Aeronautics, Space Exploration, and Sustainable Futures
For the first time, a NASA satellite has quantified in three dimensions how much dust makes the trans-Atlantic journey from the Sahara Desert the Amazon rainforest. Among this dust is phosphorus, an essential nutrient that acts like a fertilizer, which the Amazon depends on in order to flourish.

CALIPSO observes Saharan dust crossing the Atlantic Ocean

Kepler surveys our region of the Milky Way galaxy to discover hundreds of Earth-size and smaller planets in or near the habitable zone and determine what fraction of the hundreds of billions of stars in our galaxy host such worlds.

This animation shows an artistic concept of the planet Kepler-452b, the first near-Earth-size world to be found in the habitable zone of a star very similar to our Sun.

NASA Act (1958)

FUNCTIONS OF THE ADMINISTRATION

Sec. 203. (a) The Administration, in order to carry out the purpose of this Act, shall--

(1) plan, direct, and conduct aeronautical and space activities;

(2) arrange for participation by the scientific community in planning scientific measurements and observations to be made through use of aeronautical and space vehicles, and conduct or arrange for the conduct of such measurements and observations; and

(3) provide for the widest practicable and appropriate dissemination of information concerning its activities and the results thereof.
Sustainability Base

- 50,000 sq. ft. high-performance office building, ~220 occupants
- LEED Platinum certified
- Living laboratory for new technologies
