittance
Computer program generates averaged value data tapes

INTRAOPERATIVE
Experimental study and evaluation of radioprotective drugs

INVASANCE
Solution of differential equations by application of transformation groups
**INVENTORY CONTROLS**

Computer program determines inventory size  
M-FS-1135  B66-10506  01

**INVENTIONS**

Apparatus presents visual display of  
semiconductor surface characteristics  
JPL-665  B66-10200  01

Thermal and bias cycling stabilizes planar  
silicon devices  
SRC-48  B67-10176  01

Controllability of distributed-parameter  
systems  
M-FS-14929  B68-10346  02

Molecular radiation - Its application in  
physical measurements and analyses  
M-FS-14816  B69-10562  02

**INVESTIGATIONS**

Voltage generator sweeps oscillator frequency  
linearly with time  
M-FS-219  B69-10320  01

Signal generator converts direct current  
to multiphase supplies  
M-SC-11043  B67-10368  01

Circuit automatically calibrates flowmeter  
against liquid-level gage reference  
M-FS-219A  B67-10376  01

Parallel-to-serial biphase-data converter  
ISCC-11600  B68-10241  01

**INVESTIGATIONS**

Study of hydrogen slush-hydrogen gel  
utilization  
M-FS-13068  B67-10413  02

Heavy-gage bonded honeycomb sandwich as  
primary load-bearing structure  
M-SC-12060  B67-10427  05

Study made of acoustical monitoring for  
mechanical checkout  
M-FS-13372  B67-10430  02

Study made of pneumatic high pressure piping  
materials /10,000 psi/  
KSC-10133  B67-10437  03

Study made of large amplitude fuel sloshing  
M-FS-12381  B67-10439  03

Study made of procedures for externally  
loading and corrosion testing stress  
corrosion specimens  
M-FS-12064  B67-10451  03

Computer magnetic tape rehabilitation study  
GSFC-10283  B68-10635  05

Glassy materials investigated for nuclear  
reactor applications  
ARG-10075  B68-10103  03

Automatic planning concept - An analysis of  
opima scheduling  
M-FS-14198  B68-10127  06

Squeeze-film gas bearing technology  
M-FS-14821  B68-10180  05

Study of convective magnetohydrodynamic  
channel flow  
ARG-10102  B68-10181  02

Reaction studied of steam with niobium and  
tantalum  
ARG-10051  B68-10189  03

Beryllium fastener technology  
M-FS-20306  B69-10019  05

Instabilities encountered during heat  
transfer to a supercritical fluid  

**SUBJECT INDEX**

ARG-10266  B69-10042  02

Fractography can be used to analyze failure  
modes in polytetrafluoroethylene  
M-FS-20294  B69-10066  03

Fatigue failure in metal bellows due to  
flow-induced vibrations  
M-FS-18383  B69-10071  05

Performance of low-pressure thermionic  
converters is evaluated  
ARG-10276  B69-10090  01

**INVESTMENT CASTING**

Vacuum forming of thermoplastic sheet results  
in low-cost investment casting patterns  
AEC-7  B63-10008  05

**INVISCID FLOW**

Large-amplitude inviscid fluid motion in an  
accelerating container  
M-SC-11560  B66-10170  02

Axisymmetric two-phase perfect gas  
performance program  
M-SC-11794  B68-10374  06

One-dimensional two-phase reacting gas  
nonequilibrium performance program  
M-SC-11780  B68-10376  06

Computer simulation of high-frequency  
combustion instability and its suppression  
RQ-10391  B69-10368  06

**IODIDES**

New method used to fabricate gallium arsenide  
photovoltaic device  
WGO-062  B64-10019  01

Cuprous selenide and sulfide form improved  
photovoltaic barriers  
WGO-212  B66-10250  01

Improved retort for cleaning metal powders  
with hydrogen  
LEWIS-10718  B69-10468  03

**IODINE**

Static electricity of polymers reduced by  
treatment with iodine  
NOQ-10062  B67-10132  03

Photovoltaic effect in organic  
polymer-iodine complex  
NOQ-10373  B67-10634  03

**IODINE ISOTOPES**

An economical method for the continuous  
production of iodine-123  
LEWIS-10518  B68-10433  03

**IODINE 131**

Ion exchange determines iodine-131  
concentration in aqueous samples  
ABG-208  B67-10129  04

**ION BEAMS**

New apparatus increases ion beam power density  
LEWIS-73  B63-10440  01

Highly sensitive solids mass spectrometer  
uses inert-gas ion source  
KEC-11  B66-10114  02

Epitaxial crystalline growth upon cold  
substrates  
M-SC-11196  B69-10494  01

Monopole mass spectrometer with improved  
sensitivity and reduced background  
RQ-10476  B69-10666  01

**IONIC CHARGERS**

Thin film thermal detector  
JPL-983  B67-10505  01

I-346
Nitric acid-organic mixtures surveyed for use in separation by anion exchange methods
ARG-10065  B68-10425  03

Separation of the rare earths by anion-exchange in the presence of lactic acid
ARG-10436  B69-10377  03

Novel multipurpose timer for laboratories
ARG-10147  B69-10410  01

Ion-exchange lens improves the abundance sensitivity of tandem mass spectrometers
ARG-10365  B68-10584  03

Separation of traces of metal ions from sodium matrices
ARG-10341  B69-10168  03

New apparatus increases ion beam power density
LEWIS-73  B63-10440  01

Suppressor plate eliminates undesired arcing during electron beam welding
M-PS-1126  B68-10357  05

Detecting hydrogen-containing contaminants on metal surfaces
M-PS-20456  B69-10192  03

High power dc/dc and dc/ac electrical power conversion techniques developed
M-PS-13227  B67-10350  01

Glass coated single grid for charged particle acceleration
LEWIS-10106  B68-10215  03

Full wave dc-to-dc converter using energy storage transformers
LEWIS-10375  B69-10140  01

Precise gimballing mechanism
M-PS-11057  B69-10270  01

Improved inorganic ion exchange membranes
LEWIS-10737  B69-10451  03

Improved fuel-cell-type hydrogen sensor
M-PS-14656  B68-10263  01
CONTAINING ALKALI METAL

Handbook explaining the fundamentals of nuclear and atomic physics, NDC-10330

IONIZATION CHAMBERS

Densitometer system for liquid hydrogen has high accuracy, fast response

IONIZATION CHAMBERS

Aluminized thin-window proportional-counter tube is stronger, more responsive in long wavelength region

IRREVERSIBLE RADIATION

Vacuum gage system for radiation environment

IONIZATION GASES

High-intensity flashing beacon powered by mercury cells

IONIZATION POTENTIALS

High-intensity flashing beacon powered by mercury cells

IONIZED GASES

Highly sensitive solids mass spectrometer uses inert-gas ion source

### SUBJECT INDEX

**ISOTROPIC PROCESSES**

- Modification to improve self-isolating transistor arrays B69-10676 01

**ISOLATORS**

- Electropneumatic rheostat regulates high current B65-10299 01
- Accumulator isolator prevents malfunctioning of faulty hydraulic system B65-10528 05
- Analog buffer isolates high impedance source from low impedance load B67-10544 01
- Solid state single-ended switching dc-to-dc converter B67-10558 01
- Improved traveling wave maser amplifier B66-10244 01

**ISOPROPYL ALCOHOL**

- This transparent films formed from powdered glass GSFC-352 B65-10217 03

**ISOSTATIC PRESSURE**

- Isostatic compression process converts polyaromatics into structural material JPL-892 B67-10168 03
- Porous mandrels provide uniform deformation in hydrostatic powder metallurgy B67-10209 03

**ISOTHERMAL FLOW**

- Study of thermal effects on nickel-cadmium batteries GSFC-10003 B67-10614 01
- Improved calorimeter provides accurate thermal measurements of space batteries GSFC-10003A B67-10615 01

**ISOTHERMAL PROCESSES**

- Superconductivity in zirconium-rhodium alloys ARG-90250 B68-10243 02
- Prediction of thermal radiation from a rocket exhaust plume B67-10371 02

**ISOTHERMS**

- Computer program calculates steady-state temperature distribution within plane or axisymmetric solids BUC-10143 B67-10665 06
- Real fluid properties of normal and parahydrogen LEWIS-10458 B68-10361 06
- Isothermal drop calorimeter provides measurements for alpha active, pyrophoric materials ABG-10186 B69-10002 02

**ISOTOPES**

- Calculation of resonance neutron absorption in two-region problems /the GAROL code/ BUC-10045 B67-10674 06
- Computer program calculates gamma ray source strengths of materials exposed to neutron fluxes BUC-10143 B67-10665 06
- Portable, high intensity isotopic neutron source provides increased experimental accuracy ABG-90250 B68-10243 02
- Isotopically pure magnesium isotope-24 is prepared from magnesium-24 oxide

**ISOCYANATES**

- Storage-stable foamable polyurethane is activated by heat LANSLEY-187 B66-10111 03
- Process produces chlorinated aromatic isocyanate in high yield M-PS-16558 B66-10646 03
- Improved primer for bonding polyurethane adhesives to metals M-PS-90591 B69-10540 03

**ISOLATION**

- High-pass RF coaxial filter rejects dc and low frequency signals GSFC-73 B64-10173 01
- Field-effect transistor replaces bulky transformer in analog-gate circuit GSFC-351 B65-10284 01
- Transmission system isolates pressure transducer from severe environment WOC-209 B66-10064 01
- Mechanism isolates load weighing cell during lifting of load B66-10071 05
- Study of fast response thermocouple measurement of temperatures in cryogenic gases M-PS-1659 B66-10661 01
- Amplifier provides dual outputs from a single source with complete isolation NUC-10056 B67-10221 01
- Remotely operated high pressure valve protects test personnel MSC-10110 B67-10291 05
- Method of improving contact bonds in silicon integrated circuits M-PS-1753 B67-10335 01
- Pocket-size manual tape reader device aids computer tape checking KSC-10058 B67-10361 B67-10369 01
- Multiple meter monitoring circuits served by single alarm MSC-10084 B67-10433 01
- Conceptual nonorthogonal gyro configuration for guidance and navigation MSC-11363 B67-10433 01
- Biological isolation garment MSC-12206 B68-10500 04
- Isolated, multiple-output voltage dc-to-dc converter M-PS-14976 B69-10014 01
- Conceptual techniques for reducing parasitic current gain of lateral pnp transistors MSC-13199 B69-10244 01
- Self-shielding printed circuit boards for high frequency amplifiers and transmitters BQ-10433 B69-10314 01

**ISOTOPE ISOLATION**

- High-pass BP, coaxial filter rejects dc and low frequency signals GSPC-73 B64-10173 01
- Pield-effect transistor replaces bulky transformer in analog-gate circuit GSFC-351 B65-10284 01
- Analog buffer isolates high impedance source from low impedance load B67-10544 01
- Improved traveling wave maser amplifier B60-10548 01

**ISOTROPIC PROCESSES**

- Computer program for high pressure real gas effects LEWIS-10820 B69-10222 06
- High pressure real gas effects for helium and nitrogen LEWIS-10819 B69-10669 06
- Natural gas flow through critical nozzles LEWIS-11031 B69-10712 02

**ISOTROPIC PROCESSES**

- Computer program calculates steady-state temperature distribution within plane or axisymmetric solids NUC-10049 B67-10224 06
- Real fluid properties of normal and parahydrogen LEWIS-10458 B68-10361 06
- Isothermal drop calorimeter provides measurements for alpha active, pyrophoric materials ABG-10186 B69-10002 02

**ISOTHERMAL FLOW**

- Study of thermal effects on nickel-cadmium batteries GSFC-10003 B67-10614 01
- Improved calorimeter provides accurate thermal measurements of space batteries GSFC-10003A B67-10615 01

**ISOTHERMAL PROCESSES**

- Superconductivity in zirconium-rhodium alloys ARG-90250 B68-10243 02
- Prediction of thermal radiation from a rocket exhaust plume B67-10371 02

**ISOTHERMS**

- Computer program calculates steady-state temperature distribution within plane or axisymmetric solids BUC-10143 B67-10665 06
- Real fluid properties of normal and parahydrogen LEWIS-10458 B68-10361 06
- Isothermal drop calorimeter provides measurements for alpha active, pyrophoric materials ABG-10186 B69-10002 02

**ISOTOPE ISOLATION**

- High-pass BP, coaxial filter rejects dc and low frequency signals GSPC-73 B64-10173 01
- Pield-effect transistor replaces bulky transformer in analog-gate circuit GSFC-351 B65-10284 01
- Analog buffer isolates high impedance source from low impedance load B67-10544 01
- Improved traveling wave maser amplifier B60-10548 01

**ISOTROPIC PROCESSES**

- Computer program for high pressure real gas effects LEWIS-10820 B69-10222 06
- High pressure real gas effects for helium and nitrogen LEWIS-10819 B69-10669 06
- Natural gas flow through critical nozzles LEWIS-11031 B69-10712 02

**ISOTROPIC PROCESSES**

- Computer program for high pressure real gas effects LEWIS-10820 B69-10222 06
- High pressure real gas effects for helium and nitrogen LEWIS-10819 B69-10669 06
- Natural gas flow through critical nozzles LEWIS-11031 B69-10712 02

**ISOTROPIC PROCESSES**

- Computer program for high pressure real gas effects LEWIS-10820 B69-10222 06
- High pressure real gas effects for helium and nitrogen LEWIS-10819 B69-10669 06

JET CONTROL

Control jet placement on spacecraft
- B69-10671 01

JET ENGINE FUELS
Centrifugal device separates liquid from gas
- B65-10394 05

Run-out chemical additive protects gear surface
- B66-10069 05

Vapor condensation process produces slurry of magnesium particles in liquid hydrocarbons
- B66-10104 03

Properties of air and combustion products of fuels with air
- B69-10711 03

JET ENGINES
Perforations in jet engine supersonic inlet increase shock stability
- B66-10530 05

Pre-weld heat treatment improves welds in Rene 41
- B66-10205 03

New rapid-curing, stable polysulfide polymers with high-temperature strength and thermal stability
- B69-10118 03

Improved design of item in high speed rotating machinery
- B69-10373 05

JET EXHAUST
Jet engine powers large, high-temperature wind tunnel
- B67-10621 02

JET FLOW
Binary fluid amplifier solves stability and load problems
- B66-10177 01

JET MIXING FLOW
Computer program calculates peripheral water injection cooling of axisymmetric subsonic diffuser
- B67-10543 06

JIGS
Jig and fixture aid fabrication of tungsten rivets
- B65-10101 05

Peel resistance of adhesive bonds accurately measured
- B65-10173 03

Spiral heater coils hand-formed with fixture
- B65-10192 05

Assembly jig assures reliable solar cell modules
- B66-10040 05

Tool provides constant purge during tube welding
- B66-10093 05

Depth indicator and stop aid machining to precise tolerances
- B66-10149 05

Jig protects transistors from heat while tinning leads
- B66-10240 05

Heat treatment stabilizes welded aluminum jigs and tool structures
- B66-10458 03

JOINING
Captive nut fastener securely joins brittle materials

I-352

SUBJECT INDEX

- B65-10245 05

Packaging of electronic modules
- B66-10664 01

Method of improving contact bonds in silicon integrated circuits
- B67-10335 01

Standards for compatibility of printed circuit and component lead materials
- B68-10310 01

Tube welding and brazing
- B69-10085 05

Tool repairs tube components in situ
- B69-10379 05

Magnetoactive forming for precision sizing and joining of large-diameter tubes
- B69-10422 05

JOINTS (JUNCTIONS)
Modular chasis simplifies packaging and interconnecting of circuit boards
- B63-10174 01

Lightweight universal joint transmits both torque and thrust
- B63-10236 05

Special pliers connect hose containing liquid under pressure
- B63-10291 05

New method used to fabricate light-weight heat exchanger for rocket motor
- B63-10346 02

Stainless-steel elbows formed by spin forging
- B63-10590 05

Circuit reliability boosted by soldering pins of disconnect plugs to sockets
- B66-10002 01

Flexible fastener allows thermal expansion
- B66-10165 05

Viscous-pendulum damper suppresses structural vibrations
- B64-10272 05

Knob linkage permits one-hand control of several operations
- B65-10022 05

Titanium treatment improves brazed joints
- B65-10153 05

Splice plate design assures structural separation by mild explosive
- B65-10166 05

Ball and socket joints provide accurate biaxial gimbal
- B65-10205 05

Thoriated nickel bonded by solid-state diffusion method
- B65-10220 03

Thermocouple-to-instrumentation connector features quick assembly
- B65-10246 05

Universal bellows joint restraint permits angular and offset movement
- B65-10371 05

Photosensors used to maintain welding electrode-to-joint alignment
- B65-10401 05

Flexible coiled spline securely joins mating cylinders
- B66-10172 05
Mount enables precision adjustment of optical-instrumentation mirror  
B66-10199  02

Pressure seal ring may be effective over wide temperature range  
B66-10211  05

External linkage tie permits reduction in ducting system flange thickness  
B66-10326  05

Bellows joint absorbs torsional deflections in duct system  
B66-10332  04

Spherical pipe joint delivers loads equally to mating flange  
B66-10665  05

Polaroid film helps locate objects in inaccessible areas quickly  
B67-10008  02

Spherical joint connects axially misaligned flanges  
B67-10273  05

Materials data handbook, aluminum alloy 7075  
B67-10333  01

Brake joint quality tested electromagnetically  
B67-10333  01

Low-energy gamma ray inspection of brazed aluminum joints  
B67-10337  02

Reparable, high-density microelectronic module provides effective heat sink  
B67-10356  01

Resilient bearing supports are gas controlled  
B67-10364  05

Heavy-gage bonded honeycomb sandwich as primary load-bearing structure  
B67-10427  05

Technique eliminates high voltage arcing at electrode-insulator contact area  
B67-10470  01

Aluminum and stainless steel tubes joined by simple ring and welding process  
B67-10472  05

Lead plated aluminum ring provides static high pressure seal for large diameter pressure vessel  
B67-10539  05

Self-aligning rod prevents eccentric loading of tensile specimens  
B67-10559  05

Development of helical seal for high temperature /2000 degrees F/ application  
B67-10655  05

Flare angles measured with ball gage  
B66-10030  01

Heat-shrink plastic tubing seals in glass tubing  
B66-10040  05

Method for reinforcing tubing joints  
B66-10115  05

Asbestos and Inconel combined to form hot-gas seal  
B66-10162  05

Tube swaging device uses explosive force  
B66-10235  05

Conceptual apparatus for detecting leaks of nonconductive liquids  
B68-10303  01

Determining gas leakage from bubble formations  
B68-10393  05

Hand-tightened, high-pressure seal  
B68-10417  05

Tube joint leak repair coupling  
B68-10540  05

Teflon-packed flexible joint  
B69-10049  03

Materials data handbook, aluminum alloy 6061  
B69-10065  03

Tool simplifies machining of pipe ends for precision welding  
B69-10231  05

Segmented SiGe-PbTe couples  
B69-10233  01

Finite element analysis of compressible solids with nonlinear material properties  
B69-10238  06

Thermal Network Analyzer Program  
B69-10239  06

Quick-release hook-and-loop fastener  
B69-10388  05

JOURNAL BEARINGS  

 Diameter sensing depletion of lubricant in journal bearings  
LWIS-37  01

Slit feeds reduce unbalanced torques in gas-lubricated bearings  
JPL-264  05

A conceptual design for squeeze film bearings  
B66-10226  05

Resilient bearing supports are gas controlled  
B67-10364  05

Shallow grooves in journal improve air bearing performance  
B68-10134  05

Low cost techniques for fabricating lobed bearings  
B68-10135  01

Journal gas bearing for curved surfaces  
B69-10182  05

Study of high temperature bearing materials  
B69-10185  05

Hermetically sealed pump  
B69-10320  05

JP-4 JET FUEL  

Magnetic fluid readily controlled in zero gravity environment  
LWIS-126  03

Test instrumentation evaluates electrostatic hazards in fluid system  
B67-10145  01

JUDDS  

Modular chassis simplifies packaging and interconnecting of circuit boards  
JPL-236A  03

JUNCTION DIODES  

Logarithmic amplifier uses field effect transistors  
B65-10145  01
JUNCTION TRANSISTORS

Efficient millimeter wave 1140 GHz diode for harmonic power generation
HQ-61 B67-10166 01

Development of reliability prediction technique for semiconductor diodes
GSFC-10231 B67-10651 06

JUNCTION TRANSISTORS

Economical fabrication process produces high quality junction transistors
JPL-SC-065 B64-10330 01

Increased junction lead inductance ballasts high-frequency transistors
GSFC-367 B65-10259 01

Low-power ring counter drives high-level loads
GSFC-431 B66-10106 01

Improved chopper circuit uses parallel transistors
N-PS-438 B66-10113 01

Electrically controlled optical latch and switch requires less current
JPL-SC-111 B66-10414 01

Equivalent circuit for a field effect transistor established for computer simulation
N-PS-1752 B66-10690 01

Instrument sequentially samples ac signals from several accelerometers
JPL-884 B67-10029 01

Schmitt trigger multivibrator
MSC-1055 B69-10143 01

Modification to improve self-isolating transistor arrays
N-PS-20499 B69-10678 01

Lateral NPN bipolar transistor with adding field diffusions
MSC-13072 B69-10741 01

JUNCTIONS

New method used to fabricate gallium arsenide photovoltaic device
NPO-062 B64-10019 01

Multiple temperatures sampled using only one reference junction
GSFC-485 B66-10260 01

Thermoelectric metal comparator determines composition of alloys and metals
ARG-235 B67-10035 01

JUPITER (PLANETS)

Space trajectories program for IHE 7090
NPO-10125 B67-10172 06

Trajectory optimization using regularized variables
MSC-13370 B69-10810 02

K

KALMAN-SCHMIDT FILTERING

New technique for optimal smoothing of data
MSC-11354 B68-10060 02

KEPLER LANGAN

Fortran 4 program for two-impulse rendezvous analysis
N-PS-13971 B67-10479 06

KERNEL FUNCTIONS

Bell nozel kernel analysis program
N-PS-18456 B69-10146 06

KEROSHEM

Protective coating withstands high temperature in oxidizing atmosphere
N-PS-529 B66-10048 03

SUBJECT INDEX

Run-in with chemical additive protects gear surface
N-PS-548 B66-10089 05

Thermoplactic rubberlike material produced at low cost
JPL-793 B66-10453 03

VEE CELLS

Mulling pyrometer uses Kerr cell shutter for fast responses
No-0010 B65-10050 01

Synthesis of electro-optic modulators for amplitude modulation of light
N-PS-14266 B68-10275 02

VEE ELECTROOPTICAL EFFECT

Two-color holography
HP-10349 B69-10662 02

VEE MAGNETOPTICAL EFFECT

Simplified technique demonstrates magnetic domain switching
N-PS-13153 B67-10342 02

Optically exciting a magnetic memory - A feasibility study
N-PS-14054 B65-10060 02

KEROSHEM

Sprayable birefringent coating enables strain measurements on large surfaces
N-PS-1484 B66-10578 05

Degreasing of titanium to minimize stress corrosion
LWIS-302 B67-10143 07

Photonsensitive filler minimizes internal stresses in epoxy resins
N-PS-1880 B67-10227 03

Welded repairs of punctured thin-walled aluminum pressure vessels
N-PS-14036 B65-10051 05

KEYING

Keyed plugs and sockets prevent improper connections
MSC-231 B65-10381 01

Polarizing keys prevent mismatch of connector plugs and receptacles
MSC-443 B66-10251 01

KIDNEYS

Large volume continuous counterflow dialyzer has high efficiency
HP-10055 B67-10395 04

KINEMATICS

Tester for study of rolling element bearings
LEWIS-305 B67-10009 01

Study made of large amplitude fuel sloshing
N-PS-12381 B67-10439 03

Propagation of density disturbances in air-water flow
ARG-10260 B69-10043 02

KINETIC ENERGY

Kinetic-energy absorber employs frictional force between mating cylinders
LEWIS-75 B63-10442 05

Shock absorber operates over wide range
MSC-168 B65-10241 05

Magnetohydrodynamic generators using two-phase liquid-metal flows
ARG-10168 B69-10162 01

Studies of cycles for liquid-metal magnetohydrodynamic generation of power
ARG-10250 B69-10194 02

Storage of electric and magnetic energy

LEAD SULFIDES

Advances in aluminum anodizing

LEAD TELLURIDES

Thermoelectric elements diffusion-bonded to tungsten electrodes

LEAD TITANATES

Phonocardiograph microphone is rugged and moistureproof

Ultrasonic wrench produces leaktight connections

LEAKAGE

Vented piston seal prevents fluid leakage between two chambers

Device transmits rotary motion through hermetically sealed wall

Self sealing disconnect for tubing forms metal seal after breakaway

Fluid-pressure meter can be calibrated without removal from flow line

Sensitive low-pressure relief valve has positive seating against leakage

Valve designed with elastic seat

Fuel cell serves as oxygen level detector

Low-cost seal compensates for surface irregularities

Superconductor magnets used for stagger-tuning traveling-wave maser

Diaphragm eliminates leakage in cryogenic fluid duct coupling

Weld leaks rapidly and safely detected

Composite seal reduces alkaline battery leakage

O-ring tube fittings form leakproof seal in hydraulic systems

SUBJECT INDEX

Resilient clamp holds fuel cell stack through thermal cycle

Control system maintains selected liquid level

High-pressure, low temperature electrical connector makes no-leak seal

Capacitive system detects and locates fluid leaks

Dispenser leak-tests and sterilizes rubber gloves

Wide-range instrument monitors flow rates of chemically active fluids

Special tool seals conductors with combination of plastic sleeves

Soft-seal valve holds hazardous fluids safely

Expandable rubber plug seals openings for pressure testing

Brazing process using Al-Si filler alloy reliably bonds aluminum parts

Pressure-welded flange assembly provides leaktight seal at reduced bolt loads

Flow ring valve is simple, quick-acting

Vacuum test fixture improves leakage rate measurements

Flexible fastener effects airtight material closure

Union would facilitate joining of tubing, minimize braze contamination

Valve seat pores sealed with thermosetting monomer

Sniffer used as portable hydrogen leak detector

Diaphragm valve for corrosive and high temperature fluid flow control has unique features

Minimum permissible leakage resistance established for instrumentation systems

Leak locator for vacuum jacketed pipelines eliminates need for removal of outer jacket

Electroplating eliminates gas leakage in brazed areas

Large diameter metal ring seal prevents gas leakage at 5000 psi

Gas leak detector is simple and...
inexpensive
Silver plating technique seals leaks in thin wall tubing joints
Orbital tube flaring system produces tubing connectors with zero leakage
Visco seal design offers zero-leakage and wear-free characteristics
Portable detector set discloses helium leak rates
Portable fixture facilitates pressure testing of instrumentation fittings
Cryogenic seal remains leak tight during thermal displacement
Cracks in glass electrical connector headers removed by dry blasting with fine abrasive
Fixture facilitates helium leak testing of pipe welds
Apparatus for fabrication of americium-beryllium neutron sources prevents capsule contamination
Segmented, arch-bound carbon seal is pressure loaded
Ultrasound welds produce leak tight connections
Stabilizing stainless steel components for cryogenic service
Aluminum and stainless steel tubes joined by simple ring and welding process
Dynamic valve seal is reliable at cryogenic temperature
Flourocarbon seal replaces metal piston ring in low density gas environment
Dynamic captive plastic seal
Cryogenic seal concept for static and dynamic conditions
Vent and relief valve maintains low leakage rate over broad temperature range
Locating and sealing air leaks in multistoried buildings
Device provides controlled gas leaks
Tube swaging device uses explosive force
Spiral-grooved shaft seals substantially reduce leakage and wear
Between-bearing shaft seal, a concept
Conceptual apparatus for detecting leaks of nonconductive liquids
Determining gas leakage from bubble formations
Nondestructive testing of brazed rocket engine components
Tube joint leak repair coupling
Reliable method for testing gross leaks in semiconductor component packages
Semitoroidal-diaphragm cavitating valve designed for bipropellant flow control
Diffusion of trace gases for leak detection - a study
Leakage tester for flat conductor cable connector
Sealing a rubber bladder between two sections of an accumulator
Leakage measuring method
Piezoelectric linear actuator
Placed-tube fittings with replaceable seat inserts
Burst diaphragm leak detector
Integral valve provides automatic relief and remote venting
Two-functional seal for hose connection

LEAST SQUARES METHOD
Method accurately measures mean particle diameters of monodisperse polystyrene latexes
Solubility data are compiled for metals in liquid zinc
Computer program for network synthesis by frequency response fit
Numerical least-square method for resolving complex pulse height spectra
Automatic design of optical systems by digital computer
Computer graphics data conditioning
Frequency domain analysis and synthesis of lumped parameter systems using nonlinear least squares techniques

Fine-line sensitivity for holographic
interferograms
ARG-10348  B69-10663  02
Effect of preparation procedures on intensity of radioautographic labeling is studied

Instrument quickly transposes ground reference target to eye level

Alignment tool facilitates pin placement on irregular horizontal surfaces

Level of super-cold liquids automatically maintained by levelometer

Low-cost voltage-level detector

Sensitive level sensor made with spirit level, gives electrical output

Rotary valve controls multiple hydraulic leveling cylinders

Heavy duty precision leveling jacks expedite setup time on horizontal boring mill

Steel test panel helps control additives in pyrophosphate copper plating

Automatic Gaussian random-noise limiter

Automatic leveling and equalizing hoist device

Solenoid permits remote control of stop watch and assures restarting

Fatigue tester achieves true axial motion through flex plates and bars

Tool facilitates installation of Marxism clamps

Single-source mechanical loading system produces biaxial stresses in cylinders

Technique for measuring magnetic tape interlayer adhesion

Battery case shear

Detachable caster adapter

Levitation-sediment technique for metals and alloys

Electrolytic separation of crystals of transition-metal oxides

LIBRARY

JPKWIC – General key word in context and subject index report generator
LIFT DEVICES

- Miniature oxygen resuscitator
  KSC-10398 B69-10319 04
- Rate of heat extraction controller for environmental control
  HQ-10316 B69-10516 01

LIFT DEVICES

- Buckle joins web straps quickly, adjusts easily
  LANGLEY-21 B64-10111 05
- Mechanism isolates load weighing cell during lifting of load
  MSC-257 B66-10071 05
- Self-actuating grapple automatically engages and releases loads from overhead cranes
  ARG-81 B66-10522 05

LIFTS

- Hoist is automatically stopped at low deceleration rate
  M-FS-1639 B66-10545 05
- Conceptual dead weight device to provide pressure calibration
  M-FS-14672 B68-10264 01
- Fifth-wheel fork truck adapter
  M-FS-14460 B69-10021 05
- Detachable caster adapter
  MSC-91215 B69-10164 05
- Automatic leveling and equalizing hoist device
  M-FS-16549 B69-10514 05

LIGANDS

- Aggregation of metallochlorophylls - Examination by spectroscopy
  ARG-10273 B69-10163 04

LIGHT (VISIBLE RADIATION)

- Instrument accurately measures extremely low air densities
  M-FS-193 B65-10221 01
- Unique construction makes interferometer insensitive to mechanical stresses
  JPL-725 B65-10295 02
- Inexpensive infrared source improvised from flashlight
  M-FS-894 B66-10096 02
- Plastic scintillator converts standard photomultiplier to ultraviolet range
  ERC-9 B66-10108 02
- Optical device enables small detector to see large field of view
  W00-253 B66-10263 02
- Sensors measure surface ablation rate of reentry vehicle heat shield
  LANGLEY-287 B66-10592 01
- Optical automatic gain channel
  M-FS-1550 B66-10596 02
- Exposure Value /EV/ system expanded to include filter factors and transmittance
  LANGLEY-190 B66-10602 02

PHOTOGRAPHIC METHOD MEASURES PARTICLE SIZE

- and velocity in fluid stream
  M-FS-1536 B66-10668 01
- Laser Doppler flowmeter measures gas velocity
  M-FS-1747 B66-10693 02
- Design concept for improved photo-scan tube
  JPL-816 B67-10157 01
- Simplified technique demonstrates magnetic domain switching
  M-FS-13153 B67-10342 02
- Aerial-image enables diagrams and animation to be inserted in motion pictures
  ARG-165 B67-10398 02
- Optical integrating sphere operates at visible and infrared wavelengths
  M-FS-14248 B69-10126 02
- Improved gas ring laser
  MSC-11584 B68-10304 02
- System converts optical phase changes to RF phase changes
  M-FS-20091 B68-10430 01
- Occluding-filter method for obtaining flashing-light visibility data
  MSC-13097 B69-10107 02
- Method for copper staining of germanium crystals
  ARG-10403 B69-10257 03
- Concept for improved vacuum pressure measuring device
  M-FS-20172 B69-10421 02
- Synthesis of electro-optic modulators for amplitude modulation of light
  M-FS-14268 B68-10275 02
- Servo system facilitates photoelastic strain measurements on resins
  JPL-504 B69-10280 01
- System measures angular displacement without contact
  LANGLEY-46 B66-10073 02
- Light-sensitive potentiometer measures product of two variables
  GSFC-240 B65-10076 01
- Photoelectric system continuously monitors liquid level
  M-FS-817 B65-10382 02
- Device to color modulate a stationary light beam gives high intensity
  HQ-44 B66-10476 01
- High-speed camera synchronization
  M-FS-18062 B68-10282 02
- Modified sine bar device measures small angles with high accuracy
  GSFC-830 B66-10322 02
- Improvement in recording and reading holograms
  ERC-10151 B68-10347 02
- Ring laser angle encoder
  MSC-13099 B69-10115 01
- Laser interferometer micrometer system
  M-FS-14747 B69-10633 02
- Fine-line sensitivity for holographic interferograms
  HQ-10348 B69-10663 02
- Optical frequency waveguide and ion...

**LIGHT EMISSION**

Optical arrangement increases useful light output of semiconductor diodes

JPL-SC-064 B65-10020 05

Practical new method of measuring thermal-neutron fluence

NUC-10086 B67-10352 02

Fluidic-thermochromic display device

ERC-10031 B68-10350 01

Improved radiographic image amplifier panel

N-FS-14522 B68-10363 02

Silicon carbide diode for increased light output

N-FS-20063 B69-10096 01

Optical frequency waveguide and ion transmission system

BQ-10541 B69-10746 01

**LIGHT SOURCES**

LEDISIOB

Optical arrangement increases useful light output of semiconductor diodes

JPL-SC-064 B65-10020 05

Practical new method of measuring thermal-neutron fluence

NUC-10086 B67-10352 02

Fluidic-thermochromic display device

ERC-10031 B68-10350 01

Improved radiographic image amplifier panel

N-FS-14522 B68-10363 02

Silicon carbide diode for increased light output

N-FS-20063 B69-10096 01

Optical frequency waveguide and ion transmission system

BQ-10541 B69-10746 01

**LIGHT GAS GUNS**

Advances in light-gas gun technology

N-FS-14270 B68-10288 05

**LIGHT MODULATION**

Light ray modulation controls optical system alignment

GSPC-171 B65-10211 02

Communication system uses modulated laser beam

GSPC-377 B65-10333 01

Device to color modulate a stationary light beam gives high intensity

HQ-94 B66-10476 01

Improved design provides faster response time in photomultiplier

GSPC-451 B66-10526 01

Light-intensity modulator withstands high heat fluxes

MSC-246 B66-10532 02

Electronic filter discriminates between true and false reflections

HQ-55 B67-10071 02

Wideband, high efficiency optical modulator requires less than 10 watts drive power

N-FS-12733 B67-10289 01

Optically induced free carrier light modulator

GSPC-10216 B69-10114 01

**LIGHT SCATTERING**

Thin carbon film serves as UV bandpass filter

ERC-8 B66-10060 02

Solvent residue content measured by light scattering technique

N-FS-850 B66-10330 01

Laser Doppler flowmeter measures gas velocity

N-FS-1747 B66-10693 02

Special purpose reflectometer uses modified ulbricht sphere

MSC-1135 B67-10109 02

Improved atmospheric particle analyzer

ERC-33 B67-10231 01

Electronic shutter gates image orthicon on and off

HQ-96 B67-10270 01

Liquid crystals detect voids in fiber glass

**LIGHT SOURCES**

laminates

LEWIS-10104 B67-10286 03

Laser-Doppler gas-velocity instrument

N-FS-20039 B68-10389 02

Detection of effect of deposits on optical windows of pyrometer measurements

LEWIS-10366 B68-10367 01

Fresnel cup reflector directs maximum energy from light source

JPL-424 B63-10263 03

Liquid-level meter has no moving parts

N-FS-3 B63-10378 03

Mirror device aligns machine surface perpendicular to sight lines

WG0-5 B63-10421 02

Variable light source with a million-to-one intensity ratio

JPL-WGO-D08 B63-10424 03

Low-cost tape system measures velocity of acceleration

MSC-85 B63-10512 01

Camera shutter is actuated by electric signal

ARC-20 B63-10560 05

Analog device simulates physiological waveforms

MSC-51 B64-10109 01

Attachment converts microscope to point source autocollimator

JPL-499 B64-10124 05

Compact cartridge drives coded tape at constant readout speed

JPL-472 B64-10222 01

Modification increases light output of injection-luminescent diodes

N-FS-192 B65-10006 01

Sensitive level sensor made with spirit level, gives electrical output

LANGLEY-89 B65-10067 01

Simple optical system used to align spectograph

LANGLEY-92 B65-10071 02

Instrument calibrates low gas-rate flowmeters

MSC-134 B65-10137 01

Interferometer combines laser light source and digital counting system

MSC-151 B65-10161 01

Brushless dc motor uses electron beam switching tube as commutator

GSPC-345 B65-10237 01

Photore sistance analog multiplier has wide range

GSPC-360 B65-10287 01

Photoelectric system continuously monitors liquid level

N-FS-417 B65-10382 01

Optical output enhances flowmeter accuracy

N-FS-482 B65-10395 02

Photodetectors used to maintain welding electrode-to-joint alignment

MSC-243 B65-10401 05

Small, high-intensity flasher permits continuous close-in photography

NU-0043 B66-10119 03

Optical gyro pickoff operates at cryogenic temperatures

I-365

SUBJECT INDEX

LINEAR SYSTEMS

started, has high stability
WO-0030 B66-10015 01

Thin carbon film serves as UV bandpass filter
ERC-8 B66-10060 02

Neon isotopes cancel errors in gas laser
N-PS-1476 B66-10583 02

Portable spectrometer monitors inert gas shield in welding process
N-PS-12144 B67-10326 02

A computer program for a line-by-line calculation of spectra from diatomic molecules and atoms assuming a Voight line profile
ARC-10221 B69-10583 02

Molecular radiation - Its application in physical measurements and analyses
N-PS-14814 B69-10562 02

Electrothermal linear actuator
NPE-10637 B69-10296 05

An unconventional magnetically-coupled multivibrator
HQ-10226 B69-10480 01

Simple circuit functions as frequency discriminator for IFM signals
GSFC-267 B65-10102 01

Diffusion technique stabilizes resistor values
MSC-205 B66-10142 01

Linear signal noise summer accurately determines and controls S/N ratio
JPL-SC-152 B66-10433 01

Current-switching technique for analog pulse circuits
ARB-10479 B69-10445 01

An unconventional magnetically-coupled multivibrator
HQ-10226 B69-10480 01

Binary sequence detector uses minimum number of decision elements
JPL-673 B66-10264 01

Simple circuit functions as frequency discriminator for IFM signals
GSFC-267 B65-10102 01

Diffusion technique stabilizes resistor values
MSC-205 B66-10142 01

Linear signal noise summer accurately determines and controls S/N ratio
JPL-SC-152 B66-10433 01

Linear circuit analysis program for IBM 1620 Monitor 2, 1371/1443 data processing system /CIRC5/
NPO-10131 B67-10173 06

General purpose computer programs for numerically analyzing linear ac electrical and electronic circuits for steady-state conditions
N-PS-13094 B67-10331 06

Electronic skewing circuit monitors exact position of object underwater
NDC-10146 B67-10629 01

Frequency offset in linear FM/CW transponder eliminates clutter
N-PS-249 B65-10146 01

Interferometer combines laser light source and digital counting system
MSC-151 B65-10161 01

Electronic skewing circuit monitors exact position of object underwater
NDC-10146 B67-10629 01

Input gate circuit converted for use as linear amplifier
N-PS-14265 B68-10015 01

Linear voltage-to-frequency converter
GSFC-10546 B69-10220 01

Current-switching technique for analog pulse circuits
ARB-10479 B69-10445 01

Improved pulse shape discriminator for fast neutron-gamma ray detection system
HQ-10151 B69-10481 01

Computer subroutine ISUDS accurately solves large system of simultaneous linear algebraic equations
NCS-10051 B67-10344 06

Solution of differential equations by application of transformation groups
N-PS-14802 B68-10276 02

Linear systems of equations solved using mathematical algorithms
ARB-10146 B68-10292 06

Buckling Of Shells Of Revolution /BOSOR/ with various wall constructions
LANGLEY-10441 B69-10300 06

Constant-frequency, variable-duty-cycle multivibrator
XS-10033 B69-10512 01

Engineering thermal analyzer /BETA 2/
N-PS-15055 B69-10760 06

Design of dissipative linear phase filters
N-PS-14698 B66-10572 01

Polynomial manipulator AP-168
MSC-1231 B67-10103 01

Computer program provides linear sampled-data analysis for high order systems
N-PS-12927 B67-10287 06

Automatic planning concept - An analysis of optimum scheduling
H-PS-14802 B68-10127 06

Structural Analysis and Matrix Interpretive System /SAHIS/
NPO-10839 B69-10093 01

Control jet placement on spacecraft
NCS-13365 B69-10671 01

Use of both linear and logarithmic transfer functions to increase dynamic range of visual channel
GSFC-10475 B69-10037 01

Simple circuit provides adjustable voltage with linear temperature variation
JPL-WO-029 B63-10537 01

Voltage generator sweeps oscillator frequency linearly with time
N-PS-219 B64-10320 01

Temperature transducer has high output, is time stable
GSFC-486 B65-10362 01

General frequency response program calculates frequency response of system, open at any specified element
Study of yttrium iron garnet rods reveals new magnetostatic echo mode

B67-10153 01

Subminiature deflection circuit operates integrated sweep circuits in TV camera

B67-10155 01

Stress calculator speedily converts strain data

B67-2021 01

Tritiated alumina serves as reagent for self-labeling analysis

B67-10315 01

Digital voltage-controlled oscillator

GSPC-512 01

Design for high-temperature /1800 deg F/ liquid metal pressure transducer

B67-10458 01

Blood pressure reprogramming adapter assists signal recording

B66-265 01

Analog buffer isolates high impedance source from low impedance load

B67-10475 01

Design techniques - Stochastic controllers

KSC-10151 01

Dynamic linearity measurement technique

B66-10457 01

Highly linear, sensitive analog-to-digital converter

KSC-10186 01

The Quantasyn, an improved quantum detector

KSC-10148 01

Linearization techniques

Problem of oscillating cone in supersonic flow is solved by small perturbation techniques

KSC-10453 01

Hydraulic system provides smooth control of large tracking and antenna drive systems at very low tracking rates

KSC-10454 01

FORTAN optical lens design program

KSC-10507 01

Lines (Geometry)

System converts slow-scan to standard fast-scan TV signals

KSC-10508 01

Linear position processes

Teflon fluorocarbon liners for flexible hoses

KSC-10509 01

Linear position

Flow line extends operating life of high-angulation bellows

KSC-10510 01

Analysis of filament reinforced metal-shell pressure vessels

KSC-10511 01

Adhesive for cryogenic temperature applications

KSC-10512 01

Linear motions

Electromechanically operated camera shutter provides uniform exposure

JPL-357 01

Camera shutter is actuated by electric signal

Reconnect mechanism
N-PS-12968 B67-10670 05

Boydbolt, a positive-latch, simple-release fastener
MSC-13061 B68-10512 05

Astronaut’s tool for withdrawing/replacing computer cards
N-PS-20453 B69-10256 05

Piezoelectric lock mechanism resists lockpicking
SAN-10037 B69-10182 05

Countersunk headscrew retainer
N-PS-16481 B69-10282 05

Removal of retaining washers of the waffle-spring type
MSC-15531 B69-10350 05

LOG PERIODIC ANTENNAS
Antenna configurations provide polarization diversity
GSFC-74 B66-10066 01

LOGARITHMIC RECEIVERS
Transistor circuit increases range of logarithmic current amplifier
N-PS-2018 B66-10350 01

Use of both linear and logarithmic transfer functions to increase dynamic range of visual channel
GSFC-10675 B69-10037 01

LOGARITHMS
Logarithmic amplifier uses field effect transistors
JPL-509 B65-10145 01

Simple scale interpolator facilitates reading of graphs
LEWIS-92 B66-10302 05

Stress calculator speedily converts strain data
N-PS-2021 B67-10162 03

Solubility data are compiled for metals in liquid zinc
ARG-149 B67-10191 03

SiC/Si diode trigger circuit provides automatic range switching for log amplifier
N-PS-1879 B67-10314 01

General purpose computer programs for numerically analyzing linear ac electrical and electronic circuits for steady-state conditions
N-PS-13094 B67-10331 06

Study of corrosion of 1100 aluminum
ARG-10045 B67-10578 03

Linear-log counting-rate meter uses transconductance characteristics of a silicon planar transistor
ARG-10158 B69-10191 01

Accurate nine-decade temperature-compensated logarithmic amplifier
ARG-10480 B69-10429 01

LOGIC
Parallel-to-serial biphase-data converter
MSC-11600 B68-10241 01

Fluidic-thermochropic display device
HNC-10031 B68-10350 01

LOGIC CIRCUITS
Frequency-shift-keyer circuit improves PCM conversion for radio transmission
GSFC-80 B63-10511 01

Computer circuit will fit on single silicon chip
JPL-513 B63-10514 01

Ring counter may be advanced or retarded by command signal
GSFC-101 B64-10144 01

Novel circuit combines pulse stretcher with NOR gate
GSFC-187 B64-10150 01

Pneumotachometer counts respiration rate of human subject
MSC-92 B64-10259 01

Logic redundancy improves digital system reliability
JPL-SC-065 B65-10025 01

System selects framing rate for spectrograph camera
LANGLB-55 B65-10086 01

Logic circuit exhibits optimum performance
LANGLB-129 B66-10193 01

Delayed ripple counter simplifies square-root computation
GSFC-398 B65-10343 01

Simple circuit performs binary addition and subtraction
GSFC-399 B65-10355 01

Queuing register uses fluid logic elements
N-PS-317 B66-10100 05

New television camera eliminates vidicon tube
N-PS-472 B66-10112 01

Simplified circuit corrects faults in parallel binary information channels
JPL-SC-090 B66-10261 01

Binary sequence detector uses minimum number of decision elements
JPL-673 B66-10264 01

Exclusive-or logic circuit has useful properties
LANGLB-214 B66-10272 01

Single channel pulse-height analyzer operates in subnanosecond range
LEWIS-267 B66-10377 01

System monitors discrete computer inputs
N-PS-1021 B66-10389 01

Logic system aids in evaluation of project readiness
MSC-753 B66-10457 05

Instrument automatically selects peak acceleration signal from several accelerometers
JPL-876 B66-10462 01

Bipolar current driver for memory circuits
GSFC-213 B66-10469 01

Digital system provides superregulation of nanosecond amplifier-discriminator circuit
ARG-61 B66-10500 01

Nixie tube display unit employs time-shared logic
ARG-117 B66-10512 01

Apparatus enables automatic microanalysis of body fluids
JPL-962 B66-10515 04

One-count memory circuit prevents machine mode interaction
Fluid logic control circuit operates nutator actuator motor

Hybrid solid state switch replaces motor-driven power switch

Logic circuitry used to automatically test shielded cables

Computer program simulates physical systems by solving the simultaneous differential equations describing the systems

Solid state circuit averages multiple signals and rejects those varying significantly from the average

Current steering commutator offers versatility

Self-correcting, synchronizing ring counter using integrated circuit devices

Logic circuit detects both present and missing negative pulses in superimposed wave trains

Digital filter suppresses effects of nonstatistical noise bursts on multichannel scaler digital averaging systems

Gimbal angle sensor

Closed circuit TV system automatically guides welding arc

Short circuit protection for a power distribution system

Isolated, multiple-output voltage dc-to-dc converter

Simple tunnel diode circuit for accurate zero crossing timing

Integrated circuit with multiple collector current source

Self-starting circuit for switching regulators

Miniaturization of magnetic logic circuitry

Pneumatic analog-to-pulse frequency converter

Visual task analysis /VISTA/

Special purpose computer provides programmable digital filter for sampled-data control systems

Technique for improving solid state mosaic images

Pulse-code-modulation baseline correction for low signal-to-noise ratios

Delayed ripple counter simplifies square-root computation

Review of research and development in fluid logic elements

Exact minimal-state system reliability analysis

Programmed schedule holds for improving launch vehicle holds

Digital logic elements provide additional functions from analog input

Circuit maintains digital decision threshold at preset level

Frequency discriminator with binary output eliminates tuned circuits

Binary counter accumulates time by complementary preset

Queueing register uses fluid logic elements

Simplified circuit corrects faults in parallel binary information channels

Binary sequence detector uses minimum number of decision elements

Technique for improving solid state mosaic images

Design and sparing techniques to meet specified performance life

Closed circuit TV system automatically guides welding arc

Short circuit protection for a power distribution system

Isolated, multiple-output voltage dc-to-dc converter

Simple tunnel diode circuit for accurate zero crossing timing

Integrated circuit with multiple collector current source

Self-starting circuit for switching regulators

Miniaturization of magnetic logic circuitry

Pneumatic analog-to-pulse frequency converter

Visual task analysis /VISTA/

Special purpose computer provides programmable digital filter for sampled-data control systems

Technique for improving solid state mosaic images

Electrometer has automatic zero bias control

Spiral-grooved shaft seals substantially reduce leakage and wear

Self-starting circuit for switching regulators

Miniaturization of magnetic logic circuitry

Pneumatic analog-to-pulse frequency converter

Visual task analysis /VISTA/

I-381
LUBRICANT TESTS

Thermionic diode switching has high temperature application
NPO-10404 B67-10672 01

Solid state high-voltage pulser operates with low supply voltage
N-FS-14034 B68-10308 01

Millivolt signal limiter
LEWIS-90297 B69-10015 01

LUBRICANT TESTS

Polydene disulfide mixtures make effective high-vacuum lubricants
N-FS-54 B63-10453 03

Electron bombardment improves vacuum chamber efficiency
LEWIS-160 B65-10280 02

Machine tests slow-speed sliding friction in high vacuum
M-FS-12341 B67-10379 05

High-temperature bearing lubricants
LEWIS-10408 B68-10249 05

LUBRICANTS

Gallium useful bearing lubricant in high-vacuum environment
LEWIS-12 B63-10337 03

Polydene disulfide mixtures make effective high-vacuum lubricants
N-FS-54 B63-10453 03

Burnishing technique improves lubrication of threaded fasteners
LEWIS-217 B65-10302 03

Run-in with chemical additive protects gear surface
M-FS-548 B66-10069 05

Gallium alloy films investigated for use as boundary lubricants
LEWIS-245 B66-10165 03

Copper-acrylic enamel serves as lubricant for cold drawing of refractory metals
ARG-54 B66-10471 05

Film coating permits low-force scribing
MSC-990 B66-10609 03

Improved rolling element bearings provide low torque and small temperature rise in ultrahigh vacuum environment
LEWIS-359 B66-10678 05

Valve effectively controls amount of contaminant in flow stream
M-FS-1771 B66-10683 05

Development of technology for hot-drape forming of large torus sections
M-FS-12141 B67-10341 05

Improved sample capsule for determination of oxygen in hemolyzed blood
MSC-11017 B67-10408 04

Electromechanical rotary actuator operates over wide temperature range
M-FS-18402 B69-10100 05

Tools made of ice facilitate forming of soft, sticky materials
KSC-10262 B69-10199 05

Diffusion bond method of joining steel and a TPE-bronze composite
N-FS-20482 B69-10237 03

Remote balance weighs accurately and high radiation
ARG-10387 B69-10242 05

A new solid lubricant

LUBRICATING OILS

Gallon meter senses depletion of lubricant in journal bearings
LEWIS-37 B66-10042 01

Unique gear design provides self-lubrication
JPL-SC-079 B65-10366 03

Radioactive tracer system detects oil contaminants in fluid lines
M-FS-512 B66-10090 03

Air bearing provides friction-free support for shaker system slip table
WJ-0086 B66-10708 05

Design concept to decrease relative speed of ball bearings
M-FS-2003 B67-10212 05

High-temperature bearing lubricants
LEWIS-10408 B68-10249 05

Dynamic-reservoir lubricating device
M-FS-16652 B68-10261 05

Discrimination of fish oil and mineral oil slicks on sea water
BO-10412 B69-10673 01

LUBRICATION SYSTEMS

Miniature bearings lubricated by sonic dispersion method
M-FS-202 B65-10106 03

Squeeze-film gas bearing technology
M-FS-14621 B66-10180 05

Dynamic-reservoir lubricating device
M-FS-16652 B68-10261 05

Nozzles for size reclassification of microfog particles
LEWIS-10705 B69-10076 05

Self-lubricating gear
M-FS-14971 B69-10408 05

LOGS

Improved solderless connector is easily disconnected
JPL-SC-060 B65-10197 01

T-handle wrench has torque-limiting action
MSC-280 B66-10065 05

Calibrated water tank facilitates proof-
Loading of cranes and derricks

Adjustable wrench for electronic connectors

An improved method for electrical cable terminations

Simple circuit continuously monitors thermocouple sensor

Attachment converts microscope to point source autocollimator

Electronic device simulates respiration rate and depth

Electrodeless discharge lamp is easily started, has high stability

Lamp automatically switches to new filament on burnout

Thin carbon film serves as UV bandpass filter

Circular, explosion-proof lamp provides uniform illumination

Two-light circuit continuously monitors ac ground, phase, and neutral wires

Multicolor stroboscope pinpoints resonances in vibrating components

High-speed furnace uses infrared radiation for controlled brazing

A radiometer-pyrometer

Self-balancing line-reversal pyrometer automatically measures gas temperatures

Lamp enables measurement of oxygen concentration in presence of water vapor

Proposed method of rotary dynamic balancing by laser

Low cost SCR lamp driver indicates contents of digital computer registers

Superconductive thin film makes convenient liquid helium level sensor

Flow angle sensor and readout system

Automatic frequency control of voltage-controlled oscillators

Modification increases light output of injection-luminescent diodes

Luminescent screen composition for cathode ray tubes

Preparation of silver-activated zinc sulfide thin films

Rocketsonde measurements of ozone in the upper atmosphere

Mass culture of photobacteria to obtain luciferase

Modification increases light output of injection-luminescent diodes

Rapid-response, light-exposure control system

Occulting-filter method for obtaining flashing-light visibility data

Solar-angle sensor has no moving parts

Variable light source with a million-to-one intensity ratio

System selects framing rate for spectrograph camera

High-intensity flashing beacon powered by mercury cells

Optical output enhances flowmeter accuracy

Small, high-intensity flasher permits continuous close-in photography

Apparatus presents visual display of semiconductor surface characteristics

Point-source light sensor circuit is insensitive to background light

Light-intensity modulator withstands high heat fluxes

Photocell shadowing technique improves light source detector

Cleanroom air sampler counts, categorizes, and records particle data

Self-balancing line-reversal pyrometer automatically measures gas temperatures

Nonreciprocal gain control for ring laser

Improvement in recording and reading holograms

Laser-Doppler gas-velocity instrument

Automatic solar lamp intensity control system

Fluorescent photography of spray droplets using a laser light source

Improved method of fabricating planar gallium arsenide diodes
**LUMPING**

- Fine-line sensitivity for holographic interferograms
  - HQ-10348  B69-10663  02
- Quantitative determination of flavin nucleotide using the bacterial bioluminescence reaction
  - GSFC-10565  B69-10715  08

**LUMPING**

- Shock and vibration response of multistage structure
  - N-PS-14972  B68-10353  05

**Lunar Atmospheres**

- Ion mass spectrometer for special uses
  - HQ-10418  B69-10510  02

**Lunar Communication**

- Method of directing a laser beam with very high accuracy
  - NPO-11087  B69-10508  02

**Lunar Composition**

- Study made of far infrared spectra of silicate minerals
  - N-PS-1811  B67-10075  02
- Development of lunar drill to take core samples to 100-foot depths
  - N-PS-13015  B67-10529  05

**Lunar Environment**

- Method for X-ray study under extreme temperature and pressure conditions
  - MSC-11232  B67-10474  02
- Development of lunar drill to take core samples to 100-foot depths
  - N-PS-13015  B67-10529  05

**Lunar Exploration**

- Technique simulates effect of reduced gravity
  - LANGLAY-44  B64-10146  04

**Lunar Geology**

- Nondispersive X-ray emission analysis for geochemical exploration
  - GSFC-10568  B69-10011  02

**Lunar Gravitational Effects**

- Technique simulates effect of reduced gravity
  - LANGLAY-44  B64-10146  04

**Lunar Launch**

- Computer program for mass optional solutions of some endpoint trajectory problems
  - N-PS-12976  B67-10310  06

**Lunar Module**

- Diffusion technique stabilizes resistor values
  - MSC-205  B66-10142  01
- Antisnout space suit communication antenna

SUBJECT INDEX

Standard surface grinder for precision machining of thin-wall tubing
ARG-10014 B67-10400 05

Ultrasonics used to measure residual stress
M-PS-12449 B67-10428 02

Proposed method of rotary dynamic balancing by laser
M-PS-12422 B67-10452 02

Manual of industrial diamonds plus dressing and grinding criteria for machining superalloys
M-PS-14562 B68-10239 05

Spiral-grooved shaft seals substantially reduce leakage and wear
LEWIS-10397 B68-10270 05

Machining technique prevents undercutting in tensile specimens
LANGLEY-10281 B68-10352 05

Method for removing surface-damaged layers from nickel alloys
M-PS-18151 B68-10522 03

Method for controlling density and permeability of sintered powdered metals
LEWIS-10393 B68-10528 03

Cold machining of high density tungsten and other materials
ARG-10289 B69-10110 05

Tool simplifies machining of pipe ends for precision welding
KSC-10361 B69-10231 05

Spiral-flow apparatus for measuring permeation of solids by gases
M-PS-16517 B69-10357 03

Freon, T-Bl cutting fluid
ISC-11486

Magnesium alloys

Lightweight magnesium-lithium alloys show promise
M-PS-17 B63-10389 03

Adherent protective coatings plated on magnesium-lithium alloy
M-PS-365 B65-10294 03

Coating protects magnesium-lithium alloys against corrosion
M-PS-2446 B67-10149 03

Magnesium-lithium alloys developed for low temperature use
M-PS-1541 B67-10365 03

Weld micro filming in Inconel 718 minimized by minor elements
M-PS-18185 B68-10251 03

Battery-package design provides for cell cooling and constraint
KSC-11839 B68-10398 05

Device for obtaining separation of oxygen
LANGLEY-11007 B69-10477 01

Shaker slip-plate adapter
M-PS-14063 B69-10785 05

Magnesium cells

Development of low temperature battery
LEWIS-10326 B67-10546 01

Magnesium compounds

Screening technique makes reliable bond at room temperature
M-PS-227 B65-10004 03

Chromium oxide coatings improve thermal emissivity of alumina
WOO-263 B66-10227 03

New class of compounds have very low vapor pressures
ARG-115 B67-10184 03

Magnesium fluoride

Uniform reflective films deposited on large surfaces
GSFC-507 B66-10403 02

Preparation of thorium magnesium-zinc reduction
ARG-10245 B69-10079 03

Magnesium oxides

Ceramic materials purified by experimental method
LEWIS-225 B65-10270 03

Fibers of newly developed refractory ceramics produced by improved process
WOO-169 B66-10196 03

Ductile mandrel and parting compound facilitate tube drawing

MAGNETIC PROPERTIES
Rotor position sensor switches currents in
brushless dc motors
GSFC-315 B65-10151 01

Hollow spherical rotors fabricated by
electroplating
JPL-50-117 B66-10366 05

Thin-film ferrites vapor deposited by one-step
process in vacuum
MSC-259 B66-10398 03

Process yield Co-Fe alloys with superior
high temperature magnetic properties
LEWIS-333 B66-10535 03

Miniaturization of magnetic logic circuitry
LANGLEY-10037 B69-10148 06

MAGNETIC PUMPING
Rotating magnetic poles used to pump mercury
LEWIS-276 B66-10430 05

MAGNETIC RECORDING
Circuit converts AM signals to FM for
magnetic recording
GSFC-227 B65-10001 01

Hybrid computer technique yields random
signal probability distributions
ARC-34 B65-10208 01

PCD magnetic tape system efficiently records
and reproduces data
GSFC-375 B65-10311 01

An improved magnetic tape recorder
GSFC-08259 B67-10646 01

Damage to rolling element bearings may be
detected early
H-Q-10031 B67-10658 01

Scan rate converter for tape recording and
playback of TV pictures
NPO-10166 B67-10676 01

Harmonic distortion analyzer speeds setup of
magnetic tape recorders
GSFC-10198 B68-10254 01

Method of reducing time base error in

MAGNETIC RESONANCE
Magnetometer measures orthogonal components
of magnetic fields
GSFC-395 B65-10315 01

Coordination chemistry in fused-salt
solutions
ARB-10469 B69-10423 03

MAGNETIC SHIELDING
Electron beam welding of copper-nickel
facilitated by circular magnetic shields
M-FS-569 B66-10215 05

Improved ferrous shielding for flat cables
M-FS-14524 B69-10401 01

MAGNETIC SIGNALS
Magnetometer measures orthogonal components
of magnetic fields
GSFC-395 B65-10315 01

A theoretical study of radar backscatter
from distributed targets with emphasis on
polarization dependence
M-FS-13775 B69-10560 02

MAGNETIC STORAGE
Transfluxor circuit amplifies sensing current
for computer memories
JPL-806 B63-10255 01

Density trace made with computer printout
GSFC-322 B65-10200 01

Multipulse current source offers low power
losses and high reliability
LANGLEY-68 B67-10603 01

Optically exciting a magnetic memory - A
feasibility study
M-FS-14854 B69-10060 02

MAGNETIC TAPES
Small digital recording head has parallel bit
channels, minimizes cross talk
JPL-0029 B63-10284 01

Low-cost tape system measures velocity of
acceleration
GSFC-95 B63-10512 01

Compact cartridge drives coded tape at
constant readout speed
JPL-872 B64-10222 01

Security warning system monitors up to
fifteen remote areas simultaneously
ESC-66-39 B66-10548 01

Digital computer processing of X-ray photos
JPL-792 B67-10005 04

Data retrieval system provides unlimited
hardware design information
MSC-1164 B67-10170 01

Structural Analysis and Matrix
Interpretive System /SAMS/

ARG-10219 B69-10044 05

### Astronaut's tool for withdrawing/replacing computer cards
M-PS-20453 B69-10183 05

## Manned Spacecraft

### A prototype high power portable lamp
M-PS-20225 B69-10189 02

## Nanometers

### Multiple port pressure scanner valve features greater accuracy, quicker data
JPL-555 B64-10031 05

### Device induces lungs to maintain known constant pressure
MSC-50 B64-10108 04

### Fluid-pressure measurement apparatus uses short-length manometer tubes
LEWIS-28 B65-10027 05

### Probe measures characteristics of hot gas stream
M-PS-240 B65-10133 02

### Making enables McLeod gauge to measure in ultrahigh vacuum range
GSPC-440 B65-10329 01

### Microorganisms detected by enzyme-catalyzed reaction
JPL-782 B66-10117 04
Ultraminiature manometer-tipped cardiac catheter
ARC-1005A B67-10669 01

