Flight Rules
Critical Readiness Review

Increment 23/24
4 February 2010

E.Kim, F.Knudsen, S.Rice
Increment 23/24 CRR: Flight Rules

Medical Operations

**B13-152 Acoustic Constraints**
- Updated in 20A & 19A Annexes to incorporate T2 acoustic NCR
  - May not be necessary following SLM data take (occurred earlier this week)
  - Rule will be updated generically once Acoustic Working Group updates are vetted (will probably take longer than the SLM measurement)

**B13-113 IFM/Corrective Action Prioritization Due to Loss of Exercise Capability**
- Updates for prime and backup hardware for RS and USOS crew and updates definitions per GGR&C
  - Negotiations with the Program over the use of IRED
• B13-116 Constraints on Treadmill VIS Failure
  – Updated to require a contingency flight equipment hazard assessment before the bungee cords could be used to isolate a TVIS corner, in the event of a wire rope failure & no spares on board

• B13-201 Medical Management of ISS Fire/Smoke Response
  – Update in work: current draft rule to be reviewed at Air Quality Subgroup (AQS) TIM NET April.
    • Paragraph A: keep CSA-CP measurement requirement
    • Paragraph B: Half Mask donning requirement to be updated
**Increment 23/24 CRR: Flight Rules**

- ARED and T2 Exercise constraints Flight rules (flight and stage specific)
  - Protects hardware, station and crew
  - Published in 20A and 19A Annexes
  - Generic updates no longer expected for Volume C
  - New constraint for the move to Node 3: ISS reboost
  - Generic update for Volume B is TBD
    - Awaiting further generic updates prior to implementation in generic book
- FYI: B14 FR to be updated with requirement to sample crew sleep locations prior to receiving a “recommendation” from SRAG on where to sleep.
