S5: Information Technology For Science Missions

SUBTITLE

Presenter: Joe Coughlan (in place of Nikunj Oza)

MD: SMD
Date: 06/27/2017
TIME: 14:30 PDT

NOTE: All presentations will undergo a review by the MDL and then by ITAR/EAR.
Topic Overview

• Simulation
  — high-end computing

• Data
  — Observational, model, and/or simulation data
  — Transform into useful science, societal benefits

• Missions
  — Modeling for mission design
  — Decision support

• Generally: Information Technology to let humans spend more time doing science, less time doing “grunt work.”
NASA Needs (1)

• Increase “bang-for-the-buck” in NASA’s supercomputing investment through novel hardware and software technologies
  — Decrease the barriers to entry for prospective supercomputing users.
  — Minimize time-to-solution, cost for given level of supercomputing performance on NASA applications, increase efficiency

• Decision Support Tools to increase utilization and societal benefits of Earth science data
  — Component framework that can be used to build multiple remote sensing driven DSTs

• Science Data Processing, Discovery, and Analysis
  — Improvements needed for parallelization of analysis tools, improvement data management and file systems, and others.
• **Integrated Science Mission Modeling**
  — Improved modeling of the science mission targets and engineered systems to facilitate human mission design teams’ work

• **Fault Management (FM) Technologies**
  — Technologies to allow better estimation and control of FM complexity and development costs, improved FM designs, and accelerated advancement of FM tools and techniques
Role of Small Businesses

- Information Technology is widely used and developed
  - Universities
  - Small businesses
  - Large businesses
  - Research labs

- Many developments can be used for multiple problems, problem areas

- Desire for increased collaboration between government and businesses in “innovation space.”

- Science data and information have minimal sharing restrictions

The End

THANK YOU FOR YOUR PARTICIPATION!

NOTE: This presentation will be accessible through the Industry Day website.