Conceptual dead weight device to provide pressure calibration
M-FS-14672 B68-10264 01

Leakage tester for flat conductor cable connector
M-FS-20427 B69-10284 05

Elimination of dissolved gases in hypergolic engine propellants
M-FS-16179 B69-10692 03

MANPOWER

Probabilistic approach to long range planning of manpower
MSC-11524 B67-10510 06

Computerized Schedule Effectiveness Technique /SET/ determines present and future schedule position
M-FS-13012 B67-10522 06

MANUAL CONTROL

Heavy-duty staple remover operated by hand
JUL-FS-1004 B63-10292 05

Rapid billet loader aids extrusion of refractory metals
LEWIS-50 B63-10354 05

Variable load automatically tests d.c. power supplies
GSFC-291 B65-10105 01

Hand tool facilitates extraction of circuit modules
LANGLEY-30 B65-10231 05

Manual-feed adapter permits microfilming of continuous oscillograph output
NU-0029 B65-10249 01

Back mount device quickly inserts or extracts chassis units
MSC-244 B65-10385 05

Fingertip current control facilitates use of arc welding gun
MSC-289 B66-10092 05

Soldering tool heats workpieces and applies solder in one operation
LEWIS-247 B66-10115 05

Hand drill adapter limits holes to desired depth
MSC-346 B66-10123 05

Safety switch permits emergency bridge crane shutdown
M-FS-949 B66-10168 05

Tool enables proper mating of accelerometer and cable connector
M-FS-611 B66-10208 05

Hand tool permits shrink sizing of assembled tubing
MSC-504 B66-10239 05

Lathe chuck key incorporates safety feature
MSC-506 B66-10243 05

Modified soldering iron speeds cutting of synthetic materials
M-FS-725 B66-10246 05

Ultrasonic hand tool allows convenient scanning of spot welds
M-FS-539 B66-10289 02

Latching mechanism operates in limited access area
MSC-230 B66-10338 05

Tool forms right angles in component leads
M-FS-722 B66-10346 05

Human transfer functions used to predict system performance parameters
LANGLEY-203 B66-10379 01

Special tool kit aids heavily garmented workers
MSC-163 B66-10403 05

Rigid-body motion extracted from total motion of a flexible body
ARC-63 B67-10081 05

Tool facilitates installation of Marmon clamps
M-FS-2039 B67-10105 05

Tester automatically checks insulation of individual conductors in multiple-strand cables
MSC-10068 B67-10260 01

Pocket-size manual tape reader device aids computer tape checking
KSC-10058 B67-10361 01

Multiple meter monitoring circuits served by single alarm
MSC-10984 B67-10369 01

Eccentric drive mechanism is adjustable during operation
M-FS-2576 B67-10373 05

Use of color-coded sleeve shutters accelerates oscillograph channel selection
KSC-10092 B67-10382 01

Continuous wave detector has wide frequency range
M-FS-1049 B67-10386 01

Automatic telemetry checkout system
M-FS-12580 B67-10402 01

Versatile impact hand tool
M-FS-20140 B68-10371 05

Gun facilitates adhesive bonding of studs to surfaces
M-FS-20299 B69-10009 05

Two-axis winch installer for heavy ducts in confined space
M-FS-14254 B69-10062 05

J-beveling of pipe ends with a hand-held tool
KSC-10356 B69-10229 05

Foot-operated cell-counter
ARG-10315 B66-10239 05

Improved perceptual-motor performance measurement system
HQC-10123 B69-10385 01

Mass-spectrometric study of the rhenium-oxygen system
ABG-10421 B69-10645 02

Monopole mass spectrometer with improved sensitivity and reduced background
EQ-10566 01

Reliable method for testing gross leaks in semiconductor component packages
M-PS-432 B68-10284 03

Mass spectograph analysis
M-13239 06

Qualitative and quantitative analysis of mixtures of compounds containing both hydrogen and deuterium
ARG-10312 B69-10177 04

Computer simulation program is adaptable to industrial processes
LEWIS-240 B66-10426 01

Characteristics of fluidized-packed beds
ARG-10049 B68-10278 03

An investigation of particle mixing in a gas-fluidized bed
ARG-10182 B68-10407 05

Mass transport mechanism in porous fuel cell electrodes
EQ-10343 01

Polarizing keys prevent mismatch of connector plugs and receptacles
MSC-443 B66-10251 01

Bearing-cage materials
LEWIS-10403 B68-10176 03

Packaging criteria for transportation and handling shock and vibration
I-PS-13007 B68-10219 05

Inflatable bladder to facilitate handling of heavy objects - A concept
I-PS-14272 B69-10069 05

Cover protects critical electrical connectors against damage during handling
I-PS-15462 B69-10526 01

Separation technique provides rapid quantitative determination of cesium-137 in irradiated nuclear fuel
ARG-10047 B67-10194 03

Device for obtaining separation of oxygen
LANGLEY-11007 B69-10477 01

Development of technology for hot-drape forming of large torus sections
M-PS-12141 B67-10341 05

Graphite element serves as radiant heat source
M-PS-105 B65-10218 01

Multiple test chamber exposes materials to various environments
MSC-179 B65-10268 01
### SUBJECT INDEX

| Simple technique determines ac properties of hard superconductive materials | B66-10657 02 |
| Cryogenic fatigue data developed for Inconel 718 | B67-10049 03 |
| Simplified method measures changes in tensile yield strength using least number of specimens | B67-10266 03 |
| Study made of dielectric properties of promising materials for cryogenic capacitors | B67-10366 03 |
| Material fatigue data obtained by card-programmed hydraulic loading system | B67-10491 03 |
| Survey of fracture toughness test methods | B68-10046 03 |
| Abrasion and fracture testing in a high-pressure hydrogen environment | B69-10457 03 |

### MATHEMATICAL LOGIC

| Problem of oscillating cone in supersonic flow is solved by small perturbation techniques | B66-10700 02 |

### MATHEMATICAL MODELS

| New computer system simplifies programming of mathematical equations | B66-10361 01 |
| Human transfer functions used to predict system performance parameters | B67-10379 01 |
| Linear circuit analysis program for IBM 1620 Monitor 2, 1311/1443 data processing system | B67-10713 06 |
| A theoretical model for determining turbine flowmeter sensitivity | B67-10719 01 |
| A modal combination computer program for dynamic analysis of structures | B67-10217 06 |
| CIWDA - Chrysler Improved Numerical Differentiating Analyzer computer program | B67-10278 06 |
| Computer program predicts thermal and flow transients experienced in a reactor loss-of-flow accident | B67-10281 06 |
| Computer program performs rectangular fitting stress analysis | B67-10520 06 |
| Analysis of dynamic systems with DAP/H computer program | B67-10523 06 |
| M-SAP and M-SAP neutron and gamma ray albedo model scatter shield analysis program | B67-10536 06 |
| Propellant tank pressurization analysis program | B67-10625 06 |
| Development of reliability prediction techniques for semiconductor diodes | B67-10651 06 |
| Phase plane displays detect incipient failures in servo system testing | B67-10662 01 |

### MATHEMATICS

| Computer program /P1-GAS/ calculates the P-0 and P-1 transfer matrices for neutron moderation in a scatonic gas | B67-10578 06 |
| Design techniques - Stochastic controllers | B69-10234 02 |
| Vibration testing and dynamic studies of relays | B66-10268 01 |
| Computer graphics data conditioning | B68-10296 06 |
| Compound equation developed for postnatal growth of birds and mammals | B68-10427 04 |
| Rocket engine analog simulation | B69-10511 01 |
| Improved technique for digital simulation of bending and aloch phenomena | B66-10570 02 |
| Propellant tank pressurization analysis program | B69-10007 06 |
| A new method for the determination of particulate contamination levels for surface cleaniness of fluid systems | B69-10520 02 |
| Frequency domain analysis and synthesis of lumped parameter systems using nonlinear least squares techniques | B69-10577 02 |
| Flow properties of suspensions rich in solids | B69-10622 02 |
| Estimating reliability by application of matrix representation | B69-10793 02 |

### MATERIALS

| Mechanical properties of plastics predetermined by empirical method | B64-10068 03 |
| Apparatus measures concentration of suspended droplets in gas streams | B69-10237 01 |
| Delayed ripple counter simplifies square-root computation | B65-10343 01 |
| Mathematical relation predicts achievable densities of compacted particles | B69-10882 02 |
| Analytical drafting curves provide exact equations for plotted data | B67-10592 02 |
| Numerical integration of ordinary differential equations of various orders | B69-10089 02 |
| Prediction of friction coefficients for gases | B69-10112 02 |

### PHYSICS

| Pneumotachometer counts respiration rate of human subject | B64-10259 01 |
| Computer program utilizes FORTRAN 4 subrouitnes for contour plotting | B67-10323 06 |
| One hundred angstrom niobium wire | B68-10279 03 |
Improved method of producing oxide-dispersion-strengthened alloys
HQ-10461 B69-10536 03

Matrixes (Circuits)

Transistorized circuit clamped voltage with 0.1 percent error
GSPC-196 B65-10118 01

Improved wire memory matrix uses very little power
JPL-SC-167 B65-10359 01

General purpose computer programs for numerically analyzing linear ac electrical and electronic circuits for steady-state conditions
R-P-13094 B67-10331 06

Test device prevents weld joint damage by eliminating axial pin forces on unpotted modules
LEWIS-10201 B67-10359 01

Current steering commutator offers versatility
JPL-812 B67-10410 01

Heavy-gage bonded honeycomb sandwich as primary load-bearing structure
R-P-12060 B67-10427 05

Composite solar cell matrix is reliable, lightweight and flexible
BPO-10821 B67-10503 01

Random access-random release relay switching matrix
R-P-12590 B68-10301 01

Short circuit protection for a power distribution system
R-P-14993 B68-10359 01

Locating sneak paths in electrical circuitry
R-P-15018 B68-10565 01

Matrixes (Mathematics)

Structural Analysis and Matrix Interpretive System /SAMIS/
HQ-10130 B67-10171 01

Computer program calculates steady-state temperature distribution within plane or axisymmetric solids
UNC-10049 B67-10224 06

Computer program predicts thermal and flow transients experienced in a reactor loss-of-flow accident
UNC-10054 B67-10281 01

Improved computer program for elastic analysis of highly redundant structural configurations
R-P-13087 B68-10330 06

Computer subroutine ISUDS accurately solves large systems of simultaneous linear algebraic equations
UNC-10051 B67-10330 06

Computer program calculates wing aerodynamic characteristics for fixed wings with dihedral and variable-sweep wings at subsonic speeds
LANGLEY-10191 B67-10666 06

Computer program /PI-GAS/ calculates the P-0 and P-1 transfer matrices for neutron moderation in a monatomic gas
UNC-10141 B67-10678 06

HOP /Matrix Operation Programs system/
BPO-10429 B68-10005 06

Solution of differential equations by application of transformation groups

Subject Index

B-PS-14802 B68-10276 02

Linear systems of equations solved using mathematical algorithms
ARG-10146 B68-10292 06

Controllability of distributed-parameter systems
R-P-14929 B68-10386 02

Structural Analysis and Matrix Interpretive System /SAMIS/
R-P-10839 B69-10093 01

Numerical inversion of finite Toeplitz matrices and vector Toeplitz matrices
ARG-10445 B69-10415 02

Estimating reliability by application of matrix representation
HQ-10246 B69-10793 02

Matrix Methods

Structural Analysis and Matrix Interpretive System /SAMIS/
R-P-10130 B67-10171 01

A modal combination computer program for dynamic analysis of structures
HQ-10129 B67-10217 06

Transient Analysis Generator /TAG/ simulates behavior of large class of electrical networks
HQ-10031 B67-10319 06

Study made of ductility limitations of aluminum-silicon alloys
R-P-12524 B67-10392 03

Computer program provides improved longitudinal response analysis for axisymmetric launch vehicles
LANGLEY-10093 B67-10531 06

Study made of mechanics of deformation and fracture of fibrous composites
HQ-10035 B67-10660 03

Shock and vibration response of multistage structure
R-P-14972 B68-10353 05

Finite element formulation for linear thermoelastic materials
HQ-11229 B69-10660 03

Matrixes (Physics)

Analysis of silicon dioxide, magnesium oxide, lead fluoride, bismuth as low-pass velocity filters for neutrons
ARG-10220 B69-10211 02

Maxwell-Boltzmann Density Function

Computer program /PI-GAS/ calculates the P-0 and P-1 transfer matrices for neutron moderation in a monatomic gas
UNC-10141 B67-10678 06

BCIIOED GAGES

Baking enables McLeod gauge to measure in ultrahigh vacuum range
GSFC-480 B65-10359 01

Modified McLeod gage records automatically
LEWIS-290 B66-10290 02

Modified McLeod pressure gage eliminates measurement errors
ARC-62 B66-10481 01

Absolute low-pressure calibration system
R-P-13085 B68-10160 02

BRAIN

Computer program reduces calculation time of normal response functions
R-P-1517 B67-10108 01
Performance of turbine-type flowmeters in liquid hydrogen
LEWIS-10137 B67-10506 01

Optical lens design program
EPO-10603 B68-10354 06

Estimation of signal-to-noise ratios
XNP-05254 B69-10557 01

Wind tower influence study
M-PS-20239 B69-10653 01

MEASUREMENT AND INTEGRATION

Some numerical methods for integrating systems of first-order ordinary differential equations
ARO-10308 B69-10204 02

Integrated sequence display device
KSC-10381 B69-10316 01

Raster linearity of video cameras calibrated with precision tester
GSFC-200 B64-10209 01

Wide-angle sensor measures radiant heat energy in corrosive atmospheres
M-PS-228 B65-10019 05

Spherical model provides visual aid for cubic crystal study
LEWIS-106 B65-10065 03

Internal cooling increases range of immersion-type temperature probe
LEWIS-171 B65-10157 02

Gage of 6.5 per cent Si-Fe sheet is chemically reduced
M-PS-537 B66-10454 03

Computer program determines performance efficiency of remote measuring system
M-PS-1137 B66-10503 01

Rocket smoke measurements of ozone in the upper atmosphere
GSFC-10580 B69-10077 02

Direct measurement of carbon-14 in carbon dioxide by liquid scintillation counting
ARO-10237 B69-10092 03

Rapid and precise analysis for calcium in blood serum
ARC-10286 B69-10160 04

Compensation of pulse-rebalanced inertial instruments
MSC-13098 B69-10216 01

Reducing quantizer deadband with a range switching digital filter
M-PS-20419 B69-10259 01

Improved system for documenting measurement data
M-PS-18269 B69-10513 01

MEASURING INSTRUMENTS

Liquid-level meter has no moving parts
M-PS-3 B63-10378 03

Rapid helium-air analyzer can measure other binary gas mixtures
LANGLEY-16 B63-10557 03

Ultra-sensitive transducer advances micro-measurement range
ARC-26 B64-10004 01

Multiple port pressure scanner valve features greater accuracy, quicker data
JPL-555 B64-10031 05

Device induces lungs to maintain known constant pressure

MSC-50 B64-10108 04

Apparatus measures concentration of suspended droplets in gas streams
LANGLEY-31 B64-10237 01

Inexpensive, stable circuit measures heart rate
MSC-95 B65-10010 01

Seismic transducer measures small horizontal displacements
M-PS-81 B65-10029 05

Gage measures electrical connector pin retention force
JPL-SC-071 B65-10034 03

Ionization vacuum gage starts quickly, is unaffected by spurious currents
JPL-304 B65-10036 02

Device measures curved surface finish on gear teeth
Woo-112 B65-10064 05

Sensitive level sensor made with spirit level, gives electrical output
LANGLEY-49 B65-10067 01

Light-sensitive potentiometer measures product of two variables
GSFC-240 B65-10076 01

Multiple element soft X-ray source produces wide range of radiation
GSFC-286 B65-10082 02

Transducer senses displacements of panels subjected to vibration
ARC-37 B65-10085 01

Apparatus measures swelling of membranes in electrochemical cells
GSFC-280 B65-10087 01

Instrument calibrates low gas-rate flowmeters
MSC-134 B65-10137 01

System measures unidirectional forces, excludes extraneous forces
LEWIS-170 B65-10154 05

Internal cooling increases range of immersion-type temperature probe
LEWIS-171 B65-10157 02

Interferometer combines laser light source and digital counting system
MSC-151 B65-10161 01

Device enables measurement of moments of inertia about three axes
MSC-49 B65-10176 05

Sensitive electrometer features digital output
GSFC-288 B65-10206 01

Oscillator circuit measures liquid level in tanks
M-PS-245 B65-10209 01

Multiaxial analyzer detects low-energy electrons
GSFC-329 B65-10213 01

Servo calorimeter measures material heating rate
NU-0024 B65-10247 01

Differential pressure gauge has fast response
M-PS-358 B65-10285 05

Coaxial capacitor used to determine fluid density
LEWIS-232 B65-10296 02

Remote rapidly varying pressures accurately
Improved strain-wire flowmeter has fast response time
LEWIS-241

Electronic ampere-hour integrator is accurate to one percent
GSFC-203

Air brake-dynamometer accurately measures torque
LEWIS-163

Magnetometer measures orthogonal components of magnetic fields
GSFC-395

Volumetric system calibrates meters for large flow rates
WOO-130

Direct force-measuring transducer used in blood pressure research
ABC-53

Rough surface improves stability of air-sounding balloons
M-PS-320

Baking enables McLeod gauge to measure in ultrahigh vacuum range
GSFC-440

Wedge immersed thermistor bolometer measures infrared radiation
GSFC-443

Vibrating diaphragm measures high electrostatic field strengths
SSC-189

Three-dimensional wire-mesh capacitor system measures fluid density
WOO-199

Photoelectric system continuously monitors liquid level
N-PS-417

Noncontacting vibration transducer has constant sensitivity
LANLEY-99

Special mount improves remote transducer accuracy
LEWIS-269

Telescopning of instrumentation tubing eliminates swaging
N-PS-586

Improved system measures output energy of pyrotechnic devices
WOO-256

Transducer measures force in vacuum environment
LEWIS-218

Pneumatic shutoff and time-delay valve operates at controlled rate
N-PS-602

Device without electrical connections in tank measures liquid level
WOO-235

Special tool seals conductors with combination of plastic sleeves
N-PS-579

Vacuum test fixture improves leakage rate measurements
MSC-271

Minimum permissible leakage resistance established for instrumentation systems

Plant respirometer enables high resolution of oxygen consumption rates
HQ-47

Ion chambers simplify absolute intensity measurements in the vacuum ultraviolet
ERC-10

Thermionic scanner pinpoints work function of emitter surfaces
JPL-SC-177

Indicator system provides complete data of engine cylinder pressure variation
LEWIS-291

Spiral spring/strain gage combination accurately measures shock induced deflection
MSC-789

Gage tests tube flares quickly and accurately
MSC-66-19

Miniature electrometer preamplifier effectively compensates for input capacitance
ABC-69

Device accurately measures and records low gas-flow rates
N-PS-1077

Positive displacement cylinder measures corrosive liquid volume
MSC-1038

Sensors measure surface ablation rate of reentry vehicle heat shield
LANLEY-267

Pressure probe compensates for dimensional tolerance variations
LEWIS-302

A radiometer-pyrometer
LEWIS-284

Device measures reaction engine thrust vector deviations
JPL-SC-163

Modified algesimeter provides accurate depth measurements
MSC-616

Magneto resistor monitors relay performance
N-PS-1754

Rocket engine vibration accurately measured by photography
N-PS-1916

Mechanical gauge accurately checks tubing flare, roundness, and concentricity
N-PS-1822

Slide rule-type color chart predicts reproduced photo tones
MSC-1227

Mechanical device accurately measures rf phase differences in vhf or uhf ranges
N-PS-1738

Crystal microbalance measures condensable molecular fluxes
JPL-845

Absolute viscosity measured using instrumented parallel plate system
JPL-784

Holding fixture facilitates pipe thread gage measurements
N-PS-2009
SUBJECT INDEX

Instrument continuously measures density of flowing fluids
LEWIS-309 B67-10080 01

Portable fixture facilitates pressure testing of instrumentation fittings
M-FS-2032 B67-10121 03

Tritiated alumina serves as reagent for self-labeling analysis
ARG-209 B67-10315 03

Accuracy of laser measurements improved by pulse autocorrelator electronic system
MSC-10033 B67-10338 01

Instrumentation for measuring spatial distribution of ejected droplets
M-FS-14991 B68-10393 05

Portable fixture facilitates pressure testing of instrumentation fittings
M-FS-10483 B68-10395 05

Bigh-torque power wrench, a concept
I-FS-18194 B68-10299 05

Tritiated alumina serves as reagent for self-labeling analysis
ARG-209 B67-10315 03

System automatically provides dynamic launch decision criteria
I-FS-30133 B67-10363 01

Battery-package design provides for cell cooling and constraint
MSC-11839 B68-10398 05

Determining gas leakage from bubble formations
I-FS-14841 B68-10393 05

Battery-package design provides for cell cooling and constraint
MSC-11839 B68-10398 05

Environmental test planning, selection and standardization aids available
SAN-10028 B68-10445 06

Crack growth measured on flat and curved surfaces at cryogenic temperatures
LEWIS-389 B67-10384 01

System for measuring spatial distribution of ejected droplets, a concept
NFO-10185 B68-10402 01

Computer program generates averaged value data tapes
M-FS-12726 B67-10411 06

Low energy ohmmeter can be used to test sensitive circuits, other meters
SAW-10013 B68-10269 01

Mass culture of photobacteria to obtain luciferase
GSFC-10563 B69-10294 04

Low friction servo valve
LEWIS-10574 B68-10440 05

Surface irregularities detected by flare inspection instrument
M-FS-20157 B69-10152 01

Depletable lattice column
MPO-10228 B68-10018 01

Device measures static friction of magnetic tape
GSFC-10360 B67-10566 03

Review of biological mechanisms for application to instrument design
EQ-33 B67-10663 04

Digital data averager improves conventional measurement system performance
MSC-12078 B68-10018 01

Electrocardiograms and respiration rates
KSC-10233 B69-10188 04

Review of biological mechanisms for application to instrument design
EQ-33 B67-10663 04

Low energy ohmmeter can be used to test sensitive circuits, other meters
SAW-10013 B68-10269 01

Linear-log counting-rate meter uses transconductance characteristics of a silicon planar transistor
ARG-10158 B69-10191 01

A magnifying scratch-gage force transducer
LANGLET-10496 B69-10212 01

Magnetically coupled emission regulator
GSFC-10056 B69-10213 01

Induction probe determines levels of liquid metals
ARG-10348 B69-10256 03

Nondestructive evaluation of printed wiring boards by microhertz resistance measurements
SAN-10034 B69-10272 01

Low energy ohmmeter can be used to test sensitive circuits, other meters
SAW-10013 B68-10269 01

Cryogenic liquid level measuring probe
MECHANICAL DEVICES

N-PS-18052 | B69-10399 05
Leakage measuring method

N-PS-14722 | B69-10438 01
Goniometer for remote tracking of eye movement

ERC-10114 | B69-10444 02
Crossed-beam technique for measuring horizontal winds

M-PS-20160 | B69-10447 02
Adjustable thermal **tree**

MSC-15556 | B69-10484 01
Rotary antenna attenuator

RNO-10648 | B69-10502 01
Radiometric temperature reference

MSC-32376 | B69-10507 01
Measurement of gas flow at extremely low pressures

MSC-13261 | B69-10522 03
Miniaturized high-resolution mass/charge spectograph /design study/

MSC-13279 | B69-10554 02
Water-glycol system volume calculation

MSC-15193 | B69-10563 02
Millimeter-wave atmospheric loss prediction method

RNO-11054 | B69-10584 01
Pulse-height analyzer with digital readout

RNO-10293 | B69-10640 01
Measurement technique for the determination of antenna directivity

M-PS-12799 | B69-10677 01
Technique for predicting the thermal expansion coefficients of cryogenic metallic alloys

RNO-10524 | B69-10707 02
Deposition monitor and control

RNO-10706 | B69-10722 01
A simple electrometer for measuring small photoelectric currents

GSPC-10603 | B69-10734 01
Photomicroscopy

M-PS-14556 | B69-10736 01

MECHANICAL DEVICES

Automatic cryogenic liquid level controller is safe for use near combustible substances

LWIS-195 | B66-10482 01
Rolanite - A new mechanical design concept

SAN-10001 | B67-10611 05
Quick-acting backup tool for welding ducts

M-PS-18064 | B69-10396 05
Technique for ultrasonic cleaning with volatile solvents eliminates need for hoods or condensers

MSC-15611 | B69-10552 03

MECHANICAL DRIVES

Chain friction system gives positive, reversible drive

ABC-8 | B63-10009 05
Device transmits rotary motion through hermetically sealed wall

JPL-303 | B63-10198 05
Fine-particle filter prevents damage to vacuum pumps

LPHS-106 | B63-10489 05
Speed-sensing device aids crane operators

I-404
## SUBJECT INDEX

**IECANEICAL PBOPERTIES**

- Hydraulic system provides smooth control of large tracking and antenna drive systems at very low tracking rates
  - NPO-10316
  - B67-10418
  - 05

- An improved magnetic tape recorder
  - GSFC-08259
  - B67-10646
  - 01

- Improved control system power unit for large parachutes
  - MSC-12052
  - B67-10677
  - 05

- Remotely operated gripper provides vertical control rod movement
  - ARG-10160
  - B68-10359
  - 05

- High-torque precision stepping drive
  - M-PS-14772
  - B68-10549
  - 05

- Electromechanical rotary actuator operates over wide temperature range
  - 8-FS-18402
  - B69-10100
  - 05

- Magnetron tuner has locking feature
  - XNP-09771
  - B69-10119
  - 05

- Liquid gallium rotary electric contact
  - LEWIS-10828
  - B69-10138
  - 03

**IECEAEICAL ENGINBERING**

- Analytical technique permits comparison of reliability of alternate mechanical designs
  - NUC-10065
  - B67-10261
  - 06

**IECEAEICAL MEASUBEKENT**

- Seismic transducer measures small horizontal displacements
  - H-PS-81
  - B65-10029
  - 05

- Torque wrench allows readings from inaccessible locations
  - H-PS-598
  - B66-10204
  - 05

- Mechanical device accurately measures RF phase differences in VHF or UHF ranges
  - H-PS-1738
  - B66-10694
  - 05

- Integrated mobility measurement and notation system
  - MSC-726
  - B67-10114

  - B67-10271
  - 05

- Materials data handbook, Inconel alloy 718
  - H-PS-2348
  - B67-10282
  - 03

- Study made of dielectric properties of promising materials for cryogenic capacitors
  - H-PS-13620
  - B67-10366
  - 03

- Mechanical properties of wire insulation automatically determined
  - MSC-10963
  - B67-10370
  - 01

- Single-source mechanical loading system produces biaxial stresses in cylinders
  - H-PS-12530
  - B67-10380
  - 05

- Study made of ductility limitations of aluminum-silicon alloys
  - H-PS-12524
  - B67-10392
  - 03

- Experiments to investigate particulate materials in reduced gravity fields
  - H-PS-13306
  - B67-10394
  - 02

- Aluminum heat sink enables power transistors to be mounted integrally with printed circuit board
  - H-PS-13663
  - B67-10426
  - 01

- Study made of acoustical monitoring for mechanical checkout
  - H-PS-13372
  - B67-10430
  - 02

- Study made of pneumatic high pressure piping materials \(/10,000\ psi/\)
  - MSC-10133
  - B67-10437
  - 03

- Study made of procedures for externally loading and corrosion testing stress corrosion specimens
  - H-PS-12064
  - B67-10451
  - 03

- Technique eliminates high voltage arcing at electrode-insulator contact area
  - LEWIS-10133
  - B67-10470
  - 01

- Study of stress corrosion in aluminum alloys
  - H-PS-13906
  - B67-10533
  - 03

- Computer program calculates gamma ray source strengths of materials exposed to neutron fluxes
  - NUC-10143
  - B67-10565
  - 06

- Study of mechanical properties of uranium compounds
  - ABC-10074
  - B68-10197
  - 03

- Ignition of binary alloys of uranium
  - ABC-10057
  - B68-10280
  - 01

- Fiber glass reinforced structural materials for aerospace application
  - H-PS-14806
  - B68-10360
  - 03

- Tungsten fiber-reinforced nickel superalloy
  - LEWIS-10428
  - B68-10369
  - 03

- Nickel-base superalloys excellent

Corrosion of aluminum alloys by chlorinated hydrocarbon/methanol mixtures
MSC-11345 B67-10442 03

Viscosity and density of methanol/water mixtures at low temperatures
N-PS-14991 B68-10274 03

Nitric acid-organic mixtures surveyed for use in separation by anion exchange methods
ARG-10065 B66-10425 03

Coolants with selective optical filtering characteristics for ruby laser applications
N-PS-20188 B68-10508 02

Separation of the rare earths by anion-exchange in the presence of lactic acid
ARG-10436 B69-10377 03

NITRILE COMPOUNDS
Stringent cleaning technique assures reliable epoxy bond
GSFC-1616 B66-10142 03

Fabrication method produces high-grade alumina crucibles
N-PS-216 B65-10078 05

Flexible protective coatings made from silicon-nitrogen materials
N-PS-528 B66-10027 03

Sea dye marker provides visibility for 20 hours
MSC-714 B66-10313 03

High-energy, high-power, long-life battery
LBWS-10724 B69-10131 01

Microdetermination of urea in urine using p-dimethylaminobenzaldehyde (PDAB)/NPO-10715
B69-10317 04

Technique for ultrasonic cleaning with volatile solvents eliminates need forhoods or condensers
MSC-15641 B69-10552 03

NITRILE
Thermocouple-flexible cable connector insulator is highly reliable
H-00826 B66-10709 01

Adhesives for laminating polyimide insulated flat conductor cable
N-PS-12066 B67-10429 03

MICRO
Improved mouse cage provides versatility and ease in handling laboratory mice
HSC-12250 B69-10124 04

System converts optical phase changes to RF phase changes
N-PS-20091 B68-10430 01

Fine-line sensitivity for holographic interferograms
NQ-10348 B69-10663 02

MICROANALYSIS
Corrosion of metal samples rapidly measured
HMC-0041 B66-10140 03

Standards for electron probe microanalysis of silicates prepared by convenient method
GSFC-669 B66-10234 03

Apparatus enables automatic microanalysis of body fluids
JPL-962 B66-10515 04

Automated microsyringe is highly accurate and reliable
NPO-10142 B67-10203 01

Microprobe investigation of brittle segregates in aluminum HIG and TIG welds
N-PS-14720 B68-10334 03

Imaging slitless spectrometer for X-ray astronomy
N-PS-14309 B68-10546 02

Microdetermination of urea in urine using p-dimethylaminobenzaldehyde (PDAB)/NPO-10715
B69-10317 04

MICROBALANCES
Hydroentrapment device facilitates flash vapor deposition process in vacuum
NPO-10232 B67-10320 03

MICROBIOLOGY
Tool samples subsurface soil free of surface contaminants
MSC-10988 B67-10473 05

Continuous microbial cultures maintained by electronically-controlled device
ARG-177 B67-10556 04

A microalgal technique for the culture of mammalian cells
LANGLEY-10407 B68-10554 04

Impingement of confining sites for cell cultures on thermoplastic substrates
LANGLEY-10495 B69-10236 04

Technique for highly efficient recovery of microbial biological contaminants
MSC-13250 B69-10273 04

Sterilization training manual
N-PS-20437 B69-10277 04

Sampling and handling of desert soils
NPO-11171 B69-10304 04

Life detection
NPO-10510 B69-10475 04

Microbiological aspects of sterilization development laboratories
NPO-11197 B69-10593 04

MICROCRYSTALS
Laser action from a terbium beta-ketoenolate
at room temperature
GSFC-10593
01

LOGIC

Logic circuit exhibits optimum performance
LAMBERT-129
B65-10193
01

Field-effect transistor replaces bulky transformer in analog-gate circuit
GSFC-351
B65-10284
01

Rugged microelectronic module package supports circuitry on heat sink
MSC-81A
B66-10245
01

Miniature electrometer preamplifier effectively compensates for input capacitance
ARC-69
B66-10549
01

Thin film process forms effective electrical contacts on semiconductor crystals
M-PS-2343
B67-10142
01

Primary cell uses neither liquid nor fused electrolytes
MFO-10061
B67-10275
01

Repairable, high-density microelectronic module provides effective heat sink
M-PS-13075
B67-10356
01

Ultra miniature television camera
M-PS-11967
B67-10469
01

Logic realization of simple majority voting connections
JPL-727
B67-10511
06

Temperature-stabilized, triggerable microelectronic astable multivibrator starts reliably
MSC-1173
B67-10628
01

Development of reliability prediction techniques for semiconductor diodes
GSFC-10231
B67-10651
06

Piggy back mounting would increase microcircuit packaging density
MSC-12059
B68-10114
01

High dielectric thick films for screened circuit capacitors
LAMBERT-10294
B68-10542
01

Microelectronic oscillator, 2
GSFC-10387
B69-10063
01

Microelectronic oscillator
GSFC-10379
B69-10064
01

Technique for abrasive cutting of thick film conductors for hybrid circuits
MSC-13242
B69-10235
03

Leads integral with the internal interconnection that penetrate the molded wall of a package
LAMBERT-10238
B69-10436
01

Improved method of dicing integrated circuit wafers into chips
EBC-10138
B69-10441
01

Microelectronic device data handbook
EBC-10322
B69-10687
01

Lateral PIN bipolar transistor with aiding field diffusions
MSC-13072
B69-10741
01

MATERIALS

Library of documents compressed into lap-held display kit
MSC-125
B65-10030
01

Manual-feed adapter permits microfilming of continuous oscillograph output

MICROELECTRONICS

SUBJECT INDEX

</table>
A method for observing gas evolution during plastic laminate cure

Automatic sample rotator for metallographic polishing

Discrimination of fish oil and mineral oil slicks on sea water

A method accurately measures mean particle diameters of monodisperse polystyrene latexes

Liquid microsurgery chamber and microsyringe designs allow more efficient micromanipulations

Electronic test instrument generates extremely small current signals

Precision trimmer aids in preparing biomedical specimen blocks for ultrathin sectioning

Color-television medical microscopy

A rapid stress-corrosion test for aluminum alloys

Selective vignetting of Type I X-ray telescopes

Study made of ductility limitations of aluminum-silicon alloys

Pre-weld heat treatment improves welds in Rene 41

Grain-boundary migration in KCl bicrystals

Grain growth inhibitor for porous tungsten materials

Practography can be used to analyze failure modes in polytetrafluoroethylene

Parametric up-converter increases flexibility of maser

Power consumption in acoustic amplifiers under conditions of maximum stable gain

Sweep frequency detector

Flange on microwave antenna subreflector cuts ground noise

Microwave technique measures plasma characteristics

Scanning means for Cassegrainian antenna
MILLING MACHINES

MODAL RESPONSE
A modal combination computer program for

SUBJECT INDEX

Dynamic analysis of structures
WPO-10129

Computer program provides improved longitudinal response analysis for axisymmetric launch vehicles
LANGLEY-10093

Computer program determines vibration in three-dimensional space of hydraulic lines excited by forced displacements
H-PS-12226

Analysis of space vehicle structures using the transfer-function concept
WPO-11162

MODE TRANSFORMERS
Improved gas ring laser
MSC-1158A

MODELS
High purity electroforming yields superior metal models
ARC-6

Pressure transducer 3/8-inch in size can be faired into surface
WOO-665

System automatically provides dynamic launch decision criteria
H-PS-13063

Probabilistic approach to long range planning of manpower
MSC-11524

Development of lunar drill to take core samples to 100-foot depths
H-PS-13015

Shell design computer program
LEWIS-10734

Technique for assessing potential fire hazards
HQQ-10279

Surface-renewal models for heat-transfer between walls and fluidized beds
ARG-10372

MODERATORS
Neutron detector simultaneously measures flux and dose equivalent
ARG-10071

MODES
Quick-acting clutch disengages idle drive motor
GSFC-143

Thermionic diode switching has high temperature application
WPO-10404

Detection of molecular infrared spectra
HQQ-10377

Identification and evaluation of linear damping models in beam vibrations
ARG-10275

MODULATION
Nulling pyrometer uses Kerr cell shutter for fast responses
ND-0010

Frequency offset in linear PS/CW transponder eliminates clutter
H-PS-269

Instrument accurately measures extremely low air densities
H-PS-193

An improved method for testing performance of vidicons during vibration
Study made of application of stereoscopic display system to analog computer simulation H-PS-1263 B66-10590 01
Amplifier provides dual outputs from a single source with complete isolation NUC-10056 B67-10221 01
Interference effects eliminated in random oriented space station antenna system ASC-11004 B67-10435 01
High-power microwave power divider concept HPO-11031 B69-10290 01
Estimation of signal-to-noise ratios LNP-05254 B69-10557 01
Pocket-sized tone-modulated single-sideband modulator accurately improves communication system uses modulated laser beam HPO-11180 B69-10725 01
Modulators

- Frequency-shift-keyer circuit improves FSK conversion for radio transmission
- High-gain amplifier has excellent stability and low power consumption
- Phase shift frequency synthesizer is efficient, small in size
- Added diodes increase output of balanced mixer circuit
- Communication system uses modulated laser beam

Linear signal noise summer accurately determines and controls S/N ratio JPL-SC-152 B66-10433 01
Single-sideband modulator accurately reproduces phase information in 2 Mc signals H-PS-664 B66-10437 01
Device to color modulate a stationary light beam gives high intensity B66-10476 01
Polarimeter provides transient response in nanosecond range JPL-800 B67-10021 02
Double emitter suppressed carrier modulator uses commercially available components H-PS-2494 B67-10101 01
Laboratory pulse modulator uses minority carrier storage diodes H-PS-2442 B67-10226 01
Solid state phase detector replaces bulky transformer circuit ASC-11007 B67-10253 01
Interference effects eliminated in random oriented space station antenna system ASC-11004 B67-10435 01
Laser communication system is insensitive to atmospherically induced noise
Electro-optic modulator for infrared laser using gallium arsenide crystal GSPC-10686 B66-10255 02
Analysis of magnetically-controlled processes in pulse-modulation systems GSPC-10241 B69-10070 01
Optically induced free carrier light

Modulators

- Simple BCD circuit accurately counts to 24
- Modular Forbes Plate Sublimator /N6917 requires only water supply for coolant
- Gage accurately controls force for placing chips on substrates
- Accuracy of laser measurements improved by pulse autocorrelator electronic system

- Current pulse amplifier transmits detector signals with minimum distortion and attenuation
- Reparable, high-density microelectronic module provides effective heat sink
- Aluminum heat sink enables power transistors to be mounted integrally with printed circuit board

- Flat pack interconnection structure simplifies modular electronic assemblies

Modules of Elasticity

- Contact stresses calculated for miniature slip rings H-PS-280 B65-10098 01
- Computer program simplifies selection of structural steel columns NUC-0044 B66-10097 01
- Study made of mechanics of deformation and fracture of fibrous composites
- An ultrasonic method for studying elastic moduli as a function of temperature

Noise Effects

- Checking flat conductor cable spacing by means of a noise pattern

Moisture

- Metal sheath improves thermocouple using graphite in one leg
- Impact and puncture resistant material protects parts from damage
- Minimum permissible leakage resistance established for instrumentation systems
- Double copper sheath multiconductor instrumentation cable is durable and easily installed in high thermal or nuclear radiation area

Instrumentation monitors transported material through variety of parameters

I-425
MOISTURE Meters

Detection of entrapped moisture in honeycomb sandwich structures
MRC-1103

MOISTURE Meters

Plastic plus stainless-steel fibers make resilient, impermeable material
WOC-246

Detection of entrapped moisture in honeycomb sandwich structures
HSC-1103

Spray-on technique simplifies fabrication of complex thermal insulation blanket
E-FS-497

Cork is used to make tooling patterns and molds
MSC-425

Thermoplastic rubberlike material produced at low cost
JPL-793

Improved compression molding process
LANGLEY-10027

Module packaging technique for combining integrated circuits and discrete components
GSFC-10369

A method for observing gas evolution during plastic laminate cure
HSC-15592

Vacuum forming of thermoplastic sheet results in low-cost investment casting patterns
ABC-7

Improved polybutadiene disulfide-silver motor brushes have extended life
E-FS-66

Refractory ceramic has wide usage, low fabrication cost
E-FS-67

Plastic molds reduce cost of encapsulating electric cable connectors
E-FS-69

Molded elastomer provides compact ferrite-core holder, simplifies assembly
JPL-584

Plastic films for reflective surfaces reproduced from masters
GSFC-188

Pressure molding of powdered materials improved by rubber mold insert
WOC-100

Epoxy-resin patterns speed shell-molding of aluminum parts
E-FS-303

Spray-on technique simplifies fabrication of complex thermal insulation blanket
E-FS-497

Split glass tube assures quality in electron beam brazing
E-FS-564

Cork is used to make tooling patterns and molds
MSC-425

Strippable grid facilitates removal of grid-surfaced conical workpiece from die
E-FS-716

Plug replaces weld filler as seal in complex casting
NU-0049

Isostatic compression process converts polyurethanes into structural material
JPL-892

SUBJECT INDEX

Plastic preforms facilitate fabrication of welded cordwood electronic modules
LEWIS-90339

Improved molding process ensures plastic parts of higher tensile strength
LANGLEY-10033

Standards for compatibility of printed circuit and component lead materials
E-FS-14531

Compressible sleeve provides automatic centering for grinding or turning of cylinders
SAN-10021

Tools made of ice facilitate forming of soft, sticky materials
E-RSC-10262

Photonmicroscopy
E-FS-14556

MOLECULAR CHAINS

New class of thermosetting plastics has improved strength, thermal and chemical stability
LEWIS-10108

Production of crystalline polymers via liquid crystal monomers
HQ-10235

MOLECULAR COLLISIONS

Quantum mechanical calculations of reactive scattering cross sections in bimolecular encounters
E-FS-13594

MOLECULAR DIFFUSION

Large volume continuous counterflow dialyzer has high efficiency
EQ-10055

MOLECULAR FLOW

Test device prevents molecular bounce-back
GSFC-82

MOLECULAR INTERACTIONS

Molecular radiation - its application in physical measurements and analyses
E-FS-14816

MOLECULAR SPECTRA

Detection of molecular infrared spectra
HQ-10377

MOLECULAR SPECTROSCOPY

Submicron holes in thin films increase sampling range of mass spectrometers

IBM-1620 monitor 2-D disk-storage subroutines ARG-10376 B69-10618 01
Versatile telemonitoring system ARG-10339 B69-10655 01
Deposition monitor and control NPO-10706 B69-10722 01
System converts slow-scan to standard fast-scan TV signals GSPC-90534 B69-10748 01

NAME

Test monkeys anesthetized by routine procedure NQ-19 B65-10332 04

MONOCROMATIC RADIATION

Computer programs simplify optical system analysis GSPC-306 B65-10093 01
Unique construction makes interferometer insensitive to mechanical stresses JPL-725 B65-10295 02
Instrument performs nondestructive chemical analysis, data can be telemetered JPL-SC-078 B65-10317 01
Fresnel diffraction plates are simple and inexpensive M-PS-12731 B67-10297 02
Measuring coplanarity of surfaces MSC-12044 B67-10371 02
Ellipsoidal-mirror reflectometer accurately measures infrared reflectance of materials GSPC-566 B67-10444 01
Proposed method of rotary dynamic balancing by laser M-PS-12422 B67-10452 02

MONOCROMATIZATION

Use of photographs speeds inspection of printed-circuit boards MSC-72 B69-10110 01
Neutron diffractometer allows both magnetic and crystallographic analyses ARG-191 B67-10131 02

MONOCROMATORS

Fluorescent photography of spray droplets using a laser light source LEWIS-10777 B69-10122 02

MONOCQUE STRUCTURES

Computer program for determination of natural frequencies of closed spherical sandwich shells MSC-1246 B67-10279 06

MONOMERS

Valve seat pores sealed with thermosetting monomer M-PS-900 B66-10322 03
Arylenesiloxane copolymers

Fluid pressure used to test turbopump bearings
NU-0001 B65-10024

Fuel and oxidizer valve assembly employs single solenoid actuator
MSC-1046 B66-10648

Standard surface grinder for precision machining of thin-wall tubing
ARG-1001 B867-10400

Hydraulic system provides smooth control of large tracking and antenna drive systems at very low tracking rates
NPO-10316 B67-10418

Concept for cryogenic liquid reclamation system
B67-10420

Conceptual hermetically sealed elbow actuator
H-FS-14710 B68-10300

Flow angle sensor and readout system
LEWIS-90298 B69-10050

Helical tape forming device
GSPC-10830 B69-10137

Preferred-orientation analysis of polycrystalline materials
NPO-10604 B69-10336

Stress-testing of the throat of a rocket's nozzle
NPO-10311 B69-10358

Automatic leveling and equalizing hoist device
H-FS-16549 B69-10514

Improved camera for better X-ray powder photographs
HQ-10424 B69-10537

Modular chassis simplifies packaging and interconnecting of circuit boards
JPL-236A B63-10174

Lightweight universal joint transmits both torque and thrust
JPL-375 B63-10236

Break-up of metal tube makes one-time shock absorber, bars rebound
LANGLEY-18 B63-10304

Apparatus alters position of objects to facilitate demagnetization
GSPC-234 B64-10277

Mounting for diodes provides efficient heat sink
H-FS-197 B64-10263

Improved holder protects crystal during high acceleration and impact
JPL-463 B65-10037

Thermistor connector assembly increases accuracy of measurements
LANGLEY-62 B65-10045

Adhesive-backed terminal board eliminates mounting screws
MSC-173 B65-10396

Piggy-back mounting would increase microcircuit packaging density
MSC-12059 B68-10118

Global angle sensor
GSFC-10305 B68-10315

Gun facilitates adhesive bonding of studs

MULTIPATH TRANSMISSION

Mounting method improves electrical and vibrational characteristics of screen electrodes
H-FS-20169 B69-10097

Technique for anchoring fasteners to honeycomb panels
LEWIS-10888 B69-10265

Remote control thermal actuator
LEWIS-10873 B69-10307

Precision mounting for instrument optical elements provided by polyimide bonding
H-FS-20253 B69-10310

Shock-absorbent mountings for bearings
HPO-10626 B69-10331

Investigation of the development of cracks in solder joints
H-FS-20444 B69-10807

MOUTH

 Mouthpiece adapter for pipettes protects mouth from harmful liquids
LANGLEY-87 B65-10043

Experimental study and evaluation of radioprotective drugs
ARG-10196 B68-10320

MOVING TARGET INDICATORS

An investigation of phase-lock loop swept-frequency synchronization
H-FS-556 B66-10823

MULTIFILAMENT

 Improved thermal insulation materials made of foamed refractory oxides
H-FS-735 B66-10288

MULTICHANNEL COMMUNICATION

Multichannel implantable telemetry system
ARC-10083 B68-10065

Diversity RF receiving system with improved phase-lock characteristics
GIS-01222 B68-10068

Fast framing cameras provide high-speed multi-channel data recording
ARG-10252 B69-10102

Direct determination of lead-210 by liquid-scintillation counting
ARG-10339 B69-10611

Versatile telemonitoring system
ARG-10339 B69-10655

MULTILAYER INSULATION

Reflective insulator layers separated by bonded silica beads
BSC-215 B66-10070

Inexpensive cryogenic insulation replaces vacuum jacketed line
NUC-10061 B67-10264

Development of dual solid cryogens for high reliability refrigeration system
GSPC-10188 B67-10644

Design of multilayer insulation systems
ARC-10166 B69-10615

MULTIPATH TRANSMISSION

Improved VHF direction finding system
H-FS-20439 B69-10370
MULTIPHASE FLOW

Signal generator converts direct current to multiphase supplies
MSC-11043 B67-10368 01
Flowmeter determines mix ratio for viscous adhesives
N-PS-2308 B67-10378 01

MULTIPLEXING

Microphone multiplex system provides multiple outlets from single source
gspc-426 B66-10308 01
Security warning system monitors up to fifteen remote areas simultaneously
KSC-66-39 B66-10548 01
Multiplexer uses insulated gate-field effect transistors
N-PS-13096 B67-10396 01
Seismographic recording of large rocket engine operation
N-PS-20545 B69-10756 01

MULTIPLEXIMATION

Binary system generates sidereal rate from standard solar rate
GSPC-190 B64-10200 01
Video signal processing system uses gated current mode switches to perform high speed multiplication and digital-to-analog conversion
MSC-781 B66-10429 01
Stress calculator speedily converts strain data
N-PS-2021 B67-10182 03
Improved electromechanical master-slave manipulator
ARS-10027 B68-10372 05
Numerical inversion of finite Toeplitz matrices and vector Toeplitz matrices
ARS-10485 B69-10415 02

MULTIPLIERS

Computer determines high-frequency phase stability
GSPC-113 B63-10555 01
Precision gage measures ultrahigh vacuum levels
GSPC-114 B63-10597 01
Digital cardiometer computes and displays heartbeat rate
MSC-93 B64-10259 01
Variable load automatically tests dc power supplies
GSPC-291 B65-10165 01
Photoresistance analog multiplier has wide range
GSPC-360 B65-10287 01
Circuit multiplies pulse width modulation, exhibits linear transfer function
eq-56 B67-10055 01
Improved dc voltage multiplier
N-PS-14042 B68-10074 01
Conceptual heretically sealed elbow actuator
N-PS-14710 B68-10300 05
System measures arc energy dissipated in relay contact cycling
N-PS-14541 B68-10312 01
System measures response time of photomultiplier tubes
LEWIS-10437 B68-10382 01

MULTIPLIERS

A 35 GHz solid state transmitter/driver
N-PS-20152 B66-10545 01
Device for diode tuning in a stripline varactor harmonic multiplier
N-PS-20153 B69-10013 01
Automatic calorimetry system monitors RF power
NPO-11033 B69-10384 01

MULTIPOLES

An improved atomic hydrogen frequency and time standard
GSPC-10706 B69-10384 01

MULTISTAGE ROCKET VEHICLES

Shock and vibration response of multistage structure
N-PS-19772 B68-10353 05

MULTIVIBRATORS

Temperature-sensitive network drives astable multivibrator
GSPC-183 B65-10119 01

INEXPENSIVE, STABLE CIRCUIT MEASURES HEART RATE

Stepping motor drive circuit designed for low power drain
GSPC-198 B65-10026 01
Simulator produces physiological waveforms
MSC-94 B65-10091 01

Variable frequency transistor inverters use multiple core transformers
GSPC-183 B65-10119 01

Variable frequency magnetic multivibrator generates stable square-wave output
GSPC-ARK-21 B65-10124 01

Auxiliary circuit enables automatic monitoring of EKG's
MSC-106 B65-10142 01

Digital-output cardiometer measures rapid changes in heartbeat rate
NCO-133 B65-10143 01

Solid-state switching used to speed up capacitive integrator
LANGLEY-104 B65-10159 01

PCM magnetic tape system efficiently records and reproduces data
GSPC-375 B65-10311 01

Frequency divider is free of spurious outputs
GSPC-308 B65-10334 05

Frequency discriminator with binary output eliminates tuned circuits
N-PS-376 B65-10349 01

Circuit exhibits power efficiency greater than 75 percent
MSC-254 B66-10034 01

Miniature bioelectric device accurately measures and telemeters temperature
ARC-52 B66-10057 01

Electronic phase-locked-loop speed control system is stable
JFL-SC-084 B66-10232 01

Electronic circuit delivers pulse of high internal stability
MSC-673 B66-10501 01

Preregulator feedback circuit utilizes Light Actuated Switch
N-PS-1180 B66-10542 01

Security warning system monitors up to...

NAVIGATION
Conceptual nonorthogonal gyro configuration
for guidance and navigation
MSC-11363

NAVIGATION AIDS
Improved magnetometer uses toroidal gating coil
GSFC-249

GMS/local-time conversion chart
GSFC-10521

Ring laser angle encoder
MSC-13099

A polar graphic method for determining the attitude of rocket vehicles
GSFC-10860

Automatic star-horizon angle measurement system
ASC-11565

NAVIGATION INSTRUMENTS
Optical automatic gain channel
M-FS-1256

Developmental instrument supplies accurate attitude and attitude-rate data
HQ-57

Three-axis attitude and direction reference instrument has only one moving part
M-FS-1819

Hermetically sealed vibration damper
MSC-10959

NEAR INFRARED RADIATION
Solid-state laser transmitter is amplitude-modulated
MSC-121

NEEDLES
Miniature oxygen-hydrogen cutting torch constructed from hypodermic needle
JPL-545

Hollow needle used to cut metal honeycomb structures
MSC-486

Modified algosimeter provides accurate depth measurements
MSC-616

Self-sealing closure enables access to several fluid containers
NPO-10123

Device enables calibration of microphones at high sound pressure levels
M-FS-11980

Sealed container sampling device
GSFC-10690

NEGATIVE CONDUCTANCE
Logic circuit detects both present and missing negative pulses in superimposed wave trains
M-FS-12518

NEGATIVE FEEDBACK
Electrometer preamplifier has drift correction feedback
JPL-SC-074

Frequency discriminator with binary output eliminates tuned circuits
M-FS-376

Feedback loop compensates for rectifier nonlinearity
M-FS-384

Negative feedback system reduces pump oscillations
M-FS-1038

I-434
SUBJECT INDEX

GERT simulation program for GERT network analysis
ERC-10209 B68-10457 06

Locating **sneak paths** in electrical circuitry
M-PS-15018 B68-10565 01

Visual task analysis /VISTA/
M-PS-14716 B69-10394 06

Punch-magnet delay eliminated by modification of circuit
ARG-10333 B69-10416 01

NETWORK SYNTHESIS
Boron trifluoride nuclear detector preamplifier uses single-cable connection
LEWIS-178 B65-10255 01

Computer program for network synthesis by frequency response fit
M-PS-12686 B67-10406 06

Active rc networks of low sensitivity for integrated circuit transfer function
ARC-10146 B68-10210 01

Technique developed for measuring transmittance of optical birefringent networks
M-PS-14267 B68-10260 02

Study of optimum discrete estimators in measurement analysis
M-PS-14915 B66-10348 02

GERT EXCLUSIVE-OR combining paths and loops of electrical networks
ERC-10206 B68-10435 06

HIGH FREQUENCY W I D E - B A N D transformer uses coax to achieve high turn ratio and flat response
ARG-107 B66-10600 01

Accuracy of laser measurements improved by pulse autocorrelator electronic system
MSC-10033 B67-10338 01

NEUTRONS
Review of research and development in fluid logic elements
M-PS-420 B67-10438 01

NEUTRAL PARTICLES
Primary radical yields in pulse irradiated alkaline aqueous solution
ABS-10322 B69-10167 02

NEUTRON ABSORBERS
Calculation of resonance neutron absorption in two-region problems /the GAROL code/
NUC-10045 B67-10223 06

Aluminum-titanium hydride-boron carbide composite provides lightweight neutron shield material
NUC-10069 B67-10265 03

Portable, high intensity isotopic neutron source provides increased experimental accuracy
ARG-90250 B68-10243 02

NEUTRON ACTIVATION ANALYSIS
Nondestructive test method accurately sorts mixed bolts
M-PS-1626 B66-10574 01

Neutron activation analysis traces copper artifacts to geographical point of origin
ARG-119 B67-10036 02

Status of ultrachemical analysis for semiconductors
M-PS-2254 B67-10138 03

Wear studies made of slip rings and gas bearing components
M-PS-12062 B67-10403 05

Compilation of detection sensitivities in thermal-neutron activation
ARG-10069 B67-10641 03

Detection sensitivities in 3-8 MeV neutron activation
ARG-10210 B68-10298 02

Separation of traces of metal ions from sodium matrices
ARG-10341 B69-10168 03

Zone purification of potassium chloride
ARG-10377 B69-10241 03

NEUTRON BEAMS
Neutron diffractometer allows both magnetic and crystallographic analyses
ARG-191 B67-10131 02

N-SAP and G-SAP neutron and gamma ray albedo model scatter shield analysis program
NUC-10126 B67-10536 06

Analysis of silicon dioxide, magnesium oxide, lead fluoride, bismuth as low-pass velocity filters for neutrons
ARG-10220 B69-10211 02

NEUTRON COUNTERS
Boron trifluoride nuclear detector preamplifier uses single-cable connection
LEWIS-178 B65-10255 01

Detection of entrapped moisture in honeycomb sandwich structures
ESC-1103 B67-10116 01

Current pulse amplifier transmits detector signals with minimum distortion and attenuation
NUC-10055 B67-10347 01

Neutron detector simultaneously measures fluence and dose equivalent
ARG-10071 B67-10597 02

Detection sensitivities in 3-8 MeV neutron activation
ARG-10210 B68-10298 02

Improved pulse shape discriminator for fast neutron-gamma ray detection system
HG-10151 B69-10481 01

Manganese-56 coincidence-counting facility precisely measures neutron-source strength
ARG-90261 B69-10621 01

NEUTRON CROSS SECTIONS
GABIT program
NUC-10243 B69-10433 06

Niobium-uranium alloys with voids of predetermined size and total volume
ARG-10490 B69-10641 03

NEUTRON DIFFRACTION
Neutron diffractometer allows both magnetic and crystallographic analyses
ARG-191 B67-10131 02

NEUTRON DISTRIBUTION
Synthesis of calculational methods for design and analysis of radiation shields for nuclear rocket systems
M-PS-14447 B69-10158 06

NEUTRON FLUX DENSITY
A fast-neutron spectrometer of advanced design
M-PS-1664 B66-10555 01

NEUTRON IRRADIATION
Alpha particle backscattering measurements
used for chemical analysis of surfaces
ARG-116 B67-10186 03

Radiation counting technique allows density measurement of metals in high-pressure/high-temperature environment
ARG-124 B67-10316 02

Neutron irradiation of Am-241 effectively produces curium
ARG-10030 B67-10501 03

SOS-DS computer code provides tool for design evaluation of homogeneous two-material nuclear shield
NUC-10142 B67-10537 06

Computer program calculates gamma ray source strengths of materials exposed to neutron fluxes
NUC-10143 B67-10665 06

Procedure developed for reporting fast-neutron exposure
ARG-10035 B68-10190 02

Resistivity measurements of neutron-irradiated pure metals and Al-Zn alloys
ARG-10108 B68-10200 03

Neutron therapy of cancer
ARG-10310 B69-10203 04

NEUTRON PHYSICS
Multichannel pulse height analyzer is inexpensive, features low power requirements
NIM-10020 B67-10256 01

Practical new method of measuring thermal-neutron fluence
NUC-10066 B67-10352 02

NEUTRON SCATTERING
Computer program VARI-QUIR 3 provides solution of steady-state, multigroup, two-dimensional neutron diffusion equations
NUC-10052 B67-10345 06

Computer program /PI-GAS/ calculates the P-0 and P-1 transfer matrices for neutron moderation in a monatomic gas
NUC-10141 B67-10678 06

Isotopically pure magnesium isotope-24 is prepared from magnesium-24 oxide
ARG-10154 B68-10293 02

Computer program calculates the effective temperature for a crystalline solid /DETS/
NUC-10161 B69-10036 06

Analyses of silicon dioxide, magnesium oxide, lead fluoride, bismuth as low-pass velocity filters for neutrons
ARG-10220 B69-10211 02

NEUTRON SOURCES
Detection of entrapped moisture in honeycomb sandwich structures
MSC-1103 B67-10116 01

Apparatus for fabrication of americium-beryllium neutron sources prevents capsule contamination
ARG-1014 B67-10202 05

Portable, high intensity isotopic neutron source provides increased experimental accuracy
ARG-90250 B68-10243 02

Dual-mode operation of a neutron source, a concept
EQ-10106 B69-10246 02

Manganese-56 coincidence-counting facility precisely measures neutron-source strength
ARG-90261 B69-10621 01

NEUTRON SPECTRA
Low scatter lightweight fission spectrometer constructed for biological research
ARG-10094 B68-10174 02

Ge-diode detector combined with crystal-diffraction spectrometer permits high-resolution gamma ray spectroscopy
ARG-10190 B69-10005 02

NEUTRON SPECTROMETERS
A fast-neutron spectrometer of advanced design
ARG-1164 B66-10555 01

Four pi-recoil proportional counter used as neutron spectrometer
ARG-10101 B68-10326 02

NEUTRONS
Status of ultrachemical analysis for semiconductors
NUC-10086 B67-10352 06

Uranyl phthalocyanines show promise in the treatment of brain tumors
ARG-10101 B68-10188 04

Training course for radiation safety technicians
ARG-216 B67-10477 04

Neutron therapy of cancer
ARG-10310 B69-10203 04

NEUTRON-RAPHSON METHOD
Computer program reduces calculation time of normal response functions
ARG-10157 B67-10108 01

Computer program for mass optional solutions of some endpoint trajectory problems
ARG-10297 B67-10310 06

Computer program for network synthesis by frequency response fit
ARG-12668 B67-10466 06

Computer program provides steady state analysis for liquid propellant propulsion systems
MSC-10064 B67-10418 06

Program computes equilibrium normal shock and stagnation point solutions for arbitrary gas mixtures
LANGLEY-10090 B67-10509 06

Computer program offers new method for constructing periodic orbits in nonlinear dynamical systems
ARG-14654 B68-10217 06

HICOV - Newton-Raphson calculus of variation with automatic transversalities
ARG-14656 B68-10232 06

Buckling of Shells Of Revolution /BOSSO/ with various wall constructions
LANGLEY-10444 B69-10300 06

NEUTRON THEORY
Real fluid properties of normal and parahydrogen
LEWIS-10458 B68-10361 06

NICHEMONE (TRADEMARK)
Heater decomposes oil backstreaming from high-vacuum pumps
GSFRC-356 B65-10224 02

Viscosity and density of methanol/water mixtures at low temperatures
ARG-14991 B68-10274 03

Induction probe determines levels of liquid metals

Method for copper staining of germanium crystals
ARG-10403  869-10257  03

Laser action from a terbium beta-ketoenolate at room temperature
GSFC-10593  869-10324  02

Pneumatic flow comparator
E-PS-18373  869-10400  05

Control for maintaining constant level of a cryogenic liquid
MDC-11777  869-10573  05

High pressure real gas effects for helium and nitrogen
LEWIS-10819  869-10669  06

Vacuum gage calibration system for 10 to the minus 8th power to 10^-10 torr
LEWIS-11032  869-10713  01

Controlled substrate cooling improves reproducibility of vapor deposited semiconductor composites
ERC-10161  869-10732  01

Control for maintaining constant level of a cryogenic liquid
MDC-10161  869-10732  01

Mixed ether bath for electrodeposition of aluminum
LANGLEY-10200  869-10737  03

NITROGEN COMPOUNDS

Substitution of stable isotopes in Chlorella
ARG-10258  869-10197  04

NITROGEN DIOXIDE

Nitrogen dioxide produced by self-sustained pyrolysis of nitrous oxide
LANGLEY-32  865-10074  05

Continuous analysis of nitrogen dioxide in gas streams of plants
ARG-10356  869-10254  03

NITROGEN ISOTOPES

An improved nuclear magnetic resonance
NONDESTRUCTIVE TESTS

Pulse generator permits nondestructive testing of component breakdown voltage
M-SC-122 B67-10054 01

Crack detection method is safe in presence of liquid oxygen
M-PS-286 B67-10017 03

Apparatus facilitates pressure-testing of metal tubing
LEWIS-174 B67-10131 05

Force controlled solenoid drives microveld tester
W00-125 B67-10182 01

Portable self-powered device detects internal flaws in tubular structures
HS-0019 B67-10028 01

Pressure transducers dynamically tested with sinamical pressure generator
LEWIS-268 B67-10031 01

