EOS Terra Mission Summary

  - Mission extension through FY20
  - Senior Review submission delivered in Mar 2015

- **2015-16 Inclination Adjust Maneuvers**
  - Fall 2015 Inclination Maneuvers
    - IAM #42 - October 28th
  - Spring 2016 Inclination Maneuvers
    - IAM #43 - February 18th
      - Aborted – Terra to Safehold
    - IAM #44 – March 3rd
    - IAM #45 – March 11th
  - Fall 2016 Inclination Maneuvers
    - IAM #46 – October 20th

- **12/18/15**: Terra 16-Year Anniversary
  - 5-Year Design Life, 6 year goal
  - Reliability Estimates thru 2020+
  - Consumables through 2017+

- **Jan/Feb 2017**: EOS Flight Operations Annual Review #10
Terra Mission Overview

Terra Features

- **Launch Date:** December 18, 1999 (Atlas IIAS, VAFB)
- **Orbit:** 705 km, Sun-synchronous polar, 98.2° Inclination, 10:30 AM MLT descending node
- **Instrument Payload:**
  - ASTER (SWIR, TIR & VNIR) - Advanced Spaceborne Thermal Emission and Reflection Radiometer (Japan)
  - CERES (Fore & Aft) - Clouds and the Earth’s Radiant Energy System (USA – Langley)
  - MISR - Multi-angle Imaging Spectro-Radiometer (USA – JPL)
  - MODIS - Moderate Resolution Imaging Spectro-radiometer (USA – GSFC)
  - MOPITT - Measurement of Pollution in the Troposphere (Canada)
- **Project Management:** Earth Science Mission Operations (ESMO)
- **Spacecraft Flight Operations:** Contracted by GSFC to Honeywell / ASRC/JBS/AIMM team and supported by NASA NENs and TDRSS
- **Instrument Operations and Science Data processing:** Performed at respective Instrument Locations where developed
- **Mission Duration:** Successfully completed Prime mission of 5 years. Currently in Extended Operations.
- **Distributed Active Archive Centers:** LP DAAC – MODIS, ASTER; Langley DAAC – CERES, MISR, MOPITT

Science

- The primary objective of the Terra Mission is to simultaneously study clouds, water vapor, aerosol, trace gases, land surface and oceanic properties, as well as the interaction between them and their effect on the Earth’s energy budget and climate.
Terra Spacecraft Status

All subsystems on Primary Hardware except as noted

- **Command & Data Handling (CDH)** — **Nominal**
  - Solid State Recorder (SSR) — holds ~1 orbit of data
  - 10 of 58 SSR Printed Wire Assembly tripped off resulting in reduced recording capacity

- **Communications (COMM)** — **Nominal**
  - DAS Modulator Failure on 05/29/2008 (Operating on Redundant)
  - Use K-Band primarily, X-Band as needed for Science Playback

- **Electrical Power System (EPS)** — **Good**
  - Battery Cell and Heater Controller Anomaly (10/13/2009)
  - 1 of 24 Solar Panel Failed (9/24/2000)

- **Flight Software (FSW)** — **Nominal**

- **Guidance, Navigation & Control (GN&C)** — **Nominal**
  - Minor loss of sensitivity in SSSTs – updated tracker biases to compensate

- **Propulsion (PROP)** — **Nominal**

- **Thermal Control System (TCS)** — **Nominal**

- **Instruments (INST)** — **Nominal**
  - Only ASTER SWIR failed, all other instruments are taking science

</table>
**Lifetime Fuel Estimates**

**Terra Fuel Usage Comparison**

- **Baseline Fuel Reserve**: 45kgs
- **Proposed Fuel Reserve**: 12kgs

**Fuel Usage Approximations:**
- ~4 kg of fuel for every IAM
- ~0.15 kg of fuel for every DMU

![Graph showing fuel usage comparison over time](image)
Recent Activities

• Propulsive Maneuvers
  □ Inclination Adjust Maneuver (IAM) #43 on 02/18/16
    Aborted due to incorrect slew direction/Terra to Safehold
  □ Inclination Adjust Maneuver (IAM) #44 on 03/03/16
  □ Inclination Adjust Maneuver (IAM) #45 on 03/11/16
  □ Drag Make Up Maneuver (DMU) #96 executed on 04/14/16
  □ Drag Make Up Maneuver (DMU) #97 targeted for 09/14/16
  □ Inclination Adjust Maneuver (IAM) #46 currently targeted for 10/20/16

