**CHIMAERA System For Cloud Retrievals v 6.0.85**

NASA Goddard Space Flight Center, Greenbelt, MD 20771
*SSAI, Inc. Lanham, MD 20706
*USRA, Columbia, MD 21046
^Laboratory for Atmospheric and Space Physics, University of Colorado - Boulder, Boulder, CO 80303

CHIMAERA = Cross-platform HIgh Resolution Multi-instrument AtmosphERIC Retrieval Algorithms.

1km or 500m resolution

- Terra MODIS 2014 day 360 17:55 UTC
- Cloud Optical Thickness VNIR-2.1µm
- Cloud Effective Radius VNIR-2.1µm
- Cloud Optical Thickness VNIR-2.2µm
- Cloud Effective Radius VNIR-2.2µm

50m resolution

- ER-2 eMAS 2013.10.23 18:55 UTC
- Cloud Optical Thickness VNIR-2.1µm
- Cloud Effective Radius VNIR-2.1µm

3km resolution

- MSG SEVIRI 2009.08.17 12:00 UTC
- Cloud Optical Thickness VNIR-3.8µm
- Cloud Effective Radius VNIR-3.8µm

15m resolution

- Terra ASTER 2006.09.09 16:55 UTC
- Cloud Optical Thickness VNIR-2.1µm
- Cloud Effective Radius VNIR-2.1µm

800m resolution

- NPP VIIRS 2014 day 187 02:00 UTC
- Cloud Optical Thickness VNIR-2.1µm
- Cloud Effective Radius VNIR-2.1µm

50m resolution

- B200 AMS 2011.07.26 15:05 UTC
- Cloud Optical Thickness VNIR-2.1µm
- Cloud Effective Radius VNIR-2.1µm

- B200 AMS 2011.07.26 15:05 UTC
- Cloud Optical Thickness VNIR-2.1µm
- Cloud Effective Radius VNIR-2.1µm

- Terra MODIS 2014 day 360 17:55 UTC
- Cloud Optical Thickness VNIR-2.1µm
- Cloud Effective Radius VNIR-2.1µm

- MSG SEVIRI 2009.08.17 12:00 UTC
- Cloud Optical Thickness VNIR-3.8µm
- Cloud Effective Radius VNIR-3.8µm

- Terra ASTER 2006.09.09 16:55 UTC
- Cloud Optical Thickness VNIR-2.1µm
- Cloud Effective Radius VNIR-2.1µm

- NPP VIIRS 2014 day 187 02:00 UTC
- Cloud Optical Thickness VNIR-2.1µm
- Cloud Effective Radius VNIR-2.1µm

- ER-2 MASTER 2007.07.29 15:40 UTC
- Cloud Optical Thickness VNIR-2.1µm
- Cloud Effective Radius VNIR-2.1µm

Many instruments = One data format, one set of SDSs.
Ingest MODIS? Ingest everything, no code change.
Display MODIS? See everything, no code change.

- Have bands? Will retrieve!
- Variety of ancillary model data accepted: NCEP GDAS, ECMWF, GMAO GEOS-5
- Choice of CO2 slicing or Optimal Estimation for cloud top
- Standard operational MOD06 code executed
- Single shared core for all instruments supported provides for easy extension.
- User provides a data reader and any external lookup tables for the instrument and CHIMAERA does the rest
- User provides a new science algorithm that retrieves one pixel and CHIMAERA does the rest
- Runs natively on every operating system (Windows via Cygwin) that has a Fortran compiler

- AVIRIS and DSCOVR EPIC support
- Direct MPI execution for parallel machines
- Return of simulation data interface
- Retrieval algorithms other than standard MODIS cloud
  - GOES-R
  - PACE