Surfactant for dye-penetrant inspection is insensitive to liquid oxygen
M-PS-475 B67-10131 03

Fatigue cracks detected and measured without test interruption
LEWIS-266 B67-10178 02

Ultrasonic recording scanner used for nondestructive weld inspection
M-PS-284 B67-10220 01

Ultrasonic hand tool allows convenient scanning of spot welds
M-PS-539 B67-10289 02

Simple, nondestructive test identifies metals
MSC-525 B67-10305 03

Semiautomatic device tests components with biaxial leads
MSC-516 B67-10337 03

Nondestructive test method accurately sorts mixed bolts
M-PS-1426 B67-10574 01

Portable fixture facilitates pressure testing of instrumentation fittings
M-PS-2032 B67-10121 03

Calibrating ultrasonic test equipment for checking thin metal strip stock
NEC-10009 B67-10127 01

Weld procedure produces quality welds for thick sections of Hastelloy-X
NRC-10048 B67-10195 05

Electron beam welder X-rays its own welds
LEWIS-1011 B67-10216 02

Liquid crystals detect voids in fiber glass laminates
LEWIS-10104 B67-10286 03

Improved ultrasonic TV images achieved by use of Lamb-wave orientation technique
ARG-203 B67-10295 02

Thermal neutron image intensifier tube provides highly visible radiographic pattern
ARG-120 B67-10296 02

Brake joint quality tested electromagnetically
M-PS-12795 B67-10333 01

Nondestructive test determines overload destruction characteristics of current limiter fuses

Subject Index

in graphite
ARG-10087 B68-10102 03

Electron beam recrystallization of amorphous semiconductor materials
LEWIS-10443 B68-10556 02

NUCLEI

Liquid mercury chamber and microsyringe designs allow more efficient microinjections
ARG-251 B67-10305 04

Stratification of centrifuged amoeba nuclei investigated by electron microscopy
ARG-10161 B68-10366 04

NUCLEI (NUCLEAR PHYSICS)

Your pi-recoil proportional counter used as a neutron spectrometer
ARG-10101 B68-10326 02

NUCLEAR ACIDS

Effect of preparation procedures on intensity of radiograph labeling is studied
ARG-10032 B67-10500 04

NUCLIDES

Calculation of resonance neutron absorption in two-region problems /the GAROL code/
NUC-10045 B67-10223 06

Computer program FPIP-BVY calculates fission product inventory for U-235
NUC-10089 B67-10450 06

Review of physics, instrumentation and dosimetry of radioactive isotopes
ARG-10037 B67-10640 02

Neutron therapy of cancer
ARG-10310 B69-10203 04

Automatic bird watcher
ARG-10342 B69-10286 02

Gamma radiation characteristics of plutonium dioxide fuel
B69-11560 B69-10170 02

NULL ZONES

Sensitive bridge circuit measures conductance of low-conductivity electrolyte solutions
ARG-147 B67-10294 01

NUMBERS

Run numbering system for use with data recorders
N-FS-2557 B67-10215 01

NUMERICAL ANALYSIS

Computer modification reduces time of performing iterative division
N-FS-166 B65-10005 01

Calculations enable optimum design of magnetic brake
LEWIS-251 B66-10073 05

New computer system simplifies programming of mathematical equations
N-FS-441 B66-10361 01

Minimum permissible leakage resistance established for instrumentation systems
N-FS-848 B66-10397 01

New computer program solves wide variety of heat flow problems
N-FS-421 B66-10404 01

An orthonormalization procedure for multivariable function approximation
N-FS-1313 B66-10579 01

Problem of oscillating cone in supersonic flow is solved by small perturbation techniques
N-FS-849 B66-10700 02

Computer program calculates monotonic maximum likelihood estimates using method of reversals
N-FS-1516 B67-10136 01

A power-spectral-density computer program
BPO-10126 B67-10160 01

A theoretical model for determining turbine flowmeter sensitivity
N-FS-172 B67-10179 01

CINDA - Chrysler Improved Numerical Differencing Analyzer computer program
N-FS-2298 B67-10278 06

Computer program provides linear sampled-data analysis for high order systems
N-FS-12821 B67-10287 06

General purpose computer programs for numerically analyzing linear ac electrical and electronic circuits for steady-state conditions
N-FS-13094 B67-10331 06

Numerical least-square method for resolving complex pulse height spectra
GSFC-10182 B67-10480 06

Large-amplitude inviscid fluid motion in an accelerating container

HQ-10391 B69-10368 06

NUSSELT NUMBER

Computer program ICAP provides for steady state thermal and flow analysis of multiple parallel channels in heat generating solid
Feed-thru flange is useful in vacuum applications to cryogenic temperatures
JPL-846  B66-10615  02
Aluminized thin-window proportional-counter tube is stronger, more responsive in long wavelength region
JPL-689  B66-10015  01
Plasma jet electrode has longer operating life
N-0098  B66-10024  02
Feed-through connector couples RF power into vacuum chamber
N-0036  B66-10027  01
Irradiated gases transferred without contamination or dilution
LEWIS-278  B66-10044  03
Laboratory arc furnace features interchangeable hearths
AG-125  B66-10052  05
Line adapter provides quick disconnect under moderate side loading
K-FS-2159  B66-10256  06
Improved compression molding process
LEWIS-10027  B66-10302  05
Hand-operated plug insertion valve
K-FS-12019  B66-10466  05
Dynamic valve seal is reliable at cryogenic temperatures
N-12987  B66-10526  05
Lead plated aluminum ring provides static high pressure seal for large diameter pressure vessel
N-10009  B66-10539  05
Polystyrene cryostat facilitates testing tensile specimens under liquid nitrogen
N-10522  B66-10613  02
Ferromagnetic core valve gives rapid action on minimum energy
LEWIS-10135  B66-10623  05
Eddy current disk valve
LEWIS-10123  B66-10638  05
Cooled miniature pressure transducers effective at high temperatures
LEWIS-10461  B66-10370  01
Insertion device for pressure testing
N-15185  B66-10661  03
Improved retort for cleaning metal powders with hydrogen
LEWIS-10718  B69-10468  03
Cryogenic cooling reduces high voltage arcing between electrodes operating in a vacuum pressure vessels
ARG-109  B66-10499  02

OCEANOGRAPHY

Oceanborne transponder platform has good stability
K-FS-171  B66-10035  05
Extendable mast used in one shot soil penetrometer
JPL-685  B66-10146  05
New method for critical failure prediction of coaplex systems
K-FS-14133  B66-10252  02
Computer graphics data conditioning
K-FS-1695  B66-10296  06
Charts designate probable future oceanographic research fields
K-FS-20202  B66-10397  01
Analysis of filament reinforced metal-shell pressure vessels
LEWIS-10352  B66-10405  06

X-449
Dual-mode operation of a neutron source, a concept
HQ-10106  B66-10248  02

Safety switch permits emergency bridge crane shutdown
M-FS-549  B66-10168  05

Key-locked guard prevents accidental switch actuation
MSC-419  B66-10235  05

Electronic shutter gates image orthicon on and off
HQ-96  B67-10270  01

A method for reducing sampling jitter in digital control systems
NPO-11088  B69-10338  01

Rotational fluid coupling eliminates hose entanglements
MSC-312  B66-10585  05

An overview of electromagnetic interference problems in spacecraft
NPO-11170  B69-10362  01

Ohmmeter senses depletion of lubricant in journal bearings
LEWIS-37  B64-10042  01

Weld leaks rapidly and safely detected
M-FS-362  B65-10265  01

Electronic ohmmeter provides direct digital output
GSFC-363  B65-10274  01

Resistor monitors transfer of liquid helium
LANGLEY-229  B66-10580  01

Electrical continuity scanner facilitates identification of wires for soldering to connectors
MSC-626  B66-10605  01

Ratio matching of half-bridge weldable strain gages, computer program
FRC-10032  B69-10040  06

Nondestructive evaluation of printed wiring boards by microresistance measurements
SAN-10034  B69-10272  01

Oil-smeared models aid wind tunnel measurements
LANGLEY-4  B63-10311  03

Fine-particle filter prevents damage to vacuum pumps
LEWIS-106  B63-10489  05

Nonresonant support facilitates vibration testing of structures
M-FS-224  B65-10039  05

Heater decomposes oil backstreaming from high-vacuum pumps
GSFC-356  B65-10224  02

Oil-damped mercury pool makes precise optical alignment tool
GSFC-353  B65-10253  02

Tensile-strength apparatus applies high strain-rate loading with minimum shock
JPL-20  B66-10063  05

Sensor detects hydrocarbon oil contaminants in fluid lines
M-FS-522  B66-10068  01

Fluid damping reduces bellows seal fatigue failures

Ohmmeter senses depletion of lubricant in journal bearings
LEWIS-37  B64-10042  01

Weld leaks rapidly and safely detected
M-FS-362  B65-10265  01

Electronic ohmmeter provides direct digital output
GSFC-363  B65-10274  01

Resistor monitors transfer of liquid helium
LANGLEY-229  B66-10580  01

Electrical continuity scanner facilitates identification of wires for soldering to connectors
MSC-626  B66-10605  01

Ratio matching of half-bridge weldable strain gages, computer program
FRC-10032  B69-10040  06

Nondestructive evaluation of printed wiring boards by microresistance measurements
SAN-10034  B69-10272  01

Oil-smeared models aid wind tunnel measurements
LANGLEY-4  B63-10311  03

Fine-particle filter prevents damage to vacuum pumps
LEWIS-106  B63-10489  05

Nonresonant support facilitates vibration testing of structures
M-FS-224  B65-10039  05

Heater decomposes oil backstreaming from high-vacuum pumps
GSFC-356  B65-10224  02

Oil-damped mercury pool makes precise optical alignment tool
GSFC-353  B65-10253  02

Tensile-strength apparatus applies high strain-rate loading with minimum shock
JPL-20  B66-10063  05

Sensor detects hydrocarbon oil contaminants in fluid lines
M-FS-522  B66-10068  01

Fluid damping reduces bellows seal fatigue failures

Oil-smeared models aid wind tunnel measurements
LANGLEY-4  B63-10311  03

Fine-particle filter prevents damage to vacuum pumps

Nonresonant support facilitates vibration testing of structures
M-FS-224  B65-10039  05

Heater decomposes oil backstreaming from high-vacuum pumps
GSFC-356  B65-10224  02

Oil-damped mercury pool makes precise optical alignment tool
GSFC-353  B65-10253  02

Tensile-strength apparatus applies high strain-rate loading with minimum shock
JPL-20  B66-10063  05

Sensor detects hydrocarbon oil contaminants in fluid lines
M-FS-522  B66-10068  01

Fluid damping reduces bellows seal fatigue failures
SUBJECT INDEX

OPACITY
Opaque microfiche masthead permits easy reading
HQ-7 B65-10306 01

Optically driven switch turn-off time reduced by opaque coatings
JPL-SC-107 B66-10141 01

Pyrometry handbook describes practical aspects of surface temperature measurements of opaque materials
LEWIS-349 B66-10520 01

Technique for predicting temperature distribution in gases
LEWIS-10516 B69-10329 01

OPENINGS
Expandable rubber plug seals openings for pressure testing
NU-0048 B66-10229 05

Interior servicing platform simplifies maintenance of storage tanks
N-PS-1360 B66-10425 05

OPERATING TEMPERATURE
Precision capacitor has improved temperature and operational stability
ARS-189 B67-10313 01

Transient sensor development
N-PS-13370 B67-10471 01

Liquid crystal calibrator
N-PS-14151 B66-10221 03

OPERATIONAL HAZARDS
Economical and maintenance-free gas system operates railroad switches
NU-0045 B66-10124 05

Lifting clamp positively grips structural shapes
N-PS-593 B66-10176 05

OPERATIONAL PROBLEMS
Logic system aids in evaluation of project readiness
MCC-753 B66-10457 05

Electrochemical cell has internal resistive heater element
GSFC-10358 B66-10325 01

Design and sparing techniques to meet specified performance life
HQ-10200 B69-10528 02

OPERATIONS RESEARCH
Queueing register uses fluid logic elements
N-PS-317 B66-10100 05

OPERATOR PERFORMANCE
Optical projectors simulate human eyes to establish operator's field of view
WOO-250 B66-10010 02

Shoulder adapter steadies spot welding gun
N-PS-321 B66-10076 05

Tape reading fixture
N-PS-14146 B69-10008 05

Astronaut's tool for withdrawing/replacing computer cards
N-PS-20453 B69-10183 05

OPERATORS (MATHEMATICS)
Structure of the isotropic transport operators in three independent space variables
ARO-10440 B69-10432 06

OPERATORS (PERSONNEL)
Human transfer functions used to predict system performance parameters
LANGLEY-203 B66-10379 01

REMOTELY OPERATED HIGH PRESSURE VALVE
protects test personnel
N-PS-1110 B67-10291 05

OPTICAL COMMUNICATION
Local measurements in turbulent flows through cross correlation of optical signals
N-PS-1268 B67-10030 01

Laser communication system is insensitive to atmospherically induced noise
GSFC-10396 B67-10587 01

Site survey for optimum location of Optical Communication Experimental Facility
N-PS-13155 B66-10050 06

Repetitively pulsed, wavelength-selective carbon dioxide laser
ERC-10178 B68-10564 02

Occulcating-filter method for obtaining flashing-light visibility data
NCC-13097 B69-10107 02

Multipurpose binocular scanning apparatus
NPO-11002 B69-10311 02

Method of directing a laser beam with very high accuracy
NPO-11064 B69-10508 02

OPTICAL CORRECTION PROCEDURE
Oil-damped mercury pool makes precise optical alignment tool
GSFC-353 B65-10253 02

Image position sensor
N-PS-14101 B69-10763 02

OPTICAL COUPLING
Automatic frequency control of voltage-controlled oscillators
NPO-11064 B69-10569 01

OPTICAL DENSITY
PTFE-aluminum films serve as neutral density filters
LANGLEY-189 B66-10017 02

Digital computer processing of X-ray photos
JPL-792 B67-10005 04

Blood oxygen saturation determined by transmission spectrophotometry of hemolyzed blood samples
N-PS-11058 B67-10252 04

Sodium perxenate permits rapid oxidation of manganese for easy spectrophotometric determination
ARG-262 B67-10421 03

VICAR-DIGITAL image processing system
NPO-10770 B69-10139 06

OPTICAL EQUIPMENT
Optics used to measure torque at high rotational speeds
LEWIS-13 B65-10338 01

Mirror device aligns machine surface perpendicular to sight lines
WOO-5 B63-10421 02

Micromachining produces optical apertures to micron dimensions
GSFC-206 B64-10211 05

Radiation-detector optical-imaging device is of simplified construction
GSFC-251 B64-10299 01

Simple optical system used to align spectrophotograph
LANGLEY-92 B65-10071 02

Computer programs simplify optical system analysis

Design concept for improved photo-scan tube JPL-818 B67-10157 01

**OPTICAL TRACKING**

- Precision CW laser automatic tracking system investigated M-PS-1606 B66-10629 01
- Improved electro-optical tracking system M-PS-14791 B68-10311 01

**OPTICS**

- Optics used to measure torque at high rotational speeds LEWIS-13 B63-10338 01
- Liquid-level meter has no moving parts H-PS-3 B63-10378 03
- Lathe converted for grinding aspheric surfaces GSPC-115 B63-10056 05
- System measures angular displacement without contact LAMLEY-46 B65-10073 01
- Photosensors used to maintain welding electrode-to-joint alignment MSC-243 B65-10401 05
- Screen of cylindrical lenses produces stereoscopic television pictures H-PS-273 B66-10086 02
- New camera tube improves ultrasonic inspection system ARG-90237 B68-10088 01
- Properties of optics at high temperature and their measurement, a study H-PS-14696 B68-10240 02
- Improved relay optical element for spectroradiometer using cryogenically cooled detector MSC-11688 B68-10245 02
- Fluorescent particles enable visualization of gas flow H-PS-14583 B68-10259 02
- FORTRAN optical lens design program NPO-10603 B68-10354 06
- UV detector monitors organic contamination of optical surfaces H-PS-20246 B68-10413 01
- Optically induced free carrier light modulator GSPC-10216 B69-10114 01
- Determination of the absolute contours of optical flats ARG-10352 B69-10209 05

**OPTIMAL CONTROL**

- Design techniques - Stochastic controllers MSC-11554 B68-10234 02

**OPTIMIZATION**

- Computer program determines inventory size H-PS-1115 B66-10506 01
- A design procedure for the weight optimization of straight finned radiators GSPC-547 B66-10618 05
- Packaging of electronic modules JPL-801 B66-10664 01
- Computer program for mass optimal solutions of some endpoint trajectory problems H-PS-12976 B67-10310 06
Determination of quadric equation coefficients describing three-dimensional surfaces, their constraint and skewed planes, and viewpoint areas M-FS-15043

ORGANIC CHEMISTRY
Study of Raney nickel technology M-FS-2054 B67-10208 03

Qualitative and quantitative analysis of mixtures of compounds containing both hydrogen and deuterium ARG-10344 B69-10172 02

Production of solvated electrons ARG-10416 B69-10430 06

ORGANIC COMPOUNDS
Solvent residue content measured by light scattering technique M-FS-850 B66-10320 01

Primary cells utilize halogen-organic charge transfer complex JPL-526 B66-10682 02

Nitric acid-organic mixtures surveyed for use in separation by anion exchange methods ARG-10065 B68-10425 03

Detection of molecular infrared spectra HQ-10377 B69-10172 02

Recent development in organic scintillators ARG-10344 B69-10198 03

The Quantum spin an improved quantum detector BHC-1018 B69-10443 01

Thermally conducting electron transfer polymers GSFC-10703 B69-10511 03

ORGANIC MATERIALS
Multiple-orifice throttle valve XNP-09698 B66-10030 05

Testing the flammability of materials exposed to arcs MSC-15225 B69-10531 03

ORGANIC SILICON COMPOUNDS
Arylenesiloxane copolymers M-FS-1812 B67-10079 03

ORGANIZING
Computerized Schedule Effectiveness Technique /SET/ determines present and future schedule position M-FS-13012 B67-10522 06

ORGANOMETALLIC COMPOUNDS
New class of compounds have very low vapor pressures ARG-115 B67-10184 03

Uranyl phthalocyanines show promise in the treatment of brain tumors ARG-100 B67-10188 04

ORGANOMETALLIC POLYMERS
Arylenesiloxane copolymers M-FS-1812 B67-10079 03

ORIFICES
Elastic orifice automatically regulates gas bearings JPL-135 B63-10123 05

Method of welding joint in closed vessel improves quality of seam JPL-170 B63-10139 05

High-pressure regulating system prevents pressure surges JPL-231 B63-10170 05

NOT-AIR SOLDERING TECHNIQUE PREVENTS OVERHEATING OF ELECTRICAL COMPONENTS GSFC-391 B63-10536 01

MODIFIED GAS BEARING IS ADJUSTABLE TO OPTIMUM STIFFNESS RATIO M-FS-145 B64-10050 05

PNEUMATIC POWER IS TRANSMITTED THROUGH AIR BEARING MSC-8 B64-10141 05

SLIT FEEDS REDUCE UNBALANCED TORQUES IN GAS-LUBRICATED BEARINGS JPL-264 B65-10099 05

AVERAGING PROBE REDUCES STATIC-PRESSURE SENSING ERRORS LANGLER-36 B65-10114 05

COMBUSTION CHAMBER INLET MANIFOLD SEPARATES VAPOR FROM LIQUID M-FS-531 B66-10052 05

SYSTEM PROPORTIONS FLUID-FLOW IN RESPONSE TO DEMAND SIGNALS GSFC-857 B66-10094 01

SOLDERING TOOL HEATS WORKPIECES AND APPLIES SOLDER IN ONE OPERATION LEWIS-247 B66-10115 05

QUICK-RESPONSE SERVO AMPLIFIES SMALL HYDRAULIC PRESSURE DIFFERENCES ARG-99 B66-10498 05

HYDRAULIC SYSTEM PROVIDES SMOOTH CONTROL OF LARGE TRACKING AND ANTENNA DRIVE SYSTEMS AT VERY LOW TRACKING RATES NPO-10316 B67-10418 05

COMPUTER PROGRAM MCP provides for steady state thermal and flow analysis of multiple parallel channels in heat generating solid MUC-10043 B67-10457 06

PRESSURE VARIABLE ORIFICE FOR HYDRAULIC CONTROL VALVE MSC-1323 B66-10120 05

NEUTRON ACTIVATION ANALYSIS TRACES COPPER ARTIFACTS TO GEOGRAPHICAL POINT OF ORIGIN ARG-119 B67-10036 02

SOLAR-ANGLE SENSOR HAS NO MOVING PARTS JPL-418 B63-10260 02

BALL AND SOCKET JOINTS PROVIDE ACCURATE BIAXIAL GIMBAL JPL-658 B65-10205 05

MAGNETOMETER MEASURES ORTHOGONAL COMPONENTS OF MAGNETIC FIELDS GSFC-395 B65-10315 01

DEVELOPMENTAL INSTRUMENT SUPPLIES ACCURATE ATTITUDE AND ATTITUDE-RATE DATA SQ-57 B66-10607 01

IMPROVED COMPUTER PROGRAM FOR ELASTIC ANALYSIS OF HIGHLY REDUNDANT STRUCTURAL CONFIGURATIONS M-FS-13087 B67-10330 06

OCULOMETER FOR REMOTE TRACKING OF EYE MOVEMENT BHC-10114 B69-10444 02
ORTHOGONALITY

Method reduces computer time for smoothing functions and derivatives through ninth-order polynomials
BSC-10334 B69-10524 06

ORTHOGONALITY

Twin helix system produces fast scan in infrared detector
E-PS-1598 B66-10638 02

Device measures reaction engine thrust vector deviations
JPL-SC-163 B66-10642 05

Precision metal molding
E-PS-13305 B67-10423 05

Conceptual nonorthogonal gyro configuration for guidance and navigation
NC-11363 B67-10433 01

ORTHOROBIC FUNCTIONS

An orthorobicalization procedure for multivariable function approximation
E-PS-1313 B66-10579 01

ORTHOROBIC TOLERANCE

Device induces lungs to maintain known constant pressure
PSC-50 B64-10108 04

ORTHOROBIC CYLINDERS

Analysis of stability-critical orthorobic cylinders subjected to axial compression
E-PS-12869 B67-10375 03

ORTHOROBIC SHELLS

Computer program analyzes Buckling Of Shells Of Revolution with various wall construction, BOSOB
LANGLEY-10290 B68-10226 06

Buckling Of Shells Of Revolution /BOSOB/ with various wall constructions
LANGLEY-10441 B69-10300 06

OSCILLATING CYLINDERS

Problem of oscillating cone in supersonic flow is solved by small perturbation techniques
E-PS-869 B66-10700 02

Large-amplitude inviscid fluid motion in an accelerating container
E-PS-11560 B68-10170 02

OSCILLATING DAMPERS

Damping technique gives accelerometer flat frequency response
E-PS-471 B66-10293 01

Suspended chains damp wind-induced oscillations of tall flexible structures
LANGLEY-10193 B68-10042 05

Device damp fluid pressure oscillations in west valve
E-PS-13290 B68-10078 05

Radioisotopic temperature reference
E-PS-13276 B69-10507 01

OSCILLATIONS

Ellipsoidal optical reflectors reproduced by electroforming
GSFC-92 B63-10547 05

Improved holder protects crystal during high acceleration and impact
JPL-463 B65-10337 05

Device measures curved surface finish on gear teeth
W00-112 B65-10064 05

Device enables measurement of moments of inertia about three axes
GSFC-49 B65-10176 05

SUBJECT INDEX

Ultrasonic recording scanner used for nondestructive weld inspection
E-PS-284 B66-10220 01

A conceptual design for squeeze film bearings
E-PS-573 B66-10226 05

Device to color modulate a stationary light beam gives high intensity
EQ-44 B66-10476 01

Automatic system determines moments of inertia of asymmetrical objects
E-PS-1769 B66-10636 01

Negative feedback system reduces pump oscillations
E-PS-1852 B67-10064 05

System precisely controls oscillation of vibrating mass
E-PS-1675 B67-10276 01

Laser system generates single-frequency light
E-PS-2556 B67-10288 02

Circuit provides overcurrent protection to push-pull amplifier
PSC-12033 B67-10300 01

Portable spectrometer monitors inert gas shield in welding process

Welding torch and wire feed manipulator
E-PS-12144 B67-10385 05

Apparatus makes klystron operating frequency adjustable from remote point
NPO-09831 B67-10514 01

Amplitude and frequency readout overlay
GSFC-10183 B68-10054 01

Power consumption in acoustic amplifiers under conditions of maximum stable gain
GSFC-10067 B68-10327 01

Instabilities encountered during heat transfer to a supercritical fluid
ARG-10266 B69-10042 02

Teflon-packed flexible joint
VWIS-90252 B69-10049 03

Performance of low-pressure thermionic converters is evaluated
ARG-10276 B69-10090 01

Schmitt trigger multivibrator
PSC-10955 B69-10143 01

Self-shielding printed circuit boards for high frequency amplifiers and transmitters
EQ-10435 B69-10314 01

Magnetic focusing of resistive materials
E-PS-20417 B69-10397 03

Cryogenic fluid flow instabilities in heat exchangers
E-PS-20438 B69-10581 02

Self-sustained hydrodynamic oscillations in a natural-circulation two-phase-flow boiling loop
ARG-10461 B69-10620 02

Monopole mass spectrometer with improved sensitivity and reduced background
EQ-10476 B69-10666 01

Miniature backward-diode pressure sensor

I-456
OSCILLATORS

Increased performance reliability obtained with dual/redundant oscillator system
GSFC-36

Sensitive electrometer features digital output
GSFC-286

Oscillator circuit measures liquid level in tanks
H-PS-245

Brushless dc motor uses electron beam switching tube as commutator
GSFC-345

Inductor flyback characteristic gives voltage regulator fast response
GSFC-361

Electronic character provides direct digital output
GSFC-363

Electrostatically driven dynamic capacitor employs capacitive feedback
JPL-771

Frequency correction device uses digital circuitry
GSFC-368

Electronic one-hour integrator is accurate to one percent
GSFC-203

Hybrid circuit achieves pulse regeneration with low power drain
GSFC-382

Parallel line raster eliminates ambiguities in reading timing of pulses less than 500 microseconds apart
JPL-805

Single-sideband modulator accurately reproduces phase information in 2-Mc signals
H-PS-664

Transistorized converter provides nondissipative regulation
GSFC-227

Helmet system broadcasts electroencephalograms of wearer
ARC-70

Optical superheterodyne receiver uses laser for local oscillator
E-PS-1605

Digital frequency counter permits readout without disturbing counting process
JPL-906

Monitor assures availability and quality of communication channels
KSC-66-38

Fluidic oscillator used as humidity sensor
LBUIS-340

Circuit increases capability of hysteretic synchronous motor
BSC-1080

Fluorescent oscillator against laser amplifier
E-PS-2559

Voltage variable oscillator has high phase stability

I-457
Vibration analysis utilizing Mossbauer effect  
M-PS-11974  B67-10339  01

Digital-to-analog converter operates from low level inputs  
JPL-907  B67-10357  01

Interference effects eliminated in random oriented space station antenna system  
MSC-11004  B67-10435  01

Oscillator circuit operates as digitally controlled frequency synthesizer  
GSFC-370  B67-10447  01

Digital voltage-controlled oscillator  
GSFC-512  B67-10449  01

Blood pressure reprogramming adapter assists signal recording  
KSC-265  B67-10475  01

Improved circuit for measuring capacitive and inductive reactances  
M-PS-13083  B67-10513  01

Analog voicing detector responds to pitch  
GSFC-10085  B67-10571  01

Conceptual servo technique for controlling tape drivers  
E-TS-12935  B67-10595  01

New technique for determination of cross-power spectral density with damped oscillators  
E-TS-14022  B67-10602  02

Concept for automatic Doppler compensation in two-way communication systems  
GSFC-10213  B67-10643  01

Deep space FM system, a concept  
KSC-11825  B66-10289  01

Dynamic linearity measurement technique  
E-TS-10986  B66-10290  01

Cryogenic liquid level measuring probe  
ABG-10130  B66-10291  01

Improved gas ring laser  
E-TS-11584  B66-10304  02

Communication system features dual mode range acquisition plus time delay measurement  
E-TS-14323  B66-10306  01

Laser-Doppler gas-velocity instrument  
E-TS-20039  B66-10349  02

A 35 GHz solid state transmitter/driver  
E-TS-20152  B66-10545  01

Microelectronic oscillator, 2  
GSFC-10387  B69-10063  01

Microelectronic oscillator  
GSFC-10375  B69-10064  01

One hundred MHz voltage-controlled oscillator  
NPS-11004  B69-10133  01

Rectangular-bore, high-gain laser plasma tube  
EQ-10234  B69-10193  02

Technique for tuning antenna systems producing negligible signal radiation  
KSC-10060  B69-10215  01

Linear voltage-to-frequency converter  
GSFC-10546  B69-10220  01

Induction probe determines levels of liquid metals  
LEWIS-10345  069-10276  02

Pneumatic analog-to-pulse frequency converter  
LEWIS-10345  B69-10276  02

Automatic tuning of hydrogen masers  
GSFC-10127  B69-10452  01

Automatic frequency control of voltage-controlled oscillators  
NPO-11064  B69-10569  01

Load current sensor for a pulse width modulator power regulator  
GSFC-10656  B69-10578  01

Deposition monitor and control  
BBF-10706  B69-10722  01

Oscilloscopes

Microwave technique measures plasma characteristics  
LANGLEY-134  B65-10122  02

Manual-feed adapter permits microfilming of continuous oscillograph output  
MU-0029  B65-10249  01

Lamp automatically switches to new filament on burnout  
M-PS-498  B66-10406  01

Fatigue cracks detected and measured without test interruption  
LEWIS-266  B66-10178  02

Indicator system provides complete data of engine cylinder pressure variation  
LEWIS-291  B66-10470  05

Monitoring circuit accurately measures movement of solenoid valve  
M-PS-1029  B66-10568  01

Instrument accurately measures small temperature changes on test surface  
LANGLEY-174  B66-10637  01

Use of color-coded sleeve shutters accelerates oscillograph channel selection  
KSC-10092  B67-10382  01

Crack growth measured on flat and curved surfaces at cryogenic temperatures  
LEWIS-389  B67-10384  01

Instrumentation monitors transported material through variety of parameters  
E-TS-12938  B67-10545  01

Nondestructive test determines overload destruction characteristics of current limiter fuses  
ECS-00566  B66-10364  01

Electronic visualization of gas bearing behavior  
LEWIS-10711  B69-10073  01

Oscilloscopes

Emission tester for high-power vacuum tubes  
JPL-628  B64-10158  01

Raster linearity of video cameras calibrated with precision tester  
GSFC-200  B64-10209  01

Highly sensitive solids mass spectrometer uses inert-gas ion source  
BSC-11  B66-10114  02

Apparatus presents visual display of semiconductor surface characteristics  
JPL-665  B66-10200  01

New computer system simplifies programming of mathematical equations  
E-TS-441  B66-10361  01

Hollow plastic hoops protect thermocouple in storage and handling
Frequency discriminator with binary output eliminates tuned circuits
Epoxy-coated containers easily opened by wire band
Critical parts are stored and shipped in environmentally controlled reusable container
Packaging of electronic modules
Reparable, high-density microelectronic module provides effective heat sink
Aluminum heat sink enables power transistors to be mounted integrally with printed circuit board
Cone and column solar energy concentrator
Piggy-back mounting would increase microcircuit packaging density
Packaging criteria for transportation and handling shock and vibration
Low energy chaser can be used to test sensitive circuits, other meters
Standards for compatibility of printed circuit and component lead materials
Food products for space applications
One-dimensional reacting gas nonequilibrium performance program
Contamination control handbook
Microelectronic device data handbook

PACKAGING

Library of documents compressed into lap-held display kit
Battery-package design provides for cell cooling and constraint
Lightweight magnesium-lithium alloys show promise
New inflatable liferaft is not tippable
Molded elastomer provides compact ferrite-core holder, simplifies assembly
Use of tear ring permits repair of sealed module circuitry
Hollow plastic hoops protect thermocouple in storage and handling
Frequency discriminator with binary output eliminates tuned circuits
Epoxy-coated containers easily opened by wire band
Critical parts are stored and shipped in environmentally controlled reusable container
Packaging of electronic modules
Reparable, high-density microelectronic module provides effective heat sink

Microelectronic device data handbook

PACKAGING
The response of nonoenergetic gamma rays in finite media are investigated
ARG-10295 869-10080 02

PALLADIUM
Cryopumping of hydrogen in vacuum chambers is aided by catalytic oxidation of hydrogen
LEWIS-15 B63-10340 05
New alloy brazes titanium to stainless steel
MSC-102 B65-10060 05
Device removes hydrogen gas from enclosed spaces
GSPC-495 B66-10340 03
Sniffer used as portable hydrogen leak detector
N-FS-846 B66-10356 01
Purification train produces ultrapure hydrogen gas
N-FS-1913 B67-10078 03
Vibration analysis utilizing Mossbauer effect
N-FS-11974 B67-10339 01

PALLADIUM ALLOYS
Braze alloy holds bonding strength over wide temperature range
LEWIS-337 B66-10519 03
Silver-palladium braze alloy recovered from masking materials
N-FS-1845 B66-10631 03
Thermodynamic properties of solid palladium-silver alloys and other alloys are investigated by topsoil-effusion technique
ARG-277 B67-10324 03
High-temperature, gas-filled ceramic rectifiers, thyatrons, and voltage-reference tubes
LEWIS-90271 B69-10635 03
Device separates hydrogen from solution in water at ambient temperatures
MSC-13335 B69-10635 03

PALLADIUM COMPOUNDS
Trace levels of metallic corrosion in water determined by emission spectrography
MSC-1193 B66-10701 03
Quantitative determination of flavin nucleotide using the bacterial bioluminescent reaction
GSPC-10565 B69-10715 04

PANEL FLUTTER
Laser doppler flowmeter measures gas velocity
N-FS-1747 B66-10693 02
Aerodynamic forces of fluttering cylindrical and/or planar structures
N-FS-20497 B69-10781 02

PANELS
Portable display paneling has wide use, easy take down and assembly
ARC-17 B63-10435 05
Electronic assembly rack panels snap on and off
GSPC-59 B64-10121 05
Intrument adjustment knob locks to prevent accidental maladjustment
N-FS-190 B64-10249 05
Illuminated display panel is easily changed
MSC-108 B65-10003 05
Screening technique makes reliable bond at room temperature
N-FS-227 B65-10004 03

Flexible curtain shields equipment from intense heat fluxes
N-FS-48 865-10044 03
Transducer senses displacements of panels subjected to vibration
ARC-37 865-10085 01
Galvanic corrosion reduced in aluminum fabrications
N-FS-272 865-10140 03
Integral ribs formed in metal panels by cold-press extrusion
N-FS-230 865-10141 05
Expandable insert serves as screw anchor
MSC-301 866-10132 05
Concealed hinge permits flush mounting of doors and hatches
MSC-623 866-10336 03
Ultrasonic emission method enables testing of adhesive bonds
N-FS-799 866-10341 01

Verifiable machine mills, saws light materials
N-FS-627 866-10364 05
Impact and puncture resistant material protects parts from damage
MSC-747 866-10375 05
Nylon fila eliminates silk screening of equipment panels
MSC-798 864-10455 05
Optical monitor panel provides flexible test panel configurations
KSC-66-18 866-10494 01

Preformed stiffeners used to fabricate structural components for pressurized tanks
N-FS-1796 866-10688 05
Application of distorted models in developing scaled structural models
N-FS-2540 867-10321 05
Roll diffusion bonding of titanium alloy panels
N-FS-17473 868-10161 05
Simulated hailstone fabrication and use in testing weatherability of structures
NRO-10783 868-10552 03
Compound taper milling machine
KSC-15174 869-10018 05
Pressure-control purge panel for automatic butt welding
N-FS-18465 869-10403 05

PAPER CHROMATOGRAPHY
Electronic circuitry used to automate paper chromatography
JPL-840 867-10201 01

Mechanism continuously measures static and dynamic cable loads
MSC-217 866-10107 05
Expandable takeup reel facilitates paper tape removal
NGO-271 866-10399 05
Coded photographic proof paper could serve
One-dimensional Coulomb-damped wave motion in prismatic bars
(R-FS-14415) B68-10548 02

PARTIAL PRESSURE
Fuel cell serves as oxygen level detector
JPL-SC-072 B65-10066 01

New electrolyte may increase life of
polarographic oxygen sensors
MSC-1049 B67-10003 03

PARTICLE ACCELERATION
High-speed camera synchronization
R-FS-14062 B68-10282 02

PARTICLE ACCELERATOR TARGETS
Electron interaction in matter
R-FS-14086 B69-10674 02

PARTICLE ACCELERATORS
Cold cathode ionization gage has rigid metal
housing GSPC-445 B66-10041 01

Dust particle injector for hypervelocity
accelerators provides high charge-to-mass
ratio GSPC-509 B66-10347 01

Reducing bubbles in glass coatings improves
electrical breakdown strength
LEWIS-10278 B60-10214 03

Glass coated single grid for charged particle acceleration
LEWIS-10106 B68-10215 03

Advances in light-gas gun technology
R-FS-14270 B68-10288 05

On-line computer system for use with low-energy nuclear physics experiments is
reported ARG-10257 B69-10094 01

Spherical ion source
TRG-08098 B69-10186 01

PARTICLE BEAMS
Cooling method prolongs life of hot-wire
transducer LEWIS-41 B63-10344 02

PARTICLE DENSITY (CONCENTRATION)
Microparticle impact sensor measures energy
directly GSPC-252 B65-10048 01

Improved atmospheric particle analyzer
ERC-33 B67-10231 01

Mathematical relation predicts achievable
densities of compacted particles
ARG-10062 B67-10592 03

Beam profiles measured with
thermoluminescent dosimeters
ARG-10259 B69-10024 02

PARTICLE DIFFUSION
Computer program VARI-QUIR 3 provides
solution of steady-state, multigroup,
two-dimensional neutron diffusion equations
NUC-10052 B67-10345 06

PARTICLE EMISSION
Quantum mechanical calculations of reactive
scattering cross sections in bimolecular
encounters R-FS-13394 B67-10527 03

Graphite cloth facilitates vacuum
evaporation of silicon monoxide
R-FS-14764 B68-10256 03

PARTICLE ENERGY
Microparticle impact sensor measures energy
directly GSPC-252 B65-10048 01

PARTICLE INTERACTIONS
Electron interaction in matter
R-FS-14086 B69-10674 02

PARTICLE MASS
Microparticle impact sensor measures energy
directly GSPC-252 B65-10048 01

Dust particle injector for hypervelocity
accelerators provides high charge-to-mass
ratio GSPC-509 B66-10347 01

PARTICLE MOTION
Photographic method measures particle size
and velocity in fluid stream
R-FS-1536 B66-10668 01

An investigation of particle mixing in a
gas-fluidized bed
ARG-10782 B68-10407 05

Fluorescent photography of spray droplets
using a laser light source
LEWIS-10777 B69-10122 02

PARTICLE SIZE DISTRIBUTION
Protective coating withstands high temperature
in oxidizing atmosphere
R-FS-529 B66-10044 03

Submicron metal powders produced by ball
milling with grinding aids
LEWIS-188 B66-10221 03

Photographic method measures particle size
and velocity in fluid stream
R-FS-1536 B66-10668 01

Method accurately measures mean particle
diameters of monodisperse polystyrene
latexes ARG-207 B67-10054 02

Improved atmospheric particle analyzer
ERC-33 B67-10231 01

Characteristics of fluidized-packed beds
ARG-10049 B68-10270 03

Preparing rock powder specimens of
controlled size distribution
NPS-10007 B68-10297 05

Beam profiles measured with
thermoluminescent dosimeters
ARG-10259 B69-10024 02

Direct indication of particle size in
fluidized beds ARG-10130 B69-10083 05

Health hazards of ultrafine metal and metal
oxide powders LEWIS-10878 B69-10268 04

A new method for the determination of particulate contamination levels for
surface cleanliness of fluid systems
KSC-10267 B69-10520 02

Flow properties of suspensions rich in
colloids ARG-10481 B69-10622 02

Surface-renewal models for heat-transfer
between walls and fluidized beds
ARG-10372 B69-10772 02

PARTICLE THEORY
Experiments to investigate particulate
materials in reduced gravity fields
R-FS-13308 B67-10394 02

PARTICLE TRAJECTORIES
An investigation of particle mixing in a
PARTICLES

Probe samples components of rocket engine exhaust
ARS-10182
B68-10407 05

Cleanroom air sampler counts, categorizes, and records particle data
MS-PS-485
B65-10384 03

A piezo-bar pressure probe
LEWIS-393
B67-10259 01

Air sampler collects and protects minute particles
HQ-10037
B67-10661 01

Microprobe investigation of brittle segregation in aluminum HIC and TIG welds
MS-PS-14720
B68-10334 03

Effect of interparticle forces on the fluidization of fine particles
ARG-10264
B69-10195 03

Technique for pinpointing submicron particles in the electron microprobe
HQ-10043
B69-10465 01

A comparison of two methods of measuring particle size of Al2O3 produced by a small rocket motor
NPO-11198
B69-10572 03

PARTITIONS (MATHEMATICS)

Root-cubing and general root-powering methods for finding the zeros of polynomials
ARG-10444
B69-10424 02

PASIVNESS

Concept for passive system to control gas flow independently of temperature
MS-PS-982
B66-10343 05

Abraded cadmium-plated cable connectors repaired by conversion coating
MS-PS-1424
B67-10014 03

Radiation tolerant silicon nitride insulated gate field effect transistors
GSFC-10581
B69-10253 01

Storage of electric and magnetic energy in passive nonreciprocal networks
ARG-10360
B69-10630 01

PASTE

Improved electrode gives high-quality biological recordings
MSC-17
B64-10025 04

Improved conductive paste secures biomedical electrodes
MSC-107
B65-10015 03

Wire winding increases lifetime of oxide coated cathodes
LEWIS-154
B65-10032 03

Composite solar cell matrix is reliable, lightweight and flexible
NPO-10821
B67-10503 01

Improved fuel-cell-type hydrogen sensor
MS-PS-14656
B68-10263 01

Quick don-doff electrode pastes
NPO-13249
B69-10598 04

Analysis of secondary cells with lithium anodes and immobilized fused-salt electrolytes
ARG-10452
B69-10613 01

PATHOGENS

Development and test of flexible fill coupon strips for use as a sampling technique
MS-PS-20448
B69-10339 03

PATHOLOGY

Color-television medical microscopy
MSC-13086
B66-10318 01

PATIENTS

Buoyant stokes litter assembly used for sea rescue operations
MSC-131
B66-10019 05

Simulator effects partial gravity conditions
MSC-152
B66-10339 05

Automated patient monitoring system
NFS-14552
B69-10131 01

New electrical plethysmograph monitors cardiac output
MSC-11447
B68-10220 01

Electrocardiograph transmitted by RF and telephone lines in emergency situations
FRC-10031
B69-10233 01

Automatic patient respiration failure detection system with wireless transmission
ARC-10174
B68-10365 01

PATTERNS

Measuring coplanarity of surfaces
MSC-12044
B67-10371 02

Checking flat conductor cable spacing by means of a noise pattern
MS-PS-20426
B69-10456 05

Measurement technique for the determination of antenna directivity
MSC-12799
B69-10677 01

PAYLOADS

Speed-sensing device aids crane operators
WS-4
B64-10006 05

Computer program determines thermal environment and temperature history of lunar orbiting space vehicles
MSC-12916
B67-10307 06

System automatically provides dynamic launch decision criteria
MSC-13063
B67-10363 01

Earth orbit rendezvous evaluation program
MSC-13016
B67-10407 06

PEAKS

Monitoring system determines amplitude and time of vibration channel peaks
JPL-879
B66-10699 01

PEELBIB

Liquid-metal heat transfer in a cocurrent-flow, double-pipe heat exchanger is investigated
ARG-10261
B65-10091 02

PEDALS

Fingertip current control facilitates use of arc welding gun
MSC-289
B66-10092 05

PEELING

Peel resistance of adhesive bonds accurately measured
GSFC-320
B65-10173 03

Soluble undercoating facilitates removal of foamed-in-place insulation
LEWIS-193
B65-10344 03

Rotary-knife stripper facilitates removal

Preparing rock powder specimens of
controlled size distribution
NPO-10007
B66-10297 05

Adherent protective coatings plated on
magnesium-lithium alloy
M-FS-365
B65-10294 03

Reusable chelating resins concentrate,metal
ions from highly dilute solutions
JPL-758
B66-10451 03

Large volume continuous counterflow
dialyzer has high efficiency
SO-25
B67-10395 04

Hydrogen peroxide etching proves useful for
germanium
ABG-10170
B69-10454 03

Improved pH buffering agent for sodium
hypochlorite
MSC-15843
B69-10084 03

Primary radical yields in pulse irradiated
alkaline aqueous solution
ABG-10322
B69-10167 02

Improved nickel plating of Inconel X-750
M-FS-18604
B69-10463 05
SUBJECT INDEX

range acquisition plus time delay measurement
M-FS-14323 B68-10306 01

System converts optical phase changes to RF phase changes
M-FS-20091 B68-10430 01

Active frequency control system for argon PI laser
M-FS-14988 B69-10099 01

New passive telemetry system
EQ-10214 B69-10312 01

A theoretical study of radar backscatter from distributed targets with emphasis on polarization dependence
M-FS-13775 B69-10560 02

Long range holographic contour mapping concept
EQ-10350 B69-10700 02

PHASE BULK
The thermodynamic properties of the wustite phase are studied
ARG-10200 B68-10408 03

PHASE SHIFT
Computer circuit will fit on single silicon chip
JPL-513 B63-10514 01

Phase shift frequency synthesizer is efficient, small in size
M-FS-250 B65-10169 01

Magnetometer measures orthogonal components of magnetic fields
GSPC-395 B65-10315 01

Circuit operates as sine function generator
MPC-255 B66-10038 01

Multicolor stroboscope pinpoints resonances in vibrating components
JPL-0033 B66-10223 01

Linear signal noise summer accurately determines and controls S/N ratio
JPL-SC-152 B66-10433 01

Antenna simulator permits preinstallation system checkout
GSPC-522 B66-10510 01

Mechanical device accurately measures RF phase differences in VHF or UHF ranges
M-FS-1738 B66-10694 05

Means for improving apparent resolution of television
ERK-65 B67-10152 01

Improved circuit for measuring capacitive and inductive reactances
M-FS-13083 B67-10513 01

Method of reducing time base error in digital magnetic recorders
GSPC-10108 B68-10317 01

Amplifier improvement circuit
LEWIS-10712 B68-10456 01

Flow angle sensor and readout system
LEWIS-90298 B69-10050 01

Phase multiplying electronic scanning array
WPO-10302 B69-10381 01

A thirty-six element array antenna system
M-FS-20435 B69-10390 01

A compact rotary vane attenuator
WPO-10562 B69-10427 01

Energy-storage of a prescribed impedance

ARG-10430 B69-10306 01

Fast Fourier Transform Spectral Analysis Program
M-FS-15062 B69-10434 06

PCM synchronization by word stuffing
WPO-10688 B69-10695 01

PHASE SHIFT CIRCUITS
PCM magnetic tape system efficiently records and reproduces data
GSPC-375 B65-10311 01

Thermionic scanner pinpoints work function of emitter surfaces
JPL-SC-177 B66-10444 01

Electronic frequency discriminator
M-FS-2824 B67-10151 01

High power dc/dc and dc/ac electrical power conversion techniques developed
M-FS-13227 B67-10390 01

Dielectric prisms would improve performance of quasi-optical microwave components
RNC-10011 B67-10416 01

PHASE SHIFT KEYING
RF acquisition demodulator achieves automatic synchronization of a telemetry channel
JPL-612 B66-10271 01

Simple demodulator for telemetry phase-shift keyed subcarriers
WPO-11000 B69-10095 01

Improved phase-shift-keyed detector
M-FS-20064 B69-10101 01

PHASE TRANSFORMATIONS
CINDA - Chrysler Improved Numerical Differencing Analyzer computer program
M-FS-2298 B67-10278 06

Thick transducers used for generating short-duration stress pulses in thin specimens
ARG-10232 B69-10045 01

Laser interferometer micrometer system
M-FS-14747 B69-10633 02

PHASE VELOCITY
A positive taper traveling-wave tube
LANGLIT-10263 B69-10407 01

A sterilizable high-impact antenna
WPO-10231 B69-10697 01

PHENOC CIRCUITS
Insulation for cryogenic tanks has reduced thickness and weight
M-FS-326 B66-10183 02

Mill profiler machines soft materials accurately
M-FS-692 B66-10254 05

Improved method facilitates debulking and curing of phenolic impregnated asbestos
MSC-949 B66-10459 05

Flame sprayed dielectric coatings improve heat dissipation in electronic packaging
M-FS-15365 B67-10534 01

A method for observing gas evolution during plastic laminate cure
MSC-15592 B69-10530 03

PHENOLS
Composite bulkhead fabrication development
M-FS-1264 B66-10582 05

PHENOLS
Recent development in organic scintillators
ARG-10344 B69-10198 03
PHONOCARDIOGRAPHY

Phonocardiograph system monitors heart sounds
MSC-165 B66-10154 04

Phonocardiograph microphone is rugged and moistureproof
MSC-212 B66-10314 04

A phonocardiogram simulator
MSC-67-94 B67-10239 01

PHONY

Measurements of thermoelectric power in annealed and quenched gold-platinum alloys
ARC-10303 B69-10206 03

PHOSPHATES

Inorganic paint is durable, fireproof, easy to apply
GSPC-366 B65-10156 03

Dry film lubricant is effective at extreme loads
N-P-620 B66-10256 03

Purification and characterization of two fully deuterated enzymes
ARG-10314 B69-10207 04

PHOSPHOBUS COIPOUNDS

Impurity diffusion process for silicon semiconductors is fast and precise
GSFC-397 B65-10300 01

Sintering characteristics and properties of PZT and PZT are determined
ARG-10229 B69-10058 03

PHOSPHOBUS ISOTOPES

An improved nuclear magnetic resonance spectrometer
JPL-762 B67-10234 01

PHOTOCATHODES

Point-source light sensor circuit is insensitive to background light
JPL-778 B66-10502 01

Design concept for improved photo-scan tube
JPL-818 B67-10157 01

Electronic shutter gates image orthicon on and off
H-PS-628 B66-10256 03

Laser system generates single-frequency light
8-FS-2556 B61-10288 02

PHOTODETECTORS

Improved electro-optical tracking system
JPL-18791 B66-10311 01

A simple electrometer for measuring small photoelectric currents
JSP-10603 B69-10734 01

PHOTOCATACHROMES

Reparin insulublized with crosslinking agent
NPO-10834 B69-10299 03

PHOTOCHEMICAL REACTIONS

Compact cartridge drives coded tape at constant readout speed
JPL-472 B64-10222 01

Simple circuit positions film frames in projector
JPL-5P8 B67-10552 01

Instrument calibrates low gas-rate flowmeters
I-PS-477 B69-10569 01
Scanning photometer system automatically determines atmospheric layer height
MSc-245 B66-10170 01

Direction indicator system does not require complicated optics
Woo-305 B66-10407 01

Remote preamplifier circuit maintains stability over wide temperature range
Woo-278 B66-10432 01

Photoelectric scanning technique improves light source detector
Jpl-809 B66-10564 01

Point-source detection system rejects spatially extended radiation sources.
GSPC-486 B66-10622 01

Continuous microbial cultures maintained by electronically-controlled device.
ARG-177 B67-10556 04

High-speed camera synchronization
M-FS-18062 B68-10282 02

Telescope dome control system automatically tracks sun
MSC-10966 B68-10521 02

Remote balance weighs accurately amid high radiation
ARG-10387 B69-10242 05

Semiautomatic inspection of microfilm records
M-FS-20240 B69-10301 02

Use of both linear and logarithmic transfer functions to increase dynamic range of visual channel
GSFC-10675 B69-10037 01

The quantumy, an improved quantum detector
BRC-10148 B69-10443 01

A simple electrometer for measuring small photoelectric currents
GSPC-10609 B69-10734 01

High-speed camera synchronizes
I-FS-18062 B68-10282 02

Brushless dc motor has high efficiency, long life
GSFC-161 B66-10355 01

System enables more complete calibrations of dynamic-pressure transducers
M-FS-2063 B67-10099 01

Selective video blanking technique
M-FS-20013 B68-10436 01

Use of both linear and logarithmic transfer functions to increase dynamic range of visual channel
GSFC-10675 B69-10037 01

Optimizing solar-cell grid geometry
Eq-10417 B69-10460 01

Photoelectric scanner makes detailed work
Jpl-SC-176 B66-10036 01

Magnetometer measures orthogonal components of magnetic fields
GSFC-395 B65-10315 01

Photoelectric system continuously monitors liquid level
M-FS-417 B65-10382 01

Flowmeter measures low gas-flow rates
M-FS-215 B66-10036 01

Sensor detects hydrocarbon oil contaminants in fluid lines
M-FS-522 B66-10068 01
Determination of the absolute contours of optical flats
ARG-10352  B69-10209  05

Multichannel spectroscopy guide
BG-10641  B69-10550  01

Imaging procedure speeds camera copy layout
for offset printing
GSPC-497  B66-10373  02

Ultraviolet photographic pyrometer used in rocket exhaust analysis
M-PS-499  B66-10095  02

Small, high-intensity flasher permits continuous close-in photography
NU-0043  B66-10119  03

Optical device enables small detector to see large field of view
WOO-253  B66-10263  02

Automated drafting system uses computer techniques
M-PS-788  B66-10362  01

Simplified technique demonstrates magnetic domain switching
M-PS-13153  B67-10342  02

Aerial-image enables diagrams and animation to be inserted in motion pictures
ARG-165  B67-10398  02

Camera lens adapter magnifies image
M-PS-11955  B67-10431  02

Improvement in recording and reading holograms
ERC-10151  B68-10347  02

Rotary-knife stripper facilitates removal of X-ray film from pack
M-PS-14837  B68-10509  05

Camera mount for close-up stereo photographs
LANGLEY-10442  B69-10226  02

Improved camera for better X-ray powder photographs
BG-10424  B69-10537  01

Ultraviolet photographic pyrometer used in rocket exhaust analysis
M-PS-499  B66-10095  02

Camera lens adapter magnifies image
M-PS-11955  B67-10431  02

Improvement in recording and reading holograms
ERC-10151  B68-10347  02

Rotary-knife stripper facilitates removal of X-ray film from pack
M-PS-14837  B68-10509  05

Camera mount for close-up stereo photographs
LANGLEY-10442  B69-10226  02

Improved camera for better X-ray powder photographs
BG-10424  B69-10537  01

Modified developer increases line resolution in photosensitive resist
GSFC-386  B65-10377  02

Commercial film produces positive X-ray photo in ten seconds
M-PS-527  B66-10307  02

Dual photochemical replenisher system reduces chemical losses
KSC-67-111  B67-10485  02

Shortened processing time technique for color industrial radiography
ARG-10235  B69-10001  02

A concept for magazine batch processor
KSC-6786  B69-10275  02

Rotating filters permit wide range of optical pyrometry
LANGLEY-33  B65-10100  02

Means for improving apparent resolution of television
BRC-65  B67-10152  01

Shortened processing time technique for color industrial radiography
ARG-10235  B69-10001  02

Imprinting of confining sites for cell cultures on thermoplastic substrates
LANGLEY-10495  B69-10236  04

Illuminated display panel is easily changed
MSC-108  B65-10003  05

Modified contour projector makes excellent contour densitometer
LANGLEY-93  B65-10084  02

System selects frasing rate for spectrograph camera
LANGLEY-55  B65-10086  01

Magnets position X-ray film for weld inspection
M-PS-253  B65-10110  05

Simple circuit positions film frames in projector
JPL-508  B65-10132  02

Single projector accommodates slides of different size and format
GSFC-439  B66-10016  02

FORTRAN program flow chart is automatically produced
M-PS-269  B66-10052  01

Small, high-intensity flasher permits continuous close-in photography
NU-0043  B66-10119  03

Commercial film produces positive X-ray photo in ten seconds
M-PS-521  B66-10307  02

Inflatable holding fixture permits X-rays to be taken of inner weld areas
KSC-6786  B66-10327  03

Mylar film eliminates silk screening of equipment panels
MSC-798  B66-10455  05
SUBJECT INDEX

Gas pressure feeds film into camera at high speed
ARG-97 B66-10474 02

Polaroid film helps locate objects in inaccessible areas quickly
MSC-960 B67-10008 02

Means for improving apparent resolution of television
MSC-65 B67-10152 01

Electron beam welder X-rays its own welds
LEWIS-10111 B67-10216 02

Fresnel diffraction plates are simple and inexpensive
K-PS-12731 B67-10297 02

Areas of irregular, discontinuous patterns rapidly and accurately measured
GSPC-10184 B67-10674 01

Hydra 1 data display system
MSC-11594 B68-10155 01

X-ray film holder permits single continuous picture of tubing joint
LEWIS-10382 B68-10343 05

Rotary-knife stripper facilitates removal of X-ray film from pack
K-PS-18437 B68-10509 05

Shortened processing time technique for color industrial radiography
ARG-10235 B69-10001

Imprinting of confining sites for cell cultures on thermoplastic substrates
LANGLEY-10495 B69-10236 04

A concept for magazine Bimat processor
MSC-06786 B69-10275 02

Electrooptical scanning of film HPS-11106 B69-10568 01

PHOTOGRAPHIC MEASUREMENT

Photographic method measures particle size and velocity in fluid stream
K-PS-1536 B66-10668 01

Slide rule-type color chart predicts reproduced photo tones
MSC-1227 B66-10680 01

PHOTOGRAPHIC PROCESSING

Commercial film produces positive X-ray photo in ten seconds
K-PS-521 B66-10307 02

PHOTOGRAPHIC PROCESSING EQUIPMENT

Dual photochemical replenisher system reduces chemical losses
KSC-67-111 B67-10485 02

PHOTOGRAPHIC RECORDING

Numerical data frame readout system used in testing telemetry systems
GSPC-551 B67-10175 01

Measuring coplanarity of surfaces
MSC-12044 B67-10371 02

High-speed camera synchronisation
K-PS-18062 B68-10282 02

Microscopes and computers combined for analysis of chromosomes
ARG-10256 B69-10088 04

Electrooptical scanning of film MPO-11106 B69-10568 01

PHOTOGRAPHS

Built-in templates speed up process for making accurate models
LANGLEY-23 B63-10526 05

Indicator system provides complete data of engine cylinder pressure variation
LEWIS-291 B66-10470 05

VICAR-DIGITAL image processing system
NPO-10770 B69-10139 06

Stereo TV enhancement study

Discrimination of fish oil and mineral oil slicks on sea water
NO-10412 B69-10673 01

PHOTOGRAPHY

Electromechanically operated camera shutter provides uniform exposure
JPL-357 B63-10227 01

Camera shutter is actuated by electric signal
ARC-20 B63-10560 05

Front and back printed circuit layouts presented on single sheet
GSPC-93 B65-10596 01

Magnets position X-ray film for weld inspection
K-PS-253 B65-10110 05

Beam splitter used in dual filming technique
K-PS-501 B66-10072 02

Commercial film produces positive X-ray photo in ten seconds
K-PS-521 B66-10307 02

Inflatable holding fixture permits X-rays to be taken of inner weld areas
K-PS-856 B66-10327 03

Dot patterns provide reproducible flaw areas for study of adhesive bonds
K-PS-862 B66-10367 05

Exposure Value /EV/ system expanded to include filter factors and transmission
LANGLEY-190 B66-10602 02

Rocket engine vibration accurately measured by photography
K-PS-1916 B66-10652 02

Digital computer processing of X-ray photos JPL-792 B67-10005 04

Fatigue zones in metals identified by polarized light photography
WDO-286 B67-10082 02

Improved television signal processing system
NPO-10140 B67-10246 01

Computer program for Video Data Processing System /VSU/ NPO-10042 B67-10630 06

Photographic and drafting techniques simplify method of producing engineering drawings
MSC-716 B68-10126 02

Fluorescent particles enable visualization of gas flow
K-PS-18583 B68-10259 02

X-ray film holder permits single continuous picture of tubing joint
LEWIS-10382 B68-10343 05

An investigation of particle mixing in a gas-fluidized bed
ARG-10182 B68-10407 05

Rapid-response, light-exposure control system
NPO-10238 B68-10502 01

Fluorescent photography of spray droplets

I-477
using a laser light source
LEWIS-10777
A prototype high power portable lamp
I-FS-20229
Multipurpose binocular scanning apparatus
NPO-11002
Technique for pinpointing submicron particles in the electron microscope
HQ-10043
Automatic sample rotator for metallographic polishing
NPO-11015
Laser measuring system accurately locates point coordinates on photograph
ABG-74
Ion chambers simplify absolute intensity measurements in the vacuum ultraviolet
ARC-10
An improved soft X-ray photoionization detector
GSFC-540
Electronic gating circuit and ultraviolet laser excitation permit improved dosimeter sensitivity
ABG-10109
Production of crystalline polymers via liquid crystal monomers
HQ-10235
New method used to fabricate gallium arsenide photovoltaic device
WOO-062
Electromechanical flowmeter accurately monitors fluid flow
GSFC-357
Sensor detects hydrocarbon oil contaminants in fluid lines
I-FS-522
Scanning photometer system automatically determines atmospheric layer height
MSC-245
Optical device enables small detector to see large field of view
WOO-253
Solvent residue content measured by light scattering technique
I-FS-850
Uniform reflective films deposited on large surfaces
GSFC-507
Preregulator feedback circuit utilizes Light Actuated Switch
I-FS-1180
Photocell shadowing technique improves light source detector
JPL-809
Sensors measure surface ablation rate of reentry vehicle heat shield
LANGLEY-267
Blackbody cavity radiometer has rapid response
JPL-521
Local measurements in turbulent flows through cross correlation of optical signals
LBWIS-10128

SUBJECT INDEX

Stereo photomacrography system
LANGLEY-10176
UT detector monitors organic contamination of optical surfaces
I-FS-20284
Rocket ozone measurements of ozone in the upper atmosphere
GSFC-10580
Active frequency control system for argon laser
I-FS-14988
Ring laser angle encoder
MSC-13059
PTFE-aluminum films serve as neutral density filters
LANGLEY-189
Special purpose reflectometer uses modified Ulbricht sphere
MSC-1135
VICAR-DIGITAL image processing system
NPO-10770
Zone purification of potassium chloride
ARG-10377
Instrumentation for nondestructive testing of composite honeycomb materials
I-FS-20405
Quantitative determination of flavin nucleotide using the bacterial bioluminescent reaction
GSFC-10565
Inspection of fine wires simplified by capillary tube wire holder
MSC-358
Method accurately measures mean particle diameters of monodisperse polystyrene latexes
ARG-207
Stereo photomacrography system
LANGLEY-10176
One hundred angstrom niobium wire
LEWIS-10128
Variable light source with a million-to-one intensity ratio
JPL-WOO-008
System selects framing rate for spectrograph camera
LANGLEY-55
Multiaxial analyzer detects low-energy electrons
GSFC-329
Instrument accurately measures extremely low air densities
I-FS-193
Communication system uses modulated laser beam
GSFC-377
Plastic scintillator converts standard photomultiplier to ultraviolet range
SRC-9
Improved design provides faster response time in photomultiplier
GSFC-451
Laser measuring system accurately locates point coordinates on photograph

