

**NASA Air Quality Applied Sciences Team (AQAST)
10th Semiannual Meeting
EPA, Research Triangle Park
Jan 5-7, 2016**

Oral Presentation

A Summary of OMI NO₂ Data for Air Quality Applications

Bryan N. Duncan, Lok N. Lamsal, Yasuko Yoshida, Anne M. Thompson
NASA Goddard Space Flight Center

As a member of NASA's Air Quality Applied Sciences Team (AQAST), I will update air quality managers on the status of various NASA satellite datasets that are relevant for air quality applications. I will also present a new website that contains NASA Aura OMI nitrogen dioxide data and shows US city trends and comparisons to EPA surface monitor data. Since this is the final AQAST meeting, I will summarize my contributions to AQAST over the last five years.