• Calibration Maneuvers
  □ MODIS Roll #160 executed on 01/28/16
  □ MODIS Roll #161 executed on 03/28/16
  □ MODIS Roll #162 executed on 04/27/16
  □ MODIS Roll #163 executed on 05/26/16
  □ MODIS Roll #164 executed on 06/24/16
  □ MODIS Roll #165 executed on 07/24/16
  □ MODIS Roll #166 planned for 08/22/16

• 01/27/16: EOS 2015 Annual Review
• 02/02/16: Terra Lunar Deep Space Calibration Full Team Simulation
• 02/09/16 – 02/11/16: ASTER Interface Meeting
• 02/18/16: Terra Safehold @ 14:33 GMT
• 02/22/16-03/02/16: Safehold Mode Recovery Activities
• 03/09/16 : Lunar Induced Solar Eclipse #37
• 06/06/16 – 06/09/16: ASTER Interface Meeting
• 07/14/16 – NAV Table Load issues due to double TDRS Station Keeping Maneuvers
Inclination Adjust Maneuvers

- Inclination Adjust Maneuvers used to maintain nominal spacecraft mean local time (descending node) of 10:30 AM
  - 02/18/2016 IAM #43 (320 sec burn) - ABORTED
  - 03/03/2016 IAM #44 (320 sec burn)
  - 03/11/2016 IAM #45 (320 sec burn)
  - 10/20/2016 IAM #46 (320 sec burn)

- Current predictions indicate need to perform 3 maneuvers per year
  - (2 in Spring, 1 in Fall) to maintain 10:30am +/- 1 minute goal

CARA Defines the 4 Tiers as: T1 – Notify (email/phone), T2 – Conduct Briefing, T3 – Plan Maneuver, T4 – Execute Maneuver

- **2005**: 4 HIEs – 1 Debris Avoidance Maneuver (DAM) performed on 10/21/2005: Terra vs. 14222 CA on 10/23
- **2006**: 1 HIE – 1 maneuver waived off due to CA. Maneuver originally planned for 01/12/2006: Terra vs. 1716 CA on 1/12@ 17:46z
- **2007**: 4 HIEs – 1 DAM performed on 06/22/2007: Terra vs. 31410 CA on 6/23
- **2008**: 2 HIEs – 1 DAM planned and waived off: Terra vs. 82832 CA on 10/28/2008 @ 06:17z
- **2009**: 2 HIEs – No DAMs planned or performed
- **2010**: 5 HIEs – 1 DAM performed on 01/22/2010: Terra vs. 34700 CA on 1/23 @ 20:46z
- **2011**: 20 HIEs – 2 DAM planned and waived off: (1) Terra vs. 26181 CA on 3/28/2011 @ 12:14z (2) Terra vs. 30440 Repeating CA 05/07-09/2011
- **2012**: 19 HIEs – 1 maneuver waived off due to CA. Maneuver originally planned for 05/31/2012: Terra vs. 37789 CA on 6/1 @ 22:49z
- **2013**: 17 HIEs – 7 that required significant action
- **2014**: 24 HIEs – 6 that required DAM execution or nominal maneuver waive-off and replan
- **2015**: 33 HIEs – 8 that required DAM execution or nominal maneuver waive-off and replanning
- **2016 thru present**: 7 High Interest Events (HIEs) – 0 that required DAM execution or nominal maneuver waive-off and replanning
Terra End-of-Mission Plan

Document Status

- Rev C - End-of-Mission Plan Document has been revised and submitted along with corresponding waivers to NASA HQ
- In process of updating Rev C to update numbers and regenerate waivers