  - N-PS-14691

**PHOTOVOLTAIC EFFECT**

- Photovoltaic effect in organic polymer-iodine complex
  - RPO-10373

- Method for copper staining of germanium crystals
  - ARG-10403

- Optimizing solar-cell grid geometry
  - HQ-10417

**PHYSICAL CHEMISTRY**

- Apparatus presents visual display of semiconductor surface characteristics
  - JPL-665

- Production of solvated electrons
  - ARG-10416

**PHYSICAL EXERCISE**

- Improved electrode gives high-quality biological recordings
  - MSC-17

- Spray-on electrodes enable EKG monitoring of physically active subjects
  - FBC-36

**PHYSICAL FACTORS**

- Special tool kit aids heavily garmented workers
  - MSC-763

- Study of hydrogen slush-hydrogen gel utilization
  - N-PS-13068

- Photocarotinology
  - N-PS-14556

**PHYSICAL FITNESS**

- Simulator effects partial gravity conditions
  - MSC-152

**PHYSICAL PROPERTIES**

- Substituted silane-diol polymers have improved thermal stability
  - N-PS-469

- Silazane elastomer remains resilient at 400 deg C
  - N-PS-1144

- Materials data handbooks prepared for aluminum alloys 2014, 2219, and 5456, and stainless steel alloy 301

**SUBJECT INDEX**

- N-PS-1959
  - B67-10089

- Analytical technique characterizes all trace contaminants in water
  - MSC-11032
  - B67-10243

- Fluid properties handbook
  - N-PS-13462
  - B67-10040

- Hastelloy X properties, data, and metallurgical characteristics
  - NMC-10302
  - B68-10023

- Materials data handbook, aluminum alloy 6061
  - N-PS-20381
  - B69-10065

**PHYSICS**

- Review of physics, instrumentation and dosimetry of radioactive isotopes
  - ARG-10037

- Structure of the isotopic transport operators in three independent space variables
  - ARG-10448

- Subsalisate biotelemetry unit permits remote physiological investigations
  - ARC-39

- Electronic device simulates respiration rate and depth
  - MSC-89

- Hand-held instrument should relieve hemostasis pressure
  - MSC-599

- Study of radiation effects on mammalian cells in vitro
  - ARG-10191

- Rate of heat extraction controller for environmental control
  - HQ-10318

- Simulator effects partial gravity conditions
  - ISC-152

- Computer circuit calculates cardiac output
  - HQ-10123

- Improved perceptual-motor performance measurement system
  - HQ-10385

- Epoxy-coated containers easily opened by wire band

**PHYSIOLOGICAL EFFECTS**

- Subsalisate biotelemetry unit permits remote physiological investigations
  - ARC-39

- Electronic device simulates respiration rate and depth
  - MSC-89

- Hand-held instrument should relieve hemostasis pressure
  - MSC-599

- Study of radiation effects on mammalian cells in vitro
  - ARG-10191

- Rate of heat extraction controller for environmental control
  - HQ-10318

**PHYSIOLOGICAL FACTORS**

- A phonocardiogram simulator
  - KSC-67-94

**PHYSIOLOGICAL RESPONSES**

- Infrared viewing permits human iris response studies
  - FBC-36

**PHYSIOLOGICAL TESTS**

- Cardiographometer with linear beat-to-beat frequency response
  - ARG-10033

- Improved perceptual-motor performance measurement system
  - HQ-10123

- Biomedical bulk data processing program
  - FBC-10015

**PHYSIOLOGY**

- Test monkeys anesthetized by routine procedure
  - HQ-18

- Computer circuit calculates cardiac output
  - MSC-274

- Automated patient monitoring system
  - N-PS-14552

- New passive telemetry system
  - HQ-1021a

**PIERCING**

- Extendable mast used in one shot soil penetrometer
  - JPL-685

- Epoxy-coated containers easily opened by wire band
PIEZOELASTIC CRYSTALS
Improved holder protects crystal during high acceleration and impact
JPL-463 B65-10037 05
Piezoresistive gage tests pin-connector sockets
JPL-675 B65-10128 01
Crystal measures short-term, large-magnitude forces
JPL-77 B65-10187 01
Voltage variable oscillator has high phase stability
LANGLEY-123 B65-10204 01
Communication system uses modulated laser beam
GSFC-377 B65-10333 01
Phonocardiograph system monitors heart sounds
MSC-185 B66-10154 04
Acceleration-compensated pressure transducer has fast response
LANGLEY-113 B66-10353 01

PIEZOELECTRIC GAGES
A piezo-bar pressure probe
LMIS-393 B67-10259 01
Fluidic-thermochromic display device
ERC-10031 B68-10350 01
Gage measures total radiation, including vacuum UV, from ionized high-temperature gases
XRF-0902 B69-10028 02
Piezoelectric linear actuator
MSC-13194 B69-10469 02

PIEZOELECTRIC TRANSDUCERS
A piezo-bar pressure probe
LMIS-393 B67-10259 01
Device calibrates vibration transducer at amplitudes up to 20 g
K-PS-86 B63-10572 01
Ultra-sensitive transducer advances micro-measurement range
ARC-26 B64-10004 01
Damping technique gives accelerometer flat frequency response
K-PS-471 B66-10293 01
Phonocardiograph microphone is rugged and moistureproof
MSC-212 B66-10314 04
Ultrasonic emission method enables testing of adhesive bonds
K-PS-799 B66-10341 01
Method permits mechanical and electrical checkout of piezoelectric transducers while installed in a system
ARC-73 B66-10533 01
High-energy-rate magneto-hydraulic metal forming system
K-PS-2142 B67-10126 02
Design concepts using ring lasers for frequency stabilization
K-PS-2648 B67-10143 01
Automatic system nondestructively monitors and records fatigue crack growth
LANGLEY-10091 B68-10379 01

PIEZOELECTRICITY
Simple device produces accelerometer calibration pulse
K-PS-363 B65-10269 01
A conceptual design for squeeze film bearings
K-PS-573 B66-10226 05
Miniature piezoelectric triaxial accelerometer measures cranial accelerations
ARC-71 B66-10534 01
Improved gas ring laser
MSC-11584 B68-10304 02
Power consumption in acoustic amplifiers under conditions of maximum stable gain
GSFC-10067 B67-10551 04
A laboratory method for precisely determining the micro-volume-magnitudes of liquid efflux
ARC-10052 B69-10295 05

PIEZORESISTIVES
Piezoresistive gage tests pin-connector sockets
JPL-675 B65-10128 01

PIEZORESISTIVE TRANSDUCERS
Pressure transducer 3/8-inch in size can be faired into surface
WO-0065 B64-10021 05
Miniature stress transducer has directional capability
JPL-591 B65-10203 01
Gas pressure in sealed electrochemical cells measured externally
GSFC-10004 B67-10551 03
Pressure-sensitive bonded junction transducers
ERC-10087 B68-10563 01

PIGLEYBACK SYSTEMS
Concept to standardize space vehicle piggyback experiment modules
K-PS-1697 B68-10038 05

PIGMENTS
Inorganic paint is durable, fireproof, easy to apply
GSFC-366 B65-10156 03
Pigmented coating resists thermal shock
JPL-3C-083 B65-10354 03
White primer permits a corrosion-resistant coating of minimum weight
K-PS-304 B66-10207 03
Film coating permits low-force scrib ing
MSC-990 B66-10609 03
Cytology is advanced by studying effects of deuterium environment
ARC-205 B67-10304 04
Advances in aluminum anodizing
K-PS-14600 B69-10144 05
Comparative chromatography of chloroplast

SUBJECT INDEX

KSC-10050 B67-10200 05
Pipe joints reinforced in place with fitted aluminum sleeves
MSC-11109 B67-10271 05
Square tubing reduces cost of telescoping bridge crane hoist
ARG-13 B67-10293 05
Liquid oxygen dicting cleaned by falling film method
M-FS-11816 B67-10299 03
Jacketed cryogenic piping is stress relieved
M-FS-985 B67-10308 05
Ultrasonic wrench produces leaktight connections
KSC-10092 B67-10353 05
Extrusion of small-diameter, thin-wall tungsten tubing
LEWIS-90335 B67-10355 05
Transducer measures embedment stresses in electronic modules
M-FS-13486 B67-10367 01
Use of color-coded sleeve shutters accelerates oscillograph channel selection
KSC-10092 B67-10362 01
Large volume continuous counterflow dialyzer has high efficiency
BO-10055 B67-10395 04
Standard surface grinder for precision machining of thin-wall tubing
ARG-10014 B67-10400 05
Metal tube reducer is inexpensive and simple to operate
ARG-45 B67-10401 05
Improved sample capsule for determination of oxygen in hemolyzed blood
M-FS-11017 B67-10408 04
Fluid behavioral patterns found in subscale geysering study
M-FS-13582 B67-10462 02
Aluminum and stainless steel tubes joined by simple ring and welding process
M-FS-15120 B67-10472 05
Study made of thin-walled pipe response to turbulent fluids
M-FS-15324 B67-10518 05
Double copper sheath multiconductor instrumentation cable is durable and easily installed in high thermal or nuclear radiation area
KSC-10097 B67-10538 01
Plastic shoe facilitates ultrasonic inspection of thin wall metal tubing
WUC-10010 B67-10542 02
Study made of heat transfer and pressure drop through tubes with internal interrupted fins
LEWIS-10280 B67-10555 05
Lamb waves increase sensitivity in nondestructive testing
ARG-10009 B67-10605 02
Thoriated tungsten tube provides improved high temperature thermocouple sheath
KSC-10745 B67-10627 03
Flow tube used to cool solar-pumped laser
MSC-11109 B67-10010 02

PIPEGES (TUBES) CONT

Heat-shrink plastic tubing seals joints in glass tubing
LEWIS-10329 B68-10040 05
Remotely installed pipe plug provides effective seal in hazardous environment
KSC-10203 B68-10053 05
Method for reinforcing tubing joints
MSC-11108 B68-10115 05
System remotely inserts, measures, and records internal irregularities in piping
M-FS-14545 B68-10149 01
Tube swaging device uses explosive force
LANGLEY-10092 B68-10235 05
Tensile testing grips ensure uniform loading of bimetal tubing specimens
LEWIS-10267 B68-10248 05
One hundred angstrom niobium wire
LEWIS-10128 B68-10279 03
Fabrication techniques developed for small-diameter, thin-wall tungsten and tungsten alloy tubing
ARG-10100 B68-10284 05
Electron beam selectively seals porous metal filters
LEWIS-10162 B68-10331 05
X-ray film holder permits single continuous picture of tubing joint

K-FS-224 B69-10039 05

Improved fluid control valve extends diaphragm life 
JPL-345 B69-10147 05

Device disconnects several couplings simultaneously 
JPL-226 B69-10163 05

Inexpensive check valve is installed in standard BN fittings 
JPL-22A B69-10222 05

Shock absorber operates over wide range 
MSC-168 B69-10241 05

Respiratory transfer valve has fail-safe feature 
ABC-1 B69-10369 01

Tensile-strength apparatus applies high strain-rate loading with minimum shock 
JPL-28 B69-10063 05

Tool post modification allows easy turret lathe cutting-tool alignment 
K-FS-581 B69-10191 05

Quick-closing valve is actuated by explosive discharge 
ABC-55 B69-10233 03

Labyrinth-type valve seat increases valve life by decreasing fluid velocity 
N-FS-1051 B69-10428 05

Device accurately measures and records low gas-flow rates 
N-FS-1077 B69-10569 01

Positive displacement cylinder measures corrosive liquid volume 
MSC-1038 B69-10589 05

Design concept for pressure switch calibrator 
EQ-36 B69-10598 01

Friction brake cushions acceleration and vibration loads 
MSC-715 B69-10608 05

Check valve installation in pilot operated relief valve prevents reverse pressurization 
N-FS-1925 B69-10655 05

Negative feedback system reduces pump oscillations 
N-FS-1852 B69-10664 05

Device enables calibration of microphones at high sound pressure levels 
N-FS-11980 B69-10336 01

Metal tube reducer is inexpensive and simple to operate 
ABC-89 B69-10401 05

Fluorocarbon seal replaces metal piston ring in low density gas environment 
LEWIS-10277 B69-10591 05

Pneumatic pressure wave generator provides economical, simple testing of pressure transducers 
NRC-10024 B69-10664 05

Conventional dead weight device to provide pressure calibration 
N-FS-14672 B69-10264 01

Two-axis winch installer for heavy ducts in confined space 
K-FS-18224 B69-10062 05

Quick-acting backup tool for welding ducts 
K-FS-18404 B69-10396 05

Calibratable solid-state pressure switch 
K-FS-20474 B69-10437 05

Integral valve provides automatic relief and remote venting 
K-FS-12134 B69-10545 05
SUBJECT INDEX

Liquid-metal-piston MHD generator
ABG-10500 B69-10771 02

FITCH
A positive taper traveling-wave tube
LANGLSY-10263 B69-10407 01
Pocket-sized tone-modulated FM transmitter
MFO-11180 B69-10725 01

I-493
In the field of predicting surface heating rates and pressures resulting from hot exhaust gases, a computer program was used to calculate characteristics for free-jet investigation. This program is known as LABGLBZ-10117. The prediction of thermal radiation from a rocket's exhaust plume is another area of interest. A life detection system, denoted as KFO-10510, was mentioned as well.

Regarding pneumatics, a one-shot valve may be remotely actuated. A high-speed pulse camera, marked as MSC-11353, was noted. An improved retort for cleaning metal powders with hydrogen was described. A neutron irradiation of Am-241 effectively produces curium, as indicated by ARG-10030. Magnesium-zinc reduction is effective in the preparation of metals, as per ARG-10050. Daughter growth in freshly separated Ra-226, Ac-227 and U-232 was discussed. Thick transducers used for generating short-duration stress pulses in thin specimens are mentioned, with ARG-10232.

Gamma radiation characteristics of plutonium dioxide fuel were analyzed. In the realm of pneumatic equipment, pneumatic power is transmitted through an air bearing. Electropneumatic rheostat regulates high current. ECONOMIC AND MAINTENANCE-FREE GAS SYSTEM OPERATES RAILROAD SWITCHES was noted. Critical parts are stored and shipped in environmentally controlled reusable containers. Pneumatic separator gives quick release to heavy loads. An automatic protective vent has a fail-safe feature. Fluid logic control circuit operates nutator actuator motor. Pneumatic wrench retains or discharges nuts or bolts as desired. Orbital tube flaring system produces tubing connectors with zero leakage. A pneumatic high pressure piping system was described. A pneumatic high pressure piping system produces biaxial stresses in cylinders. A study made of pneumatic high pressure piping materials at 10,000 psi was detailed. Analysis of dynamic systems with DAPAN computer program was discussed. Air sampler collects and protects minute particles. Reconnect mechanism was mentioned. Pneumatic raft automatically reforms after rupture of buoyant member. High- and low-pressure pneumotachometers were also listed.
measure respiration rates accurately in adverse environments

Portable, high intensity isotopic neutron source provides increased experimental accuracy

Indium adhesion provides quantitative measure of surface cleanliness

Fluidic-thermochromic display device

Two-axis winch installer for heavy ducts in confined space

Pneumatic analog-to-pulse frequency converter

Two-step rocket engine bipropellant valve concept

Stress-testing of the throat of a rocket nozzle

Quick-acting backup tool for welding ducts

Pneumatic flow comparator

Improved solenoid valve design

Pneumatic pressure wave generator provides economical, simple testing of pressure transducers

Diffusion of trace gases for leak detection - A study

Review of research and development in fluid logic elements M-FS-420 B67-10438 01

POLYIMIDES

Polyimide manipulator AP-168 MSC-1231 B67-10103 01

Computer program provides linear sampled-data analysis for high order systems M-FS-12821 B67-10287 06

Algebraic Monte Carlo procedure reduces statistical analysis time and cost factors M-FS-1687 B67-10434 01

General frequency response program calculates frequency response of systems, open at any specified element M-FS-12817 B67-10521 06

Simultaneous message framing and error detection MSC-12001 B68-10330 01

Prediction of thermal radiation from a rocket's exhaust plane M-FS-20414 B69-10371 02

Root-cubing and general root-powering methods for finding the zeros of polynomials ABC-10444 B69-10428 02

Method reduces computer time for smoothing functions and derivatives through ninth order polynomials WUC-10334 B69-10524 06

POLYIMIDE ETHER Substituted silane-diol polymers have improved thermal stability M-FS-469 B66-10259 03

High-temperature bearing lubricants LNH-10408 B68-10249 05

POLYBUTYL ETHER Surfactant for dye-penetrant inspection is insensitive to liquid oxygen M-FS-475 B66-10131 03

POLYACRYLATE Folded stick module NPO-10854 B69-10496 01

POLYSTYRENE

Small foamed polystyrene shield protects low-frequency microphones from wind noise M-FS-123 B63-10579 01

Cryogenic waveguide window is sealed with plastic foam JPL-559 B63-10613 01

Wide-aperture solar energy collector is light in weight JPL-SC-055 B65-10046 02

Argon purge gas cooled by chill box M-FS-560 B66-10153 02

Method accurately measures mean particle diameters of monodisperse polystyrene latexes ABC-207 B67-10054 02

Polyethylene cryostat facilitates testing tensile specimens under liquid nitrogen WUC-10522 B67-10613 02

Test system accurately determines tensile properties of irradiated metals at cryogenic temperatures WUC-10521 B67-10617 02

Fast-response cup anemometer features cosine response ARG-90193 B68-10202 01

Low-loss C-band parasitic probe KSC-09348 B69-10251 01

POLYACRYLATE Metals plated on fluorocarbon polymers JPL-544 B63-10612 03

POLYIMIDES

Simple transducer measures low heat-transfer rates JFL-866 B64-10122 01

PTFE-aluminum films serve as neutral density filters LANGLE 189 B66-10017 02

Polytetrafluoroethylene lubricates ball bearings in vacuum environment M-FS-379 B66-10081 03

I-499
POLYURETHANE FOAM

Capacitive system detects and locates fluid leaks
M-FS-478 B66-10099 01

Improved rolling element bearings provide low torque and small temperature rise in ultrahigh vacuum environment
LEWIS-359 B66-10676 05

Feed-through connector couples RF power into vacuum chamber
NO-0096 B67-10027 01

Improved sample capsule for determination of oxygen in hemolyzed blood
MSC-11677 B67-10408 04

Dynamic valve seal is reliable at cryogenic temperatures
M-FS-12967 B67-10526 05

Bearings use dry self-lubricating cage materials
LEWIS-10432 B68-10165 05

Teflon-packed flexible joint
LEWIS-50252 B69-10049 03

Fractography can be used to analyze failure modes in polytetrafluoroethylene
M-FS-20294 B69-10066 03

Refractory-metal compound impregnation of polytetrafluoroethylene
LEWIS-10733 B69-10072 03

Design and testing of liquid hydrogen-cooled, ultrahigh-speed ball bearings
M-FS-18453 B69-10178 05

Self-lubricating gear
M-FS-14971 B67-10408 05

Improved inorganic ion exchange membranes
LEWIS-10737 B69-10451 03

POLYURETHANE FOAM

Storage-stable foamable polyurethane is activated by heat
LANGLEY-187 B66-10111 03

Special tool kit aids heavily garmented workers
MSC-163 B66-10403 05

Process produces chlorinated aromatic isocyanates in high yield
M-FS-1658 B66-10646 03

Synthesis of various highly halogenated monomers and polymers
M-FS-2143 B67-10100 03

Locating and sealing air leaks in multiloosed buildings
MSC-10304 B68-10024 05

Fire retardant foams developed to suppress fuel fires
ARC-10098 B68-10350 03

Fiber glass prevents cracking of polyurethane foam insulation on cryogenic vessels
M-FS-20058 B68-10846 05

An improved method for electrical cable terminations
WFC-10694 B69-10327 01

Improved fire resistant radio frequency anechoic materials
M-FS-16600 B69-10550 05

A new method for fabrication of flexible vacuum purge jackets
M-FS-12646 B69-10564 03

Thermal conductivity probe

SUBJECT INDEX

M-FS-20566 B69-10780 03

POLYURETHANE RESINS

Insulation for cryogenic tanks has reduced thickness and weight
M-FS-326 B66-10183 02

Critical parts are stored and shipped in environmentally controlled reusable container
M-FS-703 B66-10258 05

 Phonocardiograph microphone is rugged and moistureproof
MSC-212 B66-10314 04

Strippable grid facilitates removal of grid-surfaced conical workpiece from die
M-FS-716 B66-10334 01

Nonwoven glass fiber mat reinforces polyurethane adhesive
M-FS-2309 B67-10113 03

Vibration damping composition has flush-away feature
M-FS-597 B67-10432 03

Solvent permits solid curing agents to be used at room temperatures
M-FS-13434 B67-10593 03

Compressible sleeve provides automatic centering for grinding or turning of cylinders
SAN-10021 B66-10318 05

Improved primer for bonding polyurethane adhesives to metals
M-FS-90591 B69-10540 03

Synthesis of polyethers of hexafluorobenzene and hexafluoropentanediol
M-FS-18962 B69-10636 03

POLYVINYL ALCOHOL

Sea dye marker provides visibility for 20 hours
MSC-714 B66-10313 03

POLYVINYL CHLORIDE

Emergency solar still desalts seawater
MSC-135 B65-10214 03

Primary cells utilize halogen-organic charge transfer complex
JPL-926 B66-10682 02

PODANS

Imprinting of confining sites for cell cultures on thermoplastic substrates
LANGLEY-10495 B66-10236 04

POPULATION INVERSION

Rectangular-bore, high-gain laser plasma tube
HQ-10234 B66-10193 02

POPULATIONS

Computer program reduces calculation time of normal response functions
M-FS-1517 B67-10108 01

POROSITY

Apparatus facilitates pressure-testing of metal tubing
LEWIS-174 B65-10131 05

Organic reactants rapidly produce plastic foam
LANGLEY-37 B65-10280 03

Reaction heat used in static water removal from fuel cells
M-FS-532 B66-10013 01

Vapor diffusion electrode improves fuel cell operation
LEWIS-187 B66-10281 03

Valve seat pores sealed with thermostable

I-500
SUBJECT INDEX

Method for controlling density and permeability of sintered powdered metals LEWIS-10393 B68-10528 03
Mass transport mechanism in porous fuel cell electrodes HG-10343 B69-10135 01

POROUS BOUNDARY LAYER CONTROL
Improved high-temperature silicide coatings LEWIS-10817 B69-10266 03

POROUS MATERIALS
Porous glass makes effective substrate for ozone-sensing reagent GSFC-388 B65-10368 03
Unique gear design provides self-lubrication JPL-5C-079 B65-10366 03
Electron beam seals outer surfaces of porous bodies M-PS-962 B66-10033 03
Process reduces pore diameters to produce superior filters WO-0093 B66-10037 03
Combustion chamber struts can be effectively transpiration cooled M-PS-1830 B66-10643 03
Composites of porous metal and solid lubricants increase bearing life LEWIS-307 B67-10007 03
Porous mandrels provide uniform deformation in hydrostatic powder metallurgy M-PS-1972 B67-10209 03
Fuel cell life improved by metallic sinter activation after electrode assembly welding MSC-10965 B67-10436 03
Electron beam selectively seals porous metal filters LEWIS-10162 B68-10331 05
Hydrostatic testing of porous assemblies M-PS-18298 B68-10439 05

POROUS PLATES
Modular Porous Plate Sublimator /BEPS/ requires only water supply for coolant M-PS-1074 B66-10409 01

PORTABLE EQUIPMENT
Portable flooring protects finished surfaces, is easily moved M-PS-15 B63-10387 05
Portable display paneling has wide use, easy take down and assembly ARC-17 B63-10435 05
Device calibrates vibration transducer at amplitudes up to 20 g M-PS-86 B63-10572 01
Continuity tester screens out faulty socket connections JFL-596 B64-10065 01
Welding procedures improves quality of welds, offers other advantages M-PS-32 B64-10309 01
Portable tool removes burrs from pipe and tubing MSC-237 B65-10360 05
Portable tool cleans pipes and tubing MSC-238 B65-10375 05
Improved tool easily removes brazed tube connectors MSC-263 B66-10003 05
Portable self-powered device detects internal flaws in tubular structures WD-0019 B66-10028 01
Seismometer designed for remote operation in random orientation JFL-320 B66-10085 01
Pipe cutting tool is useful in limited space MSC-36 B66-10102 05
Mount makes liquid nitrogen-cooled gamma ray detector portable LEWIS-259 B66-10103 01
Chart case opens to form briefing easel MSC-349 B66-10135 05
Portable power tool machines weld joints in field M-PS-258 B66-10145 05
Extensible mast used in one shot soil penetrometer JFL-685 B66-10146 05
Dispenser leak-tests and sterilizes rubber gloves MSC-285 B66-10166 03
Ultrasonic recording scanner used for nondestructive weld inspection M-PS-284 B66-10220 01
Hand tool permits shrink sizing of assembled tubing MSC-504 B66-10239 05
Portable sandblaster cleans small areas MSC-523 B66-10242 05
Ultrasonic hand tool allows convenient scanning of spot welds M-PS-539 B66-10289 02

I-501
PORTABLE LIFE SUPPORT SYSTEMS

Portable lightweight cell provides controlled environment
MSC-648 B66-10370 05

Analog solar system model relates celestial bodies spatially
JPL-195 B66-10413 01

Automatic cryogenic liquid level controller is safe for use near combustible substances
LWIS-195 B66-10482 01

Apparatus enables automatic microanalysis of body fluids
JPL-962 B66-10515 04

Gage tests tube flares quickly and accurately
KSC-66-19 B66-10537 05

Polaroid film helps locate objects in inaccessible areas quickly
ISC-960 B67-10008 02

Portable detector set discloses helium leak rates
N-PS-1733 B67-10065 01

Portable fixture facilitates pressure testing of instrumentation fittings
N-PS-2032 B67-10121 03

Tester automatically checks insulation of individual conductors in multiple-strand cables
NUC-10068 B67-10260 01

Automated tester permits precise calibration of pressure transducers from 0 to 7050 psi
NUC-10067 B67-10263 01

Portable machine welding head automatically controls arc
N-PS-12763 B67-10272 05

Variable-speed, portable routing skate
N-PS-13772 B67-10525 05

Radiant heat source, vacuum bag, provide portable bonding oven
MSC-11342 B67-10570 03

Surface irregularities detected by flare inspection instrument
N-PS-20157 B69-10152 01

A prototype high power portable lamp
N-PS-20229 B69-10189 02

J-beveling of pipe ends with a hand-held tool
KSC-10356 B69-10229 05

Magnetoactive forming for precision sizing and joining of large-diameter tubes
N-PS-20481 B69-10422 05

Ion mass spectrometer for special uses
HQ-10418 B69-10510 02

Seismographic recording of large rocket engine operation
N-PS-20545 B69-10756 01

PORTABLE LIFE SUPPORT SYSTEMS

Improved chlorate candle provides concentrated oxygen source
MSC-1137 B67-10095 03

PORTS (OPENINGS)

Multiple port pressure scanner valve features greater accuracy, quicker data
JPL-255 B64-10031 05

Threaded pilot insures cutting tool alignment
N-PS-527 B66-10074 05

Flow ring valve is simple, quick-acting

SUBJECT INDEX

N-PS-752 B66-10255 05

Fluid logic control circuit operates nutator actuator motor
LWIS-294 B66-10593 05

Tool samples subsurface soil free of surface contaminants
MSC-10988 B67-10473 05

POSITION (LOCATION)
System locates randomly placed remote objects
LANGLEY-209 B66-10315 01

Integrated mobility measurement and notation system
MSC-726 B67-10114 04

Electron beam deflected to determine focal point location
N-PS-14107 B67-10649 01

Electron beam stand-by absorber system
N-PS-14108 B67-10650 01

Locating and sealing air leaks in multiroomed buildings
NUC-10304 B68-10026 05

Detection and location of metallic objects imbedded in nonmetallic structures
N-PS-14790 B68-10183 01

Study of optimum discrete estimators in measurement analysis
N-PS-14915 B68-10348 02

Reidentifying hardware after loss of serial number
N-PS-18133 B69-10059 05

APTEAJ on-site tracking prediction program
FPO-10836 B69-10103 06

Circuit board hole coordinate locator concept
N-PS-14737 B69-10539 01

POSITION ERRORS
Image position sensor
N-PS-14101 B69-10783 02

POSITION INDICATORS
Solar-angle sensor has no moving parts
JPL-418 B63-10260 02

Direction indicator system does not require complicated optics
WOO-305 B66-10407 01

Analog solar system model relates celestial bodies spatially
JPL-195 B66-10413 01

Shaft encoder presents digital output
JPL-SC-191 B66-10436 01

POSITIONING
Screw locking cups quickly and neatly crimped
BD-0009 B65-10049 05

Magnets position X-ray film for weld inspection
N-PS-253 B65-10110 05

Simple circuit positions film frames in projector
JPL-508 B65-10132 02

Ball and socket joints provide accurate biaxial global
JPL-654 B65-10205 05

Three-position rocker switch actuator has positive centering
MSC-261 B65-10376 01

Versatile machine mills, saws light materials

B66-10428 05

Feasibility study of wireless, power transmission systems
M-FS-14691
B68-10309 01

PREAMPLIFIERS

Auxiliary circuit enables automatic monitoring of EKG's
MSC-106
B65-10142 01

Boron trifluoride nuclear detector preamplifier uses single-cable connection
LEWIS-178
B65-10255 01

Electrometer preamplifier has drift correction feedback
JPL-SC-074
B65-10267 01

Phonocardiograph system monitors heart sounds
MSC-185
B66-10154 04

Microphone multiplexer system provides multiple outlets from single source
GSFC-426
B66-10308 01

Remote preamplifier circuit maintains stability over wide temperature range
MSC-278
B66-10432 01

Point-source light sensor circuit is insensitive to background light
JPL-778
B66-10502 01

Miniature electrometer preamplifier effectively compensates for input capacitance
ARC-69
B66-10549 01

Current pulse amplifier transmits detector signals with minimum distortion and attenuation
NRC-10055
B67-10347 01

Improved relay optical element for spectroradiometer using cryogenically cooled detector
MSC-11688
B68-10245 02

Laser-Doppler gas-velocity instrument
M-FS-20039
B68-10349 02

Low-cost, fast-response drive circuit for electromagnetic torque motors
LEWIS-10143
B68-10386 01

High resolution Ge/Li/ spectrometer reduces rate-dependent distortions at high counting rates
ARG-10144
B68-10420 01

PRECIPITATION

Crack detection method is safe in presence of liquid oxygen
M-FS-236
B65-10107 03

PRECIPITATION (CHEMISTRY)

Standards for electron probe microanalysis of silicates prepared by convenient method
GSFC-869
B66-10234 03

Process for preparing dispersions of alkali metals
JPL-734
B66-10639 03

Ion exchange determines iodine-131 concentration in aqueous samples
ARG-208
B67-10129 04

SUBJECT INDEX

Static electricity of polymers reduced by treatment with iodine
B67-10062

PRECIPITATION HARDENING

Tantalum alloys resist creep deformation at elevated temperatures
LEWIS-350
B66-10558 03

Treatment increases stress-corrosion resistance of aluminum alloys
M-FS-1840
B66-10595 05

Weld microfissuring in Inconel 718 minimized by minor elements
M-FS-18185
B68-10251 03

Strain-age cracking in Rene 41 alloy
M-FS-18650
B69-10605 03

PRECISION

Instrument quickly transposes ground reference target to eye level
MSC-275
B66-10061 05

Threaded pilot insures cutting tool alignment
M-FS-527
B66-10074 05

Etching process mills PH 14-8 Mo alloy steel to precise tolerances
MSC-270
B66-10110 03

Depth indicator and stop aid machining to precise tolerances
M-FS-553
B66-10149 05

Mount enables precision adjustment of optical-instrumentation mirror
MSC-188
B66-10199 02

Parallel line raster eliminates ambiguities in reading timing of pulses less than 500 microseconds apart
JPL-805
B66-10386 01

Heavy duty precision leveling jacks expedite setup time on horizontal boring mill
M-FS-1084
B66-10411 05

Braking mechanism is self actuating and bidirectional
M-FS-1299
B66-10484 05

Motion drive system is accurately controlled in the 1-micron range
JPL-864
B66-10695 05

Micromanipulation tool is easily adapted to many uses
JPL-129
B67-10004 05

Hydrogen maser as a highly stable frequency reference
M-FS-2437
B67-10146 01

Traveling wire electrode increases productivity of Electrical Discharge Machining /EDM/ equipment
ARG-136
B67-10238 05

Standard surface grinder for precision machining of thin-wall tubing
ARG-10014
B67-10400 05

Precision metal molding
M-FS-13305
B67-10423 05

Automatic transducer switching provides accurate wide range measurement of pressure differential
NRC-10001
B67-10540 01

Precision trimmer aids in preparing biomedical specimen blocks for ultrathin sectioning
ARG-242
B67-10541 05

Modified size bar device measures small

I-508
angles with high accuracy
GSFC-436  B68-10322  02
Rapid and precise analysis for calcium in blood serum
ABS-10246  B69-10160  04
Tool simplifies machining of pipe ends for precision welding
KSC-10361  B69-10231  05
Precise gimballing mechanism
NPO-10577  B69-10270  01
Precision mounting for instrument optical elements provided by polyimide bonding
N-PS-20293  B69-10310  05
Magnetoactive forming for precision sizing and joining of large-diameter tubes
N-PS-20481  B69-10422  05
Live-timer method of automatic dead-time correction for precision counting
ABS-10478  B69-10612  01
Laser interferometer micrometer system
N-PS-14747  B69-10633  02

PREDICTIONS
Mathematical relation predicts achievable densities of compacted particles
ABS-10082  B67-10592  03
Study of optimum discrete estimators in measurement analysis
N-PS-14975  B68-10348  02
Variable-mesh method of solving differential equations
NPO-10515  B69-10017  02
Numerical integration of ordinary differential equations of various orders
NPS-10009  B69-10089  02
ABBAJ on-site tracking prediction program
NPO-10836  B69-10103  06
Prediction of friction coefficients for gases
LEWIS-10774  B69-10112  02
Application of cryptanalytic techniques to the analysis of NiCd space batteries
GSFC-10569  B69-10731  01
Surface-renewal models for heat-transfer between walls and fluidized beds
ABS-10372  B69-10772  02
Numerical solutions of differential equations
N-PS-20537  B69-10779  02
Determination of permissible applied load stress in structural elements
N-PS-16556  B69-10823  02

PREFLIGHT ANALYSIS
Advanced mission analysis program
GSFC-10575  B69-10171  06

PREFLIGHT OPERATIONS
Separation simulator
KSC-67-15  B69-10315  01

PREFORMS
Plastic preforms facilitate fabrication of welded cordwood electronic modules
LEWIS-90333  B68-10063  01

PRELUNGC TESTS
Programmed schedule holds for improving launch vehicle holds
N-PS-14502  B69-10602  03

PREPARATION
Weld preparation tool for pipes and tubing
KSC-10955  B68-10551  05

PREPOLYMERs
Molded elastomer provides compact ferrite-core holder, simplifies assembly
JPL-584  B68-10084  05
Storage-stable foameable polyurethane is activated by heat
LANGLY-167  B66-10111  03
New rapid-curing, stable poliimide polymers with high-temperature strength and thermal stability
LEWIS-10576  B69-10118  03

PRESSING (FORMING)
A technique for making animal restraints
NRC-25  B63-10564  05
Food products for space applications
KSC-11697  B68-10324  04

PRESSS
Rapid billet loader aids extrusion of refractory metals
LEWIS-50  B63-10354  05
Opaque microfiche masthead permits easy reading
HQ-7  B65-10306  01
Apparatus for fabrication of americium-beryllium neutron sources prevents capsule contamination
ABS-108  B67-10202  05
Tools for applying lead tape to flat conductor cabling for chemical stripping
N-PS-20425  B69-10190  05
Imprinting of confining sites for cell cultures on thermoplastic substrates
LANGLY-10495  B69-10236  04

PRESSURE
High-pressure regulating system prevents pressure surges
JPL-231  B63-10170  05
Heavy-duty staple remover operated by hand
JPL-IT-1004  B63-10292  05
Electrically heated diaphragms eliminates use of pyrotechnics
KSC-241  B65-10400  01
Predicting surface heating rates and pressures resulting from hot exhaust gases
KSC-971  B66-10633  05
Lightweight, all-metal base assembly has high flexibility and strength over wide range of temperature and pressure
N-PS-1831  B66-10635  05
Hand-held instrument should relieve hematoma pressure
MSC-599  B67-10332  04
Insertion device for pressure testing
KSC-15185  B69-10061  03
Gage provides audible signal to facilitate checkout of connector pins
ESC-10335

Segmented SiGe-PbTe couples
GSFC-10746

Leakage tester for flat conductor cable connector
N-PS-20427

TFE-fluorocarbon liners for flexible hoses
N-PS-16480

Hermetically sealed pump
Lewis-10837

Vibration damper for Niles vertical boring mill ram
ESC-15529

Hydraulic calipers
N-PS-18052

Pressure Chambers

Vented piston seal prevents fluid leakage
Quick-acting backup tool for welding ducts
JPL-478

Integral coolant channels supply made by bell-out method
N-PS-91

Field-pressure meter can be calibrated without removal from flow line
N-PS-98

Nobium thin films are superconducting in strong magnetic fields at low temperatures
JFL-5C-174

Expandable rubber plug seals openings for pressure testing
RU-0048

Portable lightweight cell provides controlled environment
ESC-648

Automatic cryogenic liquid level controller is safe for use near combustible substances
LEWIS-195

Rugged switch responds to minute pressure differentials
N-PS-12704

Improved method of dicing integrated circuit wafers into chips
ERC-10138

Pressure Distribution

Two-part valve acts as quick coupling
JFL-478

Calibrated clamp facilitates pressure application
ESC-290

Post-stressed concrete foundation may reduce machinery vibration
ARG-130

Computer program provides steady state analysis for liquid propellant propulsion systems
GSFC-10064

Computer program NCAP-TOSS calculates steady-state fluid dynamics of coolant in parallel channels and temperature distribution in surrounding heat-generating solid
NOC-10042

Computer program NCAP provides for steady state thermal and flow analysis of multiple parallel channels in heat generating solid
NOC-10043

Pressure Effects

Probe tests microweld strength
WOO-118

Flow control valve is independent of pressure drop
JFL-WOO-039

Pressure responsive seal handles static and dynamic loads
GSFC-441

Flexible arms provide constant force for pressure switch calibration
HQ-38

Investigation of pressurized toroidal shells
HQ-27

Computer program simplifies design of rotating components of turbomachinery
NOC-10046

Improved atomic resonance gas cell for use in frequency standards

Subject Index

Study made of thin-walled pipe response to turbulent fluids
N-PS-1321

Distillation device supplies cesium vapor at constant pressure
XNP-08124

Computer program analyzes and designs supersonic wing-body combinations
ABC-10741

Computer program TRACK performs transient and/or steady state thermal analysis with coupled fluid flow and heat conduction
NOC-10189

Mechanical properties of a lap joint under uniform clamping pressure
N-PS-14538

Computer programs for axial flow compressor design
LEWIS-10765

Quick-acting backup tool for welding ducts
N-PS-18040

Pressure Drop

Universal bellows joint restraint permits angular and offset movement
WOO-102

Rotating magnetic poles used to pump mercury
LEWIS-276

Flowmeter measures flow rates of high temperature fluids
LEWIS-328

Selective tube roughening increases heat transfer capability
N-PS-599

Cold solid propellant motor has stop-start capability
JFL-836

Study made of heat transfer and pressure drop through tubes with internal interrupted fins
LEWIS-10900

Pressure-control purge panel for automatic butt welding
N-PS-18045

Pressure Effects

Probe tests microweld strength
WOO-118

Flow control valve is independent of pressure drop
JFL-WOO-039

Pressure responsive seal handles static and dynamic loads
GSFC-441

Flexible arms provide constant force for pressure switch calibration
HQ-38

Investigation of pressurized toroidal shells
HQ-27

Computer program simplifies design of rotating components of turbomachinery
NOC-10046

Improved atomic resonance gas cell for use in frequency standards

Temperature or pressure controller
LEWIS-10297

Fluidic transducer gives pressure output as function of temperature
EBC-10093

Pneumatic flow comparator
N-PS-10373

Pressure-control purge panel for automatic butt welding
N-PS-10465

Remote rapidly varying pressures accurately measured
PRC-28

Direct force-measuring transducer used in blood pressure research
ARC-53

Special mount improves remote transducer accuracy
LEWIS-269

Transmission system isolates pressure transducer from severe environment
WOO-239

Bismuth alloy potting seals aluminum connector in cryogenic application
WOO-260

Improved system measures output energy of pyrotechnic devices
WOO-256

Acceleration-compensated pressure transducer has fast response
LANGLEY-113
Plant respirometer enables high resolution of oxygen consumption rates

Indicator system provides complete data of engine cylinder pressure variation

Design concept for pressure switch calibrator

Pressure probe compensates for dimensional tolerance variations

Miniature telemetry system accurately measures pressure

Gas leak detector is simple and inexpensive

Laser Doppler flowmeter measures gas velocity

System enables more complete calibrations of dynamic-pressure transducers

A piezo-bar pressure probe

Automated tester permits precise calibration of pressure transducers from 0 to 1050 psi

Pressure levels and pulsation frequencies can be varied on high pressure/frequency testing device

Pump simulator provides variable pressure-flow characteristics

Design for high-temperature /1800 deg F/ liquid metal pressure transducer

Automatic transducer switching provides accurate wide range measurement of pressure differential

Instrumentation monitors transported material through variety of parameters

Gas pressure in sealed electrochemical cells measured externally

Pneumatic pressure wave generator provides economical, simple testing of pressure transducers

Ultraminiature manometer-tipped cardiac catheter

Dual rate pressure relief valve

Miniature pressure transducer for stressed member application

Silicon strain sensors enable pressure measurement at cryogenic temperatures

Cooled miniature pressure transducers effective at high temperatures

Automatic calibration system for pressure transducers

Combination probe for airflow measurements

Pressure-sensitive bonded junction transducers

Direct indication of particle size in fluidized beds

Cryogenic pressure transducer

New type pressure transducer for severe thermal environments

Miniature backward-diode pressure sensor features stability and low power consumption

Inflatable bladder provides accurate calibration of pressure switch

Indicator system provides complete data of engine cylinder pressure variation

Calibratable solid-state pressure switch

Cryogenic filter method produces super-pure helium and helium isotopes

New method forms bond line free of voids

Lightweight door seals cryogenic container against diaphragm type loading

Bismuth alloy potting seals aluminum connector in cryogenic application

Pressure seal ring may be effective over wide temperature range

Pressure vessels fabricated with high-strength wire and electroformed nickel

Expandable rubber plug seals openings for pressure testing

Vapor diffusion electrode improves fuel cell operation

Cooled miniature pressure transducers effective at high temperatures

Preformed stiffeners used to fabricate structural components for pressurized tanks

Purification train produces ultrapure hydrogen gas

Ultrasonics permits brazing complex stainless steel assembly without flux

Crack growth measured on flat and curved surfaces at cryogenic temperatures
SUBJECT INDEX

LEWIS-389 B67-10364 01
Study made of pneumatic high pressure piping materials at 10,000 psi/
KSC-10133 B67-10437 03
Lead plated aluminum ring provides static high pressure seal for large diameter
pressure vessel B67-10539 05
High-voltage pulse generator developed for wide-gap spark chambers
ARG-10136 B66-10263 01
Analysis of filament reinforced metal-shell pressure vessels
LEWIS-10352 B66-10405 06
Temperature controlled strain gaged extensometer
LEWIS-10353 B66-10543 01
Welded repairs of punctured thin-walled aluminum pressure vessels
N-PS-14836 B69-100051 05
Adhesive for cryogenic temperature applications
LEWIS-10264 B69-10074 03
Sealed container sampling device
GSPC-10690 B69-10682 03
Effects of high-pressure hydrogen on storage vessel materials
N-PS-10605 B69-10730 03
PRESSURE WELDING
Pressure-welded flange assembly provides leaktight seal at reduced bolt loads
N-PS-640 B66-10247 05
Differential expansion provides pressure for diffusion bonding of large diameter rings
N-PS-568 B66-10269 05
Rhodium-plated barrier against high-temperature fusion bonding
N-PS-92135 B69-10544 05
PRESSURIZING
Low-cost insulation system for cryostats eliminates need for a vacuum
LEWIS-64 B63-10365 05
Combustion chamber inlet manifold separates vapor from liquid
N-PS-531 B66-10052 05
Tensile-strength apparatus applies high strain-rate loading with minimum shock
JPL-28 B66-10063 05
Cryostat modified to aid rotating beam fatigue test
N-PS-435 B66-10083 03
Vapor condensation process produces slurry of magnesium particles in liquid hydrocarbons
LEWIS-263 B66-10104 03
Adapter assembly prevents damage to tubing during high pressure tests
MSC-563 B66-10330 02
Investigation of pressurized toroidal shells
HO-27 B67-10117 05
Propellant tank pressurization analysis program
N-PS-1506 B67-10625 06
Pneumatic pressure wave generator provides economical, simple testing of pressure
transducers
NOC-10024 B67-10664 05
Compact monitoring and control console for pressurized gas bottles
N-PS-14874 B66-10401 05
Sealed container sampling device GSPC-10690 B69-10682 03
PRESSURING
Jacketed cryogenic piping in stress relieved
N-PS-585 B67-10308 05
Beryllium fastener technology
N-PS-20306 B69-10019 05
PREVENTION
Strain-age cracking in Rene 41 alloy
N-PS-18650 B69-10605 03
PREVENTION
Inhibition of browning in foodstuffs
HO-10177 B69-10493 04
PRIMARY BATTERIES
Primary cells utilize halogen-organic charge transfer complex
JPL-926 B66-10682 02
Primary cell uses neither liquid nor fused electrolytes
NPO-10001 B67-10275 01
PRIMARY COATINGS
Automated urinalysis technique determines concentration of creatine and creatinine by colorimetry
NPO-10149 B67-10245 04
PRIMERS
White primer permits a corrosion-resistant coating of minimum weight
N-PS-308 B66-10207 03
PRIMERS (COATINGS)
Inorganic paint is durable, fireproof, easy to apply
GSPC-366 B65-10156 03
Improved primer for bonding polyurethane adhesives to metals
N-PS-90591 B69-10540 03
PRINTED CIRCUITS
Modular chassis simplifies packaging and interconnecting of circuit boards
JPL-236A B63-10174 01
Front and back printed circuit layouts presented on single sheet
GSPC-93 B63-10596 01
Compact coaxial connector for printed circuit adds reliability
MSC-57 B64-10016 01
Use of photographs speeds inspection of printed-circuit boards
MSC-72 B64-10118 01
Hand tool bends component leads accurately
N-PS-308 B65-10181 05
Modified developer increases line resolution in photosensitive resist
GSPC-366 B65-10278 01
Assembly jig assures reliable solar cell modules
GSPC-455 B66-10040 05
New television camera eliminates vidicon tube
N-PS-472 B66-10112 01
Tool forms right angles in component leads
N-PS-722 B66-10346 05
Process produces accurate registry between circuit board prints
LANGLEY-286 B66-10660 02
Aluminum heat sink enables power transistors to be mounted integrally with printed circuit board

Areas of irregular, discontinuous patterns rapidly and accurately measured

Optical system facilitates inspection of printed circuit boards

Inspection criteria ensure quality control of parallel gap soldering

Standards for compatibility of printed circuit and component lead materials

Fixture facilitates soldering operations

Bondestructive evaluation of printed wiring boards by microhm resistance measurements

Self-shielding printed circuit boards for high frequency amplifiers and transmitters

Folded stick module

Design of printed circuit coils

Investigation of the development of cracks in soldered joints

One-count memory circuit prevents machine mode interaction

Density trace made with computer printout

Digital data averager improves conventional measurement system performance

Fully automatic telemetry data processor

Two devices for analysis of nystagmus

Modified procedure speeds camera copy layout for offset printing

Offset lenses add versatility to phototypesetting machine

Uppercase and lowercase computer printout increases readability

Expandable takeup reel facilitates paper tape removal

Computer program performs statistical analysis for random processes

Computer/PERT technique monitors actual versus allocated costs

Translator program converts computer printout into braille language

Computer program calculates the effective temperature for a crystalline solid

One-dimensional Coulomb-damped wave motion in prismatic bars

Liquid-level meter has no moving parts

Optical automatic gain channel

Special purpose reflectometer uses modified Ulbricht sphere

Computer program resolves radiative, conductive, and convective heat transfer problems for variety of geometries

Device enables calibration of microphones at high sound pressure levels

Measuring coplanarity of surfaces

Dielectric prisms would improve performance of quasi-optical microwave components

Laser-Doppler gas-velocity instrument

Discrimination of fish oil and mineral oil slicks on sea water

Independent doubly truncated gamma variables

On the bound of first excursion probability

Automatic Gaussian random-noise limiter

Hybrid computer technique yields random signal probability distributions

X-Y plotter adapter developed for SDS-930 computer

The X square statistic and goodness of fit test

Computer program determines exact two-sided tolerance limits for normal distributions

Independent doubly truncated gamma variables

Computer program reduces calculation time of normal response functions

Computer program calculates monotonic maximum likelihood estimates using method of reversals

FM carrier deviation measured by differential probability method

SUBJECT INDEX

/EDP/ augmented management system
I-PS-14715 B68-10287 06

PROJECTILES
Tiny sensor-transmitter can withstand extreme acceleration, gives digital output
ARC-22 B63-10561 01

PROJECTION
Use of photographs speeds inspection of printed-circuit boards
MSC-72 B64-10118 01
Disk calculator indicates legible lettering size for slide projection
GSPC-409 B65-10339 05
Single projector accommodates slides of different size and format
GSPC-439 B66-10016 02
Instrument transmits vanishing point to illustration point
MSC-267A B66-10324 01
Stereo TV enhancement study
I-PS-14805 B69-10497 01

PROJECTORS
Setting of angles on machine tools speeded by magnetic protractor
ARC-5 B63-10006 01
Modified contour projector makes excellent contour densitometer
LANGLEY-93 B65-10084 02
Simple circuit positions film frames in projector
JPL-508 B65-10132 02
Optical projectors simulate human eyes to establish operator's field of view
WOD-250 B66-10010 02
Single projector accommodates slides of different size and format
GSPC-439 B66-10016 02
Improved carbon electrode reduces arc sputtering
MSC-219 B66-10026 01
Optical monitor panel provides flexible test panel configurations
ESC-66-18 B66-10494 01
Water cooled anode increases life of high temperature arc lamp
NPO-10180 B67-10247 02
Aerial-image enables diagrams and animation to be inserted in motion pictures
ARG-165 B67-10398 02

PROJECTS
Probabilistic approach to long range planning of manpower
MSC-11524 B67-10510 06

PROLONGATION
Multiple test chamber exposes materials to various environments
MSC-179 B65-10268 01

PROPAGATION
Optical superheterodyne receiver uses laser for local oscillator
I-PS-1605 B66-10584 01
Moveable RF probe eliminates need for calibration in plasma accelerators
LEWIS-10127 B67-10362 01
Propagation of density disturbances in air-water flow
ARG-10260 B69-10043 02

PROPAGATION MODES
Novel horn antenna reduces side lobes, improves radiation pattern
JPL-425 B63-10264 01
Study of yttrium iron garnet rods reveals new magnetostatic echo mode
ESC-37 B67-10153 01

PROPAGATION VELOCITY
Logic circuit exhibits optimum performance
LANGLEY-129 B65-10193 01
Improved circuit minimizes generation time of pseudo-noise check bits
JPL-498 B65-10275 01

PROPANE
Improved inorganic ion exchange membranes
LEWIS-10737 B69-10851 03

PROPELLANT CORROSION
Explosive-train initiated through solid bulkhead by pressure cartridge
ESC-11395 B67-10589 03
Two-step rocket engine bipropellant valve concept
MSC-10951 B69-10280 05

PROPELLANT PROPERTIES
Computer program for mass optional solutions of some endpoint trajectory problems
I-PS-12976 B67-10310 06

PROPELLANT SPRAYS
Two-fluid, impinging-sheet injector
NPO-10547 B69-10338 05

PROPELLANT TANKS
Insulation for cryogenic tanks has reduced thickness and weight
I-PS-326 B66-10183 02
Glass bead shot peening retards stress corrosion failure of titanium tanks
LANGLEY-319 B67-10198 05
Computer program provides steady state analysis for liquid propellant propulsion systems
MSC-10068 B67-10414 06

PROPELLANT PRESSURIZATION ANALYSIS
Study of cryogenic container thermodynamics during propellant transfer
I-PS-14310 B68-10108 06

SYNTHESIS OF CALCULATIONAL METHODS FOR DESIGN AND ANALYSIS OF RADIATION SHIELDS FOR NUCLEAR ROCKET SYSTEMS
I-PS-14447 B69-10007 06

A BIAxIAL WELD STRENGTH PREDICTION METHOD
I-PS-20019 B69-10471 05

PROPELLANT TESTS
Cryogenic fluid sampling device persists testing under hazardous conditions
I-PS-1927 B66-10654 02

PROPELLANT TRANSFER
Gas diffuser facilitates withdrawal of cryogenic liquids from tanks
I-PS-915 B66-10342 05
Fuel transfer systems persist rapid coupling
I-PS-91326 B68-10039 05
Study of cryogenic container thermodynamics during propellant transfer
PROPELLANTS

- XPS-14310
- XPS-14310

PROPELLANTS

Gas chromatographic column enables analysis of propellant hydrazines
GSC-1161 B66-10586 03
Device measures reaction engine thrust vector deviations
JPL-SC-163 B66-10642 05
Axisymmetric two-phase perfect gas performance program
MSC-11774 B66-10374 06
Axisymmetric reacting gas nonequilibrium performance program
MSC-11781 B66-10377 06

PROPORTIONAL CONTROL

Heater control circuit provides both fast and proportional control
M-PS-906 B67-10097 01

PROPORTIONAL COUNTERS

A fast-neutron spectrometer of advanced design
M-PS-1664 B66-10555 01
Non-dispersive X-ray emission analysis for geochemical exploration
GSPC-10568 B69-10111 02
A simple electrometer for measuring small photoelectric currents
GSPC-10603 B69-10734 01

PROPELLER

Analysis of secondary cells with lithium anodes and immobilized fused-salt electrolytes
MSL-10452 B69-10613 01

PROPELLER SYSTEM PERFORMANCE

Computer program provides steady state analysis for liquid propellant propulsion systems
MSC-10664 B67-10414 06
Rocket engine analog simulation
M-PS-14511 B68-10511 01

PROPHYLAXIS

Special tool seals conductors with combination of plastic sleeves
M-PS-579 B66-10209 05

PROSTHETIC DEVICES

Bearing alloys with hexagonal crystal structures provide improved friction and wear characteristics
LEWIS-120 B66-10373 03
Human transfer functions used to predict system performance parameters
LANGLEY-203 B66-10379 01
Carbon offers advantages as implant material in human body
M-PS-18207 B69-10087 04

PROTECTION

Portable flooring protects finished surfaces, is easily moved
M-PS-15 B63-10387 05
PFC thermostats protects multiloaded power supplies
GSPC-236 B69-10281 01
Shock absorber protects motive components against overloads
WOO-092 B65-10008 05
Mouthpiece adapter for pipettes protects mouth from harmful liquids
LANGLEY-47 B65-10043 03
Compact retractor protects cabling loops

SUBJECT INDEX

- XPS-561 B66-10018 05
- Tool permits damage-free removal of solar cells
GSPC-867 B66-10219 05
- Seal surfaces protected during assembly
NU-0067 B66-10266 05
- Shock-operated valve would automatically protect fluid systems
M-PS-601 B66-10335 03
- Impact and puncture resistant material protects parts from damage
MSC-747 B66-10375 05
- Metal Oxide Silicon /MOS/ transistors protected from destructive damage by wire
ARC-65 B66-10419 01
- In-tank shutoff valve is provided with maximum blast protection
M-PS-529 B66-10477 02
- Hermetically sealed cells protected from internal gas pressure
GSPC-555 B66-10692 01
- Reactively operated high pressure valve protects test personnel
MSC-11011 B67-10291 05
- Training course for radiation safety technicians
ARG-216 B67-10477 02
- Connector shorting cap provides pin alignment, inspection, and stray voltage protection
M-PS-13111 B67-10635 01
- Mechanical shielding reduces weld surface cracking in 6061 T6 aluminum
MSC-11494 B68-10022 05
- Panelized high performance multilayer insulation
M-PS-14023 B68-10031 03
- Cover protects critical electrical connectors against damage during handling
MSC-15662 B69-10526 01
- Glass fabric fire barrier for silicone rubber parts
MSC-15555 B69-10629 03
- An electrical connector pin protector
MSC-15660 B69-10742 01

PROTECTIVE CLOTHING

Comfortable, lightweight safety helmet holds radio transmitter, receiver
MSC-53 B64-10015 05
Double gloves reduce contamination of dry box atmosphere
LEWIS-211 B65-10117 03
Self-contained clothing system provides protection against hazardous environments
M-PS-536 B66-10201 05
Flexible fastener effects airtight material closure
JPL-684 B66-10304 05
Special tool kit aids heavily garmented workers
MSC-163 B66-10403 05
Concept to comfort-condition subjects wearing restrictive clothing
MSC-10604 B68-10178 02
Thermal protective visor for entering high temperature areas

Forming tool improves quality of tubing flares WOO-231 B66-10001 05

Versatile impact hand tool M-FS-20140 B68-10371 05

PUPILS
Oculometer for remote tracking of eye movement ERC-10114 B69-10444 02

PURGING
Tool provides constant purge during tube welding M-FS-537 B66-10093 05

Brassing retort manifold design concept may minimize air contamination and enhance uniform gas flow M-FS-707 B66-10371 05

Plastic tubing protects flexible copper hose M-FS-772 B66-10588 05

Irradiated gases transferred without contamination or dilution LEWIS-278 B67-10044 03

Liquid oxygen distillation cleaned by falling film method M-FS-11816 B67-10299 03

Protected, high-temperature connecting cable LEWIS-10149 B67-10461 01

Between-bearing shaft seal, a concept M-FS-18179 B68-10286 05

Detecting hydrogen-containing contaminants on metal surfaces M-FS-20456 B69-10192 03

Pressure-control purge panel for automatic butt welding M-FS-18465 B69-10403 05

A new method for fabrication of flexible vacuum purge jackets M-FS-12646 B69-10564 03

PURIFICATION
Cryogenic filter method produces super-pure helium and helium isotopes JFL-374 B63-10235 03

Ceramic materials purified by experimental method LEWIS-225 B65-10270 03

Purification train produces ultrapure hydrogen gas M-FS-1913 B67-10078 03

Steel test panel helps control additives in pyrophosphate copper plating LEWIS-10101 B67-10358 05

Two systems developed for purifying inert atmospheres ARG-10234 B69-10026 03

Transplutonium elements processed from rock debris of underground detonations ARG-10222 B69-10054 03

Separation of traces of metal ions from sodium matrices ARG-10341 B69-10160 03

Zone purification of potassium chloride ARG-10377 B69-10241 03

PURITY
Nioibium thin films are superconductive in strong magnetic fields at low temperatures JFL-SC-174 B66-10122 02

Xenon fluorides show potential as fluorinating agents ARG-113 B67-10185 03

Experiments shed new light on nickel-fluorine reactions ARG-10008 B67-10397 03

Tool samples subsurface soil free of surface contaminants MFS-10069 B67-10473 05

Preparation of high purity copper fluoride by fluorinating copper hydroxyfluoride LEWIS-10794 B69-10136 03

Apparatus automatically measures soluble residue content of volatile solvents SAN-10032 B69-10292 03

PUSH-PULL AMPLIFIERS
Phase inverter provides variable reference push-pull output HQ-23 B66-10344 01

Circuit provides overcurrent protection to push-pull amplifier MFS-12033 B67-10300 01

Adaptive control circuit prevents amplifier saturation ERC-10026 B67-10648 02

Low-cost, fast-response drive circuit for electromagnetic torque motors LEWIS-10143 B68-10386 01

Fluidic analog amplifier ERC-10102 B68-10538 05

PUSHING
Transmission system isolates pressure transducer from severe environment WOO-239 B66-10064 01

PYRAMIDAL BODIES
Image position sensor M-FS-14101 B69-10783 02

PYRAMIDS
Test device prevents molecular bounce-back GSFC-82 B63-10546 03

Antenna configurations provide polarization diversity GSFC-74 B66-10066 01
Separation of traces of metal ions from sodium matrices

Colloidal suspension simulates linear dynamic pressure profile

Fluid-bed fluoride volatility process recovers uranium from spent uranium alloy fuels

Nitrogen dioxide produced by self-sustained pyrolysis of nitrous oxide

Impurity diffusion process for silicon semiconductors in fast and precise

Welding, bonding, and sealing of refractory metals by vapor deposition

Analytical technique characterizes all trace contaminants in water

Fire retardant foams developed to suppress fuel fires

Basal-plane metallography of deformed pyrolytic carbon

Nulling pyrometer uses Kerr cell shutter for fast responses

Internal cooling increases range of immersion-type temperature probe

A radiometer-pyrometer

Self-balancing line-reversal pyrometer automatically measures gas temperatures

Detection of effect of deposits on optical windows of pyrometer measurements

Study made of Haney nickel technology

Steel test panel helps control additives in pyrophosphate copper plating

Isothermal drop calorimeter provides measurements for alpha active, pyrophoric materials

Electrically heated diaphragm eliminates use of pyrotechnics

Improved system measures output energy of pyrotechnic devices

High speed blowdown system provides rapid pressure loss

Explosive-train initiated through solid bulkhead by pressure cartridge

Pyroelectric device provides one-shot heat source

Pyrotechnic-actuated cable release

Pyrotechnic device has high q, is stable at higher temperatures

System precisely controls oscillation of vibrating mass

Apparatus makes klystron operating frequency adjustable from remote point

Active rc circuits of low sensitivity for integrated circuit transfer function

RF noise suppression using the photodielectric effect in semiconductors

Automated tuning of hydrogen masers

Fluorescent photography of spray droplets using a laser light source

Laser microprobe facility used in the elemental analysis of small features of a sample

Composite filter steepens rejection slopes in microwave application

Dielectric meter design permits measurement in vacuum under irradiation

A theoretical model for determining turbine flowmeter sensitivity

Determination of quadratic equation coefficients describing three-dimensional surfaces, their constraints and skewed planes, and view point areas

Light-controlled resistors provide quadrature signal rejection for high-gain servo systems

Combination ranging system and mapping radar

Ion mass spectrometer for special uses

Simple, nondestructive test identifies metals

Study made of application of stereoscopic display system to analog computer simulation

Quantitative determination of flavin nucleotide using the bacterial bioluminescent reaction GSFC-10565 B69-10715 04

QUANTUM COUNTERS

The Quantasyn, an improved quantum detector HEC-10148 B69-10443 01

QUANTUM MECHANICS

Quanta mechanical calculations of reactive scattering cross sections in biomolecular encounters M-PS-13594 B67-10527 03

QUARTZ

Glass converted for grinding aspheric surfaces GSFC-115 B63-10556 05

Thermoelectric elements diffusion-bonded to tungsten electrodes GSFC-346 B65-10309 01

Miniature servo accelerometer is force-balanced JPL-155 B65-10340 01

Plastic scintillator converts standard photomultiplier to ultraviolet range HEC-9 B66-10106 02

High-speed furnace uses infrared radiation for controlled brazing NU-0047 B66-10268 02

Special treatment reduces helium permeation of glass in vacuum systems HQ-25 B66-10372 02

Radon gas, useful for medical purposes, safely fixed in quartz ARG-2 B66-10466 04

