Underwater...

..on the ground...

...through the air...

...and into space
Authority for NASA Health Care: Occupational Health

◆ **5 USC 7901**
  - The head of each agency of the Government of the United States may establish, within the limits of appropriations available, a health service program to promote and maintain the physical and mental fitness of employees under his jurisdiction.
  - A health service program is limited to
    1. treatment of on-the-job illness and dental conditions requiring emergency attention;
    2. pre-employment and other examinations;
    3. referral of employees to private physicians and dentists; and
    4. preventive programs relating to health.
Authority for NASA Health Care: Astronaut Health

- 31 USC 1301(a)
  - Appropriations shall be applied only to the objects for which the appropriations were made except as otherwise provided by law.

- US General Accounting Office, Principles of Federal Appropriations Law (the GAO Red Book)
  - The “Necessary Expense Doctrine”
Comprehensive Health Care for NASA Employees

- Federal Employees Health Benefits Program – administered by the US Office of Personnel Management
  - Health
  - Vision
  - Dental
  - Flexible spending accounts
  - Long term care
- TRICARE
  - Department of Defense personnel detailed to NASA
NASA Facilities and Clinics

18,500 Civil Service Employees Agency-Wide

Kennedy Space Center - NASA Principal Center for Occupational Health

Johnson Space Center - NASA Principal Center for Human Space Flight
**NASA Occupational Exposures (Ground Based)**

- Noise
- Fuels
- Solvents
- Paints
- Pyrotechnics/explosives
- Pressure changes
- Closed spaces
- Office ergonomics
- Heat/cold
- Heights
- Radiation, etc.
NASA Occupational Health Services (Ground Based)

- Occupational Medicine
  - Emergency care
  - Preventive health care
  - Occupational health monitoring
  - Limited treatment of occupational injury/illness

- Industrial Hygiene

- Employee Assistance Program

- Workers’ Compensation Program
NASA Occupational Health Clinics

NASA launch site uses DoD helicopters, ambulances and medical staff to cover visitors as well as the astronauts
NASA Medical Launch and Landing Support (Space Shuttle)
NASA Medical Launch and Landing Support (Space Shuttle)

KSC uses DOD helicopters and ambulances to cover visitors as well as the astronauts
The 2005 hurricane season will long be remembered both for the record-breaking number of early storms and the emergence of a powerful Category 5 hurricane in the central Gulf of Mexico—Hurricane Katrina.

Hurricane Katrina strengthened into a powerful Category Five hurricane with sustained winds of 180 mph. The storm came ashore hours after Katrina reached Category 4, with winds of 145 mph. As it gathered energy from warm water of the Gulf of Mexico, it continued on its path towards the Louisiana-Mississippi coastline.
The Space Environment

- 49,000,000 km
- 22 minute 1-way communication
- Circadian rhythms
- Vacuum
- Isolation & confinement
- Temperature extremes

- Water & food availability
- New geo-ecosystem
- Reduced gravity
- Fuel & oxygen
- Radiation

1 yr
Physiology of Spaceflight

- Psychological
- Neurosensory & Neuromotor
- Musculoskeletal
- Cardiovascular/Pulmonary
- Endocrine/Immune/Hematology
- Muscle
- Fluid Shifting
- Radiation
- Psychosocial/cultural
- Confinement

Microgravity
Johnson Space Center Flight Medicine Clinic

- Comprehensive health care for astronauts on active duty with NASA and limited health care for their dependents (space available basis)
- Longitudinal Study of Astronaut Health for all astronauts, active and former
  - Annual executive physical with examinations targeted to space exposures
  - Records of all episodes of health care
Medical Care in Space: Telemedicine Based
Delivery of Medical Care in Microgravity and Space
CPR in Space

ISS004-E-8510 (11 March 2002) --- Astronaut Carl E. Walz, Expedition Four flight engineer, performs cardio-pulmonary resuscitation (CPR) on a jerry-rigged “human chest” dummy in the Destiny laboratory on the International Space Station (ISS).

Communications Challenges

- IMAGE DEGRADATION
- INTERRUPTIONS
- DELAY (>2 sec.)

Future of Health Care in Space
NASA maintains on site occupational health clinics at all Centers and major facilities.

NASA maintains an on-site clinic that offers comprehensive health care to astronauts at the Johnson Space Center.

NASA deploys limited health care capability to space and extreme environments.

Focus is always on preventive health care.