Content

- Terra will continue normal operations through October 2020
- Once all non-reserved fuel has been used, MLT will be drifted to 10:15 AM
- Feb-Oct 2022, Terra exits constellation
- Remain fuel used to lower perigee prior to spacecraft passivation
- Plan is consistent with the revised Afternoon Constellation (A-Train) Operations Coordination Plan
- Pending NASA HQ Decision
## Future Plans

Summary

- Terra remains very healthy 16+ years into the mission
  - Electrical Power Subsystem performance has been stabilized following 2009 anomaly
  - Fuel Remaining to continue operations to 2020 and beyond

- Data Capture percentages continue at ~100%

- Collision Avoidance events continue to be part of routine ops

- End of Mission Plan yet to be finalized
  - Updated dates and analysis underway based on latest drag predicts
  - Waivers to be updated and resent through signature cycle
  - New options developed in case proposal is not approved
Additional Slides

- Orbit / Inclination / MLT Maintenance
- WRS Ground Track Error
- EPS Performance
Orbit/Inclination/MLT Maintenance

- **Requirement**: Mean Local Time (MLT) maintained between 10:15 and 10:45 measured at the Descending Node.
- **Goal**: Maintain Terra mean local time of the descending node (MLTDN) below 10:31.
- **Constraint**: OCO-2 has requested Terra maintain a MLT less than 10:31 for the duration of its lifetime to maintain a safe separation at the poles.
- **Requirement**: Maintain WRS-2 ground track error, 0 +/-20 km.
- **Requirement**: Maintain Frozen orbit with Argument of Perigee at 90 degrees +/-20 and Eccentricity of 0.0012 +/- 0.0004.
- **Constraint**: Maximum burn duration limited to 320 seconds by spacecraft manufacturer. Complete yaw slews and inclination maneuvers during spacecraft orbital night. Maneuver close to spring and fall equinox to maximize efficiency.
TERRA WRS Groundtrack Error at the Descending Node
(Maneuver planning targets included)
EPS Subsystem Performance

- **Bus Load: Nominal**
  - Average bus load: 2317 Watts
  - Average housekeeping current: 11.93 A
  - Total instrument current: 7.178 A

- **Battery Performance: Nominal with exception of anomalous BBAT condition**
  - BBAT cell #50 failed following IAM #24 on October 13 (DOY 286) 2009
    - BBAT Voltage Temperature curve changed to better reflect a failed cell
  - BBAT heater control electronics (HCE) anomaly occurred following IAM #24 on October 13 (DOY 286) 2009
    - Performed soft reset, power cycle, switching to redundant side and re-enabling one of the nonfunctioning heater groups to recover HCE functionality without success
    - At least 4 of 9 BBAT heater groups are no longer being controlled
    - Heater control setpoints to changed for controllable heater groups to reduce the thermal gradient
  - PBAT Charge/Discharge Ratio was reduced from 105% to 104% on April 25, 2013 in an effort to extend PBAT life
  - PBAT BPC Channel A Disabled January 14, 2014; increases BBAT cold temperatures due to increased discharge
  - PBAT Charge/Discharge Ratio was reduced from 104% to 103% on August 20, 2015 in an effort to extend PBAT life

- **Battery Temperatures: Nominal with exception of anomalous BBAT data**
  - PBAT and half of BBAT Battery temperatures are regulated by flight software to \(\approx -1^\circ C\) to \(\approx -5^\circ C\)
  - Almost half of BBAT cell temperatures are below normal (but stable) in the \(-5^\circ C\) to \(-13^\circ C\) range

- **Battery Voltages** (BBAT)
  - Minimum battery voltages at 66.07 Volts

- **Solar Array**
  - Last offset adjustment performed on July 6th 2016
  - Average drift rate for the month, +0.44 deg/day
  - Present offset drift rate is increasing

- **BBAT Cell with Lowest Temperature** (excluding Cell #50)
  - Cell #20/21: -10.31°C
  - Thermal Gradient(avg): 7.01°C