Crystal microbalance measures condensable molecular fluxes JPL-845 B67-10012 03

A piezo-bar pressure probe LEWIS-393 B67-10259 01

Precision capacitor has improved temperature and operational stability ARG-189 B67-10313 01

Movable EF probe eliminates need for calibration in plasma accelerators LEWIS-10127 B67-10362 01

Dielectric prisms would improve performance of quasi-optical microwave components HEC-10011 B67-10816 01

Nonreciprocal gain control for ring laser M-PS-14041 B67-10653 02

Technique developed for measuring transmittance of optical birefringent networks M-PS-14267 B68-10260 02

Preparation of silver-activated zinc sulfide thin films GSFC-10687 B68-10271 03

Superconductive thin film makes convenient liquid helium level sensor LANGLEY-10289 B68-10341 01

Thermal conductivity and dielectric constant of silicate materials 1-35-14856 B68-10351 03

Protective clothing for workers with 5-kW and 20-kW short-arc lamps HPO-11055 B69-10218 01

Zone purification of potassium chloride ARG-10377 B69-10241 01

Proposed acousto-optic filter HQ-10440 B69-10666 02

Deposition monitor and control NPO-10706 B69-10722 01

A simple electrometer for measuring small photoelectric currents GSFC-10603 B69-10734 01

QUANTS LAMPS

Infrared shield facilitates optical pyrometer measurements LANGLEY-133 B65-10272 02

Microminiature thermocouple monitors own installation HEC-1111 B66-10463 05

QUATS TRANSUDERS

Quartz crystals detect gas contaminants during vacuum chamber evacuation HPO-10744 B67-10205 01

QUASI-STEADY STATES

Analysis of transient thermal stress in heat-generating plates and hollow cylinders caused by sudden environmental temperature changes ARG-10274 B69-10047 02
Aerodynamic forces of fluttering cylindrical and/or planar structures
M-FS-20497  B69-10781  02

QUATERNARY ALLOYS
Braze alloy holds bonding strength over wide temperature range
LEWIS-137  B66-10519  03

QUENCHING
Recent development in organic scintillators
ARG-10344  B69-10198  03
Measurements of thermoelectric power in annealed and quenched gold-platinum alloys
ARG-10303  B69-10206  03

QUENCHING (COOLING)
New sintering process adjusts magnetic value of ferrite cores
GSPC-129  B63-10606  01
Heat treatment study of aluminum casting alloy N8S
M-FS-2397  B67-10159  03
Development of technology for hot-drape forming of large torus sections
M-FS-12441  B67-10341  05
Magnesium-lithium alloys developed for low temperature use
M-FS-1541  B67-10365  03
Levitation-melting technique for metals and alloys
ARG-10240  B69-10006  03
Direct measurement of carbon-14 in carbon dioxide by liquid scintillation counting
ARG-10237  B69-10092  03

QUANTUM THEORY
Queuing register uses fluid logic elements
M-FS-317  B66-10100  05

RACKS (FRAMES)
Modular chassis simplifies packaging and interconnecting of circuit boards
JPL-236A  B63-10174  01
Electronic assembly rack panels snap on and off
GSPC-59  B64-10121  05
Floating device aligns blind connections
MGS-256  B66-10007  05

RACKS (GEARS)
Special pliers connect hose containing liquid under pressure
JPL-IT-1003  B63-10291  05

RADAR ANTENNAS
Structural thermal-control coatings
MPO-10785  B68-10553  03

RADAR APPROACH CONTROL
PM/CM system measures aircraft attitude
M-FS-276  B65-10290  01

RADAR EQUIPMENT
Circuit converts AM signals to FM for magnetic recording
GSPC-227  B65-10001  01

RADAR MAPS
Combination ranging system and mapping radar
MPO-11001  B69-10325  01

RADAR MEASUREMENT
Study made of application of stereoscopic display systems to analog computer simulation
M-FS-1263  B66-10590  01

RADAR TRACKING
Shock absorber protects motive components against overloads
M-00-92  B65-10008  05
Thermal conductivity and dielectric constant of silicate materials
M-FS-14856  B68-10351  03

RADAR TRANSMITTERS
PM/CM system measures aircraft attitude
M-FS-276  B65-10290  01

RADIO DISTRIBUTION
Radial coolant channels fabricated by simplified method
MU-0070  B66-10267  05
Radial furnace shows promise for growing straight boars carbide whiskers
EQ-50  B67-10070  03
A method of determining combustion gas flow
M-FS-13757  B67-10455  03
Computer programs for axial flow compressor design
LEWIS-10765  B69-10174  06

RADIATION
Modified gas bearing is adjustable to optimum stiffness ratio
M-FS-145  B64-10050  05
Segmented, arch-bound seal is pressure loaded
M-FS-12777  B67-10325  05
Resilient bearing supports are gas controlled
LEWIS-10109  B67-10364  05
Dynamics of moving bubbles in single and binary component systems
M-FS-14845  B68-10339  02
Radial inflow turbine design charts
LEWIS-10720  B68-10567  05
Geometry and design point performance of axial flow turbines
LEWIS-10471  B69-10111  06
Computer programs for axial flow compressor design
LEWIS-10765  B69-10174  06
Computer program for off-design performance of radial inflow turbines
LEWIS-10764  B69-10267  06

RADIANT COOLING
Graphite cloth facilitates vacuum evaporation of silicon monoxide
M-FS-14764  B68-10256  03

RADIANT FLUX DENSITY
Ion chambers simplify absolute intensity measurements in the vacuum ultraviolet
ERC-10  B66-10639  01
Fast-acting calorimeter measures heat output of plasma gas accelerator
LEWIS-388  B67-10192  01
Poli radiator accessory improves measurements
M-FS-12684  B67-10448  01
Improved cavity-type absolute total-radiation radiometer
JPL-897  B67-10557  01
Automatic solar lamp intensity control system
LG5-10017  B68-10399  01
Plume radiation program
RADIANT HEATING

M-FS-13202 B68-10447 06
Gage measures total radiation, including vacuous UV, from ionized high-temperature gases
INF-09802 B69-10026 02

RADIANT HEATING

Radiant heater for vacuous furnaces offers high structural rigidity, low heat loss LEWIS-39 B63-10342 01
Graphite element serves as radiant heat source M-FS-105 B65-10216 01
Circular, explosion-proof lamp provides uniform illumination MSC-382 B66-10156 02
Improved system measures output energy of pyrotechnic devices W00-256 B66-10159 01
Self-supported aluminum thin films produced by vacuum deposition process ARC-28 B66-10387 03
Computer program simplifies transient and steady-state temperature prediction for complex body shapes MSC-989 B66-10619 01
Fast-acting calorimeter measures heat output of plasma gun accelerator LEWIS-308 B67-10192 01
Radiant heat source, vacuous bag, provide portable bonding oven MSC-11342 B67-10570 03
Thermal Network Analyzer Program NUC-10540 B69-10239 06
Thermal radiation shields for piping in vacuous environments LEWIS-10899 B69-10262 03
Technique for predicting temperature distribution in gases LEWIS-10918 B69-10329 01

RADIATION

Indium foil with beryllia washer improves transistor heat dissipation GSFC-42 B63-10033 01
Wide-angle sensor measures radiant heat energy in corrosive atmospheres M-FS-1220 B65-10019 05
Improved atomic resonance gas cell for use in frequency standards MSC-11666 B68-10230 01
Analysis of annular combustors LEWIS-10399 B68-10356 06
The response of nonenergetic gasless rays in fritile media are investigated ARG-10295 B69-10080 02
Silicon carbide diode for increased light output M-FS-20063 B69-10096 01
Optically induced free carrier light modulator GSFC-10216 B69-10114 01
Production of metals and compounds by radiation chemistry LEWIS-10231 B69-10123 03
A computer program for a line-by-line calculation of spectra from diatomic molecules and atoms assuming a Voight line profile ARC-10221 B69-10232 06

RADIATION ABSORPTION

Reference black body is compact, convenient to use ARC-3 B63-10004 03
Flange on microwave antenna subreflector cuts ground noise JPL-262 B63-10229 01
Variable-transparency wall regulates temperatures of structures LANGLEY-25 B63-10528 03
Lamp enables measurement of oxygen concentration in presence of water vapor MSC-10043 B67-10387 01
Coolants with selective optical filtering characteristics for ruby laser applications M-FS-20188 B68-10508 02

RADIATION BELTS

Radiation tolerant silicon nitride insulated gate field effect transistors GSFC-10581 B69-10253 01

RADIATION COUNTERS

Multiaxial analyzer detects low-energy electrons GSFC-329 B65-10213 01
Boron trifluoride nuclear detector preamplifier uses single-cable connection LEWIS-178 B65-10255 01
Aluminized thin-window proportional-counter tube is stronger, more responsive in long wavelength region JPL-689 B67-10015 01
Ion exchange determines iodine-131 concentration in aqueous samples ARG-208 B67-10129 04
Radiation counting technique allows density measurement of metals in high-pressure/high-temperature environment ARG-124 B67-10316 02
Compilation of detection sensitivities in thermal-neutron activation ARG-10068 B67-10641 03
Four pi-recoil proportional counter used as neutron spectrometer ARG-10101 B68-10326 02
Fast framing cameras provide high-speed multi-channel data recording ARG-10252 B69-10102 02
Ion mass spectrometer for special use MG-10818 B69-10510 02
Conditioning of pulses from aerosol-particle detectors ERC-10250 B69-10681 01

RADIATION DAMAGE

Aluminum doping improves silicon solar cells LEWIS-266 B66-10181 02
Simplified method introduces drift fields into cells GSFC-572 B67-10102 03

RADIATION DETECTORS

Radiation-detector optical-imaging device is of simplified construction GSFC-251 B68-10239 01
Instrument accurately measures extremely low air densities
N-P5-193 B65-10221 01

Instrument performs nondestructive chemical analysis, data can be telemetered
JPL-SC-076 B65-10317 01

Calorimeter accurately measures thermal radiation energy
LANGLEY-173 B66-10058 02

Mount makes liquid nitrogen-cooled gamma ray detector portable
LEWIS-259 B66-10103 01

Plastic scintillator converts standard photomultiplier to ultraviolet range
EBC-9 B66-10108 02

Improved system measures output energy of pyrotechnic devices
W00-256 B66-10159 01

Semiconductor forms biomedical radiation probe
MSC-320 B66-10252 04

Hydrogen fire detection system features sharp discrimination
N-P5-643 B66-10368 01

Detector measures power in 50 to 30,000 GHz radiation band
EBC-26 B66-10581 01

A radiometer-photometer
LEWIS-204 B66-10606 01

Alpha particle backscattering measurements used for chemical analysis of surfaces
ARG-116 B67-10186 03

Infrared radiometer
N-P5-13373 B67-10422 01

Compilation of detection sensitivities in thermal-neutron activation
ARG-10068 B67-10641 03

Improved relay optical element for spectroradiometer using cryogenically cooled detector
MSC-11698 B68-10245 02

Automatic solar lamp intensity control system
XGS-10017 B68-10399 01

Readout system for radiation detector
MSC-90160 B68-10501 01

The response of monoenergetic gamma rays in finite media are investigated
ARG-10295 B69-10080 02

The QuantaSyn, an improved quantum detector
HEC-10148 B69-10443 01

Manganese-56 coincidence-counting facility precisely measures neutron-source strength
ARG-90261 B69-10621 01

Pulse-height defect due to electron interaction in dead layers of Ge/Li/gamma-ray detectors
ARG-10362 B69-10767 02

RADIATION DISTRIBUTION
Novel horn antenna reduces side lobes, improves radiation pattern
JPL-625 B63-10264 01

Fluid pressure used to test turbopump bearings
NU-6001 B65-10024 03

Electron beam parallel X-ray generator
MSC-11022 B67-10372 02

Computer programs for antenna feed system design and analysis
WFO-10359 B67-10504 06

Noise study of single stage compressor rotor-stator interaction
LANGLEY-157 B67-10516 02

High-temperature, gas-filled ceramic rectifiers, thyatrons, and voltage-reference tubes
LEWIS-90271 B69-10376 01

Long range holographic contour mapping concept
E9-10350 B69-10700 02

RADIATION DOSAGE
Variable-transparency wall regulates temperatures of structures
LANGLEY-25 B63-10528 03

N-SAP and G-SAP neutron and gamma ray albedo model scatter shield analysis program
WUC-10126 B67-10536 06

SOC-SS computer code provides tool for design evaluation of homogeneous two-material nuclear shield
NDC-10142 B67-10537 06

Prediction of radiation damage effects in transistors
GSFC-10021 B67-10606 01

Beam profiles measured with thermoluminescent dosimeters
ARG-10229 B68-10143 03

RADIATION EFFECTS
Irradiation improves properties of an aromatic polyester
LANGLEY-115 B65-10164 03

Dielectrometer design permits measurement in vacuum under irradiation
N-P5-359 B66-10401 01

Test system accurately determines tensile properties of irradiated metals at cryogenic temperatures
WUC-10521 B67-10617 02

Deep gamma ray penetration in thick shields

Susceptibility of irradiated steels to hydrogen embrittlement
ARG-10115 B68-10194 03

Study of radiation effects on mammalian cells in vitro
ARG-10191 B68-10294 02

Effects of surface preparation on quality of aluminum alloy weldments
N-P5-13152 B68-10302 03

Experimental study and evaluation of radioprotective drugs
ARG-10196 B68-10320 04

CIRCUS--a digital computer program for transient analysis of electronic circuits
N-P5-15002 B68-10416 06

Rate constants measured for hydrated electron reactions with peptides and proteins
ARG-10195 B68-10424 04

Flame radiation program
RADIATION HAZARDS

N-PS-13202 B68-10447 06
Hydrogen peroxide etching proves useful for germanium
ARG-10170 B68-10454 03
Diffusion bond method of joining steel and a Y123-bromine composite
N-PS-20482 B69-10237 03
Gamma radiation characteristics of plutonium dioxide fuel
FWO-11220 B69-10733 02

RADIATION MEASUREMENT

Spherical electrode eliminates high-voltage breakdown
JPL-638 B65-10139 01
Training course for radiation safety technicians
ARG-216 B67-10477 02

RADIATION MEASUREMENT INSTRUMENTS

Mechanical device accurately measures rf phase differences in vhf or uhf ranges
N-PS-1733 B66-10694 05
General computer program for calculation of radiation from inhomogeneous, nonisobaric, nonisothermal rocket exhaust plume
N-PS-14314 B68-10044 06
Gage measures total radiation, including vacuum UV, from ionized high-temperature gases
XWF-09802 B69-10028 02
Measurement technique for the determination of antenna directivity
N-PS-12799 B69-10677 01

RADIATION PROTECTION

Simple control device senses solar position
JPL-638 B65-10061 01
One-piece transparent shell improves design of helmet assembly
MSC-107 B66-10390 05
Method prevents secondary radiation in radiographic inspection
N-PS-13333 B67-10391 02
Double copper sheath multiconductor instrumentation cable in durable and easily installed in high thermal or nuclear radiation area
NUC-1007 B67-10538 01
Contamination control handbook
N-PS-20305 B68-10392 03

RADIATION PYROMETERS

Graphite element serves as radiant heat source
N-PS-105 B65-10216 01
Ultraviolet photographic pyrometer used in rocket exhaust analysis
N-PS-899 B66-10095 02

RADIATION SHIELDING

Apparatus facilitates high-temperature tensile testing in vacuum
LEWIS-42 B63-10345 03
Simple control device senses solar position
JPL-638 B65-10061 01

SUBJECT INDEX

Refractory metal shielding / insulation/
Increases operating range of induction furnace
LEWIS-202 B65-10188 02
Infrared shield facilitates optical pyrometer measurements
LANGLEY-133 B65-10272 02
Aluminized fiber glass insulation conforms to curved surfaces
N-PS-877 B66-10024 03
Densitometer system for liquid hydrogen has high accuracy, fast response
N-PS-969 B66-10438 01
Carriage system remotely moves drawer over extended distance
NU-0092 B66-10711 05
Simple motor drive system operates heavy hinged door
NU-0093 B66-10712 05
Swing-out rail system separates overhead crane rails
B66-10713 05
Mechanism of superconductivity investigated by nuclear radiation
N-PS-1944 B67-10057 02
Apparatus for fabrication of americium-beryllium neutron sources prevents capsule contamination
ARG-108 B67-10202 05
Aluminum-titanium hydride-boron carbide composite provides lightweight neutron shield material
NUC-10069 B67-10265 03
N-SAF and 6-SAF neutron and gamma ray albedo model scatter shield analysis program
NUC-10126 B67-10536 06
SOC-DS computer code provides tool for design evaluation of homogeneous two-material nuclear shield
NUC-10142 B67-10537 06
Graphite cloth facilitates vacuum evaporation of silicon monoxide
N-PS-14764 B68-10256 03
Isotopically pure magnesium isotope-24 is prepared from magnesium-24 oxide
ARG-10154 B68-10293 02
Miniature king furnace permits absorption spectroscopy of small samples
ARG-10177 B68-10418 02
Ionsauber vibration calibration system evaluated
N-PS-20018 B69-10125 01
Synthesis of calculational methods for design and analysis of radiation shields for nuclear rocket systems
N-PS-14447 B69-10158 06
Thermal radiation shields for piping in vacuum environments
LEWIS-10899 B69-10262 03
New shield for gamma-ray spectrometry
ARG-10388 B69-10344 02

RADIATION SOURCES

New mintering process adjusts magnetic value of ferrite cores
GSF-C-129 B63-10606 01
Multiple element soft x-ray source produces wide range of radiation
GSFC-286 B65-10082 02
Radon gas, useful for medical purposes,

</table>
Resilient clamp holds fuel cell stack through thermal cycle

Lightweight, all-metal hose assembly has high flexibility and strength over wide range of temperature and pressure

Pipe joints reinforced in place with fitted aluminum sleeves

Method for reinforcing tubing joints

Boron carbide whiskers produced by vapor deposition

Composite gaskets are compatible with liquid oxygen, resist compression set

Tungsten fiber-reinforced copper composites for high strength electrical conductors

Nonwoven glass fiber mat reinforces polyurethane adhesive

Tungsten fiber-reinforced nickel superalloy

Boron fiber-reinforced aluminum alloy tubing /experimental/

Simple circuit provides reliable multiple signal average and reject capability

Composite filter steepens rejection slopes in microwave application

Solid state circuit averages multiple signals and rejects those varying significantly from the average

Theory of a refined earth model

Temperature-controlled resistor

Fortran 4 program calculates velocities and streamlines in a tandem blade turbine machine

Uni-junction frequency divider is free of backward loading

High-intensity flashing beacon powered by mercury cells

Circuit exhibits power efficiency greater than 75 percent

One-dimensional reacting gas nonequilibrium performance program

Peformance

Pulse generator persists nondestructive testing of component breakdown voltage

Triphase spark gap actuates overvoltage relay

Instrument sequentially samples ac signals from several accelerometers

Improved relay optical element for spectrometer using cryogenically cooled detector

Pipe joints reinforced in place with fitted aluminum sleeves

Method for reinforcing tubing joints

Boron carbide whiskers produced by vapor deposition

Composite gaskets are compatible with liquid oxygen, resist compression set

| Inexpensive, stable circuit measures heart rate | B65-10010 | 01 |
| Zener diode function generator requires no external reference voltage | B65-10013 | 01 |
| Transistor voltage comparator performs own sensing | B65-10028 | 01 |
| Circuit detects errors in address currents for | B66-10679 | 01 |

## RESISTORS

- Flow-test device fits into restricted access passages
- Viscosity and density of methanol/water mixtures at low temperatures
- Calibration of a resistance thermometer down to 0.04 degrees K
- Improved sensor counts micrometeoroid penetrations
- Simple circuit provides adjustable voltage with linear temperature variation
- Transistorized trigger circuit is frequency-controllable
- High efficient square-wave oscillator operator at high power levels
- Circuit controls transients in SCR inverters
- Monostable circuit with tunnel diode has fast recovery
- Temperature-sensitive network drives astable multivibrator
- Low-power transistorized circuit provides staircase waveform
- Efficient circuit triggers high-current, high-voltage pulses
- Ring counter may be advanced or retarded by command signal
- Field effect transistors used as voltage controlled resistors
- Electronic device simulates respiration rate and depth
- Voltage generator sweeps oscillator frequency linearly with time
- Circuit converts AM signals to FM for magnetic recording
- Tunnel-diode circuit features zero-level clipping
- Inexpensive, stable circuit measures heart rate
- Zener diode function generator requires no external reference voltage
- Transistor voltage comparator performs own sensing
- Circuit detects errors in address currents for
magnetic core arrays

M-PS-468 B66-10113 01

Digitally controlled pulse-level discriminator operates over wide voltage range
GSFC-324 B66-10129 01

Diffusion technique stabilizes resistor values
MSC-205 B66-10142 01

Mounting improves heat-sink contact with beryllia washer
MSC-194 B66-10144 01

Simple circuit provides reliable multiple signal average and reject capability
NO-2069 B66-10228 01

Tool forms right angles in component leads
M-PS-722 B66-10346 05

Function generator eliminates necessity of series summation
GSFC-214 B66-10351 01

Semiconductors can be tested without removing them from circuitry
M-PS-1163 B66-10447 01

Basic suppression techniques are evaluated
M-PS-667 B66-10449 01

Pulse generator using transistors and silicon controlled rectifiers produces high current pulses with fast rise and fall times
MSC-405 B66-10456 01

Solid state circuit switches ac load
JFL-790 B66-10465 01

High voltage potential divider calibrated by simple device
ARC-83 B66-10497 01

Solid state annunciator facilitates complex system troubleshooting
M-PS-1258 B66-10505 01

Method permits mechanical and electrical checkout of piezoelectric transducers while installed in a system
ARC-73 B66-10533 01

Miniature electrometer preamplifier effectively compensates for input capacitance
ARC-69 B66-10549 01

Monitoring circuit accurately measures movement of solenoid valve
M-PS-1829 B66-10568 01

Resistor monitors transfer of liquid helium
LANGLEY-229 B66-10580 01

Electronic circuit provides accurate sensing and control of dc voltage
NU-0089 B66-10591 01

Thermocouples electrically checked while connected to data system
LANGLEY-182 B66-10623 01

Heater control circuit provides both fast and proportional control
M-PS-906 B67-10097 01

Integrator can easily be set and reset with an electronic switch
ARC-10002 B67-10135 01

Digital-to-analog converter operates from low level inputs
JFL-907 B67-10357 01

Circuit automatically calibrates flowmeter against liquid-level gage reference
M-PS-2194 B67-10376 01

Converter provides constant electrical power at various output voltages
GSFC-519 B67-10481 01

Cardiotachometer with linear beat-to-beat frequency response
ARC-10033 B67-10598 01

Temperature-stabilized, triggerable microelectronic astable multivibrator starts reliably
MSC-1173 B67-10624 01

Gyrorot-type circuits replace ungrounded inductors
XIC-10608 B68-10084 01

Moebius resistor is noninductive and nonreactive
SAH-10020 B68-10267 01

Flow angle sensor and readout system
LEWIS-90298 B69-10050 01

Microelectronic oscillator, p
GSFC-10387 B69-10063 01

Microelectronic oscillator
GSFC-10375 B69-10064 01

Remotely-actuated biomedical switch
ARC-10705 B69-10117 01
SUBJECT INDEX

Bootstrap unloader
XBP-09768

Integrated circuit with multiple collector current source
M-PS-20177

Calibration of a resistance thermometer down to 0.04 degrees K
ARC-10318

Linear-log counting-rate meter uses transconductance characteristics of a silicon planar transistor
ARC-10158

Improved liquid-level sensor for cryogenics
ARG-10162

Technique for abrasive cutting of thick-film conductors for hybrid circuits
MSC-13242

Continuous analysis of nitrogen dioxide in gas streams of plants
ARC-10356

Punch-magnet delay eliminated by modification of circuit
ARG-10333

Concept for improved vacuum pressure measuring device
M-PS-20172

Temperature-controlled resistor
NPO-10713

Fuse protects circuit from voltage and current overloads
MSC-12135

Radiometric temperature reference
NCO-13276

Constant-frequency, variable-duty-cycle multivibrator
XGS-10033

Miniature backward-diode pressure sensor features stability and low power consumption
ERC-10229

RESOLUTION

Gapped toroid provides infinite resolution of delay-line pickup
GSFC-370

Modified developer increases line resolution in photosensitive resist
GSFC-386

Local measurements in turbulent flows through cross correlation of optical signals
M-PS-1268

Ultran miniature television camera
M-PS-11967

Lamb waves increase sensitivity in nondestructive testing
ARG-10009

Circuit enhances vertical resolution in raster scanning systems
MSC-12123

Improved gas ring laser
MSC-11584

Mounting method improves electrical and vibrational characteristics of screen electrodes
M-PS-20169

Fluorescent photography of spray droplets using a laser light source
LEWIS-10777

Spherical ion source
XBP-08898

Semiautomated inspection of microfilm records
M-PS-20240

Combination ranging system and mapping radar
NPO-11001

Thermal calibration target
XGS-11144

RESONANCE

Lamb waves increase sensitivity in nondestructive testing
ARG-10009

Improved atomic resonance gas cell for use in frequency standards
MSC-11666

Device for diode tuning in a stripline varactor harmonic multiplier
M-PS-20153

RESONANCE SCATTERING

Calculation of resonance neutron absorption in two-region problems /the GARNOL code/
NUC-10045

RESONANT FREQUENCIES

Welded pressure transducer made as small as 1/36-inch in diameter
ARC-11

Vibrating- resehoss electrometer has high conversion gain
ARC-38

Auxiliary circuit enables automatic monitoring of EKG's
MSC-106

Electrostatically driven dynamic capacitor employs capacitive feedback
JPL-771

Remote rapidly varying pressures accurately measured
FRC-28

Friction device damps linear motion of rotating shaft
WGO-214

Damping technique gives accelerometer flat frequency response
M-PS-471

Resonant frequency can be adjusted on vibration mount
JPL-SC-134

Process reduces secondary resonant emission in electronic components
JPL-934

Simple pump maintains liquid helium level in cryostat
M-PS-1763

Liquid hydrogen densitometer utilizes open-ended microwave cavity
LEWIS-390

Hydrogen maser as a highly stable frequency reference
M-PS-2637

Computer program simplifies design of rotating components of turbomachinery
NUC-10046

Post-stressed concrete foundation may reduce machinery vibration
ARG-130

I-557
System precisely controls oscillation of vibrating mass
M-PS-1875  B67-10276  01

Computer program for determination of natural frequencies of closed spherical sandwich shells
ISC-1246  B67-10279  06

Vibration damping composition has flush-away feature
M-PS-597  B67-10432  03

Study made of thin-walled pipe response to turbulent fluids
M-PS-1321  B67-10518  05

Computer program provides improved longitudinal response analysis for axisymmetric launch vehicles
LANGLEY-10093  B67-10531  06

Mounting method improves electrical and vibrational characteristics of screen electrodes
M-PS-20169  B69-10097  01

Resonant microwave dichroic surface
GSFC-10658  B69-10274  01

Automatic tuning of hydrogen masers
GSFC-10127  B69-10452  01

Multicolor stroboscope pinpoints resonances in vibrating components
JPL-0033  B66-10223  01

Dampers reduce effects of resonance on force transducer
WSO-321  B66-10550  05

Resonant frequency can be adjusted on vibration mount
JPL-SC-134  B66-10672  05

Edge-type connectors evaluated by electrical noise measurement
M-PS-2243  B67-10125  01

Modal combination computer program for dynamic analysis of structures
NPO-10129  B67-10217  06

System precisely controls oscillation of vibrating mass
M-PS-1675  B67-10276  01

Study made of large amplitude fuel sloshing
M-PS-12081  B67-10439  03

Study made of thin-walled pipe response to turbulent fluids
M-PS-1321  B67-10518  05

Resonant microwave dichroic surface
GSFC-10658  B69-10274  01

Auto-tuning of hydrogen masers
GSFC-10127  B69-10452  01

System precisely controls oscillation of vibrating mass
M-PS-1875  B67-10276  01

Study made of large amplitude fuel sloshing
M-PS-12081  B67-10439  03

Study made of thin-walled pipe response to turbulent fluids
M-PS-1321  B67-10518  05

Nosepiece respiration calibration systems evaluated
M-PS-20014  B69-10125  01

Computer program conducts facilities utilization and occupancy survey
NPO-10438  B68-10137  06

Device induces lungs to maintain known constant pressure
MSC-50  B64-10108  04

Automatic patient respiration failure detection system with wireless transmission
ARC-10174  B66-10365  01

Pneumotachometer counts respiration rate of human subject
MSC-92  B64-10259  01

Simulator produces physiological waveforms
MSC-94  B65-10091  01

Plant respirometer enables high resolution of oxygen consumption rates
HQ-87  B66-10406  04

High- and low-pressure pneumotachometers measure respiration rates accurately in adverse environments
PNC-10012  B68-10188  01

Nosepiece respiration monitor
ERC-10136  B68-10438  01

Computer program simulates physical systems by solving the simultaneous differential equations describing the system
BPO-10019  B67-10193  06

Past-response frequency-to-analog converter
I-PS-709  B67-10257  04

Inductor flyback characteristic gives voltage regulator fast response
GSFC-361  B65-10257  01

Differential pressure gauge has fast response
M-PS-358  B65-10285  05

Computer program reduces calculation time of normal response functions
M-PS-1517  B67-10108  01

Computer program calculates monotonic maximum likelihood estimates using method of reversals
M-PS-1516  B67-10136  01

Shoulder adapter steadies spot welding gun
M-PS-321  B66-10076  05

Cold solid propellant motor has stop-start capability
JPL-SC-107  B66-10141  01

Multisurface fixture permits easy grinding of tool bit angles
I-PS-586  B66-10171  05

Ultrasound cleaning restores depth-type filters
E-PS-540  B66-10298  03

Screw locking cups quickly and neatly crimped
NU-0009  B65-10049  05

Removal of retaining washers of the waffle-spring type
LEWIS-10403  B68-10176  05

Optically driven switch turn-off time reduced by opaque coatings
JPL-SC-107  B66-10141  01

Study indicates fluid digital computation systems are feasible
M-PS-520  B67-10181  01

Computer program simulates physical systems by solving the simultaneous differential equations describing the system
BPO-10019  B67-10193  06

Direct reading of electrocardiograms and respiration rates
KSC-10233  B69-10188  04

Automatic tuning of hydrogen masers
GSFC-10127  B69-10452  01

Inductor flyback characteristic gives voltage regulator fast response
GSFC-361  B65-10257  01

Differential pressure gauge has fast response
M-PS-358  B65-10285  05

Computer program reduces calculation time of normal response functions
M-PS-1517  B67-10108  01

Computer program calculates monotonic maximum likelihood estimates using method of reversals
M-PS-1516  B67-10136  01

Shoulder adapter steadies spot welding gun
M-PS-321  B66-10076  05

Multisurface fixture permits easy grinding of tool bit angles
I-PS-586  B66-10171  05

Ultrasound cleaning restores depth-type filters
E-PS-540  B66-10298  03

Screw locking cups quickly and neatly crimped
NU-0009  B65-10049  05

Pipe joints reinforced in place with fitted aluminum sleeves
MSC-1109  B67-10271  05

Circuit automatically calibrates flowmeter against liquid-level gage reference
M-FS-2194  B67-10376  01

Wear studies made of slip rings and gas bearing components
M-FS-12882  B67-10403  05

Torque meter aids study of hysteresis in motor rings
M-FS-12215  B67-10412  01

Aluminum and stainless steel tubes joined by simple ring and welding process
M-FS-13120  B67-10472  05

Cone and column solar energy concentrator
LANGLET-210  B67-10517  01

Computer program performs rectangular fitting stress analysis
M-FS-13010  867-10250  06

Dynamic valve seal is reliable at cryogenic temperatures
M-FS-12987  B67-10526  05

Cryogenic seal concept for static and dynamic conditions
M-FS-12986  B67-10673  05

Mass loading effects on vibrated ring and shell structures
M-FS-14979  868-10532  03
Liquid gallium rotary electric contact
LEWIS-10828 B69-10138 03

Conceptual techniques for reducing
parasitic current gain of lateral pnp
transistors
MSC-13199 B69-10244 01

Sealing a rubber bladder between two sections
of an accumulator
M-PS-20403 B69-10355 05

Contact stresses calculated for
miniature slip rings
M-PS-280 B65-10098 05

Improved poppet valve provides positive
damagproof seal
M-PS-293 B67-10591 05

Flexible plastic ring assembly makes durable
shaft seal
WGO-227 B65-10367 05

Threaded split ring connector separates
structural sections
LANGLEY-145 B65-10383 05

Fluorocarbon seal replaces metal piston ring
in low density gas environment
LEWIS-10277 B67-10591 05

Shock-absorbing caster wheel is simple and
compact
SAM-10019 B68-10266 05

Shock-absorbent mountings for bearings
NFO-10626 B69-10331 05

Jig and fixture aid fabrication of tungsten
rivets
LEWIS-185 B65-10101 05

Cable clamp bolt fixture facilitates
assembly in close quarters
KSC-67-80 B67-10244 05

Development of structural test articles
from magnesium-lithium and beryllium
M-PS-18459 B69-10417 03

Flexible rivet set
M-PS-20317 B69-10459 05

Voltage variable oscillator has high phase
stability
LANGLEY-123 B65-10204 01

Direct indication of particle size in
fluidized beds
ARGO-10759 B69-10083 05

Adding calcium improves lithium ferrite core
HRC-10036 B69-10686 06

Shock-absorbent mountings for bearings
NFO-10626 B69-10331 05

Rocket engine nozzle photographic
system
NFO-10174 B68-10113 02

New method used to fabricate light-weight heat
exchanger for rocket motor
LEWIS-43 B63-10386 02

Novel clamps align large rocket cases,
eliminate back-up bars
M-PS-1 B63-10376 05

Plastic tubing protects flexible copper hose

BIBGS

ROCKET ENGINE DESIGN
Development of detonation reaction engine
M-PS-14020 B67-10652 01
Rocket engine analog simulation

BQ-58  B66-10577  01

 SUBJECT INDEX

 ROSES

 M-PS-1265  B66-10614  01

 Electrons beam parallel X-ray generator
MSSC-1022  B67-10372  02

 Handbooks describe eddy current techniques used in nondestructive testing of metal parts and components
M-PS-13172  B67-10374  03

 Study made of pneumatic high pressure piping materials /10,000 psi/
KSC-10133  B67-10437  03

 A method of determining combustion gas flow
H-PS-13757  B67-10455  03

 A polar graphic method for determining the attitude of rocket vehicles
GSFC-10860  B69-10591  02

 Aerodynamic forces of fluttering cylindrical and/or planar structures
H-PS-20497  B69-10781  02

 ROCKS

 Rock bit requires no flushing medium to maintain drilling speed
JPL-WOO-031  B65-10109  05

 Preparing rock powder specimens of controlled size distribution
WOO-10007  B66-10297  05

 Transplutonium elements produced from rock debris of underground detonations
ARC-10222  B69-10054  03

 ROCKWELL HARDNESS

 Control of component differential hardness increases bearing life
LEWIS-190  B65-10251  05

 Flared-tube fittings with replaceable seat inserts
MSC-15372  B69-10519  05

 ROBS

 Lightweight universal joint transmits both torque and thrust
JPL-SC-163  B66-10122  01

 Cooling method prolongs life of hot-wire transducer
LEWIS-41  B63-10344  02

 Buckle joins web straps quickly, adjusts easily
LANGLEY-21  B64-10119  05

 Simple transducer measures low heat-transfer rates
JPL-466  B64-10122  01

 Carbon-arc rod holder has long life, reduces arc splatter
MSC-144  B65-10095  03

 System measures unidirectional forces, excludes extraneous forces
LEWIS-170  B65-10154  05

 Mounting facilitates removal and installation of flame-detector rods
WOO-169  B66-10150  05

 Fibers of newly developed refractory ceramics produced by improved process
WOO-169  B66-10196  03

 Bypass rod transfers heat developed in thermionic diode
JPL-SC-136  B66-10303  05

 Ultrasonic water column probe speeds up testing of welds
BQ-58  B66-10577  01
Composite weld rod corrects individual filler weaknesses
M-FS-1923 B67-10107 05

Study of yttrium iron garnet rods reveals new magneticshock echo mode
B67-10153 01

High-strength tungsten alloy with improved ductility
LEWIS-10257 B67-10340 03

Pressure levels and pulsation frequencies can be varied on high pressure/frequency testing device
LEWIS-10205 B67-10360 05

Fiber glass reinforced structural materials for aerospace application
M-FS-14806 B68-10360 03

Method of making conical fiber optical components
IRD-09745 B69-10020 02

An ultrasonic method for studying elastic moduli as a function of temperature
ARG-10187 B69-10082 02

Restricted-flow junction between liquids
NRO-10682 B69-10332 02

Piezoelectric linear actuator
MSC-13194 B69-10469 02

A sterilizable high-impact antenna
NRO-10231 B69-10697 01

ROLL FORMING
Metal bellows custom-fabricated from tubing
LEWIS-192 B65-10150 05

Thermal stress-relief treatments for 2219 aluminum alloy are evaluated
M-FS-1213 B66-10448 03

Metal tube reducer is inexpensive and simple to operate
ARG-49 B67-10401 05

Roll diffusion bonding of titanium alloy panels
M-FS-14743 B68-10161 05

ROLLER BEARINGS
Control of component differential hardness increases bearing life
LEWIS-190 B65-10251 05

Swing-out rail system separates overhead crane rails
NU-0094 B66-10713 05

Tester for study of rolling element bearings
LEWIS-305 B67-10009 01

Rolamite - A new mechanical design concept
SN-10001 B67-10611 05

Dampness in rolling element bearings may be detected early
NCO-90031 B67-10658 01

Bearings use dry self-lubricating cage materials
LEWIS-10432 B68-10165 05

ROLLERS
Stainless-steel elbows formed by spin forging
M-FS-122 B63-10590 05

Upsetting butt edge increases weld-joint strength
M-FS-175 B64-10164 05

T-handle wrench has torque-limiting action
MSC-280 B66-10065 05

Extensometer automatically measures
SUBJECT INDEX

Evaluation of magnetic materials for static inverter and converters
LEWIS-10343

Laser action from a terbium beta-ketoenolate at room temperature
GSFC-10593

Silphenylene elastomers have high thermal stability and tensile strength
M-PS-20250

Technique for predicting the thermal expansion coefficients of cryogenic metallic alloys
NRC-10554

ROBOTS
Computer program conducts facilities utilization and occupancy survey
NRC-10026

ROOT-MEAN-SQUARE ERRORS
Maximum RMS error comparison of several redundancy techniques
M-PS-15075

Automatic Gaussian random-noise limiter
HRO-10169

ROOTS
Root-cubing and general root-powering methods for finding the zeros of polynomials
AEG-10444

ROOTS OF EQUATIONS
Computer program provides linear sampled-data analysis for high order systems
M-PS-19821

Simple tunnel diode circuit for accurate zero crossing timing
AEG-10309

ROBOTIC GYROSCOPES
Adaptive control circuit prevents amplifier saturation
ERC-10026

ROBOTIC STABILITY
Proposed method of rotary dynamic balancing by laser
M-PS-12422

Electro-mechanical rotary actuator operates over wide temperature range
M-PS-18402

ROTATING BODIES
Shock absorber protects motive components against overloads
WGO-092

Pickup device reads pressures from ports in rotating mechanisms
LEWIS-158

Rotating filters permit wide range of optical pyrometry
LANGLEY-33

Dispensing system eliminates torsion in deployed hoses
MSC-80

Rotating holder permits accurate grinding of metallurgical microsamples
LEWIS-131

Multiple test chamber exposes materials to various environments
MSC-179

Centrifugal device separates liquid from gas
MSC-282

Cryostat modified to aid rotating beam fatigue test
M-PS-435

ROBOTIC CYLINDERS
Rotating mandrel speeds assembly of plastic inflatables
LANGLEY-155

Segmented ball valve is easy to open and close
WGO-248

Intermediate rotating ring improves reliability of dynamic shaft seal
M-PS-575

Rotary valve controls multiple hydraulic levels
M-PS-361

Rotating magnetic poles used to pump mercury
LEWIS-276

Process yield Co-Fe alloys with superior high temperature magnetic properties
LEWIS-333

Rotational fluid coupling eliminates hose entanglements
MSC-312

Automatic system determines moments of inertia of asymmetrical objects
M-PS-1769

Computer program simplifies design of rotating components of turbomachinery
M-PS-10046

Eccentric drive mechanism is adjustable during operation
M-PS-2576

Flowmeter determines mix ratio for viscous adhesives
M-PS-2308

Coaxial cable stripping device facilitates RP cabling fabrication
HPO-10315

Tool samples subsurface soil free of surface contaminants
MSC-10988

Between-bearing shaft seal, a concept
M-PS-18179

Improved gas ring laser
MSC-11584

High-speed pulse camera
MSC-11353

Multiple-orifice throttle valve
XBP-09698

Detecting hydrogen-containing contaminants on metal surfaces
M-PS-20456

Multi-feed cone for Cassegrainian antenna
HPO-10539

Precisely repeatable rotary mechanics
HPO-10679

Burn-rate testing apparatus
MSC-10947

ROTATING CYLINDERS
Mechanism facilitates coating of inner surfaces of metal cylinders
GSFC-515

Pneumatic wrench retains or discharges nuts or bolts as desired
ND-0085

X-ray film holder permits single continuous picture of tubing joint
LEWIS-10382

Compact rotating cup anemometer
I-565
ROTATING DISKS

**BOTATING DISKS**

- Analog device simulates physiological waveforms
  - ESC-51
  - B64-10109 01
- Gear drive automatically indexes rotary table
  - E-PS-753
  - B66-10383 05
- System enables dimensional inspection of very large structures
  - E-PS-2477
  - B67-10214 05
- Flow angle sensor and readout system
  - LEWIS-90298
  - B69-10050 01
- Study of high-speed angular-contact ball bearings under dynamic load
  - E-PS-20562
  - B69-10367 05

**ROTATING ELECTRICAL MACHINES**

- Electronic visualization of gas bearing behavior
  - LEWIS-10711
  - B69-10073 01
- Improved design of item in high speed rotating machinery
  - E-PS-10441
  - B69-10373 05
- Automatic sample rotator for metallographic polishing
  - NPO-11015
  - B69-10596 03

**ROTATING FLUIDS**

- Rotational fluid coupling eliminates hose entanglements
  - ESC-312
  - B66-10585 05
- Twin helix system produces fast scan in infrared detector
  - E-PS-1598
  - B66-10638 02
- High-speed camera synchronization
  - E-PS-18062
  - B66-10262 02
- Flow angle sensor and readout system
  - LEWIS-90298
  - B69-10050 01
- Multipurpose binocular scanning apparatus
  - NPO-11002
  - B69-10311 02

**ROTATING SHAFTS**

- Optics used to measure torque at high rotational speeds
  - LEWIS-13
  - B63-10338 01
- Ombrometer senses depletion of lubricant in journal bearings
  - LEWIS-37
  - B64-10042 01
- Apparatus alters position of objects to facilitate demagnetization
  - GSFC-234
  - B64-10277 05
- Flexible plastic ring assembly makes durable shaft seal
  - WOO-227
  - B65-10367 05
- Friction device daaps linear motion of rotating shaft
  - WOO-274
  - B66-10030 05
- Noncontacting transducer measures shaft torque
  - E-PS-474
  - B66-10048 01
- Flexible arms provide constant force for pressure switch calibration
  - EQ-38
  - B66-10317 05
- Laser measuring system accurately locates point coordinates on photograph
  - ARG-74
  - B66-10560 02
- Rocket engine vibration accurately measured by photography
  - E-PS-1916
  - B66-10652 02

**ROTATING STALLS**

- Environmental study of miniature slip rings
  - E-PS-2443
  - B67-10210 05
- Design concept to decrease relative speed of ball bearings
  - E-PS-2003
  - B67-10212 05
- Segmented, arch-bound carbon seal is pressure loaded
  - E-PS-12777
  - B67-10325 05
- Spiral-grooved shaft seals substantially reduce leakage and wear
  - LEWIS-10357
  - B67-10270 05
- Miniature paint-spray gun for recessed areas
  - RSC-13060
  - B68-10387 05
- Connect-disconnect coupling for preadjusted rigid shafts
  - RSC-15470
  - B69-10684 05
- High-pressure seals for rotary shafts
  - E-PS-18548
  - B69-10649 05
- A rotating, noncapillary heat pipe
  - LEWIS-10258
  - B69-10695 05
- Cooled miniature pressure transducers effective at high temperatures
  - LEWIS-10401
  - B68-10370 01

**ROTATION**

- Device transmits rotary motion through hermetically sealed wall
  - JPL-303
  - B63-10198 05
- Bearing transmits rotary and axial motion
  - JPL-303
  - B64-10103 05
- Explosives actuate nonmagnetic indexing device
  - GSFC-237
  - B65-10017 05
- New coupling compensates for shaft misalignment
  - NRO-0013
  - B65-10077 05
- Universal bellows joint restraint permits angular and offset movement
  - WOO-102
  - B65-10371 05
- Ring counter circuit switches multiphase motor direction of rotation
  - JPL-SC-166
  - B66-10101 01
- Compact actuator converts rotary to linear motion
  - JPL-786
  - B66-10265 05
- Uniform reflective films deposited on large surfaces
  - GSFC-507
  - B66-10483 02
- Multilayer refractory nozzles produced by plasma-spray process
  - WOO-318
  - B66-10611 05
- Power arc welder touch-started with consumable electrode
  - E-PS-1485
  - B66-10641 05
- Welding torch and wire feed manipulator
  - E-PS-13102
  - B67-10385 05
- Metal tube reducer is inexpensive and simple to operate
  - AM 49
  - B67-10401 05
- Torque meter aids study of hysteresis motor rings
  - E-PS-12215
  - B67-10412 01
- Swing arm carrier protects flexible lines during test item rotation
  - RSC-11464
  - B68-10037 05
- Global angle sensor

**SUBJECT INDEX**

SCATTERING
Instrument performs nondestructive chemical analysis, data can be telemetered JPL-SC-078 B65-10317 01
Method prevents secondary radiation in radiographic inspection N-PS-13383 B67-10391 02
Thick transducers used for generating short-duration stress pulses in thin specimens ARG-10232 B69-10045 01
Calculation of resonance neutron absorption in two-region problems /the GAROL code/ NUC-10045 B67-10223 06
Quantitative mechanical calculations of reactive scattering cross sections in bimolecular encounters N-PS-13594 B67-10527 03
Compilation of detection sensitivities in thermal-neutron activation ARG-10068 B67-10641 03
SCAVENGING

Computer program /P1-GAS/ calculates the P-0 and P-1 transfer matrices for neutron moderation in a monatomic gas. 

Electron interaction in matter 

SCAVENGING

Primary radical yields in pulse irradiated alkaline aqueous solution 

SCHEDULING

Actuator device schedules rate of valve closure 

Vis-A-Plan /visualize a plan/ management technique provides performance-time scale 

KOPE /Kalendar Oriented Program Efforts/ provides data for management decisions 

Computerized Schedule Effectiveness Technique /SET/ determines present and future schedule position 

Automatic planning concept - An analysis of optimum scheduling 

DSN seven day/twelve week schedule program 

Visual task analysis /VISTA/ 

Programmed schedule holds for improving launch vehicle holds 

SCHOOLS

Handbooks for nondestructive testing using ultrasonics 

SCINTILLATION

Thin carbon film serves as UV bandpass filter 

Tunnel diode circuit used as nanosecond-range time marker 

Dual-mode operation of a neutron source, a concept 

Direct in-vial collection for liquid-scintillation assay of carbon-14 and tritium 

SCINTILLATION COUNTERS

Cesium iodide crystals fused to vacuum tube faceplates 

Plastic scintillator converts standard photomultiplier to ultraviolet range 

Nondestructive test method accurately sorts mixed bolts 

Radioactive method enables determination of surface areas rapidly and accurately 

Thermal neutron image intensifier tube provides brightly visible radiographic pattern 

SUBJECT INDEX

New electron microscope employs new video display technique 

Epoxy resins produce improved plastic scintillators 

The response of monoenergetic gamma rays in finite media are investigated 

Direct measurement of carbon-14 in carbon dioxide by liquid scintillation counting 

Mossbauer vibration calibration systems evaluated 

Recent development in organic scintillators 

Combustion method for assay of biological materials labeled with carbon-14 or tritium, or double-labeled 

Improved pulse shape discriminator for fast neutron-gamma ray detection system 

Manganese-56 coincidence-counting facility precisely measures neutron-source strength 

Run-in with chemical additive protects gear surface 

Film coating permits low-force scribing 

Scribable coating for plastic films 

Coaxial cable stripping device facilitates RF cabling fabrication 

Restricted-flow junction between liquids 

Improved method of dicing integrated circuit wafers into chips 

Mounting method improves electrical and vibrational characteristics of screen electrodes 

Luminescent screen composition for cathode ray tubes 

Mounting method improves electrical and vibrational characteristics of screen electrodes 

Technique for abrasive cutting of thick-film conductors for hybrid circuits 

Filter for high-pressure gases has easy take-down, assembly 

Servo system facilitates photoelastic strain measurements on resins 

Fine-mesh screen made by simplified method

Improved method of dicing integrated circuit wafers into chips
EBC-10138 B69-10441 01

Reducing contact resistance at semiconductor to metal or aluminum to metal interfaces
EBC-10254 B69-10689 01

Pulse-height defect due to electron interaction in dead layers of Ge/Li/ gamma-ray detectors
ARG-10362 B69-10767 02

Impurity diffusion process for silicon semiconductors is fast and precise
GSFC-397 B65-10300 01

Vapor grown silicon dioxide improves transistor base-collector junctions
GSFC-399 B66-10091 01

Improved chopper circuit uses parallel transistors
K-FS-468 B66-10113 01

Optically driven switch turn-off time reduced by opaque coatings
JPL-SC-107 B66-10141 01

Diffusion technique stabilizes resistor values
MSC-205 B66-10142 01

Circuit protects regulated power supply against overload current
GSFC-453 B66-10292 01

Bypass rod transfers heat developed in thermionic diode
NF-10404 B66-10303 05

Double emitter suppressed carrier modulator uses commercially available components
H-FS-2944 B67-10101 01

Efficient millimeter wave 1140 GHz diode for harmonic power generation
BQ-61 B67-10166 01

An efficient, temperature-compensated subcarrier oscillator
JPL-SC-091 B67-10251 01

Pressure-sensitive bonded junction transducers
EBC-10087 B68-10563 01

Integrated circuit with multiple collector current source
H-FS-20177 B69-10126 01

Modification to improve self-isolating transistor arrays
H-FS-20499 B69-10678 01

Miniature backward-diode pressure sensor features stability and low power consumption
EBC-10229 B69-10690 01

Temperature-compensation circuit stabilizes performance of vidicons
JPL-486 B64-10226 01

Radiation-detector optical-imaging device is of simplified construction
GSFC-251 B64-10299 01

High permeability semiconductors permit close-tolerance soldering
GSFC-319 B65-10134 05

Refractory coating protects intricate graphite elements from high-temperature hydrogen
MU-0027 B65-10027 01

Status of ultrachemical analysis for semiconductors
H-FS-2254 B67-10138 03

Process controls introduction of selected impurities into semiconductor wafers
GSFC-523 B67-10303 01

Silicon strain sensors enable pressure measurement at cryogenic temperatures

**SHPL REGISTERS**

- Small digital recording head has parallel bit channels, minimizes cross talk
- Computer circuit will fit on single silicon chip
- Blocking oscillator uses low triggering voltage
- Ring counter may be advanced or retarded by command signal
- Magnetic-shift-register circuit controls stepper motor operation
- Queuing register uses fluid logic elements
- Binary sequence detector uses minimum number of decision elements
- Electronic frequency discriminator
- Improved television signal processing system
- Review of research and development in fluid logic elements
- Parallel-to-serial biphase-data converter
- Acquisition of pseudonoise signals by sequential estimation
- Simultaneous message framing and error detection

**SUBJECT INDEX**

- Fluidic-thermochromic display device
- Simple quasi-exponential slope generator
- Flexible rivet-set
- NPO-10315
- Explosive bonding of metal-matrix composites
- Simple device produces accelerometer calibration pulse
- Perforations in jet engine supersonic inlet increase shock stability
- Thersally conductive metal wool-silicone rubber material can be used as shock and vibration damper
- Frictional wedge shock mount is inexpensive, has good damping characteristics
- Break-up of metal tube makes one-time shock absorber, bars rebound
- Portable flooring protects finished surfaces, is easily moved
- NPF-8
- Novel shock absorber features varying yield strengths
- Shock absorber protects motive components against overloads
- Shock mount isolates pressure transducers from shock loading
- Improved television signal processing system
- Lateral ring metal elastic wheel absorbs shock loading
- Land landing couch dynamics computer program
- Sleeved damper limits spring surging
- Pressure variable orifice for hydraulic control valve
- Shock-absorbing caster wheel is simple and compact

**I-588**

Pulse-height defect due to electron interaction in dead layers of Ge/Li/gamma-ray detectors  B69-10767  02

SIGNAL DETECTORS
Phase detector circuit synthesizes own reference signal  B65-10080  01
Detector circuit compensates for vidicon beam current variations  B65-10212  01
Frequency discriminator with binary output eliminates tuned circuits  B65-10349  01
Digitally controlled pulse-level discriminator operates over wide voltage range  B66-10129  01
Simple circuit provides reliable multiple signal average and reject capability  B66-10282  01
Hydrogen fire detection system features sharp discrimination  B66-10368  01
Instrument automatically selects peak acceleration signal from several accelerometers  B66-10462  01
Spray-on electrodes enable EKG monitoring of physically active subjects  B66-10649  04
Monitor assures availability and quality of communication channels  B67-10028  01
Electronic frequency discriminator  B67-10151  01
Oscilloscope used as X-Y plotter or two-dimensional analyzer  B67-10269  01
Transistor biased amplifier minimizes diode discriminator threshold attenuation  B67-10311  01

SIGNAL GENERATORS
Accuracy of laser measurements improved by pulse autocorrelator electronic system  B67-10338  01
Continuous wave detector has wide frequency range  B67-10386  01
Unique frequency-shift-keyed demodulation system  B67-10668  01
Improved phase-shift-keyed detector  B69-10101  01
Multichannel analyzers at high rates of input  B69-10214  02

SIGNAL DISTORTION
Frequency offset in linear FM/CW transponder eliminates clutter  B65-10146  01
Detector circuit compensates for vidicon beam current variations  B65-10212  01
Microphone multiplex system provides multiple outlets from single source  B66-10308  01
TT synchronization system features stability and noise immunity  B67-10118  01
Harmonic distortion analyzer speeds setup of magnetic tape recorders  B68-10254  01
Improved communication system for large operations center  B68-10529  01
Millivolt signal limiter  B69-10015  01

SIGNAL ENCODING
Optical output enhances flowmeter accuracy  B65-10395  02

SIGNAL FADING
Lightweight coaxial cable connector reduces signal loss  B65-10284  01
Video signal processing system uses gated current mode switches to perform high speed multiplication and digital-to-analog conversion  B66-10429  01

SIGNAL GENERATORS
Transducer senses displacements of panels subjected to vibration  B65-10085  01
Pressure transducers dynamically tested with sinusoidal pressure generator  B66-10031  01
Circuit operates as sine function generator  B66-10038  01
Parallel line raster eliminates ambiguities in reading timing of pulses less than 500 microseconds apart  B66-10386  01
Logic circuitry used to automatically test shielded cables  B66-10659  01
FM carrier deviation measured by differential probability method  B67-10213  01
A calibration means for spectrum analyzers  B67-10254  01
Electronic test instrument generates extremely small current signals

Electronic test instrument generates extremely small current signals

Signal generator converts direct current to multiphase supplies

Signal generator converts direct current to multiphase supplies

Circuit automatically calibrates flowmeter against liquid-level gage reference

Circuit automatically calibrates flowmeter against liquid-level gage reference

Ultrasonics used to measure residual stress

Ultrasonics used to measure residual stress

Digital voltage-controlled oscillator

Digital voltage-controlled oscillator

Hydraulic servo system increases accuracy in fatigue testing

Hydraulic servo system increases accuracy in fatigue testing

Reflectometer for receiver input system

Reflectometer for receiver input system

Technique increases storage capacity in camera tube target

Technique increases storage capacity in camera tube target

Harmonic distortion analyzer speeds setup of magnetic tape recorders

Harmonic distortion analyzer speeds setup of magnetic tape recorders

Acquisition of pseudonormal signals by sequential estimation

Acquisition of pseudonormal signals by sequential estimation

High-speed camera synchronization

High-speed camera synchronization

Dynamic linearity measurement technique

Dynamic linearity measurement technique

A 35 GHz solid state transmitter/driver

A 35 GHz solid state transmitter/driver

Technique for tuning antenna system producing negligible signal radiation

Technique for tuning antenna system producing negligible signal radiation

Optima PM pre-emphasis

Optima PM pre-emphasis

Automatic frequency control of voltage-controlled oscillators

Automatic frequency control of voltage-controlled oscillators

Range recording technique enables four-way polarization measurements

Range recording technique enables four-way polarization measurements

Linear signal noise summer accurately determines and controls S/N ratio

Linear signal noise summer accurately determines and controls S/N ratio

Electronic frequency discriminator

Electronic frequency discriminator

Voltage regulator/amplifier is self-regulated

Voltage regulator/amplifier is self-regulated

Solid state phase detector replaces bulky transformer circuit

Solid state phase detector replaces bulky transformer circuit

Interference effects eliminated in random oriented space station antenna system

Interference effects eliminated in random oriented space station antenna system

Improved communication system for large operations center

Improved communication system for large operations center

Pulse-code-modulation baseline correction for low signal-to-noise ratios
MSC-13268 B69-10750 01

**SIGNAL TRANSMISSION**

Modified filter prevents conduction of microwave signals along high-voltage power supply leads.
JPL-63 B63-10091 01

Digital system accurately controls velocity of electromechanical drive.
GSFC-287 B65-10096 01

Added diodes increase output of balanced mixer circuit.
GSFC-356 B65-10276 01

Frequency correction device uses digital circuitry.
GSFC-268 B65-10307 01

Variable word length encoder reduces TV bandwidth requirements.
Langley-67 B65-10345 01

Remote preamplifier circuit maintains stability over wide temperature range.
Woo-278 B66-10432 01

Device to color modulate a stationary light beam gives high intensity.
HZ-44 B66-10476 01

Electronic circuit delivers pulse of high interval stability.
MSC-673 B65-10501 01

Rotational fluid coupling eliminates hose entanglements.
MSC-312 B66-10585 05

Monitor assures availability and quality of communication channels.
KSC-66-38 B67-10028 01

Dielectric prisms would improve performance of quasi-optical microwave components.
SRC-10011 B67-10416 01

Pump simulator provides variable pressure-flow characteristics.
Langley-102 B67-10453 05

Optically induced free carrier light modulator.
GSFC-10216 B69-10114 01

Self-shielding printed circuit boards for high frequency amplifiers and transmitters.
HZ-10433 B69-10314 01

Preferred-orientation analysis of polycrystalline materials.
NPO-10604 B69-10336 02

Pocket-sized tone-modulated FM transmitter.
WPO-11180 B69-10725 01

**SIGNALS**

Circuit switches latching relay in response to signals of different polarity.
Woo-055 B63-10508 01

Camera shutter is actuated by electric signal.
ARC-20 B63-10560 05

Ring counter may be advanced or retarded by command signal.
GSFC-101 B64-10144 01

Phase shift frequency synthesizer is efficient, small in size.
H-FS-250 B65-10169 01

Solid state annunciator facilitates complex system troubleshooting.
H-FS-1258 B66-10505 01

High voltage pulse generator.
MSC-12178 B69-10548 01

**SIGNATURES**

Magnetoresistor monitors relay performance.
M-PS-1754 B66-10650 01

**SILICATES**

Flexible protective coatings made from silicon-nitrogen materials.
M-PS-528 B66-10027 03

Silazane polymers show promise for high-temperature application.
M-PS-468 B66-10194 03

Standards for electron probe microanalysis of silicates prepared by convenient method.
GSFC-469 B66-10234 03

Trace levels of metallic corrosion in water determined by emission spectrography.
MSC-1193 B66-10701 03

Study made of far infrared spectra of silicate minerals.
M-PS-1011 B67-10075 02

Manganese-alumina-ceramic glass eliminates rigid controls necessary in bonding metals to ceramics.
SAM-10012 B68-10204 03

Thermal conductivity and dielectric constant of silicate materials.
M-PS-14856 B68-10351 03

Silphenylene elastomers have high thermal stability and tensile strength.
M-PS-20250 B69-10580 03

**SILICON**

Improved high-temperature silicide coatings.
LEWIS-10817 B69-10266 03

Computer circuit will fit on single silicon chip.
JPL-513 B63-10514 01

Miniature stress transducer has directional capability.
JPL-591 B65-10023 01

Microparticle impact sensor measures energy directly.
GSFC-252 B65-10048 01

New alloy brazes titanium to stainless steel.
M-PO-102 B65-10050 05

Solid-state switching used to speed up capacitive integrator.
Langley-104 B65-10159 01

Selenium bond decreases ON resistance of light-activated switch.
JPL-SC-101 B65-10324 01

Aluminum doping improves silicon solar cells.
LEWIS-206 B66-10181 02

Radiation used to temperature compensate semiconductor strain gages.
Langley-207 B66-10186 02

Solar cell submodule design facilitates assembly of lightweight arrays.
JPL-728 B66-10231 02

Circuit protects regulated power supply against overload current.
GSFC-453 B66-10292 01

Substituting transistor for diode improves rectifying means.
GSFC-474 B66-10295 01
Alpha particle backscattering measurements used for chemical analysis of surfaces  
Method of improving contact bonds in silicon integrated circuits  
Blood pressure reprogramming adapter assists signal recording  
Areas of irregular, discontinuous patterns rapidly and accurately measured  
Small, low power analog-to-digital converter  
Silicon solar cell monitors high temperature furnace operation  
Silicon strain sensors enable pressure measurement at cryogenic temperatures  
Temperature or pressure controller  
Improved process for epitaxial deposition of silicon on prediffused substrates  
Electron beam recrystallization of amorphous semiconductor materials  
Improved high-temperature silicide coatings  
An integrated circuit switch  
An electronic circuit for sensing malfunctions in test instrumentation  
A new method for producing optical mirrors  
Reducing contact resistance at semiconductor to metal or aluminum to metal interfaces  
SILICON ALLOYS  
Fusion process using Al-Si filler alloy reliably bonds aluminum parts  
Fusion process provides high-strength bond between aluminum and stainless steel  
Gage of 6.5 per cent Si-Cr sheet is chemically reduced  
Prefused stiffeners used to fabricate structural components for pressurized tanks  
Study made of ductility limitations of aluminum-silicon alloys  
Weld microfissuring in Inconel 718 minimized by minor elements  
SILICON CARBIDES  
Metal sheath improves thermocouple using graphite in one leg  
Thermoelectric elements diffusion-bonded to tungsten electrodes
SILICON DIOXIDE

Teleprinter uses thermal printing technique
MSC-11327 B67-10572 01

Ferromagnetic core valve gives rapid action on minimum energy
LHIS-10135 B67-10623 05

Low cost SCR ladder driver indicates contents of digital computer registers
GSFC-10221 B67-10656 01

High voltage pulse generator
MSC-12178 B69-10548 01

SILICON DIOXIDE

Refractory ceramic has wide usage, low fabrication cost
N-FS-67 B63-10481 03

Refractory thermal insulation for smooth metal surfaces
N-FS-160 B64-10099 03

Lead oxide ceramic makes excellent high-temperature lubricant
LEHS-164 B64-10116 03

