Title: MatLab Programming for Engineers Having No Formal Programming Knowledge

Abstract: MatLab is one of the most widely used very high level programming languages for Scientific and engineering computations. It is very user-friendly and needs practically no formal programming knowledge. Presented here are MatLab programming aspects and not just the MatLab commands for scientists and engineers who do not have formal programming training and also have no significant time to spare for learning programming to solve their real world problems. Specifically provided are programs for visualization. Also, stated are the current limitations of the MatLab, which possibly can be taken care of by Mathworks Inc. in a future version to make MatLab more versatile.

Linda Shaykhian is a Software Engineer with Engineering Directorate, NASA KSC. She has worked on numerous software projects at KSC.

Gholam "Ali" Shaykhian is a Software Engineer with Engineering Directorate, NASA KSC. Shaykhian has worked at KSC since 1986. He joined NASA in April 2000. He is a professional member of the American Society for Engineering Education (ASEE), serving as the Program Chair for the Minorities in Engineering Division of ASEE and is a senior member of the Institute of Electrical and Electronic (IEEE). He teaches graduate courses at Florida Institute of Technology, University College, Melbourne, Florida.
