Introducing the:

ELECTRICAL, ELECTRONIC, AND ELECTROMECHANICAL (EEE) PARTS MANAGEMENT AND CONTROL REQUIREMENTS FOR SPACE FLIGHT HARDWARE & CRITICAL GROUND SUPPORT EQUIPMENT

...aka...The NASA EEE Parts Standard, NASA-STD 8739.10

Task Managed and Slides Prepared by Peter Majewicz
NASA LaRC

Slides Presented by Michael Sampson, NASA GSFC

To be presented by Michael J. Sampson at the 2016 NEPP Electronics Technology Workshop (ETW), Goddard Space Flight Center, Greenbelt, Maryland, June 13–16, 2016.
Current Policy Documents

- **NPD 8730.2 NASA Parts Policy**
  - Control Risk and Enhance Reliability
  - Covers
    - EEE Parts, Electronic Packaging and Interconnect Systems
    - Mechanical parts and Manufacturing Materials

- **NPR 8705.4 Risk Classification for NASA Payloads**
  - Appendix B: Guidance on acceptable risk levels
  - Appendix C: Recommended SMA – Related Requirements
    - Critical Single Point Failures
    - EEE Part Levels
    - Reliability

- **Center EEE Part Documents**
  - GSFC: EEE-INST-002
  - MSFC-STD-3012
  - Others

To be presented by Michael J. Sampson at the 2016 NEPP Electronics Technology Workshop (ETW), Goddard Space Flight Center, Greenbelt, Maryland, June 13–16, 2016.
5. RESPONSIBILITY

f. Program, project, and Government Furnished Equipment (GFE) managers shall:
(1) Develop and implement integrated parts management requirements, procedures, and plans (Requirement). Requirements for electrical, electronic and electromechanical (EEE) parts are found in the Electrical, Electronic, and Electromechanical (EEE) Parts Management and Control Requirements for Space Flight Hardware & Critical Ground Support Equipment, NASA-STD 8739.10.

f.(2)(b) Information and guidance concerning parts selection is provided on the NASA Parts Selection List (NPSL).

f.(4) Document the derating criteria for EEE parts (Requirement).

Points are now contained in the EEE Parts Standard...
Specific technical requirements are currently listed in the main body and attachments of the NASA Parts Policy, NPD 8730.2 (in violation of NPR 1400.1).

The Standard reflects current practices, instead of changing them. Most NASA Centers utilize local documents, but there is minimal consistency across the Agency.

Gap analysis clearly shows the differences that exist among the different NASA Centers and with respect to the NASA Parts Policy.

Once approved, the new standard can be referenced in contracts and agreements with organizations outside of NASA.
A Special “Thanks” to the Contributors

GSFC
- Michael Sampson
- Jay Brusse
- Bob Kichak

MSFC
- Pat Mcmanus
- Trent Griffin
- Angela Thoren

LaRC
- Peter Majewicz
- John Pandolf
- Yuan Chen

ARC
- Kuok Ling

GRC
- Edward Zampino
- Kristen Boomer
- Jeff Riddlebaugh

JPL
- Lori Risse

KSC
- Eric Denson

JSC
- Carlton Faller

Gap Analysis of Documents

Comparison of Agency and Center Documents

- Topics from all source documents used for cross-reference
- No one document covered all topics (portion shown below)
- Agency level documents had most gaps
- Goal was to make Agency level document that covered all topics

To be presented by Michael J. Sampson at the 2016 NEPP Electronics Technology Workshop (ETW), Goddard Space Flight Center, Greenbelt, Maryland, June 13–16, 2016.
Create Agency-Level Document

- Capture list of issues that must be addressed
- Single document referenced in Agency contracts
- Not overburden “higher risk” projects with excessive requirements
- Not require changes to Center documents

Maintain Center-to-Project relationship

- Center still has ample control
- Project still assumes the risk
Details

**Applicability**

- Flight hardware - Launch vehicles - Critical ground support equipment (GSE) - Critical ground test systems
- Category 1 and Category 2 projects as defined by NPR 7120.5, NASA Space Flight Program and Project Management Requirements
- Class A, B, C or D payloads as defined by NPR 8705.4, Risk Classification for NASA Payloads, Appendix A.

**Non – Applicability**

- Institutional projects as defined by NPR 7120.7, NASA Information Technology and Institutional Infrastructure Program and Project Requirements
- Research and Technology Development Programs and Projects as defined by NPR 7120.8, NASA Research and Technology Program and Project Management Requirements

**Tailoring**

- Individual NASA Centers may establish program/project-specific requirements and/or guidelines, as appropriate. To do this, individual provisions of this standard may be tailored (i.e., modified or deleted) by contract or program specifications to meet specific constraints and program/project needs.
- Formally documented as part of program or project requirements and approved by the Technical Authority in accordance with procedures in NPR 8715.3, NASA General Safety Program Requirements & and NASA-STD-8709.20, Management of Safety and Mission Assurance Technical Authority

To be presented by Michael J. Sampson at the 2016 NEPP Electronics Technology Workshop (ETW), Goddard Space Flight Center, Greenbelt, Maryland, June 13–16, 2016.
Every EEE part intended for use in space flight and critical ground support equipment shall be reviewed and approved for compatibility with the intended environment and mission life, as applicable.

Parts shall be selected so that flight hardware meets all performance and reliability requirements in the worst-case predicted mission environment.

### EEE Part Grade Description

Extensive qualification programs for manufacturers and individual parts along with qualified parts lists

- Similar to the DLA QML and QPL programs
- Space grade parts
- Includes periodic audits and process review
- Category 1 and Category 2 projects as defined by NPR 7120.5, NASA Space Flight Program and Project Management Requirements
- Class A, B, C or D payloads as defined by NPR 8705.4, Risk Classification for NASA Payloads, Appendix A.

Recommendation for NASA Projects/programs to review screening and qualification requirements
More Details…

- **Parts Assurance**
  - Qualification
    - Part Level
    - Assembly Level
  - Screening
  - Receiving and Inspection

- **Parts Selection**
  - Reliability
    - Criticality
  - Derating
  - Environment
    - Radiation
  - COTS / PEMS

- **Parts Management**
  - Procurement
  - Obsolescence
  - Counterfeit Avoidance

To be presented by Michael J. Sampson at the 2016 NEPP Electronics Technology Workshop (ETW), Goddard Space Flight Center, Greenbelt, Maryland, June 13–16, 2016.
Program / Project EEE Parts Management and Control Plan (EPMCP)

- Plan can be stand-alone documents of part of Project Product Assurance Plan
- Specific Issue Plans may be contained in EPMCP or stand alone doc’s

Parts Lists

- (EPARTS recommended)
- As Designed Parts List
- Approval Record
- As Built Parts List

Analyses

- Derating Analysis
- Parts Obsolescence
Specific Issue Plans

- Radiation Hardness Assurance Plan

- Counterfeit Control Plan

- Prohibited Materials Plan

- Red Plague Control Plan

Current Status

- Writing Draft Document - Complete
- Final Work-Group Review - Complete
- HQ OSMA Document Review – Complete
- Issuance of Document Number - Complete
- Agency-wide Stakeholder Review – In Progress
  - Review period extended to Wed, June 29, 2016
- Final Approval, Publishing and Publicizing