Adhesive for vacuum environments resists shock and vibration
N-SH-56 B65-10016 03

Flexible curtain shields equipment from intense heat fluxes
N-FS-48 B65-10044 03

Impurity diffusion process for silicon semiconductors is fast and precise
GSFC-397 B65-10300 01

Thin-film resistors used in functional electronic blocks
GSFC-380 B65-10305 01

Air-cured ceramic coating insulates against high heat fluxes
N-FS-150 B65-10357 03

Reflective insulator layers separated by bonded silica beads
MSC-215 B66-10070 03

Vapor grown silicon dioxide improves transistor base-collector junctions
GSFC-389 B66-10091 01

Optically driven switch turn-off time reduced by opaque coatings
JFL-SC-107 B66-10141 01

Fibers of newly developed refractory ceramics produced by improved process
WOO-165 B66-10196 03

Standards for electron probe microanalysis of silicates prepared by convenient method
GSFC-469 B66-10234 03

Improved thermal insulation materials made of foamed refractory oxides
N-FS-735 B66-10288 03

Special treatment reduces helium permeation of glass in vacuum systems
EQ-25 B66-10372 02

Process facilitates photosensitive mask alignment on Si crystals
N-FS-2394 B67-10144 01

A ceramic composite thermal insulation
N-FS-13991 B67-10608 03

Study of behavior of sterols at interfaces
AKH-10085 B68-10281 03

Miniaturized King furnace permits absorption spectroscopy of small samples
AKH-10177 B68-10418 02

SILICON FILMS

Thin-film resistors used in functional electronic blocks
GSFC-380 B65-10305 01

Silicon oxide films grown in microwave discharge
N-FS-14634 B66-10171 01

SILICON JUNCTIONS

Impurity diffusion process for silicon semiconductors is fast and precise
GSFC-397 B65-10300 01

Semiconductor forms biomedical radiation probe
MSC-320 B66-10252 04

Simplified method introduces drift fields into cells
GSFC-572 B67-10102 03

Process facilitates photosensitive mask alignment on Si crystals
N-FS-2394 B67-10144 01

Thermal and bias cycling stabilizes planar silicon devices
MSC-48 B67-10176 01

Fused diode provides visual indication of free condition
KSC-67-16 B67-10230 01

Development of reliability prediction technique for semiconductor diodes
GSFC-10231 B67-10651 06

Remotely-actuated biomedical switch
ARC-1045 B69-10117 01

SILICON NITRIDES

Radiation tolerant silicon nitride insulated gate field effect transistors
GSFC-10581 B69-10253 01

SILICON OXIDES

Improved sensor counts micrometeoroid penetrations
LEHS-76 B63-10483 01

Special coatings control temperature of structures
GSFC-484 B65-10337 03

Glass formulation has high coefficient of thermal expansion
MD-0084 B66-10705 03

Silicon oxide films grown in microwave discharge
N-FS-14634 B68-10171 01

Graphite cloth facilitates vacuum evaporation of silicon monoxide
N-FS-14764 B68-10256 03

Radiation tolerant silicon nitride insulated gate field effect transistors
GSFC-10581 B69-10253 01

Improved method of fabricating planar gallium arsenide diodes
XNP-04235 B69-10271 01

Dielectric materials for use in thin-film capacitors
N-FS-20471 B69-10387 02

SILICON POLYMERS

Flexible protective coatings made from silicon-nitrogen materials
N-FS-528 B66-10027 03

Silazane polymers show promise for high-
Temperature application
M-PS-466 B66-10194 03

Substituted silane-diol polymers have improved thermal stability
M-PS-469 B66-10259 03

SILICON RADIATION DETECTORS
Silicon surface barrier detectors used for liquid hydrogen density measurement
M-PS-14115 B68-10166 01

SILICON TETRACHLORIDE
Impurity diffusion process for silicon semiconductors is fast and precise
M-PS-13621 B68-10073 01

Transistor circuit increases range of logarithmic current amplifier
AB-0051 B66-10350 01

Metal Oxide Silicon /MOS/ transistors protected from destructive damage by wire
AB-65 B66-10419 01

Miniature electrometer preamplifier effectively compensates for input capacitance
ARC-65 B66-10549 01

New microelectronic power amplifier
M-PS-13621 B68-10073 01

Failure rates for accelerated acceptance testing of silicon transistors
B-10198 B68-10541 01

Linear-log counting-rate meter uses transconductance characteristics of a silicon planar transistor
AB-10158 B69-10191 01

Accurate nine-decade temperature-compensated logarithmic amplifier
AB-10480 B69-10429 01

Highly stable high-rate discriminator for nuclear counting
AB-10483 B69-10614 01

SILICON RESINS
Special coatings control temperature of structures
GSFC-444 B65-10337 03

SILICONE RUBBER
Thermally conductive metal wool-silicone rubber material can be used as shock and vibration damper
JPL-321 B63-10207 03

Pressure molding of powdered materials improved by rubber mold insert
W00-100 B64-10270 03

Shock mount isolates pressure transducers from vibration
JPL-631 B65-10113 05

High-intensity flashing beacon powered by mercury cells
LANGLEI-80 B65-10361 01

Copper foil provides uniform heat sink path
MSC-262 B66-10004 02

Capacitive system detects and locates fluid leaks
M-PS-478 B66-10099 01

Split glass tube assures quality in electron beam brazing
M-PS-564 B66-10151 05

Circular, explosion-proof lamp provides uniform illumination
MSC-382 B66-10156 02

Rubber-coated bellows improves vibration damping in vacuum lines
LEWIS-273 B66-10187 02

Rubber and alumina gaskets retain vacuum seal in high temperature RRF cell
ARC-17 B66-10472 05

Encapsulation technique eliminates thermal stresses in welded electronic modules
M-PS-14581 B68-10307 01

Battery-package design provides for cell cooling and constraint
MSC-11639 B68-10398 05

Tools made of ice facilitate forming of soft, sticky materials
MSC-12662 B69-10199 05

Glass fabric fire barrier for silicone rubber parts
MSC-15555 B69-10629 03

Improved electrode gives high-quality biological recordings
M-PS-17 B64-10025 04

Gas diffusion cell removes carbon dioxide from occupied airtight enclosures
MSC-118 B68-10319 03

Flexible curtain shields equipment from intense heat fluxes
M-PS-48 B65-10044 03

Lightweight load support serves as vibration damper
JPL-661 B65-10144 05

Organic reactants rapidly produce plastic foam
LANGLEI-37 B65-10288 03

Coating permits use of strain gage in water and liquid hydrogen
M-PS-594 B66-10192 01

Damping technique gives accelerometer flat frequency response
M-PS-471 B66-10293 01

Electrical cabling withstands severe environmental conditions
M-PS-1585 B66-10427 01

Improved method of edge coating flat ribbon wire
M-PS-902 B66-10684 03

Self-sealing closure enables access to several fluid containers
KFO-10123 B67-10207 04

Process controls introduction of selected impurities into semiconductor wafers
GSFC-523 B67-10303 01

Study made of dielectric properties of promising materials for cryogenic capacitors
M-PS-13620 B67-10366 03

Composite solar cell matrix is reliable,
SILK

- Lightweight and flexible
- Polyethylene cryostat facilitates testing of tensile specimens under liquid nitrogen
- Effects of surface preparation on quality of aluminum alloy weldments
- Compressible sleeve provides automatic centering for grinding or turning of cylinders
- Evaluation of magnetic materials for static inverters and converters

SILK

- Scribable coating for plastic films
- Aerogel siloxane copolymers
- Advances in aluminum anodizing

SILVER

- Improved molybdenum disulfide-silver motor brushes have extended life
- Connector for thermocouple leads saves costly wire, makes reliable connections
- Metals plated on fluorocarbon polymers
- Improved conductive paste secures biomedical electrodes
- New alloy brazes titanium to stainless steel
- Carbon-arc rod holder has long life, reduces arc splatter
- Rugged pressed disk electrode has low contact potential
- Plated nickel wire mesh makes superior catalyst bed
- Regenerative fuel cell combines high efficiency with low cost

SILVER ALLOYS

- New brazing alloy eliminates metal-stress cracking
- Silver-base ternary alloy proves superior for slip ring lead wires
- Silver-palladium alloy recovered from masking materials
- Compound improves thermal interface between thermocouple and sensed surface
- Submicron metal powders produced by ball milling with grinding aids
- Brazing process using Al-Si filler alloy reliably bonds aluminum parts
- Differential expansion provides pressure for diffusion bonding of large diameter rings

SUBJECT INDEX

- Copper wire plated with nickel and silver resists corrosion
- Rotating magnetic poles used to pump mercury
- Helmet system broadcasts electroencephalograms of wearer
- Silver plating technique seals leaks in thin wall tubing joints
- Plasma jet electrode has longer operating life
- Undercoat prevents blistering of silver plating at elevated temperatures
- Evaluation of high temperature stranded hookup wire
- Silver plating ensures reliable diffusion bonding of dissimilar metals
- Technique eliminates high voltage arcing at electrode-insulator contact area
- Improved cavity-type absolute total-radiation radiometer
- High-voltage pulse generator developed for wide-gap spark chambers
- Electroactive series established for metals used in aerospace technology
- Electrolytic silver ion cell sterilizes water supply
- Metallic diffusion measured by a modified Knudsen technique

SILVER ALLOYS

- Copper wire plated with nickel and silver resists corrosion
- Rotating magnetic poles used to pump mercury
- Helmet system broadcasts electroencephalograms of wearer
- Silver plating technique seals leaks in thin wall tubing joints
- Plasma jet electrode has longer operating life
- Undercoat prevents blistering of silver plating at elevated temperatures
- Evaluation of high temperature stranded hookup wire
- Silver plating ensures reliable diffusion bonding of dissimilar metals
- Technique eliminates high voltage arcing at electrode-insulator contact area
- Improved cavity-type absolute total-radiation radiometer

SUBJECT INDEX

Device separates hydrogen from solution in water at ambient temperatures MSC-13335  B69-10635  03

SILVER CADMIUM BATTERIES
Auxiliary silver electrode eliminates two-step voltage discharge characteristic of silver-zinc cells GSFC-169  B64-10114  01
Hermetically sealed cells protected from internal gas pressure GSFC-555  B66-10692  01

SILVER CHLORIDES
Cesium iodide crystals fused to vacuum tube faceplates GSFC-67  B63-10476  03
Improved electrode gives high-quality biological recordings MSC-17  B64-10025  04
Rugged pressed disk electrode has low contact potential MSC-158  B65-10320  01
Ion exchange determines iodine-131 concentration in aqueous samples ARG-208  B67-10129  04

SILVER COMPOUNDS
New energy storage concept uses tapes LEWIS-239  B66-10098  02
Preparation of silver-activated zinc sulfide thin film GSFC-10687  B68-10271  03

SILVER IODIDES
Ion exchange determines iodine-131 concentration in aqueous samples ARG-208  B67-10129  04

SILVER NITRATES
Preparation of silver-activated zinc sulfide thin film GSFC-10687  B68-10271  03

SILVER OXIDES
Auxiliary silver electrode eliminates two-step voltage discharge characteristic of silver-zinc cells GSFC-169  B64-10114  01
Regenerative fuel cell combines high efficiency with low cost WOO-090  B65-10363  01

SILVER ZINC BATTERIES
Auxiliary silver electrode eliminates two-step voltage discharge characteristic of silver-zinc cells GSFC-169  B64-10114  01
Device removes hydrogen gas from enclosed spaces GSFC-495  B66-10340  03
Hermetically sealed cells protected from internal gas pressure GSFC-555  B66-10692  01
Separator for alkaline batteries GSFC-10173  B68-10557  03
High-energy, high-power, long-life battery LEWIS-10724  B69-10131  01

SIMPPLIFICATION
Subroutines GEORGE and DRASTC simplify operation of automatic digital plotter NRC-10044  B67-10222  06
A simplified PERT system M-PS-2267  B67-10241  05
Simplified method measures changes in tensile yield strength using least number of specimens NRC-10075  B67-10266  03

SIMULATION
Optical projectors simulate human eyes to establish operator's field of view WOO-250  B66-10010  02
GEMEX - a new management training concept GSFC-574  B67-10092  01
Computer program uses Monte Carlo techniques for statistical system performance analysis M-FS-2234  B67-10306  06
Experiments to investigate particulate materials in reduced gravity fields M-FS-13308  B67-10394  02
Torque meter aids study of hysteresis motor rings M-FS-12219  B67-10412  01
Algebraic Monte Carlo procedure reduces statistical analysis time and cost factors M-FS-1887  B67-10436  01
Simulated hailstone fabrication and use in testing weatherability of structures M-PS-10783  B68-10552  03
Electroviscous visualization of gas bearing behavior LEWIS-10711  B69-10073  01

SIMPLIFIED EQUATIONS
Computer program simulates physical systems by solving the simultaneous differential equations describing the systems BFC-10019  B67-10193  06
CINERA - Chrysler Improved Numerical Differentiating Analyzer computer program M-FS-2298  B67-10278  06
Computer program provides linear sampled-data analysis for high order systems M-FS-12821  B67-10287  06
Computer subroutine ISUDS accurately solves large system of simultaneous linear algebraic equations NRC-10051  B67-10348  06

SIMPLIFIED SERIES
Measurement technique for the determination of antenna directivity M-PS-12799  B67-10677  01
SINE WAVES

Metal diaphragm used to calibrate miniature transducers
M-PS-207  B65-10059  01

Field effect transistor presents high input impedance in ac amplifier
JF-500  B65-10232  01

Pressure transducers dynamically tested with sinusoidal pressure generator
NW-268  B66-10031  01

Circuit operates as sine function generator
MSC-255  B66-10038  01

Feedback loop compensates for rectifier nonlinearity
M-PS-364  B66-10382  01

Edge-type connectors evaluated by electrical noise measurement
M-PS-2243  B67-10125  01

A modal combination computer program for dynamic analysis of structures
MGO-10129  B67-10217  06

Glow discharge density sensor probe life is extended
M-PS-1707  B67-10229  01

System precisely controls oscillation of vibrating mass
M-PS-1675  B67-10276  01

Improved circuit for measuring capacitive and inductive reactances
M-PS-13063  B67-10513  01

Circuit measures hysteresis loop areas at 30 Hz
M-PS-13069  B67-10519  01

Analysis of dynamic systems with DAPH computer program
M-PS-13999  B67-10523  06

Computer program provides improved longitudinal response analysis for axisymmetric launch vehicles
LANGLEY-10053  B67-10531  06

Pneumatic pressure wave generator provides economical, simple testing of pressure transducers
NGC-10024  B67-10664  05

Vibration testing and dynamic studies of relays
M-PS-19542  B68-10268  01

Modified sine bar device measures small angles with high accuracy
GSFC-438  B68-10322  02

Flow angle sensor and readout system
LWW-109290  B69-10050  01

An unconventional magnetically-coupled multivibrator
HQ-10226  B69-10480  01

Conditioning of pulses from aerosol-particle detectors
BRC-10250  B69-10691  01

SINGLE CRYSTALS

Single-crystal semiconductor films grown on foreign substrates
WCO-076  B66-10225  01

Indium adhesion provides quantitative measure of surface cleanliness
SAN-10024  B66-10342  01

Improved method of dicing integrated circuit wafers into chips
BRC-10338  B69-10441  01

SINGLE SIDEBAND TRANSMISSION

Single-sideband modulator accurately reproduces phase information in 2-Mc signals
M-PS-664  B66-10437  01

SINKEIN

Wall-thickness changes predicted in hollow-drawn tubing
ARG-10425  B69-10428  02

SINE

Circuit detects errors in address currents for magnetic core arrays
M-PS-234  B65-10047  01

Improved compression molding process
LANGLEY-10027  B67-10302  03

SINTERING

Improved polydopam disulfide-silver motor brushes have extended life
M-PS-64  B63-10079  03

New sintering process adjusts magnetic value of ferrite cores
GSFC-129  B63-10060  01

Electron beam seals outer surfaces of porous bodies
M-PS-562  B66-10033  03

Process reduces pore diameters to produce superior filters
WGO-093  B66-10037  03

Fibers of newly developed refractory ceramics produced by improved process
WCO-069  B66-10196  03

Fiber length and orientation prevent migration in fluid filters
M-PS-541  B66-10319  05

Concept for passive system to control gas flow independently of temperature
M-PS-982  B66-10343  05

Combustion chamber struts can be effectively transpiration cooled
M-PS-1830  B66-10643  03

Porous mandrels provide uniform deformations in hydrostatic powder metallurgy
M-PS-1972  B67-10209  03

Fuel cell life improved by metallic sinter activation after electrode assembly welding
MSC-10565  B67-10436  03

Electron beam selectively seals porous metal filters
LEWIS-10162  B68-10331  05

Grain growth inhibitor for porous tungsten materials
LEWIS-10535  B68-10527  03

Improved high-temperature silicide coatings
LEWIS-10393  B68-10528  03

Sintering characteristics and properties of PdS and PdP are determined
ARG-10228  B69-10058  03

Electrochemical sintering process for producing electrodes from cadmium felt and a nickel or silver grid
GSFC-10764  B69-10227  05

Improved incoporan ion exchange membranes
LEWIS-10737  B69-10451  03

Improved retort for cleaning metal powders

Telescoping of instrumentation tubing eliminates swaging
N-PS-546 B66-10116 05

Braze alloys used as temperature indicators
NO-0063 B66-10274 01

Solubility data are compiled for metals in liquid zinc
ARG-499 B67-10191 03

Device for reflowing electrodeposited solder on terminals
N-PS-13821 B69-10670 01

SOLENOID VALVES

Circuit exhibits power efficiency greater than 75 percent
MSC-254 B66-10034 01

High-pressure, low temperature electrical connector makes no-leak seal
MSC-276 B66-10079 02

Radioactive tracer system detects oil contaminants in fluid lines
System proportions fluid-flow in response to demand signals

Economical and maintenance-free gas system operates railroad switches

Flow ring valve is simple, quick-acting

Modified hydraulic braking system limits angular deceleration to safe values

Automatic protective vent has fail-safe feature

Monitoring circuit accurately measures movement of solenoid valve

Cryogenic fluid sampling device permits testing under hazardous conditions

Variable-pulse switching circuit accurately controls solenoid-valve actuations

High speed blowdown system provides rapid pressure loss

Solenoid valve design has one moving part

Dual photochemical replenisher system reduces chemical losses

Automatic transducer switching provides accurate wide range measurement of pressure differential

Continuous microbial cultures maintained by electronically-controlled device

Test system accurately determines tensile properties of irradiated metals at cryogenic temperatures

Environmental control system for cryogenic testing of tensile specimens

Fire extinguisher control system provides reliable cold weather operation

Ferromagnetic core valve gives rapid action on minimum energy

Solenoid hammer valve developed for quick-opening requirements

Solenoid valve design minimizes vibration and sliding wear problem

Calibratable solid-state pressure switch

Solenoid permits remote control of stop watch and assures restarting

Stepping switch with simple actuator provides many contacts in small space

Electromechanically operated camera shutter provides uniform exposure

Camera shutter is actuated by electric signal

Improved magnetometer uses toroidal gating coil

System measures unidirectional forces, excludes extraneous forces

Device disconnects several couplings simultaneously

Force controlled solenoid drives microweld tester

Gapped toroid provides infinite resolution of delay-line pickup

Multiple test chamber exposes materials to various environments

Optical output enhances flowmeter accuracy

Pneumatic binary encoder replaces multiple solenoid system

Solenoid magnetic fields calculated from superposed semi-infinite solenoids

A continuously operating source of vacuum ultraviolet below 500 angstrom

Power arc welder touch-started with consumable electrode

Fuel and oxidizer valve assembly employs single solenoid actuator

Simple technique determines ac properties of hard superconductive materials

Logic circuitry used to automatically test shielded cables

Residual magnetism holds solenoid armature in desired position

Simple pump maintains liquid helium level in cryostat

High-torque power wrench, a concept

High-speed pulse camera

Temperature or pressure controller

Propagation of density disturbances in air-water flow

Continuous analysis of nitrogen dioxide in gas streams of plants

Separation simulator
SOLID LUBRICANTS

Automatic filter-blowback systems used with sintered-metal filters
ABG-10324 B69-10342 05

Testing the flammability of materials exposed to arcs
MSC-15225 B69-10531 03

Improved solenoid valve design
GSFC-10607 B69-10704 05

IBDEX

Study of actinide chemistry in saturated potassium fluoride solution
ARG-10204 B69-10004 05

Flow properties of suspensions rich in solids
ARG-10481 B69-10622 02

ARG-10532

B69-10342

SOLID LUBRICANTS

Fluoride coatings make effective lubricants in molten sodium environment
LEWIS-229 B66-10005 03

Fricntion device damp linear motion of rotating shaft
WOO-214 B66-10030 05

Polytetrafluoroethylene lubricates ball bearings in vacuum environment
N-FS-379 B66-10081 03

Solid-film lubricant is effective at high temperatures in vacuum
LEWIS-228 B66-10087 03

Dry film lubricant is effective at extreme loads
N-FS-628 B66-10256 03

Composite of porous metal and solid lubricants increase bearing life
LEWIS-307 B67-10007 03

Environmental study of miniature slip rings
N-FS-2443 B67-10210 05

Development of lunar drill to take core samples to 100-foot depths
N-FS-13015 B67-10529 05

Bearings use dry self-lubricating cage materials
LEWIS-10432 B68-10165 05

Application of the solid lubricant molybdenum disulfide by sputtering
LEWIS-10544 B68-10340 03

Evaluation of lubricants for ball bearings at high temperatures
LEWIS-10578 B69-10025 03

Self-lubricating gear
N-FS-10971 B69-10408 05

SOLID PHASES

Solubility data are compiled for metals in liquid zinc
ARG-149 B67-10191 03

SOLID PROPELLANT ROCKET ENGINES

Study of vortex valve for solid temperature solid propellants
LANGLEY-204 B66-10524 01

Cold solid propellant motor has stop-restart capability
JPL-836 B66-10673 03

SOLID SOLUTIONS

Brazing method produces solid-solution bond between refractory metals
LEWIS-212 B65-10370 05

Brazing alloy holds bonding strength over wide temperature range
LEWIS-337 B66-10519 03

New tungsten alloy has high strength at elevated temperatures
LEWIS-336 B66-10551 03

Tantalum alloys resist creep deformation at elevated temperatures
LEWIS-350 B66-10558 03

SOLUBILITY

Study of actinide chemistry in saturated potassium fluoride solution
ARG-10204 B69-10004 05

Flow properties of suspensions rich in solids
ARG-10481 B69-10622 02

ARG-10532

B69-10342

SUBJECT INDEX

Thoriated nickel bonded by solid-state diffusion method
LANGLEY-116 B65-10220 03

Primary cells utilize halogen-organic charge transfer complex
JPL-926 B66-10682 02

Electronic aperture control devises for solid state imaging system
N-FS-12428 B68-10028 01

Metallic diffusion measured by a modified Knudsen technique
Hg-10145 B69-10309 03

Epitaxial crystalline growth upon cold substrates
MSC-11196 B69-10494 01

High efficient square-wave oscillator operator at high power levels
GSFC-112 B63-10554 01

Digital cardiometer computes and displays heartbeat rate
MSC-93 B64-10258 01

Logarithmic amplifier uses field effect transistors
JPL-509 B65-10145 01

Analog-to-digital converter has increased reliability and reduced power consumption
GSFC-246 B63-10194 01

Tiny biomedical amplifier combines high performance, low power drain
ARC-81 B65-10203 01

Thin-film resistors used in functional electronic blocks
GSFC-380 B65-10305 01

Electronic amper-hour integrator is accurate to one percent
GSFC-203 B65-10308 01

Threshold detector produces narrow pulses at high repetition rates
GSFC-383 B65-10310 01

Hybrid circuit achieves pulse regeneration with low power drain
GSFC-382 B65-10314 01

Instrument performs nondestructive chemical analysis, data can be telemetered
JPL-SC-278 B65-10317 01

Ring counter circuit switches multiphase motor direction of rotation
JPL-SC-166 B66-10101 01

Optical gyro pickoff operates at cryogenic temperatures
N-FS-407 B66-10128 01

Solid state thermostat has integral probe and circuitry
N-FS-434 B66-10193 01

Circuit provides accurate four-quadrant multiplication
WOO-272 B66-10331 02

**SOLUBILITY SUBJECT INDEX**

Computer program ICAP-TOSS calculates steady-state fluid dynamics of coolant in parallel channels and temperature distribution in surrounding heat-generating solid  
NUC-10042  B67-10056  06

Computer program ICAP provides for steady state thermal and flow analysis of multiple parallel channels in heat generating solid  
NUC-10043  B67-10457  06

Bimetal sensor averages temperature of nonuniform profile  
LEWIS-10362  B66-10007  01

Thermal conductivity and dielectric constant of silicate materials  
I-FS-14856  B67-10351  03

A new solid lubricant  
LERIS-10812  B67-10250  03

Spiral-flow apparatus for measuring permeation of solids by gases 
M-FS-16517  B67-10357  03

Self-sealing closure enables access to several fluid containers  
MFO-10123  B67-10207  04

Trace hydrazines in aqueous solutions accurately determined by gas chromatography  
MSC-11222  B67-10290  03

Sensitive bridge circuit measures conductance of low-conductivity electrolyte solutions  
ARG-147  B67-10294  01

Chemical milling solution reveals stress corrosion cracks in titanium alloy  
LARGEST-10077  B67-10322  03

Large volume continuous counterflow dialyzer has high efficiency 
HG-10055  B67-10395  04

Study of stress corrosion in aluminum alloys  
M-FS-13906  B67-10533  03

Electromotive series established for metals used in aerospace technology  
M-FS-18327  B67-10385  03

Primary radical yields in pulse irradiated alkaline aqueous solution  
ARG-10322  B67-10167  02

Method for copper staining of germanium crystals  
ARG-10403  B67-10257  03

A method for precision anodize stripping  
MSC-15040  B67-10581  03

**SOLUTION SUBJECT INDEX**

Combustion chamber inlet manifold separates vapor from liquid  
M-FS-531  B66-10052  05

Use of steel and tantalum apparatus for molten Cd-Mg-Zn alloys  
ARG-199  B67-10594  03

Effects of helium and nitrogen as pressurants in nitrogen tetroxide transfer  
MSC-924  B67-10683  03

New class of compounds have very low vapor pressures  
ARG-112  B67-10184  03

Solubility data are compiled for metals in liquid zinc  
ARG-149  B67-10191  03

Metabolic and toxicological effects of water-soluble xenon compounds are studied  
ARG-90239  B67-10076  04

Study of actinide chemistry in saturated potassium fluoride solution  
M-FS-12024  B67-10304  03

Spectrographic analysis of bismuth-tin eutectic alloys by spark-ignited low-voltage ac-arc excitation  
ARG-10208  B67-10681  03

Direct measurement of carbon-14 in carbon dioxide by liquid scintillation counting  
ARG-10237  B67-10602  03

Technique for highly efficient recovery of microbiological contaminants  
MSC-13250  B67-10273  04

Water-glycol system volume calculation  
MSC-15193  B67-10563  02

Electrolytic separation of crystals of transition-metal oxides  
ARG-10506  B67-10642  03

**SOLUTIONS SUBJECT INDEX**

Solution of differential equations by application of transformation groups  
M-FS-14802  B67-10276  02

Solubility data are compiled for metals in liquid zinc  
ARG-149  B67-10191  03

Electronic circuitry used to automate paper chromatography  
JPL-880  B67-10201  01

**SOLVENTS SUBJECT INDEX**

Silver-palladium braze alloy recovered from masking materials  
M-FS-1845  B67-10631  03

Method of welding joint in closed vessel improves quality of seam  
JPL-179  B67-10390  05

Fine-mesh screen made by simplified method  
MOC-104  B67-10201  03

Modification increases light output of injection-luminescent diodes  
M-FS-192  B67-10006  01

Miniature bearings lubricated by sonic dispersion method  
M-FS-202  B67-10160  03

Soluble undercoating facilitates removal of foamed-in-place insulation  
LEWIS-193  B67-10344  03

Surfactant for dye-penetrant inspection is insensitive to liquid oxygen  
M-FS-875  B67-10131  03

Solvent residue content measured by light scattering technique  
M-FS-850  B67-10320  01

Sprayable birefringent coating enables strain measurements on large surfaces  
M-FS-1484  B67-10578  03

Use of steel and tantalum apparatus for molten Cd-Mg-Zn alloys  
ARG-199  B67-10594  03

Degreasing of titanium to minimize stress corrosion  
LEWIS-382  B67-10147  03

Liquid oxygen dicting cleaned by falling film method  
M-FS-11016  B67-10299  03
Adhesives for laminating polyimide insulated flat conductor cable
N-FS-12066 B67-10429 03

Solvent permits solid curing agents to be used at room temperatures
N-FS-13434 B67-10593 03

Effects of surface preparation on quality of aluminum alloy weldments
N-FS-13152 B68-10302 03

Welded repairs of punctured thin-walled aluminum pressure vessels
N-FS-14836 B69-10151 05

Induction probe determines levels of liquid metals.
ABG-10348 B69-10256 03

Apparatus automatically measures soluble residue content of volatile solvents
SBW-10032 B69-10292 03

Coordination chemistry in fused-salt solutions
ARG-10669 B69-10423 03

Freon, T-81 cutting fluid
MSC-11466 B69-10465 05

Technique for ultrasonic cleaning with volatile solvents eliminates need for hoods or condensers
MSC-15611 B69-10552 03

SONAR
System locates randomly placed remote objects
LANGLEY-209 B69-10315 01

SONIC BOOMS
Computer program calculates sonic-boom pressure signatures
LANGLEY-10096 B68-10489 06

Sonic boom propagation in stratified atmosphere
LANGLEY-10480 B69-10391 06

SORPTION
Comparative chromatography of chloroplast pigment
AG-10415 B69-10425 03

SOUND AMPLIFICATION
Noise figure measurement concept for acoustic amplifiers
GSFC-10066 B68-10227 01

Power consumption in acoustic amplifiers under conditions of maximum stable gain
GSFC-10067 B68-10327 01

SOUND FIELDS
Study made of interaction between sound fields and structural vibrations
EQ-26 B67-10068 02

SOUND GENERATORS
Device detects unbonded areas in plastic laminates
N-00-206 B65-10380 01

System enables more complete calibrations of dynamic-pressure transducers
N-FS-2063 B67-10099 01

SOUND INTENSITY
Device enables calibration of microphones at high sound pressure levels
N-FS-11960 B67-10336 01

SOUND PRESSURE
Electronic dummy for acoustical testing
MSC-206 B67-10298 01

SOUND TRANSMISSION
Flow tube used to cool solar-pumped laser
JPL-943 B67-10505 01

MSC-11026 B68-10010 02

SOUND WAVES
Small foamed polystyrene shield protects low-frequency microphones from wind noise
N-FS-123 B65-10579 01

Ultrasonic emission method enables testing of adhesive bonds
N-FS-799 B66-10341 01

Study of random process theory aids digital data processing
N-FS-1475 B67-10309 06

Noise study of single stage compressor rotor-stator interaction
LANGLEY-137 B67-10516 02

Acoustic wave analysis
N-FS-18076 B68-10265 02

An ultrasonic method for studying elastic moduli as a function of temperature
ARG-10187 B65-10082 02

Experimental design for research on shock-turbulence interaction
N-FS-20331 B69-10604 02

SOUNDING
Tracer of electrical conduit or pipes
MSC-15223 B69-10347 01

SOUNDING ROCKETS
Rocket sonde measurements of ozone in the upper atmosphere
GSFC-10580 B69-10077 02

SOURCES
Circuit detects errors in address currents for magnetic core arrays
N-FS-234 B67-10030 06

SPACE CHARGE
Potassium plasma cell facilitates thermionic energy conversion process
ARG-10010 B67-10399 01

Thin film thermal detector
JPL-943 B67-10505 01

SPACE COMMUNICATION
Personal communication system combines high performance with miniaturization
N-720 B67-10119 01

Deep space FM system, a concept
N-11825 B68-10289 01

A positive taper traveling-wave tube
LANGLEY-10263 B69-10407 01

Estimation of signal-to-noise ratios
XDF-05254 B69-10551 01

SPACE DETECTION AND TRACKING SYSTEM
An investigation of phase-lock loop swept-frequency synchronization
N-FS-656 B66-10423 01

SPACE ENVIRONMENT SIMULATION
Mechanical properties of wire insulation automatically determined
MSC-10963 B67-10370 01

Concept for cryogenic liquid reclamation system
N-00-10322 B67-10420 02

SPACE EXPLORATION
Solid-state switching used to speed up capacitive integrator
LANGLEY-104 B65-10159 01

Computer program for interplanetary conic patching
N-FS-14296 B68-10033 06

I-611
SPACE FLIGHT

Advanced mission analysis programs
GSPC-10575 B69-10171 06

SPACE FLIGHT FEEDBACK
Food products for space applications
MSC-11697 B68-10324 04

SPACE MECHANICS
Channel-wall limitations in the magnetohydrodynamic induction generator
ARG-10128 B69-10255 02

SPACE MISSIONS
Conceptual nonorthogonal gyro configuration for guidance and navigation
MSC-11363 B67-10433 01

Estimating reliability by application of matrix representation
HO-10246 B69-10793 02

SPACE NAVIGATION
Special purpose reflectometer uses modified ulbricht sphere
MSC-1135 B67-10109 02

Hydrogen maser as a highly stable frequency reference
N-PS-2437 B67-10146 01

SPACE PERCEPTION
Instrument transmits vanishing point to illustration point
MSC-267A B66-10324 01

Computer program simplifies transient and steady-state temperature prediction for complex body shapes
MSC-989 B66-10619 01

SPACE PHOENS
Space trajectories program for IBM 7090
NPO-10125 B67-10172 06

SPACE PROGRAMS
Studies of cycles for liquid-metal magnetohydrodynamic generation of power
ARG-10250 B69-10194 02

SPACE RATIONS
Food products for space applications
MSC-11697 B68-10324 04

SPACE SIMULATORS
Star/horizon simulator used to test space guidance system
MSC-407 B67-10110 02

Study of thermal effects on nickel-cadmium batteries
GSPC-10003 B67-10614 01

Four-bar linkage for thermal compensation in test mounts for structures
NPO-11059 B69-10298 05

SPACE STATIONS
Study of dynamic response of elastic space structures
NPO-10124 B67-10169 06

Interference effects eliminated in random oriented space station antenna system
MSC-11004 B67-10435 01

SPACE STORAGE
One-dimensional reacting gas nonequilibrium performance program
GSPC-11777 B68-10375 06

SPACE SUITS
Flexible fastener effects airtight material closure
JPL-684 B66-10304 05

Portable lightweight cell provides controlled environment
MSC-648 B66-10370 05

SUBJECT INDEX

Integrated mobility measurement and notation system
MSC-726 B67-10114 04

Personal communication system combines high performance with miniaturization
MSC-720 B67-10119 01

Astronaut space suit communication antenna
MSC-12101 B66-10238 01

SPACE TOOLS
Electrical cable connector-clamp has smooth exterior surface
MSC-154 B65-10201 05

High-strength tungsten alloy with improved ductility
LEWIS-10257 B67-10340 03

SPACE VEHICLE CHECKOUT PROGRAM
Automatic telemetry checkout system
N-PS-12580 B67-10402 01

SPACECRAFT
High purity electroforming yields superior metal models
ARC-6 B63-10007 05

Ultra-sensitive transducer advances micro-measurement range
ARC-26 B64-10004 01

Control of component differential hardness increases bearing life
LEWIS-190 B65-10251 05

Plastic bags in evacuated chamber make lightweight gas sampling system
FEC-31 B65-10264 01

Special coatings control temperature of structures
GSPC-848 B65-10337 03

Sensors measure surface ablation rate of reentry vehicle heat shield
LANGLEY-287 B66-10592 01

Crystal microbalance measures condensable molecular fluxes
JPL-845 B67-10012 03

Advances in light-gas gun technology
N-PS-14270 B68-10288 05

Study of optimum discrete estimators in measurement analysis
N-PS-14915 B68-10348 02

Advances in aluminum anodizing
N-PS-14600 B69-10144 05

Four-bar linkage for thermal compensation in test mounts for structures
NPO-11059 B69-10298 05

Automatic star-horizon angle measurement system
MSC-11585 B65-10557 01

SPACECRAFT ANTENNAS
Sheet metal strip unrolls to form circular booms
GSPC-823 B66-10032 05

SPACECRAFT CABINS
Mechanical properties of wire insulations automatically determined
MSC-10983 B67-10370 01

SPACECRAFT COMMUNICATION
Parametric up-converter increases flexibility of maser
MSC-67-98 B67-10104 01

Hydrogen maser as a highly stable frequency reference
N-PS-2437 B67-10146 01

I-612
Development of dual solid cryogens for high reliability refrigeration system  
GSFC-10188  B67-10644  02
Improved phase-shift-keyed detector  
N-FS-20064  B69-10101  01

**SPACERIGHT COMPONENTS**

Improved sensor counts micrometeoroid penetrations  
LEWIS-76  B63-10443  01
Apparatus alters position of objects to facilitate demagnetization  
GSFC-238  B64-10277  05
Titanium treatment improves brazed joints  
MSC-127  B65-10153  05
Computer program uses Monte Carlo techniques for statistical system performance analysis  
N-FS-2234  B67-10306  06
Tube swaging device uses explosive force  
LANGLEY-10092  B68-10235  05

**SPACERIGHT CONFIGURATIONS**

Conceptual nonorthogonal gyro configuration for guidance and navigation  
MSC-11363  B67-10433  01

**SPACERIGHT CONSTRUCTION MATERIALS**

Investigation of spacecraft coatings  
N-FS-20458  B69-10181  06
Replacement of fluid-filter elements without interruption of flow  
MSC-15469  B69-10245  05
Improved high-temperature silicide coatings  
LEWIS-10617  B69-10266  03
Handbook for design of containers of fluids and gases for spacecraft  
N-FS-20502  B69-10279  05

**SPACERIGHT CONTROL**

Knob linkage permits one-hand control of several operations  
MSC-30  B65-10022  05
Plated nickel wire mesh makes superior catalyst bed  
MSC-216  B65-10321  03
A nodal combination computer program for dynamic analysis of structures  
NFO-10129  B67-10217  06
Control jet placement on spacecraft  
MSC-13365  B69-10671  01

**SPACERIGHT DESIGN**

Technique for measuring magnetic tape interlayer adhesion  
NFO-10031  B67-10417  03
A new method for fabrication of flexible vacuum purge jackets  
N-FS-12646  B69-10564  03

**SPACERIGHT DOCKING**

Visual attitude orientation and alignment system  
NFS-647  B67-10120  02
Fuel transfer system permits rapid coupling  
N-FS-91326  B68-10039  05

**SPACERIGHT ELECTRONIC EQUIPMENT**

Modular Porous Plate Sublimator /NPP/ requires only water supply for coolant  
N-FS-1374  B66-10409  01

**SPACERIGHT HANDBOOKS**

Evaluation of high temperature stranded hookup wire  
N-FS-2478  B67-10122  03
Hybrid solid state switch replaces motor-driven power switch  
JPL-931  B67-10165  01
Bacteriostatic conformal coating for electronic components  
GSFC-10007  B67-10599  03
Gamma radiation characteristics of plutonium dioxide fuel  
NFO-11220  B69-10733  02
Liquid switch is remotely operated by low dc voltage  
GSFC-119  B63-10599  01
Phonocardiograph system monitors heart sounds  
MSC-165  B66-10154  04
Method for X-ray study under extreme temperature and pressure conditions  
MSC-11232  B67-10474  02
Fuel transfer system permits rapid coupling  
N-FS-91326  B68-10039  01
A Catalog of Spacecraft for applications of flexible vacuum purge jackets  
LEWIS-76  B63-10442  05

**SPACERIGHT LAUNCHING**

Break-up of metal pipe makes one-time shock absorber, bars rebound  
LANGLEY-1A  B63-10304  05
Kinetic-energy absorber employs frictional force between mating cylinders  
LEWIS-75  B63-10442  05
Land landing couch dynamics computer program  
MSC-1270  B67-10233  06
A sterilizable high-impact antenna  
NFO-10231  B69-10697  01

**SPACERIGHT MEASUREMENTS**

Unique gear design provides self-lubrication  
JPL-SC-075  B66-10366  03
Stable ac phase and amplitude comparator  
N-FS-13086  B67-10459  01
SPACERAPTURE MODELS

Midcourse maneuver operations program
NPO-10735 B69-10105 06

SPACERAPTURE MODELS

High-torque precision stepping drive
M-PS-14772 B68-10549 05

SPACERAPTURE ORBITS

Oceanborne transponder platform has good
stability
N-PS-177 B65-10035 05

Sextant measures spacecraft altitude without
gravitational reference
MSC-200 B66-10143 02

Computer program determines thermal
environment and temperature history of
lunar orbiting space vehicles
N-PS-12916 B67-10307 06

SPACERAPTURE POSITION INDICATORS

Improved electro-optical tracking system
M-PS-14791 B68-10311 01

SPACERAPTURE POWER SUPPLIES

Modular Porous Plate Sublimator /PPPS/
requires only water supply for coolant
M-PS-1374 B66-10409 01

Zinc-oxygen primary cell yields high
energy density
M-PS-14661 B68-10218 01

Spiral-grooved shaft seals substantially
reduce leakage and wear
LEWIS-10397 B68-10270 05

SPACERAPTURE PROPULSION

Segmented electrode increases operating
pressure of HHD accelerator
LANGLEY-95 B65-10356 02

High temperature alloy
LEWIS-10377 B68-10253 03

SPACERAPTURE RADIATORS

A design procedure for the weight
optimization of straight finned radiators
GSFC-547 B66-10610 05

SPACERAPTURE RECOVERY

Threading hook facilitates safe recovery of
heavy loads
MSC-46 B64-10185 05

System locates randomly placed remote objects
LANGLEY-209 B66-10315 01

SPACERAPTURE RELIABILITY

New method for critical failure prediction
of complex systems
M-PS-14133 B68-10252 02

SPACERAPTURE SHIELDING

Fire retardant foams developed to suppress
fuel fires
ARC-10098 B68-10358 03

SPACERAPTURE STABILITY

Land landing couch dynamics computer program
MSC-1210 B67-10233 06

Electronic analog equalization for
vibrational testing
NPO-10544 B69-10472 01

SPACERAPTURE STERILIZATION

SPAN C - Terminal sterilization process
analysis program
NPO-10805 B69-10039 06

SPAN - Terminal sterilization process
analysis program
NPO-10804 B69-10104 06

Sterilization training manual
M-PS-20437 B69-10277 04

SUBJECT INDEX

Microbiological aspects of sterilization
development laboratories
NPO-11197 B69-10593 04

SPACERAPTURE STRUCTURES

Automatic fluid separator supplies own driving
power
NPO-085 B66-10008 02

System automatically provides dynamic
launch decision criteria
NPO-13063 B67-10363 01

Computer program provides improved
longitudinal response analysis for
axisymmetric launch vehicles
LANGLEY-10093 B67-10531 06

SPACERAPTURE TELEVISION

Computer program for Video Data Processing
System /VDP/
NPO-10042 B67-10630 06

Isolated, multiple-output voltage dc-to-ac
converter
M-PS-14976 B69-10014 01

SPACERAPTURE TRACKING

Oceanborne transponder platform has good
stability
N-PS-177 B65-10035 05

Frequency offset in linear FM/CW transponder
eliminates clutter
M-PS-249 B65-10146 01

Hydrogen maser as a highly stable frequency
reference
M-PS-2437 B67-10146 01

Low speed, long term tracking electric
drive system has zero backlash
NPO-10173 B67-10220 01

Communication system features dual mode
range acquisition plus time delay
measurement

ABRAAJ on-site tracking prediction
program
NPO-10836 B69-10103 06

Midcourse maneuver operations program
NPO-10735 B69-10105 06

SPACERAPTURE TRAJECTORIES

Internal velocity factors
MSC-19002 B68-10403 06

Midcourse maneuver operations program
NPO-10735 B69-10105 06

Combination ranging system and mapping
radar
NPO-11001 B69-10325 01

Fast Fourier Transform Spectral Analysis
Program
M-PS-15062 B69-10434 06

SPACERAPTURE THERMAL

Thermally conductive metal wool-silicone
can be used as shock and vibration damper
JPL-321 B68-10253 03

Modular thermoelectric cell is easily packaged
in various arrays
GSFC-339 B65-10199 01

Electropneumatic rheostat regulates high
current
ARC-44 B65-10299 01

Insulator-holder protects transistors in dense
electronic assemblies
MSC-214 B65-10389 01
Aluminized fiberglass insulation conforms to curved surfaces  
M-PS-477  B66-10024  03

Rectilinear accelerometer possesses self-calibration feature  
M-PS-1980  B66-10452  01

Combination spacer and gasket provides effective static seal  
M-PS-1397  B66-10485  05

Gas leak detector is simple and inexpensive  
M-PS-1206  B66-10669  01

Square tube reduces cost of telescoping bridge crane hoist  
ARG-13  B67-10293  05

Liquid microsurgery chamber and microsyringe designs allow more efficient microinjections  
ABG-251  B67-10305  04

Large volume continuous countercurrent dialyzer has high efficiency  
HU-10055  B67-10395  04

Aluminum heat sink enables power transistors to be mounted integrally with printed circuit board  
M-PS-13663  B67-10426  01

Tube-to-header joint for bimetallic construction  
LEWIS-10282  B67-10464  05

Thermal radiation shields for piping in vacuum environments  
LEWIS-10099  B68-10262  03

Flexible rivet-set  
M-PS-20317  B68-10459  05

Glass fabric fire barrier for silicone rubber parts  
MSC-15555  B69-10629  03

SPACING
Modified interelement spacing improves Yagi antenna array  
LANGLEY-130  B65-10183  01

Mounting method improves electrical and vibrational characteristics of screen electrodes  
M-PS-20169  B69-10097  01

Active frequency control system for argon FM laser  
M-PS-14998  E69-10099  02

Novel terminal strips for transformers  
MPO-10042  B69-10246  01

Design of a strain-gage probe  
ARG-10338  B69-10343  05

Checking flat conductor cable spacing by means of a moire pattern  
M-PS-20826  E69-10856  05

SPALLING
Testing the flammability of materials exposed to arcs  
MSC-12225  B69-10531  03

SPARK CHAMBERS
Detecting hydrogen-containing contaminants on metal surfaces  
M-PS-20856  B69-10192  03

SPARK GAPS
Triphere spark gap actuates overvoltage relay  
ARC-68  B66-10557  01

Pulse technique provides more accurate checkout of exploding bridge wire device  
B66-10051  01

Ultrasonic wrench produces leaktight connections  
M-PS-12561  B67-10353  05

High-voltage pulse generator developed for wide-gap spark chambers  
ARG-10156  B66-10283  01

Transistorized Marx bank pulse circuit provides voltage multiplication with nanosecond rise-time  
ARG-10110  B68-10328  01

Burn-rate testing apparatus  
MSC-10947  B69-10740  03

Explosive bridgewire detonator simulator  
M-PS-0219  B69-10782  01

SPARK IGNITION
Oxygen-hydrogen torch is a small-scale steam generator  
M-PS-1256  B66-10120  03

Electric arc heater is self starting  
LANGLEY-208  B66-10230  03

Evaluation of ignition mechanisms in selected nonmetallic materials  
MSC-11645  B68-10167  03

Spectrographic analysis of bismuth-tin eutectic alloys by spark-ignited low-voltage arc-arc excitation  
ARG-10288  B69-10081  03

SPARK MACHINING
Vibrator improves spark erosion cutting process  
M-PS-10071  B66-10333  01

Traveling wire electrode increases productivity of Electrical Discharge Machining /EDM/ equipment  
ARG-136  B67-10238  05

SPATIAL DISTRIBUTION
System for measuring spatial distribution of ejected droplets, a concept  
MPO-10185  B68-10402  01

Laser microprobe facility used in the elemental analysis of small feature of a sample  
ARG-10359  B69-10165  02

SPECIFIC HEAT
Pure xenon hexafluoride prepared for thermal properties studies  
ARG-10056  B67-10577  03

Real fluid properties of normal and parahydrogen  
LEWIS-10064  B68-10361  06

Computer program calculates the effective temperature for a crystalline solid /DTSS/  
MSC-10161  B69-10036  06

Calibration of a resistance thermometer down to 0.04 degrees K  
ARG-10318  B69-10149  01

SPECIFIC IMPULSE
Addition of solid oxidizer increases liquid fuel specific impulse  
JPL-661  B67-10058  03

SPECIFICATIONS
Stainless-steel elbows formed by spin forging  
M-PS-122  B63-10590  05

Workmanship standards for fusion welding  
MSC-10050  B67-10200  05

Structural thermal-control coatings
Programmed schedule holds for improving launch vehicle holds
I-FS-14502 B69-10602 03

A technique for making animal restraints
ARC-25 B67-10312 03

New electron microscope employs new video display technique
ARG-158 B67-10451 03

Study made of procedures for externally loading and corrosion testing stress corrosion specimens
I-FS-12064 B67-10312 03

Precision trimmer aids in preparing biomedical specimen blocks for ultrathin sectioning
ARG-242 B67-10541 03

Thick transducers used for generating short-duration stress pulses in this specimens
ARG-10232 B69-10045 01

Coatings decrease metal fatigue failure
ARC-10015 B69-10176 03

Detection sensitivities in 3-8 MeV neutron activation
ARG-10210 B68-10298 02

Silicon carbide diode for increased light output
M-TS-20063 B69-10096 01

Recent development in organic scintillators
ARG-10344 B69-10198 03

A computer program for a line-by-line calculation of spectra from diatomic molecules and atoms assuming a Voight line profile
ARC-10221 B69-10232 06

Multichannel spectroscopy guide
EQ-10441 B69-10550 01

On the bound of first excursion probability
MPO-11158 B69-10334 06

Aluminum doping improves silicon solar cells
LEWIS-206 B66-10181 02

Calculation of infrared spectral transmittances of inhomogeneous gases
M-TS-1563 B66-10554 02

Control apparatus for spectral energy source
LEWIS-391 B67-10404 01

Infrared spectroradiometer for rocket exhaust analysis
M-TS-14357 B68-10081 02

Occulting-filter method for obtaining flashing-light visibility data
M-TS-13097 B69-10107 02

Imaging slitless spectrometer for X-ray astronomy
M-TS-13309 B68-10546 02

Cones and cylinders solar energy concentrator
LANGLEY-210 B67-10517 01

Effects of surface preparation on quality of aluminum alloy weldments
M-TS-13152 B68-10302 03

Investigation of spacecraft coatings
M-FS-20486 B69-10181 06

Electrodeless discharge lamp is easily started, has high stability
W00-030 B66-10015 01

Multichannel analyzers at high rates of input
ARG-10355 B69-10214 02

Multilayer infrared beamsplitter film system
XGS-11036 B69-10260 02

Airborne Fraunhofer Line Discriminator
MSC-13146 B69-10594 02

Simple optical system used to align spectrograph
LANGLEY-92 B65-10071 02

System selects framing rate for spectrograph camera
LANGLEY-55 B65-10086 01

Multiple test chamber exposes materials to various environments
MSC-179 B65-10260 01

Trace levels of metallic corrosion in water determined by emission spectrograph
MSC-1193 B66-10701 03

An improved nuclear magnetic resonance spectrometer
JFL-762 B67-10234 01

Analytical technique characterizes all trace contaminants in water
MSC-11032 B67-10243 03

Self-balancing line-reversal pyrometer automatically measures gas temperatures
LEWIS-348 B67-10268 01

Electronic shutter gates image orthicon on and off
EQ-96 B67-10270 01

Portable spectrometer monitors inert gas shield in welding process
M-TS-12144 B67-10326 02

Modified blackbody device emits high-density radiation
M-TS-12744 B67-10388 02

Control apparatus for spectral energy source
LEWIS-391 B67-10404 01

Low scatter lightweight fission spectrometer constructed for biological research
ARG-10094 B68-10174 02

High resolution Ge/Li/ spectrometer reduces rate-dependent distortions at high counting rates
ARG-10184 B68-10420 01

Nitric acid-organic mixtures surveyed for use in separation by anion exchange methods
ARG-10065 B68-10425 03

Imaging slitless spectrometer for X-ray astronomy
M-TS-14305 B68-10546 02

Ge-diode detector combined with crystal-diffraction spectrometer permits high-resolution gamma ray spectroscopy
ARG-10190 B69-10005 02

Kossel-effect data-collection system
ARG-10282 B69-10027 01
SUBJECT INDEX

Nossbauer vibration calibration systems evaluated
MSC-2004 B69-10244 01

Preparation of high purity copper fluoride by fluorinating copper hydroxide fluoride
LEWIS-10794 B69-10136 03

Calibration of a resistance thermometer down to 0.04 degrees K
ARG-10318 B69-10149 01

Detection of molecular infrared spectra
B69-10172 02

Magnetically coupled emission regulator
GSPC-10056 B69-10213 01

Multichannel analyzers at high rates of input
ARG-10355 B69-10214 02

A computer program for a line-by-line calculation of spectra from diatomic molecules and atoms assuming a Voigt line profile
ARG-10221 B69-10232 06

Multilayer infrared beamsplitter film system
ISC-11036 B69-10260 02

New shield for gamma-ray spectrometry
ARG-10388 B69-10344 02

Separation of the rare earths by anion-exchange in the presence of lactic acid
ARG-10436 B69-10377 03

Miniaturized high-resolution mass/charge spectograph /design study/
MSC-13279 B69-10554 02

Pulse-height defect due to electron interaction in dead layers of Ge/Li/gamma-ray detectors
ARG-10362 B69-10767 02

SPECTROPHOTOMETERS

Microachining produces optical apertures to micron dimensions
GSPC-206 B69-10211 05

Improved sample capsule for determination of oxygen in hemolyzed blood
MSC-11017 B67-10408 04

High-speed pulse camera
MSC-11353 B68-10329 02

Rapid and precise analysis for calcium in blood serum
ARG-10246 B69-10160 04

Continuous analysis of nitrogen dioxide in gas streams of plants
ARG-10356 B69-10254 03

Coordination chemistry in fused-salt solutions
ARG-10469 B69-10423 03

A comparison of two methods of measuring particle size of Al203 produced by a small rocket motor
ARG-11198 B69-10572 03

Discrimination of fish oil and mineral oil slicks on sea water
EQ-10412 B69-10673 01

SPECTROPHOTOMETRY

Uranium isotopes quantitatively determined by modified method of atomic absorption spectrophotometry
ARG-210 B67-10236 03

Analytical technique characterizes all trace contaminants in water
MSC-11032 B67-10243 03

Blood oxygen saturation determined by transmission spectrophotometry of hemolyzed blood samples
MSC-11018 B67-10252 04

Sodium peroxide permits rapid oxidation of manganese for easy spectrophotometric determination
ARG-262 B67-10421 03

Spectrophotometric technique quantitatively determines NaBDT inhibitor in ethylene glycol-water solutions
MSC-11496 B67-10573 03

Reduction by monovalent zinc, cadmium, and nickel cations
ARG-10328 B69-10170 03

SPECTROMETERS

A radiometer-pyrometer
LEWIS-2084 B66-10606 01

Improved relay optical element for spectroradiometer using cryogenically cooled detector
MSC-11688 B68-10245 02

SPECTROSCOPIC ANALYSIS

Highly sensitive solids mass spectrograph uses inert-gas ion source
MSC-11 B66-10114 02

Thin-film ferrites vapor deposited by one-step process in vacuum
MSC-259 B66-10398 03

Neutron activation analysis traces copper artifacts to geographical point of origin
ARG-119 B67-10036 02

Spectrographic analysis of bismuth-tin eutectic alloys by spark-ignited low-voltage ac-arc excitation
ARG-10288 B69-10081 03

Mass spectograph analysis
MSC-13239 B69-10134 06

Laser microprobe facility used in the elemental analysis of small feature of a sample
ARG-10359 B69-10165 02

Detecting hydrogen-containing contaminants on metal surfaces
ARG-20456 B69-10192 03

SPECTROSCOPY

Beam splitter used in dual filming technique
MSC-11030 B66-10072 02

Blackbody cavity radiometer has rapid response
JPL-521 B66-10679 01

Hydrogen maser as a highly stable frequency reference
MSC-2437 B67-10146 01

Analytical technique characterizes all trace contaminants in water
MSC-11032 B67-10243 03

Numerical least-square method for resolving complex pulse height spectra
GSPC-10142 B67-10480 06

Miniaturized King furnace permits absorption spectroscopy of small samples
ARG-10177 B68-10418 02

Ge-diode detector combined with crystal-diffraction spectrometer permits high-resolution gamma ray spectroscopy
ARG-10090 B69-10005 02

I-617
### SPECTRUM ANALYSIS

The response of monoenergetic gamma rays in finite media are investigated

**ARG-10295**  
B69-10080  02

Conditioning of pulses from aerosol-particle detectors

**ERC-10250**  
B69-10691  01

### HIGHLY SENSITIVE SOLIDS MASS SPECTROMETER

Highly sensitive solids mass spectrometer uses inert-gas ion source

**ERC-11**  
B66-10144  02

Computer programs perform spectral analyses of up to seven time series

**M-PS-1133**  
B66-10539  01

### PARASMETRIC UP-CONVERTER INCREASES FLEXIBILITY

Parasmetric up-converter increases flexibility of laser

**M-SC-47-98**  
B67-10104  01

A calibration means for spectrum analyzers

**MSC-10987**  
B67-10254  01

New technique for determination of cross-power spectral density with damped oscillators

**M-PS-14022**

Miniature paint-spray gun for recessed
areas
MSC-13060 B68-10387 05

Renewal of corrosion protection of coated
aluminum after welding
K-PS-20361 B69-10150 05

Improved primer for bonding polyurethane
adhesive to metals
SPATTERS

Quick-hardening problems are eliminated with spray gun modification which mixes resin and accelerator liquids during application.

Lead oxide ceramic makes excellent high-temperature lubricant.

Inert gas spraying device aids in repair of hazardous systems.

Multilayer refractory nozzles produced by plasma-spray process.

Spray-on electrodes enable EKG monitoring of physically active subjects.

Scribable coating for plastic films.

System for measuring spatial distribution of ejected droplets, a concept.

Single-element coaxial injector for rocket fuel.

Modified cryogenic storage tank subsystem.

Spray-on technique simplifies fabrication of complex thermal insulation blanket.

Dispenser leak-tests and sterilizes rubber gloves.

Standards for electron probe microanalysis of silicates prepared by convenient method.

Sprayable birefringent coating enables mounting improves heat-sink contact with beryllia washer.

Liquid oxygen dicting cleaned by falling film method.

Acid spray technique mills aluminum alloy materials without immersion.

Fire retardant foams developed to suppress fuel fires.

High-emittance coatings on metal substrates.

SPREADING

Discrimination of fish oil and mineral oil slicks on sea water.

SPRINGS (ELASTIC)

Solenois permits remote control of stop watch and assures restarting.

New package for Belleville spring permits rate change, easy disassembly.

Leaf-spring suspension provides accurate parallel displacements.

Collapsible truss structure is automatically expandable.

SUBJECT INDEX

Coiled spring makes self-locking device for threaded fasteners.

Bidirectional torque filter eliminates backlash.

Extendible column can be stowed on drum.

Spiral heater coils hand-formed with fixture.

Fluid check valve has fail-safe feature.

Simple device produces accelerometer calibration pulse.

Coiled sheet metal strip opens into tubular configuration.

Lamp automatically switches to new filament on burnout.

Bench vise adapter grips tubing securely and safely.

Calibrated clamp facilitates pressure application.

T-handle wrench has torque-limiting action.

Fingertip current control facilitates use of arc welding gun.

Soldering tool heats workpieces and applies solder in one operation.

Mounting improves heat-sink contact with beryllia washer.

Portable power tool machines weld joints in field.

Fixture aids soldering of electronic components on circuit board.

Pneumatic shutoff and time-delay valve operates at controlled rate.

Bellow design features low spring rate and long life.

Torque wrench allows readings from inaccessible locations.

Cylindrical claw clamp has quick release feature.

Lathe chuck key incorporates safety feature.

Seal surfaces protected during assembly.

Device facilitates centering of workpieces in lathe chuck.
Extensometer automatically measures elongation in elastomers

Diaphragm spring gives clutch over-center toggle effect

Tool pre-tensions covers prior to lacing

Modified hydraulic braking system limits angular deceleration to safe values

Bellows joint absorbs torsional deflections in duct system

Shock-operated valve would automatically protect fluid systems

Braking mechanism is self actuating and bidirectional

Spiral spring/strain gage combination accurately measures shock induced deflection

Hole saw drill attachment has zero force reaction

Friction brake cushions acceleration and vibration loads

Fuel and oxidizer valve assembly employs single solenoid actuator

Resonant frequency can be adjusted on vibration mount

Gage accurately controls force for placing chips on substrates

Actuator device schedules rate of valve closure

Combination double door high-vacuum valve provides access to vacuum chamber

Resilient guides reduce hysteresis effect in Belleville spring package

Aspirator increases relief valve poppet stroke

Solenoid valve design has one moving part

Line adapter provides quick disconnect under moderate side loading

Excellent spring properties developed in two nickel alloys for use at cryogenic temperatures

Test device prevents weld joint damage by eliminating axial pin forces on unpotted modules

Coaxial cable stripping device facilitates RF cabling fabrication

An improved magnetic tape recorder

GSFC-08259

SUBJECT INDEX

STATIC LOADS
Lightweight load support serves as vibration damper
JPL-661 B65-10144 05
Refractory oxides evaluated for high-temperature use
LANL-121 B65-10167 03
Pressure responsive seal handles static and dynamic loads
GSFC-491 B65-10327 05
Mechanism continuously measures static and dynamic cable loads
MSC-217 B66-10107 05
Transducer measures force in vacuum environment
LANL-218 B66-10161 01
Conceptual dead weight device to provide static and dynamic pressure calibration
NPS-16672 B67-10000 01

STATIC PRESSURE
Averaging probe reduces static-pressure sensing errors
LANL-36 B66-10114 05
Computer program determines gas flow rates in piping systems
NPS-643 B66-10300 01
Combination spacer and gasket provides effective static seal
NPS-1397 B66-10485 05
Pressure probe compensates for dimensional tolerance variations
LANL-302 B66-10599 01
Experimental design for research on shock-turbulence interaction
NPS-2003 B66-10604 02

STATIC TESTS
Materials physically tested in variable-environment chamber
JPL-789 B66-10121 05
Effects of high frequency current in welding aluminum alloy 6061
NPS-17337 B66-10383 05

STATICS
Static seal concept to accommodate seal tolerances
NPS-1854 B67-10285 05
Cryogenic seal concept for static and dynamic conditions
NPS-12986 B67-10673 05

STATIONS
Concept for automatic Doppler compensation in two-way communication system
GSFC-10031 B66-10683 01

STATISTICAL ANALYSIS
Computer program performs statistical analysis for random processes
NPS-723 B66-10525 01
Computer program performs spectral analyses of up to seven time series
NPS-1123 B66-10539 01
Welding of AM50 and AM35 steel
NPS-2314 B67-10292 05
Computer program uses Monte Carlo techniques for statistical system performance analysis
NPS-2234 B67-10306 06
Algebraic Monte Carlo procedure reduces statistical analysis time and cost factors
NPS-1897 B67-10438 01

Study made of thin-walled pipe response to turbulent fluids
NPS-1321 B67-10518 05
New method for critical failure prediction of complex systems
NPS-14133 B67-10252 02
Study of optimum discrete estimators in measurement analysis
NPS-14915 B67-10348 02
Performance analysis of electrical circuits
NPS-15001 B67-10448 06

Numerical inversion of finite Toeplitz matrices and vector Toeplitz matrices
NPS-10256 B68-10088 04
A theoretical study of radar backscatter from distributed targets with emphasis on polarisation dependence
NPS-13775 B69-10560 02
Live-timer method of automatic dead-time correction for precision counting
NPS-10478 B66-10612 01

STATISTICAL CORRELATION
The X square statistic and goodness of fit test
GSFC-10547 B66-10136 02

STATISTICAL DISTRIBUTIONS
Design reliability goal developed from small sample
NPS-403 B66-10405 05
Computer program calculates monotonic maximum likelihood estimates using method of reversals
NPS-1516 B67-10136 01
Probabilistic approach to long range planning of manpower
NPS-11524 B67-10576 06
Study made of mechanics of deformation and fracture of fibrous composites
EQ-10035 B67-10660 03

STATISTICAL MECHANICS
Computer program for calculation of ideal gas thermodynamic data
LANL-10225 B67-10025 06

STATISTICS
GERT exclusive-or combining paths and loops of electrical networks
ERG-10206 B66-10435 06
GERT simulation program for GERT network analysis
ERG-10209 B66-10457 06
Failure rates for accelerated acceptance testing of silicon transistors
ERG-10198 B68-10541 01

STATOR BLADES
Noise study of single stage compressor rotor-stator interaction
LANL-137 B67-10516 02
Acoustic wave analysis
NPS-10768 B66-10265 06
Computer programs for axial flow compressor design
LANL-10765 B67-10174 06

STATORS
Brushless dc motor uses electron beam switching tube as commutator

configurations  

SUBJECT INDEX

configurations  

Analysis of stability-critical orthotropic cylinders subjected to axial compression  

Torque meter aids study of hysteresis  

Circuit measures hysteresis loop areas at 30 Hz  

Computer program performs rectangular fitting stress analysis  

Digital computer program predicts effects of local pressure transients on deformation and stresses in cylindrical ducts  

Development of biaxial test fixture includes cryogenic application  

Experiments with ceramic coatings  

Nondestructive method for measuring residual stresses in metals, a concept  

General series solution technique for bending of irregular laterally loaded flat plates  

Torsion system for creep testing with multiple stress reversals  

Stress-testing of the throat of a rocket's nozzle  

Root-cubing and general root-powering methods for finding the zeros of polynomials  

Determination of permissible applied load stress in structural elements  

STRESS CONCENTRATION  

Lightweight hinged bellows restraint has high load capacity  

Fastener distributes stress evenly from sandwich-panel-hung items  

Resilient clamp holds fuel cell stack through thermal cycle  

Aluminum/steel wire composite plates exhibit high tensile strength  

Torus elements used in effective shock absorber  

Post-stressed concrete foundation may reduce machinery vibration  

Analysis of stability-critical orthotropic cylinders subjected to axial compression  

Heavy-gage bonded honeycomb sandwich as primary load-bearing structure  

STRESS CORROSION  

Study made of mechanics of deformation and fracture of fibrous composites  

Tensile testing grips ensure uniform loading of bimetal tubing specimens  

Analysis of stability-critical orthotropic cylinders subjected to axial compression  

Heavy-gage bonded honeycomb sandwich as primary load-bearing structure  

Stress-corrosion characteristics of aluminum casting alloy 845  

Study of stress corrosion in aluminum alloys  

Post-stressed concrete foundation may reduce machinery vibration  

Analysis of stability-critical orthotropic cylinders subjected to axial compression  

Heavy-gage bonded honeycomb sandwich as primary load-bearing structure  

Aluminum alloys protected against stress-corrosion cracking  

New brazing alloy eliminates metal-stress cracking  

Electrolytic etching process provides effective bonding surface on stainless steel  

Weldable aluminum alloy has improved mechanical properties  

Thermal stress-relief treatments for 2219 aluminum alloy are evaluated  

Treatment increases stress-corrosion resistance of aluminum alloys  

New weldable high strength aluminum alloy developed for cryogenic service  

Beryllium fluoride film protects beryllium against corrosion  

Study to minimize hydrogen embrittlement of ultrahigh-strength steels  

Decrementing of titanium to minimize stress corrosion  

Heat treatment study of aluminum casting alloy 845  

Glass bead shot peening retards stress corrosion cracks in titanium alloy  

Study made of procedures for externally loading and corrosion testing stress corrosion specimens  

Study of stress corrosion in aluminum alloys  

Study of crack initiation phenomena associated with stress corrosion of aluminum alloys  

Stress-corrosion characteristics of aluminum casting alloy 845  

A rapid stress-corrosion test for aluminum alloys

Ratio matching of half-bridge weldable strain gauges, computer program
FMC-10032 B69-10040 06

Four-bar linkage for thermal compensation in test mounts for structures
NFO-11059 B69-10298 05

STRUCTURAL VIBRATION

Viscous-pendulum damper suppresses structural vibrations
LANGLEY-45 B66-10272 05

Seismic transducer measures small horizontal displacements
M-PS-81 B65-10029 05

Noncontacting vibration transducer has constant sensitivity
LANGLEY-99 B65-10392 01

Tensile-strength apparatus applies high strain-rate loading with minimum shock
JPL-26 B66-10063 05

Mechanism isolates load weighing cell during lifting of load
MSC-297 B66-10071 05

Multicolor stroboscope pinpoints resonances in vibrating components
JPL-0033 B66-10223 01

Rugged microelectronic module package supports circuitry on heat sink
MSC-81A B66-10245 01

Fluid damping reduces bellows seal fatigue failures
M-PS-565 B66-10249 05

Study made of interaction between sound fields and structural vibrations
SQ-26 B67-10068 02

Post-stressed concrete foundation may reduce machinery vibration
MDO-130 B67-10237 05

STRUCTURAL WEIGHT

Pneumatic separator gives quick release to heavy loads
KSC-66-10 B66-10294 05

Lightweight heater generates high temperatures from low current
SAM-1000A B68-10223 01

Weight Control System
M-PS-15028 B69-10041 06

STRUCTURES

Air-cured ceramic coating insulates against high heat fluxes
M-PS-150 B65-10357 03

STRAINS

Lightweight load support serves as vibration damper
JPL-661 B65-10144 05

Combustion chamber struts can be effectively transpiration cooled
M-PS-1830 B66-10643 03

Land landing couch dynamics computer program
MSC-1210 B67-10233 06

SUBMERGED BODIES

Fiber glass reinforced structural materials for aerospace application
M-PS-14806 B66-10360 03

Air-cushion lift pad
M-PS-14685 B69-10448 05

STUDS (STRUCTURAL MEMBERS)

Gas facilitates adhesive bonding of studs to surfaces
M-PS-20259 B69-10099 05

Repair of honeycomb panels with welded breakaway studs
MSC-15046 B69-10261 05

STRENGTH

Warpage eliminated in copper-clad microwave circuit laminates
M-PS-13692 B67-10454 03

STyrofoam (TRADEMARK)

Mill profiler machines soft materials accurately
M-PS-692 B66-10254 05

Fixed vacuum plate clamps styrofoam for machining
M-PS-683 B66-10283 05

SUBASSEMBLIES

Computerized parts list system coordinates engineering releases, parts control, and manufacturing planning
NWC-10073 B67-10348 06

Replacement of fluid-filter elements without interruption of flow
MSC-15499 B69-10245 05

SUBDIVISIONS

Simple scale interpolator facilitates reading of graphs
LEWIS-92 B66-10302 05

SUBHARMONIC GENERATORS

Experimental coherent fractional frequency multiplier at S-band
M-PS-2427 B66-10250 01

SUBLIATION

Peco provides heat transfer for solid CO2 calibration standard
M-PS-646 B66-10257 02

Auxiliary titanium sublimation pump produces ultrahigh 10^-10 torr/ vacua
LANGLEY-212 B66-10388 02

Modular Porous Plate Sublimator /MPPS/ requires only water supply for coolant
M-PS-1374 B66-10409 01

Chemical regeneration of emitter surface increases thermionic diode life
LEWIS-17 B66-10435 02

Radioactive method enables determination of surface areas rapidly and accurately
FU-0088 B67-10409 03

Development of dual solid cryogens for high reliability refrigeration system
GSP-10118 B67-10644 02

Measurement of gas flow at extremely low pressures
MSC-13261 B69-10522 03

SUBMERGED BODIES

System locates randomly placed remote objects
LANGLEY-209 B66-10315 01

Ballast barge concept for underwater structures
KSC-10196 B68-10168 05

Proposed gas generation assembly would recover deeply submerged objects

### SUBJECT INDEX

#### SURFACE ROUGHNESS EFFECTS

- Universal transloader moves delicate equipment without stress | M-FS-654 |
- Selective tube roughening increases heat transfer capability | M-FS-599 |

#### SURFACE STABILITY

- Nondestructive method for measuring residual stresses in metals, a concept | KSC-10237 |
- Improved process for epitaxial deposition of silicon on prediffused substrates | M-FS-14910 |

#### SURFACE TEMPERATURE

- Photoelectric scanner makes detailed work function maps of metal surface | JPL-SC-176 |
- Pyrometry handbook describes practical aspects of surface temperature measurements of opaque materials | LEWIS-349 |
- Instrument accurately measures small temperature changes on test surface | LANGLAY-174 |
- Computer program determines thermal environment and temperature history of lunar orbiting space vehicles | M-FS-12916 |
- Liquid crystal calibrator | M-FS-54151 |
- Surface temperature mapping with infrared photographic pyrometry | LEWIS-10763 |

#### SURFACE WAVES

- Ultrasonic used to measure residual stress | M-FS-12849 |
- Study of stress corrosion in aluminum alloys | M-FS-13906 |

#### SURFACES

- Portable flooring protects finished surfaces, is easily moved | M-FS-15 |
- Device measures curved surface finish on gear teeth | W00-112 |
- Rough surface improves stability of air-sounding balloons | M-FS-320 |
- Etching process mills Pd 14-8 No alloy steel to precise tolerances | MSC-270 |
- Inflatable O-ring seal would ease closing of hatch cover plate | MSC-740 |
- Lateral ring metal elastic wheel absorbs shock loading | M-FS-1312 |
- Ronchi test applied to measurement of surface roughness | M-FS-12563 |

in reduction atmosphere
NU-0046 B66-10134 01

Low power heating element provides thermal
control during swaging operations
K-PS-457 B66-10206 05

Double copper sheath multiconductor
instrumentation cable is durable and
easily installed in high thermal or nuclear
radiation area
NUC-10007 B67-10538 01
SWEB T COOLING

Tube swaging device uses explosive force
LANGLEY-1092 B68-10235 05

Shock-absorbent mountings for bearings
NFO-10626 B69-10331 05

Magnetic forming of resistive materials
F-FS-20417 B69-10397 03

SWEB T COOLING

Combustion chamber struts can be effectively transpiration cooled
N-FS-1830 B66-10643 03

SWEEP CIRCUITS

Subminiature deflection circuit operates integrated sweep circuits in TV camera
MSC-1263 B67-10155 01

Oscilloscope used as X-Y plotter or two-dimensional analyzer
LEWIS-311 B67-10269 01

SWEEP FREQUENCY

Frequency offset in linear FM/CW transponder eliminates clutter
N-FS-249 B65-10146 01

Circuit operates as sine function generator
ISC-255 B66-10038 01

Parallel line raster eliminates ambiguities in reading timing of pulses less than 500 microseconds apart
JPL-605 B66-10386 01

An investigation of phase-lock loop swept-frequency synchronization
N-FS-656 B66-10423 01

Plotter design simplifies determination of image sensor transfer characteristic
NFO-10164 B67-10206 01

Concept for automatic Doppler compensation in two-way communication systems
GSPC-10213 B67-10643 01

Sweep frequency detector
NFO-10669 B69-10289 01

SWELLING

Apparatus measures swelling of membranes in electrochemical cells
GSPC-280 B65-10087 01

SWITCHES

Camera shutter is actuated by electric signal
ABC-20 B63-10560 05

Photoelectric semiconductor switch operates with low level inputs
JPL-SC-068 B65-10033 01

Automatic thermal switch accelerates cooling-down of cryogenic system
JPL-655 B65-10060 01

Motor position sensor switches currents in brushless dc motors
GSPC-315 B65-10151 01

Electron-beam deflection controlled by digital signals
GSPC-385 B65-10283 02

Selenium bond decreases ON resistance of light-activated switch
JPL-SC-101 B65-10324 01

Three-position rocker switch actuator has positive centering
MSC-261 B65-10376 01

Economical and maintenance-free gas system operates railroad switches
NS-0045 B66-10124 05

Optically driven switch turn-off time reduced

HIGH VOLTAGE...

SYNCHRONIZATION
Beam profiles measured with thermluminescent dosimeters
ARG-10229
B69-10024

SYNTAX
JPL/JPL FORTRAN language with interval pre-processor
NFO-10835
B69-10187

SYNTHESIS
Synthesis of perbromates
ARG-10459
B69-10647

SYNTHETIC FIBERS
Modified soldering iron speeds cutting of synthetic materials
M-PS-725
B66-10246

Study made of dielectric properties of promising materials for cryogenic capacitors
M-PS-13926
B67-10366

SYNTHESIS
Automated microsyringe is highly accurate and reliable
NFO-10142
B67-10203

Liquid microscopy chamber and microsyringe designs allow more efficient microdissections
ARG-251
B67-10305

Improved sample capsule for determination of oxygen in hemolyzed blood
MSC-11017
B67-10408

SYNTHESIZED OSCILLATORS
An investigation of phase-lock loop swept-frequency synchronization
M-PS-656
B66-10423

SYSTEM FAILURES
Safety switch permits emergency bridge crane shutdown
M-PS-549
B66-10168

Polarizing keys prevent mismatch of connector plugs and receptacles
MSC-543
B66-10251

Simplified circuit corrects faults in parallel binary information channels
JPL-SC-09
B66-10261

Program computes single-point failures in critical system designs
NPO-10142
B67-10203

Improved frequency divider employs
NFO-10008
B67-10575

Synchronizing redundant power oscillators
ITC-09377
B69-10546

SUBJECT INDEX

T SHAPE
Temperature-cooled cryogenic bleed maintains liquid state in transfer line
M-FS-12681 B67-10426 01

TABLES (DATA)
Computer program simplifies selection of structural steel columns
NU-0048 B66-10097 01
System monitors discrete computer inputs
M-FS-1021 B66-10389 01
An orthonormalization procedure for multivariable function approximation
M-FS-1313 B66-10579 01
Equations provide tabular information on effects of uniform and variable loads on thin, flat, circular plates
ABG-151 B66-10601 05
Three-axis attitude and direction reference instrument has only one moving part
M-FS-1819 B66-10644 01
Recommended values of the thermophysical properties of eight alloys, their major constituents and oxides
NU-0095 B67-10062 03
Solubility data are compiled for metals in liquid zinc
ABG-149 B67-10191 03
A simplified PERT system
M-FS-2267 B67-10241 05
Analytical drafting curves provide exact equations for plotted data
LANGLEY-265 B67-10601 02
Solving nonlinear heat transfer constant area fin problems
M-FS-14051 B68-10504 02
Failure rates for accelerated acceptance testing of silicon transistors
ZRC-10198 B68-10541 01
Thermal expansion properties of aerospace materials
M-FS-18335 B69-10055 03
Electron interaction in matter
M-FS-14086 B69-10674 02

TABS (CONTROL SURFACES)
Colored spring makes self-locking device for threaded fasteners
MSC-149 B65-10135 05
Steel test panel helps control additives in pyrophosphate copper plating
LEWIS-10101 B67-10358 05

TABULATION
Analysis of dynamic systems with DAP68 computer program
M-FS-13399 B67-10523 06
Ratio matching of half-bridge weldable strain gages, computer program
FRC-10032 B69-10040 06

TABULATION PROCESSES
Data retrieval system provides unlimited hardware design information
MSC-1144 B67-10170 01

TACHOMETERS
Noncontacting vibration transducer has constant sensitivity
LANGLEY-99 B65-10392 01
Variable-capacitance tachometer eliminates troublesome magnetic fields
GSPC-435 B66-10126 01
Automatic system determines moments of inertia of asymmetrical objects
M-FS-1769 B66-10636 01
Conceptual servo technique for controlling tape drivers
M-FS-12955 B67-10595 01
High- and low-pressure pneumotachometers measure respiration rates accurately in adverse environments
FRC-10012 B68-10186 01

TAKHOFF
New anemometer has fast response, measures dynamic pressure directly
LANGLEY-26 B63-10530 05

TANGENTS
Combustion chamber inlet manifold separates vapor from liquid
M-FS-531 B66-10052 05
Thermal conductivity and dielectric constant of silicate materials
M-FS-14856 B68-10351 03

TANK GEOMETRY
System for measuring roundness and concentricity of large tanks
M-FS-13362 B68-10099 05

TANKS (CONTAINERS)
Two-part valve acts as quick coupling
JPL-478 B68-10223 05
Oscillator circuit measures liquid level in tanks
M-FS-285 B65-10209 01
Weld leaks rapidly and safely detected
M-FS-362 B65-10265 01
Economical and maintenance-free gas system operates railroad switches
NU-0045 B66-10124 05
Device without electrical connections in tank measures liquid level
WOO-235 B66-10198 01
Study made to establish parameters and limitations of explosive welding
M-FS-13006 B67-10393 05
Computer program performs rectangular fitting stress analysis
M-FS-13010 B67-10520 06
Variable-speed, portable routing skate
M-FS-13772 B67-10525 05
Portable, high intensity isotopic neutron source provides increased experimental accuracy
ARG-90250 B68-10243 02
High-torque power wrench, a concept
M-FS-18194 B68-10299 05
Renewal of corrosion protection of coated aluminum after welding
M-FS-20361 B69-10150 05
Space-saving hoist for tank manholes
M-FS-16508 B69-10180 05
Handbook for design of containers of fluids and gases for spacecraft
M-FS-20502 B69-10279 05
Instrumentation for nondestructive testing of composite honeycomb materials
M-FS-20405 B69-10366 03
Integral valve provides automatic relief

I-651
Improved inorganic ion exchange membranes
LEWIS-10737 B69-10541 03

Nickel-base superalloys developed for high-temperature applications
LEWIS-226 B66-10222 03

Tantalum alloys resist creep deformation at elevated temperatures
LEWIS-350 B66-10558 03

Improved high-temperature silicide coatings
LEWIS-10817 B69-10266 03

Dielectric materials for use in thin-film capacitors
M-FS-20471 B69-10387 02

System selects framing rate for spectrograph camera
LANGLEY-55 B65-10086 01

Hybrid computer technique yields random signal probability distributions
ARC-35 B65-10208 01

Electronic phase-locked-loop speed control system in stable
JPL-SC-084 B66-10232 01

Recording and time expansion technique for high-speed, single-shot transient video signal
ARC-1003 B67-10139 01

An improved magnetic tape recorder
GSPC-08259 B67-10646 01

Damage in rolling element bearings may be detected early
EQ-10031 B67-10658 01

Scan rate converter for tape recording and playback of TV pictures
NPO-10166 B67-10676 01

Analysis of flutter in tape transport systems
M-FS-20471 B68-10027 01

Magnetic tape transport controlled by rotating transducer heads
GSPC-463 B68-10079 01

Harmonic distortion analyzer speeds setup of magnetic tape recorders
GSPC-10198 B68-10254 01

Shock-absorbent mountings for bearings
NPO-10626 B69-10331 05

Helical recorder
GSPC-10614 B69-10340 01

Seismograph recording of large rocket engine operation
M-FS-20545 B69-10756 01

Nickel-base superalloy's excellent properties promote its service to 2200 degrees F
LEWIS-10355 B68-10380 03

Miniaturized King furnace permits absorption spectroscopy of small samples
ARG-10177 B68-10410 02

Refractory oxide insulated thermocouple designed and analyzed for high temperature applications
ARG-10202 B69-10053 03

Preparation of thorium magnesium-zinc reduction
ARG-10245 B69-10079 03

Nickel-base superalloys developed for high-temperature applications

Concept for automatic Doppler compensation in two-way communication systems
GSFC-10213

Acquisition of pseudonoise signals by sequential estimation
M-FS-13690

Communication system features dual mode range acquisition plus time delay measurement
M-FS-14323

One hundred MHz voltage-controlled oscillator
NPO-11004

Acquisition of pseudonoise signals by sequential estimation
Commnunication system features dual mode range acquisition plus time delay measurement
M-FS-14323

One hundred MHz voltage-controlled oscillator
NPO-11004

PCM bit detection with correction for intersymbol interference
GSPC-10155

RF noise suppression using the photodiodelectric effect in semiconductors
MSC-12259

Multi-feed cone for Cassegrainian antenna
NPO-10539

Self-shielding printed circuit boards for high frequency amplifiers and transmitters
HQ-10433

An infrared television system for hydrogen flame detection
KSC-10368

Optimum FM pre-emphasis
KSC-10151

Energy-storage of a prescribed impedance
NPO-10303

Estimation of signal-to-noise ratio
XNP-05254

Balloon batteries, charged and heated by solar energy
GSFC-10769

Electrolytic separation of crystals of transition-metal oxides
ABO-10596

Versatile telemetering system
ABO-10339

Optical frequency waveguide and ion transmission system
HQ-10541

A conceptual, parallel operating data compression processor
NW-10068

Improved television signal processing system
NPO-10140

A calibration means for spectrum analyzers
MSC-10987

Multichannel pulse height analyzer is inexpensive, features low power requirements
HQ-10020

Multiplexer uses insulated gate-field effect transistor

Circuit reduces distortion of FM modulator
GSFC-257

Logic circuit exhibits optimum performance
LANGLEY-129

Device measures fluid drag on test vehicles
LANGLEY-34

Field-effect transistor replaces bulky transformer in analog-gate circuit
GSFC-351

Instrument performs nondestructive chemical analysis, data can be telemetered
JPL-SC-078

Temperature transducer has high output, is time stable
GSFC-446

Miniature bioelectric device accurately measures and telemeters temperature
ARC-52

Seismometer designed for remote operation in random orientation
JPL-320

Phonocardiograph system monitors heart sounds
MSC-185

Solid state thermostat has integral probe and circuitry
N-FS-434

FM acquisition demodulator achieves automatic synchronization of a telemetry channel
JPL-612

Thin-film ferrites vapor deposited by one-step process in vacuum
MCS-259

Single-sideband modulator accurately reproduces phase information in 2-Mc signals
M-FS-664

Miniature capacitive accelerometer is especially applicable to telemetry
ARC-72

Digital system detects binary code patterns containing errors
GSFC-541

Miniature capacitor functions as pressure sensor
JPL-903

Multiplexing control device enables handling of wide variations in sampling rates
M-FS-1871

Numerical data frame readout system used in testing telemetry systems
GSFC-551

A conceptual, parallel operating data compression processor
NPO-10068

Improved television signal processing system
NPO-10140

An efficient, temperature-compensated subcarrier oscillator
JPL-SC-091

A calibration means for spectrum analyzers
MSC-10987

Multichannel pulse height analyzer is inexpensive, features low power requirements
HQ-10020

Multiplexer uses insulated gate-field effect transistors

TEMPERATURE DISTRIBUTION

Variable-transparency wall regulates temperatures of structures  
LANGLEY-25  B63-10529 03

Hot-air soldering technique prevents overheating of electrical components
Temperature-sensitivity network drives astable multivibrator

Thermal Network Analyzer Program

Technique for predicting temperature distribution in gases

Improved retort for cleaning metal powders with hydrogen

Modified cryogenic storage tank subsystem

Light ray modulation controls optical system alignment

Feed-through connector withstands high temperatures in vacuum environment

Coiled sheet metal strip opens into tubular configuration

Friction device damps linear motion of rotating shaft

Remote preamplifier circuit maintains stability over wide temperature range

Computer program resolves radiant, conductive, and convective heat transfer problems for variety of geometries

Computer program calculates steady-state temperature distribution within plane or axisymmetric solids

Computer program predicts thermal and flow transients experienced in a reactor loss-of-flow accident

Computer program resolves radiative, conductive, and convective heat transfer problems for variety of geometries

Thermodynamic properties of saturated liquid parahydrogen charted for important temperature range

Computer program MCAP-TGSS calculates steady-state fluid dynamics of coolant in parallel channels and temperature distribution in surrounding heat-generating solid

Computer program MCAP provides for steady state thermal and flow analysis of multiple parallel channels in heat-generating solid

Stable ac phase and amplitude comparator

Graphite cloth facilitates vacuum evaporation of silicon monoxide

Dynamics of moving bubbles in single and binary component systems

Computer program TRAC'K performs transient and/or steady state thermal analysis with coupled fluid flow and heat conduction

Solving nonlinear heat transfer constant area fin problems

Surface temperature mapping with infrared photographic pyrometry

Computer program simplifies design of rotating components of turbomachinery

Stable ac phase and amplitude comparator

Graphite cloth facilitates vacuum evaporation of silicon monoxide

Dynamics of moving bubbles in single and binary component systems

Computer program TRAC'K performs transient and/or steady state thermal analysis with coupled fluid flow and heat conduction

Solving nonlinear heat transfer constant area fin problems

Surface temperature mapping with infrared photographic pyrometry

Light ray modulation controls optical system alignment

Imaging slitless spectrometer for X-ray astronomy

Superconductivity in zirconium-rhodium alloys

Computer program calculates the effective temperature for a crystalline solid.

SPAN C - Terminal sterilization process analysis program

Refractory oxide insulated thermocouple designed and analyzed for high temperature applications

Dewpoint temperature inversions analyzed

Techniques for controlling warpage and residual stresses in welded structures

Liquid-metal heat transfer in a cocurrent-flow, double-pipe heat exchanger is investigated

Surface temperature mapping with infrared photographic pyrometry

The effect of mismatched components on microwave noise-temperature calibrations

TEMPERATURE MEASURING INSTRUMENTS

Transducer measures temperature differentials in presence of strong electromagnetic fields

Miniature bioelectric device accurately measures and telemeters temperature

Calorimeter accurately measures thermal radiation energy

Apparatus measures thermal conductivity of honeycomb-core panels

Bismuth alloy potting seals aluminum connector in cryogenic application

Thin-film gage measures low heat-transfer rates

Electrically conductive fibers thermally isolate temperature sensor

Microminiature thermocouple monitors own installation

Study of theory and application of long duration heat flux transducers

Instrument accurately measures small temperature changes on test surface

Bimetal sensor averages temperature of nonuniform profile

Thin film heat transfer gage is stable at higher temperatures

Tungsten-rhenium alloy thermocouples effective for high-temperature measurements

Ultrasonic temperature measuring device

Millimeter-wave atmospheric loss prediction method

TEMPERATURE PROBES

Internal cooling increases range of immersion-type temperature probe

Solid state thermostat has integral probe and circuitry

Thermal conductivity probe

TEMPERATURE PROFILES

Density trace made with computer printout

SPAN C - Terminal sterilization process analysis program

SPAN - Terminal sterilization process analysis program

Surface temperature mapping with infrared photographic pyrometry

The effect of mismatched components on microwave noise-temperature calibrations

TEMPERATURE SCALES

Resistance thermometer has linear resistance-temperature coefficient at low temperatures

Linear-log counting-rate meter uses transconductance characteristics of a silicon planar transistor

Tool for reading psychrometric charts

TEMPERATURE SENSORS

Transducer measures temperature differentials in presence of strong electromagnetic fields

Temperature transducer has high output, is time stable

Wide-range instrument monitors flow rates of chemically active fluids

Sniffer used as portable hydrogen leak detector

Heat flux sensor design reduces extraneous source effects

Thin film thermal detector

Instrumentation monitors transported material through variety of parameters

Temperature or pressure controller

Fluidic transducer gives pressure output as function of temperature
Torsion system for creep testing with multiple stress reversals

Automatic calorimetry system monitors power

Thermal conductivity probe

High permeability semiconductors permit close-tolerance soldering

Improved thermal treatment of aluminum alloy 7075

Built-in templates speed up process for making accurate models

Lathe converted for grinding aspheric surfaces

Reusable neoprene jacket protects parts for chemical milling

Nylon bit removes cork insulation without damage to substrate

Machining technique prevents undercutting in tensile specimens

Calibration standard for dynamic evaluation of a profile-plotter

A method for precision anodize stripping

Polymer deformation gage measures thickness change in tensile tests

Study made of procedures for externally loading and corrosion testing stress corrosion specimens

Test system accurately determines tensile properties of irradiated metals at cryogenic temperatures

Lightweight magnesium-lithium alloys show promise

New alloy brazes titanium to stainless steel

Lightweight aluminum casting alloy is useful at cryogenic temperatures

Irradiation improves properties of an aromatic polyester

Tensile-strength apparatus applies high strain-rate loading with minimum shock

Mechanixs continuously measures static and dynamic cable loads

Materials physically tested in variable-environment chamber

Improved adhesive for cryogenic applications cures at room temperature

Fibers of newly developed refractory ceramics produced by improved process

Nickel-base superalloys developed for high-temperature applications

Aluminum/Steel wire composite plates exhibit high tensile strength

Boron-deoxidized copper withstands brazing temperatures

Friction loading device enables accurate testing of brittle materials

New backup-bar groove configuration improves heliarc welding of 2014-T6 aluminum

Weldable aluminum alloy has improved mechanical properties

Thermoplastic rubberlike material produced at low cost

New tungsten alloy has high strength at elevated temperatures

Tungsten fiber-reinforced copper composites form high strength electrical conductors

Study made to control depth of potting compound for honeycomb sandwich fasteners

Cryogenic fatigue data developed for Inconel 718

Evaluation of high temperature stranded hookup wire

Heat treatment study of aluminum casting alloy 865

Aluminum-titanium hydride-boron carbide composite provides lightweight neutron shield material

Simplified method measures changes in tensile yield strength using least number of specimens

High-strength tungsten alloy with improved ductility

Extrusion of small-diameter, thin-wall tungsten tubing

Magnesium-lithium alloys developed for low temperature use

Transducer measures embedment stresses in electronic modules

New class of thermosetting plastics has improved strength, thermal and chemical stability.

LEWIS-10108  B67-10197  03

Improved compression molding process.

LANGLEY-10027  B67-10302  03

Solid state thermostat has integral probe and circuitry.

I-PS-434  B66-10193  01

Improved compression molding process.

LANGLBP-10027  B67-10302  03

Solid state thermostat has integral probe and circuitry.

I-PS-434  B66-10193  01

Eighth conductance vapor thermal switch.

GSPC-10109  B68-10519  02

Finite element formulation for linear thermostastic materials.

BPO-11229  B69-10660  43

Wall-thickness changes predicted in hollow-dram tubing.

ABG-10425  B69-10428  02

Bimetallic devices help maintain constant sealing forces down to cryogenic temperatures.

I-PS-800  B66-10325  02

External linkage tie permits reduction in ducting system flange thickness.

I-PS-823  B66-10326  05

System for etching thick aluminum layers minimizes bridging and undercutting.

I-33-1366  B66-10400  03

Fluoride coatings make effective lubricants in molten sodium environment.

LEWIS-229  B66-10005  03

Single-crystal semiconductor films grown on foreign substrates.

WGO-076  B66-10225  01

Extensometer automatically measures elongation in elastomers.

FDS-517  B66-10513  05

Valve seat pores sealed with thermosetting monomer.

M-PS-900  B66-10322  03

Submicron holes in thin films increase sampling range of mass spectrometers.

JPL-SC-097  B66-10380  03

Self-supported aluminum thin films produced by vacuum deposition process.

ABC-58  B66-10387  03

Thin-film ferrites vapor deposited by one-step process in vacuum.

MSC-259  B66-10398  03

System for etching thick aluminum layers minimizes bridging and undercutting.

M-PS-1366  B66-10400  03

Thin plastic sheet eliminates need for expensive plating.

M-PS-1896  B66-10681  03

Mechanism facilitates coating of inner surfaces of metal cylinders.

GSPC-515  B66-10698  05

Air bearing provides friction-free support.

**SUBJECT INDEX**

**THRESHOLDS (PERCEPTION)**
- Modified alginesimeter provides accurate depth measurements
  MSC-616 B66-10647 04
- Computer program reduces calculation time of normal response functions
  M-FS-1517 B67-10108 01
- Oscillating-filter method for obtaining flashing-light visibility data
  MSC-13097 B69-10107 02

**THREATS**
- Bell nozzle kernel analysis program
  M-FS-18456 B69-10146 06
- Stress-testing of the throat of a rocket nozzle
  M-FS-12976 B67-10310 06

**THROTTLING**
- Two-Fluid, impinging-sheet injector
  NPO-10547 B68-10338 05
- Semitoroidal-diaphragm cavitating valve designed for bipropellant flow control
  XNP-09704 B69-10016 05
- Multiple-orifice throttle valve
  XNP-09698 B69-10030 05

**THRODS**
- Lightweight universal joint transmits both torque and thrust
  JPL-375 B63-10236 05
- Elimination of rocket engine asymmetric loads during tests at sea level
  M-FS-1730 B66-10674 05
- Computer program for mass and optimal solutions of some endpoint trajectory problems
  M-FS-12976 B67-10310 06
- Earth orbit rendezvous evaluation program
  M-FS-13016 B67-10407 06
- Computer program provides steady state analysis for liquid propellant propulsion systems
  M-FS-13064 B67-10414 06
- Fortran 4 program for two-impulse rendezvous analysis
  M-FS-13971 B67-10479 06
- Electrothermal linear actuator
  NPO-10637 B69-10296 05
- Elimination of dissolved gases in hypersonic engine propellants
  M-FS-16176 B69-10692 03

**THRUST LOADS**

**THRUST BEARINGS**
- Torque wrench designed for restricted areas
  LEWIS-246 B66-10011 05
- Hermetically sealed pump
  LEWIS-10837 B69-10320 05

**THRUST CHAMBERS**
- Plated nickel wire mesh makes superior catalyst bed
  MSC-216 B65-10321 03
- New brazing alloy eliminates metal-stress cracking
  WCO-249 B65-10397 03
- Special mount improves remote transducer accuracy
  LEWIS-269 B66-10021 01
- Beam splitter used in dual filming technique
  M-FS-501 B66-10072 02
- Microminiature thermocouple monitors own installation

**THRUST LOADS**
- Flexible coiled spline securely joins mating cylinders
  WCO-270 B66-10172 05
- Electronic analog equalization for vibrational testing
  NPO-10544 B69-10472 01

**THRUST MEASUREMENT**
- Apparatus measures very small thrusts
  WCO-048 B64-10284 05

**THRUST VECTOR CONTROL**
- Study of vortex valve for medium temperature solid propellants
  WCO-321 B66-10550 05
- Device measures reaction engine thrust vector deviations
  JPL-SC-163 B66-10642 05
- A comparison of two methods of measuring particle size of Al203 produced by a small rocket motor
  B69-10572 03

**THRUST-MEASUREMENT**

**THERMOCILLS**
- Effect of preparation procedures on intensity of radioautographic labeling is studied
  ARG-10032 B67-10500 04

**THERMALITY**

**TIME**
- Commercial film produces positive X-ray photo in ten seconds
  M-FS-521 B66-10307 02
- Sea dye marker provides visibility for 20 hours

Handtool facilitates extraction of circuit modules
LANGLEY-38 B65-10231 05

Remotely operated clamping tool has positive grip
NO-0020 B65-10254 05

Standoff tool speeds placement of friction-fit electrical terminals
WOO-029 B65-10348 05

Portable tool removes burrs from pipe and tubing
MSC-237 B65-10360 05

Portable tool cleans pipes and tubing
MSC-238 B65-10375 05

Drill bit design assures clean holes in...
Alignment tool facilitates pin placement on irregular horizontal surfaces

Modified pliers facilitate coupling of bayonet-type connectors

Bearing puller facilitates removal and replacement of bearing assemblies

Heat treatment stabilizes welded aluminum fings and tool structures

Hole saw drill attachment has zero force reaction

Film coating permits low-force scribing

Mechanical gauge accurately checks tubing flares, roundness, and concentricity

Micromanipulation tool is easily adapted to many uses

Tool facilitates installation of Harxon clamps

Photocensitive filler minimizes internal stresses in epoxy resins

Concept for modifying drafting instruments to minimize smearing

Tool samples subsurface soil free of surface contaminants

Tool displays tool assures accurate dip-brased joints

Tool reconstructs data input points corresponding to first order output graph

Versatile impact hand tool

Coaxial cable stripper for confined areas

Weld preparation tool for pipes and tubing

Fixture facilitates soldering operations

Gun facilitates adhesive bonding of studs to surfaces

Tube welding and brazing

Shell design computer program

Adjustable wrench for electronic connectors

Tools made of ice facilitate forming of soft, sticky materials

Tool simplifies machining of pipe ends for
precision welding
KSC-10361 B69-10231 05

Repair of weld defects in thin-walled stainless steel tubes
M-PS-16293 B69-10305 05

Design of a strain-gage probe
ARG-10338 B69-10343 05

TRANSFER
Rapid billet loader aids extrusion of refractory metals
LEWIS-50
Study of theory and application of long duration heat flux transducers
N-PS-1265
Irradiated gases transferred without contamination or dilution
Two-light circuit continuously monitors ac ground, phase, and neutral wires
MSC-136  B66-10045  02

Soldering iron temperature is automatically reduced
ARC-57  B66-10203  01

Substituting transistor for diode improves rectifying means
GSFC-476  B66-10295  01

Microphone multiplex system provides multiple outlets from single source
GSFC-426  B66-10308  01

Efficient dc to dc converter eliminates large stray magnetic fields
GSFC-463  B66-10376  01

Control circuit maintains unity power factor of reactive load
MSC-192  B66-10431  01

Thermionic scanner pinpoints work function of emitter surfaces
JPL-SC-177  B66-10444  01

Rectilinear accelerometer possesses self-calibration feature
K-FS-1480  B66-10452  01

Computer program analyzes and designs supersonic wing-body combinations
ARC-1041  B66-10335  06

Computer program provides linear sampled-data analysis for high order systems
K-FS-13021  B66-10287  06

Solution of differential equations by application of transformation groups
K-FS-14802  B66-10276  02

Computer program analyzes and designs supersonic wing-body combinations
ARC-1041  B66-10335  06

ABRAJ on-site tracking prediction program
K-FS-1036  B66-10103  06

Root-cubing and general root-powering methods for finding the zeros of polynomials
ARC-10444  B66-10242  02

Trajectory optimization using regularized variables
KSC-13370  B66-10610  02

TRANSFORMERS
Simple circuit continuously monitors thermocouple sensor
K-FS-61  B63-10567  01

Improved insertion-loss tester
JPL-358  B64-10080  01

Variable frequency transistor inverters use multiple core transformers
GSFC-183  B65-10119  01

Apparatus permits flexure testing of specimens at cryogenic temperatures
K-FS-257  B65-10129  02

System measures unidirectional forces, excludes extraneous forces
LEWIS-170  B65-10154  05

Analog-to-digital converter has increased reliability and reduced power consumption
GSFC-246  B65-10194  01

High-speed square-wave current limiter operates efficiently
JPL-SC-079  B65-10233  01

Electronic amper-hour integrator is accurate to one percent
GSFC-203  B65-10308  01

Compact SCR trigger circuit for ignitron switch operates efficiently
K-FS-371  B65-10387  01

Noncontacting vibration transducer has constant sensitivity
LANGLEY-99  B65-10392  01

Dual-voltage power supply has increased efficiency
LEWIS-107A  B66-10002  01

Complementary system vaporizes subcooled liquid, improves transformer efficiency
K-FS-550  B66-10045  02

Amplifier provides dual outputs from a single source with complete isolation
KSC-10056  B67-10221  01

Solid state phase detector replaces bulky transformer circuit
MSC-11007  B67-10253  01

Ultrasonic wrench produces leaktight connections
K-FS-12561  B67-10353  03

Signal generator converts direct current to multiphase supplies
MSC-11043  B67-10368  01

High power dc/dc and dc/ac electrical power conversion techniques developed
K-FS-13227  B67-10390  01

Blood pressure reprogramming adapter assists signal recording
MSC-265  B67-10475  01

Converter provides constant electrical power at various output voltages
GSFC-519  B67-10481  01

Light-controlled resistors provide quadrature signal rejection for high-gain servo systems

**TRANSPORT THEORY**

Computer program /P1-GAS/ calculates the P-0 and P-1 transfer matrices for neutron moderation in a monatomic gas

**TRANSPORTATION**

Universal transloader moves delicate equipment without stress

Carriage system remotely moves drawer over extended distance

Swing-out rail system separates overhead crane rails

Hydrostatic force used to handle outsized, heavy objects

Instrumentation monitors transported material through variety of parameters

Packaging criteria for transportation and handling shock and vibration

Computer graphics data conditioning

Weight Control System

**TRANSURANIAN ELEMENTS**

Nitric acid-organic mixtures surveyed for use in separation by anion exchange methods

**TRANSVERSE WAVES**

Computer program for determination of natural frequencies of closed spherical sandwich shells

Computer graphics data conditioning

Weight Control System

**TRAVELING WAVES**

Superconductor magnets used for stagger-tuning traveling-wave maser

Parametric up-converter increases flexibility of maser

Apparatus makes klystron operating frequency adjustable from remote point

Highly stable microwave delay line

Thermal short improves sensitivity of cryogenically cooled maser

Improved traveling wave maser amplifier

RF noise suppression using the photodielectric effect in semiconductors

**TRAVELING-WAVE TUBES**

Traveling-wave tube circuit simplifies microwave relay

**TRIGGER CIRCUITS**

A positive taper traveling-wave tube

Viscous-pendulum damper suppresses structural vibrations

Mass culture of photobacteria to obtain luciferase

Lateral ring metal elastic wheel absorbs shock loading

Apparatus of small size can be extended into long, rigid boom

Unmanned seismometer levels self, corrects drift errors

Instrumentation monitors transported material through variety of parameters

Packaging criteria for transportation and handling shock and vibration

Computer graphics data conditioning

Weight Control System

**TRAPESIODS**

Antenna configurations provide polarization diversity

**TRAPPING**

Method for determining properties of microinstabilities of a magnetized plasma

**TRAVELING-WAVE MASERS**

Superconductor magnets used for staggering-tuning traveling-wave maser

**PARAMETRIC UP-CONVERTER**

Increases flexibility of maser

**APPARATUS MAKES KLYSTRON**

Operating frequency adjustable from remote point

**HIGHLY STABLE MICROWAVE DELAY LINE**

**THERMAL SHORT IMPROVES SENSITIVITY**

Cryogenically cooled maser

**IMPROVED TRAVELING WAVE MASER AMPLIFIER**

**RF NOISE SUPPRESSION USING THE PHOTODIELECTRIC EFFECT IN SEMICONDUCTORS**

**TRAVELING-WAVE TUBES**

Traveling-wave tube circuit simplifies microwave relay

**TRIGGER CIRCUITS**

Unmanned seismometer levels self, corrects drift errors

Transistorized trigger circuit is frequency-controllable

System selects framing rate for spectrograph camera

Compact SCR trigger circuit for ignitron switch operates efficiently

Security warning system monitors up to fifteen remote areas simultaneously

Circuit multiplies pulse width modulation, exhibits linear transfer function

TV synchronization system features stability and noise immunity

Modified univibrator compensates for output timing errors

Laboratory pulse modulator compensates for output timing errors

Multichannel pulse height analyzer is inexpensive, features low power requirements

SiC/Si diode trigger circuit provides automatic range switching for log amplifier

Logic circuit detects both present and missing negative pulses in superimposed wave trains

Temperature-stabilized, triggerable microelectronic astable multivibrator starts reliably

Unique frequency-shift-keyed demodulation system

High-speed camera synchronization

Transistorized Marx bank pulse circuit
TRIGONOMETRIC FUNCTIONS

provides voltage multiplication with
nanosecond rise-time
ARG-10110 B68-10328 01

Schmitt trigger multivibrator
MSC-10955 B69-10143 01

Positive and negative output circuits
LEWIS-10715 B69-10151 01

TRIGONOMETRIC FUNCTIONS

Circuit operates as sine function generator
MSC-255 B68-10038 01

Wide-band doubler and sine wave quadrature
generator
NPO-11133 B69-10383 01

仪TRIGOPIOMETBY

Instrument accurately measures weld angle
and offset
M-PS-12849 B67-10563 05

TRIODES

Meter accurately measures flow of
low-conductivity fluids
JPL-0021 B63-10280 01

Application of the solid lubricant
polyethylene disulfide by sputtering
LEWIS-10544 B69-10340 02

TRIODES

Instrument quickly transposes ground reference
target to eye level
MSC-275 B66-10061 05

Alignment tool facilitates pin placement on
irregular horizontal surfaces
LANGLEY-219 B66-10410 05

TRIODES

Combustion method for assay of biological
materials labeled with carbon-14 or tritium,
or double-labeled
ARG-10331 B69-10208 04

Direct in-vial collection for
liquid-scintillation assay of carbon-14
and tritium
ARG-10424 B69-10412 03

TRUCKS

Fifth-wheel fork truck adapter
M-PS-14160 B69-10021 05

TRUNCATION ERRORS

Variable-step method of solving
differential equations
NPO-10515 B69-10017 02

TUNESSES

Collapsible truss structure is automatically
expandable
GSPC-265 B65-10126 05

TUBE ANODES

Solar X-ray spectrum reproduced in vacuum
MSC-228 B67-10164 02

X-ray source uses interchangeable target
anodes to vary X-ray wavelength
NPO-10036 B67-10218 02

TUBE CATHODES

Solar X-ray spectrum reproduced in vacuum
MSC-228 B67-10164 02

Uranium isotopes quantitatively determined
by modified method of atomic absorption
spectrophotometry
ARG-210 B67-10236 03

Oscilloscope used as X-Y plotter or
two-dimensional analyzer
LEWIS-311 B67-10269 01

Technique for tuning antenna systems
producing negligible signal radiation

SUBJECT INDEX

KSC-10060 B69-10215 01

TUBE GRID

Solar X-ray spectrum reproduced in vacuum
MSC-228 B67-10164 02

X-ray source uses interchangeable target
anodes to vary X-ray wavelength
NPO-10036 B67-10218 02

High-temperature, gas-filled ceramic
rectifiers, thyatrons, and
voltage-reference tubes
LEWIS-90271 B69-10376 01

TUBE HEAT EXCHANGERS

Complementary system vaporizes subcooled
liquid, improves transformer efficiency
M-PS-550 B66-10045 02

Heat exchanger tubes supported in high
vibration environment
M-PS-1401 B66-10567 05

Ultra-high-flux heat exchanger
M-PS-18135 B69-10201 02

TUBES

Break-up of metal tube makes one-time shock
absorber, bars rebound
LANGLEY-1A B63-10304 05

New nut and sleeve improve flared connections
M-PS-194 B65-10180 05

Strainer fits inside flared-tube fittings
LANGLEY-180 B65-10388 02

Metal tube can be folded for compact
stowage, is self-erecting
LEWIS-288 B66-10410 05

Selective tube roughening increases heat
transfer capability
M-PS-599 B66-10610 05

New electron microscope employs new video
display technique
ARG-156 B67-10312 03

Simple switch actuated by force applied
over wide solid angle
XNP-09808 B69-10032 01

Inflatable bladder to facilitate handling
of heavy objects - A concept
M-PS-14272 B65-10069 05

Tube welding and brazing
M-PS-20348 B65-10085 05

Fuel element concept for long life high
power nuclear reactors
LEWIS-10369 B69-10154 03

Rectangular-bore, high-gain laser plasma
tube
HQ-10234 B69-10193 02

Hydrogen flash lamps studied
ARG-10419 B69-10411 02

TUMORS

Uranyl phthalocyanines show promise in the
treatment of brain tumors
ARG-10310 B69-10203 04

Compound equation developed for postnatal
growth of birds and mammals
ARG-10192 B66-10427 04

Neutron therapy of cancer
ARG-10310 B69-10203 04

TUNERS

Magnetron tuner has locking feature
XNP-09771 B69-10119 05

Tunable bandpass filter with variable
subject index

selectivity
ARC-10191 B69-10130 01

An improved atomic hydrogen frequency and time standard
GSFC-10706 B69-10341 02

thin carbon film serves as UV bandpass filter
ERC-8 B66-10066 02

refractory coating protects intricate graphite elements from high-temperature hydrogen
N9-0027 B66-10084 01

high temperature thermocouple operates in reduced atmosphere
N9-0046 B66-10134 01

chromium oxide coatings improve thermal emissivity of alumina
W00-263 B66-10227 03

chemical regeneration of emitter surface increases thermionic diode life
LEWIS-17 B66-10435 02

study shows effect of surface preparations on improving thermionic emission
JPL-SC-140 B66-10493 01

tungsten insulated susceptor cup for high temperature induction furnace eliminates contamination
LEWIS-283 B66-10538 03

tungsten fiber-reinforced copper composites form high strength electrical conductors
LEWIS-338 B66-10572 03

sensors measure surface ablation rate of reentry vehicle heat shield
LANGL-287 B66-10592 01

plasma jet electrode has longer operating life
W00-069 S67-10024 02

sensing disks for slug-type calorimeters have higher temperature stability
M-PS-1067 B66-10161 01

electron beam welder X-rays its own welds
LEWIS-10111 B66-10216 02

welding, bonding, and sealing of refractory metals by vapor deposition
LEWIS-123 B66-10232 03

water cooled anode increases life of high temperature arc lamp
B-PS-10180 B66-10247 02

self-balancing line-reversal pyrometer automatically measures gas temperatures
LEWIS-338 B66-10268 01

portable spectrometer monitors inert gas shield in welding process
M-PS-12144 B66-10326 02

extrusion of small-diameter, thin-wall tungsten tubing
LEWIS-90335 B67-10355 05

electron beam parallel X-ray generator
MSC-11022 B66-10372 02

torque meter aids study of hysteresis in motor rings
M-PS-12215 B67-10412 01

thoriated tungsten tube provides improved high temperature thermocouple sheath
NUC-10145 B67-10627 03

reinforced thermal-shock resistant ceramics
LEWIS-10376 B68-10085 03

high temperature alloy
WOO-10253 B68-10280 03

fabrication techniques developed for small-diameter, thin-wall tungsten and tungsten alloy tubing
ARG-10100 B66-10047 05

I-701
Application of the solid lubricant molybdenum disulfide by sputtering
LEWIS-10544 B66-10340  03
Nickel-base alloy with improved stress rupture properties
LEWIS-10283 B66-10344  03
Nickel-base superalloys excellent properties promote its service to 2200

### SUBJECT INDEX

<p>| Self-supported aluminum thin films produced by vacuous deposition process | B66-10387 03 |
| Dielectric meter design permits measurement in vacuous under irradiation | B66-10401 01 |
| A continuously operating source of vacuous ultraviolet below 500 angstrom | B66-10576 01 |
| Photosensitive filler minimizes internal stresses in epoxy resins       | B67-10227 03 |
| Liquid mercury chamber and microsyringe designs allow more efficient microfabrications | B-251 |
| Lamp enables measurement of oxygen concentration in presence of water vapor | B67-10387 01 |
| Tool samples subsurface soil free of surface contaminants               | B67-10473 05 |
| Fluorescent particles enable visualization of gas flow                   | B66-10259 02 |
| High-voltage pulse generator developed for wide-gap spark chambers      | B68-10283 01 |
| Coolants with selective optical filtering characteristics for ruby laser applications | B68-10500 02 |
| Improving of confining sites for cell cultures on thermoplastic substrates | B69-10236 04 |
| The Quantasyn, an improved quantum detector                             | B69-10443 01 |
| Ion mass spectrometer for special uses                                   | B69-10510 02 |
| Multichannel spectroscopy guide                                          | B69-10550 01 |
| Two-color holography                                                     | B69-10662 02 |
| Ultraviolet reflection                                                   | B66-10483 02 |
| Self-supported aluminum thin films produced by vacuous deposition process | B66-10367 03 |
| Uniform reflective films deposited on large surfaces                     | B66-10483 02 |
| Ultraviolet spectra design concept for improved photo-scan tube         | B67-10157 01 |
| Ultraviolet spectrometers                                                | B66-10060 02 |
| Glancing incidence telescope for ultraviolet and soft X-rays            | B67-10508 02 |
| Ultraviolet spectrophotometers                                            | B67-11496 03 |
| Ultraviolet spectrophotometry                                            | B67-10573 03 |
| The preparation, identification and properties of chlorophyll derivatives | B68-10409 03 |</p>

SUBJECT INDEX

Cryogenic trap valve has no moving parts

Cryogenic liquid transfer system reduces residual boiloff

Vapor diffusion electrode improves fuel cell operation

Radial furnace shows promise for growing straight boron carbide whiskers

Thermodynamic properties related to expansion of two-component gas

Control apparatus for spectral energy source

Viscosity and density of methanol/water mixtures at low temperatures

Isotopically pure magnesium isotope-24 is prepared from magnesium-24 oxide

Dispensing graduate for butadiene

Levitation-melting technique for metals and alloys

Technical report on galvanic cells with fused-salt electrolytes

Technique for ultrasonic cleaning with volatile solvents eliminates need for hoods or condensors

Control for maintaining constant level of a cryogenic liquid

Liquid-metal-piston MHD generator

Magnetohydrodynamic generators using two-phase liquid-metal flows

Improved high-temperature silicide coatings

Cryogenic fluid flow instabilities in heat exchangers

Vaporator diodes

Efficient millimeter wave 1140 GHz/ diode for harmonic power generation

Development of reliability prediction technique for semiconductor diodes

Device for diode tuning in a stripline varactor harmonic multiplier

An improved atomic hydrogen frequency and time standard

Automatic tuning of hydrogen masers

Phase inverter provides variable reference push-pull output

HQ-23

Computer program for network synthesis by frequency response fit

Tunable bandpass filter with variable selectivity

VARIABLE

Computer program utilizes FORTRAN 4 subroutines for contour plotting

VARIABLE SWEEP WINGS

Computer program calculates wing aerodynamic characteristics for fixed wings with dihedral and variable-sweep wings at subsonic speeds

VARIATIONAL PRINCIPLES

Computer program VARY-QUIR 3 provides solution of steady-state, multigroup, two-dimensional neutron diffusion equations

VARIATIONS

Magnetically coupled emission regulator

VARIATORS

Basic suppression techniques are evaluated

VARNISHERS

White primer permits a corrosion-resistant coating of minimum weight

VAPORS

Flame sprayed dielectric coatings improve heat dissipation in electronic packaging

VECTOR ANALYSIS

Study of optimum discrete estimators in measurement analysis

VECTOR SPACES

Computer program for mass optimal solutions of some endpoint trajectory problems

VECTORS (MATHEMATICS)

Device measures reaction engine thrust vector deviations

Improved computer program for elastic analysis of highly redundant structural configurations

Global angle sensor

Numerical inversion of finite Toeplitz matrices and vector Toeplitz matrices

Inhibition of browning in foodstuffs

Economical and maintenance-free gas system operates railroad switches

Digital system accurately controls velocity of electromechanical drive

Study made to establish parameters and limitations of explosive welding

I-715
Interference effects eliminated in random oriented space station antenna system
MSC-11004 B67-10435 01

Fortran 4 program for two-impulse rendezvous analysis
M-FS-12971 B67-10479 06

Computer program analyzes and designs supersonic wing-body combinations
ARC-10141 B68-10335 06

Study of optimum discrete estimators in measurement analysis
M-FS-14915 B68-10348 02

Axissymmetric two-phase perfect gas performance program
MSC-11774 B68-10374 06

Internal velocity factors
MSC-15002 B68-10403 06

Midcourse maneuver operations program
M-PO-10735 B69-10105 06

Computer programs for axial flow compressor design
LEWIS-10765 B69-10174 06

Design and testing of liquid hydrogen-cooled, ultrahigh-speed ball bearings
M-FS-18453 B69-10176 05

Prediction of performance of centrifugal pumps during starts under pressure
LEWIS-10900 B69-10263 05

VELOCITY DISTRIBUTION
Study made of large amplitude fuel sloshing
M-FS-12381 B67-10439 03

Proposed method of rotary dynamic balancing by laser
M-FS-12422 B67-10452 02

Computer program calculates velocities and streamlines in turbomachines
LEWIS-10252 B68-10097 06

Large-amplitude inviscid fluid motion in an accelerating container
MSC-11560 B68-10170 02

Dynamics of moving bubbles in single and binary component systems
M-FS-18485 B68-10339 02

Design of fluid-duct bends with low pressure loss
M-FS-20176 B68-10395 05

HAGNY - Program for calculating velocities in amplified region of turbomachines
LEWIS-10769 B69-10132 06

FORTRAN 4 program calculates velocities and streamlines in a tandem blade turbomachine
LEWIS-16743 B69-10219 06

VELOCITY MEASUREMENT
Low-cost tape system measures velocity of acceleration
GSFC-85 B63-10512 01

Ion pump provides increased vacuum pumping speed
NRO-13 B65-10239 02

Photographic method measures particle size and velocity in fluid stream
M-FS-1536 B66-10668 01

Laser Doppler flowmeter measures gas velocity
M-FS-1747 B66-10693 02

Rectilinear display gives acceleration load

VELOCITY DISTRIBUTION

Subject Index

factor and velocity information
MSC-11045 B67-10248 01

Ultrasonics used to measure residual stress
M-FS-12449 B67-10428 02

Laser-Doppler gas-velocity instrument
M-FS-20035 B68-10349 02

A mass flux probe for measurement in a supersonic stream
LEWIS-10695 B68-10533 02

Mossbauer-effect data-collection system
ARC-10182 B69-10027 01

Mossbauer vibration calibration systems evaluated
M-FS-20014 B69-10125 01

Experimental program to investigate transonic flow around protruberances
M-FS-20037 B69-10609 05

VENTILATION
One-piece transparent shell improves design of helmet assembly
MSC-167 B66-10390 05

Spray-on electrodes enable EKG monitoring of physically active subjects
FRC-36 B66-10649 04

Improved atmospheric particle analyzer
ERS-33 B67-10231 01

Technique for ultrasonic cleaning with volatile solvents eliminates need for hoods or condensers
MSC-11561 B69-10552 03

Low-cost tape system measures velocity of acceleration

Ion pump provides increased vacuum pumping speed

Photographic method measures particle size and velocity in fluid stream

Laser Doppler flowmeter measures gas velocity

Rectilinear display gives acceleration load
SUBJECT INDEX

VENTUS

Vented piston seal prevents fluid leakage between two chambers
JPL-179 B63-10141 05

High speed blowdown system provides rapid pressure loss
LEWIS-375 B67-10043 05

Toroidal ring prevents gas ignition at vent stack outlet
KFS-2042 B67-10098 05

Concept for cryogenic liquid reclamation system
NPO-10322 B67-10420 02

Temperature-sensed cryogenic bleed maintains liquid state in transfer line
KFS-12681 B67-10424 01

Vent and relief valve maintains low leakage rate over broad temperature range
KFS-12807 B68-10014 05

Device damps fluid pressure oscillations in vent valve
KFS-13290 B68-10078 05

Control for maintaining constant level of a cryogenic liquid
NPO-11177 B69-10424 05

VENTURI TUBES

Mixer conditions temperature of liquified gas streams
KFS-1784 B66-10565 02

Venturi meter with separable diffuser
LEWIS-10463 B68-10295 05

Piezoelectric linear actuator
BSC-13194 B69-10469 02

VENUS (PLANET)

Space trajectories program for IBM 7090
NPO-10125 B67-10172 06

Molecular radiation - Its application in physical measurements and analyses
KFS-14816 B69-10562 02

VERSATILITY

Metal-bending brake facilitates lightweight, close-tolerance fabrication
ISC-29 B64-10069 05

Offset lenses add versatility to phototypesetting machine
EQ-9 B66-10173 02

Versatile impact hand tool
KFS-20140 B68-10371 05

Improved mouse cage provides versatility and ease in handling laboratory mice
NPO-12250 B69-10124 04

VERTICAL DISTRIBUTION

Proposed technique for vertical alignment of a crane's cable
KFS-16496 B69-10202 05

VERTICAL MOTION

Remotely operated gripper provides vertical control rod movement
NPO-10160 B68-10359 05

Air-cushion lift pad
KFS-14665 B69-10448 05

VERY HIGH FREQUENCIES

Mechanical device accurately measures rf phase differences in vhf or uhf ranges
KFS-1738 B66-10594 05

Survey of man-made electrical noise affecting radio broadcasting
EQ-10290 B69-10308 01

SELF-SHIELDING PRINTED CIRCUIT BOARDS FOR HIGH FREQUENCY AMPLIFIERS AND TRANSMITTERS

EQ-10433 B69-10314 01

IMPROVED VHF DIRECTION FINDING SYSTEM

KFS-20439 B69-10378 01

VESSELS

Method of welding joint in closed vessel improves quality of seal
JPL-179 B63-10139 05

Method prevents secondary radiation in radiographic inspection
KFS-13383 B67-10391 02

VESTIBULAR TESTS

Two devices for analysis of nystagmus
EQ-10273 B69-10224 01

VHF OMNIRANGE NAVIGATION

LITERAL READOUT OF IDENTIFICATION SIGNALS IN MORSE CODE

LANGLEY-10222 B69-10479 01

VIABILITY

Technique for highly efficient recovery of microbiological contaminants
BSC-13250 B69-10273 04

VIBRATION

Adhesive for vacuum environments resists shock and vibration
BSC-56 B65-10016 03

Improved holder protects crystal during high acceleration and impact
JPL-463 B65-10037 05

Vibrating-membrane electrometer has high conversion gain
AMC-38 B65-10056 01

Internal cooling increases range of immersion-type temperature probe
LEWIS-171 B65-10157 02

Back mount device quickly inserts or extracts chassis units
NPO-244 B65-10385 05

Electrical cabling withstands severe environmental conditions
KFS-1585 B66-10427 01

Plastic tubing protects flexible copper hose
KFS-772 B66-10588 05

Instrument continuously measures density of flowing fluids
LEWIS-309 B67-10080 01

Device enables calibration of microphones at high sound pressure levels
KFS-11980 B67-10336 01

Coaxial cable stripping device facilitates RF cabling fabrication
NPO-10315 B67-10419 05

Ultra sound used to measure residual stress
KFS-12449 B67-10426 02

Study made of acoustical monitoring for mechanical checkout
KFS-13372 B67-10430 02

Stable ac phase and amplitude comparator
KFS-13086 B67-10459 01

Double copper sheath multiconductor instrumentation cable in durable and easily installed in high thermal or nuclear radiation area
NPO-10007 B67-10538 01

Bacteriostatic conformal coating for electronic components
GSPC-10007 B67-10595 03

I-717
VIBRATION DAMPING

Pneumatic pressure wave generator provides economical, simple testing of pressure transducers
NOS-10024 B67-10664 05

Packaging criteria for transportation and handling shock and vibration
MPS-13007 B66-10219 05

Between-bearing shaft seal, a concept
MPS-16179 B66-10286 05

Mass loading effects on vibrated ring and shell structures
MPS-14979 B67-10532 03

Fatigue failure in metal bellows due to flow-induced vibrations
MPS-18383 B69-10071 05

Mounting method improves electrical and vibrational characteristics of screen electrodes
MPS-20169 B69-10097 01

Precision mounting for instrument optical elements provided by polynux bonding
MPS-20293 B69-10310 05

Analysis of space vehicle structures using the transfer-function concept
NPO-11162 B69-10337 06

Air-cushion lift pad
MPS-14685 B69-10187 05

Improved inorganic ion exchange membranes
LANX-10737 B69-10451 03

Optimum structural design based on reliability and proof-load testing
NPO-11226 B69-10723 31

VIBRATION DAMPING

Thermally conductive metal wool-silicone rubber material can be used as shock and vibration damper
JPL-321 B63-10207 03

Shock mount isolates pressure transducers from vibration
JPL-631 B65-10113 05

Lightweight load support serves as vibration damper
JPL-661 B65-10144 05

Oil-damped mercury pool makes precise optical alignment tool
GSFC-353 B65-10253 02

Rubber-coated bellows improves vibration damping in vacuum lines
LANX-273 B66-10187 02

Fluid damping reduces bellows seal fatigue failures
MPS-565 B66-10249 05

Miniature capacitive accelerometer is especially applicable to telemetry
ARC-72 B66-10491 01

Resonant frequency can be adjusted on vibration mount
JPL-SC-134 B66-10672 05

Tester for study of rolling element bearings
LANX-305 B67-10009 01

Post-stressed concrete foundation may reduce machinery vibration
ARC-130 B67-10237 05

Vibration damping composition has flush-away feature
MPS-597 B67-10432 03

Solenoid valve design minimizes vibration

VIBRATION DAMPERS

Thermally conductive metal wool-silicone rubber material can be used as shock and vibration damper

WATER TREATMENT

Emergency solar still desalts seawater MSC-135 B65-10214 03

Trace levels of metallic corrosion in water determined by emission spectrography MSC-1193 B66-10701 03

Effects of surface preparation on quality of aluminum alloy weldments M-PS-13152 B69-10302 03

Electrolytic silver ion cell sterilizes water supply ARG-11827 B69-10555 01

Improved pH buffering agent for sodium hypochlorite M-PS-15483 B69-10084 03

A method for precision anodic stripping M-PS-15040 B69-10581 03

Self-sustained hydrodynamic oscillations in a natural-circulation two-phase-flow boiling loop ARG-10461 B69-10620 02

WATER VAPOR

Apparatus measures concentration of suspended droplets in gas streams LANGLEY-31 B64-10237 01

Reaction heat used in static water removal from fuel cells M-PS-532 B66-10013 03

Lamp enables measurement of oxygen concentration in presence of water vapor MSC-10043 B67-10382 01

Welding of commercial base plates is investigated M-PS-13649 B69-10192 03

Plume radiation program M-PS-13202 B69-10447 06

High conductance vapor thermal switch GSFC-10109 B69-10519 02

Reliable method for testing gross leaks in semiconductor component packages EEC-10156 B69-10562 01

Two systems developed for purifying inert atmospheres ARG-10234 B69-10026 03

Dewpoint temperature inversions analyzed ARG-10316 B69-10057 02

Coatings decrease metal fatigue failure ARG-10015 B69-10176 03

Prediction of thermal radiation from a rocket’s exhaust plume M-PS-20414 B69-10371 02

Molecular radiation - Its application in physical measurements and analyses M-PS-14816 B69-10562 02

Millimeter-wave atmospheric loss prediction method NPO-11054 B69-10584 01

WATERPROOFING

Inexpensive electrical connector is moisture- and corrosion-proof MSC-164 B66-10196 01

Coating permits use of strain gage in water and liquid hydrogen M-PS-594 B66-10192 01

Electrical cabling withstands severe environmental conditions M-PS-1585 B68-10427 01

High energy forming facility M-PS-14026 B67-10586 05
WAVE MEASUREMENTS

Circuit measures hysteresis loop areas at 30 Hz
H-PS-13069 B67-10519 01

Calibration technique for electromagnetic flowmeters
LMIS-10328 B67-10554 01

WAVE ATTENUATION

System precisely controls oscillation of vibrating mass
H-PS-1875 B67-10276 01

Stress-corrosion-induced property changes in aluminum alloys
H-PS-20209 B66-10568 03

WAVE DIFFRACTION

Optical frequency waveguide and ion transmission system
H-PS-10540 B69-10746 01

WAVE DRAG

Program computes zero lift wave drag of entire aircraft
LANGLEY-10079 B67-10530 06

WAVE EQUATIONS

Acoustic wave analysis
H-PS-10876 B68-10265 02

Solution of differential equations by application of transformation groups
H-PS-14802 B68-10276 02

WAVE EXCITATION

Antenna configurations provide polarization diversity
GSFC-74 B66-10066 01

Glow discharge density sensor probe life is extended
H-PS-1707 B67-10229 01

Vibration testing and dynamic studies of relays
H-PS-14542 B66-10266 01

Evaluation of magnetic materials for static inverters and converters
LMIS-10343 B69-10306 01

WAVE FUNCTIONS

Quantum mechanical calculations of reactive scattering cross sections in biomolecular encounters
H-PS-13594 B67-10527 03

WAVE GENERATION

Variable frequency magnetic multivibrator generates stable square-wave output
GSFC-AE-21 B65-10124 01

Glow discharge density sensor probe life is extended
H-PS-1707 B67-10229 01

A phonocardiogram simulator
KSC-67-94 B67-10239 01

Signal generator converts direct current to multiphase supplies
MSC-110143 B67-10368 01

Development of detonation reaction engine
H-PS-14020 B67-10652 01

Pneumatic pressure wave generator provides economical, simple testing of pressure transducers
NDC-10024 B67-10664 05

Simple quasi-exponential slope generator
HFO-11130 B69-10439 01

WAVE INTERACTION

One-dimensional Coulomb-damped wave motion in prismatic bars

WAVES SUBJECT INDEX

line profile
ARC-10221
Continuous analysis of nitrogen dioxide
in gas streams of plants
ARC-10356
Laser action from a terbium beta-ketoenolate
at room temperature
GSPC-10593
Hydrogen flash lamps studied
ARG-10419
The Quantasyn, an improved quantum
detector
EBC-10148
Discrimination of fish oil and mineral
oil slicks on sea water
H-10412
Long range holographic contour mapping
concept
H-10350
Improved gas ring laser
ISC-11584
One-dimensional Coulomb-damped wave motion
in prismatic bars
I-PS-14815
Silazane polymers show promise for high-
temperature application
I-PS-466
Proposed method of rotary dynamic balancing
by laser
I-PS-12422
Synthesis of polyethers of hexafluorolenzene
and hexafluoropentanediol
I-PS-14962
Rolamite - A new mechanical design concept
SAN-10001
Fatigue tester achieves true axial motion
through flex plates and bars
NU-0021
Modified drill permits one-step drilling
operation
N-PS-559
Wire material reduces compressor blade
vibration
LEWIS-357
Composites of porous metal and solid
lubricants increase bearing life
LEWIS-307
Solenoid valve design has one moving part
NPO-10039
Wear studies made of slip rings and gas
bearing components
N-PS-12862
Solenoid valve design minimizes vibration
and sliding wear problem
N-PS-14079
Spiral-grooved shaft seals substantially
reduce leakage and wear
LEWIS-10397
A new solid lubricant
LEWIS-10812
Wear inhibitors
Compact retractor protects cabling looms
N-PS-561

SUBJECT INDEX

Gallium alloy films investigated for use
as boundary lubricants
LEWIS-245
Intermediate rotating ring improves
reliability of dynamic shaft seal
N-PS-575
Valve seat pores sealed with thermosetting
monomer
N-PS-960
Bearing alloys with hexagonal crystal
structures provide improved friction and wear
characteristics
LEWIS-320
Visco seal design offers zero-leakage and
wear-free characteristics
W-30-329
High-temperature bearing lubricants
LEWIS-10408
Wear testing
Gallium alloy films investigated for use
as boundary lubricants
LEWIS-245
Environmental study of miniature slip rings
N-PS-2443
Cut-through tester accurately measures
insulation failure rates
N-PS-12506
Mechanical properties of wire insulation
automatically determined
N-PS-10983
Study of high temperature bearing materials
LEWIS-10629
Weather forecasting
Crossed-beam technique for measuring
horizontal winds
N-PS-20160
Balloon batteries, charged and heated by
solar energy
GSPC-10769
Weathering
Slaved hailstone fabrication and use in
testing weatherability of structures
NPO-10783
Weathering
Composite weld rod corrects individual
filler weaknesses
N-PS-1923
Nonwoven glass fiber mat reinforces
polyurethane adhesive
N-PS-2309
Webbing
Portable flooring protects finished surfaces,
in easily moved
N-PS-15
Wedge shock absorber features varying yield
strengths
N-PS-63A
Nylon shock absorber prevents injury to
parachute jumpers
N-PS-226
Web belt load measuring instrument has
excellent stability
N-PS-921
Wedges
Frictional wedge shock mount is inexpensive,
has good damping characteristics
JPL-IT-1001
Heavy duty precision leveling jacks expedite
setup time on horizontal boring mill
M-PS-1084 B66-10411 05

WEIGHT
Aluminum/steel wire composite plates exhibit high tensile strength
M-PS-407 B66-10262 05

WEIGHT (HAS)
Lightweight magnesium-lithium alloys show promise
M-PS-17 B63-10389 03

Regenerative fuel cell combines high efficiency with low cost
WOO-090 B65-10363 01

White primer permits a corrosion-resistant coating of minimum weight
M-PS-304 B66-10207 03

Pneumatic separator gives quick release to heavy loads
KSC-66-10 B66-10294 05

High-performance RC bandpass filter is adapted to miniaturized construction
ARC-60 B66-10309 01

Rotary valve controls multiple hydraulic leveling cylinders
M-PS-361 B66-10402 05

Heavy duty precision leveling jacks expedite setup time on horizontal boring mill
M-PS-1084 B66-10411 05

Simple motor drive system operates heavy hinged door
MU-0093 B66-10712 05

Hydrostatic force used to handle oversized, heavy objects
HQ-90 E67-10167 05

System enables dimensional inspection of very large structures
M-PS-2477 B67-10214 05

SOC-DS computer code provides tool for design evaluation of homogeneous two-material nuclear shield
NOC-10142 B67-10537 06

Advances in aluminum anodizing
M-PS-14600 B69-10144 05

Electronic analog equalization for vibrational testing
NFO-10544 B69-10472 01

WEIGHT ANALYSIS
Weight Control System
M-PS-15020 B69-10041 06

WEIGHT INDICATORS
A design procedure for the weight optimization of straight finned radiators
GSFC-547 B66-10618 05

Digital servo readout system increases recording accuracy of servo-balance scales
NDC-10125 B67-10496 01

WEIGHT MEASUREMENT
Mechanism isolates load weighing cell during lifting of load
MSC-297 B66-10071 05

Three-axis attitude and direction reference instrument has only one moving part
M-PS-1819 B66-10644 01

Remote balance weighs accurately amid high radiation
AG-10387 B69-10242 05

Metallic diffusion measured by a modified Knudsen technique

WEIGHTING FUNCTIONS
Procedure developed for reporting fast-neutron exposure
AG-10035 B68-10190 02

WEIGHTLESSNESS
Magnetic fluid readily controlled in zero gravity environment
LWIS-126 B65-10335 03

Automatic fluid separator supplies own driving power
WOO-085 B66-10008 02

Simulator effects partial gravity conditions
MSC-152 B66-10339 05

Hole saw drill attachment has zero force reaction
MSC-543 B66-10604 05

Automated uranalysis technique determines concentration of creatinine by colorimetry
NFO-10189 B67-10245 04

Food products for space applications
MSC-11697 B68-10324 04

WELD STRENGTH
Probe tests microveld strength
WOO-118 B65-10111 05

Shoulder adapter steadies spot welding gun
M-PS-321 B66-10076 05

Ultrasonic recording scanner used for nondestructive weld inspection
M-PS-284 B66-10220 01

Dot patterns provide reproducible flaw areas for study of adhesive bonds
M-PS-862 B66-10367 05

Brazal alloy holds bonding strength over wide temperature range
LWIS-337 B66-10519 03

Quality control criteria for acceptance testing of cross-wire welds
MSC-627 B66-10587 05

Composite weld rod corrects individual filler weaknesses
M-PS-1923 B67-10107 05

Fixture facilitates helium leak testing of pipe welds
M-PS-2167 B67-10178 05

High-strength brazal joints between copper and steel
M-PS-2519 B67-10211 05

Welding, bonding, and sealing of refractory metals by vapor deposition
LWIS-123 B67-10232 03

Portable machine welding head automatically controls arc
M-PS-12763 B67-10272 05

Welder analyzer
MSC-12068 B68-10242 01

Pre-weld heat treatment improves welds in Rene 41
M-PS-18174 B68-10285 03

Standards for compatibility of printed circuit and component lead materials
M-PS-14531 B66-10310 01

Automatic, nondestructive test monitors in-process weld quality
M-PS-14996 B68-10333 01

I-731
WELD TESTS

Calibration standard for dynamic evaluation of a profile-plottter
H-PS-51276 869-10458 05

WELD TESTS

Magnet position X-ray film for weld inspection
H-PS-253 865-10110 05

Probe tests micro weld strength
WOO-118 865-10111 05

Force controlled solenoid drives micro weld tester
WOO-125 865-10112 01

Ultrasonic recording scanner used for non destructive weld inspection
H-PS-284 866-10220 01

Ultrasonic hand tool allows convenient scanning of spot welds
H-PS-359 866-10289 02

Inflatable holding fixture permits X-rays to be taken of inner weld areas
H-PS-856 866-10327 03

Ultrasonic water column probe speeds up testing of welds
HQ-58 866-10577 01

Fixure facilitates helium leak testing of pipe welds
H-PS-2167 867-10178 05

Continuous internal channels formed in aluminum fusion welds
H-PS-2999 867-10183 05

Electron beam welder X-rays its own welds
LEW-S-10111 867-10216 02

Plastic shoe facilitates ultrasonic inspection of thin wall metal tubing
NOC-10010 867-10542 02

Gage monitors quality of cross-wire resistance welds
GSP-F-9596 868-10002 01

Development of mechanized ultrasonic scanning system
H-PS-13638 869-10004 05

System remotely inspects, measures, and records internal irregularities in piping
H-PS-14545 869-10149 01

Welding of commercial base plates is investigated
H-PS-13649 869-10192 03

Automatic, nondestructive test monitors in-process weld quality
H-PS-14996 869-10333 01

Microprobe investigation of brittle segregates in aluminum MIG and TIG welds
H-PS-14772 869-10334 03

X-ray film holder permits single continuous picture of tubing joint
LEW-S-10382 869-10343 05

Hot-cracking studies of Inconel 718 weld-heat-affected zones
H-PS-512211 869-10052 10

Quality-weld parameters for micro welding techniques and equipment
H-PS-20484 869-10303 05

Repair of weld defects in thin-walled stainless steel tubes
H-PS-16293 869-10305 05

Nondestructive testing of welds on thin-walled tubing

SUBJECT INDEX

K-PS-18144 869-10402 01

Radiographic threshold detection levels of aluminum weld defects
H-PS-20487 869-10416 01

WELDABILITY

Tantalum alloys resist creep deformation at elevated temperatures
LEW-S-10350 866-10558 03

New weldable high strength aluminum alloy developed for cryogenic service
H-PS-357 866-10613 05

Controlled ferrite content improves weldability of corrosion-resistant steel
H-PS-568 867-10069 03

Study made of pneumatic high pressure piping materials /0,000 psi/
KSC-10113 867-10437 03

Weld microfusuring in Inconel 718 misaligned by minor elements
H-PS-18185 868-10251 03

High temperature alloy
LEW-S-10377 868-10253 03

Hot-cracking studies of Inconel 718 weld-heat-affected zones
H-PS-18211 869-10052 05

WELDED JOINTS

Sleeve and cutter simplify disconnecting welded joint in tubing
JPL-394 863-10240 05

Portable display paneling has wide use, easy take down and assembly
ARC-17 863-10435 05

Welding procedures improves quality of welds, offers other advantages
H-PS-32 864-10309 01

Probe tests micro weld strength
WOO-118 865-10111 05

Force controlled solenoid drives micro weld tester
WOO-125 865-10182 01

Weld leaks rapidly and safely detected
H-PS-362 865-10265 01

O-ring tube fittings form leakproof seal in hydraulic systems
H-PS-481 866-10020 05

Capacitive system detects and locates fluid leaks
H-PS-478 866-10099 01

Aluminum oxide filler prevents obstructions in tubing during welding
MSC-222 866-10125 05

Portable power tool machines weld joints in field
H-PS-258 866-10104 05

Simple device facilitates inert-gas welding of tubes
H-PS-558 866-10155 05

Electron beam welding of copper-Keool facilitated by circular magnetic shields
H-PS-569 866-10215 05

Ultrasonic recording scanner used for nondestructive weld inspection
H-PS-204 866-10220 01

Brazing process using Al-Si filler alloy reliably bonds aluminum parts
MSC-448 866-10241 05
Vacuum test fixture improves leakage rate measurements
MSC-271 B66-10286 01

Union would facilitate joining of tubing, minimize braze contamination
MSC-777 B66-10311 05

Special mandrel permits uniform welding of out-of-round tubing
M-PS-706 B66-10323 05

Inflatable holding fixture permits X-rays to be taken of inner weld areas
M-PS-856 B66-10327 03

Welds chilled by liquid coolant manifold
M-PS-1796 B66-10688 05

Diaphragm valve for corrosive and high temperature fluid flow control has unique features
MS-5304 B66-10365 05

Hollow spherical rotors fabricated by electroplating
JPL-SC-117 B66-10366 05

Electroplating eliminates gas leakage in brazed areas
M-PS-923 B66-10415 05

Preformed stiffeners used to fabricate structural components for pressurized tanks
M-PS-1796 B66-10688 05

Silver plating technique seals leaks in thin wall tubing joints
HU-0090 B66-10703 05

Closed circuit TV system monitors welding operations
MSC-11002 B67-10162 01

Effect of welding position on porosity formation in aluminum alloy welds
M-PS-2318 B67-10177 05

Continuous internal channels formed in aluminum fusion welds
M-PS-2399 B67-10183 05

Weld procedure produces quality welds for thick sections of Hastelloy-X
NUC-10048 B67-10195 05

High-strength braze joints between copper and steel
M-PS-2519 B67-10211 05

Electron beam welder X-rays its own welds
LEWIS-10111 B67-10216 02

Welding, bonding, and sealing of refractory metals by vapor deposition
LEWIS-123 B67-10232 03

Portable machine welding head automatically controls arc
M-PS-12763 B67-10272 05

Welding of AH350 and AH355 steel
M-PS-2314 B67-10292 05

Jacketed cryogenic piping is stress relieved
M-PS-985 B67-10308 05

Test device prevents weld joint damage by eliminating axial pin forces on unpotted nodules
LEWIS-10201 B67-10359 01

Tube-to-header joint for bimetallic construction
LEWIS-10282 B67-10464 05

Plastic shoe facilitates ultrasonic inspection of thin wall metal tubing
NUC-10010 B67-10542 02

Instrument accurately measures weld angle and offset
M-PS-12889 B67-10563 05

Tube diaplaying tool assures accurate diap-brased joints
MSC-533 B66-10036 05

Standards for compatibility of printed circuit and component lead materials
M-PS-14531 B68-10310 01

Closed circuit TV system automatically guides welding arc
M-PS-20084 B68-10357 01

Cooled miniature pressure transducers effective at high temperatures
LEWIS-10401 B68-10370 01

Nondestructive testing of brazed rocket engine components
M-PS-10191 B68-10394 03

Mixing weld gases offers advantages
M-PS-14613 B69-10145 05

Detecting hydrogen-containing contaminants on metal surfaces
M-PS-20456 B69-10192 03

Quick-acting backup tool for welding ducts
M-PS-10404 B69-10396 05

Nondestructive testing of welds on thin-walled tubing
M-PS-18144 B69-10402 01

Breakaway electrical connector
NPO-11140 B69-10474 01

WELDED STRUCTURES

Method of welding joint in closed vessel improves quality of seams
JPL-170 B63-10139 05

Vacuum-type backup bar speeds weld repairs
M-PS-12 B63-10384 05

Upsetting butt edge increases weld-joint strength
M-PS-175 B64-10164 05

Improved technique for localizing electropolishing features novel nozzles
WOO-101 B64-10271 01

Fastener provides cooling and compensates for thermal expansion
HU-0003 B65-10038 05

Magnets position X-ray film for weld inspection
M-PS-253 B65-10110 05

Electromagnetic hammer removes weld distortions from aluminum tanks
M-PS-287 B65-10342 05

Lifting clamp positively grips structural shapes
M-PS-593 B66-10176 05

Nonhazardous acid etches weld samples
M-PS-975 B66-10378 05

Metal tube can be folded for compact stowage, is self-erecting
LEWIS-288 B66-10450 05

Heat treatment stabilizes welded aluminum jigs and tool structures
MSC-800 B66-10458 03

Microminiature thermocouple monitors own installation
Large seals fabricated from small segments reduce procurement lead time

Tests show that aluminum welds are improved by bead removal

Effects of heat input rates on T-1 and T-1A steel welds

Transducer measures embedment stresses in electronic modules

Study made of ductility limitations of aluminum-silicon alloys

Camera lens adapter magnifies image

Study made of procedures for externally loading and corrosion testing stress corrosion specimens

Plastic preforms facilitate fabrication of welded cordwood electronic modules

Encapsulation technique eliminates thermal stresses in welded electronic modules

Techniques for controlling warpage and residual stresses in welded structures

A biaxial weld strength prediction method

Connector for vacuum-jacketed lines cuts tubing system cost

Composite, vacuum-jacketed tubing replaces bellows in cryogenic systems

Novel clamps align large rocket cases, eliminate back-up bars

Flexible honeycomb structure can bend to fit compound curves

Lightweight magnesium-lithium alloys show promise

Gate valve with ceramic-coated base operates at high temperatures

Compact coaxial connector for printed circuit adds reliability

Miniature stress transducer has directional capability

High permeability semiconductors permit close-tolerance soldering

Inert-gas welding and brazing enclosure fabricated from sheet plastic

Calibrated clamp facilitates pressure application

Tool provides constant purge during tube welding

Compound improves thermal interface between thermocouple and measured surface

Aluminum oxide filler prevents obstructions in tubing during welding

Pressure vessels fabricated with high-strength wire and electroformed nickel

Electrical upsetting of metal sheet forms weld edge

Flexible drive allows blind machining and welding in hard-to-reach areas

New backup-bar groove configuration improves heliarc welding of 2014-T6 aluminum

Weldable aluminum alloy has improved mechanical properties

Thermal stress-relief treatments for 2219 aluminum alloy are evaluated

Composite bulkhead fabrication development

Instrument accurately measures small temperature changes on test surface

Effects of heat input rates on T-1 and T-1A steel welds

Apparatus for fabrication of americium-beryllium neutron sources prevents capsule contamination

Welding, bonding, and sealing of refractory metals by vapor deposition

Portable spectrometer monitors inert gas shield in welding process

Fuel cell life improved by metallic sinter activation after electrode assembly welding

Proposed method of rotary dynamic balancing by laser

Aluminum and stainless steel tubes joined by simple ring and welding process

Mechanical shielding reduces weld surface cracking in 6061 T6 aluminum

Automatic contour welder incorporates speed control system

Proposed gas generation assembly would

HEAT SWJBGS
SUBJECT INDEX

Electronic ohmmeter provides direct digital output
GSPC-360 B65-10274 01
Differential pressure gauge has fast response
K-FS-358 B65-10285 05
Photoresistance analog multiplier has wide range
GSPC-360 B65-10287 01
Improved strain-wire flowmeter has fast response time
LEWIS-241 B65-10304 01
Angular acceleration measured by deflection in sensing ring
MSC-250 B66-10105 01
Subminiaturized gas chromatograph gives fast, efficient analysis
JPL-735 B66-10182 01
Detector measures power in 50 to 30,000
GHz radiation band
SRC-26 B66-10581 01
Resistance thermometer has linear resistance-temperature coefficient at low temperatures
WGO-190 B66-10612 01
Fast-acting calorimeter measures heat output of plasma gun accelerator
LEWIS-249 B67-10192 01
Electronic circuitry used to automate paper chromatography
JPL-840 B67-10201 01
Web belt load measuring instrument has excellent stability
MSC-921 B67-10242 01
Machine tests slow-speed sliding friction in high vacuum
M-FS-12341 B67-10379 05
Ratio matching of half-bridge weldable strain gages, computer program
FRC-10032 B69-10040 06
Design of a strain-gage probe
ARG-10318 B69-10349 05

WHEELS
Lateral ring metal elastic wheel absorbs shock loading
M-FS-1312 B66-10663 03
Shock-absorbing caster wheel is simple and compact
SAN-10019 B68-10266 05
Fifth-wheel fork truck adapter
M-FS-14460 B69-10221 05

WHISKER COMPOSITES
Radial furnace shows promise for growing straight boron carbide whiskers
HQ-50 B67-10070 03

WHISKERS (SINGLE CRYSTALS)
Boron carbide whiskers produced by vapor deposition
HQ-24 B65-10261 03
Efficient millimeter wave 1140 GHz diode for harmonic power generation
HQ-61 B67-10166 01

WHITE BLOOD CELLS
Foot-operated cell-counter
ARG-10315 B69-10351 01

WHITE NOISE
On the bound of first excursion probability
MPO-11158 B69-10334 06

Optimum FM pre-emphasis
FSC-10151 B69-10359 01

WICKS
Improved anode design for metal-oxygen cells
LEWIS-10871 B69-10318 01

WIDEBAND COMMUNICATION
Omnidirectional antennas transmit and receive over large bandwidth
GSPC-436 B66-10133 03
Wideband, high efficiency optical modulator requires less than 10 watts drive power
M-FS-12733 B67-10269 01
RF noise suppression using the photodiectric effect in semiconductors
MSC-12259 B69-10225 01

WIDTH
System enables dimensional inspection of very large structures
M-FS-2477 B67-10214 05
Easy current probe measures size of cracks in nonmetallic materials
M-FS-14059 B67-10645 03

WINCHES
Compressed gas system operates semitrailer brakes during winching operation
JPL-0036 B64-10306 05
Hoisting frame facilitates handling of large objects
M-FS-16166 B66-10575 05
Two-axis winch installer for heavy ducts in confined space
M-FS-14224 B69-10062 05
Space-saving hoist for tank manholes
M-FS-16508 B69-10180 05

WIND (METEOROLOGY)
Small foamed polystyrene shield protects low-frequency microphones from wind noise
M-FS-123 B63-10579 01

WIND DIRECTION
Dewpoint temperature inversions analyzed
ARG-10316 B69-10057 02

WIND EFFECTS
Suspended chains damp wind-induced oscillations of tall flexible structures
LANGLEY-10193 B66-10042 05

WIND MEASUREMENT
New anemometer has fast response, measures dynamic pressure directly
LANGLEY-28 B63-10530 05
Fast-response cup anemometer features cosine response
ARG-30193 B68-10202 01

Wind tower influence study
M-FS-20239 B69-10653 01

WIND PROFILES
New anemometer has fast response, measures dynamic pressure directly
LANGLEY-28 B63-10530 05

ROUGH surface improves stability of air-sounding balloons
M-FS-320 B65-10326 05

A method of determining combustion gas flow
M-FS-13757 B67-10455 03

WIND SHEAR
Oil-mixed models aid wind tunnel measurements
LANGLEY-4 B63-10311 03

I-736
WIND TUNNEL APPARATUS
Electric arc heater is self starting  
LANGLEY-208  B66-10230  03
Jet engine powers large, high-temperature wind tunnel  
NASA-F-1564  B67-10621  02

WIND TUNNEL MODELS
Welded pressure transducer made as small as 1/8th-inch in diameter  
ARC-11  B63-10429  03
Built-in templates speed up process for making accurate models  
LANGLBY-23  B63-10526  05
Flexible fastener allows thermal expansion  
LANGLEY-40  B64-10145  05
Telescoping of instrumentation tubing eliminates swaging  
N-PS-546  B66-10116  05

WIND TUNNEL STABILITY TESTS
Rapid helium-air analyzer can measure other binary gas mixtures  
LANGLEY-16  B63-10557  03

WIND TUNNELS
Oil-smeared models aid wind tunnel measurements  
LANGLEY-4  B63-10311  03
Laser-Doppler gas-velocity instrument  
N-PS-20039  B68-10349  02
Experimental design for research on shock-turbulence interaction  
N-PS-20031  B69-10604  02

WIND VELOCITY
Dewpoint temperature inversions analyzed  
ABG-10316  B69-10057  02
Crossed-beam technique for measuring horizontal winds  
N-PS-20160  B69-10447  02

WIND VELOCITY MEASUREMENT
Independent doubly truncated gamma variables  
N-PS-20143  B68-10345  02

WINDING
Simple transducer measures low heat-transfer rates  
JPL-466  B64-10122  01
Variable frequency transistor inverters use multiple core transformers  
GSFC-183  B65-10119  01
Variable frequency magnetic multivibrator generates stable square-wave output  
GSFC-221  B65-10124  01
Rotor position sensor switches currents in brushless dc motors  
GSFC-315  B65-10151  01
Spiral heater coils hand-formed with fixture  
LEWIS-208  B65-10192  05
High frequency wide-band transformer uses coax to achieve high turn ratio and flat response  
ARC-107  B66-10600  01
An improved magnetic tape recorder  
GSFC-08259  B67-10646  01
Improved control system power unit for large parachutes  
MSC-12052  B67-10677  05
Induction probe determines levels of liquid metals  
AGS-10348  B69-10256  03

WINDS (APERTURES)
Plastic scintillator converts standard photomultiplier to ultraviolet range  
ERG-9  B66-10108  02
High pressure cryogenic liquid flow sight assembly provides streamlined flow for easy observation  
LEWIS-310  B66-10394  01
Aluminum thin-window proportional-counter tube is stronger, more responsive in long wavelength region  
JPL-689  B67-10015  01
Detection of effect of deposits on optical windows of pyrometer measurements  
LEWIS-10366  B68-10367  01

WING CAMBER
Computer program analyzes and designs supersonic wing-body combinations  
ARC-10141  B68-10335  06
Modified Multhopp mean camber computer program  
LANGLBY-10376  B68-10446  06

WING PANELS
Computer program analyzes and designs supersonic wing-body combinations  
ARC-10141  B68-10335  06

WING PLANEFORMS
Computer program calculates wing aerodynamic characteristics for fixed wings with dihedral and variable-sweep wings at subsonic speeds  
LANGLBY-10191  B67-10666  06
Modified Multhopp lifting surface loading program  
LANGLBY-10375  B68-10452  06

WING PROFILES
Computer program analyzes and designs supersonic wing-body combinations  
ARC-10141  B68-10335  06

WINGS
Program computes zero lift wave drag of entire aircraft  
LANGLBY-10079  B68-10530  06

WIRE
Thermocompression bonding produces efficient surface-barrier diode  
JPL-SC-066  B65-10007  05
Forcing blocks speed production of strain gage grids  
LEWIS-182  B65-10009  05
Cantilever springs maintain tension in thermally expanded wires  
LEWIS-136  B65-10149  05
Improved solderless connector is easily disconnected  
JPL-SC-060  B65-10197  01
Improved wire memory matrix uses very little power  
JPL-SC-167  B65-10359  01
Vacuum chamber provides improved insulation and support for cryostat  
N-PS-415  B65-10368  02
Wire bundle formed into grids with minute interstices  
WO-059  B65-10372  03
Tungsten wire and tubing joined by nickel brazing  
N-PS-394  B65-10391  05
Mechanisms continuously measures static and dynamic cable loads  
MSC-217  B66-10107  05
High temperature thermocouple operates in reduction atmosphere
~B-0046 B66-10134 01
Corrosion of metal samples rapidly measured
~B-0041 B66-10140 03
Flexible coiled spline securely joins mating cylinders
~B-0042 B66-10172 05
Epoxy-coated containers easily opened by wire band
~B-0031 B66-10174 05
Coating permits use of strain gage in water and liquid hydrogen
~B-0032 B66-10192 01
Pressure vessels fabricated with high-strength wire and electroformed nickel
~B-0028 B66-10218 05
Automatic reel controls filler wire in welding machines
~B-0029 B66-10236 05
Aluminum/steel wire composite plates exhibit high tensile strength
~B-0030 B66-10262 05
Fastener provides for bolt misalignment and quick release of flange
~B-0074 B66-10275 05
Inspection of fine wires simplified by capillary tube wire holder
~B-0031 B66-10329 01
Metal Oxide Silicon (MOS) transistors protected from destructive damage by wire
~B-0033 B66-10419 01
Silver-base ternary alloy proves superior for slip ring lead wires
~B-0031 B66-10540 03
Emergency escape system uses self-breaking mechanism on fixed cable
~B-0034 B66-10575 05
Electrical continuity scanner facilitates identification of wires for soldering to connectors
~B-0035 B66-10605 01
Improved memory word line configuration allows high storage density
~B-0036 B66-10617 01
Study of fast response thermocouple measurement of temperatures in cryogenic gases
~B-0037 B66-10661 01
Wire material reduces compressor blade vibration
~B-0038 LEWIS-357 B66-10666 03
Improved method of edge coating flat ribbon wire
~B-0039 B66-10684 03
Technique for stripping Teflon insulated wire
~B-0040 B66-10774 05
Holding fixture facilitates pipe thread gage measurements
~B-0041 B66-10866 03
Composite weld rod corrects individual filler weaknesses
~B-0042 B66-10868 04
Closed circuit TV system monitors welding operations
~B-0043 MSC-11002 B67-10162 01
Weld procedure produces quality welds for thick sections of Hastelloy-X
~B-0044 B67-10195 05
Traveling wire electrode increases productivity of Electrical Discharge Machining (EDM) equipment
~B-0045 ARG-136 B67-10238 05
Improved ultrasonic TV images achieved by use of Lamb-wave orientation technique
~B-0046 ARG-203 B67-10295 02
Method of improving contact bonds in silicon integrated circuits
~B-0047 B67-10335 01
Cut-through tester accurately measures insulation failure rates
~B-0048 B67-10354 01
Mechanical properties of wire insulation automatically determined
~B-0049 B67-10370 05
Automatic reel controls filler wire in welding machines
~B-0050 B67-10385 05
Method for making small pointed thermocouples
~B-0051 B67-10389 01
Novel terminal strips for transformers
~B-0052 B69-10246 01
Parameters for good welding of copper to nickel
~B-0053 B69-10302 05
An improved method for electrical cable terminations
~B-0054 B69-10327 01
Testing the flammability of materials exposed to arcs
~B-0055 B69-10531 03
Explosive bonding of metal-matrix composites
~B-0056 B69-10804 05
Thin-film gage measures low heat-transfer rates
~B-0057 LANGLY-205 B66-10180 01
Wide-range instrument monitors flow rates of chemically active fluids
~B-0058 MSC-186 B66-10205 01
Pulse technique provides more accurate checkout of exploding bridge wire device
~B-0059 HQ-62 B66-10561 01

I-738
WIRE WINDING

Wire mesh isolator protects sensitive electronic components
GSFC-347  B65-10216  05
Plated nickel wire mesh makes superior catalyst bed
BCS-216    B65-10321  03
Three-dimensional wire-mesh capacitor system measures fluid density
WGC-194    B65-10379  01
Strainer fits inside flared-tube fittings
LANGLEY-180 B65-10388  05
Concentric device separates liquid from gas
MSC-282    B65-10394  05
Frangible electrochemical cell and sealing technique
XGS-10101  B69-10056  01

WIRE WINDING

Wire winding increases lifetime of oxide coated cathodes
LERWS-154  B65-10032  03
Magnetic field test coils are temperature compensated
GSFC-294    B65-10081  02
Fiber glass parts cured during filament winding eliminates oven, saves time
8-PS-14     B65-10088  03
Automatic reel controls filler wire in welding machines
MSC-416     B66-10236  05
High transients suppressed in electromagnetic devices
MSC-66-13   B67-10031  01
Variable reluctance switch avoids contact corrosion and contact bounce
MSC-1178    B67-10137  01

WIRELESS COMMUNICATIONS

Phase shift frequency synthesizer is efficient, small in size
8-PS-250    B65-10169  01
Feasibility study of wireless power transmission systems
8-PS-14691  B68-10309  01

WIRING

Circuit reliability boosted by soldering pins of disconnect plugs to sockets
JPL-447     B66-10002  01
Modified RF coaxial connector ends vacuum chamber wiring problem
GSFC-150    B64-10010  01
Compact retractor protects cabling loops
8-PS-561    B66-10018  05
Copper wire plated with nickel and silver resists corrosion
8-PS-761    B66-10421  03
Electrical continuity scanner facilitates identification of wires for soldering to connectors
MSC-626     B66-10565  01
Instrument accurately measures small temperature changes on test surface
LANGLEY-174 B66-10637  01
Thermocouples easily installed in hard-to-get-to places
8-PS-1946   B66-10653  01
Logic circuitry used to automatically test shielded cables
8Q-60       B66-10659  01

Separable, high-density microelectronic module provides effective heat sink
8-PS-13075  B67-10356  01
Flat pack interconnection structure simplifies modular electronic assemblies
JPL-819     B67-10560  01
Multichannel wireway adapter box
MSC-30645   B66-10052  05
Nondestructive evaluation of printed wiring boards by microresistance measurements
SAN-10034   B69-10272  01
Pressure transducer
NPO-10853   B69-10364  01

WOOD

Cork is used to make tooling patterns and molds
MSC-425     B66-10328  01

WOODEN STRUCTURES

Built-in templates speed up process for making accurate models
LANGLEY-23  B63-10526  05
Nylon bit removes cork insulation without damage to substrate
MSC-381     B66-10152  05
Alignment tool facilitates pin placement on irregular horizontal surfaces
LANGLEY-219 B66-10410  05

WOOL

Thermally conductive metal wool-silicone rubber material can be used as shock and vibration dumper
JPL-321     B63-10207  03

WORDS (LANGUAGE)

Detection system ensures positive alarm activation in digital message loss
WOO-208     B66-10287  01

WORK

Work platform is supported by self-locking blades
8-PS-2297   B67-10180  05

WORK FUNCTIONS

Photoelectric scanner makes detailed work function maps of metal surface
JPL-SC-176  B66-10440  01
Thermionic scanner pinpoints work function of emitter surfaces
JPL-SC-177  B66-10444  01

WORK HARDENING

Study made of explosive cutting in simulated space environments
8-PS-1597   B67-10040  01
Possible correlation between work-hardening and fatigue-failure
ABG-10371  B69-10414  03

WRENCHES

Torque wrench designed for restricted areas
LEWIS-246   B66-10011  05
T-handle wrench has torque-limiting action
BSC-280     B66-10065  05
Torque wrench allows readings from inaccessible locations
8-PS-598    B66-10204  05
Tool enables proper mating of accelerometer
and cable connector
I-PS-611    B66-10208 05

Hand tool permits shrink sizing of assembled tubing
MSC-504    B66-10239 05

Pneumatic wrench retains or discharges nuts or bolts as desired
HY-0085    B66-10707 05

Single wrench separates nuts from free-floating bolts
MSC-10013  B67-10158 05

Ultrasonic wrench produces leaktight connections
I-PS-12561  B67-10353 05

Magnetically controlled torque wrench prevents overtorquing
SAM-10002  B68-10209 05

High-torque power wrench, a concept
I-PS-16194  B68-10299 05

Adjustable wrench for electronic connectors
I-PS-18547  B69-10184 05

One-handed hammer-spanner for chucks
I-PS-18581  B69-10398 05

Multi-purpose tool mitten
Eq-10047    B69-10483 05

MINING
Shell design computer program
LEWIS-10734  B69-10175 06

I X RAY ABSORPTION
Specimen holder design improves accuracy of X-ray powder analysis
JPL-SC-165  B66-10075 02

I X RAY ANALYSIS
Ceramic materials purified by experimental method
LEWIS-225    B65-10270 03

Specimen holder design improves accuracy of X-ray powder analysis
JPL-SC-165  B66-10075 02

Commercial film produces positive X-ray photo in ten seconds
I-PS-521    B66-10307 02

Reidentifying hardware after loss of serial number
I-PS-16133    B69-10059 05

Technique for pinpointing submicron particles in the electron microscope
Eq-10043    B69-10465 01

Improved camera for better X-ray powder photographs
Eq-10424    B69-10537 01

Use of medical and dental X-ray equipment for nondestructive testing
MSC-13389    B69-10553 01

I X RAY APPARATUS
Dielectric meter system for liquid hydrogen has high accuracy, fast response
I-PS-890    B66-10438 01

X-ray source uses interchangeable target anodes to vary X-ray wavelength
IPO-10036    B67-10218 02

Electron beam parallel X-ray generator
MSC-11022    B67-10372 02

Method for X-ray study under extreme temperature and pressure conditions
SUBJECT INDEX

X RAY SPECTROSCOPY
Glaning incidence telescope for far ultraviolet and soft X-rays
GSFC-10052 E67-10508 02
Imaging slitless spectrometer for X-ray astronomy
M-FS-14309 E68-10546 02
Nondispersive X-ray emission analysis for geological exploration
GSFC-10568 E69-10011 02

X RAY STRESS ANALYSIS
Ultrasonics used to measure residual stress
M-FS-12449 E67-10428 02

X RAY TELESCOPES
Imaging slitless spectrometer for X-ray astronomy
M-FS-14309 E68-10546 02
Selective vignetting of Type 1 X-ray telescopes
GSFC-10682 B69-10075 02

X RAYS
Precision gage measures ultrahigh vacuum levels
GSFC-114 E63-10597 01
Multiple element soft X-ray source produces wide range of radiation
GSFC-286 E65-10082 02
An improved soft X-ray photoionization detector
GSFC-540 E67-10072 02
Improved television signal processing system
EPO-10140 E67-10246 02
Training course for radiation safety technicians
ARG-216 E67-10477 02
Numerical least-square method for resolving complex pulse height spectra
GSFC-10142 E67-10048 06
Weld microfissuring in Inconel 718 minimized by minor elements
M-FS-18185 E68-10251 03
Notary-knife stripper facilitates removal of X-ray film from pack
M-FS-14837 E68-10509 05
Primary radical yields in pulse irradiated alkaline aqueous solution
ARG-10322 B69-10167 02
Preferred-orientation analysis of polycrystalline materials
NPO-10604 B69-10336 02
New shield for gamma-ray spectroscopy
ARG-10388 E69-10344 02
A simple electrometer for measuring small photoelectric currents
GSFC-10603 B69-10734 01

X-Y PLOTTERS
System remotely inspects, measures, and records internal irregularities in piping
M-FS-14545 E68-10149 01
Two devices for analysis of nystagmus
HQS-10273 B69-10224 01
Automated plotting of equipotentials
NFO-11134 E69-10570 01
Direct determination of lead-210 by liquid-scintillation counting
ARG-10462 E69-10611 03

XENON
Densitometer system for liquid hydrogen has high accuracy, fast response
M-FS-909 B66-10430 01
An improved soft X-ray photoionization detector
GSFC-540 B67-10072 02
High-temperature, gas-filled ceramic rectifiers, thyatron, and voltage-reference tubes
LEWIS-90271 B69-10376 01
XENON COMPOUNDS
Xenon forms stable compound with fluorine
ARG-4 E66-10467 03
Xenon fluoride solutions effective as fluorinating agents
ARG-217 B67-10133 03
Xenon fluorides show potential as fluorinating agents
ARG-113 B67-10185 03
Pure xenon hexafluoride prepared for thermal properties studies
ARG-10056 B67-10577 03
Metabolic and toxicological effects of water-soluble xenon compounds are studied
ARG-90239 B68-10076 04
XENON LAMPS
High-intensity flashing beacon powered by mercury cells
LANGLEY-8C B65-10361 01
Lamp enables measurement of oxygen concentration in presence of water vapor
BSC-10043 B67-10387 01
Laser action from a terbium beta-ketoenolate at room temperature
GSFC-10593 B69-10324 02

XEROGRAPHY
Shortened procedure for obtaining reproducible copies of 35 mm color slides
KSC-09957 B66-10560 02

XYLENE
Special coatings control temperature of structures
GSFC-444 B65-10337 03
Process produces chlorinated aromatic isocyanate in high yield
M-FS-1658 B66-10646 03

Y

YAGI ANTENNAS
Modified interelement spacing improves Yagi antenna array
LANGLEY-130 B65-10183 01

YAW
Knob linkage permits one-hand control of several operations
BSC-30 B65-10022 05
Developmental instrument supplies accurate attitude and attitude-rate data
HQ-57 B66-10607 01

YIELD STRENGTH
Novel shock absorber features varying yield strengths
BSC-63A B64-10138 03
Lightweight aluminum casting alloy is useful at cryogenic temperatures
Computer program simplifies selection of structural steel columns

Weldable aluminum alloy has improved mechanical properties

Tungsten fiber-reinforced copper composites form high strength electrical conductors

Treatment increases stress-corrosion resistance of aluminum alloys

Tests show that aluminum welds are improved by bead removal

Simplified method measures changes in tensile yield strength using least number of specimens

Magnesium-lithium alloys developed for low temperature use

Study made of ductility limitations of aluminum-silicon alloys

Study made of pneumatic high pressure piping materials /10,000 psi/

Improved thermal treatment of aluminum alloy 7075

Weld joint strength and mechanical properties in 2219-20083 aluminum alloy

Development of structural test articles from magnesium-lithium and beryllium

Apparatus permits flexure testing of specimens at cryogenic temperatures

Handtool facilitates extraction of circuit modular

Electron-beam deflection controlled by digital signals

Subminiature deflection circuit operates integrated sweep circuits in TV camera

Safety yoke would protect construction workers from falling

Refractory oxides evaluated for high-temperature use

High permeability semiconductors permit close-tolerance soldering

Study of yttrium iron garnet rods reveals new magnetostatic echo mode

Improved traveling wave maser amplifier

Vibration analysis utilizing Mossbauer effect

Taper diode controls switching of large direct currents

Purification train produces ultrapure hydrogen gas

Improved inorganic ion exchange membranes

Mole saw drill attachment has zero force reaction

Program computes zero lift wave drag of entire aircraft

Lightweight aluminum casting alloy is useful at cryogenic temperatures

Adhesive protective coatings plated on magnesium-lithium alloy

Hollow spherical rotors fabricated by electroplating

Use of steel and tantalum apparatus for molten Cd-Mg-Zn alloys

Efficient millimeter wave 1140 GHz diode for harmonic power generation

Magnesium-zinc reduction is effective in preparation of metals

Study made of resistance of stainless steels to zinc-vapor corrosion

Zinc-oxygen primary cell yields high energy density

Preparation of thorium magnesium-zinc reduction

Reduction by monovalent zinc, cadmium, and nickel cations

Metallic diffusion measured by a modified Knudsen technique

Improved anode design for metal-oxygen cells

New brazing alloy eliminates metal-stress cracking

YOKES

SUBJECT INDEX

Z

ZERO FORCE CURVES

ZERO LIFT

ZINC ALLOYS

New brazing alloy eliminates metal-stress cracking
Aluminum core structures brazed without use of flux
M-FS-659  B66-10360  05.

Solubility data are compiled for metals in liquid zinc
ARG-169  B67-10191  03.

Resistivity measurements of neutron-irradiated pure metals and Al-Zn alloys
ARG-10108  B68-10200  03.

ZINC COATINGS
Galvanic corrosion reduced in aluminum fabrications
M-FS-272  B65-10140  03.

ZINC COMPOUNDS
New method used to fabricate gallium arsenide photovoltaic device
MGC-002  B64-10019  01.

Inexpensive infrared source improvised from flashlight
M-FS-894  B66-10096  02.

White primer permits a corrosion-resistant coating of minimum weight
M-FS-304  B66-10207  03.

New class of compounds have very low vapor pressures
ARG-112  B67-10104  03.

Aggregation of metallochlorophylls - Examination by spectroscopy
ARG-10273  B69-10163  04.

ZINC OXIDES
Anodization process produces opaque, reflective coatings on aluminum
M-FS-348  B65-10336  03.

Pigmented coating resists thermal shock
JPL-SC-063  B65-10354  03.

Tool samples subsurface soil free of surface contaminants
MSC-10988  B67-10473  03.

Concept for improved vacuum pressure measuring device
M-FS-20172  B69-10421  02.

ZINC SELENIDES
Thin-film semiconductor rectifier has improved properties
MSC-207  B66-10012  01.

ZINC SULFIDES
Thermal neutron image intensifier tube provides brightly visible radiographic pattern
ARG-120  B67-10296  02.

Preparation of silver-activated zinc sulfide thin films
GSFC-10667  B68-10271  03.

ZIPPERS
A new method for fabrication of flexible vacuum purge jackets
M-FS-12646  B69-10564  03.

ZIRCALOYS (TRADEMARK)
Metal tube reducer is inexpensive and simple to operate
ARG-49  B67-10401  05.

ZIRCONATES
Phonocardiograph microphone is rugged and moistureproof
MSC-212  B66-10314  04.

ZIRCONIUM
Refractory oxides evaluated for high-temperature use
LANGLEY-121  B65-10167  03.

ZIRCONIUM COMPOUNDS
Hot-wire detector for chemically active materials used in gas chromatography
MSC-269  B66-10139  03.

New weldable high strength aluminum alloy developed for cryogenic service
M-FS-737  B66-10613  05.

Intergranular metal phase increases thermal shock resistance of ceramic coating
M-FS-1862  B66-10651  03.

Fluid-bed fluoride volatility process recovers uranium from spent uranium alloy fuels
ARG-232  B67-10032  03.

Extrusion of small-diameter, thin-wall tungsten tubing
LEWIS-90335  B67-10355  05.

Newly developed foam ceramic body shows promise as thermal insulation material at 3000 deg F
M-FS-11966  B67-10441  03.

Reaction of steam with polyethylene is studied
ARG-295  B67-10502  03.

Magnesium-zinc reduction is effective in preparation of metals
ARG-10050  B67-10579  03.

Studies in zirconium oxidation
ARG-10099  B69-10199  03.

High-speed camera synchronization
M-FS-18062  B68-10282  02.

Nickel-base superalloy's excellent properties promote its service to 2200 degrees F
LEWIS-10355  B66-10380  03.

High-emittance coatings on metal substrates
LEWIS-10325  B68-10381  03.

Silicon carbide diode for increased light output
M-FS-20663  B69-10096  01.

High strength, superplastic superalloy
LEWIS-10805  B69-10293  03.

Improved high-temperature-strength nickel-base superalloy
LEWIS-10874  B69-10352  03.

Improved inorganic ion exchange membranes
LEWIS-10737  B69-10451  03.

ZIRCONIUM ALLOYS
Nickel-base superalloys developed for high-temperature applications
LEWIS-226  B66-10222  03.

Brassing process provides high-strength bond between aluminum and stainless steel
M-FS-803  B66-10352  05.

Zirconium alloys with small amounts of iron and copper or nickel show improved corrosion resistance in superheated steam
ARG-226  B67-10050  03.

Superconductivity in zirconium-rhodium alloys
ARG-15223  B69-10010  03.

ZIRCONIUM COMPOUNDS
Protective coating withstands high temperature in oxidizing atmosphere
M-FS-529  B66-10044  03.

White primer permits a corrosion-resistant coating of minimum weight
M-FS-304  B66-10207  03.
ZIRCONIUM OXIDES

Ceramic-coated boat is chemically inert, provides good heat transfer
LANGLEY-90 B65-10063 05

Refractory oxides evaluated for high-temperature use
LANGLEY-121 B65-10167 03

Hydrogen-atmosphere induction furnace has increased temperature range
LEWIS-153 B66-10055 05

Fibers of newly developed refractory ceramics produced by improved process
WOO-109 B66-10196 03

Improved thermal insulation materials made of foamed refractory oxides
H-735 B66-10288 03

Oxide film on metal substrate reduced to form metal-oxide-metal layer structure
ARG-48 B67-10187 03

A method of determining combustion gas flow
H-PS-13757 B67-10455 03

Reinforced thermal-shock resistant ceramics
LEWIS-10376 B66-10085 03

ZONE MELTING

Single-crystal semiconductor films grown on foreign substrates
WOO-076 B66-10225 01

Process yield Co-Pe alloys with superior high temperature magnetic properties
LEWIS-333 B66-10535 03

Zone purification of potassium chloride
ARG-10377 B69-10241 03
### Cumulative Index to Tech Briefs

#### Issue 10

Oxygen-hydrogen torch is a small-scale Oculometer for remote tracking of eye movement. Positive and negative output circuits of pyrotechnics are promising materials for cryogenic structures. \textit{Rezaei, A.}

Corrosion of metal samples rapidly measured. Magnetic field mapper is simple to operate. \textit{Hailpern, K. N.}

Thin film thermal detector of tungsten is fast and precise. Liquid laser cavities are used for vanadium-20 \textit{Kosyrev, P. C.}

Electronically heated diaphragm eliminates use of pyrotechnics. Transistor circuit boosts pulse amplitude. \textit{Hetherington, R. P.}

Study made of dielectric properties of promising materials for cryogenic capacitors. Magnetic field mapper is simple to operate. \textit{Ratnas, S.}

Metallographic holding fixture permits polishing of soft metals on vibratory lapping machine. Ion plating technique improves thin film deposition. \textit{Hattori, T. C.}

Digital logic elements provide additional functions from analog input. J-leveling of pipe ends with a hand-held tool is a precision welding technique. \textit{Kath, S. T.}

Deployable lattice column is convenient to operate. Application of cryptanalytic techniques to the analysis of RIM space batteries. \textit{Rathbun, A. L.}

Insertion device for pressure testing is simple to operate. Point-source detection system rejects spatially extended radiation sources. \textit{Nakell, R. F., Jr.}

Mixing weld gases offers advantages. Special coatings control temperature of structures. \textit{Nay, B. W.}

Hydraulic fluid serves as mandrel for small diameter refractory tube drawing. Ductile mandrel and parting compound facilitate tube drawing. \textit{Haysfield, H. B.}

Metal tube reducer is inexpensive and simple to operate. Fabrication techniques developed for small-diameter, thin-wall tungsten and tungsten alloy tubing. \textit{Hagen, J. W.}

Consolidation and fabrication techniques for vanadium-20 \textit{Kosyrev, P. C.}

Separable, high-density microelectronic module provides effective heat sink. \textit{Mazer, L.}

Tester automatically checks paper tape punch and reader after maintenance. Liquid laser cavities are used for vanadium-20. \textit{Kosyrev, P. C.}

High-pass RF coaxial filter rejects dc and low frequency signals. Laser action from a terbium beta-ketocarbonate at room temperature. \textit{Nadd, J. I.}

Computer programs for calculation of ideal gas thermodynamic data. \textit{Carr, J. J.}

Electronic aperture control devised for solid state imaging system. Lateral PNP bipolar transistor with aiding field diffusions is simple to operate. \textit{Carney, H. J.}

Clamp provides efficient connection for high-density currents. Thermodynamic properties of saturated liquid parahydrogen charted for important temperature range. \textit{Carney, H. J.}

Machine tests slow-speed sliding friction in
Solid-film lubricant is effective at high temperatures in vacuum. Evaluation of lubricants for ball bearings at high temperatures. New solid lubricant designed for pressure switch applications. A novel liquid film lubricant has been developed for use at high temperatures, improving bearing life.

Cardiotachometer with linear beat-to-beat frequency response monitors cardiac activity. Computer program provides improved calibration of low-angle flowmeters. High-resolution gamma ray spectroscopy is used for trace level analysis of body fluids.

Vapor diffusion electrode improves fuel cell operation. New low-level a-c amplifier provides adjustable noise cancellation and automatic temperature compensation. Respiratory transfer value has fail-safe feature.

Modified procedure speeds camera copy layout for offset printing. Circuit switches latching relay in response to signals of different polarity. Improved adhesive for cryogenic applications cures at room temperature.

rubber-coated bellows improves vibration damping in vacuum lines. A theoretical model for determining turbine flowmeter sensitivity is developed. An economical method for the continuous production of iodine-123 is achieved.

Line adapter provides quick disconnect under moderate side loading
M-FS-2159 B67-10625 05

WOLK, G.
A new method for critical failure prediction of complex systems
M-FS-18133 B68-10252 02

WOLKIN, E. G.
Optical output enhances flowmeter accuracy
R-FS-482 B65-10395 02

WONG, R. Y.
Improved television signal processing system
MIO-10140 B67-10226 01

Electronic visualization of gas bearing behavior
LEWIS-10711 B69-10073 01

WOOG, K. D.
A sterilizable high-impact antenna
MIO-10231 B69-10697 01

WOOD, A. D.
Gage measures total radiation, including vacuum UV, from ionized high-temperature gases
XPB-09602 B69-10028 02

WOOD, C. M., JR.
Thread cutting with 3-axis N/C milling machine
LANGLEY-10017 B68-10055 06

WOOD, C. M.
Beryllium fastener technology
M-FS-20306 B69-10019 05

WOOD, G. M.
Rapid helium-air analyzer can measure other binary gas mixtures
LANGLEY-16 B63-10557 03

WOOD, L. B.
New computer system simplifies programming of mathematical equations
M-FS-441 B66-10361 01

WOOD, J. C.
Air sampler collects and protects minute samples
NQ-10037 B67-10661 01

WOODBURY, R. C.
Automatic Gaussian random-noise limiter
WPO-10169 B69-10349 01

WOODS, F. C.
Large volume continuous counterflow diazylizer has high efficiency
NQ-10055 B67-10395 04

WOODS, R. D.
Computer program TRACK performs transient and/or steady state thermal analysis with coupled fluid flow and heat conduction
EUC-10189 B68-10450 06

WOODWARD, R. C.
Computer program analyzes and designs supersonic wing-body combinations
ABC-10181 B68-10335 06

WOODWARD, O. E., JR.
Omnidirectional antennas transmit and receive over large bandwidth
MSC-436 B66-10133 01

WOOLF, R. C.
Tool samples subsurface soil free of surface contaminants
MSC-10988 B67-10473 05

WOOLSON, N. G.
Pulse generator using transistors and silicon controlled rectifiers produces high current pulses with fast rise and fall times
MSC-405 B66-10456 01

WOOSBERG, C. W., JR.
Asbestos and Inconel combined to form hot-gas seal
M-FS-18008 B68-10162 05

WORO, J. C.
Improved process for epitaxial deposition of silicon on prediffused substrates
M-FS-14910 B68-10390 03

WORO, J. L.
Method for reducing snap in magnetic amplifiers
LEWIS-10368 B68-10388 01

WOORDEN, B. W.
Effects of heat input rates on T-1 and T-1A steel welds
M-FS-2475 B67-10613 03

WHENNE, E. B.
Solenoid hammer valve developed for quick-opening requirements
LEWIS-10134 B67-10639 05

WHODE, R. E.
Effect of welding position on porosity formation in aluminum alloy welds
M-FS-2318 B67-10177 05

WELDING of AK50 and AM355 steel
M-FS-2314 B67-10292 05

WURSCHE, R. F.
Conceptual hermetically sealed elbow actuator
M-FS-14710 B68-10300 05

WULFF, J. C.
One hundred angstrom niobium wire
LEWIS-10128 B68-10279 03

WYSOCKI, J. J.
Simplified method introduces drift fields into cells
GSPC-272 B67-10102 03

YAGER, S. F.
Feed-thru flange is useful in vacuum equipment
EFS-10102 03

I-836

PERSONAL AUTHOR INDEX
applications to cryogenic temperatures
JPL-846
Combination double door high-vacuum valve
provides access to vacuum chamber
JPL-849
Feed-thru conduit minimizes heat pickup
JPL-847

YEAGER, R.
The compatible conversion system
M-PS-15010
B69-10031
06

YOUNG, J. B.
Noise figure measurement concept for
acoustic amplifiers
GSFC-10066
B68-10272
01

YOUNG, P. R.
Rapid helium-air analyzer can measure other
binary gas mixtures
LANCE-16
B63-10557
03

YUE, T. H.
Electrically controlled optical latch and
switch requires less current
JPL-SC-111
B68-10414
01

Improved method of fabricating planar gallium
arsenide diodes
XNP-04225
B69-10271
01

YOEDE, S. K.
Automatic transducer switching provides
accurate wide range measurement of pressure
differential
NAG-10001
B67-10540
01

YOUNG, A. L.
Semitoroidal-diaphragm cavitating valve
designed for bipropellant flow control
XNP-09704
B69-10016
05

ZEBAD, K. A.
Zirconium alloys with small amounts of iron
and copper or nickel show improved corrosion
resistance in superheated steam
AG-88
868-10045
03

ZIKIOTO, O.
Leak test for high-vacuum system
NPO-11228
B69-10723
05

ZUK, Y.
An unconventional magnetically-coupled
multivibrator
I-10126
B69-10031
01
ZELEZNIK, F. J.

Computer program determines chemical equilibria in complex systems
LEWIS-281  B66-10671  01

ZELLEH, J. E.
Low-cost, fast-response drive circuit for electromagnetic torque motors
LEWIS-10143  B66-10386  01

ZELLER, G. J.
Multipurpose instrumentation cable provides integral thermocouple circuit
NU-0101  B67-10046  01

High temperature thermocouple design provides gas cooling without increasing overall size of unit
NUC-10315  B67-10497  01

Vapor deposition process provides new method for fabricating high temperature thermocouples
NUC-10152  B67-10616  01

Thoriated tungsten tube provides improved high temperature thermocouple sheath
NUC-10145  B67-10627  03

Silicon solar cell monitors high temperature furnace operation
NUC-10163  B68-10148  01

ZELEN, T. Z.
Refractory oxide insulated thermocouple designed and analyzed for high temperature applications
ARG-10202  B69-10053  03

ZEIDEL, N. F. Y.
Aerodynamic forces of fluttering cylindrical and/or planar structures
N-PS-20497  B69-10781  02

ZBRTOSK, G.
Friction loading device enables accurate testing of brittle materials
NU-0051  B68-10345  05

ZIEGLER, P.
Cold machining of high density tungsten and other materials
ARG-10289  B69-10110  05

ZIMMERMANN, J. M.
Computer program simulates design, test, and analysis phases of sensitivity experiments
M-PS-1436  B67-10077  01

Computer program reduces calculation time of normal response functions
M-PS-1517  B67-10108  01

ZIMMERMANN, J. S.
Computer program conducts facilities utilization and occupancy survey
NPO-10326  B67-10476  06

Computer program conducts facilities utilization and occupancy survey
NPO-10438  B68-10137  06

ZIMMERMAN, T. A.
Rack mount device quickly inserts or extracts chassis units
MSC-264  B65-10385  05

ZIRIN, M. H.
Radon gas, useful for medical purposes, safely fixed in quartz
ARG-2  B66-10466  04

ZIRKE, H. M.
Surface irregularities detected by flare inspection instrument
N-PS-20517  B69-10152  01

ZOTTARELLI, L. J.
Current steering commutator offers versatility
JPL-612  B67-10410  01

Computer memory access technique
MPO-10201  B67-10585  01

ZUBER, N. E.
Schmitt trigger multivibrator
MSC-10955  B69-10143  01

SUCCAR, J. J.
Helmet system broadcasts
## Originator/Tech Brief Number Index

The left hand column identifies the originator number; to the right of each originator number is the Tech Brief number, e.g. 869-10063, followed by a two-digit number, e.g. 01, which identifies the subject category containing the entire citation.

NASA-Langley, 1970 – 34

I-877
"The aeronautical and space activities of the United States shall be conducted so as to contribute...to the expansion of human knowledge of phenomena in the atmosphere and space. The Administration shall provide for the widest practicable and appropriate dissemination of information concerning its activities and the results thereof."

—National Aeronautics and Space Act of 1958

NASA TECHNOLOGY UTILIZATION PUBLICATIONS

These describe science or technology derived from NASA's activities that may be of particular interest in commercial and other non-aerospace applications. Publications include:

TECH BRIEFS: Single-page descriptions of individual innovations, devices, methods, or concepts.

TECHNOLOGY SURVEYS: Selected surveys of NASA contributions to entire areas of technology.

OTHER TU PUBLICATIONS: These include handbooks, reports, conference proceedings, special studies, and selected bibliographies.

Technology Utilization publications are part of NASA's formal series of scientific and technical publications. Others include Technical Reports, Technical Notes, Technical Memorandums, Contractor Reports, Technical Translations, and Special Publications.

Details on their availability may be obtained from:
